AMERIS BANCORP AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

MARCH 31, 2010

(Unaudited)

NOTE 1 BASIS OF PRESENTATION AND ACCOUNTING POLICIES

Ameris Bancorp (the Company or Ameris) is a financial holding company headquartered in Moultrie, Georgia. Ameris conducts the majority of its operations through its wholly-owned banking subsidiary, Ameris Bank (the Bank). At March 31, 2010, the Bank operated 53 branches in select markets in Georgia, Alabama, Florida and South Carolina. Our business model capitalizes on the efficiencies of a large financial services company while still providing the community with the personalized banking service expected by our customers. We manage our Bank through a balance of decentralized management responsibilities and efficient centralized operating systems, products and loan underwriting standards. Ameris Board of Directors and senior managers establish corporate policy, strategy and administrative policies. Within Ameris established guidelines and policies, to minimize risk, each community board and senior managers make lending and community specific decisions. This approach allows the banker closest to the customer to respond to the differing needs and demands of their unique market.

The accompanying unaudited consolidated financial statements for Ameris have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and Regulation S-X. Accordingly, the financial statements do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statement presentation. The interim consolidated financial statements included herein are unaudited, but reflect all adjustments which, in the opinion of management, are necessary for a fair presentation of the consolidated financial position and results of operations for the interim periods presented. All significant intercompany accounts and transactions have been eliminated in consolidation. The results of operations for the period ended March 31, 2010 are not necessarily indicative of the results to be expected for the full year. These financial statements should be read in conjunction with the financial statements and notes thereto and the report of our registered independent public accounting firm included in the Company s Annual Report on Form 10-K for the year ended December 31, 2009.

Certain amounts reported for the periods ended December 31, 2009 and March 31, 2009 have been reclassified to conform to the presentation as of March 31, 2010. These reclassifications had no effect on previously reported net income or stockholders equity.

Subsequent Events Stock Offering

On April 20, 2010, the Company completed a registered public offering of shares of the Company s common stock, par value \$1.00 per share (the Common Stock), in which the Company sold 9,473,125 shares of Common Stock at an offering price of \$9.50 per share. The Company s net proceeds from the offering totaled approximately \$84.9 million.

Newly Adopted Accounting Pronouncements

In February 2010, the FASB issued Accounting Standards Update No. 2010-09, Subsequent Events: Amendments to Certain Recognition and Disclosure Requirements (ASC No. 2010-09). ASU No. 2010-09 removes some contradictions between the requirements of U.S. GAAP and the filing rules of the Securities and Exchange Commission (SEC). SEC filers are required to evaluate subsequent events through the date the financial statements are issued, and they are no longer required to disclose the date through which subsequent events have been evaluated. This guidance was effective upon issuance except for the use of the issued date for conduit debt obligors, and it is not expected to have a material impact on Company s results of operations, financial position or disclosures.

In February 2010, the FASB issued Accounting Standards Update No. 2010-10, Consolidation: Amendments for Certain Investment Funds (ASU No. 2010-10). ASU No. 2010-10 indefinitely defers the effective date for certain

Table of Contents

investment funds, the amendments made to FASB ASC 810-10 related to variable interest entities by Statement of Financial Accounting Standard (SFAS) No. 167, however this deferral does not apply to the disclosure requirements of SFAS No. 167. ASU No. 2010-10 also clarifies that (1) interests of related parties must be considered in determining whether fees paid to decision makers or service providers constitute a variable interest, and (2) a quantitative calculation should not be the only basis on which such determination is made. This guidance is effective as of the beginning of the first annual period beginning after November 15, 2009, and for interim periods within that first annual reporting period. It is not expected to have a material impact on Company s results of operations, financial position or disclosures.

In March 2010, the FASB issued Accounting Standards Update No. 2010-11, Derivatives and Hedging: Scope Exception Related to Embedded Credit Derivatives (ASU No. 2010-11). ASU No. 2010-11 clarifies the type of embedded credit derivative that is exempt from embedded derivative bifurcation requirements, by resolving a potential ambiguity about the breadth of the embedded credit derivative scope exception with regard to some types of contracts, such as collateralized debt obligations (CDO s) and synthetic CDO s. The scope exception will no longer apply to some contracts that contain an embedded credit derivative feature that transfers credit risk. The ASU is effective for fiscal quarters beginning after June 15, 2010, and is not expected to have a material impact on Company s results of operations, financial position or disclosures.

Fair Value of Financial Instruments

The fair value of a financial instrument is the current amount that would be exchanged between willing parties, other than in a forced liquidation. Fair value is best determined based upon quoted market prices. However, in many instances, there are no quoted market prices for the Company s various financial instruments. In cases where quoted market prices are not available, fair value is based on discounted cash flows or other valuation techniques. These techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. Accordingly, the fair value estimates may not be realized in an immediate settlement of the instrument. The accounting standard for disclosures about fair value of financial instruments excludes certain financial instruments and all nonfinancial instruments from its disclosure requirements. Accordingly, the aggregate fair value amounts presented may not necessarily represent the underlying fair value of the Company.

The following methods and assumptions were used by the Company in estimating the fair value of its financial instruments and other accounts recorded based on their fair value:

Cash, Due From Banks, Interest-Bearing Deposits in Banks and Federal Funds Sold: The carrying amount of cash, due from banks and interest-bearing deposits in banks and federal funds sold approximates fair value.

Securities Available for Sale: The fair value of securities available for sale is determined by various valuation methodologies. Where quoted market prices are available in an active market, securities are classified within Level 1 of the valuation hierarchy. If quoted market prices are not available, then fair values are estimated by using pricing models, quoted prices of securities with similar characteristics, or discounted cash flows. Level 2 securities include mortgage-backed securities issued by government sponsored enterprises and municipal bonds. The level 2 fair value pricing is provided by an independent third-party and is based upon similar securities in an active market. In certain cases where Level 1 or Level 2 inputs are not available, securities are classified within Level 3 of the hierarchy and include certain residual municipal securities and other less liquid securities. Federal Home Loan Bank (FHLB) stock is included in other investment securities at its original cost basis, as cost approximates fair value and there is no ready market for such investments.

