The accompanying notes are an integral part of the Consolidated Financial Statements.

Table of Contents

MEADOWBROOK INSURANCE GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

NOTE 1 – Summary of Significant Accounting Policies

Basis of Presentation and Management Representation

The consolidated financial statements include accounts, after elimination of intercompany accounts and transactions, of Meadowbrook Insurance Group, Inc. (the "Company" or "Meadowbrook"), its wholly owned subsidiary Star Insurance Company ("Star"), and Star's wholly owned subsidiaries, Savers Property and Casualty Insurance Company ("Savers"), Williamsburg National Insurance Company ("Williamsburg"), and Ameritrust Insurance Corporation ("Ameritrust"). The consolidated financial statements also include Meadowbrook, Inc., Crest Financial Corporation, and their respective subsidiaries. In addition, the consolidated financial statements also include ProCentury Corporation ("ProCentury") and its wholly owned subsidiaries. ProCentury's wholly owned subsidiaries consist of Century Surety Company ("Century") and its wholly owned subsidiary ProCentury Insurance Company ("PIC"). In addition, ProCentury Risk Partners Insurance Company, Ltd., is a wholly owned subsidiary of ProCentury. Star, Savers, Williamsburg, Ameritrust, Century, and PIC are collectively referred to as the Insurance Company Subsidiaries.

In the opinion of management, the consolidated financial statements reflect all normal recurring adjustments necessary to present a fair statement of the results for the interim period. Preparation of financial statements under generally accepted accounting principles ("GAAP") requires management to make estimates. Actual results could differ from those estimates. The results of operations for the three months ended March 31, 2013 are not necessarily indicative of the results expected for the full year. In addition, certain amounts in the 2012 financial statements have been reclassified to conform to the 2013 presentation as a result of adopting the new Accumulated Other Comprehensive guidance noted below.

These financial statements and the notes thereto should be read in conjunction with the Company's audited financial statements and accompanying notes included in its Annual Report on Form 10-K, as filed with the United States Securities and Exchange Commission, for the fiscal year ended December 31, 2012.

Revenue Recognition

Premiums written, which include direct, assumed and ceded amounts are recognized as earned on a pro rata basis over the life of the policy term. Unearned premiums represent the portion of premiums written that are applicable to the unexpired terms of policies in force. Provisions for unearned premiums on reinsurance assumed from others are made on the basis of ceding reports when received and actuarial estimates.

Table of Contents

MEADOWBROOK INSURANCE GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Assumed premium estimates include business where the company accepts a portion of the risk from a ceding carrier as well as the mandatory assumed pool business from the National Council on Compensation Insurance (“NCCI”), or residual market business. The majority of the assumed premium is from an established book of workers’ compensation business produced by a ceding company in which the Company has an equity stake.

Fee income, which includes risk management consulting, loss control, and claims services, is recognized during the period the services are provided. Depending on the terms of the contract, claims processing fees are recognized as revenue over the estimated life of the claims, or the estimated life of the contract. For those contracts that provide services beyond the expiration or termination of the contract, fees are deferred in an amount equal to management’s estimate of the Company’s obligation to continue to provide services in the future.

Commission income, which includes reinsurance placement, is recorded on the later of the effective date or the billing date of the policies on which they were earned. Commission income is reported net of any sub-producer commission expense. Commission adjustments that occur subsequent to the issuance of the policy because of cancellation, typically are recognized when the policy is effectively cancelled. Profit sharing commissions from insurance companies are recognized when determinable, which is when such commissions are received.

Income Taxes

As of March 31, 2013 and December 31, 2012, the Company did not have any unrecognized tax benefits. As of March 31, 2013 and December 31, 2012, the Company had no accrued interest or penalties related to uncertain tax positions.

Recent Accounting Pronouncements

Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive

In February 2013, the FASB issued guidance to improve the reporting of reclassifications out of accumulated other comprehensive income. The guidance requires an entity to report the effect of significant reclassifications out of accumulated other comprehensive income on the respective line items in net income if the amount being reclassified is required under GAAP to be reclassified in its entirety to net income. For other amounts that are not required under GAAP to be reclassified in their entirety to net income in the same reporting period, an entity is required to cross-reference other disclosures required under GAAP that provide additional detail about those amounts. The guidance is to be applied prospectively for reporting periods beginning after December 15, 2012. The Company adopted this new guidance on January 1, 2013 and included the required disclosures in note 10 ~ Accumulated Other Comprehensive Income.

Proceeds from the sales of debt and equity securities available for sale were $6.5 million and $10.8 million for the three months ended March 31, 2013 and 2012, respectively.

Table of Contents

MEADOWBROOK INSURANCE GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

At March 31, 2013, the amortized cost and estimated fair value of available for sale debt securities by contractual maturity are shown below. Expected maturities may differ from contractual maturities, because certain borrowers may have the right to call or prepay obligations with or without call or prepayment penalties (in thousands):

	Available for Sale	
	Amortized Cost	Estimated Fair Value
Due in one year or less	$ 46,685	$ 47,239
Due after one year through five years	365,358	383,453
Due after five years through ten years	600,492	639,123
Due after ten years	229,538	233,289
Mortgage-backed securities, collateralized obligations and asset-backed securities	187,927	193,849
	$ 1,430,000	$ 1,496,953

Net investment income for the three months ended March 31, 2013 and 2012 was as follows (in thousands):

	For the Three Months Ended March 31,	
	2013	2012
Net Investment Income Earned From:		
Debt securities	$ 10,688	$ 13,293
Equity securities	620	505
Cash and cash equivalents	194	275
Total gross investment income	11,502	14,073
Less investment expenses	362	341
Net investment income	$ 11,140	$ 13,732

Other-Than-Temporary Impairments of Securities and Unrealized Losses on Investments

Available for sale securities are reviewed for declines in fair value, excluding other-than-temporary declines. For a debt security, if the Company intends to sell a security and it is more likely than not that the Company will be required to sell a debt security before recovery of its amortized cost basis and the fair value of the debt security is below amortized cost, the Company concludes that an OTTI has occurred and the amortized cost is written down to current fair value, with a corresponding charge to realized loss in the Consolidated Statements of Income. If the Company does not intend to sell a debt security and it is not more likely than not that the Company will be required to sell a debt security before recovery of its amortized cost basis, but the present value of the cash flows expected to be collected is less than the amortized cost of the debt security (referred to as the credit loss), the Company concludes that an OTTI has occurred. In this instance, accounting guidance requires the bifurcation of the total OTTI into the amount related to the credit loss, which is recognized in earnings, and the non-credit OTTI, which is recorded in Other Comprehensive Income as an unrealized non-credit OTTI in the Consolidated Statements of Comprehensive Income.

Table of Contents

MEADOWBROOK INSURANCE GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

When assessing the Company's intent to sell a debt security, if it is more likely than not that the Company will be required to sell a debt security before recovery of its cost basis, facts and circumstances such as, but not limited to, decisions to reposition the security portfolio, sales of securities to meet cash flow needs and sales of securities to capitalize on favorable pricing, are evaluated. In order to determine the amount of the credit loss for a debt security, the Company calculates the recovery value by performing a discounted cash flow analysis based on the current cash flows and future cash flows expected to be recovered. The discount rate is the effective interest rate implicit in the underlying debt security upon issuance. The effective interest rate is the original yield or the coupon if the debt security was previously impaired. If an OTTI exists and there is not sufficient cash flows or other information to determine a recovery value of the security, the Company concludes the entire OTTI is credit-related and the amortized cost for the security is written down to current fair value with a corresponding charge to realized loss in the Consolidated Statements of Income.

To determine the recovery period of a debt security, the Company considers the facts and circumstances surrounding the underlying issuer including, but not limited to, the following:

- Historical and implied volatility of the security;
- Length of time and extent to which the fair value has been less than amortized cost;
- Conditions specifically related to the security such as default rates, loss severities, loan to value ratios, current levels of subordination, third party guarantees, and vintage;
- Specific conditions in an industry or geographic area;
- Any changes to the rating of the security by a rating agency;
- Failure, if any, of the issuer of the security to make scheduled payments; and/or
- Recoveries or additional declines in fair value subsequent to the balance sheet date.

In periods subsequent to the recognition of an OTTI, the security is accounted for as if it had been purchased on the measurement date of the OTTI. Therefore, for a fixed maturity security, the discount or reduced premium is reflected in net investment income over the contractual term of the investment in a manner that produces a constant effective yield.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

For an equity security, if the Company does not have the ability and intent to hold the security for a sufficient period of time to allow for a recovery of the cost of the security in value, the Company concludes that an OTTI has occurred, and the cost of the equity security is written down to the current fair value, with a corresponding charge to realized loss within the Consolidated Statements of Income. When assessing the Company's ability and intent to hold the equity security to recovery of the cost of the security, the Company considers, among other things, the severity and duration of the decline in fair value of the equity security, as well as the cause of decline, a fundamental analysis of the liquidity, business prospects and overall financial condition of the issuer.

