PACIFIC PREMIER BANCORP, INC. AND SUBSIDIARY  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
June 30, 2014  
(UNAUDITED)

Note 1 - Basis of Presentation

The consolidated financial statements include the accounts of Pacific Premier Bancorp, Inc. (the "Corporation") and its wholly owned subsidiaries, including Pacific Premier Bank (the "Bank") (collectively, the "Company," "we," "our" or "us"). All significant intercompany accounts and transactions have been eliminated in consolidation.

In the opinion of management, the consolidated financial statements contain all adjustments (consisting of normal recurring accruals) necessary to present fairly the Company's financial position as of June 30, 2014, December 31, 2013, and June 30, 2013, the results of its operations and comprehensive income for the three and six months ended June 30, 2014 and 2013 and the changes in stockholders' equity and cash flows for the six months ended June 30, 2014 and 2013. Operating results or comprehensive income for the three and six months ended June 30, 2014 are not necessarily indicative of the results or comprehensive income that may be expected for any other interim period or the full year ending December 31, 2014.

Certain information and note disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP") have been condensed or omitted pursuant to the rules and regulations of the Securities and Exchange Commission ("SEC"). The unaudited consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2013 (the "2013 Annual Report").

The Company accounts for its investments in its wholly owned special purpose entity, PPBI Trust I, under the equity method whereby the subsidiary's net earnings are recognized in the Company's statement of operations.

Note 2 – Recently Issued Accounting Pronouncements

Accounting Standards Adopted in 2014

In July 2013, the Financial Accounting Standards Board (the "FASB") issued Accounting Standards Update ("ASU") No. 2013-11, "Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists." The provisions of ASU No. 2013-11 require an entity to present an unrecognized tax benefit, or portion thereof, in the statement of financial position as a reduction to a deferred tax asset for a net operating loss carryforward or a tax credit carryforward, with certain exceptions related to availability. The Company adopted the provisions of ASU No. 2013-11 effective January 1, 2014. The adoption of ASU No. 2013-11 had no impact on the Company's Consolidated Financial Statements.

Accounting Standards Pending Adoption

In January 2014, the FASB issued ASU No. 2014-01, "Accounting for Investments in Qualified Affordable Housing Projects." ASU No. 2014-01 permits reporting entities to make an accounting policy election to account for their investments in qualified affordable housing projects using the proportional amortization method if certain conditions are met. Under the proportional amortization method, an entity amortizes the initial cost of the investment in proportion to the tax credits and other tax benefits received and recognizes the net investment performance in the income statement as a component of income tax expense. This new guidance also requires new disclosures for all investors in these projects. ASU No. 2014-01 is effective for interim and annual reporting periods beginning after December 15, 2014. Upon adoption, the guidance must be applied retrospectively to all periods presented. However, entities that use the effective yield method to account for investments in these projects before adoption may continue to do so for these pre-existing investments. The Company currently accounts for such investments using the effective yield method and plans to continue to do so for these pre-existing investments after adopting ASU No. 2014-01 on January 1, 2015. The Company expects investments made after January 1, 2015 to meet the criteria required for the proportional amortization method and plans to make such an accounting policy election. The adoption of ASU No. 2014-01 is not expected to have a material impact on the Company's Consolidated Financial Statements.

In January 2014, the FASB issued ASU No. 2014-04, "Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure." The objective of this guidance is to clarify when an in substance repossession or foreclosure occurs, that is, when a creditor should be considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan such that the loan receivable should be derecognized and the real estate property recognized. ASU No. 2014-04 states that an in substance repossession or foreclosure occurs, and a creditor is considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan, upon either (1) the creditor obtaining legal title to the residential real estate property upon completion of a foreclosure or (2) the borrower conveying all interest in the residential real estate property to the creditor to satisfy that loan through completion of a deed in lieu of foreclosure or through a similar legal agreement. Additionally, ASU No. 2014-04 requires interim and annual disclosure of both (1) the amount of foreclosed residential real estate property held by the creditor and (2) the recorded investment in consumer mortgage loans collateralized by residential real estate property that are in the process of foreclosure according to local requirements of the applicable jurisdiction. ASU No. 2014-04 is effective for interim and annual reporting periods beginning after December 15, 2014. The adoption of ASU No. 2014-04 is not expected to have a material impact on the Company's Consolidated Financial Statements.

### Note 3 – Significant Accounting Policies

**Certain Acquired Loans:** As part of business acquisitions, the Bank acquires certain loans that have shown evidence of credit deterioration since origination. These acquired loans are recorded at the allocated fair value, such that there is no carryover of the seller's allowance for loan losses. Such acquired loans are accounted for individually. The Bank estimates the amount and timing of expected cash flows for each purchased loan, and the expected cash flows in excess of the allocated fair value is recorded as interest income over the remaining life of the loan (accretable yield). The excess of the loan's contractual principal and interest over expected cash flows is not recorded (non-accretable difference). Over the life of the loan, expected cash flows continue to be estimated. If the present value of expected cash flows is less than the carrying amount, a loss is recorded through the allowance for loan losses. If the present value of expected cash flows is greater than the carrying amount, it is recognized as part of future interest income.

