PART I

Forward-Looking Statements

Certain information included in this Form 10-K and other materials filed or to be filed by us with the Securities and Exchange Commission (SEC), as well as information included in oral or written statements made by us or on our behalf, may contain forward-looking statements about our current and expected performance trends, growth plans, business goals and other matters. These statements may be contained in our filings with the SEC, in our press releases, in other written communications, and in oral statements made by or with the approval of one of our authorized officers. Words or phrases such as believe, plan, will likely result, expect, intend, will continue, is anticipated, estimate, could, would, should, and similar expressions are intended to identify forward-looking statements. These statements, and any other statements that are not historical facts, are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, as codified in Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended (the Acts).

In connection with the safe harbor provisions of the Acts, we have identified and are disclosing important factors, risks and uncertainties that could cause our actual results to differ materially from those projected in forward-looking statements made by us, or on our behalf (see Item 1A, Risk Factors). These cautionary statements are to be used as a reference in connection with any forward-looking statements. The factors, risks and uncertainties identified in these cautionary statements are in addition to those contained in any other cautionary statements, written or oral, which may be made or otherwise addressed in connection with a forward-looking statement or contained in any of our subsequent filings with the SEC. Because of these factors, risks and uncertainties, we caution against placing undue reliance on forward-looking statements. Although we believe that the assumptions underlying forward-looking statements are reasonable, any of the assumptions could be incorrect, and there can be no assurance that forward-looking statements will prove to be accurate. Forward-looking statements speak only as of the date on which they are made. Except as may be required by law, we do not undertake any obligation to modify or revise any forward-looking statement to take into account or otherwise reflect subsequent events or circumstances arising after the date that the forward-looking statement was made.

ITEM 1. BUSINESS

General

As of February 23, 2011, The Cheesecake Factory Incorporated (referred to herein as the Company or as we, us and our) operated 164 upscale, casual, full-service dining restaurants: 150 under The Cheesecake Factory® mark; 13 under the Grand Lux Cafe® mark; and one under the RockSugar Pan Asian Kitchen® mark. We also operated two bakery production facilities and licensed two limited menu bakery cafes under The Cheesecake Factory Bakery Cafe® mark to another foodservice operator. Throughout this report, we use the term restaurants to include The Cheesecake Factory, Grand Lux Cafe and RockSugar Pan Asian Kitchen, unless otherwise noted, and exclude the two bakery production facilities and two licensed bakery cafes, unless otherwise noted.

Our business operations originated in 1972 when Oscar and Evelyn Overton founded a small bakery in the Los Angeles area. Their son, David Overton, our Chairman of the Board and Chief Executive Officer, led the creation and opening in 1978 of the first The Cheesecake Factory restaurant in Beverly Hills, California. In February 1992, our Company was incorporated in Delaware to consolidate the restaurant and bakery

Edgar Filing: CHEESECAKE FACTORY INC - Form 10-K

businesses of its predecessors operating under The Cheesecake Factory® mark. Our executive offices are located at 26901 Malibu Hills Road, Calabasas Hills, California 91301, and our telephone number is (818) 871-3000.

Restaurant sales represented 96% of our revenues in fiscal 2010, 2009 and 2008. Our restaurants generally range in size from 7,000 to 15,000 interior square feet, provide full alcoholic beverage service and are generally open seven days a week for lunch and dinner, as well as Sunday brunch. Hours of operation are generally from 11:00 a.m. to 11:00 p.m., except on weekends when most of our restaurants stay open past midnight, and on Sunday when most of our restaurants open at 10:00 a.m. for brunch.

Our bakery operations create and market branded bakery products under The Cheesecake Factory®, The Cheesecake Factory Bakery® and The Dream Factory® marks as well as private-label bakery products to other foodservice operators, retailers and distributors (bakery sales) in order to leverage our brand identity with consumers and to profitably utilize our bakery production capacity. Bakery sales represented approximately 4% of our revenues for fiscal 2010, 2009 and 2008. For segment information, see Note 16 of Notes to Consolidated Financial Statements in Part IV, Item 15 of this report.

In January 2011, we announced our initial expansion plans outside of the United States. See the section entitled International Expansion in this Item 1 in this Form 10-K for further discussion of our international licensing agreement.

Table of Contents

We maintain a website at www.thecheesecakefactory.com. On our website, we make available at no charge our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, all amendments to those reports, and our proxy statements, as soon as reasonably practicable after we electronically file this material with or furnish it to the SEC. Our filings are also available on the SEC's website at www.sec.gov. The contents of our website are not incorporated by reference into this Form 10-K.

The Cheesecake Factory Restaurant Concept

The Cheesecake Factory restaurants strive to provide a distinctive, high quality dining experience at moderate prices by offering an extensive, innovative and evolving menu in an upscale casual, high energy setting with attentive, efficient and friendly service. As a result, The Cheesecake Factory restaurants appeal to a diverse guest base across a broad demographic range. Our extensive menu enables us to compete for substantially all dining preferences and occasions from the key lunch and dinner day parts to the mid-afternoon and late-night day parts, which are traditionally weaker times for most casual dining restaurant operations. The Cheesecake Factory restaurants are not open for breakfast, but do offer Sunday brunch. All of our restaurants are open seven days a week. All items (excluding alcoholic beverages) on the menu, including approximately 40 varieties of cheesecake and other quality baked desserts, may be purchased for off-premise consumption, which represented approximately 9%, 8% and 8% of total Cheesecake Factory restaurant sales in fiscal 2010, 2009 and 2008, respectively.

The Cheesecake Factory menu features over 200 items, in addition to items presented on supplemental menu cards, including appetizers, pizza, seafood, steaks, chicken, burgers, specialty items, pastas, salads, sandwiches, omelets and desserts. Examples of menu offerings include Chicken Madeira, Cajun Jambalaya Pasta, Thai Lettuce Wraps and Crispy Chicken Costoletta. Menu items, except those desserts manufactured at our bakery production facilities, are prepared from scratch daily on the restaurant premises with high quality, fresh ingredients using innovative and proprietary recipes. We consider the extensive selection of items on our menu to be an important factor in the differentiation of our restaurants from our competitors.

The Cheesecake Factory menu features all-natural chicken with no added hormones, premium beef that is Certified Angus, U.S.D.A. American Style Kobe Wagyu, Prime or Choice, fresh fish that is either longline or hook and line caught whenever possible, cooking oils that contain no trans fat according to United States Food and Drug Administration Food Labeling Guidelines, and produce that is mainly sourced directly from premium growers. In addition, we offer certified organic, fair trade, shade-grown coffee, and certified organic black and herbal teas.

One of our competitive strengths is our ability to anticipate consumer dining and taste preferences and adapt our menu to the latest trends in food consumption. We regularly update our ingredients and cooking methods, as well as create new menu items, to improve the quality and consistency of our food and keep our menu relevant to consumers. Generally, we review our entire menu every six months, in the winter and in the summer, for guest appeal and pricing. All new menu items are tested and selected based on uniqueness, anticipated sales popularity, preparation technique and profitability.

Our ability to create, promote and attractively display our unique line of desserts is also important to the competitive positioning and financial success of our restaurants. Our brand identity and reputation for offering high quality desserts results in a higher percentage of dessert sales compared to most chain restaurant operators. Dessert sales represented approximately 15% for fiscal 2010, 15% for fiscal 2009, and 14% for fiscal 2008 of The Cheesecake Factory restaurant sales.

Edgar Filing: CHEESECAKE FACTORY INC - Form 10-K

Each of our restaurants offers a full-service bar where our entire menu is served. Our alcoholic beverage sales represent approximately 13% of The Cheesecake Factory restaurant sales for fiscal 2010, 2009 and 2008. Most of our alcoholic beverage sales occur with meal purchases.

We place significant emphasis on the unique interior design and decor of our restaurants, which results in a higher investment per square foot of restaurant space than is typical for the casual dining industry. However, each of our restaurants has historically generated annual sales per square foot that are also typically higher than our competitors. Our stylish restaurant design and decor contributes to the distinctive dining experience enjoyed by our guests. Each restaurant features large, open dining areas and a contemporary kitchen design. More than 85% of our restaurants offer outdoor patio seating as weather permits. Approximately 20% of our total estimated productive seating capacity is located on outdoor patios, which can be subject to underutilization from time to time due to adverse or unseasonable weather conditions. The table and seating layouts of our restaurants are flexible, permitting tables and seats to be easily rearranged to accommodate large groups or parties, thus permitting more effective utilization of seating capacity.

Table of Contents

Grand Lux Cafe Restaurant Concept

Grand Lux Cafe is an upscale casual dining concept that offers unique American and international menu items in an elegant but relaxed atmosphere. The menu at Grand Lux Cafe offers approximately 200 items, including appetizers, pasta, seafood, steaks, chicken, burgers, salads, specialty items and desserts. Examples of menu offerings include our Chop House Burger, Buffalo Chicken Rolls, Crispy Caramel Chicken and Santa Barbara Grilled Chicken Sandwich. A full-service bar, as well as an onsite bakery which produces made-to-order desserts, are also elements of this concept. All of our Grand Lux Cafes are open seven days a week. Our location in the Venetian Resort-Hotel-Casino in Las Vegas, Nevada is open 24 hours a day and its sister location in the Palazzo Resort-Hotel-Casino is open 20 to 21 hours a day. Both locations also serve a breakfast menu.

We will further refine Grand Lux Cafe's architectural design and layout, as well as its menu, in order to position the concept appropriately for potential future growth. Although we did not open any new Grand Lux Cafes in fiscal 2009 or fiscal 2010, we gained valuable insight into the concept during this time, including the types of markets in which it performs well, how guests perceive the concept based on its design and decor, how guests use the restaurant, and the appropriate size of future units. We continue to search for premier locations that would be suitable for this concept and intend to incorporate the knowledge we gained over the past few years into future sites.

RockSugar Pan Asian Kitchen Concept

RockSugar Pan Asian Kitchen is a unique concept featuring a Southeast Asian menu in an upscale casual dining setting. It showcases the cuisines of Thailand, Vietnam, Malaysia, Singapore, Indonesia and India with approximately 80 dishes served Asian family-style to create an atmosphere that encourages sharing and conversation. Examples of menu offerings include Shaking Beef, Crispy Chicken Samosas, Lacquered BBQ Ribs and Banana Leaf Chilean Sea Bass. We currently have one RockSugar Pan Asian Kitchen restaurant in operation in the Century City Shopping Center in Los Angeles, California. The unique décor of the restaurant features design elements true to the restaurant's Southeast Asian branding. RockSugar Pan Asian Kitchen also features a full-service bar with an extensive wine list and exotic cocktails, as well as an onsite bakery where we create freshly-made desserts that infuse traditional French flair into nearly a dozen Asian-influenced items.

Competition

The restaurant industry is highly competitive. There are a substantial number of restaurant operators that compete directly and indirectly with us, many of which have significantly greater financial and operational resources, higher revenues and greater economies of scale than we do. The restaurant business is affected by many factors, including changes in consumer tastes and discretionary spending patterns; macroeconomic conditions; demographic trends; weather conditions; the cost and availability of raw materials, labor and energy; government regulations; and local competitive factors. Any change in these or other related factors could adversely affect our restaurant operations. In addition, with improving product offerings at fast casual restaurants, quick-service restaurants and grocery stores, consumers may choose to trade down to these alternatives. As a result of these competitive factors, we must constantly evolve and refine the critical elements of our restaurant concepts over time to protect their longer-term competitiveness.

Other factors pertaining to our competitive positioning in the industry are addressed in the sections entitled Restaurant Competitive Positioning, New Restaurant Site Selection and Development, Purchasing and Distribution, Marketing and Advertising and Information Technology in this

Edgar Filing: CHEESECAKE FACTORY INC - Form 10-K

Item 1 and in our Risk Factors in Item 1A of this Form 10-K.

With regard to our bakery operations, national competition within the premium baked dessert category has shifted over the past several years to a lesser number of manufacturers, and the market remains highly competitive.

We believe that our restaurant and bakery operations compete favorably for consumers on the critical attributes of quality, variety, taste, service, consistency and overall value.

Restaurant Competitive Positioning

The restaurant industry is comprised of multiple segments, including fine dining, casual dining and quick-service. Casual dining can be sub-divided further into fast casual, casual and upscale casual dining. Our restaurants operate in the upscale casual dining segment, which we believe is differentiated by freshly prepared and innovative food, flavorful recipes with creative presentations, unique restaurant layouts, eye-catching design elements and more personalized service. Upscale casual dining is positioned higher than core casual dining, with standards that are closer to fine dining. We believe that we are a leader in upscale

Table of Contents

casual dining given our high average sales per restaurant and strong competitive positioning, the key elements of which include the following:

High Quality, High Profile Restaurant Locations and Flexible Site Layouts. We generally locate our restaurants in high quality, high profile locations within densely populated areas with a balanced mix of residences and businesses, including shopping and entertainment outlets. Our restaurants rely principally on the visit frequency and loyalty of our guests who work, reside or shop near each of our restaurants. We have the flexibility to design our restaurants to accommodate a wide variety of urban and suburban site layouts, including multi-level locations. While we have a variety of restaurant design sizes generally ranging from 7,000 to 15,000 interior square feet, we expect the majority of our new restaurants will vary from 7,000 to 10,000 square feet, from which we are able to select appropriately for each market and specific site.

Extensive and Innovative Menu with Award-Winning Bar and Bakery Programs. Our restaurants offer one of the broadest menus in casual dining and feature a wide array of flavors with portions designed for sharing. Substantially all of our menu items, except the desserts manufactured at our bakery production facilities, are prepared fresh daily on the restaurant premises using high quality ingredients based on innovative and proprietary recipes. Our menus are generally updated twice each year to respond to evolving consumer dining preferences and needs, as well as food trends, food-related legislation and changes in consumers eating habits. These menu updates keep our concepts relevant to consumers. Our bakery production facilities produce over 70 varieties of quality cheesecake and other baked desserts using high quality dairy and other ingredients. We periodically introduce new and innovative cheesecakes and other baked desserts as part of our menu enhancements and for our third party customers.

Affordability. We believe our restaurants are recognized by consumers for offering value with menu items across a broad array of price points and generous food portions at moderate prices. Over the past several years, we introduced new menu items and categories at our restaurants, such as Small Plates and Snacks, further enhancing the variety and price point offerings to our guests. The estimated average check for each The Cheesecake Factory restaurant guest, including beverages and desserts, was approximately \$19.00, \$19.00 and \$18.50 for fiscal 2010, 2009 and 2008, respectively. The estimated average check per restaurant guest at Grand Lux Cafe was approximately \$19.00 for fiscal 2010, 2009 and 2008.

Distinctive Restaurant Design and Decor and Outdoor Seating. Our restaurants' distinctive contemporary design and decor create a high energy, non-chain image and upscale ambiance in a casual setting. Whenever possible, outdoor patio seating is incorporated in the design of our restaurants, allowing for additional restaurant capacity, as weather permits, at a comparatively low occupancy cost per seat. Outdoor patio seating is available at more than 85% of our restaurants.

Commitment to Excellent Service and Hospitality through the Selection, Training and Retention of High Quality Employees. Our mission is to create an environment where absolute guest satisfaction is our highest priority. We strive to consistently exceed the expectations of our guests in all aspects of their experience in our restaurants. One of the most important aspects of delivering dependable, quality service is experienced staff members who can execute our concepts according to our high standards. We believe our recruitment, selection, training, and rewards and recognition programs are among the most comprehensive in the restaurant industry and allow us to attract and retain qualified staff members who are motivated to consistently provide excellence in guest hospitality. By providing extensive training and innovative compensation programs, our goal is to encourage our staff members to develop a sense of personal commitment to our core values and culture of excellence in restaurantteuring and guest hospitality. These programs have resulted in generally higher retention rates relative to the restaurant industry. (See Restaurant Operations and Management below.)

Existing Restaurant Locations

Edgar Filing: CHEESECAKE FACTORY INC - Form 10-K

As of February 23, 2011, we operated 164 upscale, casual, full-service dining restaurants: 150 under The Cheesecake Factory® mark in 35 states and the District of Columbia; 13 under the Grand Lux Cafe® mark in nine states; and one RockSugar Pan Asian Kitchen® in California. Additionally, we licensed two bakery cafes under The Cheesecake Factory Bakery Cafe® mark to another foodservice operator. The following table sets forth information with respect to our Company-operated, full-service restaurant locations:

Table of Contents**Existing Company-Operated Full-Service Restaurant Locations by State**

Restaurant Expansion

We believe the viability of The Cheesecake Factory concept has been successfully demonstrated in a variety of layouts (single or multi-level, generally from 7,000 to 15,000 interior square feet), site locations (i.e., urban or suburban shopping malls, lifestyle centers, retail strip centers, office complexes and entertainment centers – either freestanding or in-line) and trade areas across the United States. Accordingly, we intend to continue developing The Cheesecake Factory restaurants in high quality, high profile locations that meet our site standards and demographic requirements within densely populated areas in both existing and new markets. We also continue to refine a smaller footprint restaurant which should help us to penetrate lower density markets that would not have otherwise been available to us. In addition to expanding The Cheesecake

Edgar Filing: CHEESECAKE FACTORY INC - Form 10-K

Factory concept, we plan to selectively pursue other opportunities to leverage the competitive strengths of our restaurant operations, including the expansion of the Grand Lux Cafe and RockSugar Pan Asian Kitchen concepts, as well as the potential development or acquisition of new restaurant concepts. We also intend to seek opportunities to expand both our restaurant and bakery operations internationally (see International Expansion below).

During the past three years, many landlords delayed or cancelled new development projects, as well as extensions and renovations of existing projects, due to the instability in the credit market and a decline in consumer spending brought on by the economic downturn commencing in 2008. This kept the number of premier sites available that we would consider for our restaurants below historical levels. As a result, we only opened three new restaurants in fiscal 2010 and one new restaurant in fiscal 2009. We believe the environment is improving, and in fiscal 2011, we expect to open as many as six to nine new restaurants, including one The Cheesecake Factory restaurant that opened in early February 2011. It is difficult for us to precisely predict the timing of our new restaurant openings due to many factors that are outside of our control (see New Restaurant Site Selection and Development below). We are currently looking for additional sites that meet our standards and are negotiating leases for potential future locations. From time to time, we will evaluate opportunities to acquire and convert other restaurant locations into our concepts.

Table of Contents

Our upscale, highly customized, casual dining restaurants draw guests from a much larger geographical area compared to most casual dining chain restaurants. The size of our restaurant trade areas varies by location, depending on a number of factors such as population density, retail traffic generators and geography. (See Item 1A- Risk Factors – New Restaurant openings may negatively impact sales at our existing restaurants.)

International Expansion

In January 2011, we announced our initial expansion plans outside of the United States. We entered into an exclusive licensing agreement with a Kuwait-based company to build and operate The Cheesecake Factory restaurants in the Middle East. The agreement provides for the development of 22 restaurants over the next five years in the United Arab Emirates, Kuwait, Bahrain, Qatar and the Kingdom of Saudi Arabia, with the opportunity to expand the agreement to include other markets in the Middle East and North Africa, Central and Eastern Europe, Russia and Turkey. This licensing agreement includes an initial development fee, site and design fees and ongoing royalties on our licensee's restaurant sales. The transaction also includes an agreement to supply bakery products branded under The Cheesecake Factory trademark to such restaurants. We do not expect this agreement to have a meaningful impact on our financial results in the near term.

We are evaluating other international markets, being extremely selective about our partners and focusing on well-capitalized companies with established business infrastructures, expertise in multiple countries and experience in operating upscale casual dining restaurants. We look to partner with companies who will protect our brands and operate our concept in a high-quality, consistent way.

New Restaurant Site Selection and Development

We believe the locations of our restaurants are critical to our long-term success and, accordingly, we devote significant time and resources to analyzing each prospective site. Since our restaurant concepts can be successfully executed within a variety of site locations and layouts, we can be highly selective and flexible in choosing suitable locations. In general, we focus on high quality, high profile sites within larger metropolitan areas with dense populations and above-average household incomes. We also continue to refine a smaller footprint restaurant which should help us to penetrate lower density markets that would not have otherwise been available to us. While our restaurants typically share common interior decor elements, the design of each restaurant is customized to accommodate the specifics of each site, including the building type, square footage and layout of available space. In addition to carefully analyzing demographic information and both historical and anticipated population growth for each prospective site, we consider many other factors to assess the suitability of a location. Our restaurants principally rely on the visit frequency and loyalty of consumers who work, reside or shop in each of our trade areas.

Our restaurant development model closely resembles a retail business model that occupies leased space in shopping malls, office complexes, retail strip centers, entertainment centers and other real estate developments. We also develop freestanding restaurant locations using both ground leases and built-to-suit leases, which are commonly used to finance freestanding locations in the restaurant industry. However, we do not rely on third party financing to obtain or construct sites although we generally receive tenant improvement allowances from our landlords as discussed below. We generally lease our restaurant locations for primary periods of 15 to 20 years, with an option to renew. Our rent structures vary from lease to lease, but typically provide for the payment of both minimum base rent and contingent (percentage) rent based on restaurant sales. We are also generally responsible for our proportionate share of common area maintenance (CAM), insurance, property tax and other occupancy-related expenses under our leases. Many of our leases provide for maximum allowable annual percentage or fixed dollar increases in CAM, insurance, and property tax expenses to enable us to better predict and control future variable lease costs. Our sales volumes generally have been in excess of the threshold for percentage rent payments at a large percentage of our restaurant locations that are subject to leases with percentage rent payment provisions.