The Company reviewed its investment portfolio in relation to its OTTI policy and determined that the Company did not record a credit related OTTI loss or recognize a non-credit related OTTI loss in other comprehensive income for the three months ended March 31, 2013 and 2012.

The fair value and amount of unrealized losses segregated by the time period the investment has been in an unrealized loss position were as follows (in thousands):

NOTE 3 – Fair Value Measurements

According to accounting guidance for fair value measurements and disclosures, fair value is the price that would be received in the sale of an asset or would be paid in the transfer of a liability (i.e., the "exit price") in an orderly transaction between market participants at the measurement date. The guidance establishes a three-level hierarchy for fair value measurements that distinguishes between market participant assumptions based on market data obtained from sources independent of the reporting entity ("observable inputs") and the reporting entity's own assumptions about market participant assumptions developed based on the best information available in the circumstances ("unobservable inputs").

Table of Contents

MEADOWBROOK INSURANCE GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

The estimated fair values of the Company's fixed investment portfolio are based on prices provided by a third party pricing service and a third party investment manager. The prices provided by these services are based on quoted market prices, when available, non-binding broker quotes, or matrix pricing. The third party pricing service and the third party investment manager provide a single price or quote per security and the Company has not historically adjusted security prices. The Company obtains an understanding of the methods, models and inputs used by the third party pricing service and the third party investment manager, and has controls in place to validate that amounts provided represent fair values. The Company's control process includes, but is not limited to, initial and ongoing evaluation of the methodologies used, a review of specific securities and an assessment for proper classification within the fair value hierarchy. The hierarchy level assigned to each security in the Company's available for sale portfolio is based upon its assessment of the transparency and reliability of the inputs used in the valuation as of the measurement date. The three hierarchy levels are defined as follows:

Level 1 – Valuations that are based on unadjusted quoted prices in active markets for identical securities. The fair value of exchange-traded preferred and common equities, and mutual funds included in the Level 1 category were based on quoted prices that are readily and regularly available in an active market. The fair value measurements that were based on Level 1 inputs comprise 4.9% of the fair value of the total investment portfolio.

Level 2 – Valuations that are based on observable inputs (other than Level 1 prices) such as quoted prices for similar assets at the measurement date; quoted prices in markets that are not active; or other inputs that are observable, either directly or indirectly. The fair value of securities included in the Level 2 category were based on the market values obtained from a third party pricing service that were evaluated using pricing models that vary by asset class and incorporate available trade, bid and other observable market information. The third party pricing service monitors market indicators, as well as industry and economic events. The Level 2 category includes corporate bonds, government and agency bonds, asset-backed, residential mortgage-backed and commercial mortgage-backed securities and municipal bonds. The fair value measurements that were based on Level 2 inputs comprise 94.8% of the fair value of the total investment portfolio.

Level 3 – Valuations that are derived from techniques in which one or more of the significant inputs are unobservable and/or involve management judgment and/or are based on non-binding broker quotes. The fair value measurements that were based on Level 3 inputs comprise 0.3% of the fair value of the total investment portfolio.

For corporate, government and municipal bonds, the third party pricing service utilizes a pricing model with standard inputs that include benchmark yields, reported trades, issuer spreads, two-sided markets, benchmark securities, market bids/offers, and other reference data observable in the marketplace. The model uses the option adjusted spread methodology and is a multi-dimensional relational model. All bonds valued under these techniques are classified as Level 2.

Table of Contents

MEADOWBROOK INSURANCE GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

For asset-backed, residential mortgage-backed and commercial mortgage-backed securities, the third party pricing service valuation methodology includes consideration of interest rate movements, new issue data, monthly remittance reports and other pertinent data that is observable in the marketplace. This information is used to determine the cash flows for each tranche and identifies the inputs to be used such as benchmark yields, prepayment assumptions and collateral performance. All asset-backed, residential mortgage-backed and commercial mortgage-backed securities valued under these methods are classified as Level 2.

Also included in Level 2 valuation are interest rate swap agreements the Company utilizes to hedge the floating interest rate on its debt, thereby changing the variable rate exposure to a fixed rate exposure for interest on these obligations. The estimated fair value of the interest rate swaps is obtained from the third party financial institution counterparties and measured using discounted cash flow analysis that incorporates significant observable inputs, including the LIBOR forward curve, derivative counterparty spreads, and measurements of volatility.

The Level 3 securities consist of 19 securities totaling $5.3 million or 0.3% of the total investment portfolio. These primarily represent asset-backed securities and corporate debt securities that have a principal protection feature supported by a U.S. Treasury strip. To fair value these securities, the third party investment manager uses a combination of methods. Non-binding broker/dealer quotes are used on 2 holdings. Benchmarking techniques based upon industry sector, rating and other factors are used on 17 holdings.

Also included in Level 3 valuation are the conversion feature within the Notes (as defined below) and the convertible senior notes hedge. The estimated fair values of the both the conversion feature and the convertible senior notes hedge are obtained from the third party financial institution counterparties valued using non-binding broker quotations and significant unobservable inputs.

Table of Contents

MEADOWBROOK INSURANCE GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

There were no credit losses for the period included in earnings attributable to the change in unrealized losses on Level 3 assets still held at the reporting date.

The Company's policy on recognizing transfers between hierarchy levels is applied at the end of a reporting period. During the quarter ended March 31, 2013, no transfers into or out of Levels 1, 2 and 3 were required. During the quarter ended March 31, 2012, there was one asset-backed security transferred into Level 3 from Level 2 as fair value was no longer determined using market inputs that could be directly or indirectly observable.

NOTE 4 – Debt

Credit Facilities

On August 29, 2012, the Company executed $130.0 million in senior credit facilities (the "Credit Facilities"). The Credit Facilities include a $30.0 million term loan facility and a $100.0 million revolving credit facility.

The term loan facility has a four year term with a $30.0 million borrowing limit, which, subject to certain exceptions, can be increased up to an additional $25.0 million. As of March 31, 2013, the outstanding balance on its term loan facility was $27.0 million. The Company had $20.0 million outstanding under its revolving credit facility as of March 31, 2013, and $0.5 million in letters of credit had been issued as of March 31, 2013. The undrawn portion of the revolving credit facility, which was $79.5 million as of March 31, 2013, is available to finance working capital and for other general corporate purposes, including but not limited to, surplus contributions to its Insurance Company Subsidiaries to support premium growth or strategic acquisitions. These Credit Facilities replaced the Company's former term loan and revolving credit agreement, which were terminated upon the closing of the Credit Facilities. At December 31, 2012, the Company had an outstanding balance of $28.5 million on its term loan and a $20.0 million outstanding balance on its revolving credit facility. There was $0.5 million in letters of credit that had been issued as of December 31, 2012.

The principal amount outstanding under the Credit Facilities provides for interest at either the Alternative Base Rate ("ABR") or the London interbank offered rate ("LIBOR"). ABR borrowings under the Agreement will bear interest at the greatest of (a) the Administrative Agent's prime rate, (b) the federal funds effective rate plus 0.5%, or (c) the adjusted LIBOR for a one-month period plus 1.0%, in each case, plus a margin that is adjusted on the basis of Company's consolidated leverage ratio. Eurodollar borrowings under the Agreement will bear interest at the adjusted LIBOR for the interest period in effect plus a margin that is adjusted on the basis of Company's consolidated leverage ratio. In addition, the Credit Facilities provide for an unused facility fee ranging between twenty basis points and thirty basis points, based on the Company's consolidated leverage ratio as defined by the Credit Facilities. At March 31, 2013, the interest rate on the Company's term loan was 2.72%, which consisted of a weighted fixed rate of 0.72%, plus an applicable margin of 2.00%, as described in Note 5 ~ Derivative Instruments. At March 31, 2013, the interest rate on the Company's revolving credit facility was 0.31%, plus a 2.00% margin.

Table of Contents

MEADOWBROOK INSURANCE GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

The financial covenants applicable to the Credit Facilities consist of: (1) minimum consolidated net worth starting at $473.9 million, (2) minimum Risk Based Capital Ratio for Star of 1.50 to 1.00 and all other Insurance Company Subsidiaries of 1.75 to 1.00, (3) maximum permitted consolidated leverage ratio of 0.35 to 1.00, (4) minimum consolidated fixed charge coverage ratio of 1.25 to 1.00, and (5) minimum A.M. Best rating of "B++." As of March 31, 2013, the Company was in compliance with these debt covenants.

