the leadership of the combined company following the closing of the proposed transaction. Words such as “believes,” “expects,” “anticipates,” “estimates,” “intends,” “plans,” “seeks,” “projects” or words of similar meaning, or future or conditional verbs, such as “will,” “should,” “would,” “could,” “may” or variations of such words and similar expressions are intended to identify such forward-looking statements, which are not statements of historical fact or guarantees or assurances of future performance.

However, the absence of these words or similar expressions does not mean that a statement is not forward-looking. Actual results could differ materially from those projected or forecast in the forward-looking statements. The factors that could cause actual results to differ materially include, without limitation, the following risks, uncertainties or assumptions: the satisfaction of the conditions precedent to the consummation of the proposed transaction, including, without limitation, the receipt of HFF stockholder and regulatory approvals on the terms desired or anticipated; unanticipated difficulties or expenditures relating to the proposed transaction, including, without limitation, difficulties that result in the failure to realize expected synergies, efficiencies and cost savings from the proposed transaction within the expected time period (if at all); potential difficulties in JLL’s and HFF’s ability to retain employees as a result of the announcement and pendency of the proposed transaction; JLL’s ability to obtain and maintain an investment grade credit rating and obtain financing on the anticipated terms and schedule; risks relating to the value of JLL’s shares to be issued in the transaction; disruptions of JLL’s and HFF’s current plans, operations and relationships with customers caused by the announcement and pendency of the proposed transaction; legal proceedings that may be instituted against JLL and HFF following announcement of the proposed transaction; and other factors described in JLL’s annual report on Form 10-K for the fiscal year ended December 31, 2018, which was filed with the Securities and Exchange Commission (the “SEC”) on February 26, 2019, HFF’s annual report for the fiscal year ended December 31, 2018, which was filed with the SEC on February 28, 2019, and other filings made by JLL and HFF from time to time with the SEC. The factors described in such SEC filings include, without limitation: the effect of political, economic and market conditions and geopolitical events; the logistical and other challenges inherent in operating in numerous different countries; the actions and initiatives of current and potential competitors; the level and volatility of real estate prices, interest rates, currency values and other market indices; the outcome of pending litigation; and the impact of current, pending and future legislation and regulation. Neither JLL nor HFF undertakes, and each of them expressly disclaims, any duty to update any forward-looking statement whether as a result of new information, future events or otherwise, except as required by law. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date hereof. 2

Non-GAAP measures for JLL Management uses certain non-GAAP financial measures to develop budgets and forecasts, measure and reward performance against those budgets and forecasts, and enhance comparability to prior periods. These measures are believed to be useful to investors and other external stakeholders as supplemental measures of core operating performance and include the following: (i) Fee revenue and Fee-based operating expenses (ii) Adjusted EBITDA and Adjusted EBITDA margin (iii) Adjusted net income attributable to common shareholders However, non-GAAP financial measures should not be considered

alternatives to measures determined in accordance with U.S. generally accepted accounting principles ("GAAP"). Any measure that eliminates components of a company's capital structure, cost of operations or investments, or other results has limitations as a performance measure. In light of these limitations, management also considers GAAP financial measures and does not rely solely on non-GAAP financial measures. Because the company's non-GAAP financial measures are not

calculated in accordance with GAAP, they may not be comparable to similarly titled measures used by other companies. Adjustments to GAAP Financial Measures Used to Calculate non-GAAP Financial Measures Gross Contract Costs represent certain costs associated with client-dedicated employees and third-party vendors and subcontractors and are indirectly reimbursed through the fee we receive. These costs are presented on a gross basis in Operating expenses with the corresponding fee in Revenue before reimbursements. However, as we generally earn little to no margin on such costs, excluding gross contract costs from both Fee revenue and Fee-based operating expenses more accurately reflects how the company manages its expense base and operating margins and also enables a more consistent performance assessment across a portfolio of contracts with varying payment terms and structures, including those with direct versus indirect reimbursement of such costs. Net Non-Cash Mortgage Servicing Rights ("MSR") and Mortgage Banking Derivative Activity consists of the balances presented within Revenue composed of (i) derivative gains/losses resulting from mortgage banking loan commitment and warehousing activity and (ii) gains recognized from the retention of MSR upon origination and sale of mortgage loans, offset by (iii) amortization of MSR intangible assets over the period that net servicing income is projected to be received. Non-cash derivative gains/losses resulting from mortgage banking loan commitment and warehousing activity are calculated as the estimated fair value of loan commitments and subsequent changes thereof, primarily represented by the estimated net cash flows associated with future servicing rights. MSR gains and corresponding MSR intangible assets are calculated as the present value of estimated cash flows over the estimated mortgage servicing periods. The above activity is reported entirely within Revenue of the Capital Markets service line of the Americas segment. Excluding net non-cash MSR and mortgage banking derivative activity reflects how the company manages and evaluates performance because the excluded activity is non-cash in nature. Impact of December 2017 Tax Cuts and Jobs Act Enactment reflects the transition tax on the deemed repatriated earnings of foreign subsidiaries and the remeasurement of U.S. deferred tax assets. The \$47.0 million of additional expense in 2018 represents the true-up to the provisional amounts recorded in 2017. Such activity is excluded as the amount relates predominantly to accumulated foreign earnings, net of tax credits, realized over many years with cash obligations to be paid over eight years beginning in 2019. Therefore, these amounts are not considered indicative of core operating results. Restructuring and Acquisition Charges primarily consist of: (i) severance and employment-related charges, including those related to external service providers, incurred in conjunction with a structural business shift, which can be represented by a notable change in headcount, change in leadership or transformation of business processes; (ii) acquisition and integration-related charges, including non-cash fair value adjustments to assets and liabilities recorded in purchase accounting such as earn-out liabilities and intangible assets; and (iii) lease exit charges. Such activity is excluded as the amounts are generally either non-cash in nature or the anticipated benefits from the expenditures would not likely be fully realized until future periods. Restructuring and acquisition charges are excluded from segment operating results and therefore not a line item in the segments' reconciliation to Adjusted EBITDA. Amortization of Acquisition-Related Intangibles, primarily composed of the estimated fair value ascribed at closing of an acquisition to assets such as acquired management contracts, customer backlog and trade name, is more notable following the company's increase in acquisition activity in recent years. Such activity is excluded as the change in period-over-period activity is generally the result of longer-term strategic decisions and therefore not necessarily indicative of core operating results. Gain on Disposition reflects the net gain recognized on the sale of a business in the Asia Pacific reporting segment. Given the low frequency of business disposals by the company historically, the gain directly associated with such activity is excluded as it is not considered indicative of core operating performance 17 .