Edgar Filing: CHEESECAKE FACTORY INC - Form 10-K

We expend cash for leasehold improvements and furnishings, fixtures and equipment (FF&E) to build out our leased premises. We may also expend cash for structural additions that we make to leased premises. Generally, a portion of the leasehold improvement and building costs are reimbursed to us by our landlords as construction contributions pursuant to agreed-upon terms in our leases. If obtained, landlord construction contributions usually take the form of up-front cash, full or partial credits against minimum or percentage rents otherwise payable by us, or a combination thereof. We own substantially all of the FF&E in our restaurants and currently plan to do so in the future.

The relatively high sales productivity of our restaurants provides opportunities to obtain suitable and competitive leasing terms from landlords. Due to the flexible and customized nature of our restaurant operations and the complex design, construction and preopening processes for each new location, our lease negotiation and restaurant development time frames vary. The development and opening process generally ranges from six to eighteen months, depending largely on the availability of the leased space we intend to occupy, and can be subject to delays either due to factors outside of our control or to our selective timing of restaurant openings. The number and timing of new restaurants actually opened during any given period, and their associated contribution to operating

Table of Contents

week growth for the period, depend on a number of factors. (See Item 1A Risk Factors Selecting high quality restaurant sites for new restaurant opening is essential to our ability to grow revenues, profitability and earnings per share.) While we attempt to manage those factors within our control, we have experienced unforeseen and planned delays in restaurant openings from time to time in the past and could experience delays in the opening of future sites.

Unit Economics

We believe that our ability to select suitable locations and operate successful, high quality restaurants results in the continuing popularity of our restaurant concepts with consumers. This popularity is reflected in our average sales per restaurant, which is among the highest of any publicly-held restaurant company. The following discussion of sales and square foot averages include only The Cheesecake Factory and Grand Lux Cafe restaurant concepts.

Average sales per restaurant open for the full year were approximately \$9.8 million, \$9.6 million and \$9.9 million for fiscal 2010, 2009 and 2008, respectively. Since each of our restaurants has a customized layout and differs in size, an effective method to measure the unit economics of our concepts is by square foot. Average sales per productive square foot (defined as interior plus seasonally-adjusted patio square footage) for restaurants open for the full year were approximately \$850, \$830 and \$860 for fiscal years 2010, 2009 and 2008. Our average sales metrics for a given fiscal year can be impacted by a number of factors, including consumer preferences, macroeconomic conditions, severe weather conditions and the average size of new restaurants we open during that year. (See Item 1A Risk Factors for a discussion of the risks related to the foregoing factors.) The average interior square footage for restaurants opened during fiscal 2010, 2009 and 2008 was 9,300, 11,000 and 9,800, respectively.

We currently lease space for all of our restaurants and are required to expend cash for leasehold improvements and FF&E to build out the leased premises, which is targeted at an average of \$650 to \$750 per square foot for The Cheesecake Factory restaurants, excluding preopening costs. The construction costs to build out our leased premises vary geographically. Additionally, our investment cost per square foot also varies from restaurant to restaurant, depending on the complexity of our build-out of the leased space, site conditions and labor conditions in the local market. We typically seek to obtain construction contributions from our landlords for structural additions and other leasehold improvements that we make to the leased premises. These contributions vary from lease to lease, depending on the scope of construction activities and other factors, and are not achievable at every site.

In selecting sites for our restaurants, an important objective is to earn an appropriate return on investment. However, this return cannot be meaningfully measured until our restaurants reach their mature run-rate levels of sales and profitability. The initial return on investment performance targets for newer concepts will typically be lower than the average for an established, highly productive concept such as The Cheesecake Factory, since the first few locations of a new concept are typically in a refinement stage as they build brand recognition for a period of time. Our return targets do not consider field supervision and corporate support expenses; exclude non-cash items such as depreciation expense; exclude income taxes; and do not represent a targeted return on investment in our common stock.

Our new restaurants historically open with initial sales volumes well in excess of their sustainable run-rate levels. This initial honeymoon effect usually results from grand opening publicity, promotions and other consumer awareness activities that generate abnormally high customer traffic for our concepts, particularly in new markets. During the three to six months following the opening of new restaurants, customer traffic generally settles into its normal pattern, resulting in sales volumes that gradually adjust downward to their sustainable run-rate level. Additionally, our new restaurants usually require a 90- to 120-day period after opening to reach their targeted restaurant-level margin due to cost of sales and labor inefficiencies commonly associated with new, highly complex casual dining restaurants such as ours. (See Item 1A

Edgar Filing: CHEESECAKE FACTORY INC - Form 10-K

Risk Factors Selecting high quality sites for new restaurant openings is essential to our ability to grow revenues, profitability and earnings per share and New restaurant openings may negatively impact sales at our existing restaurants.)

Preopening Costs for New Restaurants

As a result of the highly customized and operationally complex nature of our upscale, high volume concepts, as well as the investment we make in properly training our staff to operate our restaurants, the preopening process for our restaurants is more extensive, time consuming and costly relative to that of most chain restaurant operations. Preopening costs vary by location depending on a number of factors, including the proximity of our existing restaurants; the size and physical layout of each location; the number of management and hourly employees required to operate each restaurant; the relative difficulty of the restaurant staffing process; the cost of travel and lodging for different metropolitan areas; the timing of the restaurant opening and the extent of unexpected delays, if any, in obtaining final licenses and permits to open the restaurants, which may also depend on our landlords obtaining their licenses and permits, as well as completing their construction activities.

Table of Contents

Preopening costs for a typical single-story The Cheesecake Factory restaurant in an established market average approximately \$1.2 million to \$1.4 million and include all costs to relocate and compensate restaurant management employees during the preopening period; costs to recruit and train hourly restaurant employees; wages, travel and lodging costs for our opening training team and other support employees; and straight-line minimum base rent during the build-out and in-restaurant training periods. Also included in preopening costs are expenses for maintaining a roster of trained managers for pending openings; the associated temporary housing and other costs necessary to relocate managers in alignment with future restaurant opening and operating needs; and corporate travel and support activities. Preopening costs are usually higher for larger restaurants, initial entry into a new market and newer concepts. We usually incur the most significant portion of preopening costs within the two months immediately preceding and the month of a restaurant's opening. Preopening costs can fluctuate significantly from period to period, based on the number and timing of restaurant openings and the specific preopening costs incurred for each restaurant.

Restaurant Operations and Management

Our ability to consistently and properly execute a made-from-scratch, complex menu in an upscale casual, high volume dining environment is critical to our overall success. We employ detailed operating procedures, standards, controls, food line management systems, and cooking methods and processes to accommodate our extensive menu and to drive sales productivity. However, the successful day-to-day operation of our restaurants remains critically dependent on the quality, ability, dedication and engagement of our general managers, executive kitchen managers and all other management and hourly staff members working at our restaurants. The availability and retention of high-level restaurant management has been and continues to be a significant industry-wide challenge. (See Item 1A Risk Factors Our business and future development could be harmed if we are unable to retain key personnel or have difficulties in recruiting qualified personnel.)

We believe that the high average sales volumes and popularity of our restaurants allow us to attract and retain high quality, experienced restaurant-level management and other operational personnel. In addition, we tend to experience a higher level of management and staff member retention than the restaurant industry in general. Each full-service restaurant is typically staffed with one general manager, one executive kitchen manager and approximately six to ten additional kitchen and front-of-the-house managers, depending on the size and sales volume of each restaurant. Our general managers possess an average of nine years of experience with the Company. All newly recruited restaurant management personnel complete an extensive training program during which they receive both classroom and on-the-job instruction in food quality, safety and preparation, guest service, alcoholic beverage service, liquor liability avoidance, financial management and cost controls, risk management, staff relations, and our core values and culture of guest hospitality. Managers continue their development by participating in and completing a variety of training and development activities to assess their skills and knowledge necessary for continued upward progression through our management levels.

Restaurant general managers report to an area director of operations who typically supervises the operations of six to eight restaurants, depending on geographic and management experience factors. In turn, each area director of operations reports to one of four regional vice presidents of restaurant operations. Our executive kitchen managers report to their general managers, but are also supervised by an area kitchen operations manager responsible for between six and ten restaurants. Our restaurant field supervision organization also includes a chief operating officer, a chief culinary officer, an operations services team and a performance development department who are collectively responsible for managing new restaurant openings and training for all operational managers and staff.

To enable us to more effectively compete for and retain the highest quality restaurant management personnel, we offer an innovative and comprehensive compensation program for our restaurant general managers and executive kitchen managers. Each participant receives a competitive base salary and has the opportunity to earn an annual cash bonus (calculated and paid quarterly) based on quantitative restaurant performance metrics. Participating restaurant general managers are also eligible to use a Company-leased vehicle, for which all non-business use is calculated and added to the participants' taxable income in accordance with income tax regulations. A longer-term, equity incentive program, currently based on stock options and restricted stock, is also available to participating restaurant general managers and executive

Edgar Filing: CHEESECAKE FACTORY INC - Form 10-K

kitchen managers. Participation in our equity compensation program depends on the participants' extended service with us in their respective positions and their achievement of certain established performance objectives during that period.

Our restaurant general managers are responsible for selecting and training hourly staff members for their respective restaurants. Each restaurant is staffed, on average, with approximately 180 hourly staff members. The actual number of staff members working in a restaurant on any given day will depend on guest traffic levels and can be scaled accordingly throughout the day as appropriate. We require each hourly staff member to participate in a formal training program for his or her respective position in the restaurant, under the supervision of other experienced staff members and restaurant management. We strive to foster enthusiasm and dedication in our staff members through daily staff meetings and dedicated time for training. We regularly solicit their suggestions concerning restaurant operations and other aspects of our business.

Table of Contents

In order to equip our restaurant general managers, executive kitchen managers and field supervision management with the necessary tools to effectively operate our restaurants, we prepare a detailed monthly operating budget for each restaurant. The information we provide includes comparisons of actual results to budgeted results, as well as to actual results for the prior year period. We also measure the productivity and efficiency of our restaurant operations using a variety of statistical indicators such as daily table turns, guests served per labor hour worked, operating costs incurred per guest served and other metrics, and provide this statistical package to the management of each restaurant to assist them in better managing financial, labor, operational and other metrics.

Bakery Operations

Currently, we have two bakery production facilities: one in Calabasas Hills, California, and a second in Rocky Mount, North Carolina. Our facility in Calabasas Hills contains approximately 60,000 square feet, of which approximately 40,000 square feet is devoted to production operations and the remainder is utilized for corporate support purposes. Our facility in Rocky Mount contains approximately 100,000 square feet, of which approximately 70% is devoted to production operations and 20% is being used as a distribution center for our restaurants and customers located in the eastern United States. We intend to build out the remaining space in stages as additional capacity is needed to produce cheesecakes and other bakery products for our restaurants and other foodservice wholesalers, retailers and distributors. We have an option to acquire additional land adjacent to our current facility in North Carolina, should additional capacity be needed in the future.

We produce approximately 70 varieties of cheesecake in our two production facilities based on proprietary recipes. Some of our most popular cheesecakes include the Original Cheesecake, Ultimate Red Velvet Cake Cheesecake™, Reese's® Peanut Butter Cup Chocolate Cake Cheesecake™, Godiva® Chocolate, 30th Anniversary Chocolate Cake Cheesecake, Fresh Banana Cream and Fresh Strawberry. Other popular baked desserts include Chocolate Tower Truffle Cake™, Carrot Cake, Black-Out Cake and Lemoncello Cream Torte. In the aggregate, our bakery production facilities currently produce approximately 300 product SKUs (stock keeping units).

High quality baked desserts and other products made with the best available ingredients are essential to the successful execution of our restaurant and bakery operations. Our bakery facilities operate under an ongoing, comprehensive food safety and quality assurance program. This program includes, among other things, supplier qualification and plant inspections, inbound raw material testing, microbiological testing of the production environment, safety and sanitation monitoring, and finished goods testing. Our in-house food safety and quality assurance staff audits and monitors our manufacturing practices during operation and closely monitors our compliance with the industry standard Hazard Analysis Critical Control Points (HACCP) program. We use both internal and external quality control laboratory resources to test raw ingredients and finished products for safety.

The primary role of our bakery operations is to produce innovative, high quality cheesecakes and other baked desserts for sale at our restaurants. Dessert sales represented approximately 15% of our restaurant sales in fiscal 2010, 15% in fiscal 2009 and 14% in fiscal 2008, and are important to restaurant-level profitability. We also sell cheesecakes and other baked products on a wholesale basis to other foodservice operators, retailers and distributors. Approximately 60% of the bakery's production activities are currently devoted to our outside customers, with the remaining dedicated to supplying our restaurants. Cheesecakes and other items produced for outside accounts are marketed under The Cheesecake Factory® trademark, The Dream Factory® trademark, The Cheesecake Factory Bakery® mark and other private labels. Current large-account customers include the leading national warehouse club operators, a national retail bookstore cafe, institutional foodservice distributors, supermarkets and other restaurant and foodservice operators. Sales to warehouse clubs, which represent approximately two-thirds of our total outside bakery sales, are concentrated with three large warehouse club operators in the United States. Bakery products are shipped to our restaurants and other customers throughout the United States by common carrier. We also fulfill orders received by telephone and through our website.

Edgar Filing: CHEESECAKE FACTORY INC - Form 10-K

Our bakery sells our baked goods internationally under both The Cheesecake Factory® and The Dream Factory® trademarks in over ten countries. We have a limited distribution arrangement with one operator in Saudi Arabia to sell our baked goods in their cafe outlets under The Cheesecake Factory of California name and are selling our desserts at another Middle East-based coffee cafe under The Dream Factory® trademark. Our bakery will supply The Cheesecake Factory® branded products offered in our restaurants to any licensed The Cheesecake Factory® restaurants opened in the Middle East under our exclusive licensing agreement.

We strive to develop and maintain long-term, growing relationships with our bakery customers, based largely on our 38-year reputation for producing high quality, creative baked desserts. However, bakery sales volumes always will be less predictable than our restaurant sales. (See Item 1A Risk Factors Our failure to successfully operate our bakery business would have a material adverse impact on our third party bakery sales and profits.)

Table of Contents

We currently maintain a full-time staff of sales and marketing and product development employees dedicated to bakery operations. Additionally, we utilize the services of professional foodservice brokers for certain bakery products and distribution channels.

Purchasing and Distribution

We strive to obtain quality menu ingredients, bakery raw materials and other supplies and services for our operations from reliable sources at competitive prices. We continually research and evaluate various ingredients and products in an effort to maintain high quality levels and to be responsive to changing consumer tastes. Except for cheesecakes and other baked products, which we produce at our bakery facilities, our restaurants do not utilize a central food commissary. Substantially all menu items are prepared daily on each restaurant's premises from scratch using fresh ingredients. In order to maximize purchasing efficiencies and to provide the freshest ingredients for our menu items while obtaining the lowest possible prices for the required quality and consistency, each restaurant's management determines the quantities of food and supplies required and orders the items from local, regional and national suppliers on terms negotiated by our central purchasing staff. Restaurant-level inventories are maintained at a minimum dollar-value level in relation to sales due to the high concentration and relatively rapid turnover of the perishable produce, poultry, meat, fish and dairy commodities that we use in our operations, coupled with limited storage space at our restaurants.

We attempt to negotiate short-term and long-term agreements for our principal commodity, supply and equipment requirements, depending on market conditions and expected demand. However, we are currently unable to contract for long periods of time for certain of our commodities such as fish and most dairy items (except for cream cheese used in our bakery operations). Consequently, these commodities can be subject to unforeseen supply and cost fluctuations. In addition, commodity costs also can fluctuate due to other factors as discussed in Item 1A Risk Factors including increases in food costs, raw materials and other supplies and services may have a material adverse impact on our business as a result of operations. Substantially all of our food and supplies are available from multiple qualified suppliers in virtually all cities in which our operations are located. Independent foodservice distributors, including the largest foodservice distributor in North America, deliver most food and supply items daily to our restaurants.

Information Technology

We facilitate financial and accounting controls in our restaurants through the use of a sophisticated point-of-sale (POS) cash register system and computer network in each restaurant that interfaces with the computer network in our corporate offices using a high-speed, secure communication system. The POS system is also used to authorize and transmit credit card sales transactions. The POS system and computer network provide our restaurant management with daily information regarding sales, cash receipts, inventory, food and beverage costs, labor costs and other controllable operating expenses. Our Kitchen Management System (KMS) provides automated routing and cookline balancing and is installed in all of our restaurants. KMS has improved productivity and continues to provide synchronization in order completion, ticket time and cook time data and more efficient levels of labor without sacrificing quality. Field supervision staff members also use computer systems that interface with the restaurant and corporate computer networks and handheld wireless devices to insure prompt communication.

We continue to innovate and modernize our technology infrastructure to provide improved efficiency, capability, stability and scalability. In fiscal 2010, we implemented and leveraged a robust business intelligence solution and data warehouse architecture to empower corporate, field and restaurant management with information and insights into key operational metrics and performance indicators. This framework provides enterprise reporting, dashboards and analytics allowing relevant and targeted access and correlations to data sources such as front desk metrics like quote accuracy and wait times, management and staff retention trends, and restaurant quality and service analysis. We are in the process of implementing an improved back office system at our restaurants to further improve supply chain management, prep and production planning,

forecasting and ordering. We also completed the implementation of our new front desk management system, which has further streamlined our operations by improving our quote accuracy.

Marketing and Advertising

We believe our commitment to providing a differentiated total guest experience through fresh and innovative menu items, unique restaurant design and decor, and friendly, attentive service where guest satisfaction is our highest priority has created strong brand recognition for our namesake concept. Our operational excellence continues to be a highly effective approach to attracting and retaining guests. Accordingly, we historically relied on our reputation, as well as our high profile locations, media interest and positive word of mouth to retain and grow market share rather than using traditional paid advertising through television and print. For restaurants opening in new markets, we strive to obtain local television and radio station coverage of the opening in order to benefit from the free publicity. We also attempt to build awareness and relationships with retailers located in the same developments, mall concierges, local hotel concierges, neighborhood groups and others in the community.

Table of Contents

During fiscal 2009, we implemented a strategic marketing plan with the primary objectives of further building our brand awareness through high profile national/local publicity, deepening guest engagement through social media and driving sales in a cost effective way that is consistent with the high quality of our brands. We continued to evolve this strategic platform in fiscal 2010 by building on our brand positioning, which is founded on the concept of sharing. Most notably, this included the continuation of our relationship with Feeding America® the nation's leading domestic hunger-relief charity along with an integrated promotional partnership with the American Idol® Live Tour and the addition of a new e-gift card sales channel. We are actively using social media, such as email, Facebook® and Twitter® to engage our guests by providing an interactive forum for them to relate with us (and each other), as well as learn about what is new and exciting in our restaurants. In fiscal years 2010, 2009 and 2008, expenditures for marketing and advertising were approximately 1% of restaurant sales.

Seasonality and Quarterly Results

Our business is subject to seasonal fluctuations. Historically, our highest levels of revenues for our established restaurants occur in the second and third quarters of the fiscal year. Approximately 90% of our restaurants are located in or near retail centers and malls that typically experience seasonal fluctuations in sales. Patio seating represents approximately 20% of the total available productive seating in our restaurants and can be subject to disruption from inclement weather. Quarterly results have been and will continue to be significantly impacted by the number and timing of new restaurant openings and their associated preopening costs and operating inefficiencies. Our bakery operations are seasonal to the extent that the fourth quarter's sales are typically higher due to holiday business. Additionally, bakery sales comparisons may fluctuate significantly from quarter to quarter due to the timing and size of orders from our larger bakery customers. (See Item 1A Risk Factors Seasonality of our business and the timing of new restaurant openings could result in fluctuations in our financial performance from quarter to quarter within a fiscal year and Adverse weather conditions could unfavorably affect our restaurant sales.)

Food Quality and Safety

To minimize the risk of food borne illness, we monitor compliance with industry best practice standards, including extensive training of staff in food safety, rigorous management of internal processes and conditions as validated by third party audit and certifications for Safe Quality Food standards and American Institute of Baking food safety. We have similar procedures with respect to food safety at our restaurants. In addition, our corporate food safety and quality assurance staff supplement our internal operational staff and external food quality monitoring programs, including a monthly review by a third-party provider to audit our food safety and sanitation. (See Item 1A Risk Factors Negative publicity about us, our restaurants or bakery products, and about others across the food industry supply chain, whether or not accurate, could harm our business and Litigation could have a material adverse impact on our business.)