**Goodwill and Core Deposit Intangible:** Goodwill is generally determined as the excess of the fair value of the consideration transferred, plus the fair value of any noncontrolling interests in the acquiree, over the fair value of the net assets acquired and liabilities assumed as of the acquisition date. Goodwill and intangible assets acquired in a purchase business combination and determined to have an indefinite useful life are not amortized, but tested for impairment at least annually or more frequently if events and circumstances exist that indicate the necessity for such impairment tests to be performed. The Company has selected December 31 as the date to perform the annual

impairment test. Intangible assets with definite useful lives are amortized over their estimated useful lives to their estimated residual values. Goodwill is the only intangible asset with an indefinite life on our balance sheet.

Core deposit intangible assets arising from whole bank acquisitions are amortized on an accelerated method over their estimated useful lives, which range from 6 to 10 years.

Use of Estimates: The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements. Actual results could differ from those estimates. The allowance for loan losses, the fair value of stock-based compensation awards, the fair values of financial instruments and the status of contingencies are particularly subject to change.

#### Note 4 – Acquisitions

The Company accounted for the following transactions under the acquisition method of accounting which requires purchased assets and liabilities assumed to be recorded at their respective fair values at the date of acquisition. The Company determined the fair value of the core deposit intangible, securities and deposits with the assistance of third party valuations. The fair value of other real estate owned (“OREO”) was based on recent appraisals of the properties.

The estimated fair values in these acquisitions are subject to refinement as additional information relative to the closing date fair values become available through the measurement period, which can extend for up to one year after the closing date of the transaction. While additional significant changes to the closing date fair values are not expected, any information relative to the changes in these fair values will be evaluated to determine if such changes are due to events and circumstances that existed as of the acquisition date. During the measurement period, any such changes will be recorded as part of the closing date fair value.

#### Infinity Franchise Holdings Acquisition

On January 30, 2014, the Company completed its acquisition of Infinity Franchise Holdings, LLC (“Infinity Holdings”) and its wholly owned operating subsidiary Infinity Franchise Capital, LLC (“IFC” and together with Infinity Holdings, “IFH”), a national lender to franchisees in the quick service restaurant (“QSR”) industry, and other direct and indirect subsidiaries utilized in its business. The value of the total consideration paid for the IFH acquisition was \$17.4 million, which consisted of \$8.3 million paid in cash and the issuance of 562,469 shares of the Corporation’s stock, which was valued at \$16.02 per share as measured by the 10-day average closing price immediately prior to closing of the transaction.

The acquisition of IFH is expected to further diversify our loan portfolio with commercial and industrial and owner-occupied commercial real estate loans, to deploy excess liquidity into higher yielding assets, to positively impact our net interest margin and to further leverage our strong capital base. The QSR franchisee lending business is a niche market that we believe provides attractive growth opportunities for the Company in the future. IFH had no delinquent loans or adversely classified assets as of the acquisition date; and the acquisition is expected to be accretive to our 2014 earnings per share.

Goodwill in the amount of \$5.5 million was recognized in the IFH acquisition. Goodwill represents the future economic benefits arising from net assets acquired that are not individually identified and separately recognized and is attributable to synergies expected to be derived from the combination of the two entities. Goodwill recognized in this transaction is not deductible for income tax purposes.

The following table represents the assets acquired and liabilities assumed of IFH as of January 30, 2014 and the provisional fair value adjustments and amounts recorded by the Company in 2014 under the acquisition method of

accounting:

	IFH Book Value	Fair Value Adjustments	Fair Value
(dollars in thousands)			
<b>ASSETS</b>			
<b>ACQUIRED</b>			
Cash and cash equivalents	\$ 555	\$ -	\$ 555

Excess of assets acquired over liabilities assumed	\$ 12,652	\$ (814 )	11,838
Consideration paid			17,360
Goodwill recognized			\$ 5,522

### San Diego Trust Bank Acquisition

On June 25, 2013, the Company completed its acquisition of San Diego Trust Bank (“SDTB”) in exchange for consideration valued at \$30.6 million which consisted of \$16.2 million of cash and 1,198,255 shares of the Corporation’s common stock.

SDTB was a San Diego, California based state-chartered bank. The acquisition was an opportunity for the Company to acquire a banking network that complemented our existing banking franchise and expanded into a new market area. Additionally, the SDTB acquisition improved the Company’s deposit base by lowering our cost of deposits and providing an opportunity to accelerate future core deposit growth in the San Diego, California, market area.

Goodwill in the amount of \$5.6 million was recognized in the SDTB acquisition. Goodwill recognized in this transaction is not deductible for income tax purposes.