Loans: The carrying amount of variable-rate loans that reprice frequently and have no significant change in credit risk approximates fair value. The fair value of fixed-rate loans is estimated based on discounted contractual cash flows, using interest rates currently being offered for loans with similar terms to borrowers with similar credit quality. The fair value of impaired loans is estimated based on discounted contractual cash flows or underlying collateral values, where applicable. A loan is determined to be impaired if the Company believes it is probable that all principal and interest amounts due according to the terms of the note will not be collected as scheduled. The fair value of impaired loans is determined in accordance with accounting standards and generally results in a specific reserve established through a charge to the provision for loan losses. Losses on impaired loans are charged to the allowance when management believes the uncollectability of a loan is confirmed. Management has determined that the majority of impaired loans are Level 2 assets due to the extensive use of market appraisals. To the extent that

Table of Contents

market appraisals or other methods do not produce reliable determinations of fair value, these assets are deemed to be Level 3.

Deposits: The carrying amount of demand deposits, savings deposits and variable-rate certificates of deposit approximates fair value. The fair value of fixed-rate certificates of deposit is estimated based on discounted contractual cash flows using interest rates currently offered for certificates with similar maturities.

Repurchase Agreements and/or Other Borrowings: The carrying amount of variable rate borrowings and securities sold under repurchase agreements approximates fair value. The fair value of fixed rate other borrowings is estimated based on discounted contractual cash flows using the current incremental borrowing rates for similar type borrowing arrangements.

Subordinated Deferrable Interest Debentures: The carrying amount of the Company's variable rate trust preferred securities approximates fair value.

Off-Balance-Sheet Instruments: The carrying amount of commitments to extend credit and standby letters of credit approximates fair value. The carrying amount of the off-balance-sheet financial instruments is based on fees charged to enter into such agreements.

Derivatives: The Company's current hedging strategies involve utilizing interest rate floors and interest rate swaps. The fair value of derivatives is recognized as assets or liabilities in the financial statements. The accounting for the changes in the fair value of a derivative depends on the intended use of the derivative instrument at inception and ongoing tests of effectiveness. As of March 31, 2010, the Company had cash flow hedges with a notional amount of \$35.0 million.

Other Real Estate Owned: The fair value of other real estate owned (OREO) is determined using certified appraisals that value the property at its highest and best uses by applying traditional valuation methods common to the industry. The Company does not hold any OREO for profit purposes and all other real estate is actively marketed for sale. Management has determined that in most cases the valuation method for other real estate produces reliable estimates of fair value and has classified these assets as Level 2.

The carrying amount and estimated fair value of the Company's financial instruments, not shown elsewhere in these financial instruments, were as follows:

	March 31, 2010		March 31, 2009	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
(Dollars in Thousands)				
Financial assets:				
Loans, net	\$ 1,502,965	\$ 1,513,424	\$ 1,548,597	\$ 1,557,362
Financial liabilities:				
Deposits	\$ 2,088,306	\$ 2,090,633	\$ 2,028,684	\$ 2,037,202
Other borrowings	\$ 2,000	\$ 2,012	\$ 7,000	\$ 7,106

The fair value hierarchy describes three levels of inputs that may be used to measure fair value:

Level 1 - Quoted prices in active markets for identical assets or liabilities.

Level 2 - Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 - Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

Table of Contents

The following table presents the fair value measurements of assets and liabilities measured at fair value on a recurring basis and the level within the fair value hierarchy in which the fair value measurements fall as of March 31, 2010 and 2009:

	Fair Value Measurements on a Recurring Basis			
	As of March 31, 2010			
	Fair Value	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)

Total nonrecurring assets at fair value	\$ 122,449	\$	\$ 89,649	\$ 32,800
--	-------------------	-----------	------------------	------------------

	Fair Value Measurements on a Nonrecurring Basis As of March 31, 2009			
	Fair Value	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Impaired loans carried at fair value	\$ 63,908	\$	\$ 63,908	\$
Other real estate owned	14,271		14,271	
Total nonrecurring assets at fair value	\$ 78,179	\$	\$ 78,179	\$

Pursuant to accounting standards, below is the Company's reconciliation of Level 3 assets as of March 31, 2010. Gains or losses on impaired loans are recorded in the provision for loan losses.

	Investment Securities Available for Sale	Other Real Estate Owned
Beginning balance January 1, 2010	\$ 2,000	\$ 23,316
Total gains/(losses) included in net income		(1,072)
Purchases, sales, issuances, and settlements, net		(4,253)
Transfers in or out of Level 3		16,692
Ending balance March 31, 2010	\$ 2,000	\$ 34,683

NOTE 2 INVESTMENT SECURITIES

Ameris' investment policy blends the Company's liquidity needs and interest rate risk management with its desire to increase income and provide funds for expected growth in loans. The investment securities portfolio consists primarily of U.S. government sponsored mortgage-backed securities and agencies, state and municipal securities and corporate debt securities. Ameris' portfolio and investing philosophy concentrate activities in obligations where the credit risk is limited. For the small portion of Ameris' portfolio found to present credit risk, the Company has reviewed the investments and financial performance of the obligors and believes the credit risk to be acceptable.

The amortized cost and estimated fair value of investment securities available for sale at March 31, 2010, December 31, 2009 and March 31, 2009 are presented below:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
(Dollars in Thousands)				
March 31, 2010:				
U. S. government agencies	\$ 33,818	\$ 416	\$	\$ 34,234

Total securities	\$ 337,405	\$ 8,308	\$ (1,681)	\$ 344,032

The amortized cost and fair value of available-for-sale securities at March 31, 2010 by contractual maturity are summarized in the table below. Expected maturities for mortgage-backed securities may differ from contractual maturities because in certain cases borrowers can prepay obligations without prepayment penalties. Therefore, these securities are not included in the following maturity summary.

	Amortized Cost (Dollars in Thousands)	Fair Value
Due in one year or less	\$ 6,144	\$ 6,210
Due from one year to five years	28,107	28,584
Due from five to ten years	44,582	45,384
Due after ten years	8,415	5,503
Mortgage-backed securities	154,926	162,332
	\$ 242,174	248,013

Securities with a carrying value of approximately \$123.5 million were pledged to secure public deposits and other purposes required or permitted by law at March 31, 2010.

The following table details the gross unrealized losses and fair value of securities aggregated by category and duration of continuous unrealized loss position at March 31, 2010 and December 31, 2009.

