**Forward Looking Statements**

This Annual Report contains certain forward-looking statements which may be identified by the use of words such as believe, expect, anticipate, should, planned, estimated and potential. Examples of forward-looking statements include, but are not limited to, estimates with respect to our financial condition, results of operations and business that are subject to various factors which could cause actual results to differ materially from these estimates and most other statements that are not historical in nature. These factors include, but are not limited to, general and local economic conditions, changes in interest rates, deposit flows, demand for mortgage, and other loans, real estate values, competition, changes in accounting principles, policies, or guidelines, changes in legislation or regulation, and other economic, competitive, governmental, regulatory, and technological factors affecting our operations, pricing products and services.

**ESSA Bancorp, Inc.**

ESSA Bancorp, Inc. is the Pennsylvania-chartered stock holding company of ESSA Bank & Trust. ESSA Bancorp, Inc. owns 100% of the outstanding shares of common stock of ESSA Bank & Trust. Since being formed in 2006, ESSA Bancorp, Inc. has engaged primarily in the business of holding the common stock of ESSA Bank & Trust. Our executive offices are located at 200 Palmer Street, Stroudsburg, Pennsylvania 18360. Our telephone number at this address is (570) 421-0531. ESSA Bancorp, Inc. is subject to comprehensive regulation and examination by the Office of Thrift Supervision. At September 30, 2008, ESSA Bancorp, Inc. had consolidated assets of \$993.5 million, consolidated deposits of \$370.5 million and consolidated stockholders' equity of \$200.1 million. Its consolidated net income for the fiscal year ended September 30, 2008 was \$6.1 million.

On April 3, 2007, ESSA Bancorp, Inc. consummated its stock offering, resulting in gross proceeds of \$158.7 million, through the sale of 15,870,000 shares at a price of \$10.00 per share. ESSA Bancorp, Inc. also contributed 1,110,900 shares of its common stock to the ESSA Bank & Trust Foundation along with \$1.6 million in cash. Expenses related to the offering were approximately \$2.9 million, which resulted in net proceeds of approximately \$155.8 million prior to the contribution to the ESSA Bank & Trust Foundation.

ESSA Bancorp, Inc. loaned approximately \$13.6 million to the ESSA Bank & Trust's Employee Stock Ownership Plan. ESSA Bancorp, Inc. retained approximately \$64.3 million of the net proceeds of the offering prior to the contribution to the ESSA Bank & Trust Foundation, and the remainder of the net proceeds were contributed to ESSA Bank & Trust.

**ESSA Bank & Trust**

**General**

ESSA Bank & Trust was organized in 1916. ESSA Bank & Trust is a Pennsylvania chartered full-service, community-oriented savings association. We provide financial services to individuals, families and businesses through our thirteen full-service banking offices, located in Monroe and Northampton Counties, Pennsylvania. ESSA Bank & Trust is subject to comprehensive regulation and examination by the Pennsylvania Department of Banking and the Office of Thrift Supervision.

ESSA Bank & Trust's business consists primarily of accepting deposits from the general public and investing those deposits, together with funds generated from operations and borrowings, in residential first mortgage loans (including construction mortgage loans), commercial real estate loans, home equity loans and lines of credit, commercial and consumer loans. We offer a variety of deposit accounts, including checking, savings and certificates of deposits. We also offer asset management and trust services. We offer investment services through our relationship with PRIMEVEST Financial Services, Inc., a third party broker/dealer and investment advisor.

ESSA Bank & Trust's executive offices are located at 200 Palmer Street, Stroudsburg, Pennsylvania 18360. Our telephone number at this address is (570) 421-0531. Our website address is [www.essabank.com](http://www.essabank.com).

## **Table of Contents**

The Company is a public company, and files interim, quarterly and annual reports with the Securities and Exchange Commission ( SEC ). All filed SEC reports and interim filings can be obtained from the Bank s website, on the Investor Relations page, without charge from the Company.

### **Market Area**

At September 30, 2008, our thirteen full-service banking offices consisted of twelve offices in Monroe County and one office in Northampton County, Pennsylvania. Our primary market for deposits is currently concentrated around the areas where our full-service banking offices are located. Our primary lending area consists of the counties where our branch offices are located, and to a lesser extent, the contiguous counties in the Commonwealth of Pennsylvania.

Monroe County is located in eastern Pennsylvania, situated 90 miles north of Philadelphia, 75 miles west of New York and 116 miles northeast of Harrisburg. Monroe County is comprised of 611 square miles of mostly rural terrain. Monroe County is the second-fastest growing county in Pennsylvania. Major industries include tourism, construction and educational facilities. Northampton County is located south of Monroe County and directly borders New Jersey. As of June 30, 2008, we had a deposit market share of approximately 18.6% in Monroe County, which represented the second largest deposit market share in Monroe County and less than 1.0% in Northampton County.

### **Lending Activities**

Historically, our principal lending activity has been the origination of first mortgage loans for the purchase, construction or refinancing of one- to four-family residential real property. During the past five years, we have increased our originations of commercial real estate loans in an effort to increase interest income, diversify our loan portfolio, and better serve the community. These loans have increased from 6.1% of our total loan portfolio at September 30, 2004 to \$69.5 million, or 9.8% of our total loan portfolio at September 30, 2008. One- to four-family residential real estate mortgage loans represented \$572.0 million, or 80.3%, of our loan portfolio at September 30, 2008. Home equity loans and lines of credit totaled \$47.5 million, or 6.7% of our loan portfolio at September 30, 2008. Commercial loans totaled \$12.0 million or 1.7% of our loan portfolio at September 30, 2008 and construction first mortgage loans totaled \$8.3 million, or 1.1% of the total loan portfolio at September 30, 2008. We originate other consumer loans on a limited basis.

## Edgar Filing: ESSA Bancorp, Inc. - Form 10-K

Total \$ 578,151 \$ 125,864 \$ 704,015

***Loan Originations and Repayments.*** Historically, we have originated residential mortgage loans pursuant to underwriting standards that generally conform to Fannie Mae and Freddie Mac guidelines. Loan origination activities are primarily concentrated in Monroe and Northampton Counties, Pennsylvania and secondarily from other Pennsylvania counties contiguous to Monroe County. New loans are generated primarily from the efforts of employees and advertising, a network of select mortgage brokers, other parties with whom we do business, customer referrals, and from walk-in customers. Loan applications are underwritten and processed at our corporate center.

***One- to Four-Family Residential Loans.*** Historically, our primary lending activity has consisted of the origination of one- to four-family residential mortgage loans secured primarily by properties located in Monroe and Northampton Counties, Pennsylvania.

---

## Table of Contents

At September 30, 2008, approximately \$572.0 million, or 80.3% of our loan portfolio, consisted of one- to four-family residential loans. Our origination of one- to four-family loans increased in fiscal year 2008 compared to fiscal years 2007 and 2006, although such loans have generally been declining as a percentage of our total loan portfolio. Generally, one- to four-family residential mortgage loans are originated in amounts up to 80% of the lesser of the appraised value or purchase price of the property, although loans may be made with higher loan-to-value ratios at a higher interest rate to compensate for the risk. Private mortgage insurance is generally required on loans with a loan-to-value ratio in excess of 80%. Fixed-rate loans are originated for terms of 10, 15, 20 and 30 years. At September 30, 2008, our largest loan secured by one- to four-family real estate had a principal balance of approximately \$739,000 and was secured by a single family house. This loan was performing in accordance with its repayment terms.

We also offer adjustable-rate mortgage loans which have fixed terms of one, three, five or ten-years before converting to an annual adjustment schedule based on changes in a designated United States Treasury index. We originated \$12.3 million of adjustable rate one- to four-family residential loans during the year ended September 30, 2008 and \$23.0 million during the year ended September 30, 2007. Our adjustable rate mortgage loans provide for maximum rate adjustments of 200 basis points per adjustment, with a lifetime maximum adjustment of 500 basis points. Our adjustable rate mortgage loans amortize over terms of up to 30 years.

Adjustable rate mortgage loans decrease the risk associated with changes in market interest rates by periodically repricing, but involve other risks because, as interest rates increase, the principal and interest payments on the loan increase, thus increasing the potential for default by the borrower. At the same time, the marketability of the underlying collateral may be adversely affected by higher interest rates. Upward adjustment of the contractual interest rate is also limited by the maximum periodic and lifetime interest rate adjustments, permitted by our loan documents; and therefore, is potentially limited in effectiveness during periods of rapidly rising interest rates. At September 30, 2008, \$69.3 million, or 12.1%, of our one- to four-family residential loans had adjustable rates of interest.

All one- to four-family residential mortgage loans that we originate include due-on-sale clauses, which give us the right to declare a loan immediately due and payable in the event that, among other things, the borrower sells or otherwise disposes of the real property subject to the mortgage and the loan is not repaid.

Regulations limit the amount that a savings bank may lend relative to the appraised value of the real estate securing the loan, as determined by an appraisal of the property at the time the loan is originated. For all purchase money loans, we utilize outside independent appraisers approved by the Board of Directors. All purchase money borrowers are required to obtain title insurance. Certain modest refinance requests may utilize an automated valuation model and title search. We also require fire and casualty insurance and, where circumstances warrant, flood insurance.

**Home Equity Loans and Lines of Credit.** Home equity loans and lines of credit are generated almost exclusively by our branch staff. Eligible properties include primary and vacation homes in northeastern Pennsylvania, with the large majority of loans being originated in Monroe County. As of September 30, 2008, home equity loans and lines totaled about \$47.5 million, or 6.7% of our loan portfolio.

The maximum combined loan-to-value originated is currently 70-80%, depending on the collateral and the holder of the first mortgage. There is a modest portion of the portfolio originated in years past that contains original combined loan-to-values of up to 90%. Our home equity lines of credit typically feature a 10 year draw period with interest-only payments permitted, followed by another 10 years of fully amortizing payments with no further ability to draw funds. Similar combined loan-to-value characteristics and standards exist for the lines as are outlined above for the loans.

Home equity borrowers are prime rated individuals. Loan underwriting standards restrict the size of a junior lien loan to \$200,000. All loans exceeding 70-75% of value require an appraisal by bank-approved, licensed appraisers. Loans with lesser loan-to-value ratios may have utilized either automated valuation models or county tax assessments. Title/lien searches are secured on all home equity loans and lines greater than \$25,000.

---

**Table of Contents**

**Commercial Real Estate Loans.** At September 30, 2008, \$69.5 million, or 9.8% of our total loan portfolio consisted of commercial real estate loans. Commercial real estate loans are secured by office buildings, mixed-use properties and other commercial properties. We generally originate adjustable rate commercial real estate loans with an initial term of five years and a repricing option, and a maximum term of up to 25 years. The maximum loan-to-value ratio of our commercial real estate loans is 85%. At September 30, 2008, we had 253 commercial real estate loans with an outstanding balance of \$69.5 million. At September 30, 2008, our largest commercial real estate loan balance was \$3.4 million, which was performing in accordance with its terms. At September 30, 2008, four of our loans secured by commercial real estate totaling \$2.5 million were not performing in accordance with their terms and were on nonaccrual status.

We consider a number of factors in originating commercial real estate loans. We evaluate the qualifications and financial condition of the borrower, including credit history, profitability and expertise, as well as the value and condition of the mortgaged property securing the loan. When evaluating the qualifications of the borrower, we consider the financial resources of the borrower, the borrower's experience in owning or managing similar property and the borrower's payment history with us and other financial institutions. In evaluating the property securing the loan, the factors we consider include the net operating income of the mortgaged property before debt service and depreciation, the ratio of the loan amount to the appraised value of the mortgaged property and the debt service coverage ratio (the ratio of net operating income to debt service) to ensure that it is at least 120% of the monthly debt service. All commercial real estate loans in excess of \$250,000 are appraised by outside independent appraisers approved by the Board of Directors. Personal guarantees are obtained from commercial real estate borrowers although we will occasionally consider waiving this requirement based upon the loan-to-value ratio of the proposed loan. All purchase money and asset refinance borrowers are required to obtain title insurance. We also require fire and casualty insurance and, where circumstances warrant, flood insurance.

Loans secured by commercial real estate generally are considered to present greater risk than one- to four-family residential loans. Commercial real estate loans often involve large loan balances to single borrowers or groups of related borrowers. Repayment of these loans depends to a large degree on the results of operations and management of the properties securing the loans or the businesses conducted on such property, and may be affected to a greater extent by adverse conditions in the real estate market or the economy in general. Accordingly, the nature of these loans makes them more difficult for management to monitor and evaluate.

**First Mortgage Construction Loans.** At September 30, 2008, \$8.3 million, or 1.1%, of our total loan portfolio consisted of first mortgage construction loans. Most of our first mortgage construction loans are for the construction of residential properties. We currently offer fixed and adjustable-rate residential first mortgage construction loans. First mortgage construction loans are generally structured for permanent mortgage financing once the construction is completed. At September 30, 2008, our largest first mortgage construction loan balance was \$600,000. The loan was performing in accordance with its terms. First mortgage construction loans, once converted to permanent financing, generally repay over a thirty-year period. First mortgage construction loans require only the payment of interest during the construction period. First mortgage construction loans will generally be made in amounts of up to 80% of the appraised value of the completed property, or the actual cost of the improvements. In certain circumstances first mortgage construction loans may be made in amounts up to 97% of the appraised value with appropriate credit enhancements such as private mortgage insurance. Funds are disbursed based on our inspections in accordance with a schedule reflecting the completion of portions of the project.

First mortgage construction loans generally involve a greater degree of credit risk than one- to four-family residential mortgage loans. The risk of loss on a construction loan depends upon the accuracy of the initial estimate of the value of the property at completion of construction compared to the estimated cost of construction.

For all loans, we utilize outside independent appraisers approved by the Board of Directors. All borrowers are required to obtain title insurance. We also require fire and casualty insurance and, where circumstances warrant, flood insurance on properties.

**Other Loans.** We offer a variety of loans that are either unsecured or secured by property other than real estate. These loans include loans secured by deposits, personal loans and automobile loans. At September 30, 2008, these other loans totaled \$3.1 million, or 0.4% of the total loan portfolio.

**Table of Contents**

***Loan Approval Procedures and Authority.*** The loan approval process is intended to assess the borrower's ability to repay the loan, the viability of the loan, and the adequacy of the value of the property that will secure the loan. To assess the borrower's ability to repay, we review each borrower's employment and credit history and information on the historical and projected income and expenses of mortgagors. All residential mortgage loans in excess of the conforming loan limit but not more than \$500,000 must be approved by one of the following: President or Chief Lending Officer. All loans in excess of \$500,000 but not more than \$750,000 must be approved by any two of the following: President, Chief Lending Officer and the Vice President, Branch Administration. All loans in excess of \$750,000 to \$1.25 million must be approved by the Management Loan Committee. The Management Loan Committee consists of the President, Chief Lending Officer, Vice President, Branch Administration and Vice President, Commercial Lending. All loans in excess of \$1.25 million must be approved by the Board of Directors.

**Non-Performing Loans and Problem Assets**

After a real estate secured loan becomes 15 days late, we deliver a computer generated late charge notice to the borrower and will attempt to contact the borrower by telephone. When a loan becomes 30 days delinquent, we send a delinquency letter to the borrower. We then attempt to make satisfactory arrangements to bring the account current, including interviewing the borrower, until the mortgage is brought current or a determination is made to recommend foreclosure, deed-in-lieu of foreclosure or other appropriate action. After 60 days, we will generally refer the matter to the Board of Directors who may authorize legal counsel to commence foreclosure proceedings.

Mortgage loans are reviewed on a regular basis and such loans are placed on non-accrual status when they become more than 90 days delinquent. When loans are placed on non-accrual status, unpaid accrued interest is fully reserved, and further income is recognized only to the extent received.

***Non-performing Loans.*** At September 30, 2008, \$3.9 million (or less than 1.0% of our total loans) were non-performing loans. Three related commercial real estate development loans with a balance of \$2.5 million made up the majority on non-performing loans at September 30, 2008. These loans, together with a commercial business relationship with a combined loan relationship of \$201,000 were judged by management to be impaired. Specific loan loss allowances were allocated to these loans in the amounts of \$457,000 and \$77,000 for the commercial real estate and business loans, respectively. On October 30, 2008, the Company received a deed in lieu of foreclosure on the commercial real estate loans. The property is being actively marketed and additional losses may occur.

***Non-Performing Assets.*** The table below sets forth the amounts and categories of our non-performing assets at the dates indicated.

For the year ended September 30, 2008, gross interest income that would have been recorded had our non-accruing loans been current in accordance with their original terms was \$133,000.

**Delinquencies.** The following table sets forth certain information with respect to our loan portfolio delinquencies at the dates indicated. Loans delinquent for 90 days or more are generally classified as nonaccrual loans.

**Classified Assets.** Banking regulations and our Asset Classification Policy provide that loans and other assets considered to be of lesser quality should be classified as substandard, doubtful or loss assets. An asset is considered substandard if it is inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Substandard assets include those characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected. Assets classified as doubtful have all of the weaknesses inherent in those classified substandard, with the added characteristic that the weaknesses present make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable. Assets classified as loss are those considered uncollectible and of such little value that their continuance as assets without the establishment of a specific loss reserve is not warranted. We classify an asset as special mention if the asset has a potential weakness that warrants management's close attention. While such assets are not impaired, management has concluded that if the potential weakness in the asset is not addressed, the value of the asset may deteriorate, thereby adversely affecting the repayment of the asset.

## **Table of Contents**

On the basis of management's review of its assets, at September 30, 2008, we classified approximately \$10.1 million of our assets as special mention, \$4.2 million as substandard, \$2.7 million as doubtful, and \$0 as loss.

The loan portfolio is reviewed on a regular basis to determine whether any loans require classification in accordance with applicable regulations. Not all classified assets constitute non-performing assets.

### **Allowance for Loan Losses**

Our allowance for loan losses is maintained at a level necessary to absorb loan losses that are both probable and reasonably estimable. Management, in determining the allowance for loan losses, considers the losses inherent in its loan portfolio and changes in the nature and volume of loan activities, along with the general economic and real estate market conditions. Our allowance for loan losses consists of two elements: (1) an allocated allowance, which comprises allowances established on specific loans and class allowances based on historical loss experience and current trends, and (2) an unallocated allowance based on general economic conditions and other risk factors in our markets and portfolios. We maintain a loan review system, which allows for a periodic review of our loan portfolio and the early identification of potential impaired loans. Such system takes into consideration, among other things, delinquency status, size of loans, type and market value of collateral and financial condition of the borrowers. Specific loan loss allowances are established for identified losses based on a review of such information. A loan evaluated for impairment is considered to be impaired when, based on current information and events, it is probable that we will be unable to collect all amounts due according to the contractual terms of the loan agreement. All loans identified as impaired are evaluated independently. We do not aggregate such loans for evaluation purposes. Loan impairment is measured based on the fair value of collateral method, taking into account the appraised value, any valuation assumptions used, estimated costs to sell and trends in the market since the appraisal date. General loan loss allowances are based upon a combination of factors including, but not limited to, actual loan loss experience, composition of the loan portfolio, current economic conditions, management's judgment and losses which are probable and reasonably estimable. The allowance is increased through provisions charged against current earnings and recoveries of previously charged-off loans. Loans that are determined to be uncollectible are charged against the allowance. While management uses available information to recognize probable and reasonably estimable loan losses, future loss provisions may be necessary based on changing economic conditions. Payments received on impaired loans are applied first to accrued interest receivable and then to principal. The allowance for loan losses as of September 30, 2008 is maintained at a level that represents management's best estimate of losses inherent in the loan portfolio, and such losses were both probable and reasonably estimable.

