Commvault Systems, Inc

Notes to Consolidated Financial Statements - Unaudited

(In thousands, except per share data)

1. Basis of Presentation

Commvault Systems, Inc. and its subsidiaries (“Commvault” or the “Company”) is a provider of data and information management software applications and related services. The Company develops, markets and sells a suite of software applications and services, primarily in North America, Europe, Australia and Asia, that provides its customers with data protection solutions supporting all major operating systems, applications, and databases on virtual and physical servers, NAS shares, cloud-based infrastructures, and mobile devices; management through a single console; multiple protection methods including backup and archive, snapshot management, replication, and content indexing for eDiscovery; efficient storage management using deduplication for disk, tape and cloud; integration with the industry's top storage arrays; complete virtual infrastructure management supporting multiple hypervisors; security capabilities to limit access to critical data; policy based data management; and an end-user experience that allows them to protect, find and recover their own data using common tools such as web browsers, Microsoft Outlook and File Explorer. The Company also provides its customers with a broad range of professional and customer support services.

The consolidated financial statements as of June 30, 2017 and for the three months ended June 30, 2017 and 2016 are unaudited, and in the opinion of management, include all adjustments (consisting only of normal recurring adjustments) necessary for a fair presentation of the results for the interim periods. Accordingly, they do not include all of the information and footnotes required by U.S. generally accepted accounting principles (“U.S. GAAP”) for complete financial statements and should be read in conjunction with the financial statements and notes in the Company’s Annual Report on Form 10-K for fiscal 2017. The results reported in these financial statements should not necessarily be taken as indicative of results that may be expected for the entire fiscal year. The Company has early adopted the new revenue standard as of April 1, 2017 using the full retrospective method which required each prior reporting period presented to be adjusted beginning with this issuance of the Company’s financial statements.

The preparation of financial statements and related disclosures in conformity with U.S. GAAP requires management to make judgments and estimates that affect the amounts reported in the Company’s consolidated financial statements and the accompanying notes. The Company bases its estimates and judgments on historical experience and on various other assumptions that it believes are reasonable under the circumstances. The amounts of assets and liabilities reported in the Company’s balance sheets and the amounts of revenues and expenses reported for each of its periods presented are affected by estimates and assumptions, which are used for, but not limited to, the accounting for revenue recognition, income taxes and related reserves, stock-based compensation and accounting for research and development costs. Actual results could differ from those estimates.

2. Summary of Significant Accounting Policies

During fiscal 2018 the Company adopted new accounting guidance related to revenue recognition and accounting for share-based compensation which is described below. The impact of this new guidance is described below. There have been no other significant changes in the Company’s accounting policies during the three months ended June 30, 2017 as compared to the significant accounting policies described in its Annual Report on Form 10-K for the year ended March 31, 2017.

Recently Issued Accounting Standards

Revenue Recognition

In May 2014, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) No. 2014-09, “Revenue from Contracts with Customers (Topic 606).” This standard replaced existing revenue recognition rules with a comprehensive revenue measurement and recognition standard and expanded disclosure requirements. The ASU also includes guidance regarding the accounting for contract acquisition costs, which includes sales commissions. The Company has early adopted the new standard as of April 1, 2017 using the full retrospective method which required each prior reporting period presented to be adjusted beginning with this issuance of the Company’s financial statements. The most significant impact of adopting the new standard related to the deferral of commission costs. A portion of sales commissions cost is now recorded as an asset and recognized as an operating

expense over the time period that the Company expects to recover the costs.

Share-Based Compensation

In March 2016, the FASB issued ASU No. 2016-09, Improvements to Employee Share-Based Payment Accounting (Topic 718), which simplifies the accounting for share-based payment transactions, including related accounting for income taxes, forfeitures, and classification in the statement of cash flows. The Company adopted the guidance prospectively effective April 1, 2017.

Table of Contents

Commvault Systems, Inc

Notes to Consolidated Financial Statements - Unaudited (continued)

(In thousands, except per share data)

The guidance requires excess tax benefits and tax deficiencies to be recorded as income tax benefit or expense in the statement of income when the awards vest or are settled, and eliminates the requirement to reclassify cash flows related to excess tax benefits from operating activities to financing activities on the statement of cash flows. In the three months ended June 30, 2017, the Company recognized \$2,358 of such excess tax benefits, and, pursuant to the adopted guidance, net loss decreased by \$2,358, or \$0.05 per basic and diluted share. Amounts previously recorded to Additional paid-in capital related to excess tax benefits prior to April 1, 2017 remain in Stockholders' equity. Cash flows related to excess taxes prior to April 1, 2017 remain classified as financing cash flows. In addition, the standard allows the Company to repurchase more of an employee's vesting shares for tax withholding purposes without triggering liability accounting, and provides an accounting policy election to account for forfeitures as they occur. The Company has elected to account for forfeitures as they occur. The cumulative impact of the election to account for forfeitures as they are incurred is included as an adjustment to accumulated deficit.

Leases

In February 2016, the FASB issued ASU 2016-02 "Leases (Topic 842)" ("ASU 2016-02"). Under ASU 2016-02, a lessee will recognize in the balance sheet a liability to make lease payments (the lease liability) and a right-to-use asset representing its right to use the underlying asset for the lease term. The amendments of this ASU are effective for the Company's fiscal 2020, with early adoption permitted. A company will be required to recognize and measure leases at the beginning of the earliest period presented using a modified retrospective approach. The Company is currently assessing the impact the adoption of ASU 2016-02 will have on the financial statements.

Trade and Other Receivables

Trade and other receivables are primarily comprised of trade receivables that are recorded at the invoice amount, net of an allowance for doubtful accounts, which is not material. Unbilled receivables represent amounts for which revenue has been recognized but which have not yet been invoiced to the customer. The current portion of unbilled receivables is included in Trade accounts receivable on the consolidated balance sheet. Long term unbilled receivables are included in Other assets.

Sales Tax

The Company records revenue net of sales tax.

Shipping and Handling Costs

Shipping and handling costs are included in cost of revenues for all periods presented

Deferred Commissions Cost

Sales commissions and related payroll taxes earned by the Company's employees are considered incremental and recoverable costs of obtaining a contract with a customer. The costs related to revenue that will be recognized in future periods is deferred and then amortized over a period of benefit that the Company has determined to be five years. The period of benefit was determined by taking into consideration customer contracts, technology and other factors. Amortization expense related to these costs is included in Sales and marketing expenses in the accompanying condensed consolidated statements of loss.

Deferred Revenue

Deferred revenues represent amounts collected from, or invoiced to, customers in excess of revenues recognized. This results primarily from the billing of annual customer support agreements, and billings for other professional services fees that have not yet been performed by the Company. The value of deferred revenues will increase or decrease based on the timing of invoices and recognition of revenue.

Related Party Transactions

During the first quarter of fiscal 2018, one of our Directors, Joseph F. Eazor, was hired as the CEO of Rackspace, Inc ("Rackspace"). Prior to his appointment as CEO, the Company completed the sale of \$4,212 of software and related services to Rackspace. Total recognized revenue related to Rackspace in the first quarter of fiscal 2018 was \$4,054.

The outstanding accounts receivable from this customer as of June 30, 2017 is \$4,032.

8

Table of Contents

Commvault Systems, Inc

Notes to Consolidated Financial Statements - Unaudited (continued)

(In thousands, except per share data)

Concentration of Credit Risk

The Company grants credit to customers in a wide variety of industries worldwide and generally does not require collateral. Credit losses relating to these customers have been minimal.

Sales through the Company's distribution agreement with Arrow Enterprise Computing Solutions, Inc. ("Arrow") totaled approximately 36% and 34% of total revenues for the three months ended June 30, 2017 and 2016, respectively.

Arrow accounted for approximately 33% of total accounts receivable as of June 30, 2017 and 40% of total accounts receivable as of March 31, 2017.

Sales through the Company's distribution agreement with Avnet Technology Solutions ("Avnet") totaled 12% of total revenues for the three months ended June 30, 2017. Avnet accounted for approximately 13% of total accounts receivable as of June 30, 2017 and 12% of total accounts receivable as of March 31, 2017.

The Company has an original equipment manufacturer agreement with Hitachi Data Systems ("HDS") for them to market, sell and support the Company's software applications and services on a stand-alone basis and/or incorporate the Company's software applications into their own hardware products. HDS accounted for 11% of total revenues for the three months ended June 30, 2017. HDS accounted for approximately 12% of total accounts receivable as of June 30, 2017.

