REPORT ON REVIEW BY INDEPENDENT CERTIFIED PUBLIC ACCOUNTANT

To the Board of Directors
Sonic Jet Performance, Inc and Subsidiary

We have reviewed the accompanying consolidated balance sheet of Sonic Jet Performance, Inc. and Subsidiary as of June 30, 2002 and the related consolidated statements of operations and cash flows for the six months ended June 30, 2002 and 2001 included in the accompanying Securities and Exchange Commission Form 10-QSB for the period ended June 30, 2002. These financial statements are the responsibility of the Company's management.

We conducted our reviews in accordance with standards established by the American Institute of Certified Public Accountants. A review of interim financial information consists principally of applying analytical procedures to financial data and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with auditing standards generally accepted in the United States, the objective of which is the expression of an opinion regarding the financial statements as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to the accompanying financial statements for them to be in conformity with accounting principles generally accepted in the United States.

We have previously audited, in accordance with auditing standards generally accepted in the United States, the balance sheet as of December 31, 2001, and the related consolidated statements of operations, stockholders' equity and cash flows for the year then ended (not presented herein). In our report dated March 4, 2002, we expressed an unqualified opinion on those financial statements. In our opinion, the information set forth in the accompanying balance sheet as of June 30, 2002 is fairly stated in all material respects in relation to the balance sheet from which it has been derived.

This increase in loss is mainly attributable to expenses incurred on consultants, legal expenses for preparing the annual report, and proxy statement, printing of brochures, demo expenses, provision for inventory in China and settlement of legal cases. Also the profit margin increased during the Fiscal year 2002 due to higher profit margin on Fire and rescue boats.

LIQUIDITY AND CAPITAL RESOURCES

The Company's principal sources of capital have been cash flow from its operations, the sale of Series B and Series C Convertible Preferred Stock, and funds raised through the sale of additional securities.

Based on its current operating plan, the Company anticipates that additional financing will be required to finance its operations and capital expenditures.

The Company's currently anticipated levels of revenues and cash flow are subject to many uncertainties and cannot be assured. Further, unforeseen events may occur causing the Company to raise additional funds. The amount of funds required by the Company will depend upon many factors, including without limitation, the extent and timing of sales of the Company's products, future product costs, the timing and costs associated with the establishment and/or expansion, as appropriate, of the Company's manufacturing, development, engineering and customer support capabilities, the timing and cost of the Company's product development and enhancement activities and the Company's operating results. Until the Company generates cash flow from operations, which will be sufficient to satisfy its cash requirements, the Company will need to seek alternative means for financing its operations and capital expenditures and/or postpone or eliminate certain investments or expenditures. Potential alternative means for financing may include leasing capital equipment, obtaining lines of credit, or obtaining additional debt or equity financing. There can be no assurance that, if and when needed, additional financing will be available, or available on acceptable terms. The inability to obtain additional financing or generate sufficient cash from operations could require the Company to reduce or eliminate expenditures for capital equipment, research and development, production or marketing of its products, or otherwise curtail or discontinue its operations, which could have a material adverse effect on the Company's business, financial condition and results of operations. Furthermore, if the

Company raises funds through the sale of additional equity securities, the Common Stock currently outstanding may be further diluted.

The Company has raised \$331,750 during the six months period ending July 31,
