### Additional positive Roflumilast data of RECORD study at German Congress for Pneumonology

**Bad Homburg, Germany, March 12, 2004** ALTANA AG (NYSE: AAA; FSE: ALT) reported today that additional efficacy results on Daxas® (Roflumilast) in patients suffering from COPD (Chronic Obstructive Pulmonary Disease, smoker s lung) were presented at a scientific symposium during the 45th Congress of the German Society of Pulmonology in Frankfurt. This study (RECORD) was enrolled over 1,400 patients in eleven countries. These patients were treated for 24 weeks with either placebo or 250 μg or 500 μg Roflumilast.

Exacerbation rate (acute worsening with requirement of additional treatments) was statistically significant reduced. Exacerbation rate per patient of 1.13 with Placebo decreased to 1.03 with Roflumilast 250  $\mu$ g and to 0.75 with Roflumilast 500  $\mu$ g.

Contrary to the original planning to present the data in may for the first time they have been made public to the medical experts today.

Roflumilast is a selective phosphodiesterase-4-inhibitor for the treatment of COPD and asthma. Roflumilast is being developed worldwide with the exception of Japan together with Pfizer Inc. Our partner in Japan is Tanabe Seiyaku Co., Ltd. In February 2004 Roflumilast was submitted for European approval to the European Agency for the Evaluation of Medicinal Products (EMEA).