In addition, the Office of Thrift Supervision and the Pennsylvania Department of Banking, as an integral part of its examination process, periodically review our allowance for loan losses. The banking regulators may require that we recognize additions to the allowance based on its analysis and review of information available to it at the time of its examination.

**Table of Contents**

The following table sets forth activity in our allowance for loan losses for the periods indicated.

	At or For the Years Ended September 30,				
	2008	2007	2006	2005	2004
	(Dollars in thousands)				
Balance at beginning of year	\$ 4,206	\$ 3,855	\$ 3,563	\$ 3,027	\$ 2,509

Provision for loan losses	900	360	300	550	530
Balance at end of year	\$ 4,915	\$ 4,206	\$ 3,855	\$ 3,563	\$ 3,027
Ratios:					
Net charge-offs to average loans outstanding	0.03%	%	%	%	%
Allowance for loan losses to non-performing loans at end of year	124.81%	757.84%	809.87%	588.93%	455.19%
Allowance for loan losses to total loans at end of year	0.69%	0.67%	0.69%	0.70%	0.63%

As indicated in the table above, we charged off a de minimus amount of loans since fiscal year 2004, due, in part, to conservative underwriting of loans and aggressive monitoring of the loan portfolio to identify and address non-performing loans and potential problem assets at an early date. The amount of foreclosures we incurred in the last five years was not material to our financial statements taken as a whole and ESSA Bank & Trust suffered no material losses on foreclosed assets during that period. See Non-Performing Loans and Problem Assets. There can be no assurance that we will not experience a deterioration of our loan portfolio, including increases in non-performing loans, problem assets and charge-offs, in the future.

**Table of Contents**

**Allocation of Allowance for Loan Losses.** The following tables set forth the allowance for loan losses allocated by loan category, the percent of the allowance to the total allowance and the percent of loans in each category to total loans at the dates indicated. The allowance for loan losses allocated to each category is not necessarily indicative of future losses in any particular category and does not restrict the use of the allowance to absorb losses in other categories.

## **Table of Contents**

We use the accrual method of accounting for all performing loans. The accrual of interest income is generally discontinued when the contractual payment of principal or interest has become 90 days past due or management has serious doubts about further collectibility of principal or interest, even though the loan is currently performing. When a loan is placed on nonaccrual status, unpaid interest previously credited to income is reversed. Interest received on nonaccrual loans generally is either applied against principal or reported as interest income, according to management's judgment as to the collectibility of principal. Generally, residential and consumer loans are restored to accrual status when the obligation is brought in accordance with the contractual terms for a reasonable period of time and ultimate collectibility of total contractual principal and interest is no longer in doubt. Commercial loans are restored to accrual status when the obligation is brought current, has performed in accordance with the contractual terms for a reasonable period of time and ultimate collectibility of total contractual principal and interest no longer is in doubt.

In our collection efforts, we will first attempt to cure any delinquent loan. If a real estate secured loan is placed on nonaccrual status, it will be subject to transfer to the real estate owned ( REO ) portfolio (properties acquired by or in lieu of foreclosure), upon which our loan servicing department will pursue the sale of the real estate. Prior to this transfer, the loan balance will be reduced, if necessary, to reflect its current market value less estimated costs to sell. Write downs of REO that occur after the initial transfer from the loan portfolio and costs of holding the property are recorded as other operating expenses, except for significant improvements which are capitalized to the extent that the carrying value does not exceed estimated net realizable value.

Fair values for determining the value of collateral are estimated from various sources, such as real estate appraisals, financial statements and from any other reliable sources of available information. For those loans deemed to be impaired, collateral value is reduced for the estimated costs to sell. Reductions of collateral value are based on historical loss experience, current market data, and any other source of reliable information specific to the collateral.

This analysis process is inherently subjective, as it requires us to make estimates that are susceptible to revisions as more information becomes available. Although we believe that we have established the allowance at levels to absorb probable and estimable losses, future additions may be necessary if economic or other conditions in the future differ from the current environment.

## **Securities Activities**

Our securities investment policy is established by our Board of Directors. This policy dictates that investment decisions be made based on the safety of the investment, liquidity requirements, potential returns, cash flow targets, and consistency with our interest rate risk management strategy. Our investment policy is reviewed annually by our ALCO/Investment management committee. All policy changes recommended by this management committee must be approved by the Board of Directors. The Committee is comprised of the Chief Executive Officer, Chief Financial Officer, Controller, Lending Services Division Manager, Retail Services Division Manager and the Marketing Services Manager. Authority to make investments under the approved guidelines is delegated by the Committee to appropriate officers. While general investment strategies are developed and authorized by the ALCO/Investment management committee, the execution of specific actions rests with the Chief Financial Officer.

The approved investment officers are authorized to execute investment transactions up to \$5.0 million per transaction without the prior approval of the ALCO/Investment management committee and within the scope of the established investment policy. These officers are also authorized to execute investment transactions between \$5.0 million and \$10.0 million with the additional approval from the Chief Executive Officer. Each transaction in excess of \$10.0 million must receive prior approval of the ALCO/Investment Committee.

Our current investment policy generally permits investments in debt securities issued by the U.S. government and U.S. agencies, municipal bonds, and corporate debt obligations, as well as investments in preferred and common stock of government agencies and government sponsored enterprises such as Fannie Mae, Freddie Mac and the Federal Home Loan Bank of Pittsburgh (federal agency securities) and, to a much lesser extent, other equity securities. Securities in these categories are classified as investment securities for financial reporting purposes. The policy also permits investments in mortgage-backed securities, including pass-through securities issued and guaranteed by Fannie Mae, Freddie Mac and GNMA as well as commercial paper, corporate debt and municipal securities.

---

## **Table of Contents**

As of September 30, 2008, other equity securities consisted almost exclusively of securities issued by Fannie Mae and the FHLBank Pittsburgh. Our current investment strategy uses a risk management approach of diversified investing in fixed-rate securities with short- to intermediate-term maturities, as well as adjustable-rate securities, which may have a longer term to maturity. The emphasis of this approach is to increase overall investment securities yields while managing interest rate risk.

SFAS No. 115 requires that, at the time of purchase, we designate a security as held to maturity, available-for-sale, or trading, depending on our ability and intent. Securities available-for-sale are reported at fair value, while securities held to maturity are reported at amortized cost.

***Mortgage-Backed Securities.*** We purchase mortgage-backed securities in order to generate positive interest rate spreads with minimal administrative expense, lower credit risk as a result of the guarantees provided by Freddie Mac, Fannie Mae and GNMA, and increased liquidity. We invest primarily in mortgage-backed securities issued or sponsored by Fannie Mae, Freddie Mac, and GNMA. At September 30, 2008 our mortgage-backed securities portfolio had a fair value of \$157.8 million, consisting of Freddie Mac, Fannie Mae and GNMA mortgage-backed securities.

Mortgage-backed securities are created by pooling mortgages and issuing a security collateralized by the pool of mortgages with an interest rate that is less than the interest rate on the underlying mortgages. Mortgage-backed securities typically represent a participation interest in a pool of single-family or multi-family mortgages, although most of our mortgage-backed securities are collateralized by single-family mortgages. The issuers of such securities (generally U.S. government agencies and U.S. government sponsored enterprises, including Fannie Mae, Freddie Mac and GNMA) pool and resell the participation interests in the form of securities to investors, such as ESSA Bank & Trust, and guarantee the payment of principal and interest to these investors. Investments in mortgage-backed securities involve a risk that actual prepayments will be greater or less than the prepayment rate estimated at the time of purchase, which may require adjustments to the amortization of any premium or accretion of any discount relating to such instruments, thereby affecting the net yield on such securities. We review prepayment estimates for our mortgage-backed securities at the time of purchase to ensure that prepayment assumptions are reasonable considering the underlying collateral for the securities at issue and current interest rates, and to determine the yield and estimated maturity of the mortgage-backed securities portfolio. Periodic reviews of current prepayment speeds are performed in order to ascertain whether prepayment estimates require modification that would cause amortization or accretion adjustments.

***Equity Securities.*** At September 30, 2008, our equity securities consisted almost entirely of securities issued by Fannie Mae, which are classified as available-for-sale.

In addition, we hold FHLBank Pittsburgh common stock to qualify for membership in the Federal Home Loan Bank System and to be eligible to borrow funds under the FHLBank Pittsburgh advance program. There is no market for the common stock.

The aggregate fair value of our FHLBank Pittsburgh common stock as of September 30, 2008 was \$19.2 million based on its par value. No unrealized gains or losses have been recorded because we have determined that the par value of the common stock represents its fair value. We owned shares of Federal Home Loan Bank of Pittsburgh common stock at September 30, 2008 with a par value that was \$219,400 more than we were required to own to maintain our membership in the Federal Home Loan Bank System and to be eligible to obtain advances. We are required to purchase additional stock as our outstanding advances increase. Any excess stock we own is redeemed monthly by the Federal Home Loan Bank of Pittsburgh.

We review equity and debt securities with significant declines in fair value on a periodic basis to determine whether they should be considered temporarily or other than temporarily impaired. If a decline in the fair value of a security is determined to be other than temporary, we are required to reduce the carrying value of the security to its fair value and record a non-cash impairment charge in the amount of the decline, net of tax effect, against our current income.

**Table of Contents**

Our investment securities portfolio contains unrealized losses on securities, including mortgage-related instruments issued or backed by the full faith and credit of the United States government, or generally viewed as having the implied guarantee of the United States government, and debt obligations of a State or political subdivision.

Our policy is to recognize an other-than-temporary impairment of equity securities where the fair value has been significantly below cost for four consecutive quarters. For fixed maturity investments with unrealized losses due to interest rates where we have the positive intent and ability to hold the investment for a period of time sufficient to allow a market recovery, declines in value below cost are not assumed to be other than temporary. We review our position quarterly and concluded that at September 30, 2008, the declines outlined in the table below represent temporary declines due to interest rate change, and we have the intent and ability to hold those securities either to maturity or to allow a market recovery. However, during the year ended September 30, 2008, the Company recognized a loss of \$802,000 on equity securities that it deemed, through analysis of the security, to be other than a temporary loss. This loss was related to Fannie Mae perpetual preferred stock that the Company owns. Fannie Mae was placed into conservatorship by the U.S. Government on September 7, 2008.

The following table sets forth the composition of our securities portfolio (excluding FHLBank Pittsburgh common stock) at the dates indicated.

**Sources of Funds**

**General.** Deposits, borrowings, repayments and prepayments of loans and securities, proceeds from maturing securities and cash flows from operations are the primary sources of our funds for use in lending, investing and for other general purposes.

**Deposits.** We offer a variety of deposit accounts with a range of interest rates and terms. Our deposit accounts consist of savings accounts, NOW accounts, checking accounts, money market accounts, club accounts, certificates of deposit and IRAs and other qualified plan accounts. We provide commercial checking accounts for businesses.

At September 30, 2008, our deposits totaled \$370.5 million. Interest-bearing NOW, savings and club and money market deposits totaled \$191.9 million at September 30, 2008. At September 30, 2008, we had a total of \$153.7 million in certificates of deposit. Noninterest-bearing demand deposits totaled \$24.9 million. Although we have a significant portion of our deposits in shorter-term certificates of deposit, we monitor activity on these accounts and, based on historical experience and our current pricing strategy, we believe we will retain a large portion of these accounts upon maturity.

Our deposits are obtained predominantly from the areas in which our branch offices are located. We rely on our favorable locations, customer service and competitive pricing to attract and retain these deposits. While we accept certificates of deposit in excess of \$100,000 for which we may provide preferential rates, we generally do not solicit such deposits as they are more difficult to retain than core deposits. At September 30, 2008, we had a total of \$10.9 million of brokered certificates of deposits, a decrease of \$9.1 million from the prior fiscal year end. Our brokered certificates of deposits range from one- to five-year terms, and are purchased only through pre-approved brokers.

The following table sets forth the distribution of total deposit accounts, by account type, at the dates indicated.

	2008		For the Years Ended September 30,				2006		Average Rate Paid
	Average Balance	Percent	Average Rate Paid	Average Balance	Percent	Average Rate Paid	Average Balance	Percent	
(Dollars in thousands)									
<b>Deposit type:</b>									
Noninterest bearing demand accounts	\$ 24,211	6.57%		\$ 34,934	8.49%		\$ 21,383	5.49%	
Interest bearing NOW	55,073	14.91	0.07	60,826	14.79	0.07	59,709	15.34	0.07
Money market	58,034	15.72	2.90	35,351	8.60	3.12	31,618	8.12	2.17
Savings and club	62,982	17.07	0.44	75,354	18.32	0.42	79,452	20.41	0.45
Certificates of deposit	168,763	45.73	4.19	204,802	49.80	4.48	197,064	50.64	4.02
<b>Total deposits</b>	<b>\$ 369,063</b>	<b>100.00%</b>	<b>2.46%</b>	<b>\$ 411,267</b>	<b>100.0%</b>	<b>2.28%</b>	<b>\$ 389,226</b>	<b>100.00%</b>	<b>2.31%</b>

As of September 30, 2008, the aggregate amount of outstanding certificates of deposit in amounts greater than or equal to \$100,000 was approximately \$53.1 million. The following table sets forth the maturity of those certificates as of September 30, 2008.

	At September 30, 2008 (In thousands)
Three months or less	\$ 10,921
Over three months through six months	12,565
Over six months through one year	9,584
Over one year	19,980
<b>Total</b>	<b>\$ 53,050</b>

**Table of Contents**

At September 30, 2008, \$102.3 million of our certificates of deposit had maturities of one year or less. We monitor activity on these accounts and, based on historical experience and our current pricing strategy, we believe we will retain a significant portion of these accounts upon maturity.

**Borrowings.** Our short-term borrowings consist of Federal Home Loan Bank advances. The following table sets forth information concerning balances and interest rates on all of our short-term borrowings at the dates and for the years indicated.

	At or For the Years Ended September 30,		
	2008	2007	2006
	(Dollars in thousands)		
Balance at end of year	\$ 39,510	\$ 34,230	\$ 35,299
Maximum outstanding at any month end	\$ 56,183	\$ 46,409	\$ 35,299
Average balance during year	\$ 36,150	\$ 33,975	\$ 21,957
Weighted average interest rate at end of year	2.41%	5.17%	5.40%
Average interest rate during year	3.94%	5.21%	4.92%

At September 30, 2008, we had the ability to borrow approximately \$573.0 million under our credit facilities with the Federal Home Loan Bank of Pittsburgh.

**Competition**

We face significant competition in both originating loans and attracting deposits. The counties in which we operate have a significant concentration of financial institutions, many of which are significantly larger institutions and have greater financial resources than we, and many of which are our competitors to varying degrees. Our competition for loans comes principally from commercial banks, savings banks, mortgage banking companies, credit unions, leasing companies, insurance companies and other financial service companies. Our most direct competition for deposits has historically come from commercial banks, savings banks and credit unions. We face additional competition for deposits from nondepository competitors such as the mutual fund industry, securities and brokerage firms and insurance companies.

We seek to meet this competition by the convenience of our branch locations, emphasizing personalized banking and the advantage of local decision-making in our banking business. Specifically, we promote and maintain relationships and build customer loyalty within local communities by focusing our marketing and community involvement on the specific needs of individual neighborhoods. As of June 30, 2008, ESSA Bank & Trust had the second largest deposit market share in Monroe County, Pennsylvania. We do not rely on any individual, group, or entity for a material portion of our deposits.

**Employees**

As of September 30, 2008, we had 159 full-time employees and 25 part-time employees. The employees are not represented by a collective bargaining unit and we consider our relationship with our employees to be good.

**Subsidiary Activities**

ESSA Bank & Trust has two wholly owned subsidiaries, ESSACOR, Inc. and Pocono Investment Company. ESSACOR, Inc. is a Pennsylvania corporation that is currently inactive. Pocono Investment Company is a Delaware corporation formed as an investment company subsidiary to hold and manage certain investments of ESSA Bank & Trust, including certain intellectual property.

---

**Table of Contents**

**SUPERVISION AND REGULATION**

**General**

ESSA Bancorp, Inc. is a Pennsylvania corporation. As a savings and loan holding company, we are required to file certain reports with, and otherwise comply with the rules and regulations of the Office of Thrift Supervision.

ESSA Bank & Trust is a Pennsylvania-chartered savings association and its deposit accounts are insured up to applicable limits by the Federal Deposit Insurance Corporation under the Deposit Insurance Fund ( DIF ). We are subject to extensive regulation by the Pennsylvania Department of Banking, our chartering agency, and by the Office of Thrift Supervision, our primary federal regulator. We must file reports with the Pennsylvania Department of Banking and the Office of Thrift Supervision concerning our activities and financial condition in addition to obtaining regulatory approvals prior to entering into certain transactions including, but not limited to, mergers with or acquisitions of other savings institutions. There are periodic examinations by the Pennsylvania Department of Banking and the Office of Thrift Supervision to test our compliance with various regulatory requirements. This regulation and supervision establishes a comprehensive framework of activities in which an institution can engage and is intended primarily for the protection of the Federal Deposit Insurance Corporation insurance fund and depositors. The regulatory structure also gives the regulatory authorities extensive discretion in connection with their supervisory and enforcement activities and with their examination policies, including policies with respect to the classification of assets and the establishment of adequate loan loss reserves for regulatory purposes. Any change in such regulation, whether by the Pennsylvania Department of Banking or the Office of Thrift Supervision could have a material adverse impact on us and our operations.

**Regulation by the Pennsylvania Department of Banking**

The Pennsylvania Savings Association Code of 1967, as amended (the Savings Association Code ) contains detailed provisions governing the organization, location of offices, rights and responsibilities of directors, officers, employees, and depositors, as well as corporate powers, savings and investment operations and other aspects of ESSA Bank & Trust and its affairs. The Savings Association Code delegates extensive rulemaking power and administrative discretion to the Pennsylvania Department of Banking so that the supervision and regulation of state-chartered savings associations may be flexible and readily responsive to changes in economic conditions and in savings and lending practices.

One of the purposes of the Savings Association Code is to provide savings associations with the opportunity to be competitive with each other and with other financial institutions existing under other Pennsylvania laws as well as other state, federal and foreign laws. A Pennsylvania savings association may locate or change the location of its principal place of business and establish an office anywhere in Pennsylvania, with the prior approval of the Pennsylvania Department of Banking.

The Pennsylvania Department of Banking generally examines each savings association not less frequently than once every two years. Although the Department may accept the examinations and reports of the Office of Thrift Supervision in lieu of the Department's examination, the current practice is for the Department to conduct individual examinations. The Department may order any savings association to discontinue any violation of law or unsafe or unsound business practice and may direct any trustee, officer, attorney, or employee of a savings association engaged in an objectionable activity, after the Department has ordered the activity to be terminated, to show cause at a hearing before the Department why such person should not be removed.

