CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This annual report on Form 10-K contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act. These "forward-looking statements" reflect our current views with respect to, among other things, future events and our financial performance. The words "may," "plan," "contemplate," "anticipate," "believe," "intend," "continue," "expect," "project," "predict," "estimat "should," "would," "will," and similar expressions are intended to identify such forward-looking statements, but other statements not based on historical information may also be considered forward-looking. All forward-looking statements are subject to risks, uncertainties and other factors that may cause our actual results, performance or achievements to differ materially from any results expressed or implied by such forward-looking statements. These statements should be considered subject to various risks and uncertainties, and are made based upon management's belief as well as assumptions made by, and information currently available to, management pursuant to "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995. Such risks include, without limitation:

- the effects of the continued slow economic recovery and high unemployment;
- the effects of continued deleveraging of United States citizens and businesses;
- the effects of potential federal spending cuts due to the United States financial budgetary "sequester";
- the effects of continued depression of residential housing values and the slow market for sales and resales;
- credit risks, including credit risks resulting from the devaluation of collateralized debt obligations (CDOs) and/or structured investment vehicles to which we currently have no direct exposure;
- the effects of governmental monetary and fiscal policies and legislative and regulatory changes;
- the effects of hazardous weather such as the tornados that struck the state of Alabama in April 2011 and January 2012;
- the effects of competition from other commercial banks, thrifts, mortgage banking firms, consumer finance companies, credit unions, securities brokerage firms, insurance companies, money market and other mutual funds and other financial institutions operating in our market area and elsewhere, including institutions operating regionally, nationally and internationally, together with competitors offering banking products and services by mail, telephone and the internet;
- the effect of any merger, acquisition or other transaction to which we or any of our subsidiaries may from time to time be a party, including our ability to successfully integrate any business that we acquire;
- deterioration in the financial condition of borrowers resulting in significant increases in loan losses and provisions for those losses;
- the effect of changes in interest rates on the level and composition of deposits, loan demand and the values of loan collateral, securities and interest sensitive assets and liabilities;
- the effects of terrorism and efforts to combat it;
- the results of regulatory examinations;
- changes in state and federal legislation, regulations or policies applicable to banks and other financial service providers, including regulatory or legislative developments arising out of current unsettled conditions in the economy, including implementation of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act");
- the effect of inaccuracies in our assumptions underlying the establishment of our loan loss reserves; and
- other factors that are discussed in the section titled "Risk Factors" in Item 1A.

The foregoing factors should not be construed as exhaustive and should be read together with the other cautionary statements included in this annual report on Form 10-K. If one or more events related to these or other risks or uncertainties materialize, or if our underlying assumptions prove to be incorrect, actual results may differ materially from what we anticipate. Accordingly, you should not place undue reliance on any such forward-looking statements. Any forward-looking statement speaks only as of the date on which it is made, and we do not undertake any obligation to publicly update or review any forward-looking statement, whether as a result of new information, future developments or otherwise. New factors emerge from time to time, and it is not possible for us to predict which will arise. In addition, we cannot assess the impact of each factor on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements.

PART I

Unless this Form 10-K indicates otherwise, the terms "we," "our," "us," "the Company," "ServisFirst Bancshares" or "Serv as used herein refer to ServisFirst Bancshares, Inc., and its subsidiaries, including ServisFirst Bank, which sometimes is referred to as "our bank subsidiary" or "the Bank," and its other subsidiaries. References herein to the fiscal years 2010, 2011, 2012, 2013 and 2014 mean our fiscal years ended December 31, 2010, 2011, 2012, 2013 and 2014, respectively.

ITEM 1. BUSINESS

Overview

We are a bank holding company within the meaning of the Bank Holding Company Act of 1956 and are headquartered in Birmingham, Alabama. Through our wholly-owned subsidiary bank, we operate 13 full-service banking offices located in Jefferson, Shelby, Madison, Montgomery, Houston and Mobile Counties of Alabama and in Escambia County Florida in the metropolitan statistical areas ("MSAs") of Birmingham-Hoover, Huntsville, Montgomery, Dothan and Mobile, Alabama, and Pensacola-Ferry Pass-Brent, Florida. Additionally, we operate a loan production office in Davidson County of Tennessee in the Nashville MSA. Through our bank, we originate commercial, consumer and other loans and accept deposits, provide electronic banking services, such as online and mobile banking, including remote deposit capture, deliver treasury and cash management services and provide correspondent banking services to other financial institutions. As of December 31, 2014, we had total assets of approximately $4.1 billion, total loans of approximately $3.4 billion, total deposits of approximately $3.4 billion and total stockholders' equity of approximately $407 million.

We operate our bank using a simple business model based on organic loan and deposit growth, generated through high quality customer service, delivered by a team of experienced bankers focused on developing and maintaining long-term banking relationships with our target customers. We utilize a uniform, centralized back office risk and credit platform to support a decentralized decision-making process executed locally by our regional chief executive officers. This decentralized decision-making process allows individual lending officers varying levels of lending authority, based on the experience of the individual officer. When the total amount of loans to a borrower exceeds on officer's lending authority, further approval must be obtained by the applicable regional chief executive officer (G. Carlton Barker – Montgomery, Andrew N. Kattos – Huntsville, B. Harrison Morris, III – Dothan, Rex D. McKinney – Pensacola or W. Bibb Lamar, Jr. – Mobile) and/or our senior management team. Rather than relying on a more typical traditional, retail bank strategy of operating a broad base of multiple brick and mortar branch locations in each market, our strategy focuses on operating a limited and efficient branch network with sizable aggregate balances of total loans and deposits housed in each branch office. We believe that this approach more appropriately addresses our customers' banking needs and reflects a best-of-class delivery strategy for commercial banking services.

Our principal business is to accept deposits from the public and to make loans and other investments. Our principal sources of funds for loans and investments are demand, time, savings and other deposits and the amortization and prepayment of loans and borrowings. Our principal sources of income are interest and fees collected on loans, interest and dividends collected on other investments, and service charges. Our principal expenses are interest paid on savings and other deposits, interest paid on our other borrowings, employee compensation, office expenses and other overhead expenses.

In January 2012, we formed SF Holding 1, Inc., an Alabama corporation (“SF Holding”), and its subsidiary, SF Realty 1, Inc., an Alabama corporation (“SF Realty 1”). In September 2013, we formed SF FLA Realty, Inc., an Alabama corporation (“SF FLA Realty”), as a subsidiary of SF Holding. ”). In May 2014, we formed SF GA Realty, Inc., an Alabama corporation (“SF GA Realty”), as a subsidiary of SF Holding. Each of SF Realty 1, SF FLA Realty and SF GA Realty elected to be treated as a real estate investment trust (“REIT”) for U.S. income tax purposes. SF Realty 1, SF FLA Realty and SF GA Realty hold and manage participations in residential mortgages and commercial real estate loans originated by our bank in Alabama, Florida and Georgia, respectively. SF Holding, SF Realty 1, SF FLA Realty and SF GA Realty are all consolidated into the Company.

As a bank holding company, we are subject to regulation by the Federal Reserve. We are required to file reports with the Federal Reserve and are subject to regular examinations by that agency.

Recent Developments – Metro Bank Acquisition

On January 31, 2015, we completed the merger with Metro Bancshares, Inc. (“Metro”), which resulted in the acquisition of 100% of all the outstanding shares of Metro, including all outstanding options and warrants, for an aggregate of 636,720 shares of ServisFirst common stock and approximately $20.9 million in cash, representing aggregate consideration value of approximately $40.3 million (based on the closing price of ServisFirst Bancshares, Inc. on January 30, 2015). The acquisition of Metro represents our first strategic acquisition and our entry into the Atlanta metropolitan market. At December 31, 2014, Metro had total assets of approximately $211 million, total loans of approximately $154 million, total deposits of approximately $182 million and total stockholders’ equity of approximately $28 million. The cash portion of the merger consideration was paid from the Company’s cash on hand. Because the acquisition closed on January 31, 2015, after the end of the fiscal period covered by this Annual Report on Form 10-K, the Company’s financial information does not include any of the results of operations from Metro or its subsidiary, Metro Bank.

History

Our bank was founded by our President and Chief Executive Officer, Thomas A. Broughton, III, and commenced banking operations in May 2005 following an initial capital raise of $35 million, the largest capital raise by a *de novo* bank in the history of Alabama. We were incorporated as a Delaware corporation in August 2007 for the purpose of acquiring all of the common stock of our bank, and in November 2007 our holding company became the sole shareholder of the bank by virtue of a plan of reorganization and agreement of merger. In May 2008, following our filing of a registration statement on Form 10 with the SEC, we became a reporting company within the meaning of the Exchange Act and have been filing annual, quarterly, and current reports, proxy statements and other information with the SEC since 2008. On May 19, 2014, we completed our initial public offering (the “Offering’) of common stock. Since the completion of the Offering, our common stock has traded on The NASDAQ Global Market under the symbol “SFBS”.

Business Strategy

We are a full service commercial bank focused on providing competitive products, state of the art technology and quality service. Our business philosophy is to operate as a metropolitan community bank emphasizing prompt, personalized customer service to the individuals and businesses located in our primary markets. We aggressively market to our target customers, which include privately held businesses with $2 million to $250 million in annual sales, professionals and affluent consumers whom we believe are underserved by the larger regional banks operating in our markets. We also seek to capitalize on the extensive relationships that our management, directors, advisory directors and stockholders have with the businesses and professionals in our markets.

Focus on Core Banking Business. We deliver a broad array of core banking products to our customers. While many large regional competitors and national banks have chosen to develop non-traditional business lines to supplement their net interest income, we believe our focus on traditional commercial banking products driven by a high margin delivery system is a superior method to deliver returns to our stockholders. We emphasize an internal culture of keeping our operating costs as low as practical, which in turn leads to greater operational efficiency. Additionally, our centralized technology and process infrastructure contribute to our low operating costs. We believe this combination of products, operating efficiency and technology make us attractive to customers in our markets. In addition, in 2011 we began providing correspondent banking services to various smaller community banks in our markets, and currently act as a correspondent bank to approximately 200 community banks located throughout the southeastern United States. We provide a source of clearing and liquidity to our correspondent bank customers, as well as a wide array of account, credit, settlement and international services.

Commercial Bank Emphasis. We have historically focused on people as opposed to places. This strategy translates into a smaller number of brick and mortar branch locations relative to our size, but larger overall branch sizes in terms of total deposits. As a result, as of December 31, 2014 our branches averaged approximately $261.4 million in total deposits, and our branches that had been open at least three years at that time averaged approximately $330.7 million in total deposits. In the more typical retail banking model, branch banks continue to lose traffic to other banking channels which may prove to be an impediment to earnings growth for those banks that have invested in large branch networks. In addition, unlike many traditional community banks, we place a strong emphasis on originating commercial and industrial loans, which comprised approximately 44.5% of our total loan portfolio as of December 31, 2014.

Scalable, Decentralized Business Model. We emphasize local decision-making by experienced bankers supported by centralized risk and credit oversight. We believe that the delivery by our bankers of in-market customer decisions, coupled with risk and credit support from our corporate headquarters, allows us to serve our borrowers and depositors directly and in person, while managing risk centrally and on a uniform basis. We intend to continue our growth by repeating this scalable model in each market in which we are able to identify a strong banking team. Our goal in each market is to employ the highest quality bankers in that market. We then empower those bankers to implement our operating strategy, grow our customer base and provide the highest level of customer service possible. We focus on a geographic model of organizational structure as opposed to a line of business model employed by most regional banks. This structure assigns significant responsibility and accountability to our regional chief executive officers, who we believe will drive our growth and success. We have developed a business culture whereby our management team, from the top down, is actively involved in sales, which we believe is a key differentiator from our competition.

Identify Opportunities in Vibrant Markets. Since opening our original banking facility in Birmingham in 2005, as of December 31, 2014, we had expanded into six additional markets. Our focus has been to expand opportunistically when we identify a strong banking team in a market with attractive economic characteristics and market demographics where we believe we can achieve a minimum of $300 million in deposits within five years of market entry. There are two primary factors we consider when determining whether to enter a new market:

- the availability of successful, experienced bankers with strong reputations in the market; and

- the economic attributes of the market necessary to drive quality lending opportunities coupled with deposit-related characteristics of the potential market.

Prior to entering a new market, historically we have identified and built a team of experienced, successful bankers with market-specific knowledge to lead the bank's operations in that market, including a regional chief executive officer. Generally, we or members of our senior management team are familiar with these individuals based on prior work experience and reputation, and strongly believe in the ability of such individuals to successfully execute our business model. We also have assembled a non-voting advisory board of directors in each market, comprised of directors representing a broad spectrum of business experience and community involvement in the market. We currently have advisory boards in each of the Huntsville, Montgomery, Dothan, Mobile and Pensacola markets.

We announced the hiring of Tom Trouche as Executive Vice President and Regional CEO of Charleston, South Carolina on January 20, 2015. Mr. Trouche will be establishing a banking presence for us in Charleston by hiring a staff of experienced bankers and locating office space.

In connection with opening a full-service banking office in a new market, historically we have raised capital through private placements to investors in the local market, many of whom are also customers of our bank in such market. We believe that having many of our customers who are also stockholders provides us with a strong source of core deposits, aligns our and our customers' interests, and fosters a platform for developing and maintaining the long-term banking relationships we seek. In addition to organic expansion, we may seek to expand through targeted acquisitions, as evidenced by our recent merger with Metro Bank. For more information regarding our acquisition of Metro Bank, see the heading entitled "Recent Developments" in this Item 1. "Business."

Markets and Competition

Our primary markets are broadly defined as the metropolitan statistical areas ("MSAs") of Birmingham-Hoover, Huntsville, Montgomery, Dothan and Mobile, Alabama, Pensacola-Ferry Pass-Brent, Florida, and Nashville, Tennessee. We draw most of our deposits from, and conduct most of our lending transactions in, these markets.

According to FDIC reports, total deposits in each of our primary market areas have expanded from 2004 to 2014 (deposit data reflects totals as reported by financial institutions as of June 30th of each year) as follows:

	2014	2004	Compound Annual Growth Rate	
	(Dollars in Billions)			
Jefferson/Shelby County, Alabama	$30.2	$17.7	5.45	%
Madison County, Alabama	6.0	3.9	4.56	%
Montgomery County, Alabama	6.1	4.0	4.23	%
Houston County, Alabama	2.2	1.4	4.87	%
Mobile County, Alabama	6.3	4.8	2.69	%
Escambia County, Florida	3.6	3.1	1.57	%

Our bank is subject to intense competition from various financial institutions and other financial service providers. Our bank competes for deposits with other local and regional commercial banks, savings and loan associations, credit unions and issuers of commercial paper and other securities, such as money-market and mutual funds. In making loans, our bank competes with other commercial banks, savings and loan associations, consumer finance companies, credit unions, leasing companies and other lenders.

The following table illustrates our market share, by insured deposits, in our primary service areas at June 30, 2014, as reported by the FDIC:

Market (1)	Number of Branches	Our Market Deposits		Total Market Deposits	Ranking	Market Share Percentage	
	(Dollars in Millions)						
Alabama:							
Birmingham-Hoover MSA	3	$ 1,523.7	(2)	$ 32,907.2	5	4.63	%
Huntsville MSA	2	574.2		6,760.9	3	8.49	%
Montgomery MSA	2	398.5		7,487.6	6	5.32	%
Dothan MSA	2	379.3		2,854.9	2	13.28	%
Mobile MSA	2	290.2		6,266.7	10	1.44	%
Florida:							
Pensacola-Ferry Pass-Brent MSA	2	246.3		4,794.9	7	5.14	%

(1) Represents metropolitan statistical areas (MSAs).

(2) Includes approximately $26.5 million in deposits attributable to our loan production office in Nashville, Tennessee.

Together, deposits for all institutions in Jefferson, Shelby, Madison, Montgomery, Houston and Mobile Counties represented approximately 57.15% of all the deposits in the State of Alabama at June 30, 2014. Deposits for all institutions in Escambia County represent approximately 0.79% of all the deposits in the state of Florida at June 30, 2014.

Each of our markets are described following:

Birmingham. Birmingham, the largest city in Alabama, is located in central Alabama 146 miles west of Atlanta, Georgia and 148 miles southwest of Chattanooga, Tennessee. The Birmingham-Hoover MSA’s economy consists of a diverse mixture of traditional and emerging employment sectors. While metals manufacturing is an important historical sector, finance, insurance and healthcare services and distribution are the region’s core economic sectors, and biological and medical technology, entertainment and diverse manufacturing have been identified as the region’s emerging economic sectors. Large corporations headquartered or with a major presence in the region include Protective Life, HealthSouth Corporation, Vulcan Materials Company and AT&T. Additionally, The University of Alabama at Birmingham (UAB) is Alabama’s largest single-site employer, and Birmingham is home to the largest nonprofit independent research laboratory in the southeastern United States, the Southern Research Institute.

Huntsville. We believe that Huntsville, located in northern Alabama mid-way between Birmingham and Nashville, Tennessee, offers substantial growth as one of the strongest technology economies in the nation, with over 300 companies performing sophisticated government, commercial and university research. Huntsville has one of the highest concentrations of engineers and Ph.D.'s in the United States and has a number of major government programs, including NASA and the U.S. Army. Huntsville also has one of the highest concentrations of *Inc.* 5000 companies in the United States and a number of offices of Fortune 500 companies. Major employers in Huntsville include the U.S. Army/Redstone Arsenal, the Boeing Company, NASA/Marshall Space Flight Center, Intergraph Corporation, ADTRAN, Inc., Northrop Grumman, Cinram, SAIC, DirecTV, Lockheed Martin and Toyota Motor Manufacturing of Alabama.

Montgomery. Montgomery, which is Alabama's capital, is located in south central Alabama between Birmingham and Mobile, Alabama. In addition to housing many Alabama government agencies, Montgomery is also home to Maxwell Gunter Air Force Base, which employs more than 12,500 people and includes Air University, the Air Force's center for leadership and education. In 2005, Hyundai Motor Manufacturing Alabama opened its Montgomery manufacturing plant, which was built with an initial capital investment of over $1.4 billion, and has experienced subsequent expansions. The area has also benefited from Hyundai suppliers that have invested over $550 million, creating 6,000 additional jobs.

Dothan. We believe that the Dothan MSA, which is located in the southeastern corner of Alabama near the Florida panhandle and Georgia state line, continues to hold great potential due to its position as a central agricultural trade hub, its accessibility to large distribution centers, it being home to several large corporations, and what we believe to be a low level of personalized banking services provided by other financial institutions in the area. The Dothan area is home to facilities of several large corporations, including Michelin, Pemco World Aviation, International Paper, Globe Motors and AAA Cooper Transportation. Additionally, the agriculture and agribusiness industries are thriving in the Dothan MSA, and the area is home to many successful farmers and related businesses. In addition, the nearby agricultural communities in northwest Florida and southwest Georgia often use Dothan as their agricultural trade hub. We believe the existence of these industries and the continuing growth in the area allows an opportunity for the bank to increase its presence and penetration in this market.

Pensacola. In April 2011, we opened our first office outside of Alabama in Pensacola, Florida, which is located in the Florida panhandle approximately 50 miles east of Mobile, Alabama, and 40 miles west of Fort Walton, Florida. The Pensacola and northwest Florida economies are driven by the tourism, military, health services, and medical technology industries. Six major military bases are located in northwest Florida: Eglin Air Force Base, Hurlburt Field, Pensacola Whiting Field, Naval Air Station Pensacola, Naval Air Station Panama City and Tyndall Air Force Base. Other major employers in the area include Sacred Heart Health Systems, Baptist Healthcare, West Florida Regional Medical Center, Gulf Power Company (Southern Company), the University of West Florida, International Paper, Ascend Performance Materials (Solutia), GE Wind Energy, Armstrong World Industries and Wayne Dalton Corporation. The Pensacola Bay area is also home to the Andrews Institute for Orthopaedics and Sports Medicine, a world-leading surgical and research center for human performance enhancement. Although this market was negatively impacted by the recent economic downturn, we believe this area has significant long-term growth potential.

Mobile. In July 2012, we opened a loan production office in Mobile, Alabama and, in May 2013, converted the location to a full-service banking office. The Mobile MSA is located in southwest Alabama approximately 31 miles from the Gulf of Mexico and is the largest metropolitan area along the Gulf between New Orleans, Louisiana and Tampa, Florida. The Mobile Bay region has over 23,000 businesses and is a center for finance, healthcare, education, manufacturing, transportation, construction, distribution, retail, trade and technology. With its strategic location, the Port of Mobile serves as a gateway between the southeastern United States and global destinations, and is served by 12 shipping lines offering service throughout the world. Virtually every service for the maritime industry can be found in this 310-plus-year old port city. The aviation/aerospace industry is another of the area’s strong, growing industry sectors. A former U.S. Air Force base located on Mobile Bay near downtown Mobile, Brookley Aeroplex has been transformed into a leading 1,700-acre industrial and trade aeroplex with deepwater port access and the capability of landing the Space Shuttle on one of its runways. The Mobile area is also served by five national Class I railroads.

Nashville. In April 2013, we opened a loan production office in Nashville, Tennessee, the state’s capital. The Nashville MSA is located in central Tennessee and is home to over 1.8 million people and 40,000 businesses. Nashville, known as the “Music City” for its country music heritage, is also home to a diverse healthcare industry and is a center for manufacturing, transportation and technology in the area. Nashville has more than 250 healthcare companies headquartered in the region, including 16 publicly traded healthcare companies with combined employment of nearly 400,000 and $70 billion in global revenue. The Nashville area is also considered a transportation hub, as it is one of only 12 U.S. cities with three major intersecting interstate highways. Notable companies with corporate headquarters in Nashville include HCA Holdings, Nissan North America, Dollar General Corporation, Asurion and Community Health Systems. Although we only recently opened our loan production facility in Nashville, we believe the market has great potential.

Our retail and commercial divisions operate in highly competitive markets. We compete directly in retail and commercial banking markets with other commercial banks, savings and loan associations, credit unions, mortgage brokers and mortgage companies, mutual funds, securities brokers, consumer finance companies, other lenders and insurance companies, locally, regionally and nationally. Many of our competitors compete by using offerings by mail, telephone, computer and/or the Internet. Interest rates, both on loans and deposits, and prices of services are significant competitive factors among financial institutions generally. Providing convenient locations, desired financial products and services, convenient office hours, quality customer service, quick local decision making, a

strong community reputation and long-term personal relationships are all important competitive factors that we emphasize.

In our primary service areas, our five largest competitors are Regions Bank, Wells Fargo Bank, BBVA Compass Bank, BB&T and Synovus Bank. These institutions, as well as other competitors of ours, have greater resources, serve broader geographic markets, have higher lending limits, offer various services that we do not offer and can better afford, and make broader use of, media advertising, support services, and electronic technology than we can. To offset these competitive disadvantages, we depend on our reputation for greater personal service, consistency, and flexibility and the ability to make credit and other business decisions quickly.

Lending Services

Lending Policy

Our lending policies are established to support the credit needs of our primary market areas. Consequently, we aggressively seek high-quality borrowers within a limited geographic area and in competition with other well-established financial institutions in our primary service areas that have greater resources and lending limits than we have.

Loan Approval and Review

Our loan approval policies set various levels of officer lending authority. When the total amount of loans to a single borrower exceeds an individual officer's lending authority, further approval, up to $3.0 million secured, must be obtained from the Regional CEO and/or our senior management team, based on our loan policies.

Commercial Loans

Our commercial lending activity is directed principally toward businesses and professional service firms whose demand for funds falls within our legal lending limits. We make loans to small- and medium-sized businesses in our primary service areas for the purpose of upgrading plant and equipment, buying inventory and for general working capital. Typically, targeted business borrowers have annual sales between $2 million and $250 million. This category of loans includes loans made to individual, partnership or corporate borrowers, and such loans are obtained for a variety of business purposes. We offer a variety of commercial lending products to meet the needs of business and professional service firms in our service areas. These commercial lending products include seasonal loans, bridge loans and term loans for working capital, expansion of the business, or acquisition of property, plant and equipment. We also offer commercial lines of credit. The repayment terms of our commercial loans will vary according to the needs of each customer.

Our commercial loans usually will be collateralized. Generally, collateral consists of business assets, including accounts receivable, inventory, equipment, or real estate. Collateral is subject to the risk that we may have difficulty converting it to a liquid asset if necessary, as well as risks associated with degree of specialization, mobility and general collectability in a default situation. To mitigate this risk, we underwrite collateral to strict standards, including valuations and general acceptability based on our ability to monitor its ongoing condition and value.

We underwrite our commercial loans primarily on the basis of the borrower's cash flow, ability to service debt, and degree of management expertise. As a general practice, we take as collateral a security interest in any available real estate, equipment or personal property. Under limited circumstances, we may make commercial loans on an unsecured basis. This type loan may be subject to many different types of risks, including fraud, bankruptcy, economic downturn, deteriorated or non-existent collateral, and changes in interest rates such as have occurred in the recent economic recession and credit market crisis. Perceived risks may differ depending on the particular industry in which a borrower operates. General risks to an industry, such as the recent economic recession and credit market crisis, or to a particular segment of an industry are monitored by senior management on an ongoing basis. When warranted, loans to individual borrowers who may be at risk due to an industry condition may be more closely analyzed and reviewed by the credit review committee or board of directors. Commercial and industrial borrowers are required to submit financial statements to us on a regular basis. We analyze these statements, looking for weaknesses and trends, and will assign the loan a risk grade accordingly. Based on this risk grade, the loan may receive an increased degree of scrutiny

by management, up to and including additional loss reserves being required.