During 2011, several of the Insurance Company Subsidiaries (Star, Williamsburg, and Ameritrust) became members of the Federal Home Loan Bank of Indianapolis ("FHLBI"). As a member of the FHLBI, these subsidiaries have the ability to borrow on a collateralized basis at relatively low borrowing rates providing a source of liquidity. As of March 31, 2013, the Company had borrowed $30.0 million from the FHLBI after pledging as collateral residential mortgage-backed securities ("RMBS") having a carrying value of $31.0 million, and making a FHLBI common stock investment of approximately $1.6 million. The Company has the ability to increase its borrowing capacity through purchasing additional investments in FHLBI and pledging additional securities. The Company retains all the rights regarding the collateralized RMBS.

Debentures

The following table summarizes the principal amounts and variables associated with the Company's debentures (in thousands):

Year of Issuance	Description	Year Callable	Year Due	Interest Rate Terms	Interest Rate at March 31, 2013 (1)		Principal Amount
2003	Junior subordinated debentures	2008	2033	Three-month LIBOR, plus 4.05%	4.33	%	$ 10,310
2004	Senior debentures	2009	2034	Three-month LIBOR, plus 4.00%	4.29	%	13,000
2004	Senior debentures	2009	2034	Three-month LIBOR, plus 4.20%	4.49	%	12,000
2005	Junior subordinated debentures	2010	2035	Three-month LIBOR, plus 3.58%	3.86	%	20,620
	Junior subordinated debentures (2)	2007	2032	Three-month LIBOR, plus 4.00%	4.29	%	15,000
	Junior subordinated debentures (2)	2008	2033	Three-month LIBOR, plus 4.10%	4.39	%	10,000
					Total		$ 80,930

(1) The underlying three-month LIBOR rate varies as a result of the interest rate reset dates used in determining the three-month LIBOR rate, which varies for each long-term debt item each quarter.

(2) Represents the junior subordinated debentures acquired in conjunction with the ProCentury Merger on July 31, 2008.

19

MEADOWBROOK INSURANCE GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Excluding the junior subordinated debentures acquired in conjunction with the ProCentury Merger, the Company received a total of $53.3 million in net proceeds from the issuances of the above long-term debt, of which $26.2 million was contributed to the surplus of its Insurance Company Subsidiaries and the remaining balance was used for general corporate purposes. Associated with the issuance of the above long-term debt, the Company incurred approximately $1.7 million in issuance costs for commissions paid to the placement agents in the transactions.

The issuance costs associated with these debentures have been capitalized and are included in other assets on the balance sheet. As of June 30, 2007, these issuance costs were being amortized over a seven year period as a component of interest expense. The seven year amortization period represented management's best estimate of the estimated useful life of the bonds related to both the senior debentures and junior subordinated debentures. Beginning July 1, 2007, the Company reevaluated its best estimate and determined a five year amortization period to be a more accurate representation of the estimated useful life. Therefore, this change in amortization period from seven years to five years has been applied prospectively beginning July 1, 2007.

The junior subordinated debentures issued in 2003 and 2005 were issued in conjunction with the issuance of $10.0 million and $20.0 million in mandatory redeemable trust preferred securities to a trust formed by an institutional investor from the Company's unconsolidated subsidiary trusts, Meadowbrook Capital Trust I and Meadowbrook Capital Trust II, respectively.

The junior subordinated debentures acquired in the ProCentury Merger were issued in conjunction with the issuance of $15.0 million and $10.0 million in floating rate trust preferred securities to a trust formed from the Company's unconsolidated trust, ProFinance Statutory Trust I and ProFinance Statutory Trust II. The Company also acquired the remaining unamortized portion of the capitalized issuance costs associated with these debentures. The remaining unamortized portion of the issuance costs acquired was $625,000. These issuance costs are included in other assets on the balance sheet. The remaining balance is being amortized over a five year period beginning August 1, 2008, as a component of interest expense.

The junior subordinated debentures are unsecured obligations of the Company and are junior to the right of payment to all senior indebtedness of the Company. The Company has guaranteed that the payments made to the four trusts mentioned above will be distributed to the holders of the respective trust preferred securities.

The Company estimates that the fair value of the above mentioned junior subordinated debentures and senior debentures issued approximate the gross proceeds of cash received at the time of issuance.

MEADOWBROOK INSURANCE GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Cash Convertible Senior Notes

On March 18, 2013, the Company issued $100.0 million of 5.0% cash convertible senior notes (the “Notes”), which mature on March 15, 2020. Interest on the Notes is payable semi-annually in arrears on March 15 and September 15 of each year, commencing September 15, 2013. Until the close of business on the second scheduled trading day immediately preceding the maturity date, holders may convert their Notes solely into cash at any time on or after September 15, 2019 or earlier under certain circumstances determined by: (i) the market price of the Company’s stock, (ii) the trading price of the Notes, or (iii) the occurrence of specified corporate transactions. The notes are not convertible into Meadowbrook common stock or any other securities under any circumstances. The initial conversion rate is 108.8732 shares of common stock per $1,000 principal amount of the Notes (equivalent to an initial conversion price of approximately $9.18 per share), subject to adjustment upon the occurrence of certain events. Additionally, in the event of a fundamental change, the holders may require the Company to repurchase the Notes for a cash price equal to 100% of the principal, plus any accrued and unpaid interest. The proceeds from the issuance of the Notes were bifurcated into a debt component and an embedded conversion option component.

Due to the bifurcation, the debt component reflects an original issue discount (“OID”) of $12.9 million. The OID and deferred issuance costs of $3.6 million will be amortized into interest expense over the term of the Notes. After considering the contractual interest payments and amortization of the OID, the Notes’ effective interest rate is 7.4%. Interest expense, including amortization of deferred issuance costs, recognized on the Notes was $244,000 for the period ended March 31, 2013.

The following table shows the amounts recorded for the debt component of the Notes as of March 31, 2013 (in thousands):

Outstanding principal	$100,000
Unamortized OID	(12,890)
Total debt component	$87,110

As the conversion feature is structured under the cash settlement method, the embedded conversion option is reported as a derivative liability.

In connection with the offering of the Notes, the Company also entered into cash convertible senior notes hedge transactions (the “Note Hedges”) and warrant transactions (the “Warrants”) with respect to its common stock with certain counter-parties. Upon conversion, the Note Hedges are intended to offset potential cash payments in excess of the principal of the Notes. The Note Hedges and Warrants are separate transactions, entered into by the Company with certain counter-parties and are not part of the terms of the Notes.

Table of Contents

MEADOWBROOK INSURANCE GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

The Company paid $12.9 million for the Note Hedges, which are exercisable upon conversion of the Notes. The Note Hedges are structured under the cash settlement method and are accounted for as a derivative asset.

The Company received $3.0 million for the warrants sold to certain counter-parties. The warrants have a strike price of $11.69 and will be net share settled; meaning the Company will issue a number of shares per warrant corresponding to the difference between its share price on each warrant exercise date and the exercise price. The warrants meet the definition of derivatives under the guidance in ASC 815; however, because these instruments have been determined to be indexed to the Company's own stock and meet the criteria for equity classification under ASC 815-40, the warrants have been accounted for as an adjustment to the Company's paid-in-capital.

If the market value per share of the Company's common stock exceeds the strike price of the warrants, the warrants will have a dilutive effect on the Company's net income per share and the Company will use the "treasury stock" method in calculating the dilutive effect on earnings per share.

NOTE 5 – Derivative Instruments

The Company has entered into interest rate swap transactions to mitigate its interest rate risk on its existing debt obligations. These interest rate swap transactions have been designated as cash flow hedges and are deemed highly effective hedges. These interest rate swap transactions are recorded at fair value on the balance sheet and the effective portion of the changes in fair value are accounted for within other comprehensive income. The interest differential to be paid or received is accrued and recognized as an adjustment to interest expense.