Fair Value of Financial Instruments

The carrying amounts of the Company's cash and cash equivalents, accounts receivable and accounts payable approximate their fair values due to the short-term maturity of these instruments. The Company's cash equivalents balance consists primarily of money market funds. The Company's short-term investments balance consists of U.S. Treasury Bills with maturities of one year or less. The Company accounts for its short-term investments as held to maturity.

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for such asset or liability in an orderly transaction between market participants on the measurement date. Valuation techniques used to measure fair value should maximize the use of observable inputs and minimize the use of unobservable inputs. To measure fair value, the Company uses the following fair value hierarchy based on three levels of inputs, of which the first two are considered observable and the last unobservable:

Level 1 – Quoted prices in active markets for identical assets or liabilities.

Level 2 – Inputs other than Level 1 that are observable for the asset or liability, either directly or indirectly, such as quoted prices for similar assets and liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not active; or other inputs that are observable or can be corroborated by observable market data by correlation or other means.

Level 3 – Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

The following table summarizes the composition of the Company's financial assets measured at fair value at June 30, 2017 and March 31, 2017:

June 30, 2017	Level 1	Level 2	Level 3	Total
Cash equivalents	\$88,554	—	—	\$88,554
Short-term investments	\$—	131,774	—	\$131,774
March 31, 2017	Level 1	Level 2	Level 3	Total
Cash equivalents	\$70,190	—	—	\$70,190
Short-term investments	\$—	120,989	—	\$120,989

3. Revenue

The Company accounts for revenue in accordance with ASC Topic 606, Revenue from Contracts with Customers, which was adopted on April 1, 2017, using the full retrospective method.

9

Table of Contents

Commvault Systems, Inc

Notes to Consolidated Financial Statements - Unaudited (continued)

(In thousands, except per share data)

The Company derives revenues from two primary sources: software licenses and services. Services include customer support (software updates and technical support), consulting, assessment and design services, installation services and customer education. A typical contract includes both licenses and services.

The Company's software licenses typically provide for a perpetual right to use the Company's software. The Company also sells term-based software licenses that expire, which are referred to as subscription arrangements. The Company does not customize its software for customers and installation services are not required. The software is delivered before related services are provided and is functional without professional services, updates and technical support. The Company has concluded that its software license is distinct as the customer can benefit from the software on its own. Software revenue is typically recognized when the software is delivered or made available for download to the Company's customer. In addition, the Company has licensing arrangements with customers that are accounted for as usage-based royalties. Revenue from these arrangements is recognized as the usage occurs.

Services revenue includes revenue from customer support and other professional services. Customer support includes software updates on a when-and-if-available basis, telephone support, integrated web-based support and bug fixes or patches. The Company sells its customer support contracts as a percentage of net software purchases the support is related to. Customer support revenue is recognized ratably over the term of the customer support agreement, which is typically one year.

The Company's other professional services include consulting, assessment and design services, installation services and customer education. Customer education services include courses taught by the Company's instructors or third-party contractors. Revenue related to other professional services and customer education services is typically recognized as the services are performed.

Most of the Company's contracts with customers contain multiple performance obligations. For these contracts, the Company accounts for individual performance obligations separately if they are distinct. The transaction price is allocated to the separate performance obligations on a relative standalone selling price basis. Standalone selling prices of software are typically estimated using the residual approach. Standalone selling prices of services are typically estimated based on observable transactions when these services are sold on a standalone basis.

The Company's typical performance obligations include the following:

Performance Obligation	When Performance Obligation is Typically Satisfied	When Payment is Typically Due	How Standalone Selling Price is Typically Estimated
Software Revenue			
Software Licenses	Upon shipment or made available for download (point in time)	Within 90 days of shipment except for certain subscription licenses which are paid for over time	Residual approach
Customer Support Revenue			
Software Updates	Ratably over the course of the support contract (over time)	At the beginning of the contract period	Observable in renewal transactions
Customer Support	Ratably over the course of the support contract (over time)	At the beginning of the contract period	Observable in renewal transactions
Professional Services			

Edgar Filing: COMMVault SYSTEMS INC - Form 10-Q

Other Professional Services (except for education services)	As work is performed (over time)	Within 90 days of services being performed	Observable in transactions without multiple performance obligations
Education Services	When the class is taught (point in time)	Within 90 days of services being performed	Observable in transactions without multiple performance obligations

Disaggregation of Revenue

The Company disaggregates revenue from contracts with customers into the nature of the products and services and geographical regions. The geographic regions that are tracked are the Americas (United States, Canada, Latin America), EMEA (Europe, Middle East, Africa) and APAC (Australia, New Zealand, Southeast Asia, China). The Company operates in one segment.

	Three Months Ended June 30, 2017			
	Americas	EMEA	APAC	Total
Software Revenue	\$40,011	\$23,772	\$10,978	\$74,761
Customer Support Revenue	56,189	17,111	8,590	81,890
Professional Services	4,861	2,545	1,915	9,321
Total Revenue	\$101,061	\$43,428	\$21,483	\$165,972

	Three Months Ended June 30, 2016			
	Americas	EMEA	APAC	Total
Software Revenue	\$35,801	\$17,633	\$9,979	\$63,413
Customer Support Revenue	53,603	16,626	8,038	78,267
Professional Services	6,025	2,816	1,253	10,094
Total Revenue	\$95,429	\$37,075	\$19,270	\$151,774

Information about Contract Balances

Amounts collected in advance of services being provided are accounted for as deferred revenue. Nearly all of the Company's deferred revenue balance is related to services revenue, primarily customer support contracts.

In some arrangements the Company allows customers to pay for term based software licenses over the term of the software license. The Company refers to these as subscription transactions. Amounts recognized as revenue in excess of amounts billed are recorded as unbilled receivables. Unbilled receivables which are anticipated to be invoiced in the next twelve months are included in Accounts receivable on the consolidated balance sheet. Long term unbilled receivables are included in Other assets. The opening and closing balances of the Company's accounts receivable, unbilled receivables, and deferred revenues are as follows:

	Accounts Receivable	Unbilled Receivable (current)	Unbilled Receivable (long-term)	Deferred Revenue (current)	Deferred Revenue (long-term)
Opening Balance as of March 31, 2017	\$132,711	\$7,373	\$—	\$209,099	\$70,803
Increase/decrease, net	(7,633)	(1,094)	640	8,440	4,201
Ending Balance as of June 30, 2017	\$125,078	\$6,279	\$640	\$217,539	\$75,004

The decrease in accounts receivable is a result of the sequential decline in software revenue as well as customer support renewals which are more concentrated in the Company's fiscal fourth quarter. The increase in deferred revenue is primarily the result of an increase in deferred customer support revenue related to software revenue transactions and customer support renewals during the first quarter of fiscal 2018, most of which will be recognized over the course of the next twelve months.

The amount of revenue recognized in the period that was included in the opening deferred revenue balance was \$78,932. The vast majority of this revenue consists of customer support arrangements. The amount of revenue recognized from performance obligations satisfied in prior periods was not material.

Table of Contents

Commvault Systems, Inc

Notes to Consolidated Financial Statements - Unaudited (continued)

(In thousands, except per share data)

Remaining Performance Obligations

In addition to the amounts included in deferred revenue as of June 30, 2017, approximately \$14,840 of revenue may be recognized from remaining performance obligations, of which \$687 was related to software. The Company expects the software to be recognized next quarter. The majority of this services revenue is related to other professional services which may be recognized over the next twelve months but is contingent upon a number of factors, including customers' needs and schedules.

4. Property and Equipment

Property and equipment consist of the following:

	June 30, 2017	March 31, 2017
Land	\$9,445	\$9,445
Buildings	103,244	103,244
Computers, servers and other equipment	35,858	35,274
Furniture and fixtures	15,393	14,912
Leasehold improvements	8,632	7,040
Purchased software	1,341	1,335
Construction in process	151	1,147
	174,064	172,397
Less: Accumulated depreciation and amortization	(42,855)	(40,078)
	\$131,209	\$132,319

The Company recorded depreciation and amortization expense of \$2,709 and \$2,439 for the three months ended June 30, 2017 and 2016, respectively.