Real Estate Loans

We make commercial real estate loans, construction and development loans and residential real estate loans.

Commercial Real Estate. Commercial real estate loans are generally limited to terms of five years or less, although payments are usually structured on the basis of a longer amortization. Interest rates may be fixed or adjustable, although rates generally will not be fixed for a period exceeding five years. In addition, we generally will require personal guarantees from the principal owners of the property supported by a review by our management of the principal owners' personal financial statements.

Commercial real estate lending presents risks not found in traditional residential real estate lending. Repayment is dependent upon successful management and marketing of properties and on the level of expense necessary to maintain the property. Repayment of these loans may be adversely affected by conditions in the real estate market or the general economy. Also, commercial real estate loans typically involve relatively large loan balances to a single borrower. To mitigate these risks, we closely monitor our borrower concentration. These loans generally have shorter maturities than other loans, giving us an opportunity to reprice, restructure or decline renewal. As with other loans, all commercial real estate loans are graded depending upon strength of credit and performance. A higher risk grade will bring increased scrutiny by our management, the credit review committee and the board of directors.

Construction and Development Loans. We make construction and development loans both on a pre-sold and speculative basis. If the borrower has entered into an agreement to sell the property prior to beginning construction, then the loan is considered to be on a pre-sold basis. If the borrower has not entered into an agreement to sell the property prior to beginning construction, then the loan is considered to be on a speculative basis. Construction and development loans are generally made with a term of 12 to 24 months, and interest is paid monthly. The ratio of the loan principal to the value of the collateral as established by independent appraisal typically will not exceed 80% of residential construction loans. Speculative construction loans will be based on the borrower's financial strength and cash flow position. Development loans are generally limited to 75% of appraised value. Loan proceeds will be disbursed based on the percentage of completion and only after the project has been inspected by an experienced construction lender or third-party inspector. During times of economic stress, this type loan has typically had a greater degree of risk than other loan types, as has been evident in the recent credit crisis.

Beginning in 2008, there have been numerous construction loan defaults among many commercial bank loan portfolios, including a number of Alabama-based banks. To mitigate the risk of such defaults in our portfolio, the board of directors and management tracks and monitors these loans closely. Total construction loans increased $56.9 million in 2014. Our allocation of loan loss reserve for these loans increased $0.3 million to $6.4 million at December 31, 2014 compared to $6.1 million at the end 2013. Charge-offs for construction loans decreased from $4.8 million for 2013 to $1.3 million for 2014, and the overall quality of the construction loan portfolio has improved with $5.7 million rated as substandard at December 31, 2014 compared to $9.2 million at December 31, 2013.

Residential Real Estate Loans. Our residential real estate loans consist primarily of residential second mortgage loans, residential construction loans and traditional mortgage lending for one-to-four family residences. We will originate fixed-rate mortgages with long-term maturities. The majority of our fixed-rate loans are sold in the secondary mortgage market. All loans are made in accordance with our appraisal policy, with the ratio of the loan principal to the value of collateral as established by independent appraisal generally not exceeding 80%. Risks associated with these loans are generally less significant than those of other loans and involve fluctuations in the value of real estate, bankruptcies, economic downturn and customer financial problems. Real estate has recently experienced a period of declining prices which negatively affects real estate collateralized loans, but this negative effect has to date been more prevalent in regions of the United States other than our primary service areas; however, homes in our primary service areas may experience significant price declines in the future. We have not made and do not expect to make any "Alt-A" or subprime loans.

Consumer Loans

We offer a variety of loans to retail customers in the communities we serve. Consumer loans in general carry a moderate degree of risk compared to other loans. They are generally more risky than traditional residential real estate loans but less risky than commercial loans. Risk of default is usually determined by the well-being of the local economies. During times of economic stress, there is usually some level of job loss both nationally and locally, which directly affects the ability of the consumer to repay debt. Risk on consumer-type loans is generally managed though policy limitations on debt levels consumer borrowers may carry and limitations on loan terms and amounts depending

upon collateral type.

Our consumer loans include home equity loans (open- and closed-end), vehicle financing, loans secured by deposits, and secured and unsecured personal loans. These various types of consumer loans all carry varying degrees of risk.

Commitments and Contingencies

As of December 31, 2014, we had commitments to extend credit beyond current fundings of approximately $1.2 billion, had issued standby letters of credit in the amount of approximately $33.3 million, and had commitments for credit card arrangements of approximately $45.2 million.

Policy for Determining the Loan Loss Allowance

The allowance for loan losses represents our management's assessment of the risk associated with extending credit and its evaluation of the quality of the loan portfolio. In calculating the adequacy of the loan loss allowance, our management evaluates the following factors:

- the asset quality of individual loans;
- changes in the national and local economy and business conditions/development, including underwriting standards, collections, and charge-off and recovery practices;
- changes in the nature and volume of the loan portfolio;
- changes in the experience, ability and depth of our lending staff and management;

- changes in the trend of the volume and severity of past-due loans and classified loans, and trends in the volume of non-accrual loans, troubled debt restructurings and other modifications, as has occurred in the residential mortgage markets and particularly for residential construction and development loans;

- possible deterioration in collateral segments or other portfolio concentrations;

- historical loss experience (when available) used for pools of loans (i.e. collateral types, borrowers, purposes, etc.);

- changes in the quality of our loan review system and the degree of oversight by our board of directors; and

- the effect of external factors such as competition and the legal and regulatory requirement on the level of estimated credit losses in our current loan portfolio.

These factors are evaluated quarterly, and changes in the asset quality of individual loans are evaluated as needed.

We assign all of our loans individual risk grades when they are underwritten. We have established minimum general reserves based on the risk grade of the loan. We also apply general reserve factors based on historical losses, management’s experience and common industry and regulatory guidelines.

After a loan is underwritten and booked, it is monitored by the account officer, management, internal loan review, and representatives of our independent external loan review firm over the life of the loan. Payment performance is monitored monthly for the entire loan portfolio; account officers contact customers during the regular course of business and may be able to ascertain whether weaknesses are developing with the borrower; independent loan consultants perform a review annually; and federal and state banking regulators perform annual reviews of the loan portfolio. If we detect weaknesses that have developed in an individual loan relationship, we downgrade the loan and assign higher reserves based upon management’s assessment of the weaknesses in the loan that may affect full collection of the debt. We have established a policy to discontinue accrual of interest (non-accrual status) after any loan has become 90 days delinquent as to payment of principal or interest unless the loan is considered to be well collateralized and is actively in process of collection. In addition, a loan will be placed on non-accrual status before it becomes 90 days delinquent if management believes that the borrower’s financial condition is such that the collection of interest or principal is doubtful. Interest previously accrued but uncollected on such loans is reversed and charged against current income when the receivable is determined to be uncollectible. Interest income on non-accrual loans is recognized only as received. If a loan will not be collected in full, we increase the allowance for loan losses to reflect our management’s estimate of any potential exposure or loss.

Our net loan losses to average total loans decreased to 0.17% for the year ended December 31, 2014 from 0.33% for the year ended December 31, 2013, which was up from 0.24% for the year ended December 31, 2012. Historical

performance, however, is not an indicator of future performance, and our future results could differ materially. As of December 31, 2014, we had $9.1 million of non-accrual loans, of which 91% are secured real estate loans. We have allocated approximately $6.4 million of our allowance for loan losses to real estate construction, acquisition and development, and lot loans, $16.1 million to commercial and industrial loans, $12.1 million to real estate mortgage loans and $1.0 million to consumer loans and have a total loan loss reserve as of December 31, 2014 of $35.6 million. The loan loss reserve methodology incorporates qualitative factors which are based on management's judgment regarding various external and internal factors including macroeconomic trends, management's assessment of the Company's loan growth prospects and evaluations of internal risk controls. Our management believes, based upon historical performance, known factors, overall judgment, and regulatory methodologies, that the current methodology used to determine the adequacy of the allowance for loan losses is reasonable, including after considering the effect of the current residential housing market defaults and business failures (particularly of real estate developers) plaguing financial institutions in general.

Our allowance for loan losses is also subject to regulatory examinations and determinations as to adequacy, which may take into account such factors as the methodology used to calculate the allowance for loan losses and the size of the allowance for loan losses in comparison to a group of peer banks identified by the regulators. During their routine examinations of banks, regulatory agencies may require a bank to make additional provisions to its allowance for loan losses when, in the opinion of the regulators, credit evaluations and allowance for loan loss methodology differ materially from those of management.

While it is our policy to charge off in the current period loans for which a loss is considered probable, there are additional risks of future losses that cannot be quantified precisely or attributed to particular loans or classes of loans. Because these risks include the state of the economy, our management's judgment as to the adequacy of the allowance is necessarily approximate and imprecise.

Investments

In addition to loans, we purchase investments in securities, primarily in mortgage-backed securities and state and municipal securities. No investment in any of those instruments will exceed any applicable limitation imposed by law or regulation. Our board of directors reviews the investment portfolio on an ongoing basis in order to ensure that the investments conform to the policy as set by the board of directors. Our investment policy provides that no more than 60% of our total investment portfolio may be composed of municipal securities. All securities held are traded in liquid markets, and we have no auction-rate securities. We had no investments in any one security, restricted or liquid, in excess of 10% of our stockholders' equity at December 31, 2014.

Deposit Services

We seek to establish solid core deposits, including checking accounts, money market accounts, savings accounts and a variety of certificates of deposit and IRA accounts. We currently have no brokered deposits. To attract deposits, we employ an aggressive marketing plan throughout our service areas that features a broad product line and competitive services. The primary sources of core deposits are residents of, and businesses, and their employees located in, our market areas. We have obtained deposits primarily through personal solicitation by our officers and directors, through reinvestment in the community, and through our stockholders, who have been a substantial source of deposits and referrals. We make deposit services accessible to customers by offering direct deposit, wire transfer, night depository, banking-by-mail and remote capture for non-cash items. The Bank is a member of the FDIC, and thus our deposits are FDIC-insured.

Other Banking Services

Given client demand for increased convenience and account access, we offer a range of products and services, including 24-hour telephone banking, direct deposit, Internet banking, mobile banking, traveler's checks, safe deposit boxes, attorney trust accounts and automatic account transfers. We also participate in a shared network of automated teller machines and a debit card system that our customers are able to use throughout Alabama and in other states and, in certain accounts subject to certain conditions, we rebate to the customer the ATM fees automatically after each business day. Additionally, we offer Visa® credit cards.

Asset, Liability and Risk Management

We manage our assets and liabilities with the aim of providing an optimum and stable net interest margin, a profitable after-tax return on assets and return on equity, and adequate liquidity. These management functions are conducted within the framework of written loan and investment policies. To monitor and manage the interest rate margin and related interest rate risk, we have established policies and procedures to monitor and report on interest rate risk, devise strategies to manage interest rate risk, monitor loan originations and deposit activity and approve all pricing strategies. We attempt to maintain a balanced position between rate-sensitive assets and rate-sensitive liabilities. Specifically, we chart assets and liabilities on a matrix by maturity, effective duration, and interest adjustment period, and endeavor to manage any gaps in maturity ranges.

Seasonality and Cycles

We do not consider our commercial banking business to be seasonal.

Employees

We had 298 full-time equivalent employees as of December 31, 2014. We consider our employee relations to be good, and we have no collective bargaining agreements with any employees.

Supervision and Regulation

Both we and our bank are subject to extensive state and federal banking laws and regulations that impose restrictions on and provide for general regulatory oversight of our operations. These laws and regulations require compliance with various consumer protection provisions applicable to lending, deposits, brokerage and fiduciary activities. They also impose capital adequacy requirements and restrict our ability to repurchase our stock and receive dividends from our bank. These laws and regulations generally are intended to protect customers, rather than stockholders. The following discussion describes material elements of the regulatory framework that applies to us. However, the description below is not intended to summarize all laws and regulations applicable to us.

Bank Holding Company Regulation

Since we own all of the capital stock of the bank, we are a bank holding company under the federal Bank Holding Company Act of 1956, as amended (the "BHC Act"). As a result, we are primarily subject to the supervision, examination and reporting requirements of the BHC Act and the regulations of the Federal Reserve.

Acquisition of Banks

The BHC Act requires every bank holding company to obtain the Federal Reserve's prior approval before:

- acquiring direct or indirect ownership or control of any voting shares of any bank if, after the acquisition, the bank holding company will, directly or indirectly, own or control more than 5% of the bank's voting shares;

- acquiring all or substantially all of the assets of any bank; or

- merging or consolidating with any other bank holding company.

Additionally, the BHC Act provides that the Federal Reserve may not approve any of these transactions if such transaction would result in or tend to create a monopoly or substantially lessen competition or otherwise function as a restraint of trade, unless the anti-competitive effects of the proposed transaction are clearly outweighed by the public interest in meeting the convenience and needs of the community to be served. The Federal Reserve is also required to consider the financial and managerial resources and future prospects of the bank holding companies and banks concerned and the convenience and needs of the community to be served. The Federal Reserve's consideration of financial resources generally focuses on capital adequacy, which is discussed in the section titled *"—Bank Regulation and Supervision – Capital Adequacy."*

Under the BHC Act, if adequately capitalized and adequately managed, we or any other bank holding company located in Alabama may purchase a bank located outside of Alabama. Conversely, an adequately capitalized and adequately managed bank holding company located outside of Alabama may purchase a bank located inside Alabama. In each case, however, restrictions may be placed on the acquisition of a bank that has only been in existence for a limited amount of time or will result in specified concentrations of deposits.

Change in Bank Control

Subject to various exceptions, the BHC Act and the Change in Bank Control Act, together with related regulations, require Federal Reserve approval prior to any person's or company's acquiring "control" of a bank holding company. Under a rebuttable presumption established by the Federal Reserve, the acquisition of 10% or more of a class of voting stock of a bank holding company would, under the circumstances set forth in the presumption, constitute acquisition of control of the bank holding company. In addition, any person or group of persons must obtain the approval of the Federal Reserve under the BHC Act before acquiring 25% (5% in the case of an acquirer that is already a bank holding company) or more of the outstanding common stock of a bank holding company, or otherwise obtaining control or a "controlling influence" over the bank holding company.

Permitted Activities

Under the BHC Act, a bank holding company is generally permitted to engage in or acquire direct or indirect control of more than 5% of the voting shares of any company engaged in the following activities:

- banking or managing or controlling banks; and
- any activity that the Federal Reserve determines to be so closely related to banking as to be a proper incident to the business of banking.

Activities that the Federal Reserve has found to be so closely related to banking as to be a proper incident to the business of banking include:

- factoring accounts receivable;
- making, acquiring, brokering or servicing loans and usual related activities;
- leasing personal or real property;
- operating a non-bank depository institution, such as a savings association;
- trust company functions;
- financial and investment advisory activities;
- discount securities brokerage activities;
- underwriting and dealing in government obligations and money market instruments;
- providing specified management consulting and counseling activities;
- performing selected data processing services and support services;
- acting as an agent or broker in selling credit life insurance and other types of insurance in connection with credit transactions; and
- performing selected insurance underwriting activities.

Despite prior approval, the Federal Reserve may order a bank holding company or its subsidiaries to terminate any of these activities or to terminate its ownership or control of any subsidiary when it has reasonable cause to believe that the bank holding company's continued ownership, activity or control constitutes a serious risk to the financial safety, soundness, or stability of it or any of its bank subsidiaries.

In addition to the permissible bank holding company activities listed above, a bank holding company may qualify and elect to become a financial holding company, permitting the bank holding company to engage in activities that are financial in nature or incidental or complementary to financial activity. The BHC Act expressly lists the following

activities as financial in nature:

- lending, trust and other banking activities;
- insuring, guaranteeing, or indemnifying against loss or harm, or providing and issuing annuities, and acting as principal, agent, or broker for these purposes, in any state;
- providing financial, investment, or advisory services;
- issuing or selling instruments representing interests in pools of assets permissible for a bank to hold directly;

14

- underwriting, dealing in or making a market in securities;
- other activities that the Federal Reserve may determine to be so closely related to banking or managing or controlling banks as to be a proper incident to managing or controlling banks;
- foreign activities permitted outside of the United States if the Federal Reserve has determined them to be usual in connection with banking operations abroad;
- merchant banking through securities or insurance affiliates; and
- insurance company portfolio investments.

For us to qualify to become a financial holding company, the bank and any other depository institution subsidiary of ours must be well-capitalized and well-managed and must have a Community Reinvestment Act rating of at least “satisfactory”. Additionally, we must file an election with the Federal Reserve to become a financial holding company and must provide the Federal Reserve with 30 days written notice prior to engaging in a permitted financial activity. We have not elected to become a financial holding company at this time.

Support of Subsidiary Institutions

The Federal Deposit Insurance Act and Federal Reserve policy require a bank holding company to act as a source of financial and managerial strength to its bank subsidiaries and to take measures to preserve and protect its bank subsidiaries in situations where additional investments in a troubled bank may not otherwise be warranted. In addition, where a bank holding company has more than one bank or thrift subsidiary, each of the bank holding company’s subsidiary depository institutions is responsible for any losses to the FDIC as a result of an affiliated depository institution’s failure. As a result, a bank holding company may be required to loan money to a bank subsidiary in the form of subordinate capital notes or other instruments which qualify as capital under bank regulatory rules. However, any loans from the holding company to such subsidiary banks likely will be unsecured and subordinated to such bank’s depositors and perhaps to other creditors of the bank.

Repurchase or Redemption of Securities

A bank holding company is generally required to give the Federal Reserve prior written notice of any purchase or redemption of its own then-outstanding equity securities if the gross consideration for the purchase or redemption, when combined with the net consideration paid for all such purchases or redemptions during the preceding 12 months,

is equal to 10% or more of the company's consolidated net worth. The Federal Reserve may disapprove such a purchase or redemption if it determines that the proposal would constitute an unsafe and unsound practice, or would violate any law, regulation, Federal Reserve order or directive, or any condition imposed by, or written agreement with, the Federal Reserve. The Federal Reserve has adopted an exception to this approval requirement for well-capitalized bank holding companies that meet certain conditions.

Bank Regulation and Supervision

The bank is subject to extensive state and federal banking laws and regulations that impose restrictions on and provide for general regulatory oversight of our operations. These laws and regulations are generally intended to protect the bank's customers, rather than our stockholders. The following discussion describes the material elements of the regulatory framework that applies to the bank.

Since the bank is a commercial bank chartered under the laws of the State of Alabama and is not a member of the Federal Reserve System, it is primarily subject to the supervision, examination and reporting requirements of the FDIC and the Alabama Banking Department. The FDIC and the Alabama Banking Department regularly examine the bank's operations and have the authority to approve or disapprove mergers, the establishment of branches and similar corporate actions. Both regulatory agencies have the power to prevent the development or continuance of unsafe or unsound banking practices or other violations of law. Additionally, the bank's deposits are insured by the FDIC to the maximum extent provided by law. The bank is also subject to numerous state and federal statutes and regulations that affect its business, activities and operations.

Branching

Under current Alabama law, the bank may open branch offices throughout Alabama with the prior approval of the Alabama Banking Department. In addition, with prior regulatory approval, the bank may acquire branches of existing banks located in Alabama. While prior law imposed various limits on the ability of banks to establish new branches in states other than their home state, the Dodd-Frank Act allows a bank to branch into a new state by acquiring a branch of an existing institution or by setting up a new branch, without merging with an existing institution in the target state, if, under the laws of the state in which the branch is to be located, a state bank chartered by that state would be permitted to establish the branch. This makes it much simpler for banks to open *de novo* branches in other states. We opened our Pensacola, Florida branch using this mechanism.

FDIC Insurance Assessments

The bank's deposits are insured by the FDIC to the full extent provided in the Federal Deposit Insurance Act, and the bank pays assessments to the FDIC for that coverage. Under the FDIC's risk-based deposit insurance assessment system, an insured institution's deposit insurance premium is computed by multiplying the institution's assessment base by the institution's assessment rate. The following information applies to an institution's assessment base and assessment rate:

- Assessment Base. An institution's assessment base equals the institution's average consolidated total assets during a particular assessment period, minus the institution's average tangible equity capital (that is, Tier 1 capital) during such period.

- Assessment Rate. An institution's assessment rate is assigned by the FDIC on a quarterly basis. To assign an assessment rate, the FDIC designates an institution as falling into one of four risk categories, or as being a large and highly complex financial institution. The FDIC determines an institution's risk category based on the level of the institution's capitalization and on supervisory evaluations provided to the FDIC by the institution's primary federal regulator. Each risk category designation contains upward and downward adjustment factors based on long-term unsecured debt and brokered deposits. Assessment rates currently range from 0.025% per annum for an institution in the lowest risk category with the maximum downward adjustment, to 0.45% per annum for an institution in the highest risk category with the maximum upward adjustment. For the fourth quarter of 2014, the bank's assessment rate was set at $0.0125, or $0.05 annually, per $100 of assessment base.

In addition to its risk-based insurance assessments, the FDIC also imposes Financing Corporation ("FICO") assessments to help pay the $780 million in annual interest payments on the $8 billion of bonds issued in the late 1980s as part of the government rescue of the savings and loan industry. For the fourth quarter of 2014, the FICO assessment was equal to $0.0015, or $0.0060 annually, per $100 of assessment base. These assessments will continue until the bonds mature in 2019.

The FDIC is responsible for maintaining the adequacy of the Deposit Insurance Fund, and the amount the bank pays for deposit insurance is affected not only by the risk the bank poses to the Deposit Insurance Fund, but also by the adequacy of the fund to cover the risk posed by all insured institutions. In recent years, systemic economic problems and changes in law have put pressure on the Deposit Insurance Fund. In this regard, from 2009 to 2012, the United States experienced an unusually high number of bank failures, resulting in significant losses to the Deposit Insurance Fund. Moreover, the Dodd-Frank Act permanently increased the standard maximum deposit insurance amount from $100,000 to $250,000, and raised the minimum required Deposit Insurance Fund reserve ratio (i.e., the ratio of the amount on reserve in the Deposit Insurance Fund to the total estimated insured deposits) from 1.15% to 1.35%. To support the Deposit Insurance Fund in light of these types of pressures, the FDIC took several actions in 2009 to supplement the revenues received from its annual deposit insurance premium assessments. Such actions included imposing a one-time special assessment on insured institutions and requiring that insured institutions prepay their regular quarterly assessments for the fourth quarter of 2009 through 2012. The FDIC’s possible need to increase assessment rates, charge additional one-time assessment fees, and take other extraordinary actions to support the Deposit Insurance Fund is generally considered to be greater in the current economic climate. If the FDIC were to take these types of actions in the future, they could have a negative impact on the bank’s earnings.

Termination of Deposit Insurance

The FDIC may terminate its insurance of deposits of a bank if it finds that the bank has engaged in unsafe or unsound practices, is in an unsafe or unsound condition to continue operations, or has violated any applicable law, regulation, rule, order or condition imposed by the FDIC.

Liability of Commonly Controlled Depository Institutions

Under the Federal Deposit Insurance Act, an FDIC-insured depository institution can be held liable for any loss incurred by, or reasonably expected, to be incurred by, the FDIC in connection with (i) the default of a commonly controlled FDIC-insured depository institution or (ii) any assistance provided by the FDIC to any commonly controlled FDIC-insured depository institution in danger of default. "Default" is defined generally as the appointment of a conservator or receiver, and "in danger of default" is defined generally as the existence of certain conditions indicating that a default is likely to occur in the absence of regulatory assistance. The FDIC's claim for damage is superior to claims of stockholders of the insured depository institution but is subordinate to claims of depositors, secured creditors, other general and senior creditors, and holders of subordinated debt (other than affiliates) of the institution.

Community Reinvestment Act

The Community Reinvestment Act ("CRA") requires that, in connection with examinations of financial institutions within their respective jurisdictions, the Federal Reserve or the FDIC will evaluate the record of each financial institution in meeting the needs of its local community, including low and moderate-income neighborhoods. These factors are also considered in evaluating mergers, acquisitions, and applications to open an office or facility. Failure to adequately meet these criteria could impose additional requirements and limitations on the bank. Additionally, we must publicly disclose the terms of various CRA-related agreements.

Interest Rate Limitations

Interest and other charges collected or contracted for by the bank are subject to state usury laws and federal laws concerning interest rates.

Federal Laws Applicable to Consumer Credit and Deposit Transactions

The bank's loan and deposit operations are subject to a number of federal consumer protection laws, including:

· the Federal Truth-In-Lending Act, governing disclosures of credit terms to consumer borrowers;

- the Home Mortgage Disclosure Act, requiring financial institutions to provide information to enable the public and public officials to determine whether a financial institution is fulfilling its obligation to help meet the housing needs of the community it serves;

- the Equal Credit Opportunity Act, prohibiting discrimination on the basis of race, color, religion, national origin, sex, marital status or certain other prohibited factors in all aspects of credit transactions;

- the Fair Credit Reporting Act, governing the use and provision of information to credit reporting agencies;

- the Fair Debt Collection Act, governing the manner in which consumer debts may be collected by debt collectors;

- the Servicemembers' Civil Relief Act, governing the repayment terms of, and property rights underlying, secured obligations of persons in military service;

- rules and regulations of the various federal agencies charged with the responsibility of implementing these federal laws;

- the Right to Financial Privacy Act, which imposes a duty to maintain confidentiality of consumer financial records and prescribes procedures for complying with administrative subpoenas of financial records; and

- the Electronic Funds Transfer Act and Regulation E issued by the Consumer Financial Protection Bureau to implement that act, which govern automatic deposits to and withdrawals from deposit accounts and customers' rights and liabilities arising from the use of automated teller machines and other electronic banking services.