The following table summarizes the rates and amounts associated with the Company's interest rate swaps (in thousands):

Effective Date	Expiration Date	Debt Instrument	Counterparty Interest Rate Terms	Fixed Rate		Fixed Amount at March 31, 2013
4/23/2008	6/30/2013	Junior subordinated debentures (1)	Three-month LIBOR, plus 4.05%	8.020	%	$ 10,000
4/29/2008	4/29/2013	Senior debentures (1)	Three-month LIBOR, plus 4.00%	7.940	%	13,000
9/28/2012	8/30/2016	Term loan (2)	Three-month LIBOR	0.724	%	27,000
8/15/2008	8/15/2013	Junior subordinated debentures (1)(3)	Three-month LIBOR	3.780	%	10,000
9/4/2008	9/4/2013	Junior subordinated debentures (1)(3)	Three-month LIBOR	3.790	%	15,000
9/8/2010	5/24/2016	Senior debentures	Three-month LIBOR, plus 4.20%	6.248	%	5,000
9/16/2010	9/15/2015	Junior subordinated debentures	Three-month LIBOR, plus 3.58%	6.160	%	10,000
9/16/2010	9/15/2015	Junior subordinated debentures	Three-month LIBOR, plus 3.58%	6.190	%	10,000

MEADOWBROOK INSURANCE GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

(1) During the quarter ended June 30, 2012, the Company entered into four forward starting interest rate swaps. The swaps will replace the identified interest rate swap, upon their expiration in 2013. The fixed rates on the forward starting interest rate swaps are approximately 150 basis points less than the fixed rates on the current swaps in place. Additionally, the forward starting interest rate swaps will expire ten years from the effective date.

(2) The Company is required to make fixed rate interest payments on the current balance of the term loan, amortizing in accordance with the term loan amortization schedule. The Company fixed only the variable interest portion of the loan. The actual interest payments associated with the term loan also include an additional rate of 2.00% in accordance with the Credit Facilities.

(3) The Company fixed only the variable interest portion of the debt. The actual interest payments associated with the debentures also include an additional rate of 4.10% and 4.00% on the $10.0 million and $15.0 million debentures, respectively.

In relation to the above interest rate swaps, the net interest expense incurred for the three months ended March 31, 2013 and 2012, was approximately $0.6 million and $0.8 million, respectively.

As of March 31, 2013 and December 31, 2012, the total fair value of the interest rate swaps were unrealized losses of $3.3 million and $4.5 million, respectively. At March 31, 2013 and December 31, 2012, accumulated other comprehensive income included accumulated loss on the cash flow hedge, net of taxes, of approximately $2.1 million and $2.9 million, respectively.

In March 2012, the Company replaced its existing $5.6 million convertible note and $664,000 demand note receivables with an unaffiliated insurance agency into new debt instruments with a related limited liability company. The new instruments were effective January 1, 2012 and consist of a $2 million convertible note and a $4.2 million term loan. The interest rate on the convertible note is 3% and is due on January 1, 2022. This note is convertible at the option of the Company based upon a pre-determined formula. The interest rate on the term loan is 5.5% and is due on April 30, 2016. As security for the note and term loan, the borrower granted the Company a first lien on all of its accounts receivable, cash, general intangibles, and other assets. As additional collateral for the note and term loan, the Company obtained guaranties of payment and performance from certain affiliated companies of the borrower, as well as related individuals, which guaranties are secured by additional collateral.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Cash Convertible Senior Notes and Note Hedges

As discussed in Note 4 ~ Debt, the Company issued the Notes. Holders may convert their cash convertible notes subject to certain conversion provisions. In order to offset the risk associated with the cash conversion feature, the Company entered into convertible note hedges with certain counterparties. Both the cash conversion feature and the purchased convertible note hedges are measured at fair value with gains and losses recorded in the Company's Consolidated Statements of Income.

NOTE 6 – Restricted and Non-Restricted Stock Awards

On February 23, 2011 and 2010, the Company issued 28,500 and 202,500 restricted stock awards, respectively, to executives of the Company, out of its 2002 Amended and Restated Stock Option Plan (the "Plan"). No restricted stock awards were issued in 2012 or 2013. The restricted stock awards vest over a four year period, with the first twenty percent vesting immediately on the date issued (i.e., February 23) and the remaining eighty percent vesting annually on a straight line basis over the requisite four year service period. The unvested restricted stock awards are subject to forfeiture in the event the employee is terminated for "Good Cause" or voluntarily resigns their employment without "Good Reason" as provided for in the employee's respective employment agreements. The Company recorded approximately $81,000 and $46,000 of restricted stock awards compensation expense for the three months ended March 31, 2013 and 2012, respectively.

On February 13, 2013, and February 23, 2012 the Company issued 2,400 and 1,500 non-restricted stock awards, respectively, to members of the Board of Directors, which vested immediately. The Company recorded approximately $137,000 and $148,500 of non-restricted stock awards compensation expense for the three months ended March 31, 2013 and 2012, respectively.

NOTE 7 – Shareholders' Equity

At March 31, 2013, shareholders' equity was $565.5 million, or a book value of $11.33 per common share, compared to $558.3 million, or a book value of $11.22 per common share, at December 31, 2012.

On October 28, 2011, the Company's Board of Directors approved a Share Repurchase Plan authorizing management to purchase up to 5.0 million shares of the Company's common stock in market transactions for a period not to exceed twenty-four months. For the three months ended March 31, 2013, there were no share repurchases. For the three months ended March 31, 2012, the Company purchased and retired approximately 0.5 million shares of common stock for a total cost of approximately $5.0 million.

MEADOWBROOK INSURANCE GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

For the three months ended March 31, 2013, the Company had $1.0 million of cash dividends payable on April 4, 2013. For the three months ended March 31, 2012, cash dividends payable to common shareholders totaled $2.5 million.

On April 26, 2013, the Company's Board of Directors declared a quarterly dividend of $0.02 per common share. The dividend is payable on May 28, 2013, to shareholders of record as of May 10, 2013.

When evaluating the declaration of a dividend, the Company's Board of Directors considers a variety of factors, including but not limited to, cash flow, liquidity needs, results of operations, industry conditions, and our overall financial condition. As a holding company, the ability to pay cash dividends is partially dependent on dividends and other permitted payments from its Insurance Company Subsidiaries.

NOTE 8 – Earnings Per Share

Basic earnings per share are based on the weighted average number of common shares outstanding during the year, while diluted earnings per share includes the weighted average number of common shares and potential dilution from shares issuable pursuant to stock awards using the treasury stock method.

The following table is a reconciliation of the income and share data used in the basic and diluted earnings per share computations for the three months ended March 31 (in thousands, except per share amounts):

	For the Three Months Ended March 31,	
	2013	2012
Net income	$ 7,082	$ 8,104
Common shares:		
Basic		
Weighted average shares outstanding	49,823,882	50,915,145
Diluted		
Weighted average shares outstanding	49,823,882	50,915,145
Dilutive effect of:		
Share awards under long term incentive plan	21,141	6,320
Total	49,845,023	50,921,465
Net income per common share		
Basic	$ 0.14	$ 0.16
Diluted	$ 0.14	$ 0.16

NOTE 9 – Commitments and Contingencies

The Company, and its subsidiaries, are subject at times to various claims, lawsuits and proceedings relating principally to alleged errors or omissions in the placement of insurance, claims administration, consulting services and other business transactions arising in the ordinary course of business. Where appropriate, the Company vigorously defends such claims, lawsuits and proceedings. Some of these claims, lawsuits and proceedings seek damages, including consequential, exemplary or punitive damages, in amounts that could, if awarded, be significant. Most of the claims, lawsuits and proceedings arising in the ordinary course of business are covered by the policy at issue, errors and omissions insurance or other appropriate insurance. In terms of any retentions or deductibles associated with such insurance, the Company has established accruals for such retentions or deductibles, when necessary, based upon currently available information. In accordance with accounting guidance, if it is probable that an asset has been impaired or a liability has been incurred as of the date of the financial statements and the amount of loss is estimable; then an accrual for the costs to resolve these claims is recorded by the Company in the accompanying consolidated balance sheets. Period expenses related to the defense of such claims are included in the accompanying consolidated statements of income. Management, with the assistance of outside counsel, adjusts such provisions according to new developments or changes in the strategy in dealing with such matters. On the basis of current information, the Company does not expect the outcome of the claims, lawsuits and proceedings to which the Company is subject, either individually, or in the aggregate, to have a material adverse effect on the Company's financial condition. However, it is possible that future results of operations or cash flows for any particular quarter or annual period could be materially affected by an unfavorable resolution of any such matters.