The following table represents the assets acquired and liabilities assumed of SDTB as of June 25, 2013 and the provisional fair value adjustments and amounts recorded by the Company in 2013 under the acquisition method of accounting:

	SDTB Book Value	Fair Value Adjustments	Fair Value
(dollars in thousands)			
<b>ASSETS</b>			
<b>ACQUIRED</b>			
Cash and cash equivalents	\$ 30,252	\$ -	\$ 30,252

Excess of assets acquired over liabilities assumed	\$ 22,361	\$ 2,687	25,048
Consideration paid			30,622
Goodwill recognized			\$ 5,574

## First Association Bank Acquisition

On March 15, 2013, the Company completed its acquisition of First Association Bank (“FAB”) in exchange for consideration valued as of the closing at \$57.9 million which consisted of \$43.0 million of cash and 1,279,217 shares of the Corporation’s common stock.

FAB was a Dallas, Texas, based bank which specialized in providing commercial banking services to home owner association (“HOA”) management companies throughout the United States. The FAB acquisition was an opportunity for the Company to acquire a highly efficient, consistently profitable and niche-focused business that complimented our banking franchise. Additionally, this acquisition improved the Company’s deposit base by lowering our cost of deposits and providing a platform to accelerate future core deposit growth from HOAs.

Goodwill in the amount of \$11.9 million was recognized in the FAB acquisition. Goodwill recognized in this transaction is not deductible for income tax purposes.

The following table represents the assets acquired and liabilities assumed of FAB as of March 15, 2013, the provisional fair value adjustments and amounts recorded by the Company in 2013 under the acquisition method of accounting:

	FAB Book Value	Fair Value Adjustments	Fair Value
ASSETS ACQUIRED (dollars in thousands)			
Cash and cash equivalents	\$ 167,663	\$ -	\$ 167,663
Investment securities	219,913	2,478	222,391
Loans, gross	26,264	158	26,422
Allowance for loan losses	(224 )	224	-
Core deposit intangible	-	1,930	1,930
Other assets	5,823	-	5,823
<b>Total assets acquired</b>	<b>\$ 419,439</b>	<b>\$ 4,790</b>	<b>\$ 424,229</b>
LIABILITIES ASSUMED			
Deposits	\$ 356,737	\$ 81	\$ 356,818
Borrowings	16,905	-	16,905
Deferred tax liability	-	3,918	3,918
Other Liabilities	536	-	536
<b>Total liabilities</b>	<b>374,178</b>	<b>3,999</b>	<b>378,177</b>

assumed			
Excess of assets acquired over liabilities assumed	\$ 45,261	\$ 791	46,052
Consideration paid			57,906
Goodwill recognized			\$ 11,854

There were no purchased credit impaired loans acquired from FAB, SDTB or IFH. For loans acquired from FAB, SDTB and IFH, the contractual amounts due, expected cash flows to be collected, interest component and fair value as of the respective acquisition dates were as follows:

	Acquired Loans		
	FAB	SDTB	IFH
	(dollars in thousands)		
Contractual amounts due	\$ 32,107	\$ 47,251	\$ 98,320
Cash flows not expected to be collected	-	-	-
Expected cash flows	32,107	47,251	98,320
Interest component of expected cash flows	5,685	4,529	19,487
Fair value of acquired loans	\$ 26,422	\$ 42,722	\$ 78,833

In accordance with generally accepted accounting principles, there was no carryover of the allowance for loan losses that had been previously recorded by FAB, SDTB or IFH.

The operating results of the Company for the six months ending June 30, 2014 include the operating results of FAB, SDTB and IFH since their respective acquisition dates. The following table presents the net interest and other income, net income and earnings per share as if the acquisitions of FAB, SDTB and IFH were effective as of January 1, 2014 and 2013. There were no material, nonrecurring adjustments to the pro forma net interest and other income, net income and earnings per share presented below:

Six months Ended  
June 30,  
2014 2013

Net interest and other income	\$38,891	\$35,903
---	----------	----------

Net income	\$6,894	\$1,961
---------------	---------	---------

Basic earnings per share	\$0.40	\$0.11
--------------------------------	--------	--------

Diluted earnings per share	\$0.40	\$0.10
----------------------------------	--------	--------

#### Note 5 – Investment Securities

At June 30, 2014, the Company had \$10.0 million in Federal Home Loan Bank (“FHLB”) stock, \$3.9 million in Federal Reserve Bank (“FRB”) stock, and \$4.5 million in other stock, all carried at cost. During the six months ended June 30, 2014, the FHLB has repurchased \$1.4 million of the Company’s excess FHLB stock through its stock repurchase program.

At June 30, 2014, mortgage-backed securities (“MBS”) with an estimated par value of \$67.0 million and a fair value of \$69.5 million were pledged as collateral for the Bank’s three reverse repurchase agreements which totaled \$28.5 million and HOA reverse repurchase agreements which totaled \$16.8 million.

The table below shows the number, fair value and gross unrealized holding losses of the Company’s investment securities by investment category and length of time that the securities have been in a continuous loss position.

