UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

QUARTERLY REPORT UNDER SECTION 13 or 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934

For Quarter Ended September 30, 2010

Commission File Number 1-1687

PPG INDUSTRIES, INC.

(Exact name of registrant as specified in its charter)

Edgar Filing: PPG INDUSTRIES INC - Form 10-Q

(State or other jurisdiction of incorporation or organization)	(I.R.S. Employer Identification No.)
One PPG Place, Pittsburgh, Pennsylvania (Address of principal executive offices)	15272 (Zip Code)
(412) 434-3131	
(Registrant's telephone number, including area code)	

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months, and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer <input checked="" type="checkbox"/>	Accelerated filer <input type="checkbox"/>
Non-accelerated filer <input type="checkbox"/> (Do not check if a smaller reporting company)	Smaller reporting company <input type="checkbox"/>

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of September 30, 2010, 163,019,256 shares of the Registrant's common stock, par value \$1.66²/₃ per share, were outstanding.

Table of Contents

PPG INDUSTRIES, INC. AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements (Unaudited)

1. Basis of Presentation

The condensed consolidated financial statements included herein are unaudited. In the opinion of management, these statements include all adjustments, consisting only of normal, recurring adjustments, necessary for a fair presentation of the financial position of PPG Industries, Inc. and subsidiaries (the Company or PPG) as of September 30, 2010, and the results of their operations for the three and nine months ended September 30, 2010 and 2009 and their cash flows for the nine months then ended. These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes included in PPG's Annual Report on Form 10-K for the year ended December 31, 2009.

The results of operations for the nine months ended September 30, 2010 are not necessarily indicative of the results to be expected for the full year.

2. Newly Adopted Accounting Standards

In June 2009, the Financial Accounting Standards Board (FASB) issued revisions to the accounting guidance on consolidation of variable interest entities. On January 1, 2010, PPG adopted the provisions of the new guidance, which did not have an impact on its consolidated results of operations, cash flows or financial position. Refer to Note 9, Variable Interest Entities for information related to PPG's sole variable interest entity, RS Cogen, L.L.C.

In July 2010, the FASB issued new accounting guidance on finance receivables and the allowance for credit losses, including disclosure requirements. This new guidance is effective for fiscal years ending after December 15, 2010, and for interim periods within the first annual period of reporting under the new guidance. While PPG is currently evaluating the effect this new guidance may have on its consolidated financial statements, PPG does not believe that it will have a material effect on PPG's consolidated results of operations, cash flows or financial position upon adoption.

3. Fair Value Measurement

The accounting guidance on fair value measurement establishes a hierarchy with three levels of inputs used to determine fair value. Level 1 inputs are quoted prices in active markets for identical assets and liabilities, are considered to be the most reliable evidence of fair value, and should be used whenever available. Level 2 inputs are observable prices that are not quoted on active exchanges. Level 3 inputs are unobservable inputs used for measuring the fair value of assets or liabilities.

(2) This entire balance is designated as a hedging instrument under GAAP.

Table of Contents

4. Acquisitions

During the nine months ended September 30, 2010, PPG spent \$18 million on acquisitions (net of cash acquired of \$3 million), and during the nine months ended September 30, 2009, PPG spent \$24 million on acquisitions, including purchase price adjustments related to 2008 acquisitions and \$15 million related to earn-out and holdback payments on acquisitions that were completed prior to December 31, 2008.

5. Divestiture of Automotive Glass and Services Business

During the third quarter of 2007, the Company entered into an agreement to sell its automotive glass and services business to Platinum Equity (Platinum) for approximately \$500 million. In the fourth quarter of 2007, PPG was notified that affiliates of Platinum had filed suit in the Supreme Court of the State of New York, County of New York, alleging that Platinum was not obligated to consummate the agreement. Platinum also terminated the agreement. PPG has sued Platinum and certain of its affiliates for damages, including the \$25 million breakup fee stipulated by the terms of the agreement, based on various alleged actions of the Platinum parties.

In July 2008, PPG entered into an agreement with affiliates of Kohlberg & Company, LLC, under which PPG would divest the automotive glass and services business to a new company formed by affiliates of Kohlberg. As part of this sale, PPG received a noncontrolling interest of approximately 40 percent in the new company, Pittsburgh Glass Works LLC. PPG accounts for its interest in Pittsburgh Glass Works LLC under the equity method of accounting.

PPG has retained certain liabilities for pension and post-employment benefits earned for service up to the time of the sale, totaling \$850 million at December 31, 2009, for employees who were active as of the divestiture date and for individuals who were retirees of the business as of the divestiture date. PPG recognized expense of approximately \$25 million and \$33 million related to these obligations in the nine months ended September 30, 2010 and 2009, respectively.

Pittsburgh Glass Works LLC ceased production at its Oshawa, Canada plant in 2009 and closed its Hawkesbury, Canada plant in August 2010. Under Canadian pension regulations, these plant closures will result in partial wind-ups of the pension plans for former employees at these plants, the liability for which was retained by PPG. Each of these partial windups will result in settlement charges against PPG earnings and require cash contributions to the plans in amounts that will be determined following the required review of the partial wind-ups by the Canadian pension authorities. The amount of each pretax charge and the cash contribution is currently estimated to be in the range of \$20-\$30 million and \$10-\$15 million, respectively. The proposed effective dates of the partial windups related to the Oshawa and Hawkesbury plant closures are February 27, 2009 and August 31, 2010, respectively. The cash contributions must be made by the end of the five year period following the proposed effective dates of the partial wind-ups. The settlement charges will be recorded following the approval of the partial wind-ups by the Canadian pension authorities and when the related cash contributions are completed.

Table of Contents

6. Business Restructuring

During the third quarter of 2008, the Company finalized a restructuring plan as part of implementing PPG's global transformation strategy and the integration of its 2008 acquisition of SigmaKalon. As part of that restructuring, PPG closed its coatings manufacturing facilities in Clarkson, Ont., Canada, and Geldermalsen, the Netherlands. Other staffing reductions in PPG's coatings businesses in North America and Europe occurred in 2009. PPG also closed its Owen Sound, Ont., Canada, glass manufacturing facility and idled one float glass production line at its Mt. Zion, Ill., facility in the fourth quarter of 2008. Other actions included writing off idle production assets in PPG's fiber glass and chemicals businesses.

In the third quarter of 2008, the Company recorded a charge of \$163 million for business restructuring, including severance and other costs of \$73 million, pension curtailments of \$21 million and asset write-offs of \$69 million. Severance and other restructuring costs related to the SigmaKalon acquisition totaling \$33 million were recorded as part of the purchase price allocation, effectively increasing goodwill. The restructuring reserve recorded in 2008 totaled \$196 million.

During the first quarter of 2009, the Company finalized a restructuring plan focused on further reducing its global cost structure, driven by global economic conditions, low end-market demand and acceleration of cost-savings from the integration of the 2008 acquisition of SigmaKalon. As part of the restructuring, PPG closed the paint manufacturing portion of its facility in Saultain, France at the end of 2009, as well as several smaller production, laboratory, warehouse and distribution facilities across PPG's businesses and regions, and reduced staffing across the company globally.

In the first quarter of 2009, the Company recorded a charge of \$186 million for business restructuring, including severance and other costs of \$154 million and asset write-offs of \$32 million. The Company also incurred approximately \$11 million of additional costs directly associated with the restructuring actions for demolition, dismantling, relocation and training, which were charged to expense as incurred in the second half of 2009.

In the fourth quarter of 2009, adjustments of approximately \$10 million were recorded to reduce the remaining restructuring reserves established in 2008 and 2009 to reflect the current estimate of the costs to complete these actions. Also in the fourth quarter of 2009, some additional restructuring actions were approved and charges of approximately \$10 million were recorded.

At September 30, 2010, the remaining reserve for the 2008 and 2009 restructuring plans of \$41 million includes \$32 million for severance payments to certain former employees of which \$10 million will be paid after September 30, 2011. The remaining restructuring actions are expected to be completed in the last quarter of 2010.

Table of Contents

The following table summarizes the activity through September 30, 2010 related to the 2008 restructuring plans:

(Millions, except no. of employees)	Severance and Other Costs	Pension Curtailment Losses	Asset Write-offs	Total Reserve	Employees Impacted
Performance Coatings	\$ 30	\$	\$ 15	\$ 45	270
Industrial Coatings	45	9	10	64	577

7. Inventories

Inventories as of September 30, 2010 and December 31, 2009 are detailed below.

	Sept. 30, 2010	Dec. 31, 2009
	(Millions)	
Finished products	\$ 938	\$ 918
Work in process	142	125

Edgar Filing: PPG INDUSTRIES INC - Form 10-Q

Raw materials	443	390
Supplies	115	115
Total	\$ 1,638	\$ 1,548

Table of Contents

Most U.S. inventories are valued using the last-in, first-out method. These inventories represented approximately 32% and 35% of total inventories at September 30, 2010 and December 31, 2009, respectively. If the first-in, first-out method of inventory valuation had been used, inventories would have been \$201 million and \$224 million higher as of September 30, 2010 and December 31, 2009, respectively.