NOTE 10 – Accumulated Other Comprehensive Income

The Company's comprehensive income includes net earnings plus unrealized gain or loss on available-for-sale investment securities, net of tax. In reporting comprehensive earnings on a net basis in the income statement, we used a 35 percent tax rate. The following table illustrates the amounts reclassified from accumulated other comprehensive income:

Reclassifications out of accumulated other comprehensive income: Period Ended March 31, 2013 (in thousands)

Details about accumulated other comprehensive income components	Amount reclassified from accumulated other comprehensive income		Affected line item in the statement where net income is presented
Unrealized gain or loss on available for sale securities			
	$	288	Net realized gains
		(101)	Tax expense
	$	187	Net of tax

Reclassifications out of accumulated other comprehensive income: Period Ended March 31, 2012 (in thousands)

Details about accumulated other comprehensive income components	Amount reclassified from accumulated other comprehensive income		Affected line item in the statement where net income is presented
Unrealized gain or loss on available for sale securities			
	$	711	Net realized gains
		(249)	Tax expense
	$	462	Net of tax

ITEM 2.MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

For the Periods ended March 31, 2013 and 2012

Forward-Looking Statements

This quarterly report may provide information including certain statements which constitute forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These include statements regarding the intent, belief, or current expectations of management, including, but not limited to, those statements that use the words "believes," "expects," "anticipates," "estimates," or similar expressions. You are cautioned that any such forward-looking statements are not guarantees of future performance and involve a number of risks and uncertainties, and results could differ materially from those indicated by such forward-looking statements. Among the important factors that could cause actual results to differ materially from those indicated by such forward-looking statements are: actual loss and loss adjustment expenses exceeding our reserve estimates; competitive pressures in our business; the failure of any of the loss limitation methods we employ; our geographic concentration and the business, economic, natural perils, man made perils, and regulatory conditions within our most concentrated region; our ability to appropriately price the risks we underwrite; goodwill impairment risk employed as part of our growth strategy; a decrease in our A.M. Best rating; increased risks or reduction in the level of our underwriting commitments due to market conditions; a failure of our reinsurers to pay losses in a timely fashion, or at all; interest rate changes; continued difficult conditions in the global capital markets and the economy generally; market and credit risks affecting our investment portfolio; liquidity requirements forcing us to sell our investments; a failure to introduce new products or services to keep pace with advances in technology; the new federal financial regulatory reform; our holding company structure and regulatory constraints restricting dividends or other distributions by our Insurance Company Subsidiaries; minimum capital and surplus requirements imposed on our Insurance Company Subsidiaries; a failure of additional capital to be available or only available on unfavorable terms; acquisitions and integration of acquired businesses resulting in operating difficulties, which may prevent us from achieving the expected benefits; our reliance upon producers, which subjects us to their credit risk; loss of one of our core selected producers; our dependence on the continued services and performance of our senior management and other key personnel; our reliance on our information technology and telecommunications systems; managing technology initiatives and obtaining the efficiencies anticipated with technology implementation; a failure in our internal controls; the cyclical nature of the property and casualty insurance industry; severe weather conditions and other catastrophes; the effects of litigation; state regulation; and assessments imposed upon our Insurance Company Subsidiaries to provide funds for failing insurance companies. For additional information with respect to certain of these and other factors, refer to the "Risk Factors" section contained in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2012 and subsequent filings made with the United States Securities and Exchange Commission. We are not under any obligation to (and expressly disclaim any obligation to) update or alter our forward-looking statements, whether as a result of new information, future events or otherwise.

Table of Contents

Business Overview

We are a specialty niche focused commercial insurance underwriter and insurance administration services company. We market and underwrite specialty property and casualty insurance programs and products on both an admitted and non-admitted basis through a broad and diverse network of independent retail agents, wholesalers, program administrators and general agents, who value service, specialized knowledge, and focused expertise. Program business refers to an aggregation of individually underwritten risks that have some unique characteristic and are distributed through a select group of agents. We seek to combine profitable underwriting, income from our net commissions and fees, investment returns and efficient capital management to deliver consistent long-term growth in shareholder value.

Through our retail property and casualty agencies, we also generate commission revenue, which represents 2.4% of our total consolidated revenues. Our agencies are located in Michigan, California, Massachusetts, and Florida and produce commercial, personal lines, life and accident and health insurance that is placed primarily with unaffiliated insurance carriers. These agencies are a minimal source of business for our Insurance Company Subsidiaries.

We recognize revenue related to the services and coverages within the following categories: net earned premiums, management administrative fees, claims fees, commission revenue, net investment income, and net realized gains (losses).

We compete in the specialty insurance market. Our wide range of specialty niche insurance expertise allows us to accommodate a diverse distribution network ranging from specialized program agents to insurance brokers. In the specialty market, competition tends to place considerable focus on availability, service and other tailored coverages in addition to price. Moreover, our broad geographical footprint enables us to function with a local presence on both a regional and national basis. We also have the capacity to write specialty insurance in both the admitted and non-admitted markets. These unique aspects of our business model enable us to compete on factors other than price.

Recent Developments

On April 19, 2013, A.M. Best Company (“A.M. Best”) announced it had removed the ‘under review’ status and affirmed the financial strength rating and issuer credit rating of our Insurance Company Subsidiaries and our issuer credit rating. A.M. Best had previously announced in October 2012 that they had put the financial strength rating and issuer credit rating of our Insurance Company Subsidiaries and our issuer credit rating under review with negative implications. Our Insurance Company Subsidiaries are rated “A-” (Excellent) by A.M. Best.

Table of Contents

Critical Accounting Policies

In certain circumstances, we are required to make estimates and assumptions that affect amounts reported in our consolidated financial statements and related footnotes. We evaluate these estimates and assumptions periodically on an on-going basis based on a variety of factors. There can be no assurance, however, that actual results will not be materially different than our estimates and assumptions, and that reported results of operation will not be affected by accounting adjustments needed to reflect changes in these estimates and assumptions. The accounting estimates and related risks described in our Annual Report on Form 10-K, as filed with the United States Securities and Exchange Commission on March 8, 2013, are those that we consider to be our critical accounting estimates. For the three months ended March 31, 2013, there have been no material changes in regard to any of our critical accounting estimates.

Non-GAAP Financial Measures

Statutory Surplus

Statutory surplus is a non-GAAP measure with the most directly comparable financial GAAP measure being shareholders' equity. The following is a reconciliation of statutory surplus to shareholders' equity:

Consolidated Statutory Surplus to GAAP Shareholders' Equity
For Period Ending March 31, 2013
(In thousands)

Statutory Consolidated Surplus		$501,166
Statutory to GAAP differences:		
Deferred policy acquisition costs	51,967	
Unrealized gain on securities available for sale	57,749	
Non-admitted assets and other	(4,354)	
Total Statutory to GAAP differences		105,362
Total Non-Regulated Entities		(41,065)
GAAP Consolidated Shareholders' Equity		$565,463

Table of Contents

Net Operating Income and Net Operating Income Per Share

Net operating income and net operating income per share are non-GAAP measures that represent net income excluding net realized gains or loss, net of tax. The most directly comparable financial GAAP measures to net operating income and net operating income per share are net income and net income per share, respectively. Net operating income and net operating income per share are intended as supplemental information and are not meant to replace net income or net income per share. Net operating income and net operating income per share should be read in conjunction with the GAAP financial results. The following is a reconciliation of net operating income to net income, as well as net operating income per share to net income per share:

	For the Three Months Ended March 31,			
	2013		2012	
	(In thousands, except share and per share data)			
Net operating income	$	6,877	$	7,527
Net realized gains, net of tax		205		577
Net income	$	7,082	$	8,104
Diluted earnings per common share:				
Net operating income	$	0.14	$	0.15
Net income	$	0.14	$	0.16
Diluted weighted average common shares outstanding		49,845,023		50,921,465

We use net operating income and net operating income per share as components to assess our performance and as measures to evaluate the results of our business. We believe these measures provide investors with valuable information relating to our ongoing performance that may be obscured by the net effect of realized gains and losses as a result of our market risk sensitive instruments, which primarily relate to fixed income securities that are available for sale and not held for trading purposes. Realized gains and losses may vary significantly between periods and are generally driven by external economic developments, such as capital market conditions. Accordingly, net operating income excludes the effect of items that tend to be highly variable from period to period and highlights the results from our ongoing business operations and the underlying loss or profitability of our business. We believe that it is useful for investors to evaluate net operating income and net operating income per share, along with net income and net income per share, when reviewing and evaluating our performance.

Table of Contents

Accident Year Loss Ratio

The accident year loss and LAE ratio is a non-GAAP measure and represents our net loss and LAE ratio excluding the impact of any changes in net ultimate loss estimates on prior year loss and LAE reserves. The most directly comparable financial GAAP measure to the accident year loss and LAE ratio is the net loss and LAE ratio. The accident year loss and LAE ratio is intended as supplemental information and is not meant to replace the net loss and LAE ratio. The accident year loss and LAE ratio should be read in conjunction with the GAAP financial results. The following is a reconciliation of the accident year loss and LAE ratio to the net loss and LAE ratio:

	For the Three Months Ended March 31,			
	2013		2012	
Accident year loss and LAE ratio	69.3	%	63.5	%
Increase in net ultimate loss estimates on prior year loss reserves	2.1	%	5.3	%
Net loss & LAE ratio	71.4	%	68.8	%

We use the accident year loss and LAE ratio as one component to assess our current year performance and as a measure to evaluate and, if necessary, adjust our pricing and underwriting. Our net loss and LAE ratio is based on calendar year information. Adjusting this ratio to an accident year loss and LAE ratio allows us to evaluate information based on the current accident year activity. We believe this measure provides investors with valuable information for comparison to historical trends and current industry estimates. We also believe that it is useful for investors to evaluate the accident year loss ratio and LAE and net loss and LAE ratio separately when reviewing and evaluating our performance.

