## **A Letter from the Chairman**

Dear Client:

The first half of 2004 brought mixed news for the global economy. In the United Kingdom, consumer and mortgage credit continued to grow at a brisk pace with minimal signs of inflation, as the jobless rate dropped further. Unemployment remained high in France and Germany, as signs of recovery were muted in mainland Europe. Fueled by exploding growth in China and India, many Asian economies performed well, led by Thailand, Singapore and Malaysia. Domestic oriented companies helped stimulate stronger than expected growth in Japan. European stock markets held up relatively well as Germany's DAX Index rose 2.21%, England's FTSE Index gained 1.85% and France's CAC 40 Index was up 7.25%. Asian stock markets were mixed, as Japan's Nikkei Average finished the period up 11.58%, while Hong Kong's Hang Seng Index was lower by 0.29%.

The United States economy turned in a solid performance during the first six months of 2004. First quarter GDP came in at 3.9% and growth for the full period is expected to be in the same range. The long-awaited growth in jobs finally began to occur during the first half of the year. After starting slowly, non-farm payroll gains averaged over 200,000 per month in the second quarter, persuading many that a traditional economic recovery was under way. Consumer spending remained strong, industrial production ramped up and business investment increased, while core producer prices came in slightly higher than expected. Core inflation also edged higher during the period, partially as a result of the voracious demand for raw materials from China and other recovering economies. These and other strong economic statistics caused many analysts to conclude that the Federal Reserve Board would need to raise interest rates sooner, rather than later, in order to head off a rapid rise in inflation. In late June, these concerns were realized, as the Federal Reserve Board raised its target for the federal funds rate by 0.25%, to 1.25%. Gas prices at the pump climbed to over \$2.00 a gallon, as oil prices rose significantly in the first quarter, then fell back slightly during the second quarter. Several analysts expressed concern that higher oil prices might dampen the surging domestic economy. U.S. securities markets finished the first six months of 2004 with small gains. The S&P 500® Index rose 3.44% and the Nasdaq Composite Index was higher by 2.22%. Bonds struggled as interest rates ticked higher. For the period, the Lehman Brothers Aggregate Bond Index managed a gain of only 0.15%.

For the first half of 2004, the Allmerica Securities Trust portfolio generated income supporting aggregate dividends of 27 cents per share.

On behalf of the Board of Trustees,

John P. Kavanaugh

Chairman of the Board

Allmerica Securities Trust

**Table of Contents****Allmerica Securities Trust**

The Allmerica Securities Trust returned (0.37)% for the first half of 2004, underperforming its benchmark, the Lehman Brothers U.S. Credit Index, which returned (0.27)%.

The markets started out the year with mixed-to-weak economic data, heightened questions about job growth and overhanging concerns about Iraq and terrorism. The anticipated economic rebound had not materialized, so the Federal Reserve Board was expected to remain accommodative with a 1.00% federal funds rate for at least several more months. However, when the March non-farm payrolls release showed that an additional 308,000 jobs had been created, the market sold off quickly. At their June meeting, the Federal Reserve Board raised its overnight federal funds rate by 25 basis points to 1.25%, confirming to the market that the Federal Reserve Board agreed that the economy was headed back on the right track.

The asset-backed securities sector performed best for the period, with an excess return of 53 basis points over U.S. Treasury securities. The mortgage-backed securities sector had an excess return of 36 basis points, while the Agency sector had an excess return of 10 basis points. The corporate sector underperformed U.S. Treasuries for the first six months, primarily as a result of a weak second quarter. The portfolio was almost fully invested in the corporate sector during the period, although during the second quarter, the investment manager reduced exposure slightly, investing the proceeds in U.S. Treasury securities. The reduction was primarily in those sectors that would be more negatively affected by rising interest rates: banks, finance and utilities. The investment manager plans to replace these U.S. Treasury securities with corporate bonds during the third quarter of 2004.

**Average Annual Total Returns**

	1 Year	5 Year	10 Year
Allmerica Securities Trust	(0.27)%	4.58%	6.52%
Lehman Brothers U.S. Credit Index	0.08%	7.54%	7.95%
Lipper Corporate Debt Funds BBB-Rated Average	1.06%	6.42%	7.10%

**Historical Performance**

	Total Return on Net Asset Value	Total Return on Market Value
1999	(1.42)%	(13.75)%
2000	6.76 %	23.76 %
2001	4.41 %	6.00 %
2002	5.54 %	2.11 %
2003	6.15 %	9.38 %
2004 (As of June 30)	(0.37)%	(6.56)%

*The Lehman Brothers U.S. Credit Index is an unmanaged index of all publicly issued, fixed-rate, non-convertible investment grade corporate debt. The Lipper Corporate Debt Funds BBB-Rated Average is a non-weighted index of funds within the Corporate Debt Funds BBB-Rated category.*

ALLMERICA SECURITIES TRUST

NOTES TO FINANCIAL STATEMENTS (Unaudited)

---

**1. ORGANIZATION**

Allmerica Securities Trust (the Trust ) was organized as a Massachusetts business trust on June 30, 1986, and is registered under the Investment Company Act of 1940, as amended, as a diversified, closed-end management investment company.