8. Goodwill and Other Identifiable Intangible Assets

The change in the carrying amount of goodwill attributable to each reportable segment for the nine months ended September 30, 2010 was as follows:

	Performance Coatings	Industrial Coatings	Architectural Coatings EMEA	Optical and Specialty Materials (Millions)	Commodity Chemicals	Glass	Total
Balance, Dec. 31, 2009	\$ 1,143	\$ 509	\$ 1,021	\$ 51	\$ 3	\$ 57	\$ 2,784
Acquisitions			7		1		8
Currency	1	(16)	(46)	(2)		(4)	(67)
Balance, September 30, 2010	\$ 1,144	\$ 493	\$ 982	\$ 49	\$ 4	\$ 53	\$ 2,725

The carrying amount of acquired trademarks with indefinite lives as of September 30, 2010 and December 31, 2009 totaled \$326 million and \$334 million, respectively.

The Company's identifiable intangible assets with finite lives are being amortized over their estimated useful lives and are detailed below.

	September 30, 2010			December 31, 2009		
	Gross Carrying Amount	Accumulated Amortization	Net	Gross Carrying Amount	Accumulated Amortization	Net
Acquired technology	\$ 515	\$ (264)	\$ 251	\$ 519	\$ (234)	\$ 285
Customer-related intangibles	974	(337)	637	990	(286)	704
Trade names	120	(41)	79	122	(35)	87
Other	27	(23)	4	28	(22)	6
Balance	\$ 1,636	\$ (665)	\$ 971	\$ 1,659	\$ (577)	\$ 1,082

Aggregate amortization expense related to these identifiable intangible assets for the three and nine months ended September 30, 2010 was \$30 million and \$92 million, respectively, and for the three and nine months ended September 30, 2009 was \$32 million and \$93 million, respectively. As of September 30, 2010, estimated future amortization expense of identifiable intangible assets is as follows: \$30 million for the remaining quarter of 2010 and \$130 million in each of the next five years.

9. Variable Interest Entities

PPG has a 50% ownership interest in RS Cogen, L.L.C., which toll produces electricity and steam, primarily for PPG and its joint venture partner. The joint venture was formed with a wholly-owned subsidiary of Entergy Corporation in 2000 for the construction and operation of a \$300 million process steam, natural gas-fired cogeneration facility in Lake Charles, LA., the majority of which was financed by a syndicate of

Edgar Filing: PPG INDUSTRIES INC - Form 10-Q

lenders. PPG's future commitment to purchase electricity and steam from the joint venture approximates \$23 million per year subject to contractually defined inflation adjustments for the next 13 years. RS Cogen is a variable interest entity under U.S. accounting guidance. The joint venture's critical operations are overseen by a management committee, which has equal representation by PPG and Entergy. With the power to direct the activities of RS Cogen equally shared between RS Cogen's two owners, PPG does not consider itself to be the joint venture's primary beneficiary. Accordingly, PPG accounts for its investment in RS Cogen as an equity method investment.

Table of Contents

The following table summarizes the Company's maximum exposure to loss associated with RS Cogen.

(Millions)	
Investment in and advances to RS Cogen	\$ 10
Take-or-pay obligation under power tolling arrangement	300
Maximum exposure to loss as of September 30, 2010	\$ 310

10. Debt

During the first nine months of 2010, the Company repaid \$106 million borrowed under its \$650 million revolving credit facility. In August 2010, PPG entered into a three-year credit agreement with several banks and financial institutions (the Credit Agreement). The Credit Agreement provides for a \$1.2 billion unsecured revolving credit facility. In connection with entering into this Credit Agreement, the Company terminated its \$650 million and its \$1 billion revolving credit facilities that were each set to expire in 2011. There were no outstanding amounts due under either revolving facility at the time of their termination. The Company has the ability to increase the size of the Credit Agreement by up to an additional \$300 million, subject to the receipt of lender commitments and other conditions. The Credit Agreement will terminate and all amounts outstanding will be due and payable on August 5, 2013.

The Credit Agreement provides that loans will bear interest at rates based, at the Company's option, on one of two specified base rates plus a margin based on certain formulas defined in the Credit Agreement. Additionally, the Credit Agreement contains a commitment fee on the amount of unused commitment under the Credit Agreement ranging from 0.125% to 0.625% per annum. The applicable interest rate and the commitment fee will vary depending on the ratings established by Standard & Poor's Financial Services LLC and Moody's Investor Service Inc. for the Company's non-credit enhanced, long-term, senior, unsecured debt.

The Credit Agreement contains usual and customary restrictive covenants for facilities of its type, which include, with specified exceptions, limitations on the Company's ability to create liens or other encumbrances, to enter into sale and leaseback transactions and to enter into consolidations, mergers or transfers of all or substantially all of its assets. The Credit Agreement also requires the Company to maintain a ratio of total indebtedness to total capitalization, as defined in the Credit Agreement, of sixty percent or less.

The Credit Agreement contains customary events of default that would permit the lenders to accelerate the repayment of any loans, including the failure to make timely payments when due under the Credit Agreement or other material indebtedness, the failure to satisfy covenants contained in the Credit Agreement, a change in control of the Company and specified events of bankruptcy and insolvency. There were no amounts outstanding under the Credit Agreement at September 30, 2010.

In October of 2009, the Company entered into an agreement with a counterparty to repurchase up to 1.2 million shares of the Company's stock of which 1.1 million shares were purchased in the open market. The counterparty held the shares until September of 2010 when the Company paid \$65 million and took possession of these shares.

Table of Contents**11. Earnings Per Common Share**

The following table presents the earnings per common share calculations for the three and nine months ended September 30, 2010 and 2009.

(Millions, except per share amounts)	Three Months Ended Sept. 30		Nine Months Ended Sept. 30

Stock options	0.8	0.2	0.7	0.1
Other stock compensation plans	0.4	0.6	0.6	0.6
Potentially dilutive common shares	1.2	0.8	1.3	0.7
Adjusted weighted average common shares outstanding	165.4	166.0	166.4	165.1
Earnings per common share - assuming dilution (attributable to PPG)	\$ 1.58	\$ 0.96	\$ 3.39	\$ 1.17

Excluded from the computation of diluted earnings per share due to their antidilutive effect were 1.8 million outstanding stock options for the three and nine months ended September 30, 2010 and 5.2 million and 7.0 million outstanding stock options for the three and nine months ended September 30, 2009, respectively.

12. Income Taxes

PPG recorded a one-time aftertax charge in the first quarter 2010 of \$85 million, or 51 cents per share, as a result of a change in U.S. tax law included in the U.S. Patient Protection and Affordable Care Act enacted in March 2010. Under the prior tax law, the total amount paid for prescription drug costs for retirees over the age of 65 was tax deductible. Beginning in 2013, however, these costs will only be deductible to the extent they exceed the amount of the annual subsidy PPG receives from the U.S. government under Medicare Part D. As a result of this change, the Company's deferred tax asset, which reflects the future tax deductibility of these post retirement costs, had to be reduced. This resulted in a charge against earnings of \$85 million in the first quarter of 2010, the period that the change in the tax law was enacted, as required by the accounting guidance for income taxes.

While this charge will not have a cash impact in 2010, the \$85 million represents the loss of future tax benefits beginning in 2013. The Company estimates a negative cash impact of approximately \$4 million in 2013, with the remainder realized over the many future years that these retiree prescription drug costs are expected to be paid.

Table of Contents

The Company files federal, state and local income tax returns in numerous domestic and foreign jurisdictions. In most tax jurisdictions, returns are subject to examination by the relevant tax authorities for a number of years after the returns have been filed. The Company is no longer subject to examinations by tax authorities in any major tax jurisdiction for years before 2002. Additionally, the Internal Revenue Service (IRS) has completed its examination of the Company's U.S. federal income tax returns filed for years through 2007. The IRS is currently conducting its examination of the Company's U.S. federal income tax return for 2008. This examination is expected to be completed in the first quarter of 2011 and is not expected to result in a significant adjustment to the Company's income tax expense.

13. Pensions and Other Postretirement Benefits

The net periodic benefit costs for the three and nine months ended September 30, 2010 and 2009 were as follows:

	Pensions			
	Three Months Ended Sept. 30		Nine Months Ended Sept. 30	
	2010	2009	2010	2009
	(Millions)			
Service cost	\$ 15	\$ 13	\$ 48	\$ 47
Interest cost	61	60	187	182
Expected return on plan assets	(69)	(57)	(208)	(170)
Amortization of prior service cost	1	2	3	5
Amortization of actuarial losses	29	34	91	98
Net periodic pension cost	\$ 37	\$ 52	\$ 121	\$ 162

PPG does not have a mandatory contribution to make to its U.S. defined benefit pension plans in 2010; however, PPG made voluntary contributions of \$150 million to these plans in September 2010. PPG expects to make mandatory contributions to its non-U.S. plans in 2010 of approximately \$90 million, of which approximately \$67 million have been made as of September 30, 2010.

