NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

1. BASIS OF PRESENTATION AND SIGNIFICANT ACCOUNTING POLICIES

Jamba, Inc., a Delaware corporation, and its wholly-owned subsidiary, Jamba Juice Company (the *Company*), is a leading restaurant retailer of better-for-you food and beverage offerings, including great tasting fruit smoothies, juices and teas, hot oatmeal made with organic steel cut oats, wraps, salads, sandwiches and California Flatbreads and a variety of baked goods and snacks. As of October 6, 2009, there were 742 locations consisting of 488 company-owned and operated stores (*Company Stores*) and 254 franchise stores (*Franchise Stores*).

Unaudited Interim Financial Information The condensed consolidated balance sheet as of October 6, 2009 and the condensed consolidated statements of operations and cash flows for each of the 12 week and 40 week periods ended October 6, 2009 and October 7, 2008 have been prepared by the Company, without audit, and have been prepared on the same basis as the Company's audited consolidated financial statements. In the opinion of management, such statements include all adjustments (which include only normal recurring adjustments) considered necessary to present fairly the financial position as of October 6, 2009 and the results of operations and cash flows for the 12 week and 40 week periods ended October 6, 2009 and October 7, 2008. The condensed consolidated balance sheet as of December 30, 2008 has been derived from the Company's audited consolidated financial statements. Operating results for the 12 week and 40 week period ended October 6, 2009 are not necessarily indicative of the results that may be expected for the year ending December 29, 2009. The Company reports its results of operations on a 52-week or 53-week fiscal year, which is comprised of thirteen 4-week periods or twelve 4-week periods and one 5-week period. The first fiscal quarter is sixteen weeks, the second and third fiscal quarters each are twelve weeks, and the fourth quarter is twelve or thirteen weeks.

Certain information and disclosures normally included in the notes to annual consolidated financial statements prepared in accordance with accounting principles generally accepted in the United States of America (*GAAP*) have been omitted from these interim consolidated financial statements pursuant to the rules and regulations of the Securities and Exchange Commission (the *SEC*). Accordingly, these interim consolidated financial statements should be read in conjunction with the Company's annual consolidated financial statements and notes thereto in the Company's Annual Report on Form 10-K for the year ended December 30, 2008.

Reclassifications Certain amounts have been reclassified on the condensed consolidated statements of operations to conform to the fiscal 2009 presentation. Lease termination and store closure costs of \$2.9 million for the 40 week period ended October 7, 2008 and recorded as store lease termination and closure costs are now included in other operating expenses on the consolidated statements of operations.

Comprehensive Income (Loss) Comprehensive income (loss) is defined as the change in equity during a period from transactions and other events, excluding changes resulting from investments from owners and distributions to owners. Comprehensive income (loss) equals net income (loss) for all periods presented.

Earnings (Loss) Per Share Earning (loss) per share is computed in accordance with SFAS No. 128, *Earnings per Share (now codified in Accounting Standards Codification (ASC) 260)*. Basic earnings (loss) per share is computed based on the weighted-average of common shares outstanding during the period. Diluted earnings (loss) per share is computed based on the weighted-average number of common shares and potentially dilutive securities, which includes outstanding warrants and outstanding options and restricted stock awards granted under the Company's stock option plans. Anti-dilutive shares of 3.3 million and 21.5 million have been excluded from the calculation of diluted weighted-average shares outstanding in the 12 week periods ended October 6, 2009 and October 7, 2008, respectively. Anti-dilutive shares of 16.3 million and 21.8 million have been excluded from the calculation of diluted weighted-average shares outstanding in the 40 week periods ended October 6, 2009 and October 7, 2008, respectively.

Table of Contents**JAMBA, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(UNAUDITED)**

The number of incremental shares from the assumed exercise of warrants and options was calculated by applying the treasury stock method. The if converted method was used for the conversion of preferred stock. A reconciliation of the numerators and denominators of the basic and diluted earnings per share calculations is as follows (in thousands, except shares):

	12 Week Period Ended		40 Week Period Ended	
	October 6, 2009	October 7, 2008	October 6, 2009	October 7, 2008
Income available (loss attributable) to common stockholders (numerator for basic earnings per share)	2,113	(12,363)	(13,440)	(107,989)
Accretion of interest and dividend of convertible stock	839			
Adjusted income available to common stockholders (numerator for diluted earnings per share)	2,952	(12,363)	(13,440)	(107,989)
Basic weighted-average shares outstanding	52,690,728	53,251,591	53,912,157	52,821,493
Incremental shares from assumed exercise of warrants, options and conversion of Series B Preferred Stock	31,084,371			
Diluted weighted-average shares outstanding	83,775,099	53,251,291	53,912,157	52,821,493

Restricted Cash The Company held \$2.7 million in restricted cash at October 6, 2009, of which \$1.5 million was classified as a current asset and \$1.2 million was classified as a long-term asset. This restricted cash is held in the form of certificates of deposit to collateralize the Company's letters of credit. The Company held \$7.7 million in restricted cash at December 30, 2008, of which \$5.0 million was classified as a current asset and \$2.7 million was classified as a long-term asset. The \$7.7 million in restricted cash represented certificates of deposit to collateralize the Company's letters of credit and also included \$3.0 million related to the Company's financing agreement (see Note 4).

Recent Accounting Pronouncements*FASB Accounting Standards Codification*

(Accounting Standards Update (ASU) 2009-01)

In June 2009, FASB approved the FASB Accounting Standards Codification (the Codification) as the single source of authoritative nongovernmental GAAP. All existing accounting standard documents, such as FASB, American Institute of Certified Public Accountants, Emerging Issues Task Force and other related literature, excluding guidance from the SEC, have been superseded by the Codification. All other non-grandfathered, non-SEC accounting literature not included in the Codification has become nonauthoritative. The Codification did not change GAAP, but instead introduced a new structure that combines all authoritative standards into a comprehensive, topically organized online database. The Codification is effective for interim or annual periods ending after September 15, 2009, and impacts the Company's financial statements as all future references to authoritative accounting literature will be referenced in accordance with the Codification. There have been no changes to the content of the Company's financial statements or disclosures as a result of implementing the Codification during the quarter ended October 6, 2009.

Edgar Filing: JAMBA, INC. - Form 10-Q

As a result of the Company's implementation of the Codification during the quarter ended October 6, 2009, previous references to new accounting standards and literature are no longer applicable. In the current quarter financial statements, the Company will provide reference to both new and old guidance to assist in understanding the impacts of recently adopted accounting literature, particularly for guidance adopted since the beginning of the current fiscal year but prior to the Codification.

Subsequent Events

(Included in ASC 855 Subsequent Events, previously SFAS No. 165 Subsequent Events)

ASC 855 established general standards of accounting for and disclosure of events that occur after the balance sheet date, but before the financial statements are issued or available to be issued (subsequent events). An entity is required to disclose the date through which subsequent events have been evaluated and the basis for that date. For public entities, this is the date the financial statements are issued. ASC 855 does not apply to subsequent events or transactions that are within the scope of other GAAP and did not result in significant changes in the subsequent events reported by the Company. ASC 855 became effective for interim or annual periods ending after June 15, 2009 and did not impact the Company's consolidated financial statements. The Company evaluated for subsequent events through November 12, 2009, the issuance date of the Company's financial statements.