**Regulation by the Office of Thrift Supervision**

ESSA Bank & Trust is also subject to extensive regulation, examination and supervision by the Office of Thrift Supervision, as its primary federal regulator. Such regulation and supervision:

establishes a comprehensive framework of activities in which ESSA Bank & Trust can engage;

limits the ability of ESSA Bank & Trust to extend credit to any given borrower;

## **Table of Contents**

significantly limits the transactions in which ESSA Bank & Trust may engage with its affiliates;

requires ESSA Bank & Trust to meet a qualified thrift lender test which requires ESSA Bank & Trust to invest in qualified thrift investments, which include primarily residential mortgage loans and related investments;

places limitations on capital distributions by savings associations, such as ESSA Bank & Trust, including cash dividends;

imposes assessments to the Office of Thrift Supervision to fund its operations;

establishes a continuing and affirmative obligation, consistent with ESSA Bank & Trust's safe and sound operation, to help meet the credit needs of its community, including low and moderate income neighborhoods;

establishes various capital categories resulting in various levels of regulatory scrutiny applied to the institutions in a particular category; and

establishes standards for safety and soundness.

The Office of Thrift Supervision generally examines each savings association not less frequently than once every two years. The Office of Thrift Supervision has the authority to order any savings association or its directors, trustees, officers, attorneys or employees to discontinue any violation of law or unsafe or unsound banking practice.

### **Transactions with Affiliates**

Sections 23A and 23B of the Federal Reserve Act and its implementing regulations govern transactions between depository institutions and their affiliates. These provisions are made applicable to savings associations, such as ESSA Bank & Trust, by the Home Owners' Loan Act and Office of Thrift Supervision regulation. In a holding company context, the parent holding company of a savings association and any companies that are controlled by the parent holding company are affiliates of the savings association.

Section 23A limits the extent to which a savings association or its subsidiaries may engage in certain transactions with its affiliates. These transactions include, among other things, the making of loans or other extensions of credit to an affiliate and the purchase of assets from an affiliate. Generally, these transactions between the savings association and any one affiliate cannot exceed 10% of the savings association's capital stock and surplus, and these transactions between the savings institution and all of its affiliates cannot, in the aggregate, exceed 20% of the savings institution's capital stock and surplus. Section 23A also establishes specific collateral requirements for loans or extensions of credit to an affiliate, and for guarantees or acceptances on letters of credit issued on behalf of an affiliate. Applicable regulations prohibit a savings association from lending to any affiliate engaged in activities not permissible for a bank holding company or for the purpose of acquiring the securities of most affiliates.

Section 23B requires that transactions covered by Section 23A and a broad list of other specified transactions be on terms and under circumstances substantially the same, or no less favorable to the savings association or its subsidiary, as similar transactions with non-affiliates. In addition to the restrictions on transactions with affiliates that Sections 23A and 23B of the Federal Reserve Act impose on depository institutions, the regulations of the Office of Thrift Supervision also generally prohibit a savings association from purchasing or investing in securities issued by an affiliate.

### **Insurance of Accounts and Regulation by the Federal Deposit Insurance Corporation**

Deposit accounts in ESSA Bank & Trust are insured by the Federal Deposit Insurance Corporation (FDIC) generally up to a maximum of \$100,000 per separately insured depositor and up to a maximum of \$250,000 for self-directed retirement accounts. ESSA Bank & Trust's deposits, therefore, are subject to FDIC deposit insurance assessments.

---

## **Table of Contents**

The Emergency Economic Stabilization Act which became law on October 3, 2008 raised the amount of federal deposit insurance coverage for all deposit accounts to \$250,000. This provision of the Act is scheduled to expire on December 31, 2009. In addition, on October 14, 2008 the FDIC announced a new program – the Temporary Liquidity Guarantee Program, which provides FDIC coverage on non-interest bearing deposit transaction accounts and certain other accounts regardless of dollar amount. This new program is scheduled to expire December 31, 2009.

The Federal Deposit Insurance Corporation regulations assess insurance premiums based on an institution's risk. Under this assessment system, the Federal Deposit Insurance Corporation evaluates the risk of each financial institution based on its supervisory rating, financial ratios, and long-term debt issuer rating. The rates for nearly all of the financial institutions industry vary between five and seven cents for every \$100 of domestic deposits. Federal law requires the Federal Deposit Insurance Corporation to establish a deposit reserve ratio for the deposit insurance fund of between 1.15% and 1.50% of estimated deposits. The Federal Deposit Insurance Corporation has designated the reserve ratio for the deposit insurance fund through the first quarter of 2009 at 1.25% of estimated insured deposits.

Effective March 31, 2006, the Federal Deposit Insurance Corporation merged the Bank Insurance Fund ( BIF ) and the Savings Association Insurance Fund ( SAIF ) into a single fund called the Deposit Insurance Fund. In addition to the Federal Deposit Insurance Corporation assessments, the Financing Corporation ( FICO ) is authorized to impose and collect, with the approval of the Federal Deposit Insurance Corporation, assessments for anticipated payments, issuance costs and custodial fees on bonds issued by the FICO in the 1980s to recapitalize the Federal Savings and Loan Insurance Corporation. The bonds issued by the FICO are due to mature in 2017 through 2019. For the quarter ended June 30, 2008, the annualized FICO assessment was equal to 1.14 basis points for each \$100 in domestic deposits maintained at an institution.

Recent failures have significantly increases the Deposit Insurance Fund's (the DIF or the fund) loss provisions, resulting in a decline in the reserve ratio. As of June 30, 2008, the reserve ratio stood at 1.01%, 18 basis points below the reserve ratio as of March 31, 2008. This is the lowest reserve ratio for a combined bank and thrift insurance fund since March 31, 1995. Staff expects a higher rate of insured institution failures in the next few years compared to recent years; thus, the reserve ratio may continue to decline. Because the fund reserve ratio has fallen below 1.15% and is expected to remain below 1.15%, the FDIC is required to establish and implement a restoration plan to restore the reserve ratio to 1.15%. Absent extraordinary circumstances, the reserve ratio must be returned to at least 1.15% no later than five years after establishment of the plan.

On October 6, 2008 the FDIC issued a Notice of Proposed Rulemaking on Risk-Bases Assessments and the Designated Reserve Ratio for 2009. The proposal calls for raising premiums by seven basis points during the first quarter of 2009, with a series of additional risk-based adjustments that would take effect in the second quarter of 2009. Under the proposal, premiums for well capitalized banks will increase from five to seven basis points to twelve to fourteen basis points for the first quarter of 2009. After that, base rates for well capitalized banks would be set at ten to fourteen basis points with additional adjustments resulting in base rates between eight and twenty-one basis points. Included in the proposed additional adjustments are reductions of up to two basis for banks with tier one ratios greater than ten percent and increases for banks with secured liabilities greater than fifteen percent of domestic deposits and banks with brokered deposits in excess of ten percent of domestic deposits.

### **Capital Requirements**

Any savings institution that fails any of the capital requirements is subject to possible enforcement actions by the Office of Thrift Supervision. Such actions could include a capital directive, a cease and desist order, civil money penalties, the establishment of restrictions on an institution's operations, termination of federal deposit insurance, and the appointment of a conservator or receiver. Certain actions are required by law. The Office of Thrift Supervision's capital regulation provides that such actions, through enforcement proceedings or otherwise, could require one or more of a variety of corrective actions.

We are also subject to more stringent capital guidelines of the Pennsylvania Department of Banking. Although not adopted in regulation form, the Pennsylvania Department of Banking utilizes capital standards of 6% leverage capital and 10% risk-based capital. The components of leverage and risk-based capital are substantially the same as those defined by the Office of Thrift Supervision.

---

## **Table of Contents**

### **Loans-to-One-Borrower Limitation**

Under federal regulations, with certain limited exceptions, a Pennsylvania chartered savings association may lend to a single or related group of borrowers on an unsecured basis an amount equal to 15% of its unimpaired capital and surplus. An additional amount, equal to 10% of unimpaired capital and surplus, may be lent if such loan is secured by readily marketable collateral, which is defined to include certain securities, but generally does not include real estate. Our internal policy, however, is to not make a commercial loan in excess of \$5.0 million, nor to allow more than \$7.5 million in total loan relationships with any one borrower, including the borrower's residential mortgage and consumer loans. However, in special circumstances this limit may be exceeded subject to the approval of the Management Loan Committee in addition to a majority of the members of the Board of Directors.

### **Prompt Corrective Action**

Under federal regulations, a savings association is deemed to be (i) well capitalized if it has total risk-based capital of 10.0% or more, has a Tier I risk-based capital ratio of 6.0% or more, has a Tier I leverage capital ratio of 5.0% or more and is not subject to any written capital order or directive; (ii) adequately capitalized if it has a total risk-based capital ratio of 8.0% or more, a Tier I risk-based capital ratio of 4.0% or more and a Tier I leverage capital ratio of 4.0% or more (3.0% under certain circumstances) and does not meet the definition of well capitalized; (iii) undercapitalized if it has a total risk-based capital ratio that is less than 8.0%, a Tier I risk-based capital ratio that is less than 4.0% or a Tier I leverage capital ratio that is less than 4.0% (3.0% under certain circumstances); (iv) significantly undercapitalized if it has a total risk-based capital ratio that is less than 6.0%, a Tier I risk-based capital ratio that is less than 3.0% or a Tier I leverage capital ratio that is less than 3.0%; and (v) critically undercapitalized if it has a ratio of tangible equity to total assets that is equal to or less than 2.0%. Federal regulations also specify circumstances under which a federal banking agency may reclassify a well capitalized institution as adequately capitalized and may require an adequately capitalized institution to comply with supervisory actions as if it were in the next lower category (except that the Office of Thrift Supervision may not reclassify a significantly undercapitalized institution as critically undercapitalized). As of September 30, 2008, the Bank was a well-capitalized institution for this purpose.

### **The USA PATRIOT Act**

The USA PATRIOT Act of 2001 gave the federal government new powers to address terrorist threats through enhanced domestic security measures, expanded surveillance powers, increased information sharing and broadened anti-money laundering requirements. The USA PATRIOT Act also required the federal banking agencies to take into consideration the effectiveness of controls designed to combat money laundering activities in determining whether to approve a merger or other acquisition application of a member institution. Accordingly, if we engage in a merger or other acquisition, our controls designed to combat money laundering would be considered as part of the application process. We have established policies, procedures and systems designed to comply with these regulations.

### **Holding Company Regulation**

ESSA Bancorp, Inc. is a unitary savings and loan holding company, subject to regulation and supervision by the Office of Thrift Supervision. The Office of Thrift Supervision will have enforcement authority over ESSA Bancorp, Inc. and its non-savings institution subsidiaries. Among other things, this authority permits the Office of Thrift Supervision to restrict or prohibit activities that are determined to be a risk to ESSA Bank & Trust.

Under prior law, a unitary savings and loan holding company generally had no regulatory restrictions on the types of business activities in which it could engage, provided that its subsidiary savings association was a qualified thrift lender. The Gramm-Leach-Bliley Act of 1999, however, restricts unitary savings and loan holding companies not existing on, or applied for before, May 4, 1999 to those activities permissible for financial holding companies or for multiple savings and loan holding companies. The Company is

---

## **Table of Contents**

not a grandfathered unitary savings and loan holding company and, therefore, is limited to the activities permissible for financial holding companies or for multiple savings and loan holding companies. A financial holding company may engage in activities that are financial in nature, including underwriting equity securities and insurance as well as activities that are incidental to financial activities or complementary to a financial activity. A multiple savings and loan holding company is generally limited to activities permissible for bank holding companies under Section 4(c)(8) of the Bank Holding Company Act, subject to the prior approval of the Office of Thrift Supervision, and certain additional activities authorized by Office of Thrift Supervision regulations.

Federal law prohibits a savings and loan holding company, directly or indirectly, or through one or more subsidiaries, from acquiring control of another savings institution or holding company thereof, without prior written approval of the Office of Thrift Supervision. It also prohibits the acquisition or retention of, with specified exceptions, more than 5% of the equity securities of a company engaged in activities that are not closely related to banking or financial in nature or acquiring or retaining control of an institution that is not federally insured. In evaluating applications by holding companies to acquire savings institutions, the Office of Thrift Supervision must consider the financial and managerial resources and future prospects of the savings institution involved, the effect of the acquisition on the risk to the insurance fund, the convenience and needs of the community, the effectiveness of each parties anti-money laundering program, and competitive factors.

### **Federal Securities Laws**

Shares of ESSA Bancorp, Inc. s common stock are registered with the SEC under Section 12(b) of the Securities Exchange Act of 1934, as amended (the Exchange Act ). ESSA Bancorp, Inc. is also subject to the proxy rules, tender offer rules, insider trading restrictions, annual and periodic reporting, and other requirements of the Exchange Act.

### **Sarbanes-Oxley Act of 2002**

The Sarbanes-Oxley Act of 2002 was enacted in response to public concerns regarding corporate accountability in connection with certain accounting scandals. The stated goals of the Sarbanes-Oxley Act are to increase corporate responsibility, to provide for enhanced penalties for accounting and auditing improprieties at publicly traded companies, and to protect investors by improving the accuracy and reliability of corporate disclosures pursuant to the securities laws. The Sarbanes-Oxley Act generally applies to all companies that file or are required to file periodic reports with the Securities and Exchange Commission, under the Securities Exchange Act of 1934.

The Sarbanes-Oxley Act includes specific additional disclosure requirements, requires the Securities and Exchange Commission and national securities exchanges to adopt extensive additional disclosure, corporate governance and other related rules, and mandates further studies of certain issues by the Securities and Exchange Commission. The Sarbanes-Oxley Act represents significant federal involvement in matters traditionally left to state regulatory systems, such as the regulation of the accounting profession, and to corporate law, such as the relationship between a board of directors and management and between a board of directors and its committees.

Although we have and will continue to incur additional expense in complying with the provisions of the Sarbanes-Oxley Act and the resulting regulations, management does not expect that such compliance will have a material impact on our results of operations or financial condition.

### **Regulatory Enforcement Authority**

Federal law provides federal banking regulators with substantial enforcement powers. This enforcement authority includes, among other things, the ability to assess civil money penalties, to issue cease-and-desist or removal orders, and to initiate injunctive actions against banking organizations and institution-affiliated parties, as defined. In general, these enforcement actions may be initiated for violations of laws and regulations and unsafe or unsound practices. Other actions or inactions may provide the basis for enforcement action, including misleading or untimely reports filed with regulatory authorities.

### **Dividends**

Our ability to pay dividends depends, to a large extent, upon ESSA Bank & Trust s ability to pay dividends to ESSA Bancorp. The Savings Association Code states, in part, that dividends may be declared and paid by the Bank only out of net earnings for the

---

**Table of Contents**

then current year. A dividend may not be declared or paid if it would impair the general reserves of ESSA Bank & Trust required to be maintained under the Savings Association Code. In addition, we are required to notify the Office of Thrift Supervision prior to declaring a dividend to the Company, and receive the nonobjection of the Office of Thrift Supervision to any such dividend.

**FEDERAL AND STATE TAXATION**

**Federal Taxation**

**General.** ESSA Bancorp, Inc. and ESSA Bank & Trust are subject to federal income taxation in the same general manner as other corporations, with some exceptions discussed below. The following discussion of federal taxation is intended only to summarize material federal income tax matters and is not a comprehensive description of the tax rules applicable to ESSA Bancorp, Inc. and ESSA Bank & Trust.

**Method of Accounting.** For federal income tax purposes, ESSA Bancorp, Inc. currently reports its income and expenses on the accrual method of accounting and uses a tax year ending September 30th for filing its consolidated federal income tax returns. The Small Business Protection Act of 1996 eliminated the use of the reserve method of accounting for bad debt reserves by savings institutions, effective for taxable years beginning after 1995.

**Bad Debt Reserves.** Prior to the Small Business Protection Act of 1996, ESSA Bank & Trust was permitted to establish a reserve for bad debts for tax purposes and to make annual additions to the reserve. These additions could, within specified formula limits, be deducted in arriving at ESSA Bank & Trust's taxable income. As a result of the Small Business Protection Act of 1996, ESSA Bank & Trust must use the specific charge off method in computing its bad debt deduction for tax purposes.

**Taxable Distributions and Recapture.** Prior to the Small Business Protection Act of 1996, bad debt reserves created prior to 1988 were subject to recapture into taxable income if ESSA Bank & Trust failed to meet certain thrift asset and definition tests. The Small Business Protection Act of 1996 eliminated these thrift-related recapture rules. However, under current law, pre-1988 reserves remain subject to tax recapture should ESSA Bank & Trust make certain distributions from its tax bad debt reserve or cease to maintain a financial institution charter. At September 30, 2008, ESSA Bank & Trust's total federal pre-1988 reserve was approximately \$4.3 million. This reserve reflects the cumulative effects of federal tax deductions by ESSA Bank & Trust for which no federal income tax provision has been made.

**Minimum Tax.** The Internal Revenue Code of 1986, as amended, imposes an alternative minimum tax at a rate of 20% on a base of regular taxable income plus certain tax preferences, referred to as alternative minimum taxable income. The alternative minimum tax is payable to the extent alternative minimum tax income is in excess of the regular income tax. Net operating losses can, in general, offset no more than 90% of alternative minimum taxable income. Certain payments of alternative minimum tax may be used as credits against regular tax liabilities in future years. At September 30, 2008, ESSA Bank & Trust had no minimum tax credit carryforward.

**Net Operating Loss Carryovers.** A financial institution may carry back net operating losses to the preceding two taxable years (five years for losses incurred in 2001 and 2002) and forward to the succeeding 20 taxable years. At September 30, 2008, ESSA Bank & Trust had no net operating loss carryforward for federal income tax purposes.

**Corporate Dividends.** We may exclude from our income 100% of dividends received from ESSA Bank & Trust as a member of the same affiliated group of corporations.

**Audit of Tax Returns.** ESSA Bank & Trust's federal income tax returns have not been audited in the most recent five-year period. The 2004, 2005 and 2006 tax years remain open.

## **Table of Contents**

### **State Taxation**

**Pennsylvania State Taxation.** ESSA Bancorp, Inc. is subject to the Pennsylvania Corporate Net Income Tax, Capital Stock and Franchise Tax. The Corporation Net Income Tax rate for 2008 is 9.99% and is imposed on unconsolidated taxable income for federal purposes with certain adjustments. In general, the Capital Stock and Franchise Tax is a property tax imposed on a corporation's capital stock value at a statutorily defined rate, such value being determined in accordance with a fixed formula based upon average net income and net worth. ESSA Bank & Trust is subject to tax under the Pennsylvania Mutual Thrift Institutions Tax Act, as amended to include thrift institutions having capital stock. Pursuant to the Mutual Thrift Institutions Tax, the tax rate is 11.5%. The Mutual Thrift Institutions Tax exempts ESSA Bank & Trust from other taxes imposed by the Commonwealth of Pennsylvania for state income tax purposes and from all local taxation imposed by political subdivisions, except taxes on real estate and real estate transfers. The Mutual Thrift Institutions Tax is a tax upon net earnings, determined in accordance with generally accepted accounting principles with certain adjustments. The Mutual Thrift Institutions Tax, in computing income according to generally accepted accounting principles, allows for the deduction of interest earned on state and federal obligations, while disallowing a percentage of a thrift's interest expense deduction in the proportion of interest income on those securities to the overall interest income of ESSA Bank & Trust. Net operating losses, if any, thereafter can be carried forward three years for Mutual Thrift Institutions Tax purposes.