Government Regulation

We are subject to numerous federal, state and local laws affecting our business. Each of our restaurants is subject to licensing and regulation by a number of government authorities, which may include alcoholic beverage control, nutritional information disclosure, health, sanitation, environmental, zoning and public safety agencies in the state or municipality in which the restaurant is located. (For a discussion of these factors, see Item 1A Risk Factors including Changes in, or any failure to comply with, applicable laws or regulations at the federal, state or local level, including mandated changes to minimum wage levels, could adversely affect our business, financial position and results.)

Edgar Filing: CHEESECAKE FACTORY INC - Form 10-K

During fiscal 2010, alcoholic beverages represented approximately 13% of our restaurant sales. Alcoholic beverage control regulations require each of our restaurants to apply to a state authority and, in certain locations, county and municipal authorities, for licenses and permits to sell alcoholic beverages on the premises. Typically, licenses must be renewed annually and may be subject to penalties, temporary suspension or revocation for cause at any time. Alcoholic beverage control regulations impact many aspects of the daily operations of our restaurants, including the minimum ages of patrons consuming and staff members serving these beverages; staff member alcoholic beverage training and certification requirements; hours of operation; advertising; wholesale purchasing and inventory control of these beverages; the seating of minors and the servicing of food within our bar areas; special menus and events, such as happy hours, and the storage and dispensing of alcoholic beverages. State and local authorities in many jurisdictions routinely monitor compliance with alcoholic beverage laws.

In addition, we are subject to dram shop statutes in most of the states in which we operate, which generally provide a person injured by an intoxicated person the right to recover damages from an establishment that wrongfully served alcoholic beverages to the intoxicated person. We carry liquor liability coverage as part of our existing comprehensive general liability insurance. (For a discussion of the potential impact of a settlement or judgment in excess of our liability insurance coverage, see Item 1A Risk Factors)

Table of Contents

Litigation could have a material adverse effect on our business and Increases in the cost of managing our risk profile, including employee health benefits, may have a material adverse effect on our business and results of operations.)

Various federal and state labor laws govern our operations and our relationships with our staff members, including such matters as minimum wages, breaks, overtime, fringe benefits, safety, working conditions and citizenship or work authorization requirements. Various proposals that would require employers to provide health insurance for all of their employees are considered from time to time in Congress and various states and municipalities, including the recently enacted federal health care legislation. We are also subject to the regulations of the Office of Homeland Security, the U.S. Citizenship and Immigration Services and U.S. Customs and Immigration Enforcement. In addition, some states in which we operate have adopted immigration employment laws which impose additional conditions on employers.

As a manufacturer and distributor of food products, we are subject to a number of food safety regulations, including the Federal Food, Drug and Cosmetic Act and the newly enacted Federal Food Safety Modernization Act. This comprehensive regulatory framework governs the manufacture (including composition and ingredients), labeling, packaging and safety of food in the United States. In addition, several states and local jurisdictions have adopted or are considering various food and menu nutritional labeling requirements, many of which are inconsistent or are interpreted differently from one jurisdiction to another.

We are subject to federal and state environmental regulations. However, these laws have not had a material effect on our operations. During fiscal 2010, there were no material capital expenditures for environmental control facilities, and no such expenditures are anticipated.

Our facilities must comply with the applicable requirements of the Americans with Disabilities Act of 1990 (ADA) and related federal and state statutes. The ADA prohibits discrimination on the basis of disability with respect to public accommodations and employment. Under the ADA and related state laws, we must make access to our new or significantly remodeled restaurants readily accessible to disabled persons. We must also make reasonable accommodations for the employment of disabled persons.

We have a significant number of hourly restaurant staff members who receive income from gratuities. We have elected to voluntarily participate in a Tip Reporting Alternative Commitment (TRAC) agreement with the Internal Revenue Service. By complying with the educational and other requirements of the TRAC agreement, we reduce the likelihood of potential employer-only FICA tax assessments for unreported or underreported tips. However, we rely on our staff members to accurately disclose the full amount of their tip income and base our reporting on the disclosures provided to us by such tipped employees.

Trademarks and Other Intellectual Property

We have registered, among other marks, The Cheesecake Factory, Grand Lux Cafe, RockSugar Pan Asian Kitchen, The Cheesecake Factory Bakery, The Dream Factory, and The Cheesecake Factory Bakery Cafe as trademarks with the United States Patent and Trademark Office in both restaurant and bakery goods categories, among others. Additional trademark applications are pending. We have also registered our ownership of the Internet domain names www.thecheesecakefactory.com, www.grandluxcafe.com, www.rocksugarpanasiankitchen.com and other Internet domain names, and we periodically apply for copyright protection of our restaurant menus. We regard our trademarks and other intellectual property as having substantial value and as important factors in the marketing of our restaurants and bakery products. We have registered, or have pending applications to register, one or more of our trademarks in more than 70 foreign countries, although we have not been

Edgar Filing: CHEESECAKE FACTORY INC - Form 10-K

able to register our marks in every country or in every category for which registration has been sought and can provide no assurance that our name and marks will be renewed in the future. (See Item 1A Risk Factors Failure to maximize or to successfully assert our intellectual property rights could impact our competitiveness.)

Charitable Giving

In 2001, we sponsored the formation of The Cheesecake Factory Oscar and Evelyn Overton Charitable Foundation (Foundation), a 501(c)(3) qualified, non-profit charitable organization. Two of our Executive Officers, David Overton and Debby Zurzolo, hold positions on the Foundation's Board of Directors. Our Foundation allows us to give back to our communities and provides a means for staff member participation in qualified local community service and charitable programs. In fiscal 2010, the Foundation hosted its annual Invitational Charity Golf Tournament, raising over \$200,000 in net proceeds to benefit the City of Hope, a National Cancer Institute-designated Comprehensive Cancer Center. Since the inception of the event in 2003, the Foundation has raised \$1.7 million for the City of Hope. In addition, in fiscal 2010, the Foundation held its annual Thanksgiving Day Feast at 13 Salvation Army shelters across the country, serving approximately 6,000 low-income individuals and families. The Foundation also supports the Salvation Army's South Los Angeles Youth and Community Center, enabling it to provide a safe haven to at risk children and families on Saturdays. Additionally, the Foundation helps sponsor The Cheesecake Factory Secret Ingredients™ teams of our staff members who work directly with qualified charities in their communities to support a variety of local and national causes.

Table of Contents

In addition to the efforts of the Foundation, in fiscal 2010 we donated \$1.3 million to Feeding America® as a lead sponsor of Hunger Action Month, a campaign to fight domestic hunger. Our staff members also donated over 65 tons of peanut butter to local food banks across the country as part of a company-wide initiative to support Hunger Action Month. In addition, we continued to participate in the Harvest Program by donating excess, unused food from The Cheesecake Factory and Grand Lux Cafe restaurants to qualified local and regional agencies, including food banks, soup kitchens and homeless shelters.

Employees

As of December 28, 2010, we employed approximately 31,500 staff members, of which approximately 30,300 worked in our restaurants, approximately 800 worked in our bakery operations and approximately 400 worked in our corporate center and restaurant field supervision organization. None of our staff members are currently covered by collective bargaining agreements, and we have never experienced an organized work stoppage, strike or labor dispute. Our working conditions and compensation packages are generally comparable with those offered by our competitors, and we consider overall relations with our staff members to be favorable.

Executive Officers

David Overton, age 64, serves as our Chairman of the Board and Chief Executive Officer. Mr. Overton co-founded our predecessor company in 1972 with his parents, Oscar and Evelyn Overton.

Michael E. Jannini, age 58, was appointed President of the Company in February 2010. Prior to joining the Company, Mr. Jannini spent over 20 years in various management roles with Marriott International, Inc. He most recently served as Executive Vice President and General Manager of Global Brand Strategy and Innovation at Marriott.

W. Douglas Benn, age 56, was appointed Executive Vice President and Chief Financial Officer in January 2009. Mr. Benn is a veteran of the restaurant industry having spent more than 20 years in management roles with restaurant companies. Prior to joining the Company, he served as Executive Vice President and Chief Financial Officer of RARE Hospitality International, owner of the LongHorn Steakhouse and The Capital Grille concepts, prior to that company's sale to another multi-concept, public restaurant company in October 2007.

Max S. Byfuglin, age 65, serves as President of The Cheesecake Factory Bakery Incorporated, our bakery subsidiary. Mr. Byfuglin joined our bakery operations in 1982 and worked closely with our founders, serving in nearly every capacity in our bakery over the past 28 years.

Debby R. Zurzolo, age 54, serves as our Executive Vice President, Secretary and General Counsel. Ms. Zurzolo joined our Company as Senior Vice President and General Counsel in April 1999 and was appointed to her current positions in December 2003. From 1982 until joining the Company, she practiced law at Greenberg Glusker Fields Claman & Machtinger LLP in Los Angeles, California. As a partner with that firm, Ms. Zurzolo represented us on various real estate and other business matters.

ITEM 1A. RISK FACTORS

Our business, operating results, financial position and/or cash flows are subject to a number of risks and uncertainties. Our actual results could vary materially from any results expressed or implied by forward-looking statements contained in this report (and in any of our other filings with the SEC and other communications by us, both written and oral) depending on a variety of factors, including the risks and uncertainties described below. It is not possible for us to predict the impact these factors could have on us or the extent to which any one factor, or combination of factors, may adversely affect our results.

Continuing effects from the global economic crisis and recession, including a decline in consumer discretionary spending, materially affected us in fiscal 2010, 2009 and 2008, and could adversely affect us in fiscal 2011 and beyond.

Dining in casual, upscale restaurants generally is a discretionary expense. Factors that affect consumer behavior and spending for restaurant dining in general, such as changes in general economic conditions (including national, regional and local economic conditions), consumer tastes, discretionary spending patterns, demographic trends and employment levels, may have a material adverse effect on our business, operating results, financial position or cash flows. Leading economic indicators, such as unemployment and consumer confidence, remain volatile and may not show meaningful improvement in fiscal 2011. If economic conditions worsen, our business, operating results, financial position and cash flows could be adversely affected.

Table of Contents

Future growth in our revenues, profitability and earnings per share depends heavily on improving comparable restaurant sales.

Future growth in revenues and profits is highly dependent on our ability to grow comparable restaurant sales and leverage comparable sales gains by operating our restaurants efficiently. Comparable restaurant sales changes generally occur as a result of guest traffic increases or decreases, menu pricing and menu mix shifts. Decreases in comparable restaurant sales generally result in spreading fixed costs across a lower level of sales, which may, in turn, cause downward pressure on our profitability. If we are unable to increase the guest traffic levels in our restaurants, it will likely hinder our ability to grow our comparable restaurant sales.

Changes in guest traffic levels can be impacted by a variety of factors, including macroeconomic conditions and changes in customer discretionary spending (as discussed above), competition from other restaurants (both in the upscale casual dining segment and in other segments of the restaurant industry), consumer perception of our concepts' offerings in terms of quality, price, value and service, changes in consumer eating habits, such as trends toward eating less calories, salt and fats, and how guest experiences affect their desire to return to our restaurants.

We utilize menu price increases to help offset inflation of key operating costs. If our menu price increases are not accepted by guests, resulting in reduced guest traffic, it could reduce our growth in comparable restaurant sales and negatively affect our profitability. If our menu price increases are insufficient to absorb or offset increased costs, it could negatively affect our profitability.

Menu mix can be negatively impacted as a result of guests managing their checks. If menu mix is unfavorable, it could offset some of the impact of our menu price increases, thereby lowering our potential for comparable restaurant sales growth.

Selecting high quality sites for new restaurant openings is essential to our ability to grow revenues, profitability and earnings per share.

Our future revenue and profitability growth also depends on the availability of high quality sites that meet our criteria for new restaurant development and our ability to select sites that will continue to drive high levels of sales per square foot. Our new restaurant development can be subject to unforeseen delays due to market conditions, the highly customized nature of our restaurant concepts, and the complex design, construction, and preopening processes for each new location. The lease negotiation and restaurant development timeframes also vary by location. Due to continued instability in the credit market and continuing conservative consumer spending in fiscal 2010, many landlords continued to delay new projects or extensions and/or renovations of existing projects. Also, few retail developers launched new projects for openings in future years. Such actions may limit our choices to consider for growth opportunities.

The number and timing of new restaurants opened during any given period, and their associated contribution to operating week growth for the period, will depend on a number of factors including, but not limited to:

- the identification and availability of high quality locations and acceptable lease terms;

Edgar Filing: CHEESECAKE FACTORY INC - Form 10-K

- the availability of suitable financing for our landlords;
- the financial viability of our landlords;
- the timing of the delivery of the leased premises to us from our landlords in order to commence build-out construction activities;
- the ability of our landlords and us to obtain all necessary governmental licenses and permits on a timely basis to construct and operate our restaurants;
- our ability to successfully manage the design, construction and preopening processes for each restaurant, and the availability and/or cost of raw materials;
- any unforeseen engineering or environmental problems with the leased premises;
- adverse weather during the construction period; and
- the availability of qualified operating personnel in the local market.

If we are unable to develop new restaurants, our ability to increase our revenues and profitability may be harmed.

Restrictive credit conditions, along with macroeconomic factors, had an adverse impact on certain of our landlords and other tenants in retail centers in which we are located. If these conditions continue or worsen, it could further materially impact these parties, which in turn could negatively affect our financial results.

Table of Contents

The credit and lending industry continue to be restrictive. If credit accessibility fails to improve in fiscal 2011 and beyond, our landlords may be unable to obtain financing or remain in good standing under their existing financing arrangements, resulting in their inability to provide construction contributions or failure to satisfy other lease covenants to us. In addition, lenders are taking a more active role in reviewing tenant leases and prospective tenancies and have been more restrictive in approving tenancies and financing. This may affect our ability to lease sites at as favorable terms as we have received in the past.

Several of our landlords filed for protection under Chapter 11 of the United States Bankruptcy Code, and we received notices of intended foreclosures from lenders to our landlords on other projects. While several of our landlords have filed for bankruptcy protection, many of them have now emerged from such protection and continue to own and operate the shopping centers in which we are located. While as of the date of filing of this report, no leases have been rejected in the bankruptcy proceedings, and we have not received any indications that our occupancy rights will be disturbed by any of these proceedings, we can not be certain that such proceedings will not impact us in the future. In addition, if these landlords (and others who have not filed for bankruptcy protection to date) are unable to obtain sufficient credit to continue to properly manage their retail sites, we may experience a drop in the level of quality of such retail centers.

In addition, several other tenants at retail centers in which we are located or have executed leases have ceased operations or, in some cases, have failed to open after committing to do so. While the number of tenant closures subsided by the end of fiscal 2010, if these failures continue, they could result in a reduction of guest traffic at retail centers in which we are located. In turn, this may contribute to a lower number of guest visits at our restaurants. Additionally, if our landlords fail to satisfy required co-tenancies in our leases, such failures may result in us delaying openings or terminating leases in these locations. All of these factors could have a material adverse impact on our operations.

Our inability to renew our restaurant leases on similar terms and conditions, or at all, could harm our business and results of operations.

We currently lease all of the premises in which our restaurants are located and plan to continue to do so in the future. Should we be unable to renew these leases on similar terms and conditions, or at all, we would be required to incur additional costs to operate our restaurants, including increased rent and other costs related to our occupancy of the leased premises, and costs for the relocation and development of a restaurant with respect to which a lease was not renewed. Additional costs related to the leasing and development of our restaurants could negatively affect our business and results of operations.

Our success depends substantially on the value of our brands and our reputation for offering guests a unique total experience.

We believe we have built a strong reputation for the quality and breadth of our menu items and bakery products, as part of the total experience that guests enjoy in our restaurants. We believe we must protect and grow the value of our brands to continue to be successful in the future. Any incident that erodes consumer trust in or affinity for our brands could significantly reduce their value. If consumers perceive or experience a reduction in food quality, service or ambiance, or in any way believe we failed to deliver a consistently positive experience, including in any future restaurants operated by licensees, our brand value could suffer.

Negative publicity about us, our restaurants or bakery products and about other businesses across the food industry supply chain, whether or not accurate, could harm our business.

Adverse publicity or news reports, whether or not accurate, regarding food quality or safety issues, illness, injury, health concerns, government or industry findings concerning food products served by us, or operating issues stemming from a single restaurant, a limited number of our restaurants, a single production run of our bakery products, restaurants operated by other foodservice providers or generally in the food supply chain, could be damaging to the restaurant industry overall and specifically harm our brand and reputation. A decrease in guest traffic as a result of these types of health concerns or negative publicity could adversely impact our results of operations.

Our growth strategy includes plans to improve upon and expand our Grand Lux Cafe and RockSugar Pan Asian Kitchen brands. A failure by us to successfully expand and operate these brands may negatively affect our business and results of operations.

As of February 23, 2011, The Cheesecake Factory Incorporated operated 164 upscale, casual, full-service dining restaurants: 150 under The Cheesecake Factory® mark; 13 under the Grand Lux Cafe® mark; and one under the RockSugar Pan Asian Kitchen® mark. Each of our restaurant concepts, as well as each of our individual restaurants, is subject to the risks and uncertainties described in this filing. However, there is an enhanced level of risk and uncertainty related to the operation and expansion of our less-established brands, Grand Lux Cafe and RockSugar Pan Asian Kitchen. While we have made substantial investments in the development of these concepts, additional investments are required in order for us to refine and expand each of these concepts. We can provide no

Table of Contents

assurance that these investments will be successful or that additional new unit growth will be accepted in the markets targeted for expansion of these concepts.

Our international expansion and global brand development efforts could negatively affect our brand, require additional infrastructure to support, and cause us to be exposed to additional liabilities under foreign laws.

In January 2011, we entered into an exclusive licensing agreement with a Kuwait-based company to build and operate 22 The Cheesecake Factory restaurants over the next five years in the United Arab Emirates, Kuwait, Bahrain, Qatar and the Kingdom of Saudi Arabia, with the opportunity to expand the agreement to include other markets in the Middle East and North Africa, Central and Eastern Europe, Russia and Turkey. We currently have no restaurants in locations other than the United States and have not licensed our brand, trained licensees to execute our The Cheesecake Factory concept or supported a third party arrangement of this type.

Our licensee is authorized to operate The Cheesecake Factory restaurant concept using our trademarks, trade dress, logos and systems and to provide our branded food and bakery products directly to consumers in The Cheesecake Factory restaurants to be opened in the licensed areas. The products and services our licensee delivers in our branded restaurants may be negatively affected by factors outside of our control, including, but not limited to:

- difficulties in achieving the consistency of product quality and service as compared to restaurants we operate in the United States;
- changes to our recipes required due to cultural differences;
- inability to obtain adequate and reliable supplies of ingredients and products necessary to execute our diverse menu; and
- differences, changes or uncertainties in economic, regulatory, legal, social and political conditions.

If these difficulties are attributed to us by guests in restaurants operated by our licensee, our reputation and brand value could be diminished.

In order to support our international expansion, we entered into an agreement with our Middle East restaurant licensee whereby our bakery will supply certain of our branded bakery products to restaurants to be developed and operating by our licensee in the Middle East. In order to supply product to the countries in the Middle East in which we will license restaurant operations, our bakery must adapt certain recipes to eliminate prohibited ingredients, comply with labeling requirements that differ from the United States, and maintain certifications required to export to such countries. In addition, unexpected events outside of our control, such as trade restrictions, embargos, and disruptions in shipping, may affect our ability to transport adequate levels of bakery products to our licensee, for whom we are a sole source of supply for our branded desserts. A failure to adequately supply our licensee's restaurants could affect the guest experience at their restaurants, result in decreased sales and, depending upon the reason for the failure, trigger contractual defaults on our part.

As we expand our brand internationally, we will need to comply with regulations and legal requirements, including those related to the protection of our trademarks, trade secrets and other intellectual property. (See Failure to maximize or to successfully assert our intellectual

Edgar Filing: CHEESECAKE FACTORY INC - Form 10-K

property rights could negatively impact our competitiveness (below.) We will have additional exposure to foreign tax laws and regulations which currently do not affect us. Additionally, we will need to comply with both domestic laws affecting United States businesses that operate internationally and foreign laws in the countries in which we expand our restaurants, such as the Foreign Corrupt Practices Act, under which we do not currently have exposure. Also, we may become subject to lawsuits or other legal actions resulting from the acts or omissions of our licensee and, even though we may have taken reasonable steps to protect against such liabilities, including by obtaining contractual indemnifications and insurance coverage, there is no assurance that we will not incur costs and expenses as a result of our licensee's conduct even when we are not legally liable.

We may be unable to appropriately scale our infrastructure in a timely manner.

During fiscal 2009 and 2008, we reduced our infrastructure to adapt to the reduction in comparable restaurant sales and for the reduced number of new restaurant openings planned for those years. In fiscal 2010, we opened three new restaurants without substantially adding to our infrastructure. However, we continue to evaluate the appropriate level of our infrastructure necessary to support our fiscal 2011 and beyond operational and development plans, including our international expansion.

