Note Regarding Forward-Looking Statements

This report includes "forward-looking statements" within the meaning and protections of Section 27A of the Securities Act of 1933, as amended, or the Securities Act, and Section 21E of the Securities Exchange Act of 1934, as amended, or the Exchange Act. All statements other than statements of historical fact are statements that could be forward-looking statements. You can identify these forward-looking statements through our use of words such as "may," "will," "anticipate," "assume," "should," "indicate," "would," "believe," "contemplate," "expect," "estimate," "contin "could," "intend," "target" and other similar words and expressions of the future. These forward-looking statements include, but are not limited to:

- statements of our goals, intentions and expectations;
- statements regarding our business plans, prospects, growth and operating strategies;
 - statements regarding the asset quality of our loan and investment portfolios; and
 - estimates of our risks and future costs and benefits.

These forward-looking statements are based on current beliefs and expectations of our management and are inherently subject to significant business, economic and competitive uncertainties and contingencies, many of which are beyond our control. In addition, these forward-looking statements are subject to assumptions with respect to future business strategies and decisions that are subject to change.

The following factors, among others, could cause actual results to differ materially from the anticipated results or other expectations expressed in the forward-looking statements:

- •changes in laws or government regulations or policies affecting financial institutions, including changes in regulatory fees and capital requirements;
 - general economic conditions, either nationally or in our market areas, that are worse than expected;
 - competition among depository and other financial institutions;
 - changes in the prices, values and sales volume of residential and commercial real estate in Montana;
- inflation and changes in the interest rate environment that reduce our margins or reduce the fair value of financial instruments:
 - changes or volatility in the securities markets;
 - our ability to enter new markets successfully and capitalize on growth opportunities;
 - our ability to successfully integrate acquired businesses;
 - changes in consumer spending, borrowing and savings habits;
- •our ability to continue to increase and manage our commercial and residential real estate, multi-family and commercial business loans;
- •possible impairments of securities held by us, including those issued by government entities and government sponsored enterprises;
 - the level of future deposit premium assessments;
- the impact of a recurring recession on our loan portfolio (including cash flow and collateral values), investment portfolio, customers and capital market activities;
 - the Company's ability to develop and maintain secure and reliable information technology systems;
 - the impact of the current restructuring of the U.S. financial and regulatory system;
- the failure of assumptions underlying the establishment of allowance for possible loan losses and other estimates;
- •changes in the financial performance and/or condition of our borrowers and their ability to repay their loans when due; and

5

the effect of changes in accounting policies and practices, as may be adopted by the regulatory agencies, as well as the Securities and Exchange Commission, the Public Company Accounting Oversight Board, the Financial Accounting Standards Board and other accounting standard setters.

Because of these and other uncertainties, our actual future results may be materially different from the results indicated by these forward-looking statements. For a further list and description of various risks, relevant factors and uncertainties that could cause future results or events to differ materially from those expressed or implied in our forward-looking statements, see the Item 1A, "Risk Factors" and Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations" sections contained elsewhere in this report, as well as our Annual Report on Form 10-K for the transition period from July 1, 2014 to December 31, 2014, any subsequent Reports on Form 10-Q and Form 8-K, and other filings with the SEC. We do not undertake any obligation to publicly update or correct any forward-looking statements to reflect events or circumstances that subsequently occur, or of which we hereafter become aware.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 1. BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements have been prepared in accordance with the rules and regulations of the Securities and Exchange Commission. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for annual reports. However, such information reflects all adjustments (consisting of normal recurring adjustments) which are, in the opinion of management, necessary for a fair presentation of our financial position, results of operations, changes in comprehensive income and cash flows for the unaudited interim periods.

The results of operations for the three month period ended March 31, 2015 are not necessarily indicative of the results to be expected for the year ending December 31, 2015 or any other period. The unaudited consolidated financial statements and notes presented herein should be read in conjunction with the audited consolidated financial statements and related notes thereto included in Eagle's Form 10-K for the six month transition period ended December 31, 2014.

Certain prior period amounts have been reclassified to conform to the presentation for 2015. These reclassifications had no impact on net income or total shareholders' equity.

The Company evaluated subsequent events for potential recognition and/or disclosure through May 13, 2015 the date the consolidated financial statements were issued.

