NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. BASIS OF PRESENTATION

The accompanying condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") for interim financial information and with the instructions in Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals and adjustments) considered necessary for a fair presentation of the condensed consolidated financial statements have been included. Results for interim periods should not be considered indicative of results to be expected for a full year. Reference should be made to the consolidated financial statements and notes thereto contained in our Annual Report on Form 10-K for the fiscal year ended February 22, 2013 ("Form 10-K"). The Condensed Consolidated Balance Sheet as of February 22, 2013 was derived from the audited Consolidated Balance Sheet included in our Form 10-K.

As used in this Quarterly Report on Form 10-Q ("Report"), unless otherwise expressly stated or the context otherwise requires, all references to "Steelcase," "we," "our," "Company" and similar references are to Steelcase Inc. and its subsidiaries in which a controlling interest is maintained. Unless the context otherwise indicates, reference to a year relates to the fiscal year, ended in February of the year indicated, rather than a calendar year. Additionally, Q1, Q2, Q3 and Q4 reference the first, second, third and fourth quarter, respectively, of the fiscal year indicated. All amounts are in millions, except share and per share data, data presented as a percentage or as otherwise indicated.

2. NEW ACCOUNTING STANDARDS

In February 2013, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update 2013-02, Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income. The guidance requires an entity to present significant amounts reclassified out of accumulated other comprehensive income by the respective line items of net income if the amount is reclassified to net income in its entirety in the same reporting period. This presentation may be either on the face of the statement where net income is presented or as a separate disclosure in the notes to the financial statements. For other significant amounts not required to be reclassified in their entirety to net income in the same reporting period, a cross reference to other disclosures that provide additional detail about the reclassification amounts is required. The Company adopted these provisions in Q1 2014, applied prospectively. This update impacts disclosures only, and therefore adoption did not have an impact on our consolidated financial position, results of operations or cash flows. The disclosures required by this update are included in Note 4.

In July 2012, the FASB amended Accounting Standards Codification ("ASC") 350, Intangibles — Goodwill and Other. This amendment is intended to reduce the cost and complexity of the annual impairment test for indefinite-lived intangible assets other than goodwill by providing entities an option to perform a qualitative assessment to determine whether further impairment testing is necessary. The Company adopted the amended provisions in Q1 2014. This amendment impacts impairment testing steps only, and therefore adoption did not have an impact on our consolidated financial position, results of operations or cash flows.

3. EARNINGS PER SHARE

Earnings per share is computed using the two-class method. The two-class method determines earnings per share for each class of common stock and participating securities according to dividends or dividend equivalents and their respective participation rights in undistributed earnings. Participating securities include performance units and restricted stock units in which the participants have non-forfeitable rights to dividend equivalents during the performance period. Diluted earnings per share includes the effects of certain performance units in which the participants have forfeitable rights to dividend equivalents during the performance period.

5. FAIR VALUE

The carrying amounts for many of our financial instruments, including cash and cash equivalents, accounts and notes receivable, accounts and notes payable, short-term borrowings and certain other liabilities, approximate their fair value due to their relatively short maturities. Our short-term investments, foreign exchange forward contracts and long-term investments are measured at fair value on the Condensed Consolidated Balance Sheets.

Our total debt is carried at cost and was \$288.4 and \$289.0 as of May 24, 2013 and February 22, 2013, respectively.

The fair value of our total debt is measured using a discounted cash flow analysis based on current market interest rates for similar types of instruments and was approximately \$323 and \$321 as of May 24, 2013 and February 22, 2013, respectively.

We periodically use derivative financial instruments to manage exposures to movements in interest rates and foreign exchange rates. The use of these financial instruments modifies the exposure of these risks with the intention to reduce our risk of short-term volatility. We do not use derivatives for speculative or trading purposes.