We currently do not have corporate personnel or staffing dedicated to international development and will need to utilize the talents of existing management, some of who have prior experience with international operations, as we develop our international licensing and operations infrastructure. The inability to find and retain management personnel to support our international expansion and the diversion of key members of our current management team towards the development of an international operations infrastructure may detract from their ability to manage our domestic operations. Because we intend to remain highly engaged in the initial training of our licensee's restaurants operated under our brand, we will need to temporarily assign our staff members to our

Table of Contents

licensee's newly opened restaurants to insure that our brand is executed as it is in the United States. This entails sending trainers for each of our restaurant staff positions to countries in which many of such staff members will not previously have had any exposure. Although we intend to train our staff to become familiar with local customs and laws, there is a risk that such unfamiliarity may result in unintended encounters with local traditions.

With respect to our domestic operations, if market conditions continue to improve and we are able to identify enough high quality sites to significantly increase the planned number of new restaurant openings in the future, we may be unable to scale or manage the growth of our corporate and field supervision infrastructure in the short term to appropriately support our operations. Likewise, if sales decline, we may be unable to reduce our infrastructure quickly enough to prevent further sales deleveraging which would adversely affect our results of operations.

With respect to our planned international expansion, our initial license agreement requires us to provide training and support to our licensee for its development and operation of The Cheesecake Factory restaurants in the Middle East. One of the most important aspects of our restaurant operations is our ability to deliver dependable, quality service by experienced staff members who can execute our concepts according to our high standards. This will initially require training our licensee's management in United States and also will require training our licensee's staff in the licensed territories. This will also require providing support in the selection and development of restaurant sites, product sourcing logistics, technological systems, and menu renovation. If we are unable to provide the appropriate level of infrastructure support to our licensee, our contractual relationship with our licensee and our future international expansion opportunities may be harmed.

Increases in food costs, raw materials and other supplies and services may have a material adverse impact on our business and results of operations.

Our operating margins depend on, among other things, our ability to anticipate and react to changes in the costs of key operating resources, including food and other raw materials, energy and water, and other supplies and services. We attempt to negotiate short-term and long-term agreements for our principal commodity, supply and equipment requirements, depending on market conditions and expected demand. However, we are currently unable to contract for long periods of time for certain of our commodities. Consequently, these commodities can be subject to unforeseen supply and cost fluctuations due to factors such as changes in demand patterns, increases in the cost of key inputs, fuel costs, weather and other market conditions outside of our control. Dairy costs can also fluctuate due to government regulation. In addition, raw materials that we may purchase on the international market are subject to fluctuations in both the value of the U.S. dollar and increases in local demand, which may increase our costs and negatively impact our profitability.

Our suppliers also may be affected by higher costs to produce and transport commodities used in our restaurants and bakery manufacturing facilities, higher minimum wage and benefit costs, and other expenses that they pass through to their customers, which could result in higher costs for goods and services supplied to us. There is no assurance that we will be able to maintain these costs at levels that do not have a material adverse effect on our operations.

Increases in the cost of managing our risk profile, including employee health benefits, may have a material adverse effect on our business and results of operations.

Edgar Filing: CHEESECAKE FACTORY INC - Form 10-K

We retain the financial responsibility for a significant portion of our risks and associated liabilities with respect to workers' compensation, general liability, employment practices, employee health benefits and other insurable risks through our self insurance programs. Unfavorable fluctuations in market conditions or availability of such insurance or changes in local, state and/or federal regulations could significantly increase our self insurance costs and insurance premiums.

In addition, despite our efforts to control costs while still providing competitive health care benefits to our staff members, significant increases in health care costs continue to occur, and we can provide no assurance that our cost containment efforts in this area will be effective. Further, we are unable to accurately predict the impact of recent federal health care legislation on our health care benefit costs due to continued uncertainty with respect to implementation of such legislation, and significant increases in such costs could adversely impact our operating results. In addition, several localities, including San Francisco, California, have adopted or are considering adoption of health care related legislation affecting employers. There is no assurance that we will be able to absorb and/or pass through the costs of such legislation in a manner that will not adversely impact our operating results.

Employment-related litigation continues to increase at both the state and federal levels, particularly with respect to claims styled as class action lawsuits, which are costly to defend. Also, some employment related claims in the area of wage and hour disputes are not insurable risks. If our costs related to these claims continue to increase, our results of operations may be harmed.

Table of Contents

Changes in, or any failure to comply with, applicable laws or regulations at the federal, state or local level, including mandated changes to minimum wage levels, could adversely affect our business, financial position and results.

Various federal, state and local labor laws and regulations govern our operations and relationships with our staff members, including minimum wages, breaks, overtime, fringe benefits (including health care benefits), safety, working conditions and citizenship and legal residency requirements. Changes in, or any failure to comply with, these laws and regulations could subject us to fines or legal actions. Settlements or judgments that are not insured or are in excess of our coverage limitations could have a material adverse affect on our business. Despite our efforts to maintain compliance with legal requirements, some of our staff members may not meet federal citizenship or residency requirements. This could result in a disruption in our work force, sanctions against us and adverse publicity. Significant government-imposed increases in minimum wages, paid or unpaid leaves of absence and mandated health and/or COBRA benefits, or increased tax reporting, assessment or payment requirements related to our employees who receive gratuities, or changes in interpretations of existing law concerning meal and rest period breaks currently under consideration by the Supreme Court in the State of California, could be detrimental to the profitability of our restaurants and bakery operations.

Our staff members are subject to various minimum wage requirements. We operate in many states, including California, where the minimum wage is higher than the federal minimum and in such states our staff members receive compensation equal to the state's minimum wage. There have been and may be additional minimum wage increases in excess of federal minimum wage implemented in various jurisdictions in which we operate or seek to operate. Minimum wage increases may have a material adverse effect on our labor costs.

Our business is subject to extensive state and local government regulation in the various jurisdictions in which our restaurants and bakeries are located, including regulations relating to alcoholic beverage control, public health and safety, environmental hazards and food safety. The failure to obtain and/or retain licenses, permits or other regulatory approvals could delay or prevent the opening and/or continued operation of a restaurant in a particular area. Alcoholic beverage control regulations require each of our restaurants to obtain licenses and permits to sell alcoholic beverages on the premises. The failure of a restaurant to obtain or retain its licenses would adversely affect that restaurant's operations and profitability, and could adversely affect our ability to obtain these licenses elsewhere. We may also be subject to dram shop statutes in certain states, which generally provide a person injured by an intoxicated person the right to recover damages from an establishment that wrongfully served alcoholic beverages to the intoxicated person. Even though we are covered by general liability insurance, a settlement or judgment against us under a dram shop statute in excess of liability coverage could have a material adverse effect on our operations.

In addition, as a manufacturer and distributor of food products, we are subject to a number of food safety and labeling laws and regulations, including the Federal Food, Drug and Cosmetic Act and the newly enacted Federal Food Safety Modernization Act. Failure to comply with these and other applicable laws and regulations could adversely affect our business, financial position and results of operations.

A reduction in bakery sales at our restaurants or to third parties could adversely affect our profits.

While one of the primary functions of our bakery still remains to provide quality, innovative dessert products to our branded restaurants, the profitability of our bakery operations depends on a number of factors including, but not limited to our:

- ability to obtain and retain large-account customers;

Edgar Filing: CHEESECAKE FACTORY INC - Form 10-K

- ability to pass on increases in the key costs of operations to our customers, in whole or in part;
- macroeconomic conditions affecting consumers' desire and ability to purchase our bakery product offerings;
- ability to appropriately adjust our bakery infrastructure and staffing to accommodate fluctuations in production, including increases which will be required to support our international expansion; and
- current reliance on three major warehouse customers for a substantial percentage of our third party bakery sales.

A decrease in sales and/or profitability from our bakery operations would have an adverse impact on our financial results.

If we are unable to respond appropriately to changes in consumer health regulations and consumer eating habits, our revenues and results of operations could be adversely impacted.

The Federal government, as well as a number of states, counties and cities have enacted menu labeling laws requiring multi-unit restaurant operators to make certain nutritional information available to guests. Some states and local governments have also enacted legislation prohibiting the sales of certain types of ingredients in restaurants. The success of our restaurant operations depends, in part, upon our ability to effectively respond to changes in consumer health and disclosure regulations and to adapt our menu offerings to trends in eating habits. If consumer health regulations or consumer eating habits change significantly, we may be required to modify or discontinue certain menu items. In addition, dietary restrictions in some international locations in which our

Table of Contents

international licensee plans to operate may require us to modify or discontinue serving certain menu items. To the extent we are unable to respond with appropriate changes to our menu offerings, this could materially affect guest demand for our concepts and have an adverse impact on our revenues and results of operations.

Competition in the restaurant industry in general, and specifically within the upscale casual segment of the restaurant industry, may adversely affect guest traffic at our restaurants.

The restaurant industry is highly competitive with respect to price, value and promotions, service, location, and food quality. There are a number of other restaurant operations that compete with us for guest traffic, some of which have significantly greater resources to aggressively market to consumers, which could result in our concepts losing market share. We believe that many consumers remain focused on value, and if other restaurant operators are able to promote and deliver a higher degree of value through heavy discounting or other methods, our guest traffic levels may decline, which would adversely impact our revenues and profitability. In addition, with more varied product offerings at fast casual restaurants, quick-service restaurants and grocery stores, consumers may choose to trade down to these alternatives, which could also negatively affect our financial results. Even as the economy recovers, such patterns of downgrading selection may continue among consumers, which could reduce guest traffic at our restaurants.

Our business and future development could be harmed if we are unable to retain key personnel or have difficulties in recruiting qualified personnel.

The success of our business continues to depend in critical respects on the contributions of David Overton, our co-founder, Chairman of the Board and Chief Executive Officer (CEO), and other senior executives of the Company. The loss of the services of Mr. Overton or other senior executives could have a material adverse effect on our business and plans for future development. We have adopted a succession planning policy that includes both emergency short-term and long-term planning elements to allow us to successfully continue operations should any of our senior management team become unavailable to us. However, there is a risk that we may not be able to implement the succession planning policy successfully or in a timely manner for all situations.

In addition to our senior executives, we also must continue to attract, retain and motivate a sufficient number of qualified management and operating personnel, including regional management, general managers and executive kitchen managers. Qualified individuals historically have been in short supply and an inability to attract them to our restaurant operations would limit our ability to effectively expand our concepts. The ability of these key personnel to maintain consistency in the service, hospitality, quality and atmosphere of our restaurants is a critical factor in our success. In addition, we will require the services of our senior management and operating personnel to support our international expansion efforts. Any failure by us to retain or recruit key personnel may harm the reputation of our brand and adversely affect our operating results.

If we are unable to offer our management personnel equity compensation, including options and restricted stock, as part of their total compensation package, we may have difficulty retaining such personnel, which would adversely affect our operations.

We have historically granted equity awards, including non-qualified options and restricted stock awards, to key staff members, including our executives and our General Managers and Executive Kitchen Managers who run our restaurants, as part of a competitive compensation package. Our ability to grant equity compensation awards is vital to attracting and retaining a talented management team, and other talented and

Edgar Filing: CHEESECAKE FACTORY INC - Form 10-K

experienced individuals, in a competitive marketplace. Equity awards are an important part of our total compensation package and we believe that such compensation helps us have one of the highest retention rates in the industry for these positions. If we are limited in our ability to grant equity compensation awards, we would be at a competitive disadvantage. In addition, we would need to resort to providing increased short-term incentives including direct immediate compensation, such as cash payments or other compensation arrangements, to prevent a loss of executives and other staff members, and to continue to attract high caliber employees for our future needs. Should this happen, we would face higher compensation costs, which could adversely affect our financial results.

Information technology system failures or breaches of our network security could interrupt our operations and subject us to increased operating costs as well as litigation and other liabilities.

We rely heavily on our computer systems and network infrastructure across our operations including, but not limited to, point-of-sale processing at our restaurants, and the systems we use could be vulnerable to unforeseen risks. Our operations depend upon our ability to protect our computer equipment and systems against damage from physical theft, fire, power loss, telecommunications failure or other catastrophic events, as well as from internal and external security breaches, denial of service attacks, viruses, worms and other disruptive problems caused by hackers. In addition, our corporate support center is located in California, in an area prone to natural disasters such as earthquakes and wildfires. Any damage or failure of our computer systems or network infrastructure to operate effectively, problems with transitioning to upgraded or replacement systems, or breaches in the

Table of Contents

security of these systems could cause delays in customer service and reduce efficiency in our operations, and significant capital investments could be required to remediate the issue.

We employ both internal resources and external consultants to conduct extensive auditing and testing for weaknesses in our systems, controls, firewalls and encryption to reduce the likelihood of any security failures or breaches. However, we can provide no assurance that these security measures will be successful. Advances in computer capabilities, new discoveries in the field of cryptography or other developments could result in a compromise or breach of the algorithms we and our third-party service providers use to encrypt and protect customer transaction data. In addition, our ability to accept credit cards as payment in our restaurants and on-line store depends on us remaining in compliance with PCI standards. These standards require certain levels of system security and procedures to protect our customers' credit card and other personal information. A failure of our security measures could harm our reputation and financial results, as well as subject us to litigation or actions by regulatory authorities.

Our inability or failure to execute on a comprehensive business continuity plan following a major natural or manmade disaster, including terrorism, at our corporate facility could materially adversely impact our business.

Most of our corporate systems and processes and corporate support for our restaurant operations are centralized at one California location with the exception of our construction and design department and our east coast bakery production and fulfillment facility. We have disaster recovery procedures and a comprehensive business continuity plan in place to address most events of a crisis nature, including back up and off-site locations for recovery of electronic and other forms of data and information. However, if we are unable to fully implement our disaster recovery plans, we may experience delays in recovery of data, inability to perform vital corporate functions, tardiness in required reporting and compliance, failures to adequately support field operations and other breakdowns in normal operating procedures that could have a material adverse effect on our financial condition, results of operation and exposure to administrative and other legal claims.

Litigation could have a material adverse impact on our business.

We are subject to lawsuits, administrative proceedings and claims that arise in the regular course of business. The matters typically involve claims by guests, staff members and others regarding issues such as food borne illness, food safety, premises liability, compliance with wage and hour requirements, work-related injuries, discrimination, harassment, disability and other operational issues common to the foodservice industry. We could be adversely affected by negative publicity and litigation costs resulting from these claims, regardless of their validity. Significant legal fees and costs in complex class action litigation or an adverse judgment or settlement that is not insured or is in excess of insurance coverage could have a material adverse effect on our financial position and results of operations. We are self-insured, or carry insurance programs with high retention levels, for a significant portion of our risks and associated liabilities with respect to workers compensation, general liability, employer's liability, health benefits and other insurable risks. We accrue liabilities for these programs based on our estimate of the ultimate costs to settle known claims as well as claims that are incurred but not reported. Significant judgment is required to estimate claims that have been incurred but not reported. If actual claims trends, including the severity or frequency of claims, differ from our estimates, our financial results could be negatively impacted.

Seasonality of our business and the timing of new restaurant openings could result in fluctuations in our financial performance from quarter-to-quarter within a fiscal year.

Edgar Filing: CHEESECAKE FACTORY INC - Form 10-K

Our business is subject to seasonal fluctuations. Our restaurant sales are typically higher during the second and third quarters of the fiscal year. Our bakery operation is seasonal to the extent that the fourth quarter's sales are typically higher due to holiday business and also may significantly vary from quarter-to-quarter due to the timing and/or size of orders from large account bakery customers. As a result of these factors, results of operations for any single quarter are not necessarily indicative of the results that may be achieved for a full fiscal year. Quarterly results have been, and in the future could continue to be, significantly impacted by the timing of new restaurant openings, including associated preopening costs and operating inefficiencies, as well as macroeconomic factors.

New restaurant openings may negatively impact sales at our existing restaurants.

We target high quality, high profile locations for our upscale and highly customized restaurants, and we believe that we draw guests from a much larger geographical area compared to most casual dining chain restaurants. The sizes of our restaurant trade areas vary by location, depending on a number of factors such as population density, demographics, retail, business, entertainment and other traffic generators and geography. As a result, the opening of a new restaurant could impact the sales of one or more of our existing restaurants nearby. It is not our intention to open new restaurants that materially cannibalize the sales of our existing restaurants. However, as with most growing retail and restaurant chain operations, there can be no assurance that such sales impact will not occur.

Table of Contents

or become more significant in the future as we gradually increase our presence in existing markets to maximize our competitive position and financial performance in each market.

Adverse weather conditions could unfavorably affect our restaurant sales.

Adverse weather conditions can impact guest traffic at our restaurants, cause the temporary underutilization of outdoor patio seating, and, in more severe cases, cause temporary closures, sometimes for prolonged periods. Outdoor patio seating is available at most of our restaurants and accounts for approximately 20% of our seating capacity. Our inability to fully utilize our restaurants' seating capacity as planned may negatively impact our revenues and results of operations.

We invest resources in marketing, but our marketing programs may not be successful.

A significant increase in our marketing efforts began in the fourth quarter of fiscal 2008 and continued in fiscal 2009 using a variety of media, including social media avenues. While we have not significantly increased our marketing expenditures during 2010, we expect to continue to conduct brand awareness programs and guest initiatives to attract and retain guests. These initiatives may not be successful, resulting in expenses incurred without the benefit of higher revenues. In addition, we may determine in the future that developing and maintaining national and/or regional advertising campaigns may be necessary, which would increase our operating expenses with no guarantee of a corresponding increase in revenue necessary to offset those higher costs.

Failure to maximize or to successfully assert our intellectual property rights could impact our competitiveness.

We rely on trademark, trade secret and copyright laws to protect our intellectual property rights. We cannot be sure that these intellectual property rights will be maximized or that they can be successfully asserted. There is a risk that we will not be able to obtain and perfect our own, or, where appropriate, license intellectual property rights necessary to support new product introductions or other expansion, including to international markets. We cannot be sure that these rights, if obtained, will not be invalidated, circumvented or challenged in the future. In addition, even if such rights are obtained in the United States, the laws of some of the other countries in which our products are or may be sold or in which restaurants licensed under our brand names may operate in the future do not protect our intellectual property rights to the same extent as the laws of the United States. Our failure to perfect or successfully assert our intellectual property rights could make us less competitive and could have an adverse effect on our business, operating results and financial condition.

Our failure to establish, maintain and apply adequate internal control over our financial reporting could affect our reported results of operations. In addition, changes in financial accounting standards or interpretations of existing standards could affect our reported results of operations.

We are subject to the ongoing internal control provisions of Section 404 of the Sarbanes-Oxley Act of 2002. These provisions provide for the identification of material weaknesses in internal control over financial reporting—a process to provide reasonable assurance regarding the reliability of financial reporting for external purposes in accordance with accounting principles generally accepted (GAAP) in the United States

Edgar Filing: CHEESECAKE FACTORY INC - Form 10-K

of America. If we experience a material weakness in internal controls, there can be no assurance that we will be able to remediate that material weakness in a timely manner or maintain all of the controls necessary to remain in compliance. Any failure to maintain an effective system of internal controls over financial reporting could limit our ability to report our financial results accurately and timely or to detect and prevent fraud. Additionally, changes in accounting standards or new accounting pronouncements and interpretations may occur that could adversely affect our previously reported or future financial position or results of operations.

Our federal, state and local tax returns may, from time to time, be selected for audit by taxing authorities, which may result in tax assessments or penalties that could have a material adverse impact on our results of operations and financial position.

We are subject to federal, state and local taxes. Significant judgment is required in determining the provision for income taxes. Although we believe our tax estimates are reasonable, if the IRS or other taxing authority disagrees with the positions we have taken on our tax returns, we could face additional tax liability, including interest and penalties. Payment of such additional amounts upon final adjudication of any disputes could have a material impact on our results of operations and financial position.

There may be future sales or other dilution of our equity which may adversely affect the market price of our common stock.

We are not restricted from issuing additional common stock or preferred stock, including any securities that are convertible into or exchangeable for, or that represent the right to receive, common stock or preferred stock or any substantially similar securities. Our Board of Directors is authorized to issue additional shares of common stock and additional classes or series of preferred stock without any action on the part of the stockholders. The Board of Directors also has the discretion, without stockholder approval, to set the terms of any such classes or series of preferred stock that may be issued, including voting rights, dividend rights and preferences

Table of Contents

over the common stock with respect to dividends or upon the liquidation, or winding up of our business and other terms. If we issue preferred shares that have a preference over our common stock with respect to the payment of dividends or upon liquidation, dissolution or winding up, or if we issue preferred shares with voting rights that dilute the voting power of our common stock, the rights of our common stockholders or the market price of our common stock could be adversely affected.

Failure to satisfy financial covenants and/or repayment requirements under our credit facility could have a material adverse effect on our financial condition.

We have a five-year revolving credit facility (Facility) with a maximum available borrowing commitment of \$200 million, which expires in December 2015. The Facility requires us to maintain certain financial covenants. At December 28, 2010, we had no outstanding debt balance under such Facility. However, any failure to maintain these covenants or have sufficient liquidity to either repay or refinance the then outstanding balance at expiration of the Facility would have a material adverse effect on our financial condition. (See Note 7 of Notes to Consolidated Financial Statements in Part IV, Item 15 of this report for additional information concerning our long-term debt.)