NOTE 2. INVESTMENT SECURITIES

Investment securities are summarized as follows:

	March 31, 2015				December 31, 2014				
		G	ross			Gross			
	Amortized	Unre	alized		Fair	Amortized	Unre	ealized	Fair

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 2. INVESTMENT SECURITIES - continued

Management evaluates securities for other-than-temporary impairment at least quarterly, and more frequently when economic or market concerns warrant such evaluation. Consideration is given to (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near-term prospects of the issuer and (3) the intent and ability of the Company to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value. As of March 31, 2015 and December 31, 2014, there were, respectively, 56 and 87 securities in an unrealized loss position and that were considered to be temporarily impaired and therefore an impairment charge has not been recorded.

At March 31, 2015, 45 U.S. government and agency securities and municipal obligations had unrealized losses with aggregate depreciation of approximately 1.44% from the Company's amortized cost basis of these securities. At December 31, 2014, 69 U.S. government and agency securities and municipal obligations had unrealized losses with aggregate depreciation of approximately 1.98% from the Company's amortized cost basis of these securities. These unrealized losses are principally due to changes in interest rates and credit spreads. In analyzing an issuer's financial condition, management considers whether the securities are issued by the federal government or its agencies, whether downgrades by bond rating agencies have occurred and industry analysts' reports. As management has the ability to hold debt securities until maturity, or for the foreseeable future, no declines are deemed to be other than temporary.

At March 31, 2015, 4 corporate obligations had an unrealized loss of approximately 1.28% from the Company's amortized cost basis of this security. At December 31, 2014, 3 corporate obligations had an unrealized loss with aggregate depreciation of approximately 0.40% from the Company's cost basis. This unrealized loss is principally due to changes in interest rates. No credit issues have been identified that cause management to believe the declines in market value are other than temporary. In analyzing the issuer's financial condition, management considers industry analysts' reports, financial performance and projected target prices of investment analysts within a one-year time frame. As management has the ability to hold debt securities until maturity, or for the foreseeable future, no declines are deemed to be other than temporary.

At March 31, 2015, 7 mortgage backed and CMO securities had unrealized losses with aggregate depreciation of approximately 0.55% from the Company's cost basis of these securities. At December 31, 2014, 15 mortgage backed and CMO securities have unrealized losses with aggregate depreciation of approximately 1.56% from the Company's cost basis. We believe these unrealized losses are principally due to the credit market's concerns regarding the stability of the mortgage market, changes in interest rates and credit spreads and uncertainty of future prepayment speeds. Management considers available evidence to assess whether it is more likely-than-not that all amounts due would not be collected. In such assessment, management considers the severity and duration of the impairment, the credit ratings of the security, the overall deal and payment structure, including the Company's position within the structure, underlying obligor, financial condition and near term prospects of the issuer, delinquencies, defaults, loss severities, recoveries, prepayments, cumulative loss projections, discounted cash flows and fair value estimates. There has been no disruption of the scheduled cash flows on any of the securities. Management's analysis as of December 31, 2014 revealed no expected credit losses on the securities and therefore, declines are not deemed to be other than temporary.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 3. LOANS RECEIVABLE

Loans receivable consisted of the following:

First mortgage loans:	March 31, 2015 (In Th	December 31, 2014 nousands)
Residential mortgage (1-4 family)	\$104,546	\$102,543

The Company utilizes a 5 point internal loan rating system, largely based on regulatory classifications, for 1-4 family real estate, commercial real estate, construction, home equity and commercial loans as follows:

Loans rated Pass: these are loans that are considered to be protected by the current net worth and paying capacity of the obligor, or by the value of the asset or the underlying collateral.

Loans rated Special Mention: these loans have potential weaknesses that deserve management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the asset at some future date.

Loans rated Substandard: these loans are inadequately protected by the current net worth and paying capacity of the obligor of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses. They are characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not corrected.

Loans rated Doubtful: these loans have all the weaknesses inherent in those classified Substandard with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.

Loans rated Loss: these loans are considered uncollectible and of such little value that their continuance as assets without establishment of a specific reserve is not warranted. This classification does not mean that an asset has absolutely no recovery or salvage value, but, rather, that it is not practical or desirable to defer writing off a basically worthless asset even though practical recovery may be affected in the future.