NOTE 3 LOANS

The Company engages in a full complement of lending activities, including real estate-related loans, agriculture-related loans, commercial and financial loans and consumer installment loans. Ameris concentrates the majority of its lending activities in real estate loans where the historical loss percentages have been low. While risk of loss in the Company's portfolio is primarily tied to the credit quality of the various borrowers, risk of loss may increase due to factors beyond Ameris' control, such as local, regional and/or national economic downturns. General conditions in the real estate market may also impact the relative risk in the real estate portfolio.

The Company evaluates loans for impairment when a loan is risk rated as substandard or worse. The Company measures impairment based upon the present value of the loan's expected future cash flows discounted at the loan's effective interest rate, except where foreclosure or liquidation is probable or when the primary source of repayment is provided by real estate collateral. In these circumstances, impairment is measured based upon the estimated fair value of the collateral. In addition, in certain circumstances, impairment may be based on the loan's observable estimated fair value. Impairment with regard to substantially all of Ameris' impaired loans has been measured based on the estimated fair value of the underlying collateral. At the time the contractual principal payments on a loan are deemed uncollectible, Ameris' policy is to record a charge against the allowance for loan losses.

Nonperforming assets include loans classified as nonaccrual or renegotiated and foreclosed or repossessed assets. It is the general policy of the Company to stop accruing interest income and place the recognition of interest on a cash basis when any commercial, industrial or commercial real estate loan is 90 days or more past due as to principal or interest and/or the ultimate collection of either is in doubt, unless collection of both principal and interest is assured by way of collateralization, guarantees or other security. When a loan is placed on nonaccrual status, any interest previously accrued but not collected is reversed against current income unless the collateral for the loan is sufficient to cover the accrued interest or a guarantor assures payment of interest.

Loans are stated at unpaid balances, net of unearned income and deferred loan fees. Balances within the major loans receivable categories are presented in the following table:

(Dollars in Thousands)	March 31, 2010	December 31, 2009	March 31, 2009
Commercial, financial and agricultural	\$ 161,059	\$ 168,046	\$ 183,860
Real estate - residential	177,481	182,483	189,069
Real estate - commercial and farmland	1,040,097	1,063,369	1,077,044
Real estate - construction and development	93,694	100,770	151,539
Consumer installment	56,344	59,108	62,176
Other	7,403	10,583	9,235
	\$ 1,536,528	\$ 1,584,359	\$ 1,672,923

NOTE 4 ALLOWANCE FOR LOAN LOSSES

Activity in the allowance for loan losses for the three months ended March 31, 2010, for the year ended December 31, 2009 and for the three months ended March 31, 2009 is as follows:

(Dollars in Thousands)	March 31, 2010	December 31, 2009	March 31, 2009
------------------------	-------------------	----------------------	-------------------

Edgar Filing: Ameris Bancorp - Form 10-Q

Balance, January 1	\$ 35,762	\$ 39,652	\$ 39,652
Provision for loan losses charged to expense	10,770	42,068	7,912

Ending balance	\$ 33,563	\$ 35,762	\$ 42,417

The following is a summary of information pertaining to impaired loans for the three months ended March 31, 2010 and the twelve months ended December 31, 2009:

(Dollars in Thousands)	March 31, 2010	December 31, 2009
Impaired loans requiring a valuation allowance	\$ 58,842	\$ 55,504
Impaired loans not requiring a valuation allowance	\$ 30,807	\$ 40,627
Valuation allowance related to impaired loans	\$ 7,207	\$ 6,815
Average investment in impaired loans	\$ 90,984	75,784
Interest income recognized on impaired loans	\$ 22	\$ 523
Foregone interest income on impaired loans	\$ 575	\$ 6,253

NOTE 5 OTHER REAL ESTATE OWNED

The following is an inventory of other real estate as of March 31, 2010:

(Dollars in Thousands)	Number of Properties	Carrying Amount
Land - Commercial	16	\$ 5,924
Land Residential	9	2,215
Finished residential lots	52	4,187
Subdivision	4	4,437
SFR properties	86	8,635
Commercial properties	18	8,573
Agricultural land	6	712
Total Other Real Estate Owned	191	\$ 34,683

NOTE 6 ASSETS ACQUIRED IN FDIC-ASSISTED ACQUISITIONS

Total covered assets at March 31, 2010 totaled \$138.2 million, compared to \$146.6 million at December 31, 2009. The following table summarizes components of covered assets:

(Dollars in Thousands)	American United Bank	United Security Bank	Covered Assets
Covered Loans	\$ 66,439	\$ 92,136	\$ 158,575
Less adjustments related to credit risk	(22,782)	(14,027)	(36,809)
Less adjustments related to liquidity and yield	(407)	(995)	(1,402)
Total Covered Loans	\$ 43,250	\$ 77,114	\$ 120,364
OREO	\$ 10,333	\$ 12,619	\$ 22,952
Less remaining fair value adjustments	(1,585)	(3,504)	(5,089)

Edgar Filing: Ameris Bancorp - Form 10-Q

Covered OREO	\$ 8,748	\$ 9,115	\$ 17,863
Total Covered Assets	51,998	86,229	138,227
FDIC loss share receivable	24,329	21,497	45,827

Through the end of the first quarter of 2010, the Company had realized losses totaling approximately \$17.7 million on the covered loans and OREO at the acquired banks. The fair value adjustments assigned at the acquisition date were sufficient for the losses realized such that no provision for loan losses was required. For the realized losses, the Company has submitted the required loss-share certificates and anticipates a payment totaling approximately \$14.2 million.

NOTE 7 WEIGHTED AVERAGE SHARES OUTSTANDING

Due to the net loss reported for the quarter ending March 31, 2010, the Company has excluded the effects of options as these would have been anti-dilutive. Earnings per share have been computed based on the following weighted average number of common shares outstanding:

	For the Three Months Ended March 31, 2010 2009 (share data in thousands)	
Basic shares outstanding	13,840	13,842
Plus: Dilutive effect of ISOs		
Plus: Dilutive effect of restricted grants		
Diluted shares outstanding	13,840	13,842

NOTE 8 OTHER BORROWINGS

The Company has certain borrowing arrangements with various financial institutions that are used in the Company's operations primarily to fund growth in earning assets when appropriate spreads can be realized. At March 31, 2010, total other borrowings amounted to \$2.0 million compared to \$7.0 million at March 31, 2009. The Company's

Table of Contents

success with attracting and retaining retail deposits has allowed for very low dependence on more volatile non-deposit funding.