(UNAUDITED)

Determination of the Useful Life of Intangible Assets

(Included in ASC 350 Intangibles Goodwill and Other , previously FSP SFAS No. 142-3 Determination of the Useful Lives of Intangible Assets)

ASC 350 amended the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset under previously issued goodwill and intangible assets topics. This change was intended to improve the consistency between the useful life of a recognized intangible asset and the period of expected cash flows used to measure the fair value of the asset under topics related to business combinations and other GAAP. The requirement for determining useful lives must be applied prospectively to intangible assets acquired after the effective date and the disclosure requirements must be applied prospectively to all intangible assets recognized as of, and subsequent to, the effective date. ASC 350 became effective for financial statements issued for fiscal years beginning after December 15, 2008, and interim periods within those fiscal years. The adoption of ASC 350 did not impact the Company's consolidated financial statements.

Consolidation of Variable Interest Entities Amended

(To be included in ASC 810 Consolidation , SFAS No. 167 Amendments to FASB Interpretation No. 46(R))

ASC 810 amends FASB Interpretation No. 46(R) Consolidation of Variable Interest Entities regarding certain guidance for determining whether an entity is a variable interest entity and modifies the methods allowed for determining the primary beneficiary of a variable interest entity. The amendments include: (1) the elimination of the exemption for qualifying special purpose entities, (2) a new approach for determining who should consolidate a variable-interest entity, and (3) changes to when it is necessary to reassess who should consolidate a variable-interest entity. ASC 810 is effective for the first annual reporting period beginning after November 15, 2009, with earlier adoption prohibited. The Company will adopt ASC 810 in fiscal 2010 and does not anticipate any material impact on the Company's consolidated financial statements.

2. ASSETS HELD FOR SALE

Assets held for sale consists of Company Stores that the Company expects to rebrand. Such assets are recorded at the lower of the carrying amount or fair values. Assets are no longer depreciated once classified as held for sale. Assets held for sale at October 6, 2009 include \$1.5 million of property, fixtures and equipment and are included in prepaid expenses and other current assets on the Company's balance sheet.

3. STOCK OPTIONS

The Company maintains three share-based compensation plans (collectively, the Plans). The Company's 2006 Employee, Director and Consultant Stock Plan (the 2006 Plan) was approved by the Company's stockholders on November 28, 2006, and provides for the granting of up to five million shares of common stock in the form of nonqualified and incentive stock options, stock grants or other share-based awards to employees, nonemployee directors and consultants. In connection with the merger of Jamba, Inc. with Jamba Juice Company on November 28, 2006, the Company assumed the outstanding options under the Jamba Juice Company 1994 Stock Incentive Plan (the 1994 Plan) and the Jamba Juice Company 2001 Equity Incentive Plan (the 2001 Plan), both of which provided for the granting of nonqualified and incentive stock options to employees, nonemployee directors and consultants. No additional grants are available under the 2001 Plan and the 1994 Plan. As of October 6, 2009, there remained 1,629,823 shares available for grant under the Company's 2006 Plan. In December 2008, the Company also granted an option covering an aggregate of 1,500,000 shares of common stock options under an inducement grant made outside of the Company's existing equity plans. A summary of option activity under the Plans as of October 6, 2009, and changes during the 40 week period then ended is presented below:

Edgar Filing: JAMBA, INC. - Form 10-Q

Table of Contents**JAMBA, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(UNAUDITED)****Share-Based Compensation**

The fair value of options granted was estimated at the date of grant using a Black-Scholes option-pricing model. Option valuation models, including Black-Scholes, require the input of highly subjective assumptions, and changes in the assumptions used can materially affect the grant date fair value of an award. These assumptions include the risk-free rate of interest, expected dividend yield, expected volatility, and the expected life of the award. The risk-free rate of interest is based on the zero coupon U.S. Treasury rates appropriate for the expected term of the award. Expected dividends are zero based on a history of not paying cash dividends on the Company's common stock and as the Company does not intend to pay common stock dividends in the future. Expected volatility is based on a 50/50 blend of historic, daily stock price observations of the Company's common stock since its inception and historic, daily stock price observations of the Company's peers during the period immediately preceding the share-based award grant that is equal in length to the award's expected term. Estimated forfeitures are also included as a part of the grant date estimate. The Company used historical data to estimate expected employee behaviors related to option exercises and forfeitures. There is currently no market-based mechanism or other practical application to verify the reliability and accuracy of the estimates stemming from these valuation models or assumptions, nor is there a means to compare and adjust the estimates to actual values, except for annual adjustments to reflect actual forfeitures.

Share-based compensation expense, which is included in general and administrative expense, was \$0.3 million and \$2.2 million for the 12 week periods ended October 6, 2009 and October 7, 2008, respectively. Share-based compensation expense was \$1.2 million and \$3.9 million for the 40 week periods ended October 6, 2009 and October 7, 2008, respectively. There was no income tax benefit related to share-based compensation expense during the 12 and 40 week periods ended October 6, 2009 and October 7, 2008.

The following are the weighted-average assumptions used to value option grants for the 12 and 40 week periods ended October 6, 2009, and October 7, 2008:

	12 Week Period Ended		40 Week Period Ended	
	October 6, 2009	October 7, 2008	October 6, 2009	October 7, 2008
Weighted-average risk-free interest rate	2.48%	2.95%	1.88%	2.98%
Expected life of options (years)	5.00	5.00	5.00	5.00

4. DERIVATIVE INSTRUMENTS**Warrants**

In connection with its initial public offering in July 2005, the Company issued warrants to purchase 17,250,000 shares of common stock at an exercise price of \$6.00 (the "\$6.00 Warrants") and an option to purchase up to a total of 750,000 units at an exercise price of \$10.00. Each unit included one share of common stock and a warrant to purchase one share of common stock at an exercise price of \$7.50 (the "Embedded Warrants"). The \$6.00 Warrants and the Embedded Warrants were considered derivative instruments and the fair value of such instruments was recorded as derivative liabilities on the Company's condensed consolidated balance sheets with any changes in the fair value recorded in the Company's results of operations. The \$6.00 Warrants and the Embedded Warrants expired on June 28, 2009.

Edgar Filing: JAMBA, INC. - Form 10-Q

In November 2006, the Company assumed 304,581 outstanding warrants in connection with the acquisition of Jamba Juice Company, of which 283,966 warrants remain outstanding as of October 6, 2009 and expire on various dates from December 29, 2010 through December 14, 2011.

Put and Call Rights

Pursuant to the Company's financing agreement dated September 11, 2008 (see Note 9), the Company issued to Victory Park Management LLC, as agent, and its affiliated funds as lenders, (the Lenders) two million shares of its common stock (the Shares) with certain registration rights, and entered into a Common Stock Put and Call Agreement with the Lenders (the Put and Call Agreement). The put right was exercised by the Lenders and on June 19, 2009 the Company repurchased these Shares with \$3.0 million paid from its restricted cash. These Shares were retired on July 20, 2009.

The Company had no derivative financial instruments in asset positions as of October 6, 2009 or December 30, 2008. See Note 5 for discussion of the methods used to determine fair value of the derivative financial instruments.

The effect of derivative instruments on the consolidated statements of operations is as follows (in thousands):

5. FAIR VALUE MEASUREMENT

The following table presents the financial assets and liabilities that were accounted for at fair value on a recurring basis as of October 6, 2009 (in thousands):

	Fair Value Measurements Using		
	Level 1 Inputs	Level 2 Inputs	Level 3 Inputs
Assets:			
Cash invested in money market fund ⁽¹⁾	\$ 2,916	\$	\$

⁽¹⁾ Included in cash and cash equivalents on the consolidated balance sheet.