### **Item 1A. Risk Factors**

#### **Future Changes in Interest Rates Could Reduce Our Profits.**

Our ability to make a profit largely depends on our net interest income, which could be negatively affected by changes in interest rates. Net interest income is the difference between:

1. the interest income we earn on our interest-earning assets, such as loans and securities; and
2. the interest expense we pay on our interest-bearing liabilities, such as deposits and borrowings.

From September, 2007 through October, 2008, the Federal Reserve Board of Governors decreased its target for the federal funds rate from 5.25% to 1.00%. While these short term market interest rates (which we use as a guide to price our deposits) decreased, longer term market interest rates (which we use as a guide to price our longer term loans) did not decrease to the same degree. As a result of this steepening of the market yield curve the Company's net interest spread has increased from 1.93% for the quarter ended December 31, 2007 to 2.23% for the quarter ended September 30, 2008. If this steepening were to continue the initial increase in our interest rate spread would be reduced as our assets begin to re-price downward.

In addition, changes in interest rates can affect the average life of loans and mortgage-backed and related securities. A reduction in interest rates results in increased prepayments of loans and mortgage-backed and related securities, as borrowers refinance their loans in order to reduce their borrowing costs. This creates reinvestment risk, which is the risk that we may not be able to reinvest prepayments at rates that are comparable to the rates we earned on the prepaid loans or securities. Alternatively, increases in interest rates may decrease loan demand and/or make it more difficult for borrowers to repay adjustable rate loans.

Changes in interest rates also affect the current market value of our interest-earning securities portfolio. Generally, the value of securities moves inversely with changes in interest rates. At September 30, 2008, the fair value of our debt securities available for sale totaled \$204.0 million. Unrealized net losses on these available for sale securities totaled approximately \$275,000 at September 30, 2008 and are reported as a separate component of stockholders' equity. Decreases in the fair value of securities available for sale in future periods would have an adverse effect on stockholders' equity.

We evaluate interest rate sensitivity by estimating the change in ESSA Bank & Trust's net portfolio value over a range of interest rate scenarios. Net portfolio value is the discounted present value of expected cash flows from assets, liabilities and off-balance sheet contracts. At September 30, 2008, in the event of an immediate 200 basis point increase in interest rates, the Office of Thrift Supervision model projects that we would experience a \$29.8 million, or 20.0%, decrease in net portfolio value. See Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations Management of Market Risk.

---

## **Table of Contents**

### **A Downturn in the Local Economy or a Decline in Real Estate Values Could Reduce Our Profits.**

Nearly all of our real estate loans are secured by real estate in Monroe and Northampton Counties, Pennsylvania. As a result of this concentration, a downturn in this market area could cause significant increases in nonperforming loans, which would reduce our profits. Additionally, a decrease in asset quality could require additions to our allowance for loan losses through increased provisions for loan losses, which would hurt our profits. In recent years, there have been significant increases in real estate values in our market area. As a result of rising home prices, our loans have been well collateralized. A decline in real estate values could cause some of our mortgage loans to become inadequately collateralized, which would expose us to a greater risk of loss. For a discussion of our market area, see Item 1. Business Market Area.

### **Recent Negative Developments in the Financial Industry and the Domestic and International Credit Markets may Adversely Affect our Operations and Results.**

Negative developments in the latter half of 2007 and during 2008 in the global credit and securitization markets have resulted in uncertainty in the financial markets in general with the expectation of the general economic downturn continuing into 2009. Loan portfolio quality has deteriorated at many institutions. In addition, the values of real estate collateral supporting many commercial loans and home mortgages have declined and may continue to decline. Bank and bank holding company stock prices have been negatively affected, as has the ability of banks and bank holding companies to raise capital or borrow in the debt markets. As a result, the potential exists for new federal or state laws and regulations regarding lending and funding practices and liquidity standards, and bank regulatory agencies are expected to be active in responding to concerns and trends identified in examinations, including the expected issuance of many formal enforcement orders. Negative developments in the financial industry and the domestic and international credit markets, and the impact of new legislation in response to those developments, may negatively impact our operations by restricting our business operations, including our ability to originate or sell loans, and adversely impact our financial performance. In addition, these risks could affect the value of our loan portfolio as well as the value of our investment portfolio, which would also negatively affect our financial performance.

### **Our Continued Emphasis On Commercial Real Estate Lending Could Expose Us To Increased Lending Risks.**

Our business strategy centers on continuing our emphasis on commercial real estate lending. We have grown our loan portfolio in recent years with respect to this type of loan and intend to continue to emphasize this type of lending. At September 30, 2008, \$69.5 million, or 9.8%, of our total loan portfolio consisted of commercial real estate loans. Loans secured by commercial real estate generally expose a lender to greater risk of non-payment and loss than one- to four-family residential mortgage loans because repayment of the commercial real estate loans often depends on the successful operation of the property and the income stream of the underlying property. Additionally, such loans typically involve larger loan balances to single borrowers or groups of related borrowers compared to one- to four-family residential mortgage loans. Accordingly, an adverse development with respect to one loan or one credit relationship can expose us to greater risk of loss compared to an adverse development with respect to a one- to four-family residential mortgage loan. We seek to minimize these risks through our underwriting policies, which require such loans to be qualified on the basis of the property's collateral value, net income and debt service ratio; however, there is no assurance that our underwriting policies will protect us from credit-related losses.

At September 30, 2008, our largest commercial real estate lending relationship was \$4.8 million of loans located in Monroe County, Pennsylvania and secured by real estate. See Item 1. Business Lending Activities Commercial Real Estate Loans.

### **Strong Competition Within Our Market Areas May Limit Our Growth and Profitability.**

Competition in the banking and financial services industry is intense. In our market areas, we compete with commercial banks, savings institutions, mortgage brokerage firms, credit unions, finance companies, mutual funds, insurance companies, and brokerage and investment banking firms operating locally and elsewhere. Some of our competitors have greater name recognition and market

**Table of Contents**

presence that benefit them in attracting business, and offer certain services that we do not or cannot provide. In addition, larger competitors may be able to price loans and deposits more aggressively than we do, which could affect our ability to grow and remain profitable on a long-term basis. Our profitability depends upon our continued ability to successfully compete in our market areas. For additional information see Item 1. Business Competition.

**If Our Allowance for Loan Losses is Not Sufficient to Cover Actual Loan Losses, Our Earnings Will Decrease.**

We make various assumptions and judgments about the collectability of our loan portfolio, including the creditworthiness of our borrowers and the value of the real estate and other assets serving as collateral for the repayment of many of our loans. In determining the amount of the allowance for loan losses, we review our loans and our loss and delinquency experience, and we evaluate economic conditions. If our assumptions are incorrect, our allowance for loan losses may not be sufficient to cover losses inherent in our loan portfolio, resulting in additions to our allowance. While our allowance for loan losses was 0.69% of total loans at September 30, 2008, material additions to our allowance could materially decrease our net income.

In addition, bank regulators periodically review our allowance for loan losses and may require us to increase our provision for loan losses or recognize further loan charge-offs. Any increase in our allowance for loan losses or loan charge-offs as required by these regulatory authorities might have a material adverse effect on our financial condition and results of operations.

**Item 3. Legal Proceedings**

The Company and its subsidiaries are subject to various legal actions arising in the normal course of business. In the opinion of management, the resolution of these legal actions is not expected to have a material adverse effect on the Company's results of operations.

**Table of Contents****Item 4. Submission of Matters to a Vote of Security Holders**

During the fourth quarter of the fiscal year covered by this report, the Company did not submit any matters to the vote of security holders.

**PART II****Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities**

Our shares of common stock are traded on the Nasdaq Global Market under the symbol ESSA. The approximate number of holders of record of ESSA Bancorp, Inc.'s common stock as of September 30, 2008 was 2,636. Certain shares of ESSA Bancorp, Inc. are held in nominee or street name and accordingly, the number of beneficial owners of such shares is not known or included in the foregoing number. The following tables present quarterly market information for ESSA Bancorp, Inc.'s common stock for the period ended September 30, 2007 and September 30, 2008. ESSA Bancorp, Inc. began trading on the Nasdaq Global Market on April 3, 2007. Accordingly, no information prior to this date is available. The following information was provided by the Nasdaq Stock Market.

<b>Fiscal 2008</b>	<b>High</b>	<b>Low</b>	<b>Dividends</b>
Quarter ended September 30, 2008	\$ 14.10	\$ 12.90	\$ 625,000
Quarter ended June 30, 2008	12.95	11.50	625,000
Quarter ended March 31, 2008	12.17	10.50	
Quarter ended December 31, 2007	11.90	9.56	
<b>Fiscal 2007</b>	<b>High</b>	<b>Low</b>	<b>Dividends</b>

Quarter ended June 30, 2007	12.21	11.05	

The Board of Directors has the authority to declare cash dividends on shares of common stock, subject to statutory and regulatory requirements. We began to pay quarterly cash dividends in the third quarter of fiscal 2008. In determining whether and in what amount to pay a cash dividend in the future, the Board will take into account a number of factors, including capital requirements, our consolidated financial condition and results of operations, tax considerations, statutory and regulatory limitations and general economic conditions. No assurances can be given that cash dividends will not be reduced or eliminated in the future.

The sources of funds for the payment of a cash dividend are the retained proceeds from the initial sale of shares of common stock and earnings on those proceeds, interest and principal payments with respect to ESSA Bancorp, Inc.'s loan to the Employee Stock Ownership Plan, and dividends from ESSA Bank & Trust. For a discussion of the limitations applicable to ESSA Bank & Trust's ability to pay dividends, see Business Supervision and Regulation.

**Table of Contents****Stock Performance Graph**

Set forth hereunder is a stock performance graph comparing (a) the cumulative total return on the common stock between April 4, 2007 (the date the ESSA Bancorp, Inc. completed its initial public offering) and September 30, 2008, (b) the cumulative total return on stock included in the SNL Thrift Index over such period, and (c) the cumulative total return on stocks included in the Russell 2000 Index over such period. Cumulative return assumes the reinvestment of dividends, and is expressed in dollars based on an assumed investment of \$100.

There can be no assurance that the ESSA Bancorp, Inc.'s stock performance will continue in the future with the same or similar trend depicted in the graph. ESSA Bancorp, Inc. will not make or endorse any predictions as to future stock performance.

The Company repurchased Common Stock in the quarter ending September 30, 2008. On May 27, 2008, the Board of Directors approved a stock repurchase program and authorized the repurchase of up to 15% of the Company's outstanding shares of common stock. Stock repurchases will be made from time to time and may be effected through open market purchases, block trades and in privately negotiated transactions. Repurchased stock will be held as treasury stock and will be available for general corporate purposes. No time limit was placed on the duration of the share repurchase program. As of September 30, 2008, 793,553 shares have been repurchased under the program, including 601,053 shares repurchased in the quarter described in the following table:

**Table of Contents****Company Purchases of Common Stock**

Period	Total number of shares purchased	Average price paid per share	Total number of shares purchased as part of publicly announced plans or programs	Maximum number of shares that may yet be purchased under the plans or programs
July 1, 2008 through July 31, 2008	256,200	12.88	256,200	2,098,435

- (1) The interest rate spread represents the difference between the weighted-average yield on a fully tax equivalent basis on interest-earning assets and the weighted-average cost of interest-bearing liabilities for the year.
- (2) The net interest margin represents net interest income on a fully tax equivalent basis as a percent of average interest-earning assets for the year.
- (3) The efficiency ratio represents non-interest expense divided by the sum of net interest income and non-interest income.

**Table of Contents**

**Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations**  
**Business Strategy**

Our business strategy is to grow and improve our profitability by:

Increasing customer relationships through the offering of excellent service and the distribution of that service through effective delivery systems;

Continuing to transform into a full service community bank by meeting the financial services needs of our customers;

Continuing to develop into a high performing financial institution, in part by increasing interest revenue and fee income;

Remaining within our risk management parameters; and

Employing affordable technology to increase profitability and improve customer service.

We intend to continue to pursue our business strategy, subject to changes necessitated by future market conditions and other factors. We also intend to focus on the following:

***Increasing customer relationships through a continued commitment to service and enhancing products and delivery systems.*** We will continue to increase customer relationships by focusing on customer satisfaction with regard to service, products, systems and operations. We have upgraded and expanded certain of our facilities, including our corporate center, to provide additional capacity to manage future growth and expand our delivery systems.

***Continuing to transform into a full-service community bank.*** We continue to transform from a traditional savings association into a full-service community bank. During the last several years, we have begun to offer a wide variety of commercial loans and deposits, as well as trust and brokerage services.

***Continuing to develop into a high performing financial institution.*** We will continue to enhance profitability by focusing on increasing non-interest income as well as increasing commercial products, including commercial real estate lending, which often have a higher profit margin than more traditional products. We also will pursue lower-cost commercial deposits as part of this strategy.

***Remaining within our risk management parameters.*** We place significant emphasis on risk management and compliance training for all of our directors, officers and employees. We focus on establishing regulatory compliance programs to determine the degree of such compliance and to maintain the trust of our customers and community.

***Employing cost-effective technology to increase profitability and improve customer service.*** We will continue to upgrade our technology in an efficient manner. We have implemented new software for marketing purposes and have upgraded both our internal and external communication systems.

*Continuing our emphasis on commercial real estate lending to improve our overall performance.* We intend to continue to emphasize the origination of higher interest rate margin commercial real estate loans as market conditions, regulations and other factors permit. We have expanded our commercial banking capabilities by adding experienced commercial bankers, and enhancing our direct marketing efforts to local businesses.

---

## **Table of Contents**

***Expanding our banking franchise through branching and acquisitions.*** We will attempt to use the net proceeds from the offering, as well as our new stock holding company structure, to expand our market footprint through *de novo* branching as well as through acquisitions of banks, savings institutions and other financial service providers in our primary market area. We will also consider establishing *de novo* branches or acquiring financial institutions in contiguous counties. We opened a new branch office in Tannersville, Pennsylvania in March, 2007. We will continue to review and assess locations for new branches both within Monroe County and the contiguous counties around Monroe. There can be no assurance that we will be able to consummate any acquisitions or establish any additional new branches. We may explore acquisition opportunities involving other banks and thrifts, and possibly financial service companies, when and as they arise, as a means of supplementing internal growth, filling gaps in our current geographic market area and expanding our customer base, product lines and internal capabilities, although we have no current plans, arrangements or understandings to make any acquisitions.

***Maintaining the quality of our loan portfolio.*** Maintaining the quality of our loan portfolio is a key factor in managing our growth. We will continue to use customary risk management techniques, such as independent internal and external loan reviews, risk-focused portfolio credit analysis and field inspections of collateral in overseeing the performance of our loan portfolio.

### **Critical Accounting Policies**

We consider accounting policies that require management to exercise significant judgment or discretion or make significant assumptions that have, or could have, a material impact on the carrying value of certain assets or on income, to be critical accounting policies. We consider the following to be our critical accounting policies:

***Allowance for Loan Losses.*** The allowance for loan losses is the estimated amount considered necessary to cover credit losses inherent in the loan portfolio at the balance sheet date. The allowance is established through the provision for loan losses which is charged against income. In determining the allowance for loan losses, management makes significant estimates and has identified this policy as one of our most critical. The methodology for determining the allowance for loan losses is considered a critical accounting policy by management due to the high degree of judgment involved, the subjectivity of the assumptions utilized and the potential for changes in the economic environment that could result in changes to the amount of the recorded allowance for loan losses.

As a substantial amount of our loan portfolio is collateralized by real estate, appraisals of the underlying value of property securing loans and discounted cash flow valuations of properties are critical in determining the amount of the allowance required for specific loans. Assumptions for appraisals and discounted cash flow valuations are instrumental in determining the value of properties. Overly optimistic assumptions or negative changes to assumptions could significantly impact the valuation of a property securing a loan and the related allowance determined. The assumptions supporting such appraisals and discounted cash flow valuations are carefully reviewed by management to determine that the resulting values reasonably reflect amounts realizable on the related loans.

Management performs a quarterly evaluation of the adequacy of the allowance for loan losses. Consideration is given to a variety of factors in establishing this estimate including, but not limited to, current economic conditions, delinquency statistics, geographic and industry concentrations, the adequacy of the underlying collateral, the financial strength of the borrower, results of internal and external loan reviews and other relevant factors. This evaluation is inherently subjective, as it requires material estimates that may be susceptible to significant revision based on changes in economic and real estate market conditions.

The analysis of the allowance for loan losses has two components: specific and general allocations. Specific allocations are made for loans that are determined to be impaired. Impairment is measured by determining the present value of expected future cash flows or, for collateral-dependent loans, the fair value of the collateral adjusted for market conditions and selling expenses. The general allocation is determined by segregating the remaining loans by type of loan, risk weighting (if applicable) and payment history. We also analyze historical loss experience, delinquency trends, general economic conditions and geographic and industry concentrations. This analysis establishes factors that are applied to the loan groups to determine the amount of the general allocations. Actual loan losses may be significantly more than the allowance for loan losses we have established which could have a material negative effect on our financial results.

**Table of Contents**

**Other-than-Temporary Investment Security Impairment.** Securities are evaluated periodically to determine whether a decline in their value is other-than-temporary. Management utilizes criteria such as the magnitude and duration of the decline, in addition to the reasons underlying the decline, to determine whether the loss in value is other-than-temporary. The term *other-than-temporary* is not intended to indicate that the decline is permanent, but indicates that the prospect for a near-term recovery of value is not necessarily favorable, or that there is a lack of evidence to support a realizable value equal to or greater than the carrying value of the investment. Once a decline in value is determined to be other-than-temporary, the value of the security is reduced and a corresponding charge to earnings is recognized.

**Deferred Income Taxes.** We use the asset and liability method of accounting for income taxes. Under this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. If current available information raises doubt as to the realization of the deferred tax assets, a valuation allowance is established. We consider the determination of this valuation allowance to be a critical accounting policy because of the need to exercise significant judgment in evaluating the amount and timing of recognition of deferred tax liabilities and assets, including projections of future taxable income. These judgments and estimates are reviewed on a continual basis as regulatory and business factors change. A valuation allowance for deferred tax assets may be required if the amount of taxes recoverable through loss carryback declines, or if we project lower levels of future taxable income. Such a valuation allowance would be established through a charge to income tax expense which would adversely affect our operating results.

The Company adopted the provisions of FIN No. 48, *Accounting for Uncertainty in Income Taxes*, an interpretation of FASB Statement 109, effective October 1, 2007. FIN No. 48 prescribes a recognition threshold and a measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return benefits from tax positions should be recognized in the financial statements only when it is more likely than not that the tax position will be sustained upon examination by the appropriate taxing authority that would have full knowledge of all relevant information. A tax position that meets the more-likely-than-not recognition threshold is measured at the largest amount of benefit that is greater than 50 percent likely of being realized upon ultimate settlement. Tax positions that previously failed to meet the more-likely-than-not recognition threshold should be recognized in the first subsequent financial reporting period in which that threshold is met. Previously recognized tax positions that no longer meet the more-likely-than-not recognition threshold should be derecognized in the first subsequent financial reporting period in which that threshold is no longer met. FIN No. 48 also provides guidance on the accounting for and disclosure of unrecognized tax benefits, interest, and penalties. In accordance with FIN No. 48, interest or penalties incurred for income taxes will be recorded as a component of other expenses. The adoption of FIN No. 48 did not have a significant impact on the Company's financial statements.