NOTE 9 COMMITMENTS AND CONTINGENCIES

The Company is a party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. These instruments involve, to varying degrees, elements of credit risk in excess of the amount recognized in the consolidated balance sheets.

The contract amounts of those instruments reflect the extent of involvement the Company has in particular classes of financial instruments. The Company uses the same credit policies in making commitments and conditional obligations as are used for on-balance-sheet instruments.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements.

The Company issues standby letters of credit, which are conditional commitments issued to guarantee the performance of a customer to a third party. Those guarantees are primarily issued to support public and private borrowing arrangements and expire in decreasing amounts with varying terms. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. The Company holds various assets as collateral supporting those commitments for which collateral is deemed necessary.

The Company evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Company upon extension of credit, is based on management's credit evaluation of the borrower. Collateral held may include accounts receivable, inventory, property, plant and equipment, residential real estate, and income-producing commercial properties.

The Company's commitments to extend credit and standby letters of credit are presented in the following table:

(Dollars in Thousands)	March 31, 2010	March 31, 2009
Commitments to extend credit	\$ 149,613	\$ 141,233
Standby letters of credit	\$ 3,967	\$ 4,285

Overview

The following is management's discussion and analysis of certain significant factors which have affected the financial condition and results of operations of the Company as reflected in the unaudited consolidated balance sheet as of March 31, 2010 as compared to December 31, 2009 and operating results for the three month period ended March 31, 2010. These comments should be read in conjunction with the Company's unaudited consolidated financial statements and accompanying notes appearing elsewhere herein.

Results of Operations for the Three Months Ended March 31, 2010**Consolidated Earnings and Profitability**

Ameris reported a net loss available to common shareholders of \$2.3 million, or \$0.17 per diluted share, for the quarter ended March 31, 2010, compared to a net loss for the same quarter in 2009 of \$1.3 million, or \$0.10 per diluted share. The Company's return on average assets and average shareholders' equity decreased in the first quarter of 2010 to (0.26%) and (4.33%), respectively, compared to (0.21%) and (1.35%) in the first quarter of 2009. The decrease in earnings and profitability during the quarter was primarily due to higher levels of loan loss provisions and costs associated with problem assets.

Net Interest Income and Margins

On a tax equivalent basis, net interest income for the first quarter of 2010 was \$20.6 million, an increase of \$3.5 million compared to the same quarter in 2009. The Company's net interest margin increased during the first quarter of 2010 to 3.92% compared to 3.21% during the same quarter in 2009. The continued improvement in the net interest margin is due to a combination of reduced funding costs and relatively steady loan yields.

Total interest income during the first quarter of 2010 was \$28.0 million compared to \$29.6 million in the same quarter of 2009. Yields on earning assets fell to 5.36% compared to 5.57% reported in the first quarter of 2009. The

Table of Contents

Company continues to carry higher average levels of short-term assets than in the past as loan and investment opportunities are not abundant. The increase in short-term assets as a percentage of total earning assets contributed to the decline in overall yields on earning assets. During the first quarter of 2010, short-term assets averaged 9.3% of total earning assets compared to 5.4% in the same quarter in 2009.

Interest expense declined significantly as the Company continued to improve its deposit mix and reduce deposit costs across its footprint. Total interest expense in the first quarter of 2010 amounted to \$7.6 million, reflecting a decline of \$5.0 million from the same quarter in 2009.

Total funding costs declined to 1.41% in the first quarter of 2010 compared to 2.45% at the same time in 2009. The decline in total funding costs relates to savings realized on both deposit funding and non-deposit funding. Deposit costs decreased from 2.46% in the first quarter of 2009 to 1.41% in the current quarter of 2010. Ongoing efforts to increase the percentage of funding from transaction deposits have succeeded such that non-CD deposits averaged 58.3% of total deposits in the first quarter of 2010 compared to 44.9% during the first quarter of 2009.

Provision for Loan Losses and Credit Quality

The Company's provision for loan losses during the first quarter of 2010 amounted to \$10.8 million compared to \$16.5 million in the fourth quarter of 2009 and to \$7.9 million in the first quarter of 2009. The higher level in the provision for loan losses compared to the same quarter in 2009 reflects the trend in the level of non-performing assets, whereas the lower level compared to the fourth quarter of 2009 reflects a slowdown in problem loan formation relative to what the Company experienced in the last part of 2009. At the end of the first quarter of 2010, total non-performing assets decreased to 5.21% of total assets compared to 3.33% at March 31, 2009. Management continues to aggressively identify and resolve problem assets while seeking quality credits to grow the loan portfolio.

Net charge-offs on loans during the first quarter of 2010 increased to \$12.9 million, compared to \$5.1 million in the first quarter of 2009. For the quarters ended March 31, 2010 and 2009, net charge-offs annualized as a percentage of loans were 3.42% and 1.23%, respectively. The Company's allowance for loan losses at March 31, 2010 was \$33.6 million, or 2.18% of total loans, compared to \$42.4 million, or 2.54% of total loans, at March 31, 2009.

Non-interest Income

Total non-interest income for the first quarter of 2010 decreased slightly to \$4.9 million from \$5.5 million in the first quarter of 2009. The decrease in non-interest income related to lower gains on sales of securities which were \$200,000 in the first quarter of 2010 as compared to \$713,000 during the same period in 2009. Also during the first quarter of 2009, the Company recognized a gain of \$543,000 related to the early repayment of FHLB advances. Services charges on deposit accounts increased to \$3.4 million in the first quarter of 2010 compared to \$3.0 million in the same quarter of 2009. Increased levels of accounts subject to service charges were the primary reason for the increase over prior year levels.

Non-interest Expense

Total non-interest expenses for the first quarter of 2010 increased to \$16.9 million, compared to \$15.7 million at the same time in 2009. Salaries and benefits decreased 2.1% from the prior year period, primarily due to decreases in staffing as well as reduced levels of retirement benefits. Equipment and occupancy expenses for the first quarter of 2010 amounted to \$2.0 million, representing a decrease of \$131,000 from the same quarter in 2009. This decline in occupancy related charges was primarily due to lower levels of repairs and maintenance as well as significantly reduced new branching activities as compared to the same quarter in 2009. Increases in FDIC insurance premiums reflect the general increase in premiums experienced across the industry due to increases in bank failures. The Company prepaid three years of expected insurance premiums in 2009 totaling approximately \$12.3 million. Increases in problem loan and OREO related expenses amounted to \$1.3 million and were the result of increases in non-performing assets experienced since the first quarter of 2009. Other noninterest expenses in the first quarter of 2010 declined \$870,000 to \$2.0 million when compared to the same quarter in 2009. This decline resulted primarily from lower levels of marketing and advertising which declined from \$716,000 in the first quarter of 2009 to \$280,000 in the first quarter of 2010.