For assets that are measured using quoted prices in active markets, fair value is the published market price per unit multiplied by the number of units held without consideration of transaction costs. As of October 6, 2009, we had \$2.9 million of cash invested in money market funds and active exchange funds.

The Company reviews its non-financial assets for impairment at least on an annual basis or whenever events or changes in circumstances indicate that its carrying amount may not be recoverable. Impairment losses represented the excess of the carrying value over the fair value of the affected assets and are included in Impairment of long-lived assets. The fair values of impaired assets were estimated based upon the present values of the anticipated cash flows associated with each related asset.

For more information on our impairment analysis, please refer to the discussion under *Business and Significant Accounting Policies Impairment of Long-Lived Assets* included within Note 1 in the Notes to the Financial Statements of Jamba, Inc. in our Annual Report on Form 10-K for the year ended December 30, 2008.

6. ASSET IMPAIRMENT, STORE LEASE TERMINATION AND CLOSURE COSTS AND WORKFORCE REDUCTION***Impairment of long-lived assets***

The Company reviews its entire store portfolio on a regular basis. Long-lived assets are reviewed for impairment when indicators of impairment are present. Expected future cash flows associated with an asset, in addition to other quantitative and qualitative analyses, including certain assumptions about expected future operating performance and changes in economic conditions are the key factors in determining undiscounted future cash flows. If the sum of the undiscounted cash flows is less than the carrying value of the asset, an impairment loss equal to the amount by which the carrying value exceeds the fair value of the asset is recognized. The Company recorded impairment charges of \$0.5 million and

Edgar Filing: JAMBA, INC. - Form 10-Q

\$5.9 million for the 12 week period ended October 6, 2009 and October 7, 2008, respectively. Impairment charges of \$11.1 million and \$13.2 million were recorded for the 40 week period ended October 6, 2009 and October 7, 2008, respectively.

Store lease termination and closure costs and workforce reduction

As a result of the Company's restructuring efforts and revised development goals, the Company evaluated the infrastructure needed to support its evolving business model and restructured its Support Center to eliminate certain administrative positions during fiscal 2008. Severance accruals will be paid primarily during fiscal 2009. In conjunction with its restructuring, the Company also closed certain underperforming stores and canceled the opening of certain stores under development.

Lease termination costs consist primarily of the costs of future obligations related to closed store locations. Discounted liabilities for future lease costs and the fair value of related subleases of closed locations are recorded when the stores are closed. All other costs related to closed units are expensed as incurred. In assessing the discounted liabilities for future costs

of obligations related to closed stores, the Company makes assumptions regarding amounts of future subleases. If these assumptions or their related estimates change in the future, the Company may be required to record additional exit costs or reduce exit costs previously recorded. Exit costs recorded for each of the periods presented include the effect of such changes in estimates. Lease obligations are payable through 2018, less sublease amounts. The charges related to the restructuring effort are noted below.

7. INCOME TAXES

A valuation allowance is recognized if, based on the weight of available evidence, it is more-likely-than-not that some portion, or all, of the deferred tax assets will not be realized. After consideration of all the evidence, both positive and negative, management has concluded that it is not more likely than not that the deferred tax assets related to depreciation, tax goodwill, jambacards, accrued expenses and net operating losses will be realized and a full valuation allowance has been maintained against the Company's net deferred tax assets.

During the 40 week period ended October 6, 2009, stock options related to certain former employees were cancelled. Once the requisite service has been provided, the prior book expense is not reversed. However, because a tax deduction will no longer be realized, there is no longer a temporary difference. The deferred income tax asset and related valuation allowance to these stock options at December 30, 2008 were adjusted during the 40 week period ended October 6, 2009.

The Company has recorded a tax benefit for the 12 week period ended October 6, 2009. The Company's effective tax rate was (21.8)% and (3.5)% respectively for the 12 and 40 week period ended October 6, 2009. The effective tax rate is affected by pretax income or loss, a change in the valuation allowance related to deductible temporary differences originating during the current year and the reversal of previously unrecognized tax benefits. During the 12 week period ended October 6, 2009, approximately \$0.5 million of previously unrecognized tax benefits were reversed due to the expiration of the statute of limitations.

Edgar Filing: JAMBA, INC. - Form 10-Q

As of October 6, 2009, there have been no material changes to the Company's uncertain tax positions disclosure under FIN 48 as provided in Note 11 in the Notes to the Financial Statements in the Company's Annual Report on Form 10-K for the year ended December 30, 2008. As of October 6, 2009 approximately \$0.5 million of previously unrecognized tax benefits have been reversed due to the expiration of the statute of limitations.

8. COMMITMENTS AND CONTINGENCIES

The Company is a defendant in certain litigation arising in the normal course of business. Although there can be no assurance as to the ultimate disposition of these matters, it is the opinion of the Company's management, based upon the information available at this time, that the expected outcome of these matters, individually or in the aggregate, will not have a material adverse effect on the results of operations, liquidity or financial condition of the Company.

9. NOTE PAYABLE

On September 11, 2008, the Company entered into a financing agreement with Victory Park Management, LLC, as agent, and its affiliated funds as lenders whereby the Lenders purchased \$25 million two-year senior secured term notes from the Company (Senior Notes). The Senior Notes were repaid in full on June 16, 2009. During the 40 week period ended October 6, 2009, the Company recorded \$3.7 million in interest expense, relating to prepayment penalties and deferred loan costs for the Senior Note.

Table of Contents**JAMBA, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(UNAUDITED)****10. REDEEMABLE PREFERRED STOCK**

On June 16, 2009, the Company issued (i) 170,000 shares of its Series B-1 Convertible Preferred Stock, par value \$0.001, (the Series B-1 Preferred) to affiliates of Mistral Equity Partners at a price of \$115 per share, for an aggregate purchase price of approximately \$19.6 million, and (ii) 134,348 shares of its Series B-2 Convertible Preferred Stock, par value \$0.001, (the Series B-2 Preferred) to a company controlled by the Serruya family at a price of \$115 per share, for an aggregate purchase price of approximately \$15.4 million. The issuance of shares of the Series B-1 and B-2 Preferred Stock (together the Series B Preferred Stock or Preferred Stock) for \$35 million, less approximately \$3.1 million in total transaction costs, which includes \$2.2 million in transaction fees and \$885,000 paid to investors, was completed through a private placement to the purchasers as accredited investors and pursuant to the exemptions from the registration requirements of the Securities Act. The shares of Preferred Stock and the shares of the Company's Common Stock issuable upon conversion of the Preferred Stock to be issued to the purchasers includes legends restricting transfer other than pursuant to an effective registration statement under the Securities Act or in accordance with an exemption from registration.

The shares of Preferred Stock are convertible at the election of the holders, at any time, into shares of Common Stock at an initial conversion price of \$1.15 per share. The conversion price for the Preferred Stock is subject to customary anti-dilution adjustments for stock splits, dividends and the like. After a two year period from the original date of issuance, the Company will have the right to require that the shares of Preferred Stock be converted into shares of Common Stock if (i) the Common Stock trading volume averages 150,000 shares per trading day over a 30 trading day period and (ii) the daily volume weighted average price per share of the Common Stock exceeds the product of 2.5 times the then-applicable conversion price for any 20 of the preceding 30 trading days at any time these conditions continue to be satisfied and for a period of 10 trading days thereafter. Upon exercise of this right, the Preferred Stock will be converted at the then applicable conversion rate and the Company will be obligated to pay any then-existing dividend arrearages in cash.