	June 30, 2014						Total	Gross Unrealized

(dollars in thousands)

Any temporary impairment is a result of the change in market interest rates and not the underlying issuers' ability to repay. The Company has the intent and ability to hold these securities until the temporary impairment is eliminated. Accordingly, the Company has not recognized the temporary impairment in earnings.

Unrealized gains and losses on investment securities available for sale are recognized in stockholders' equity as accumulated other comprehensive income or loss. At June 30, 2014, the Company had accumulated other comprehensive loss of \$38,000, or \$22,000 net of tax, compared to accumulated other comprehensive loss of \$5.2 million, or \$3.1 million net of tax, at December 31, 2013.

#### Note 6 – Loans Held for Investment

The following table sets forth the composition of our loan portfolio in dollar amounts at the dates indicated:

	June 30, 2014	December 31, 2013	June 30, 2013
	(in thousands)		
Business loans:			
Commercial and industrial	\$ 319,541	\$ 187,035	\$ 146,240
Commercial owner occupied (1)	216,784	221,089	201,802
SBA	15,115	10,659	5,820
Warehouse facilities	114,032	87,517	135,317
Real estate loans:			
Commercial non-owner occupied	360,288	333,544	295,767
Multi-family	251,512	233,689	172,797
One-to-four family (2)	132,020	145,235	84,672
Construction	47,034	13,040	2,135
Land	6,271	7,605	10,438
Other loans	3,753	3,839	4,969
Total gross loans (3)	1,466,350	1,243,252	1,059,957
Less loans held for sale, net	-	(3,147 )	(3,617 )
Total gross loans held for investment	1,466,350	1,240,105	1,056,340
Less:			
Deferred loan origination costs (fees)	418	18	(910 )

and premiums (discounts), net			
Allowance for loan losses	(9,733 )	(8,200 )	(7,994 )
Loans held for investment, net	\$ 1,457,035	\$ 1,231,923	\$ 1,047,436

(1) Majority  
secured by  
real estate.

(2) Includes  
second trust  
deeds.

(3) Total gross loans for June 30, 2014 are net of (i) the unaccreted mark-to-market discounts on Canyon National Bank ("Canyon National") loans of \$1.6 million, on Palm Desert National Bank ("Palm Desert National") loans of \$2.0 million, and on SDTB loans of \$143,000 and (ii) the mark-to-market premium on FAB loans of \$41,000.

From time to time, we may purchase or sell loans in order to manage concentrations, maximize interest income, change risk profiles, improve returns and generate liquidity.

The Company makes residential and commercial loans held for investment to customers located primarily in California. Consequently, the underlying collateral for our loans and a borrower's ability to repay may be impacted unfavorably by adverse changes in the economy and real estate market in the region.

Under applicable laws and regulations, the Bank may not make secured loans to one borrower in excess of 25% of the Bank's unimpaired capital plus surplus and likewise in excess of 15% for unsecured loans. These loans-to-one borrower limitations result in a dollar limitation of \$51.5 million for secured loans and \$30.9 million for unsecured loans at June 30, 2014. At June 30, 2014, the Bank's largest aggregate outstanding balance of loans to one borrower was \$34.4 million of secured credit.

#### Purchased Credit Impaired

The following table provides a summary of the Company's investment in purchased credit impaired loans, acquired from Canyon National and Palm Desert National, as of the period indicated:

	June 30, 2014		
	Canyon	Palm	
	National	Desert	Total
	National	National	
Business loans:			
			(in thousands)

Commercial and industrial	\$ 85	\$ -	\$ 85
Commercial owner occupied	559	-	559
Real estate loans:			
Commercial non-owner occupied	982	-	982
One-to-four family	-	11	11
Total purchase credit impaired	\$ 1,626	\$ 11	\$ 1,637

On the acquisition date, the amount by which the undiscounted expected cash flows of the purchased credit impaired loans exceed the estimated fair value of the loan is the “accretable yield.” The accretable yield is measured at each financial reporting date and represents the difference between the remaining undiscounted expected cash flows and the current carrying value of the purchased credit impaired loan. At June 30, 2014, the Company had \$1.6 million of purchased credit impaired loans, none of which were placed on nonaccrual status.

The following table summarizes the accretable yield on the purchased credit impaired for the six months ended June 30, 2014:

	Six Months Ended June 30, 2014		
	Canyon National	Palm Desert National	Total
	(in thousands)		
Balance at the beginning of period	\$ 1,623	\$ 53	\$ 1,676
Accretion	(130 )	(1 )	(131 )
Disposals and other	(17 )	-	(17 )
Change in accretable yield	-	-	-
Balance at the end of period	\$ 1,476	\$ 52	\$ 1,528

## Impaired Loans

## Impaired Loans

	Contractual Unpaid Principal Balance	Recorded Investment	With Specific Allowance	Without Specific Allowance	Specific Allowance for Impaired Loans	Average Recorded Investment	Interest Income Recognized
June 30, 2013							
Business loans:							
Commercial and industrial	\$ 423	\$ 308	\$ 233	\$ 76	\$ 233	\$ 454	\$ 19
Commercial owner occupied	-	-	-	-	-	122	-
SBA	-	-	-	-	-	84	1
Real estate loans:							
Commercial non-owner occupied	531	450	-	450	-	1,254	3
Multi-family	1,046	1,035	-	1,035	-	217	2
One-to-four family	836	813	501	312	360	837	26
Totals	\$ 2,836	\$ 2,606	\$ 734	\$ 1,873	\$ 593	\$ 2,968	\$ 51

The Company considers a loan to be impaired when, based on current information and events, it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement or it is determined that the likelihood of the Company receiving all scheduled payments, including interest, when due is remote. The Company has no commitments to lend additional funds to debtors whose loans have been impaired.