Table of Contents

Income Taxes

Income tax expense is influenced by the amount of taxable income, the amount of tax-exempt income and the amount of non-deductible expenses. For the first quarter of 2010, the Company reported an income tax benefit of \$869,000 compared to a benefit of \$539,000 in the same period of 2009. The Company's effective tax rate for the three months ended March 31, 2010 and 2009 was 36.17% and 45.9%, respectively.

Securities

Debt securities with readily determinable fair values are classified as available for sale and recorded at fair value with unrealized gains and losses excluded from earnings and reported in accumulated other comprehensive income, net of the related deferred tax effect. Equity securities, including restricted equity securities, are classified as other investment securities and are recorded at their fair market value.

The amortization of premiums and accretion of discounts are recognized in interest income using methods approximating the interest method over the life of the securities. Realized gains and losses, determined on the basis of the cost of specific securities sold, are included in earnings on the settlement date. Declines in the fair value of securities below their cost that are deemed to be other-than-temporary are reflected in earnings as realized losses.

In determining whether other-than-temporary impairment losses exist, management considers (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near-term prospects of the issuer and (3) the intent and ability of the Company to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value.

Management evaluates securities for other-than-temporary impairment at least on a quarterly basis, and more frequently when economic or market concerns warrant such evaluation. Substantially all of the unrealized losses on debt securities are related to changes in interest rates and do not affect the expected cash flows of the issuer or underlying collateral. All unrealized losses are considered temporary because each security carries an acceptable investment grade and the Company has the intent and ability to hold to maturity. Therefore, at March 31, 2010, these investments are not considered impaired on an other-than temporary basis.

Loans and Allowance for Loan Losses

At March 31, 2010, gross loans outstanding were \$1.54 billion, a decrease of \$136.4 million, or 8.2%, compared to balances at March 31, 2009. When compared to the period ended December 31, 2009, gross loans declined approximately \$47.8 million, or 3.0%. The decline in loans reflects management's focus on reducing higher risk loans within the Bank's loan portfolio as well as the slower economic environment that persisted throughout 2009 and the first quarter of 2010. The Company regularly monitors the composition of the loan portfolio to evaluate the adequacy of the allowance for loan losses in light of the impact that changes in the economic environment may have on the loan portfolio.

The Company focuses on the following loan categories: (1) commercial, financial and agricultural, (2) residential real estate, (3) commercial and farmland real estate, (4) construction and development related real estate, and (5) consumer. The Company's management has strategically located its branches in select markets in south and southeast Georgia, north Florida, southeast Alabama and throughout the state of South Carolina to take advantage of the growth in these areas.

The Company's risk management processes include a loan review program designed to evaluate the credit risk in the loan portfolio and ensure credit grade accuracy. Through the loan review process, the Company conducts (1) a loan portfolio summary analysis, (2) charge-off and recovery analysis, (3) trends in accruing problem loan analysis, and (4) problem and past due loan analysis. This analysis process serves as a tool to assist management in assessing the overall quality of the loan portfolio and the adequacy of the allowance for loan losses. Loans classified as "substandard" are loans which are inadequately protected by the current sound worth and paying capacity of the borrower or of the collateral pledged. These assets exhibit a well-defined weakness or are characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not corrected. These weaknesses may be characterized by past due performance, operating losses and/or questionable collateral values. Loans classified as "doubtful" are those loans that have characteristics similar to substandard loans but have an increased

Table of Contents

risk of loss. Loans classified as loss are those loans which are considered uncollectible and are in the process of being charged-off.

The allowance for loan losses is a reserve established through charges to earnings in the form of a provision for loan losses. The provision for loan losses is based on management's evaluation of the size and composition of the loan portfolio, the level of non-performing and past due loans, historical trends of charged-off loans and recoveries, prevailing economic conditions and other factors management deems appropriate. The Company's management has established an allowance for loan losses which it believes is adequate for the risk of loss inherent in the loan portfolio. Based on a credit evaluation of the loan portfolio, management presents a monthly review of the allowance for loan losses to the Company's Board of Directors. The review that management has developed primarily focuses on risk by evaluating individual loans in certain risk categories. These categories have also been established by management and take the form of loan grades. By grading the loan portfolio in this manner the Company's management is able to effectively evaluate the portfolio by risk, which management believes is the most effective way to analyze the loan portfolio and thus analyze the adequacy of the allowance for loan losses.

The allowance for loan losses is established by examining (1) the large classified loans, nonaccrual loans and loans considered impaired and evaluating them individually to determine the specific reserve allocation, and (2) the remainder of the loan portfolio to allocate a portion of the allowance based on past loss experience and the economic conditions for the particular loan category. The Company also considers other factors such as changes in lending policies and procedures; changes in national, regional, and/or local economic and business conditions; changes in the nature and volume of the loan portfolio; changes in the experience, ability and depth of either the bank president or lending staff; changes in the volume and severity of past due and classified loans; changes in the quality of the Company's corporate loan review system; and other factors management deems appropriate.

For the three month period ended March 31, 2010, the Company recorded net charge-offs totaling \$13.0 million compared to \$5.1 million for the period ended March 31, 2009. The provision for loan losses for the three months ended March 31, 2010 increased to \$10.8 million compared to \$5.1 million during the three month period ended March 31, 2009. At the end of the first quarter of 2010, the allowance for loan losses totaled \$33.6 million, or 2.18% of total loans, compared to \$35.8 million, or 2.26% of total loans, at December 31, 2010 and \$42.4 million, or 2.54% of total loans, at March 31, 2009.

