COACH INDUSTRIES GROUP, INC.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS

For the Three Months Ended March 31, 2005 and 2004

1. Background

Summary

Coach Industries Group, Inc. (Coach or the Company) is a holding company which, through its subsidiaries, manufactures specialty vehicles for commercial fleet operators and offers an array of financial services and insurance products to commercial fleet operators and independent contractors in the courier industry.

Coach owns four wholly owned subsidiaries that operate in two business segments: financial services to commercial fleet operators and third party contract rights management for commercial fleet operators; and manufacturing specialty vehicles. Commercial Transportation Manufacturing Corporation (CTMC) and Springfield Coach Industries Corporation, Inc. (SCB) manufacture specialty vehicles, such as limousine buses, Lincoln Town Car limousines and Ford Excursion limousines. Coach Financial Services (CFS) offers financial services to CDS, SCB and CTMC customers and other commercial fleet operators. Corporate Development Services, Inc. (CDS) provides the services of independent contractors, subcontractor settlement processing and specialty insurance products to commercial fleet operators.

The Company's long-term strategy is to offer and expand its financial services to commercial fleet operators, specifically the 7,000 courier companies and the 16,000 limousine operators, throughout the United States. The Company will actively pursue acquisition candidates that can support the expansion of these products and financial services.

Financial Services

Coach offers an array of financial services and products in the commercial fleet industry. CFS offers financial services to CDS, SCB and CTMC customers and other commercial fleet operators. CFS targets small to mid-size business and professionals. The Company plans to offer an array of financial products, including financing for luxury limousines, commercial fleets and high-end automobiles and specialty lines of insurance products. CFS provides various leases, including commercial motor vehicle leases, equipment leases and retail installment loans to commercial customers who purchase vehicles from SCB or CTMC and from non SCB/CTMC customers.

CDS provides the services of independent contractors, subcontractor settlement processing and specialty insurance products to commercial fleet operators. CDS is one of three entities providing independent contractors to the commercial fleet industry. CDS provides services that insulate

Edgar Filing: COACH INDUSTRIES GROUP INC - Form 10QSB

the commercial fleet operator from workplace concerns relating to employment by creating an independent operator status for the individual drivers. CDS provides specialty insurance products to these drivers, as well as health benefits and other insurance products they require through various relationships with independent brokers. The Company currently provides its products to approximately 5,700 drivers and 250 courier companies.

Manufacturing

CTMC's operation consists of manufacturing, selling and servicing specialty vehicles, limousine buses and to a lesser extent, Lincoln Town Cars. CTMC manufactures its vehicles pursuant to a Quality Vehicle Modifier Agreement with Ford Motor Company. The facility was relocated to Springfield, Missouri during 2004.

SCB manufactures its vehicles pursuant to a Quality Vehicle Modifier Agreement with Ford Motor Company and a Cadillac Master CoachBuilder Agreement with General Motors Corporation. SCB's operations consist of manufacturing, selling and servicing Lincoln Town Cars and Ford Excursions Limousines. The operations is housed in a 45,000 square foot manufacturing facility with approximately 60 employees involved in the direct manufacture of the modified chassis for the combined facilities of CTMC and SCB.

Table of Contents

SCB acquired certain assets and liabilities of Springfield Coach Builders, Inc., effective December 31, 2003 and at that time determined that the production of the various vehicles needed to be segregated to eliminate any duplication of production processes at both facilities. CTMC personnel have extensive depth of knowledge in prototype development, modification and engineering of specialty vehicles, such as the Chrysler Sprinter and the General Motors Hummer H2. In January 2004, the Company made a strategic decision to focus SCB on manufacturing the Lincoln Town Car limousines and the Ford Excursion limousines and for CTMC to focus on specialty vehicles and limousine buses. Based on these manufacturing changes and focus CTMC on specialty vehicles, the Company, intends to expend \$500,000 on research and development during the next twelve months. The Company has expended \$106,050 on research and development for the three months ended March 31, 2005, compared to \$747,665 expended for the three months ended March 31, 2004.

Specialty Vehicle Manufacturing

Edgar Filing: COACH INDUSTRIES GROUP INC - Form 10QSB

The limousine industry consists of the manufacturing of modified chassis, both through manufacturer supported programs, such as through QVM and CMC agreements, as well as non-conforming, non-manufacturer supported chassis modifications. The chassis is purchased from the manufacturer under a manufacturer supported program and modified based on the specifications provided and monitored by the manufacturer. The modification manufacturer may provide some changes to the design and aesthetics of the product, but not the engineering of the product. The manufacturer closely monitors and reviews the performance of all those modification manufacturers in their programs. In addition, there are those vehicles that are not supported by the manufacturer. These vehicles are manufactured based on the customer specifications or the marketplace. These vehicles do not receive the same warranty from the manufacturer, thus require additional support by the modification manufacturer.

Once a vehicle is manufactured, it is typically sold to one of approximately 16,000 limousine operators. These operators utilize these vehicles to provide livery service. The livery service provides drivers and short-term rentals for airport shuttle service, weddings, business travel, proms, funerals and various other special occasions.

Table of Contents

Based on the Limousine and Chauffeured Transportation Industry statistic, the limousine manufacturing industry generates approximately \$400 million in annual revenues through the sale of luxury limousines, specialty vehicles and limousine buses to approximately 16,000 limousine operators located throughout the United States. These limousine operators are located in the following regions of the United States: 59% in the Northeast, 16% in the Southeast, 11% in the Midwest and 14% in the West.

Courier Industry

The courier industry consists of approximately 7,200 same day, messenger and expedited courier with about 562,000 couriers in the field. Approximately 400,000 of those couriers are independent contractors. The couriers utilize some form of transportation to provide their service: 3% by bicycle; 34% by small cars; 48% by pick-up trucks or vans; 13% by small or large trucks and 1% by foot.

Financial Services

The financial services business consists of savings and loans, banks, leasing companies, insurance companies, insurance brokers and other providers of financial services. The industry is highly competitive and the rates charged by the competition may be lower than those rates that we may be able to charge because our cost of funds and overhead costs are higher than these other companies. We intend to offer our services primarily to businesses in our niche markets. These businesses are largely under-served by the financial community. We will offer various services to our drivers and purchasers of our vehicles that will differentiate us from our competition. By doing so, we believe that we can make our services less sensitive to rate and more focused on the service aspect of the business.

Once we begin offering insurance products to our drivers and purchases of our vehicles, we will be competing with other insurance carriers, insurance companies and brokers that may have additional products and services that we do not provide and their products and services may be at lower costs than ours, due to a lower cost structure and additional industry experience rate.

Liquidity and Capital Resources

In January 2004, the Company made a strategic decision to focus SCB on manufacturing the Lincoln Town Car limousines and the Ford Excursion limousines and for CTMC to focus on specialty vehicles and limousine buses. This acquisition enables us to offer an array of financial products, including financing for luxury limousines, commercial fleets and high-end automobiles as well as other financial services, such as specialty lines of insurance products. CFS provides various leases, including commercial motor vehicle leases, equipment leases and retail installment loans to commercial customers who purchase vehicles from Coach as well as other operators purchasing vehicles from competitors. CFS primarily lends to small to mid-size business and professionals.