The Preferred Stock has an 8% dividend, payable quarterly in cash, which accrues irrespective of whether dividends are actually declared or paid. The dividend rate shall increase to 10% in the event the Common Stock is not listed for trading on any of the New York Stock Exchange, the NASDAQ Global Market or the American Stock Exchange or if the Company fails to declare and pay, in full and in cash, dividends on shares of the Preferred Stock for three consecutive quarters until such time as the dividends are paid in full and in cash. After seven years from the date the shares of Preferred Stock are originally issued, the holders of such shares will have the right to require the Company to redeem their shares of Preferred Stock, in whole or in part, at a price per share equal to the original sale price per share plus any unpaid but accrued dividends. The Company has also granted the purchasers of the shares of Preferred Stock certain pre-emptive rights with respect to the sale and issuance by the Company of equity securities, as delineated in the Purchase Agreement. If the Company fails to declare and pay, in full and in cash, dividends on shares of the Preferred Stock for three consecutive quarters, the size of the board of directors of the Company (Board) shall be increased by one member and the holders of the Preferred Stock, voting together as a single class, shall be entitled to elect one additional member to the Board until such time as the dividends are paid in full and in cash.

The holders of the shares of Preferred Stock have the right to vote on any matters submitted to a vote of the stockholders of the Company and are entitled to cast that number of votes equal to the aggregate number of shares of Common Stock issuable upon the conversion of such holders shares of Preferred Stock at the then-applicable conversion price. The holders of the shares of Preferred Stock will also receive customary protective provisions under the Certificate of Designation and additional protections under the Purchase Agreement (including the requirement that the consent of a majority of the holders of the shares of Common Stock issuable upon conversion of the Preferred Stock must be obtained prior to the Company incurring in excess of \$10 million in indebtedness).

The holders of the shares of the Series B-1 Preferred, voting as a separate class, elected two members to the Board. The Series B-1 Preferred holders are allowed to hold two seats on the Board so long as more than 50% of the number of shares of Series B-1 Preferred originally issued is outstanding. In the event the number of shares of Series B-1 Preferred Stock outstanding is less than 50% of the number of shares originally issued but greater than 25% of the number of shares originally issued, the holders of the shares of the Series B-1 Preferred, voting as a separate class, will be entitled to elect only one member to the Board. The ability to have any members to the Board by the holders of the shares of the Series B-1 Preferred will cease once the number of outstanding shares of Series B-1 Preferred is less than 25% of the number of shares of Series B-1 Preferred originally issued.

Edgar Filing: JAMBA, INC. - Form 10-Q

B-2 Preferred holders are allowed to hold one seat on the Board so long as more than 25% of the number of shares of Series B-1 Preferred originally issued is outstanding. In the event that (i) at the time of the Company's 2010 annual meeting

of its stockholders there are more than nine members on the Board and (ii) so long as more than 50% of the number of shares of Series B-2 Preferred originally issued are outstanding, the size of the Board will be increased by one Board seat and the holders of the shares of the Series B-2 Preferred, voting as a separate class, will be entitled to have one member on the Board to fill the seat. The ability to elect any members to the Board by the holders of the shares of Series B-2 Preferred will cease once the number of outstanding shares of Series B-2 Preferred is less than 25% of the number of shares of Series B-2 Preferred originally issued.

In the event of the liquidation, dissolution or winding-up of the affairs of the Company, whether voluntary or involuntary, the holders of shares of the Series B Preferred Stock then outstanding will be entitled to receive, out of the assets of the Company available for distribution to its stockholders before any payment shall be made to the holders of shares of Common Stock or any other junior stock by reason of their ownership thereof, an amount per share equal to the greater of (i) the Series B original issue price of \$115 per share plus any applicable accrued dividends or (ii) such amount per share as would have been payable had all shares of Series B Preferred Stock been converted into Common Stock immediately prior to the liquidation.

The Series B Preferred Stock is classified as temporary stockholders' equity, since the shares are (i) redeemable at the option of the holder in the future after satisfaction of the requisite holding period and (ii) have conditions for redemption which are not solely within the control of the Company. Total transaction costs of \$3.1 million, which is comprised of \$2.2 million in transaction fees and \$885,000 paid to investors is recorded as a reduction in proceeds received by the Company and will be accreted to the redemption amount over seven years. The \$885,000 paid to investors, is also recorded as a beneficial conversion feature. The proceeds from the issuance of Series B Preferred Stock were used to repay in full the outstanding debt resulting from the Company's Senior Notes and for working capital.

The Company granted a warrant to purchase common stock to Northpoint Advisors LLC by the Company for professional services provided. The number of shares purchasable upon exercise of the warrant is 760,870 and the exercise price is \$1.15 per share. The fair value of the warrant on June 16, 2009 was estimated at \$0.2 million and is recorded as a reduction in proceeds received by the Company and will be accreted to the redemption amount. The number of shares and exercise price are subject to adjustments due to events such as stock splits, distributions of common stock and other similar capital restructuring as noted in the warrant document. The warrant is a registrable security under the provisions of the Registration Rights Agreement of June 16, 2009 among the Company and the investors. The registrable securities include the shares issuable upon exercise of the warrant as well as shares issuable upon conversion of the Series B Preferred Stock to common stock. In accordance with the registration rights agreement, the Company filed an S-3 registration statement after the issuance of the registrable securities.

11. SUBSEQUENT EVENTS

The Company completed the sale of eight of its Company Stores in central and southern California to a franchisee on October 28, 2009 and expects to recognize a gain from this sale in the fourth quarter.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

You should read the following discussion and analysis in conjunction with our financial statements and related notes included elsewhere in this report. Except for historical information, the discussion in this report contains certain forward-looking statements that involve risks and uncertainties. We have based these forward-looking statements on our current expectations and assumptions about future events. In some cases, you can identify forward-looking statements by terminology, such as may, should, could, predict, potential, continue, expect, anticipate, future, intend, plan, believe, estimate, forecast and similar expressions (or the negative of such expressions). Forward-looking statements include, but are not limited to, statements concerning projected new store openings or refranchising transactions, 2009 revenue growth rates, global sourcing, distribution strategies and capital expenditures. Forward-looking statements are based on our beliefs as well as assumptions based on information currently available to us, including financial and operational information, the volatility of our stock price, and current competitive conditions. As a result, these statements are subject to various risks and uncertainties. For a discussion of material risks and uncertainties that the Company faces, see the discussion titled Risk Factors in our Annual Report on Form 10-K for the year ended December 30, 2008 and in our Quarterly Report on Form 10-Q for the period ended July 14, 2009.

JAMBA, INC. OVERVIEW

Jamba, Inc. (we , us , our or the Company), a Delaware corporation, and its wholly owned subsidiary, Jamba Juice Company is a leading restaurant retailer of better-for-you food and beverage offerings, including great tasting fruit smoothies, juices and teas, hot oatmeal made with organic steel cut oats, wraps, salads, sandwiches and California Flatbreads and a variety of baked goods and snacks. As of October 6, 2009, there were 742 locations consisting of 488 company owned and operated stores (Company Stores) and 254 franchise stores (Franchise Stores). Jamba Juice Company began operations in 1990.

EXECUTIVE OVERVIEW

2009 Third Fiscal Quarter In Review

In the third quarter of fiscal 2009, we continued to execute on our strategic initiatives. These efforts focused on five key initiatives: building a customer first operationally focused service culture; building retail food capability across all four day parts (breakfast, lunch, afternoon and dinner); accelerating the development of franchise and non-traditional stores; building a licensing growth platform; and continuing to implement a disciplined expense reduction plan.