**2. SIGNIFICANT ACCOUNTING POLICIES**

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions at the date of the financial statements. Actual results could differ from those estimates.

The following is a summary of significant accounting policies followed by the Trust in the preparation of its financial statements:

**Security Valuation:** Corporate debt securities and debt securities of the U.S. Government and its agencies (other than short-term investments) are valued using an independent pricing service approved by the Board of Trustees which utilizes market quotations and transactions, quotations from dealers and various relationships among securities in determining value. If not valued by a pricing service, such securities are valued at prices obtained from independent brokers. Investments with prices that cannot be readily obtained are carried at fair value as determined in good faith under consistently applied procedures established by and under the supervision of the Board of Trustees. Short-term investments that mature in 60 days or less are valued at amortized cost. This method involves valuing a portfolio security initially at its cost and thereafter assuming a constant amortization to maturity of any discount or premium.

At June 30, 2004, one security with a value of \$234,348 or 0.3% of net assets was valued by management under the direction of the Board of Trustees.

**Security Transactions and Investment Income:** Security transactions are recorded as of the trade date. Realized gains and losses from security transactions are determined on the basis of identified cost. Interest income, including amortization of premium and accretion of discount on securities, is accrued daily. Income distributions earned by the Trust from investments in certain investment companies are recorded as interest income in the accompanying financial statements.

**Federal Taxes:** The Trust intends to continue to qualify as a regulated investment company under Subchapter M of the Internal Revenue Code of 1986, as amended. By so qualifying, the Trust will not be subject to Federal income taxes to the extent it distributes all of its taxable income and net realized gains, if any, for its fiscal year. In addition, by distributing during each calendar year substantially all of its net investment income, capital gains and certain other amounts, if any, the Trust will not be subject to Federal excise tax. Therefore, no Federal income tax provision is required.

**Distributions to Shareholders:** Dividends to shareholders resulting from net investment income are recorded on the ex-dividend date and paid quarterly. Net realized capital gains, if any, are distributed at least annually. Income and capital gains distributions are determined in accordance with income tax regulations. Differences between book basis and tax basis amounts are primarily due to differing book and tax treatments in both the timing of the recognition of losses deferred due to wash sales and differing treatments for the amortization of premium and market discount. Permanent book and tax basis differences relating to shareholder distributions will result in reclassifications to paid in capital. Permanent book-tax differences, if any, are not included in ending undistributed net investment income for the purpose of calculating net investment income per share in the Financial Highlights.

**Securities Lending:** The Trust, using Investors Bank & Trust Company ( IBT ) as its lending agent, may loan securities to brokers and dealers in exchange for negotiated lenders' fees. These fees are disclosed as Securities lending income in the Statement of Operations. The Trust receives collateral against the loaned securities which must be maintained at not less than 102% of the market value of the loaned securities during the period of the loan. Collateral received is generally

**NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)**

---

cash, and is invested in short term investments. Lending portfolio securities involves possible delays in receiving additional collateral or in the recovery of the securities or possible loss of rights in the collateral should the counterparty (borrower) not meet its obligations under the terms of the loan. Information regarding the value of the securities loaned and the value of the collateral at period end is included in a footnote at the end of the Trust's portfolio of investments.

**Expenses:** Most expenses of the Trust can be directly attributable to the Trust. Expenses which cannot be directly attributable to the Trust are allocated based upon relative net assets among the Trust and one other affiliated registered investment company, Allmerica Investment Trust (comprised of nine separate portfolios).

**3. INVESTMENT MANAGEMENT AND OTHER RELATED PARTY TRANSACTIONS**

Opus Investment Management, Inc. ( Opus ), a direct, wholly-owned subsidiary of Allmerica Financial Corporation ( Allmerica Financial ) serves as Investment Manager to the Trust. For these services, the Trust pays Opus an aggregate monthly compensation at the annual rate of (a) 3/10 of 1% of average net assets plus (b) 2 1/2% of the amount of interest income.

To the extent that normal operating expenses of the Trust, excluding taxes, interest, brokerage commissions and extraordinary expenses, but including the investment management fee, exceed 1.50% of the first \$30,000,000 of the Trust's average weekly net assets, and 1.00% of any excess of such value over \$30,000,000, Opus will bear such excess expenses.

IBT performs fund administration, custodian and fund accounting services for the Trust. IBT is entitled to receive a fee for these services, in addition to certain out-of-pocket expenses. Opus is solely responsible for the payment of the administration fee and the Trust pays the fees for the fund accounting and custodian services to IBT.

The Trust pays no salaries or compensation to any of its officers. Trustees who are not directors, officers or employees of the Trust or the Investment Manager are reimbursed for their travel expenses in attending meetings of the Trustees and receive fees for their services. Such amounts are paid by the Trust.