5. Net Income per Common Share

Basic net income per common share is computed by dividing net income by the weighted average number of common shares during the period. Diluted net income per share is computed using the weighted average number of common shares and, if dilutive, potential common shares outstanding during the period. Potential common shares consist of the incremental common shares issuable upon the exercise of stock options, vesting of restricted stock units and shares to be purchased under the Employee Stock Purchase Plan. The dilutive effect of such potential common shares is reflected in diluted earnings per share by application of the treasury stock method.

The diluted weighted average shares outstanding exclude outstanding stock options, restricted stock units, performance stock options, performance restricted stock units and shares to be purchased under the employee stock purchase plan totaling approximately 7,775 and 8,443 for the three months ended June 30, 2017 and 2016, respectively, because the effect would have been anti-dilutive.

6. Commitments and Contingencies

In the normal course of its business, the Company may be involved in various claims, negotiations and legal actions. As of June 30, 2017, the Company is not aware of any asserted or unasserted claims, negotiations and legal actions for which a loss is considered reasonably possible of occurring and would require disclosure under the guidance.

On September 10, 2014, a purported class action complaint was filed in the United States District Court for the District of New Jersey against the Company, its Chief Executive Officer and its Chief Financial Officer. The case is captioned *In re Commvault Systems, Inc. Securities Litigation* (Master File No. 3:14-cv-05628-MAS-LHG). The suit alleges that the Company made materially false and misleading statements, or failed to disclose material facts, regarding the Company's financial results, business, operations and prospects in violation of Sections 10(b) and 20(a) of the Securities Exchange Act of 1934 and Rule 10b-5 promulgated thereunder. The suit asserts claims covering an alleged class period from May 7, 2013 through April 24, 2014. It is purportedly brought on behalf of purchasers of the Company's common stock during that period, and seeks compensatory damages, costs and expenses, as well as equitable or other relief. Lead plaintiff, the Arkansas Teachers Retirement System, was appointed on January 12, 2015, and on March 18, 2015, an amended complaint was filed by the plaintiffs. On December 17, 2015, the defendant's motion to dismiss the case was granted and the case dismissed; however, the plaintiffs were permitted to re-file their claim, which they did on February 5, 2016. Defendants filed another motion to dismiss on April 5, 2016, which was denied by the court on September 30, 2016. Discovery has commenced in this action and is ongoing. Due to the inherent uncertainties of litigation, the Company cannot accurately predict the ultimate outcome of this matter. The Company is unable at this time to determine whether the outcome of the litigation will have a material impact on its results of operations, financial condition or cash flows. As of June 30, 2017, the Company has not recorded an accrual for this matter as it has concluded the probability of a loss is remote.

On April 12, 2017, a shareholder derivative complaint was filed in the United States District Court for the District of New Jersey against the Company (nominally), certain of its executive officers, and certain of its current and former members of the board of directors. The complaint is entitled *Murashko v. Hammer, et al.* (Civ. No. 3:17-cv-02533-PGS-TJB). The action alleges that certain of the Company's executive officers and board members breached their fiduciary duties to the Company by causing, or allowing, the Company to manipulate its financial results and conceal the state of its business prospects. The suit also alleges that through these breaches, the Company's executive officers and board members unjustly enriched themselves at the expense of the Company. The suit asserts factual allegations similar to the allegations made in *In re Commvault Systems, Inc. Securities Litigation* (Master File No. 3:14-cv-05628-PGS-LHG), a securities litigation also pending in the United States District Court for the District of New Jersey. The allegations asserted in the shareholder derivative action purport to cover a period from 2013 through the present. As a derivative action, the complaint is brought nominally on behalf of the Company, and seeks compensatory damages, restitution, costs and expenses, as well as equitable or other relief. Due to the inherent uncertainties of litigation, the Company cannot accurately predict the ultimate outcome of this matter. The Company is unable at this time to determine whether the outcome of the litigation will have a material impact on its results of operations, financial condition or cash flows. As of June 30, 2017, the Company has not recorded an accrual for this matter as it has concluded the probability of a loss is remote.

On February 27, 2017, Realtime Data LLC d/b/a/ IXO ("Realtime"), a non-practicing entity, sued the Company and Spectra Logic Corporation in the Eastern District of Texas for alleged infringement of four patents: U.S. Patent Nos. 9,054,728, 7,415,530, 9,116,908, and 8,717,204. Realtime has sued numerous other companies for infringement of these and other patents. Realtime seeks monetary damages and an injunction. The Company has not yet answered the

complaint. Due to the inherent uncertainties of litigation, the Company cannot accurately predict the ultimate outcome of this matter. The Company is unable at this time to determine whether the outcome of the litigation will have a material impact on its results of operations, financial condition or cash flows. The Company intends to defend itself vigorously. As of June 30, 2017, the Company has not recorded an accrual for this matter as it has concluded the probability of a loss is remote.

7. Revolving Credit Facility

On June 30, 2014, the Company entered into a five-year \$250,000 revolving credit facility (the "Credit Facility"). The Credit Facility is available for share repurchases, general corporate purposes, and letters of credit. The Credit Facility contains financial maintenance covenants including a leverage ratio and interest coverage ratio. The Credit Facility also contains certain customary events of default which would permit the lenders to, among other things, declare all loans then outstanding to be immediately due and payable if such default is not cured within applicable grace periods. The Credit Facility also limits the Company's ability to incur certain additional indebtedness, create or permit liens on assets, make acquisitions, make investments, loans or advances, sell or transfer assets, pay dividends or distributions, and engage in certain transactions with foreign affiliates. Outstanding borrowings under the Credit Facility accrue interest at an annual rate equal to London Interbank Offered Rate plus 1.50% subject to increases based on the Company's actual leverage. The unused balance on the Credit Facility is also subject to a 0.25% annual interest charge subject to increases based on the Company's actual leverage. As of June 30, 2017, there were no borrowings under the Credit Facility and the Company was in compliance with all covenants.

The Company has deferred the expense related to debt issuance costs, which are classified as Other assets, and will amortize the costs into interest expense over the term of the Credit Facility. Unamortized amounts at June 30, 2017 were \$505. The amortization of debt issuance costs was \$63 in the three months ended June 30, 2017 and 2016.

8. Capitalization

The Company did not repurchase any of its shares during the three months ended June 30, 2017. As of June 30, 2017, \$125,000 remained in the stock repurchase authorization that expires on March 31, 2018.

9. Stock Plans

On August 16, 2016, the Company's Omnibus Incentive Plan (the "2016 Incentive Plan") was approved by its shareholders. The 2016 Incentive Plan authorizes a broad range of awards including stock options, stock appreciation rights, full value awards (including restricted stock, restricted stock units, performance shares or units and other stock-based awards) and cash-based awards. The maximum number of shares of common stock that may be delivered under the 2016 Incentive Plan is equal to 2,800 shares.

The following table presents the stock-based compensation expense included in Cost of services revenue, Sales and marketing, Research and development and General and administrative expenses for the three months ended June 30, 2017 and 2016. Stock-based compensation is attributable to stock options, restricted stock units, performance based awards and the employee stock purchase plan.

	Three Months Ended June 30,	
	2017	2016
Cost of services revenue	\$751	\$871
Sales and marketing	9,440	7,671
Research and development	2,070	1,678
General and administrative	7,303	7,120
Stock-based compensation expense	\$19,564	\$17,340

As of June 30, 2017, there was approximately \$99,267 of unrecognized stock-based compensation expense related to non-vested stock option and restricted stock unit awards that is expected to be recognized over a weighted average period of 1.36 years. The Company accounts for forfeitures as they occur. To the extent that awards are forfeited, stock-based compensation will be different from the Company's current estimate.

Table of Contents

Commvault Systems, Inc

Notes to Consolidated Financial Statements - Unaudited (continued)

(In thousands, except per share data)

Stock Options

Stock Option activity for the three months ended June 30, 2017 is as follows:

Options	Number of Options	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value
Outstanding as of March 31, 2017	5,300	\$ 44.74		
Options granted	—	—		
Options exercised	(223)	25.01		
Options forfeited	(10)	45.79		
Options expired	(7)	59.90		
Outstanding as of June 30, 2017	5,060	\$ 45.59	4.64	\$ 83,710
Exercisable as of June 30, 2017	4,569	\$ 44.78	4.36	\$ 79,222

The total intrinsic value of options exercised was \$7,002 for the three months ended June 30, 2017 and \$1,369 for the three months ended June 30, 2016. The Company's policy is to issue new shares upon exercise of options as the Company does not hold shares in treasury.