7. STOCK INCENTIVE PLAN

Performance Units

In Q1 2014, we awarded 419,724 performance units ("PSUs") to our executive officers. Of the PSUs awarded, 209,862 units are earned after a three-year performance period, from 2014 through 2016, based on our total shareholder return relative to a comparison group of companies, which is a market condition, and, if earned, will be issued in the form of shares of Class A Common Stock. The number of shares that may be earned can range from 0% to 200% of the target amount; therefore, the maximum number of shares that can be issued under this award is 419,724. These PSUs are expensed and recorded in Additional paid-in capital on the Condensed Consolidated Balance Sheets over the performance periods. We used the Monte Carlo simulation model to calculate the fair value of these PSUs on the date of grant. The model resulted in a weighted average grant date fair value of \$15.51 per unit for these PSUs, compared to \$11.92 and \$16.56 per unit for PSUs granted in 2013 and 2012, respectively. The weighted average grant date fair values were determined using the following assumptions:

	2014 Awards	2013 Awards	2012 Awards	
Three-year risk-free interest rate (1)	0.3	% 0.5	% 1.4	%
Expected term	3 years	3 years	3 years	
Estimated volatility (2)	44.7	% 49.8	% 50.9	%

(1) Based on the U.S. government bond benchmark on the grant date.

(2) Represents the historical price volatility of the Company's common stock for the three-year period preceding the grant date.

The remaining 209,862 PSUs awarded during Q1 2014 are earned after a three-year performance period, from 2014 through 2016, based on our three-year average return on invested capital, which is a performance condition, and, if earned, will be issued in the form of shares of Class A Common Stock. The number of shares that

Table of Contents

STEELCASE INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

may be earned can range from 0% to 200% of the target amount, therefore the maximum number of shares that can be issued under this award is 419,724. These units are expensed and recorded in Additional paid-in capital on the Condensed Consolidated Balance Sheets over the performance periods based on the probability that the performance condition will be met. The expense recorded will be adjusted as the estimate of the total number of PSUs that will ultimately be earned changes. The weighted average grant date fair value of these PSUs was \$12.66. The fair value is equal to the closing stock price on the date of grant.

For all PSUs awarded in Q1 2014, dividend equivalents are calculated based on the actual number of shares earned at the end of the performance period equal to the dividends that would have been payable on the earned shares had they been held during the entire performance period as Class A Common Stock. At the end of the performance period, the dividend equivalents are paid in the form of cash or Class A Common Stock at the discretion of the Board of Directors. In addition, these awards will be forfeited if the participant leaves the Company for reasons other than retirement, disability or death or if the participant engages in any competition with us, as defined in the plan and determined by the Administrative Committee in its discretion. If a change in control occurs at least six months following the award date, the target awards will be deemed to be earned and a pro rata number of units will be vested and paid based upon the length of time within the performance period which has elapsed prior to the effective date of the change in control.

The total PSU expense and associated tax benefit for all outstanding awards for the three months ended May 24, 2013 and May 25, 2012 are as follows:

	Three Months Ended	
	May 24, 2013	May 25, 2012
Performance Units		
Expense	\$5.2	\$3.4
Tax benefit	2.0	1.3

The PSU activity for the three months ended May 24, 2013 is as follows:

Maximum Number of Shares That May Be Issued Under Nonvested Units	Total	Weighted-Average Grant Date Fair Value per Unit
Nonvested as of February 22, 2013	1,932,030	\$13.96
Granted	839,448	14.08
Nonvested as of May 24, 2013	2,771,478	\$14.00

As of May 24, 2013, there was \$4.9 of remaining unrecognized compensation cost related to nonvested PSUs, which is expected to be recognized over a remaining weighted-average period of 2.1 years.

Restricted Stock Units

In Q1 2014, we awarded 803,993 restricted stock units ("RSUs"), of which 171,775 were awarded to our executive officers. These RSUs have restrictions on transfer, the majority of which lapse three years after the date of grant, at which time the units will be issued as unrestricted shares of Class A Common Stock. Holders of RSUs receive cash dividends equal to the dividends we declare and pay on our Class A Common Stock, which are included in Dividends paid on the Condensed Consolidated Statements of Cash Flows. These awards are subject to forfeiture if a participant leaves our company for reasons other than retirement, disability, death or termination by us without cause prior to the vesting date. RSUs are expensed and recorded in Additional paid-in capital on the Condensed Consolidated Balance Sheets over the requisite service period based on the value of the underlying shares on the grant date.

The RSU expense and associated tax benefit for all outstanding awards for the three months ended May 24, 2013 and May 25, 2012 are as follows:

8. REPORTABLE SEGMENTS

Our reportable segments consist of the Americas segment, the EMEA segment and the Other category. Unallocated corporate expenses are reported as Corporate.