**Comparison of Financial Condition at September 30, 2008 and September 30, 2007**

**Total Assets.** Total assets increased \$83.1 million, or 9.1%, to \$993.5 million at September 30, 2008, compared to \$910.4 million at September 30, 2007. This increase was primarily due to increases in certificates of deposit, net loans receivable, and Federal Home Loan Bank stock offset, in part by decreases in cash and due from banks, interest bearing deposits with other banks and investment securities held to maturity.

**Cash and Due from Banks.** Cash and due from banks decreased \$2.2 million or 21.0% to \$8.4 million at September 30, 2008 from \$10.6 million at September 30, 2007. The primary reason for this decrease was decreases in the Company's cash on hand at the Bank's branch locations combined with a decrease in the Company's cash balance at the Federal Reserve Bank of Philadelphia. Both of these cash balances fluctuate up and down based on the customer trends and demands within our branch network.

**Interest-Bearing Deposits with Other Institutions.** Interest-bearing deposits with other institutions decreased \$1.9 million, or 31.5%, to \$4.2 million at September 30, 2008 from \$6.2 million at September 30, 2007. The primary reason for the decrease was a decrease in the Company's interest bearing demand deposit account at the FHLBank Pittsburgh of \$1.9 million.

---

**Table of Contents**

**Investment Securities Available for Sale.** Investment securities available for sale decreased \$1.2 million, or 1% to \$204.1 million at September 30, 2008 from \$205.3 million at September 30, 2007. The decrease was due primarily to an increase of \$33.3 million in the Company's portfolio of mortgage-backed securities issued by United States sponsored agencies or entities offset by a \$33.5 million decrease in the Company's portfolio of United States government agency securities along with the previously discussed \$802,000 other than temporary impairment write down of Fannie Mae preferred stock owned by the Company. The growth in the mortgage-backed securities was due to the reinvestment of the proceeds from United States government agency security maturities.

**Investment Securities Held to Maturity.** Investment securities held to maturity decreased \$5.3 million or 30.8% to \$11.9 million at September 30, 2008 from \$17.1 million at September 30, 2007. The primary reasons for this decrease were the maturities of U.S. Government Agency Securities and repayments received on mortgage-backed securities issued by U.S. Government Agencies.

**Net Loans.** Net loans increased \$87.1 million, or 14.0%, to \$706.9 million at September 30, 2008 from \$619.8 million at September 30, 2007. Loan growth was primarily attributable to growth in several product categories as a result of our continued marketing efforts and a decrease in the number of non-financial institution competitors. One- to-four-family residential mortgages increased by \$71.9 million to \$572.0 million at September 30, 2008 from \$500.1 million at September 30, 2007. For the same period, commercial real estate loans increased by \$11.1 million to \$69.5 million from \$58.4 million, construction loans outstanding increased by \$454,000 to \$8.3 million at September 30, 2008 from \$7.8 million at September 30, 2007, and commercial loans increased by \$4.3 million to \$12.0 million at September 30, 2008 from \$7.7 million at September 30, 2007.

**Federal Home Loan Bank Stock.** Federal Home Loan Bank stock increased \$2.7 million, or 16.6%, to \$19.2 million at September 30, 2008 from \$16.5 at September 30, 2007. The Bank is a member of the Federal Home Loan Bank System. As a member, the Bank maintains an investment in the capital stock of the FHLBank Pittsburgh in an amount not less than 70 basis points of the outstanding unused FHLB borrowing capacity or 1/20 of its outstanding FHLB borrowings, whichever is greater, as calculated throughout the year. FHLBank Pittsburgh borrowings outstanding at September 30, 2008 were \$367.8 million compared to borrowings of \$313.9 million at September 30, 2007.

**Deposits.** Deposits decreased by \$14.2 million, or 3.7%, to \$370.5 million at September 30, 2008 from \$384.7 million at September 30, 2007. The decrease in deposits was primarily due to decreases in savings and club accounts of \$4.5 million, retail certificates of deposit of \$32.6 million and brokered certificates of deposit of \$9.1 million offset in part by an increase in money market accounts of \$35.0 million. The overall decline in deposits was primarily attributable to the increasingly competitive environment within the Company's market area. The decline in brokered certificates was the result of the Company's decision not to renew maturing certificates based on the cost of renewing those certificates compared to other available funding sources. Money market accounts increased in part in response to rate promotions for that product. At September 30, 2008, the Company had \$10.9 million of brokered certificates of deposit outstanding.

**Borrowed Funds.** Borrowed funds, short term and other, increased \$98.8 million or 31.5% to \$412.8 million at September 30, 2008 from \$313.9 million at September 30, 2007. Included in borrowed funds at September 30, 2008 were \$45.0 million of repurchase agreements with various financial institution third parties. Except for these borrowings all borrowed funds are from the FHLBank Pittsburgh. The increase in borrowed funds was primarily due to the need to offset the decline in deposits, to fund additional loan growth and to purchase investment securities and certificates of deposit.

**Stockholders' Equity.** Stockholders' equity decreased by \$4.6 million, or 2.3% to \$200.1 million at September 30, 2008 from \$204.7 million at September 30, 2007. This decrease was primarily the result of stock repurchases of \$10.4 million and the payment of cash dividends of \$1.3 million which were partially offset by net income of \$6.1 million for the year ending September 30, 2008.

**Table of Contents****Comparison of Operating Results for the Years Ended September 30, 2008 and September 30, 2007**

**Net Income.** Net income increased \$11.2 million to \$6.1 million for the fiscal year ended September 30, 2008 from a net loss of \$5.1 million for the fiscal year ended September 30, 2007. The increase was primarily the result of a one time contribution of \$12.7 million made by the Company during the year ended September 30, 2007 to the ESSA Bank & Trust Foundation, in conjunction with the Company's stock offering which was consummated on April 3, 2007.

**Net Interest Income.** Net interest income increased by \$4.7 million, or 21.7%, to \$26.4 million for fiscal year 2008 from \$21.7 million for fiscal year 2007. The increase was primarily attributable to an increase in net average interest-earning assets of \$72.9 million offset, in part, by a decrease of 9 basis points in the interest rate spread to 2.09% for fiscal year 2008 from 2.18% for fiscal year 2007.

**Interest Income.** Interest income increased \$6.6 million, or 14.4% to \$52.1 million for fiscal year 2008 from \$45.5 million for fiscal year 2007. The increase resulted from a \$137.5 million increase in average interest-earning assets which had the effect of increasing interest income by \$7.7 million. In addition, there was a 16 basis point decrease in the overall yield on interest earning assets to 5.68% for fiscal year 2008, from 5.84% for fiscal year 2007 which decreased interest income by \$1.1 million. The average balance of loans during 2008 increased \$78.7 million over the average balance during 2007, along with increases in the average balances of investment securities of \$7.7 million and mortgage-backed securities of \$53.0 million. In addition, average Federal Home Loan Bank stock increased \$3.2 million along with a decrease in the average balance of other interest earning assets of \$5.2 million. The primary reasons for the increase in investment securities and mortgage-backed securities was the partial reinvestment of borrowing proceeds into these assets along with the investment of the majority of the net proceeds from the stock offering into short-term, investment grade debt and mortgage-backed securities issued by United States government sponsored agencies or entities. Average FHLB stock increased as a result of the Bank's increase in borrowings from the FHLBank Pittsburgh. As a member of the FHLB system, the Bank maintains an investment in the capital stock of the FHLBank Pittsburgh in an amount not less than 70 basis points of the outstanding unused FHLB borrowing capacity or 1/20 of its outstanding FHLB borrowings, whichever is greater, as calculated throughout the year. The decrease in average other interest earning assets was the result of a decrease in the average balance of interest earning deposits held by the Company in its FHLBank Pittsburgh demand account of \$2.0 million. Funds received during the Company's stock offering contributed to an increase in the Bank's FHLBank Pittsburgh average demand deposit account balance for the year ended September 30, 2007. The average yield on loans decreased to 6.03% for the fiscal year 2008, from 6.10% for the fiscal year 2007. The average yields on investment securities decreased to 4.77% from 5.11% and the average yields on mortgage backed securities increased to 4.93% from 4.92% for the 2008 and 2007 periods, respectively.

**Interest Expense.** Interest expense increased \$1.8 million, or 7.7% to \$25.6 million for fiscal year 2008 from \$23.8 million for fiscal year 2007. The increase resulted from a \$64.6 million increase in average interest-bearing liabilities, which had the effect of increasing interest expense by \$3.4 million. In addition, there was a 7 basis point decrease in the overall cost of interest-bearing liabilities to 3.59% for fiscal 2008 from 3.66% for fiscal 2007, which decreased interest expense by \$1.6 million. Average savings and club accounts decreased by \$12.4 million, average NOW accounts decreased \$5.8 million, average money market accounts increased \$22.7 million and average certificates of deposit decreased \$36.0 million. For fiscal 2008, average borrowed funds increased \$96.1 million over 2007. The cost of money market accounts decreased to 2.9% for fiscal year 2008 from 3.12% for fiscal year 2007. The cost of certificates of deposit decreased to 4.19% from 4.48% and the cost of borrowed funds decreased to 4.48% from 4.81% for fiscal 2008 and 2007, respectively.

**Provision for Loan Losses.** ESSA Bancorp, Inc. establishes provisions for loan losses, which are charged to earnings, at a level necessary to absorb known and inherent losses that are both probable and reasonably estimable at the date of the financial statements. In evaluating the level of the allowance for loan losses, management considers historical loss experience, the types of loans and the amount of loans in the loan portfolio, adverse situations that may affect the borrower's ability to repay, the estimated value of any underlying collateral, peer group information and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available or as future events occur. After an evaluation of these factors, management made a provision of \$900,000 for fiscal year 2008 compared to a \$360,000 provision for the 2007 fiscal year. At September 30, 2008 the Company had two commercial loan relationships whose loans were judged by

**Table of Contents**

management to be impaired. A commercial real estate relationship with combined outstanding loans of \$2.5 million was allocated a specific loan loss allowance of \$457,000. A commercial business relationship with combined loans of \$201,000 was allocated a specific loan loss allowance of \$77,000. These specific allowance allocations were also considered in the Company's evaluation for its provision for loan losses for the fiscal year ended September 30, 2008. The allowance for loan losses was \$4.9 million or 0.69% of loans outstanding at September 30, 2008, compared to \$4.2 million, or 0.67% of loans outstanding at September 30, 2007.

Determining the amount of the allowance for loan losses necessarily involves a high degree of judgment. Management reviews the level of the allowance on a quarterly basis, and establishes the provision for loan losses based on the factors set forth in the preceding paragraph. Historically, the Bank's loan portfolio has consisted primarily of one-to-four-family residential mortgage loans. However, our current business plan calls for increases in commercial real estate loan originations. As management evaluates the allowance for loan losses, the increased risk associated with larger non-homogenous commercial real estate may result in large additions to the allowance for loan losses in future periods. Loans secured by commercial real estate generally expose a lender to greater risk of non-payment and loss than one-to-four family residential mortgage loans because repayment of the loans often depends on the successful operation of the property and the income stream of the underlying property. Additionally, such loans typically involve larger loan balances to single borrowers or groups of related borrowers compared to one-to-four family residential mortgage loans. Accordingly, an adverse development with respect to one loan or one credit relationship can expose us to greater risk of loss compared to an adverse development with respect to a one-to-four family residential mortgage loan.

Although we believe that we use the best information available to establish the allowance for loan losses, future additions to the allowance may be necessary, based on estimates that are susceptible to change as a result of changes in economic conditions and other factors. In addition, the Office of Thrift Supervision, as an integral part of its examination process, will periodically review our allowance for loan losses. This agency may require us to recognize adjustments to the allowance, based on its judgments about information available to it at the time of its examination.

**Non-Interest Income.** Non-interest income decreased \$693,000 or 12.6%, to \$4.8 million for the year ended September 30, 2008, from \$5.5 million for the comparable 2007 period. The decrease was primarily attributable to the one time other-than temporary-impairment pretax charge of \$802,000 related to Fannie Mae preferred stock the Company owns. Excluding the one time charge, noninterest income increased \$109,000, or by 2.0% for the year ended September 30, 2008, compared to the year ended September 30, 2007. This increase was primarily due to increases in service charges and fees on loans of \$37,000 and trust and investment fees of \$100,000 for fiscal 2008 compared to fiscal 2007.

**Non-Interest Expense.** Non-interest expense decreased \$10.0 million, or 32.1%, to \$21.2 million for fiscal year 2008 from \$31.2 million for the comparable period in 2007. The primary reason for the decrease was the \$12.7 million contribution made to the Foundation during the 2007 period. Excluding the contribution, noninterest expense increased \$2.7 million or 14.5%. The primary reasons for the increase excluding the contribution were increases in compensation and employee benefits of \$1.8 million, occupancy and equipment of \$189,000, professional fees of \$617,000 and other expenses of \$98,000. Compensation and employee benefits increased primarily as a result of normal compensation increases of \$677,000, along with an increase in the expense related to the ESOP of \$237,000 and the additional expense of \$717,000 related to the Company's Equity Incentive Plan. Occupancy and equipment costs increased primarily as a result of increases in rental costs of \$54,000, along with increases in depreciation expense of \$62,000. Professional fees increased primarily as a result of increased legal, accounting and regulatory fees associated with being a public reporting company, including approximately \$270,000 related to the Company's compliance with Section 404 of the Sarbanes-Oxley Act. Other expense increased primarily due to increased loan processing costs related to increased loan volume.

**Income Taxes.** Income tax expense of \$3.1 million was recognized for fiscal year 2008 compared to an income tax expense of \$782,000 recognized for fiscal year 2007. The \$802,000 impairment loss associated with the Company's Fannie Mae perpetual preferred stock was characterized as a capital loss at September 30, 2008. As such and since the Company had no capital gains to offset this loss during the 2008 fiscal year, there was no tax benefit related to this loss for the fiscal year ended September 30, 2008. The Emergency Economic Stabilization Act which became law on October 3, 2008, among other things, re-characterized such losses as operating. The Company expects to realize a tax benefit of approximately \$317,000 during the first quarter of its 2009 fiscal year as a result of this change.

**Table of Contents****Comparison of Operating Results for the Years Ended September 30, 2007 and September 30, 2006**

**Net Income.** Net income decreased \$9.1 million to a net loss of \$5.1 million for the fiscal year ended September 30, 2007 from net income of \$4.0 million for the fiscal year ended September 30, 2006. The decrease was primarily the result of a \$12.7 million pre-tax charitable contribution to the ESSA Bank & Trust Foundation. The contribution was made in conjunction with the Company's initial public stock offering and was detailed in the Company's prospectus.

**Net Interest Income.** Net interest income increased by \$4.5 million, or 25.9%, to \$21.7 million for fiscal year 2007 from \$17.2 million for fiscal year 2006. The increase was primarily attributable to an increase in net average interest-earning assets of \$83.7 million offset, in part, by a decrease of 28 basis points in the interest rate spread to 2.18% for fiscal year 2007 from 2.46% for fiscal year 2006.

**Interest Income.** Interest income increased \$9.0 million, or 24.9% to \$45.5 million for fiscal year 2007 from \$36.5 for fiscal year 2006. The increase resulted from a \$137.7 million increase in average interest-earning assets which had the effect of increasing interest income by \$7.4 million. In addition, there was a 16 basis point increase in the overall yield on interest earning assets to 5.84% for fiscal year 2007, from 5.68% for fiscal year 2006 which increased interest income by \$1.7 million. Loans increased on average \$54.2 million between the two periods, along with increases in the average balances of investment securities of \$21.4 million and mortgage-backed securities of \$53.4 million. In addition, average Federal Home Loan Bank stock increased \$2.5 million along with an increase in the average balance of other interest earning assets of \$6.2 million. The primary reason for the increase in other interest earning assets was funds received for stock orders during the Company's initial stock offering which was consummated on April 3, 2007. Cash received during the offering period was held until April 3, 2007 when it was used to execute stock purchases or refunded to the prospective purchaser. While held by the Company, this cash was maintained in a demand account at the Federal Home Loan Bank. The primary reasons for the increase in investment securities and mortgage-backed securities was the partial reinvestment of borrowing proceeds into these assets along with the investment of the majority of the net proceeds from the stock offering into short-term, investment grade debt and mortgage-backed securities issued by United States government sponsored agencies or entities. The average yield on loans increased to 6.10% for the fiscal year 2007, from 5.95% for the fiscal year 2006. The average yields on investment securities increased to 5.11% from 4.49% and the average yields on mortgage backed securities increased to 4.92% from 4.30% for the 2007 and 2006 periods, respectively.

**Interest Expense.** Interest expense increased \$4.6 million, or 23.9% to \$23.8 million for fiscal year 2007 from \$19.2 million for fiscal year 2006. The increase resulted from a \$54.0 million increase in average interest-bearing liabilities, which had the effect of increasing interest expense by \$2.5 million. In addition, there was a 44 basis point increase in the overall cost of interest-bearing liabilities to 3.66% for fiscal 2007 from 3.22% for fiscal 2006, which increased interest expense by \$2.1 million. Average savings and club accounts decreased by \$4.1 million, average NOW accounts increased \$1.1 million, average money market accounts increased \$3.7 million and average certificates of deposit increased \$7.7 million. For the same comparative periods, average borrowed funds increased \$45.5 million. The cost of money market accounts increased to 3.12% for fiscal year 2007 from 2.17% for fiscal year 2006. The cost of certificates of deposit increased to 4.48% from 4.02% and the cost of borrowed funds increased to 4.81% from 4.47% for the same respective periods.

**Provision for Loan Losses.** ESSA Bancorp, Inc. establishes provisions for loan losses, which are charged to earnings, at a level necessary to absorb known and inherent losses that are both probable and reasonably estimable at the date of the financial statements. In evaluating the level of the allowance for loan losses, management considers historical loss experience, the types of loans and the amount of loans in the loan portfolio, adverse situations that may affect the borrower's ability to repay, the estimated value of any underlying collateral, peer group information and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available or as future events occur. After an evaluation of these factors, management made a provision of \$360,000 for fiscal year 2007 compared to a \$300,000 provision for 2006 fiscal year. The allowance for loan losses was \$4.2 million, or 0.67% of loans outstanding at September 30, 2007, compared to \$3.9 million, or 0.69% of loans outstanding at September 30, 2006.

**Table of Contents**

**Non-Interest Income.** Non-interest income in total remained relatively unchanged at \$5.5 million for fiscal years 2007 and 2006. For the comparative periods, service fees on deposit accounts decreased \$333,000 while service charges and fees on loans increased \$96,000, trust and investment fees increased \$122,000 and earnings on bank-owned life insurance increased \$53,000. The decrease in service fees on deposit accounts was due to a decrease in non-sufficient fund charges of \$263,000 primarily related to volume. Increases in service charges and fees on loans, and trust and investment fees were volume driven. The increase in earnings on bank owned life insurance was due to an increase in yield.

