x QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF

THE SECURITIES EXCHANGE ACT OF 1934

FOR THE QUARTERLY PERIOD ENDED JUNE 30, 2008

OR

o TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF

THE SECURITIES EXCHANGE ACT OF 1934

Commission file number 1-11840

THE ALLSTATE CORPORATION

(Exact name of registrant as specified in its charter)

Delaware	**36-3871531**
(State of Incorporation)	(I.R.S. Employer Identification No.)
2775 Sanders Road	
Northbrook, Illinois	**60062**
(Address of principal executive offices)	(Zip Code)

Registrant s telephone number, including area code: 847/402-5000

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes x **No** o

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer	Accelerated filer	Non-accelerated filer	Smaller reporting company
x	o	o	o
		(Do not check if a smaller reporting company)	

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes o **No** x

As of July 31, 2008, the registrant had 541,517,994 common shares, $.01 par value, outstanding.

THE ALLSTATE CORPORATION AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. General

Basis of presentation

The accompanying condensed consolidated financial statements include the accounts of The Allstate Corporation and its wholly owned subsidiaries, primarily Allstate Insurance Company (AIC), a property liability insurance company with various property liability and life and investment subsidiaries, including Allstate Life Insurance Company (ALIC) (collectively referred to as the Company or Allstate).

The condensed consolidated financial statements and notes as of June 30, 2008, and for the three month and six month periods ended June 30, 2008 and 2007 are unaudited. The condensed consolidated financial statements reflect all adjustments (consisting only of normal recurring accruals), which are, in the opinion of management, necessary for the fair presentation of the financial position, results of operations and cash flows for the interim periods. These condensed consolidated financial statements and notes should be read in conjunction with the consolidated financial statements and notes thereto included in the Company s Annual Report on Form 10 K for the year ended December 31, 2007. The results of operations for the interim periods should not be considered indicative of results to be expected for the full year.

To conform to the 2008 presentation, certain amounts in the prior year condensed consolidated financial statements and notes have been reclassified.

Adopted accounting standards

Statement of Position 05 1, Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection with Modifications or Exchanges of Insurance Contracts (SOP 05 1)

In October 2005, the American Institute of Certified Public Accountants (AICPA) issued SOP 05 1. SOP 05 1 provides accounting guidance for deferred policy acquisition costs (DAC) associated with internal replacements of insurance and investment contracts other than those set forth in Statement of Financial Accounting Standards (SFAS) No. 97, Accounting and Reporting by Insurance Enterprises for Certain Long Duration Contracts and for Realized Gains and Losses from the Sale of Investments . SOP 05 1 defines an internal replacement as a modification in product benefits, features, rights or coverages that occurs through the exchange of an existing contract for a new contract, or by amendment, endorsement or rider to an existing contract, or by the election of a feature or coverage within an existing contract. The Company adopted the provisions of SOP 05 1 on January 1, 2007 for internal replacements occurring in fiscal years beginning after December 15, 2006. The adoption resulted in a $9 million after tax reduction to retained income to reflect the impact on estimated future gross profits (EGP) from the changes in

accounting for certain costs associated with contract continuations that no longer qualify for deferral under SOP 05 1 and a reduction of DAC and deferred sales inducement balances of $13 million pre tax as of January 1, 2007.

SFAS No. 155, Accounting for Certain Hybrid Financial Instruments an amendment of FASB Statements No. 133 and 140 (SFAS No. 155)

In February 2006, the Financial Accounting Standards Board (FASB) issued SFAS No. 155, which permits fair value remeasurement at the date of adoption of any hybrid financial instrument containing an embedded derivative that otherwise would require bifurcation under paragraph 12 or 13 of SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities (SFAS No. 133); clarifies which interest only strips and principal only strips are not subject to the requirements of SFAS No. 133; establishes a requirement to evaluate interests in securitized financial assets to identify interests that are freestanding derivatives or hybrid financial instruments that contain embedded derivatives requiring bifurcation; and clarifies that concentrations of credit risk in the form of subordination are not embedded derivatives. The Company adopted the provisions of SFAS No. 155 on January 1, 2007, which were effective for all financial instruments acquired, issued or subject to a remeasurement event occurring after the beginning of the first fiscal year after September 15, 2006. The Company elected not to remeasure existing hybrid financial instruments that contained embedded derivatives requiring bifurcation at the date of adoption pursuant to paragraph 12 or 13 of SFAS No. 133. The adoption of SFAS No. 155 did not have a material effect on the results of operations or financial position of the Company.

THE ALLSTATE CORPORATION AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109 and FASB Staff Position No. FIN 48 1, Definition of Settlement in FASB Interpretation No. 48 (FIN 48)

The FASB issued FIN 48 in July 2006 and the related staff position in May 2007. FIN 48 clarifies the accounting for uncertainty in income taxes recognized in an entity s financial statements in accordance with SFAS No. 109, Accounting for Income Taxes . FIN 48 requires an entity to recognize the tax benefit of uncertain tax positions only when it is more likely than not, based on the position s technical merits, that the position would be sustained upon examination by the respective taxing authorities. The tax benefit is measured as the largest benefit that is more than fifty percent likely of being realized upon final settlement with the respective taxing authorities. On January 1, 2007, the Company adopted the provisions of FIN 48, which were effective for fiscal years beginning after December 15, 2006. No cumulative effect of a change in accounting principle or adjustment to the liability for unrecognized tax benefits was recognized as a result of the adoption of FIN 48. Accordingly, the adoption of FIN 48 did not have an effect on the results of operations or financial position of the Company.

SFAS No. 158, Employers Accounting for Defined Benefit Pension and Other Postretirement Plans, an amendment of FASB Statements No. 87, 88, 106 and 132(R) (SFAS No. 158)

SFAS No. 158 required, as of December 31, 2006 for calendar year end companies, recognition in the statements of financial position of the over or underfunded status of defined pension and other postretirement plans, measured as the difference between the fair value of plan assets and the projected benefit obligation (PBO) for pension plans and the accumulated postretirement benefit obligation (APBO) for other postretirement benefit plans. This effectively required the recognition of all previously unrecognized actuarial gains and losses and prior service costs as a component of accumulated other comprehensive income, net of tax, at the date of adoption. In addition, SFAS No. 158 required, on a prospective basis, that the actuarial gains and losses and prior service costs and credits that arise during any reporting period, but are not recognized as components of net periodic benefit cost, be recognized as a component of other comprehensive income (OCI) and that disclosure in the notes to the financial statements include the anticipated impact on the net periodic benefit cost of the actuarial gains and losses and the prior service costs and credits previously deferred and recognized, net of tax, as a component of OCI. The Company adopted the funded status provisions of SFAS No. 158 as of December 31, 2006. The impact on the Consolidated Statements of Financial Position of adopting SFAS No. 158, including the inter related impact to the minimum pension liability, was a decrease in shareholders equity of $1.11 billion.

In addition to the impacts of reporting the funded status of pension and other postretirement benefit plans and the related additional disclosures, SFAS No. 158 also required reporting entities to conform plan measurement dates with the fiscal year end reporting date. The effective date of the guidance relating to the measurement date of the plans is for years ending after December 15, 2008. The Company remeasured its plans as of January 1, 2008 to transition to a December 31 measurement date in 2008. As a result, the Company recorded a decrease of $13 million, net of tax, to beginning retained earnings in 2008 representing the net periodic benefit cost for the period between October 31, 2007 and December 31, 2007 and a decrease of $80 million, net of tax, to beginning accumulated other comprehensive income in 2008 to reflect changes in the fair value of plan assets and the benefit obligations between October 31, 2007 and January 1, 2008, and for amortization of actuarial gains and losses and prior service cost between October 31, 2007 and December 31, 2007.

SEC Staff Accounting Bulletin No. 109, Written Loan Commitments That are Recorded At Fair Value Through Earnings (SAB 109)

In October 2007, the SEC issued SAB 109, a replacement of SAB 105, Application of Accounting Principles to Loan Commitments . SAB 109 is applicable to both loan commitments accounted for under SFAS No. 133, and other loan commitments for which the issuer elects fair value accounting under SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities . SAB 109 states that the expected net future cash flows related to the servicing of a loan should be included in the fair value measurement of a loan commitment accounted for at fair value through earnings. The expected net future cash flows associated with loan servicing should be determined in accordance with the guidance in SFAS No. 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities , as amended by SFAS No. 156, Accounting for Servicing of Financial Assets . SAB 109 should be applied on a prospective basis to loan commitments accounted for under SFAS No. 133 that were issued or modified in fiscal quarters beginning after December 15, 2007. Earlier adoption was not permitted. The adoption of SAB 109 did not have a material impact on the Company s results of operations or financial position.

THE ALLSTATE CORPORATION AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

SFAS No. 157, Fair Value Measurements (SFAS No. 157)

In September 2006, the FASB issued SFAS No. 157, which redefines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, establishes a framework for measuring fair value in GAAP, and expands disclosures about fair value measurements. SFAS No. 157 establishes a three level hierarchy for fair value measurements based upon the nature of the inputs to the valuation of an asset or liability. SFAS No. 157 applies where other accounting pronouncements require or permit fair value measurements. In February 2008, the FASB issued FASB Staff Position No. 157 2, Effective Date of FASB Statement No. 157 (FSP 157 2), which permits the deferral of the effective date of SFAS No. 157 to fiscal years beginning after November 15, 2008 for all nonfinancial assets and liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis. The Company adopted the provisions of SFAS No. 157 for financial assets and liabilities recognized or disclosed at fair value on a recurring and non recurring basis as of January 1, 2008. Consistent with the provisions of FSP 157 2, the Company decided to defer the adoption of SFAS No. 157 for non financial assets and liabilities measured at fair value on a non recurring basis until January 1, 2009. The adoption of SFAS No. 157 did not have a material effect on the Company s results of operations or financial position (see Note 4).

SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities Including an amendment of FASB Statement No. 115 (SFAS No. 159)

In February 2007, the FASB issued SFAS No. 159 which provides reporting entities, on an ongoing basis, an option to report selected financial assets, including investment securities, and financial liabilities, including most insurance contracts, at fair value through earnings. SFAS No. 159 establishes presentation and disclosure requirements designed to facilitate comparisons between companies that choose different measurement alternatives for similar types of financial assets and liabilities. The standard also requires additional information to aid financial statement users understanding of the impacts of a reporting entity s decision to use fair value on its earnings and requires entities to display, on the face of the statement of financial position, the fair value of those assets and liabilities for which the reporting entity has chosen to measure at fair value. SFAS No. 159 was effective as of the beginning of a reporting entity s first fiscal year beginning after November 15, 2007. The Company did not apply the fair value option to any existing financial assets or liabilities as of January 1, 2008. Consequently, the initial adoption of SFAS No. 159 had no impact on the Company s results of operations or financial position.

FASB Staff Position No. FIN 39 1, Amendment of FASB Interpretation No. 39 (FSP FIN 39 1)

In April 2007, the FASB issued FSP FIN 39 1, which amends FASB Interpretation No. 39, Offsetting of Amounts Related to Certain Contracts . FSP FIN 39 1 replaces the terms conditional contracts and exchange contracts with the term derivative instruments and requires a reporting entity to offset fair value amounts recognized for the right to reclaim cash collateral or the obligation to return cash collateral against fair value amounts recognized for derivative instruments executed with the same counterparty under the same master netting arrangement that have been offset in the statement of financial position. FSP FIN 39 1 was effective for fiscal years beginning after November 15, 2007, with early adoption permitted. The adoption of FSP FIN 39 1 did not have a material impact on the Company s results of operations or financial position.

Pending accounting standards

SFAS No. 141(R), Business Combinations (SFAS No. 141R)

In December 2007, the FASB issued SFAS No. 141R which replaces SFAS No. 141, Business Combinations (SFAS No. 141). Among other things, SFAS No. 141R broadens the scope of SFAS No. 141 to include all transactions where an acquirer obtains control of one or more other businesses; retains the guidance to recognize intangible assets separately from goodwill; requires, with limited exceptions, that all assets acquired and liabilities assumed, including certain of those that arise from contractual contingencies, be measured at their acquisition date fair values; requires most acquisition and restructuring related costs to be expensed as incurred; requires that step acquisitions, once control is acquired, to be recorded at the full amounts of the fair values of the identifiable assets, liabilities and the noncontrolling interest in the acquiree; and replaces the reduction of asset values and recognition of negative goodwill with a requirement to recognize a gain in earnings. The provisions of SFAS No. 141R are effective for fiscal years beginning after December 15, 2008 and are to be applied prospectively only. Early adoption is not permitted. The Company will apply the provisions of SFAS 141R as required when effective.

THE ALLSTATE CORPORATION AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

SFAS No. 160, Noncontrolling Interests in Consolidated Financial Statements an amendment of ARB No. 51 (SFAS No. 160)

In December 2007, the FASB issued SFAS No. 160 which clarifies that a noncontrolling interest in a subsidiary is that portion of the subsidiary s equity that is attributable to owners of the subsidiary other than its parent or parent s affiliates. Noncontrolling interests are required to be reported as equity in the consolidated financial statements and as such net income will include amounts attributable to both the parent and the noncontrolling interest with disclosure of the amounts attributable to each on the face of the consolidated statement of operations. SFAS No. 160 requires that all changes in a parent s ownership interest in a subsidiary when control of the subsidiary is retained, be accounted for as equity transactions. In contrast, SFAS No. 160 requires a parent to recognize a gain or loss in net income when control over a subsidiary is relinquished and the subsidiary is deconsolidated, as well as provide certain associated expanded disclosures. SFAS No. 160 is effective as of the beginning of a reporting entity s first fiscal year beginning after December 15, 2008. Early adoption is prohibited. SFAS No. 160 requires prospective application as of the beginning of the fiscal year in which the standard is initially applied, except for the presentation and disclosure requirements which are to be applied retrospectively for all periods presented. The adoption of SFAS No. 160 is not expected to have a material effect on the Company s results of operations or financial position.

SFAS No. 161, Disclosures about Derivative Instruments and Hedging Activities an amendment of FASB Statement No. 133 (SFAS No. 161)

In March 2008, the FASB issued SFAS No. 161, which amends and expands the disclosure requirements for derivatives currently accounted for in accordance with SFAS No. 133. The new disclosures are designed to enhance the understanding of how and why an entity uses derivative instruments and how derivative instruments affect an entity s financial position, results of operations, and cash flows. The standard requires, on a quarterly basis, quantitative disclosures about the potential cash outflows associated with the triggering of credit related contingent features, if any; tabular disclosures about the classification and fair value amounts of derivative instruments reported in the statement of financial position; disclosure of the location and amount of gains and losses on derivative instruments reported in the statement of operations; and qualitative information about how and why an entity uses derivative instruments and how derivative instruments and related hedged items affect the entity s financial statements. SFAS No. 161 is effective for fiscal periods beginning after November 15, 2008, and is to be applied on a prospective basis only. SFAS No. 161 affects disclosures and therefore will not impact the Company s results of operations or financial position.

2. Earnings per share

Basic earnings per share is computed based on the weighted average number of common shares outstanding. Diluted earnings per share is computed based on the weighted average number of common and dilutive potential common shares outstanding. For Allstate, dilutive potential common shares consist of outstanding stock options and restricted stock units.

THE ALLSTATE CORPORATION AND SUBSIDIARIES

Net income	$ 25	$ 1,403	$ 373	$ 2,898
Denominator:				
Weighted average common shares outstanding	549.6	604.1	554.2	610.4
Effect of dilutive potential securities:				
Stock options	1.0	2.9	0.9	3.1
Unvested restricted stock units	2.3	1.8	2.1	1.7
Weighted average common and dilutive potential common shares outstanding	552.9	608.8	557.2	615.2
Earnings per share Basic:	$ 0.05	$ 2.33	$ 0.67	$ 4.75
Earnings per share Diluted:	$ 0.05	$ 2.30	$ 0.67	$ 4.71

The effect of dilutive potential securities does not include the options with exercise prices that exceed the average market price of Allstate common shares during the period or for which the unrecognized compensation cost would have an antidilutive effect. Options to purchase 17.6 million and 4.1 million Allstate common shares, with exercise prices ranging from $48.01 to $65.38 and $52.23 to $65.38, were outstanding at June 30, 2008 and 2007, respectively, but were not included in the computation of diluted earnings per share for the six month periods.

3. Supplemental Cash Flow Information

Non cash investment exchanges and modifications, which primarily reflect refinancings of fixed income securities and mergers completed with equity securities and limited partnerships, totaled $20 million and $60 million for the six month periods ended June 30, 2008 and 2007, respectively.

Liabilities for collateral received in conjunction with the Company s securities lending and other business activities and for funds received from the Company s security repurchase business activities are reported in either other liabilities and accrued expenses or other invested assets as permitted under FSP FIN 39-1 in the Condensed Consolidated Statements of Financial Position. The accompanying cash flows are included in cash flows from operating activities in the Condensed Consolidated Statements of Cash Flows along with the activities resulting from management of the proceeds, which are as follows:

($ in millions)	Six months ended June 30, 2008	2007
Net change in fixed income securities	$ 399	$ (799)
Net change in short term investments	82	(547)
Operating cash flow provided (used)	481	(1,346)
Net change in cash		2
Net change in proceeds managed	$ 481	$ (1,344)
Liabilities for collateral and security repurchase, beginning of year	$ (3,461)	$ (4,144)
Liabilities for collateral and security repurchase, end of period	(2,980)	(5,488)
Operating cash flow (used) provided	$ (481)	$ 1,344

THE ALLSTATE CORPORATION AND SUBSIDIARIES

(Unaudited)

4. Fair Value of Financial Assets and Financial Liabilities

The measurement basis for a significant amount of the Company s financial assets is fair value. Financial instruments measured at fair value on a recurring basis include:

Financial Assets Primarily investments including U.S. treasuries, U.S. equities, international equities, money market funds, corporates, municipals, U.S. government and agencies, commercial mortgage backed securities (CMBS), preferred stock, mortgage backed securities (MBS), foreign governments, asset backed securities (ABS), commercial paper, derivatives (exchange traded and over the counter (OTC)), and separate account assets.

Financial Liabilities Primarily free standing derivatives (exchange listed and OTC) and derivatives embedded in certain contractholder liabilities in the Allstate Financial segment.

Financial instruments measured at fair value on a non recurring basis include:

Financial Assets Primarily mortgage loans and other investments written down to fair value in connection with recognizing other than temporary impairments.

Financial Liabilities Includes certain reserves on a closed block of policies expected to be transferred through a future reinsurance agreement to an unrelated third party.

SFAS No. 157 is effective for fiscal years beginning after November 15, 2007. The Company adopted the provisions of SFAS No. 157 as of January 1, 2008 for its financial assets and financial liabilities that are measured at fair value. SFAS No. 157:

- Defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, and establishes a framework for measuring fair value;

- Establishes a three level hierarchy for fair value measurements based upon the transparency of inputs to the valuation as of the measurement date;

- Expands disclosures about financial instruments measured at fair value.

In determining fair value, the Company principally uses the market approach which generally utilizes market data for the same or similar instruments. To a lesser extent, the Company uses the income approach which involves determining fair values from discounted cash flow methodologies. SFAS No. 157 establishes a hierarchy for inputs used in determining fair value that maximize the use of observable inputs and minimizes the use of unobservable inputs by requiring that observable inputs be used when available. Certain financial assets are not carried at fair value on a recurring basis, including investments such as mortgage loans, limited partnership interests, bank loans and policy loans, and thus are only categorized in the fair value hierarchy when held at fair value on a non recurring basis. In addition, equity options embedded in fixed income securities are not disclosed in the hierarchy with free standing derivatives as the embedded derivatives are presented as combined instruments in fixed income securities.

Observable inputs are those used by market participants in valuing financial instruments that are developed based on market data obtained from independent sources. In the absence of sufficient observable inputs, unobservable inputs reflect the Company s estimates of the assumptions market participants would use in valuing financial assets and financial liabilities and are developed based on the best information available in the circumstances.

