NOTES TO SCHEDULE OF INVESTMENTS

September 30, 2008
(Unaudited)

NOTE 1 -- SIGNIFICANT ACCOUNTING POLICIES

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-Q

The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of its Schedules of Investments. The preparation of Schedules of Investments in conformity with accounting principals generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosure of contingent assets and liabilities at the date of the Schedules of Investments. Actual results could differ from those estimates.

A. Security Valuation:

Equity securities are valued at the official closing price (typically last sale) on the exchange on which the securities are primarily traded, or if no closing price is available, at the last bid price.

Debt securities are valued on the basis of broker quotations or valuations provided by a pricing service, which utilizes information with respect to recent sales, market transactions in comparable securities, quotations from dealers, and various relationships between securities in determining value. Due to excessive volatility in the current market (please see note on Market Conditions -- Note 2), valuations developed through pricing techniques may materially vary from the actual amounts realized upon sale of the securities.

As required, some securities and other assets may be valued at fair value as determined in good faith by or under the direction of the Directors.

Certain foreign common stocks may be fair valued in cases where closing prices are not readily available or are deemed not reflective of readily available market prices. For example, significant events (such as movement in the U.S. securities market, or other regional and local developments) may occur between the time that foreign markets close (where the security is principally traded) and the time that the Fund calculates its net asset value (generally, the close of the NYSE) that may impact the value of securities traded in these foreign markets. In these cases, information from an external vendor may be utilized to adjust closing market prices of certain foreign common stocks to reflect their fair value. Because the frequency of significant events is not predictable, fair valuation of certain foreign common stocks may occur on a frequent basis.

Short-term investments having a remaining maturity of 60 days or less are valued at amortized cost, which approximates market.

The Fund has adopted the provisions of the Statement of Financial Accounting Standards No. 157 ("SFAS 157") as of the beginning of the current fiscal period of the Fund. This standard clarifies the definition of fair value for financial reporting, establishes a framework for measuring fair value and requires additional disclosures about the use of fair value measurements. To increase consistency and

5

comparability in fair value measurements and related disclosures, the Fund utilizes a fair value hierarchy which prioritizes the inputs to valuation techniques used to measure fair value into three broad levels:

- . Level 1 -- quoted prices in active markets for identical securities
- . Level 2 -- prices determined using other significant observable inputs (including quoted prices for similar securities, interest rates,

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-Q

prepayment speeds, credit risk, etc.)

- . Level 3 -- prices determined using significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The following is a summary of the inputs used to value the Fund's net assets as of September 30, 2008. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

Valuation Inputs	Investments in Securities
Assets:	
Level 1 -- Quoted Prices.....	\$187,829,550
Level 2 -- Other Significant Observable Inputs.	307,045,973
Level 3 -- Significant Unobservable Inputs.....	--

Total	\$494,875,523
	=====

B. Foreign Security Country Determination:

A combination of the following criteria is used to assign the countries of risk listed in the Schedule of Investments: country of incorporation, actual building address, primary exchange on which the security is traded and country in which the greatest percentage of company revenue is generated.

6

C. Short Sales:

A short sale is a transaction in which the Fund sells a security it does not own in anticipation of a decline in market price. To sell a security short, the Fund must borrow the security. The Fund's obligation to replace the security borrowed and sold short will be fully collateralized at all times by the proceeds from the short sale retained by the broker and by cash and securities deposited in a segregated account with the Fund's custodian. If the price of the security sold short increases between the time of the short sale and the time the Fund replaces the borrowed security, the Fund will realize a loss, and if the price declines during the period, the Fund will realize a gain. Any realized gain will be decreased, and any realized loss increased, by the amount of transaction costs. On ex-dividend date, dividends on short sales are recorded as an expense to the Fund. Short selling used in the management of the Fund may accelerate the velocity of potential losses if the prices of securities sold short appreciate quickly. Stocks purchased may decline in value at the same time stocks sold short may appreciate in value, thereby increasing potential losses.

At September 30, 2008, the Fund had no securities sold short.

D. Security Lending:

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-Q

The Fund may loan securities to qualified brokers through an agreement with State Street Bank and Trust Company (the "Custodian"). Under the terms of agreement, the Fund is required to maintain collateral with a market value not less than 100% of the market value of loaned securities. Collateral is adjusted daily in connection with changes in the market value of securities on loan. Collateral may consist of cash, securities issued or guaranteed by the U.S. Government or its agencies. Cash collateral is invested in a short-term money market fund. Dividends earned on the collateral and premiums paid by the broker are recorded an income by the Fund net of fees and rebates charged by the Custodian for its services in connection with this securities lending program. Lending portfolio securities involves a risk of delay in the recovery of the loaned securities or in the foreclosure on collateral.

At September 30, 2008, the Fund had no securities on loan.

NOTE 2 -- MARKET CONDITIONS

Recent events in the financial sector have resulted in an unusually high degree of volatility in the financial markets and the net asset value of many mutual funds, including the Fund. Such events include, but are not limited to, the seizure of the Federal National Mortgage Association and the Federal Home Loan Mortgage Corporation by U.S. banking regulators, the bankruptcy filing of Lehman Brothers and sale of Merrill Lynch to Bank of America, and the government bailout of AIG. The potential investment of the Fund's investments in these issuers, and the financial sector in general, as reflected in the Fund's schedule of investments, exposes investors to the negative (or positive) performance resulting from these and other events.

NOTE 3 -- OTHER

On February 7, 2008, the Phoenix Companies, Inc. ("PNX") announced its intention to spin off various subsidiaries constituting its asset management business to PNX's shareholders. Once spun off from PNX, the company holding the asset management subsidiaries, Virtus Investment Partners, Inc. ("Virtus"), will become an independent public company. The spinoff is expected to occur at a date later in the year based on regulatory approval. In preparation for this spinoff, certain of the asset management subsidiaries have changed their names to reflect the Virtus brand, including the Fund's adviser, Phoenix Zweig Advisers LLC, which is now known as Zweig Advisers LLC.