**Non-Interest Expense.** Non-interest expense increased \$14.5 million, or 86.9%, to \$31.2 million for fiscal year 2007 from \$16.7 million for fiscal year 2006. The primary reason for this increase was the increase of \$12.3 million in contribution to charitable foundation expense for fiscal year 2007 compared to fiscal year 2006. This increase was the result of the Company's contribution of \$12.7 million to the ESSA Bank & Trust Foundation made in connection with the Company's initial public stock offering. In addition, increases in compensation and employee benefits of \$1.6 million, occupancy and equipment of \$255,000, advertising of \$118,000 and other expenses of \$125,000 contributed to the increase. The increase in compensation and employee benefits was the result of normal increases in compensation and related taxes of \$516,000 along with increases in employee benefits of \$591,000, employee incentives of \$377,000 and directors' compensation of \$166,000. In connection with the Company's initial public stock offering the Company implemented an employee stock ownership plan (ESOP). Expenses related to this plan for fiscal year 2007 were \$339,000 and were included in the employee benefit increase noted above. The increase in occupancy and equipment was the result of increases in office lease expense of \$98,000 along with an increase in depreciation expense of \$122,000. Advertising expense increased as a result of the Company's continued effort to increase its exposure in its primary market area. The increase in other expense was the result of increases in office supplies and loan processing expenses.

**Income Taxes.** Income tax expense of \$782,000 was recognized for fiscal year 2007 compared to an income tax expense of \$1.8 million recognized for fiscal year 2006. The tax deduction generated by the contribution to the ESSA Bank & Trust Foundation exceeded the allowable federal income tax deduction limitations resulting in the establishment of a valuation allowance on the contribution carry forward at September 30, 2007.

**Table of Contents**

**Average Balances and Yields.** The following table sets forth average balance sheets, average yields and costs, and certain other information for the periods indicated. All average balances are monthly average balances. The yields set forth below include the effect of deferred fees and discounts and premiums that are amortized or accreted to interest income.

	For the Years Ended September 30,								
	2008 Interest			2007 Interest			2006 Interest

Net interest margin <sup>(5)</sup>			2.88%			2.78%			2.70%
Average interest-earning assets to average interest-bearing liabilities		128.60%			120.22%		108.00%		

## Edgar Filing: ESSA Bancorp, Inc. - Form 10-K

- (1) Non-accruing loans are included in the outstanding loan balances.
- (2) Interest income on loans includes net amortized revenues (costs) on loans totaling \$287,000 for 2008, \$440,000 for 2007, and \$603,000 for 2006.
- (3) Held to maturity securities are reported as amortized cost. Available for sale securities are reported at fair value.
- (4) Yields on tax exempt securities have been calculated on a fully tax equivalent basis assuming a tax rate of 34%.
- (5) Represents the difference between interest earned and interest paid, divided by average total interest earning assets.

**Table of Contents****Rate/Volume Analysis**

The following table presents the effects of changing rates and volumes on our net interest income for the years indicated. The rate column shows the effects attributable to changes in rate (changes in rate multiplied by prior volume). The volume column shows the effects attributable to changes in volume (changes in volume multiplied by prior rate). The net column represents the sum of the prior columns. For purposes of this table, changes attributable to both rate and volume, which cannot be segregated, have been allocated proportionately based on the changes due to rate and the changes due to volume.

	For the Years Ended September 30, 2008 vs. 2007			For the Years Ended September 30, 2007 vs. 2006

**Management of Market Risk**

**General.** The majority of our assets and liabilities are monetary in nature. Consequently, our most significant form of market risk is interest rate risk. Our assets, consisting primarily of mortgage loans, have longer maturities than our liabilities, consisting primarily of deposits and borrowings. As a result, a principal part of our business strategy is to manage interest rate risk and reduce the exposure of our net interest income to changes in market interest rates. Accordingly, our Board of Directors has approved guidelines for managing the interest rate risk inherent in our assets and liabilities, given our business strategy, operating environment, capital, liquidity and performance objectives. Senior management monitors the level of interest rate risk on a regular basis and the asset/liability committee meets quarterly to review our asset/liability policies and interest rate risk position.

We have sought to manage our interest rate risk in order to minimize the exposure of our earnings and capital to changes in interest rates. The net proceeds from the offering has increased our capital and provided management with greater flexibility to manage our interest rate risk.

**Net Portfolio Value.** The Office of Thrift Supervision requires the computation of amounts by which the net present value of an institution's cash flow from assets, liabilities and off balance sheet items (the institution's net portfolio value or NPV) would change in the event of a range of assumed changes in market interest rates. The Office of Thrift Supervision provides all institutions that file a Consolidated Maturity/Rate Schedule as a part of their quarterly Thrift Financial Report with an interest rate sensitivity report of net portfolio value. The Office of Thrift Supervision simulation model uses a discounted cash flow analysis and an option-based pricing approach to measuring the interest rate sensitivity of net portfolio value. Historically, the Office of Thrift Supervision model estimated the economic value of each type of asset, liability and off-balance sheet contract under the assumption that the

**Table of Contents**

United States Treasury yield curve increases or decreases instantaneously by 50 to 300 basis points (100 basis points in the event of an interest rate decrease) in 50 and 100 basis point increments. A basis point equals one-hundredth of one percent, and 100 basis points equals one percent. An increase in interest rates from 3% to 4% would mean, for example, a 100 basis point increase in the Change in Interest Rates column below. The Office of Thrift Supervision provides us the results of the interest rate sensitivity model, which is based on information we provide to the Office of Thrift Supervision to estimate the sensitivity of our net portfolio value.

The table below sets forth, as of September 30, 2008, the estimated changes in our net portfolio value that would result from the designated instantaneous changes in the United States Treasury yield curve. Computations of prospective effects of hypothetical interest rate changes are based on numerous assumptions including relative levels of market interest rates, loan prepayments and deposit decay, and should not be relied upon as indicative of actual results.

Change in Interest Rates (basis points) (1)	Estimated NPV (2) (Dollars in thousands)	Estimated Increase (Decrease) in NPV		NPV as a Percentage of Present Value of Assets (3)	
		Amount	Percent	NPV Ratio (4)	Increase (Decrease) (basis points)
+300	\$ 105,195	\$ (47,343)	(31)%	11.96%	(403)
+200	122,778	(29,760)	(20)%	13.56%	(243)
+100	139,822	(12,716)	(8)%	15.01%	(98)
+50	146,876	(5,662)	(4)%	15.57%	(42)
	152,538			15.98%	
-50	156,030	3,493	2%	16.20%	22
-100	158,680	6,142	4%	16.34%	36

- (1) Assumes an instantaneous uniform change in interest rates at all maturities.
- (2) NPV is the discounted present value of expected cash flows from assets, liabilities and off-balance sheet contracts.
- (3) Present value of assets represents the discounted present value of incoming cash flows on interest-earning assets.
- (4) NPV Ratio represents NPV divided by the present value of assets.

The table above indicates that at September 30, 2008, in the event of an immediate 100 basis point decrease in interest rates, we would experience a 4.0% increase in net portfolio value. In the event of an immediate 100 basis point increase in interest rates, we would experience an 8.0% decrease in net portfolio value.

Certain shortcomings are inherent in the methodology used in the above interest rate risk measurement. Modeling changes in net portfolio value requires making certain assumptions that may or may not reflect the manner in which actual yields and costs respond to changes in market interest rates. In this regard, the net portfolio value table presented assumes that the composition of our interest-sensitive assets and liabilities existing at the beginning of a period remains constant over the period being measured and assumes that a particular change in interest rates is reflected uniformly across the yield curve regardless of the duration or repricing of specific assets and liabilities. Accordingly, although the net portfolio value table provides an indication of our interest rate risk exposure at a particular point in time, such measurements are not intended to and do not provide a precise forecast of the effect of changes in market interest rates on our net interest income and will differ from actual results.

**Liquidity and Capital Resources**

We maintain liquid assets at levels we consider adequate to meet both our short-term and long-term liquidity needs. We adjust our liquidity levels to fund deposit outflows, repay our borrowings and to fund loan commitments. We also adjust liquidity as appropriate to meet asset and liability management objectives.

Our primary sources of liquidity are deposits, amortization and prepayment of loans and mortgage-backed securities, maturities of investment securities and other short-term investments, and earnings and funds provided from operations, as well as access to Federal Home Loan Bank advances and other borrowings. While scheduled principal repayments on loans and mortgage-backed securities are a relatively predictable source of funds, deposit flows and loan prepayments are greatly influenced by market interest rates, economic conditions, and rates offered by our competition. We set the interest rates on our deposits to maintain a desired level of total deposits.

**Table of Contents**

A portion of our liquidity consists of cash and cash equivalents and borrowings, which are a product of our operating, investing and financing activities. At September 30, 2008, \$12.6 million of our assets were invested in cash and cash equivalents. Our primary sources of cash are principal repayments on loans, proceeds from the maturities of investment securities, principal repayments of mortgage-backed securities and increases in deposit accounts. Short-term investment securities (maturing in one year or less) totaled \$25.6 million at September 30, 2008. As of September 30, 2008, we had \$367.8 million in borrowings outstanding from the Federal Home Loan Bank of Pittsburgh and \$45.0 million in repurchase agreements. We have access to Federal Home Loan Bank advances of up to approximately \$573.0 million.

At September 30, 2008, we had \$60.9 million in loan commitments outstanding, which included \$21.2 million in undisbursed construction loans, \$23.6 million in unused home equity lines of credit and \$5.6 million in commercial lines of credit. Certificates of deposit due within one year of September 30, 2008 totaled \$102.3 million, or 66.5% of certificates of deposit. If these maturing deposits do not remain with us, we will be required to seek other sources of funds, including other certificates of deposit and borrowings. Depending on market conditions, we may be required to pay higher rates on such deposits or other borrowings than we currently pay on the certificates of deposit due on or before September 30, 2008. We believe, however, based on past experience that a significant portion of our certificates of deposit will remain with us. We have the ability to attract and retain deposits by adjusting the interest rates offered.

As reported in the Consolidated Statements of Cash Flows, our cash flows are classified for financial reporting purposes as operating, investing or financing cash flows. Net cash provided by operating activities was \$10.7 million, \$4.6 million and \$1.8 million for the years ended September 30, 2008, 2007 and 2006, respectively. These amounts differ from our net income because of a variety of cash receipts and disbursements that did not affect net income for the respective periods. In particular, we made a contribution of common stock to the ESSA Bank & Trust Foundation of \$11.1 million during the year ended September 30, 2007. Net cash used in investing activities was \$89.5 million, \$179.2 million and \$75.2 million in fiscal years 2008, 2007 and 2006, respectively, principally reflecting our loan and investment security activities in the respective periods. Investment security cash flows had the most significant effect, as net cash utilized in purchases amounted to \$119.5 million, \$174.6 million and \$52.2 million in the years ended September 30, 2008, 2007 and 2006, respectively. Deposit and borrowing cash flows have traditionally comprised most of our financing activities which resulted in net cash provided of \$74.6 million in fiscal year 2008, \$178.6 million in fiscal year 2007 and \$65.8 million in fiscal year 2006. In addition, during fiscal 2008 we used \$9.4 million to repurchase our stock as part of a previously disclosed stock repurchase plan. In 2007, we completed our initial public offering in which we received net proceeds of \$155.8 million. This was offset partially by the purchase of common stock in connection with the ESOP of \$13.6 million. The net effect of our operating, investing and financing activities was to reduce our cash and cash equivalents from \$12.7 million at the beginning of fiscal year 2006 to \$12.6 million at the end of fiscal year 2008.

The following table summarizes our significant fixed and determinable contractual principal obligations and other funding needs by payment date at September 30, 2008. The payment amounts represent those amounts due to the recipient and do not include any unamortized premiums or discounts or other similar carrying amount adjustments.

Contractual Obligations	Payments Due by Period				Total
	Less than One Year	One to Three Years	Three to Five Years	More than Five Years	
	(In thousands)				
Long-term debt	\$ 68,000	\$ 156,747	\$ 111,500	\$ 37,000	\$ 373,247
Operating leases	373	625	420	1,851	3,269
Certificates of deposit	102,292	31,657	19,773		153,722
Total	\$ 170,665	\$ 189,029	\$ 131,693	\$ 38,851	\$ 530,238
Commitments to extend credit	\$ 38,137	\$	\$ 18	\$ 22,701	\$ 60,856

We also have obligations under our post retirement plan as described in note 15 to the Consolidated Financial Statements. The post retirement benefit payments represent actuarially determined future payments to eligible plan participants. We expect to contribute \$409,000 to our post retirement plan in 2009. In addition, as part of the reorganization and stock offering, the ESOP trust borrowed funds from ESSA Bancorp, Inc. and used those funds to purchase a number of shares equal to 8% of the common stock issued in the offering.

## **Table of Contents**

**Off-Balance Sheet Arrangements.** In the normal course of operations, we engage in a variety of financial transactions that, in accordance with generally accepted accounting principles, are not recorded in our financial statements. These transactions involve, to varying degrees, elements of credit, interest rate and liquidity risk. Such transactions are used primarily to manage customers' requests for funding and take the form of loan commitments and lines of credit. For information about our loan commitments, letters of credit and unused lines of credit, see note 13 of the notes to the Consolidated Financial Statements.

For fiscal year 2008, we did not engage in any off-balance-sheet transactions other than loan origination commitments and standby letters of credit in the normal course of our lending activities.

### **Impact of Inflation and Changing Prices**

The financial statements and related notes of ESSA Bancorp, Inc. have been prepared in accordance with United States generally accepted accounting principles ( GAAP ). GAAP generally requires the measurement of financial position and operating results in terms of historical dollars without consideration for changes in the relative purchasing power of money over time due to inflation. The impact of inflation is reflected in the increased cost of our operations. Unlike industrial companies, our assets and liabilities are primarily monetary in nature. As a result, changes in market interest rates have a greater impact on performance than the effects of inflation.

### **Item 7A. Quantitative and Qualitative Disclosures About Market Risk**

For information regarding market risk see Item 7- Management's Discussion and Analysis of Financial Conditions and Results of Operation.

### **Item 8. Financial Statements and Supplementary Data**

The Financial Statements are included in Part III, Item 15 of this Form 10-K.

### **Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure**

Not Applicable.

### **Item 9A. Controls and Procedures**

#### (a) Evaluation of disclosure controls and procedures.

Under the supervision and with the participation of our management, including our Principle Executive Officer and Principle Financial Officer, we evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the fiscal year (the Evaluation Date ). Based upon that evaluation, the Principle Executive Officer and Principle Financial Officer concluded that, as of the Evaluation Date, our disclosure controls and procedures were effective in timely alerting them to the material information relating to us (or our consolidated subsidiaries) required to be included in our periodic SEC filings.

#### (b) Changes in internal controls.

There were no changes in our internal control over financial reporting that occurred during the fourth quarter of fiscal 2008 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting and we identified no material weaknesses requiring corrective action with respect to those controls.

---

**Table of Contents**

(c) Management report on internal control over financial reporting.

The management of ESSA Bancorp, Inc. (the Company) is responsible for establishing and maintaining adequate internal control over financial reporting. ESSA Bancorp's internal control system is a process designed to provide reasonable assurance to the Company's management and board of directors regarding the preparation and fair presentation of published financial statements.

Our internal control over financial reporting includes policies and procedures that pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect transactions and dispositions of assets; provide reasonable assurances that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. generally accepted accounting principles, and that receipts and expenditures are being made only in accordance with authorizations of management and the directors of ESSA Bancorp; and provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of ESSA Bancorp's assets that could have a material effect on our financial statements.

All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

ESSA Bancorp's management assessed the effectiveness of the Company's internal control over financial reporting as of September 30, 2008. In making this assessment, we used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in *Internal Control-Integrated Framework*. Based on our assessment we believe that, as of September 30, 2008, the Company's internal control over financial reporting is effective based on those criteria.

ESSA Bancorp's independent registered public accounting firm that audited the consolidated financial statements has issued an audit report on the effectiveness of the Company's internal control over financial reporting as of September 30, 2008. See the Consolidated Financial Statements of ESSA Bancorp, Inc. and related notes included elsewhere in this Annual Report.

The Sarbanes-Oxley Act Section 302 Certifications have been filed with the SEC as exhibit 31.1 and exhibit 31.2 to this Annual Report on Form 10-K.

**REPORT ON MANAGEMENT'S ASSESSMENT OF  
INTERNAL CONTROL OVER FINANCIAL REPORTING**

ESSA Bancorp, Inc. is responsible for the preparation, integrity, and fair presentation of the consolidated financial statements included in this annual report. The consolidated financial statements and notes included in this annual report have been prepared in conformity with United States generally accepted accounting principles and necessarily include some amounts that are based on management's best estimates and judgments.

We, as management of ESSA Bancorp, Inc., are responsible for establishing and maintaining effective internal control over financial reporting that is designed to produce reliable financial statements in conformity with United States generally accepted accounting principles. The system of internal control over financial reporting as it relates to the financial statements is evaluated for effectiveness by management and tested for reliability. Actions are taken to correct potential deficiencies as they are identified. Any system of internal control, no matter how well designed, has inherent limitations, including the possibility that a control can be circumvented or overridden and misstatements due to error or fraud may occur and not be detected. Also, because of changes in conditions, internal control effectiveness may vary over time. Accordingly, even an effective system of internal control will provide only reasonable assurance with respect to financial statement preparation.

Management assessed the Company's system of internal control over financial reporting as of September 30, 2008, in relation to criteria for effective internal control over financial reporting as described in Internal Control - Integrated Framework, issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this assessment, management concludes that, as of September 30, 2008, its system of internal control over financial reporting is effective and meets the criteria of the Internal Control - Integrated Framework. S.R. Snodgrass A.C., independent registered public accounting firm, has issued an attestation report on management's assessment of the Company's internal control over financial reporting.

**Table of Contents**

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM ON INTERNAL  
CONTROL OVER FINANCIAL REPORTING**

We have audited ESSA Bancorp, Inc.'s internal control over financial reporting as of September 30, 2008, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. ESSA Bancorp, Inc.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Report on Management's Assessment of Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, ESSA Bancorp, Inc. maintained, in all material respects, effective internal control over financial reporting as of September 30, 2008, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

**Table of Contents**

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of ESSA Bancorp, Inc. as of September 30, 2008 and 2007, and the related consolidated statements of income, changes in stockholders' equity, and cash flows for each of the three years in the period ended September 30, 2008 and our report dated December 11, 2008, expressed an unqualified opinion.

Wexford, PA  
December 11, 2008

**Table of Contents**

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM ON  
FINANCIAL STATEMENTS**

Board of Directors and Stockholders

ESSA Bancorp, Inc.

We have audited the accompanying consolidated balance sheet of ESSA Bancorp, Inc. and subsidiaries as of September 30, 2008 and 2007, and the related consolidated statements of income, changes in stockholders' equity, and cash flows for each of the three years in the period ended September 30, 2008. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of ESSA Bancorp, Inc. and subsidiaries as of September 30, 2008 and 2007, and the results of their operations and their cash flows for each of the three years in the period ended September 30, 2008, in conformity with U.S. generally accepted accounting principles.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), ESSA Bancorp, Inc. and subsidiaries' internal control over financial reporting as of September 30, 2008, based on criteria established in *Internal Control Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated December 11, 2008, expressed an unqualified opinion on the effectiveness of ESSA Bancorp, Inc.'s internal control over financial reporting.