RESULTS OF OPERATIONS FOR THE THREE MONTHS ENDED MARCH 31, 2013 AND 2012

Executive Overview

Our results for the first quarter of 2013 were impacted by the increase in net ultimate loss estimates for 2012 and prior accident years, which added 2.1 percentage points to the GAAP combined ratio. The first quarter of 2013 results also reflect a 1.8 combined ratio percentage points impact from the quota share reinsurance treaty that was entered into during the fourth quarter of 2012. Our GAAP combined ratio was 101.1% for the first quarter of 2013 compared to 101.5% for the comparable quarter in 2012. Our accident year combined ratio was 99.0% for the first quarter of 2013, compared to 96.2% in 2012.

Net operating income, a non-GAAP measure, decreased $0.6 million, from $7.5 million, or $0.15 per diluted share for the first quarter ended March 31, 2012, to $6.9 million, or $0.14 per diluted share for the first quarter ended March 31, 2013. The first quarter 2013 results include an after-tax increase in net ultimate loss estimates for 2012 and prior accident years of $2.3 million, or $0.05 per diluted share. By contrast, the first quarter of 2012 results include an after-tax decrease in net ultimate loss estimates for 2011 and prior accident years of $6.6 million, or $0.13 per diluted share. In addition, the first quarter 2013 after-tax results were reduced by $2.2 million, or $0.04 per diluted share as a result of the quota share reinsurance treaty.

Gross written premium increased $9.7 million, or 3.8%, to $267.7 million in 2013, compared to $258.0 million in 2012. This growth primarily reflects the accelerating pace of rate increases that have been achieved in combination with the maturation of existing programs where we are achieving adequate pricing levels. This growth was partially offset by the termination of, or reductions in, certain programs where pricing and underwriting did not meet our targets.

Table of Contents

Results of Operations

Net income for the three months ended March 31, 2013, was $7.1 million, or $0.14 per dilutive share, compared to net income of $8.1 million, or $0.16 per dilutive share, for the comparable period of 2012. Net operating income, a non-GAAP measure, decreased to $6.9 million, or $0.14 per dilutive share, compared to net operating income of $7.5 million, or $0.16 per dilutive share for the comparable period in 2012. Total diluted weighted average shares outstanding for the three months ended March 31, 2013 was 49,845,023 compared to 50,921,465 for the comparable period in 2012. This decrease reflects the impact of our Share Repurchase Plan.

Revenues

Revenues for the three months ended March 31, 2013 decreased $24.6 million, or 11.4%, to $191.7 million, from $216.2 million for the comparable period in 2012. This decrease primarily reflects the reduction within our net earned premiums.

The following table sets forth the components of revenues (in thousands):

	For the Three Months Ended March 31,	
	2013	2012
Revenue:		
Net earned premiums	$ 170,588	$ 192,815
Management administrative fees	3,369	2,927
Claims fees	1,743	1,662
Commission revenue	4,522	4,376
Net investment income	11,140	13,732
Net realized gains	316	732
Total revenue	$ 191,678	$ 216,244

Net earned premiums decreased $22.2 million, or 11.5%, to $170.6 million for the three months ended March 31, 2013, from $192.8 million in the comparable period in 2012. This decrease was primarily the result of the quota share reinsurance treaty as well as termination of, or reductions in, certain programs where pricing and underwriting did not meet our targets.

Net investment income decreased by $2.6 million, or 18.9%, to $11.1 million for the three months ended March 31, 2013, from $13.7 million in the comparable period in 2012. The decrease reflects the impact from the fourth quarter 2012 sale of a portion of our bond portfolio in order to generate realized gains. We reinvested the proceeds during the first quarter of 2013, with the replacement of those bonds at lower interest rates.

Table of Contents

Expenses

Expenses decreased $23.8 million from $207.0 million for the three months ended March 31, 2012 to $183.2 million for the three months ended March 31, 2013.

The following table sets forth the components of expenses (in thousands):

	For the Three Months Ended March 31,	
	2013	2012
Expense:		
Net losses and loss adjustment expenses	$ 121,816	$ 132,747
Policy acquisition and other underwriting expenses	50,605	63,113
General selling & administrative expenses	6,023	6,339
General corporate expenses	1,516	1,373
Amortization expense	1,071	1,416
Interest expense	2,197	1,977
Total expenses	$ 183,228	$ 206,965

Net loss and loss adjustment expenses (“LAE”) decreased $10.9 million, to $121.8 million for the three months ended March 31, 2013, from $132.7 million for the same period in 2012. Our loss and LAE ratio was 71.4% for the three months ended March 31, 2013 and 68.8% for the three months ended March 31, 2012. The loss and LAE ratio for the first quarter of 2013 includes a 2.1 percentage point increase from net ultimate loss estimates for accident years 2012 and prior, whereas the 2012 results included a 5.3 percentage point increase from net ultimate loss estimates for accident years 2011 and prior. The accident year loss and LAE ratio was 69.3% for the three months ended March 31, 2013 up from 63.5% in the comparable period in 2012. In addition, the 2013 accident year loss and LAE ratio reflects the cumulative effect of an increase in our 2013 accident year forecasted loss and LAE ratio based upon the increase in net ultimate loss estimates for the 2009, 2010, and 2011 accident years previously recognized in the second and third quarters of 2012, and was partially offset by earned rate increases and other underwriting actions. Additional discussion of our reserve activity is described below within the Other Items ~ Reserves section.

Policy acquisition and other underwriting expenses decreased $12.5 million, to $50.6 million for the three months ended March 31, 2013 from $63.1 million for the same period in 2012. Our expense ratio decreased 3.0 percentage points to 29.7% for the three months ended March 31, 2013, from 32.7% for the same period in 2012. This improvement reflects the impact of the quota share reinsurance treaty and our ability to leverage fixed costs and execute on expense management initiatives.

Federal income tax expense for the three months ended March 31, 2013 was $1.7 million, or 20.6% of income before taxes, compared to $1.7 million, or 18.6% of income before taxes, for the same period in 2012. Income tax expense on capital gains and the change in our valuation allowance on deferred tax assets, was $111,000 and $155,000 for the three months ended March 31, 2013 and 2012, respectively. The higher rate reflects a lower proportion of taxable income derived from net investment income, which includes a portion of tax exempt income, as opposed to fee based or underwriting income.

Table of Contents

Other Items

Equity earnings of affiliated, net of tax

In July 2009, our subsidiary, Star, purchased a 28.5% ownership interest in an affiliate, Midwest Financial Holdings, LLC ("MFH"), for $14.8 million in cash. We are not required to consolidate this investment because we are not the primary beneficiary of the business, nor do we control the entity's operations. Our ownership interest is significant, but is less than a majority ownership and, therefore, we are accounting for this investment under the equity method of accounting. Star recognizes 28.5% of the profits and losses as a result of this equity interest ownership. We recognized equity earnings, net of tax, from MFH of $0.3 million, or less than $0.01 per dilutive share, for the three months ended March 31, 2013, compared to $0.7 million, or $0.01 per dilutive share, for the comparable period of 2012. We received dividends from MFH in the three months ended March 31, 2013 and 2012, for $0.4 million and $1.0 million, respectively.

In November 2012, our subsidiary, Century Surety Company, committed to a $10 million strategic equity investment in Aquiline Financial Services Fund II L.P. As of March 31, 2013, approximately $3.8 million of the commitment had been satisfied with $6.2 million of unfunded commitment remaining. Our ownership interest is approximately 1.34% of the fund, which we are accounting for under the equity method of accounting. Century Surety Company will recognize 1.34% of the Fund's profits and losses as a result of this equity interest ownership. We recognized equity earnings, net of tax, from the Aquiline Financial Services Fund II L.P. of $0.2 million, or less than $0.01 per dilutive share, for the three months ended March 31, 2013.