The net periodic other postretirement benefit costs for the three and nine months ended September 30, 2010 and 2009 were as follows:

	Other Postretirement Benefits			
	Three Months Ended Sept. 30		Nine Months Ended Sept. 30	
	2010	2009	2010	2009
	(Millions)			
Service cost	\$ 5	\$ 3	\$ 14	\$ 16
Interest cost	16	17	48	51
Amortization of prior service cost	(2)	(3)	(5)	(10)
Amortization of actuarial losses	5	8	15	25
Net periodic other postretirement benefit cost	\$ 24	\$ 25	\$ 72	\$ 82

Table of Contents**14. Comprehensive Income**

Total comprehensive income for the three and nine months ended September 30, 2010 and 2009 was as follows:

	Three Months Ended Sept. 30		Nine Months Ended Sept. 30	
	2010	2009	2010	2009
	(Millions)			
Net income attributable to the controlling and noncontrolling interests	\$ 292	\$ 185	\$ 652	\$ 263
Other comprehensive income (loss), net of tax:				
Pension and other postretirement benefits (Note 13)	1	16	18	52
Unrealized currency translation adjustment	347	158	(5)	137
Unrealized losses on marketable securities	(1)		1	
Net change derivatives (Note 17)	(12)	11	(33)	8
Other comprehensive income (loss), net of tax	335	185	(19)	197
Total comprehensive income	627	370	633	460
Less: amounts attributable to noncontrolling interests:				
Net income	(30)	(26)	(88)	(69)
Unrealized currency translation adjustment	(12)	(3)		
Comprehensive income attributable to PPG	\$ 585	\$ 341	\$ 545	\$ 391

15. Shareholders Equity

The following tables presents the change in total shareholders equity for the nine months ended September 30, 2010 and 2009, respectively.

(Millions)	Total PPG Shareholders Equity	Non-controlling Interests	Total
Balance, January 1, 2010	\$ 3,753	\$ 169	\$ 3,922
Net income	564	88	652
Other comprehensive loss, net of tax	(19)		(19)
Cash dividends	(270)		(270)
Issuance of treasury stock	92		92
Purchase of treasury stock	(275)		(275)
Stock-based compensation activity	2		2
Dividends paid on subsidiary common stock to noncontrolling interests		(31)	(31)
Equity forward agreement (Note 10)	27		27
Other changes in noncontrolling interests		2	2
Balance, September 30, 2010	\$ 3,874	\$ 228	\$ 4,102

Table of Contents

(Millions)	Total PPG Shareholders Equity	Non-controlling Interests	Total
Balance, January 1, 2009	\$ 3,333	\$ 156	\$ 3,489
Net income	194	69	263
Other comprehensive income, net of tax	197		197
Cash dividends	(262)		(262)
Issuance of treasury stock	139		139
Stock-based compensation activity	(4)		(4)
Dividends paid on subsidiary common stock to noncontrolling interests		(29)	(29)
Equity forward agreement ⁽¹⁾	(59)		(59)
Balance, September 30, 2009	\$ 3,538	\$ 196	\$ 3,734

- ⁽¹⁾ In December of 2008, the Company entered into an agreement with a counterparty to repurchase 1.5 million shares of the Company's stock. Under the terms of the agreement, the counterparty purchased the shares in the open market in January of 2009. These shares were not considered outstanding for basic and diluted earnings per share calculation, and total shareholders' equity at September 30, 2009 was reduced by \$59 million, representing the amount that was paid by PPG to the counterparty upon settlement in December of 2009.

16. Financial Instruments, Excluding Derivative Financial Instruments

Included in PPG's financial instrument portfolio are cash and cash equivalents, cash held in escrow, marketable equity securities, company-owned life insurance and short- and long-term debt instruments. The fair values of these financial instruments approximated their carrying values at September 30, 2010 and December 31, 2009, in the aggregate, except for long-term debt.

Long-term debt (excluding capital lease obligations) had carrying and fair values totaling \$3,037 million and \$3,512 million, respectively, as of September 30, 2010. Long-term debt (excluding capital lease obligations) had carrying and fair values totaling \$3,046 million and \$3,313 million, respectively, as of December 31, 2009. The fair values of the debt instruments were based on discounted cash flows and interest rates then currently available to the Company for instruments of the same remaining maturities.

17. Derivative Financial Instruments and Hedge Activities

The Company recognizes all derivative financial instruments as either assets or liabilities at fair value on the balance sheet. The accounting for changes in the fair value of a derivative depends on the use of the instrument. To the extent that a derivative is effective as a hedge of an exposure to future changes in cash flows, the change in fair value of the instrument is deferred in accumulated other comprehensive income (loss) (AOCI). Any portion considered to be ineffective is reported in earnings immediately, including changes in value related to credit risk. To the extent that a derivative is effective as a hedge of an exposure to future changes in fair value, the change in the derivative's fair value is offset in the condensed consolidated statement of income by the change in fair value of the item being hedged. To the extent that a derivative or a financial instrument is effective as a hedge of a net investment in a foreign operation, the change in the derivative's fair value is deferred as an unrealized currency translation adjustment in AOCI.

Table of Contents

PPG's policies do not permit speculative use of derivative financial instruments. PPG uses derivative instruments to manage its exposure to fluctuating natural gas prices through the use of natural gas swap contracts. PPG also uses forward currency and option contracts as hedges against its exposure to variability in exchange rates on short-term intercompany borrowings, unrecognized firm sales commitments and cash flows denominated in foreign currencies. PPG uses foreign denominated debt and cross currency swap contracts to hedge net investments in foreign operations. Interest rate swaps are used to manage the Company's exposure to changing interest rates as such rate changes affect the fair value of fixed rate borrowings. Forward starting swaps are used to lock-in a fixed interest rate, to which will be added a corporate spread, related to future long-term debt refinancings. PPG also uses an equity forward arrangement to hedge the Company's exposure to changes in the fair value of PPG stock that is to be contributed to the asbestos settlement trust as discussed in Note 20, Commitments and Contingent Liabilities.

PPG enters into derivative financial instruments with high credit quality counterparties and diversifies its positions among such counterparties in order to reduce its exposure to credit losses. The Company did not realize a credit loss on derivatives during the nine month periods ended September 30, 2010 or 2009.

PPG centrally manages certain of its foreign currency transaction risk to minimize the volatility in cash flows caused by currency fluctuations. Decisions on whether to use derivative financial instruments to hedge the net transaction exposures related to all regions of the world are made based on the amount of those exposures by currency and, in certain situations, an assessment of the near-term outlook for certain currencies. This net hedging strategy does not qualify for hedge accounting; therefore, the change in the fair value of these instruments is recorded in Other charges in the accompanying condensed consolidated statement of income in the period of change. As of September 30, 2010 and December 31, 2009, the fair values of these contracts were assets of \$1 million and less than \$0.5 million, respectively.

PPG designates forward currency contracts as hedges against the Company's exposure to variability in exchange rates on short-term intercompany borrowings denominated in foreign currencies. To the extent effective, changes in the fair value of these instruments are deferred in AOCI and subsequently reclassified to Other charges in the accompanying condensed consolidated statement of income as foreign exchange gains and losses are recognized on the related intercompany borrowings. The portion of the change in fair value considered to be ineffective is recognized immediately in Other charges in the accompanying condensed consolidated statement of income. All amounts related to these instruments deferred in AOCI as of September 30, 2010 will be reclassified to earnings within the next twelve months. As of September 30, 2010 and December 31, 2009, the fair value of these instruments was a net asset of \$5 million and a net liability of \$2 million, respectively.

PPG designates forward currency contracts as hedges against the Company's exposure to future changes in fair value related to certain firm sales commitments denominated in foreign currencies. These contracts are designated as fair value hedges. As such, they are reported at fair value in the Company's condensed consolidated balance sheet, with changes in the fair value of these contracts and that of the related firm sales commitments reported in net sales. As of September 30, 2010, these contracts converted \$77 million to the South Korean won over the 33 month period ending June 30, 2013. As of December 31, 2009, these contracts converted \$87 million to the South Korean won over the 18 month period ending June 30, 2011. As of September 30, 2010 and December 31, 2009, the fair value of the contracts was a net asset of \$2 million and a net liability of \$3 million, respectively.

PPG previously entered into ten U.S. dollar to euro cross currency swap contracts with a total notional amount of \$1.3 billion, of which \$600 million were to settle on March 15, 2013 and \$700 million were to settle on March 15, 2018. One contract, with a notional amount of \$140 million and a settlement date of March 15, 2018 was converted to cash during the first quarter of 2010. Accordingly, on settlement of the remaining outstanding contracts PPG will receive \$1.2 billion U.S. dollars and pay euros to the counterparties to the contracts. During the term of these contracts, PPG will receive semiannual payments in March and September of each year based on U.S. dollar, long-term fixed interest rates, and PPG will make annual payments in March of each year to the counterparties based on euro, long-term fixed interest rates. The Company has designated these swaps as hedges of its net investment in the acquired SigmaKalon businesses and, as a result, the mark to market fair value adjustments of the swaps have been and will be recorded as a component of AOCI, and the cash flow impact of these swaps has been and will be classified as investing activities in the condensed consolidated statement of cash flows. As of September 30, 2010 and December 31, 2009, the fair value of these contracts was a net liability of \$182 million and \$308 million, respectively.

Table of Contents

As of September 30, 2010 and December 31, 2009, PPG designated 300 million euro-denominated borrowings as a hedge of a portion of PPG's net investment in the Company's European operations. Also, during 2010 and 2009, certain portions of PPG's various other euro-denominated borrowings were designated as hedges of PPG's investments in its European operations. As a result, the changes in book value from adjusting these foreign denominated borrowings to current spot rates have been deferred in AOCI.

As of September 30, 2010 and December 31, 2009, the Company had accumulated pretax unrealized translation gains in AOCI of \$60 million and translation losses in AOCI of \$210 million, respectively, related to both the euro-denominated borrowings and the cross currency swaps that have been designated as hedges of net investments.