As discussed in Note 15 to the consolidated financial statements, ESSA Bancorp, Inc. changed its method of accounting for its defined benefit pension plans as of September 30, 2007, in accordance with Financial Accounting Standards Board Statement No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans*.

**ESSA BANCORP, INC. AND SUBSIDIARY**

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

**1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

A summary of significant accounting and reporting policies applied in the presentation of the accompanying financial statements follows:

**Nature of Operations and Basis of Presentation**

The consolidated financial statements include the accounts of ESSA Bancorp, Inc. (the Company), and its wholly owned subsidiary, ESSA Bank & Trust (the Bank), and the Bank's wholly owned subsidiaries, ESSACOR, Inc. and Pocono Investment Company. The primary purpose of the Company is to act as a holding company for the Bank. The Company is subject to regulation and supervision by the Office of Thrift Supervision (the OTS). The Bank is a Pennsylvania-chartered savings association located in Stroudsburg, Pennsylvania. The Bank's primary business consists of the taking of deposits and granting of loans to customers, generally in Monroe and Northampton counties, Pennsylvania. The Bank is subject to regulation and supervision by the Pennsylvania Department of Banking and the OTS. The investment in subsidiary on the parent company's financial statements is carried at the parent company's equity in the underlying net assets.

ESSACOR, Inc. is a Pennsylvania corporation that is currently inactive. Pocono Investment Company is a Delaware corporation formed as an investment company subsidiary to hold and manage certain investments of the Bank, including certain intellectual property. All inter-company transactions have been eliminated in consolidation.

**Use of Estimates in the Preparation of Financial Statements**

The accounting principles followed by the Company and its subsidiary and the methods of applying these principles conform to U.S. generally accepted accounting principles and to general practice within the banking industry. In preparing the consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the balance sheet date and related revenues and expenses for the period. Actual results could differ significantly from those estimates.

**Securities**

Management determines the appropriate classification of debt securities at the time of purchase and reevaluates such designation as of each balance sheet date.

Securities classified as available for sale are those securities that the Company intends to hold for an indefinite period of time but not necessarily to maturity. Any decision to sell a security classified as available for sale would be based on various factors, including significant movement in interest rates, changes in maturity mix of the Company's assets and liabilities, liquidity needs, regulatory capital considerations, and other similar factors. Securities available for sale are carried at fair value. Unrealized gains and losses are reported in other comprehensive income, net of the related deferred tax effects. Realized gains or losses, determined on the basis of the cost of the specific securities sold, are included in earnings. Premiums and discounts are recognized in interest income using the interest method over the period to maturity.

Securities classified as held to maturity are those securities the Company has both the intent and ability to hold to maturity regardless of changes in market conditions, liquidity needs, or changes in general economic conditions. These securities are carried at cost adjusted for the amortization of premium and accretion of discount, recognized in interest income using the interest method over the period to maturity.

---

**Table of Contents**

**1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)**

**Securities (Continued)**

Declines in the fair value of held-to-maturity and available-for-sale securities below their cost that are deemed to be other than temporary are reflected in earnings as realized losses. In estimating other-than-temporary impairment losses, management considers: (1) the length of time and the extent to which the fair value has been less than cost; (2) the financial condition and near-term prospects of the issuer; and (3) the intent and ability of the Company to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value.

Federal law requires a member institution of the Federal Home Loan Bank ( FHLB ) system to hold stock of its district FHLB according to a predetermined formula. This restricted stock is carried at cost.

**Loans Receivable**

Loans receivable that management has the intent and ability to hold for the foreseeable future or until maturity or payoff are stated at their outstanding unpaid principal balances, net of an allowance for loan losses and any deferred fees and costs. Interest income is accrued on the unpaid principal balance. Loan origination fees, net of certain direct origination costs, are deferred and recognized as an adjustment of the yield (interest income) of the related loans. The Company is generally amortizing these amounts over the contractual life of the loan. Mortgage loans sold in the secondary market are sold without recourse.

The accrual of interest is generally discontinued when the contractual payment of principal or interest has become 90 days past due or management has serious doubts about further collectibility of principal or interest, even though the loan is currently performing. A loan may remain on accrual status if it is in the process of collection and is either guaranteed or well secured. When a loan is placed on nonaccrual status, unpaid interest credited to income is reversed. Interest received on nonaccrual loans generally is either applied against principal or reported as interest income, according to management's judgment as to the collectibility of principal. Generally loans are restored to accrual status when the obligation is brought current, has performed in accordance with the contractual terms for a reasonable period of time, and the ultimate collectibility of the total contractual principal and interest is no longer in doubt.

**Allowance for Loan Losses**

The allowance for loan losses is established through provisions for loan losses charged against income. Loans deemed to be uncollectible are charged against the allowance for loan losses, and subsequent recoveries, if any, are credited to the allowance.

The allowance for loan losses is maintained at a level by management which represents the evaluation of known and inherent risks in the loan portfolio at the consolidated balance sheet date. Management's periodic evaluation of the adequacy of the allowance is based on the Company's past loan loss experience, known and inherent risks in the portfolio, adverse situations that may affect the borrower's ability to repay, the estimated value of any underlying collateral, composition of the loan portfolio, current economic conditions, and other relevant factors. This evaluation is inherently subjective, since it requires material estimates that may be susceptible to significant change, including the amounts and timing of future cash flows expected to be received on impaired loans.

The allowance consists of specific and general components. The specific component relates to loans that are classified as impaired. For such loans an allowance is established when the discounted cash flows (or collateral value or observable market price) of the impaired loan is lower than the carrying value of that loan. The general component covers nonclassified loans and is based on historical loss experience adjusted for qualitative factors.

---

**Table of Contents**

**1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)**

**Allowance for Loan Losses (Continued)**

A loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan-by-loan basis for commercial and construction loans by the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair value of the collateral if the loan is collateral-dependent.

Large groups of smaller balance homogeneous loans are collectively evaluated for impairment. Accordingly, the Company does not separately identify individual consumer and residential mortgage loans for impairment disclosures.

**Loan Servicing**

Servicing assets are recognized as separate assets when rights are acquired through purchase or through sale of financial assets. Capitalized servicing rights are reported in other assets and are amortized into noninterest income in proportion to, and over the period of, the estimated future net servicing income of the underlying financial assets. Servicing assets are evaluated for impairment based upon the fair value of the rights as compared with amortized cost. Fair value is determined using prices for similar assets with similar characteristics, when available, or based upon discounted cash flows using market-based assumptions. Impairment is recognized through a valuation allowance to the extent that fair value is less than the capitalized amount. Total servicing assets included in other assets as of September 30, 2008 and 2007, were \$156,000 and \$183,000, respectively.

**Premises and Equipment**

Premises and equipment are stated at cost less accumulated depreciation. Depreciation is calculated using the straight-line method over the useful lives of the related assets, which range from 10 to 40 years for building and leasehold improvements and 3 to 7 years for furniture, fixtures, and equipment. Expenditures for maintenance and repairs are charged to operations as incurred. Costs of major additions and improvements are capitalized.

**Bank-Owned Life Insurance (BOLI)**

The Company owns insurance on the lives of a certain group of key employees. The policies were purchased to help offset the increase in the costs of various fringe benefit plans, including healthcare. The cash surrender value of these policies is included as an asset on the consolidated statements of financial condition, and any increase in cash surrender value is recorded as noninterest income on the consolidated statement of income. In the event of the death of an insured individual under these policies, the Company would receive a death benefit which would be recorded as noninterest income.

**Real Estate Owned**

Real estate owned acquired in settlement of foreclosed loans is carried at the lower of cost or fair value minus estimated costs to sell. Valuation allowances for estimated losses are provided when the carrying value of the real estate acquired exceeds fair value minus estimated costs to sell. Operating expenses of such properties, net of related income, are expensed in the period incurred. The Company had \$31,000 of foreclosed real estate included in other assets as of September 30, 2008. The Company did not have any foreclosed real estate included in other assets as of September 30, 2007.

**Table of Contents****1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)****Employee Benefit Plans**

The Bank maintains a noncontributory, defined benefit pension plan for all employees who have met age and length of service requirements. The Bank's funding policy is to contribute annually the maximum amount that can be deducted for federal income tax purposes. The Bank also maintains a defined contribution Section 401(k) plan covering eligible employees. Contributions matching those made by eligible employees and an elective contribution are made annually at the discretion of the Board of Directors. In 2007, the Company created an ESOP for the benefit of employees who meet certain eligibility requirements. The Company makes cash contributions to the ESOP on an annual basis.

During 2008, the Company implemented an Equity Incentive Plan to provide for issuance or granting of shares of common stock for stock options or restricted stock. The Company adopted Statement of Financial Accounting Standards ( FAS ) No. 123(R), *Share-Based Payment*, and has recorded stock-based employee compensation cost using the fair value method. Management estimated the fair values of all option grants using the Black-Scholes option-pricing model. Management estimated the expected life of the options using the simplified method allowed under SAB No. 107. The risk-free rate was determined utilizing the treasury yield for the expected life of the option contract.

The fair value of the stock option grants was estimated on the date of the grant using the Black-Scholes option-pricing model with the following weighted-average assumptions:

	<b>2008</b>
Expected dividend yield	0.70%
Expected volatility	8.50%
Risk-free interest rate	3.85%
Expected option life in years	6.50

**Advertising Costs**

In accordance with Statement of Position No. 93-7, *Reporting on Advertising Costs*, the Company expenses all advertising expenditures incurred.

**Transfers of Financial Assets**

Transfers of financial assets are accounted for as sales, when control over the assets has been surrendered. Control over transferred assets is deemed to be surrendered when (1) the assets have been isolated from the Company, (2) the transferee obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets, and (3) the Company does not maintain effective control over the transferred assets through an agreement to repurchase them before their maturity.

---

**Table of Contents**

**1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)**

**Income Taxes**

Deferred tax assets and liabilities are reflected based on the differences between the financial statement and the income tax basis of assets and liabilities using the enacted marginal tax rates. Deferred income tax expense and benefit are based on the changes in the deferred tax assets or liabilities from period to period. Deferred tax assets and liabilities are reflected at currently enacted income tax rates applicable to the period in which such items are expected to be realized or settled. As changes in tax rates are enacted, deferred tax assets and liabilities are adjusted through the provision for income taxes. The Company files a consolidated federal income tax return and individual state income tax returns.

The Company adopted the provisions of FIN No. 48, *Accounting for Uncertainty in Income Taxes*, an interpretation of FASB Statement 109, effective October 1, 2007. FIN No. 48 prescribes a recognition threshold and a measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. Benefits from tax positions should be recognized in the financial statements only when it is more likely than not that the tax position will be sustained upon examination by the appropriate taxing authority that would have full knowledge of all relevant information. A tax position that meets the more-likely-than-not recognition threshold is measured at the largest amount of benefit that is greater than 50 percent likely of being realized upon ultimate settlement. Tax positions that previously failed to meet the more-likely-than-not recognition threshold should be recognized in the first subsequent financial reporting period in which that threshold is met. Previously recognized tax positions that no longer meet the more-likely-than-not recognition threshold should be derecognized in the first subsequent financial reporting period in which that threshold is no longer met. FIN No. 48 also provides guidance on the accounting for and disclosure of unrecognized tax benefits, interest, and penalties. In accordance with FIN No. 48, interest or penalties incurred for income taxes will be recorded as a component of other expenses. The adoption of FIN No. 48 did not have a significant impact on the Company's financial statements.

**Cash and Cash Equivalents**

The Company has defined cash and cash equivalents as cash and due from banks and interest-bearing deposits with other institutions.

**Earnings Per Share**

The Company provides dual presentation of basic and diluted earnings per share. Basic earnings per share are calculated utilizing net income as reported as the numerator and average shares outstanding as the denominator. The computation of diluted earnings per share differs in that the dilutive effects of any options are adjusted for in the denominator.

**Comprehensive Income (Loss)**

The Company is required to present comprehensive income (loss) and its components in a full set of general-purpose financial statements for all periods presented. Other comprehensive income (loss) is composed exclusively of net unrealized holding gains or losses on its available-for-sale investment and mortgage-backed securities portfolio. The Company has elected to report the effects of other comprehensive income (loss) as part of the Consolidated Statement of Changes in Stockholders' Equity.

**Reclassification of Comparative Amounts**

Certain items previously reported have been reclassified to conform to the current year's reporting format. Such reclassifications did not affect net income (loss) or stockholders' equity.

**Table of Contents****1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)****Recent Accounting Pronouncements**

In September 2006, the FASB reached consensus on the guidance provided by Emerging Issues Task Force Issue 06-4 ( EITF 06-4 ), *Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements*. The guidance is applicable to endorsement split-dollar life insurance arrangements, whereby the employer owns and controls the insurance policy, that are associated with a postretirement benefit. EITF 06-4 requires that for a split-dollar life insurance arrangement within the scope of the Issue, an employer should recognize a liability for future benefits in accordance with FAS No. 106 (if, in substance, a postretirement benefit plan exists) or Accounting Principles Board Opinion No. 12 (if the arrangement is, in substance, an individual deferred compensation contract) based on the substantive agreement with the employee. EITF 06-4 is effective for fiscal years beginning after December 15, 2007. The adoption of this EITF is not expected to have a material effect on the Company's results of operations or financial position.

In March 2007, the FASB ratified Emerging Issues Task Force Issue No. 06-10 ( EITF 06-10 ), *Accounting for Collateral Assignment Split-Dollar Life Insurance Agreements*. EITF 06-10 provides guidance for determining a liability for the postretirement benefit obligation as well as recognition and measurement of the associated asset on the basis of the terms of the collateral assignment agreement. EITF 06-10 is effective for fiscal years beginning after December 15, 2007. The adoption of this EITF is not expected to have a material effect on the Company's results of operations or financial position.

In June 2007, the FASB ratified Emerging Issues Task Force Issue No. 06-11 ( EITF 06-11 ), *Accounting for Income Tax Benefits of Dividends on Share-Based Payment Awards*. EITF 06-11 applies to share-based payment arrangements with dividend protection features that entitle employees to receive (a) dividends on equity-classified nonvested shares, (b) dividend equivalents on equity-classified nonvested share units, or (c) payments equal to the dividends paid on the underlying shares while an equity-classified share option is outstanding, when those dividends or dividend equivalents are charged to retained earnings under FAS No. 123R, *Share-Based Payment*, and result in an income tax deduction for the employer. A consensus was reached that a realized income tax benefit from dividends or dividend equivalents that are charged to retained earnings and are paid to employees for equity-classified nonvested equity shares, nonvested equity share units, and outstanding equity share options should be recognized as an increase in additional paid-in capital. EITF 06-11 is effective for fiscal years beginning after December 15, 2007, and interim periods within those fiscal years. The adoption of this EITF is not expected to have a material effect on the Company's results of operations or financial position.

In September 2006, the FASB issued FAS No. 157, *Fair Value Measurements*, which provides enhanced guidance for using fair value to measure assets and liabilities. The standard applies whenever other standards require or permit assets or liabilities to be measured at fair value. The standard does not expand the use of fair value in any new circumstances. FAS No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. In February 2008, the FASB issued Staff Position No. 157-1, *Application of FASB Statement No. 157 to FASB Statement No. 13 and Other Accounting Pronouncements That Address Fair Value Measurements for Purposes of Lease Classification or Measurement under Statement 13*, which removed leasing transactions accounted for under FAS No. 13 and related guidance from the scope of FAS No. 157. Also in February 2008, the FASB issued Staff Position No. 157-2, *Partial Deferral of the Effective Date of Statement 157*, which deferred the effective date of FAS No. 157 for all nonfinancial assets and nonfinancial liabilities to fiscal years beginning after November 15, 2008. The adoption of this standard is not expected to have a material effect on the Company's results of operations or financial position.

In September 2006, the FASB issued FAS No. 158, *Employers' Accounting for Defined Benefit Pension and Other Post Retirement Plans, an amendment of FASB Statements No. 87, 88, 106 and 132(R)*. This statement requires that employers measure plan assets and obligations as of the balance sheet date. This requirement is effective for fiscal years ending after December 15, 2008. The other provisions of the statement were effective as of the end of the fiscal year ending after December 15, 2006, for public companies. The adoption of this standard is not expected to have a material effect on the Company's results of operations or financial position.

---

**Table of Contents****1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)****Recent Accounting Pronouncements (Continued)**

In February 2007, the FASB issued FSP No. FAS 158-1, *Conforming Amendments to the Illustrations in FASB Statements No. 87, No. 88, and No. 106 and to the Related Staff Implementation Guides*. This FSP provides conforming amendments to the illustrations in FAS Statements No. 87, 88, and 106 and to related staff implementation guides as a result of the issuance of FAS Statement No. 158. The conforming amendments made by this FSP are effective as of the effective dates of Statement No. 158. The unaffected guidance that this FSP codifies into Statements No. 87, 88, and 106 does not contain new requirements and, therefore, does not require a separate effective date or transition method. The adoption of this FSP is not expected to have a material effect on the Company's results of operations or financial position.

In February 2007, the FASB issued FAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities – Including an amendment of FASB Statement No. 115*, which provides all entities with an option to report selected financial assets and liabilities at fair value. The objective of the FAS No. 159 is to improve financial reporting by providing entities with the opportunity to mitigate volatility in earnings caused by measuring related assets and liabilities differently without having to apply the complex provisions of hedge accounting. FAS No. 159 is effective as of the beginning of an entity's first fiscal year beginning after November 15, 2007. Early adoption is permitted as of the beginning of a fiscal year that begins on or before November 15, 2007, provided the entity also elects to apply the provisions of FAS No. 157, *Fair Value Measurements*. The adoption of this standard is not expected to have a material effect on the Company's results of operations or financial position.

In December 2007, the FASB issued FAS No. 141 (revised 2007), *Business Combinations* ( FAS 141(R) ), which establishes principles and requirements for how an acquirer recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any noncontrolling interest in an acquiree, including the recognition and measurement of goodwill acquired in a business combination. FAS No. 141(R) is effective for fiscal years beginning on or after December 15, 2008. Earlier adoption is prohibited. The adoption of this standard is not expected to have a material effect on the Company's results of operations or financial position.

In December 2007, the FASB issued FAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements – an amendment of ARB No. 51*. FAS No. 160 amends ARB No. 51 to establish accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. It clarifies that a noncontrolling interest in a subsidiary, which is sometimes referred to as minority interest, is an ownership interest in the consolidated entity that should be reported as equity in the consolidated financial statements. Among other requirements, this statement requires consolidated net income to be reported at amounts that include the amounts attributable to both the parent and the noncontrolling interest. It also requires disclosure, on the face of the consolidated income statement, of the amounts of consolidated net income attributable to the parent and to the noncontrolling interest. FAS No. 160 is effective for fiscal years beginning on or after December 15, 2008. Earlier adoption is prohibited. The adoption of this standard is not expected to have a material effect on the Company's results of operations or financial position.