Pursuant to SFAS No. 157, fair value is a market based measure, considered from the perspective of a market participant who owns an asset or owes a liability. Accordingly, when market observable data is not readily available, the Company s own assumptions are set to reflect those that market participants would be presumed to use in pricing the asset or liability at the measurement date. The Company uses prices and inputs that are current as of the measurement date, including during periods of market disruption. In periods of market disruption, the ability to observe prices and inputs may be reduced for many instruments. This condition could cause an instrument to be reclassified from Level 1 to Level 2, or from Level 2 to Level 3.

THE ALLSTATE CORPORATION AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Financial assets and financial liabilities recorded on the Condensed Consolidated Statements of Financial Position at fair value are categorized based on the reliability of inputs to the valuation techniques as follows:

Level 1 Financial assets and financial liabilities whose values are based on unadjusted quoted prices for identical assets or liabilities in an active market that the Company can access.

Level 2 Financial assets and financial liabilities whose values are based on the following:

a) Quoted prices for similar assets or liabilities in active markets;
b) Quoted prices for identical or similar assets or liabilities in non active markets; or
c) Valuation models whose inputs are observable, directly or indirectly, for substantially the full term of the asset or liability

Level 3 Financial assets and financial liabilities whose values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. These inputs may reflect the Company s estimates of the assumptions that market participants would use in valuing the financial assets and financial liabilities.

The availability of observable inputs varies by instrument. In situations where fair value is based on internally developed pricing models or inputs that are unobservable in the market, the determination of fair value requires more judgment. The degree of judgment exercised by the Company in determining fair value is typically greatest for instruments categorized in Level 3. In many instances, inputs used to measure fair value fall into different levels of the fair value hierarchy. In those instances, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement is categorized is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

Summary of Significant Valuation Techniques for Financial Assets and Financial Liabilities on a Recurring Basis

<u>Level 1 Measurements</u>

<u>Fixed Income Securities:</u> U.S. treasuries are in Level 1 and valuation is based on unadjusted quoted prices for identical assets in active markets that the Company can access.

Equity Securities: Comprise actively traded, exchange listed U.S. and international equity securities. Valuation is based on unadjusted quoted prices for identical assets in active markets that the Company can access.

Short-term: Comprise actively traded money market funds that have daily quoted net asset values for identical assets that the Company can access.

Separate Account Assets: Comprise actively traded mutual funds that have daily quoted net asset values for identical assets that the Company can access. Net asset values for the actively traded mutual funds in which the separate account assets are invested are obtained daily from the fund managers.

Level 2 Measurements

Fixed Income Securities:

Corporate, including privately placed: Valued based on inputs including quoted prices for identical or similar assets in markets that are not active. Also includes privately placed securities totaling $4.4 billion that are valued based on market observable external ratings from independent third party rating agencies.

Municipal: Externally rated municipals are valued based on inputs including quoted prices for identical or similar assets in markets that are not active. Included in municipals are $89 million of auction rate securities (ARS) other than those backed by student loans. ARS backed by student loans are included in Level 3.

U.S. Government and Agencies: Valued based on inputs including quoted prices for identical or similar assets in markets that are not active.

CMBS: Valuation is principally based on inputs including quoted prices for identical or similar assets in markets that are not active and are categorized as Level 2.

Preferred Stock; MBS; Foreign Government; ABS credit card and auto loans: Valued based on inputs including quoted prices for identical or similar assets in markets that are not active.

THE ALLSTATE CORPORATION AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Equity Securities: Valued based on inputs including quoted prices for identical or similar assets in markets that are not active.

Short term: Commercial paper and other short term are valued based on inputs including amortized cost, which approximates fair value, and quoted prices for identical or similar assets in markets that are not active.

Other Investments: Free standing exchange listed derivatives that are not actively traded are valued based on quoted prices for identical instruments in markets that are not active.

OTC derivatives including interest rate swaps, foreign currency swaps, foreign exchange forward contracts, certain credit default swaps, and commodity swaps are valued using models that rely on inputs such as interest rate yield curves, currency rates, counterparty credit risk, and commodity prices that are observable for substantially the full term of the contract. The valuation techniques underlying the models are widely accepted in the financial services industry and do not involve significant judgment.

Contractholder Funds: Derivatives embedded in certain annuity contracts are valued based on internal models that rely on inputs such as interest rate yield curves and equity index volatility assumptions that are market observable for substantially the full term of the contract. The valuation techniques are widely accepted in the financial services industry and do not include significant judgment.

Level 3 Measurements

Fixed Income Securities:

Corporate: Valued based on non binding broker quotes and are categorized as Level 3.

Corporate Privately Placed Securities: Valued based on non binding broker quotes and models that are widely accepted in the financial services industry and use internally assigned credit ratings as inputs and instrument specific inputs. Instrument specific inputs used in internal fair value determinations include: coupon rate, weighted average life, sector of the issuer and call provisions. Privately placed securities are categorized as Level 3 as a result of the significance of non market observable inputs. The $11.4 billion of privately placed fixed income securities included in Level 3 comprise $9.9 billion valued using an internal model and $1.5 billion valued using non binding broker quotes. The internally modeled securities are valued based on internal ratings, which are not observable in the market. Multiple internal ratings comprise a National Association of Insurance Commissioners (NAIC) rating category and when used in the internal model provide a more refined determination of fair value.

The Company s internal ratings are primarily consistent with the NAIC ratings which are generally updated annually.

ABS RMBS; Alt-A Residential Mortgage backed Securities (Alt-A): ABS RMBS and Alt-A are principally valued based on inputs including quoted prices for identical or similar assets in markets that exhibit less liquidity relative to those markets supporting Level 2 fair value measurements. Certain ABS RMBS and Alt-A are valued based on non binding broker quotes. Due to the reduced availability of actual market prices or relevant observable inputs as a result of the decrease in liquidity that has been experienced in the market for these securities, all ABS RMBS and Alt-A are categorized as Level 3.

Other CDO; ABS CDO: Valued based on non binding broker quotes received from brokers who are familiar with the investments. Due to the reduced availability of actual market prices or relevant observable inputs as a result of the decrease in liquidity that has been experienced in the market for these securities, all CLO, ABS CDO, and Synthetic CDO are categorized as Level 3.

CMBS; Commercial Real Estate Collateralized Debt Obligations (CRE CDO): CRE CDO, which are reported as CMBS, and other CMBS, are valued based on non binding broker quotes and are categorized as Level 3.

Municipals: Certain distressed municipal securities for which valuation is based on valuation models that are widely accepted in the financial services industry and require projections of future cash flows that are not market observable are included in Level 3. Included in this category are $1.9 billion of ARS that are backed by student loans. ARS backed by student loans are valued based on a discounted cash flow model with certain inputs to the valuation model that are significant to the valuation, but are not market observable, including estimates of future coupon rates if auction failures continue, maturity assumptions, and illiquidity premium.

THE ALLSTATE CORPORATION AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Other Investments: Certain free standing OTC derivatives, such as caps, floors, certain credit default swaps and OTC options (including swaptions), are valued using valuation models that are widely accepted in the financial services industry. Inputs include non market observable inputs such as volatility assumptions that are significant to the valuation of the instruments.

Contractholder Funds: Derivatives embedded in annuity contracts are valued internally using models widely accepted in the financial services industry that determine a single best estimate of fair value for a block of contractholder liabilities that contain certain embedded derivatives. The models use stochastically determined cash flows based on the contractual elements of embedded derivatives and other applicable market data. These are categorized as Level 3 as a result of the significance of non market observable inputs.

Financial Assets and Financial Liabilities on a Non-recurring Basis

Mortgage loans, limited partnerships and other investments written down to fair value in connection with recognizing other than temporary impairments are primarily valued using valuation models that are widely accepted in the financial services industry. Inputs include non market observable inputs such as credit spreads. At June 30, 2008, the fair value of mortgage loans, limited partnerships and other investments totaled $282 million and were categorized as Level 3.

Reserves on a closed block of policies expected to be transferred through a future reinsurance agreement to an unrelated third party are valued based on significant non observable inputs. At June 30, 2008, the fair value of Reserves for life contingent contract benefits on a closed block of policies totaled $89 million and were categorized as Level 3.

The following table summarizes the Company s financial assets and financial liabilities measured at fair value on a recurring and non recurring basis as of June 30, 2008:

($ in millions)	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Other Valuations and Netting	Balance as of June 30, 2008
Financial assets

% of Total financial liabilities	0.0%	119.1%	47.0%	(66.1)%	100.0%

(1) In accordance with FSP FIN 39 1, the Company nets all fair value amounts recognized for derivative instruments and fair value amounts recognized for the right to reclaim cash collateral or the obligation to return cash collateral executed with the same counterparty under a master netting agreement. At June 30, 2008, the right to reclaim cash collateral was offset by securities held, and the obligation to return collateral was $151 million.

THE ALLSTATE CORPORATION AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

As required by SFAS No. 157, when the inputs used to measure fair value fall within different levels of the hierarchy, the level within which the fair value measurement is categorized is based on the lowest level input that is significant to the fair value measurement in its entirety. Thus, a Level 3 fair value measurement may include inputs that are observable (Level 1 or Level 2) and unobservable (Level 3). Gains and losses for such assets and liabilities categorized within the Level 3 table may include changes in fair value that are attributable to both observable inputs (Level 1 and Level 2) and unobservable inputs (Level 3). Net transfers in and/or out of Level 3 are reported as having occurred at the beginning of the period; therefore, all realized and unrealized gains and losses on these securities for the period are reflected in the table below. Further, it should be noted that the following table does not take into consideration the effect of offsetting Level 1 and Level 2 financial instruments entered into that economically hedge certain exposures to the Level 3 positions.

The following table provides a summary of changes in fair value during the three month period ended June 30, 2008 of Level 3 financial assets and financial liabilities held at fair value on a recurring basis at June 30, 2008.

		Total realized and unrealized Gains (Losses) included in:					Total Gains (Losses) included in Net Income for Instruments Still Held at
($ in millions)	**Balance as of March 31, 2008**	**Net Income (1)**	**OCI on Statement of Financial Position**	**Purchases, Sales, Issuances and Settlements, net**	**Net Transfers In and/or (Out) of Level 3**	**Balance as of June 30, 2008**	**June 30, 2008 (4)**
Financial assets							
Fixed income securities	$ 22,566	$ (826)	$ 258	$ (1,223)	$ 1,512	$ 22,287	$ (801)
Equity securities	128	(4)	(3)	36	(82)	75	(2)

(1) The amounts above total $(1.23) billion and are reported in the Condensed Consolidated Statements of Operations as follows: $(1.23) billion in Realized capital gains and losses; $28 million in Net investment income; $(4) million in Interest credited to contractholder funds; and $(25) million in Life and annuity contract benefits.

(2) Comprises $59 million of financial assets and $(78) million of financial liabilities.

(3) Comprises $22.42 billion of investments and $(78) million of free standing derivatives included in financial liabilities.

(4) The amounts above represent gains and losses included in net income for the period of time that the financial asset or financial liability was determined to be in Level 3. These gains and losses total $(1.16) billion and are reported in the Condensed Consolidated Statements of Operations as follows: $(1.16) billion in Realized capital gains and losses; $28 million in Net investment income; $(1) million in Interest credited to contractholder funds; and $(25) million in Life and annuity contract benefits.

5. Reserve for Property Liability Insurance Claims and Claims Expense

The Company establishes reserves for claims and claims expense (loss) on reported and unreported claims of insured losses. The Company s reserving process takes into account known facts and interpretations of circumstances and factors including the Company s experience with similar cases, actual claims paid, historical trends involving claim payment patterns and pending levels of unpaid claims, loss management programs, product mix and contractual terms, law changes, court decisions, changes to regulatory requirements and economic conditions. In the normal course of business, the Company may also supplement its claims processes by utilizing third party adjusters, appraisers, engineers, inspectors, other professionals and information sources to assess and settle catastrophe and non catastrophe related claims. The effects of inflation are implicitly considered in the reserving process.

Because reserves are estimates of unpaid portions of losses that have occurred, including incurred but not reported (IBNR) losses, the establishment of appropriate reserves, including reserves for catastrophes, is an inherently uncertain and complex process. The ultimate cost of losses may vary materially from recorded amounts, which are based on management s best estimates. The highest degree of uncertainty is associated with reserves for losses incurred in the current reporting period as it contains the greatest proportion of losses that have not been reported or settled. The Company regularly updates its reserve estimates as new information becomes available and as events unfold that may affect the resolution of unsettled claims. Changes in prior year reserve estimates, which may be material, are reported in property liability insurance claims and claims expense in the Condensed Consolidated Statements of Operations in the period such changes are determined.

Management believes that the reserve for property liability claims and claims expense, net of reinsurance recoverables, is appropriately established in the aggregate and adequate to cover the ultimate net cost of reported and unreported claims arising from losses which had occurred by the date of the Condensed Consolidated Statement of Financial Position based on available facts, technology, laws and regulations.

THE ALLSTATE CORPORATION AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

6. Reinsurance

Property liability insurance premiums earned and life and annuity premiums and contract charges have been reduced by the reinsurance premium ceded amounts shown in the following table.

	Three months ended June 30,		Six months ended June 30,	
($ in millions)	**2008**	**2007**	**2008**	**2007**
Property liability insurance premiums earned	$ 294	$ 349	$ 624	$ 696
Life and annuity premiums and contract charges	225	244	459	477

Property liability insurance claims and claims expense and life and annuity contract benefits and interest credited to contractholder funds have been reduced by the reinsurance recovery amounts shown in the following table.

	Three months ended June 30,		Six months ended June 30,	
($ in millions)	**2008**	**2007**	**2008**	**2007**
Property-liability insurance claims and claims expense	$ 47	$ 99	$ 120	$ 203
Life and annuity contract benefits	169	172	362	318
Interest credited to contractholder funds	8	11	18	24

Property Liability

During the second quarter, the Company entered into several reinsurance agreements effective in June, 2008, including a Texas agreement that provides for coverage for Allstate Protection personal property excess catastrophe losses in Texas for hurricane catastrophe losses effective June 18, 2008 to June 17, 2011, and four separate agreements for Allstate Floridian and its subsidiaries (Allstate Floridian) that provide coverage for personal property excess catastrophe losses in Florida effective June 1, 2008 to May 31, 2009. The Florida agreements coordinate coverage with the Florida Hurricane Catastrophe Fund.

7. Company Restructuring

The Company undertakes various programs to reduce expenses. These programs generally involve a reduction in staffing levels, and in certain cases, office closures. Restructuring and related charges include employee termination and relocation benefits, and post exit rent expenses in connection with these programs, and non cash charges resulting from pension benefit payments made to agents in connection with the 1999 reorganization of Allstate s multiple agency programs to a single exclusive agency program and the Company s 2006 voluntary termination offer. The expenses related to these activities are included in the Condensed Consolidated Statements of Operations as restructuring and related charges, and totaled $(5) million and $4 million for the three month periods ended June 30, 2008 and 2007, respectively, and $(6) million and $3 million for the six month periods ended June 30, 2008 and 2007, respectively.

The following table illustrates the changes in the restructuring liability during the six month period ended June 30, 2008:

($ in millions)	**Employee costs**	**Exit costs**	**Total liability**
Balance at the beginning of the year	$ 23	$ 2	$ 25
Expense incurred	10		10
Adjustments to liability	(13)		(13)
Payments applied against liability	(8)		(8)
Balance at the end of the period	$ 12	$ 2	$ 14

The payments applied against the liability for employee costs primarily reflect severance costs.

THE ALLSTATE CORPORATION AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

8. Guarantees and Contingent Liabilities

State facility assessments

The Company is required to participate in assigned risk plans, reinsurance facilities and joint underwriting associations in various states that provide insurance coverage to individuals or entities that otherwise are unable to purchase such coverage from private insurers. Because of the Company s participation, it may be exposed to losses that surpass the capitalization of these facilities and/or to assessments from these facilities.

Shared markets

As a condition of maintaining its licenses to write personal property and casualty insurance in various states, the Company is required to participate in assigned risk plans, reinsurance facilities and joint underwriting associations that provide various types of insurance coverage to individuals or entities that otherwise are unable to purchase such coverage from private insurers. Underwriting results related to these arrangements, which tend to be adverse, have been immaterial to the Company s results of operations.

Guarantees

The Company provides residual value guarantees on Company leased automobiles. If all outstanding leases were terminated effective June 30, 2008, the Company s maximum obligation pursuant to these guarantees, assuming the automobiles have no residual value, would be $19 million at June 30, 2008. The remaining term of each residual value guarantee is equal to the term of the underlying lease that range from less than one year to three years. Historically, the Company has not made any material payments pursuant to these guarantees.

The Company owns certain fixed income securities that obligate the Company to exchange credit risk or to forfeit principal due, depending on the nature or occurrence of specified credit events for the referenced entities. In the event all such specified credit events were to occur, the Company s maximum amount at risk on these fixed income securities, as measured by the amount of the aggregate initial investment, was $207 million at June 30, 2008. The obligations associated with these fixed income securities expire at various times during the next six years.

Related to the disposal through reinsurance of substantially all of Allstate Financial s variable annuity business to Prudential Financial, Inc. and its subsidiary in 2006, the Company and its consolidated subsidiaries, ALIC and Allstate Life Insurance Company of New York (ALNY), have agreed to indemnify Prudential for certain pre closing contingent liabilities (including extra contractual liabilities of ALIC and ALNY and

liabilities specifically excluded from the transaction) that ALIC and ALNY have agreed to retain. In addition, the Company, ALIC and ALNY will each indemnify Prudential for certain post closing liabilities that may arise from the acts of ALIC, ALNY and their agents, including in connection with ALIC s and ALNY s provision of transition services. The Reinsurance Agreements contain no limitations or indemnifications with regard to insurance risk transfer, and transferred all of the future risks and responsibilities for performance on the underlying variable annuity contracts to Prudential, including those related to benefit guarantees, in accordance with the provisions of SFAS No. 113 Accounting and Reporting for Reinsurance of Short Duration and Long Duration Contracts . Management does not believe this agreement will have a material adverse effect on results of operations, cash flows or financial position of the Company.

In the normal course of business, the Company provides standard indemnifications to contractual counterparties in connection with numerous transactions, including acquisitions and divestitures. The types of indemnifications typically provided include indemnifications for breaches of representations and warranties, taxes and certain other liabilities, such as third party lawsuits. The indemnification clauses are often standard contractual terms and are entered into in the normal course of business based on an assessment that the risk of loss would be remote. The terms of the indemnifications vary in duration and nature. In many cases, the maximum obligation is not explicitly stated and the contingencies triggering the obligation to indemnify have not occurred and are not expected to occur. Consequently, the maximum amount of the obligation under such indemnifications is not determinable. Historically, the Company has not made any material payments pursuant to these obligations.

The aggregate liability balance related to all guarantees was not material as of June 30, 2008.

(Unaudited)

Regulation

The Company is subject to changing social, economic and regulatory conditions. From time to time, regulatory authorities or legislative bodies seek to influence and restrict premium rates, require premium refunds to policyholders, restrict the ability of insurers to cancel or non renew policies, require insurers to continue to write new policies or limit their ability to write new policies, limit insurers ability to change coverage terms or to impose underwriting standards, impose additional regulations regarding agent and broker compensation and otherwise expand overall regulation of insurance products and the insurance industry. The ultimate changes and eventual effects of these initiatives on the Company s business, if any, are uncertain.