The Company reviews loans for impairment when the loan is classified as substandard or worse, delinquent 90 days, or determined by management to be collateral dependent, or when the borrower files bankruptcy or is granted a troubled debt restructuring ("TDR"). Measurement of impairment is based on the loan's expected future cash flows discounted at the loan's effective interest rate, measured by reference to an observable market value, if one exists, or the fair value of the collateral if the loan is deemed collateral dependent. All loans are generally charged-off at such time the loan is classified as a loss. Valuation allowances are determined on a loan-by-loan basis or by aggregating loans with similar risk characteristics.

The following table provides additional detail on the components of impaired loans at the period end indicated:

June    December    June  
30,       31,       30,  
2014    2013    2013  
(in thousands)

Nonaccruing loans	\$1,345	\$ 2,239	\$1,969
Accruing loans	185	188	637
Total impaired loans	\$1,530	\$ 2,427	\$2,606

When loans are placed on nonaccrual status all accrued interest is reversed from earnings. Payments received on nonaccrual loans are generally applied as a reduction to the loan principal balance. If the likelihood of further loss is remote, the Company will recognize interest on a cash basis only. Loans may be returned to accruing status if the Company believes that all remaining principal and interest is fully collectible and there has been at least three months of sustained repayment performance since the loan was placed on nonaccrual.

The Company does not accrue interest on loans 90 days or more past due or when, in the opinion of management, there is reasonable doubt as to the collection of interest. The Company had impaired loans on nonaccrual status of \$1.3 million at June 30, 2014, \$2.2 million at December 31, 2013, and \$2.0 million at June 30, 2013. The Company had no loans 90 days or more past due and still accruing at June 30, 2014, December 31, 2013 or June 30, 2013.

The Company had no TDRs during the quarter ended June 30, 2014 and had one immaterial TDR outstanding related to a U.S. Small Business Administration (“SBA”) loan.

#### Concentration of Credit Risk

As of June 30, 2014, the Company’s loan portfolio was collateralized by various forms of real estate and business assets located principally in California. The Company’s loan portfolio contains concentrations of credit in multi-family real estate, commercial non-owner occupied real estate and commercial owner occupied business loans. The Bank maintains policies approved by the Bank’s Board of Directors (the “Bank Board”) that address these concentrations and continues to diversify its loan portfolio through loan originations, purchases and sales to meet approved concentration levels. While management believes that the collateral presently securing these loans is adequate, there can be no assurances that a significant deterioration in the California real estate market or economy would not expose the Company to significantly greater credit risk.

#### Credit Quality and Credit Risk Management

The Company’s credit quality is maintained and credit risk managed in two distinct areas. The first is the loan origination process, wherein the Bank underwrites credit quality and chooses which risks it is willing to accept. The second is in the ongoing oversight of the loan portfolio, where existing credit risk is measured and monitored, and where performance issues are dealt with in a timely and comprehensive fashion.

The Company maintains a comprehensive credit policy which sets forth minimum and maximum tolerances for key elements of loan risk. The policy identifies and sets forth specific guidelines for analyzing each of the loan products the Company offers from both an individual and portfolio wide basis. The credit policy is reviewed annually by the

Bank Board. The Bank's seasoned underwriters ensure all key risk factors are analyzed with nearly all underwriting including a comprehensive global cash flow analysis of the prospective borrowers. The credit approval process mandates multiple-signature approval by the management credit committee for every loan that requires any subjective credit analysis.

Credit risk is managed within the loan portfolio by the Company's Portfolio Management department based on a comprehensive credit and investment review policy. This policy requires a program of financial data collection and analysis, comprehensive loan reviews, property and/or business inspections and monitoring of portfolio concentrations and trends. The Portfolio Management department also monitors asset-based lines of credit, loan covenants and other conditions associated with the Company's business loans as a means to help identify potential credit risk. Individual loans, excluding the homogeneous loan portfolio, are reviewed at least biennially, and in most cases more often, including the assignment of a risk grade.

Risk grades are based on a six-grade Pass scale, along with Special Mention, Substandard, Doubtful and Loss classifications as such classifications are defined by the regulatory agencies. The assignment of risk grades allows the Company to, among other things, identify the risk associated with each credit in the portfolio, and to provide a basis for estimating credit losses inherent in the portfolio. Risk grades are reviewed regularly by the Company's Credit and Investment Review committee, and are reviewed annually by an independent third-party, as well as by regulatory agencies during scheduled examinations.