- 14 -

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 3. LOANS RECEIVABLE - continued

On an annual basis, or more often if needed, the Company formally reviews the ratings of all commercial real estate, construction, and commercial business loans that have a principal balance of \$500,000 or more. Quarterly, the Company reviews the rating of any consumer loan, broadly defined, that is delinquent 90 days or more. Likewise, quarterly, the Company reviews the rating of any commercial loan, broadly defined, that is delinquent 60 days or more. Annually, the Company engages an independent third-party to review a significant portion of loans within these segments. Management uses the results of these reviews as part of its annual review process.

Internal classification of the loan portfolio was as follows:

	March 31, 2015

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 4. TROUBLED DEBT RESTRUCTURINGS

The Company adopted the amendments in Accounting Standards Update No. 2011-02 during the quarter ended December 31, 2011. As required, the Company reassessed all restructurings that occurred on or after the beginning of that fiscal year starting July 1, 2011 for identification as troubled debt restructurings. The Company identified as troubled debt restructurings certain receivables for which the allowance for credit losses had previously been measured under a general allowance for credit losses methodology (ASC 450-20). Upon identifying the reassessed receivables as troubled debt restructurings, the Company also identified them as impaired under the guidance in ASC 310-10-35. The amendments in Accounting Standards Update No. 2011-02 require prospective application of the impairment measurement guidance in Section 310-10-35 for those receivables newly identified as impaired. As of March 31, 2015, the recorded investment in receivables for which the allowance for credit losses was previously measured under a general allowance for credit losses methodology and are now impaired under Section 310-10-35 was \$47,000 (310-40-65-1(b)), and there was no allowance for credit losses associated with these receivables, on the basis of a current evaluation of loss (310-40-65-1(b)). There was \$34,000 charged-off at the time of restructure related to these receivables.

The Company offers a variety of modifications to borrowers. The modification categories offered can generally be described in the following categories:

Rate Modification – A modification in which the interest rate is changed.

Term Modification – A modification in which the maturity date, timing of payments, or frequency of payments is changed.

Interest Only Modification – A modification in which the loan is converted to interest only payments for a period of time.

Payment Modification – A modification in which the dollar amount of the payment is changed, other than an interest only modification described above.

Combination Modification – Any other type of modification, including the use of multiple categories above.

NOTE 4. TROUBLED DEBT RESTRUCTURINGS - continued

The following tables present troubled debt restructurings.

		Water 51, 2015	
	Accrual	Non-Accrual	Total
	Status	Status	Modification
		(In Thousands)	
Residential mortgage (1-4 family)	\$ -	\$ -	\$ -
Commercial real estate	-	-	-
Real estate construction	-	-	-
Home equity	47	-	47
Consumer	-	-	-
Commercial	-	-	-
Total	\$ 47	\$ -	\$ 47
		December 31, 201	14
	Accrual	Non-Accrual	Total
	Status	Status	Modification
		(In Thousands)	
Residential mortgage (1-4 family)	\$ -	\$ -	\$ -
Commercial real estate	-	_	-
Real estate construction	-	-	-

The Bank's policy is that loans placed on non-accrual will typically remain on non-accrual status until all principal and interest payments are brought current and the prospect for future payment in accordance with the loan agreement appears relatively certain. The Bank's policy generally refers to six months of payment performance as sufficient to warrant a return to accrual status.

\$

48

48

During the three months ended March 31, 2015 and 2014, there were no new restructured loans.

\$

There were no loans modified as a troubled debt restructured loan within the previous three months for which there was a payment default during the three months ended March 31, 2015.

A default for purposes of this disclosure is a troubled debt restructured loan in which the borrower is 90 days past due or results in the foreclosure and repossession of the applicable collateral. As of March 31, 2015 and December 31, 2014, the Company had no commitments to lend additional funds to loan customers whose terms had been modified in trouble debt restructures.

NOTE 6. EARNINGS PER SHARE

Basic earnings per share for the three months ended March 31, 2015 was computed using 3,844,617 weighted average shares outstanding. Basic earnings per share for the three months ended March 31, 2014 was computed using 3,918,399 weighted average shares outstanding. Diluted earnings per share was computed using the treasury stock method by adjusting the number of shares outstanding by the shares purchased. The weighted average shares outstanding for the diluted earnings per share calculations was 3,881,872 for the three months ended March 31, 2015 and 3,973,202 for the three months ended March 31, 2014.