The Florida Office of Insurance Regulation (OIR) filed an Immediate Final Order (IFO) with respect to ten affiliated Allstate companies on January 17, 2008, suspending their certificates of authority in Florida and ordering them to discontinue transacting any new insurance business in Florida until all requested documents were produced in accordance with previously issued OIR subpoenas. The subpoenas were issued in connection with the investigation of residential property insurance rate practices but sought a wide range of information. The IFO order allowed the companies to continue all of their existing insurance business and renewals of that insurance; only the writing of new insurance policies was prohibited. On January 18, 2008, the companies filed an emergency motion for immediate relief with the First District Court of Appeal of the State of Florida. The Court granted the motion and stayed the order and subsequently upheld the stay pending a final disposition on the merits. On May 16, 2008, the OIR stayed enforcement of its IFO, relying on the companies submission of an affidavit certifying that the companies have complied with Florida law by providing documents requested by the OIR. That same day, the companies resumed writing new property and casualty business. In June 2008, the Florida Supreme Court denied the companies request to review the First District Court of Appeal s ruling that the OIR had the authority to issue the IFO. The companies are abiding by the Court s decision. In February 2008, the OIR filed an administrative complaint against the companies regarding the response to the subpoenas and their rate filing certification process. The filing of this complaint provides the companies with an opportunity for an evidentiary hearing, which was required by Florida law after the OIR issued the IFO. Additionally, following hearings in February 2008 regarding residential property insurance rate practices before the Florida Senate Select Committee on Property Insurance Accountability, the Committee submitted a request to the companies to produce certain documents. The companies have provided responsive documents to both the OIR and the Committee.

Legal and regulatory proceedings and inquiries

Background

The Company and certain subsidiaries are involved in a number of lawsuits, regulatory inquiries, and other legal proceedings arising out of various aspects of its business. As background to the Proceedings subsection below, please note the following:

- These matters raise difficult and complicated factual and legal issues and are subject to many uncertainties and complexities, including the underlying facts of each matter; novel legal issues; variations between jurisdictions in which matters are being litigated, heard, or investigated; differences in applicable laws and judicial interpretations; the length of time before many of these matters might be resolved by settlement, through litigation or otherwise; the fact that some of the lawsuits are putative class actions in which a class has not been certified and in which the purported class may not be clearly defined; the fact that some of the lawsuits involve multi state class actions in which the applicable law(s) for the claims at issue is in dispute and therefore unclear; and the current challenging legal environment faced by large corporations and insurance companies.

- The outcome on these matters may also be affected by decisions, verdicts, and settlements, and the timing of such decisions, verdicts, and settlements, in other individual and class action lawsuits that involve the Company, other insurers, or other entities and by other legal, governmental, and regulatory actions that involve the Company, other insurers, or other entities.

THE ALLSTATE CORPORATION AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

- In the lawsuits, plaintiffs seek a variety of remedies including equitable relief in the form of injunctive and other remedies and monetary relief in the form of contractual and extra contractual damages. In some cases, the monetary damages sought include punitive or treble damages. Often specific information about the relief sought, such as the amount of damages, is not available because plaintiffs have not requested specific relief in their pleadings. When specific monetary demands are made, they are often set just below a state court jurisdictional limit in order to seek the maximum amount available in state court, regardless of the specifics of the case, while still avoiding the risk of removal to federal court. In Allstate s experience, monetary demands in pleadings bear little relation to the ultimate loss, if any, to the Company.

- In connection with regulatory examinations and proceedings, government authorities may seek various forms of relief, including penalties, restitution and changes in business practices. The Company may not be advised of the nature and extent of relief sought until the final stages of the examination or proceeding.

- For the reasons specified above, it is often not possible to make meaningful estimates of the amount or range of loss that could result from the matters described below in the Proceedings subsection. The Company reviews these matters on an ongoing basis and follows the provisions of SFAS No. 5, Accounting for Contingencies , when making accrual and disclosure decisions. When assessing reasonably possible and probable outcomes, the Company bases its decisions on its assessment of the ultimate outcome following all appeals.

- Due to the complexity and scope of the matters disclosed in the Proceedings subsection below and the many uncertainties that exist, the ultimate outcome of these matters cannot be reasonably predicted. In the event of an unfavorable outcome in one or more of these matters, the ultimate liability may be in excess of amounts currently reserved and may be material to the Company s operating results or cash flows for a particular quarterly or annual period. However, based on information currently known to it, management believes that the ultimate outcome of all matters described below as they are resolved over time is not likely to have a material adverse effect on the financial position of the Company.

Proceedings

There are a number of state and nationwide class action lawsuits pending in various state courts challenging the legal propriety of Allstate s medical bill review processes on a number of grounds, including the manner in which Allstate determines reasonableness and necessity. These lawsuits, which to a large degree mirror similar lawsuits filed against other carriers in the industry, allege these processes are used by Allstate systematically to undervalue claims. Plaintiffs seek monetary damages in the form of contractual and extra contractual damages. The Company denies these allegations. One nationwide class action has been certified. The Company continues to vigorously defend these cases.

There is a nationwide putative class action pending against Allstate that challenges Allstate s use of a vendor s automated database in valuing total loss automobiles. To a large degree, this lawsuit mirrors similar lawsuits filed against other carriers in the industry. Plaintiffs allege that Allstate systematically underpays first party total loss vehicle claims. The plaintiffs are seeking actual and punitive damages. The lawsuit is in

the early stages of discovery and Allstate is vigorously defending it.

The Company is defending a number of matters filed in the aftermath of Hurricanes Katrina and Rita, including individual lawsuits, and several statewide putative class action lawsuits pending in Mississippi and Louisiana. These matters are in various stages of development. The lawsuits and developments in litigation arising from the hurricanes include the following:

• The Mississippi Attorney General filed a suit asserting that the flood exclusion found in Allstate s and other insurance companies policies is either ambiguous, unenforceable as unconscionable or contrary to public policy, or inapplicable to the damage suffered in the wake of Hurricane Katrina. Allstate s motion for judgment on the pleadings is pending.

• In a putative class action in Mississippi, some members of the Mississippi Windstorm Underwriters Association (MWUA) have filed suit against the MWUA board members and the companies they represent, including an Allstate subsidiary, alleging that the Board purchased insufficient reinsurance to protect the MWUA members. Plaintiffs motion for class certification has been denied. Discovery as to the individual plaintiffs claims is ongoing.

THE ALLSTATE CORPORATION AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

- In a putative class action in Louisiana, the federal trial court ruled that Allstate s and other insurers flood, water and negligent construction exclusions do not preclude coverage for damage caused by flooding in the New Orleans area to the extent it was caused by human negligence in the design, construction and/or maintenance of the levees. Allstate and other insurers pursued an interlocutory appeal and in June 2007 the United States Court of Appeals for the Fifth Circuit reversed the trial court s ruling. The matter has been remanded to the trial court for further proceedings, which have been consolidated along with other putative class and individual actions brought against the Company and other insurers, challenging the adjustment and settlement of Hurricane Katrina claims. In a case in Louisiana state court involving a similar challenge to the flood exclusion of another carrier, the Louisiana Supreme Court issued its ruling in April 2008 that the flood exclusion is clear and unambiguous, and therefore valid and enforceable regardless of whether the source of the flooding was natural or man made. The Louisiana Supreme Court has denied plaintiffs motion for reconsideration of its ruling. In light of the Louisiana Supreme Court s ruling, the federal trial court has issued an order that all claims for insurance coverage for flood damage, where the policy has a flood exclusion, are dismissed. The plaintiffs bar has moved for reconsideration of the federal trial court s dismissal.

- The Company has also been sued in a putative class action in the United States District Court for the Western District of Louisiana. The plaintiffs allege that they were entitled to, but did not receive, payment for general contractor overhead and profit or that the overhead and profit they received was not adequate to compensate them for the entire costs of a general contractor. The Company s motion to strike the class allegations was denied and the parties are proceeding with discovery. Plaintiffs motion for class certification is pending.

- The Louisiana Attorney General filed a class action lawsuit in state court against Allstate and other insurers on behalf of Road Home fund recipients alleging that the insurers have failed to pay all damages owed under their policies. The insurers removed the matter to federal court. The district court denied plaintiffs motion to remand the matter to state court and the U.S. Court of Appeals for the Fifth Circuit has upheld the denial of remand motion. The matter will now proceed in federal court.

- The Louisiana Attorney General also has filed a lawsuit in state court against Allstate, other insurers, a consulting company, and two computer database companies. The lawsuit is brought under the Louisiana Monopolies Act and generally alleges the defendants conspired to suppress competition and thwart policyholder recoveries. The defendants removed the matter to federal court. Plaintiffs motion to remand the matter to state court was defeated at both the trial court and Court of Appeals levels. The matter now will proceed in federal court.

- Private plaintiffs have filed *qui tam* actions under the Federal False Claims Act against Allstate and certain other

insurers in Louisiana and Mississippi federal courts regarding claims that they administered under the federally funded National Flood Insurance Program. The basic allegations are that insurers and engineering firms falsely or fraudulently identified the cause of Hurricane Katrina related property damage as flood so that those claims would be paid through the National Flood Insurance Program. The action brought in federal court in Louisiana has been dismissed. Plaintiffs are appealing that dismissal. In the Mississippi action, plaintiffs have, with the Government s consent, filed a motion to voluntarily dismiss Allstate.

The various suits described above seek a variety of remedies, including actual and/or punitive damages in unspecified amounts and/or declaratory relief. The Company has been vigorously defending these suits and other matters related to Hurricanes Katrina and Rita.

In addition, the Company had been providing documents to federal and state authorities conducting investigations into the insurance industry s handling of claims in the aftermath of Hurricanes Katrina and Rita, including a federal grand jury sitting in the Southern District of Mississippi. With the agreement of the respective authorities, the Company currently has suspended the production of documents. Other insurers have received similar subpoenas and requests for information.

Allstate is defending various lawsuits involving worker classification issues. These lawsuits include several certified class actions challenging the overtime exemption claimed by the Company under the Fair Labor Standards Act or a state wage and hour law. In these cases, plaintiffs seek monetary relief, such as penalties and liquidated damages, and non monetary relief, such as injunctive relief. These class actions mirror similar lawsuits filed against other carriers in the industry and other employers. Allstate is continuing to vigorously defend its worker classification lawsuits.

THE ALLSTATE CORPORATION AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

The Company is defending certain matters relating to the Company s agency program reorganization announced in 1999. These matters are in various stages of development.

- These matters include a lawsuit filed in 2001 by the U.S. Equal Employment Opportunity Commission (EEOC) alleging retaliation under federal civil rights laws (the EEOC I suit) and a class action filed in 2001 by former employee agents alleging retaliation and age discrimination under the Age Discrimination in Employment Act (ADEA), breach of contract and ERISA violations (the Romero I suit). In 2004, in the consolidated EEOC I and Romero I litigation, the trial court issued a memorandum and order that, among other things, certified classes of agents, including a mandatory class of agents who had signed a release, for purposes of effecting the court s declaratory judgment that the release is voidable at the option of the release signer. The court also ordered that an agent who voids the release must return to Allstate any and all benefits received by the [agent] in exchange for signing the release. The court also stated that, on the undisputed facts of record, there is no basis for claims of age discrimination. The EEOC and plaintiffs have asked the court to clarify and/or reconsider its memorandum and order and in January 2007, the judge denied their request. In June 2007, the court granted the Company s motions for summary judgment. Following plaintiffs filing of a notice of appeal, the Third Circuit issued an order in December 2007 stating that the notice of appeal was not taken from a final order within the meaning of the federal law and thus not appealable at this time. In March 2008, the Third Circuit decided that the appeal should not summarily be dismissed and that the question of whether the matter is appealable at this time will be addressed by the Court along with the merits of the appeal.

- The EEOC also filed another lawsuit in 2004 alleging age discrimination with respect to a policy limiting the rehire of agents affected by the agency program reorganization (the EEOC II suit). In EEOC II, in 2006, the court granted partial summary judgment to the EEOC. Although the court did not determine that the Company was liable for age discrimination under the ADEA, it determined that the rehire policy resulted in a disparate impact, reserving for trial the determination on whether the Company had reasonable factors other than age to support the rehire policy. In June 2008, the Eighth Circuit Court of Appeals affirmed summary judgment in the EEOC s favor. The Company filed a petition for rehearing *en banc*.

- The Company is also defending a certified class action filed by former employee agents who terminated their employment prior to the agency program reorganization. Plaintiffs allege that they were constructively discharged so that Allstate could avoid paying ERISA and other benefits offered under the reorganization. They claim that the constructive discharge resulted from the implementation of agency standards, including mandatory office hours and a requirement to have licensed staff available during business hours. The court approved the form of class notice which was sent to approximately 1,800 potential class members in November 2007. Fifteen individuals opted out. The Company s motions for judgment on the pleadings were partially granted. In May 2008, the Court granted summary judgment in Allstate s favor on all class claims. Plaintiffs moved for reconsideration and in the alternative to decertify

the class. Allstate opposed this motion and filed a motion for summary judgment with respect to the remaining non class claim.

• A putative nationwide class action has also been filed by former employee agents alleging various violations of ERISA, including a worker classification issue. These plaintiffs are challenging certain amendments to the Agents Pension Plan and are seeking to have exclusive agent independent contractors treated as employees for benefit purposes. This matter was dismissed with prejudice by the trial court, was the subject of further proceedings on appeal, and was reversed and remanded to the trial court in 2005. In June 2007, the court granted Allstate s motion to dismiss the case. Following plaintiffs filing of a notice of appeal, the Third Circuit issued an order in December 2007 stating that the notice of appeal was not taken from a final order within the meaning of the federal law and thus not appealable at this time. In March 2008, the Third Circuit decided that the appeal should not summarily be dismissed and that the question of whether the matter is appealable at this time will be addressed by the Court along with the merits of the appeal.

In all of these various matters, plaintiffs seek compensatory and punitive damages, and equitable relief. Allstate has been vigorously defending these lawsuits and other matters related to its agency program reorganization.

THE ALLSTATE CORPORATION AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Allstate is defending a certified 13 state class action challenging the method by which Allstate discloses installment fees. The plaintiffs contend that installment fees must be disclosed on the insurance policy itself, which would include the declarations page, because the fees allegedly meet the legal definition of premium. Plaintiffs seek repayment of installment fees since October 1996. The New Mexico trial court had initially certified the 13 state class in 2005. In 2007, the class, except for New Mexico, was set aside on appeal. In June 2008, the New Mexico Supreme Court reinstated the 13 state class of Allstate policyholders who paid installment fees from October 1996 to present. The Court has denied the Company s motion for reconsideration.

The Company is vigorously defending its auto and homeowners insurance rates in administrative actions filed by the Texas and California Departments of Insurance. The Departments are focusing on the reasonableness of the Company s rates for the risks to which they apply.

- In 2004, the Company made a homeowners rate filing in Texas requesting to reduce its rates by approximately 1.5%. In December 2004, the Texas Commissioner of Insurance disapproved that filing and began proceedings to disapprove the Company s then current rates. Following an administrative hearing process, in 2006, the Commissioner ordered the Company to reduce its then current homeowners rates by 5% and to pay refunds on the difference plus interest back to December 30, 2004, for which the Company has been accruing. The Company implemented a 5% rate decrease occurring in two stages, but challenged this 2006 refund order in the Travis County, Texas district court. In March 2007, the district court affirmed in whole the Texas Commissioner s rate refund order. In April 2007, the Company appealed the judgment of the district court to the Third Court of Appeals, Austin, Texas. In May 2008, the Company resolved the dispute with the Commissioner. The Company has agreed to dismiss its appeal and the Commissioner has agreed to amend his order. Instead, the Company will be required to pay refunds in the total amount of principal and interest of $36.8 million for the period of December 1, 2004 through April 23, 2006.

- Allstate filed and implemented an 8% homeowners rate increase in August 2007 and immediately received an order from the Texas Commissioner of Insurance disapproving the rate change. In addition, in October 2007 the Commissioner ordered the Company to pay refunds of its homeowners rates amounting to approximately 6.5% for the period between August 20, 2007 and October 5, 2007, and refunds of approximately 18.5% for the period following October 5, 2007, plus interest. In May 2008, the Company resolved this dispute with the Commissioner. The Commissioner has agreed to vacate his refund order and vacate his disapproval of the Company s August 2007 rate increase. The Company has agreed to provide credits or refunds of 3% to certain policyholders for the period between August 20, 2007 and June 1, 2008, and to also reduce its current rate level by an average of 3%, effective June 1, 2008.

- In 2006, the Company made an automobile rate filing in California. Following a rate hearing, the California Department of Insurance (CDI) issued an order in March 2008 directing the Company to reduce its rates by 15.9%.

The Company implemented the rate reduction effective April 28, 2008. The Company has withdrawn its appeal of the order.

- In 2006, the Company made a homeowners rate filing in California. Following a rate hearing, the CDI issued an order in July 2008 directing the Company to reduce its rates by 28.5%. The Company is complying with this order. Additionally, in May 2007, the CDI issued an Order to Show Cause and commenced an administrative hearing seeking an order directing Allstate to issue refunds to its California homeowners customers for rates dating to May 2007 based upon the allegation that Allstate s current rates are excessive. The CDI has made the decision to withdraw the Order to Show Cause.

Other Matters

Various other legal, governmental, and regulatory actions, including state market conduct exams, and other governmental and regulatory inquiries are currently pending that involve the Company and specific aspects of its conduct of business. Like other members of the insurance industry, the Company is the target of a number of class action lawsuits and other types of proceedings, some of which involve claims for substantial or indeterminate amounts. These actions are based on a variety of issues and target a range of the Company s practices. The outcome of these disputes is currently unpredictable.

THE ALLSTATE CORPORATION AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

One or more of these matters could have an adverse effect on the Company s operating results or cash flows for a particular quarterly or annual period. However, based on information currently known to it, management believes that the ultimate outcome of all matters described in this Other Matters subsection, in excess of amounts currently reserved, as they are resolved over time is not likely to have a material effect on the operating results, cash flows or financial position of the Company.

Shareholder Derivative Suit

In January 2008, a shareholder derivative action was filed, purportedly on behalf of The Allstate Corporation, against the members of its Board of Directors, in the United States District Court for the Northern District of Illinois, Eastern Division. This derivative action alleges breaches of fiduciary duties, abuse of control, gross mismanagement, and waste of corporate assets in connection with Allstate s actions to protect certain documents from public disclosure in litigation and regulatory proceedings. The complaint further alleges wrongdoing with respect to Allstate s claim handling. According to the allegations, the director defendants conspired to approve or permit these alleged wrongs to occur and participated in efforts to conceal them from Allstate s stockholders. Plaintiff alleges that these actions have resulted in a variety of sanctions and adverse orders being entered against Allstate by various courts and the Florida Office of Insurance Regulation. The complaint seeks an unspecified amount of damages. The defendants have moved to dismiss the complaint.

Asbestos and environmental

Allstate s reserves for asbestos claims were $1.25 billion and $1.30 billion, net of reinsurance recoverables of $724 million and $752 million, at June 30, 2008 and December 31, 2007, respectively. Reserves for environmental claims were $223 million and $232 million, net of reinsurance recoverables of $103 million and $107 million, at June 30, 2008 and December 31, 2007, respectively. Approximately 63% of the total net asbestos and environmental reserves at June 30, 2008 and December 31, 2007 were for incurred but not reported estimated losses.

Management believes its net loss reserves for asbestos, environmental and other discontinued lines exposures are appropriately established based on available facts, technology, laws and regulations. However, establishing net loss reserves for asbestos, environmental and other discontinued lines claims is subject to uncertainties that are greater than those presented by other types of claims. The ultimate cost of losses may vary materially from recorded amounts, which are based on management s best estimate. Among the complications are lack of historical data, long reporting delays, uncertainty as to the number and identity of insureds with potential exposure and unresolved legal issues regarding policy coverage; unresolved legal issues regarding the determination, availability and timing of exhaustion of policy limits; plaintiffs evolving and expanding theories of liability, availability and collectibility of recoveries from reinsurance, retrospectively determined premiums and other contractual agreements; and estimating the extent and timing of any contractual liability, and other uncertainties. There are also complex legal issues concerning the interpretation of various insurance policy provisions and whether those losses are covered, or were ever intended to be covered, and could be recoverable through retrospectively determined premium, reinsurance or other contractual agreements. Courts have reached different and sometimes inconsistent conclusions as to when losses are deemed to have occurred and which policies provide coverage; what types of losses are covered; whether there is an insurer obligation to defend; how policy limits are determined; how policy exclusions and conditions are applied and interpreted; and whether clean up costs represent insured property damage. Management believes these issues are not likely to be resolved in the near future, and the ultimate cost may vary materially from the amounts currently recorded resulting in an increase in loss reserves. In addition, while the Company believes that improved actuarial techniques and databases have assisted in its ability to estimate

asbestos, environmental, and other discontinued lines net loss reserves, these refinements may subsequently prove to be inadequate indicators of the extent of probable losses. Due to the uncertainties and factors described above, management believes it is not practicable to develop a meaningful range for any such additional net loss reserves that may be required.