Capital Adequacy

The federal banking regulators view capital levels as important indicators of an institution's financial soundness. In this regard, we and the bank are required to comply with the capital adequacy standards established by the Federal Reserve (in the case of ServisFirst Bancshares, Inc.) and the FDIC and the Alabama Banking Department (in the case of the bank). The Federal Reserve has established a risk-based and a leverage measure of capital adequacy for bank holding companies. The FDIC has established substantially similar measures for banks.

The risk-based capital standards are designed to make regulatory capital requirements more sensitive to differences in risk profiles among banks and bank holding companies, to account for off-balance-sheet exposure, and to minimize disincentives for holding liquid assets. Assets and off-balance-sheet items, such as letters of credit and unfunded loan commitments, are assigned to broad risk categories, each with appropriate risk weights. The resulting capital ratios represent capital as a percentage of total risk-weighted assets and off-balance-sheet items.

Failure to meet capital guidelines could subject a bank or bank holding company to a variety of enforcement remedies, including issuance of a capital directive, the termination of deposit insurance by the FDIC, a prohibition on accepting brokered deposits, and certain other restrictions on its business. Significant additional restrictions can be imposed on FDIC-insured depository institutions that fail to meet applicable capital requirements.

The current risk-based capital guidelines, commonly referred to as Basel I, are based upon the 1988 capital accord of the Basel Committee on Banking Supervision ("Basel Committee"), an international committee of central banks and bank supervisors, as implemented by the U.S. federal banking agencies. As discussed further below, the federal banking agencies have adopted separate risk-based capital guidelines for so-called "core banks" based upon the Revised Framework for the International Convergence of Capital Measurement and Capital Standards ("Basel II") issued by the Basel Committee in November 2005, and recently adopted rules implementing the revised standards referred to as Basel III.

Basel I

Under Federal Reserve regulations implementing the Basel I standards, the minimum guideline for the ratio of total capital to risk-weighted assets is 8%. Total capital consists of two components, Tier 1 capital and Tier 2 capital. Tier 1

capital generally consists of common stock, minority interests in the equity accounts of consolidated subsidiaries, noncumulative perpetual preferred stock, and a limited amount of qualifying cumulative perpetual preferred stock, less goodwill and other specified intangible assets. Tier 1 capital must equal at least 4% of risk-weighted assets. Tier 2 capital generally consists of subordinated debt, other preferred stock, and a limited amount of loan loss reserves. The total amount of Tier 2 capital is limited to 100% of Tier 1 capital. At December 31, 2014, our consolidated ratio of total capital to risk-weighted assets was 13.38%, and our ratio of Tier 1 capital to risk-weighted assets was 11.75%.

In addition, the Federal Reserve has established minimum leverage ratio guidelines for bank holding companies. These guidelines provide for a minimum ratio of Tier 1 capital to average assets, less goodwill and other specified intangible assets, of 3% for bank holding companies that meet specified criteria, including having the highest regulatory rating and implementing the Federal Reserve’s risk-based capital measure for market risk. All other bank holding companies generally are required to maintain a leverage ratio of at least 4%. At December 31, 2014, our leverage ratio was 9.91%. The guidelines also provide that bank holding companies experiencing internal growth or making acquisitions will be expected to maintain strong capital positions substantially above the minimum supervisory levels without reliance on intangible assets. The Federal Reserve considers the leverage ratio and other indicators of capital strength in evaluating proposals for expansion or new activities.

As of December 31, 2014, the bank’s most recent notification from the FDIC categorized the bank as well-capitalized under the regulatory framework for prompt corrective action. To remain categorized as well-capitalized, the bank must maintain minimum total risk-based, Tier 1 risk-based, and Tier 1 leverage ratios of 10%, 6% and 5%, respectively. Our bank was well-capitalized under the prompt corrective action provisions as of December 31, 2014.

In addition to the foregoing federal requirements, the bank is subject to a requirement of the Alabama Banking Department that the bank maintain a leverage ratio of 8%. At December 31, 2014, the bank's leverage ratio was 8.92%.

Basel II

Under the final U.S. Basel II rules issued by the federal banking agencies, there are a small number of "core" banking organizations that have been required to use the advanced approaches under Basel II for calculating risk-based capital related to credit risk and operational risk, instead of the methodology reflected in the regulations effective prior to adoption of Basel II. The rules also require core banking organizations to have rigorous processes for assessing overall capital adequacy in relation to their total risk profiles, and to publicly disclose certain information about their risk profiles and capital adequacy. Neither we nor the bank are among the core banking organizations required to use Basel II advanced approaches.

Basel III

On December 16, 2010, the Basel Committee released its final framework for strengthening international capital and liquidity regulation, known as Basel III. The Basel III calibration and phase-in arrangements were previously endorsed by the Seoul G20 Leaders Summit in November 2010. Under these standards, when fully phased-in on January 1, 2019, banking institutions would be required to satisfy three risk-based capital ratios:

- A new common equity tier 1 capital to risk-weighted assets ratio of at least 7.0%, inclusive of a 4.5% minimum common equity tier 1 capital ratio, net of regulatory deductions, and a new 2.5% "capital conservation buffer" of common equity to risk-weighted assets;
- A tier 1 capital ratio of at least 8.5%, inclusive of the 2.5% capital conservation buffer; and
- A total capital ratio of at least 10.5%, inclusive of the 2.5% capital conservation buffer.

Basel III places more emphasis than current capital adequacy requirements on common equity tier 1 capital, or "CET1", which is predominately made up of retained earnings and common stock instruments. Basel III also introduces a capital conservation buffer, which is designed to absorb losses during periods of economic stress. Banking institutions with a CET1 ratio above the minimum but below the capital conservation buffer may face constraints on dividends, equity repurchases, and compensation based on the amount of such shortfall. The Basel Committee also announced that a "countercyclical buffer" of 0% to 2.5% of CET1 or other loss-absorbing capital "will be implemented according to national circumstances" as an "extension" of the conservation buffer during periods of excess credit growth.

Basel III also introduced a non-risk adjusted tier 1 leverage ratio of 3%, based on a measure of total exposure rather than total assets. The Basel Committee had initially planned for member nations to begin implementing the Basel III requirements by January 1, 2013, with full implementation by January 1, 2019. On November 9, 2012, U.S. regulators announced that implementation of Basel III's first requirements would be delayed.

United States Implementation of Basel III

In July 2013, the federal banking agencies published final rules (the "Basel III Capital Rules") that revised their risk-based and leverage capital requirements and their method for calculating risk-weighted assets to implement, in part, agreements reached by the Basel Committee and certain provisions of the Dodd-Frank Act. The Basel III Capital Rules will apply to banking organizations, including us and the bank.

Among other things, the Basel III Capital Rules: (i) introduce CET1; (ii) specify that tier 1 capital consists of CET1 and additional financial instruments satisfying specified requirements that permit inclusion in tier 1 capital; (iii) define CET1 narrowly by requiring that most deductions or adjustments to regulatory capital measures be made to CET1 and not to the other components of capital; and (iv) expand the scope of the deductions or adjustments from capital as compared to the existing regulations. The Basel III Capital Rules also provide a permanent exemption from the proposed phase out of existing trust preferred securities and cumulative perpetual preferred stock from regulatory capital for banking organizations with less than $15 billion in total consolidated assets as of December 31, 2009.

The Basel III Capital Rules provide for the following minimum capital to risk-weighted assets ratios:

- 4.5% based upon CET1;
- 6.0% based upon tier 1 capital; and
- 8.0% based upon total regulatory capital.

A minimum leverage ratio (tier 1 capital as a percentage of total assets) of 4.0% is also required under the Basel III Capital Rules (even for highly rated institutions). The Basel III Capital Rules additionally require institutions to retain a capital conservation buffer of 2.5% above these required minimum capital ratio levels. Banking organizations that fail to maintain the minimum 2.5% capital conservation buffer could face restrictions on capital distributions or discretionary bonus payments to executive officers.

As a result of the enactment of the Basel III Capital Rules, we and the bank could be subject to increased required capital levels. The Basel III Capital Rules become effective as applied to us and the bank on January 1, 2015, with a phase in period that generally extends from January 1, 2015, through January 1, 2019.

The ultimate impact of the new capital standards on us and the bank is currently being reviewed and will depend on a number of factors, including the implementation of the new Basel III Capital Rules and any additional related rulemaking by the U.S. banking agencies.

Prompt Corrective Action

The Federal Deposit Insurance Corporation Improvement Act of 1991 establishes a system of “prompt corrective action” to resolve the problems of undercapitalized financial institutions. Under this system, the federal banking regulators have established five capital categories (well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized and critically undercapitalized) into which all institutions are placed. The federal banking agencies have also specified by regulation the relevant capital thresholds for each of those categories. When effective, the Basel III Capital Rules will amend those thresholds to reflect both (i) the generally heightened requirements for regulatory capital ratios, and (ii) the introduction of the CET1 capital measure. At December 31, 2014, the bank qualified for the well-capitalized category.

Federal banking regulators are required to take various mandatory supervisory actions and are authorized to take other discretionary actions with respect to institutions in the three undercapitalized categories. The severity of the action depends upon the capital category in which the institution is placed. Generally, subject to a narrow exception, the banking regulator must appoint a receiver or conservator for an institution that is critically undercapitalized.

An institution that is categorized as undercapitalized, significantly undercapitalized, or critically undercapitalized is required to submit an acceptable capital restoration plan to its appropriate federal banking agency. A bank holding company must guarantee that a subsidiary depository institution meets its capital restoration plan, subject to various limitations. The controlling holding company's obligation to fund a capital restoration plan is limited to the lesser of (i) 5% of an undercapitalized subsidiary's assets at the time it became undercapitalized and (ii) the amount required to meet regulatory capital requirements. An undercapitalized institution is also generally prohibited from increasing its average total assets, making acquisitions, establishing any branches or engaging in any new line of business, except under an accepted capital restoration plan or with FDIC approval. The regulations also establish procedures for downgrading an institution to a lower capital category based on supervisory factors other than capital.

Liquidity

Financial institutions are subject to significant regulatory scrutiny regarding their liquidity positions. This scrutiny has increased during recent years, as the economic downturn that began in the late 2000s negatively affected the liquidity of many financial institutions. Various bank regulatory publications, including FDIC Financial Institution Letter FIL-13-2010 (Funding and Liquidity Risk Management) and FDIC Financial Institution Letter FIL-84-2008 (Liquidity Risk Management), address the identification, measurement, monitoring and control of funding and liquidity risk by financial institutions.

Basel III also addresses liquidity management by proposing two new liquidity metrics for financial institutions. The first metric is the "Liquidity Coverage Ratio", and it aims to require a financial institution to maintain sufficient high quality liquid resources to survive an acute stress scenario that lasts for one month. The second metric is the "Net Stable Funding Ratio", and its objective is to require a financial institution to maintain a minimum amount of stable sources relative to the liquidity profiles of the institution's assets, as well as the potential for contingent liquidity needs arising from off-balance sheet commitments, over a one-year horizon.

In the Basel III Capital Rules, the federal banking regulators did not address either the Liquidity Coverage Ratio or the Net Stable Funding Ratio. However, on November 29, 2013, the Federal Reserve, FDIC and Office of the Comptroller of the Currency jointly issued a proposed rule implementing a Liquidity Coverage Ratio requirement in the United States for larger banking organizations. Neither we nor the bank would be subject to such requirement as proposed.

The Liquidity Coverage Ratio and the Net Stable Funding Ratio continue to be monitored for implementation, and we cannot yet provide concrete estimates as to how those requirements, or any other regulatory positions regarding liquidity and funding, might affect us or our bank. However, we note that increased liquidity requirements generally would be expected to cause the bank to invest its assets more conservatively—and therefore at lower yields—than it otherwise might invest. Such lower-yield investments likely would reduce the bank's revenue stream, and in turn its earnings potential.

Payment of Dividends

We are a legal entity separate and distinct from the bank. Our principal source of cash flow, including cash flow to pay dividends to our stockholders, is dividends the bank pays to us as the bank's sole stockholder. Statutory and regulatory limitations apply to the bank's payment of dividends to us as well as to our payment of dividends to our stockholders. The requirement that a bank holding company must serve as a source of strength to its subsidiary banks also results in the position of the Federal Reserve that a bank holding company should not maintain a level of cash dividends to its stockholders that places undue pressure on the capital of its bank subsidiaries or that can be funded only through additional borrowings or other arrangements that may undermine the bank holding company's ability to serve as such a source of strength. Our ability to pay dividends is also subject to the provisions of Delaware corporate law.

The Alabama Banking Department also regulates the bank's dividend payments. Under Alabama law, a state-chartered bank may not pay a dividend in excess of 90% of its net earnings until the bank's surplus is equal to at least 20% of its capital (our bank's surplus currently exceeds 20% of its capital). Moreover, our bank is also required by Alabama law to obtain the prior approval of the Superintendent for its payment of dividends if the total of all dividends declared by the bank in any calendar year will exceed the total of (i) the bank's net earnings (as defined by statute) for that year, plus (ii) its retained net earnings for the preceding two years, less any required transfers to surplus. Based on this, our bank would be limited to paying $129.1 million in dividends as of December 31, 2014. In addition, no dividends, withdrawals or transfers may be made from the bank's surplus without the prior written approval of the Superintendent.

The bank's payment of dividends may also be affected or limited by other factors, such as the requirement to maintain adequate capital above regulatory guidelines. The federal banking agencies have indicated that paying dividends that deplete a depository institution's capital base to an inadequate level would be an unsafe and unsound banking practice. Under the Federal Deposit Insurance Corporation Improvement Act of 1991, a depository institution may not pay any dividends if payment would cause it to become undercapitalized or if it already is undercapitalized. Moreover, the federal agencies have issued policy statements that provide that bank holding companies and insured banks should generally only pay dividends out of current operating earnings. If, in the opinion of the federal banking regulators, the bank were engaged in or about to engage in an unsafe or unsound practice, the federal banking regulators could require, after notice and a hearing, that the bank stop or refrain from engaging in the questioned practice.

Restrictions on Transactions with Affiliates and Insiders

We are subject to Section 23A of the Federal Reserve Act, which places limits on the amount of:

- a bank's loans or extensions of credit to affiliates;
- a bank's investment in affiliates;
- assets a bank may purchase from affiliates, except for real and personal property exempted by the Federal Reserve;
- loans or extensions of credit made by a bank to third parties collateralized by the securities or obligations of affiliates;
- a bank's guarantee, acceptance or letter of credit issued on behalf of an affiliate;

- a bank's transactions with an affiliate involving the borrowing or lending of securities to the extent they create credit exposure to the affiliate; and

- a bank's derivative transactions with an affiliate to the extent they create credit exposure to the affiliate.

The total amount of the above transactions is limited in amount, as to any one affiliate, to 10% of a bank's capital and surplus and, as to all affiliates combined, to 20% of a bank's capital and surplus. In addition to the limitation on the amount of these transactions, certain of the above transactions must also meet specified collateral requirements. The bank must also comply with other provisions designed to avoid the taking of low-quality assets.

We are also subject to Section 23B of the Federal Reserve Act, which, among other things, prohibits an institution from engaging in the above transactions with affiliates unless the transactions are on terms substantially the same, or at least as favorable to the institution or its subsidiaries, as those prevailing at the time for comparable transactions with nonaffiliated companies.

The bank is also subject to restrictions on extensions of credit to its executive officers, directors, principal shareholders and their related interests. These extensions of credit (i) must be made on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with third parties and (ii) must not involve more than the normal risk of repayment or present other unfavorable features. There is also an aggregate limitation on all loans to insiders and their related interests. These loans cannot exceed the institution's total unimpaired capital and surplus, and the FDIC may determine that a lesser amount is appropriate. Insiders are subject to enforcement actions for knowingly accepting loans in violation of applicable restrictions. Alabama state banking laws also have similar provisions.

Lending Limits

Under Alabama law, the amount of loans which may be made by a bank in the aggregate to one person is limited. Alabama law provides that unsecured loans by a bank to one person may not exceed an amount equal to 10% of the capital and unimpaired surplus of the bank or 20% in the case of secured loans. For purposes of calculating these limits, loans to various business interests of the borrower, including companies in which a substantial portion of the stock is owned or partnerships in which a person is a partner, must be aggregated with those made to the borrower individually. Loans secured by certain readily marketable collateral are exempt from these limitations, as are loans secured by deposits and certain government securities.

Commercial Real Estate Concentration Limits

In December 2006, the U.S. bank regulatory agencies issued guidance entitled "Concentrations in Commercial Real Estate Lending, Sound Risk Management Practices" to address increased concentrations in commercial real estate ("CRE") loans. The guidance describes the criteria the agencies will use as indicators to indentify institutions potentially exposed to CRE concentration risk. An institution that has (i) experienced rapid growth in CRE lending, (ii) notable exposure to a specific type of CRE, (iii) total reported loans for construction, land development, and other land representing 100% or more of the institution's capital, or (iv) total CRE loans representing 300% or more of the institution's capital, and the outstanding balance of the institutions CRE portfolio has increased by 50% or more in the prior 36 months, may be identified for further supervisory analysis of the level and nature of its CRE concentration risk.

Privacy

Financial institutions are required to disclose their policies for collecting and protecting non-public personal information of their consumer customers. Consumer customers generally may prevent financial institutions from sharing nonpublic personal information with nonaffiliated third parties except under certain circumstances, such as the processing of transactions requested by the consumer or when the financial institution is jointly offering a product or service with a nonaffiliated financial institution. Additionally, financial institutions generally may not disclose consumer account numbers to any nonaffiliated third party for use in telemarketing, direct mail marketing or other marketing to consumers.

Consumer Credit Reporting

The Fair Credit Reporting Act (the "FCRA") imposes, among other things:

- requirements for financial institutions to develop policies and procedures to identify potential identity theft and, upon the request of a consumer, place a fraud alert in the consumer's credit file stating that the consumer may be the victim of identity theft or other fraud;
- requirements for entities that furnish information to consumer reporting agencies (which would include our bank) to implement procedures and policies regarding the accuracy and integrity of the furnished information and regarding the correction of previously furnished information that is later determined to be inaccurate;
- requirements for mortgage lenders to disclose credit scores to consumers; and
- limitations on the ability of a business that receives consumer information from an affiliate to use that information for marketing purposes.

Anti-Terrorism and Money Laundering Legislation

Our bank is subject to the USA Patriot Act, the Bank Secrecy Act, and the requirements of OFAC. These statutes and related rules and regulations impose requirements and limitations on specified financial transactions and account and other relationships intended to guard against money laundering and terrorism financing. Our bank has established a customer identification program pursuant to Section 326 of the USA Patriot Act and maintains records of cash purchases of negotiable instruments, files reports of certain cash transactions exceeding $10,000 (daily aggregate amount), and reports suspicious activity that might signify money laundering, tax evasion, or other criminal activities pursuant to the Bank Secrecy Act. Our bank otherwise has implemented policies and procedures to comply with the foregoing requirements.

Effect of Governmental Monetary Policies

Our bank's earnings are affected by domestic economic conditions and the monetary and fiscal policies of the United States government and its agencies. The Federal Reserve's monetary policies have had, and are likely to continue to

have, an important impact on the operating results of commercial banks through its power to implement national monetary policy in order, among other things, to curb inflation or combat a recession. The monetary policies of the Federal Reserve affect the levels of bank loans, investments and deposits through its control over the issuance of United States government securities, its regulation of the discount rate applicable to member banks and its influence over reserve requirements to which member banks are subject. We cannot predict, and have no control over, the nature or impact of future changes in monetary and fiscal policies.

Sarbanes-Oxley Act of 2002

The Sarbanes-Oxley Act represents a comprehensive revision of laws affecting corporate governance, accounting obligations and corporate reporting. The Sarbanes-Oxley Act is applicable to all companies with equity securities registered, or that file reports, under the Exchange Act. In particular, the act established (i) requirements for audit committees, including independence, expertise and responsibilities; (ii) responsibilities regarding financial statements for the chief executive officer and chief financial officer of the reporting company and new requirements for them to certify the accuracy of periodic reports; (iii) standards for auditors and regulation of audits; (iv) disclosure and reporting obligations for the reporting company and its directors and executive officers; and (v) civil and criminal penalties for violations of the federal securities laws. The legislation also established a new accounting oversight board to enforce auditing standards and restrict the scope of services that accounting firms may provide to their public company audit clients.

Overdraft Fees

The Federal Reserve has adopted amendments under its Regulation E that impose restrictions on banks' abilities to charge overdraft fees. The rule prohibits financial institutions from charging fees for paying overdrafts on ATM and one-time debit card transactions, unless a consumer consents, or opts in, to the overdraft service for those types of transactions.

Interchange Fees

The Dodd-Frank Act, through a provision known as the Durbin Amendment, required the Federal Reserve to establish standards for interchange fees that are “reasonable and proportional” to the cost of processing the debit card transaction and imposes other requirements on card networks. Institutions like the bank with less than $10 billion in assets are exempt. However, while we are under the $10 billion level that caps income per transaction, we have been affected by federal regulations that prohibit network exclusivity arrangements and routing restrictions. Essentially, issuers and networks must allow transaction processing through a minimum of two unaffiliated networks.

The Volcker Rule

On December 10, 2013, five U.S. financial regulators, including the Federal Reserve and the FDIC, adopted a final rule implementing the so-called “Volcker Rule.” The Volcker Rule was created by Section 619 of the Dodd-Frank Act and prohibits “banking entities” from engaging in “proprietary trading” and making investments and conducting certain other activities with “private equity funds and hedge funds.” Although the final rule provides some tiering of compliance and reporting obligations based on size, the fundamental prohibitions of the Volcker Rule apply to banking entities of any size, including us and the bank. The final rule became effective April 1, 2014, but the Federal Reserve has extended the conformance period for all banking entities until July 21, 2015.

While the final rule and its accompanying materials comprise approximately 1,000 pages, banking entities that do not engage in any of the activities covered by the Volcker Rule (other than with respect to certain U.S. government obligations) are not required to adopt any formal compliance program specific to the Volcker Rule. We have reviewed the scope of the final rule and have concluded that it will not impact our operations.

The Dodd-Frank Act

On July 21, 2010, the Dodd-Frank Act was signed into law. As final rules and regulations implementing the Dodd-Frank Act are adopted, this new law is significantly changing the bank regulatory structure and affecting the lending, deposit, investment, trading and operating activities of financial institutions and their holding companies. The Dodd-Frank Act requires various federal agencies to adopt a broad range of new implementing rules and regulations and to prepare numerous studies and reports for Congress. The federal agencies are given significant discretion in drafting the implementing rules and regulations, and consequently, many of the details and much of the impact of the Dodd-Frank Act may not be known for many years.

A number of the effects of the Dodd-Frank Act are described or otherwise accounted for in various parts of this *Supervision and Regulation* section. The following items provide a brief description of certain other provisions of the Dodd-Frank Act that may be relevant to us and the bank.

- The Dodd-Frank Act created a new Consumer Financial Protection Bureau with broad powers to supervise and enforce consumer protection laws. The Bureau now has broad rule-making authority for a wide range of consumer protection laws that apply to all banks, including the authority to prohibit “unfair, deceptive or abusive” acts and practices. The Bureau has examination and enforcement authority over all banks with more than $10 billion in assets. Institutions with less than $10 billion in assets will continue to be examined for compliance with consumer laws by their primary bank regulator.

- The Dodd-Frank Act imposed new requirements regarding the origination and servicing of residential mortgage loans. The law created a variety of new consumer protections, including limitations on the manner by which loan originators may be compensated and an obligation on the part of lenders to verify a borrower’s “ability to repay” a residential mortgage loan. Final rules implementing these latter statutory requirements were effective in 2014.

- The Dodd-Frank Act eliminated the federal prohibitions on paying interest on demand deposits effective one year after the date of its enactment, thus allowing businesses to have interest bearing checking accounts. Depending on competitive responses, this significant change to existing law could have an adverse impact on our interest expense.

- The Dodd-Frank Act addresses many investor protection, corporate governance and executive compensation matters that will affect most U.S. publicly traded companies. The Dodd-Frank Act (i) requires publicly traded companies to give stockholders a non-binding vote on executive compensation and golden parachute payments; (ii) enhances independence requirements for compensation committee members; (iii) requires companies listed on national securities exchanges to adopt incentive-based compensation clawback policies for executive officers; (iv) authorizes the SEC to promulgate rules that would allow stockholders to nominate their own candidates using a company's proxy materials; and (v) directs the federal banking regulators to issue rules prohibiting incentive compensation that encourages inappropriate risks.

- While insured depository institutions have long been subject to the FDIC's resolution process, the Dodd-Frank Act creates a new mechanism for the FDIC to conduct the orderly liquidation of certain "covered financial companies," including bank holding companies and systemically significant non-bank financial companies. Upon certain findings being made, the FDIC may be appointed receiver for a covered financial company, and would conduct an orderly liquidation of the entity. The FDIC liquidation process is modeled on the existing Federal Deposit Insurance Act bank resolution process, and generally gives the FDIC more discretion than in the traditional bankruptcy context. The FDIC has issued final rules implementing the orderly liquidation authority.

As noted above, many aspects of the Dodd-Frank Act are subject to rulemaking and will take effect over several years, making it difficult to anticipate the overall financial impact on us. However, compliance with this new law and its implementing regulations clearly will result in additional operating and compliance costs that could have a material adverse effect on our business, financial condition and results of operations.