We have a shareholder rights plan, or poison pill, which could affect the price of our common stock and make it more difficult for a potential acquirer to purchase a large portion of our securities, to initiate a tender offer or a proxy contest, or to acquire us.

In August 2008, our Board of Directors extended a shareholder rights plan, commonly known as a poison pill, for a period to end in August 2018. The poison pill may discourage, delay, or prevent a third party from acquiring a large portion of our securities, initiating a tender offer or proxy contest, or acquiring us through an acquisition, merger, or similar transaction. Such an acquirer could be prevented from consummating one of these transactions even if our shareholders might receive a premium for their shares over then-current market prices.

ITEM 1B. UNRESOLVED STAFF COMMENTS

Not applicable.

ITEM 2. PROPERTIES

All of our 164 existing restaurants are located on leased properties, and we have no current plans to own the real estate underlying our restaurants. See Part I, Item 1 Business Existing Restaurant Locations for information regarding the location of our restaurants. We own substantially all of the FF&E in our restaurants. Existing restaurant leases have expiration dates ranging from October 4, 2012 to January 31, 2032 (excluding unexercised renewal options). Most of our restaurant leases provide for contingent rent based on a percentage of restaurant sales (to the extent this amount exceeds a minimum base rental) and payment of certain lease-related expenses. (See Note 10 of Notes to Consolidated Financial Statements in Part IV, Item 15 of this report for information regarding the aggregate straight-line minimum and contingent rent expense for the last three fiscal years and information regarding our obligation to pay minimum base rentals in future years.) A majority of our leases also provide for termination rights by us in the event our sales are below a stated level for a period of time, generally

Edgar Filing: CHEESECAKE FACTORY INC - Form 10-K

conditioned upon a repayment of the unamortized allowances contributed by landlords to the build out of the leased premises. Additionally, most of our leases also provide for a reduced level of overall rent obligation should specified co-tenancies not be satisfied.

Our corporate support center and one bakery production facility are located in Calabasas Hills, California. The corporate support center is an 88,000 square-foot facility on an approximate five acre parcel of land. The bakery production facility is a 60,000 square foot facility on an approximate three acre parcel of land. Our second bakery facility located in Rocky Mount, North Carolina is a 100,000 square foot facility on an approximate 16 acre parcel of land. We currently own all three properties in fee simple and have an option to purchase additional land adjacent to our North Carolina facility, which is subject to our satisfaction of certain staffing levels at that facility and improvements to this real estate. We also lease office space in Irvine, California for our development and design department.

ITEM 3. LEGAL PROCEEDINGS

See Note 10 of Notes to Consolidated Financial Statements in Part IV, Item 15 of this report for a summary of legal proceedings.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

None.

Table of Contents**PART II****ITEM 5. MARKET FOR THE REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES**

Our common stock is listed on the Global Select Market tier of The NASDAQ Stock Market® under the symbol CAKE. The following table sets forth, for the periods indicated, the high and low sales prices as reported on The NASDAQ Stock Market:

| | High | Low |
|--------------------|----------|----------|
| Fiscal 2010 | | |
| First Quarter | \$ 27.95 | \$ 20.75 |
| Second Quarter | 30.75 | 22.16 |
| Third Quarter | 26.98 | 21.56 |
| Fourth Quarter | 34.00 | 26.04 |
| Fiscal 2009 | | |
| First Quarter | \$ 12.82 | \$ 6.84 |
| Second Quarter | 18.53 | 11.14 |
| Third Quarter | 21.01 | 15.69 |
| Fourth Quarter | 22.63 | 17.55 |

Since our initial public offering in September 1992, we have not declared or paid any cash dividends on our common stock and have no current plans to pay dividends in the near future. In addition, our amended credit facility limits cash distributions with respect to our equity interests, such as cash dividends and share repurchases, based on a defined leverage ratio. (See Note 7 of Notes to Consolidated Financial Statements in Part IV, Item 15 of this report for further discussion of our long-term debt.)

There were approximately 1,200 holders of record of our common stock at February 16, 2011, and we estimate there were approximately 34,200 beneficial stockholders on that date.

The following provides information regarding our purchase of equity securities that are registered by us pursuant to Section 12 of the Exchange Act during the fourth quarter of fiscal 2010:

| Period | Total Number of Shares Purchased | Average Price Paid per Share | Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs | Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs |
|---------------------------------|---|------------------------------------|---|---|
| September 29 – November 2, 2010 | 35,143 | \$ 26.58 | 35,143 | 5,792,146 |
| November 3 – November 30, 2010 | — | — | — | 5,792,146 |
| December 1 – December 28, 2010 | — | — | — | 5,792,146 |
| Total | 35,143 | | 35,143 | |

Edgar Filing: CHEESECAKE FACTORY INC - Form 10-K

We have an outstanding authorization from our Board of Directors to repurchase up to 31 million shares of our common stock. Under this authorization, we have cumulatively repurchased a total of 25.2 million shares at a total cost of \$558.3 million through December 28, 2010. The authorization does not have an expiration date, does not require us to purchase a specific number of shares and may be modified, suspended or terminated at any time.

In October 2008, we suspended our share repurchase program in order to maintain maximum flexibility in our capital decisions in light of the unprecedented crisis in the global financial markets and the indeterminate future impact it could have on the overall economy and on our business. In February 2010, our Board of Directors reinstated our stock repurchase program and approved the adoption of a trading plan under Rule 10b5-1 (10b5-1Plan) under the Securities Exchange Act of 1934, as amended from time to time (Act), which was effective from March 2010 through December 2010. In February 2011, our Board of Directors approved a new 10b5-1 Plan, which will be effective from March 16, 2011 through February 29, 2012. In addition, the Board of Directors approved the terms of a share repurchase plan pursuant to which we are authorized to repurchase shares of our common stock in open market transactions in accordance with Rule 10b-18 of the Exchange Act of 1934, such plan to be effective from February 24, 2011 through May 13, 2011.

The timing and number of shares repurchased pursuant to the share repurchase authorization are subject to a number of factors, including current market conditions, legal constraints, available cash or other sources of funding and financial covenants under our credit facility that limit share repurchases based on a defined leverage ratio. Shares may be repurchased in the open market or through privately negotiated transactions at times and prices considered appropriate by us. We make the determination to repurchase shares based on several factors, including an evaluation of current and future capital needs associated with new restaurant development, current and forecasted cash flows, a review of our capital structure and cost of capital, and our share price, although

Edgar Filing: CHEESECAKE FACTORY INC - Form 10-K

Table of Contents

once effective, we do not intervene in the operations of our 10b5-1 Plan.

During fiscal 2010 and 2008, we repurchased 2.1 million and 9.6 million shares of our common stock at a cost of \$52.1 million and \$172.5 million, respectively. We did not repurchase any shares during fiscal 2009. Repurchased common stock is reflected as a reduction of stockholders' equity.

Price Performance Graph

Set forth below is a graph comparing the total return on an indexed basis of a \$100 investment in the Company's common stock, the S&P 400 Midcap Index, the NASDAQ Composite® (US) Index and the *Nation's Restaurant News* Index. The measurement points utilized in the graph consist of the last trading day in each calendar year, which closely approximates the last day of the respective fiscal year of the Company. The historical stock performance presented below is not intended to and may not be indicative of future stock performance.

| | 12/30/05 | 12/29/06 | 12/31/07 | 12/31/08 | 12/31/09 | 12/31/10 |

(1) All fiscal years presented consisted of 52 weeks.

(2) Fiscal 2010, 2009, 2008, 2007 and 2006 included \$10.9 million, \$14.6 million, \$13.1 million, \$18.2 million and \$18.2 million, respectively, of stock-based compensation expense.

Non-GAAP Measures

Edgar Filing: CHEESECAKE FACTORY INC - Form 10-K

Adjusted net income and adjusted diluted net income per share are supplemental measures of our performance that are not required by or presented in accordance with GAAP. These non-GAAP measures may not be comparable to similarly titled measures used by other companies and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP.

We calculate these non-GAAP measures by eliminating from net income and diluted net income per share the impact of items we do not consider indicative of our ongoing operations. We believe these adjusted measures provide additional information to facilitate the comparison of our past and present financial results. We utilize results that both include and exclude the identified items in evaluating business performance. However, our inclusion of these adjusted measures should not be construed as an indication that our future results will be unaffected by unusual or infrequent items. In the future, we may incur expenses or generate income similar to the adjusted items.

Table of Contents

Following is a reconciliation from net income and diluted net income per share to the corresponding adjusted measures (in thousands, except per share data):

| | Fiscal Year | |
|---|-------------|-----------|
| | 2010 | 2009 |
| Net income | \$ 81,713 | \$ 42,833 |
| After-tax impact from: | | |
| Impairment of assets (1) | — | 15,925 |
| Unwinding of interest rate collars (2) | 4,425 | 4,452 |
| Chairman and CEO employment agreement (3) | — | 1,530 |
| Realization of investment in variable life insurance contract (4) | — | (668) |
| Adjusted net income | \$ 86,138 | \$ 64,072 |
| Diluted net income per share | \$ 1.35 | \$ 0.71 |
| After-tax impact from: | | |
| Impairment of assets | — | 0.27 |
| Unwinding of interest rate collars | 0.07 | 0.07 |
| Chairman and CEO employment agreement | — | 0.03 |
| Realization of investment in variable life insurance contract | — | (0.01) |
| Adjusted diluted net income per share | \$ 1.42 | \$ 1.07 |

(1) Represents the impairment of the carrying value of four Grand Lux Cafe restaurants in fiscal 2009. The pre-tax amount associated with this item was \$26,541 and was recorded in impairment of assets.

(2) Represents costs to unwind derivative instruments in conjunction with reducing the outstanding balance on our revolving credit facility. The pre-tax amounts associated with this item are \$7,376 and \$7,421 in fiscal years 2010 and 2009, respectively, and were recorded in interest expense.

(3) Represents a charge resulting from a change in the amount and structure of the retirement benefit contained in the employment agreement with our Chief Executive Officer. The pre-tax amount associated with this item was \$2,550 and was recorded in general and administrative expenses.

(4) Represents the realization of proceeds from one of our variable life insurance contracts used to support our Executive Savings Plan, a non-qualified deferred compensation plan. This item is non-taxable and was recorded in other (expense)/income.

See Management's Discussion and Analysis of Financial Condition and Results of Operations in Part 1, Item 7 of this report for more information regarding each of the identified items.

Table of Contents

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

General

This discussion and analysis should be read in conjunction with our consolidated financial statements and related notes in Part IV, Item 15 of this report, the Risk Factors included in Part I, Item 1A of this report, and the cautionary statements included throughout this report. The inclusion of supplementary analytical and related information herein may require us to make estimates and assumptions in connection with our analysis of trends and expectations with respect to our results of operations and financial position taken as a whole.

As of February 23, 2011, we operated 164 upscale, casual, full-service dining restaurants: 150 under The Cheesecake Factory® mark; 13 under the Grand Lux Cafe® mark; and one under the RockSugar Pan Asian Kitchen® mark. We also operated two bakery production facilities and licensed two limited menu bakery cafes under The Cheesecake Factory Bakery Cafe® mark to another foodservice operator.

The Cheesecake Factory is an upscale, casual dining concept that offers more than 200 menu items including appetizers, pizza, seafood, steaks, chicken, burgers, pasta, specialty items, salads, sandwiches, omelettes and desserts, including approximately 40 varieties of cheesecake and other baked desserts. Grand Lux Cafe and RockSugar Pan Asian Kitchen are also upscale, casual dining concepts offering approximately 200 and 80 menu items, respectively. In contrast to many chain restaurant operations, substantially all of our menu items (except certain desserts manufactured at our bakery production facilities) are prepared on the restaurant premises using high quality, fresh ingredients based on innovative and proprietary recipes. We believe our restaurants are recognized by consumers for offering value with generous food portions at moderate prices. Our restaurants' distinctive, contemporary design and decor create a high-energy ambiance in a casual setting. Our restaurants typically range in size from 7,000 to 15,000 interior square feet, provide full liquor service and are generally open seven days a week for lunch and dinner, as well as Sunday brunch.

Overview

In addition to being highly competitive, the restaurant industry is affected by changes in consumer tastes and discretionary spending patterns; changes in general economic conditions; public safety conditions; demographic trends; weather conditions; the cost and availability of food products, labor and energy; purchasing power; and government regulations. Accordingly, as part of our strategy we must constantly evolve and refine the critical elements of our restaurant concepts to protect our competitiveness and to maintain and enhance the strength of our brand.

Our strategy is driven by our commitment to guest satisfaction and is focused primarily on menu innovation and operational execution to continue to differentiate ourselves from other restaurant concepts, as well as drive competitively strong performance that is sustainable. Financially, we are focused on prudently managing expenses at our restaurants, bakery facilities and corporate support center. We are also committed to allocating capital in a manner that will maximize profitability and returns. Investing in new restaurant development that meets our return on investment criteria is our top capital allocation priority with a focus on opening our restaurant concepts in premier locations within both existing and new markets. During fiscal 2011, we target repurchasing at least \$100 million of our common stock, depending on Company performance and market conditions.

Table of Contents

In evaluating and assessing the performance of our business, we believe the following are key performance indicators that should be taken into consideration:

- *Comparable Restaurant Sales and Overall Revenue Growth.* Changes in comparable restaurant sales come from variations in guest traffic, as well as changes in check average (as a result of menu price increases and/or changes in menu mix). Our strategy is to grow guest traffic by continuing to offer innovative, high quality menu items that offer guests a wide range of options in terms of flavor, price and value. In addition, we plan to continue focusing on service and hospitality with the goal of delivering an exceptional guest experience. Our philosophy with regard to menu pricing is to use price increases to help offset key operating costs in a manner that balances protecting both our margins and guest traffic levels. Prior to the economic downturn, menu mix generally had a neutral effect on our average check, allowing us to retain the full impact of our menu price increases. As the economy strengthens, we would expect this pattern to resume as guests focus less on check management.

Comparable restaurant sales growth, in addition to revenue from new restaurant openings and increases in third-party bakery sales, drive our overall revenue growth.

- *Income from Operations Expressed as a Percentage of Revenues (Operating Margins).* Operating margins are subject to fluctuations in commodity costs, labor, restaurant-level occupancy expenses, general and administrative expenses, and preopening expenses. Our objective is to gradually increase our operating margins by capturing fixed cost leverage from comparable restaurant sales increases; maximizing our purchasing power as our business grows; and operating our restaurants as productively as possible by retaining the efficiencies we gained through the implementation of cost management initiatives in fiscal 2010 and 2009.

These initiatives, which improved our operational efficiency and reduced our restaurant-level expenses, included developing menu items with favorable food costs; managing our commodity needs more efficiently; leveraging technology, such as our Kitchen Management System; and aligning the staffing in our restaurants with current sales volumes.

By efficiently scaling our restaurant and bakery support infrastructure and improving our internal processes, we strive to grow general and administrative expenses at a slower rate than revenue growth over the long-term, which should also contribute to operating margin expansion.

- *Return on Investment.* Return on investment measures our ability to make the best decisions regarding our allocation of capital. Returns are affected by the cost to build restaurants, the level of revenues that each restaurant can deliver and our ability to maximize the profitability of restaurants through operational execution and strict cost management. Our objective is to deploy capital in a manner that will maximize our return on investment.

Results of Operations

The following table sets forth, for the periods indicated, our consolidated statements of operations expressed as percentages of revenues:

Edgar Filing: CHEESECAKE FACTORY INC - Form 10-K

| | 2010 | Fiscal Year 2009 | 2008 |
|--|--------|---------------------|--------|
| Revenues | 100.0% | 100.0% | 100.0% |
| Costs and expenses: | | | |
| Cost of sales | 24.9 | 24.6 | 26.0 |
| Labor expenses | 32.4 | 33.0 | 33.2 |
| Other operating costs and expenses | 24.6 | 25.1 | 24.7 |
| General and administrative expenses | 5.8 | 6.1 | 5.2 |

Table of Contents

Fiscal 2010 Compared to Fiscal 2009

Revenues

Revenues increased 3.6% to \$1,659.4 million for fiscal 2010 compared to \$1,602.0 million for fiscal 2009.

Restaurant sales increased 3.4% to \$1,586.3 million for fiscal 2010 compared to \$1,534.3 million for the prior fiscal year. The resulting sales increase of \$52.0 million consisted of a \$30.0 million increase in The Cheesecake Factory and Grand Lux Cafe comparable restaurant sales and a \$22.0 million increase from restaurants not in the comparable sales base. Comparable sales at The Cheesecake Factory and Grand Lux Cafe restaurants increased by 2.0% from fiscal 2009 to fiscal 2010. At December 28, 2010, there were three The Cheesecake Factory restaurants not included in the comparable sales base. The Cheesecake Factory and Grand Lux Cafe restaurants become eligible to enter our comparable sales calculations in their 19th month of operation.

Comparable sales at The Cheesecake Factory restaurants increased 2.0% from fiscal 2009 driven primarily by improved guest traffic. We implemented effective menu price increases of approximately 0.6% and 0.7% during the first and third quarter of fiscal 2010, respectively. On a weighted average basis, based on the timing of our menu roll outs within each quarter, The Cheesecake Factory menu included a 1.4% increase in pricing for fiscal year ended December 28, 2010. This increase in menu pricing was partially offset by menu mix shifts due to ongoing check management by guests, particularly with regard to their purchase of non-alcoholic beverages. Inclusive of our summer 2010 and winter 2011 menu changes, we will have implemented a targeted effective price increase of approximately 1.4% for the first half of fiscal 2011. We plan to review our operating cost and expense trends in the spring of 2011 and consider the need for additional menu pricing in connection with our 2011 summer menu change.

Comparable sales at our Grand Lux Cafe restaurants increased 1.5% from fiscal year 2009, driven by improved guest traffic. We did not implement any price increases in fiscal 2010. However, menu price increases made in fiscal 2009 had a year over year impact in fiscal 2010. On a weighted average basis, the Grand Lux menu included a 0.7% increase in pricing for fiscal year ended December 28, 2010. This increase in menu pricing was offset by menu mix shifts due to ongoing check management by guests, particularly with regard to their purchase of non-alcoholic beverages.

We generally update and reprint the menus in our restaurants twice a year. As part of these menu updates, we evaluate the need for price increases based on those operating cost and expense increases of which we are aware or that we can reasonably expect. While menu price increases can facilitate increased comparable restaurant sales in addition to offsetting margin pressure, we carefully consider all potential price increases in light of the extent to which we believe they will be accepted by our restaurant guests.

Additionally, other factors outside of our control, such as general economic conditions, inclement weather, timing of holidays, and competitive and other factors, including those referenced in Part I, Item 1A, Risk Factors, of this report can impact comparable sales.

Edgar Filing: CHEESECAKE FACTORY INC - Form 10-K

Total restaurant operating weeks increased 1.4% to 8,426 in fiscal 2010 from the prior year due to the opening of three new restaurants during the trailing 15-month period. In addition, average sales per restaurant operating week increased approximately 1.8% to \$188,000 in fiscal 2010 compared to the prior fiscal year due principally to the improvement in guest traffic.

Bakery sales to other foodservice operators, retailers and distributors (bakery sales) increased 8.0% to \$73.1 million in fiscal 2010 compared to \$67.7 million in the prior fiscal year due primarily to increases in warehouse club and national account sales.

We strive to develop and maintain long-term, growing relationships with our bakery customers, based largely on our 38-year reputation for producing high quality and creative baked desserts. However, it is difficult to predict the timing of bakery product shipments and contribution margins on a quarterly basis, as the purchasing plans of our large-account customers may fluctuate. Due to the highly competitive nature of the bakery business, we are unable to enter into long-term contracts with our large-account bakery customers, who may discontinue purchasing our products without advance notice at any time for any reason.

Cost of Sales

Cost of sales consists of food, beverage, retail and bakery production supply costs incurred in conjunction with our restaurant

Table of Contents

and bakery revenues, and excludes depreciation, which is captured separately in depreciation and amortization expenses.

As a percentage of revenues, cost of sales increased to 24.9% in fiscal 2010 compared to 24.6% in fiscal 2009. This increase was due to cost pressures from certain commodities, primarily dairy and cheese, partially offset by pricing leverage and savings from our cost of sales initiatives, including the development of new menu items with lower food costs, negotiation of more favorable pricing for certain commodities and improvements in our supply chain.

Our restaurant menus are among the most diversified in the foodservice industry and, accordingly, are not overly dependent on a few select commodities. Changes in costs for one commodity are often, but not always, counterbalanced by cost changes in other commodity categories. The principal commodity categories for our restaurants include produce, poultry, meat, fish and seafood, cheese, other fresh dairy products, bread and general grocery items.