As of November 23, 2012, we realigned portions of our reportable segments for financial reporting purposes as a result of the integration of the PolyVision global technology business into the Steelcase Education Solutions group. Prior to this change, the PolyVision global technology business was combined with the PolyVision surfaces business and was reported collectively as PolyVision in the Other category along with Asia Pacific and Designtex. As a result of these changes, the results of the PolyVision technology business are now reported in the Americas and EMEA segments. The PolyVision surfaces business remains in the Other category. Similarly, amounts in the prior years' financial statements have been reclassified to conform to the new segment presentation.

The Americas segment serves customers in the U.S., Canada and Latin America with a portfolio of integrated architecture, furniture and technology products marketed to corporate, government, healthcare, education and retail customers through the Steelcase, Coalesse, Details, Nurture by Steelcase and Turnstone brands.

The EMEA segment serves customers in Europe, the Middle East and Africa primarily under the Steelcase and Coalesse brands, with an emphasis on freestanding furniture systems, storage and seating solutions.

The Other category includes Asia Pacific, Designtex and PolyVision. Asia Pacific serves customers in Asia and Australia primarily under the Steelcase brand with an emphasis on freestanding furniture systems, storage and seating solutions. Designtex designs and sells surface materials including textiles and wall coverings which are specified by architects and designers directly to end-use customers primarily in North America. PolyVision manufactures ceramic steel surfaces for use in multiple applications, but primarily for sale to third-party fabricators to create static whiteboards sold in the primary and secondary education markets in the U.S. and Europe.

Corporate costs include unallocated portions of shared service functions such as information technology, human resources, finance, executive, corporate facilities, legal and research.

9. RESTRUCTURING ACTIVITIES

In Q1 2014, we announced restructuring actions in EMEA to improve our global competitiveness by reorganizing the sales, marketing and support functions in France. We currently estimate the cash restructuring costs associated with these actions will be approximately \$5, with approximately \$4 related to employee termination costs and approximately \$1 of business exit and other related costs. We incurred \$1.8 of employee termination costs and \$0.3 of business exit and other related costs in the EMEA segment during the three months ended May 24, 2013.

In Q2 2013, we announced plans to integrate PolyVision's global technology business into the Steelcase Education Solutions group. We incurred \$0.9 of business exit and other related costs in the Americas segment during the three months ended May 24, 2013. These restructuring actions are now substantially complete.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations:

This management's discussion and analysis of financial condition and results of operations should be read in conjunction with our Annual Report on Form 10-K for the fiscal year ended February 22, 2013. Reference to a year relates to the fiscal year, ended in February of the year indicated, rather than the calendar year, unless indicated by a specific date. Additionally, Q1, Q2, Q3 and Q4 reference the first, second, third and fourth quarter, respectively, of the fiscal year indicated. All amounts are in millions, except share and per share data, data presented as a percentage or as otherwise indicated.

Non-GAAP Financial Measures

This item contains certain non-GAAP financial measures. A "non-GAAP financial measure" is defined as a numerical measure of a company's financial performance that excludes or includes amounts so as to be different than the most directly comparable measure calculated and presented in accordance with GAAP in the condensed consolidated statements of income, balance sheets or statements of cash flows of the company. Pursuant to the requirements of Regulation G, we have provided a reconciliation below of non-GAAP financial measures to the most directly comparable GAAP financial measure.

The non-GAAP financial measures used are: (1) organic revenue growth (decline), which represents the change in revenue excluding estimated currency translation effects and the impacts of acquisitions and divestitures, and (2) adjusted operating income (loss), which represents operating income (loss) excluding restructuring costs. These measures are presented because management uses this information to monitor and evaluate financial results and trends. Therefore, management believes this information is also useful for investors.

Overview						

In Q1 2014, we experienced an organic revenue decline of 1% compared to the prior year. The prior year included \$20 of revenue from two particularly large projects in the energy sector. The Americas posted organic revenue growth of less than 1% over the prior year, marking its thirteenth consecutive quarter of organic growth but representing a lower level of growth than the segment has experienced over that period. However, Q1 2014 orders grew approximately 7% over the prior year, and order patterns during the quarter resulted in a customer backlog at the end of the quarter which was approximately 10% higher than the prior year. EMEA results remain concerning due to the challenging economic environment in Western Europe, and revenue trends by market continue to be mixed. Although EMEA experienced an organic revenue decline in Q1 2014, operating results improved, driven in part by continued benefits from cost reduction measures previously implemented. The Other category also experienced an organic revenue decline but improved operating results, primarily driven by gross margin improvements in Asia Pacific. Additionally, while order patterns remained mixed in the Other category, orders in Asia Pacific grew in Q1 2014 when compared to Q1 2013. We recorded net income of \$13.2 in both Q1 2014 and Q1 2013. Improved operating results and lower income tax expense in Q1 2014 were offset by lower gains in the cash surrender value of variable life company owned life insurance (“COLI”) and lower other income.