Some of the most significant events that occurred during the third quarter of fiscal 2009 in furtherance of our business and in each of these areas include:

Building on the successful launch of food in California, we continued to expand our retail food capability, with the introduction of California Flatbreads or our complete food offering including wraps, salads, sandwiches and California Flatbreads as well as our Fruit Tea Infusion beverages in a total of 82 additional retail locations across our New York City, Chicago, Seattle and Hawaii (which is 100% franchised) markets in the second phase of a system-wide rollout. This food offering seeks to satisfy consumer demand for great tasting, high quality, better-for-you, grab-and-go food in furtherance of a healthy lifestyle. As a result, we now offer grab-n-go food and/or California Flatbreads in 377 retail locations and have expanded the sale of oatmeal to over 600 locations. Like all of the Jamba products, these products contain no artificial flavors, 0g trans fat, no artificial preservatives and no high fructose corn syrup.

We opened ten new Franchise Stores and, in the process, achieved the opening of our thirtieth college campus location which further supported our strategy of growth through a focus on franchise and non-traditional store development. We also continued to develop our traditional store growth plan for 2010.

In furtherance of our refranchising and franchise growth strategies, we also obtained registration with the Small Business Administration, or SBA. Registration with the SBA includes having Jamba Juice included in a list of businesses whose franchisees can receive expedited loan processing when applying for financial assistance from the SBA. We expect that this registration will help facilitate and in some cases expedite our franchise growth and refranchising initiatives, which is helpful in light of the current challenging credit market and economy.

We entered into an agreement with Costco Wholesale, or Costco, under which it will sell our jambacards to its members at a discounted rate, with a goal of driving additional traffic into our stores.

Table of Contents

Following negotiations during the quarter, we signed a license agreement with Headline Entertainment for the sale of Jamba-branded apparel and a license agreement with Johnvince Foods for the sale of Jamba-branded trail mix. These licenses supplement the previously reported license agreements we have with Nestlé for ready-to-drink beverages, Oregon Ice Cream for frozen novelties, The Inventure Group for frozen smoothie kits and Think Wow Toys for a Jamba-branded blender for children. We believe these current licenses will provide a good foundation for a consumer products retail licensing program as we continue to seek complementary consumer product categories to license.

We continue to track to plan in our cost reduction initiatives targeting \$25 million in aggregate annual Company Store-level cost savings for fiscal 2009. The primary cost reductions were in the areas of costs of sales and labor. We also continued to manage general and administrative expenses within our targets for the year as we continue to optimize our organizational structure and orient our internal infrastructure to support a more heavily franchise-focused business.

We launched our Fall Feel Good Campaign which is a multi-faceted comprehensive marketing campaign aimed at driving traffic, trial and awareness of the Jamba brand and products.

Despite the many accomplishments and successes we experienced during the third quarter in furtherance of our strategic initiatives, we believe the current recession continues to have a negative impact on our revenue, which is impacted by consumer confidence and discretionary spending. Despite these economic pressures, however, we have seen less pronounced declines in comparable store sales which was (5.3)% for the third fiscal quarter compared to a (13.7)% decline in our second fiscal quarter. While working to continue to improve comparable store sales and increase average ticket, we also have been diligently managing our costs. Although the economic environment continues to be unpredictable, we believe that these efforts, together with the continued execution of our strategic initiatives, will improve the Company's performance and better position the Company for long-term success with a sustainable business model.

Franchise and other revenue	1,498	1.9%	1,652	1.9%
Total revenue	\$ 78,991	100.0%	\$ 86,079	100.0%

Total revenue decreased 8.2% to \$79.0 million for the 12 week period ended October 6, 2009 compared to \$86.1 million for the 12 week period ended October 7, 2008. The \$7.1 million decrease in total revenue was attributable to a \$6.9 million decrease in Company Store revenue and a \$0.2 million decrease in franchise and other revenue.

The decrease in Company Store revenue was primarily attributable to a decrease in Company Store comparable sales of 5.3% for the 12 week period ended October 6, 2009 and was also affected by a net decrease of 32 Company Stores operating since the prior year period, which includes opening one new Company Store, acquiring 13 stores from a franchisee, closing 27 stores and refranchising 19 stores in connection with our refranchising initiative. The number of Company Stores decreased from 520 stores as of October 7, 2008 to 488 stores as of October 6, 2009. Company Store comparable sales represents the change in year-over-year sales for all Company Stores opened for at least 13 full fiscal periods.

The decrease in franchise and other revenue is primarily due to lower comparable franchise store sales and fewer franchise store openings in the third fiscal quarter of 2009 compared to the third quarter of fiscal 2008, resulting in lower franchise fees earned. These decreases were partially offset by an increase in franchise revenue resulting from a net increase of 25 franchise stores since the prior year period. The number of franchise stores as of October 6, 2009 was 254 as compared to 229 stores as of October 7, 2008.

Cost of sales is mostly comprised of fruit, dairy and other products used to make smoothies, as well as prepared food and paper products. Cost of sales decreased \$3.4 million or 15.2% to \$19.3 million for the 12 week period ended October 6, 2009 compared to \$22.7 million for the prior year period. The decrease in cost of sales was primarily attributable to a net decrease of 32 Company Stores since the prior year period, cost savings initiatives implemented during late fiscal 2008 and a decrease in Company Store comparable sales, partially offset by increases resulting from our food offering. The decrease as a percentage of Company Store revenue to 24.9% in the third quarter of fiscal 2009 compared to 26.9% in the prior year period was primarily attributable to cost savings initiatives implemented during late fiscal 2008, a shift in product mix and reductions in waste through our food cost system, partially offset by increases related to products offered in our food offering.

Total occupancy	\$ 10,178	13.1%	\$ 10,679	12.6%

Occupancy costs include both fixed and variable portions of rent, common area maintenance charges, property taxes and property insurance for all Company Store locations. Occupancy costs decreased \$0.5 million or 4.7% to \$10.2 million for the 12 week period ended October 6, 2009 compared to \$10.7 million for the prior year period. Rent decreased \$0.6 million due primarily to a net decrease of 32 Company Stores operating since the prior year period and benefits from rent reductions we received from certain landlords. The increase in common area maintenance fees, property taxes and insurance was primarily attributable to increased real estate taxes, partially offset by a net decrease of 32 Company Stores since the prior year period. As a percentage of Company Store revenue, occupancy costs increased to 13.1% in the third quarter of fiscal 2009 compared to 12.6% in the prior year period. This increase as a percentage of Company Store revenue was primarily due to deleverage resulting from a decrease in Company Store comparable sales.

Store operating expenses consist primarily of various store-level costs such as utilities, marketing, repairs and maintenance, credit card fees and other. Store operating expenses decreased \$0.7 million or 6.4% to \$10.0 million for the 12 week period ended October 6, 2009 compared to \$10.7 million for the prior year period. This decrease was primarily attributable to a \$0.3 million decrease in marketing expenses, \$0.2 million decrease in utilities due to a net decrease of 32 Company Stores since the prior year period and \$0.3 million net decrease from other store operating expenses such as office supplies expense, printing expenses and contract services as a result of our cost savings initiatives, partially offset by increased donations. As a percentage of Company Store revenue, store operating expenses increased to 12.9% for the third quarter of fiscal 2009 compared to 12.7% in the prior year period. This increase as a percentage of Company Store revenue was primarily attributable to deleverage resulting from a decrease in Company Store comparable sales, partially offset by the net effect of reduced expenditures.