Deferrals in AOCI related to hedges of the Company's net investments in European operations would be reclassified and recognized in earnings upon a substantial liquidation, sale or partial sale of such investments or upon impairment of all or a portion of such investments.

The Company manages its interest rate risk by monitoring its exposure to fixed and variable rates while attempting to minimize its interest costs. Generally, the Company maintains variable interest rate debt at a level of approximately 25% to 50% of total borrowings. PPG principally manages its fixed and variable interest rate risk by retiring and issuing debt from time to time and through the use of interest rate swaps. As of September 30, 2010 and December 31, 2009, these swaps converted \$450 million of fixed rate debt to variable rate debt. The swaps are designated as fair value hedges. As such, these swaps are carried at fair value. Changes in the fair value of these swaps and that of the related debt are recorded in Interest expense in the accompanying condensed consolidated statement of income. As of September 30, 2010 and December 31, 2009, the fair value of these contracts was an asset of \$20 million and \$10 million, respectively.

The Company entered into forward starting swaps in 2009 and in the second quarter of 2010 to effectively lock-in a fixed interest rate for future debt refinancings with an anticipated term of ten years based on the ten year swap rate, to which will be added a corporate spread. All of the swap contracts are required to be settled in July 2012. As of September 30, 2010 and December 31, 2009, the notional amount of the swaps outstanding totaled \$400 million and \$250 million, respectively. To the extent that the swaps are effective, changes in the fair values of the swap contracts are deferred in AOCI. The portion of the change in fair value considered to be ineffective is recognized immediately in Other charges in the accompanying condensed consolidated statement of income. Amounts deferred in AOCI will be reclassified to interest expense over the same period of time that interest expense is recognized on the future borrowings. As of September 30, 2010 and December 31, 2009, the fair value of these swaps was a liability of \$51 million and an asset of \$3 million, respectively.

The Company uses derivative instruments to manage its exposure to fluctuating natural gas prices through the use of natural gas swap contracts. These instruments mature over the next 23 months. To the extent that these instruments are effective in hedging PPG's exposure to price changes, changes in the fair values of the hedge contracts are deferred in AOCI and reclassified to Cost of sales, exclusive of depreciation and amortization as the natural gas is purchased. The amount of ineffectiveness is reported in Other charges in the accompanying condensed consolidated statement of income immediately. As of September 30, 2010 and December 31, 2009, the fair value of these contracts was a liability of \$46 million and \$50 million, respectively. Of the total pretax loss deferred in AOCI as of September 30, 2010, \$39 million related to contracts that mature within the twelve-month period ending September 30, 2011.

Table of Contents

PPG entered into a one-year renewable equity forward arrangement with a bank in order to mitigate the impact of changes in the fair value of 1,388,889 shares of PPG stock that is to be contributed to the asbestos settlement trust as discussed in Note 20, Commitments and Contingent Liabilities. This instrument, which has been renewed, is recorded at fair value as an asset or liability and changes in the fair value of this instrument are reflected in the Asbestos settlement net caption of the accompanying condensed consolidated statement of income. The total principal amount payable for these shares is \$62 million. PPG will pay to the bank interest based on the principal amount and the bank will pay to PPG an amount equal to the dividends paid on these shares during the period this instrument is outstanding. The difference between the principal amount and any amounts related to unpaid interest or dividends and the current market price for these shares, adjusted for credit risk, represents the fair value of the instrument as well as the amount that PPG would pay or receive if the bank chose to net settle the instrument. Alternatively, the bank may, at its option, require PPG to purchase the shares covered by the arrangement at the market price on the date of settlement. As of September 30, 2010 and December 31, 2009, the fair value of this contract was an asset of \$40 million and \$18 million, respectively.

No derivative instrument initially designated as a hedge instrument was undesignated or discontinued as a hedging instrument during the nine month periods ended September 30, 2010 or 2009. Nor were any amounts deferred in AOCI reclassified to earnings during these periods related to hedges of anticipated transactions that were no longer expected to occur.

All of the outstanding derivative instruments are subject to accelerated settlement in the event of PPG's failure to meet its debt obligations or payment obligations under the terms of the instruments' contractual provisions. In addition, should the Company be acquired and its payment obligations under the derivative instruments' contractual arrangements not be assumed by the acquirer, or should PPG enter into bankruptcy, receivership or reorganization proceedings, the instruments would also be subject to accelerated settlement.

For the first nine months of 2010, other comprehensive income included a net pretax loss due to cash flow hedge derivatives of \$54 million (\$33 million, net of tax). This loss was comprised of realized losses of \$67 million and unrealized losses of \$121 million. The realized losses related to the settlement during the period of natural gas contracts, interest rate swaps owned by one of the Company's investees accounted for under the equity method of accounting and foreign currency contracts. The unrealized losses related to the change in fair value of the natural gas and foreign currency contracts, the change in fair value on forward starting swaps and interest rate swaps owned by one of the Company's investees accounted for under the equity method of accounting.

For the first nine months of 2009, other comprehensive income included a net pretax gain due to cash flow hedge derivatives of \$11 million (\$8 million, net of tax). This gain was comprised of realized losses of \$126 million and unrealized losses of \$115 million. The realized losses related to the settlement during the period of natural gas contracts, foreign currency contracts, and interest rate swaps owned by one of the Company's investees accounted for under the equity method of accounting. The unrealized losses related to the changes in fair value of the natural gas, foreign currency and forward starting swaps, partially offset by unrealized gains on interest rate swaps owned by one of the Company's investees accounted for under the equity method of accounting.

Table of Contents

Refer to Note 3, Fair Value Measurement, for additional disclosures related to the Company's derivative instruments outstanding as of September 30, 2010 and December 31, 2009.

The following table provides details related to fair value, cash flow, net investment and economic hedges, by type of derivative and financial instrument. All dollar amounts are pretax and relate to the nine month period ended September 30, 2010.

Table of Contents

18. Cash Flow Information

Cash payments for interest were \$168 million and \$180 million for the nine months ended September 30, 2010 and 2009, respectively. Cash payments for income taxes for the nine months ended September 30, 2010 and 2009 were \$153 million and \$162 million, respectively.

19. Stock-Based Compensation

The Company's stock-based compensation includes stock options, restricted stock units (RSUs) and grants of contingent shares that are earned based on achieving targeted levels of total shareholder return. All current grants of stock options, RSUs and contingent shares are made under the PPG Industries, Inc. Omnibus Incentive Plan (PPG Omnibus Plan). Shares available for future grants under the PPG Omnibus Plan were 4.1 million as of September 30, 2010.

Total stock-based compensation cost was \$11 million and \$34 million for the three and nine months ended September 30, 2010, respectively, and \$8 million and \$21 million for the three and nine months ended September 30, 2009, respectively. The total income tax benefit recognized in the accompanying condensed consolidated statement of income related to the stock-based compensation was \$4 million and \$12 million for the three and nine months ended September 30, 2010, respectively, and \$3 million and \$8 million for the three and nine months ended September 30, 2009, respectively.

Stock Options

PPG has outstanding stock option awards that have been granted under two stock option plans: the PPG Industries, Inc. Stock Plan (PPG Stock Plan) and the PPG Omnibus Plan. Under the PPG Omnibus Plan and the PPG Stock Plan, certain employees of the Company have been granted options to purchase shares of common stock at prices equal to the fair market value of the shares on the date the options were granted. The options are generally exercisable beginning from six to 48 months after being granted and have a maximum term of 10 years. Upon exercise of a stock option, shares of Company stock are issued from treasury stock. The PPG Stock Plan includes a restored option provision for options originally granted prior to January 1, 2003 that allows an optionee to exercise options and satisfy the option price by certifying ownership of mature shares of PPG common stock with equivalent market value.

In the first quarter of 2010, PPG granted 900,170 stock options under the PPG Omnibus Plan at a weighted average exercise price of \$61.81 per share. The weighted average fair value of options granted was \$13.36 per share. In the first quarter of 2009, PPG granted 926,380 stock options from the PPG Omnibus Plan, at a weighted average exercise price of \$34.19 per share. The weighted average fair value of options granted was \$6.79 per share.

The fair value of stock options issued to employees is measured on the date of grant and is recognized as expense over the requisite service period. PPG estimates the fair value of stock options using the Black-Scholes option pricing model. The risk-free interest rate is determined by using the U.S. Treasury yield curve at the date of the grant and using a maturity equal to the expected life of the option. The expected life of options is calculated using the average of the vesting term and the maximum term, as prescribed by accounting guidance on the use of the simplified method for determining the expected term of an employee share option. This method is used as the vesting term of stock options was changed to three years in 2004 and, as a result, the historical exercise data does not provide a reasonable basis upon which to estimate the expected life of options. The expected dividend yield and volatility are based on historical stock prices and dividend amounts over past time periods equal in length to the expected life of the options.