Restricted Stock Units

Restricted stock unit activity for the three months ended June 30, 2017 is as follows:

Non-vested Restricted Stock Units	Number of Awards	Weighted Average Grant Date Fair Value
Non-vested as of March 31, 2017	2,396	\$ 45.53
Awarded	403	60.19
Vested	(315)	54.13
Forfeited	(44)	45.25
Non-vested as of June 30, 2017	2,440	\$ 47.47

The weighted average fair value of restricted stock units awarded was \$60.19 per unit during the three months ended June 30, 2017, and \$46.88 per unit during the three months ended June 30, 2016. The weighted average fair value of awards includes the awards with a market condition described below.

Performance Based Awards

In the three months ended June 30, 2017, the Company granted 88 performance restricted stock units ("PSU") to certain executives. Vesting of these awards is contingent upon i) the Company meeting certain company-wide revenue and non-GAAP performance goals (performance-based) in fiscal 2017 and ii) the Company's customary service periods. The awards vest over three years and have a maximum potential to vest at 200% (176 shares) based on actual fiscal 2018 performance. The related stock-based compensation expense is determined based on the value of the underlying shares on the date of grant and is recognized over the vesting term using the accelerated method. During the interim financial periods, management estimates the probable number of PSU's that would vest until the ultimate achievement of the performance goals is known. The awards are included in the restricted stock unit table.

Table of Contents

Commvault Systems, Inc

Notes to Consolidated Financial Statements - Unaudited (continued)

(In thousands, except per share data)

Awards with a Market Condition

In the three months ended June 30, 2017, the Company granted 88 market performance stock units to certain executives. The vesting of these awards is contingent upon the Company meeting certain total shareholder return ("TSR") levels as compared to a market index over the next three years. The awards vest in three annual tranches and have a maximum potential to vest at 200% (176 shares) based on TSR performance. The related stock-based compensation expense is determined based on the estimated fair value of the underlying shares on the date of grant and is recognized using the accelerated method over the vesting term. The estimated fair value was calculated using a Monte Carlo simulation model. The fair value of the awards granted during the three months ended June 30, 2017 was \$78.28. The awards are included in the restricted stock unit table.

Employee Stock Purchase Plan

The Employee Stock Purchase Plan (the "Purchase Plan") is a shareholder approved plan under which substantially all employees may purchase the Company's common stock through payroll deductions at a price equal to 85% of the lower of the fair market values of the stock as of the beginning or the end of the six-month offering periods. An employee's payroll deductions under the Purchase Plan are limited to 10% of the employee's salary and employees may not purchase more than \$25 of stock during any calendar year. As of June 30, 2017, 2,400 shares were reserved for future issuance under the Purchase Plan. The Purchase Plan is considered compensatory and the fair value of the discount and look back provision are estimated using the Black-Scholes formula and recognized over the six month withholding period prior to purchase. The total expense associated with the Purchase Plan was \$676 for the three months ended June 30, 2017 and \$679 for the three months ended June 30, 2016.

10. Income Taxes

Income tax benefit was \$3,837 in the three months ended June 30, 2017. The income tax benefit in the three month period ended June 30, 2017 is primarily related to the \$2,358 impact of excess tax benefits for exercised stock options and vested restricted stock units. In prior periods, excess tax benefits were accounted for as a component of equity. The income tax benefit also includes the favorable impact of research tax credits and was partially offset by the unfavorable impact of permanent book to tax differences.

Income tax benefit was \$695 in the three months ended June 30, 2016. The effective rate of the income tax benefit in the three month period is lower than the federal statutory rate due to the impact of unfavorable permanent differences, partially offset by the impact of research tax credits.

Unrecognized Tax Benefits

The calculation of the Company's tax liabilities involves dealing with uncertainties in the application of complex tax regulations in each of its tax jurisdictions. The number of years with open tax audits varies depending on the tax jurisdiction. A number of years may lapse before a particular matter is audited and finally resolved. A reconciliation of the beginning and ending amounts of unrecognized tax benefits is as follows:

Balance as of March 31, 2017	\$2,098
Additions for tax positions related to fiscal 2017	64
Additions for tax positions related to prior years	—
Settlements and effective settlements with tax authorities and remeasurements	—
Reductions related to the expiration of statutes of limitations	—
Foreign currency translation adjustment	1
Balance as of June 30, 2017	\$2,163

Table of Contents

Commvault Systems, Inc

Notes to Consolidated Financial Statements - Unaudited (continued)

(In thousands, except per share data)

All of the Company's unrecognized tax benefits would favorably impact the effective tax rate if they were recognized. Components of the reserve are classified as either current or long-term in the Consolidated Balance Sheet based on when the Company expects each of the items to be settled. Unrecognized tax benefits and the related accrued interest and penalties totaling \$1,434 are recorded as Other Liabilities on the Consolidated Balance Sheet, of which \$321 represents interest and penalties. The Company also has unrecognized tax benefits and related accrued interest and penalties totaling \$1,146 as a reduction of Deferred Tax Assets on the Consolidated Balance Sheet, of which \$96 represents interest and penalties.

Other Tax Items

The Company conducts business globally and as a result, files income tax returns in the United States and in various state and foreign jurisdictions. In the normal course of business, the Company is subject to examination by taxing authorities throughout the world, including such major jurisdictions as the United States, Australia, Canada, Germany, Netherlands and United Kingdom. The years subject to income tax examination in the Company's foreign jurisdictions cover the maximum time period with respect to these jurisdictions. Due to net operating loss ("NOL") carryforwards, in some cases the tax years continue to remain subject to examination with respect to such NOLs.

Item 2 - Management's Discussion and Analysis of Financial Condition and Results of Operations

You should read the following discussion and analysis along with our consolidated financial statements and the related notes included elsewhere in this quarterly report on Form 10-Q. The statements in this discussion regarding our expectations of our future performance, liquidity and capital resources, and other non-historical statements are forward-looking statements. These forward-looking statements are subject to numerous risks and uncertainties, including, but not limited to, the risks and uncertainties described under "Risk Factors" in our Annual Report on Form 10-K for the fiscal year ended March 31, 2016. Our actual results may differ materially from those contained in or implied by any forward-looking statements.

Overview

Commvault is a provider of data and information management software applications and related services. Commvault was incorporated in 1996 as a Delaware corporation. The Commvault software platform is an enterprise level, integrated data and information management solution, built from the ground up on a single platform and unified code base. All software functionality share the same back-end technologies to deliver the benefits of a holistic approach to protecting, managing, and accessing data. The software addresses many aspects of data management in the enterprise, while providing scalability and control of data and information. We also provide our customers with a broad range of professional services that are delivered by our worldwide support and field operations. As of June 30, 2017, we had licensed our software applications to approximately 25,000 registered customers.

Our software licenses typically provide for a perpetual right to use our software and are sold on a per terabyte capacity basis, per-copy, as site licenses or as a solution set. Prior to fiscal 2018, an insignificant amount of our revenue has been sold under subscription, or term based, license arrangements. In these arrangements the customer has the right to use the software over a designated period of time. During fiscal 2018, we expect revenue from subscription arrangements to become a more significant portion of our total revenue compared to historical periods.

In recent years, the majority of our software revenue has been sold on a capacity basis and we expect this to remain true in the near future. During the three months ended June 30, 2017, approximately 66% of software license revenue was sold on a capacity basis. This compares to approximately 69% of software license revenue was sold on a capacity basis during fiscal 2017. Software licenses sold on a capacity basis provide the customer with unlimited licenses of specified software products based on a defined level of terabytes of data under management. As a result, when we sell our platform through a capacity license, certain of the various functionalities discussed below are bundled into one capacity based price. Site licenses give the customer the additional right to deploy the software on a limited basis during a specified term.

Our solution sets are generally sold on a per unit basis such as per virtual machine for our virtual machine backup, recovery and cloud management solution set; per mailbox for our email archive solution set, and per user for our endpoint data protection solution set. These solution sets are purpose-built offerings designed to accelerate private, public and hybrid cloud adoption that seamlessly integrate with our single platform software, offering a path towards holistic data management while allowing customers to utilize functionality that addresses the point solution requirements their business dictates. We primarily sell solution sets for virtual machine backup, recovery and cloud management; endpoint data protection; and email archive.