Other Legislation and Regulatory Action relating to Financial Institutions

Recent government efforts to strengthen the U.S. financial system, including the implementation of the American Recovery and Reinvestment Act ("ARRA"), the Emergency Economic Stabilization Act ("EESA"), the Dodd-Frank Act, and special assessments imposed by the FDIC, subject us, to the extent applicable, to additional regulatory fees, corporate governance requirements, restrictions on executive compensation, restrictions on declaring or paying dividends, restrictions on stock repurchases, limits on tax deductions for executive compensation and prohibitions against golden parachute payments. These fees, requirements and restrictions, as well as any others that may be imposed in the future, may have a material adverse effect on our business, financial condition, and results of operations.

New regulations and statutes are regularly proposed that contain wide-ranging proposals for altering the structures, regulations and competitive relationships of financial institutions operating or doing business in the United States and the states in which we do business. We cannot predict whether or in what form any proposed regulation or statute will be adopted or the extent to which our business may be affected by any new regulation or statute.

Available Information

Our corporate website is www.servisfirstbank.com. We have direct links on this website to our Code of Ethics and the charters for our Audit, Compensation and Corporate Governance and Nominations Committees by clicking on the "Investor Relations" tab. We also have direct links to our filings with the Securities and Exchange Commission (SEC), including, but not limited to, our annual reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, proxy statements and any amendments to these filings. You may also obtain a copy of any such report from us free of charge by requesting such copy in writing to 850 Shades Creek Parkway, Suite 200, Birmingham, Alabama 35209, Attention: Chief Financial Officer.

Executive Officers of the Registrant

A brief description of the background of each of our named executive officers is set forth below.

Thomas A. Broughton, III (59) — Mr. Broughton has served as our President and Chief Executive Officer and a director since 2007 and as President, Chief Executive Officer and a director of the Bank since its inception in May 2005. Mr. Broughton has spent the entirety of his 30-year banking career in the Birmingham area. In 1985, Mr. Broughton was named President of the de novo First Commercial Bank. When First Commercial Bank was acquired by Synovus Financial Corp. in 1992, Mr. Broughton continued as President and was named Chief Executive Officer of First Commercial Bank. In 1998, he became Regional Chief Executive Officer for the markets of Alabama, Tennessee and parts of Georgia. He continued his work in this position until his retirement from Synovus in August 2004. Mr. Broughton's experience in banking has afforded him opportunities to work in many areas of banking and has given him exposure to all bank functions. Mr. Broughton served on the Board of Directors of Cavalier Homes, Inc. from 1986 until 2009, when the company was sold to a subsidiary of Berkshire Hathaway.

Clarence C. Pouncey, III (58) – Mr. Pouncey has served as our Executive Vice President and Chief Operating Officer since 2007 and Executive Vice President and Chief Operating Officer of the Bank since November 2006. Prior to joining the Company, Mr. Pouncey was employed by SouthTrust Bank (subsequently, Wachovia Bank and now Wells Fargo Bank) at its corporate headquarters in Birmingham, in various capacities from 1978 to 2006, most recently as the Senior Vice President and Regional Manager of Real Estate Financial Services. During his employment with SouthTrust, Mr. Pouncey oversaw various operational and production functions in its nine-state footprint of Alabama, Florida, Georgia, Mississippi, North Carolina, South Carolina, Tennessee, Texas and Virginia, and while employed by Wachovia, Mr. Pouncey oversaw various operational and production functions in Alabama, Arizona, Tennessee and Texas.

William M. Foshee (60) – Mr. Foshee has served as our Executive Vice President, Chief Financial Officer, Treasurer and Secretary since 2007 and as Executive Vice President, Chief Financial Officer, Treasurer and Secretary of the Bank since 2005. Mr. Foshee served as the Chief Financial Officer of Heritage Financial Holding Corporation, a publicly traded bank holding company headquartered in the Huntsville MSA, from 2002 until it was acquired in 2005. Mr. Foshee is a Certified Public Accountant.

Rodney E. Rushing (57) – Mr. Rushing has served as the Executive Vice President and Executive for Correspondent Banking for us and the bank since 2011. Prior to joining us, Mr. Rushing was employed at BBVA Compass from 1982 to 2011, most recently serving as Executive Vice President of Correspondent Banking. At the time of his departure in March 2011, the correspondent banking division of BBVA Compass provided correspondent banking services to over 600 financial institutions with total fundings in excess of $2 billion.

Don G. Owens (63) – Mr. Owens has served as the Senior Vice President and Chief Credit Officer for us and the bank since 2012. Prior to joining us, Mr. Owens served as a retail branch manager of First Alabama Bank from 1973 to 1978, worked for C&I Bank (now Bank of America) from 1978 to 1982, including as a branch manager and commercial lender, worked for Republic Bank (now Bank of America) from 1982 to 1988, including as a commercial lender and credit administrator, and served as a Senior Vice President and Senior Loan Administrator for BBVA Compass from 1988 to 2012.

A brief description of the background of each of our regional chief executive officers is set forth below.

G. Carlton Barker (66) –Mr. Barker has served as Executive Vice President and Montgomery President and Chief Executive Officer of the Bank since February 1, 2007. Prior to joining the Company, Mr. Barker was employed by Regions Bank for 19 years in various capacities, most recently as the Regional President for the Southeast Alabama Region. Mr. Barker serves on the Huntingdon College Board of Trustees.

B. Harrison Morris, III (38) – Mr. Morris has served as Dothan Regional Chief Executive Officer since February 2015 when the outgoing CEO, Ronald DeVane, retired from the Company. Prior to his promotion, Mr. Morris served as Executive Vice President and Dothan President since June 2010, following his promotion from Senior Lending Officer of the Dothan Region. Mr. Morris joined the Company in September 2008. Prior to joining the Company, Mr. Morris held various positions with Wachovia Bank and SouthTrust Bank since 1998. Mr. Morris is a trustee of the Wallace Community College Foundation Board, a member of the Dothan Area Chamber of Commerce Board, a member of the Wiregrass United Way Board and a member of the Wiregrass Chapter of the American Red Cross.

Andrew N. Kattos (45) – Mr. Kattos has served as Executive Vice President and Huntsville President and Chief Executive Officer of the Bank since April 2006. Prior to joining the Company, Mr. Kattos was employed by First Commercial Bank for 14 years, most recently as an Executive Vice President and Senior Lender in the Commercial Lending Department. Mr. Kattos also serves as a Board Member and Finance Chairperson for the Huntsville Hospital Foundation.

William Bibb Lamar, Jr. (71) – Mr. Lamar serves as the Mobile Regional Chief Executive Officer of ServisFirst Bank. Mr. Lamar is a seasoned Mobile banker with over 40 years of leadership responsibilities. Mr. Lamar graduated from University of Mobile. Mr. Lamar began his banking career with Merchants National, now Regions Bank where he spent more than 20 years in various leadership roles. Most recently, Mr. Lamar was the CEO of BankTrust for over 20 years. Mr. Lamar has served on the State Banking Board for 15 years and was formally President of Alabama Banker’s Association.

Rex D. McKinney (52) – Mr. McKinney has served as Executive Vice President and Pensacola President and Chief Executive Officer of the Bank since January 2011. Prior to joining the Company, Mr. McKinney held several leadership positions, including the senior lender position, at First American Bank/Coastal Bank and Trust (owned by Synovus Financial Corporation) starting in 1997. Mr. McKinney is a Past Board Member of the Rotary Club of Pensacola. He is Past President of the Pensacola Sports Association, a Member of the Irish Politicians Club, a Member of the Pensacola Sports Association Foundation and a member of the Board of Trustees of the St. Christopher's Episcopal Church Endowment Trust Fund.

ITEM 1A. RISK FACTORS.

Our business, financial condition and results of operation could be harmed by any of the following risks or by other risks identified in this annual report, as well as by other risks we may not have anticipated or viewed as material. The risks discussed below also include forward-looking statements, and our actual results may differ substantially from those discussed in these forward-looking statements. See also "Cautionary Note Regarding Forward-Looking Statements".

Risks Related To Our Business

As a business operating in the financial services industry, our business and operations may be adversely affected in numerous and complex ways by weak economic conditions.

Our businesses and operations, which primarily consist of lending money to customers in the form of loans, borrowing money from customers in the form of deposits and investing in securities, are sensitive to general business and economic conditions in the United States. If the U.S. economy weakens, our growth and profitability from our lending, deposit and investment operations could be constrained. Uncertainty about the federal fiscal policymaking process, the medium and long-term fiscal outlook of the federal government, and future tax rates is a concern for businesses, consumers and investors in the United States. In addition, economic conditions in foreign countries, including uncertainty over the stability of the euro and other currencies, could affect the stability of global financial markets, which could hinder U.S. economic growth. Weak economic conditions are characterized by deflation, fluctuations in debt and equity capital markets, a lack of liquidity and/or depressed prices in the secondary market for mortgage loans, increased delinquencies on mortgage, consumer and commercial loans, residential and commercial real estate price declines and lower home sales and commercial activity. The current economic environment is also characterized by interest rates at historically low levels, which impacts our ability to attract deposits and to generate attractive earnings through our investment portfolio. All of these factors can individually or in the aggregate be detrimental to our business, and the interplay between these factors can be complex and unpredictable. Our business is also significantly affected by monetary and related policies of the U.S. federal government and its agencies. Changes in any of these policies are influenced by macroeconomic conditions and other factors that are beyond our control. Adverse economic conditions and government policy responses to such conditions could have a material adverse

effect on our business, financial condition, results of operations and prospects.

We are dependent on the services of our management team and board of directors, and the unexpected loss of key officers or directors may adversely affect our business and operations.

We are led by an experienced core management team with substantial experience in the markets that we serve, and our operating strategy focuses on providing products and services through long-term relationship managers. Accordingly, our success depends in large part on the performance of our key personnel, as well as on our ability to attract, motivate and retain highly qualified senior and middle management. Competition for employees is intense, and the process of locating key personnel with the combination of skills and attributes required to execute our business plan may be lengthy. If any of our or the bank's executive officers, other key personnel, or directors leaves us or the bank, our operations may be adversely affected. In particular, we believe that Thomas A. Broughton, III, Clarence C. Pouncey, III, and William M. Foshee are extremely important to our success and the success of our bank. Mr. Broughton has extensive executive-level banking experience and is the President and Chief Executive Officer of us and the bank. Mr. Pouncey has extensive operating banking experience and is an Executive Vice President and the Chief Operating Officer of us and the bank. Mr. Foshee has extensive financial, banking and accounting experience and is an Executive Vice President and the Chief Financial Officer of us and the bank. If any of Mr. Broughton, Mr. Pouncey or Mr. Foshee leaves his position for any reason, our financial condition and results of operations may suffer. The bank is the beneficiary of a key man life insurance policy on the life of Mr. Broughton in the amount of $5 million. Also, we have hired key officers to run our banking offices in each of the Huntsville, Montgomery, Mobile and Dothan, Alabama markets, the Atlanta, Georgia market and the Pensacola, Florida market, who are extremely important to our success in such markets. If any of them leaves for any reason, our results of operations could suffer in such markets. With the exception of the key officers in charge of our Atlanta, Huntsville and Montgomery banking offices, we do not have employment agreements or non-competition agreements with any of our executive officers, including Messrs. Broughton, Pouncey, Foshee, Rushing and Owens. In the absence of these types of agreements, our executive officers are free to resign their employment at any time and accept an offer of employment from another company, including a competitor. Additionally, our directors' and advisory board members' community involvement and diverse and extensive local business relationships are important to our success. Any material change in the composition of our board of directors or the respective advisory boards of the bank could have a material adverse effect on our business, financial condition, results of operations and prospects.

We may not be able to successfully expand into new markets.

We have opened new offices and operations in four primary markets (Pensacola, Florida, Mobile, Alabama, Atlanta, Georgia and Nashville, Tennessee) in the past four years. We may not be able to successfully manage this growth with sufficient human resources, training and operational, financial and technological resources. Any such failure could limit our ability to be successful in these new markets and may have a material adverse effect on our business, financial condition, results of operations and prospects.

A prolonged downturn in the real estate market could result in losses and adversely affect our profitability.

As of December 31, 2014, 47.6% of our loan portfolio was composed of commercial and consumer real estate loans, of which 70.5% was owner occupied commercial or 1-4 family mortgage loans. The real estate collateral in each case provides an alternate source of repayment in the event of default by the borrower and may deteriorate in value during the time the credit is extended. The recent recession has adversely affected real estate market values across the country and values may continue to decline. A further decline in real estate values could further impair the value of our collateral and our ability to sell the collateral upon any foreclosure, which would likely require us to increase our provision for loan losses. In the event of a default with respect to any of these loans, the amounts we receive upon sale of the collateral may be insufficient to recover the outstanding principal and interest on the loan. If we are required to re-value the collateral securing a loan to satisfy the debt during a period of reduced real estate values or to increase our allowance for loan losses, our profitability could be adversely affected, which could have a material adverse effect on our business, financial condition, results of operations and prospects.

Lack of seasoning of our loan portfolio could increase risk of credit defaults in the future.

In general, loans do not begin to show signs of credit deterioration or default until they have been outstanding for some period of time, a process referred to as "seasoning." As a result, a portfolio of older loans will usually behave more predictably than a newer portfolio. Because a large portion of our portfolio is relatively new, the current level of delinquencies and defaults may not represent the level that may prevail as the portfolio becomes more seasoned. If delinquencies and defaults increase, we may be required to increase our provision for loan losses, which could have a material adverse effect on our business, financial condition, results of operations and prospects.

Our high concentration of large loans to certain borrowers may increase our credit risk.

Our growth over the last several years has been partially attributable to our ability to originate and retain large loans. Many of these loans have been made to a small number of borrowers, resulting in a high concentration of large loans to certain borrowers. As of December 31, 2014, our 10 largest borrowing relationships ranged from approximately $18.1 million to $24.8 million (including unfunded commitments) and averaged approximately $20.6 million in total commitments. Along with other risks inherent in these loans, such as the deterioration of the underlying businesses or property securing these loans, this high concentration of borrowers presents a risk to our lending operations. If any one of these borrowers becomes unable to repay its loan obligations as a result of economic or market conditions, or personal circumstances, such as divorce or death, our non-performing loans and our provision for loan losses could increase significantly, which could have a material adverse effect on our business, financial condition, results of operations and prospects.

Our decisions regarding credit risk could be inaccurate and our allowance for loan losses may be inadequate, which could have a material adverse effect on our business, financial condition, results of operations and future prospects.

Our earnings are affected by our ability to make loans, and thus we could sustain significant loan losses and consequently significant net losses if we incorrectly assess either the creditworthiness of our borrowers resulting in loans to borrowers who fail to repay their loans in accordance with the loan terms or the value of the collateral securing the repayment of their loans, or we fail to detect or respond to a deterioration in our loan quality in a timely manner. Management makes various assumptions and judgments about the collectability of our loan portfolio, including the creditworthiness of our borrowers and the value of the real estate and other assets serving as collateral for the repayment of many of our loans. We maintain an allowance for loan losses that we consider adequate to absorb losses inherent in the loan portfolio based on our assessment of the information available. In determining the size of our allowance for loan losses, we rely on an analysis of our loan portfolio based on historical loss experience, volume and types of loans, trends in classification, volume and trends in delinquencies and non-accruals, national and local economic conditions and other pertinent information. We target small and medium-sized businesses as loan customers. Because of their size, these borrowers may be less able to withstand competitive or economic pressures than larger borrowers in periods of economic weakness. Also, as we expand into new markets, our determination of the size of the allowance could be understated due to our lack of familiarity with market-specific factors. Despite the effects of sustained economic weakness, we believe our allowance for loan losses is adequate. Our allowance for loan losses as of December 31, 2014 was $35.6 million, or 1.06% of total gross loans.

If our assumptions are inaccurate, we may incur loan losses in excess of our current allowance for loan losses and be required to make material additions to our allowance for loan losses, which could have a material adverse effect on our business, financial condition, results of operations and prospects.

However, even if our assumptions are accurate, federal and state regulators periodically review our allowance for loan losses and could require us to materially increase our allowance for loan losses or recognize further loan charge-offs based on judgments different than those of our management. Any material increase in our allowance for loan losses or loan charge-offs as required by these regulatory agencies could have a material adverse effect on our business, financial condition, results of operations and prospects.

If we fail to design, implement and maintain effective internal control over financial reporting or remediate any future material weakness in our internal control over financial reporting, we may be unable to accurately report our financial results or prevent fraud, which could have a material adverse effect on our business, financial condition, results of operations and prospects.

Our internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of the financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Effective internal control over financial reporting is necessary for us to provide reliable reports and prevent fraud.

We believe that a control system, no matter how well designed and managed, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected. We may not be able to identify all significant deficiencies and/or material weaknesses in our internal control in the future, and our failure to maintain effective internal control over financial reporting in accordance with Section 404 of the Sarbanes-Oxley Act of 2002 (the “Sarbanes-Oxley Act”) could have a material adverse effect on our business, financial condition, results of operations and prospects.

Our corporate structure provides for decision-making authority by our regional chief executive officers and banking teams. Our business, financial condition, results of operations and prospects could be negatively affected if our employees do not follow our internal policies or are negligent in their decision-making.

We attract and retain our management talent by empowering them to make certain business decisions on a local level. Lending authorities are assigned to regional chief executive officers and their banking teams based on their experience. Additionally, all loans in excess of $1.0 million are reviewed by our centralized credit administration department in Birmingham. Moreover, for decisions that fall outside of the assigned authorities, our regional chief

executive officers are required to obtain approval from our senior management team. Our local bankers may not follow our internal procedures or otherwise act in our best interests with respect to their decision-making. A failure of our employees to follow our internal policies, or actions taken by our employees that are negligent could have a material adverse effect on our business, financial condition, results of operations and prospects.

Our business strategy includes the continuation of our growth plans, and our business, financial condition, results of operations and prospects could be negatively affected if we fail to grow or fail to manage our growth effectively.

We intend to continue pursuing our growth strategy for our business through organic growth of our loan portfolio. Our prospects must be considered in light of the risks, expenses and difficulties that can be encountered by financial service companies in rapid growth stages, which include the risks associated with the following:

- maintaining loan quality;
- maintaining adequate management personnel and information systems to oversee such growth;
- Sufficiently growing deposit base to provide funds for lending;
- maintaining adequate control and compliance functions; and
- securing capital and liquidity needed to support anticipated growth.

We may not be able to expand our presence in our existing markets or successfully enter new markets, and any expansion could adversely affect our results of operations. Our ability to grow successfully will depend on a variety of factors, including the continued availability of desirable business opportunities, the competitive responses from other financial institutions in our market areas and our ability to manage our growth. Failure to manage our growth effectively could adversely affect our ability to successfully implement our business strategy, which could have a material adverse effect on our business, financial condition, results of operations and prospects.

Our continued pace of growth may require us to raise additional capital in the future to fund such growth, and the unavailability of additional capital on terms acceptable to us could adversely affect our growth and/or our financial condition and results of operations.

We are required by federal and state regulatory authorities to maintain adequate levels of capital to support our operations. To support our recent and ongoing growth, we have completed a series of capital transactions during the past three years, including:

- the sale of $20,000,000 in 5.5% subordinated notes due November 9, 2022 to accredited investor purchasers in November 2012, the proceeds of which were used to pay off $15,000,000 in our 8.5% subordinated debentures;
- the sale of an aggregate of 750,000 shares of our common stock at $13.833 per share, or $10,375,000, in a private placement completed on December 2, 2013; and
- the sale of an aggregate of 1,875,000 shares of our common stock at $30.333 per share, or $56,874,000, exclusive of underwriting discounts, in our initial public offering completed May 19, 2014.

After giving effect to these transactions, we believe that we will have sufficient capital to meet our capital needs for our immediate growth plans. However, we will continue to need capital to support our longer-term growth plans. If capital is not available on favorable terms when we need it, we will have to either issue common stock or other securities on less than desirable terms or reduce our rate of growth until market conditions become more favorable. Either of such events could have a material adverse effect on our business, financial condition, results of operations and prospects.

Competition from financial institutions and other financial service providers may adversely affect our profitability.

The banking business is highly competitive, and we experience competition in our markets from many other financial institutions. We compete with commercial banks, credit unions, savings and loan associations, mortgage banking firms, consumer finance companies, securities brokerage firms, insurance companies, money market funds, and other mutual funds, as well as other community banks and super-regional and national financial institutions that operate offices in our service areas.

We compete with these other financial institutions both in attracting deposits and in making loans. In addition, we must attract our customer base from other existing financial institutions and from new residents. We expect competition to increase in the future as a result of legislative, regulatory and technological changes and the continuing trend of consolidation in the financial services industry. Our profitability depends upon our continued ability to successfully compete with an array of financial institutions in our service areas.

Our ability to compete successfully will depend on a number of factors, including, among other things:

- our ability to build and maintain long-term customer relationships while ensuring high ethical standards and safe and sound banking practices;
- the scope, relevance and pricing of products and services that we offer;
- customer satisfaction with our products and services;
- industry and general economic trends; and
- our ability to keep pace with technological advances and to invest in new technology.

Increased competition could require us to increase the rates that we pay on deposits or lower the rates that we offer on loans, which could reduce our profitability. Our failure to compete effectively in our market could restrain our growth or cause us to lose market share, which could have a material adverse effect on our business, financial condition, results of operations and prospects.

Unpredictable economic conditions or a natural disaster in the state of Alabama, the panhandle of the state of Florida, the Atlanta, Georgia metropolitan area or the Nashville, Tennessee metropolitan area may have a material adverse effect on our financial performance.

Substantially all of our borrowers and depositors are individuals and businesses located and doing business in our markets within the state of Alabama, the panhandle of the state of Florida, the Atlanta, Georgia metropolitan area and the Nashville, Tennessee MSA. Therefore, our success will depend on the general economic conditions in these areas, and more particularly in Birmingham, Huntsville, Dothan, Montgomery and Mobile, Alabama, Pensacola, Florida, Atlanta, Georgia and Nashville, Tennessee, which we cannot predict with certainty. Unlike with many of our larger competitors, the majority of our borrowers are commercial firms, professionals and affluent consumers located and doing business in such local markets. As a result, our operations and profitability may be more adversely affected by a local economic downturn or natural disaster in Alabama, Florida, Georgia or Tennessee, particularly in such markets, than those of larger, more geographically diverse competitors. For example, a downturn in the economy of any of our MSAs could make it more difficult for our borrowers in those markets to repay their loans and may lead to loan losses that we cannot offset through operations in other markets until we can expand our markets further. Our entry into the Pensacola, Florida and Mobile, Alabama markets increased our exposure to potential losses associated with hurricanes and similar natural disasters that are more common on the Gulf Coast than in our other markets. Accordingly, any regional or local economic downturn, or natural or man-made disaster, that affects Alabama, the panhandle of Florida, the Atlanta, Georgia metropolitan area or the Nashville, Tennessee metropolitan area, or existing or prospective property or borrowers in Alabama, the panhandle of Florida, the Atlanta, Georgia metropolitan area or the Nashville, Tennessee metropolitan area may affect us and our profitability more significantly and more adversely than our more geographically diversified competitors, which could have a material adverse effect on our business, financial condition, results of operations and prospects.

We encounter technological change continually and have fewer resources than many of our competitors to invest in technological improvements.

The financial services industry is undergoing rapid technological changes, with frequent introductions of new technology-driven products and services. In addition to serving customers better, the effective use of technology increases efficiency and enables financial institutions to reduce costs. Our success will depend in part on our ability to address our customers' needs by using technology to provide products and services that will satisfy customer demands for convenience, as well as to create additional efficiencies in our operations. Many of our competitors have substantially greater resources to invest in technological improvements than we have. We may not be able to implement new technology-driven products and services effectively or be successful in marketing these products and services to our customers. As these technologies are improved in the future, we may, in order to remain competitive, be required to make significant capital expenditures, which may increase our overall expenses and have a material adverse effect on our net income.

We depend on our information technology and telecommunications systems and third-party servicers, and any systems failures or interruptions could adversely affect our operations and financial condition.

Our business depends on the successful and uninterrupted functioning of our information technology and telecommunications systems and third-party servicers. We outsource many of our major systems, such as data processing, loan servicing and deposit processing systems. For example, Jack Henry & Associates, Inc. provides our entire core banking system through a service bureau arrangement. The failure of these systems, or the termination of a third-party software license or service agreement on which any of these systems is based, could interrupt our operations. Because our information technology and telecommunications systems interface with and depend on third-party systems, we could experience service denials if demand for such services exceeds capacity or such third-party systems fail or experience interruptions. If significant, sustained or repeated, a system failure or service denial could compromise our ability to operate effectively, damage our reputation, result in a loss of customer business, and subject us to additional regulatory scrutiny and possible financial liability, any of which could have a material adverse effect on our business, financial condition, results of operations and prospects.

We may bear costs associated with the proliferation of computer theft and cybercrime.

We necessarily collect, use and hold data concerning individuals and businesses with whom we have a banking relationship. Threats to data security, including unauthorized access and cyber attacks, rapidly emerge and change, exposing us to additional costs for protection or remediation and competing time constraints to secure our data in accordance with customer expectations and statutory and regulatory requirements. It is difficult and near impossible to defend against every risk being posed by changing technologies as well as criminals intent on committing cyber-crime. Increasing sophistication of cyber-criminals and terrorists make keeping up with new threats difficult and could result in a breach of our data security. Patching and other measures to protect existing systems and servers could be inadequate, especially on systems that are being retired. Controls employed by our information technology department and third-party vendors could prove inadequate. We could also experience a breach by intentional or negligent conduct on the part of our employees or other internal sources. Our systems and those of our third-party vendors may become vulnerable to damage or disruption due to circumstances beyond our or their control, such as from catastrophic events, power anomalies or outages, natural disasters, network failures, and viruses and malware.

