ARCADIS WINS STRATEGIC ASSIGNMENT IN NEW ORLEANS

ARNHEM, THE NETHERLANDS April 28, 2006 ARCADIS (NASDAQ: ARCAF, Euronext: ARCAD), an international consulting and engineering company, announced today that the Company has won a strategically important assignment in New Orleans. The assignment involves the concept study of two navigable floodgates in the New Orleans Inner Harbor Navigation Canal (IHNC). The client is the New Orleans District, U.S. Army Corps of Engineers, and the work will be performed under the US\$ 3 million ARCADIS multi-year framework contract for engineering services. The initial study of the storm surge closure gates will be performed to validate the concept. If feasible, work will proceed to subsequent phases, which will ultimately lead to the design and construction of these unique structures.

The floodgates, with widths of approximately 110-feet and 350-feet, are conceptually comparable to the barrier in the Nieuwe Waterweg near Rotterdam, the Netherlands. The proposed pair of navigable floodgates would close when hurricanes threaten New Orleans. The structures would prevent hurricane storm surges from Lake Borgne and Lake Pontchartrain from entering the IHNC. This will aid in preventing storm surge from entering populated areas that were vulnerable to hurricane Katrina. The floodgates have been estimated to cost in excess of \$350 million.

The study will identify the type, location, environmental impacts, initial technical specifications, and planning level cost estimates. ARCADIS will perform this project with both U.S. and Dutch engineering experts supported by Dutch companies WL Delft Hydraulics and Alkyon.

ARCADIS CEO Harrie Noy commented: ARCADIS has won this assignment because, unlike any other company, we are able to provide both Dutch and U.S. expertise from one company. In addition to solid local knowledge, the client also recognizes the value of Dutch expertise in storm surge barriers that will be applied in this project.

ARCADIS is an international company providing consultancy, engineering and management services in infrastructure, environment and facilities, to enhance mobility, sustainability and quality of life. ARCADIS develops, designs, implements, maintains and operates projects for companies and governments. With more than 10,000 employees and over 1 billion in gross revenue, the company has an extensive international network that is supported by strong local market positions.
