MINERA ANDES ANNOUNCES THIRD QUARTER GOLD/SILVER**SALES AT THE SAN JOSE MINE TOTAL \$18.5 MILLION****FIRST PHASE OF EXPANSION COMPLETED**

SPOKANE, WA November 11, 2008 Minera Andes Inc. (TSX: MAI and US OTC: MNEAF) is pleased to announce details of the San José mine performance to September 30, 2008. The San José project is operated by Minera Santa Cruz S.A. (MSC) and is owned 49% by Minera Andes and 51% by Hochschild Mining plc (Hochschild) (HOCM.L: Reuters and HOC LN: Bloomberg - London Stock Exchange). Hochschild is the operator of the project. Gross proceeds from metal sales during the third quarter of 2008 were \$18.5 million.

Production at the San José mine in Q3 2008 totaled 990,000 ounces of silver and 12,340 ounces of gold, of which 49% is attributable to Minera Andes. Mill throughput increased 11.5% compared to the previous quarter, but silver production was 9.4% lower and gold production was 0.6% lower than the previous quarter due to lower head grades.

SAN JOSE MINE PRODUCTION

	Q3	Q2	Q1
	2008	2008	2008
Production *			
Ore production (metric tons)	67,589	60,603	59,897
Average head grade silver (g/t)	547	681	624
Average head grade gold (g/t)	6.78	7.56	7.10
Silver produced (ounces)	990,000	1,093,000	968,000
Gold produced (ounces)	12,340	12,410	12,140
Net silver sold (ounces)*	846,000	2,284,400	323,000
Net gold sold (ounces)*	9,760	28,980	5,050

*** The company has a 49% interest in the San José production.**

Third quarter 2008 sales of gold and silver are lower than Q2 because an inventory build of metal produced in 4Q 2007 and 1Q 2008 gave the second quarter higher than normal sales. In addition, another build up of metal inventory has occurred in Q3 due to a smelting furnace being temporarily down. The metal in inventory is forecast to be sold in Q4 of 2008. The average realized market prices in 3Q 2008 were 4.5% lower for Au and 25% lower for Ag than in 2Q 2008. Prices for sales of metal in Q3 2008 on an average weighted basis were \$861 per ounce of gold and \$12.37 per ounce of silver.

Phase I of the expansion has been completed, consisting of an increase in the mining and processing capacity from 750 metric ton per day to 1,500 metric ton per day. Mine production will ramp up to full capacity over the next few months. Currently, approximately 40% of the ore fed to the expanded plant is being processed to produce doré bars and approximately 60% is being processed to produce concentrates. Phase II of the expansion involves connecting to the regional electrical grid which is estimated to be completed in Q1 2009. Meanwhile, there is sufficient diesel generating capacity at the mine to run the mill at its full capacity. Phase III of the mine expansion involves further expansion of the refining circuit at the processing facility to convert all the concentrate produced at the mine to doré which is expected to be completed by mid 2009, which will reduce working capital requirements and selling discounts and receive a lower tax treatment.

Allen Ambrose, president of Minera Andes said, "The San José project now has cash flow that is being used to pay for the expansion of the mine, refining circuit, and for the connection to the regional power grid. Remaining funds will be used to begin repayment of the joint venture project debt."

The San José mine now comprises 18 km of underground workings accessed by ramps on the Huevos Verdes, Freya and Kospi veins. During 2008 to date, 4,095 meters of workings were completed on the Huevos Verdes, Freya, and Kospi veins. The mine is currently staffed with 724 employees and over 230 contractors.

Caution Concerning Forward-Looking Statements:

This press release contains certain forward-looking statements, including, but not limited to, the statements regarding the Company's strategic plans, evolution of mineral resources and reserves, work programs, development plans and exploration budgets at the Company's San José Project. The forward-looking statements express, as at the date of this press release, the Company's plans, estimates, forecasts, projections, expectations or beliefs as to future events and results. Forward-looking statements involve a number of risks and uncertainties, and there can be no assurance that such statements will prove to be accurate. Therefore, actual results and future events could differ materially from those anticipated in such statements. In particular, there can be no assurance that production capacity at the San José mine will be successfully increased, that resources and reserves at the San José mine will be increased. Risks and uncertainties that could cause results or future events to differ materially from current expectations expressed or implied by the forward-looking statements include, but are not limited to, factors associated with fluctuations in the market price of precious metals, mining industry risks, risks associated with foreign operations, the state of the capital markets, environmental risks and hazards, uncertainty as to calculation of mineral reserves and other risks. We refer readers to the risk factors and uncertainties described in the Company's continuous disclosure record, a copy of which is available under the Company's profile at www.sedar.com. Minera Andes' joint venture partner, a subsidiary of Hochschild Mining plc, and its affiliates do not accept responsibility for the use of project data or the adequacy or accuracy of this release.

Cautionary Note to U.S. Investors:

The United States Securities and Exchange Commission (the SEC) permits mining companies, in their filings with the SEC, to disclose only those mineral deposits with mineral reserves that a company can economically and legally extract or produce. We use certain terms in this press release, such as mineral resources, that the SEC guidelines strictly prohibit us from including in our filings with the SEC, because these terms are common usage in Canada and form part of our Canadian filing requirements.