A breach of our security that results in unauthorized access to our data could expose us to a disruption or challenges relating to our daily operations as well as to data loss, litigation, damages, fines and penalties, significant increases in compliance costs, and reputational damage, any of which could individually or in the aggregate have a material adverse effect on our business, results of operations, financial condition and prospects.

Our recent results may not be indicative of our future results, and may not provide guidance to assess the risk of an investment in our common stock.

We may not be able to sustain our historical rate of growth and may not even be able to expand our business at all. In addition, our recent growth may distort some of our historical financial ratios and statistics. In the future, we may not have the benefit of several factors that were favorable until late 2008, such as a rising interest rate environment, a strong residential housing market or the ability to find suitable expansion opportunities. Various factors, such as economic conditions, regulatory and legislative considerations and competition, may also impede or prohibit our ability to expand our market presence. As a small commercial bank, we have different lending risks than larger banks. We provide services to our local communities; thus, our ability to diversify our economic risks is limited by our own local markets and economies. We lend primarily to small to medium-sized businesses, which may expose us to greater lending risks than those faced by banks lending to larger, better-capitalized businesses with longer operating histories. We manage our credit exposure through careful monitoring of loan applicants and loan concentrations in particular industries, and through our loan approval and review procedures. Our use of historical and objective information in determining and managing credit exposure may not be accurate in assessing our risk. Our failure to sustain our historical rate of growth or adequately manage the factors that have contributed to our growth could have a material adverse effect on our business, financial condition, results of operations and prospects.

We engage in lending secured by real estate and may be forced to foreclose on the collateral and own the underlying real estate, subjecting us to the costs associated with the ownership of the real property.

Since we originate loans secured by real estate, we may have to foreclose on the collateral property to protect our investment and may thereafter own and operate such property, in which case we are exposed to the risks inherent in the ownership of real estate. As of December 31, 2014, we held $6.8 million in other real estate owned. The amount that we, as a mortgagee, may realize after a default is dependent upon factors outside of our control, including, but not limited to:

- general or local economic conditions;
- environmental cleanup liability;
- neighborhood assessments;
- interest rates;
- real estate tax rates;
- operating expenses of the mortgaged properties;

- supply of and demand for rental units or properties;
- ability to obtain and maintain adequate occupancy of the properties;
- zoning laws;
- governmental and regulatory rules;
- fiscal policies; and
- natural disasters.

Our inability to manage the amount of costs or size of the risks associated with the ownership of real estate could have a material adverse effect on our business, financial condition, results of operations and prospects.

Regulatory requirements affecting our loans secured by commercial real estate could limit our ability to leverage our capital and adversely affect our growth and profitability.

The federal bank regulatory agencies have indicated their view that banks with high concentrations of loans secured by commercial real estate are subject to increased risk and should hold higher capital than regulatory minimums to maintain an appropriate cushion against loss that is commensurate with the perceived risk. Because a significant portion of our loan portfolio is dependent on commercial real estate, a change in the regulatory capital requirements applicable to us as a result of these policies could limit our ability to leverage our capital, which could have a material adverse effect on our business, financial condition, results of operations and prospects.

The dividend rate on our Series A Preferred Stock fluctuates based on the changes in our "qualified small business lending" and other factors and may increase, which could adversely affect income to common stockholders.

We issued $40.0 million in Series A Preferred Stock to the Treasury on June 21, 2011 in connection with the Treasury's Small Business Lending Fund program. Dividends on each share of our Series A Preferred Stock are payable on the liquidation amount at an annual rate calculated based upon the "percentage change in qualified lending" of the bank between each dividend period and the "baseline" level of "qualified small business lending" of the bank. Such dividend rate may vary from 1% per annum to 7% per annum for the eleventh through the eighteenth dividend periods and that portion of the nineteenth dividend period ending on the four and one-half year anniversary of the date of issuance of the Series A Preferred Stock (or, the dividend periods from October 1, 2013 through and including December 20, 2015). The dividend rate increases to a fixed rate of 9% after 4.5 years from the issuance of our Series A Preferred Stock (or, on December 21, 2015), regardless of the previous rate, until all of the preferred shares are redeemed. If we are unable to maintain our "qualified small business lending" at certain levels, if we fail to comply with certain other terms of our Series A Preferred Stock, or if we are unable to redeem our Series A Preferred Stock within 4.5 years following issuance, the dividend rate on our Series A Preferred Stock could result in materially greater dividend payments, which in turn could have a material adverse effect on our business, financial condition, results of operations and prospects.

We are subject to interest rate risk, which could adversely affect our profitability.

Our profitability, like that of most financial institutions, depends to a large extent on our net interest income, which is the difference between our interest income on interest-earning assets, such as loans and investment securities, and our interest expense on interest bearing liabilities, such as deposits and borrowings. We have positioned our asset portfolio to benefit in a higher or lower interest rate environment, but this may not remain true in the future. Our interest sensitivity profile was somewhat liability sensitive as of December 31, 2014, meaning that our net interest income and economic value of equity would decrease more from rising interest rates than from falling interest rates. Interest rates are highly sensitive to many factors that are beyond our control, including general economic conditions and policies of various governmental and regulatory agencies and, in particular, the Board of Governors of the Federal Reserve System (or, the "Federal Reserve"). Changes in monetary policy, including changes in interest rates, could influence not only the interest we receive on loans and securities and the interest we pay on deposits and borrowings, but such changes could also affect our ability to originate loans and obtain deposits, the fair value of our financial assets and liabilities, and the average duration of our assets. If the interest rates paid on deposits and other borrowings increase at a faster rate than the interest rates received on loans and other investments, our net interest income, and therefore earnings, could be adversely affected. Earnings could also be adversely affected if the interest rates received on loans and other investments fall more quickly than the interest rates paid on deposits and other borrowings. Any substantial, unexpected, prolonged change in market interest rates could have a material adverse effect on our business, financial condition, results of operations and prospects.

In addition, an increase in interest rates could also have a negative impact on our results of operations by reducing the ability of borrowers to repay their current loan obligations. These circumstances could not only result in increased

loan defaults, foreclosures and charge-offs, but also necessitate further increases to the allowance for loan losses which could have a material adverse effect on our business, results of operations, financial condition and prospects.

Liquidity risk could impair our ability to fund operations and meet our obligations as they become due.

Liquidity is essential to our business. Liquidity risk is the potential that we will be unable to meet our obligations as they come due because of an inability to liquidate assets or obtain adequate funding. An inability to raise funds through deposits, borrowings, the sale of loans and other sources could have a substantial negative effect on our liquidity. In particular, approximately 73.2% of the bank's liabilities as of December 31, 2014 were checking accounts and other liquid deposits, which are payable on demand or upon several days' notice, while by comparison, 82.0% of the assets of the bank were loans, which cannot be called or sold in the same time frame. Our access to funding sources in amounts adequate to finance our activities or on terms that are acceptable to us could be impaired by factors that affect us specifically or the financial services industry or economy in general. Market conditions or other events could also negatively affect the level or cost of funding, affecting our ongoing ability to accommodate liability maturities and deposit withdrawals, meet contractual obligations and fund asset growth and new business transactions at a reasonable cost, in a timely manner and without adverse consequences. Any substantial, unexpected or prolonged change in the level or cost of liquidity could have a material adverse effect on our ability to meet deposit withdrawals and other customer needs, which could have a material adverse effect on our business, financial condition, results of operations and prospects.

The fair value of our investment securities can fluctuate due to factors outside of our control.

As of December 31, 2014, the fair value of our investment securities portfolio was approximately $328.3 million. Factors beyond our control can significantly influence the fair value of securities in our portfolio and can cause potential adverse changes to the fair value of these securities. These factors include, but are not limited to, rating agency actions in respect of the securities, defaults by the issuer or with respect to the underlying securities, and changes in market interest rates and continued instability in the capital markets. Any of these factors, among others, could cause other-than-temporary impairments and realized and/or unrealized losses in future periods and declines in other comprehensive income, which could materially and adversely affect our business, results of operations, financial condition and prospects. The process for determining whether impairment of a security is other-than-temporary usually requires complex, subjective judgments about the future financial performance and liquidity of the issuer and any collateral underlying the security in order to assess the probability of receiving all contractual principal and interest payments on the security. Our failure to assess any currency impairments or losses with respect to our securities could have a material adverse effect on our business, financial condition, results of operations and prospects.

Deterioration in the fiscal position of the U.S. federal government and downgrades in Treasury and federal agency securities could adversely affect us and our banking operations.

The long-term outlook for the fiscal position of the U.S. federal government is uncertain, as illustrated by the 2011 downgrade by certain rating agencies of the credit rating of the U.S. government and federal agencies. However, in addition to causing economic and financial market disruptions, any future downgrade, failure to raise the U.S. statutory debt limit, or deterioration in the fiscal outlook of the U.S. federal government, could, among other things, materially adversely affect the market value of the U.S. and other government and governmental agency securities that we hold, the availability of those securities as collateral for borrowing, and our ability to access capital markets on favorable terms. In particular, it could increase interest rates and disrupt payment systems, money markets, and long-term or short-term fixed income markets, adversely affecting the cost and availability of funding, which could negatively affect our profitability. Also, the adverse consequences of any downgrade could extend to those to whom we extend credit and could adversely affect their ability to repay their loans. Any of these developments could have a material adverse effect on our business, financial condition, results of operations and prospects.

We may be adversely affected by the soundness of other financial institutions.

Our ability to engage in routine funding transactions could be adversely affected by the actions and commercial soundness of other financial institutions. Financial services companies are interrelated as a result of trading, clearing, counterparty, and other relationships. We have exposure to different industries and counterparties, and through transactions with counterparties in the financial services industry, including brokers and dealers, commercial banks, investment banks, and other institutional clients. As a result, defaults by, or even rumors or questions about, one or more financial services companies, or the financial services industry generally, have led to market-wide liquidity

problems and could lead to losses or defaults by us or by other institutions. These losses or defaults could have a material adverse effect on our business, financial condition, results of operations and prospects.

We are subject to environmental liability risk associated with our lending activities.

In the course of our business, we may purchase real estate, or we may foreclose on and take title to real estate. As a result, we could be subject to environmental liabilities with respect to these properties. We may be held liable to a governmental entity or to third parties for property damage, personal injury, investigation and clean-up costs incurred by these parties in connection with environmental contamination or may be required to investigate or clean up hazardous or toxic substances or chemical releases at a property. The costs associated with investigation or remediation activities could be substantial. In addition, if we are the owner or former owner of a contaminated site, we may be subject to common law claims by third parties based on damages and costs resulting from environmental contamination emanating from the property. Any significant environmental liabilities could have a material adverse effect on our business, financial condition, results of operations and prospects.

Risks Related to Our Industry

We are subject to extensive regulation that could limit or restrict our activities and impose financial requirements or limitations on the conduct of our business, which limitations or restrictions could have a material adverse effect on our profitability.

We operate in a highly regulated industry and are subject to examination, supervision and comprehensive regulation by various federal and state agencies including the Federal Reserve, the Federal Deposit Insurance Corporation (“FDIC”) and the Alabama State Banking Department (the “Alabama Banking Department”). Regulatory compliance is costly and restricts certain of our activities, including payment of dividends, mergers and acquisitions, investments, loans and interest rates charged, and interest rates paid on deposits. We are also subject to capitalization guidelines established by our regulators, which require us to maintain adequate capital to support our growth. Violations of various laws, even if unintentional, may result in significant fines or other penalties, including restrictions on branching or bank acquisitions. Recently, banks generally have faced increased regulatory sanctions and scrutiny particularly with respect to the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act (“USA Patriot Act”) and other statutes relating to anti-money laundering compliance and customer privacy. The recent recession had major adverse effects on the banking and financial industry, during which time many institutions saw a significant amount of their market capitalization erode as they charged off loans and wrote down the value of other assets. As described above, recent legislation has substantially changed, and increased, federal regulation of financial institutions, and there may be significant future legislation (and regulations under existing legislation) that could have a further material effect on banks and bank holding companies like us.

In July 2013, the U.S. federal banking authorities approved the implementation of the Basel III regulatory capital reforms and issued rules effecting certain changes required by the Dodd-Frank Act (the "Basel III Rules"). The Basel III Rules are applicable to all U.S. banks that are subject to minimum capital requirements as well as to bank and saving and loan holding companies, other than "small bank holding companies" (generally bank holding companies with consolidated assets of less than $500 million). The Basel III Rules not only increase most of the required minimum regulatory capital ratios, they introduce a new common equity Tier 1 capital ratio and the concept of a capital conservation buffer. The Basel III Rules also expand the current definition of capital by establishing additional criteria that capital instruments must meet to be considered additional Tier 1 capital (that is, Tier 1 capital in addition to common equity) and Tier 2 capital. A number of instruments that now generally qualify as Tier 1 capital will not qualify or their qualifications will change when the Basel III Rules are fully implemented. However, the Basel III Rules permit banking organizations with less than $15 billion in assets to retain, through a one-time election, the existing treatment for accumulated other comprehensive income, which currently does not affect regulatory capital. The Basel III Rules have maintained the general structure of the current prompt corrective action thresholds while incorporating the increased requirements, including the common equity Tier 1 capital ratio. In order to be a "well-capitalized" depository institution under the new regime, an institution must maintain a common equity Tier 1 capital ratio of 6.5% or more; a Tier 1 capital ratio of 8% or more; a total capital ratio of 10% or more; and a leverage ratio of 5% or more. Institutions must also maintain a capital conservation buffer consisting of common equity Tier 1 capital. Generally, financial institutions became subject to the Basel III Rules on January 1, 2015 with a phase-in period through 2019 for many of the changes.

The laws and regulations applicable to the banking industry could change at any time, and we cannot predict the effects of these changes on our business and profitability. Because government regulation greatly affects the business and financial results of all commercial banks and bank holding companies, our cost of compliance could adversely affect our ability to operate profitably. We are subject to the reporting requirements of the Exchange Act, the Sarbanes-Oxley Act, and the related rules and regulations promulgated by the SEC. These laws and regulations increase the scope, complexity and cost of corporate governance, reporting and disclosure practices over those of non-public or non-reporting companies. Despite our conducting business in a highly regulated environment, these laws and regulations have different requirements for compliance than we experienced prior to becoming a reporting company. Our expenses related to services rendered by our accountants, legal counsel and consultants have increased in order to ensure compliance with these laws and regulations that we became subject to as a reporting company and may increase further as we become a public company and grow in size. These provisions, as well as any other aspects of current or proposed regulatory or legislative changes to laws applicable to us may impact the profitability of our business activities and may change certain of our business practices, including our ability to offer new products, obtain financing, attract deposits, make loans and achieve satisfactory interest spreads and could expose us to additional costs, including increased compliance costs, which could have a material adverse effect on our business, financial condition, results of operations and prospects.

Federal and state regulators periodically examine our business and we may be required to remediate adverse examination findings.

The Federal Reserve, the FDIC and the Alabama Banking Department periodically examine our business, including our compliance with laws and regulations. If, as a result of an examination, a federal or state banking agency were to determine that our financial condition, capital resources, asset quality, earnings prospects, management, liquidity or other aspects of any of our operations had become unsatisfactory, or that we were in violation of any law or regulation, it may take a number of different remedial actions as it deems appropriate. These actions include the power

to enjoin "unsafe or unsound" practices, to require affirmative action to correct any conditions resulting from any violation or practice, to issue an administrative order that can be judicially enforced, to direct an increase in our capital, to restrict our growth, to assess civil monetary penalties against our officers or directors, to remove officers and directors and, if it is concluded that such conditions cannot be corrected or there is an imminent risk of loss to depositors, to terminate our deposit insurance and place us into receivership or conservatorship. Any regulatory action against us could have a material adverse effect on our business, results of operations, financial condition and prospects.

Our FDIC deposit insurance premiums and assessments may increase.

The deposits of the bank are insured by the FDIC up to legal limits and, accordingly, subject it to the payment of FDIC deposit insurance assessments. The bank's regular assessments are determined by its risk classification, which is based on its regulatory capital levels and the level of supervisory concern that it poses. High levels of bank failures since the beginning of the financial crisis and increases in the statutory deposit insurance limits have increased resolution costs to the FDIC and put significant pressure on the Deposit Insurance Fund. In order to maintain a strong funding position and restore the reserve ratios of the Deposit Insurance Fund, the FDIC increased deposit insurance assessment rates and charged a special assessment to all FDIC-insured financial institutions. Further increases in assessment rates or special assessments may occur in the future, especially if there are significant additional financial institution failures. Any future special assessments, increases in assessment rates or required prepayments in FDIC insurance premiums could reduce our profitability or limit our ability to pursue certain business opportunities, which could have a material adverse effect on our business, financial condition, results of operations and prospects.

We are subject to numerous laws designed to protect consumers, including the Community Reinvestment Act and fair lending laws, and failure to comply with these laws could lead to a wide variety of sanctions.

The Community Reinvestment Act, the Equal Credit Opportunity Act, the Fair Housing Act and other fair lending laws and regulations impose nondiscriminatory lending requirements on financial institutions. The U.S. Department of Justice and other federal agencies are responsible for enforcing these laws and regulations. A successful regulatory challenge to an institution's performance under the Community Reinvestment Act or fair lending laws and regulations could result in a wide variety of sanctions, including damages and civil money penalties, injunctive relief, restrictions on mergers and acquisitions activity, restrictions on expansion, and restrictions on entering new business lines. Private parties may also have the ability to challenge an institution's performance under fair lending laws in private class action litigation. Such actions could have a material adverse effect on our business, financial condition, results of operations and prospects.

We face a risk of noncompliance and enforcement action with the Bank Secrecy Act and other anti-money laundering statutes and regulations.

The Bank Secrecy Act, the USA Patriot, and other laws and regulations require financial institutions, among other duties, to institute and maintain an effective anti-money laundering program and file suspicious activity and currency transaction reports as appropriate. The Federal Financial Crimes Enforcement Network is authorized to impose significant civil money penalties for violations of those requirements and has recently engaged in coordinated enforcement efforts with the individual federal banking regulators, as well as the U.S. Department of Justice, Drug Enforcement Administration, and Internal Revenue Service. We are also subject to increased scrutiny of compliance with the rules enforced by the Office of Foreign Assets Control ("OFAC"). If our policies, procedures and systems are deemed deficient, we would be subject to liability, including fines and regulatory actions, which may include

restrictions on our ability to pay dividends and the necessity to obtain regulatory approvals to proceed with certain aspects of our business plan, including our acquisition plans. Failure to maintain and implement adequate programs to combat money laundering and terrorist financing could also have serious reputational consequences for us. Any of these results could have a material adverse effect on our business, financial condition, results of operations and prospects.

Financial reform legislation will, among other things, tighten capital standards, create a new Consumer Financial Protection Bureau and result in new regulations that are likely to increase our costs of operations.

On July 21, 2010, the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") was signed into law. As final rules and regulations implementing the Dodd-Frank Act are adopted, this law is significantly changing the current bank regulatory structure and affecting the lending, deposit, investment, trading and operating activities of financial institutions and their holding companies. The Dodd-Frank Act requires various federal agencies to adopt a broad range of new implementing rules and regulations and to prepare numerous studies and reports for Congress. The federal agencies are given significant discretion in drafting the implementing rules and regulations, and consequently, many of the details and much of the impact of the Dodd-Frank Act may not be known for many years.

The Dodd-Frank Act eliminated the federal prohibitions on paying interest on demand deposits effective one year after the date of its enactment, thus allowing businesses to have interest bearing checking accounts. Depending on competitive responses, this significant change to existing law could have an adverse impact on our interest expense.

The Dodd-Frank Act also broadens the base for FDIC insurance assessments. Assessments are now based on the average consolidated total assets less tangible equity capital of a financial institution. The Dodd-Frank Act permanently increases the maximum amount of deposit insurance for banks, savings institutions and credit unions to $250,000 per depositor. Non-interest bearing transaction accounts and certain attorney's trust accounts had unlimited deposit insurance through December 31, 2012.

The Dodd-Frank Act requires publicly traded companies to give stockholders a non-binding vote on executive compensation and golden parachute payments. In addition, the Dodd-Frank Act authorizes the SEC to promulgate rules that would allow stockholders to nominate their own candidates using a company's proxy materials and directs the federal banking regulators to issue rules prohibiting incentive compensation that encourages inappropriate risks.

The Dodd-Frank Act created a new Consumer Financial Protection Bureau with broad powers to supervise and enforce consumer protection laws. The Bureau now has broad rule-making authority for a wide range of consumer protection laws that apply to all banks, including the authority to prohibit "unfair, deceptive or abusive" acts and practices. The Bureau has examination and enforcement authority over all banks with more than $10 billion in assets. Institutions with less than $10 billion in assets will continue to be examined for compliance with consumer laws by their primary bank regulator.

As noted above, many aspects of the Dodd-Frank Act are subject to rulemaking and will take effect over several years, making it difficult to anticipate the overall financial impact on us. However, compliance with this new law and its implementing regulations will result in additional operating and compliance costs that could have a material adverse effect on our business, financial condition, results of operations and prospects.

Additional regulatory requirements especially those imposed under ARRA, EESA or other legislation intended to strengthen the U.S. financial system, could adversely affect us.

Recent government efforts to strengthen the U.S. financial system, including the implementation of the American Recovery and Reinvestment Act ("ARRA"), the Emergency Economic Stabilization Act ("EESA"), the Dodd-Frank Act, and special assessments imposed by the FDIC, subject us, to the extent applicable, to additional regulatory fees, corporate governance requirements, restrictions on executive compensation, restrictions on declaring or paying dividends, restrictions on stock repurchases, limits on tax deductions for executive compensation and prohibitions against golden parachute payments. These fees, requirements and restrictions, as well as any others that may be imposed in the future, may have a material adverse effect on our business, financial condition, results of operations and prospects.

Recent market conditions have adversely affected, and may continue to adversely affect, us, our customers and our industry.

Because our business is focused exclusively in the southeastern United States, we are particularly exposed to downturns in the U.S. economy in general and in the southeastern economy in particular. Beginning with the economic recession in 2008 and continuing through 2010, falling home prices, increasing foreclosures, unemployment and under-employment, have negatively impacted the credit performance of mortgage loans and resulted in significant write-downs of asset values by financial institutions, including government-sponsored entities as well as major commercial and investment banks. These write-downs, initially of mortgage-backed securities but spreading to credit default swaps and other derivative and cash securities, in turn, have caused many financial institutions to seek additional capital, to merge with larger and stronger institutions and, in some cases, to fail. Reflecting concern about the stability of the financial markets generally and the strength of counterparties, many lenders and institutional investors have reduced or ceased providing funding to borrowers, including to other financial institutions. This market turmoil and tightening of credit has led to an increased level of commercial and consumer delinquencies, lack of consumer confidence, increased market volatility and widespread reduction of business activity generally. The resulting economic pressure on consumers and businesses and lack of confidence in the financial markets may adversely affect our customers and thus our business, financial condition, and results of operations. A return of these conditions in the near future would likely exacerbate the adverse effects of these difficult market conditions on us and others in the financial institutions industry and have a material adverse effect on our business, financial condition, results of operations and prospects.

Current market volatility and industry developments may adversely affect our business and financial results.

The volatility in the capital and credit markets, along with the housing declines over the past years, has resulted in significant pressure on the financial services industry. We have experienced a higher level of foreclosures and higher losses upon foreclosure than we have historically. If current volatility and market conditions continue or worsen, we may have further increases in loan losses, deterioration of capital or limitations on our access to funding or capital, if needed, which could have a material adverse effect on our business, financial condition, results of operations and prospect.

Further, if other, particularly larger, financial institutions continue to fail to be adequately capitalized or funded, it may negatively impact our business and financial results. We routinely interact with numerous financial institutions in the ordinary course of business and are therefore exposed to operational and credit risk to those institutions. Failures of such institutions may significantly adversely impact our operations and have a material adverse effect on our business, financial condition, results of operations and prospects.

Our profitability is vulnerable to interest rate fluctuations.

As a financial institution, our earnings can be significantly affected by changes in interest rates, particularly our net interest income, the rate of loan prepayments, the volume and type of loans originated or produced, the sales of loans on the secondary market and the value of our mortgage servicing rights. Our profitability is dependent to a large extent on our net interest income, which is the difference between our income on interest-earning assets and our expense on interest bearing liabilities. We are affected by changes in general interest rate levels and by other economic factors beyond our control.

Changes in interest rates also affect the average life of loans and mortgage-backed securities. The relatively lower interest rates in recent periods have resulted in increased prepayments of loans and mortgage-backed securities as borrowers have refinanced their mortgages to reduce their borrowing costs. Under these circumstances, we are subject to reinvestment risk to the extent that we are not able to reinvest such prepayments at rates which are comparable to the rates on the prepaid loans or securities. Our inability to manage interest rate risk and fluctuations could have a material adverse effect on our business, financial condition, results of operations and prospects.

Changes in monetary policies may have a material adverse effect on our business.