Revenue was \$667.1 in Q1 2014 compared to \$675.2 in Q1 2013. Organic revenue declined 1% after adjusting for currency translation effects and the impact of recent dealer acquisitions, net of a divestiture. Organic revenue growth in the Americas was less than 1% while EMEA and the Other category declined by 3% and 8%, respectively. Current quarter revenue continued to include a higher than normal mix of project business from some of the company's largest corporate customers.

Operating income was \$20.4 in Q1 2014 compared to \$19.3 in the prior year. Q1 2014 adjusted operating income of \$24.8 increased by \$0.4 compared to Q1 2013 adjusted operating income of \$24.4. Net benefits from pricing adjustments and recent restructuring actions in the Americas were largely offset by higher operating expenses. Cost of sales was 68.5% of revenue in Q1 2014, a 170 basis point improvement compared to Q1 2013. The improvement was primarily driven by net benefits from pricing adjustments and recent restructuring actions in the Americas.

Operating expenses in Q1 2014 of \$185.1 increased by \$8.4 compared to Q1 2013 operating expenses of \$176.7. Q1 2014 included a \$3.2 increase in variable compensation and \$2.2 of operating expenses related to

Table of Contents

recent dealer acquisitions, net of a divestiture. The remaining increase primarily related to deferred compensation and increased spending on sales, product development and other initiatives in the Americas.

We recorded restructuring costs of \$4.4 in Q1 2014, which included \$3.2 associated with actions in EMEA and \$0.9 associated with the integration of PolyVision's global technology business into the Steelcase Education Solutions group. In Q1 2013, we recorded restructuring costs of \$5.1, \$4.5 of which was associated with the North America plant closures announced in Q4 2011.

Our Q1 2014 effective tax rate was 25.8% which is below the U.S. federal statutory tax rate of 35%. The difference was primarily driven by favorable discrete tax items of \$1.6. The Q1 2013 effective tax rate was 33.0%.

Total other income, net	1.2	3.8
Total interest expense, investment income and other income, net	\$(2.6)	\$0.4

The Q1 2014 decrease in investment income was primarily driven by lower gains in the cash surrender value of variable life COLI. Other income, net declined in Q1 2014 primarily due to a \$2.1 gain recognized on the sale of a small equity investment in Q1 2013.

Business Segment Review

As of November 23, 2012, we realigned portions of our reportable segments for financial reporting purposes as a result of the integration of the PolyVision global technology business into the Steelcase Education Solutions group. Prior to this change, the PolyVision global technology business was combined with the PolyVision surfaces business and was reported collectively as PolyVision in the Other category along with Asia Pacific and DesignTex. As a result of these changes, the results of the PolyVision technology business are now reported in the Americas and EMEA segments. The PolyVision surfaces business remains in the Other category. Similarly, amounts in the prior years' financial statements have been reclassified to conform to the new segment presentation.

See Note 8 to the condensed consolidated financial statements for additional information regarding our business segments.

Americas

The Americas segment serves customers in the U.S., Canada and Latin America with a portfolio of integrated architecture, furniture and technology products marketed to corporate, government, healthcare, education and retail customers through the Steelcase, Coalesse, Details, Nurture by Steelcase and Turnstone brands.

Add: restructuring costs	1.2	0.2		4.8	1.0	
Adjusted operating income	\$39.9	8.3	%	\$39.3	8.2	%

Operating income in the Americas of \$38.7 in Q1 2014 increased by \$4.2 compared to Q1 2013 operating income of \$34.5. Adjusted operating income increased by \$0.6 in Q1 2014 compared to Q1 2013. The improvement was driven by net benefits from pricing adjustments and recent restructuring actions, offset in part by higher variable compensation and increased spending in sales, product development and other initiatives.