Table of Contents

The fair value of the first quarter 2010 grant was calculated with the following weighted average assumptions:

Risk free interest rate	3.1%
Expected life of option in years	6.5
Expected dividend yield	3.3%
Expected volatility	27.3%

Restricted Stock Units

Long-term incentive value is delivered to selected key management employees by granting RSUs, which have either time or performance-based vesting features. The fair value of an RSU is equal to the market value of a share of stock on the date of grant. Time-based RSUs vest over the three-year period following the date of grant, unless forfeited, and will be paid out in the form of stock, cash or a combination of both at the Company's discretion at the end of the three-year vesting period. Performance-based RSUs vest based on achieving specific annual performance targets for earnings per share growth and cash flow return on capital over the three-year period following the date of grant. Unless forfeited, the performance-based RSUs will be paid out in the form of stock, cash or a combination of both at the Company's discretion at the end of the three-year vesting period if PPG meets the performance targets. The amount paid for performance-based awards may range from 0% to 180% of the original grant, based upon the frequency with which the earnings per share growth and cash flow return on capital performance targets are met over the three-year period. For the purposes of expense recognition, PPG has assumed that performance-based RSUs granted in 2008 will vest at the 150% level and those granted in 2009 and 2010 will vest at the 100% level. With respect to the 2008 grant, two of the four performance targets were met in 2008 and 2009. With respect to the 2009 grant, one of the two performance targets was met in 2009.

In the first quarter of 2010, PPG granted 357,902 RSUs at a weighted average fair value of \$55.53 per share. In the first quarter of 2009, PPG granted 420,281 RSUs at a weighted average fair value of \$28.06 per share.

Contingent Share Grants

The Company also provides grants of contingent shares to selected key executives that may be earned based on PPG total shareholder return over the three-year period following the date of grant. Contingent share grants (referred to as "TSR awards") are made annually and are paid out at the end of each three-year period based on the Company's performance. Performance is measured by determining the percentile rank of the total shareholder return of PPG common stock in relation to the total shareholder return of the S&P 500 for the three-year period following the date of grant. The payment of awards following the three-year award period will be based on performance achieved in accordance with the scale set forth in the plan agreement and may range from 0% to 220% of the initial grant. A payout of 100% is earned if the target performance is achieved. Contingent share awards for the 2008-2010 period earn dividend equivalents during the three-year award period based on the original number of contingent shares granted, which are credited to participants quarterly in the form of common stock equivalents. For the 2009-2011 and 2010-2012 periods, dividend equivalents for the award period will be paid to participants with the award payout at the end of the period based on the actual number of contingent shares that are earned. Any payments made at the end of the award period may be in the form of stock, cash or a combination of both. The TSR awards qualify as liability awards, and compensation expense is recognized over the three-year award period based on the fair value of the awards (giving consideration to the Company's percentile rank of total shareholder return) remeasured in each reporting period until settlement of the awards.

Table of Contents

20. Commitments and Contingent Liabilities

PPG is involved in a number of lawsuits and claims, both actual and potential, including some that it has asserted against others, in which substantial monetary damages are sought. These lawsuits and claims, the most significant of which are described below, relate to contract, patent, environmental, product liability, antitrust and other matters arising out of the conduct of PPG's current and past business activities. To the extent that these lawsuits and claims involve personal injury and property damage, PPG believes it has adequate insurance; however, certain of PPG's insurers are contesting coverage with respect to some of these claims, and other insurers, as they had prior to the asbestos settlement described below, may contest coverage with respect to some of the asbestos claims if the settlement is not implemented. PPG's lawsuits and claims against others include claims against insurers and other third parties with respect to actual and contingent losses related to environmental, asbestos and other matters.

The result of any future litigation of such lawsuits and claims is inherently unpredictable. However, management believes that, in the aggregate, the outcome of all lawsuits and claims involving PPG, including asbestos-related claims in the event the settlement described below does not become effective, will not have a material effect on PPG's condensed consolidated financial position or liquidity; however, such outcome may be material to the results of operations of any particular period in which costs, if any, are recognized.

Antitrust Matters

Several complaints were filed in late 2007 and early 2008 in different federal courts naming PPG and other flat glass producers as defendants in purported antitrust class actions. The complaints allege that the defendants conspired to fix, raise, maintain and stabilize the price and the terms and conditions of sale of flat glass in the United States in violation of federal antitrust laws. In June 2008, these cases were consolidated into one federal court class action in Pittsburgh, Pa. In the consolidated complaint, the plaintiffs seek a permanent injunction enjoining the defendants from future violations of the federal antitrust laws, unspecified compensatory damages, including treble damages, and the recovery of their litigation costs. Many allegations in the complaints are similar to those raised in proceedings by the European Commission in which fines were levied against other flat glass producers arising out of alleged antitrust violations. PPG is not involved in any of the proceedings in Europe. PPG divested its European flat glass business in 1998. A complaint containing allegations substantially similar to the U.S. litigation and seeking compensatory and punitive damages in amounts to be determined by the court was filed in the Superior Court in Windsor, Ontario, Canada in August 2008 regarding the sale of flat glass in Canada. In the third quarter of 2010, the other defendants in these cases agreed to settlements. Although PPG is aware of no wrongdoing or conduct on its part in the operation of its flat glass business that violated any antitrust laws, in order to avoid the ongoing expense of this protracted case, as well as the risks and uncertainties associated with complex litigation involving jury trials, in the third quarter of 2010 PPG reached an agreement in principle to resolve these flat glass antitrust matters for approximately \$6 million. The charge for these matters was recorded in Other charges for the three and nine month periods ending September 30, 2010.

Table of Contents

Asbestos Matters

For over 30 years, PPG has been a defendant in lawsuits involving claims alleging personal injury from exposure to asbestos. Most of PPG's potential exposure relates to allegations by plaintiffs that PPG should be liable for injuries involving asbestos-containing thermal insulation products, known as Unibestos, manufactured and distributed by Pittsburgh Corning Corporation (PC). PPG and Corning Incorporated are each 50% shareholders of PC. PPG has denied responsibility for, and has defended, all claims for any injuries caused by PC products. As of the April 16, 2000 order which stayed and enjoined asbestos claims against PPG (as discussed below), PPG was one of many defendants in numerous asbestos-related lawsuits involving approximately 114,000 claims served on PPG. During the period of the stay, PPG generally has not been aware of the dispositions, if any, of these asbestos claims.

Background of PC Bankruptcy Plan of Reorganization

On April 16, 2000, PC filed for Chapter 11 Bankruptcy in the U.S. Bankruptcy Court for the Western District of Pennsylvania located in Pittsburgh, Pa. Accordingly, in the first quarter of 2000, PPG recorded an after-tax charge of \$35 million for the write-off of all of its investment in PC. As a consequence of the bankruptcy filing and various motions and orders in that proceeding, the asbestos litigation against PPG (as well as against PC) has been stayed and the filing of additional asbestos suits against them has been enjoined, until 30 days after the effective date of a confirmed plan of reorganization for PC substantially in accordance with the settlement arrangement among PPG and several other parties discussed below. The stay may be terminated if the Bankruptcy Court determines that such a plan will not be confirmed, or the settlement arrangement set forth below is not likely to be consummated.

On May 14, 2002, PPG announced that it had agreed with several other parties, including certain of its insurance carriers, the official committee representing asbestos claimants in the PC bankruptcy, and the legal representatives of future asbestos claimants appointed in the PC bankruptcy, on the terms of a settlement arrangement relating to certain asbestos claims against PPG and PC (the 2002 PPG Settlement Arrangement).

On March 28, 2003, Corning Incorporated announced that it had separately reached its own arrangement with the representatives of asbestos claimants for the settlement of certain asbestos claims against Corning and PC (the 2003 Corning Settlement Arrangement).

The terms of the 2002 PPG Settlement Arrangement and the 2003 Corning Settlement Arrangement were incorporated into a bankruptcy reorganization plan for PC along with a disclosure statement describing the plan, which PC filed with the Bankruptcy Court on April 30, 2003. Amendments to the plan and disclosure statement were subsequently filed. On November 26, 2003, after considering objections to the second amended disclosure statement and plan of reorganization, the Bankruptcy Court entered an order approving such disclosure statement and directing that it be sent to creditors, including asbestos claimants, for voting. In March 2004, the second amended PC plan of reorganization (the second amended PC plan of reorganization) received the required votes to approve the plan with a channeling injunction for present and future asbestos claimants under §524(g) of the Bankruptcy Code. After voting results for the second amended PC plan of reorganization were received, the Bankruptcy Court judge conducted a hearing regarding the fairness of the settlement, including whether the plan would be fair with respect to present and future claimants, whether such claimants would be treated in substantially the same manner, and whether the protection provided to PPG and its participating insurers would be fair in view of the assets they would convey to the asbestos settlement trust (the Trust) to be established as part of the second amended PC plan of reorganization. At that hearing, creditors and other parties in interest raised objections to the second amended PC plan of reorganization. Following that hearing, the Bankruptcy Court scheduled oral arguments for the contested items.

Table of Contents

The Bankruptcy Court heard oral arguments on the contested items on November 17-18, 2004. At the conclusion of the hearing, the Bankruptcy Court agreed to consider certain post-hearing written submissions. In a further development, on February 2, 2005, the Bankruptcy Court established a briefing schedule to address whether certain aspects of a decision of the U.S. Third Circuit Court of Appeals in an unrelated case had any applicability to the second amended PC plan of reorganization. Oral arguments on these matters were subsequently held in March 2005. During an omnibus hearing on February 28, 2006, the Bankruptcy Court judge stated that she was prepared to rule on the PC plan of reorganization in the near future, provided certain amendments were made to the plan. Those amendments were filed, as directed, on March 17, 2006. After further conferences and supplemental briefings, in December 2006, the court denied confirmation of the second amended PC plan of reorganization, on the basis that the plan was too broad in the treatment of allegedly independent asbestos claims not associated with PC.