The following table presents an analysis of the allowance for loan losses for the three month periods ended March 31, 2010 and March 31, 2009:

(Dollars in Thousands)	March 31, 2010	March 31, 2009
Balance of allowance for loan losses at beginning of period	\$ 35,762	\$ 39,652
Provision charged to operating expense	10,770	7,912
Charge-offs:		
Commercial, financial and agricultural	2,008	1,389
Real estate residential	924	1,738
Real estate commercial and farmland	4,593	277
Real estate construction and development	5,576	1,930
Consumer installment	145	187
Other		
Total charge-offs	13,246	5,521
Recoveries:		
Commercial, financial and agricultural	78	82
Real estate residential	28	8
Real estate commercial and farmland	64	230
Real estate construction and development	64	10
Consumer installment	43	44
Other		
Total recoveries	277	374
Net charge-offs	12,969	5,147

Table of Contents

Balance of allowance for loan losses at end of period	\$ 33,563	\$ 42,417
Net annualized charge-offs as a percentage of average loans	3.32%	1.23%
Allowance for loan losses as a percentage of loans at end of period	2.18%	2.54%

Covered Assets

Total covered assets declined during the first quarter of 2010 to \$138.2 million, compared to \$146.6 million at December 31, 2009. Covered loans declined to \$120.4 million at the end of the first quarter, representing a decline of approximately \$137.2 million when compared to December 31, 2009. Additional detail on covered loans is shown below:

The Company acquired American United Bank on October 23, 2009 and United Security Bank on November 6, 2009. Little activity in the loan or OREO accounts occurred between the acquisition date and the end of 2009. Subsequent to December 31, 2009, the Company has accelerated its resolution efforts on loans with deterioration of credit as well as OREO and expects to see continued declines in these balances for several quarters.

(Dollars in Thousands)	March 31, 2010	December 31, 2009	Acquisition Dates
Loans with credit quality deterioration	\$ 47,161	\$ 50,956	\$ 58,552
Loans without credit quality deterioration	73,204	75,172	81,576
Total covered loans	120,365	126,128	140,128

Collection efforts since the FDIC assisted acquisitions in the fourth quarter of 2009 have proceeded according to expectations. To date, the Company has not experienced cumulative losses in excess of the initial marks recorded as of the purchase dates.

Covered OREO increased during the first quarter to \$17.9 million, compared to \$9.3 million at December 31, 2009. A breakdown of covered OREO by type is seen in the following table:

Property Type	March 31, 2010	December 31, 2009	Acquisition Dates
Single family residential	\$ 3,893	\$ 3,119	\$ 3,119
Non-farm, non-residential	5,622	2,893	2,893
Construction and development			
Residential lots	4,528	1,588	1,588
Land Commercial	1,970	1,717	117
Land residential	1,849	1,803	1,619
Subdivisions			
Covered OREO	\$ 17,862	\$ 11,120	\$ 9,336

At the date of acquisition, the Company recorded a receivable from the FDIC totaling approximately \$45.8 million, representing the portion of losses for which the Company could expect reimbursement under the loss-share agreements. The Company has experienced \$17.7 million of losses through March 31, 2010, and submitted certificates for repayment totaling \$14.2 million that are expected to be collected during the second quarter of 2010.

Non-Performing Assets

Non-performing assets include nonaccrual loans, accruing loans contractually past due 90 days or more, repossessed personal property, and other real estate. Loans are placed on nonaccrual status when management has concerns relating to the ability to collect the principal and interest and generally when such loans are 90 days or more past due. Management performs a detailed review and valuation assessment of impaired loans on a quarterly basis and recognizes losses when permanent impairment is identified. A loan is considered impaired when it is probable that not all principal and interest amounts will be collected according to the loan contract. When a loan is placed on nonaccrual status, any interest previously accrued but not collected is reversed against current income.

Edgar Filing: Ameris Bancorp - Form 10-Q

For the quarter ended March 31, 2010, nonaccrual or impaired loans totaled \$89.6 million, a decrease of approximately \$6.5 million since December 31, 2009. The decrease in nonaccrual loans is due to success in the foreclosure and resolution process as well as a significant slowdown in the formation of new problem credits. Non-performing assets as a percentage of total assets were 5.29%, 4.85% and 3.33% at March 31, 2010, December 31, 2009 and March 31, 2009, respectively.

Non-performing assets at March 31, 2010, December 31, 2009 and March 31, 2009 were as follows:

(Dollars in Thousands)	March 31, 2010	December 31, 2009	March 31, 2009
Total nonaccrual loans	\$ 89,649	\$ 96,131	\$ 63,908
Accruing loans delinquent 90 days or more			2
Other real estate owned and repossessed collateral	34,683	21,551	14,271
 Total non-performing assets	 \$ 124,332	 \$ 117,682	 \$ 78,181

Other Real Estate Owned

For the three months ended March 31, 2010, the Company sold 26 foreclosed assets with an aggregate estimated value of \$4.3 million. During the same period, the Company foreclosed on 68 properties with an aggregate estimated value of \$16.7 million. During the first quarter of 2010, 35% of the newly foreclosed properties were construction and development properties, 30% were residential properties and 34% were commercial real estate properties.

Activity in non-performing assets is seen in the table below:

	For the quarter ended March 31, 2010		
	Non-performing loans	Other real estate owned	Non-performing assets
Beginning Balance	96,131	23,316	119,447
Loans placed on non-accrual	24,302		24,302
Payments received	(846)		(846)
Loan charge-offs	(13,246)		(13,246)
Foreclosures	(16,692)	16,692	
Note/property sales		(4,253)	(4,253)
Writedowns		(585)	(585)
Net gains (losses) on sales		(487)	(487)
 Ending Balance	 89,649	 34,683	 124,332

Table of Contents**Commercial Lending Practices**

On December 12, 2006, the Federal Bank Regulatory Agencies released guidance on *Concentration in Commercial Real Estate Lending*. This guidance defines commercial real estate (CRE) loans as loans secured by raw land, land development and construction (including 1-4 family residential construction), multi-family property, and non-farm nonresidential property where the primary or a significant source of repayment is derived from rental income associated with the property, excluding owner occupied properties (loans for which 50% or more of the source of repayment is derived from the ongoing operations and activities conducted by the party, or affiliate of the party, who owns the property) or the proceeds of the sale, refinancing, or permanent financing of the property. Loans for owner occupied CRE are generally excluded from the CRE guidance.

The CRE guidance is applicable when either:

- (1) total loans for construction, land development, and other land, net of owner occupied loans, represent 100% or more of a bank's total risk-based capital; or
- (2) total loans secured by multifamily and nonfarm nonresidential properties and loans for construction, land development, and other land, net of owner occupied loans, represent 300% or more of a bank's total risk-based capital.