The industry in which we currently operate continues to go through accelerating changes as the result of compounding data growth and the introduction of new technologies. We remain focused on both the data and information management trends in the marketplace and, in fact, a material portion of our existing research and development expenses are utilized toward the development of such new technologies. While we are confident in our ability to meet these changing industry demands with our Commvault suite and potential future releases, the development, release and timing of any features or functionality remain at our sole discretion and our solutions or other technologies may not be widely adopted.

Given the nature of the industry in which we operate, our software applications are subject to obsolescence. We continually develop and introduce updates to our existing software applications in order to keep pace with evolving

industry technologies. In addition, we must address evolving industry standards, changing customer requirements and competitive software applications that may render our existing software applications obsolete. For each of our software applications, we provide full support for the current generally available release and one prior release. When we declare a product release obsolete, a customer notice is delivered twelve months prior to the effective date of obsolescence announcing continuation of full product support for the first six months. We provide an additional six months of extended assistance support in which we only provide existing workarounds or fixes that do not require additional development activity. We do not have existing plans to make any of our software products permanently obsolete.

Table of Contents

Sources of Revenues

We derive a significant portion of our total revenues from sales of licenses of our software applications. We do not customize our software for a specific end-user customer. We sell our software applications to end-user customers both directly through our sales force and indirectly through our global network of value-added reseller partners, systems integrators, corporate resellers and original equipment manufacturers. Our software revenue was 45% and 42% of our total revenues for the three months ended June 30, 2017 and 2016, respectively.

In recent fiscal periods, we have generated approximately three-quarters of our software revenue from our existing customer base and approximately one-quarter of our software revenue from new customers. In addition, our total software revenue in any particular period is, to a certain extent, dependent upon our ability to generate revenues from large customer software deals, which we refer to as enterprise software transactions. Enterprise software transactions (transactions greater than \$0.1 million) represented approximately 63% and 49% of our total software revenue in the three months ended June 30, 2017 and 2016, respectively.

Software revenue generated through indirect distribution channels was 81% of total software revenue in the three months ended June 30, 2017 and was approximately 83% of total software revenue in the three months ended June 30, 2016. Software revenue generated through direct distribution channels was approximately 19% of total software revenue in the three months ended June 30, 2017 and was approximately 17% of total software revenue in the three months ended June 30, 2016. The dollar value of software revenue generated through indirect distribution channels increased approximately \$7.9 million, or 15%, in the three months ended June 30, 2017 compared to the three months ended June 30, 2016. The dollar value of software revenue generated through direct distribution channels increased approximately \$3.5 million, or 33%, in the three months ended June 30, 2017 compared to the three months ended June 30, 2016. Deals initiated by our direct sales force are sometimes transacted through indirect channels based on end-user customer requirements, which are not always in our control and can cause this overall percentage split to vary from period-to-period. As such, there may be fluctuations in the dollars and percentage of software revenue generated through our direct distribution channels from time-to-time. We believe that the growth of our software revenue, derived from both our indirect channel partners and direct sales force, are key attributes to our long-term growth strategy. We will continue to invest in both our channel relationships and direct sales force in the future, but we continue to expect more revenue to be generated through indirect distribution channels over the long term. The failure of our indirect distribution channels or our direct sales force to effectively sell our software applications could have a material adverse effect on our revenues and results of operations.

Our primary original equipment manufacturer agreement is with Hitachi Data Systems ("HDS") and allows them to market, sell and support our software applications and services on a stand-alone basis and/or incorporate our software applications into their own hardware products. Our original equipment manufacturer partners, including HDS, have no obligation to recommend or offer our software applications exclusively or at all, and they have no minimum sales requirements and can terminate our relationship at any time. Sales through our original equipment manufacturer agreements, accounted for approximately 10% of our total revenues for the three months ended June 30, 2017 and 15% of our total revenues for the three months ended June 30, 2016.

We also have non-exclusive distribution agreements covering our North American commercial markets and our U.S. Federal Government market with Arrow Enterprise Computing Solutions, Inc. ("Arrow"), a subsidiary of Arrow Electronics, Inc., and Avnet Technology Solutions ("Avnet"), a subsidiary of Avnet, Inc. Pursuant to these distribution agreements, these distributors' primary role is to enable a more efficient and effective distribution channel for our products and services by managing our reseller partners and leveraging their own industry experience. We generated approximately 36% of our total revenues through Arrow in the three months ended June 30, 2017, and approximately 34% in the three months ended June 30, 2016. We generated approximately 12% of our total revenues through Avnet in the three months ended June 30, 2017. If Arrow or Avnet were to discontinue or reduce the sales of our products or if our agreement with Arrow or Avnet was terminated, and if we were unable to take back the management of our reseller channel or find another North American distributor to replace Arrow or Avnet, then it could have a material adverse effect on our future business.

Our services revenue was 55% of our total revenues for the three months ended June 30, 2017 and 58% of our total revenues for the three months ended June 30, 2016. Our services revenue is made up of fees from the delivery of customer support and other professional services, which are typically sold in connection with the sale of our software applications. Customer support agreements provide technical support and unspecified software updates on a when-and-if-available basis for an annual fee based on licenses purchased and the level of service subscribed. Other professional services include consulting, assessment and design services, installation services and customer education.

Table of Contents

Most of our customer support agreements are priced as a percentage of the related net software purchased and are for a one year term. As the end of the annual period approaches, we pursue the renewal of the agreement with the customer. Historically, customer support renewals have represented a significant portion of our total revenue. Because of this characteristic of our business, if our customers choose not to renew their support agreements with us on beneficial terms, or at all, our business, operating results and financial condition could be harmed.

Foreign Currency Exchange Rates' Impact on Results of Operations

Sales outside the United States were approximately 45% of our total revenue for the three months ended June 30, 2017 and 43% of our total revenue for the three months ended June 30, 2016. The results of our non-U.S. operations are translated into U.S. dollars at the average exchange rates for each applicable month in a period. To the extent the U.S. dollar weakens against foreign currencies, the translation of these foreign currency denominated transactions generally results in increased revenue, operating expenses and income from operations for our non-U.S. operations. Similarly, our revenue, operating expenses and net income will generally decrease for our non-U.S. operations if the U.S. dollar strengthens against foreign currencies.

Using the average foreign currency exchange rates from the three months ended June 30, 2016 our software revenue would have been higher by \$0.9 million, our services revenue would have been higher by \$1.3 million, our cost of sales would have been higher by \$0.1 million and our operating expenses would have been higher by \$2.4 million from non-U.S. operations for the three months ended June 30, 2017.

In addition, we are exposed to risks of foreign currency fluctuation primarily from cash balances, accounts receivables and intercompany accounts denominated in foreign currencies and are subject to the resulting transaction gains and losses, which are recorded as a component of general and administrative expenses. We recognized a net foreign currency transaction gains of \$0.1 million and \$0.3 million in the three months ended June 30, 2017 and 2016.

Critical Accounting Policies

Our condensed consolidated financial statements are prepared in accordance with U.S. GAAP. The preparation of these condensed consolidated financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue, costs and expenses and related disclosures. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances. In many instances, we could have reasonably used different accounting estimates, and in other instances changes in the accounting estimates are reasonably likely to occur from period-to-period. Accordingly, actual results could differ significantly from the estimates made by our management. To the extent that there are material differences between these estimates and actual results, our future financial statement presentation, financial condition, results of operations and cash flows will be affected.

In many cases, the accounting treatment of a particular transaction is specifically dictated by GAAP and does not require management's judgment in its application, while in other cases, significant judgment is required in selecting among available alternative accounting standards that allow different accounting treatment for similar transactions. We consider these policies requiring significant management judgment to be critical accounting policies. These critical accounting policies are:

- Revenue Recognition;
- Stock-Based Compensation;
- Accounting for Income Taxes
- Software Development Costs
- Deferred Commissions Costs

The discussion below includes changes to our critical accounting policies that have occurred in fiscal 2018.

Revenue Recognition

We account for revenue in accordance with ASC Topic 606, Revenue from Contracts with Customers. Our revenue recognition policies require us to make significant judgments and estimates. In applying our revenue recognition policy, we must determine which portions of our revenue are recognized currently (generally software revenue) and which portions must be deferred and recognized in future periods (generally services revenue). We analyze various factors including, but not limited to, the selling price of undelivered services when sold on a stand-alone basis, our pricing policies, the credit-worthiness of our customers, and contractual terms and conditions in helping us to make

such judgments about revenue recognition. Changes in judgment on any of these factors could materially impact the timing and amount of revenue recognized in a given period.