We attempt to negotiate short-term and long-term agreements for our principal commodity, supply and equipment requirements, depending on market conditions and expected demand. However, we are currently unable to contract for long periods of time for certain of our commodities such as fish and most dairy items (except for cream cheese used in our bakery operations). Consequently, these commodities can be subject to unforeseen supply and cost fluctuations. Cream cheese is the most significant commodity used in our bakery products. We contracted for a substantial portion of our fiscal 2010 cream cheese requirements and also purchased cream cheese on the spot market as necessary to supplement our contracted amounts.

As has been our past practice, we will carefully consider opportunities to introduce new menu items and implement selected menu price increases to help offset expected cost increases for key commodities and other goods and services utilized by our operations. While we have been successful in the past in reacting to inflation and other changes in the costs of key operating resources by gradually increasing prices for our menu items, coupled with more efficient purchasing practices, varying menu mix, productivity improvements and greater economies of scale, there can be no assurance that we will be able to continue to do so in the future.

We have taken steps to qualify multiple suppliers and enter into agreements for some of the key commodities used in our restaurant and bakery operations. However, there can be no assurance that future supplies and costs for these commodities will not fluctuate due to weather and other market conditions outside of our control. For new restaurants, cost of sales will typically be higher during the first 90 to 120 days of operations until our management team becomes more accustomed to optimally predicting, managing and servicing the sales volumes at the new restaurant.

Labor Expenses

As a percentage of revenues, labor expenses, which include restaurant-level labor costs and bakery direct production labor, including associated fringe benefits, decreased to 32.4% in fiscal 2010 compared to 33.0% in fiscal 2009. This improvement was primarily due to overall productivity gains as a result of our operational initiatives, which included aligning the staffing in our restaurants with current sales volumes, leverage from positive comparable sales and lower stock-based compensation. The amount of stock-based compensation included in labor was \$3.2 million in fiscal 2010 compared to \$5.9 million in fiscal 2009.

Other Operating Costs and Expenses

Other operating costs and expenses consist of restaurant-level occupancy expenses (rent, common area expenses, insurance, licenses, taxes and utilities), other operating expenses (excluding food costs and labor expenses, which are reported separately) and bakery production overhead, selling and distribution expenses. As a percentage of revenues, other operating costs and expenses decreased to 24.6% for fiscal 2010 versus 25.1% for fiscal 2009. This decrease was primarily due to savings from our cost management initiatives, leverage of fixed costs due to positive comparable sales and favorable experience related to our self-insured workers' compensation and general liability plans.

General and Administrative Expenses

General and administrative (G&A) expenses consist of the restaurant management recruiting and training program, as well as the restaurant field supervision, bakery administrative and corporate support organizations. As a percentage of revenues, G&A expenses decreased to 5.8% for fiscal 2010 versus 6.1% for fiscal 2009. This variance was primarily due to a \$2.9 million charge in fiscal 2009 resulting from a change in the amount and structure of the retirement benefit contained in the employment agreement with our Chief Executive Officer, as well as to lower stock-based compensation expense. The amount of stock-based compensation included in G&A expense declined to \$7.5 million in fiscal 2010 from \$8.4 million in fiscal 2009.

Table of Contents

Depreciation and Amortization Expenses

As a percentage of revenues, depreciation and amortization expenses decreased to 4.3% for fiscal 2010 compared to 4.7% for fiscal 2009. The decrease is primarily attributable to leveraging from positive comparable sales, as well as to lower depreciation expense resulting from the impairment charge we recorded in fiscal 2009 discussed below in *Impairment of Assets*.

Impairment of Assets

We assess potential impairment of our long-lived assets whenever events or changes in circumstances indicate that the carrying value of the assets may not be recoverable. Factors considered include, but are not limited to, significant underperformance relative to historical or projected future operating results; significant changes in the manner of use of the acquired assets or the strategy for the overall business; and significant negative industry or economic trends. We regularly review restaurants that are cash flow negative for the previous four quarters to determine if impairment testing is warranted. At any given time, we may be monitoring a small number of locations, and impairment charges could be triggered in the future if individual restaurant performance does not improve.

Based on the results of this analysis, we recorded a \$26.5 million impairment charge against the carrying value of four Grand Lux Cafe restaurants in fiscal 2009. No impairment charges were recorded in fiscal 2010.

Preopening Costs

Preopening costs increased to \$5.2 million for fiscal 2010 compared to \$3.3 million for the prior fiscal year. We incurred preopening costs to open three The Cheesecake Factory restaurants in fiscal 2010 compared to opening one The Cheesecake Factory restaurant during fiscal 2009.

Preopening costs include all costs to relocate and compensate restaurant management employees during the preopening period; costs to recruit and train hourly restaurant employees; wages, travel and lodging costs for our opening training team and other support employees; and straight-line minimum base rent during the build-out and in-restaurant training periods. Also included in preopening costs are expenses for maintaining a roster of trained managers for pending openings; the associated temporary housing and other costs necessary to relocate managers in alignment with future restaurant opening and operating needs; and corporate travel and support activities. Preopening costs can fluctuate significantly from period to period, based on the number and timing of restaurant openings and the specific preopening costs incurred for each restaurant.

Interest Expense, Interest Income and Other Income

Edgar Filing: CHEESECAKE FACTORY INC - Form 10-K

Interest expense decreased to \$16.8 million for fiscal 2010 compared to \$23.4 million for fiscal 2009 due primarily to lesser interest expense based on lower average outstanding debt balances during fiscal 2010 as compared to the prior year. Interest expense included \$7.4 million in both fiscal 2010 and 2009 to unwind interest rate collars in conjunction with reducing our revolving credit facility balance. (See Notes 7 and 8 of Notes to Consolidated Financial Statements in Part IV, Item 15 of this report for further discussion of our long-term debt and derivative financial instruments, respectively.) Interest expense also included \$3.6 million and \$3.7 million in fiscal 2010 and fiscal 2009, respectively, associated with landlord construction allowances deemed to be financing in accordance with accounting guidance.

Interest income decreased to \$0.2 million for fiscal 2010 compared to \$0.4 million for the prior year due primarily to lower invested balances and lower interest rates on those invested balances during fiscal 2010.

We recorded net other expense of \$0.5 million for fiscal 2010 compared to net other income of \$0.7 million for fiscal 2009. This variance primarily relates to changes in the value of our investments in variable life insurance contracts used to support our Executive Savings Plan (ESP), a non-qualified deferred compensation plan, and the realization in fiscal 2009 of \$0.7 million in proceeds from one of these contracts, as well as reductions in other miscellaneous income items.

Income Tax Provision

Our effective income tax rate was 26.4% for fiscal 2010 compared to 16.5% for fiscal 2009. This increase was primarily attributable to deleverage from employment-related tax credits on higher pretax income, as well as lower non-taxable gains on our investments in variable life insurance contracts used to support our ESP, partially offset by the favorable resolution of our 162(m) Dispute as to tax years 2005 and 2006, as described in Note 10 of Notes to Consolidated Financial Statements in Part IV, Item 15 of this report.

Table of Contents

Fiscal 2009 Compared to Fiscal 2008

Revenues

Revenues decreased slightly to \$1,602.0 million for fiscal 2009 compared to \$1,606.4 million for fiscal 2008.

Restaurant sales decreased slightly to \$1,534.3 million for fiscal 2009 compared to \$1,536.5 million for the prior fiscal year. The resulting sales decrease of \$2.2 million consisted of \$36.5 million decrease in comparable restaurant sales and a \$34.3 million increase from newer locations not in the comparable sales base. Comparable sales decreased by 2.6% from fiscal 2008 to fiscal 2009.

Comparable sales at The Cheesecake Factory restaurants decreased 2.3% from fiscal 2008. This decline was due to reduced traffic at our restaurants, which we believe was primarily driven by the macroeconomic factors affecting the restaurant industry in general, and was partially offset by a slightly higher check average. We realized effective menu price increases of approximately 1.2% and 0.8% in the first and third quarters of 2009, respectively.

Comparable sales at our Grand Lux Cafe restaurants decreased 5.1% from fiscal year 2008. We realized effective menu price increases of approximately 0.3% and 0.6% in the second and fourth quarters of 2009, respectively. The decrease in Grand Lux Cafe comparable sales is also attributable to a decline in guest traffic, which we believe was primarily driven by the macroeconomic factors affecting the restaurant industry in general.

Total restaurant operating weeks increased 3% to 8,313 in fiscal 2009 from the prior year primarily from the opening of three new restaurants during the trailing 15-month period. Average sales per restaurant operating week decreased approximately 3% in fiscal 2009 to \$184,600 compared to the prior fiscal year. This decrease in average weekly sales was due principally to the decline in guest traffic.

Bakery sales decreased 3% to \$67.7 million in fiscal 2009 compared to \$69.9 million in the prior fiscal year. This decrease is primarily due to lower sales to our warehouse clubs and national accounts.

Cost of Sales

As a percentage of revenues, cost of sales decreased to 24.6% during fiscal 2009 compared to 26.0% for the prior fiscal year. Approximately one-half of this decrease was attributable to savings associated with our cost of sales initiatives, including the development of new menu items with lower food costs, negotiation of more favorable pricing for commodities and improvements in our supply chain. The majority of the remaining cost of sales favorability stemmed from commodity price spikes that occurred in 2008 when prices were significantly higher for certain grocery, produce and dairy items as compared to the same periods in fiscal 2009. Additionally, our bakery benefited from a favorable

year-over-year contracted price for cream cheese.

Labor Expenses

As a percentage of revenues, labor expenses decreased to 33.0% in fiscal 2009 compared to 33.2% in fiscal 2008. This decrease was primarily due to direct labor savings as a result of our operational initiatives, partially offset by higher health insurance costs and deleveraging from lower sales levels in fiscal 2009 as compared to the prior year. Stock-based compensation included in labor was \$5.9 million in fiscal 2009 compared to \$4.7 million in fiscal 2008. The expense in the prior year period is net of a \$1.5 million reduction related to an adjustment to our estimated stock option forfeiture rate.

Other Operating Costs and Expenses

As a percentage of revenues, other operating costs and expenses increased to 25.1% for fiscal 2009 versus 24.7% for fiscal 2008. This increase was primarily due to higher self-insurance reserves, increased marketing expenses and deleveraging of fixed costs due to lower sales levels in fiscal 2009. These items were partially offset by benefits from operational cost saving initiatives and lower utility costs during fiscal 2009.

Table of Contents

General and Administrative Expenses

As a percentage of revenues, G&A expenses increased to 6.1% for fiscal 2009 versus 5.2% for fiscal 2008. The majority of this variance was due to an increase in the accrual for corporate performance bonuses in fiscal 2009 as compared to the comparable prior year period, as well as a \$2.9 million charge in fiscal 2009 resulting from a change in the amount and structure of the retirement benefit contained in the employment agreement with our Chief Executive Officer. G&A expenses included \$8.4 million and \$8.2 million of stock-based compensation expense in fiscal 2009 and fiscal 2008, respectively. The expense in the prior year period is net of a \$0.7 million reduction related to an adjustment to our stock option forfeiture rate.

Depreciation and Amortization Expenses

As a percentage of revenues, depreciation and amortization expenses increased to 4.7% for fiscal 2009 compared to 4.6% for fiscal 2008. The increase is primarily due to deleveraging from lower average weekly sales at our restaurants.

Impairment of Assets

We assess potential impairment of our long-lived assets whenever events or changes in circumstances indicate that the carrying value of the assets may not be recoverable. Factors considered include, but are not limited to, significant underperformance relative to historical or projected future operating results; significant changes in the manner of use of the acquired assets or the strategy for the overall business; and significant negative industry or economic trends. We regularly review restaurants that are cash flow negative for the previous four quarters to determine if impairment testing is warranted. At any given time, we may be monitoring a small number of locations, and impairment charges could be triggered in the future if individual restaurant performance does not improve.

Based on the results of this analysis, we recorded a \$26.5 million impairment charge against the carrying value of four Grand Lux Cafe restaurants in fiscal 2009. During fiscal 2008, we recorded a \$3.0 million impairment charge against the carrying value of three The Cheesecake Factory locations.

Preopening Costs

Preopening costs decreased to \$3.3 million for fiscal 2009 compared to \$11.9 million for the prior fiscal year. We incurred preopening costs to open one The Cheesecake Factory restaurant in fiscal 2009 compared to opening six The Cheesecake Factory restaurants and our first RockSugar Pan Asian Kitchen location during fiscal 2008. In addition, preopening costs were incurred in both years for restaurant openings in progress; maintaining a roster of trained managers for pending openings; and the associated temporary housing and other costs necessary to relocate managers in alignment with future restaurant opening and operating needs.

Edgar Filing: CHEESECAKE FACTORY INC - Form 10-K

Interest Expense, Interest Income and Other Income

Interest expense increased to \$23.4 million for fiscal 2009 compared to \$14.8 million for fiscal 2008 due primarily to costs totaling \$7.4 million to unwind two of our interest rate collars in conjunction with reducing our revolving credit facility balance. In addition, we paid a higher interest rate on the outstanding balance of our debt during fiscal 2009 relative to the prior year as a result of an amendment to our revolving credit facility in January 2009. (See Notes 7 and 8 of Notes to Consolidated Financial Statements in Part IV, Item 15 of this report for further discussion of our long-term debt and derivative financial instruments, respectively.) These increases to interest expense were partially offset by a lower average outstanding debt balance during fiscal 2009 as compared to the prior year. Interest expense also included \$3.7 million and \$3.5 million in fiscal 2009 and fiscal 2008, respectively, associated with landlord construction allowances deemed to be financing in accordance with accounting guidance.

Interest income decreased to \$0.4 million for fiscal 2009 compared to \$1.8 million for the prior year due primarily to lower interest rates earned on invested balances during fiscal 2009.

We recorded net other income of \$0.7 million for fiscal 2009 compared to net other expense of \$1.0 million for fiscal 2008. This variance primarily relates to changes in the value of our investments in variable life insurance contracts used to support our Executive Savings Plan (ESP), a non-qualified deferred compensation plan, as well as the realization in fiscal 2009 of \$0.7 million in proceeds from one of these contracts.

Income Tax Provision

Our effective income tax rate was 16.5% for fiscal 2009 compared to 28.6% for fiscal 2008. This decline was primarily attributable to non-taxable gains in fiscal 2009 compared to non-deductible losses in fiscal 2008 on our investments in variable life insurance contracts used to support our ESP, greater leverage from tax credits and incentives on lower book income in fiscal 2009 and a reserve recorded in fiscal 2008 for the potential disallowance of certain executive compensation under the provisions of Internal

Table of Contents

Revenue Code Section 162(m). The favorable rate impact of these items was partially offset by a rate benefit in fiscal 2008 for the IRS approval of our change in method of accounting for construction allowances.

Fiscal Outlook

This discussion contains forward-looking statements and should be read in conjunction with our consolidated financial statements and related notes in Part IV, Item 15 of this report, the Risk Factors included in Part I, Item 1A of this report, and the cautionary statements included throughout this report. The inclusion of supplementary analytical and related information herein may require us to make estimates and assumptions in connection with our analysis of trends and expectations with respect to our results of operations and financial position taken as a whole.

In fiscal 2011, we plan to open as many as six to nine new restaurants. We estimate diluted earnings per share for fiscal 2011 will be between \$1.55 and \$1.70 based on the assumption that comparable restaurant sales will increase in a range of between 1.0% and 3.0%. We expect cash capital expenditures in fiscal 2011 to range between \$70 million and \$90 million. We also target repurchasing at least \$100 million of our common stock, depending on Company performance and market conditions.

We utilize a 52/53-week fiscal year ending on the Tuesday closest to December 31st for financial reporting purposes. Fiscal years 2010, 2009 and 2008 consisted of 52 weeks. Fiscal 2011 will be a 53-week year, with an additional week in our fourth quarter. The impact from the extra week is incorporated into our estimates.

Liquidity and Capital Resources

One of our corporate financial objectives is to maintain a sufficiently strong and conservative balance sheet to support our operating initiatives and unit growth with financial flexibility; to provide the financial resources necessary to protect and enhance the competitiveness of our restaurant and bakery brands; and to provide a prudent level of financial capacity to manage the risks and uncertainties of conducting our business operations in the current economic environment and through future economic and industry cycles. Our ongoing capital requirements are principally related to our restaurant expansion plan and ongoing maintenance of our restaurants and bakery facilities, as well as investment in our corporate and information technology infrastructures.

Similar to many restaurant and retail chain store operations, we utilize operating lease arrangements for all of our restaurant locations. We believe that our operating lease arrangements continue to provide appropriate leverage for our capital structure in a financially efficient manner. However, we are not limited to the use of lease arrangements as our only method of opening new restaurants. While most of our operating lease obligations are not required to be reflected as indebtedness on our consolidated balance sheet, the minimum base rents and related fixed obligations under our lease agreements must be satisfied by cash flows from our ongoing operations. Accordingly, our lease arrangements reduce, to some extent, our capacity to utilize funded indebtedness in our capital structure.

Edgar Filing: CHEESECAKE FACTORY INC - Form 10-K

Historically, we have obtained capital from our ongoing operations, public stock offerings, debt financing, employee stock option exercises and construction contributions from our landlords. Our requirement for working capital is not significant, since our restaurant guests pay for their food and beverage purchases in cash or cash equivalents at the time of sale, and we are able to sell many of our food inventory items before payment is due to the suppliers of such items.

The following table presents, for the periods indicated, a summary of our key cash flows from operating, investing and financing activities (dollar amounts in millions):

| | 2010 | Fiscal Year 2009 | 2008 |
|--|------------|---------------------|------------|
| Cash provided by operating activities | \$ 165.2 | \$ 197.1 | \$ 169.2 |
| Capital expenditures | \$ (41.8) | \$ (37.2) | \$ (84.9) |
| Proceeds from exercise of employee stock options | \$ 30.6 | \$ 1.7 | \$ 2.7 |
| (Repayment)/borrowing on credit facility | \$ (100.0) | \$ (175.0) | \$ 100.0 |
| Purchase of treasury stock | \$ (52.1) | \$ — | \$ (172.5) |

During fiscal 2010, our cash and marketable securities on hand increased by \$7.9 million to \$81.6 million at December 28, 2010. This increase was primarily attributable to cash provided by operating activities and proceeds from stock option exercises, partially offset by repayments on our credit facility and purchases of treasury stock and property and equipment. See Note 1 of Notes to Consolidated Financial Statements in Part IV, Item 15 of this report for further discussion of cash and cash equivalents.

Table of Contents

Our restaurant development model closely resembles that of a retail business that occupies leased space in shopping malls, lifestyle centers, office complexes, strip centers, entertainment centers and other real estate developments. We typically seek to lease our restaurant locations for primary periods of 15 to 20 years under operating lease arrangements. Our rent structures vary by lease, but generally provide for the payment of both minimum and contingent (percentage) rent based on net sales, as well as other expenses related to the leases (for example, our pro rata share of common area maintenance, property tax and insurance expenses). We disburse cash for leasehold improvements and FF&E to build out our leased premises. We may also disburse cash for structural additions that we make to leased premises that generally are reimbursed to us by our landlords as construction contributions pursuant to agreed-upon terms in the respective leases. If obtained, landlord construction contributions usually take the form of up-front cash, full or partial credits against minimum or percentage rents otherwise payable by us, or a combination thereof. We do not have any current plans to encumber our existing leasehold interests with lessee secured financing. We own substantially all of the FF&E in our restaurants and currently plan to do so in the future.

Capital expenditures were lower in fiscal 2010 and 2009 compared to fiscal 2008 due to the number of restaurants opened in each year (three, one and seven, respectively.) Capital expenditures for new restaurants, including locations under development as of each fiscal year end were \$15 million, \$8 million and \$56 million for fiscal 2010, 2009 and 2008, respectively. In fiscal 2010, no capital expenditures were funded through deemed landlord financing. Fiscal 2010 capital expenditures also included \$23 million for maintenance and capacity addition outlays in our existing restaurants, and approximately \$4 million for bakery and corporate infrastructure investments.

For fiscal 2011, we currently estimate our cash outlays for capital expenditures to range between \$70 million and \$90 million, net of agreed-upon up-front cash landlord construction contributions and excluding \$9 million of expected noncapitalizable preopening costs for new restaurants. The amount reflected as additions to property and equipment in the consolidated statements of cash flows may vary from this estimate based on the accounting treatment of each operating lease (See Note 1 of Notes to Consolidated Financial Statements in Part IV, Item 15 of this report). Our estimate for capital expenditures for fiscal 2011 contemplates a net outlay of \$40 million to \$57 million for as many as six to nine restaurants to be opened during fiscal 2011 and estimated construction-in-progress disbursements for anticipated fiscal 2012 openings. These amounts are net of estimated collections of up-front cash landlord construction contributions. Expected capital expenditures for fiscal 2011 also include \$24 million to \$26 million for maintenance and capacity additions on our existing restaurants and \$6 million to \$7 million for bakery and corporate infrastructure investments.

At December 28, 2010, we had no borrowings outstanding under our \$200 million revolving credit facility (Facility). Availability under the Facility is reduced by outstanding standby letters of credit, which are used to support our self-insurance programs. As of December 28, 2010, we had net availability for borrowings of \$184 million, based on \$16 million in standby letters of credit. See Note 7 of Notes to Consolidated Financial Statements in Part IV, Item 15 of this report for further discussion of our long-term debt.