THE ALLSTATE CORPORATION AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

9. Income Taxes

During the second quarter of 2008, the Company settled a case involving its 2003 and 2004 federal income tax returns at the Internal Revenue Service Appeals Office. Settlement of the examination of these tax years resulted in a $57 million decrease to the liability for unrecognized tax benefits, resulting in a liability balance of $19 million at June 30, 2008.

The Company believes it is reasonably possible that the liability balance will not significantly increase or decrease within the next twelve months. Because of the impact of deferred tax accounting, recognition of previously unrecognized tax benefits is not expected to impact the effective tax rate.

The Company recognizes interest accrued related to unrecognized tax benefits in income tax expense. During the six months ended June 30, 2008, the balance of interest expense accrued with respect to unrecognized tax benefits decreased to $1 million from $7 million at January 1, 2008 due to the Appeals settlement for 2003 and 2004. $4 million of this reduction was recognized in tax expense in the second quarter of 2008. No amounts have been accrued for penalties.

10. Components of Net Periodic Pension and Postretirement Benefit Costs

The components of net periodic cost for the Company s pension and postretirement benefit plans are as follows:

($ in millions)	Three months ended June 30, 2008	Three months ended June 30, 2007	Six months ended June 30, 2008	Six months ended June 30, 2007

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of

The Allstate Corporation

Northbrook, IL 60062

We have reviewed the accompanying condensed consolidated statements of financial position of The Allstate Corporation and subsidiaries (the Company) as of June 30, 2008, and the related condensed consolidated statements of operations for the three-month and six-month periods ended June 30, 2008 and 2007, and of cash flows for the six-month periods ended June 30, 2008 and 2007. These interim financial statements are the responsibility of the Company s management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to such condensed consolidated interim financial statements for them to be in conformity with accounting principles generally accepted in the United States of America.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated statement of financial position of The Allstate Corporation and subsidiaries as of December 31, 2007, and the related consolidated statements of operations, comprehensive income, shareholders equity, and cash flows for the year then ended (not presented herein); and in our report dated February 26, 2008, which report includes an explanatory paragraph relating to a change in the Company s method of accounting for uncertainty in income taxes and accounting for deferred acquisition costs associated with internal replacements in 2007 and defined pension and other postretirement plans in 2006, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated statement of financial position as of December 31, 2007 is fairly stated, in all material respects, in relation to the consolidated statement of financial position from which it has been derived.

The components of other comprehensive (loss) income on a pre-tax and after tax basis are as follows:

Item 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS FOR THE THREE-MONTH AND SIX-MONTH PERIODS ENDED JUNE 30, 2008 AND 2007

OVERVIEW

The following discussion highlights significant factors influencing the consolidated financial position and results of operations of The Allstate Corporation (referred to in this document as we , our , us , the Company or Allstate). It should be read in conjunction with the condensed consolidated financial statements and notes thereto found under Part I. Item 1. contained herein, and with the discussion, analysis, consolidated financial statements and notes thereto in Part I. Item 1. and Part II. Item 7. and Item 8. of The Allstate Corporation Annual Report on Form 10-K for 2007. Further analysis of our insurance segments is provided in the Property-Liability Operations (which includes the Allstate Protection and the Discontinued Lines and Coverages segments) and in the Allstate Financial Segment sections of Management s Discussion and Analysis (MD&A). The segments are consistent with the way in which we use financial information to evaluate business performance and to determine the allocation of resources.

Allstate s goal is to reinvent protection and retirement for the consumer. To achieve this goal, Allstate is focused on the following operating priorities: consumer focus, operational excellence, enterprise risk and return, and capital management.

HIGHLIGHTS

- Net income decreased $1.38 billion to $25 million in the second quarter of 2008 from $1.40 billion in the second quarter of 2007, and $2.53 billion to $373 million in the first six months of 2008 from $2.90 billion in the first six months of 2007. Net income per diluted share decreased $2.25 to $0.05 in the second quarter of 2008 from $2.30 in the second quarter of 2007, and $4.04 to $0.67 in the first six months of 2008 from $4.71 in the first six months of 2007.

- The Property-Liability combined ratio was 94.4 in the second quarter of 2008 compared to 87.6 in the second quarter of 2007 and 94.2 in the first six months of 2008 compared to 86.1 in the first six months of 2007.

- Allstate Financial had a net loss of $379 million in the second quarter of 2008 compared to net income of $200 million in the second quarter of 2007, and a net loss of $490 million in the first six months of 2008 compared to net income of $364 million in the first six months of 2007.

- Total revenues decreased 21.5% to $7.42 billion in the second quarter of 2008 from $9.46 billion in the second quarter of 2007, and 17.5% to $15.51 billion in the first six months of 2008 from $18.79 billion in the first six months of 2007.

- Property-Liability premiums earned decreased 1.1% to $6.75 billion in the second quarter of 2008 from $6.82 billion in the second quarter of 2007, and 0.8% to $13.51 billion in the first six months of 2008 from $13.63 billion in the first six months of 2007.

- Realized capital losses were $1.22 billion and $1.87 billion in the second quarter and first six months of 2008, respectively, compared to realized capital gains of $545 million and $1.02 billion in the second quarter and first six months of 2007, respectively.

- Investments as of June 30, 2008 decreased 4.5% from December 31, 2007 and net investment income decreased 13.6% and 8.3% in the second quarter and first six months of 2008, respectively, compared to the same periods of 2007.

- Book value per diluted share decreased 1.3% to $35.93 as of June 30, 2008 from $36.39 as of June 30, 2007 and decreased 6.9% from $38.58 as of December 31, 2007.

- For the twelve months ended June 30, 2008, return on the average of beginning and ending period shareholders equity decreased 14.8 points to 10.2% from 25.0% for the twelve months ended June 30, 2007.

- Stock repurchases totaled $434 million and $858 million for the three months and six months ended June 30, 2008, respectively. In the first six months of 2008, we completed our $4.00 billion share repurchase program that commenced in November 2006, and commenced a $2.00 billion share repurchase program that is expected to be completed by March 31, 2009.

PROPERTY-LIABILITY HIGHLIGHTS

- Premiums written, an operating measure that is defined and reconciled to premiums earned on page 33, decreased 2.0% to $6.80 billion in the second quarter of 2008 from $6.94 billion in the second quarter of 2007, and 1.7% to $13.32 billion in the first six months of 2008 from $13.55 billion in the first six months of 2007. Allstate brand standard auto premiums written in the second quarter of 2008 were comparable to the second quarter of 2007. Allstate brand standard auto premiums written increased 0.3% to $8.03 billion in the first six months of 2008 from $8.01 billion in the first six months of 2007. Allstate brand homeowners premiums written decreased 0.8% to $1.53 billion in the second quarter of 2008 from $1.54 billion in the second quarter of 2007, and 1.5% to $2.72 billion in the first six months of 2008 from $2.76 billion in the first six months of 2007.

- Premium operating measures and statistics contributing to the overall Allstate brand standard auto premiums written growth were the following:

- 0.8% decrease in policies in force (PIF) as of June 30, 2008 compared to June 30, 2007

- 0.8 point decline in the six month renewal ratio to 89.1% in the second quarter of 2008 compared to 89.9% in the second quarter of 2007, and 0.8 point decline in the six month renewal ratio to 89.0% in the first six months of 2008 compared to 89.8% in the first six months of

2007

- 1.4% increase in the six month policy term average gross premium before reinsurance to $427 in the second quarter of 2008 from $421 in the second quarter of 2007, and 1.7% increase in the six month policy

term average gross premium before reinsurance to $427 in the first six months of 2008 from $420 in the first six months of 2007

- 6.7% and 10.3% decrease in new issued applications in the second quarter and first six months of 2008, respectively, compared to the same periods of 2007

- Premium operating measures and statistics contributing to the overall Allstate brand homeowners premiums written decline were the following:

- 4.0% decrease in PIF as of June 30, 2008 compared to June 30, 2007

- 1.0 point decline in the twelve month renewal ratio to 86.3% in the second quarter of 2008 compared to 87.3% in the second quarter of 2007, and 0.5 point decline in the twelve month renewal ratio to 86.4% in the first six months of 2008 compared to 86.9% in the first six months of 2007

- 1.9% increase in the twelve month policy term average gross premium before reinsurance to $867 in the second quarter of 2008 from $851 in the second quarter of 2007, and 2.1% increase in the twelve month policy term average gross premium before reinsurance to $867 in the first six months of 2008 from $849 in the first six months of 2007

- 26.1% and 27.1% decrease in new issued applications in the second quarter and first six months of 2008, respectively, compared to the same periods of 2007

- The Allstate brand standard auto loss ratio increased 3.6 points to 67.1 in the second quarter of 2008 from 63.5 in the second quarter of 2007, and 2.7 points to 66.3 in the first six months of 2008 from 63.6 in the first six months of 2007. Standard auto property damage gross claim frequency (rate of claim occurrence per policy in force) decreased 4.2% and 3.3% in the second quarter and first six months of 2008, respectively, from the same periods of 2007, and bodily injury gross claim frequency decreased 7.6% and 7.0% in the second quarter and first six months of 2008, respectively, from the same periods of 2007. Auto property damage and bodily injury paid severities (average cost per claim) increased 2.6% and 7.1%, respectively, in the second quarter of 2008, and 3.4% and 7.8%, respectively, in the first six months of 2008 from the same periods of 2007.

- The Allstate brand homeowners loss ratio, which includes catastrophes, increased 18.8 points to 86.5 in the second quarter of 2008 from 67.7 in the second quarter of 2007, and 21.9 points to 83.3 in the first six months of 2008 from 61.4 in the first six months of 2007. Homeowner gross claim frequency, excluding catastrophes, increased 13.7% and 7.7% in the second quarter and first six months of 2008, respectively, from the same periods of 2007. Homeowners paid severity, excluding catastrophes, increased 0.3% and 1.7% in the second quarter and first six months of 2008, respectively, from the same periods of 2007.

- Catastrophe losses in the second quarter of 2008 totaled $698 million compared to $433 million in the second quarter of 2007 and $1.27 billion in the first six months of 2008 compared to $594 million in the first six months of 2007. Impact of prior year reserve reestimates on catastrophe losses was $11 million and $128 million unfavorable in the second quarter and first six months of 2008, respectively, compared to an unfavorable impact of $50 million and $44 million in the second quarter and first six months of 2007, respectively.

- Prior year reserve reestimates totaled $9 million unfavorable, including $11 million related to catastrophes, in the second quarter of 2008 compared to $143 million favorable, including $50 million unfavorable related to catastrophes, in the same period of 2007, and $110 million unfavorable, including $128 million related to catastrophes, in the first six months of 2008 compared to $272 million favorable, including $44 million unfavorable related to catastrophes, in the same period of 2007.

- Underwriting income for Property-Liability was $378 million in the second quarter of 2008 compared to $845 million in the second quarter of 2007, and $786 million in the first six months of 2008 compared to $1.89 billion in the first six months of 2007. The combined ratio

was 94.4 in the second quarter of 2008 compared to 87.6 in the second quarter of 2007, and 94.2 in the first six months of 2008 compared to 86.1 in the first six months of 2007. Underwriting income, a measure not based on accounting principles generally accepted in the United States of America (GAAP), is defined below.

- Investments as of June 30, 2008 decreased 9.8% from December 31, 2007 and net investment income decreased 16.6% and 10.6% in the second quarter and first six months of 2008, respectively, compared to the same periods of 2007.

- Realized capital losses were $238 million in the second quarter of 2008 compared to realized capital gains of $437 million in the second quarter of 2007, and realized capital losses were $432 million in the first six months of 2008 compared to realized capital gains of $881 million in the first six months of 2007.

PROPERTY-LIABILITY OPERATIONS

Overview Our Property-Liability operations consist of two business segments: Allstate Protection and Discontinued Lines and Coverages. Allstate Protection is comprised of two brands, the Allstate brand and Encompass® brand. Allstate Protection is principally engaged in the sale of personal property and casualty insurance, primarily private passenger auto and homeowners insurance, to individuals in the United States and Canada. Discontinued Lines and Coverages includes results from insurance coverage that we no longer write and results for certain commercial and other businesses in run-off. These segments are consistent with the groupings of financial information that management uses to evaluate performance and to determine the allocation of resources.

Underwriting income (loss), a measure that is not based on GAAP and is reconciled to net income on page 32, is calculated as premiums earned, less claims and claims expense (losses), amortization of deferred policy acquisition costs (DAC), operating costs and expenses and restructuring and related charges, as determined using GAAP. We use this measure in our evaluation of results of operations to analyze the profitability of the Property-Liability insurance operations separately from investment results. It is also an integral component of incentive compensation. It is useful for investors to evaluate the components of income separately and in the aggregate when reviewing performance. Net income is the GAAP measure most directly comparable to underwriting income (loss). Underwriting income (loss) should not be considered as a substitute for net income and does not reflect the overall profitability of the business.

The table below includes GAAP operating ratios we use to measure our profitability. We believe that they enhance an investor s understanding of our profitability. They are calculated as follows:

- Claims and claims expense (loss) ratio - the ratio of claims and claims expense to premiums earned. Loss ratios include the impact of catastrophe losses.
- Expense ratio the ratio of amortization of DAC, operating costs and expenses, and restructuring and related charges to premiums earned.
- Combined ratio the ratio of claims and claims expense, amortization of DAC, operating costs and expenses, and restructuring and related charges to premiums earned. The combined ratio is the sum of the loss ratio and the expense ratio. The difference between 100% and the combined ratio represents underwriting income (loss) as a percentage of premiums earned.

We have also calculated the following impacts of specific items on the GAAP operating ratios because of the volatility of these items between fiscal periods.

- Effect of catastrophe losses on combined ratio the percentage of catastrophe losses included in claims and claims expense to premiums earned. This ratio includes prior year reserve reestimates of catastrophe losses.
- Effect of prior year reserve reestimates on combined ratio the percentage of prior year reserve reestimates included in claims and claims expense to premiums earned. This ratio includes prior year reserve reestimates of catastrophe losses.
- Effect of restructuring and related charges on combined ratio the percentage of restructuring and related charges to premiums earned.

- Effect of Discontinued Lines and Coverages on combined ratio the ratio of claims and claims expense and other costs and expenses in the Discontinued Lines and Coverages segment to Property-Liability premiums earned. The sum of the effect of Discontinued Lines and Coverages on the combined ratio and the Allstate Protection combined ratio is equal to the Property-Liability combined ratio.

31

Summarized financial data, a reconciliation of underwriting income to net income and GAAP operating ratios for our Property-Liability operations are presented in the following table.

($ in millions, except ratios)	Three Months Ended June 30, 2008	Three Months Ended June 30, 2007	Six Months Ended June 30, 2008	Six Months Ended June 30, 2007

Effect of catastrophe losses on combined ratio	10.3	6.3	9.4	4.4
Effect of prior year reserve reestimates on combined ratio	0.1	(2.1)	0.8	(2.0)
Effect of restructuring and related charges on combined ratio	(0.1)	0.1		
Effect of Discontinued Lines and Coverages on combined ratio		0.1	0.1	(0.3)

(1) Unfavorable reserve reestimates included in catastrophe losses totaled $11 million and $128 million in the three months and six months ended June 30, 2008, respectively, compared to $50 million and $44 million unfavorable in the three months and six months ended June 30, 2007, respectively.

Premiums written, an operating measure, is the amount of premiums charged for policies issued during a fiscal period. Premiums earned is a GAAP measure. Premiums are considered earned and are included in the financial results on a pro-rata basis over the policy period. The portion of premiums written applicable to the unexpired terms of the policies is recorded as unearned premiums on our Condensed Consolidated Statements of Financial Position. A reconciliation of premiums written to premiums earned is presented in the following table.

($ in millions)	Three Months Ended June 30, 2008	Three Months Ended June 30, 2007	Six Months Ended June 30, 2008	Six Months Ended June 30, 2007
Premiums written:				
Allstate Protection	$ 6,803	$ 6,939	13,317	13,548
Discontinued Lines and Coverages				
Property-Liability premiums written	6,803	6,939	13,317	13,548
(Increase) decrease in unearned premiums (1)	(154)	(125)	140	78
Other (1)	101	8	57	2
Property-Liability premiums earned	$ 6,750	$ 6,822	13,514	13,628
Premiums earned:				
Allstate Protection	$ 6,750	$ 6,822	13,514	13,628
Discontinued Lines and Coverages				
Property-Liability	$ 6,750	$ 6,822	13,514	13,628

(1) The three month and six month ended June 30, 2008 includes $49 million in unearned premiums related to June 27, 2008 acquisition of Partnership Marketing Group.

ALLSTATE PROTECTION SEGMENT

Premium operating measures and statistics that are used to analyze the business are calculated and described below. Measures and statistics presented for Allstate brand exclude Allstate Canada, loan protection and specialty auto.

- PIF: Policy counts are based on items rather than customers. A multi-car customer would generate multiple item (policy) counts, even if all cars were insured under one policy.

- Average premium- gross written: Gross premiums written divided by issued item count. Gross premiums written do not include the impacts from mid-term premium adjustments, ceded reinsurance premiums, or premium refund accruals. Allstate brand average gross premiums represent the appropriate policy term for each line, which is 6 months for standard and non-standard auto and 12 months for homeowners. Encompass brand average gross premiums represent the appropriate policy term for each line, which is 12 months for standard auto and homeowners and 6 months for non-standard auto.

- Renewal ratio: Renewal policies issued during the period, based on contract effective dates, divided by the total policies issued 6 months prior for standard and non-standard auto (12 months prior for Encompass brand standard auto) or 12 months prior for homeowners.

- New issued applications: Item counts of automobiles or homeowners insurance applications for insurance policies that were issued during the period. Does not include automobiles that are added by existing customers.

Allstate Protection standard auto premiums written decreased 0.6% to $4.23 billion in the three months ended June 30, 2008 from $4.25 billion in the same period of 2007 and increased 0.1% to $8.58 billion during the first six months of 2008 from $8.57 billion in the first six months of 2007.

Standard Auto	**Allstate brand** 2008	2007	**Encompass brand(2)** 2008	2007
Three Months Ended June 30,				
PIF (thousands)	18,124	18,271	1,119	1,103
Average premium- gross written (1)	$ 427	$ 421	$ 962	$ 969
Renewal ratio (%)(1)	89.1	89.9	74.1	73.8
Six Months Ended June 30,				
PIF (thousands)	18,124	18,271	1,119	1,103
Average premium- gross written (1)	$ 427	$ 420	$ 962	$ 972
Renewal ratio (%)(1)	89.0	89.8	74.5	74.6

(1) Policy term is six months for Allstate brand and twelve months for Encompass brand.

(2) Premium operating measures and statistics exclude the discontinuation of a large national broker arrangement.

Allstate brand standard auto premiums written in the three months ended June 30, 2008 were comparable to the same period of 2007 and increased 0.3% to $8.03 billion during the first six months of 2008 from $8.01 billion in the first six months of 2007 due to increases in average gross premium, partially offset by declines in PIF. The 0.8% decrease in Allstate brand standard auto PIF as of June 30, 2008 compared to June 30, 2007 was due to a lower renewal ratio and lower new business production. New issued applications decreased 6.7% on a countrywide basis to 447 thousand in the second quarter of 2008 from 479 thousand in the second quarter of 2007 and 10.3% to 901 thousand during the first six months of 2008 from 1 million in the first six months of 2007. Allstate brand standard auto average gross premium increased 1.4% for the three months ended June 30, 2008 and 1.7% in the first six months of 2008 compared to same periods of 2007, primarily due to rate changes, including a 15.9% rate reduction in California related to an order effective in April 2008. The Allstate brand standard auto renewal ratio declined 0.8 points in the second quarter of 2008 and first six months of 2008 compared to the same periods of 2007 due to competitive conditions.