Table of Contents

We derive revenue from two primary sources: software licenses and services. Services include customer support (software updates and technical support), consulting, assessment and design services, installation services and customer education. A typical contract includes both licenses and services.

Our software licenses typically provide for a perpetual right to use the Company's software. We also sell term-based software licenses that expire, which we refer to as subscription arrangements. We do not customize its software for customers and installation services are not required. Our software is delivered before related services are provided and is functional without professional services, updates and technical support. We have concluded that our software license is distinct as the customer can benefit from the software on its own. Software revenue is typically recognized when the software is delivered or made available for download to our customer. We also have licensing arrangements with customers that are accounted for as usage-based royalties. Revenue from these arrangements is recognized as the usage occurs.

Services revenue includes revenue from customer support and other professional services. Customer support includes software updates on a when-and-if-available basis, telephone support, integrated web-based support and bug fixes or patches. The Company sells its customer support contracts as a percentage of net software purchases the support is related to. Customer support revenue is recognized ratably over the term of the customer support agreement, which is typically one year.

Other professional services include consulting, assessment and design services, installation services and customer education. Customer education services include courses taught by our instructors or third-party contractors. Revenue related to other professional services and customer education services is typically recognized as the services are performed.

Most of our contracts with customers contain multiple performance obligations. For these contracts, we account for individual performance obligations separately if they are distinct. The transaction price is allocated to the separate performance obligations on a relative standalone selling price basis. Standalone selling prices of software are typically estimated using the residual approach. Standalone selling prices of services are typically estimated based on observable transactions when these services are sold on a standalone basis.

Our typical performance obligations include the following:

Performance Obligation	When Performance Obligation is Typically Satisfied	When Payment is Typically Due	How Standalone Selling Price is Typically Estimated
Software Revenue			
Software Licenses	Upon shipment or made available for download (point in time)	Within 90 days of shipment except for certain subscription licenses which are paid for over time	Residual approach
Customer Support Revenue			
Software Updates	Ratably over the course of the support contract (over time)	At the beginning of the contract period	Observable in renewal transactions
Customer Support	Ratably over the course of the support contract (over time)	At the beginning of the contract period	Observable in renewal transactions
Professional Services			
Other Professional Services (except for education services)	As work is performed (over time)	Within 90 days of services being performed	Observable in transactions without multiple performance obligations
Education Services			

Edgar Filing: COMMVault SYSTEMS INC - Form 10-Q

When the class is taught (point in time)	Within 90 days of services being performed	Observable in transactions without multiple performance obligations

Table of Contents

Stock-Based Compensation and Accounting for Income Taxes

In March 2016, the FASB issued ASU No. 2016-09, Improvements to Employee Share-Based Payment Accounting (Topic 718), which simplifies the accounting for share-based payment transactions, including related accounting for income taxes, forfeitures, and classification in the statement of cash flows. In connection with the adoption of this guidance we elected an accounting policy to account for forfeitures as they occur. The guidance also requires excess tax benefits and tax deficiencies to be recorded as income tax benefit or expense in the statement of income when the awards vest or are settled, and eliminates the requirement to reclassify cash flows related to excess tax benefits from operating activities to financing activities on the statement of cash flows.

Deferred Commissions Cost

Sales commissions and related payroll taxes earned by our employees are considered incremental and recoverable costs of obtaining a contract with a customer. The costs related to revenue that will be recognized in future periods is deferred and then amortized over a period of benefit that we have determined to be five years. The period of benefit was determined by taking into consideration customer contracts, technology and other factors. Amortization expense related to these costs is included in Sales and marketing expenses in the accompanying condensed consolidated statements of income. If we were to change our estimate of the period of benefit of these deferred costs it would impact our results of operations.

There have been no other significant changes in our critical accounting policies and estimates during the three months ended June 30, 2017 as compared to the critical accounting policies and estimates disclosed in “Management’s Discussion and Analysis of Financial Condition and Results of Operations - Critical Accounting Policies” included in our Annual Report on Form 10-K for the year ended March 31, 2017. In addition, please see Note 2 of Notes to the Condensed Consolidated Financial Statements included in this Quarterly Report on Form 10-Q and Note 2 of the Notes to Consolidated Financial Statements included in our fiscal 2017 Annual Report on Form 10-K filed for a description of our accounting policies.

Results of Operations

Three months ended June 30, 2017 compared to three months ended June 30, 2016

Revenues

Total revenues increased \$14.2 million, or 9%, from \$151.8 million in the three months ended June 30, 2016 to \$166.0 million in the three months ended June 30, 2017.

Software Revenue. Software revenue increased \$11.3 million, or 18%, from \$63.4 million in the three months ended June 30, 2016 to \$74.8 million in the three months ended June 30, 2017. Software revenue represented 45% of our total revenues in the three months ended June 30, 2017 as compared to 42% of total revenues in the three months ended June 30, 2016.

We track software revenue on a geographic basis. The geographic regions that are tracked are the Americas (United States, Canada, Latin America), EMEA (Europe, Middle East, Africa) and APAC (Australia, New Zealand, Southeast Asia, China). Americas, EMEA and APAC represented 53%, 32% and 15% of total software revenue, respectively, for the three months ended June 30, 2017. The year-over-year increase of software revenue in the Americas, EMEA and APAC was 12%, 35% and 10%, respectively.

The increase in Americas software revenue for the three months ended June 30, 2017 was the result of an increase in enterprise transaction revenue driven by a higher average dollar value of enterprise revenue transactions.

EMEA software revenue increased as a result of a significant increase in enterprise transaction revenue. The significant increase in enterprise transaction revenue was driven by an increase in the average dollar value of such transactions. Year over year software revenue growth in EMEA was adversely impacted by changes in foreign exchange rates as the U.S. dollar strengthened against the Euro and British pound sterling. Using average foreign exchange rates from the first three months of fiscal 2017, fiscal 2018 EMEA software revenue would have increased 39% compared to an actual increase of 35%.

The increase in APAC software revenue was the result of an increase in enterprise transaction revenue driven by a higher average dollar value of enterprise revenue transactions.

Our software revenue in EMEA and APAC is subject to changes in foreign exchange rates as more fully discussed above in the “Foreign Currency Exchange Rates’ Impact on Results of Operations” section.

Table of Contents

Software revenue derived from enterprise software transactions (transactions greater than \$0.1 million) represented approximately 63% of our software revenue in the three months ended June 30, 2017 and approximately 49% of our software revenue in the three months ended June 30, 2016. Enterprise software transaction revenue increased by \$15.6 million, or 50%, in the three months ended June 30, 2017 compared to the three months ended June 30, 2016. This increase was driven by a 59% increase in the average dollar amount of such transactions partially offset by a 6% decline in the number of transactions. The average sales price was approximately \$375,000 in the three months ended June 30, 2017 and approximately \$236,000 in the three months ended June 30, 2016. Software revenue derived from transactions less than \$0.1 million decreased \$4.2 million, or 13%, in the three months ended June 30, 2017 compared to the three months ended June 30, 2016.

Services Revenue. Services revenue increased \$2.9 million, or 3%, from \$88.4 million in the three months ended June 30, 2016 to \$91.2 million in the three months ended June 30, 2017. Services revenue represented 55% of our total revenues in the three months ended June 30, 2017 and 58% in the three months ended June 30, 2016. The increase in services revenue is due to a \$3.6 million increase in revenue from customer support agreements as a result of software sales to new customers and renewal agreements with our installed software base. The increase in customer support revenue was partially offset by a decline in other professional services revenue.

Cost of Revenues. Total cost of revenues increased \$0.7 million, or 3%, from \$21.0 million in the three months ended June 30, 2016 to \$21.7 million in the three months ended June 30, 2017. The gross margin of our services revenue was 77% for both the three months ended June 30, 2017 and 2016. Overall, our services revenue has lower gross margins than our software revenue. The gross margin of our software revenue was approximately 99% for both the three months ended June 30, 2017 and 2016. An increase in the percentage of total revenues represented by services revenue may adversely affect our overall gross margins.

