- Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Item 8.01. Other Events

Edgar Filing: ALLEGHENY TECHNOLOGIES INC - Form 8-K

On June 26, 2006, Allegheny Technologies Incorporated announced that its Board of Directors has approved a greenfield premium-grade titanium sponge facility to be built in Rowley, UT with an annual capacity of 24 million pounds. This \$325 million investment is aimed at increasing ATI's capacity to produce titanium alloys for aerospace and defense applications. Premium-grade sponge is essential for many aerospace applications, including rotating quality titanium alloys used for new jet engines and spare parts. ATI expects initial production to begin in the third quarter 2008.

This Phase IV titanium expansion brings ATI's projected total annual titanium sponge capacity to approximately 40 million pounds. ATI previously announced three titanium sponge capacity increases at its Albany, OR facility amounting to 16 million pounds per year.

The Board's approval of the Phase IV expansion is contingent upon the satisfactory completion of appropriate arrangements relating to the acquisition of and use of property, incentives from the State of Utah and the County of Tooele, and the supply of raw materials and utilities.

A copy of the press release is attached as Exhibit 99.1 to this Report on Form 8-K.