Like all regulated financial institutions, we are affected by monetary policies implemented by the Federal Reserve and other federal instrumentalities. A primary instrument of monetary policy employed by the Federal Reserve is the restriction or expansion of the money supply through open market operations. This instrument of monetary policy frequently causes volatile fluctuations in interest rates, and it can have a direct, material adverse effect on the operating results of financial institutions including our business. Borrowings by the United States government to finance government debt may also cause fluctuations in interest rates and have similar effects on the operating results of such institutions. We do not have any control over monetary policies implemented by the Federal Reserve or otherwise and any changes in these policies could have a material adverse effect on our business, financial condition, results of operations and prospects.

Risks Related to Our Common Stock

The market price of our common stock may be subject to substantial fluctuations, which may make it difficult for you to sell your shares at the volume, prices and times desired.

The market price of our common stock may be highly volatile, which may make it difficult for you to resell your shares at the volume, prices and times desired. There are many factors that may impact the market price and trading volume of our common stock, including, without limitation:

- actual or anticipated fluctuations in our operating results, financial condition or asset quality;
- changes in economic or business conditions;
- the effects of, and changes in, trade, monetary and fiscal policies, including the interest rate policies of the Federal Reserve;
- publication of research reports about us, our competitors, or the financial services industry generally, or changes in, or failure to meet, securities analysts' estimates of our financial and operating performance, or lack of research reports by industry analysts or ceasing of coverage;
- operating and stock price performance of companies that investors deemed comparable to us;
- future issuances of our common stock or other securities;
- additions to or departures of key personnel;
- proposed or adopted changes in laws, regulations or policies affecting us;
- perceptions in the marketplace regarding our competitors and/or us;
- significant acquisitions or business combinations, strategic partnerships, joint ventures or capital commitments by or involving our competitors or us;
- other economic, competitive, governmental, regulatory and technological factors affecting our operations, pricing, products and services; and
- other news, announcements or disclosures (whether by us or others) related to us, our competitors, our core market or the financial services industry.

The stock market and, in particular, the market for financial institution stocks, have experienced substantial fluctuations in recent years, which in many cases have been unrelated to the operating performance and prospects of particular companies. In addition, significant fluctuations in the trading volume in our common stock may cause significant price variations to occur. Increased market volatility may materially and adversely affect the market price of our common stock, which could make it difficult to sell your shares at the volume, prices and times desired.

The rights of our common stockholders are subordinate to the rights of the holders of our Series A Preferred Stock and any debt securities that we may issue and may be subordinate to the holders of any other class of preferred stock that we may issue in the future.

We have issued 40,000 shares of our Series A Preferred Stock to the Treasury in connection with our participation in the Small Business Lending Fund program. These shares have certain rights that are senior to our common stock. As a result, we must make payments on the preferred stock before any dividends can be paid on our common stock and, in the event of our bankruptcy, dissolution or liquidation, the holders of the Series A Preferred Stock must be satisfied in full before any distributions can be made to the holders of our common stock. Our board of directors has the authority to issue in the aggregate up to one million shares of preferred stock, and to determine the terms of each issue of preferred stock, without stockholder approval. Accordingly, you should assume that any shares of preferred stock that we may issue in the future will also be senior to our common stock. Because our decision to issue debt or equity securities or incur other borrowings in the future will depend on market conditions and other factors beyond our control, the amount, timing, nature or success of our future capital raising efforts is uncertain. Because our ability to pay dividends on our common stock in the future will depend on our and our bank's financial condition as well as factors outside of our control, our common stockholders bear the risk that no dividends will be paid on our common stock in future periods or that, if paid, such dividends will be reduced or eliminated, which may negatively impact the market price of our common stock.

We and our banking subsidiary are subject to capital and other requirements which restrict our ability to pay dividends.

On September 19, 2013, we announced the approval of the initiation of quarterly cash dividends beginning in 2014. Future declarations of quarterly dividends will be subject to the approval of our board of directors, subject to limits imposed on us by our regulators. In order to pay any dividends, we will need to receive dividends from our bank or have other sources of funds. Under Alabama law, a state-chartered bank may not pay a dividend in excess of 90% of its net earnings until the bank's surplus is equal to at least 20% of its capital (our bank's surplus currently exceeds 20% of its capital). Moreover, our bank is also required by Alabama law to obtain the prior approval of the Superintendent of Banks (the "Superintendent") for its payment of dividends if the total of all dividends declared by our bank in any calendar year will exceed the total of (1) our bank's net earnings (as defined by statute) for that year, plus (2) its retained net earnings for the preceding two years, less any required transfers to surplus. In addition, the bank must maintain certain capital levels, which may restrict the ability of the bank to pay dividends to us and our ability to pay dividends to our stockholders. As of December 31, 2014, our bank could pay approximately $129.1 million of dividends to us without prior approval of the Superintendent. However, the payment of dividends is also subject to

declaration by our board of directors, which takes into account our financial condition, earnings, general economic conditions and other factors, including statutory and regulatory restrictions. There can be no assurance that dividends will in fact be paid on our common stock in future periods or that, if paid, such dividends will not be reduced or eliminated.

Alabama and Delaware law limit the ability of others to acquire the bank, which may restrict your ability to fully realize the value of your common stock.

In many cases, stockholders receive a premium for their shares when one company purchases another. Alabama and Delaware law make it difficult for anyone to purchase the bank or us without approval of our board of directors. Thus, your ability to realize the potential benefits of any sale by us may be limited, even if such sale would represent a greater value for stockholders than our continued independent operation.

Our Certificate of Incorporation, as amended, authorizes the issuance of preferred stock which could adversely affect holders of our common stock and discourage a takeover of us by a third party.

Our certificate of incorporation, as amended (or, our “charter”) authorizes our board of directors to issue up to 1,000,000 shares of preferred stock without any further action on the part of our stockholders. In 2011, we issued 40,000 shares of our Series A Preferred Stock with certain rights and preferences set forth in the certificate of designation for such preferred stock. Our board of directors also has the power, without stockholder approval, to set the terms of any series of preferred stock that may be issued, including voting rights, dividend rights, and preferences over our common stock with respect to dividends or in the event of a dissolution, liquidation or winding up and other terms. In the event that we issue preferred stock in the future that has preference over our common stock with respect to payment of dividends or upon our liquidation, dissolution or winding up, or if we issue preferred stock with voting rights that dilute the voting power of our common stock, the rights of the holders of our common stock or the market price of our common stock could be adversely affected. In addition, the ability of our board of directors to issue shares of preferred stock without any action on the part of the stockholders may impede a takeover of us and prevent a transaction favorable to our stockholders.

An investment in our common stock is not an insured deposit and is subject to risk of loss.

Our common stock is not a bank deposit and, therefore, is not insured against loss by the FDIC, any deposit insurance fund or by any other public or private entity. Investment in our common stock is inherently risky for the reasons described in this "*Risk Factors*" section and is subject to the same market forces that affect the price of common stock in any company. As a result, an investor may lose some or all of such investor's investment in our common stock.

Our corporate governance documents, and certain corporate and banking laws applicable to us, could make a takeover more difficult.

Certain provisions of our charter and bylaws, as amended, and corporate and federal banking laws, could make it more difficult for a third party to acquire control of our organization, even if those events were perceived by many of our stockholders as beneficial to their interests. These provisions, and the corporate and banking laws and regulations applicable to us:

- provide that special meetings of stockholders may be called at any time by the Chairman of our board of directors, by the President or by order of the board of directors;
- enable our board of directors to issue preferred stock up to the authorized amount, with such preferences, limitations and relative rights, including voting rights, as may be determined from time to time by the board;
- enable our board of directors to increase the number of persons serving as directors and to fill the vacancies created as a result of the increase by a majority vote of the directors present at the meeting;
- enable our board of directors to amend our bylaws without stockholder approval; and
- do not provide for cumulative voting rights (therefore allowing the holders of a majority of the shares of common stock entitled to vote in any election of directors to elect all of the directors standing for election, if they should so choose).

These provisions may discourage potential acquisition proposals and could delay or prevent a change in control, including under circumstances in which our stockholders might otherwise receive a premium over the market price of our shares.

Risks Related to the Metro Bank Acquisition

If we are unable to successfully integrate the operations of Metro Bank, we could be materially and adversely affected.

On January 31, 2015, we completed the merger with Metro Bancshares, Inc. (“Metro”), which resulted in the acquisition of 100% of all the outstanding shares of Metro, including all outstanding options and warrants. The acquisition of Metro represents our first strategic acquisition and our entry into the Atlanta metropolitan market. The transaction involves the integration of the operations of Metro Bank, the former wholly-owned subsidiary of Metro. Successful integration of these operations will depend primarily on our ability to consolidate standards, controls, procedures and policies. This transaction will also pose other risks commonly associated with similar transactions, including unanticipated liabilities, unexpected costs and the diversion of management’s attention to the integration of the operations of Metro Bank. We may not be able to integrate these operations without encountering difficulties, including, but not limited to, the disruption of our ongoing businesses or possible inconsistencies in standards, controls, procedures and policies. If we have difficulties with any of these integrations, we might not achieve the economic benefits we expect to result from the transaction, and this may hurt our business and financial results. Additional risks include, but are not limited to, the following:

- inability to compete in a new market;
- projections of estimated future revenues or cost savings that we developed during the due diligence and integration planning process may not be achieved;
- adverse impact on the effectiveness of our internal controls and compliance with the regulatory requirements under the Sarbanes-Oxley Act of 2002;
- unanticipated issues, expenses and liabilities; diversion of our management’s attention away from other business concerns; and
- exposure to any undisclosed or unknown potential liabilities relating to Metro Bank.

We cannot assure you that we would be able to integrate the operations of Metro Bank without encountering difficulties or that any such difficulties will not have a material adverse effect on us. Furthermore, if we fail to realize the intended benefits of the Metro acquisition, the market price of our common stock could decline to the extent that the market price reflects those benefits.

ITEM 1B. UNRESOLVED STAFF COMMENTS.

None.

ITEM 2. PROPERTIES.

As of December 31, 2014, we operated through 14 banking offices, including our loan production office in Nashville Tennessee, which does not include the offices in the Atlanta metropolitan area we will operate as a result of the Metro Bank acquisition. Our Shades Creek Parkway office also includes our corporate headquarters. We believe that our banking offices are in good condition, are suitable to our needs and, for the most part, are relatively new. The following table gives pertinent details about our banking offices.

State MSA Office Address	City	Zip Code	Owned or Leased	Date Opened
Alabama:				
Birmingham-Hoover:				
850 Shades Creek Parkway, Suite 200 (1)	Birmingham	35209	Leased	3/2/2005
324 Richard Arrington Jr. Boulevard North	Birmingham	35203	Leased	12/19/2005

(1) Offices relocated to this address. Original offices opened on date indicated.

(2) Office is a loan production office only.

39

ITEM 3. LEGAL PROCEEDINGS.

Neither we nor the Bank is currently subject to any material legal proceedings. In the ordinary course of business, the Bank is involved in routine litigation, such as claims to enforce liens, claims involving the making and servicing of real property loans, and other issues incident to the Bank's business. Management does not believe that there are any threatened proceedings against us or the Bank which, if determined adversely, would have a material effect on our or the Bank's business, financial position or results of operations.

ITEM 4. MINE SAFETY DISCLOSURE

Not applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES.

Our common stock is listed on the NASDAQ Global Select Market under the symbol "SFBS." As of February 27, 2015, there were 851 holders of record of our common stock. As of the close of business on February 27, 2015, the price of our common stock was $32.14 per share. All share and per share data in this Annual Report on Form 10-K is adjusted to reflect our three-for-one stock split in the form of a stock dividend effective on July 16, 2014 for stockholders of record on July 9, 2014.

The following table sets forth the reported high and low sales price of our common stock as quoted on the NASDAQ during each quarter since we completed our initial public offering in May 2014.

2014	High Sale	Low Sale
4th quarter	$ 35.10	$ 28.00
3rd quarter	30.30	27.52
2nd quarter	30.96	26.50

Dividends

We paid a cash dividend of $0.17 per common share on December 31, 2012 and $0.17 per common share on December 16, 2013. In September 2013, we announced a plan to initiate the payment of a quarterly cash dividend beginning in 2014. Quarterly cash dividends of $0.15 per common share were paid on each of April 14, 2014 and July 15, 2014. Following completion of our three-for-one stock split on July 16, 2014, we declared a quarterly cash dividend of $0.05 per common share, which was paid on each of October 6, 2014 and January 6, 2015. Future declarations of quarterly cash dividends will be subject to the approval of the Board and may be adjusted as business needs or market conditions change. The principal source of our cash flow, including cash flow to pay dividends, comes from dividends that the Bank pays to us as its sole stockholder. Statutory and regulatory limitations apply to the Bank's payment of dividends to us, as well as our payment of dividends to our stockholders. For a more complete discussion on the restrictions on dividends, see "Supervision and Regulation - Payment of Dividends" in Item 1. We also pay quarterly dividends on our 40,000 shares of outstanding Non-cumulative Perpetual Preferred Stock pursuant to its Certificate of Designation.

Recent Sales of Unregistered Securities

We had no sales of unregistered securities in 2014 other than those previously reported in our reports filed with the Securities and Exchange Commission.

On May 13, 2014, the Company's registration statement on Form S-1 (File No. 333-193401), which related to the Company's initial public offering, was declared effective by the SEC. Under that registration statement, we registered and sold an aggregate of 1,875,000 shares of common stock at a price to the public of $30.333 per share, generating gross offering proceeds of approximately $56.9 million. The net proceeds of the sale of such shares, after underwriting commissions and offering expenses, were approximately $52.1 million. There has been no material change in the planned use of proceeds from the initial public offering as described in the final prospectus filed with the SEC on May 14, 2014 under Rule 424(b) of the Securities Act of 1933, as amended. We applied approximately $20.9 million of the proceeds from the initial public offering toward the acquisition of Metro Bank. on January 31, 2015. See "Recent Developments – Metro Bank acquisition" in Item 1. BUSINESS of this Form 10-K for further information about this acquisition.

Purchases of Equity Securities by the Registrant and Affiliated Purchasers

We made no repurchases of our equity securities, and no "affiliated purchasers" (as defined in Rule 10b-18(a) (3) under the Securities Exchange Act of 1934) purchased any shares of our equity securities during the fourth quarter of the fiscal year ended December 31, 2014.

Equity Compensation Plan Information

The following table sets forth certain information as of December 31, 2014 relating to stock options granted under our 2005 Amended and Restated Stock Incentive Plan and our 2009 Amended and Restated Stock Incentive Plan and other options or warrants issued outside of such plans, if any.

Plan Category	Number of Securities Issued/To Be Issued Upon Exercise of Outstanding Awards	Weighted-average Exercise Price of Outstanding Awards	Number of Securities Remaining Available For Future Issuance Under Equity Compensation Plans
Equity Compensation Award-Plans Approved by Security Holders	1,622,917	$ 9.38	2,018,510
Equity Compensation Awards-Plans Not Approved by Security Holders	-	-	-
Total	1,622,917	$ 9.38	2,018,510

We award stock options as incentive to employees, officers, directors and consultants to attract or retain these individuals, to maintain and enhance our long-term performance and profitability, and to allow these individuals to

acquire an ownership interest in our Company. Our compensation committee administers this program, making all decisions regarding grants and amendments to these awards. An incentive stock option may not be exercised later than 90 days after an option holder terminates his or her employment with us unless such termination is a consequence of such option holder's death or disability, in which case the option period may be extended for up to one year after termination of employment. All of our issued options will vest immediately upon a transaction in which we merge or consolidate with or into any other corporation (unless we are the surviving corporation), or sell or otherwise transfer our property, assets or business substantially in its entirety to a successor corporation. At that time, upon the exercise of an option, the option holder will receive the number of shares of stock or other securities or property, including cash, to which the holder of a like number of shares of common stock would have been entitled upon the merger, consolidation, sale or transfer if such option had been exercised in full immediately prior thereto. All of our issued options have a term of 10 years. This means the options must be exercised within 10 years from the date of the grant.

We have granted 235,500 (post-stock split) shares of restricted stock under the 2009 Amended and Restated Stock Incentive Plan. These shares generally vest between three and five years from the date of grant, subject to earlier vesting in the event of a merger, consolidation, sale or transfer of the Company or substantially all of its assets and business.

ITEM 6. SELECTED FINANCIAL DATA.

The following table sets forth selected historical consolidated financial data from our consolidated financial statements and should be read in conjunction with our consolidated financial statements including the related notes and "Management's Discussion and Analysis of Financial Condition and Results of Operations" which are included below. Except for the data under "Selected Performance Ratios", "Core Performance Ratios", "Asset Quality Ratios", "Liquidity Ratios", "Capital Adequacy Ratios" and "Growth Ratios", the selected historical consolidated financial data as of December 31, 2014, 2013, 2012, 2011 and 2010 and for the years ended December 31, 2014, 2013, 2012, 2011 and 2010 are derived from our audited consolidated financial statements and related notes.

(1) Net interest margin is the net yield on interest earning assets and is the difference between the interest yield earned on interest-earning assets and interest rate paid on interest-bearing liabilities, divided by average earning assets.

(2) Efficiency ratio is the result of noninterest expense divided by the sum of net interest income and noninterest income.

(3) Core metrics exclude a non-routine expense in the first quarter of 2014 related to the correction of our accounting for vested stock options granted to our advisory board members in our Huntsville, Montgomery and Dothan, Alabama markets, and a non-routine expense in the second quarter of 2014 related to the acceleration of vesting of stock options previously granted to our advisory board members in our Mobile, Alabama and Pensacola, Florida markets. For a reconciliation of these non-GAAP measures to the most comparable GAAP measure, see "GAAP Reconciliation and Management Explanation of Non-GAAP Financial Measures." None of the other periods included in our selected consolidated financial information are affected by such non-routine expenses.

(4) Total stockholders' equity excluding unrealized gains/(losses) on securities available for sale, net of taxes, and intangible assets plus allowance for loan losses (limited to 1.25% of risk-weighted assets) divided by total risk-weighted assets. The FDIC required minimum to be well capitalized is 10%.

(5)Total stockholders' equity excluding unrealized gains/(losses) on securities available for sale, net of taxes, and intangible assets divided by total risk-weighted assets. The FDIC required minimum to be well-capitalized is 6%.

(6) Total stockholders' equity excluding unrealized losses on securities available for sale, net of taxes, and intangible assets divided by average assets less intangible assets. The FDIC required minimum to the be well-capitalized is 5%; however, the Alabama Banking Department has required that the Bank maintain a Tier 1 capital ratio of 8%.

GAAP Reconciliation and Management Explanation of Non-GAAP Financial Measures

We recorded a non-routine expense of $0.7 million for the first quarter of 2014 resulting from the correction of our accounting for vested stock options previously granted to members of our advisory boards in our Huntsville, Montgomery and Dothan, Alabama markets, and we recorded a non-routine expense of $1.8 million for the second quarter of 2014 resulting from an acceleration of vesting of stock options previously granted to members of our advisory boards in our Mobile, Alabama and Pensacola, Florida markets. This change in accounting treatment is a non-cash item and does not impact our operating activities or cash from operations. The non-GAAP financial measures included in this annual report on Form 10-K results for the year ended December 31, 2014 are “core net income available to common stockholders,” “core earnings per share, basic,” “core earnings per share, diluted,” “core return on average assets,” “core return on average stockholders’ equity,” “core return on average common stockholders’ equity” and “core efficiency ratio.” Each of these seven core financial measures excludes the impact of the non-routine expense attributable to the correction of our accounting for stock options and related acceleration of vesting of such stock options. None of the other periods included in our selected financial data are affected by this correction and acceleration of vesting.

"Core net income available to common stockholders" is defined as net income available to common stockholders, adjusted by the net effect of the non-routine expense.

"Core earnings per share, basic" is defined as net income available to common stockholders, adjusted by the net effect of the non-routine expense, divided by weighted average shares outstanding.

"Core earnings per share, diluted" is defined as net income available to common stockholders, adjusted by the net effect of the non-routine expense, divided by weighted average diluted shares outstanding.

“Core return on average assets” is defined as net income, adjusted by the net effect of the non-routine expense, divided by average total assets.

“Core return of average stockholders’ equity” is defined as net income, adjusted by the net effect of the non-routine expense, divided by average total stockholders’ equity.

“Core return of average common stockholders’ equity” is defined as net income, adjusted by the net effect of the non-routine expense, divided by average common stockholders’ equity.

“Core efficiency ratio” is defined as non-interest expense, adjusted by the effect of the non-routine expense, divided by the sum of net interest income and non-interest income.

We believe these non-GAAP financial measures provide useful information to management and investors that is supplementary to our financial condition, results of operations and cash flows computed in accordance with GAAP; however, we acknowledge that these non-GAAP financial measures have a number of limitations. As such, you should not view these disclosures as a substitute for results determined in accordance with GAAP, and they are not necessarily comparable to non-GAAP financial measures that other companies, including those in our industry, use. The following reconciliation table provides a more detailed analysis of the non-GAAP financial measures for the year ended December 31, 2014. All amounts are in thousands, except share and per share data.

	2014	
Provision for income taxes - GAAP	$21,601	
Adjustments:		
Adjustment for non-routine expense	865	
Core income tax expense	$22,466

Adjustments:		
Adjustment for non-routine expense	2,477	
Core non-interest expense	55,121	
Net interest income	130,606	
Non-interest income	11,229	
Total net interest income and non-interest income	$141,835	
Core efficiency ratio	38.86	%

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following is a narrative discussion and analysis of significant changes in our results of operations and financial condition. The purpose of this discussion is to focus on information about our financial condition and results of operations that is not otherwise apparent from the audited financial statements. Analysis of the results presented should be made in the context of our relatively short history. This discussion should be read in conjunction with the financial statements and selected financial data included elsewhere in this document.

Overview

We are a bank holding company within the meaning of the Bank Holding Company Act of 1956 headquartered in Birmingham, Alabama. Through our wholly-owned subsidiary bank, we operate 13 full service banking offices located in Jefferson, Shelby, Madison, Montgomery, Mobile and Houston Counties in Alabama, and in Escambia County in Florida. These offices operate in the Birmingham-Hoover, Huntsville, Montgomery, Mobile and Dothan, Alabama MSAs, and in the Pensacola-Ferry Pass-Brent, Florida MSA. Additionally, we opened a loan production office in Nashville, Tennessee in June 2013. Our principal business is to accept deposits from the public and to make loans and other investments. Our principal source of funds for loans and investments are demand, time, savings, and other deposits and the amortization and prepayment of loans and borrowings. Our principal sources of income are interest and fees collected on loans, interest and dividends collected on other investments and service charges. Our principal expenses are interest paid on savings and other deposits, interest paid on our other borrowings, employee compensation, office expenses and other overhead expenses.

Recent Developments – Metro Bank Acquisition

On January 31, 2015, we completed the merger with Metro Bancshares, Inc. ("Metro"), which resulted in the acquisition of 100% of all the outstanding shares of Metro, including all outstanding options and warrants, for an aggregate of 636,720 shares of ServisFirst common stock and approximately $20.9 million in cash, representing aggregate consideration value of approximately $40.3 million (based on the closing price of ServisFirst Bancshares, Inc. on January 30, 2015). The acquisition of Metro represents our first strategic acquisition and our further entry into the Atlanta metropolitan market. At December 31, 2014, Metro had total assets of approximately $211 million, total loans of approximately $154 million, total deposits of approximately $182 million and total stockholders' equity of approximately $28 million. The cash portion of the merger consideration was paid from the Company's cash on hand. Because the acquisition closed on January 31, 2015, after the end of the fiscal period covered by this Annual Report on Form 10-K, the Company's financial information does not include any of the results of operations from Metro or its subsidiary, Metro Bank.

Critical Accounting Policies

Our consolidated financial statements are prepared based on the application of certain accounting policies, the most significant of which are described in the Notes to the Consolidated Financial Statements. Certain of these policies require numerous estimates and strategic or economic assumptions that may prove inaccurate or subject to variation and may significantly affect our reported results and financial position for the current period or in future periods. The use of estimates, assumptions, and judgments are necessary when financial assets and liabilities are required to be recorded at, or adjusted to reflect, fair value. Assets carried at fair value inherently result in more financial statement volatility. Fair values and information used to record valuation adjustments for certain assets and liabilities are based on either quoted market prices or are provided by other independent third-party sources, when available. When such information is not available, management estimates valuation adjustments. Changes in underlying factors, assumptions or estimates in any of these areas could have a material impact on our future financial condition and results of operations.

Allowance for Loan Losses

The allowance for loan losses, sometimes referred to as the “ALLL”, is established through periodic charges to income. Loan losses are charged against the ALLL when management believes that the future collection of principal is unlikely. Subsequent recoveries, if any, are credited to the ALLL. If the ALLL is considered inadequate to absorb future loan losses on existing loans for any reason, including but not limited to, increases in the size of the loan portfolio, increases in charge-offs or changes in the risk characteristics of the loan portfolio, then the provision for loan losses is increased.

Loans are considered impaired when, based on current information and events, it is probable that the Bank will be unable to collect all amounts due according to the original terms of the loan agreement. The collection of all amounts due according to contractual terms means that both the contractual interest and principal payments of a loan will be collected as scheduled in the loan agreement. Impaired loans are measured based on the present value of expected future cash flows discounted at the loan’s effective interest rate, or, as a practical expedient, at the loan’s observable market price, or the fair value of the underlying collateral. The fair value of collateral, reduced by costs to sell on a discounted basis, is used if a loan is collateral-dependent.