General and administrative (G&A) expenses include costs associated with our corporate support center, field supervision, bonuses, outside and contract services, travel and travel-related expenses, legal and accounting fees, share-based compensation and other. G&A expenses decreased \$3.3 million or 26.8% to \$8.8 million for the 12 week period ended October 6, 2009 compared to \$12.1 million for the prior year period. The \$3.3 million decrease was primarily attributable to a \$1.9 million reduction in share based compensation, resulting primarily from \$2.2 million in share based compensation recorded in the prior year quarter for the acceleration of certain stock options and equity awards granted to a former executive officer of the Company. Also contributing to the \$3.3 million decrease in G&A expenses was a \$1.1 million reduction of wage and payroll related expenses, resulting from \$1.2 million in severance costs related to workforce reductions recorded in the prior year period and headcount reductions implemented during fiscal 2008. Additional contributing factors include a reduction in accounting and legal fees and a reduction in other G&A expenses, partially offset by an increase in outside and contract services related to certain management initiatives. As a percentage of total revenue, G&A expenses decreased to 11.2% for the third quarter of fiscal 2009 compared to 14.0% for the prior year period. This decrease was primarily attributable to decreases in share-based compensation, wages and payroll related expenses, travel and travel-related expenses and accounting and legal fees which were partially offset by increases in outside and contract services and deleverage resulting from a decrease in Company Store comparable sales.

Impairment of long-lived assets	\$ 532	0.7%	\$ 5,901	6.9%

Long-lived assets are reviewed for impairment when indicators of impairment are present. Expected future cash flows associated with an asset, in addition to other quantitative and qualitative analyses, including certain assumptions about expected future operating performance and changes in economic conditions are the key factors in determining undiscounted future cash flows. If the sum of the undiscounted cash flows is less than the carrying value of the asset, we recognize an impairment loss equal to the amount by which the carrying value exceeds the fair value of the asset.

Table of Contents

We recorded long-lived asset impairment expense of \$0.5 million for the 12 week period ended October 6, 2009 compared to \$5.9 million for the prior year period. As a percentage of total revenue, impairment of long-lived assets decreased to 0.7% for the 12 week period ended October 6, 2009, compared to 6.9% for the prior year period. Impairment charge for the 12 week period ended October 6, 2009 reflects the underperformance of fewer stores as compared to the prior year period.

Other operating expenses consist primarily of store closure and lease termination costs, pre-opening expense, losses on disposals, amortization of jambacard liability and income from jambacard breakage. Other operating expenses decreased \$1.4 million to \$3,000 for the 12 week period ended October 6, 2009 compared to \$1.4 million for the prior year period. As a percentage of total revenue, other operating expenses were 0.0% for the third quarter of fiscal 2009 as compared to 1.7% in the prior year period. This \$1.4 million decrease and decrease as a percentage of total revenue is primarily attributable to the \$1.0 million expense incurred in the prior year quarter resulting from the write-off of loan origination fees and early termination fee with the lender of our previous credit facility and a \$0.6 million decrease in loss on disposals.

Interest expense for the 12 week period ended October 6, 2009 decreased to \$0.3 million compared to \$0.5 million for the prior year period. As a percentage of total revenue, interest expense decreased to 0.4% for the 12 week period ended October 6, 2009 compared to 0.6% for the prior year period. This \$0.2 million decrease and decrease as a percentage of revenue was primarily attributable to interest and fees resulting from our former credit facility recorded in the prior year period, partially offset by accretion of transaction costs resulting from the issuance of our redeemable preferred equity.

Income tax benefit

The Company has recorded a tax benefit for the 12 week period ended October 6, 2009. The Company's effective tax rate was (21.8)% for the 12 week period ended October 6, 2009. The effective tax rate is affected by pretax income or loss, a change in the valuation allowance related to deductible temporary differences originating during the current year and the recording of previously unrecognized tax benefits. During the 12 week period ended October 6, 2009 approximately \$0.5 million of previously unrecognized tax benefits were recorded due to the expiration of the statute of limitations.

Our effective income tax rate was (0.1)% for the 12 week period ended October 7, 2008. Our prior year tax rate was affected by a number of factors, including pretax loss, a change in the valuation allowance related to deductible temporary differences originating during the current year and the intangible asset impairment. The unrealized change in fair value recorded for our derivative liability of \$0.5 million is not included in income for tax purposes.

Excluding the unrealized change in the fair value of the derivative liability, the valuation allowance established related to deferred tax assets at January 1, 2008, and the impairment of the trademark, the annual effective tax (benefit) rate was 0.0%.

Total revenue decreased 11.9% to \$251.0 million for the 40 week period ended October 6, 2009 compared to \$284.7 million for the 40 week period ended October 7, 2008. The \$33.7 million decrease in total revenue was attributable to a \$33.2 million decrease in Company Store revenue and a \$0.5 million decrease in franchise and other revenue.

The decrease in Company Store revenue is primarily attributable to a decrease in Company Store comparable sales of 11.2% for the 40 week period ended October 6, 2009 and was also affected by a net decrease of 32 Company Stores operating since the prior year period, which includes opening one new Company Store, acquiring 13 stores from a franchisee, closing 27 stores and refranchising 19 stores in connection with our refranchising initiative. The number of Company Stores decreased from 520 stores as of October 7, 2008 to 488 stores as of October 6, 2009. Company Store comparable sales represents the change in year-over-year sales for all Company Stores opened for at least 13 full fiscal periods.

The decrease in franchise and other revenue is due primarily to lower comparable franchise store sales, partially offset by a net increase of 25 franchise stores since the prior year period. The number of franchise stores as of October 6, 2009 was 254 as compared to 229 stores as of October 7, 2008.

	40 Week Period Ended October 6, 2009	% of Total Revenue	40 Week Period Ended October 7, 2008	% of Total Revenue
Trademark impairment	\$	0.0%	\$ 82,600	29.0%

There was no trademark impairment recorded for the 40 week period ended October 6, 2009 as the value of our trademarks has been written down to zero. During the 40 week period ended October 7, 2008, \$82.6 million was recorded for trademark impairment. In the prior year, we recorded an intangible asset impairment expense related to the impairment of our trademark. We assess our intangible asset amounts for impairment each year, and more frequently if circumstances suggest an impairment may have occurred. The requirements for assessing whether intangible assets have been impaired involve market-based information and some degree of subjective assessment. The fair value is estimated using a discounted cash flow model combined with market valuation approaches. Based on our stock price, negative comparable store sales and our forecast, we determined that an \$82.6 million charge for impairment of our trademark was necessary in the 40 week period ended October 7, 2008.

