Item 8.01. Other Events.

Registrant received notice that its 1996 - 1998 Internal Revenue Service (IRS) audit is final.

As a result Registrant will record a second quarter 2005 net income benefit of approximately \$330 million. Approximately \$250 million of the total \$330 million after tax benefit is the result of a 2002 change in tax law that allowed Registrant to recognize a benefit for capital losses associated with the disposition of its insurance group operations. The remaining \$80 million net income benefit is related to the favorable resolution of certain other tax matters from the 1996 - 1998 IRS audit. The benefit will not result in a significant cash refund. This claim of additional losses and related tax benefits required review by the U.S. Joint Committee on Taxation, which was completed on June 27, 2005.

Registrant expects that the net income benefit will be partially offset by charges associated with new restructuring actions and other cost-saving initiatives totaling approximately \$200 million after tax. The restructuring actions are primarily related to headcount reductions across all geographies and segments. Of the \$200 million, Registrant expects \$140 million will be charged to net income in the second quarter. The remaining \$60 million will be charged to net income in the second half of 2005.

The net result of the tax benefit and restructuring actions will be an increase in second quarter net income of \$190 million and an increase in full year net income of \$130 million.

The two matters discussed above are not reflected in Registrant's previously issued earnings guidance. Apart from the matters addressed in this Form 8-K filing, Registrant is not updating or reaffirming its previously issued earnings guidance. On or about July 25, 2005 Registrant plans to release its second quarter 2005 earnings and will update earnings guidance for the remainder of the year at that time.