Investment Securities Impairment

Periodically, we may need to assess whether there have been any events or economic circumstances to indicate that a security on which there is an unrealized loss is impaired on an other-than-temporary basis. In any such instance, we would consider many factors, including the severity and duration of the impairment, our intent and ability to hold the security for a period of time sufficient for a recovery in value, recent events specific to the issuer or industry, and for debt securities, external credit ratings and recent downgrades. Securities on which there is an unrealized loss that is deemed to be other-than-temporary are written down to fair value, with the write-down recorded as a realized loss in securities gains (losses).

Other Real Estate Owned

Other real estate owned ("OREO"), consisting of assets that have been acquired through foreclosure, is recorded at the lower of cost or estimated fair value less the estimated cost of disposition. Fair value is based on independent appraisals and other relevant factors. Other real estate owned is revalued on an annual basis or more often if market conditions necessitate. Valuation adjustments required at foreclosure are charged to the allowance for loan losses. Subsequent to foreclosure, losses on the periodic revaluation of the property are charged to net income as OREO expense. Significant judgments and complex estimates are required in estimating the fair value of other real estate, and the period of time within which such estimates can be considered current is significantly shortened during periods of market volatility, as experienced in recent years. As a result, the net proceeds realized from sales transactions could differ significantly from appraisals, comparable sales, and other estimates used to determine the fair value of other real estate.

Results of Operations

Net Income

Net income available to common stockholders was $51.9 million for the year ended December 31, 2014, compared to $41.2 million for the year ended December 31, 2013. This increase in net income is primarily attributable to an increase in net interest income, which increased $18.1 million, or 16.1%, to $130.6 million in 2014 from $112.5 million in 2013. Noninterest income increased $1.2 million, or 12.0%, to $11.2 million in 2014 from $10.0 million in 2013. Noninterest expense increased by $10.1 million, or 21.3%, to $57.6 million in 2014 from $47.5 million in 2013. Basic and diluted net income per common share were $2.18 and $2.09, respectively, for the year ended December 31, 2014, compared to $2.00 and $1.90, respectively, for the year ended December 31, 2013. Return on average assets was 1.39% in 2014, compared to 1.32% in 2013, and return on average stockholders' equity was 14.43% in 2014, compared to 15.70% in 2013. This decrease in return on average stockholders' equity was the result of our initial

public offering in May 2014, which increased equity by approximately $52.1 million.

Net income available to common stockholders for the year ended December 31, 2013 was $41.2 million, compared to net income of $34.0 million for the year ended December 31, 2012. This increase in net income is primarily attributable to an increase in net interest income, which increased $18.4 million, or 19.6%, to $112.5 million in 2013 from $94.1 million in 2012. Noninterest income increased $0.4 million, or 4.2%, to $10.0 million in 2013 from $9.6 million in 2012. Noninterest expense increased by $4.4 million, or 10.2%, to $47.5 million in 2013 from $43.1 million in 2012. Basic and diluted net income per common share were $2.00 and $1.90, respectively, for the year ended December 31, 2013, compared to $1.89 and $1.66, respectively, for the year ended December 31, 2012. Return on average assets was 1.32% in 2013, compared to 1.31% in 2012, and return on average stockholders' equity was 15.70% in 2013, compared to 15.99% in 2012.

The following table presents some ratios of our results of operations for the years ended December 31, 2014, 2013 and 2012.

	For the years ended December 31,					
	2014		2013		2012	
Return on average assets	1.39	%	1.32	%	1.31	%
Return on average stockholders' equity	14.43	%	15.70	%	15.99	%
Dividend payout ratio	9.57	%	8.79	%	10.02	%
Average stockholders' equity to average total assets	9.58	%	8.43	%	8.19	%

The following tables present a summary of our statements of income, including the percent change in each category, for the years ended December 31, 2014 compared to 2013, and for the years ended December 31, 2013 compared to 2012, respectively.

	Year Ended December 31,		Change from	
	2014	2013	the Prior Year	
	(Dollars in Thousands)			
Interest income	$ 144,725	$ 126,081	14.79	%

Net Interest Income

Net interest income is the difference between the income earned on interest-earning assets and interest paid on interest-bearing liabilities used to support such assets. The major factors which affect net interest income are changes in volumes, the yield on interest-earning assets and the cost of interest-bearing liabilities. Our management's ability to respond to changes in interest rates by effective asset-liability management techniques is critical to maintaining the stability of the net interest margin and the momentum of our primary source of earnings.

Net interest income increased $18.1 million, or 16.1%, to $130.6 million for the year ended December 31, 2014 from $112.5 million for the year ended December 31, 2013. This was due to an increase in total interest income of $18.6

million, or 14.8%, partially offset by an increase in total interest expense of $0.5 million, or 3.7%. The increase in total interest income was primarily attributable to a 18.60% increase in average loans outstanding from 2013 to 2014, which was the result of growth in all of our markets, including in Mobile, Alabama and Nashville, Tennessee, our two newest markets.

Net interest income increased $18.4 million, or 19.5%, to $112.5 million for the year ended December 31, 2013 from $94.1 million for the year ended December 31, 2012. This was due to an increase in total interest income of $17.1 million, or 15.6%, and a decrease in total interest expense of $1.3 million, or -8.6%. The increase in total interest income was primarily attributable to a 26.56% increase in average loans outstanding from 2012 to 2013, which was the result of growth in all of our markets, including in Pensacola, Florida, our newest market entrance in 2011.

Net Interest Margin Analysis

The net interest margin is impacted by the average volumes of interest-sensitive assets and interest-sensitive liabilities and by the difference between the yield on interest-sensitive assets and the cost of interest-sensitive liabilities (spread). Loan fees collected at origination represent an additional adjustment to the yield on loans. Our spread can be affected by economic conditions, the competitive environment, loan demand, and deposit flows. The net yield on earning assets is an indicator of effectiveness of our ability to manage the net interest margin by managing the overall yield on assets and cost of funding those assets.

The following table shows, for the years ended December 31, 2014, 2013 and 2012, the average balances of each principal category of our assets, liabilities and stockholders' equity, and an analysis of net interest revenue, and the change in interest income and interest expense segregated into amounts attributable to changes in volume and changes in rates. This table is presented on a taxable equivalent basis, if applicable.

Average Balance Sheets and Net Interest Analysis

On a Fully Taxable-Equivalent Basis

For the Year Ended December 31,

(1) Non-accrual loans are included in average loan balances in all periods. Loan fees of $1,025,000, $551,000 and $372,000 are included in interest income in 2014, 2013 and 2012, respectively.

(2) Interest income and yields are presented on a fully taxable equivalent basis using a tax rate of 35%.

(3) Unrealized gains of $7,545,000, $8,408,000 and $11,998,000 are excluded from the yield calculation in 2014, 2013 and 2012, respectively.

The following table reflects changes in our net interest margin as a result of changes in the volume and rate of our interest-bearing assets and liabilities.

	For the Year Ended December 31,					
	2014 Compared to 2013 Increase (Decrease) in Interest Income and Expense Due to Changes in:			2013 Compared to 2012 Increase (Decrease) in Interest Income and Expense Due to Changes in:

In the table above, changes in net interest income are attributable to (a) changes in average balances (volume variance), (b) changes in rates (rate variance), or (c) changes in rate and average balances (rate/volume variance). The volume variance is calculated as the change in average balances times the old rate. The rate variance is calculated as the change in rates times the old average balance. The rate/volume variance is calculated as the change in rates times the change in average balances. The rate/volume variance is allocated on a pro rata basis between the volume variance and the rate variance in the table above.

We have experienced an unfavorable variance relating to the interest rate component because rates on loans have declined at a greater pace compared to deposit costs. Accordingly, the prolonged low interest rate environment has resulted in a compression of the net interest margin percentage. Our growth in loans continues to drive favorable volume component change and overall change.

The two primary factors that make up the spread are the interest rates received on loans and the interest rates paid on deposits. We have been disciplined in raising interest rates on deposits only as the market demanded and thereby managing our cost of funds. Also, we have not competed for new loans on interest rate alone, but rather we have relied significantly on effective marketing to business customers.

Our net interest spread and net interest margin were 3.54% and 3.68%, respectively, for the year ended December 31, 2014, compared to 3.66% and 3.80%, respectively, for the year ended December 31, 2013. Our average interest-earning assets for the year ended December 31, 2014 increased $596.5 million, or 19.9%, to $3.6 billion from $3.0 billion for the year ended December 31, 2013. This increase in our average interest-earning assets was due to continued core growth in all of our markets and increased loan production. Our average interest-bearing liabilities increased $368.2 million, or 16.0%, to $2.7 billion for the year ended December 31, 2014 from $2.3 billion for the year ended December 31, 2013. This increase in our average interest-bearing liabilities was primarily due to an increase in interest-bearing deposits in all our markets. The ratio of our average interest-earning assets to average interest-bearing liabilities was 135.2% and 130.9% for the years ended December 31, 2014 and 2013, respectively.

Our average interest-earning assets produced a taxable equivalent yield of 4.07% for the year ended December 31, 2014, compared to 4.25% for the year ended December 31, 2013. The average rate paid on interest-bearing liabilities was 0.53% for the year ended December 31, 2014, compared to 0.59% for the year ended December 31, 2013.

Our net interest spread and net interest margin were 3.66% and 3.80%, respectively, for the year ended December 31, 2013, compared to 3.62% and 3.80%, respectively, for the year ended December 31, 2012. Our average interest-earning assets for the year ended December 31, 2013 increased $486.4 million, or 19.3%, to $3.0 billion from $2.5 billion for the year ended December 31, 2012. This increase in our average interest-earning assets was due to continued core growth in all of our markets and increased loan production. Our average interest-bearing liabilities increased $362.1 million, or 18.7%, to $2.3 billion for the year ended December 31, 2013 from $1.9 billion for the year ended December 31, 2012. This increase in our average interest-bearing liabilities was primarily due to an increase in interest-bearing deposits in all our markets. The ratio of our average interest-earning assets to average interest-bearing liabilities was 130.9% and 130.3% for the years ended December 31, 2013 and 2012, respectively.

Our average interest-earning assets produced a taxable equivalent yield of 4.25% for the year ended December 31, 2013, compared to 4.39% for the year ended December 31, 2012. The average rate paid on interest-bearing liabilities was 0.59% for the year ended December 31, 2013, compared to 0.77% for the year ended December 31, 2012.

Provision for Loan Losses

The provision for loan losses represents the amount determined by management to be necessary to maintain the allowance for loan losses at a level capable of absorbing inherent losses in the loan portfolio. Our management reviews the adequacy of the allowance for loan losses on a quarterly basis. The allowance for loan losses calculation is segregated into various segments that include classified loans, loans with specific allocations and pass rated loans. A pass rated loan is generally characterized by a very low to average risk of default and in which management perceives there is a minimal risk of loss. Loans are rated using a nine-point risk grade scale with loan officers having the primary responsibility for assigning risk grades and for the timely reporting of changes in the risk grades. Based on these processes, and the assigned risk grades, the criticized and classified loans in the portfolio are segregated into the following regulatory classifications: Special Mention, Substandard, Doubtful or Loss, with some general allocation of reserve based on these grades. At December 31, 2014, total loans rated Special Mention, Substandard, and Doubtful were $77.6 million, or 2.3% of total loans, compared to $93.2 million, or 3.3% of total loans, at December 31, 2013. Impaired loans are reviewed specifically and separately under FASB ASC 310-30-35, Subsequent Measurement of Impaired Loans, to determine the appropriate reserve allocation. Our management compares the investment in an impaired loan with the present value of expected future cash flow discounted at the loan's effective interest rate, the loan's observable market price or the fair value of the collateral, if the loan is collateral-dependent, to determine the specific reserve allowance. Reserve percentages assigned to non-impaired loans are based on historical charge-off experience adjusted for other risk factors. To evaluate the overall adequacy of the allowance to absorb losses inherent in our loan portfolio, our management considers historical loss experience based on volume and types of loans, trends in classifications, volume and trends in delinquencies and nonaccruals, economic conditions and other pertinent information. Based on future evaluations, additional provisions for loan losses may be necessary to maintain the allowance for loan losses at an appropriate level.

The provision expense for loan losses was $10.3 million for the year ended December 31, 2014, a decrease of $2.7 million from $13.0 million in 2013. This decrease in provision expense for loan losses for 2014 is primarily

attributable to improving credit quality resulting from fewer loan charge-offs. Also, nonperforming loans increased to $10.1 million, or 0.30% of total loans, at December 31, 2014 from $9.7 million, or 0.34% of total loans, at December 31, 2013. During 2014, we had net charged-off loans totaling $5.3 million, compared to net charged-off loans of $8.6 million for 2013. The ratio of net charged-off loans to average loans was 0.17% for 2014 compared to 0.33% for 2013. The allowance for loan losses totaled $35.6 million, or 1.06% of loans, net of unearned income, at December 31, 2014, compared to $30.7 million, or 1.07% of loans, net of unearned income, at December 31, 2013.

The provision expense for loan losses was $13.0 million for the year ended December 31, 2013, an increase of $3.9 million from $9.1 million in 2012. Our management maintains a proactive approach in managing nonperforming loans, which decreased to $9.7 million, or 0.34% of total loans, at December 31, 2013, from $10.4 million, or 0.44% of total loans, at December 31, 2012. During 2013, we had net charged-off loans totaling $9.7 million, compared to net charged-off loans of $4.9 million for 2012. The ratio of net charged-off loans to average loans was 0.33% for 2013 compared to 0.24% for 2012. The allowance for loan losses totaled $30.7 million, or 1.07% of loans, net of unearned income, at December 31, 2013, compared to $26.3 million, or 1.11% of loans, net of unearned income, at December 31, 2012.

Noninterest Income

Noninterest income increased $1.2 million, or 12.0%, to $11.2 million in 2014 from $10.0 million in 2013. Service charges on deposit accounts increased $1.1 million, or 34.4%, to $4.3 million in 2014 compared to 2013 due to increases in the number of accounts and higher NSF fees. Increases in the cash surrender value of bank-owned life insurance contracts were up $0.3 million, or 15.0%, to $2.3 million in 2014 compared to 2013 which is the result of additional investment of $15.0 million in such contracts in September 2014. Other operating income increased $0.5 million, or 23.8%, to $2.6 million in 2014 compared to 2013. Mortgage banking income decreased $0.5 million, or 20.0%, to $2.0 million in 2014 compared to 2013. Higher mortgage rates and a general slow-down in refinance activity during 2014 compared to 2013 lead to lower mortgage banking revenue.

Noninterest income increased $0.4 million, or 4.2%, to $10.0 million in 2013 from $9.6 million in 2012. Service charges on deposit accounts increased $0.4 million, or 14.3%, to $3.2 million in 2013 compared to 2012 due to increases in the number of accounts. Increases in the cash surrender value of bank-owned life insurance contracts were up $0.4 million, or 25.0%, to $2.0 million in 2013 compared to 2012 which is the result of additional investment of $10.0 million in such contracts in September 2013. Other operating income increased $0.4 million, or 23.5%, to $2.1 million in 2013 compared to 2012. Mortgage banking income decreased $1.1 million, or 30.6%, to $2.5 million in 2013 compared to 2012. Higher mortgage rates and a general slow-down in refinance activity during 2013 compared to 2012 lead to lower mortgage banking revenue.

Noninterest Expense

Noninterest expenses increased $10.1 million, or 21.3%, to $57.6 million for the year ended December 31, 2014 from $47.5 million for the year ended December 31, 2013. This increase is largely attributable to increased salary and employee benefits expense and the write-down of investments in tax credit partnerships. Increases in salary and benefit expenses occurred as a result of staff additions related to our expansion, increased incentive pay, general merit increases and non-routine expenses associated with the correction of accounting for vested stock options and related acceleration of vesting of stock options. We had 298 full-time equivalent employees at December 31, 2014 compared to 262 at December 31, 2013, a 13.7% increase. The increase in number of employees is the result of our continued expansion into new markets, additional sales and sales support staff in our existing regional markets and added support staff in our headquarters in Birmingham. We recorded a non-routine expense of $0.7 million for the first quarter of 2014 resulting from the correction of our accounting for vested stock options previously granted to members of our advisory boards in our Huntsville, Montgomery and Dothan, Alabama markets, and we recorded a non-routine expense of $1.8 million for the second quarter of 2014 resulting from an acceleration of vesting of stock options previously granted to members of our advisory boards in our Mobile, Alabama and Pensacola, Florida markets. This change in accounting treatment is a non-cash item and does not impact our operating activities or cash from operations. Equipment and occupancy expense increased $0.3 million, or 5.8%, to $5.5 million in 2014 compared to $5.2 million in 2013. Professional services expenses were up $0.6 million, or 33.3%, to $2.4 million in 2014 compared to $1.8 million in 2013. FDIC assessments were up $0.3 million, or 16.7%, to $2.1 million in 2014 from $1.8 million in 2013, mostly a result of increases in total assets, which is the major component of our assessment base. Other noninterest expenses increased $4.1 million, or 37.6%, to $15.0 million in 2014 compared to $10.9 million in 2013. We wrote down our investments in tax credit partnerships by $2.6 million in 2014 in connection with tax credits recognized during the year. This compared to write-downs in 2013 of only $0.4 million. Tax credits increased by $1.3 million in 2014 compared to 2013, which is reflected in a lower effective tax rate for 2014. Changes in other operating expenses from 2013 to 2014 are detailed in Note 16, "*Other Operating Income and Expenses,*" to the Consolidated Financial Statements.

Noninterest expenses increased $4.4 million, or 10.2%, to $47.5 million for the year ended December 31, 2013 from $43.1 million for the year ended December 31, 2012. This increase is largely attributable to increased salary and employee benefits expense, which is a result of staff additions related to our expansion, increased incentive pay, and general merit increases. We had 262 full-time equivalent employees at December 31, 2013 compared to 234 at December 31, 2012. Equipment and occupancy expense increased $1.2 million, or 30.0%, to $5.2 million in 2013 compared to $4.0 million in 2012. Much of this increase is the result of operating an airplane we purchased in the

fourth quarter of 2012. Additionally, we opened a new loan production office in Nashville, Tennessee and expanded our space in our Mobile, Alabama office. FDIC assessments were up $0.2 million, or 12.5%, to $1.8 million in 2013 from $1.6 million in 2012, mostly a result of increases in total assets, which is the major component of our assessment base. OREO expense decreased $1.3 million, 48.1%, to $1.4 million in 2013 from $2.7 million in 2012. This large decrease was the result of fewer write-downs in residential development properties during 2013 compared to 2012. Other noninterest expenses increased $0.2 million, or 1.9%, to $10.9 million compared to $10.7 million in 2012.

Income Tax Expense

Income tax expense was $21.6 million for the year ended December 31, 2014 compared to $20.4 million in 2013 and $17.1 million in 2012. Our effective tax rates for 2014, 2013 and 2012 were 29.20%, 32.85% and 33.20%, respectively. The decrease in the effective tax rate for 2014 primarily relates to historic rehabilitation tax credits. Our primary permanent differences are related to tax exempt income on debt securities, state income tax benefit on real estate investment trust dividends, various qualifying tax credits, change in cash surrender value of bank-owned life insurance and incentive stock option expenses.

We have invested $85.0 million in bank-owned life insurance for certain named officers of the Bank. The periodic increases in cash surrender value of those policies are tax exempt and therefore contribute to a larger permanent difference between book income and taxable income.

We own real estate investment trusts for the purpose of holding and managing participations in residential mortgages and commercial real estate loans originated by the Bank. The trusts are majority-owned subsidiaries of a trust holding company, which in turn is a wholly-owned subsidiary of the Bank. The trusts earn interest income on the loans they hold and incur operating expenses related to their activities. They pay their net earnings, in the form of dividends, to the Bank, which receives a deduction for state income taxes.

Financial Condition

Assets

Total assets at December 31, 2014, were $4.1 billion, an increase of $0.6 billion, or 17.1% over total assets of $3.5 billion at December 31, 2013. Average assets for the year ended December 31, 2014 were $3.8 billion, an increase of $0.7 billion, or 22.6%, over average assets of $3.1 billion for the year ended December 31, 2013. Loan growth was the primary reason for the increase. Year-end 2014 loans were $3.4 billion, up $0.5 billion, or 17.2%, over year-end 2013 total loans of $2.9 billion.

Total assets at December 31, 2013, were $3.5 billion, an increase of $0.6 billion, or 20.7% over total assets of $2.9 billion at December 31, 2012. Average assets for the year ended December 31, 2013 were $3.1 billion, an increase of $0.5 billion, or 19.2%, over average assets of $2.6 billion for the year ended December 31, 2012. Loan growth was the primary reason for the increase. Year-end 2013 loans were $2.9 billion, up $0.5 billion, or 20.8%, over year-end 2012 total loans of $2.4 billion.

Earning assets include loans, securities, short-term investments and bank-owned life insurance contracts. We maintain a higher level of earning assets in our business model than do our peers because we allocate fewer of our resources to facilities, ATMs, cash and due-from-bank accounts used for transaction processing. Earning assets at December 31, 2014 were $4.0 billion, or 97.6% of total assets of $4.1 billion. Earning assets at December 31, 2013 were $3.4 billion, or 97.1% of total assets of $3.5 billion. We believe this ratio is expected to generally continue at these levels, although it may be affected by economic factors beyond our control.

Investment Portfolio

We view the investment portfolio as a source of income and liquidity. Our investment strategy is to accept a lower immediate yield in the investment portfolio by targeting shorter term investments. Our investment policy provides that no more than 60% of our total investment portfolio should be composed of municipal securities. At December 31, 2014, mortgage-backed securities represented 36% of the investment portfolio, state and municipal securities represented 43% of the investment portfolio, U.S. Treasury and government agencies represented 16% of the investment portfolio, and corporate debt represented 5% of the investment portfolio.

All of our investments in mortgage-backed securities are pass-through mortgage-backed securities. We do not currently, and did not have at December 31, 2014, any structured investment vehicles or any private-label mortgage-backed securities. The amortized cost of securities in our portfolio totaled $320.8 million at December 31, 2014, compared to $292.0 million at December 31, 2013. All such securities held are traded in liquid markets. The following table presents the amortized cost of securities available for sale and held to maturity by type at December 31, 2014, 2013 and 2012.

	December 31,		
	2014	2013	2012

At December 31, 2014, we had $0.9 million in federal funds sold, compared with $8.6 million at December 31, 2013. At the end of each of the two years, we shifted balances held at correspondent banks to our reserve account at the Federal Reserve Bank of Atlanta to gain favorable capital treatment. At year-end 2014, there were no holdings of securities of any issuer, other than US government and its agencies, in an amount greater than 10% of stockholders' equity.

The objective of our investment policy is to invest funds not otherwise needed to meet our loan demand to earn the maximum return, yet still maintain sufficient liquidity to meet fluctuations in our loan demand and deposit structure. In doing so, we balance the market and credit risks against the potential investment return, make investments compatible with the pledge requirements of any deposits of public funds, maintain compliance with regulatory investment requirements, and assist certain public entities with their financial needs. The investment committee has full authority over the investment portfolio and makes decisions on purchases and sales of securities. The entire portfolio, along with all investment transactions occurring since the previous board of directors meeting, is reviewed by the board at each monthly meeting. The investment policy allows portfolio holdings to include short-term securities purchased to provide us with needed liquidity and longer term securities purchased to generate level income for us over periods of interest rate fluctuations.

Loan Portfolio

We had total loans of approximately $3.4 billion at December 31, 2014. The following table shows the percentage of our total loan portfolio assigned to each of our markets. A large majority of our loan customers are located within our market MSAs, and so is the collateral for their loans. With our loan portfolio concentrated in a limited number of markets, there is a risk that our borrowers’ ability to repay their loans from us could be affected by changes in local and regional economic conditions.

	Percentage of Total Loans Assigned to Market	
Birmingham, AL	50	%
Huntsville, AL	13	%
Dothan, AL	12	%
Montgomery, AL	9	%
Mobile, AL	5	%
Total Alabama Markets	89	%

Net charge-offs	(5,293)	(8,603)	(4,872)	(5,019)	(7,010)
Provision for loan losses charged to expense	10,259	13,008	9,100	8,972	10,350
Allowance for loan losses at end of period	$35,629	$30,663	$26,258	$22,030	$18,077
As a percent of year to date average loans:					

Net charge-offs	0.17 %	0.33 %	0.24 %	0.32 %	0.55 %
Provision for loan losses	0.34 %	0.50 %	0.45 %	0.57 %	0.81 %
Allowance for loan losses as a percentage of:					
Year-end loans	1.06 %	1.07 %	1.11 %	1.20 %	1.30 %
Nonperforming assets	210.95 %	135.70 %	130.77 %	84.48 %	84.82 %

The allowance for loan losses is established and maintained at levels needed to absorb anticipated credit losses from identified and otherwise inherent risks in the loan portfolio as of the balance sheet date. In assessing the adequacy of the allowance for loan losses, management considers its evaluation of the loan portfolio, past due loan experience, collateral values, current economic conditions and other factors considered necessary to maintain the allowance at an adequate level. Our management feels that the allowance was adequate at December 31, 2014.

The following table presents the allocation of the allowance for loan losses for each respective loan category with the corresponding percent of loans in each category to total loans.

	For the Years Ended December 31,									
	2014		2013		2012		2011		2010	
	Amount	Percentage of loans in each category to total loans	Amount	Percentage of loans in each category to total loans	Amount	Percentage of loans in each category to total loans	Amount	Percentage of loans in each category to total loans	Amount	Percentage of loans in each category to total loans

Total	$35,629	100.00%	$30,663	100.00%	$26,258	100.00%	$22,030	100.00%	$18,077	100.00%

We target small and medium-sized businesses as loan customers. Because of their size, these borrowers may be less able to withstand competitive or economic pressures than larger borrowers in periods of economic weakness. If loan losses occur at a level where the loan loss reserve is not sufficient to cover actual loan losses, our earnings will decrease. We use an independent consulting firm to review our loans annually for quality in addition to the reviews that may be conducted by bank regulatory agencies as part of their usual examination process.

