- A Treasury Inflation-Protected Security Treasury security whose principal value is adjusted daily in accordance with changes to the Consumer Price Index for All Urban Consumers. Interest is calculated on the basis of the current adjusted principal value
- B All or a portion of this security is collateral to cover futures and options contracts written.
- C All or a portion of this security is on loan.
- D Private Placement
- E Indexed Security The rates of interest earned on these securities are tied to the London Interbank Offered Rate (LIBOR), the Consumer Price Index (CPI), or the one-year Treasury Bill Rate. The coupon rates are the rates as of March 31, 2007.
- F Illiquid security valued at fair value under the procedures approved by the Board of Directors.
- G Yankee Bond A dollar-denominated bond issued in the U.S. by foreign entities.
- H Rule 144a Security A security purchased pursuant to Rule 144a under the Securities Act of 1933 which may not be resold subject to that rule except to qualified institutional buyers. These securities, which the Fund's investment adviser has determined to be liquid, represent 5.16% of net assets.
- I Stepped Coupon Security A security with a predetermined schedule of interest or dividend rate changes at which time it begins to accrue interest or pay dividends according to the predetermined schedule.
- J Options and futures are described in more detail in the notes to financial statements.

Security Valuation

The Fund's securities are valued on the basis of readily available market quotations or, lacking such quotations, at fair value as determined under policies approved by and under the general oversight of the Board of Trustees. In determining fair value, all relevant qualitative and quantitative factors available are considered. These factors are subject to change over time and are reviewed periodically. The Fund may use fair value pricing instead of market quotations to value one or more securities if the Fund believes that, because of special circumstances, doing so would more accurately reflect the prices the Fund expects to realize on the current sale of those securities. Further, because of the inherent uncertainty of valuation, those estimated values may differ significantly from quoted or published values or from the values that would have been used had a ready market for the investments existed, and the differences could be material.

With respect to the Fund, where a security is traded on more than one market, which may include foreign markets, the securities are generally valued on the market considered by the Fund's adviser to be the primary market. The Fund will value its foreign securities in U.S. dollars on the basis of the then-prevailing exchange rates.

Securities Lending

The Fund may lend its securities to approved brokers to earn additional income, and will receive cash and U.S. government securities as collateral against the loans. Cash collateral received is invested in a money market pooled account by the Fund's lending agent. Collateral is maintained over the life of the loan in an amount not less than 100% of the value of the loaned securities. At March 31, 2007, the market value of the securities on loan to broker-dealers was \$43,216 for which the fund received collateral of \$44,130 in cash. Such collateral is in the possession of the Fund's custodian. The cash was invested in the State Street Navigator Securities Lending Prime Portfolio and is included in the Fund's portfolio of investments. As with other extensions of credit, the Fund may bear the risk of delay in recovery or even loss of rights to the collateral should the borrower of the securities fail financially.

Options, Futures and Swap Agreements

The current market value of an exchange traded option is the last sale price or, in the absence of a sale, the price obtained by reference to broker-dealer quotations. Futures contracts are valued daily at the settlement price established by the board of trade or exchange on which they are traded. Futures contracts are marked-to-market on a daily basis. As the contract's value fluctuates, payments known as variation margin are made or received by the Fund each day, depending on the daily fluctuation in the value of the contract. The daily changes in contract value are recorded as unrealized gains or losses, and the Fund recognizes a gain or loss when the contract is closed. Swap agreements are generally priced daily based upon quotations from brokers and the change, if any, is recorded as unrealized appreciation or depreciation.

The following is a summary of open credit default swap contracts outstanding at March 31, 2007:

Agreement With:	Termination Date	The Fund Agrees to Pay	The Fund Will Receive	Contract Notional Amount (Depreciation)	Unrealized Appreciation/ Depreciation
Barclays Capital Inc. (CDX HVOL 7)	March 20, 2011	Specified amount upon credit event notice ^A	0.75% Quarterly	\$ 17,000	\$ 29