Terms of 2002 PPG Settlement Arrangement

PPG had no obligation to pay any amounts under the 2002 PPG Settlement Arrangement until 30 days after the second amended PC plan of reorganization was finally approved by an appropriate court order that was no longer subject to appellate review (the Effective Date). If the second amended PC plan of reorganization had been approved as proposed, PPG and certain of its insurers (along with PC) would have made payments on the Effective Date to the Trust, which would have provided the sole source of payment for all present and future asbestos bodily injury claims against PPG, its subsidiaries or PC alleged to be caused by the manufacture, distribution or sale of asbestos products by these companies. PPG would have conveyed the following assets to the Trust: (i) the stock it owns in PC and Pittsburgh Corning Europe, (ii) 1,388,889 shares of PPG's common stock and (iii) aggregate cash payments to the Trust of approximately \$998 million, payable according to a fixed payment schedule over 21 years, beginning on June 30, 2003, or, if later, the Effective Date. PPG would have had the right, in its sole discretion, to prepay these cash payments to the Trust at any time at a discount rate of 5.5% per annum as of the prepayment date. In addition to the conveyance of these assets, PPG would have paid \$30 million in legal fees and expenses on behalf of the Trust to recover proceeds from certain historical insurance assets, including policies issued by certain insurance carriers that were not participating in the settlement, the rights to which would have been assigned to the Trust by PPG.

Under the proposed 2002 PPG Settlement Arrangement, PPG's participating historical insurance carriers would have made cash payments to the Trust of approximately \$1.7 billion between the Effective Date and 2023. These payments could also have been prepaid to the Trust at any time at a discount rate of 5.5% per annum as of the prepayment date. In addition, as referenced above, PPG would have assigned to the Trust its rights, insofar as they related to the asbestos claims to have been resolved by the Trust, to the proceeds of policies issued by certain insurance carriers that were not participating in the 2002 PPG Settlement Arrangement and from the estates of insolvent insurers and state insurance guaranty funds.

Under the proposed 2002 PPG Settlement Arrangement, PPG would have granted asbestos releases to all participating insurers, subject to a coverage-in-place agreement with certain insurers for the continuing coverage of premises claims (discussed below). PPG would have granted certain participating insurers full policy releases on primary policies and full product liability releases on excess coverage policies. PPG would have also granted certain other participating excess insurers credit against their product liability coverage limits.

Table of Contents

If the second amended PC plan of reorganization incorporating the terms of the 2002 PPG Settlement Arrangement and the 2003 Corning Settlement Arrangement had been approved by the Bankruptcy Court, the Court would have entered a channeling injunction under §524(g) and other provisions of the Bankruptcy Code, prohibiting present and future claimants from asserting bodily injury claims after the Effective Date against PPG or its subsidiaries or PC relating to the manufacture, distribution or sale of asbestos-containing products by PC or PPG or its subsidiaries. The injunction would have also prohibited codefendants in those cases from asserting claims against PPG for contribution, indemnification or other recovery. All such claims would have been filed with the Trust and only paid from the assets of the Trust.

Modified Third Amended PC Plan of Reorganization

To address the issues raised by the Bankruptcy Court in its December 2006 ruling, the interested parties engaged in extensive negotiations regarding the terms of a third amended PC plan of reorganization, including modifications to the 2002 PPG Settlement Arrangement. A modified third amended PC plan of reorganization (the third amended PC plan of reorganization), including a modified PPG settlement arrangement (the 2009 PPG Settlement Arrangement), was filed with the Bankruptcy Court on January 29, 2009. The parties also filed a disclosure statement describing the third amended PC plan of reorganization with the court. The third amended PC plan of reorganization also includes a modified settlement arrangement of Corning Incorporated.

Several creditors and other interested parties filed objections to the disclosure statement. Those objections were overruled by the Bankruptcy Court by order dated July 6, 2009 approving the disclosure statement. The third amended PC plan of reorganization and disclosure statement were then sent to creditors, including asbestos claimants, for voting. The report of the voting agent, filed on February 18, 2010, reveals that all voting classes, including asbestos claimants, voted overwhelmingly in favor of the third amended PC plan of reorganization, which included the 2009 PPG Settlement Arrangement. In light of the favorable vote on the third amended PC plan of reorganization, the Bankruptcy Court conducted a hearing regarding the fairness of the proposed plan, including whether (i) the plan would be fair with respect to present and future claimants, (ii) such claimants would be treated in substantially the same manner, and (iii) the protection provided to PPG and its participating insurers would be fair in view of the assets they would convey to the Trust to be established as part of the third amended PC plan of reorganization. The hearing was held in June of 2010. The remaining objecting parties (a number of objections were resolved through plan amendments and stipulations filed before the hearing) appeared at the hearing and presented their cases. At the conclusion of the hearing, the Bankruptcy Court established a briefing schedule for its consideration of confirmation of the plan and the objections to confirmation. That briefing was completed and final oral arguments held in October 2010. Following those arguments, the Bankruptcy Court, after considering the objections to the third amended PC plan of reorganization, will enter a confirmation order if all requirements to confirm a plan of reorganization under the Bankruptcy Code have been satisfied. Such an order could be appealed to the U.S. District Court for the Western District of Pennsylvania. Assuming that the District Court approves a confirmation order, interested parties could appeal the order to the U.S. Third Circuit Court of Appeals and subsequently could seek review by the U.S. Supreme Court.

The 2009 PPG Settlement Arrangement will not become effective until the third amended PC plan of reorganization is finally approved by an appropriate court order that is no longer subject to appellate review, and PPG's initial contributions will not be due until 30 business days thereafter (the Funding Effective Date).

Table of Contents***Asbestos Claims Subject to Bankruptcy Court's Channeling Injunction***

If the third amended PC plan of reorganization is approved by the Bankruptcy Court and becomes effective, a channeling injunction will be entered under §524(g) of the Bankruptcy Code prohibiting present and future claimants from asserting asbestos claims against PC. With regard to PPG, the channeling injunction by its terms will prohibit present and future claimants from asserting claims against PPG that arise, in whole or in part, out of exposure to Unibestos, or any other asbestos or asbestos-containing products manufactured, sold and/or distributed by PC, or asbestos on or emanating from any PC premises. The injunction by its terms will also prohibit codefendants in these cases that are subject to the channeling injunction from asserting claims against PPG for contribution, indemnification or other recovery. Such injunction will also preclude the prosecution of claims against PPG arising from alleged exposure to asbestos or asbestos-containing products to the extent that a claimant is alleging or seeking to impose liability, directly or indirectly, for the conduct of, claims against or demands on PC by reason of PPG's:

(i) ownership of a financial interest in PC; (ii) involvement in the management of PC, or service as an officer, director or employee of PC or a related party; (iii) provision of insurance to PC or a related party; or (iv) involvement in a financial transaction affecting the financial condition of PC or a related party. The foregoing PC related claims are referred to as PC Relationship Claims and constitute, in PPG management's opinion, the vast majority of the pending asbestos personal injury claims against PPG. All claims channeled to the Trust will be paid only from the assets of the Trust.

Asbestos Claims Retained by PPG

The channeling injunction provided for under the third amended PC plan of reorganization will not extend to any claim against PPG that arises out of exposure to any asbestos or asbestos-containing products manufactured, sold and/or distributed by PPG or its subsidiaries that is not a PC Relationship Claim, and in this respect differs from the channeling injunction contemplated by the second amended PC plan of reorganization filed in 2003. While management believes that the vast majority of the approximately 114,000 claims against PPG alleging personal injury from exposure to asbestos relate to products manufactured, distributed or sold by PC, the potential liability for any non-PC Relationship Claims will be retained by PPG. Because a determination of whether an asbestos claim is a non-PC Relationship Claim would typically not be known until shortly before trial and because the filing and prosecution of asbestos claims (other than certain premises claims) against PPG has been enjoined since April 2000, the actual number of non-PC Relationship Claims that may be pending at the expiration of the stay or the number of additional claims that may be filed against PPG in the future cannot be determined at this time. PPG does not expect the Bankruptcy Court to lift the stay until after confirmation or rejection of the third amended PC plan of reorganization. PPG intends to defend against all such claims vigorously and their ultimate resolution in the court system is expected to occur over a period of years.

In addition, similar to what was contemplated by the second amended PC plan of reorganization, the channeling injunction will not extend to claims against PPG alleging personal injury caused by asbestos on premises owned, leased or occupied by PPG (so called premises claims), which generally have been subject to the stay imposed by the Bankruptcy Court. Historically, a small proportion of the claims against PPG and its subsidiaries have been premises claims, and based upon review and analysis, PPG believes that the number of premises claims currently comprises less than 2% of the total asbestos related claims against PPG. Beginning in late 2006, the Bankruptcy Court lifted the stay with respect to certain premises claims against PPG. As a result, PPG and its primary insurers have settled approximately 500 premises claims. PPG's insurers agreed to provide insurance coverage for a major portion of the payments made in connection with the settled claims, and PPG accrued the portion of the settlement amounts not covered by insurance. PPG and its primary insurers are evaluating the voluminous factual, medical, and other relevant information pertaining to approximately 560 additional claims that are being considered for potential settlement. Premises claims remain subject to the stay, as outlined above, although certain claimants have requested the Court to lift the stay with respect to these claims and the stay has been lifted as to some claims. PPG believes that any financial exposure resulting from such premises claims, taking into account available insurance coverage, will not have a material adverse effect on PPG's consolidated financial position, liquidity or results of operations.