The Americas revenue represented 71.8% of consolidated revenue in Q1 2014. Revenue for Q1 2014 was \$478.8 compared to \$479.2 in Q1 2013. After adjusting for currency translation effects, organic revenue growth was \$0.7 or 0% compared to the prior year which included \$20 of revenue from two large projects in the energy sector. Current quarter orders and customer backlog grew 7% and 10%, respectively, compared to the prior year, driven by a high level of activity during May. Revenue growth in Q1 2014 is categorized as follows:

• **Product categories** — Six out of nine categories grew in Q1 2014, led by Technology, Turnstone and Architectural Solutions. The Wood category declined due to large projects in the prior year.

• **Vertical markets** — Information Technology, Technical/Professional and Manufacturing experienced strong growth while Energy declined significantly, due to large projects in the prior year.

• **Geographic regions** — Strength in the East Business Group was offset by a decline in the South Business Group.

• **Contract type** — Marketing business grew modestly but was offset by declines in project business, which included two large projects in the prior year, and continuing business.

Cost of sales improved to 67.6% of revenue in Q1 2014 compared to 69.6% of revenue in Q1 2013. The improvement was largely driven by net benefits from pricing adjustments and recent restructuring actions.

Operating expenses increased by \$9.2 in Q1 2014 compared to the same period last year. The increase primarily related to \$3.2 of higher variable compensation expense. The remaining increase related to higher spending on sales, product development and other initiatives.

Restructuring costs of \$1.2 in Q1 2014 included \$0.9 associated with the integration of PolyVision's global technology business into the Steelcase Education Solutions group.

EMEA

The EMEA segment serves customers in Europe, the Middle East and Africa primarily under the Steelcase and Coalesse brands, with an emphasis on freestanding furniture systems, seating and storage solutions.

EMEA reported an operating loss of \$10.3 in Q1 2014 compared to an operating loss of \$8.8 in Q1 2013. The adjusted operating loss recorded in Q1 2014 was \$7.1 compared to \$8.5 in the same period of the prior year. The improvement was primarily driven by lower operating costs offset in part by the organic revenue decline.

EMEA revenue represented 19.0% of consolidated revenue in Q1 2014. Revenue for Q1 2014 was \$126.7 compared to \$129.2 in Q1 2013. After adjusting for \$1.7 of currency translation effects and \$3.5 of revenue from recent dealer acquisitions, net of a divestiture, the organic revenue decline was \$4.3 or 3%. Organic revenue growth in the Middle East and Africa (as a group), the export markets of the central, eastern and southern parts of Europe (as a group) and Germany was more than offset by declines in France, Northern Europe and Iberia.

Cost of sales was flat at 74.2% of revenue in Q1 2014 compared to 74.3% of revenue in Q1 2013.

Q1 2014 operating expenses decreased by \$1.9 as \$2.2 of additional operating expenses related to dealer acquisitions, net of a divestiture, was more than offset by the benefits from recent restructuring actions and cost containment efforts.

Restructuring costs of \$3.2 are primarily associated with the reorganization of the sales, marketing and support functions in France, which is currently under consultation with the local works council.

Other

The Other category includes Asia Pacific, Designtex and PolyVision. Asia Pacific serves customers in Asia and Australia primarily under the Steelcase brand with an emphasis on freestanding furniture systems, storage and seating solutions. Designtex designs and sells surface materials including textiles and wall coverings which are specified by architects and designers directly to end-use customers through a direct sales force. PolyVision manufactures ceramic steel surfaces for use in multiple applications but primarily for sale to third-party fabricators to create static whiteboards sold in the primary and secondary education markets in the U.S. and Europe.

The Other category reported operating income of \$1.9 in Q1 2014 compared to operating income of \$0.6 in Q1 2013. The increase was primarily driven by higher gross margins and lower operating expenses in Asia Pacific and was accomplished despite lower revenue in the current quarter.

Table of Contents

Q1 2014 revenue decreased by \$5.2 or 7.8% compared to the prior year. Revenue declined in Asia Pacific (primarily in China) and PolyVision but grew at Designtex.

Cost of sales as a percent of revenue was 64.5% in Q1 2014 compared to 66.5% in Q1 2013, a 200 basis point improvement. The improvement was driven by benefits from business mix shifts and higher absorption of fixed costs in Asia Pacific partially offset by a higher mix of lower-margin project business in PolyVision.