Other operating

(in 000 \$)

	40 Week Period Ended October 6, 2009	% of Total Revenue	40 Week Period Ended October 7, 2008	% of Total Revenue
Other operating	\$ 312	0.1%	\$ 6,312	2.2%

Other operating expenses consist primarily of lease termination and store closure costs, pre-opening expense, losses on disposals, amortization of jambacard liability and income from jambacard breakage. Other operating expenses decreased \$6.0 million to \$0.3 million for the 40 week period ended October 6, 2009 compared to \$6.3 million for the prior year period. As a percentage of total revenue, other operating expenses were 0.1% for the 40 week period ended October 6, 2009 as compared to 2.2% in the prior year period. The \$6.0 million decrease and decrease as a percentage of total revenue is primarily attributable to a decrease in lease termination and store closure costs of \$2.0 million which was recorded in the prior year as a part of our announced restructuring efforts, a decrease in pre-opening expenses of \$1.5 million resulting from one new Company Store opening in the 40 week period ended October 6, 2009 as compared to 35 Company Store openings in the prior year period, a \$1.0 million expense recorded in the prior year resulting from the write-off of loan origination fees and early termination fee with the lender of our previous credit facility and a \$1.0 million decrease in loss from disposals. Also contributing to the decrease in other operating expense was a net increase of \$0.8 million in income from jambacard breakage and amortization of jambacard liability. Pre-opening expense was classified as its own line item in the prior year period quarterly report and has been reclassified to be included in other operating expenses.

Gain from derivative liabilities	\$ 1,597	0.6%	\$ 7,610	2.7%

Gain from derivative liabilities decreased \$6.0 million or 79.0% to \$1.6 million for the 40 week period ended October 6, 2009 compared to \$7.6 million for the prior year period. The \$6.0 million decrease and decrease as a percentage of revenue was attributable to the change in the fair value of our warrants that were classified as derivative liabilities and the change in

the fair value of our Put and Call Rights we issued in connection with our previous Financing Agreement (see Note 4). These warrants expired and the put portion of the Put and Call Rights was exercised during the second fiscal quarter of 2009. For more information on our warrants and Put and Call Rights, please refer to the discussion under *Business and Significant Accounting Policies Warrants and Derivative Instruments* included within Note 1 in the Notes to the Financial Statements of Jamba, Inc. in our Annual Report on Form 10-K for the year ended December 30, 2008.

Interest income

Interest income	\$ 384	0.2%	\$ 315	0.1%

Interest income for the 40 week period ended October 6, 2009 increased to \$0.4 million compared to \$0.3 million from the prior year period due primarily to higher average cash balances in our interest bearing accounts, partially offset by decreases in interest rates.

Interest expense

(in 000 \$)

	40 Week Period Ended October 6, 2009	% of Total Revenue	40 Week Period Ended October 7, 2008	% of Total Revenue
Interest expense	\$ 6,920	2.8%	\$ 703	0.2%

Interest expense for the 40 week period ended October 6, 2009 increased to \$6.9 million compared to \$0.7 million for the prior year period. As a percentage of total revenue, interest expense increased to 2.8% for the 40 week period ended October 6, 2009 compared to 0.2% for the prior year period. This \$6.2 million increase and increase as a percentage of revenue was primarily attributable to interest and fees resulting from our Financing Agreement for the 40 week period ended October 6, 2009, prepayment penalties and the write-off of prepaid loan fees and transaction costs in connection with the payoff of our previous Financing Agreement (see Note 9). Also contributing to the increase in interest expense is the accretion of transaction costs resulting from the issuance of our redeemable preferred equity.

Income tax benefit

The Company has recorded a tax benefit for the 40 week period ended October 6, 2009. The Company's effective tax rate was (3.5)% for the 40 week period ended October 6, 2009. The effective tax rate is affected by pretax loss, a change in the valuation allowance related to deductible temporary differences originating during the current year, and the recording of previously unrecognized tax benefits. During the 40 week period ended October 6, 2009 approximately \$0.5 million of unrecognized tax benefits were recorded due to the expiration of the statute of limitations.

Our effective income tax rate was (0.6)% for the 40 week period ended October 7, 2008. Our prior year tax rate was affected by a number of factors, including income before taxes, a change in the valuation allowance related to deductible temporary differences originating during the current year and the intangible asset impairment. The unrealized change in fair value recorded for our derivative liability of \$7.6 million is not included in income for tax purposes. We determined that it is more likely than not, based on updated projections of operating results and related taxable income, that the benefit of deferred tax assets at January 1, 2008 will not be realized and a valuation allowance of \$31.8 million was established. We recorded a tax benefit of \$32.9 million related to the intangible asset impairment of the trademark and corresponding reversal of the deferred tax liability related to the temporary book and tax basis difference in the trademark.

Excluding the unrealized change in the fair value of the derivative liability, the valuation allowance established related to deferred tax assets at January 1, 2008, and the impairment of the trademark, the effective tax benefit rate was 0.0%.

Table of Contents**LIQUIDITY AND CAPITAL RESOURCES*****Cash Flows Summary***

The following table summarizes our cash flows for the 40 week periods ended October 6, 2009 and October 7, 2008 (in thousands):

	40 Week Period Ended October 6, 2009	40 Week Period Ended October 7, 2008
Net cash provided by operating activities	\$ 9,731	\$ 11,401
Net cash used in investing activities	(4,444)	(26,265)
Net cash provided by financing activities	3,312	20,102
Net increase in cash and cash equivalents	\$ 8,599	\$ 5,238

Operating Activities

In the 40 week period ended October 6, 2009, net cash provided by operating activities was approximately \$9.7 million, compared with net cash provided by operating activities of approximately \$11.4 million in the 40 week period ended October 7, 2008. The decrease in net cash provided by operating activities for the 40 week period ended October 6, 2009 as compared to the 40 week period ended October 7, 2008 primarily resulted from net decreases in working capital, combined with the Company's net loss excluding shared-based compensation, depreciation and amortization and other non-cash expenses.

Investing Activities

In the 40 week period ended October 6, 2009, net cash used in investing activities was approximately \$4.4 million, compared with net cash used by investing activities of approximately \$26.3 million in the 40 week period ended October 7, 2008. Capital expenditures were the largest component of our investing activities in the current and prior year period and include expenditures for the funding of the development or sale and acquisition of Company Stores and acquisition of personal property and equipment for existing Company Stores. The required cash investment for new Company Stores varies depending on the size of the new Company Store, geographic location, degree of work performed by the landlord and complexity of site development issues. During the 40 week period ended October 6, 2009, we opened one new Company Store. Net cash used by investing activities for the 40 week period ended October 6, 2009 was also affected by a change in restricted cash of \$3.0 million and proceeds from the sale of our stores of \$1.1 million.

Capital expenditures for the 40 week period ended October 6, 2009 total approximately \$8.5 million as compared to approximately \$26.2 million for the 40 week period ended October 7, 2008. The decrease in capital expenditures resulted primarily from the Company's decision to substantially slow new Company Store development and Franchise Store acquisitions. In fiscal 2009, we expect capital expenditures to be \$11 million to \$12 million depending on our liquidity needs. We expect to open less than five new Company Stores for all of 2009 as we focus our growth on franchise development. We anticipate investing in new equipment to support building our food capability and upgrade our information technology systems.

Financing Activities

In the 40 week period ended October 6, 2009, net cash provided by financing activities was \$3.3 million, compared with net cash provided by financing activities of \$20.1 million in the 40 week period ended October 7, 2008. Cash provided by financing activities for the 40 week period ended October 6, 2009 resulted primarily from net proceeds of our issuance of redeemable preferred stock of \$34.1 million, partially offset by the payoff of our Senior Notes of \$25.0 million principal plus accrued interest, the exercise of an outstanding put option which required us to repurchase two million shares of our outstanding common stock for \$3.0 million, transaction costs paid in connection with the issuance of our preferred stock of \$1.9 million, preferred stock dividend payments of \$0.7 million and \$0.2 million in capital lease payments.