Encompass brand standard auto premiums written decreased 8.4% to $272 million in the three months ended June 30, 2008 from $297 million in the same period of 2007 and 3.7% to $542 million during the first six months of 2008 from $563 million in the first six months of 2007 due to the discontinuation of a large national broker arrangement. Encompass brand standard auto premiums written excluding the terminated national broker s business increased 0.4% to $272 million in the three months ended June 30, 2008 from $271 million in the same period of 2007 and 0.8% to $525 million during the first six months of 2008 from $521 million in the first six months of 2007. The 1.5% increase in Encompass brand standard auto PIF as of June 30, 2008 compared to June 30, 2007 was due to higher new business production, primarily driven by the rollout of the Encompass EdgeSM product. Encompass brand standard auto average gross premium decreased 0.7% for the three months ended June 30, 2008 and 1.0% in the first six months of 2008 compared to the same periods of 2007 due to rate changes and a shift in the mix of business toward policies with basic coverages and fewer features.

Rate increases that are indicated based on loss trend analysis to achieve a targeted return will continue to be pursued. The following table shows the net rate changes that were approved for standard auto during the three-month and six-month periods ended June 30, 2008 and 2007. These rate changes do not reflect initial rates filed for insurance subsidiaries initially writing new business in a state.

	Three Months Ended June 30,					
	# of States		Countrywide (%) (1)		State Specific (%) (2) (3)

---

(1) Represents the impact in the states where rate changes were approved during the three months and six months ended June 30, 2008 and 2007, respectively, as a percentage of total countrywide prior year-end premiums written.

(2) Represents the impact in the states where rate changes were approved during the three months and six months ended June 30, 2008 and 2007, respectively, as a percentage of total prior year-end premiums written in those states.

(3) Based on historical premiums written in those states, rate changes approved for standard auto totaled $(56) million and $80 million for the three months and six months ended June 30, 2008, respectively, compared to $61 million and $117 million for the three months and six months ended June 30, 2007, respectively.

(4) Excluding the impact of a 15.9% rate reduction in California related to an order effective in April 2008, the Allstate brand standard auto rate change is 5.5% on a state specific basis and 1.3% on a countrywide basis for the three months ended June 30, 2008 and 5.4% on a state specific basis and 2.2% on a countrywide basis for the six months ended June 30, 2008. We estimate that this rate decrease will have an impact of $135 million on premiums written and $85 million on underwriting income during the remainder of 2008.

Allstate Protection non-standard auto premiums written decreased 14.5% to $272 million in the three months ended June 30, 2008 from $318 million in the same period of 2007 and 15.5% to $558 million during the first six months of 2008 from $660 million during the first six months of 2007.

	Allstate brand		Encompass brand	
Non-Standard Auto	**2008**	**2007**	**2008**	**2007**
Three Months Ended June 30,				
PIF (thousands)	790	896	48	75
Average premium- gross written	$ 624	$ 613	$ 498	$ 523

Renewal ratio (%)	74.1	77.3	68.5	66.7
Six Months Ended June 30,				
PIF (thousands)	790	896	48	75
Average premium- gross written	$ 626	$ 613	$ 502	$ 522
Renewal ratio (%)	74.3	76.9	66.8	66.2

Allstate brand non-standard auto premiums written decreased 13.0% to $261 million in the three months ended June 30, 2008 from $300 million in the same period of 2007 and 13.8% to $535 million during the first six months of 2008 from $621 million in the first six months of 2007 due to declines in PIF, partially offset by increases in average gross premium. PIF decreased 11.8% as of June 30, 2008 compared to June 30, 2007 as new business production was insufficient to offset the decline in polices available to renew. Allstate brand non-standard auto new issued applications increased 9.9% on a countrywide basis to 78 thousand in the second quarter of 2008 from 71 thousand in the second quarter of 2007 and 10.8% to 164 thousand during the first six months of 2008 from 148 thousand in the first six months of 2007. Both increases were due to the continued rollout of our Allstate BlueSM product. The renewal ratio decreased 3.2 points in the second quarter of 2008 and 2.6 points in the first six months of 2008 compared to the same periods of 2007 due to competitive pressures and rate changes. The Allstate brand non-standard auto average gross premium increased 1.8% for the three months ended June 30, 2008 and 2.1% in the first

six months of 2008 compared to the same periods of 2007 due to changes in customer mix from the rollout of Allstate Blue and rate changes.

Encompass brand non-standard auto premiums written decreased 38.9% to $11 million in the three months ended June 30, 2008 from $18 million in the same period of 2007 and 41.0% to $23 million during the first six months of 2008 from $39 million in the first six months of 2007 due to declines in PIF, driven by new business production that was insufficient to offset the decline in policies available to renew, and lower average gross premium due to geographic shifts in the mix of business.

Rate increases that are indicated based on loss trend analysis to achieve a targeted return will continue to be pursued. The following table shows the net rate changes that were approved for non-standard auto during the three-month and six-month periods ended June 30, 2008 and 2007. These rate changes do not reflect initial rates filed for insurance subsidiaries initially writing new business in a state.

			Three Months Ended June 30,			
	# of States		Countrywide (%) (1)		State Specific (%) (2) (3)	
Non-Standard Auto	**2008**	**2007**	**2008**	**2007**	**2008**	**2007**

Renewal ratio (%)	86.4	86.9	80.6	80.0

(1) Premium operating measures and statistics exclude the discontinuation of a large national broker arrangement.

Allstate brand homeowners premiums written decreased 0.8% to $1.53 billion in the three months ended June 30, 2008 from $1.54 billion in the same period of 2007 and 1.5% to $2.72 billion during the first six months of 2008 from $2.76 billion in the first six months of 2007. The decreases in both periods were due to a 4.0% decline in PIF, due to lower new issued applications and renewals, partially offset by increases in average gross premium, reflecting rate changes, including those taken for our net cost of reinsurance. New issued applications decreased 26.1% on a countrywide basis to 164 thousand in the second quarter of 2008 from 222 thousand in the second quarter of 2007 and 27.1% to 314 thousand during the first six months of 2008 from 431 thousand in the first six months of 2007. The Allstate brand homeowners average gross premium increased 1.9% for the three months ended June 30, 2008 and 2.1% in the first six months of 2008 compared to the same periods of 2007, primarily due to higher average renewal premiums related to increases in insured value and approved rate changes, including those taken for our net cost of reinsurance, partially offset by a shift in geographic mix as our catastrophe management actions reduce premiums written in areas with generally higher average gross premiums. The Allstate brand homeowners renewal ratio decreased 1.0 points in the second quarter of 2008 and 0.5 points in the first six months of 2008 compared to the same periods of 2007 due in part to our catastrophe management actions.

PIF and the renewal ratio will continue to be negatively impacted by our catastrophe management actions such as our decision to discontinue offering coverage by Allstate Floridian Insurance Company and its subsidiaries (Allstate Floridian) on approximately 120,000 property policies as part of a renewal rights and reinsurance arrangement with Royal Palm Insurance Company (Royal Palm) entered into in 2006 (Royal Palm 1), and separately, an additional 106,000 property policies under a renewal rights agreement with Royal Palm entered into in 2007 (Royal Palm 2). Allstate Floridian no longer offers coverage on the policies involved in Royal Palm 1 and Royal Palm 2 when they expire, at which time Royal Palm may offer coverage to these policyholders. The policies involved in Royal Palm 1 and Royal Palm 2 expired at a rate of 4% in the fourth quarter of 2006, 5% in the first quarter of 2007, 27% in the second quarter of 2007, 27% in the third quarter of 2007, 22% in the fourth quarter of 2007, and 14% in the first quarter of 2008. The remaining policies are expected to expire during 2008.

Encompass brand homeowners premiums written decreased 12.2% to $129 million in the three months ended June 30, 2008 from $147 million in the same period of 2007 and 10.4% to $242 million during the first six months of 2008 from $270 million in the first six months of 2007 due to a decline in PIF, and the discontinuation of a large national broker arrangement, partially offset by increases in average gross premium. Encompass brand homeowners premiums written excluding the terminated national broker s business decreased 5.8% to $129 million in the three months ended June 30, 2008 from $137 million in the same period of 2007 and 7.5% to $235 million during the first six months of 2008 from $254 million in the first six months of 2007. The 7.9% decline in Encompass brand homeowners PIF as of June 30, 2008 compared to June 30, 2007 was primarily due to our catastrophe management actions in certain markets. The Encompass brand homeowners average gross premium increased 1.1% for the three months ended June 30, 2008 and 1.6% in the first six months of 2008 compared to the same periods of 2007 due to rate actions including those taken for our net cost of reinsurance.

Rate increases that are indicated based on loss trend analysis to achieve a targeted return will continue to be pursued. The following table shows the net rate changes that were approved for homeowners during the three-month and six-month periods ended June 30, 2008 and 2007, including rate changes approved based on our net cost of reinsurance.

Homeowners

	Three Months Ended June 30,					
	# of States		**Countrywide (%) (1)**		**State Specific (%) (2) (3) (4)**

Allstate brand (5)	23	21	2.0	2.8	4.9	5.8
Encompass brand (6)	17	21	1.4	1.8	6.6	4.3

(1) Represents the impact in the states where rate changes were approved during the three months and six months ended June 30, 2008 and 2007, respectively, as a percentage of total countrywide prior year-end premiums written.

(2) Represents the impact in the states where rate changes were approved during the three months and six months ended June 30, 2008 and 2007, respectively, as a percentage of total prior year-end premiums written in those states.

(3) Based on historical premiums written in those states, rate changes approved for homeowners totaled $48 million and $132 million for the three months and six months ended June 30, 2008, respectively, compared to $81 million and $189 million for the three months and six months ended June 30, 2007, respectively.

(4) During July 2008, we received an order to reduce Allstate brand homeowners rates in the state of California by 28.5%. We estimate that this rate decrease will have an impact of $88 million on premiums written and $15 million on underwriting income during the remainder of 2008.

(5) Excluding the impact of a 3.0% rate reduction in Texas related to a resolution reached in the second quarter of 2008, the Allstate brand homeowners rate change is 3.3% on a state specific basis and 1.0% on a countrywide basis for the three months ended June 30, 2008 and 5.7% on a state specific basis and 2.3% on a countrywide basis for the six months ended June 30, 2008. We estimate that this rate decrease will have an impact of $7 million on premiums written and $1 million on underwriting income during the remainder of 2008.

(6) Includes Washington D.C.

(7) The prior period has been restated to conform to the current period presentation.

Underwriting results are shown in the following table.

---

(1) During the first quarter of 2008, $45 million of incurred but not reported (IBNR) losses were reclassified from standard auto to other personal lines to be consistent with the recording of excess liability policies premiums and losses.

Allstate Protection generated underwriting income of $381 million during the three months ended June 30, 2008 compared to $850 million in the same period of 2007. For the six months ended June 30, 2008, Allstate Protection s underwriting income was $796 million compared to $1.86 billion for the first six months of 2007. The decrease in both periods was primarily due to higher catastrophe losses and the absence of favorable prior year reserve reestimates.

Loss ratios are a measure of profitability. Loss ratios by product, and expense and combined ratios by brand, are shown in the following table. These ratios are defined on page 31.

	Three Months Ended June 30,				Six Months Ended June 30,

(1) During the first quarter of 2008, $45 million of IBNR losses were reclassified from standard auto to other personal lines to be consistent with the recording of excess liability policies premiums and losses.

The following table presents the type and number of catastrophe losses.

	Three months ended June 30,				Six months ended June 30,			
($ in millions)	**2008**	**# Events**	**2007**	**# Events**	**2008**	**# Events**	**2007**	**# Events**
Tornadoes	$ 302	13	$ 93	5	$ 478	17	$ 140	10
Wind/Hail	382	27	248	28	597	45	294	36
Other, including prior year reserve reestimates	14	3	92	1	191	8	160	6

Total Catastrophe losses	$	698	43	$	433	34	$	1,266	70	$	594	52

Standard auto loss ratio increased 3.6 points for the Allstate brand in the three months ended June 30, 2008 and 2.7 points during the first six months of 2008 compared to the same periods of 2007 due to lower favorable reserve reestimates related to prior years and increased catastrophe losses. Standard auto loss ratio for the Encompass brand increased 8.6 points in the three months ended June 30, 2008 compared to the same period of 2007 due to reserve reestimates that were unfavorable in the current year and favorable in the prior years. Standard auto loss ratio for the Encompass brand decreased 2.6 points during the first six months of 2008 compared to the same period of 2007 due to higher favorable reserve reestimates.

Non-standard auto loss ratio increased 0.8 points for the Allstate brand in the three months ended June 30, 2008 and 2.9 points during the first six months of 2008 compared to the same periods of 2007 due to lower favorable reserve reestimates related to prior years. Non-standard auto loss ratio for the Encompass brand increased 3.3 points in the three months ended June 30, 2008 compared to the same period of 2007. Non-standard auto loss ratio for the Encompass brand decreased 1.7 points during the first six months of 2008 compared to the same period of 2007.

Homeowners loss ratio for the Allstate brand increased 18.8 points in the three months ended June 30, 2008 and 21.9 points during the first six months of 2008 compared to the same periods of 2007 largely attributable to higher catastrophe losses. Homeowners loss ratio for the Encompass brand increased 17.5 points in the first three months of June 30, 2008 and 16.8 points during the first six months of 2008 compared to the same periods of 2007 primarily due to higher catastrophe losses.

Expense ratio for Allstate Protection decreased 0.6 points in the three months ended June 30, 2008 compared to the same period of 2007 primarily due to lower employee related costs, including pension, and amortization of DAC. Expense ratio for Allstate Protection during the first six months of 2008 was comparable to the same period of 2007.

The expense ratio for Encompass brand increased 1.0 points in the three months ended June 30, 2008 and 1.2 points during the first six months of 2008 compared to the same periods of 2007 primarily due to lower earned premiums as well as increased state fund assessments.

The impact of specific costs and expenses on the expense ratio are included in the following table.

	Three Months Ended June 30,					
	Allstate brand		Encompass brand		Allstate Protection	
	2008	2007	2008	2007	2008	2007
Amortization of DAC	14.4	14.8	20.0	20.0	14.9	15.1
Other costs and expenses	8.9	9.2	8.7	7.7	8.9	9.1
Restructuring and related charges	(0.1)	0.1			(0.1)	0.1
Total expense ratio	23.2	24.1	28.7	27.7	23.7	24.3

	Six Months Ended June 30,					
	Allstate brand		Encompass brand		Allstate Protection

Total expense ratio	23.9	24.0	28.5	27.3	24.2	24.2

Allstate Protection Reinsurance

During the second quarter of 2008, we completed our 2008 catastrophe reinsurance program by placing a Florida component and additional coverage in the state of Texas. The Florida component of the reinsurance program is designed separately from the other components of the program to address the distinct needs of our separately capitalized legal entities in that state.

The Texas agreement provides coverage for Allstate Protection personal property excess catastrophe losses in Texas for hurricane catastrophe losses. This agreement was placed with a Cayman Island insurance company, Willow Re Ltd., which completed an offering to unrelated investors for principal at risk, variable market rate notes of $250 million to collateralize hurricane catastrophe losses covered by this agreement. Amounts payable under the reinsurance agreement will be based on an index created by applying predetermined percentages representing our market share to insured personal property industry losses in Texas as reported by Property Claim Services (PCS), a division of Insurance Services Offices, Inc., limited to our actual losses. The limits on our Texas agreement are

designed to replicate as close as possible 100% of $250 million, our estimated market share of estimated modified personal property industry catastrophe losses between $12.5 billion and $15.8 billion, or 100% of our catastrophe losses between $950 million (retention) and $1.2 billion (exhaustion point).

Four separate agreements have been entered into by Allstate Floridian for personal property excess catastrophe losses in Florida, effective June 1, 2008 for one year. These agreements coordinate coverage with the Florida Hurricane Catastrophe Fund, including our elected participation in the optional temporary increase in coverage limit (TICL), (collectively FHCF). We chose not to participate in the optional temporary emergency additional coverage option (TEACO) that is below the mandatory FHCF coverage. The FHCF provides 90% reimbursement on qualifying Allstate Floridian property losses up to an estimated maximum of $458 million in excess of a $99 million retention, including reimbursement of eligible loss adjustment expenses at 5%, for each of the two largest hurricanes and $33 million for all other hurricanes for the season beginning June 1, 2008. The four agreements are listed and described below.

- FHCF Retention provides coverage on $59 million of losses in excess of $40 million and is 100% placed, with one prepaid reinstatement of limit.

- FHCF Sliver provides coverage on 10% co-participation of the FHCF payout, or $46 million and is 100% placed, with one prepaid reinstatement of limit.

- FHCF Back-up provides coverage after the exhaustion of an amount equivalent to the anticipated FHCF reimbursement protection on $458 million of losses in excess of $99 million and is 90% placed.

- FHCF Excess provides coverage on $99 million of losses in excess of the FHCF Retention, FHCF and the FHCF Back-up agreements and is 100% placed, with one prepaid reinstatement of limit.

The terms, retentions and limits for Allstate s additional catastrophe management reinsurance agreements, Texas and Allstate Floridian, as of June 1, 2008 are listed in the following table.

(in millions)	Effective Date	Yr 1	% Placed Yr 2	Yr 3	Reinstatements	Retention	Per Occurrence Limit
Texas(1)	6/18/2008	100	100	100	None	950	250
FHCF Retention(2)	6/1/2008	100	N/A	N/A	2 limits over 1-year term, prepaid	40	59
FHCF(3)	6/1/2008	90	N/A	N/A	Annual remeasurements with a first and	99 for the 2 largest storms, 33 for	458

					second season coverage provision	all other storms	
FHCF Sliver(4)	6/1/2008	100	N/A	N/A	2 limits over 1-year term, prepaid	99	10% co-participation of the FHCF recoveries estimated at $458, up to a limit of $46
FHCF Back-up(5)	6/1/2008	90	N/A	N/A	1 limit over 1-year term	Back-up for FHCF	458

43

---

(1) Texas This agreement is effective 6/18/2008 to 6/17/2011 and covers Allstate Protection personal property excess catastrophe losses for hurricanes. This agreement provides coverage for 100% of $250 million, our estimated market share of estimated modified personal property industry catastrophe losses between $12.5 billion and $15.8 billion, or 100% of our catastrophe losses between $950 million (retention) and $1.2 billion (exhaustion point). Qualifying losses under this agreement are also eligible to be ceded under the Texas multi-peril and aggregate excess agreement.

(2) FHCF Retention - provides coverage beginning 6/1/2008 for 1 year covering personal property excess catastrophe losses on policies written by Allstate Floridian. The preliminary reinsurance premium is subject to redetermination for exposure changes.

(3) FHCF provides 90% reimbursement on qualifying personal property losses up to an estimated maximum per hurricane season. Estimated limits and retentions are calculated for Allstate Floridian Insurance Company and each of its subsidiaries independently, and are subject to annual remeasurements based on 6/30 exposure data. Provisional retentions are initial estimates subject to adjustment upward or downward to the actual retention which is determined based on the submitted exposures of all FHCF participants. As of 6/1/2008, the limits provided are an estimated $309 million for Allstate Floridian Insurance Company, $94 million for Allstate Floridian Indemnity Company, $40 million for Encompass Floridian Insurance Company, and $15 million for Encompass Floridian Indemnity Company for a total of $458 million. Provisional retentions for each of the Floridian companies are an estimated $67 million for Allstate Floridian Insurance Company, $21 million for Allstate Floridian Indemnity Company, $8 million for Encompass Floridian Insurance Company, and $3 million for Encompass Floridian Indemnity Company for a total of $99 million.