Banks that are subject to the CRE guidance's criteria are required to implement enhanced strategic planning, CRE underwriting policies, risk management and internal controls, portfolio stress testing, risk exposure limits, and other policies, including management compensation and incentives, to address the CRE risks. Higher allowances for loan losses and capital levels may also be appropriate.

As of March 31, 2010, the Company exhibited a concentration in commercial real estate (CRE) loan category based on Federal Reserve Call codes. The primary risks of CRE lending are:

- (1) within CRE loans, construction and development loans are somewhat dependent upon continued strength in demand for residential real estate, which is reliant on favorable real estate mortgage rates and changing population demographics;
- (2) on average, CRE loan sizes are generally larger than non-CRE loan types; and
- (3) certain construction and development loans may be less predictable and more difficult to evaluate and monitor.

The following table outlines CRE loan categories and CRE loans as a percentage of total loans as of March 31, 2010 and December 31, 2009. The loan categories and concentrations below are based on Federal Reserve Call codes and include covered loans.

(Dollars in Thousands)	March 31, 2010		December 31, 2009	
	Balance	% of Total Loans	Balance	% of Total Loans
Construction and development loans	\$ 235,237	14%	\$ 259,412	15%
Multi-family loans	49,257	3%	49,158	3%
Nonfarm non-residential loans	722,079	44%	758,369	44%
Total CRE Loans	\$ 1,006,573	61%	\$ 1,066,939	62%
All other loan types	644,910	39%	646,717	38%
Total Loans	\$ 1,651,483	100%	\$ 1,713,656	100%

Edgar Filing: Ameris Bancorp - Form 10-Q

The following table outlines the percent of total CRE loans, net owner occupied loans to total risk-based capital, and the Company's internal concentration limits as of March 31, 2010 and December 31, 2009.

Table of Contents

	Internal Limit	March 31, 2010 Actual	December 31, 2009 Actual
Construction and development	150%	115%	181%
Construction and development, multi-family and Short-Term Investments	300%	276%	358%

The Company's short-term investments are comprised of federal funds sold and interest bearing balances. At March 31, 2010, the Company's short-term investments were \$200.9 million, compared to \$220.3 million and \$137.8 million at December 31, 2009 and March 31, 2009, respectively. At March 31, 2010 approximately 97.3% of the balance was comprised of interest bearing balances, the majority of which were at the FHLB.

Derivative Instruments and Hedging Activities

As of March 31, 2010, the Company had one cash flow hedge with a notional amount totaling \$35.0 million. The cash flow hedge is an interest rate floor with a total fair value of approximately \$1.8 million and \$1.9 million as of March 31, 2010 and December 31, 2009, respectively. The interest rate floor matures on August 15, 2011.

Capital

Capital management consists of providing equity to support both current and anticipated future operations. The Company is subject to capital adequacy requirements imposed by the Federal Reserve Board (the "FRB") and the Georgia Department of Banking and Finance (the "GDBF"), and the Bank is subject to capital adequacy requirements imposed by the Federal Deposit Insurance Corporation (the "FDIC") and the GDBF.

The FRB, the FDIC and the GDBF have adopted risk-based capital requirements for assessing bank holding company and bank capital adequacy. These standards define and establish minimum capital requirements in relation to assets and off-balance sheet exposure, adjusted for credit risk. The risk-based capital standards currently in effect are designed to make regulatory capital requirements more sensitive to differences in risk profiles among bank holding companies and banks and to account for off-balance sheet exposure. The regulatory capital standards are defined by three key measurements.

- a) The **Leverage Ratio** is defined as Tier 1 capital to average assets. To be considered **adequately capitalized** under this measurement, a bank must maintain a leverage ratio greater than or equal to 4.00%. For a bank to be considered **well capitalized** a bank must maintain a leverage ratio greater than or equal to 5.00%.
- b) The **Core Capital Ratio** is defined as Tier 1 capital to total risk weighted assets. To be considered **adequately capitalized** under this measurement, a bank must maintain a core capital ratio greater than or equal to 4.00%. For a bank to be considered **well capitalized** a bank must maintain a core capital ratio greater than or equal to 6.00%.
- c) The **Total Capital Ratio** is defined as total capital to total risk weighted assets. To be considered **adequately capitalized** under this measurement, a bank must maintain a total capital ratio greater than or equal to 8.00%. For a bank to be considered **well capitalized** a bank must maintain a total capital ratio greater than or equal to 10.00%.

As of March 31, 2010, under the regulatory capital standards the Bank was considered **well capitalized** under all capital measurements. The following table sets forth the Bank's ratios at March 31, 2010, December 31, 2009 and March 31, 2009.

Table of Contents

	March 31, 2010	December 31, 2009	March 31, 2009
Leverage Ratio (tier 1 capital to average assets)	9.26%	9.61%	7.27%
Core Capital Ratio (tier 1 capital to risk weighted assets)	13.38%	13.27%	9.79%
Total Capital Ratio (total capital to risk weighted assets)	14.64%	14.53%	11.06%

Recent Developments

On November 21, 2008, the Company, elected to participate in the Capital Purchase Program (CPP) established under the Emergency Economic Stabilization Act of 2008 (EESA). Accordingly, on such date, the Company issued and sold to the United States Treasury (Treasury), for an aggregate cash purchase price of \$52 million, (i) 52,000 shares (the Preferred Shares) of the Company s fixed rate Cumulative Perpetual Preferred Stock, Series A, having a liquidation preference of \$1,000 per share, and (ii) a ten-year warrant (the Warrant) to purchase up to 679,443 shares of the Common Stock at an exercise price of \$11.48 per share. The issuance and sale of these securities was a private placement exempt from registration pursuant to Section 4(2) of the Securities Act of 1933, as amended.

Cumulative dividends on the Preferred Shares will accrue on the liquidation preference at a rate of 5% per annum for the first five years and at a rate of 9% per annum thereafter, but such dividends will be paid only if, as and when declared by the Company s Board of Directors. The Preferred Shares have no maturity date and rank senior to the Common Stock (and pari passu with the Company s other authorized preferred stock, of which no shares are currently designated or outstanding) with respect to the payment of dividends and distributions and amounts payable upon liquidation, dissolution and winding up of the Company. Subject to the approval of the Board of Governors of the Federal Reserve System, the Preferred Shares are redeemable at the option of the Company at 100% of their liquidation preference

The Purchase Agreement pursuant to which the Preferred Shares and the Warrant were sold contains limitations on the payment of dividends on the Common Stock (including with respect to the payment of cash dividends in excess of \$0.05 per share, which was the amount of the last regular dividend declared by the Company prior to October 14, 2008) and on the Company s ability to repurchase its Common Stock, and subjects the Company to certain of the executive compensation limitations included in the EESA.

