Prospectus Supplement Summary Ratio of Earnings to Fixed Charges

The following disclosure is hereby added as footnote (2) under Ratios of Earnings to Fixed Charges on page S-31:

(2) The pro forma effect of using \$275 million of proceeds from the notes to pay down \$275 million of bank debt outstanding at March 31, 2014 results in our pro forma ratio of earnings to fixed charges to change by greater than 10% primarily from using a higher pro forma rate of interest than was actually incurred during those periods. The pro forma ratio of earnings to fixed charges for the three months ended March 31, 2014 and the year ended December 31, 2013 would have been 13.4 and 13.9, respectively.