(4) FHCF Sliver - provides coverage beginning 6/1/2008 for 1 year covering primarily excess catastrophe losses not reimbursed by the FHCF. The provisional retention is $99 million and is subject to adjustment upward or downward to an actual retention that will equal the FHCF retention as respects business covered by this contract. The preliminary reinsurance premium is subject to redetermination for exposure changes. Estimated limits and retentions are calculated for Allstate Floridian Insurance Company and each of its subsidiaries independently. As of 6/1/2008, the limits provided are an estimated $31 million for Allstate Floridian Insurance Company, $9 million for Allstate Floridian Indemnity Company, $4 million for Encompass Floridian Insurance Company, and $2 million for Encompass Floridian Indemnity Company for a total of $46 million. Retentions for each of the Floridian companies are an estimated $67 million for Allstate Floridian Insurance Company, $21 million for Allstate Floridian Indemnity Company, $8 million for Encompass Floridian Insurance Company, and $3 million for Encompass Floridian Indemnity Company for a total of $99 million.

(5) FHCF Back-up provides coverage beginning 6/1/2008 for 1 year covering personal property excess catastrophe losses and is contiguous to the FHCF payout. As the FHCF capacity is paid out, the retention on this agreement automatically adjusts to mirror the amount of the payout. The preliminary reinsurance premium is subject to redetermination for exposure changes. Estimated limits and retentions are calculated for Allstate Floridian Insurance Company and each of its subsidiaries independently. As of 6/1/2008, the limits provided are an estimated $309 million for Allstate Floridian Insurance Company, $94 million for Allstate Floridian Indemnity Company, $40 million

for Encompass Floridian Insurance Company, and $15 million for Encompass Floridian Indemnity Company for a total of $458 million. Retentions for each of the Floridian companies are an estimated $67 million for Allstate Floridian Insurance Company, $21 million for Allstate Floridian Indemnity Company, $8 million for Encompass Floridian Insurance Company, and $3 million for Encompass Floridian Indemnity Company for a total of $99 million.

(6) FHCF Excess - provides coverage beginning 6/1/2008 for 1 year covering excess catastrophe losses. The retention on this agreement is designed to attach above and contiguous to the FHCF and FHCF Back-up. As the FHCF and the FHCF Back-up are paid out, the retention automatically adjusts to mirror the amount of the payout. The preliminary reinsurance premium is subject to redetermination for exposure changes. The estimated limit is calculated for Allstate Floridian Insurance Company on a consolidated basis. Estimated retentions are calculated for Allstate Floridian Insurance Company and each of its subsidiaries independently. As of 6/1/2008, retentions are an estimated $67 million for Allstate Floridian Insurance Company, $21 million for Allstate Floridian Indemnity Company, $8 million for Encompass Floridian Insurance Company, and $3 million for Encompass Floridian Indemnity Company for a total of $99 million.

Highlights of certain other contract terms and conditions for the Texas and Allstate Floridian catastrophe management reinsurance agreements are listed in the following table.

	Texas	**Allstate Floridian(1)**
Business Reinsured	Personal Lines Property Business	Personal Lines Property Business
Location (s)	Texas	Florida
Covered Losses	Hurricanes	Multi-peril including hurricanes and earthquakes
Pertinent Exclusions	Assessment exposure to the Texas Windstorm Insurance Association, Automobile, Terrorism, Commercial	Automobile, Terrorism, Commercial, Policies reinsured under 100% quota share agreements with Royal Palm Insurance Company and Universal Insurance Company of North America
Loss Occurrence	Hurricane event our market share of PCS estimated modified industry catastrophe losses	Sum of all qualifying losses for specific occurrences over 168 hours Windstorm related occurrences over 96 hours Riot related occurrences over 72 hours
Loss adjustment expenses included within ultimate net loss	12.5% of qualifying losses	12.5% of qualifying losses

(1) Allstate Floridian information relates to the FHCF Retention, FHCF Sliver, FHCF Back-up and FHCF Excess agreements.

The reinsurance agreements have been placed in the global reinsurance market, with all limits on our current Florida program and the majority of limits on our other programs placed with reinsurers who currently have an A.M. Best insurance financial strength rating of A or better. The remaining limits are placed with reinsurers who currently have an A.M. Best insurance financial strength rating no lower than A-, with three exceptions. Of the three exceptions, one has a Standard & Poor s (S&P) rating of AA, one has an S&P rating of AA- and we have collateral for the entire contract limit exposure for the reinsurer which is not rated by either rating agency.

We estimate that the total annualized cost of all catastrophe reinsurance programs for the year beginning June 1, 2008 will be approximately $660 million per year or $165 million per quarter. This is compared to $920 million per year for our total annualized cost for the year beginning June 1, 2007, or an estimated annualized cost decrease of $260 million beginning June 1, 2008. The estimated decrease is due in part to our reduced exposure in Florida following our non-renewal activities over the past year. The total cost of our reinsurance programs during 2007 was $216 million in the first quarter, $231 million in the second quarter, $227 million in the third quarter and $222 million in the fourth quarter of 2007. The cost during 2008 was $227 million in the first quarter and $223 million in the second quarter and is estimated to be $165 million in the third and fourth quarters. We continue to attempt to capture our reinsurance cost in premium rates as allowed by state regulatory authorities.

Reserve reestimates

The table below shows net reserves representing the estimated cost of outstanding claims as they were recorded at the beginning of years 2008 and 2007, and the effect of reestimates in each year.

($ in millions)	January 1 Reserves 2008	2007
Auto	$ 10,175	$ 9,995
Homeowners	2,279	2,226
Other personal lines	2,131	2,235
Allstate Protection	$ 14,585	$ 14,456
Allstate brand	$ 13,456	$ 13,220
Encompass brand	1,129	1,236
Allstate Protection	$ 14,585	$ 14,456

	Three Months Ended June 30,				Six Months Ended June 30,			
	Reserve Reestimate		Effect on Combined Ratio		Reserve Reestimate		Effect on Combined Ratio	
($ in millions, except ratios)	2008	2007	2008	2007	2008	2007	2008	2007
Auto (1)	$ (13)	$ (146)	(0.2)	(2.2)	$ (67)	$ (212)	(0.5)	(1.6)
Homeowners	18	25	0.3	0.4	96	22	0.7	0.2
Other lines (1)	2	(26)		(0.4)	74	(44)	0.5	(0.3)
Allstate Protection (2)	$ 7	$ (147)	0.1	(2.2)	$ 103	$ (234)	0.7	(1.7)
Allstate brand	$ (2)	$ (113)		(1.7)	$ 94	$ (192)	0.7	(1.4)
Encompass brand	9	(34)	0.1	(0.5)	9	(42)		(0.3)
Allstate Protection (2)	$ 7	$ (147)	0.1	(2.2)	$ 103	$ (234)	0.7	(1.7)

(1) During the first quarter of 2008, $45 million of IBNR losses were reclassified from standard auto to other lines to be consistent with the recording of excess liability policies premiums and losses.

(2) Unfavorable reserve reestimates included in catastrophe losses totaled $11 million and $128 million in the three months and six months ended June 30, 2008, respectively, compared to $50 million and $44 million unfavorable in the three months and six months ended June 30, 2007, respectively.

DISCONTINUED LINES AND COVERAGES SEGMENT

Overview The Discontinued Lines and Coverages segment includes results from insurance coverage that we no longer write and results for certain commercial and other businesses in run-off. Our exposure to asbestos, environmental and other discontinued lines claims is reported in this segment. We have assigned management of this segment to a designated group of professionals with expertise in claims handling, policy coverage interpretation, exposure identification and reinsurance collection. As part of its responsibilities, this group is also regularly engaged in policy

buybacks, settlements and reinsurance assumed and ceded commutations.

Summarized underwriting results are presented in the following table.

($ in millions)	Three Months Ended June 30, 2008	Three Months Ended June 30, 2007	Six Months Ended June 30, 2008	Six Months Ended June 30, 2007
Premiums written	$	$	$	$
Premiums earned	$	$	$	$
Claims and claims expense	(2)	(3)	(7)	39
Operating costs and expenses	(1)	(2)	(3)	(4)
Underwriting (loss) income	$ (3)	$ (5)	$ (10)	$ 35

Six months ended June 30, 2007 included a $46 million reduction in the reinsurance recoverable valuation allowance related to Equitas Limited s improved financial position as a result of its reinsurance coverage with National Indemnity Company.

PROPERTY-LIABILITY INVESTMENT RESULTS

Net investment income decreased 16.6% in the second quarter of 2008 and 10.6% in the first six months of 2008 compared to the same periods of 2007. These decreases were principally due to decreased partnership income, lower average asset balances reflecting dividends paid by Allstate Insurance Company (AIC) to its parent, The Allstate Corporation, and reduced portfolio yields.

Net realized capital gains and losses, after-tax are presented in the following table.

($ in millions)	Three Months Ended June 30, 2008	Three Months Ended June 30, 2007	Six Months Ended June 30, 2008	Six Months Ended June 30, 2007
Investment write-downs (1)	$ (51)	$ (4)	$ (226)	$ (8)
Sales	24	380	199	796
Change in intent write-downs	(324)	(28)	(375)	(33)
Valuation of derivative instruments	32	64	(91)	72
Settlements of derivative instruments	81	25	61	54
Realized capital gains and losses, pretax	(238)	437	(432)	881
Income tax benefit (expense)	85	(154)	154	(311)
Realized capital gains and losses, after-tax	$ (153)	$ 283	$ (278)	$ 570

(1) Investment write-downs include other-than-temporary impairments except for those related to changes in intent to hold.

For a further discussion of net realized capital gains and losses, see the Investments section of the MD&A.

ALLSTATE FINANCIAL HIGHLIGHTS

- Net loss of $379 million and $490 million in the second quarter and first six months of 2008, respectively, driven by realized capital losses, compared to net income of $200 million and $364 million in the second quarter and first six months of 2007, respectively.
- Net realized capital losses of $965 million and $1.40 billion in the second quarter and first six months of 2008, respectively, compared to net realized capital gains of $104 million and $127 million in the second quarter and first six months of 2007, respectively.
- Contractholder fund deposits totaled $4.32 billion and $7.24 billion for the second quarter and first six months of 2008, respectively, compared to $2.74 billion and $5.19 billion for the second quarter and first six months of 2007, respectively.
- Investments as of June 30, 2008 decreased 2.4% from December 31, 2007 and net investment income decreased 12.4% and 7.9% in the second quarter and first six months of 2008, respectively, compared to the same periods of 2007.

ALLSTATE FINANCIAL SEGMENT

Summarized financial data is presented in the following table.

($ in millions)	Three Months Ended June 30, 2008	Three Months Ended June 30, 2007	Six Months Ended June 30, 2008	Six Months Ended June 30, 2007

Total costs and expenses	(1,042)	(1,337)	(2,245)	(2,648)
Gain (loss) on disposition of operations		2	(9)	2
Income tax benefit (expense)	214	(99)	280	(180)
Net (loss) income	$ (379)	$ 200	$ (490)	$ 364
Investments at June 30			$ 72,504	$ 77,113

Net loss in the second quarter of 2008 of $379 million compared to net income of $200 million in the same period of 2007, and a net loss of $490 million in the first six months of 2008 compared to net income of $364 million in the first six months of 2007. The change was the result of the recognition of net realized capital losses in 2008 compared to net realized capital gains in 2007.

Analysis of Revenues Total revenues decreased 72.5% or $1.19 billion in the second quarter of 2008 and decreased 53.5% or $1.71 billion in the first six months of 2008, compared to the same periods of 2007, due mostly to the recognition of net realized capital losses in the current year periods compared to net realized capital gains in the prior year periods, and, to a much lesser extent, lower net investment income in the current year periods compared to the prior year periods. Life and annuity premiums and contract charges increased in the second quarter of 2008 but declined in the first six months of 2008.

Life and annuity premiums and contract charges Premiums represent revenues generated from traditional life insurance, immediate annuities with life contingencies, and accident, health and other insurance products that have significant mortality or morbidity risk. Contract charges are revenues generated from interest-sensitive and variable life insurance, fixed annuities and institutional products for which deposits are classified as contractholder funds or separate accounts liabilities. Contract charges are assessed against the contractholder account values for maintenance, administration, cost of insurance and surrender prior to contractually specified dates. As a result, changes in contractholder funds are considered in the evaluation of growth and as indicators of future levels of revenues.

The following table summarizes life and annuity premiums and contract charges by product.

	Three Months Ended June 30,		Six Months Ended June 30,	
($ in millions)	**2008**	**2007**	**2008**	**2007**
Premiums				
Traditional life insurance	$ 76	$ 66	$ 141	$ 140
Immediate annuities with life contingencies	36	52	66	129
Accident, health and other	99	92	202	183
Total premiums	211	210	409	452
Contract charges				
Interest-sensitive life insurance	246	224	487	447
Fixed annuities	13	19	26	37
Variable annuities	1	1	1	1
Total contract charges (1)	260	244	514	485
Life and annuity premiums and contract charges	$ 471	$ 454	$ 923	$ 937

(1) Total contract charges for the second quarter of 2008 and 2007 include contract charges related to the cost of insurance of $173 million and $159 million, respectively. Total contract charges for the first six months of 2008 and 2007 include contract charges related to the cost of insurance of $345 million and $318 million, respectively.

Total premiums in the second quarter of 2008 were comparable to the second quarter of 2007 and decreased 9.5% in the first six months of 2008 compared to the same period of 2007. In the second quarter of 2008, higher sales of traditional life insurance and accident and health insurance products sold through the Allstate Workplace Division were almost entirely offset by a decline in sales of life contingent immediate annuities due to competitive market conditions. In the first six months of 2008, a decline in sales of life contingent immediate annuities and higher reinsurance premiums on life insurance were partially offset by higher sales of accident and health insurance products.

Contract charges increased 6.6% and 6.0% in the second quarter and first six months of 2008, respectively, compared to the same periods of 2007 due primarily to higher contract charges on interest-sensitive life insurance policies resulting from increased contract charge rates and growth in business in force, partially offset by decreased contract charges on fixed annuities resulting primarily from lower surrender charges.

Contractholder funds represent interest-bearing liabilities arising from the sale of individual and institutional products, such as interest-sensitive life insurance, fixed annuities, funding agreements and bank deposits. The balance of

contractholder funds is equal to the cumulative deposits received and interest credited to the contractholder less cumulative contract maturities, benefits, surrenders, withdrawals and contract charges for mortality or administrative expenses.

The following table shows the changes in contractholder funds.

($ in millions)	Three Months Ended June 30, 2008	Three Months Ended June 30, 2007	Six Months Ended June 30, 2008	Six Months Ended June 30, 2007
Contractholder funds, beginning balance	$ 61,727	$ 62,472	$ 61,975	$ 62,031
Deposits				
Fixed annuities	1,237	880	1,923	1,576
Institutional products (funding agreements)	2,498	1,300	4,158	2,500
Interest-sensitive life insurance	347	343	707	696
Bank and other deposits	242	214	453	417

Total maturities, benefits, withdrawals and other adjustments	(4,231)	(3,267)	(8,022)	(5,936)
Contractholder funds, ending balance	$ 62,419	$ 62,616	$ 62,419	$ 62,616

(1) The table above illustrates the changes in contractholder funds, which are presented gross of reinsurance recoverables on the Condensed Consolidated Statements of Financial Position. The table above is intended to supplement our discussion and analysis of revenues, which are presented net of reinsurance on the Condensed Consolidated Statements of Operations. As a result, the net change in contractholder funds associated with products reinsured to third parties is reflected as a component of the other adjustments line.

Contractholder funds increased 1.1% in the second quarter of 2008, compared to an increase of 0.2% in the second quarter of 2007, and increased 0.7% in the first six months of 2008, compared to an increase of 0.9% in the same period in the prior year. Average contractholder funds decreased 0.8% and 0.2% in the second quarter and first six months of 2008, respectively, compared to the same periods of 2007.

Contractholder deposits increased 58.0% and 39.5% in the second quarter and first six months of 2008, respectively, compared to the same periods of 2007. These increases were primarily due to higher deposits on institutional products and, to a lesser extent, higher deposits on fixed annuities. Deposits on institutional products increased 92.2% and 66.3% in the second quarter and first six months of 2008, respectively, compared to the same periods of 2007. Sales of our institutional products vary from period to period based on management s assessment of market conditions, investor demand and operational priorities. Deposits on fixed annuities increased 40.6% and 22.0% in the second quarter and first six months of 2008, respectively, compared to the same periods of 2007, due primarily to an improved sales environment for fixed annuities relative to competing products resulting from a steeper interest rate yield curve.

Maturities and retirements of institutional products increased 80.5% and 107.0% in the second quarter and first six months of 2008, respectively, compared to the same periods in the prior year. During the second quarter and first six months of 2008, we acquired in the secondary market and retired $1.14 billion and $2.39 billion, respectively, of institutional market deposits for which investors had elected to non-extend their

maturity. In addition, $986 million have been called and will be retired in July 2008. Total non-extended institutional market deposits were $3.12 billion as of June 30, 2008, all of which become due no later than the end of the first quarter of 2009. We have accumulated, and expect to maintain, short-term investments to retire these obligations.

Surrenders and partial withdrawals decreased 3.5% and 3.2% in the second quarter and first six months of 2008, respectively, compared to the same periods of 2007. These declines were mostly due to lower surrenders and partial withdrawals on fixed annuities, partially offset by higher surrenders and partial withdrawals on interest-sensitive life insurance products and, in the second quarter of 2008, increased withdrawals on Allstate Bank products. The

annualized surrender and partial withdrawal rate on deferred fixed annuities, interest-sensitive life insurance products and Allstate Bank products, based on the beginning of period contractholder funds, was 11.5% and 11.7% for the first six months of 2008 and 2007, respectively.

Net investment income decreased 12.4% and 7.9% in the second quarter and first six months of 2008, respectively, compared to the same periods of 2007. The declines were primarily due to lower investment yields on floating rate assets, lower yields on increased short-term investment balances held to offset reduced liquidity in some asset classes and the maturity of institutional markets funding agreements, and lower investment balances reflecting dividends paid by Allstate Life Insurance Company (ALIC) in 2007.

Net realized capital gains and losses are reflected in the following table.

($ in millions)	Three Months Ended June 30, 2008	Three Months Ended June 30, 2007	Six Months Ended June 30, 2008	Six Months Ended June 30, 2007
Investment write-downs(1)	$ (199)	$ (4)	$ (408)	$ (5)
Sales	(14)	(6)	(56)	51
Change in intent write-downs	(762)	(43)	(786)	(65)
Valuation of derivative instruments	8	135	(194)	115
Settlements of derivative instruments	2	22	47	31
Realized capital gains and losses, pretax	(965)	104	(1,397)	127
Income tax benefit (expense)	338	(37)	489	(45)
Realized capital gains and losses, after-tax	$ (627)	$ 67	$ (908)	$ 82

(1) Investment write-downs include other-than-temporary impairments except for those related to changes in intent to hold.

For further discussion of realized capital gains and losses, see the Investments section of MD&A.

Analysis of Costs and Expenses Total costs and expenses decreased 22.1% and 15.2% in the second quarter and first six months of 2008, respectively, compared with the same periods of 2007, due mostly to lower amortization of DAC and interest credited to contractholder funds partially offset by higher operating costs and expenses.

Life and annuity contract benefits increased 2.3% or $9 million in the second quarter of 2008 compared to the second quarter of 2007 and decreased 2.7% or $22 million in the first six months of 2008 compared to the same period in 2007. The increase in the second quarter of 2008 was due to higher contract benefits on life insurance products resulting primarily from increased insurance in-force and slightly unfavorable mortality experience, partially offset by lower contract benefits on annuities due primarily to the impact of lower sales of immediate annuities with life contingencies on reserve changes partly offset by unfavorable mortality experience. The decrease in the first six months of 2008 was due to lower contract benefits on annuities resulting primarily from the impact of lower sales of

immediate annuities with life contingencies on reserve changes, partially offset by higher contract benefits on life insurance products due primarily to increased insurance in-force and slightly unfavorable mortality experience, partially offset by the recognition in the prior year of litigation related costs in the form of additional policy benefits.