Q1 2014 operating expenses decreased by \$1.8 compared to Q1 2013. The decrease was primarily driven by cost containment efforts in Asia Pacific.

Corporate

Corporate expenses include unallocated portions of shared service functions such as information technology, human resources, finance, executive, corporate facilities, legal and research.

Statement of Operations Data — Corporate	Three Months Ended	
	May 24, 2013	May 25, 2012
Operating expenses	\$9.9	\$7.0

Operating expenses in Q1 2014 increased primarily due to earnings associated with deferred compensation and higher variable compensation expense.

Liquidity and Capital Resources

Based on current business conditions, we target a minimum of \$75 to \$150 in cash and cash equivalents and short-term investments to fund day-to-day operations, including seasonal disbursements, particularly the annual payment of accrued variable compensation and retirement plan contributions in Q1 of each fiscal year. In addition, we may carry additional liquidity for potential investments in strategic initiatives and as a cushion against economic volatility.

Primary Liquidity Sources	May 24, 2013	February 22, 2013
Cash and cash equivalents	\$103.1	\$150.4
Short-term investments	43.7	100.5
Variable life company-owned life insurance	116.0	116.2
Availability under credit facilities	166.0	174.2
Total liquidity	\$428.8	\$541.3

As of May 24, 2013, we held a total of \$146.8 in cash and cash equivalents and short-term investments. All of our short-term investments are located in the U.S. Of our total \$103.1 in cash and cash equivalents, approximately 42% was located in the U.S. and the remaining 58% was located outside of the U.S., primarily in France, China, Mexico and Canada. The amounts located outside the U.S. would be taxable if repatriated to the U.S., but we do not anticipate repatriating such amounts or needing them for operations in the U.S. Such amounts are considered permanently reinvested in foreign subsidiaries, available to repay intercompany debt or to be utilized to meet local working capital requirements.

The majority of our short-term investments are maintained in a managed investment portfolio, which primarily consists of U.S. agency debt securities, corporate debt securities and U.S. government debt securities.

Our investments in variable life COLI are recorded at their net cash surrender value. We believe the financial strength of the issuing insurance companies associated with our variable life COLI policies is sufficient to meet their obligations.

Availability under credit facilities may be reduced by the use of cash and cash equivalents and short-term investments for purposes other than the repayment of debt as a result of constraints related to our maximum leverage ratio covenant. See Liquidity Facilities for more information.

Capital expenditures in Q1 2014 were primarily related to investments in product development, manufacturing operations and showrooms. In Q1 2013, we sold a corporate aircraft for cash proceeds of \$13.7. The increase in liquidations of short-term investments in Q1 2014 compared to Q1 2013 was primarily due to funding requirements for increased variable compensation payments.

In Q1 2014, we made common stock repurchases of 2,366,189 shares, all of which related to our Class A Common Stock. As of the end of Q1 2014, we had \$109.9 of remaining availability under the \$250 share repurchase program approved by our Board of Directors in Q4 2008.

Off-Balance Sheet Arrangements

During Q1 2014, no material change in our off-balance sheet arrangements occurred.

Contractual Obligations

During Q1 2014, no material change in our contractual obligations occurred.

Liquidity Facilities

Our total liquidity facilities as of May 24, 2013 were:

Liquidity Facilities	May 24, 2013
Global committed bank facility	\$125.0
Various uncommitted lines	41.0
Total credit lines available	166.0
Less: Borrowings outstanding	—
Available capacity	\$166.0

We have a \$125 global committed five-year unsecured revolving syndicated credit facility which was entered into in Q1 2013. The facility requires us to satisfy financial covenants including a maximum leverage ratio covenant and a minimum interest coverage ratio covenant. Additionally, the facility requires us to comply with certain other covenants, including a restricted payment covenant which establishes a maximum level of dividends and/or other equity-related distributions or payments (such as share repurchases) we may make in any fiscal year. As of May 24, 2013, we were in compliance with all covenants under the facility.

The various uncommitted lines may be changed or canceled by the banks at any time. There were no outstanding borrowings under the uncommitted facilities as of May 24, 2013. In addition, we have a revolving letter of credit agreement for \$12.9 of which \$10.9 was utilized primarily related to our self-insured workers' compensation programs as of May 24, 2013. There were no draws on our standby letters of credit during Q1 2014.

