Notes to Condensed Consolidated Financial Statements

(In Thousands, Except Share and Per Share Data)

1. Basis of Presentation

The condensed consolidated financial statements include the accounts of Symmetry Medical, Inc. and its wholly-owned subsidiaries (collectively referred to as the Corporation), Symmetry Medical USA Inc., Jet Engineering, Inc., Ultrex, Inc., Othy Limited, Poly-Vac S.A. and Mettis (UK) Limited, including its wholly-owned subsidiary, Thornton Precision Components Limited. The Corporation is a global supplier of integrated products and services consisting primarily of surgical implants, instruments and cases to orthopedic and other medical device companies.

The condensed consolidated financial statements of the Corporation have been prepared without audit, pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted pursuant to such rules and regulations. In the opinion of management, the accompanying condensed consolidated financial statements contain all material adjustments (consisting only of normal recurring adjustments) necessary to present fairly the consolidated financial position of the Company, its results of operations and cash flows. Interim results are not necessarily indicative of results for a full year. The condensed consolidated financial statements included herein should be read in conjunction with the consolidated financial statements and the notes thereto included in the Company's 2004 Annual Report on Form 10-K.

Certain prior year amounts have been reclassified to conform to the current-year presentation. These reclassifications had no impact on our results of operations or financial position.

The Corporation's year end is the 52 or 53 week period ending the Saturday closest to December 31. Fiscal year 2005 and 2004 are 52 week years. As such, quarters are 13 weeks long ending the Saturday closest to March 31, June 30, or September 30. References in these consolidated financial statements to the three months ended refer to these financial periods, respectively.

2. Inventories

Inventories consist of the following:

Table of Contents**3. Property and Equipment**

Property and equipment, including depreciable lives, consists of the following:

	April 2, 2005	January 1, 2005
Land	\$ 1,327	\$ 1,337
Buildings and improvements (20 to 40 years)	22,380	22,117

Less accumulated depreciation	36,985	35,141
	<u>\$ 77,230</u>	<u>\$ 71,854</u>

4. Intangible Assets

Intangible assets subject to amortization consist of technology and customer related intangible assets acquired in connection with our acquisition of Mettis (UK) Limited on June 11, 2003. These assets (\$13,286 at April 2, 2005 and \$13,482 at January 1, 2005) are being amortized using the straight-line method over 9 to 25 years. The Corporation has \$3,813 and \$3,845 of indefinite lived intangible assets at April 2, 2005 and January 1, 2005, respectively.

5. New Accounting Pronouncements

On December 16, 2004, the FASB issued Statement No. 123 (revised 2004), Share-Based Payment, which is a revision of FASB Statement No. 123, Accounting for Stock Based Compensation. Statement 123(R) supersedes APB Opinion No. 25, Accounting for Stock Issued to Employees, and amends FASB Statement No. 95, Statement of Cash Flows. Generally, the approach in Statement 123(R) is similar to the approach described in Statement 123. However, Statement 123(R) requires all share-based payments to employees, including grants of employee stock options, to be recognized in the income statement based on their fair values. Pro forma disclosure is no longer an alternative.

Statement 123(R) is effective for fiscal years beginning after July 1, 2005. We expect to adopt Statement 123(R) using the modified prospective method in which compensation cost is recognized beginning with the effective date based on the requirements of Statement 123(R) for all share-based payments granted after the effective date and based on the requirements of Statement 123 for all awards granted to employees prior to the effective date of Statement 123(R) that remain unvested on the effective date.