Operating Expenses

Sales and Marketing. Sales and marketing expenses increased \$7.2 million, or 8%, from \$92.7 million in the three months ended June 30, 2016 to \$99.9 million in the three months ended June 30, 2017. The increase is primarily due to a \$4.8 million increase in employee compensation and related expenses mainly attributable to the expansion of our sales force from the prior year and a \$1.8 million increase in stock-based compensation. Sales and marketing expenses as a percentage of total revenues was 60% in the three months ended June 30, 2017 and 61% in the three months ended June 30, 2016.

Research and Development. Research and development expenses increased \$3.3 million, or 17%, from \$19.2 million in the three months ended June 30, 2016 to \$22.5 million in the three months ended June 30, 2017. The increase is due to salary and related expenses resulting from the expansion of our engineering group. Research and development expenses as a percentage of total revenues was 14% in the three months ended June 30, 2017 and 13% in the three months ended June 30, 2016. Investing in research and development has been a priority for Commvault, and we anticipate continued spending related to the development of our data and information management software applications.

General and Administrative. General and administrative expenses increased \$3.9 million, or 20%, from \$19.9 million in the three months ended June 30, 2016 to \$23.9 million in the three months ended June 30, 2017. The increase is primarily the result of a \$4.3 million increase in employee compensation and related expenses. Expenses in the three months ended June 30, 2017 includes approximately \$0.1 million of net foreign currency transaction gains compared to \$0.3 million of net foreign currency transaction gains in the three months ended June 30, 2016. General and administrative expenses as a percentage of total revenues increased to 14% in the three months ended June 30, 2017 from 13% in the three months ended June 30, 2016.

Depreciation and Amortization. Depreciation expense increased by \$0.3 million from \$2.1 million in the three months ended June 30, 2016 to \$2.4 million in the three months ended June 30, 2017.

Income Tax Expense (Benefit)

Income tax benefit was \$3.8 in the three months ended June 30, 2017. The income tax benefit in the three month period ended June 30, 2017 is primarily related to the \$2.4 impact of excess tax benefits for exercised stock options and vested restricted stock units. The inclusion of excess tax benefits in the income tax benefit is the result of changes in accounting guidance effective April 1, 2017. In prior periods excess tax benefits were recorded as an adjustment to

equity. The income tax benefit also includes the favorable impact of research tax credits and was partially offset by the unfavorable impact of permanent book to tax differences. Income tax benefit was \$0.7 in the three months ended June 30, 2016. The effective rate of the income tax benefit in the three month period is lower than the federal statutory rate due to the impact of unfavorable permanent differences, partially offset by the impact of research tax credits.

Table of Contents

Liquidity and Capital Resources

As of June 30, 2017, our cash and cash equivalents balance of \$349.5 million primarily consisted of cash and money market funds. In addition, as of June 30, 2017 we have short-term investments invested in U.S. Treasury Bills totaling \$131.5 million. In recent fiscal years, our principal source of liquidity has been cash provided by operations.

As of June 30, 2017, the amount of cash and cash equivalents held outside of the United States by our foreign legal entities was approximately \$169 million. These balances are dispersed across many international locations around the world. We believe that such dispersion meets the current and anticipated future liquidity needs of our foreign legal entities. In addition, it is our intention to indefinitely reinvest undistributed earnings of our foreign legal entities. In the event we needed to repatriate funds from outside of the United States, such repatriation would likely be subject to restrictions by local laws and/or tax consequences including foreign withholding taxes or U.S. income taxes. It is not currently practical to estimate the legal restrictions or tax liability that would arise from such repatriations.

We have a five-year \$250 million revolving credit facility (the "Credit Facility") that expires in June 2019. The Credit Facility is available for share repurchases, general corporate purposes, and letters of credit. The Credit Facility contains financial maintenance covenants including a leverage ratio and interest coverage ratio. The Credit Facility also contains certain customary events of default which would permit the lenders to, among other things, declare all loans then outstanding to be immediately due and payable if such default is not cured within applicable grace periods. The Credit Facility also limits our ability to incur certain additional indebtedness, create or permit liens on assets, make acquisitions, make investments, loans or advances, sell or transfer assets, pay dividends or distributions, and engage in certain transactions with foreign affiliates. Outstanding borrowings under the Credit Facility accrue interest at an annual rate equal to London Interbank Offered Rate plus 1.50% subject to increases based on actual leverage. The unused balance on the Credit Facility is also subject to a 0.25% annual interest charge subject to increases based on our actual leverage. As of June 30, 2017, there were no borrowings under the Credit Facility and we believe we are in compliance with all covenants.

During the three months ended June 30, 2017, we did not repurchase any of common stock shares under our share repurchase program. As of June 30, 2017 there was \$125.0 million remaining in the share repurchase program which expires March 31, 2018. Under our stock repurchase program, repurchased shares are constructively retired and returned to unissued status. Our stock repurchase program has been funded by our existing cash and cash equivalent balances as well as cash flows provided by our operations.

Our future stock repurchase activity is subject to the business judgment of our management and Board of Directors, taking into consideration our historical and projected results of operations, financial condition, cash flows and other anticipated capital requirements or investment alternatives. Our stock repurchase program reduces the dilutive impact on our common shares outstanding associated with stock option exercises and our previous public and private stock offerings through the repurchase of common stock we believe is undervalued.

Our summarized cash flow information is as follows (in thousands):

	Three Months Ended June 30,	
	2017	2016
Net cash provided by operating activities	\$19,933	\$24,047
Net cash used in investing activities	(12,247)	(9,894)
Net cash provided by financing activities	5,570	1,842
Effects of exchange rate-changes in cash	6,775	(1,855)
Net increase in cash and cash equivalents	\$20,031	\$14,140

Net cash provided by operating activities was \$19.9 million in the three months ended June 30, 2017 and \$24.0 million in the three months ended June 30, 2016. In the three months ended June 30, 2017, cash provided by operating activities was primarily due to net loss adjusted for the impact of non-cash charges, collection of accounts receivable and an increase in deferred revenue. These amounts were partially offset by a decrease in Accrued liabilities and an increase in Other current assets. During the quarter we made a \$3.0 million payment for software royalties related to our hyper-converged products and appliance strategy. We expect to utilize these prepaid royalties over the next year. Cash flow from operations in the three month period ended June 30, 2017 also includes \$2.4 of excess tax benefits for

exercised stock options and vested restricted stock units. In prior periods excess tax benefits were classified as financing activities. In the three months ended June 30, 2016, cash provided by operating activities was primarily due to net loss adjusted for the impact of non-cash charges and the collection of accounts receivable.

Table of Contents

Net cash used in investing activities was \$12.2 million for the three months ended June 30, 2017 and \$9.9 million in the three months ended June 30, 2016. In the three months ended June 30, 2017, cash used in investing activities was related to \$10.8 million in net purchases of U.S. Treasury Bills and \$1.5 million of capital expenditures. In the three months ended June 30, 2016, cash used in investing activities was related to \$8.9 million in net purchases of U.S. Treasury Bills and \$1.0 million of capital expenditures.

Net cash provided by financing activities was \$5.6 million in the three months ended June 30, 2017 and \$1.8 million in the three months ended June 30, 2016. The cash provided by financing activities in the three months ended June 30, 2017 was due to \$5.6 million of proceeds from the exercise of stock options. The cash used in financing activities in the three months ended June 30, 2016 was due to \$1.6 million of proceeds from the exercise of stock options and \$0.3 million of excess tax benefits recognized as a result of the stock option exercises and restricted stock vesting. As a result of the adoption of new accounting guidance, excess tax benefits are now included in cash from operating activities.

Working capital increased \$31.5 million from \$318.1 million as of March 31, 2017 to \$349.6 million as of June 30, 2017. The net increase in working capital is due primarily to a net increase in cash and short-term investments that was a result of the cash flows generated from operations. We believe that our existing cash, cash equivalents and our cash from operations will be sufficient to meet our anticipated cash needs for working capital, income taxes, capital expenditures and potential stock repurchases for at least the next twelve months. We may seek additional funding through public or private financings or other arrangements during this period. Adequate funds may not be available when needed or may not be available on terms favorable to us, or at all. If additional funds are raised by issuing equity securities, dilution to existing stockholders will result. If we raise additional funds by obtaining loans from third parties, including borrowing under our revolving credit facility, the terms of those financing arrangements may include negative covenants or other restrictions on our business that could impair our operational flexibility, and would also require us to fund additional interest expense. If funding is insufficient at any time in the future, we may be unable to develop or enhance our products or services, take advantage of business opportunities or respond to competitive pressures, any of which could have a material adverse effect on our business, financial condition and results of operations.