The following provides brief definitions for risk grades assigned to loans in the portfolio:

- Pass classifications represent assets with a level of credit quality which contain no well-defined deficiency or weakness.
- Special Mention assets do not currently expose the Bank to a sufficient risk to warrant classification in one of the adverse categories, but possess correctable deficiency or potential weaknesses deserving management's close attention.
  - Substandard assets are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. These assets are characterized by the distinct possibility that the Bank will sustain some loss if the deficiencies are not corrected. OREO acquired from foreclosure is also classified as substandard.
- Doubtful credits have all the weaknesses inherent in substandard credits, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.
- Loss assets are those that are considered uncollectible and of such little value that their continuance as assets is not warranted. Amounts classified as loss are promptly charged off.

The Portfolio Management department also manages loan performance risks, collections, workouts, bankruptcies and foreclosures. Loan performance risks are mitigated by our portfolio managers acting promptly and assertively to address problem credits when they are identified. Collection efforts are commenced immediately upon non-payment, and the portfolio managers seek to promptly determine the appropriate steps to minimize the Company's risk of loss. When foreclosure will maximize the Company's recovery for a non-performing loan, the portfolio managers will take appropriate action to initiate the foreclosure process.

When a loan is graded as special mention or substandard or doubtful, the Company obtains an updated valuation of the underlying collateral. If the credit in question is also identified as impaired, a valuation allowance, if necessary, is established against such loan or a loss is recognized by a charge to the allowance for loan losses ("ALLL") if management believes that the full amount of the Company's recorded investment in the loan is no longer collectable. The Company typically continues to obtain updated valuations of underlying collateral for special mention and classified loans on an annual basis in order to have the most current indication of fair value. Once a loan is identified as impaired, an analysis of the underlying collateral is performed at least quarterly, and corresponding

changes in any related valuation allowance are made or balances deemed to be fully uncollectable are charged-off.

The following tables stratify the loan portfolio by the Company's internal risk grading system as well as certain other information concerning the credit quality of the loan portfolio as of the periods indicated:

	Credit Risk Grades			Total Gross Loans

#### Note 7 – Allowance for Loan Losses

The Company's ALLL covers estimated credit losses on individually evaluated loans that are determined to be impaired as well as estimated credit losses inherent in the remainder of the loan portfolio. The ALLL is prepared using the information provided by the Company's credit and investment review process together with data from peer institutions and economic information gathered from published sources.

The loan portfolio is segmented into groups of loans with similar risk characteristics. Each segment possesses varying degrees of risk based on, among other things, the type of loan, the type of collateral, and the sensitivity of the borrower or industry to changes in external factors such as economic conditions. An estimated loss rate calculated using the Company's actual historical loss rates adjusted for current portfolio trends, economic conditions, and other relevant internal and external factors, is applied to each group's aggregate loan balances.

The following provides a summary of the ALLL calculation for the major segments within the Company's loan portfolio.

#### Owner Occupied Commercial Real Estate Loans, Commercial and Industrial Loans and SBA Loans

The Company's base ALLL factor for owner occupied commercial real estate loans, commercial business loans and SBA loans is determined by management using the Bank's actual trailing 36 month, 24 month, trailing 12 month and annualized trailing six month charge-off data. Adjustments to those base factors are made for relevant internal and

external factors. For owner occupied commercial real estate loans, commercial business loans and SBA loans, those factors include:

- Changes in national, regional and local economic conditions, including trends in real estate values and the interest rate environment,
  - Changes in the nature and volume of the loan portfolio, including new types of lending,
- Changes in volume and severity of past due loans, the volume of nonaccrual loans, and the volume and severity of adversely classified or graded loans, and
  - The existence and effect of concentrations of credit, and changes in the level of such concentrations.

The resulting total ALLL factor is compared for reasonableness against the 10-year average, 15-year average, and trailing 12 month total charge-off data for all Federal Deposit Insurance (“FDIC”) insured commercial banks and savings institutions based in California. This factor is applied to balances graded pass-1 through pass-5. For loans risk graded as watch or worse, progressively higher potential loss factors are applied based on management’s judgment, taking into consideration the specific characteristics of the Bank’s portfolio and analysis of results from a select group of the Company’s peers.

#### Multi-Family and Non-Owner Occupied Commercial Real Estate Loans

The Company's base ALLL factor for multi-family and non-owner occupied commercial real estate loans is determined by management using the Bank's actual trailing 36 month, 24 month, trailing 12 month and annualized trailing six month charge-off data. Adjustments to those base factors are made for relevant internal and external factors. For multi-family and non-owner occupied commercial real estate loans, those factors include:

- Changes in national, regional and local economic conditions, including trends in real estate values and the interest rate environment,
- Changes in volume and severity of past due loans, the volume of nonaccrual loans, and the volume and severity of adversely classified or graded loans, and
  - The existence and effect of concentrations of credit, and changes in the level of such concentrations.