Table of Contents***PPG's Funding Obligations***

PPG has no obligation to pay any amounts under the third amended PC plan of reorganization until the Funding Effective Date. If the third amended PC plan of reorganization is approved, PPG and certain of its insurers will make the following contributions to the Trust. On the Funding Effective Date, PPG will relinquish any claim to its equity interest in PC, convey the stock it owns in Pittsburgh Corning Europe and transfer 1,388,889 shares of PPG's common stock or cash equal to the fair value of such shares as defined in the 2009 PPG Settlement Arrangement. PPG will make aggregate cash payments to the Trust of approximately \$825 million, payable according to a fixed payment schedule over a period ending in 2023. The first payment is due on the Funding Effective Date. PPG would have the right, in its sole discretion, to prepay these cash payments to the Trust at any time at a discount rate of 5.5% per annum as of the prepayment date. PPG's historical insurance carriers participating in the third amended PC plan of reorganization will also make cash payments to the Trust of approximately \$1.7 billion between the Funding Effective Date and 2027. These payments could also be prepaid to the Trust at any time at a discount rate of 5.5% per annum as of the prepayment date. PPG will grant asbestos releases and indemnifications to all participating insurers, subject to amended coverage-in-place arrangements with certain insurers for remaining coverage of premises claims. PPG will grant certain participating insurers full policy releases on primary policies and full product liability releases on excess coverage policies. PPG will also grant certain other participating excess insurers credit against their product liability coverage limits.

PPG's obligation under the 2009 PPG Settlement Arrangement at December 31, 2008 was \$162 million less than the amount that would have been due under the 2002 PPG Settlement Arrangement. This reduction is attributable to a number of negotiated provisions in the 2009 PPG Settlement Arrangement, including the provisions relating to the channeling injunction under which PPG retains liability for any non-PC Relationship Claims. PPG will retain such amount as a reserve for asbestos-related claims that will not be channeled to the Trust, as this amount represents PPG's best estimate of its liability for these claims. PPG does not have sufficient current claim information or settlement history on which to base a better estimate of this liability, in light of the fact that the Bankruptcy Court's stay has been in effect since 2000. As a result, PPG's reserve at September 30, 2010 and December 31, 2009 for asbestos-related claims that will not be channeled to the Trust is \$162 million. In addition, under the 2009 PPG Settlement Arrangement, PPG will retain for its own account rights to recover proceeds from certain historical insurance assets, including policies issued by non-participating insurers. Rights to recover these proceeds would have been assigned to the Trust by PPG under the 2002 PPG Settlement Arrangement.

Following the effective date of the third amended PC plan of reorganization and the lifting of the Bankruptcy Court stay, PPG will monitor the activity associated with asbestos claims which are not channeled to the Trust pursuant to the third amended PC plan of reorganization, and evaluate its estimated liability for such claims and related insurance assets then available to the Company as well as underlying assumptions on a periodic basis to determine whether any adjustment to its reserve for these claims is required.

Of the total obligation of \$803 million under the 2009 PPG Settlement Arrangement at September 30, 2010, \$563 million is reported as a current liability and the present value of the payments due in the years 2012 to 2023 totaling \$240 million is reported as a non-current liability in the accompanying condensed consolidated balance sheet as of September 30, 2010. The future accretion of the noncurrent portion of the liability will total \$140 million and be reported as expense in the condensed consolidated statement of income over the period through 2023, as follows (in millions):

Remainder of 2010	\$ 4
2011	14
2012	14
2013 - 2023	108
Total	\$ 140

Table of Contents

The following table summarizes the impact on PPG's financial statements for the three and nine months ended September 30, 2010, respectively, and the three and nine months ended September 30, 2009, respectively, resulting from the 2009 PPG Settlement Arrangement including the change in fair value of the stock to be transferred to the Trust and the equity forward instrument (see Note 17, Derivative Financial Instruments and Hedge Activities) and the increase in the net present value of the future payments to be made to the Trust.

Increase (decrease) in expense:	Three Months		Nine Months	
	Ended Sept. 30 2010	2009	Ended Sept. 30 2010	2009
	(Millions)			
Change in fair value:				
PPG stock	\$ 18	\$ 20	\$ 21	\$ 23
Equity forward instrument	(18)	(20)	(22)	(23)
Accretion of asbestos liability	3	3	10	10
Asbestos settlement net expense	\$ 3	\$ 3	\$ 9	\$ 10

The fair value of the equity forward instrument is included as an Other current asset as of September 30, 2010 and December 31, 2009 in the accompanying condensed consolidated balance sheet. Payments under the fixed payment schedule require annual payments that are due each June. The current portion of the asbestos settlement liability included in the accompanying condensed consolidated balance sheet as of September 30, 2010 consists of all such payments required through June 2011, the fair value of PPG's common stock and the value of PPG's investment in Pittsburgh Corning Europe. The amount due June 30, 2012 of \$16 million and the net present value of the remaining payments is included in the long-term asbestos settlement liability in the accompanying condensed consolidated balance sheet as of September 30, 2010.

Enjoined Claims

If the 2009 PPG Settlement Arrangement is not implemented, for any reason, and the Bankruptcy Court stay expires, PPG intends to defend vigorously the pending and any future asbestos claims, including PC Relationship Claims, asserted against it and its subsidiaries. PPG continues to assert that it is not responsible for any injuries caused by PC products, which it believes account for the vast majority of the pending claims against PPG. Prior to 2000, PPG had never been found liable for any PC-related claims. In numerous cases, PPG was dismissed on motions prior to trial, and in others PPG was released as part of settlements by PC. PPG was found not responsible for PC-related claims at trial in two cases. In January 2000, one jury found PPG, for the first time, partly responsible for injuries to five plaintiffs alleged to be caused by PC products. The plaintiffs holding the judgment on that verdict moved to lift the injunction as applied to their claims. Before the hearing on that motion, PPG entered into a settlement with those claimants in the second quarter of 2010 to avoid the costs and risks associated with the possible lifting of the stay and appeal of the adverse 2000 verdict. The settlement resolved both the motion to lift the injunction and the judgment against PPG. The cost of this settlement was not significant to PPG's results of operations for the second quarter of 2010 and was fully offset by prior insurance recoveries. Although PPG has successfully defended asbestos claims brought against it in the past, in view of the number of claims, and the significant verdicts that other companies have experienced in asbestos litigation, the result of any future litigation of such claims is inherently unpredictable.

Table of Contents***Environmental Matters***

It is PPG's policy to accrue expenses for environmental contingencies when it is probable that a liability has been incurred and the amount of loss can be reasonably estimated. Reserves for environmental contingencies are exclusive of claims against third parties and are generally not discounted. In management's opinion, the Company operates in an environmentally sound manner and the outcome of the Company's environmental contingencies will not have a material effect on PPG's financial position or liquidity; however, any such outcome may be material to the results of operations of any particular period in which costs, if any, are recognized. Management anticipates that the resolution of the Company's environmental contingencies will occur over an extended period of time.

As of September 30, 2010 and December 31, 2009, PPG had reserves for environmental contingencies totaling \$282 million and \$287 million, respectively, of which \$64 million and \$59 million, respectively, were classified as current liabilities. The reserve at September 30, 2010 included \$176 million for environmental contingencies associated with PPG's former chromium manufacturing plant in Jersey City, N.J. (Jersey City), \$51 million for environmental contingencies associated with the Calcasieu River estuary and three operating plant sites in PPG's chemicals business and \$55 million for other environmental contingencies, including PPG's estimated obligations related to sites on the National Priority List. The reserve at December 31, 2009 included \$188 million for environmental contingencies associated with the former chromium manufacturing plant in Jersey City, \$44 million for environmental contingencies associated with the Calcasieu River estuary and three operating plant sites in PPG's chemical business and \$55 million for other environmental contingencies, including National Priority List sites. Pretax charges against income for environmental remediation costs totaled \$7 million and \$19 million, respectively, for the three and nine months ended September 30, 2010, and \$4 million and \$9 million, respectively, for the three and nine months ended September 30, 2009, and are included in Other charges in the accompanying condensed consolidated statement of income. Cash outlays related to such environmental remediation aggregated \$11 million and \$23 million, respectively, for the three and nine months ended September 30, 2010 and \$7 million and \$19 million, respectively, for the three and nine months ended September 30, 2009. The impact of foreign currency translation decreased the liability by \$1 million in the first nine months of 2010.

The Company's continuing efforts to analyze and assess the environmental issues associated with a former chromium manufacturing plant site located in Jersey City and at the Calcasieu River Estuary located near the Lake Charles, La., chlor-alkali plant resulted in a pre-tax charge of \$173 million in the third quarter of 2006 for the estimated costs of remediating these sites. These charges for estimated environmental remediation costs in 2006 were significantly higher than PPG's historical range. Excluding 2006, pretax charges against income have ranged between \$10 million and \$49 million per year for the past 15 years. PPG anticipates that charges against income in 2010 for environmental remediation costs will be within this historical range.