We analyze our mortality and morbidity results using the difference between premiums and contract charges earned for the cost of insurance and life and annuity contract benefits excluding the portion related to the implied interest on immediate annuities with life contingencies (benefit spread). This implied interest totaled $138 million and $139 million in the second quarter of 2008 and 2007, respectively, and totaled $276 million in both the first six months of 2008 and 2007. The benefit spread by product group is disclosed in the following table.

	Three Months Ended June 30,				Six Months Ended June 30,			
($ in millions)	**2008**		**2007**		**2008**		**2007**	
Life insurance	$	134	$	128	$	263	$	246
Annuities		(7)		(6)		(25)		(14)
Total benefit spread	$	127	$	122	$	238	$	232

Interest credited to contractholder funds decreased 16.3% or $110 million in the second quarter of 2008 compared to the second quarter of 2007 and 10.2% or $135 million in the first six months of 2008 compared to the same period of 2007. These decreases were due primarily to a decline in average contractholder funds, lower amortization of deferred sales inducements and lower weighted average interest crediting rates on institutional products due to declines in market interest rates on floating rate obligations. Amortization of deferred sales inducements reflected a credit to income of $24 million and $15 million in the second quarter and first six months of 2008, respectively, compared to a charge to income of $18 million and $29 million in the second quarter and first six months of 2007, respectively. The changes of $42 million and $44 million in the second quarter and first six months of 2008, respectively, compared to the same periods in the prior year, were predominantly the result of realized capital losses recorded in the current year periods on assets that support fixed annuities.

In order to analyze the impact of net investment income and interest credited to policyholders on net income, we review the difference between net investment income and the sum of interest credited to contractholder funds and the implied interest on immediate annuities with life contingencies, which is included as a component of life and annuity contract benefits on the Condensed Consolidated Statements of Operations (investment spread). The investment spread by product group is shown in the following table.

($ in millions)	Three Months Ended June 30, 2008	Three Months Ended June 30, 2007	Six Months Ended June 30, 2008	Six Months Ended June 30, 2007
Annuities	$ 132	$ 129	$ 247	$ 258
Life insurance	15	14	34	33
Institutional products	16	20	43	45
Bank	4	4	9	8
Net investment income on investments supporting capital	75	97	162	184
Total investment spread	$ 242	$ 264	$ 495	$ 528

To further analyze investment spreads, the following table summarizes the weighted average investment yield on assets supporting product liabilities and capital, interest crediting rates on investment type products and investment spreads for the three months ended June 30.

	Weighted Average Investment Yield		Weighted Average Interest Crediting Rate		Weighted Average Investment Spreads	
	2008	2007	2008	2007	2008	2007
Interest-sensitive life insurance	6.0%	6.1%	4.6%	4.7%	1.4%	1.4%
Deferred fixed annuities	5.5	5.8	3.7	3.7	1.8	2.1
Immediate fixed annuities with and without life contingencies	6.9	7.1	6.5	6.6	0.4	0.5
Institutional products	3.9	6.0	3.2	5.1	0.7	0.9
Investments supporting capital, traditional life and other products	5.3	6.1	N/A	N/A	N/A	N/A

The following table summarizes the weighted average investment yield on assets supporting product liabilities and capital, interest crediting rates on investment type products and investment spreads for the six months ended June 30.

	Weighted Average Investment Yield		Weighted Average Interest Crediting Rate		Weighted Average Investment Spreads	
	2008	2007	2008	2007	2008	2007
Interest-sensitive life insurance	6.1%	6.1%	4.6%	4.6%	1.5%	1.5%
Deferred fixed annuities	5.5	5.7	3.7	3.7	1.8	2.0
Immediate fixed annuities with and without life contingencies	6.9	7.1	6.5	6.6	0.4	0.5
Institutional products	4.5	6.0	3.7	5.1	0.8	0.9
Investments supporting capital, traditional life and other products	5.7	5.8	N/A	N/A	N/A	N/A

The following table summarizes our product liabilities as of June 30 and indicates the account value of those contracts and policies in which an investment spread is generated.

($ in millions)	As of June 30, 2008	2007
Immediate fixed annuities with life contingencies	$ 8,333	$ 8,247
Other life contingent contracts and other	4,632	4,428
Reserve for life-contingent contract benefits	$ 12,965	$ 12,675
Interest-sensitive life insurance	$ 9,764	$ 9,334
Deferred fixed annuities	34,082	35,038
Immediate fixed annuities without life contingencies	3,867	3,822
Institutional products	13,266	13,301
Allstate Bank	850	737
Fair value adjustments related to fair value hedges and other	590	384
Contractholder funds	$ 62,419	$ 62,616

Amortization of DAC reflected a credit to income of $41 million in the second quarter of 2008 compared to a charge to income of $184 million in the second quarter of 2007. For the first six months of 2008 and 2007, amortization of DAC reflected a charge to income of $23 million and $313 million, respectively. The changes of $225 million and $290 million in the second quarter and first six months of 2008, respectively, compared to the same periods in the prior year, were predominantly the result of reduced actual gross profits for fixed annuities and interest-sensitive life insurance products due to realized capital losses recorded in the current year periods. For the six-month period, the change was also impacted by an increase in amortization deceleration (credit to income) of $11 million due to our annual comprehensive review of DAC assumptions (commonly referred to as DAC unlocking).

Accretion in the current year periods and amortization in the prior year periods of DAC related to realized capital gains and losses increased income by $171 million and $224 million, pretax, in the second quarter and first six months of 2008, respectively, compared to a decrease to income of $20 million, pretax, in both the second quarter and first six months of 2007. The impact of realized capital gains and losses on amortization of DAC is dependent upon the relationship between the assets that give rise to the gain or loss and the product liability supported by the assets. Fluctuations result from changes in the impact of realized capital gains and losses on actual and expected gross profits.

In accordance with our annual comprehensive review of DAC assumptions, in the first six months of 2008, the Company recognized net amortization deceleration totaling $25 million, including $17 million for fixed annuities and $8 million for interest-sensitive life insurance products. In the first six months of 2007, net amortization deceleration totaled $14 million and included net amortization deceleration of $18 million for interest-sensitive life insurance products and net amortization acceleration of $4 million for fixed annuities. The first six months of 2008 net amortization deceleration of $17 million on fixed annuities was due primarily to higher than expected investment spreads partially offset by increased expenses. The first six months of 2008 net amortization deceleration of $8 million on interest-sensitive life insurance products was due to higher than expected benefit spreads partially offset by increased expenses.

Operating costs and expenses increased 31.6% and 21.5% in the second quarter and first six months of 2008, respectively, compared to the same periods of 2007. The following table summarizes operating costs and expenses.

($ in millions)	Three Months Ended June 30, 2008	Three Months Ended June 30, 2007	Six Months Ended June 30, 2008	Six Months Ended June 30, 2007
Non-deferrable acquisition costs	$ 36	$ 39	$ 75	$ 81
Other operating costs and expenses	89	56	168	119
Total operating costs and expenses	$ 125	$ 95	$ 243	$ 200

Non-deferrable acquisition costs decreased 7.7% or $3 million in the second quarter and decreased 7.4% or $6 million in the first six months of 2008, compared to the same periods of 2007, primarily due to lower non-deferrable commissions. Other operating costs and expenses increased 58.9% or $33 million in the second quarter and 41.2% or $49 million in the first six months of 2008, compared to the same periods of 2007, due primarily to increased spending on consumer research, product development, marketing and technology related to the effort to reinvent retirement for consumers.

Loss on disposition of operations for the first six months of 2008 totaled $9 million and was comprised primarily of losses associated with the anticipated disposition of our direct response long-term care business that is currently held for sale. In the second quarter and first six months of 2007, a gain on disposition of operations of $2 million was recognized that primarily included amortization of a deferred reinsurance gain associated with a prior period disposition.

Income tax benefit of $214 million and $280 million was recognized for the second quarter and first six months of 2008, respectively, compared to income tax expense of $99 million and $180 million in the second quarter and first six months of 2007, respectively. The change reflects the shift from net pretax income in the prior year to a net pretax loss in the current year.

INVESTMENTS

We developed additional risk mitigation and return optimization programs in the second quarter of 2008 in response to an altered outlook for continued weakness in the U.S. financial markets and economy including continued volatility in the financial markets, continued reduced liquidity in certain asset classes and further unfavorable economic trends. In addition, the potential for systemic investment supply and demand imbalances has remained above normal due to the deteriorating credit strength of financial institutions. The risk mitigation and return optimization programs are designed to protect certain portions of our investment portfolio from significant decreases in value resulting from extreme adverse movements in risk-free interest rates, credit spreads, and equity market valuations. They consist of overall portfolio protection (macro-hedging) and potential future reductions in certain real estate and financial-related market sectors. These actions will position us to take advantage of market opportunities and also will help protect our investment portfolio from the continued turmoil in the financial markets. These programs augment earlier actions to reduce investments in real estate and other market sectors as well as to mitigate exposures to risk-free interest rate spikes. We will monitor the progress of these programs as market and economic conditions continue to develop and will adapt our decisions as appropriate.

We have begun to implement the macro-hedging program using derivatives to partially mitigate the potential adverse impacts from potential future increases in risk-free interest rates, increases in credit spreads, and negative equity market valuations for our Property-Liability portfolio with plans to introduce a program later this year for Allstate Financial. The interest rate component is being integrated with the current program, to protect a certain portion of fixed income securities, if interest rates increase above a targeted maximum level, for example in excess of 150 basis points. The equity hedge will be designed to protect the equity portfolio from significant equity market valuation declines below a targeted level using a collar whereby we give up returns above a certain level. For example, if equity market valuation declines fall below 25% the equity hedge protects valuations, and with a collar we give up returns in excess of 20%. Another component of the macro-hedging program is less comprehensive since these derivatives are less effective and efficient and partially mitigates municipal bond interest rate risk and some general market credit spread risk. The cost of the macro-hedging program for one year is currently estimated to be approximately $85 million. The provisions of the macro-hedging program and its estimated cost will be dependent upon market conditions at the time of entering into the applicable contracts.

The risk mitigation and return optimization programs were designed to reduce our exposure to residential and commercial real estate and financial related markets by approximately $4 billion of amortized cost, prior to change in intent write-downs. A comprehensive review identified specific investments that could be significantly impacted by continued deterioration in the economy including certain real estate and financial-related market sectors that may be sold. This includes a portion of our residential and commercial real estate securities including securities collateralized by residential and commercial mortgage loans, mortgage loans and securities issued by financial institutions. As a result, we have change in intent write-downs on securities with a fair value of approximately $3.31 billion at June 30, 2008. Accordingly, approximately $857 million of realized capital losses were recognized in the second quarter of 2008 net income related to our change in intent write-downs, with minimal net impact on

shareholders equity as these investments were carried at fair value with unrealized losses reflected within accumulated other comprehensive income at March 31, 2008.

At June 30, 2008, our exposure to residential and commercial real estate is approximately $28.14 billion, comprised primarily of mortgage-backed securities (MBS), commercial mortgage-backed securities (CMBS), asset-backed residential mortgage-backed securities (ABS RMBS), asset-backed collateralized debt obligations (ABS CDO) and mortgage loans. Our exposure to financial-related market sectors totaled approximately $12 billion at June 30, 2008, and includes fixed income and equity holdings in banks, brokerages, finance companies and insurance.

Any funds raised from the eventual disposition of these securities will be invested in accordance with our asset-liability management strategies and the initial stage of our enhanced enterprise-wide asset allocation (EAA) strategy. These strategies identify risks and return needs across the Corporation and consider cross-correlation impacts in determining an efficient mix of assets for the enterprise as a whole. The work associated with these strategies is ongoing, and implementation will occur as market opportunities arise. Under conditions we find favorable, an increase in municipal bond and foreign equity exposures comprise the initial stage of our EAA strategy. To the extent markets remain unstable, we will invest in high quality, lower risk investments over the short-term. Net investment income from potential reinvested funds may be lower as proceeds invested at current yields could be lower than the yields on the investments written-down.

An important component of our financial results is the return on our investment portfolios. Investment portfolios are segmented between the Property-Liability, Allstate Financial and Corporate and Other operations. The investment portfolios are managed based upon the nature of each respective business and its corresponding liability structure. The composition of the investment portfolios at June 30, 2008 is presented in the table below.

	Property-Liability		Allstate Financial(4)		Corporate and Other(4)		Total	
($ in millions)		**Percent to total**		**Percent to total**		**Percent to total**		**Percent to total**
Fixed income securities (1)	$ 28,110	76.2%	$ 53,164	73.3%	$ 1,950	46.2%	$ 83,224	73.3%
Equity securities (2)	4,513	12.2	151	0.2			4,664	4.1
Mortgage loans	764	2.1	9,865	13.6			10,629	9.4
Limited partnership interests (3)	1,656	4.5	1,154	1.6	80	1.9	2,890	2.5
Short-term	1,773	4.8	5,675	7.8	2,191	51.9	9,639	8.5
Other	61	0.2	2,495	3.5	1		2,557	2.2
Total	$ 36,877	100.0%	$ 72,504	100.0%	$ 4,222	100.0%	$ 113,603	100.0%

(1) Fixed income securities are carried at fair value. Amortized cost basis for these securities was $28.28 billion, $54.21 billion and $1.95 billion for Property-Liability, Allstate Financial and Corporate and Other, respectively.

(2) Equity securities are carried at fair value. Cost basis for these securities was $4.05 billion and $152 million for Property-Liability and Allstate Financial, respectively.

(3) We have commitments to invest in additional limited partnerships totaling $2.01 billion at June 30, 2008.

(4) Balances reflect the elimination of related party investments between Allstate Financial and Corporate and Other.

Total investments decreased to $113.60 billion at June 30, 2008, from $118.98 billion at December 31, 2007, due to unrealized net capital losses, net realized capital losses, and lower funds associated with collateral received in conjunction with securities lending, partially offset by a slight

increase in contractholder funds.

The Property-Liability investment portfolio decreased to $36.88 billion at June 30, 2008, from $40.91 billion at December 31, 2007, due to lower unrealized net capital gains, dividends paid by AIC to The Allstate Corporation, lower funds associated with collateral received in conjunction with securities lending and net realized capital losses.

The Allstate Financial investment portfolio decreased to $72.50 billion at June 30, 2008, from $74.25 billion at December 31, 2007, due to unrealized net capital losses and net realized capital losses, partially offset by increased funds associated with collateral received in conjunction with securities lending.

The Corporate and Other investment portfolio increased to $4.22 billion at June 30, 2008, from $3.82 billion at December 31, 2007, primarily due to dividends received from AIC, partially offset by cash flows used in financing activities.

Total investments at amortized cost related to collateral received in connection with securities lending business activities and collateral posted by counterparties related to derivative transactions decreased to $2.98 billion at June

30, 2008, from $3.46 billion at December 31, 2007. These investments are carried at fair value and classified in fixed income securities totaling $1.92 billion and $2.85 billion, respectively, and short-term investments totaling $971 million and $549 million, as of June 30, 2008 and December 31, 2007, respectively.

Fixed income securities by type are listed in the table below.

($ in millions)		June 30, 2008	% to Total Investments		December 31, 2007	% to Total Investments
U.S. government and agencies	$	4,131	3.6%	$	4,421	3.7%
Municipal		24,418	21.5		25,307	21.3
Corporate		33,691	29.7		38,467	32.3
Foreign government		2,676	2.3		2,936	2.5
MBS		6,089	5.4		6,959	5.8
CMBS		6,036	5.3		7,617	6.4
Asset-backed securities (ABS)		6,126	5.4		8,679	7.3
Redeemable preferred stock		57	0.1		65	0.1
Total fixed income securities	$	83,224	73.3%	$	94,451	79.4%

At June 30, 2008, 95.0% of the consolidated fixed income securities portfolio was rated investment grade, which is defined as a security having a rating from the National Association of Insurance Commissioners (NAIC) of 1 or 2; a rating of Aaa, Aa, A or Baa from Moody s or a rating of AAA, AA, A or BBB from S&P s, Fitch or Dominion or a rating of aaa, aa, a, or bbb from A.M. Best; or a comparable internal rating if an externally provided rating is not available.

During the second quarter of 2008, certain financial markets continued to experience price declines due to market and liquidity disruptions. We experienced this illiquidity and disruption particularly in our prime residential mortgage-backed securities (Prime), Alt-A residential mortgage-backed securities (Alt-A), commercial real estate collateralized debt obligations (CRE CDO), ABS RMBS and ABS CDO portfolios. These portfolios totaled $5.29 billion, or less than 5.0% of our total investments at June 30, 2008. Certain other asset-backed and real estate-backed securities markets experienced illiquidity, but to a lesser degree.

We determine the fair values of securities comprising these illiquid portfolios by obtaining information from an independent third-party valuation service provider and brokers. We confirmed the reasonableness of the fair value of these portfolios as of June 30, 2008 by analyzing available market information including, but not limited to, collateral quality, anticipated cash flows, credit enhancements, default rates, loss severities, securities relative position within their respective capital structures, and credit ratings from statistical rating agencies.

Investment write-downs during the second quarter of 2008 were recorded on our Alt-A, CRE CDO, ABS RMBS and ABS CDO totaling $2 million, $39 million, $137 million and $3 million, respectively. Investment write-downs during the first six months of 2008 were recorded on our Prime, Alt-A, CRE CDO, ABS RMBS and ABS CDO totaling $9 million, $91 million, $39 million, $172 million and $63 million, respectively. Change in intent write-downs, included losses on our Prime totaling $15 million, Alt-A totaling $96 million, CRE CDO totaling $248 million and ABS RMBS totaling $185 million for the three months ended June 30, 2008. We continue to believe that the unrealized losses on these securities are not necessarily predictive of the ultimate performance of the underlying collateral. In the absence of further deterioration in the collateral relative to our positions in the securities respective capital structures, which could be other-than-temporary, the unrealized losses should reverse over the remaining lives of the securities.

The cash flows of the underlying mortgages or collateral for MBS, CRE CDO and ABS are generally applied in a pre-determined order and are designed so that each security issued qualifies for a specific original rating. The security issue is typically referred to as the class . For example, the senior portion or top of the capital structure which would originally qualify for a rating of Aaa is referred to as the Aaa class and typically has priority in receiving the principal repayments on the underlying mortgages. In addition, the portion of the capital structure originally rated Aaa may further be divided into multiple sub-classes, super senior , senior , senior support for Prime and Alt-A issues, and first , second , thir ABS RMBS issues where the principal repayments are typically paid sequentially (i.e., all of the underlying mortgage principal repayments are received by the first originally rated Aaa class in the structure until it is paid in full, then all of the underlying mortgage principal repayments are received by the second originally rated Aaa class in the structure until it is paid in full). Although securities within the various Aaa classes are paid sequentially, they typically share any losses on a pro-rata basis after losses are absorbed by classes with lower original ratings or what may be referred to as more junior or subordinate securities in the capital structure. The underlying mortgages have fixed interest rates, variable interest

rates (such as adjustable rate mortgages (ARM)) or are hybrid, meaning that they contain features of both fixed and variable rate mortgages.

MBS totaled $6.09 billion and 99.9% were rated investment grade at June 30, 2008. The MBS portfolio is subject to interest rate risk since price volatility and the ultimate realized yield are affected by the rate of prepayment of the underlying mortgages. The credit risk associated with our MBS is mitigated due to the fact that 68.3% of the portfolio consists of securities that were issued by, or have underlying collateral that is guaranteed by U.S. government agencies or U.S. government sponsored entities (U.S. Agency).

The following table shows MBS by type and Moody s equivalent rating.

