- Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Item 7.01 Regulation FD Disclosure.

In connection with Quidel Corporation's (the Company's) announcement on September 18, 2006, of its receipt of FDA clearance for its new rapid test for the detection of respiratory syncytial virus (RSV), the QuickVue® RSV test, and interest surrounding RSV infections, the Company is providing the following new and updated information. Upon additional review, which revealed statistical variation, and based on the sources footnoted below, it appears that in the United States RSV is estimated to be responsible for approximately 73,400 to 126,300 hospitalizations per year for bronchiolitis and pneumonia alone among children younger than one year of age.(1) In addition, data appears to show that among children hospitalized with RSV infection, the mortality rate is estimated to be approximately 0.3% to 1.0%(1)(2)(3)(4) of hospitalized children and in the range of 2.5% to 4.0% for hospitalized children with underlying cardiac or pulmonary disease.(1)(2)(5)

The information in this current report on Form 8-K is being furnished and shall not be deemed filed for purposes of Section 18 of the Securities Exchange Act of 1934, as amended, or otherwise subject to the liabilities of such section. The information in this current report on Form 8-K shall not be incorporated by reference into any registration statement or other document pursuant to the Securities Act of 1933, as amended, except as expressly set forth by specific reference in such filing.