The resulting total ALLL factor is compared for reasonableness against the 10-year average, 15-year average, and trailing 12 month total charge-off data for all FDIC-insured commercial banks and savings institutions based in California. This factor is applied to balances graded pass-1 through pass-5. For loans risk graded as watch or worse, progressively higher potential loss factors are applied based on management’s judgment, taking into consideration the specific characteristics of the Bank’s portfolio and analysis of results from a select group of the Company’s peers.

#### One-to-Four Family and Consumer Loans

The Company's base ALLL factor for one-to-four family and consumer loans is determined by management using the Bank's actual trailing 36 month, trailing 24 month, trailing 12 month and annualized trailing six month charge-off data. Adjustments to those base factors are made for relevant internal and external factors. For one-to-four family and consumer loans, those factors include:

- Changes in national, regional and local economic conditions, including trends in real estate values and the interest rate environment, and
-

Changes in volume and severity of past due loans, the volume of nonaccrual loans, and the volume and severity of adversely classified or graded loans.

The resulting total ALLL factor is compared for reasonableness against the 10-year average, 15-year average, and trailing 12 month total charge-off data for all FDIC-insured commercial banks and savings institutions based in California. This factor is applied to balances graded pass-1 through pass-5. For loans risk graded as watch or worse, progressively higher potential loss factors are applied based on management's judgment, taking into consideration the specific characteristics of the Bank's portfolio and analysis of results from a select group of the Company's peers.

#### Warehouse Facilities

The Company's warehouse facilities are structured as repurchase facilities, whereby we purchase funded one-to-four family loans on an interim basis. Therefore, the base ALLL factor for warehouse facilities is equal to that for one-to-four family and consumer loans as discussed above. Adjustments to the base factor are made for relevant internal and external factors. Those factors include:

- Changes in national, regional and local economic conditions, including trends in real estate values and the interest rate environment,
  - Changes in the nature and volume of the loan portfolio, including new types of lending, and
  - The existence and effect of concentrations of credit, and changes in the level of such concentrations.

The resulting total ALLL factor is compared for reasonableness against the 10-year average, 15-year average, and trailing 12 month total charge-off data for one-to-four family loans for all FDIC-insured commercial banks and savings institutions based in California. This factor is applied to balances graded pass-1 through pass-5. For loans risk graded as watch or worse, progressively higher potential loss factors are applied based on management's judgment, taking into consideration the specific characteristics of the Bank's portfolio and analysis of results from a select group of the Company's peers.

The following tables summarize the allocation of the ALLL as well as the activity in the ALLL attributed to various segments in the loan portfolio as of and for the three months ended for the periods indicated:

#### Note 8 – Subordinated Debentures

In March 2004, the Corporation issued \$10.3 million of Floating Rate Junior Subordinated Deferrable Interest Debentures (the “Subordinated Debentures”) to PPBI Trust I, which funded the payment of \$10.0 million of Floating Rate Trust Preferred Securities (“Trust Preferred Securities”) issued by PPBI Trust I in March 2004. The net proceeds from the offering of Trust Preferred Securities were contributed as capital to the Bank to support further growth. Interest is payable quarterly on the Subordinated Debentures at three-month LIBOR plus 2.75% per annum, for an effective rate of 2.98% per annum as of June 30, 2014.

The Corporation is not allowed to consolidate PPBI Trust I into the Company's consolidated financial statements. The resulting effect on the Company's consolidated financial statements is to report only the Subordinated Debentures as a component of the Company's liabilities.

#### Note 9 – Earnings Per Share

Basic earnings per share excludes dilution and is computed by dividing net income or loss available to common stockholders by the weighted average number of common shares outstanding for the period, excluding common shares in treasury. Diluted earnings per share reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted from the issuance of common stock that would then share in earnings and excludes common shares in treasury. Stock options exercisable for shares of common stock are excluded from the computation of diluted earnings per share if they are anti-dilutive due to their exercise price exceeding the average market price during the period.

The impact of stock options which are anti-dilutive are excluded from the computations of diluted earnings per share. The dilutive impact of these securities could be included in future computations of diluted earnings per share if the market price of the common stock increases. The following table sets forth the number of stock options excluded for the periods indicated:

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2014	2013	2014	2013
Stock options excluded	606,894	61,870	605,146	81,919

The following tables set forth the Company's unaudited earnings per share calculations for the periods indicated:

#### Note 10 – Fair Value of Financial Instruments

Fair value is the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Financial instruments are considered Level 1 when the valuation is based on quoted prices in active markets for identical assets or liabilities. Level 2 financial instruments are valued using quoted prices for similar assets or liabilities, quoted prices in markets that are not active, or models using inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Financial instruments are considered Level 3 when their values are determined using pricing models, discounted cash flow methodologies or similar techniques, and at least one significant model assumption or input is unobservable and when determination of the fair value requires significant management judgment or estimation.