Off-Balance Sheet Arrangements

As of June 30, 2017, other than our operating leases, we do not have off-balance sheet financing arrangements, including any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities.

Indemnifications

Certain of our software licensing agreements contain certain provisions that indemnify our customers from any claim, suit or proceeding arising from alleged or actual intellectual property infringement. These provisions continue in perpetuity along with our software licensing agreements. We have never incurred a liability relating to one of these indemnification provisions in the past and we believe that the likelihood of any future payout relating to these provisions is remote. Therefore, we have not recorded a liability during any period related to these indemnification provisions.

Impact of Recently Issued Accounting Standards

See Note 2 of the unaudited consolidated financial statements for a discussion of the impact of recently issued accounting standard.

Item 3 - Quantitative and Qualitative Disclosures about Market Risk

Interest Rate Risk

As of June 30, 2017, our cash and cash equivalents and short-term investments consisted primarily of money market funds and U.S. Treasury Bills. Due to the short-term nature of these investments, we are not subject to any material interest rate risk on these balances.

Table of Contents

Foreign Currency Risk

Economic Exposure

As a global company, we face exposure to adverse movements in foreign currency exchange rates. Our international sales are generally denominated in foreign currencies and this revenue could be materially affected by currency fluctuations. Approximately 45% of our sales were outside the United States for the three months ended June 30, 2017. Our primary exposures are to fluctuations in exchange rates for the U.S. dollar versus the Euro, and to a lesser extent, the Australian dollar, British pound sterling, Canadian dollar, Chinese yuan, Indian rupee, Korean won and Singapore dollar. Changes in currency exchange rates could adversely affect our reported revenues and require us to reduce our prices to remain competitive in foreign markets, which could also have a material adverse effect on our results of operations. Historically, we have periodically reviewed and revised the pricing of our products available to our customers in foreign countries and we have not maintained excess cash balances in foreign accounts.

Transaction Exposure

Our exposure to foreign currency transaction gains and losses is primarily the result of certain net receivables due from our foreign subsidiaries and customers being denominated in currencies other than the functional currency of the subsidiary. Our foreign subsidiaries conduct their businesses in local currency and we generally do not maintain excess U.S. dollar cash balances in foreign accounts.

Foreign currency transaction gains and losses are recorded in "General and administrative expenses" in the Consolidated Statements of Loss. We recognized a net foreign currency transaction gain of \$0.1 million in the three months ended June 30, 2017. We recognized net foreign currency transaction gain of \$0.3 million in the three months ended June 30, 2016. The net foreign currency transaction gains and losses recorded in "General and administrative" expenses include settlement gains and losses on forward contracts disclosed below.

To date, we have selectively hedged our exposure to foreign currency transaction gains and losses on the balance sheet through the use of forward contracts, which were not designated as hedging instruments. The duration of forward contracts utilized for hedging our balance sheet exposure is generally one to three months. Gains and losses from these contracts are recorded in general and administrative expenses. As of June 30, 2017 and March 31, 2017, we did not have any forward contracts outstanding. We recorded net realized gains and losses of less than \$0.1 million related to the settlement of forward exchange contracts in the three months ended June 30, 2017 and 2016. In the future, we may enter into additional foreign currency based hedging contracts to reduce our exposure to significant fluctuations in currency exchange rates on the balance sheet.

Item 4 - Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of the Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as of June 30, 2017. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of June 30, 2017.

Changes in Internal Control over Financial Reporting

The adoption of ASC 606, Revenue from Contracts with Customers, required the implementation of new accounting processes, which changed the Company's internal controls over revenue recognition, contract acquisition costs (deferred commissions) and financial reporting. The Company has completed the design of these controls and they have been implemented as of April 1, 2017. There was no other significant changes in our internal control over financial reporting that occurred during the first quarter of fiscal 2018 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

Inherent Limitations on Internal Controls

Our management, including our Chief Executive Officer and Chief Financial Officer, do not expect that our disclosures controls and procedures or our internal controls over financial reporting will prevent or detect all error and all fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of a simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, controls may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

Table of Contents

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

From time to time, we are subject to claims in legal proceedings arising in the normal course of our business. Except as discussed below, we do not believe that we are currently party to any pending legal action that could reasonably be expected to have a material adverse effect on our business or operating results.

On September 10, 2014, a purported class action complaint was filed in the United States District Court for the District of New Jersey against the Company, our Chief Executive Officer and our Chief Financial Officer. The case is captioned *In re Commvault Systems, Inc. Securities Litigation* (Master File No. 3:14-cv-05628-MAS-LHG). The suit alleges that we made materially false and misleading statements, or failed to disclose material facts, regarding our financial results, business, operations and prospects in violation of Sections 10(b) and 20(a) of the Securities Exchange Act of 1934 and Rule 10b-5 promulgated thereunder. The suit asserts claims covering an alleged class period from May 7, 2013 through April 24, 2014. It is purportedly brought on behalf of purchasers of our common stock during that period, and seeks compensatory damages, costs and expenses, as well as equitable or other relief. Lead plaintiff, the Arkansas Teachers Retirement System, was appointed on January 12, 2015, and on March 18, 2015, an amended complaint was filed by the plaintiffs. On December 17, 2015, the defendant's motion to dismiss the case was granted and the case dismissed; however, the plaintiffs were permitted to re-file their claim, which they did on February 5, 2016. Defendants filed another motion to dismiss on April 5, 2016, which was denied by the court on September 30, 2016. Discovery has commenced in this action and is ongoing. Due to the inherent uncertainties of litigation, we cannot accurately predict the ultimate outcome of this matter. We are unable at this time to determine whether the outcome of the litigation will have a material impact on our results of operations, financial condition or cash flows. As of June 30, 2017, we have not recorded an accrual for this matter as we have concluded that the probability of a loss is remote.

On April 12, 2017, a shareholder derivative complaint was filed in the United States District Court for the District of New Jersey against us (nominally), certain of its executive officers, and certain of its current and former members of the board of directors. The complaint is entitled *Murashko v. Hammer, et al.* (Civ. No. 3:17-cv-02533-PGS-TJB). The action alleges that certain of our executive officers and board members breached their fiduciary duties to us by causing, or allowing, us to manipulate its financial results and conceal the state of its business prospects. The suit also alleges that through these breaches, our executive officers and board members unjustly enriched themselves at the expense of the company. The suit asserts factual allegations similar to the allegations made in *In re Commvault Systems, Inc. Securities Litigation* (Master File No. 3:14-cv-05628-PGS-LHG), a securities litigation also pending in the United States District Court for the District of New Jersey. The allegations asserted in the shareholder derivative action purport to cover a period from 2013 through the present. As a derivative action, the complaint is brought nominally on behalf of the company, and seeks compensatory damages, restitution, costs and expenses, as well as equitable or other relief. Due to the inherent uncertainties of litigation, we cannot accurately predict the ultimate outcome of this matter. We are unable at this time to determine whether the outcome of the litigation will have a material impact on its results of operations, financial condition or cash flows. As of June 30, 2017, we have not recorded an accrual for this matter as we have concluded the probability of a loss is remote.

On February 27, 2017, Realtime Data LLC d/b/a/ IXO ("Realtime"), a non-practicing entity, sued us and Spectra Logic Corporation in the Eastern District of Texas for alleged infringement of four patents: U.S. Patent Nos. 9,054,728, 7,415,530, 9,116,908, and 8,717,204. Realtime has sued numerous other companies for infringement of these and other patents. Realtime seeks monetary damages and an injunction. We have not yet answered the complaint. Due to the inherent uncertainties of litigation, we cannot accurately predict the ultimate outcome of this matter. We are unable at this time to determine whether the outcome of the litigation will have a material impact on our results of operations, financial condition or cash flows. We intend to defend ourselves vigorously. As of June 30, 2017, we have not recorded an accrual for this matter as we have concluded that the probability of a loss is remote.

Item 1A. Risk Factors

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, “Item 1A. Risk Factors” in our Annual Report on Form 10-K for the year ended March 31, 2017, which could materially affect our business, financial condition or future results. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or operating results. If any of the risks actually occur, our business, financial conditions or results of operations could be negatively affected. In that case, the trading price of our stock could decline, and our stockholders may lose part or all of their investment.