Capital Resources

Edgar Filing: JAMBA, INC. - Form 10-Q

On June 16, 2009, we issued 304,348 shares of Series B Preferred Stock at a price of \$115 per share, for an aggregate purchase price of \$35.0 million, less approximately \$3.1 million in transaction costs in a private placement transaction. The Series B Preferred Stock has an 8% dividend, payable quarterly in cash and accrues irrespective of whether dividends are actually declared or paid. The dividend rate shall increase to 10% in the event the Common Stock is not listed for trading on any of the New York Stock Exchange, the NASDAQ Global Market or the American Stock Exchange or if we fail to declare

and pay, in full and in cash, dividends on shares of the Series B Preferred Stock for three consecutive quarters until such time as the dividends are paid in full and in cash. After seven years from the date the shares of Series B Preferred Stock are originally issued, the holders of such shares will have the right to require us to redeem their shares of Series B Preferred Stock, in whole or in part, at a price per share equal to the original sale price per share plus any unpaid but accrued dividends. At October 6, 2009, the redemption amount of our outstanding Series B Preferred Stock was approximately \$35.2 million.

We used a substantial portion of the proceeds from the sale of the Series B Preferred Stock to repay the Senior Notes and certain related transaction costs. As a result we no longer carry the debt or the monthly interest payment obligations associated with the Senior Notes, but we do have a dividend obligation, payable quarterly measured from the original date of issuance of the Series B Preferred Stock, in an aggregate amount of \$700,000 per quarter based on the current number of shares of Series B Preferred Stock outstanding and the current dividend rate of 8% per year.

As of October 6, 2009, we had cash and cash equivalents of \$29.4 million compared to \$20.8 million as of December 30, 2008. Our primary sources of liquidity are the remaining cash on hand resulting from the issuance of the Series B Preferred Stock and cash flows provided by operating activities. In the future, and as permitted under the Securities Purchase Agreement for the Series B Preferred Stock, we may enter into equipment leasing arrangements and incur up to \$10.0 million of indebtedness as necessary. We cannot assure, however, that such financing will be available on favorable terms or at all. As of October 6, 2009, we held \$2.7 million in restricted cash, which represented cash held in certificates of deposit to collateralize our letters of credit.

On May 28, 2009, we announced the launch of a franchising program that is expected to involve the sale of as many as 150 Company Stores primarily located outside of California to existing or prospective franchisees. Over the next twelve to eighteen months, we expect the sale of any such Company Stores to generate additional cash which we intend to use to fund future growth and for working capital, if necessary. Through the 40 week period ended October 6, 2009, we have completed the sale of 19 stores and have subsequently completed the sale of an additional eight stores through November 12, 2009, the issuance date of our financial statements.

Our primary liquidity and capital requirements are for working capital and general corporate needs and the planned fiscal 2009 capital expenditures described above. We expect that our primary sources of liquidity will be sufficient to fund working capital, general corporate needs, Series B Preferred Stock dividend payments and the non-discretionary capital expenditures for at least the next 12 months. The use of cash to fund discretionary capital expenditures will be based on the need to conserve our capital.

The adequacy of our available funds will depend on many factors, including the macroeconomic environment, the operating performance of our Company Stores, the successful expansion of our franchise and licensing programs, our franchising initiative and the successful rollout and consumer acceptance of our food initiatives. Given these factors, our foremost priorities for the near term are preserving and generating cash sufficient to fund our liquidity needs.

Contractual Obligations

Except as set forth below, the disclosures relating to our contractual obligations in our Annual Report on Form 10-K for the year ended December 30, 2008 have not materially changed since we filed that report:

We repaid the Senior Notes in full during our second fiscal quarter and we no longer have a note payable or interest payable obligation in connection with our Financing Agreement. In connection with the repayment of the Senior Notes, the put right that we issued under our Put and Call Agreement was exercised and is no longer outstanding.

COMMODITY PRICES, AVAILABILITY AND GENERAL RISK CONDITIONS

We contract for significant amounts of instant quick freeze fruit, fruit concentrate and dairy products to support the needs of both our Company Stores and franchise stores. The price and availability of these commodities directly impacts our results of operations and can be expected to impact our future results of operations.

SEASONALITY AND QUARTERLY RESULTS

Our business is subject to seasonal fluctuations. We expect to realize significant portions of our revenue during the second and third quarters of the fiscal year, which align with the warmer summer season. In addition, quarterly results are affected by the timing of the opening of new stores and weather conditions. However, geographic diversification of our store locations may conceal or diminish the financial statement impact of such seasonal influences. Because of the seasonality of our business, results for any quarter are not necessarily indicative of the results that may

be achieved for the full fiscal year or any subsequent quarter.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to adopt accounting policies and make significant judgments and estimates to develop amounts reflected and disclosed in the financial statements. In many cases, there are alternative policies or estimation techniques that could be used. We maintain a process to review the application of our accounting policies and to evaluate the appropriateness of the many estimates that we are required to make in order to prepare the financial statements. However, even under optimal circumstances, estimates routinely require adjustment based on changing circumstances and the receipt of new or better information. There have been no significant changes to the policies and estimates as discussed in our Annual Report on Form 10-K for the year ended December 30, 2008.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The following discussion of market risks contains forward-looking statements. Actual results may differ materially from the following discussion based on general conditions in the financial and commodity markets.

We purchase fruit based on short-term seasonal pricing agreements. These short-term agreements generally set the price of procured frozen fruit and 100% pure fruit concentrates for less than one year based on estimated annual requirements. In order to mitigate the effects of price changes in any one commodity on its cost structure, we contract with multiple suppliers both domestically and internationally. These agreements typically set the price for some or all of our estimated annual fruit requirements, protecting us from short-term volatility. Nevertheless, these agreements typically contain a *force majeure* clause, which, if utilized (such as when hurricanes in 2004 destroyed the Florida orange crop and more recently with the freeze that affected California citrus), may subject us to significant price increases.

Our pricing philosophy is not to attempt to change consumer prices with every move up or down of the commodity market, but to take a longer term view of managing margins and the value perception of our products in the eyes of our customers. Management's objective is to maximize our revenue through increased customer frequency. However, management has the ability to increase certain menu prices in response to food commodity prices.

We do not purchase derivative instruments on the open market. We did not have any outstanding derivative liabilities as of October 6, 2009. Certain warrants which were previously classified as a derivative liability expired on June 28, 2009 and the put right under our Put and Call Agreement which was also classified as a derivative liability was exercised during the second fiscal quarter of 2009. We had classified certain warrants in our stock (a current liability of \$0.1 million at December 30, 2008) and rights under our Put and Call Agreement signed in connection with our Financing Agreement as derivative instruments (a current liability of \$2.0 million at December 30, 2008). Classification as derivative liabilities was required because, for each instrument, there is a possibility that the instrument could be required to be settled in stock that requires registration. We were required to mark these instruments to market as of the end of each reporting period and to recognize the change in fair value in our consolidated statements of operations. Our stock price has been historically volatile and the fair values of these instruments were sensitive to changes in our underlying stock price. We are also subject to changes in the risk free interest rate in connection with the cash we hold in interest bearing accounts.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

We have established and maintain disclosure controls and procedures that are designed to ensure that material information relating to the Company and our subsidiaries required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934 is recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only a reasonable assurance of achieving the desired control objectives, and management was necessarily required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures. We carried out an evaluation under the supervision and with the participation of management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the period covered by this report. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective at the reasonable assurance level as of October 6, 2009.

Changes in Internal Control over Financial Reporting

There have been no changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934) during the fiscal quarter ended October 6, 2009 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