Edgar Filing: Symmetry Medical Inc. - Form 10-Q

As permitted by Statement 123, the Corporation currently accounts for share-based payments to employees using Opinion 25's intrinsic value method and, as such, generally recognizes no compensation cost for employee stock options. Accordingly, the adoption of Statement 123(R)'s fair value method will have a significant impact on the Corporation's results of operations, although it will have no impact on its overall financial position. The total impact of adoption of Statement 123(R) cannot be predicted at this time because it will depend on levels of share-based payments granted in the future. However, had the Corporation adopted Statement 123(R) in prior periods, the impact of that standard would have approximated the impact of Statement 123 as described in the disclosure of pro forma net income and earnings per share in Note 6 to the condensed consolidated financial statements. Statement 123(R) also requires the benefits of tax deductions in excess of recognized compensation cost to be reported as a financing cash flow, rather than as an operating cash flow as required under current literature. This requirement will reduce net operating cash flows and increase net financing cash flows in periods after adoption.

Table of Contents**6. Stock-Based Compensation**

The Corporation has elected to follow APB No. 25, Accounting for Stock Issued to Employees, in accounting for its stock options and; accordingly, no compensation cost has been recognized for stock options in the consolidated financial statements. However, SFAS 123, Accounting for Stock-Based Compensation, as amended by SFAS No. 148, Accounting for Stock-Based Compensation-Transition and Disclosure, requires pro forma presentation as if compensation costs had been expensed under the fair value method of SFAS No. 123. For purposes of pro forma disclosure, the estimated fair value of the options at the date of grant is amortized to expense over the vesting period.

The following table illustrates the effect on net income as if compensation expense had been recognized for the years ended:

	April 2, 2005	April 3, 2004

7. Segment Reporting

The Corporation primarily designs, develops and manufactures implants and related surgical instruments and cases for orthopedic device companies and companies in other medical device markets such as dental, osteobiologic and endoscopy. The Corporation also has a special services business serving primarily aerospace customers, which does not meet the quantitative disclosure requirements of SFAS 131. The Corporation manages its business and operates in a single reportable business segment. Because of the similar economic characteristics of the operations, including the nature of the products, comparable level of FDA regulations, same or similar customers, those operations have been aggregated following the provisions of SFAS 131 for segment reporting purposes.

Table of Contents

The Corporation is a multi-national corporation with operations in the United States, the United Kingdom and France. As a result, the Corporation's financial results can be impacted by currency exchange rates in the foreign markets in which the Corporation sells its products. While exposure to variability in foreign currency exists, the Corporation does not believe it is significant to its operations and any variability is somewhat offset through the location of its manufacturing facilities. Revenue is attributed to geographic locations based on the location to which we ship our products.

Concentration of Credit Risk:

A substantial portion of the Corporation's revenue is derived from a limited number of customers. The Corporation's revenue includes revenue from customers of the Corporation which individually account for 10% or more of revenue as follows:

Quarter ended April 2, 2005 Three customers representing approximately 29%, 14% and 14% of revenue, respectively.

Quarter ended April 3, 2004 Four customers representing approximately 22%, 15%, 14% and 12% of revenue, respectively.

Following is a summary of the composition by product category of the Corporation's revenue to external customers. Revenue of the specialty services business is included in the other category.

9. Commitments and Contingencies

The Corporation is involved, from time to time, in various contractual, product liability, patent (or intellectual property) and other claims and disputes incidental to its business. Currently, there is no environmental or other litigation pending or, to the knowledge of the Corporation, threatened, that the Corporation expects to have a material adverse effect on its financial condition, results of operations or liquidity. While litigation is subject to uncertainties and the outcome of litigated matters is not predictable with assurance, the Corporation currently believes that the disposition of all pending or, to the knowledge of the Corporation threatened, claims and disputes, individually or in the aggregate, should not have a material adverse effect on the Corporation's consolidated and combined financial condition, results of operations or liquidity.

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF RESULTS OF OPERATIONS AND FINANCIAL CONDITION****Overview**

The Corporation is the world's largest independent provider of implants and related instruments and cases to orthopedic device manufacturers. The Corporation also designs, develops and produces these products for companies in other segments of the medical device market, including dental, osteobiologic and endoscopy sectors, and provides limited specialized products and services to non-healthcare markets.