Table of Contents

Reserves

At March 31, 2013, our best estimate for the ultimate liability for loss and LAE reserves, net of reinsurance recoverables, was $1.1 billion. We established a reasonable range of reserves of approximately $951.0 million to $1.2 billion. This range was established primarily by considering the various indications derived from standard actuarial techniques and other appropriate reserve considerations. The following table sets forth this range by line of business (in thousands):

Line of Business	Minimum Reserve Range	Maximum Reserve Range	Selected Reserves
Workers' Compensation	$ 402,201	$ 471,241	$ 450,547
Residual Markets	19,190	21,254	20,637
Commercial Multiple Peril / General Liability	381,214	493,206	434,468
Commercial Automobile	118,445	139,270	130,193
Other	29,993	34,532	32,196
Total Net Reserves	$ 951,043	$ 1,159,503	$ 1,068,041

Reserves are reviewed and established by our internal actuaries for adequacy and peer reviewed by our third-party actuaries. When reviewing reserves, we analyze historical data and estimate the impact of numerous factors such as (1) per claim information; (2) industry and our historical loss experience; (3) legislative enactments, judicial decisions, legal developments in the imposition of damages, and changes in political attitudes; and (4) trends in general economic conditions, including the effects of inflation. This process assumes that past experience, adjusted for the effects of current developments and anticipated trends, is an appropriate basis for predicting future events. There is no precise method for subsequently evaluating the impact of any specific factor on the adequacy of reserves, because the eventual deficiency or redundancy is affected by multiple factors.

The key assumptions used in our selection of ultimate reserves included the underlying actuarial methodologies, a review of current pricing and underwriting initiatives, an evaluation of reinsurance costs and retention levels, and a detailed claims analysis with an emphasis on how aggressive claims handling may be impacting the paid and incurred loss data trends embedded in the traditional actuarial methods. With respect to the ultimate estimates for losses and LAE, the key assumptions remained consistent for the three months ended March 31, 2013, and the year ended December 31, 2012.

Table of Contents

For the three months ended March 31, 2013, we reported an increase in net ultimate loss estimates for accident years 2012 and prior of $3.6 million, or 0.3% of $1.1 billion of beginning net loss and LAE reserves at December 31, 2012. The change in net ultimate loss estimates reflected revisions in the estimated reserves as a result of actual claims activity in calendar year 2013 that differed from the projected activity. The major components of this change in ultimates are as follows (in thousands):

		Incurred Losses			Paid Losses			
Line of Business	Reserves at December 31, 2012	Current Year	Prior Years	Total Incurred	Current Year	Prior Years	Total Paid	Reserves at March 31, 2013
Workers' Compensation	$ 448,591	$54,142	$(1,170)	$52,972	$1,748	$49,268	$51,016	$450,547
Residual Markets	18,451	4,295	(324)	3,971	1,012	773	1,785	20,637
Commercial Multiple Peril / General Liability	427,296	38,235	2,848	41,083	692	33,219	33,911	434,468
Commercial Automobile	138,705	12,300	3,871	16,171	1,941	22,742	24,683	130,193
Other	41,032	9,204	(1,585)	7,619	1,536	14,919	16,455	32,196
Net Reserves	1,074,075	$118,176	$3,640	$121,816	$6,929	$120,921	$127,850	1,068,041
Reinsurance Recoverable	381,905							419,864
Consolidated	$ 1,455,980							$1,487,905

The following table shows the re-estimated December 31, 2012 held reserves by line as of March 31, 2013 (in thousands):

Line of Business	Reserves at December 31, 2012	Re-estimated Reserves for December 31, 2012 at March 31, 2013	Development as a Percentage of Prior Year Reserves
Workers' Compensation	$ 448,591	$ 447,421	-0.3%
Commercial Multiple Peril / General Liability	427,296	430,144	0.7%
Commercial Automobile	138,705	142,576	2.8%
Other	41,032	39,447	-3.9%
Sub-total	1,055,624	1,059,588	0.4%
Residual Markets	18,451	18,127	-1.8%
Total Net Reserves	$ 1,074,075	$ 1,077,715	0.3%

Workers’ Compensation Excluding Residual Markets

The net ultimate loss estimates for accident years 2012 and prior in the workers' compensation line of business decreased $1.2 million, or 0.3%. This was driven primarily by a decrease of $941,000 in 2009 related to a California and a New England program. An increase of $5.0 million in 2011 was offset by a decrease of $5.0 million in

2012. The change in ultimate loss estimates for all other accident years was insignificant.

Commercial Multiple Peril / General Liability

The net ultimate loss estimates for accident years 2012 and prior in the commercial multi-peril/general liability line of business increased $2.8 million, or 0.7%. This was driven primarily by increases of $703,000, $1.1 million, and $1.5 million in accident years 2009, 2008 and 2006, respectively. This increase was primarily due to an excess liability program. This increase was partially offset by a decrease of $510,000 in accident year 2011. This decrease was related to an excess liability program. The change in ultimate loss estimates for all other accident years was insignificant.

Table of Contents

Commercial Automobile

The $3.9 million increase, or 2.8%, in net ultimate loss estimates for the commercial automobile line of business increased $2.1 million, $809,000, and $599,000 in accident years 2012, 2010, and 2004, respectively. This increase was from an excess liability program and two other commerical automobile programs. The increase in net ultimate loss estimates was partially offset by a decrease of $671,000 in accident year 2009. This decrease was related to smaller movements in several programs. The change in ultimate loss estimates for all other accident years was insignificant.

Other

The $1.6 million decrease, or 3.9%, in net ultimate loss estimates in other lines of business is primarily from a decrease of $1.7 million in accident year 2012. This decrease was related to a habitational program and a professional liability program. The change in ultimate loss estimates for all other accident years was insignificant.

Residual Markets

The workers' compensation residual market line of business had a decrease in net ultimate loss estimate of $324,000, or 1.8% of net reserves. This decrease reflects reductions in the net ultimate loss estimates for various accident years. We record loss reserves as reported by the NCCI, plus a provision for the reserves incurred but not yet analyzed and reported to us due to a two quarter lag in reporting. These changes reflect a difference between our estimate of the lag incurred but not reported and the amounts reported by the NCCI in the year.

LIQUIDITY AND CAPITAL RESOURCES

Our principal sources of funds are insurance premiums, investment income, proceeds from the maturity and sale of invested assets from our Insurance Company Subsidiaries, and risk management fees and agency commissions from our non-regulated subsidiaries. Funds are primarily used for the payment of claims, commissions, salaries and employee benefits, other operating expenses, shareholder dividends, share repurchases, capital expenditures, and debt service.

A significant portion of our consolidated assets represents assets of our Insurance Company Subsidiaries that may not be transferable to the holding company in the form of dividends, loans or advances in accordance with state insurance laws. These laws generally specify that dividends can be paid only from unassigned surplus and only to the extent that all dividends in the current twelve months do not exceed the greater of 10% of total statutory surplus as of the end of the prior fiscal year or 100% of the statutory net income for the prior year, less any dividends paid in the prior twelve months. Using these criteria, the ordinary dividend available that can be paid from the Insurance Company Subsidiaries during 2013 is $42.6 million without prior regulatory approval. Of this $42.6 million, no ordinary dividends have been declared and paid as of March 31, 2013. In addition to ordinary dividends, the Insurance Company Subsidiaries have the capacity to pay $126.3 million of extraordinary dividends in 2013, subject to prior regulatory approval. The ability to pay ordinary and extraordinary dividends must be reviewed in relation to the impact on key financial measurement ratios, including Risk Based Capital (RBC) ratios and A.M. Best's Capital Adequacy Ratio. The Insurance Company Subsidiaries' ability to pay future dividends without advance regulatory approval is dependent upon maintaining a positive level of unassigned surplus, which in turn, is dependent upon the Insurance Company Subsidiaries generating net income. Total ordinary dividends paid from our Insurance Company Subsidiaries to our holding company were zero and $12.5 million for the three months ended March 31, 2013 and 2012, respectively. As of March 31, 2013, on a trailing twelve month statutory consolidated basis, the gross and net premium leverage ratios were 2.1 to 1.0 and 1.5 to 1.0, respectively.

Table of Contents

We also generate operating cash flow from non-regulated subsidiaries in the form of commission revenue, outside management fees, and intercompany management fees. These sources of income are used to meet debt service, shareholders' dividends, and other operating expenses of the holding company and non-regulated subsidiaries. Earnings before interest, taxes, depreciation, and amortization from non-regulated subsidiaries were approximately $3.3 million for the three months ended March 31, 2013.

We have a revolving credit facility of $100.0 million. As of March 31, 2013, we had $20.0 million outstanding balance under our revolving credit facility and $0.5 million in letters of credit issued. The undrawn portion of the revolving credit facility, which was $79.5 million as of March 31, 2013, is available to finance working capital and for other general corporate purposes, including but not limited to, surplus contributions to our Insurance Company Subsidiaries to support premium growth or strategic acquisitions.