During fiscal 2008 and 2007, we entered into several zero-cost interest rate collars that hedged interest rate variability on a portion of outstanding borrowings on our Facility. During fiscal 2010 and 2009, in conjunction with repayments on our Facility, we unwound our derivatives at a cost of \$7.4 million in each year. We had no derivative instruments outstanding at December 28, 2010. See Note 8 of Notes to Consolidated Financial Statements in Part IV, Item 15 of this report for further discussion of our derivative financial instruments.

We have an outstanding authorization from our Board of Directors to repurchase up to 31 million shares of our common stock. Under this authorization, we have cumulatively repurchased a total of 25.2 million shares at a total cost of \$558.3 million through December 28, 2010. The authorization does not have an expiration date, does not require us to purchase a specific number of shares and may be modified, suspended or terminated at any time.

Edgar Filing: CHEESECAKE FACTORY INC - Form 10-K

In October 2008, we suspended our share repurchase program in order to maintain maximum flexibility in our capital decisions in light of the unprecedented crisis in the global financial markets and the indeterminate future impact it could have on the overall economy and on our business. In February 2010, our Board of Directors reinstated our stock repurchase program and approved the adoption of a trading plan under Rule 10b5-1 (10b5-1Plan) under the Securities Exchange Act of 1934, as amended from time to time (Act), which was effective from March 2010 through December 2010. In February 2011, our Board of Directors approved a new 10b5-1 Plan, which will be effective from March 16, 2011 through February 29, 2012. In addition, the Board of Directors approved the terms of a share repurchase plan pursuant to which we are authorized to repurchase shares of our common stock in open market transactions in accordance with Rule 10b-18 of the Exchange Act of 1934, such plan to be effective from February 24, 2011 through May 13, 2011. We target repurchasing at least \$100 million of our common stock, depending on Company performance and market conditions.

The timing and number of shares repurchased pursuant to the share repurchase authorization are subject to a number of factors, including current market conditions, legal constraints, available cash or other sources of funding and financial covenants under our credit facility that limit share repurchases based on a defined leverage ratio. (See Note 7 of Notes to Consolidated Financial Statements in Part IV, Item 15 of this report for further discussion of our long-term debt.) Shares may be repurchased in the open

Table of Contents

market or through privately negotiated transactions at times and prices considered appropriate by us. We make the determination to repurchase shares based on several factors, including an evaluation of current and future capital needs associated with new restaurant development, current and forecasted cash flows, a review of our capital structure and cost of capital, and our share price.

Based on our current expansion objectives, we believe that our cash and cash equivalents, combined with expected cash flows provided by operations, available borrowings under our credit facility and expected landlord construction contributions should be sufficient in the aggregate to finance our planned capital expenditures and other operating activities in fiscal 2011.

As of December 28, 2010, we had no financing transactions, arrangements or other relationships with any unconsolidated entities or related parties. Additionally, we had no financing arrangements involving synthetic leases or trading activities involving commodity contracts.

Contractual Obligations and Commercial Commitments

The following schedules summarize our contractual obligations and commercial commitments as of December 28, 2010 (amounts in millions):

| | Total | Payment Due by Period | | | More than 5 Years |
|--|------------|-----------------------|-----------|-----------|----------------------|
| | | Less than 1 Year | 1-3 Years | 4-5 Years | |
| <u>Contractual obligations</u> | | | | | |
| Leases (1) | \$ 895.9 | \$ 60.6 | \$ 125.6 | \$ 127.0 | \$ 582.7 |
| Long-term debt | | | | | |
| Purchase obligations (2) | 106.8 | 89.5 | 14.1 | 2.6 | 0.6 |
| Uncertain tax positions (3) | 3.0 | 1.4 | 1.6 | | |
| Total | \$ 1,005.7 | \$ 151.5 | \$ 141.3 | \$ 129.6 | \$ 583.3 |
| <u>Other commercial commitments</u> | | | | | |
| Standby letters of credit | \$ 16.0 | \$ | \$ | \$ 16.0 | \$ |

(1) Represents aggregate minimum lease payments for our restaurant operations, automobiles and certain equipment, including amounts characterized as deemed landlord financing payments in accordance with accounting guidance. See Note 1 in Notes to Consolidated Financial Statements in Part IV, Item 15 of this report. Most of our leases also require contingent rent in addition to the minimum base rent based on a percentage of sales ranging from 3% to 10% and require expenses incidental to the use of the property.

(2) Purchasing obligations represent commitments for the purchase of goods and estimated construction commitments, net of agreed-upon up-front landlord construction contributions. Amounts exclude agreements that are cancelable without significant penalty.

(3) Represents liability for uncertain tax positions. See Note 14 of Notes to Consolidated Financial Statements in Part IV, Item 15 of this report for further discussion of income taxes.

We expect to fund our contractual obligations primarily with operating cash flows generated in the normal course of business.

Critical Accounting Policies

Critical accounting policies are those we believe are most important to portraying our financial condition and results of operations and also require the greatest amount of subjective or complex judgments by management. Judgments and uncertainties regarding the application of these policies may result in materially different amounts being reported under various conditions or using different assumptions. We consider the following policies to be the most critical in understanding the judgment that is involved in preparing our consolidated financial statements.

Property and Equipment

We record all property and equipment at cost less accumulated depreciation. Improvements are capitalized while repairs and maintenance costs are expensed as incurred. Depreciation and amortization are calculated using the straight-line method over the estimated useful life of each asset or lease term, whichever is shorter. The useful life of property and equipment and the determination as to what constitutes a capitalized cost versus a repair and maintenance expense involves judgment by management, which may produce materially different amounts of depreciation expense than if different assumptions were used.

Table of Contents

Impairment of Long-Lived Assets

We assess potential impairment of our long-lived assets whenever events or changes in circumstances indicate that the carrying value of the assets or asset group may not be recoverable. Factors considered include, but are not limited to, significant underperformance relative to historical or projected future operating results; significant changes in the manner of use of the acquired assets or the strategy for the overall business; and significant negative industry or economic trends. We regularly review restaurants that are cash flow negative for the previous four quarters to determine if impairment testing is warranted. At any given time, we may be monitoring a small number of locations, and impairment charges could be triggered in the future if individual restaurant performance does not improve.

We have determined that our asset group for impairment testing is comprised of the assets and liabilities of each of our individual restaurants, as this is the lowest level of identifiable cash flows. We have identified leasehold improvements as the primary asset because it is the most significant component of our restaurant assets, is the principal asset from which our restaurants derive their cash flow generating capacity and has the longest remaining useful life. The recoverability is assessed in most cases by comparing the carrying value of the assets to the undiscounted cash flows expected to be generated by these assets.

Impairment losses are measured as the amount by which the carrying values of the assets exceed their fair values. This assessment process requires the use of estimates and assumptions regarding future cash flows and estimated useful lives, which are subject to a significant degree of judgment based on our experience and knowledge. These estimates can be significantly impacted by changes in the economic environment, real estate market conditions and capital spending decisions.

During fiscal 2009, we recorded a \$26.5 million impairment charge against the carrying value of four Grand Lux Cafe locations. During fiscal 2008, we recorded a \$3.0 million impairment charge against the carrying value of three The Cheesecake Factory locations. No impairment charges were recorded in fiscal 2010. If the current economic situation deepens in magnitude and/or we are unable to implement initiatives to appropriately scale our infrastructure in a timely manner, we may be required to record additional impairment charges in future periods.

Leases

We currently lease all of our restaurant locations. We evaluate each lease to determine its appropriate classification as an operating or capital lease for financial reporting purposes. All of our restaurant leases are classified as operating leases.

Minimum base rent for our operating leases, which generally have escalating rentals over the term of the lease, is recorded on a straight-line basis over the lease term. The initial lease term includes the build-out, or rent holiday period, for our leases, where no rent payments are typically due under the terms of the lease. Contingent rent expense, which is based on a percentage of revenue, is recorded as incurred to the extent it exceeds minimum base rent per the lease agreement.

We disburse cash for leasehold improvements and FF&E to build out and equip our leased premises. We may also expend cash for structural additions that we make to leased premises that generally are reimbursed to us by our landlords as construction contributions pursuant to

Edgar Filing: CHEESECAKE FACTORY INC - Form 10-K

agreed-upon terms in our leases. Landlord construction contributions usually take the form of up-front cash, full or partial credits against minimum or percentage rents otherwise payable by us, or a combination thereof. Depending on the specifics of the leased space and the lease agreement, amounts paid for structural components are recorded during the construction period as either prepaid rent or construction-in-progress and the landlord construction contributions are recorded as either an offset to prepaid rent or as a deemed landlord financing liability.

Upon completion of construction, we perform an analysis on the leases for which the structural cost was initially recorded to construction-in-progress to determine if they qualify for sale-leaseback treatment. For those qualifying leases, the deemed landlord financing liability and the associated construction-in-progress are removed and the difference is reclassified to either prepaid or deferred rent and amortized over the lease term as an increase or decrease to rent expense. If the lease does not qualify for sale-leaseback treatment, the deemed landlord financing liability is amortized over the lease term based on the rent payments designated in the lease agreement.

Gift Card Revenue Recognition

We recognize a liability upon the sale of our gift cards and recognize revenue when these gift cards are redeemed in our restaurants or on our website. Based on our historical gift card redemption patterns, we can reasonably estimate the amount of gift cards for which redemption is remote, which is referred to as breakage. Breakage is recognized in proportion to historical redemption trends and is classified as revenues in our consolidated statement of operations. Utilizing this method, we estimate both

Table of Contents

the amount of breakage and the time period of redemption. If actual redemption patterns vary from our estimates, actual gift card breakage income may differ from the amounts recorded.

Self-Insurance Liability

We retain the financial responsibility for a significant portion of our risks and associated liabilities with respect to workers' compensation, general liability, employment practices, employee health benefits and other insurable risks. The accrued liabilities associated with these programs are based on our estimate of the ultimate costs to settle known claims as well as claims incurred but not yet reported to us (IBNR) as of the balance sheet date. Our estimated liabilities are not discounted and are based on information provided by our insurance brokers and insurers, combined with our judgment regarding a number of assumptions and factors, including the frequency and severity of claims, claims development history, case jurisdiction, applicable legislation and our claims settlement practices. We maintain stop-loss coverage with third party insurers to limit our individual claim exposure for many of our programs and for aggregate exposure on our employee health benefits program. The estimated amounts receivable from our third-party insurers under this coverage are recorded in other receivables. Significant judgment is required to estimate IBNR amounts as parties have yet to assert such claims. If actual claims trends, including the severity or frequency of claims, differ from our estimates, our financial results could be impacted.

Stock-Based Compensation

We apply the Black-Scholes valuation model in determining the fair value of stock option grants, which requires the use of subjective assumptions, including the volatility of our common stock price and the length of time employees will retain their vested stock options prior to exercise. Additionally, we estimate the expected forfeiture rate related to both stock options and restricted stock in determining the amount of stock-based compensation expense for each period. Changes in these assumptions can materially affect our results of operations. (See Note 12 of Notes to Consolidated Financial Statements in Part IV, Item 15 of this report for further discussion of stock-based compensation.)

Income Taxes

We provide for income taxes based on our estimate of federal and state tax liabilities. Our estimates include, but are not limited to, effective state and local income tax rates, allowable tax credits for items such as FICA taxes paid on reported tip income, and estimates related to depreciation expense allowable for tax purposes. Our estimates are made based on the best available information at the time we prepare our income tax provision. In making our estimates, we also consider the impact of legislative and judicial developments. As these developments evolve, we update our estimates, which, in turn, may result in adjustments to our effective tax rate. We generally file our income tax returns within nine to ten months after our fiscal year-end. All tax returns are subject to audit by federal and state governments, usually years after the returns are filed, and could be subject to differing interpretations of the tax laws.

We account for uncertain tax positions under Financial Accounting Standards Board guidance, which prescribes a minimum probability threshold that a tax position must meet before a financial statement benefit is recognized. The minimum threshold is defined as a tax position that is more likely than not to be sustained upon examination by the applicable taxing authority, including resolution of any related appeals or litigation processes, based on the technical merits of the position. The tax benefit to be recognized is measured as the largest amount of benefit that is greater than 50% likely of being realized upon settlement. Assessment of uncertain tax positions requires significant judgments relating

to the amounts, timing and likelihood of resolution. Our actual results could differ materially from these estimates.

Recent Accounting Pronouncements

See Note 1 of Notes to Consolidated Financial Statements in Part IV, Item 15 of this report for a summary of new accounting standards.

Impact of Inflation and Changes in the Costs of Key Operating Resources

Our operating margins depend on, among other things, on our ability to anticipate and react to changes in the costs of key operating resources, including food and other raw materials, labor, energy and other supplies and services. Substantial increases in costs and expenses could impact our operating results to the extent that such increases cannot be passed along to our restaurant and bakery customers. While we have taken steps to qualify multiple suppliers and enter into agreements for some of the commodities used in our restaurant and bakery operations, there can be no assurance that future supplies and costs for such commodities will not fluctuate due to weather and other market conditions outside of our control. We are currently unable to contract for long periods of time for certain of our commodities such as fish and dairy items (except for cream cheese used in our bakery operations). Consequently, these commodities can be subject to unforeseen supply and cost fluctuations.

Table of Contents

Our staff members are subject to various minimum wage requirements. We operate in many states, including California, where the minimum wage is higher than the federal minimum and in such states our staff members receive compensation equal to the state's minimum wage. There have been and may be additional minimum wage increases in excess of federal minimum wage implemented in various jurisdictions in which we operate or seek to operate. Minimum wage increases may have a material adverse effect on our labor costs. Certain operating costs, such as taxes, insurance and other outside services continue to increase with the general level of inflation or higher and may also be subject to other cost and supply fluctuations outside of our control.

While we have been able to partially offset inflation and other changes in the costs of key operating resources by gradually increasing prices for our menu items and bakery products, coupled with more efficient purchasing practices, productivity improvements and greater economies of scale, there can be no assurance that we will be able to continue to do so in the future. From time to time, competitive conditions could limit our menu pricing flexibility. In addition, macroeconomic conditions could make additional menu price increases imprudent. There can be no assurance that all future cost increases can be offset by increased menu prices or that increased menu prices will be fully absorbed by our restaurant guests without any resulting changes in their visit frequencies or purchasing patterns. Substantially all of the leases for our restaurants provide for contingent rent obligations based on a percentage of sales. As a result, rent expense will absorb a proportionate share of any menu price increases in our restaurants. There can be no assurance that we will continue to generate increases in comparable restaurant and bakery sales in amounts sufficient to offset inflationary or other cost pressures.

Seasonality and Quarterly Results

Our business is subject to seasonal fluctuations. Historically, our highest levels of revenues for our established restaurants occur in the second and third quarters of the fiscal year. Approximately 90% of our restaurants are located in or near retail centers and malls that typically experience seasonal fluctuations in sales. Patio seating represents approximately 20% of the total available productive seating in our restaurants and can be subject to disruption from inclement weather. Quarterly results have been and will continue to be significantly impacted by the number and timing of new restaurant openings and their associated preopening costs and operating inefficiencies. Our bakery operations are seasonal to the extent that the fourth quarter's sales are typically higher due to holiday business. Additionally, bakery sales comparisons may fluctuate significantly from quarter to quarter due to the timing and size of orders from our larger bakery customers. (See Item 1A Risk Factors Seasonality of our business and the timing of new restaurant openings could result in fluctuations in our financial performance from quarter to quarter within a fiscal year and Adverse weather conditions could unfavorably affect our restaurant sales.) As a result of these and other factors, our financial results for any given quarter may not be indicative of the results that may be achieved for a full fiscal year.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The following discussion of market risks contains forward-looking statements. Actual results may differ materially from the following discussion based on general conditions in the financial and commodity markets.

We are exposed to market risk from interest rate changes on our funded debt. This exposure relates to the component of the interest rate on our \$200 million revolving credit facility (Facility) that is indexed to three-month LIBOR. As of December 28, 2010, we had no debt outstanding under the Facility. Therefore, we had no exposure to interest rate fluctuations on our funded debt at year end fiscal 2010. See Note 7 of Notes to Consolidated Financial Statements in Part IV, Item 15 of this report for further discussion of our long-term debt.

Edgar Filing: CHEESECAKE FACTORY INC - Form 10-K

We are also subject to market risk related to our investments in variable life insurance contracts used to support our ESP, to the extent these investments are not equivalent to the related liability. In addition, because changes in these investments are not taxable, the full impact of gains or losses affects net income. Based on balances at December 28, 2010 and December 29, 2009, a hypothetical 10% decline in the market value of our deferred compensation asset and related liability would not impact income before income taxes. However, net income would decline by \$0.9 million and \$0.7 million, respectively.

We purchase food and other commodities for use in our operations, based on market prices established with our suppliers. Many of the commodities purchased by us can be subject to volatility due to market supply and demand factors outside of our control. To manage this risk in part, we periodically enter into fixed price purchase commitments, with terms typically up to one year, for many of our commodity requirements. However, we are currently unable to contract for long period of time for certain of our commodities such as fish and most dairy items (except for cream cheese used in our bakery operations). Dairy costs can also fluctuate due to government regulation. Substantially all of our food and supplies are available from multiple qualified suppliers, which helps to diversify our overall commodity cost risk. In addition, we may have the ability to increase menu prices, or vary menu items, in response to food commodity price increases. Some of our commodity purchase arrangements may contain contractual features that limit the price paid by establishing certain price floors or caps. We do not use financial instruments to hedge commodity prices, since our purchase arrangements with suppliers, to the extent that we can enter into such arrangements, help control the ultimate cost that we pay.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

The consolidated financial statements required to be filed hereunder are set forth in Part IV, Item 15 of this report.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

We have established and maintain disclosure controls and procedures that are designed to ensure that material information relating to the Company and our subsidiaries required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934 is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only a reasonable assurance of achieving the desired control objectives, and management was necessarily required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures. We carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the period covered by this report. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective at the reasonable assurance level as of December 28, 2010.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting. As defined in Exchange Act Rule 13a-15(f), internal control over financial reporting is a process designed by, or under the supervision of, our principal executive and principal financial officer and effected by our Board of Directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that (i) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the Company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in

accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements.

Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we carried out an evaluation of the effectiveness of our internal control over financial reporting as of December 28, 2010 based on the criteria in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this evaluation, our management concluded that our internal control over financial reporting was effective as of December 28, 2010.

The effectiveness of our internal control over financial reporting as of December 28, 2010 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report which appears in Part IV, Item 15 of this report.

Changes in Internal Control over Financial Reporting

There have been no changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934) during our most recent fiscal quarter ended December 28, 2010 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

We have adopted a code of ethics which applies to our Chief Executive Officer, Chief Financial Officer and Chief Accounting Officer, who are the Company's principal executive, financial and accounting officers, respectively, and the Company's other executive officers and members of the Board of Directors, entitled Code of Ethics for Executive Officers, Senior Financial Officers and Directors. The Code of Ethics is available on our corporate website at www.thecheesecakefactory.com in the Corporate Governance section of our Investors page. We intend to satisfy disclosure requirements under Item 5.05 of Form 8-K regarding an amendment to, or waiver from, a provision of the Code of Ethics by posting such information on our website, at the address and location specified above, or as otherwise required by the NASDAQ Global Market.

Information with respect to our executive officers is included in Part I, Item 1 of this report. Other information required by this item is hereby incorporated by reference from the sections entitled Election of Directors, Board of Directors and Corporate Governance, Audit Committee Financial Expert, Committees of the Board of Directors and Composition of Committees, and Section 16(a) Beneficial Ownership Reporting Compliance in our definitive Proxy Statement for the Annual Meeting of Stockholders to be held on June 1, 2011 (the Proxy Statement).

ITEM 11. EXECUTIVE COMPENSATION

The information required by this item is hereby incorporated by reference to the sections entitled Board of Directors Compensation and Executive Compensation in the Proxy Statement.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The information required by this item is hereby incorporated by reference to the sections entitled Equity Compensation Plan Information and Beneficial Ownership of Principal Stockholders and Management in the Proxy Statement.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information required by this item is hereby incorporated by reference to the sections entitled Policies Regarding Review, Approval or Ratification of Transactions with Related Parties and Board of Directors and Corporate Governance in the Proxy Statement.

ITEM 14.