As of December 31, 2014, we had impaired loans of $26.7 million inclusive of nonaccrual loans, a decrease of $5.3 million from $32.0 million as of December 31, 2013. We allocated $5.1 million of our allowance for loan losses at December 31, 2014 to these impaired loans compared to $6.3 million at December 31, 2013. We had previous write-downs against impaired loans of $0.5 million at December 31, 2014, compared to $1.4 million at December 31, 2013. The average balance for 2014 of loans impaired was $26.7 million. Interest income foregone throughout the year on impaired loans was $750,000 and we recognized $255,000 of interest income on these impaired loans for the year ended December 31, 2014, compared to interest income foregone throughout 2013 of $972,000 and $433,000 of interest income recognized on impaired loans for the year ended December 31, 2013. A loan is considered impaired, based on current information and events, if it is probable that we will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the original loan agreement. Impairment does not always indicate credit loss, but provides an indication of collateral exposure based on prevailing market conditions and third-party valuations. Impaired loans are measured by either the present value of expected future cash flows

discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair value of the collateral if the loan is collateral-dependent. The amount of any initial impairment and subsequent changes in impairment are included in the allowance for loan losses. Interest on accruing impaired loans is recognized as long as such loans do not meet the criteria for nonaccrual status. Our credit administration group performs verification and testing to ensure appropriate identification of impaired loans and that proper reserves are allocated to these loans.

Of the $26.7 million of impaired loans reported as of December 31, 2014, $10.3 million were commercial and industrial loans, $10.0 million were real estate mortgage loans, $5.7 million were real estate construction loans and $0.7 million were consumer loans. Of the $5.7 million of impaired real estate construction loans, $4.2 million (a total of seven loans with three builders) were residential construction loans.

The Bank has procedures and processes in place intended to ensure that losses do not exceed the potential amounts documented in the Bank's impairment analyses and reduce potential losses in the remaining performing loans within our real estate construction portfolio. These include the following:

- We closely monitor the past due and overdraft reports on a weekly basis to identify deterioration as early as possible and the placement of identified loans on the watch list.

- We perform extensive monthly credit review for all watch list/classified loans, including formulation of aggressive workout or action plans. When a workout is not achievable, we move to collection/foreclosure proceedings to obtain control of the underlying collateral as rapidly as possible to minimize the deterioration of collateral and/or the loss of its value.

- We require updated financial information, global inventory aging and interest carry analysis for existing builders to help identify potential future loan payment problems.

- We generally limit loans for new construction to established builders and developers that have an established record of turning their inventories, and we restrict our funding of undeveloped lots and land.

Nonperforming Assets

The table below summarizes our nonperforming assets at December 31, 2014, 2013, 2012, 2011 and 2010:

	2014		2013		2012		2011		2010

Total restructured accruing loans	$8,295	10	$9,689	6	$9,513	26	$4,485	6	$2,398	9
Total nonperforming assets and restructured accruing loans	$25,185	58	$32,286	93	$29,592	97	$30,562	81	$23,711	83
Gross interest income foregone on nonaccrual loans througout year	$255		$972		$850		$1,371		$510	
	$750		$433		$155		$263		$418	

Interest income recognized on nonaccrual loans througout year					
Ratios:					
Nonperforming loans to total loans	0.30 %	0.34 %	0.44 %	0.75 %	1.03 %
Nonperforming assets to total loans plus other real estate owned	0.50 %	0.79 %	0.85 %	1.41 %	1.52 %
Nonperforming loans plus restructured accruing loans to total loans plus other real estate owned and repossessions	0.75 %	1.12 %	1.25 %	1.66 %	1.69 %

The balance of nonperforming assets can fluctuate due to changes in economic conditions. We have established a policy to discontinue accruing interest on a loan (i.e., place the loan on nonaccrual status) after it has become 90 days delinquent as to payment of principal or interest, unless the loan is considered to be well-collateralized and is actively in the process of collection. In addition, a loan will be placed on nonaccrual status before it becomes 90 days delinquent unless management believes that the collection of interest is expected. Interest previously accrued but uncollected on such loans is reversed and charged against current income when the receivable is determined to be uncollectible. Interest income on nonaccrual loans is recognized only as received. If we believe that a loan will not be collected in full, we will increase the allowance for loan losses to reflect management's estimate of any potential exposure or loss. Generally, payments received on nonaccrual loans are applied directly to principal. There are not any loans, outside of those included in the table above, that cause management to have serious doubts as to the ability of borrowers to comply with present repayment terms.

Deposits

We rely on increasing our deposit base to fund loan and other asset growth. Each of our markets is highly competitive. We compete for local deposits by offering attractive products with competitive rates. We expect to have a higher average cost of funds for local deposits than competitor banks due to our lack of an extensive branch network. Our management's strategy is to offset the higher cost of funding with a lower level of operating expense and firm pricing discipline for loan products. We have promoted electronic banking services by providing them without charge and by offering in-bank customer training. The following table presents the average balance and average rate paid on each of the following deposit categories at the Bank level for years ended December 31, 2014, 2013 and 2012:

Average Deposits

	Average for Years Ended December 31,					
	2014		2013		2012	
	Average Balance	Average Rate Paid	Average Balance	Average Rate Paid	Average Balance	Average Rate Paid
Types of Deposits:	(Dollars in Thousands)					
Non-interest-bearing demand deposits	$723,338	- %	$576,072	- %	$474,284	- %
Interest-bearing demand deposits	489,210	0.26 %	433,931	0.28 %	351,975	0.31 %
Money market accounts	1,523,120	0.44 %	1,244,957	0.47 %	1,042,870	0.56 %
Savings accounts	26,480	0.28 %	21,793	0.28 %	17,081	0.28 %
Time deposits	209,361	1.04 %	214,888	1.15 %	219,186	1.32 %
Time deposits, over $250,000	191,821	1.09 %	190,039	1.20 %	179,366	1.35 %
Total deposits	$3,163,330		$2,681,680		$2,284,762	

The following table presents the maturities of our certificates of deposit as of December 31, 2014 and 2013.

At December 31, 2014	Over $250,000	Less than or equal to $250,000	Total
Maturity	(In Thousands)		
Three months or less	$ 26,003	$ 38,675	$64,678
Over three through six months	23,492	31,565	55,057
Over six months through one year	44,757	54,344	99,101
Over one year	99,925	80,830	180,755
Total	$ 194,177	$ 205,414	$399,591

At December 31, 2013	Over $250,000	Less than or equal to $250,000	Total
Maturity	(In Thousands)		
Three months or less	$ 35,314	$ 36,357	$71,671
Over three through six months	39,597	36,182	75,779
Over six months through one year	43,281	69,757	113,038
Over one year	77,973	76,159	154,132
Total	$ 196,165	$ 218,455	$414,620

Total average deposits for the year ended December 31, 2014 were $3.2 billion, an increase of $0.5 billion, or 18.5%, over total average deposits of $2.7 billion for the year ended December 31, 2013. Average noninterest-bearing deposits increased by $0.1 billion, or 16.7%, from $0.6 billion for the year ended December 31, 2013 to $0.7 billion for the year ended December 31, 2014.

Total average deposits for the year ended December 31, 2013 were $2.7 billion, an increase of $0.4 billion, or 17.4%, over total average deposits of $2.3 billion for the year ended December 31, 2012. Average noninterest-bearing deposits increased by $0.1 billion, or 20.0%, from $0.5 billion for the year ended December 31, 2012 to $0.6 billion for the year ended December 31, 2013.

We have never had brokered deposits.

Borrowed Funds

We had available approximately $160 million in unused federal funds lines of credit with regional banks as of December 31, 2014 and 2013. These lines are subject to certain restrictions and collateral requirements.

We had average federal funds purchased from correspondent banks of $202.6 million, $167.1 million and $88.7 million for 2014, 2013 and 2012, respectively. We paid average interest rates on these funds of 0.28%, 0.28% and 0.25% for the same three years, respectively.

Stockholders' Equity

Stockholders' equity increased $110.0 million during 2014, to $407.2 million at December 31, 2014 from $297.2 million at December 31, 2013. The increase in stockholders' equity resulted from net proceeds of our initial public stock offering in May 2014 in the amount of approximately $52.1 million, net income of $51.9 million during the year ended December 31, 2014, and $6.3 million of contributed equity upon the exercise of stock options and warrants during 2014. These increases were partially offset by the payment of dividends on common and preferred stock of approximately $5.3 million in the aggregate.

Off-Balance Sheet Arrangements

In the normal course of business, we are a party to financial credit arrangements with off-balance sheet risk to meet the financing needs of our customers. These financial credit arrangements include commitments to extend credit beyond current fundings, credit card arrangements, standby letters of credit and financial guarantees. Those credit arrangements involve, to varying degrees, elements of credit risk in excess of the amount recognized in the balance sheet. The contract or notional amounts of those instruments reflect the extent of involvement we have in those particular financial credit arrangements. All such credit arrangements bear interest at variable rates and we have no such credit arrangements which bear interest at fixed rates.

Our exposure to credit loss in the event of non-performance by the other party to the financial instrument for commitments to extend credit, credit card arrangements and standby letters of credit is represented by the contractual or notional amount of those instruments. We use the same credit policies in making commitments and conditional obligations as we do for on-balance sheet instruments.

The following table sets forth our credit arrangements and financial instruments whose contract amounts represent credit risk as of December 31, 2014, 2013 and 2012:

	2014	2013	2012

	(In Thousands)		
Commitments to extend credit	$1,156,682	$1,052,902	$824,047
Credit card arrangements	45,155	38,122	25,699
Standby letters of credit and financial guarantees	33,280	40,371	36,374
Total	$1,235,117	$1,131,395	$886,120

Commitments to extend credit beyond current fundings are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Such commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. We evaluate each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained if deemed necessary by us upon extension of credit is based on our management's credit evaluation. Collateral held varies but may include accounts receivable, inventory, property, plant and equipment, and income-producing commercial properties.

Standby letters of credit are conditional commitments issued by us to guarantee the performance of a customer to a third party. Those guarantees are primarily issued to support public and private borrowing arrangements, including commercial paper, bond financing, and similar transactions. All letters of credit are due within one year or less of the original commitment date. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers.

Derivatives

The Bank has entered into agreements with secondary market investors to deliver loans on a "best efforts delivery" basis. When a rate is committed to a borrower, it is based on the best price that day and locked with our investor for our customer for a 30-day period. In the event the loan is not delivered to the investor, the Bank has no risk or exposure with the investor. The interest rate lock commitments related to loans that are originated for later sale are classified as derivatives. The fair values of our agreements with investors and rate lock commitments to customers as of December 31, 2014 and 2013 were not material.

Asset and Liability Management

The matching of assets and liabilities may be analyzed by examining the extent to which such assets and liabilities are "interest rate sensitive" and by monitoring an institution's interest rate sensitivity "gap." An asset or liability is said to be interest rate sensitive within a specific time period if it will mature or reprice within that time period. The interest rate sensitivity gap is defined as the difference between the dollar amount of rate-sensitive assets repricing during a period and the volume of rate-sensitive liabilities repricing during the same period. A gap is considered positive when the amount of interest rate-sensitive assets exceeds the amount of interest rate-sensitive liabilities. A gap is considered negative when the amount of interest rate-sensitive liabilities exceeds the amount of interest rate-sensitive assets. During a period of rising interest rates, a negative gap would tend to adversely affect net interest income while a positive gap would tend to result in an increase in net interest income. During a period of falling interest rates, a negative gap would tend to result in an increase in net interest income while a positive gap would tend to adversely affect net interest income.

Our asset liability and investment committee is charged with monitoring our liquidity and funds position. The committee regularly reviews the rate sensitivity position on a three-month, six-month and one-year time horizon; loans-to-deposits ratios; and average maturities for certain categories of liabilities. The asset liability committee uses a model to analyze the maturities of rate-sensitive assets and liabilities. The model measures the "gap" which is defined as the difference between the dollar amount of rate-sensitive assets repricing during a period and the volume of rate-sensitive liabilities repricing during the same period. Gap is also expressed as the ratio of rate-sensitive assets divided by rate-sensitive liabilities. If the ratio is greater than "one," then the dollar value of assets exceeds the dollar value of liabilities and the balance sheet is "asset sensitive." Conversely, if the value of liabilities exceeds the dollar value of assets, then the ratio is less than one and the balance sheet is "liability sensitive." Our internal policy requires our management to maintain the gap such that net interest margins will not change more than 10% if interest rates change by 100 basis points or more than 15% if interest rates change by 200 basis points. As of December 31, 2014, our gap was within such ranges. See "—Quantitative and Qualitative Analysis of Market Risk" below in Item 7A for additional information.

Liquidity and Capital Adequacy

Liquidity

Liquidity is defined as our ability to generate sufficient cash to fund current loan demand, deposit withdrawals, or other cash demands and disbursement needs, and otherwise to operate on an ongoing basis.

Liquidity is managed at two levels. The first is the liquidity of the Company. The second is the liquidity of the Bank. The management of liquidity at both levels is critical, because the Company and the Bank have different funding needs and sources, and each are subject to regulatory guidelines and requirements. We are subject to general FDIC

guidelines which require a minimum level of liquidity. Management believes our liquidity ratios meet or exceed these guidelines. Our management is not currently aware of any trends or demands that are reasonably likely to result in liquidity increasing or decreasing in any material manner.

The retention of existing deposits and attraction of new deposit sources through new and existing customers is critical to our liquidity position. In the event of compression in liquidity due to a run-off in deposits, we have a liquidity policy and procedure that provides for certain actions under varying liquidity conditions. These actions include borrowing from existing correspondent banks, selling or participating loans and the curtailment of loan commitments and funding. At December 31, 2014, our liquid assets, represented by cash and due from banks, federal funds sold and unpledged available-for-sale securities, totaled $402.5 million. Additionally, at such date we had available to us approximately $160.0 million in unused federal funds lines of credit with regional banks, subject to certain restrictions and collateral requirements, to meet short term funding needs. We believe these sources of funding are adequate to meet immediate anticipated funding needs. Our management meets on a weekly basis to review sources and uses of funding to determine the appropriate strategy to ensure an appropriate level of liquidity, and we have increased our focus on the generation of core deposit funding to supplement our liquidity position. At the current time, our long-term liquidity needs primarily relate to funds required to support loan originations and commitments and deposit withdrawals.

Our regular sources of funding are from the growth of our deposit base, repayment of principal and interest on loans, the sale of loans and the renewal of time deposits. We also my continue periodic offerings of debt and equity securities.

The following table reflects the contractual maturities of our term liabilities as of December 31, 2014. The amounts shown do not reflect any early withdrawal or prepayment assumptions.

	Payments due by Period				
	Total	1 year or less	Over 1 - 3 years	Over 3 - 5 years	Over 5 years
	(In Thousands)				
Contractual Obligations (1)					
Deposits without a stated maturity	$2,998,569	$ -	$ -	$ -	$ -
Certificates of deposit (2)	399,591	218,837	129,133	47,434	4,187
Federal funds purchased	264,315	264,315	-	-	-
Other borrowings	19,973	-	-	-	19,973
Operating lease commitments	14,268	2,500	4,688	3,456	3,624
Total	$3,696,716	$ 485,652	$ 133,821	$ 50,890	$ 27,784

(1) Excludes interest

(2) Certificates of deposit give customers the right to early withdrawal. Early withdrawals may be subject to penalties. The penalty amount depends on the remaining time to maturity at the time of early withdrawal.

Capital Adequacy

As of December 31, 2014, our most recent notification from the FDIC categorized us as well-capitalized under the regulatory framework for prompt corrective action. To remain categorized as well-capitalized, we must maintain minimum total risk-based, Tier 1 risk-based, and Tier 1 leverage ratios as disclosed in the table below. Our management believes that we are well-capitalized under the prompt corrective action provisions as of December 31, 2014. In addition, the Alabama Banking Department has required that the Bank maintain a leverage ratio of 8.00%.

The following table sets forth (i) the capital ratios of the Company required by the FDIC to maintain “well-capitalized” status and (ii) our actual ratios of capital to total regulatory or risk-weighted assets, as of December 31, 2014.

	Well-Capitalized	Actual at December 31, 2014
Total risk-based capital	10.00 %	13.38 %
Tier 1 capital	6.00 %	11.75 %
Leverage ratio	5.00 %	9.91 %

For a description of capital ratios see Note 15 to “Notes to Consolidated Financial Statements”.

Impact of Inflation

Our consolidated financial statements and related data presented herein have been prepared in accordance with generally accepted accounting principles which require the measure of financial position and operating results in terms of historic dollars, without considering changes in the relative purchasing power of money over time due to inflation.

Inflation generally increases the costs of funds and operating overhead, and to the extent loans and other assets bear variable rates, the yields on such assets. Unlike most industrial companies, virtually all of the assets and liabilities of a financial institution are monetary in nature. As a result, interest rates generally have a more significant effect on the performance of a financial institution than the effects of general levels of inflation. In addition, inflation affects financial institutions’ cost of goods and services purchased, the cost of salaries and benefits, occupancy expense, and similar items. Inflation and related increases in interest rates generally decrease the market value of investments and loans held and may adversely affect liquidity, earnings and stockholders’ equity. Mortgage originations and refinancing tend to slow as interest rates increase, and likely will reduce our volume of such activities and the income from the sale of residential mortgage loans in the secondary market.

Adoption of Recent Accounting Pronouncements

New accounting standards are discussed in Note 1 to "Notes to Consolidated Financial Statements".

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

Like all financial institutions, we are subject to market risk from changes in interest rates. Interest rate risk is inherent in the balance sheet due to the mismatch between the maturities of rate-sensitive assets and rate-sensitive liabilities. If rates are rising, and the level of rate-sensitive liabilities exceeds the level of rate-sensitive assets, the net interest margin will be negatively impacted. Conversely, if rates are falling, and the level of rate-sensitive liabilities is greater than the level of rate-sensitive assets, the impact on the net interest margin will be favorable. Managing interest rate risk is further complicated by the fact that all rates do not change at the same pace; in other words, short term rates may be rising while longer term rates remain stable. In addition, different types of rate-sensitive assets and rate-sensitive liabilities react differently to changes in rates.

To manage interest rate risk, we must take a position on the expected future trend of interest rates. Rates may rise, fall, or remain the same. Our asset liability committee develops its view of future rate trends and strives to manage rate risk within a targeted range by monitoring economic indicators, examining the views of economists and other experts, and understanding the current status of our balance sheet. Our annual budget reflects the anticipated rate environment for the next twelve months. The asset liability committee conducts a quarterly analysis of the rate sensitivity position and reports its results to our board of directors.

The asset liability committee employs multiple modeling scenarios to analyze the maturities of rate-sensitive assets and liabilities. The model measures the "gap" which is defined as the difference between the dollar amount of rate-sensitive assets repricing during a period and the volume of rate-sensitive liabilities repricing during the same period. The gap is also expressed as the ratio of rate-sensitive assets divided by rate-sensitive liabilities. If the ratio is greater than "one", the dollar value of assets exceeds the dollar value of liabilities; the balance sheet is "asset sensitive". Conversely, if the value of liabilities exceeds the value of assets, the ratio is less than one and the balance sheet is "liability sensitive". Our internal policy requires management to maintain the gap such that net interest margins will not change more than 10% if interest rates change 100 basis points or more than 15% if interest rates change 200 basis points. As of December 31, 2014, our gap was within such ranges.

The model measures scheduled maturities in periods of three months, four to twelve months, one to five years and over five years. The chart below illustrates our rate-sensitive position at December 31, 2014. Management uses the one year gap as the appropriate time period for setting strategy.

Rate Sensitive Gap Analysis

	1-3 Months	4-12 Months	1-5 Years	Over 5 Years	Total
	(Dollars in Thousands)				

Interest-earning assets:					
Loans, including mortgages held for sale	$1,873,980	$327,521	$1,035,258	$129,083	$3,365,842
Securities	23,518	43,010	197,938	67,120	331,586
Federal funds sold	891	-	-	-	891
Interest bearing balances with banks	246,324	490	1,240	-	248,054
Total interest-earning assets	$2,144,713	$371,021	$1,234,436	$196,203	$3,946,373
Interest-bearing liabilities:					
Deposits:					
Interest-bearing checking	$556,863	$ -	$-	$ -	$556,863
Money market and savings	1,631,246	-	-	-	1,631,246
Time deposits	64,686	154,158	176,569	4,178	399,591
Federal funds purchased	264,315	-	-	-	264,315
Other borrowings	-	-	-	19,973	19,973
Total interest-bearing liabilities	2,517,110	154,158	176,569	24,151	2,871,988
Interest sensitivity gap	$(372,397)	$216,863	$1,057,867	$172,052	$1,074,385
Cumulative sensitivity gap	$(372,397)	$(155,534)	$902,333	$1,074,385	$-
Percent of cumulative sensitivity Gap to total interest-earning assets	(9.4)%	(3.9)%	22.9%	27.2%	

The interest rate risk model that defines the gap position also performs a "rate shock" test of the balance sheet. The rate shock procedure measures the impact on the economic value of equity (EVE) which is a measure of long term interest rate risk. EVE is the difference between the market value of our assets and the liabilities and is our liquidation value. In this analysis, the model calculates the discounted cash flow or market value of each category on the balance sheet. The percent change in EVE is a measure of the volatility of risk. Regulatory guidelines specify a maximum change of 30% for a 200 basis points rate change. Short term rates dropped to historically low levels during 2009 and have remained at those low levels. We could not assume further drops in interest rates in our model, and as a result feel the down rate shock scenarios are not meaningful. At December 31, 2014, the 2.87% change for a 200 basis points rate change is well within the regulatory guidance range.

The chart below identifies the EVE impact of an upward shift in rates of 100 and 200 basis points.

Economic Value of Equity Under Rate Shock

At December 31, 2014

	0 bps	+100 bps	+200 bps
	(Dollars in Thousands)		
Economic value of equity	$407,213	$413,362	$418,900
Actual dollar change		$6,149	$11,687
Percent change		1.51 %	2.87 %

The one year gap ratio of negative 3.9% indicates that we would show a decrease in net interest income in a rising rate environment, and the EVE rate shock shows that the EVE would increase in a rising rate environment. The EVE simulation model is a static model which provides information only at a certain point in time. For example, in a rising rate environment, the model does not take into account actions which management might take to change the impact of rising rates on us. Given that limitation, it is still useful in assessing the impact of an unanticipated movement in interest rates.

The above analysis may not on its own be an entirely accurate indicator of how net interest income or EVE will be affected by changes in interest rates. Income associated with interest earning assets and costs associated with interest bearing liabilities may not be affected uniformly by changes in interest rates. In addition, the magnitude and duration of changes in interest rates may have a significant impact on net interest income. Interest rates on certain types of assets and liabilities fluctuate in advance of changes in general market rates, while interest rates on other types may lag behind changes in general market rates. Our asset liability committee develops its view of future rate trends by monitoring economic indicators, examining the views of economists and other experts, and understanding the current status of our balance sheet and conducts a quarterly analysis of the rate sensitivity position. The results of the analysis are reported to our board of directors.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders

ServisFirst Bancshares, Inc.

We have audited the accompanying consolidated balance sheets of ServisFirst Bancshares, Inc. and subsidiaries as of December 31, 2014 and 2013, and the related consolidated statements of income, comprehensive income, stockholders' equity and cash flows for each of the years in the three-year period ended December 31, 2014. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of ServisFirst Bancshares, Inc. and subsidiaries as of December 31, 2014 and 2013, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2014, in conformity with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal controls over financial reporting as of December 31, 2014, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated March 3, 2015, expressed an unqualified opinion thereon.

REPORT OF MANAGEMENT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

We, as members of the Management of ServisFirst Bancshares, Inc. (the "Company"), are responsible for establishing and maintaining effective internal control over financial reporting. The Company's internal control system was designed to provide reasonable assurance to the Company's management and Board of Directors regarding the preparation and fair presentation of the Company's financial statements for external purposes in accordance with U.S. generally accepted accounting principles. Internal control over financial reporting includes self-monitoring mechanisms, and actions are taken to correct deficiencies as they are identified.

All internal controls systems, no matter how well designed, have inherent limitations and may not prevent or detect misstatements in the Company's financial statements, including the possibility of circumvention or overriding of controls. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The Company's management assessed the effectiveness of its internal control over financial reporting as of December 31, 2014. In making this assessment, we used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in its *Internal Control—Integrated Framework (2013)*. Based on this assessment, management determined that the Company maintained effective internal control over financial reporting as of December 31, 2014, based on these criteria.

The Company's independent registered public accounting firm has issued an audit report on the effectiveness of the Company's internal control over financial reporting. This report appears on the following page.

SERVISFIRST BANCSHARES, INC.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders

ServisFirst Bancshares, Inc.

We have audited internal control over financial reporting of ServisFirst Bancshares, Inc. and subsidiaries (the “Company”) as of December 31, 2014, based on criteria established in *Internal Control—Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company’s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Report of Management on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2014, based on criteria established in *Internal Control—Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements of ServisFirst Bancshares, Inc. and subsidiaries as of and for the year ended December 31, 2014, and our report dated March 3, 2015, expressed an unqualified opinion on those consolidated financial statements.