**4. SHARES OF BENEFICIAL INTEREST**

There are 10,000,000 shares of \$1.00 par value common stock authorized. At June 30, 2004, First Allmerica Financial Life Insurance Company, an indirect, wholly-owned subsidiary of Allmerica Financial, the Trustees and the officers of the Trust owned in the aggregate 125,232 shares of beneficial interest.

**5. RESTRICTED SECURITIES**

At June 30, 2004, the Trust owned the following restricted security constituting 0.3% of net assets, which may not be publicly sold without registration under the Securities Act of 1933. The Trust would bear the registration costs in connection with the disposition of restricted securities held in the portfolio. The Trust does not have the right to demand that such securities be registered. The value of restricted securities is determined by valuations supplied by a pricing service or brokers or, if not available, in good faith by or at the direction of the Board of Trustees. Additional information on the restricted security is as follows:

<u>Issuer</u>	<u>Date of Acquisition</u>	<u>Par Amount</u>	<u>Cost at Acquisition</u>	<u>Value</u>
Jones (Edward D.) & Co., LP	05/06/94	\$ 222,011	\$ 222,011	\$ 234,348

ALLMERICA SECURITIES TRUST

**REGULATORY DISCLOSURES (Unaudited)**

---

The performance data quoted represents past performance and the investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost.

This report is authorized for distribution to existing shareholders of Allmerica Securities Trust (the Trust).

During the most recent 12-month period ended June 30, the Trust did not vote proxies relating to its portfolio securities because the Trust invests exclusively in non-voting securities.

**SHAREHOLDER INFORMATION (Unaudited)**

---

**Automatic Dividend Investment Plan:** As a shareholder, you may participate in the Trust's Automatic Dividend Investment Plan. Under the plan, dividends and other distributions are automatically invested in additional full and fractional shares of the Trust to be held on deposit in your account. Such dividends and other distributions are invested at the net asset value if lower than market price plus brokerage commission or, if higher, at the market price plus brokerage commission. You will receive a statement after each payment date for a dividend or other distribution that will show the details of the transaction and the status of your account. You may terminate or rejoin at any time.

**Cash Investment Plan:** The cash investment plan provides a systematic, convenient and inexpensive means to increase your investment in the Trust by putting your cash to work. The plan permits you to invest amounts ranging from \$25 to \$1,000 in any one month to purchase additional shares of the Trust. Regular monthly investment is not required.

Your funds are consolidated with funds of other participants to purchase shares. Shares are purchased in bulk and you realize the commission savings. You pay only a service charge of \$1.00 per transaction and your proportionate share of the brokerage commission.

Your account will be credited with full and fractional shares purchased. Following each investment, you will receive a statement showing the details of the transaction and the current status of the account. The plan is voluntary and you may terminate at any time.

**Investment Manager:** Opus Investment Management, Inc.

**Portfolio Management:** All investment decisions for the Trust are made by an investment management team.

**Investment Objectives:** The Trust's primary investment objective is to provide a high rate of current income, with capital appreciation as a secondary objective.

(There is no guarantee that the Trust will achieve its investment objectives and an investor in the Trust could lose money.)

**Principal Investment Policies:** The Trust seeks to achieve its objectives by investing in various types of fixed income securities with an emphasis on corporate debt obligations. Examples of the types of securities in which the Trust invests are corporate bonds, notes and debentures; mortgage-backed and asset-backed securities; obligations issued or guaranteed by the U.S. Government, its agencies and instrumentalities; and money market instruments. The Trust may invest up to 30% of its assets in high yield securities or junk bonds rated below investment grade but at least B- or higher by Moody's Investors Services or Standard & Poor's Rating Services or similar rating organizations, and in unrated securities determined by the Investment Manager to be of comparable quality. The Trust may invest up to 25% of its assets in U.S. dollar denominated foreign debt securities. The Trust may invest in securities with relatively long maturities as well as securities with shorter maturities.

Securities issued by some U.S. Government-sponsored entities, such as the Federal Home Loan Mortgage Corporation (Freddie Mac) and the Federal National Mortgage Association (Fannie Mae), are not backed by the full faith and credit of the U.S. Government. No assurances can be given that the U.S. Government would provide financial support to a U.S. Government-sponsored instrumentality if not obligated to do so.

*Principal Risks of investing in the Trust:*

Company Risk means that investments in a company often fluctuate based on factors such as earnings, changes in management or products or potential for takeovers or acquisition.

Credit Risk is the risk that a fixed income security will not be able to pay interest and principal. Junk bonds, for example, have a high level of credit risk.

Foreign Investment Risk involves risks relating to political, social and economic developments abroad.

Interest Rate Risk means that, when interest rates rise, the prices of fixed income securities will generally fall and, when interest rates fall, the prices of fixed income securities will generally rise.

Investment Management Risk is the risk that a fund does not achieve its investment objective despite the investment strategies used by the investment managers.

Liquidity Risk is the risk that a fund will not be able to sell a security at a reasonable price because the security is not traded on a regular basis.

Market Risk is the risk that the price of a security will fall due to changes in economic, political or market conditions.

Prepayment Risk means that a fund may lose future interest income when a decline in interest rates causes homeowners to prepay their mortgage loans.