Interest Rate Sensitivity and Liquidity

The Company s primary market risk exposures are credit, interest rate risk, and to a lesser degree, liquidity risk. The Bank operates under an Asset Liability Management Policy approved by the Company s Board of Directors and the Asset and Liability Committee (the ALCO Committee). The policy outlines limits on interest rate risk in terms of changes in net interest income and changes in the net market values of assets and liabilities over certain changes in interest rate environments. These measurements are made through a simulation model which projects the impact of changes in interest rates on the Bank s assets and liabilities. The policy also outlines responsibility for monitoring interest rate risk, and the process for the approval, implementation and monitoring of interest rate risk strategies to achieve the Bank s interest rate risk objectives.

The ALCO Committee is comprised of senior officers of Ameris and two outside members of the Company s Board of Directors. The ALCO Committee makes all strategic decisions with respect to the sources and uses of funds that may affect net interest income, including net interest spread and net interest margin. The objective of the ALCO Committee is to identify the interest rate, liquidity and market value risks of the Company s balance sheet and use reasonable methods approved by the Company s board and executive management to minimize those identified risks.

The normal course of business activity exposes the Company to interest rate risk. Interest rate risk is managed within an overall asset and liability framework for the Company. The principal objectives of asset and liability management are to predict the sensitivity of net interest spreads to potential changes in interest rates, control risk and enhance profitability. Funding positions are kept within predetermined limits designed to properly manage risk and liquidity. The Company employs sensitivity analysis in the form of a net interest income simulation to help

Table of Contents

characterize the market risk arising from changes in interest rates. In addition, fluctuations in interest rates usually result in changes in the fair market value of the Company's financial instruments, cash flows and net interest income. The Company's interest rate risk position is managed by the ALCO Committee.

The Company uses a simulation modeling process to measure interest rate risk and evaluate potential strategies. Interest rate scenario models are prepared using software created and licensed from an outside vendor. The Company's simulation includes all financial assets and liabilities. Simulation results quantify interest rate risk under various interest rate scenarios. Management then develops and implements appropriate strategies. ALCO has determined that an acceptable level of interest rate risk would be for net interest income to decrease no more than 5.00% given a change in selected interest rates of 200 basis points over any 24 month period.

Liquidity management involves the matching of the cash flow requirements of customers, who may be either depositors desiring to withdraw funds or borrowers needing assurance that sufficient funds will be available to meet their credit needs, and the ability of Ameris to manage those requirements. The Company strives to maintain an adequate liquidity position by managing the balances and maturities of interest-earning assets and interest-bearing liabilities so that the balance it has in short-term investments at any given time will adequately cover any reasonably anticipated immediate need for funds. Additionally, the Bank maintains relationships with correspondent banks, which could provide funds on short notice, if needed. The Company has invested in FHLB stock for the purpose of establishing credit lines with the FHLB. The credit availability to the Bank is equal to 20% of the Bank's total assets as reported on the most recent quarterly financial information submitted to the regulators subject to the pledging of sufficient collateral. At March 31, 2010 there were \$2.0 million in advances outstanding with the FHLB and \$5 million in advances outstanding on the Company's line of credit held with a correspondent bank.

The following liquidity ratios compare certain assets and liabilities to total deposits or total assets:

	March 31, 2010	December 31, 2009	September 30, 2009	June 30, 2009	March 31, 2009
Investment securities available for sale to total deposits	11.88%	11.57%	13.31%	13.35%	16.96%
Loans (net of unearned income) to total deposits ¹	73.58%	74.62%	87.56%	84.85%	82.46%
Interest-earning assets to total assets	84.74%	84.88%	91.71%	92.09%	92.08%
Interest-bearing deposits to total deposits	89.35%	88.84%	89.10%	89.35%	89.76%

1 - loans exclude covered assets where appropriate

The liquidity resources of the Company are monitored continuously by the ALCO Committee and on a periodic basis by state and federal regulatory authorities. As determined under guidelines established by these regulatory authorities, the Company's and the Bank's liquidity ratios at March 31, 2010 were considered satisfactory. The Company is aware of no events or trends likely to result in a material change in liquidity.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

The Company is exposed only to U.S. dollar interest rate changes, and, accordingly, the Company manages exposure by considering the possible changes in the net interest margin. The Company does not have any trading instruments nor does it classify any portion of the investment portfolio as held for trading. The Company's hedging activities are limited to cash flow hedges and are part of the Company's program to manage interest rate sensitivity. At March 31, 2010, the Company had one effective interest rate floor with a notional amount totaling \$35 million. The floor is hedging specific cash flows associated with variable rate loans, has a strike rate of 7.00% and matures August 2011. Additionally, the Company has no exposure to foreign currency exchange rate risk, commodity price risk and other market risks.

Table of Contents

Interest rates play a major part in the net interest income of a financial institution. The sensitivity to rate changes is known as interest rate risk. The repricing of interest-earning assets and interest-bearing liabilities can influence the changes in net interest income. As part of the Company's asset/liability management program, the timing of repriced assets and liabilities is referred to as Gap management.

The Company uses simulation analysis to monitor changes in net interest income due to changes in market interest rates. The simulation of rising, declining and flat interest rate scenarios allows management to monitor and adjust interest rate sensitivity to minimize the impact of market interest rate swings. The analysis of the impact on net interest income over a twelve-month period is subjected to a gradual 200 basis point increase or decrease in market rates on net interest income and is monitored on a quarterly basis.

Additional information required by Item 305 of Regulation S-K is set forth under Part I, Item 2 of this report.

Item 4. Controls and Procedures.

The Company's Chief Executive Officer and Chief Financial Officer have evaluated the Company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) or 15d-15(e) promulgated under the Exchange Act), as of the end of the period covered by this report, as required by paragraph (b) of Rules 13a-15 or 15d-15 of the Exchange Act. Based on such evaluation, such officers have concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures are effective.

During the quarter ended March 31, 2010, there were no changes in the Company's internal control over financial reporting identified in connection with the evaluation required by paragraph (d) of Rules 13a-15 or 15d-15 of the Exchange Act that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.