NOTE 7. DIVIDENDS AND STOCK REPURCHASE PROGRAM

For the six month transition period from July 1, 2014 through December 31, 2014, Eagle paid dividends of \$0.075 per share each quarter. A dividend of \$0.075 per share was declared on January 22, 2015, and paid March 6, 2015 to shareholders of record on February 13, 2015. A dividend of \$0.075 per share was declared on April 23, 2015, payable on June 6, 2015 to shareholders of record on May 13, 2015.

On July 1, 2013, the Company announced that its Board of Directors authorized a common stock repurchase program for 150,000 shares of common stock, effective July 1, 2013. The Company did not purchase any shares of our common stock during the fiscal year ended June 30, 2014. The repurchase program expired on June 30, 2014.

On July 1, 2014, the Company announced that its Board of Directors had authorized the repurchase of up to 200,000 shares of its common stock. Under the plan, shares may be purchased by the company on the open market or in privately negotiated transactions. The extent to which the company repurchases its shares and the timing of such repurchase will depend upon market conditions and other corporate considerations. The Company has purchased 110,800 shares of its common stock. The repurchase program expires on June 30, 2015.

NOTE 9. DERIVATIVES AND HEDGING ACTIVITIES

The Company is exposed to certain risks relating to its ongoing business operations. The primary risk managed by using derivative instruments is interest rate risk. The Company entered into an interest rate swap agreement on August 27, 2010 with a third party to manage interest rate risk associated with a fixed-rate loan. The interest rate swap agreement effectively converted the loan's fixed rate into a variable rate. Derivatives and hedging accounting requires that the Company recognize all derivative instruments as either assets or liabilities at fair value in the statement of financial position. In accordance with this guidance, the Company designated the interest rate swap on this fixed-rate loan as a fair value hedge.

The Company was exposed to credit-related losses in the event of nonperformance by the counterparties to this agreement. The Company controlled the credit risk of its financial contracts through credit approvals, limits and monitoring procedures, and did not expect any counterparties to fail their obligations. The Company deals only with

primary dealers.

If certain hedging criteria specified in derivatives and hedging accounting guidance are met, including testing for hedge effectiveness, hedge accounting may be applied. The hedge effectiveness assessment methodologies for similar hedges are performed in a similar manner and are used consistently throughout the hedging relationships.

The hedge documentation specifies the terms of the hedged item and the interest rate swap. The documentation also indicates that the derivative is hedging a fixed-rate item, that the hedge exposure is to the changes in the fair value of the hedged item, and that the strategy is to eliminate fair value variability by converting fixed-rate interest payments to variable-rate interest payments.

For derivative instruments that are designated and qualify as a fair value hedge, the gain or loss on the derivative as well as the offsetting loss or gain on the hedged item attributable to the hedged risk are recognized in current earnings. The Company includes the gain or loss on the hedged items in the same line item—noninterest income—as the offsetting loss or gain on the related interest rate swap.

NOTE 9. DERIVATIVES AND HEDGING ACTIVITIES - continued

Instruments

Under ASC 815

The hedged fixed rate loan had an original maturity of 20 years and was not callable. This loan was hedged with a "pay fixed rate, receive variable rate" swap with a similar notional amount, maturity, and fixed rate coupons. The swap is not callable. At December 31, 2014, the loan had an outstanding principal balance of \$10,641,000 and the interest rate swap had a notional value of \$10,673,000.

At December 31, 2014, the interest rate swap on the fixed-rate loan was ineffective. The Bank recorded a loss of \$317,000 in noninterest income during the quarter ended December 31, 2014 related to the ineffectiveness. The interest rate swap was terminated during the quarter ended March 31, 2015. The Bank recorded a loss of \$93,000 in noninterest income during the quarter ended March 31, 2015 related to the swap termination. The loan fair value adjustment of \$138,000 at March 31, 2015 will be amortized over the remaining life of the loan which matures September 1, 2030.

Derivative loan commitments – Mortgage loan commitments are referred to as derivative loan commitments if the loan that will result from exercise of the commitment will be held-for-sale upon funding. The Company enters into commitments to fund residential mortgage loans at specified times in the future, with the intention that these loans will subsequently be sold in the secondary market. A mortgage loan commitment binds the Company to lend funds to a potential borrower at a specified interest rate and within a specified period of time, generally up to 60 days after inception of the rate lock.