Because of our Insurance Company Subsidiaries' membership in the FHLBI, we have the ability to borrow on a collateralized basis at relatively low borrowing rates, providing a source of liquidity. As of March 31, 2013, we had borrowed $30.0 million from the FHLBI. The proceeds were used to fund purchases of high quality bonds with maturities that match the maturity of the FHLBI credit facility. Due to the low cost of the FHLBI funding, we expect to generate returns in excess of its cost of borrowing under this strategy. We have the ability to increase our borrowing capacity through additional investments in FHLBI and pledging additional securities. As of December 31, 2012, we had $30.0 million of borrowings outstanding from the FHLBI.

Cash flow provided by operations was $2.6 million and $38.3 million for the three months ended March 31, 2013 and 2012, respectively. The decrease in operating cash flows reflects a net cash outflow from the quota share treaty that was entered into during the fourth quarter of 2012 as well as a reduction in cash from underwriting activities. We maintain a strong balance sheet with diversified geographic risks, high quality reinsurance, and a high quality investment portfolio.

Table of Contents

Other Items – Liquidity and Capital Resources

Interest Rate Swaps

We have entered into interest rate swap transactions to mitigate our interest rate risk on our existing debt obligations. These interest rate swap transactions have been designated as cash flow hedges and are deemed highly effective hedges. These interest rate swap transactions are recorded at fair value on the balance sheet and the effective portion of the changes in fair value are accounted for within other comprehensive income. The interest differential to be paid or received is accrued and recognized as an adjustment to interest expense.

Refer to Note 5 ~ Derivative Instruments of the Notes to the Consolidated Financial Statements, for additional information specific to our interest rate swaps.

Credit Facilities, Debentures, and Cash Convertible Senior Notes

Refer to Note 4 ~ Debt of the Notes to the Consolidated Financial Statements, for additional information specific to our credit facilities, debentures, and the Notes.

Investment Portfolio

As of March 31, 2013 and December 31, 2012, the recorded values of our investment portfolio, including cash and cash equivalents, were both $1.7 billion.

In general, we believe our overall investment portfolio is conservatively invested. The effective duration of the investment portfolio at March 31, 2013, is 5.2 years, compared to 5.0 years at March 31, 2012. Our pre-tax book yield, excluding cash and cash equivalents was 3.3%, compared to 4.1% in 2012. The tax equivalent yield, excluding cash and cash equivalents was 3.8%, compared to 4.8% in 2012. Approximately 99.7% of our fixed income investment portfolio is investment grade.

Shareholders' Equity

Refer to Note 7 ~ Shareholders' Equity of the Notes to the Consolidated Financial Statements.

Contractual Obligations and Commitments

On March 18, 2013, the Company issued $100.0 million of 5.0% cash convertible senior notes, which mature on March 15, 2020. As a result of the issuance of the cash convertible notes, as of March 31, 2013, the total debt (including debentures) of the Company and its non-regulated subsidiaries was $245.0 million, and the payments due in more than five years increased to $180.9 million. For additional information regarding the cash convertible notes, refer to Note 4 ~ Debt of the Notes to the Consolidated Financial Statements. For the three months ended March 31, 2013, there were no other material changes in relation to our contractual obligations and commitments, outside of the ordinary course of our business.

Recent Accounting Pronouncements

Refer to Note 1 ~ Summary of Significant Accounting Policies of the Notes to the Consolidated Financial Statements.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk is the risk of loss arising from adverse changes in market rates and prices, such as interest rates as well as other relevant market rate or price changes. The volatility and liquidity in the markets in which the underlying assets are traded directly influence market risk. The following is a discussion of our primary risk exposures and how those exposures are currently managed as of March 31, 2013. Our market risk sensitive instruments are primarily related to fixed income securities, which are available for sale and not held for trading purposes.

Interest Rate Risk

Interest rate risk is managed within the context of an asset and liability management strategy for which the target duration for the fixed income portfolio is based on the estimate of the liability duration and takes into consideration our surplus. The investment policy guidelines provide for a fixed income portfolio duration of between three and a half and five and a half years. At March 31, 2013, our fixed income portfolio had an effective duration of 5.2 years, compared to 5.1 years at December 31, 2012.

At March 31, 2013, the fair value of our investment portfolio, excluding cash and cash equivalents, was $1.6 billion. Our market risk to the investment portfolio is primarily interest rate risk associated with debt securities. Our exposure to equity price risk is related to our investments in relatively small positions of preferred stocks and mutual funds with an emphasis on dividend income. These investments comprise 4.8% of our investment portfolio.

Our investment philosophy is one of maximizing after-tax earnings and has historically included significant investments in tax-exempt bonds. We continue to increase our holdings of tax-exempt securities based on our desire to maximize after-tax investment income. For our investment portfolio, there were no significant changes in our primary market risk exposures or in how those exposures are managed compared to the year ended December 31, 2012. We do not anticipate significant changes in our primary market risk exposures or in how those exposures are managed in future reporting periods based upon what is known or expected to be in effect.

A sensitivity analysis is defined as the measurement of potential loss in future earnings, fair values, or cash flows of market sensitive instruments resulting from one or more selected hypothetical changes in interest rates and other market rates or prices over a selected period. In our sensitivity analysis model, a hypothetical change in market rates is selected that is expected to reflect reasonable possible near-term changes in those rates. "Near term" means a period of up to one year from the date of the consolidated financial statements. In our sensitivity model, we use a hypothetical change to measure our potential loss in fair value of debt securities assuming an upward and downward parallel shift in interest rates. The table below presents our model's estimate of changes in fair values given a change in interest rates. Dollar values are in thousands.

	Rates Down 100bps	Rates Unchanged	Rates Up 100bps
Fair Value	$1,562,567	$1,496,953	$1,419,664
Yield to Maturity or Call	1.3%	2.0%	3.0%
Effective Duration	5.1	5.2	5.3

Table of Contents

The other financial instruments, which include cash and cash equivalents, equity securities, premium receivables, reinsurance recoverables, line of credit and other assets and liabilities, when included in the sensitivity model, do not produce a material change in fair values.

Our debentures are subject to variable interest rates. Thus, our interest expense on these debentures is directly correlated to market interest rates. At March 31, 2013 and December 31, 2012, we had outstanding debentures of $80.9 million. At this level, a 100 basis point (1%) change in market rates would change annual interest expense by $809,000.

Our term loan is subject to variable interest rates. Thus, our interest expense on our term loan is directly correlated to market interest rates. At March 31, 2013, we had an outstanding balance on our term loan of $27.0 million. At this level, a 100 basis point (1%) change in market rates would change annual interest expense by $270,000. At December 31, 2012 we had an outstanding balance on our term loan of $28.5 million. At this level, a 100 basis point (1%) change in market rates would change annual interest expense by $285,000.

We have entered into interest rate swap transactions to mitigate our interest rate risk on our existing debt obligations. These interest rate swap transactions have been designated as cash flow hedges and are deemed highly effective hedges. These interest rate swap transactions are recorded at fair value on the balance sheet and the effective portion of the changes in fair value are accounted for within other comprehensive income. The interest differential to be paid or received is accrued and recognized as an adjustment to interest expense. Refer to Note 5 ~ Derivative Instruments for further detail relating to our interest rate swap transactions.

In addition, our revolving line of credit under which we can borrow up to $100.0 million is subject to variable interest rates. Thus, our interest expense on the revolving line of credit is directly correlated to market interest rates. At March 31, 2013 and December 31, 2012, we had a $20.0 million outstanding balance on our line of credit. At this level, a 100 basis point (1%) change in market rates would change annual interest expense by $200,000. In addition, at March 31, 2013 and December 31, 2012, $0.5 million in letters of credit had been issued.

Equity Risk

Equity risk is the risk that we may incur economic losses due to adverse changes in equity prices. Our equity securities are classified as available for sale in accordance with GAAP and carried on the balance sheet at fair value. Our outside investment managers are constantly reviewing the financial health of these issuers. In addition, we perform periodic reviews of these issuers.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, the “Exchange Act”), which we refer to as disclosure controls, are controls and procedures that are designed with the objective of ensuring that information required to be disclosed in our reports filed under the Exchange Act, such as this Form 10-Q, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission’s rules and forms. Disclosure controls are also designed with the objective of ensuring that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. There are inherent limitations to the effectiveness of any control system. A control system, no matter how well conceived and operated, can provide only reasonable assurance that its objectives are met. No evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, have been detected.

As of March 31, 2013, an evaluation was carried out under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of disclosure controls. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that the design and operation of these disclosure controls were effective in recording, processing, summarizing, and reporting, on a timely basis, material information required to be disclosed in the reports we file under the Exchange Act and is accumulated and communicated, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There were no significant changes in our internal control over financial reporting during the three month period ended March 31, 2013, which have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