($ in millions)	Fair value at June 30, 2008	% to Total Investments	Aaa	Aa	A	Ba or lower
MBS						
U.S. Agency	$ 4,160	3.7%	100.0%

Alt-A	948	0.8	95.3	3.7	0.4%	0.6%
Other	5			100.0		
Total MBS	$ 6,089	5.4%				

Prime are collateralized by residential mortgage loans issued to prime borrowers. As of June 30, 2008, fair value represents 94.1% of amortized cost of these securities. During both the second quarter and first six months of 2008, we sold $154 million of Prime, recognizing a loss of $3 million. In addition, we acquired $21 million of Prime during the first six months of 2008. We also collected $33 million and $60 million of principal repayments consistent with the expected cash flows during the second quarter and first six months of 2008, respectively. Investment write-downs during the first six months of 2008 were recorded on our Prime totaling $9 million. In addition, $15 million of change in intent write-downs were recorded during the second quarter of 2008 on Prime.

Our Prime positions comprised 73.0% fixed rate mortgages, and 84.8% of the portfolio is in the Aaa class of the capital structure. The following table shows our Prime portfolio of June 30, 2008 by vintage year, based upon our participation in the capital structure.

($ in millions)	Vintage Year

Included in our mortgage-backed fixed income securities are Alt-A at fixed or variable rates. The following table presents information about the collateral in our Alt-A holdings.

($ in millions)		Fair value at June 30, 2008	% to Total Investments
Alt-A			
Fixed rate	$	594	0.5%
Variable rate		354	0.3
Total Alt-A	$	948	0.8%

Alt-A can be issued by trusts backed by pools of residential mortgages with either fixed or variable interest rates. The mortgage pools can include residential mortgage loans issued to borrowers with stronger credit profiles than sub-prime borrowers, but who do not qualify for prime financing terms due to high loan-to-value ratios or limited supporting documentation. As of June 30, 2008, fair value represents 87.6% of the amortized cost of these securities. Alt-A securities with a fair value less than 70% of amortized cost totaled $69 million, with unrealized losses of $69 million. During both the second quarter and first six months of 2008, we sold $43 million of Alt-A, recognizing a loss of $15 million. We also collected $42 million and $83 million of principal repayments consistent with the expected cash flows during the second quarter and first six months of 2008, respectively. Investment write-downs during the second quarter and first six months of 2008 were recorded on our Alt-A totaling $2 million and $91 million, respectively. In addition, $96 million of change in intent write-downs were recorded during the second quarter of 2008 on Alt-A.

The following table shows our Alt-A portfolio at June 30, 2008 by vintage year, based upon our participation in the capital structure.

CMBS totaled $6.04 billion and 99.9% were rated investment grade at June 30, 2008. The CMBS portfolio is subject to credit risk, but unlike other structured securities, is generally not subject to prepayment risk due to protections within the underlying commercial mortgages whereby borrowers are effectively restricted from prepaying their mortgages due to changes in interest rates. Approximately 83.6% of the CMBS investments are pools of commercial mortgages, broadly diversified across property types and geographical area. The following table shows CMBS by type and Moody s equivalent rating.

($ in millions)	Fair value at June 30, 2008	% to Total Investments	Aaa	Aa	A	Baa	Ba or lower
CMBS							
CMBS	$ 5,660	5.0%	81.2%	13.2%	4.0%	1.4%	0.2%
CRE CDO	376	0.3	38.3	28.4	24.5	8.8	
Total CMBS	$ 6,036	5.3%					

CRE CDO are investments secured primarily by commercial mortgage-backed securities and other commercial mortgage debt obligations. These securities are generally less liquid and have a higher risk profile than other commercial mortgage-backed securities. As of June 30, 2008, fair value represents 101.1% of the amortized cost of these securities. During the second quarter and first six months of 2008, we sold $27 million and $36 million of CRE CDO, respectively, recognizing a loss of $22 million and $24 million, respectively. We also collected $2 million and $3 million of principal repayments consistent with the expected cash flows during the second quarter and first six months of 2008, respectively. Investment write-downs during both the second quarter and first six months of 2008 were recorded on our CRE CDO totaling $39 million. In addition, $248 million of change in intent write-downs were recorded during the second quarter of 2008 on CRE CDO. The following table shows our CRE CDO portfolio at June 30, 2008 by vintage year, based upon our participation in the capital structure.

Other collateralized debt obligations	1,652	1.5	74.2	35.2	26.4	27.4	8.3	2.7
Other asset-backed securities	1,486	1.3	93.8	47.3	16.6	23.5	9.0	3.6
Total ABS	$ 6,126	5.4%	81.9					

ABS RMBS portfolio includes securities that are collateralized by mortgage loans issued to borrowers that cannot qualify for Prime or Alt-A financing terms due in part to weak or limited credit history. It also includes securities that are collateralized by certain second lien mortgages regardless of the borrower s credit history.

The following table presents additional information about our ABS RMBS portfolio including a summary by first and second lien collateral.

($ in millions)		Fair value at June 30, 2008	% to Total Investments
ABS RMBS			
First lien:			
Fixed rate(1)	$	886	0.8%
Variable rate(1)		1,581	1.4
Total first lien(2)		2,467	2.2
Second lien :			
Insured		382	0.3
Other		125	0.1
Total second lien(3)		507	0.4
Total ABS RMBS	$	2,974	2.6%

(1) Fixed rate and variable rate refer to the primary interest rate characteristics of the underlying mortgages at the time of issuance.

(2) The credit ratings of the first lien ABS RMBS were 58.9% Aaa, 29.5% Aa, 7.7% A, 2.1% Baa and 1.8% Ba or lower at June 30, 2008.

(3) The credit ratings of the second lien ABS RMBS were 18.9% Aaa, 18.6% Aa, 23.1% A, 27.0% Baa and 12.4% Ba or lower at June 30, 2008.

As of June 30, 2008, the ABS RMBS portfolio had net unrealized losses of $680 million. Fair value represents 81.4% of the amortized cost of these securities. ABS RMBS securities with a fair value less than 70% of amortized cost totaled $451 million, with unrealized losses of $460 million. During the second quarter and first six months of 2008, we sold $40 million and $59 million of ABS RMBS, respectively, recognizing a loss of $3 million and $20 million, respectively. We also collected $185 million and $335 million of principal repayments consistent with the expected cash flows during the second quarter and first six months of 2008, respectively. Investment write-downs during the second quarter and first six months of 2008 were recorded on our ABS RMBS totaling $137 million and $172 million, respectively. In addition, $185 million of change in intent write-downs were recorded during the second quarter of 2008 on ABS RMBS.

When buying ABS RMBS securities from 2006 and 2007 vintages, we concentrated our holdings in securities that were senior or at the top of the structure and that were generally within the first three Aaa sub-classes of the capital structure, as it was expected that, in the unlikely event of losses in the underlying collateral, these sub-classes within the Aaa class would likely either be paid in full or receive substantial principal repayments before underlying mortgage losses would breach that level. However, when the underlying mortgage product was fixed-rate in nature, which we assessed to have stronger underwriting origination standards than variable rate collateral, we invested somewhat lower in the capital structure, such as securities below the first three Aaa sub-classes. The vast majority of our investment in either of these vintages was concentrated within originally rated Aaa or Aa securities.

The following table includes first lien non-insured ABS RMBS by vintage, the interest rate characteristics of the underlying mortgage product and our participation in the capital structure. The information in this table, together with the second lien non-insured, comprise the $2.42 billion of non-insured ABS RMBS.

(1) Includes primarily pass-through securities and NAS bonds. NAS bonds are typically locked out from receiving principal prepayments for a specified period of time after which they receive prepayment allocations according to a specified formula.

We also own approximately $125 million of second lien ABS RMBS non-insured securities, representing 80.1% of amortized cost. Approximately $62 million, or 49.6%, of this portfolio are 2006 and 2007 vintage years.

At June 30, 2008, $550 million or 18.5% of the total ABS RMBS securities are insured by 6 bond insurers and 87.1% were rated investment grade. $2.44 billion or 81.9% of the portfolio consisted of securities that were issued during 2005, 2006 and 2007. At June 30, 2008, 59.8% of securities issued during 2005, 2006 and 2007 were rated Aaa, 21.0% rated Aa, 7.6% rated A, 7.7% rated Baa and 3.9% rated Ba or lower.

The following table shows our insured ABS RMBS portfolio at June 30, 2008 by bond insurer and vintage year for the first lien and second lien collateral.

ABS CDO are securities collateralized by a variety of residential mortgage-backed securities and other securities, which may include sub-prime RMBS. Fair value represents 116.7% of the amortized cost of these securities. During both the second quarter and first six months of 2008, we sold $1 million of ABS CDO. Investment write-downs during the second quarter and first six months of 2008 were recorded on our ABS CDO totaling $3 million and $63 million, respectively. As of June 30, 2008, the ABS CDO portfolio had unrealized gains of $2 million.

Other collateralized debt obligations totaled $1.65 billion and 97.3% are rated investment grade at June 30, 2008. Other collateralized debt obligations consist primarily of obligations secured by high yield and investment grade corporate credits including $1.01 billion of collateralized loan obligations; $193 million of synthetic CDOs; $158 million of primarily bank trust preferred CDOs; $108 million of market value CDOs; $44 million of CDOs that invest in other CDOs (CDO squared); and $30 million of collateralized bond obligations. As of June 30, 2008, net unrealized losses on the other CDOs were $574 million. Other CDOs with a fair value less than 70% of amortized cost totaled $390 million, or 23.6% of the total other CDOs at June 30, 2008, with unrealized losses of $335 million.

Other asset-backed securities consist primarily of investments secured by portfolios of credit card loans, auto loans, student loans and other consumer and corporate obligations. As of June 30, 2008, the net unrealized losses on these securities were $99 million. Additionally, 22.1% of the other asset-backed securities that are rated Aaa, Aa, A and Baa were insured by five bond insurers. During the second quarter and first six months of 2008, we sold $4 million and $25 million of these securities, respectively, recognizing a gain of $1 million and $2 million, respectively. In addition, we acquired $11 million of securities during the first six months of 2008. We also collected $5 million and $10 million of principal repayments consistent with the expected cash flows during the second quarter and first six months of 2008, respectively.

As of June 30, 2008, we hold $13.55 billion of fixed income securities that are insured by bond insurers, including approximately $12.64 billion or 51.7% of our municipal bond portfolio, $550 million of our ABS RMBS and $329 million of our other asset-backed securities. Additionally, we hold $4 million of corporate bonds and credit default swaps that were directly issued by these bond insurers. 51.7% of our municipal bond portfolio is insured by eight bond insurers and 55.4% have a Moody s equivalent rating of Aaa or Aa. Our practices for acquiring and monitoring municipal bonds primarily are based on the quality of the underlying security. As of June 30, 2008, we believe the valuations already reflected a decline in the value of the insurance, and further such

declines if any, are not expected to be material. While the valuation of these holdings may be temporarily impacted by negative and rapidly changing market developments, we continue to have the intent and ability to hold the bonds and expect to receive all of the contractual cash flows. As of June 30, 2008, 32.8% of our insured municipal bond portfolio was insured by MBIA, 25.2% by AMBAC, 18.7% by FSA and 18.1% by FGIC.

Included in our municipal bond portfolio at June 30, 2008 are $2.01 billion of auction rate securities (ARS) that have long-term stated maturities, with the interest rate reset based on auctions that generally occur every 7, 28 or 35 days depending on the specific security. This is compared to a balance of ARS at December 31, 2007 of $2.56 billion, with the decline representing primarily redemptions during the second quarter of 2008. Our holdings primarily have a Moody s equivalent rating of Aaa. We make our investment decisions based on the underlying credit of each security. Approximately $1.92 billion of our holdings are pools of student loans for which at least 85% of the collateral was insured by the U.S. Department of Education at the time we purchased the security. As of June 30, 2008, $1.3 billion of our ARS backed by student loans was 100% insured by the U.S. Department of Education, $383 million was 90% to 99% insured and $178 million was 80% to 89% insured. During the second quarter of 2008, all of our ARS holdings experienced failed auctions and we received the failed auction rate or, for those which contain maximum reset rate formulas, we received the contractual maximum rate. We anticipate that failed auctions may persist and most of our holdings will continue to pay the failed auction rate or, for those that contain maximum rate reset formulas, the maximum rate, as described below. Auctions continue to be conducted as scheduled for each of the securities.

We estimate that approximately one third of our student loan backed ARS include maximum rate reset formulas whereby when the failed auction rate exceeds an annual contractual maximum rate over a preceding stipulated period, the coupon interest rate is temporarily reset to the maximum rate, which can vary between zero and the failed auction rate. This maximum rate formula causes the reset interest rate on these securities to be lower than the failed auction rate in order to reduce the annual interest rate so that it does not exceed the annual contractual maximum rate. Generally, the annual contractual maximum rate is higher than the historical rates paid on these securities. During the second quarter of 2008, $291 million of our ARS reset using the maximum rate reset formula.

Fannie Mae and Freddie Mac direct fixed income and equity exposure investments totaled $733 million as of June 30, 2008. The following table shows our direct exposure to Fannie Mae and Freddie Mac at June 30, 2008.

($ in millions)	**Fannie Mae**	**Freddie Mac**	**Total**
Fixed Income Securities:			
Fair Value	$ 425	$ 180	$ 605
Net Unrealized Capital Gains (Losses)	15	(4)	11
Equity Securities:			
Fair Value	$ 77	$ 51	$ 128
Net Unrealized Capital Gains (Losses)	(7)	(6)	(13)

Limited partnership interests consist of investments in private equity/debt funds, real estate funds and hedge funds. The overall limited partnership interests portfolio is well diversified across a number of metrics including fund sponsors, vintage years, strategies, geography (including international), and company/property types. At June 30, 2008, our limited partnership interests comprise:

Private equity/debt funds - Approximately 43% or $1.23 billion of the limited partnership interests comprised private equity/debt funds diversified across the following fund types: buyout, mezzanine, distressed security, and secondary offerings. Private/equity debt funds were spread across 75 sponsors and 106 individual funds. The largest exposure to any single private equity/debt fund was $39 million.

Real estate funds - Approximately 30% or $878 million of the limited partnership interests comprised real estate funds diversified across a variety of strategies including opportunistic, value-add platforms, distressed property, and property/market specific. Real estate funds were spread across 34 sponsors and 79 individual funds. The largest exposure to any single real estate fund was $44 million.

Hedge funds - Approximately 27% or $779 million of the limited partnership interests comprised hedge funds with the majority invested with fund of funds advisors. Hedge funds were spread across 9 sponsors and 160 individual funds. The largest exposure to any single hedge fund was $26 million.

Our aggregate limited partnership exposure represented 2.5% and 2.1% of total invested assets as of June 30, 2008 and December 31, 2007, respectively. Income from limited partnership interest was $30 million and $90 million for the second quarter and first six months of 2008, respectively, versus $86 million and $156 million for the

same periods in 2007, respectively. The decline was primarily related to reduced income from both real estate funds and hedge funds as capital market deleveraging has slowed the pace at which portfolio holdings are being sold.

Unrealized net capital losses totaled $789 million as of June 30, 2008, compared to unrealized net capital gains of $1.91 billion at December 31, 2007. The decline was primarily due to investment grade fixed income securities as the yields supporting fair values increased, resulting from widening credit spreads and relatively flat risk-free interest rates. This increase in fixed income unrealized net capital losses more than offset the decline in unrealized net capital losses resulting from the realization of capital losses on write-downs, change in intent to hold to recovery and sales. We continue to experience volatility in the balance of our unrealized net capital gains and losses as we did between the years 2004/2005 and 2006/2007. The following table presents total unrealized gains and losses.

Unrealized net gains and losses	$	(789)	$	1,913

The net unrealized loss for the fixed income portfolio totaled $1.21 billion, comprised of $2.38 billion of unrealized gains and $3.59 billion of unrealized losses at June 30, 2008. This is compared to a net unrealized gain for the fixed income portfolio totaling $956 million at December 31, 2007, comprised of $3.15 billion of unrealized gains and $2.20 billion of unrealized losses. Included in gross unrealized losses at June 30, 2008 were $1.15 billion of fixed income securities with a fair value below 70% of amortized cost, or 1.4% of our fixed income portfolio at June 30, 2008. The percentage of fair value to amortized cost for the remaining fixed income gross unrealized losses at June 30, 2008 are shown in the following table.

($ in millions)		Unrealized (loss) gain		Fair value	% to Total Fixed Income Investments
> 80% of amortized cost	$	(1,950)	$	38,964	46.8%
70% to 80% of amortized cost		(648)		1,986	2.4
< 70% of amortized cost		(1,000)		1,150	1.4
Gross unrealized losses on fixed income securities	$	(3,598)	$	42,100	50.6
Gross unrealized gains on fixed income securities		2,384		41,124	49.4
Net unrealized gains and losses on fixed income securities	$	(1,214)	$	83,224	100.0%

79.1% of the fixed income securities with a fair value less than 70% of amortized cost were ABS RMBS, Alt-A and other CDOs with a fair value totaling $910 million. We continue to believe that the unrealized losses on these securities are not necessarily predictive of the ultimate performance. The unrealized losses should reverse over the remaining lives of the securities, in the absence of further deterioration in the collateral relative to our positions in the securities respective capital structures.

Of the gross unrealized losses in the fixed income portfolio at June 30, 2008, $3.32 billion or 92.2% were related to investment grade securities and are primarily interest rate related. Of the remaining $282 million of unrealized losses in the fixed income portfolio, $180 million or 63.8% were in the corporate fixed income portfolio and primarily comprised securities in the consumer goods, financial services, communications, utilities and banking sectors. The gross unrealized losses in these sectors were primarily related to changes in interest rates and credit spreads, and company specific conditions.

The net unrealized gain for the equity portfolio totaled $467 million, comprised of $599 million of unrealized gains and $132 million of unrealized losses at June 30, 2008. This is compared to a net unrealized gain for the equity portfolio totaling $990 million at December 31, 2007, comprised of $1.10 billion of unrealized gains and $106 million of unrealized losses. Within the equity portfolio, the losses were primarily concentrated in the financial services, consumer goods, and banking sectors. The unrealized losses in these sectors were company and sector specific.

We have a comprehensive portfolio monitoring process to identify and evaluate, on a case-by-case basis, fixed income and equity securities whose carrying value may be other-than-temporarily impaired. The process includes a quarterly review of all securities using a screening process to identify situations where the fair value, compared to amortized cost for fixed income securities, and cost for equity securities is below established thresholds for certain time periods, or which are identified through other monitoring criteria such as ratings, ratings downgrades or payment defaults. The securities identified, in addition to other securities for which we may have a concern, are evaluated based on facts and circumstances for inclusion on our watch-list. All investments in an unrealized loss position at June 30, 2008 were included in our portfolio monitoring process for determining whether declines in value were other-than-temporary. We also conduct a portfolio review to recognize impairment on securities in an unrealized loss position for which we do not have the intent and ability to hold until recovery as a result of approved programs involving the disposition of investments for reasons such as changes in economic and market outlooks, duration, revisions to strategic asset allocations, unanticipated liquidity actions, investment risk mitigation actions and unanticipated federal income tax situations involving capital gain (loss) carryforwards and carrybacks with specific expiration dates, as well as changes in intent to hold certain investments by portfolio managers.

The following table summarizes fixed income and equity securities in a gross unrealized loss position according to significance, aging and investment grade classification.

	June 30, 2008				December 31, 2007			
	Fixed Income				Fixed Income			
($ in millions except number of issues)	Investment Grade	Below Investment Grade	Equity	Total	Investment Grade	Below Investment Grade	Equity	Total
Category (I): Unrealized loss less than 20% of cost (1)								
Number of Issues	5,379	420	194	5,993	4,058	379	322	4,759
Fair Value	$ 36,302	$ 2,461	$ 1,195	$ 39,958	$ 31,489	$ 2,446	$ 884	$ 34,819