Outstanding derivative loan commitments expose the Company to the risk that the price of the loans arising from exercise of the loan commitment might decline from inception of the rate lock to funding of the loan due to increases in mortgage interest rates. If interest rates increase, the value of these loan commitments decreases. Conversely, if interest rates decrease, the value of these loan commitments increases. The notional amount of interest rate lock commitments was \$29,253,000 and \$12,276,000 at March 31, 2015 and December 31, 2014, respectively.

The Company has no other off-balance-sheet arrangements or transactions with unconsolidated, special purpose entities that would expose the Company to liability that is not reflected on the face of the financial statements.

NOTE 10. FAIR VALUE DISCLOSURES

FASB ASC 820 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market for the asset or liability. The price in the principal (or most advantageous) market used to measure the fair value of the asset or liability shall

not be adjusted for transaction costs. An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets and liabilities; it is not a forced transaction. Market participants are buyers and sellers in the principal market that are (i) independent, (ii) knowledgeable, (iii) able to transact and, (iv) willing to transact.

FASB ASC 820 requires the use of valuation techniques that are consistent with the market approach, the income approach and/or the cost approach. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets and liabilities. The income approach uses valuation techniques to convert future amounts, such as cash flows or earnings, to a single present amount on a discounted basis. The cost approach is based on the amount that currently would be required to replace the service capacity of an asset (replacement costs). Valuation techniques should be consistently applied. Inputs to valuation techniques refer to the assumptions that market participants would use in pricing the asset or liability. Inputs may be observable, meaning those that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from independent sources, or unobservable, meaning those that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. In that regard, FASB ASC 820 establishes a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs.

The fair value hierarchy is as follows:

Level 1 Inputs - Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date, or convert to cash in the short term.

Level 2 Inputs - Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (for example, interest rates, volatilities, prepayment speeds, loss severities, credit risks and default rates) or inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 Inputs - Significant unobservable inputs that reflect an entity's own assumptions that market participants would use in pricing the assets or liabilities.

A description of the valuation methodologies used for assets and liabilities measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below.

In general, fair value is based upon quoted market prices, where available. If such quoted market prices are not available, fair value is based upon internally developed models that primarily use, as inputs, observable market-based

parameters. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value. While management believes the Company's valuation methodologies are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date.

Available-for-Sale Securities – Securities classified as available-for-sale are reported at fair value utilizing Level 1 and Level 2 inputs. For these securities, the Company obtains fair value measurements from an independent pricing service. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U. S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayments speeds, credit information and the bond's terms and conditions, among other things.

Impaired Loans – Impaired loans are reported at the fair value of the underlying collateral if repayment is expected solely from the collateral. Collateral values are estimated using Level 3 inputs based on internally customized discounting criteria.

EAGLE BANCORP MONTANA, INC. AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 10. FAIR VALUE DISCLOSURES - continued

Loans Held-for-Sale – These loans are reported at the lower of cost or fair value. Fair value is determined based on expected proceeds based on sales contracts and commitments and are considered Level 2 inputs.

Repossessed Assets – Fair values are valued at the time the loan is foreclosed upon and the asset is transferred from loans. The value is based upon primary third party appraisals, less costs to sell. The appraisals are generally discounted based on management's historical knowledge, changes in market conditions from the time of valuation, and/or management's expertise and knowledge of the client and client's business. Such discounts are typically significant and result in Level 3 classification of the inputs for determining fair value. Repossessed assets are reviewed and evaluated on at least a quarterly basis for additional impairment and adjusted accordingly, based on same or similar factors above.

Loan Subject to Fair Value Hedge – The Company previously had one loan that was carried at fair value subject to a fair value hedge. Fair value was determined utilizing valuation models that considered the scheduled cash flows through anticipated maturity and was considered a Level 2 input. The interest rate swap was terminated during the quarter ended March 31, 2015. See Note 9 – Derivatives and Hedging Activities for more information.

Derivative financial instruments – Fair values for interest rate swap agreements were based upon the amounts required to settle the contracts. These instruments were valued using Level 3 inputs utilizing valuation models that considered: (a) time value, (b) volatility factors and (c) current market and contractual prices for the underlying instruments, as well as other relevant economic measures. Although the Company utilized counterparties' valuations to assess the reasonableness of its prices and valuation techniques, there was not sufficient corroborating market evidence to support classifying these assets and liabilities as Level 2. The interest rate swap was terminated during the quarter ended March 31, 2015. See Note 9 – Derivatives and Hedging Activities for more information.