The Corporation offers its customers Total Solutions for complete implant systems—implants, instruments and cases. While the Corporation's revenue to date has been derived primarily from the sale of implants, instruments and cases separately, or instruments and cases together, its ability to provide Total Solutions for complete implant systems has already proven to be attractive to its customers and the Corporation expects this capability will provide it with growth opportunities. In addition, the Corporation expects that its Total Solutions capability will increase the relative percentage of value added products that it supplies to its customers.

The Corporation's 2004 Annual Report on Form 10-K provides additional information about the Corporation's business, operations and financial condition.

Results of Operations**First Quarter 2005 Compared to First Quarter 2004**

Revenue. Revenue increased \$17.9 million, or 39.1%, to \$63.8 million in the first quarter of fiscal 2005 from \$45.8 million in the first quarter of fiscal 2004. Revenue for each of the Corporation's principal product categories in these periods was as follows:

<u>Product Category</u>	<u>Three Months Ended</u>	
	<u>April 2,</u>	<u>April 3,</u>
	<u>2005</u>	<u>2004</u>
	<u>(in millions)</u>	
Implants	\$ 23.0	\$ 17.0
Instruments	23.4	14.7
Cases	13.8	10.6
Non-healthcare and other	3.6	3.5
Total	\$ 63.8	\$ 45.8

Edgar Filing: Symmetry Medical Inc. - Form 10-Q

The \$17.9 million increase in revenue resulted from increased implant, instrument, case, and non-healthcare/other sales of \$5.9 million, \$8.6 million, \$3.3 million, and \$0.1 million, respectively, as a result of increased demand from customers due primarily to continued industry growth, their launches of new systems and an increase in the Corporation's market share.

Gross Profit. Gross profit increased \$6.8 million, or 54.1%, to \$19.4 million in the first quarter of fiscal 2005 from \$12.6 million in the first quarter of fiscal 2004. This increase in gross profit resulted from increased revenues and improved leveraging of fixed costs. As a percentage of revenue, gross profit was 30.4% in the first quarter of fiscal 2005 compared to 27.5% in the first quarter of fiscal 2004.

Table of Contents

Selling, General and Administrative Expenses. Selling, general and administrative expenses increased \$1.5 million, or 26.4%, to \$6.9 million in the first quarter of fiscal 2005 from \$5.5 million in the first quarter of fiscal 2004. This increase in expenses primarily resulted from increases in costs associated with the increase in revenue. As a percentage of revenue, selling, general and administrative expenses declined to 10.9% of revenue in the first quarter of fiscal 2005 from 12.0% of revenue in the first quarter of fiscal 2004. This 1.1% decrease as a percentage of revenue was attributable to controlled spending combined with a 39.1% increase in revenue.

Interest Expense. Interest expense decreased \$2.6 million, or 73.5%, to \$0.9 million in the first quarter of fiscal 2005 from \$3.5 million in the first quarter of fiscal 2004. This decrease primarily reflects the decrease in senior and subordinated debt that resulted from the proceeds of the Corporation's initial public offering of its common stock in the fourth quarter of 2004.

Provision for Income Taxes. The Corporation's effective tax rate was 33.9% in the first quarter of fiscal 2005 as compared to 34.3% in the first quarter of fiscal 2004. The decrease was primarily due to tax rate differentials in certain jurisdictions. Provision for income taxes increased by \$2.8 million, or 240.8%, to \$3.9 million in the first quarter of fiscal 2005 from \$1.2 million in the first quarter of fiscal 2004, due primarily to higher pre-tax earnings.

Preferred Stock Dividends. There were no preferred stock dividends in the first quarter of fiscal 2005 as compared to preferred stock dividends of \$2.3 million in the first quarter of fiscal 2004. This was due to the repurchase or reclassification as common stock of all of the Corporation's outstanding preferred stock in the fourth quarter of fiscal 2004 in connection with the Corporation's initial public offering.