Because no market exists for a significant portion of the Company's financial instruments, fair value estimates are based on judgments regarding current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the fair values presented. The following methods and assumptions were used by the Company to estimate the fair value of its financial instruments at June 30, 2014, December 31, 2013 and June 30, 2013:

Cash and due from banks – The carrying amounts of cash and short-term instruments approximate fair values and are classified as Level 1.

Securities Available for Sale – Where possible, the Company utilizes quoted market prices to measure debt and equity securities; such items are classified as Level 1 in the hierarchy and include equity securities, US government bonds and securities issued by federally sponsored agencies. When quoted market prices for identical assets are unavailable

or the market for the asset is not sufficiently active, varying valuation techniques are used. Common inputs in valuing these assets include, among others, benchmark yields, issuer spreads, forward mortgage-backed securities trade prices and recently reported trades. Such assets are classified as Level 2 in the hierarchy and typically include private label mortgage-backed securities and corporate bonds. Pricing on these securities are provided to the Company by a pricing service vendor. In the Level 3 category, the Company classifies securities that reflect other-than-temporary impairments (“OTTI”) based on a discounted cash flow of the security or a determination of fair value that requires significant management judgment or consideration.

FHLB, FRB, Other Stock – The carrying value approximates the fair value based upon the redemption provisions of the stock and are classified as Level 1.

Loans Held for Sale - The fair value of loans held for sale is determined, when possible, using quoted secondary-market prices. If no such quoted price exists, the fair value of a loan is determined using quoted prices for a similar asset or assets, adjusted for the specific attributes of that loan. Loans held for sale are classified as Level 2.

Loans Held for Investment— The fair value of loans, other than loans on nonaccrual status, was estimated by discounting the remaining contractual cash flows using the estimated current rate at which similar loans would be made to borrowers with similar credit risk characteristics and for the same remaining maturities, reduced by deferred net loan origination fees and the allocable portion of the allowance for loan losses. Accordingly, in determining the estimated current rate for discounting purposes, no adjustment has been made for any change in borrowers’ credit risks since the origination of such loans. Rather, the allocable portion of the allowance for loan losses is considered to provide for such changes in estimating fair value. As a result, this fair value is not necessarily the value which would be derived using an exit price. These loans are included within Level 3 of the fair value hierarchy. The carrying amount of accrued interest receivable approximates its fair value as a Level 1 classification.

OREO – OREO assets are recorded at the fair value less estimated costs to sell at the time of foreclosure. The fair value of OREO assets is generally based on recent real estate appraisals adjusted for estimated selling costs. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the appraisers to adjust for differences between the comparable sales and income data available. Such adjustments are typically significant and result in a Level 3 classification of the inputs for determining fair value.

Accrued Interest Receivable/Payable – The carrying amount approximates fair value and is classified as Level 1.

Deposit Accounts— The fair values estimated for demand deposits (interest and noninterest checking, passbook savings, and certain types of money market accounts) are, by definition, equal to the amount payable on demand at the reporting date (i.e., their carrying amounts) resulting in a Level 1 classification. Fair values for fixed-rate certificates of deposit are estimated using a discounted cash flow calculation that applies interest rates currently being offered on certificates to a schedule of the aggregate expected monthly maturities on time deposits in a Level 2 classification. The carrying amount of accrued interest payable approximates its fair value as a Level 1 classification.

FHLB Advances and Other Borrowings— For these instruments, the fair value of short term borrowings is estimated to be the carrying amount and is classified as Level 1. The fair value of long term borrowings and debentures is determined using rates currently available for similar borrowings or debentures with similar credit risk and for the remaining maturities and are classified as Level 2. The carrying amount of accrued interest payable approximates its fair value as a Level 1 classification.

Subordinated Debentures – The fair value of subordinated debentures is estimated by discounting the balance by the current three-month LIBOR rate plus the current market spread. The fair value is determined based on the maturity date as the Company does not currently have intentions to call the debenture and is classified as Level 2.

Edgar Filing: PACIFIC PREMIER BANCORP INC - Form 10-Q

Off-Balance Sheet Commitments and Standby Letters of Credit – The majority of the Bank’s commitments to extend credit carry current market interest rates if converted to loans. Because these commitments are generally unassignable by either the Bank or the borrower, they only have value to the Bank and the borrower. The notional amount disclosed for off-balance sheet commitments and standby letters of credit is the amount available to be drawn down on all lines and letters of credit. The cost to assume is calculated at 10% of the notional amount and is classified as Level 2.

Estimated fair values are disclosed for financial instruments for which it is practicable to estimate fair value. These estimates are made at a specific point in time based on relevant market data and information about the financial instruments. These estimates do not reflect any premium or discount that could result from offering the Company’s entire holdings of a particular financial instrument for sale at one time, nor do they attempt to estimate the value of anticipated future business related to the instruments. In addition, the tax ramifications related to the realization of unrealized gains and losses can have a significant effect on fair value estimates and have not been considered in any of these estimates.

The fair value estimates presented herein are based on pertinent information available to management as of the periods indicated.