In February 2008, the FASB issued FSP No. FAS 140-3, *Accounting for Transfers of Financial Assets and Repurchase Financing Transactions*. This FSP concludes that a transferor and transferee should not separately account for a transfer of a financial asset and a related repurchase financing unless (a) the two transactions have a valid and distinct business or economic purpose for being entered into separately and (b) the repurchase financing does not result in the initial transferor regaining control over the financial asset. The FSP is effective for financial statements issued for fiscal years beginning on or after November 15, 2008, and interim periods within those fiscal years. The adoption of this FSP is not expected to have a material effect on the Company's results of operations or financial position.

---

**Table of Contents****1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)****Recent Accounting Pronouncements (Continued)**

In March 2008, the FASB issued FAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities*, to require enhanced disclosures about derivative instruments and hedging activities. The new standard has revised financial reporting for derivative instruments and hedging activities by requiring more transparency about how and why an entity uses derivative instruments; how derivative instruments and related hedged items are accounted for under FAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*; and how derivative instruments and related hedged items affect an entity's financial position, financial performance, and cash flows. FAS No. 161 requires disclosure of the fair values of derivative instruments and their gains and losses in a tabular format. It also requires entities to provide more information about their liquidity by requiring disclosure of derivative features that are credit risk-related. Further, it requires cross-referencing within footnotes to enable financial statement users to locate important information about derivative instruments. FAS No. 161 is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008, with early application encouraged. The adoption of this standard is not expected to have a material effect on the Company's results of operations or financial position.

In April 2008, the FASB issued FASB Staff Position No. 142-3, *Determination of the Useful Life of Intangible Assets* ( FSP 142-3 ). FSP 142-3 amends the factors that should be considered in developing assumptions about renewal or extension used in estimating the useful life of a recognized intangible asset under FAS No. 142, *Goodwill and Other Intangible Assets*. This standard is intended to improve the consistency between the useful life of a recognized intangible asset under FAS No. 142 and the period of expected cash flows used to measure the fair value of the asset under FAS No. 141R and other GAAP. FSP 142-3 is effective for financial statements issued for fiscal years beginning after December 15, 2008. The measurement provisions of this standard will apply only to intangible assets of the Company acquired after the effective date.

In June 2008, the FASB issued FASB Staff Position (FSP) No. EITF 03-6-1, *Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities*, to clarify that instruments granted in share-based payment transactions can be participating securities prior to the requisite service having been rendered. A basic principle of the FSP is that unvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents (whether paid or unpaid) are participating securities and are to be included in the computation of EPS pursuant to the two-class method. The provisions of this FSP are effective for financial statements issued for fiscal years beginning after December 15, 2008, and interim periods within those years. All prior-period EPS data presented (including interim financial statements, summaries of earnings, and selected financial data) are required to be adjusted retrospectively to conform with the provisions of the FSP. The adoption of this FSP is not expected to have a material effect on the Company's results of operations or financial position.

In October 2008, the FASB issued FSP No. 157-3, *Determining the Fair Value of a Financial Asset When the Market for That Asset*. This FSP clarifies the application of FAS Statement No. 157, *Fair Value Measurements*, in a market that is not active and provides an example to illustrate key considerations in determining the fair value of a financial asset when the market for that financial asset is not active. This FSP shall be effective upon issuance, including prior periods for which financial statements have not been issued. Revisions resulting from a change in the valuation technique or its application shall be accounted for as a change in accounting estimate (FAS Statement No. 154, *Accounting Changes and Error Corrections*). The disclosure provisions of Statement 154 for a change in accounting estimate are not required for revisions resulting from a change in valuation technique or its application. The adoption of this FSP is not expected to have a material effect on the Company's results of operations or financial position.

**Table of Contents****2. COMPLETION OF INITIAL PUBLIC OFFERING**

On July 25, 2006, the Bank's Board of Directors adopted a Plan of Conversion (the "Plan") pursuant to which the Bank would convert from a Pennsylvania-chartered mutual savings institution to a Pennsylvania-chartered stock association and concurrently form ESSA Bancorp, Inc., a Pennsylvania-chartered stock holding company. On December 7, 2006, the Company filed a Registration Statement on Form S-1 with the Securities and Exchange Commission with respect to the shares to be offered and sold pursuant to the Plan. The Company registered for offer and sale 16,980,900 shares of common stock, par value \$0.01 per share, at a sales price of \$10.00 per share.

The stock offering was consummated on April 3, 2007, resulting in gross proceeds of \$158.7 million, through the sale of 15,870,000 shares at a price of \$10.00 per share. The Company also contributed 1,110,900 shares of its common stock to the ESSA Bank & Trust Foundation and \$1.6 million in cash. Expenses related to the offering were approximately \$2.9 million, which resulted in net proceeds of approximately \$155.8 million prior to the contribution to the ESSA Bank & Trust Foundation.

The Company lent approximately \$13.6 million to the Bank's Employee Stock Ownership Plan. The Company retained approximately \$64.4 million of the net proceeds of the offering prior to the contribution to the ESSA Bank & Trust Foundation, and the remainder of the net proceeds were contributed to the Bank.

In accordance with regulations, at the time that the Bank converted from a mutual savings bank to a stock savings bank, a portion of retained earnings was restricted by establishing a liquidation account. The liquidation account will be maintained for the benefit of eligible account holders who continue to maintain their accounts at the Bank after the conversion. The liquidation account will be reduced annually to the extent that eligible account holders have reduced their qualifying deposits. Subsequent increases will not restore an eligible account holder's interest in the liquidation account. In the event of a complete liquidation of the Bank, each account holder will be entitled to receive a distribution from the liquidation account in an amount proportionate to the current adjusted qualifying balances for accounts then held.

**3. EARNINGS PER SHARE**

The following table sets forth the composition of the weighted-average common shares (denominator) used in the basic and diluted earnings per share computation for the years ended September 30, 2008 and 2007. The net loss of \$7,289,000 from April 3, 2007 (date of conversion) to September 30, 2007 will be used as the numerator for the year ended 2007.

	2008	2007
Weighted average common shares outstanding	16,980,900	16,980,900
Average treasury stock shares	(5,406)	
Average unearned ESOP shares	(1,300,445)	(1,340,780)
Average unearned nonvested shares	(117,641)	
<b>Weighted average common shares and common stock equivalents used to calculate basic earnings per share</b>	<b>15,557,408</b>	<b>15,640,120</b>
Additional common stock equivalents (nonvested stock) used to calculate diluted earnings per share	360,395	
Additional common stock equivalents (stock options) used to calculate diluted earnings per share	59,108	
<b>Weighted average common shares and common stock equivalents used to calculate diluted earnings per share</b>	<b>15,976,911</b>	<b>15,640,120</b>

The amortized cost and fair value of debt securities at September 30, 2008, by contractual maturity, are shown below. Expected maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties (in thousands):

	AVAILABLE FOR SALE		HELD TO MATURITY	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
Due in one year or less	\$ 23,408	\$ 23,424	\$ 2,184	\$ 2,207
Due after one year through five years	33,334	33,354	4,542	4,595
Due after five years through ten years	528	522	3,112	3,114
Due after ten years	146,987	146,682	2,019	2,008
<b>Total</b>	<b>\$ 204,257</b>	<b>\$ 203,982</b>	<b>\$ 11,857</b>	<b>\$ 11,924</b>

The Company had no sales of investment securities for the three years ending September 30, 2008.

Investment securities with carrying values of \$15,960,000 and \$8,616,000 at September 30, 2008 and 2007, respectively, were pledged to secure public deposits and other purposes as required by law.

**Table of Contents****5. UNREALIZED LOSSES ON SECURITIES**

The following table shows the Company's gross unrealized losses and fair value, aggregated by investment category and length of time that the individual securities have been in a continuous unrealized loss position (in thousands):

	Number of Securities	Less than Twelve Months		2008 Twelve Months or Greater		Total	
		Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses
Fannie Mae	20	\$ 41,932	\$ (538)	\$	\$	\$ 41,932	\$ (538)

Obligations of states and political subdivisions	3	2,055	(6)			2,055	(6)
U.S. government agency securities	9	5,627	(16)	9,719	(16)	15,346	(32)
Equity securities	1	463	(37)			463	(37)
Total	75	\$ 57,140	\$ (377)	\$ 30,719	\$ (564)	\$ 87,859	\$ (941)

The Company's investment securities portfolio contains unrealized losses on securities, including mortgage-related instruments issued or backed by the full faith and credit of the United States government, or generally viewed as having the implied guarantee of the U.S. government, and debt obligations of a U.S. state or political subdivision.

The policy of the Company is to recognize an other-than-temporary impairment of equity securities where the fair value has been significantly below cost for four consecutive quarters. For fixed maturity investments with unrealized losses due to interest rates where the Company has the positive intent and ability to hold the investment for a period of time sufficient to allow a market recovery, declines in value below cost are not assumed to be other than temporary. The Company reviews its position quarterly and has asserted that at September 30, 2008, the declines outlined in the above table represent temporary declines and the Company does have the intent and ability to hold those securities either to maturity or to allow a market recovery.

The Company has concluded that any impairment of its investment securities portfolio is not other than temporary but is the result of interest rate changes that are not expected to result in the noncollection of principal and interest during the period. However, as of September 30, 2008, the Company recognized a loss of \$802,000 on equity securities that it deemed, through analysis of the security, to be other than a temporary loss. The loss is related to Fannie Mae perpetual preferred stock that the Company owns. Fannie Mae was placed into conservatorship by the U.S. Government on September 7, 2008.

**Table of Contents****6. LOANS RECEIVABLE**

Loans receivable consist of the following (in thousands):

	2008	2007
Real estate loans:		
Residential	\$ 572,038	\$ 500,104
Construction	8,254	7,800
Commercial	69,505	58,447
Commercial	11,987	7,699
Home equity loans and lines of credit	47,508	47,544
Other	3,059	3,875
	712,351	625,469
Less deferred loan fees	546	1,418
	711,805	624,051
Less allowance for loan losses	4,915	4,206
Net loans	\$ 706,890	\$ 619,845

Mortgage loans serviced by the Company for others amounted to \$16,665,000, \$19,346,000 and \$21,894,000 at September 30, 2008, 2007, and 2006, respectively.

At September 30, 2008, 2007, and 2006, the Company had nonaccrual loans of \$3,938,000, \$555,000, and \$476,000, respectively. Additional interest income that would have been recorded under the original terms of the loan agreements amounted to \$133,000, \$34,000, and \$37,000 for the years ended September 30, 2008, 2007, and 2006, respectively. Included in September 30, 2008 nonaccrual loans were \$2,495,000 of impaired loans. The Company had no impaired loans at September 30, 2007.

Impaired loans for the year ended September 30, 2008 are summarized as follows (in thousands):

	2008
Impaired loans with a related allowance	\$ 2,697
Impaired loans without a related allowance	
Related allowance for loan losses	534
Average recorded balance of impaired loans	225
Interest income recognized	

The Company's primary business activity is with customers located within its local trade area. Commercial, residential, and consumer loans are granted. The Company also funds commercial and residential loans originated outside its immediate trade area provided such loans meet the Company's credit policy guidelines. Although the Company has a diversified loan portfolio at September 30, 2008 and 2007, loans outstanding to individuals and businesses are dependent upon the local economic conditions in its immediate trade area.

Activity in the allowance for loan losses for the years ended is summarized as follows (in thousands):

	2008	2007	2006
Balance, beginning of period	\$ 4,206	\$ 3,855	\$ 3,563
Add:			
Provision charged to operations	900	360	300
Loan recoveries	2	1	1

Edgar Filing: ESSA Bancorp, Inc. - Form 10-K

	5,108	4,216	3,864
Less loans charged off	(193)	(10)	(9)
Balance, end of period	\$ 4,915	\$ 4,206	\$ 3,855

F - 21

**Table of Contents****6. LOANS RECEIVABLE (Continued)**

The Company has had, and may be expected to have in the future, banking transactions in the ordinary course of business with directors, officers, their immediate families, and affiliated companies (commonly referred to as related parties), on the same terms including interest rates and collateral, as those prevailing at the time for comparable transactions with others. At September 30, 2008 and 2007, these persons were indebted to the Company for loans totaling \$1,126,000 and \$1,350,000, respectively. During the year ended September 30, 2008, \$120,000 of loan advances were made and repayments totaled \$344,000.

**7. FEDERAL HOME LOAN BANK STOCK**

The Bank is a member of the Federal Home Loan Bank System. As a member, the Bank maintains an investment in the capital stock of the FHLB of Pittsburgh in an amount not less than 70 basis points of the outstanding unused FHLB borrowing capacity or <sup>1</sup>/<sub>20</sub> of its outstanding FHLB borrowings, whichever is greater, as calculated throughout the year.

**8. PREMISES AND EQUIPMENT**

Premises and equipment consist of the following (in thousands):

	2008	2007
Land and land improvements	\$ 3,531	\$ 3,478
Buildings and leasehold improvements	9,206	9,205
Furniture, fixtures, and equipment	7,029	6,707
Construction in process	76	8
	19,842	19,398
Less accumulated depreciation	(9,180)	(8,121)
<b>Total</b>	<b>\$ 10,662</b>	<b>\$ 11,277</b>

Depreciation expense amounted to \$1,059,000, \$1,055,000, and \$985,000 for the years ended September 30, 2008, 2007, and 2006, respectively.

**9. DEPOSITS**

Deposits and their respective weighted-average interest rates consist of the following major classifications (in thousands):

	2008		2007	
	Weighted-Average Interest Rate	Amount	Weighted-Average Interest Rate	Amount
Non-interest-bearing demand accounts	%	\$ 24,862	%	\$ 25,925
NOW accounts	0.08	55,694	0.09	57,586
Money market accounts	2.57	74,807	3.65	39,780
Savings and club accounts	0.40	61,444	0.40	65,989
Certificates of deposit	3.63	153,722	4.63	195,436
<b>Total</b>	<b>2.09%</b>	<b>\$ 370,529</b>	<b>2.80%</b>	<b>\$ 384,716</b>

**Table of Contents****9. DEPOSITS (Continued)**

	2008		2007	
	Weighted-Average Interest Rate	Amount	Weighted-Average Interest Rate	Amount
Certificates of deposit:				
0.00 - 2.00%	1.99%	\$ 421	0.33%	\$ 17
2.01 - 4.00%	3.10	97,408	3.82	38,443
4.01 - 6.00%	4.57	55,893	4.83	156,976
<b>Total</b>	<b>3.63%</b>	<b>\$ 153,722</b>	<b>4.63%</b>	<b>\$ 195,436</b>

At September 30, scheduled maturities of certificates of deposit are as follows (in thousands):

2009	\$ 102,292
2010	22,164
2011	9,493
2012	14,383
2013	5,390
<b>Total</b>	<b>\$ 153,722</b>

The aggregate amount of time certificates of deposit with a minimum denomination of \$100,000 and individual retirement accounts with a minimum denomination of \$250,000 were \$53,050,000 and \$0, respectively, at September 30, 2008. Time certificates of deposit in excess of \$100,000 and individual retirement accounts in excess of \$250,000 were not federally insured at September 30, 2008.

The Emergency Economic Stabilization Act which became law on October 3, 2008, raised the amount of federal deposit insurance coverage (FDIC) for all deposit accounts to \$250,000. This provision of the act is scheduled to expire on December 31, 2009. In addition, on October 14, 2008, the Federal Deposit Insurance Corporation announced a new program – the Temporary Liquidity Guarantee Program, which provides FDIC coverage of non-interest-bearing deposit transaction accounts and certain other accounts regardless of dollar amount. This new program is scheduled to expire December 31, 2009.

The scheduled maturities of time certificates of deposit in denominations of \$100,000 or more are as follows (in thousands):

	<b>2008</b>
Within three months	\$ 10,921
Three through six months	12,565
Six through twelve months	9,584
Over twelve months	19,980
<b>Total</b>	<b>\$ 53,050</b>

**Table of Contents****9. DEPOSITS (Continued)**

A summary of interest expense on deposits for the years ended is as follows (in thousands):

	2008	2007	2006
NOW accounts	\$ 41	\$ 45	\$ 44
Money market accounts	1,684	1,104	687
Savings and club accounts	278	320	355
Certificates of deposits	7,063	9,171	7,926
<b>Total</b>	<b>\$ 9,066</b>	<b>\$ 10,640</b>	<b>\$ 9,012</b>

**10. SHORT-TERM BORROWINGS**

As of September 30, 2008 and 2007, the Company had \$39,510,000 and \$34,230,000 of short-term borrowings, respectively, of which \$24,010,000 and \$16,230,000 respectively, were advances on a \$75,000,000 line of credit with the FHLB.

All borrowings from the FHLB are secured by a blanket lien on qualified collateral, defined principally as investment securities and mortgage loans that are owned by the Company free and clear of any liens or encumbrances. During 2008, the Company had a borrowing limit of approximately \$573 million, with a variable rate of interest, based on the FHLB's cost of funds.

The following table sets forth information concerning short-term borrowings (in thousands):

	2008	2007	2006
Balance at year-end	\$ 39,510	\$ 34,230	\$ 35,299
Maximum amount outstanding at any month-end	56,183	46,409	35,299
Average balance outstanding during the year	36,150	33,975	21,657
Weighted-average interest rate:			
As of year-end	2.41%	5.17%	5.40%
Paid during the year	3.94%	5.21%	4.92%

Average balances outstanding during the year represent daily average balances, and average interest rates represent interest expenses divided by the related average balance.

**11. OTHER BORROWINGS**

The following table presents contractual maturities of FHLB long-term advances and securities sold under agreements to repurchase (in thousands):

Description	Maturity range		Weighted-average interest rate	Stated interest rate ranged		2008	2007
	from	to		from	to		
Convertible	7/15/2009	8/21/2017	4.87%	3.90%	6.06%	\$ 64,000	\$ 57,000
Fixed rate	10/6/2008	5/5/2014	4.39	3.11	5.95	170,247	150,697
Mid-term	11/17/2008	9/6/2011	4.22	2.38	5.60	94,000	72,000
	1/17/2011	9/3/2018	3.27	1.79	4.01	45,000	

Edgar Filing: ESSA Bancorp, Inc. - Form 10-K

**Table of Contents****11. OTHER BORROWINGS (Continued)**

Maturities of FHLB long-term advances and securities sold under agreements to repurchase are summarized as follows (in thousands):

<b>Year Ending September 30,</b>	<b>Amount</b>	<b>Weighted-average Rate</b>
2009	\$68,000	4.67%
2010	71,500	4.33
2011	85,247	4.46
2012	55,200	4.19
2013	56,300	3.72
2014 and thereafter	37,000	4.22
<b>Total</b>	<b>\$373,247</b>	<b>4.29%</b>

Included above are ten convertible notes, which total \$64,000,000 and are convertible to variable-rate advances on specific dates at the discretion of the FHLB. Should the FHLB convert these advances, the Bank has the option of accepting the variable rate or repaying the advance without penalty.

The FHLB long-term advances are secured by qualifying assets of the Bank, which include the FHLB stock, securities, and first-mortgage loans.

Securities sold under agreements to repurchase are secured by U.S. government agency and mortgage-backed securities with a carrying value of \$49,646,000 at September 30, 2008.

Included in other borrowings are sales of securities under repurchase agreements. Repurchase agreements are treated as financings with the obligations to repurchase securities sold reflected as a liability in the balance sheet. The dollar amount of securities underlying the agreements remains recorded as an asset, although the securities underlying the agreements are delivered to the brokers who arranged the transactions.