PRINCIPAL ACCOUNTANT FEES AND SERVICES

The information required by this item is hereby incorporated by reference to the section entitled "Independent Registered Public Accounting Firm Fees and Services" (in the proposal entitled "Ratification of Selection of Independent Registered Public Accounting Firm") in the Proxy Statement.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of The Cheesecake Factory Incorporated:

In our opinion, the accompanying consolidated balance sheets and the related consolidated statements of operations, stockholders' equity and cash flows present fairly, in all material respects, the financial position of The Cheesecake Factory Incorporated and its subsidiaries at December 28, 2010 and December 29, 2009, and the results of their operations and their cash flows for each of the three years ended December 28, 2010, December 29, 2009, and December 30, 2008 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 28, 2010, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on these financial statements and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

THE CHEESECAKE FACTORY INCORPORATED AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies:

Description of Business

The Cheesecake Factory Incorporated (referred to herein as the Company or in the first person notations we, us and our) operates 164 upscale, casual, full-service dining restaurants under The Cheesecake Factory®, Grand Lux Cafe® and RockSugar Pan Asian Kitchen® marks. Additionally, we operate two bakery production facilities that produce baked desserts and other products for our restaurants and for other foodservice operators, retailers and distributors. We also license two bakery cafes under The Cheesecake Factory Bakery Cafe® mark to another foodservice operator. All of our Company-operated and licensed restaurants and our bakery production facilities are located within the United States of America.

Basis of Presentation

The accompanying consolidated financial statements include the accounts of The Cheesecake Factory Incorporated and its wholly owned subsidiaries. All intercompany accounts and transactions for the periods presented have been eliminated in consolidation.

We utilize a 52/53-week fiscal year ending on the Tuesday closest to December 31st for financial reporting purposes. Fiscal years 2010, 2009 and 2008 each consisted of 52 weeks. Fiscal year 2011 will consist of 53 weeks.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires us to make estimates and assumptions for the reporting period and as of the financial statement date. These estimates and assumptions affect the reported amounts of assets, liabilities, revenues and expenses, and the disclosure of contingent liabilities. Actual results could differ from those estimates.

Cash and Cash Equivalents

Edgar Filing: CHEESECAKE FACTORY INC - Form 10-K

At December 28, 2010 and December 29, 2009, we had \$2,000 and \$25.2 million, respectively, of cash invested in a tax-exempt money market fund. This asset qualifies as a cash equivalent since we have a call option that allows us to redeem daily for cash. Amounts receivable from credit card processors, totaling \$7.4 million and \$7.8 million at December 28, 2010 and December 29, 2009, respectively, are considered cash equivalents because they are both short-term and highly liquid in nature and are typically converted to cash within three days of the sales transaction. Checks issued, but not yet presented for payment to our bank, are reflected as a reduction of cash and cash equivalents.

Accounts and Other Receivables

Our accounts receivable principally result from credit sales to bakery customers. Other receivables consist of various amounts due from landlords, insurance providers, our gift card reseller and others in the ordinary course of business.

Concentration of Credit Risk

Financial instruments that potentially subject us to a concentration of credit risk are cash and cash equivalents and receivables. We maintain a majority of our day-to-day operating cash balances with one major financial institution; cash balances may be in excess of FDIC insurance limits. We invest our temporary excess cash in tax-exempt money market funds that purchase only first-tier securities and have not experienced any losses in these accounts. Therefore, we believe we are not exposed to significant risk on these investments.

We consider the concentration of credit risk for accounts receivable to be minimal due to the payment histories and general financial condition of our larger outside bakery customers. Concentration of credit risk related to other receivables is limited as this balance is comprised primarily of amounts due from our landlords for the reimbursement of tenant improvements, as well as from our third-party insurers and gift card reseller.

Table of Contents

Fair Value of Financial Instruments

For cash and cash equivalents, the carrying amount approximates fair value because of the short maturity of these instruments. The fair value of our long-term debt and deemed landlord financing liabilities are determined using current applicable rates for similar instruments as of the balance sheet date. We amended our credit agreement in December 2010, lowering our interest rate to current applicable market rates at that time. However, we had no outstanding debt at December 28, 2010. The fair value of our deemed landlord financing liabilities is \$52.7 million versus a carrying value of \$53.6 million.

Inventories

Inventories are stated at the lower of cost or market on a first-in, first-out basis and consist of restaurant food and other supplies, bakery raw materials, and bakery finished goods.

Property and Equipment

We record all property and equipment at cost less accumulated depreciation. Improvements are capitalized while repairs and maintenance costs are expensed as incurred. Depreciation and amortization are calculated using the straight-line method over the estimated useful life of the assets or the lease term, whichever is shorter. Leasehold improvements include the cost of our internal development and construction department. Depreciation and amortization periods are as follows:

| | |
|-----------------------------------|----------------|
| Buildings and land improvements | 25 to 30 years |
| Leasehold improvements | 15 to 20 years |
| Restaurant fixtures and equipment | 10 years |
| Bakery equipment | 15 years |
| Computer software and equipment | 3 to 5 years |

Impairment of Long-Lived Assets

We assess potential impairment of our long-lived assets whenever events or changes in circumstances indicate that the carrying value of the assets or asset group may not be recoverable. Factors considered include, but are not limited to, significant underperformance relative to historical or projected future operating results; significant changes in the manner of use of the acquired assets or the strategy for the overall business; and significant negative industry or economic trends. We regularly review restaurants that are cash flow negative for the previous four quarters to determine if impairment testing is warranted. At any given time, we may be monitoring a small number of locations, and impairment charges could be triggered in the future if individual restaurant performance does not improve.

Edgar Filing: CHEESECAKE FACTORY INC - Form 10-K

We have determined that our asset group for impairment testing is comprised of the assets and liabilities of each of our individual restaurants, as this is the lowest level of identifiable cash flows. We have identified leasehold improvements as the primary asset because it is the most significant component of our restaurant assets, it is the principal asset from which our restaurants derive their cash flow generating capacity and has the longest remaining useful life. The recoverability is assessed in most cases by comparing the carrying value of the assets to the undiscounted cash flows expected to be generated by these assets. Impairment losses are measured as the amount by which the carrying values of the assets exceed their fair values.

During fiscal 2009, we recorded a \$26.5 million impairment charge against the carrying value of four Grand Lux Cafe locations. During fiscal 2008, we recorded a \$3.0 million impairment charge against the carrying value of three The Cheesecake Factory locations. No impairment charges were recorded in fiscal 2010.

Self-Insurance Liability

We retain the financial responsibility for a significant portion of our risks and associated liabilities with respect to workers' compensation, general liability, employment practices, employee health benefits and other insurable risks. The accrued liabilities associated with these programs are based on our estimate of the ultimate costs to settle known claims as well as claims incurred but not yet reported to us (IBNR) as of the balance sheet date. Our estimated liabilities are not discounted and are based on information provided by our insurance brokers and insurers, combined with our judgment regarding a number of assumptions and factors, including the frequency and severity of claims, claims development history, case jurisdiction, applicable legislation and our claims settlement practices. We maintain stop-loss coverage with third party insurers to limit our individual claim exposure for many of our programs and for aggregate exposure on our employee health benefits program. The estimated amounts receivable from our third-party insurers under this coverage are recorded in other receivables. Significant judgment is required to estimate IBNR amounts as parties have yet to assert such claims. If actual claims trends, including the severity or frequency of claims, differ from our estimates, our financial results could be impacted.

Table of Contents

Derivative Financial Instruments

Our derivative financial instruments have consisted of zero-cost interest rate collars to hedge interest rate variability on our revolving credit facility. We formally document the relationship between the hedging instruments and the hedged items, as well as our risk management objective and strategy for undertaking hedge transactions. These interest rate collars qualified for hedge accounting as cash flow hedges. Accordingly, we recognized these derivatives at fair value as either assets or liabilities on the consolidated balance sheets. All changes in fair value were recorded in accumulated other comprehensive income and subsequently reclassified into earnings when the related interest expense on the underlying borrowing was recognized. We have not, and do not plan to, enter into any derivative financial instruments for trading or speculative purposes. We had no derivative instruments outstanding as of December 28, 2010.

Revenue Recognition

Our revenues consist of sales from our restaurant operations and sales from our bakery operations to other foodservice operators, retailers and distributors (bakery sales). Revenues from restaurant sales are recognized when payment is tendered at the point of sale. Revenues from bakery sales are recognized upon transfer of title to customers. Revenues are presented net of sales taxes. The obligation is included in other accrued expenses until the taxes are remitted to the appropriate taxing authorities.

We recognize a liability upon the sale of our gift cards and recognize revenue when these gift cards are redeemed in our restaurants or on our website. Based on our historical gift card redemption patterns, we can reasonably estimate the amount of gift cards for which redemption is remote, which is referred to as breakage. Breakage is recognized in proportion to historical redemption trends and is classified as revenues in our consolidated statement of operations. We recognized \$2.7 million, \$3.1 million and \$3.1 million of gift card breakage in fiscal years 2010, 2009 and 2008, respectively. Incremental direct costs related to gift card sales, including commissions and credit card fees, are deferred and recognized in earnings in the same pattern as the related gift card revenue.

Certain of our promotional programs are multiple element arrangements that include both delivered and undelivered components. Through fiscal 2010, we have allocated revenue to each undelivered element based on vendor-specific objective evidence of fair value, which is the price charged when that element is sold separately. These revenues were deferred and subsequently recognized when these elements were delivered. Any residual revenue was allocated to the delivered component and recognized at the time of the original transaction. See Recent Accounting Pronouncements in this Note for discussion of new guidance for revenue recognition of arrangements with multiple deliverables, which will go into effect for us in fiscal 2011.

Leases

We currently lease all of our restaurant locations. We evaluate each lease to determine its appropriate classification as an operating or capital lease for financial reporting purposes. All of our restaurant leases are classified as operating leases.

Edgar Filing: CHEESECAKE FACTORY INC - Form 10-K

Minimum base rent for our operating leases, which generally have escalating rentals over the term of the lease, is recorded on a straight-line basis over the lease term. The initial rent term includes the build-out, or rent holiday period, for our leases, where no rent payments are typically due under the terms of the lease. Contingent rent expense, which is based on a percentage of revenue, is also recorded to the extent it exceeds minimum base rent per the lease agreement.

We disburse cash for leasehold improvements and FF&E to build out and equip our leased premises. We may also expend cash for structural additions that we make to leased premises that generally are reimbursed to us by our landlords as construction contributions pursuant to agreed-upon terms in our leases. Landlord construction contributions usually take the form of up-front cash, full or partial credits against minimum or percentage rents otherwise payable by us, or a combination thereof. Depending on the specifics of the leased space and the lease agreement, amounts paid for structural components are recorded during the construction period as either prepaid rent or construction-in-progress and the landlord construction contributions are recorded as either an offset to prepaid rent or as a deemed landlord financing liability.

Upon completion of construction, we perform an analysis on the leases for which the structural cost was initially recorded to construction-in-progress to determine if they qualify for sale-leaseback treatment. For those qualifying leases, the deemed landlord financing liability and the associated construction-in-progress are removed and the difference is reclassified to either prepaid or deferred rent and amortized over the lease term as an increase or decrease to rent expense. If the lease does not qualify for sale-leaseback treatment, the deemed landlord financing liability is amortized over the lease term based on the rent payments designated in the lease agreement.

Table of Contents

Stock-Based Compensation

We maintain performance incentive plans under which incentive stock options, non-qualified stock options, stock appreciation rights, restricted shares, deferred shares, performance shares and performance units may be granted to employees and consultants. To date, we have only granted non-qualified stock options and restricted shares of common stock under these plans. Stock options generally vest at 20% per year or, in the case of restaurant management, cliff vest in five years and expire eight to ten years from the date of grant. Certain stock options require that either the grantee or the Company satisfy specified performance criteria prior to exercisability of vested stock options. Restricted shares vest 100% not prior to three years from the date of grant, and require that the staff member remains employed in good standing with the Company as of the vesting date. Certain executive officer stock options and restricted stock may vest earlier in the event of a change of control, as defined in the plan.

Non-employee directors have received only non-qualified stock options under a non-employee director equity plan, which expired in May 2007. Currently, we do not have a plan under which non-employee directors may be granted stock options or other equity interests in the Company.

We apply the Black-Scholes valuation model in determining the fair value of stock option grants, which is then amortized on a straight-line basis over the requisite service period. See Note 12 for discussion of the assumptions utilized in our stock option valuation model. We reclassify the excess tax benefit resulting from the exercise of stock options out of cash flows from operating activities and into cash flows from financing activities on the consolidated statements of cash flows.

Advertising Costs

We expense advertising production costs at the time the advertising first takes place; all other advertising costs are expensed as incurred. Most of our advertising costs are included in other operating costs and expenses and were \$7.3 million, \$7.7 million and \$1.4 million in fiscal 2010, 2009 and 2008, respectively.

Preopening Costs

Preopening costs include all costs to relocate and compensate restaurant management employees during the preopening period; costs to recruit and train hourly restaurant employees; wages, travel and lodging costs for our opening training team and other support employees; and straight-line minimum base rent during the build-out and in-restaurant training periods. Also included in preopening costs are expenses for maintaining a roster of trained managers for pending openings; the associated temporary housing and other costs necessary to relocate managers in alignment with future restaurant opening and operating needs; and corporate travel and support activities. We expense preopening costs as incurred.

Income Taxes

Edgar Filing: CHEESECAKE FACTORY INC - Form 10-K

Deferred income tax assets and liabilities are recognized for the tax consequences of temporary differences based on the difference between the financial statement and tax basis of existing assets and liabilities using the statutory rates expected in the years in which the differences are expected to reverse. The effect on deferred taxes of a change in tax rates is recognized in income in the period that includes the enactment date.

We account for uncertain tax positions under Financial Accounting Standards Board guidance, which prescribes a minimum probability threshold that a tax position must meet before a financial statement benefit is recognized. The minimum threshold is defined as a tax position that is more likely than not to be sustained upon examination by the applicable taxing authority, including resolution of any related appeals or litigation processes, based on the technical merits of the position. The tax benefit to be recognized is measured as the largest amount of benefit that is greater than 50% likely of being realized upon settlement. See Note 14 for information regarding changes in our unrecognized tax benefits during fiscal 2010.

Net Income per Share

Basic net income per share is computed by dividing net income available to common stockholders by the weighted average number of common shares outstanding during the period. At December 28, 2010, December 29, 2009 and December 30, 2008, 0.5 million, 0.6 million and 0.4 million shares, respectively, of restricted stock issued to employees were unvested, and therefore excluded from the calculation of basic earnings per share for each of the fiscal years ended on those dates. Diluted net income per share includes the dilutive effect of both outstanding stock options and restricted shares, calculated using the treasury stock method. Assumed proceeds from the in-the-money options include the windfall tax benefits, net of shortfalls, calculated under the as-if method as prescribed by FASB Accounting Standards Codification 718, Compensation Stock Option Compensation.

Table of Contents

| | 2010 | Fiscal Year 2009 (In thousands, except per share data) | | 2008 |
|--|-----------|--|----|--------|
| Net income | \$ 81,713 | \$ 42,833 | \$ | 52,293 |
| Basic weighted average shares outstanding | 58,905 | 59,362 | | 63,822 |
| Dilutive effect of stock options and restricted shares | 1,541 | 720 | | 187 |
| Diluted weighted average shares outstanding | 60,446 | 60,082 | | 64,009 |
| Basic net income per share | \$ 1.39 | \$ 0.72 | \$ | 0.82 |
| Diluted net income per share | \$ 1.35 | \$ 0.71 | \$ | 0.82 |

Shares of common stock equivalents of 4.4 million, 9.3 million and 9.2 million for fiscal 2010, 2009 and 2008, respectively, were excluded from the diluted calculation due to their anti-dilutive effect.

Comprehensive Income

Comprehensive income includes all changes in equity during a period except those resulting from investment by and distribution to owners. Comprehensive income reported on our consolidated statements of stockholders' equity consists of net income, the unrealized portion of changes in the fair value of our cash flow hedges, the losses reclassified into income due to cancellations of our cash flow hedges and unrealized gains or losses on available-for-sale securities.

Recent Accounting Pronouncements

In October 2009, the Financial Accounting Standards Board issued guidance on revenue arrangements with multiple deliverables effective for us in fiscal 2011, although early adoption is permitted. The guidance revises the criteria for measuring and allocating consideration to each component of a multiple element arrangement. The guidance requires companies to allocate revenue using the relative selling price of each deliverable, which must be estimated if the company does not have either a history of selling the deliverable on a stand alone basis or third-party evidence of selling price. For us, this guidance will only impact the pattern of revenue recognition for our marketing programs that include multiple elements. As the timing and content of future promotions is not determinable at this time, we are unable to estimate the impact of this guidance on our financial statements.

2. Other Receivables:

| Rent and related expenses | | 6,927 | | 6,764 |
| Other | | 17,648 | | 18,144 |
| Total | \$ | 170,054 | \$ | 166,513 |

7. Long-Term Debt:

Long-term debt consisted of (in thousands):

| | December 28, 2010 | December 29, 2009 |
|-----------------|-------------------|-------------------|
| Credit facility | \$ | \$ 100,000 |

In December 2010, we entered into a five-year credit agreement, (Facility) that provides us with revolving loan commitments that total \$200 million, including letter of credit subfacility commitments that total \$35 million. The Facility contains a commitment increase feature that could provide for an additional \$50 million in available credit upon our request and the satisfaction of certain conditions.

Table of Contents

Borrowings under the Facility bear interest at a floating rate based on LIBOR, plus a spread ranging from 1.75% to 2.25%, depending on our ratio of debt plus eight times rent (Adjusted Debt) to trailing 12-month earnings before interest, taxes, depreciation, amortization, rent and noncash stock option expense (EBITDAR), as defined in the agreement. In addition, we pay a commitment fee ranging from 0.3% to 0.4%, also depending on our ratio of Adjusted Debt to EBITDAR, calculated on the average unused portion of the Facility.

We are obligated to maintain certain financial covenants, which include a maximum Adjusted Debt to trailing 12-month EBITDAR ratio (Adjusted Debt Ratio) of 4.0, as well as a trailing 12-month minimum EBITDAR to interest and rental expense ratio (EBITDAR Ratio) of 1.9. At December 28, 2010, our Adjusted Debt and EBITDAR Ratios were 2.7 and 2.6, respectively. Therefore we were in compliance with the financial covenants in effect under the Facility at that date.

Availability under the Facility is reduced by outstanding standby letters of credit, which are used to support our self-insurance programs. As of December 28, 2010, we had net availability for borrowings of \$184 million, based upon outstanding debt of \$0 million and \$16 million in standby letters of credit. Since we have the contractual ability to maintain the outstanding balance on our Facility, the debt is classified as long-term on our consolidated balance sheets in 2009.

In conjunction with the entry into the new Facility, the Company terminated its prior credit facility dated April 2007, as amended March 2008 and January 2009.

8. Derivative Financial Instruments

During fiscal 2008 and 2007, we entered into several zero-cost interest rate collars that hedged interest rate variability on a portion of outstanding borrowings on our Facility. During fiscal 2010 and 2009, in conjunction with repayments on our Facility, we unwound our derivatives at a cost of \$7.4 million in each year. We had no derivative instruments outstanding at December 28, 2010. See Note 7 for further discussion of our long-term debt.

These derivatives qualified for hedge accounting as cash flow hedges and, accordingly, were recognized at fair value as either assets or liabilities on the consolidated balance sheets. Changes in fair value were recorded in accumulated other comprehensive income (AOCI) and subsequently reclassified into earnings when the related interest expense on the underlying borrowing was recognized. We do not hold any derivative financial instruments for trading or speculative purposes.

Changes in the fair value of our interest rate collars are expected to be perfectly effective in offsetting the variability in interest payments attributable to fluctuations in three-month LIBOR rates above the cap rates and below the floor rates specified in the respective agreements. If, at any time, an interest rate collar is determined to be ineffective, in whole or in part, due to modifications in the interest rate collar or the underlying credit facility, prospective changes in fair value of the portion of the derivative determined to be ineffective will be recognized as a gain or loss in the consolidated statements of operations.

The fair values and balance sheet locations of our derivatives were as follows (in thousands):

Edgar Filing: CHEESECAKE FACTORY INC - Form 10-K

| | December 28, 2010 | | Liability Derivatives | | December 29, 2009 | |
|-------------------------|------------------------------|------------|------------------------------|------------|------------------------|------------|
| | Balance Sheet Location | Fair Value | Balance Sheet Location | Fair Value | Balance Sheet Location | Fair Value |
| Interest rate contracts | Other accrued expenses | \$ | Other accrued expenses | \$ | 4,299 | |
| Interest rate contracts | Other noncurrent liabilities | | Other noncurrent liabilities | | 3,945 | |
| Total | | \$ | | \$ | 8,244 | |

We had no derivative financial instruments in asset positions at December 28, 2010 or December 29, 2009. See Note 9 for discussion of the methods used to determine fair value of our derivative financial instruments.

The effect of derivative instruments on our consolidated statements of operations was as follows (in thousands):

| | Gain/(Loss) Recognized in AOCI on Derivatives Fiscal Year | | Location of Gain/(Loss) Reclassified from AOCI into Income | Loss Reclassified from AOCI into Income (1) Fiscal Year | |
|-------------------------|--|--------|--|---|-------------|
| | 2010 | 2009 | | 2010 | 2009 |
| Interest rate contracts | \$ 41 | \$ 346 | Interest expense | \$ (9,638) | \$ (12,494) |

(1) Loss reclassified from AOCI into income during fiscal 2010 and 2009 included \$7.4 million of expense in each year to unwind our interest rate collars.