Liquidity and Capital Resources

The Corporation's principal source of cash in the first quarter of fiscal 2005 was primarily cash generated from operations and borrowings under the Corporation's revolving credit facility. Principal uses of cash in the first quarter of fiscal 2005 included the financing of working capital, capital expenditures and debt service. The Corporation expects that its principal uses of cash in the future will be to finance working capital, capital expenditures and to service debt.

The Corporation generated cash from operations of \$5.4 million in the first quarter of fiscal 2005 compared to \$0.1 million in the first quarter of fiscal 2004. This increase is primarily the result of a \$5.3 million increase in net income, adjusted for non-cash items, including depreciation expense, deferred income tax provision and the interest rate swap valuation. Working capital increased \$5.1 million in the first quarter of fiscal 2005, consistent with the \$5.1 million increase in the first quarter of fiscal 2004. Increases in working capital are in line with the Corporation's quarter over quarter growth in revenue.

Capital Expenditures

Capital expenditures totaled \$8.9 million in the first quarter of fiscal 2005, compared to \$4.3 million in the first quarter of fiscal 2004, and were primarily used to expand and enhance production capacity in most of the Corporation's manufacturing facilities.

Debt and Credit Facilities

In connection with the Corporation's initial public offering of its common stock in the fourth quarter of fiscal 2004, it entered into a \$75.0 million senior secured credit facility, consisting of a \$35.0 million five-year term loan and a \$40.0 million five-year revolving credit facility.

As of April 2, 2005, the Corporation had an aggregate of \$50.2 million of outstanding indebtedness, which consisted of the following:

\$4.9 million of revolving credit borrowings and an aggregate of \$31.5 million of term loan borrowings under its senior credit facility;
and

\$13.8 million of capital lease obligations.

Table of Contents

The Corporation's senior credit agreement contains various financial covenants, including covenants requiring a maximum total debt to EBITDA ratio, minimum EBITDA to interest ratio and a minimum EBITDA to fixed charges ratio. The Corporation was in compliance with its financial and restrictive covenants under the senior credit facility as of April 2, 2005.

The Corporation believes that cash flow from operating activities and borrowings under its senior credit facility will be sufficient to fund currently anticipated working capital, planned capital spending and debt service requirements for the foreseeable future, including at least the next twelve months. The Corporation regularly reviews acquisitions and other strategic opportunities, which may require additional debt or equity financing. The Corporation currently does not have any pending agreements to consummate any acquisition or other strategic opportunity.

Off-Balance Sheet Arrangements

The Corporation's off-balance sheet arrangements include the Corporation's operating leases and letters of credit. There have been no material changes from the information provided in the Company's Annual Report on Form 10-K for the year ended January 1, 2005. The Corporation had no letters of credit outstanding as of April 2, 2005.

Environmental

There have been no material changes from the information provided in the Corporation's Annual Report on Form 10-K for the year ended January 1, 2005.

Critical Accounting Policies and Estimates

The preparation of the Corporation's financial statements requires management to make estimates, judgments and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses during the periods presented. The Corporation's Annual Report on Form 10-K for the year ended January 1, 2005 includes a summary of the critical accounting policies the Corporation believes are the most important to aid in understanding its financial results. There have been no material changes to these critical accounting policies that impacted the Corporation's reported amounts of assets, liabilities, revenues or expenses during the first quarter of fiscal 2005.

Cautionary Notice Regarding Forward-Looking Statements

Certain statements contained in this Quarterly Report on Form 10-Q and other written and oral statements made from time to time by the Corporation do not relate strictly to historical or current facts. As such they are considered forward-looking statements that provide current expectations or forecasts of future events. Forward-looking statements typically are identified by the use of terms such as may, will, should, expect, anticipate, believe, could, estimate, intend and similar words, although some forward-looking statements are expressed differently. Factors that could cause the Corporation's actual results to differ materially from the expectations expressed in our forward-looking statements include, but are not limited to, the following: changes in general economic conditions in the United States and Europe; our ability to retain existing customers and attract new customers; the competitive nature of the orthopedic device market; the pursuit of strategic acquisitions or