Total consolidated debt as of May 24, 2013 was \$288.4. Our debt primarily consists of \$249.9 in term notes due in 2021 with an effective interest rate of 6.6%. In addition, we have a term loan with a balance as of May 24, 2013 of \$37.8. This term loan has a floating interest rate based on 30-day LIBOR plus 3.35% and is due in 2017. The term notes are unsecured, the term loan is secured by two corporate aircraft, and neither the term notes nor the term loan contain financial covenants or are cross-defaulted to other debt facilities.

Liquidity Outlook

Our current cash and cash equivalents and short-term investment balances, funds available under our credit facilities, funds available from COLI and cash generated from future operations are expected to be sufficient to finance our known or foreseeable liquidity needs. We believe the timing, strength and continuity of the economic recovery across the geographies we serve remain uncertain which may continue to challenge our level of cash

generation from operations. We continue to maintain a conservative approach to liquidity and maintain flexibility over significant uses of cash including our capital expenditures and discretionary operating expenses.

Our significant funding requirements include operating expenses, non-cancelable operating lease obligations, capital expenditures, variable compensation and retirement plan contributions, dividend payments and debt service obligations.

We expect capital expenditures to total approximately \$80 in 2014 compared to \$74 in 2013. This amount includes global product development projects and manufacturing investments in both EMEA and the Americas. We closely manage capital spending to ensure we are making investments that we believe will sustain our business and preserve our ability to introduce innovative new products.

On June 20, 2013, we announced a quarterly dividend on our common stock of \$0.10 per share, or \$12.6, to be paid in Q2 2014. Future dividends will be subject to approval by our Board of Directors.

Critical Accounting Estimates

During Q1 2014, there have been no changes in the items that we have identified as critical accounting estimates.

Forward-looking Statements

From time to time, in written and oral statements, we discuss our expectations regarding future events and our plans and objectives for future operations. These forward-looking statements generally are accompanied by words such as “anticipate,” “believe,” “could,” “estimate,” “expect,” “forecast,” “intend,” “may,” “possible,” “potential,” “predict,” “project,” words, phrases or expressions. Forward-looking statements involve a number of risks and uncertainties that could cause actual results to vary from our expectations because of factors such as, but not limited to, competitive and general economic conditions domestically and internationally; acts of terrorism, war, governmental action, natural disasters and other Force Majeure events; changes in the legal and regulatory environment; our restructuring activities; changes in raw materials and commodity costs; currency fluctuations; changes in customer demand; and the other risks and contingencies detailed in this Report, our most recent Annual Report on Form 10-K and our other filings with the Securities and Exchange Commission. We undertake no obligation to update, amend, or clarify forward-looking statements, whether as a result of new information, future events, or otherwise.

Item 3. Quantitative and Qualitative Disclosures About Market Risk:

The nature of market risks (i.e., the risk of loss arising from adverse changes in market rates and prices) faced by us as of May 24, 2013 is the same as disclosed in our Annual Report on Form 10-K for the year ended February 22, 2013.

We are exposed to market risks from foreign currency exchange, interest rates, commodity prices and fixed income and equity prices, which could affect our operating results, financial position and cash flows.

Foreign Exchange Risk

During Q1 2014, no material change in foreign exchange risk occurred.

Interest Rate Risk

During Q1 2014, no material change in interest rate risk occurred.

Fixed Income and Equity Price Risk

During Q1 2014, no material change in fixed income and equity price risk occurred.

Item 4. Controls and Procedures:

(a) Disclosure Controls and Procedures. Our management, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure

controls and procedures (as defined in Rules 13a-15(e) or 15d-15(e) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”)), as of May 24, 2013. Based on such evaluation, our Chief Executive Officer and Chief Financial Officer concluded that as of May 24, 2013, our disclosure controls and procedures were effective in (1) recording, processing, summarizing and reporting, on a timely basis, information required to be disclosed by us in the reports that we file or submit under the Exchange Act and (2) ensuring that information required to be disclosed by us in such reports is accumulated and communicated to our management, including our Chief Executive Officer and our Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

(b) Internal Control Over Financial Reporting. There were no changes in our internal control over financial reporting (as defined in Rules 13a-15(f) or 15d-15(f) under the Exchange Act) during our first fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