Management expects cash outlays for environmental remediation costs to be approximately \$35 million in 2010 and to range from \$50 million to \$70 million annually through 2014. It is possible that technological, regulatory and enforcement developments, the results of environmental studies and other factors could alter the Company's expectations with respect to charges against income and future cash outlays. Specifically, the level of expected cash outlays is highly dependent upon activity related to the former chromium manufacturing plant site in New Jersey as discussed below.

Table of Contents

Since 1990, PPG has remediated 47 of 61 residential and nonresidential sites under the 1990 Administrative Consent Order (ACO). The most significant of the 14 remaining sites is the former chromium manufacturing location in Jersey City. The principal contaminant of concern is hexavalent chromium. Based on current estimates, at least 500,000 tons of soil may be potentially impacted for all remaining sites. The Company submitted a feasibility study work plan to the New Jersey Department of Environmental Protection (NJDEP) in October 2006 that includes a review of the available remediation technology alternatives for the former chromium manufacturing location. Under the feasibility study work plan, remedial alternatives which will be assessed include, but are not limited to, soil excavation and offsite disposal in a licensed disposal facility, in situ chemical stabilization of soil and groundwater, and in situ solidification of soils. PPG has submitted a Remedial Action Work Plan for one other of the remaining sites under the ACO. This proposal has been submitted to the NJDEP for approval. In addition, investigation activities are ongoing for an additional six sites covered by the ACO adjacent to the former manufacturing site with completion expected in 2010 to 2011. Investigation activities have not yet begun for the remaining six sites covered by the ACO, but PPG believes the results of the study at the former chromium manufacturing location will also provide the Company with relevant information concerning remediation alternatives at these sites.

As a result of the extensive analysis undertaken in connection with the preparation and submission of the feasibility study work plan for the former chromium manufacturing location described above, the Company recorded a pretax charge of \$165 million in the third quarter of 2006. The charge included estimated costs for remediation at the 14 remaining ACO sites, including the former manufacturing site, and for the resolution of litigation filed by NJDEP in May 2005 as discussed below. The principal estimated cost elements of the third quarter 2006 charge and of the remaining reserve at September 30, 2010 were based on competitively derived or readily available remediation industry cost data for representative remedial options, e.g., excavation and in situ stabilization/solidification. The major cost components are (i) in place soil treatment and transportation and disposal of excavated soil and (ii) construction services (related to soil excavation, groundwater management and site security), which account for approximately 50% and 30% of the reserve, respectively, as of September 30, 2010. The reserve also includes estimated costs for remedial investigation, interim remedial measures, engineering and project management. The most significant assumptions underlying the reserve are those related to the extent and concentration of chromium impacts in the soil, as these will determine the quantity of soil that must be treated in place, the quantity that will have to be excavated and transported for offsite disposal, and the nature of disposal required. The charges are exclusive of any third party indemnification, as management does not expect to receive any such amounts.

In May 2005, the NJDEP filed a complaint against PPG and two other former chromium producers seeking to hold the parties responsible for a further 53 sites where the source of chromium contamination is not known and to recover costs incurred by the agency in connection with its response activities at certain of those sites. During the third quarter of 2008, the parties reached an agreement in principle on all claims relating to these 53 sites (the Orphan Sites Settlement). Under the terms of the proposed Orphan Sites Settlement, PPG would, among other things, accept responsibility for remediation of six of the 53 sites, one half of the cost for remediating nine sites where chrome ore processing residue was used as fill in connection with the installation or repair of sewer pipes owned by the City, reimburse the NJDEP for a portion of past costs in the amount of \$5 million and be responsible for the NJDEP's oversight costs associated with the sites for which PPG is wholly or partially responsible. The proposed Orphan Sites Settlement would not affect PPG's responsibilities for the 14 remaining unremediated sites covered by PPG's ACO. However, a settlement agreement among PPG, NJDEP and Jersey City has been reached and memorialized in the form of a Judicial Consent Order (the JCO) that was entered by the Court on June 26, 2009. PPG's remedial obligations under the ACO with NJDEP have been incorporated into the JCO. Pursuant to the JCO, a new process has been established for the review of the technical reports PPG must submit for the investigation and remedy selection for the 14 ACO sites and the six sites for which PPG has accepted sole responsibility under the terms of the proposed Orphan Sites Settlement (i.e., 20 PPG Sites). The JCO also provides for the appointment of a court-approved Site Administrator who has established a master schedule for the remediation of the 20 PPG sites. The JCO establishes a goal, based on currently applicable remedial options, to remediate soils and sources of contamination at the PPG sites as expeditiously as possible with a five year goal for completion in accordance with a master schedule that was developed by the Site Administrator. On July 6, 2009, former United States Environmental Protection Agency Deputy Administrator, Michael McCabe, was appointed as Site Administrator under the JCO. The JCO also resolves reparation claims by the City of Jersey City with the payment of \$1.5 million over a five year time period. The JCO does not otherwise affect PPG's responsibility for the remediation of the 14 ACO sites. PPG's estimated costs under the proposed Orphan Sites Settlement and the JCO are included in the September 30, 2010 reserve for New Jersey chrome environmental remediation matters.

Table of Contents

Multiple future events, including completion of feasibility studies, remedy selection, remedy design and remedy implementation involving governmental agency action or approvals will be required, and considerable uncertainty exists regarding the timing of these future events for the remaining 14 sites covered by the ACO and the six orphan sites for which PPG has accepted responsibility under the terms of a proposed Orphan Sites Settlement. Final resolution of these events is expected to occur over an extended period of time. The feasibility study work plan for the former manufacturing site is under review. The work plans for interim remedial measures, which consist of the removal and off-site disposal of concrete foundations, have been approved and the work associated began in the third quarter of 2010. Remedy implementation for the former manufacturing site is scheduled to begin during the second quarter of 2012. The remedial action work plan for one other site is currently under review by NJDEP and remedial activities are scheduled to begin in the fourth quarter of 2010. The investigation and remediation of the five other ACO sites and the six orphan sites for which PPG has accepted sole responsibility is scheduled to be completed over the next four years. As these events occur and to the extent that the cost estimates of the environmental remediation remedies change, the existing reserve for this environmental remediation will be adjusted. Based on current information, PPG expects cash outlays related to remediation efforts in New Jersey to range from \$20 million to \$25 million in 2010 and \$30 million to \$60 million annually from 2011 through 2014.

In Lake Charles, the U.S. Environmental Protection Agency (USEPA) completed an investigation of contamination levels in the Calcasieu River Estuary and issued a Final Remedial Investigation Report in September 2003, which incorporates the Human Health and Ecological Risk Assessments, indicating that elevated levels of risk exist in the estuary. PPG and other potentially responsible parties are performing a feasibility study under the authority of the Louisiana Department of Environmental Quality (LDEQ). PPG 's exposure with respect to the Calcasieu Estuary is focused on the lower few miles of Bayou d Inde, a small tributary to the Calcasieu Estuary near PPG 's Lake Charles facility, and about 150 to 200 acres of adjacent marshes. The Company and three other potentially responsible parties submitted a draft remediation feasibility study report to the LDEQ in October 2006. The proposed remedial alternatives include sediment dredging, sediment capping, and biomonitoring of fish and shellfish. Principal contaminants of concern which may require remediation include various metals, dioxins and furans, and polychlorinated biphenyls. In response to agency comments on the draft study, the companies conducted additional investigations and submitted a revised feasibility report to the agencies in the third quarter of 2008. Government officials have indicated that a U.S. Army Corps of Engineers ' study has concluded that the proposed remedy will not adversely affect drainage in communities adjacent to Bayou d Inde. In response to the feasibility study, LDEQ issued a draft decision document for the Bayou d Inde area in February 2010. The decision document includes LDEQ 's selection of remedial alternatives for the Bayou d Inde area and are in accordance with those recommended in the feasibility study. LDEQ held a public hearing on March 23, 2010 and is in the process of evaluating the public comments received as part of the finalization of its decision document which is expected later this year.

Table of Contents

Multiple future events, such as feasibility study approval, remedy selection, remedy design and remedy implementation involving agency action or approvals related to the Calcasieu River estuary will be required and considerable uncertainty exists regarding the timing of these future events. Final resolution of these events is expected to occur over an extended period of time. However, based on currently available information it is expected that feasibility study approval and remedy selection could occur in 2010, remedy design and approval could occur during 2010 to 2011, and remedy implementation could occur during 2011 to 2014, with some period of long-term monitoring for remedy effectiveness to follow. In addition, PPG's obligation related to any potential remediation will be dependent in part upon the final allocation of responsibility among the potentially responsible parties. Negotiations with respect to this allocation are ongoing, but the outcome is uncertain.

In addition to the amounts currently reserved for environmental remediation, the Company may be subject to loss contingencies related to environmental matters estimated to be as much as \$200 million to \$300 million, which range is unchanged since December 31, 2009. Such unreserved losses are reasonably possible but are not currently considered to be probable of occurrence. This range of reasonably possible unreserved loss relates to environmental matters at a number of sites; however, about 50% of this range relates to additional costs at the former chromium manufacturing plant site and related sites in Jersey City, N.J., and about 30% relates to the Calcasieu River Estuary and the three operating PPG plant sites in the Company's chemicals businesses. The loss contingencies related to these sites include significant unresolved issues such as the nature and extent of contamination at these sites and the methods that may have to be employed to remediate them.

The status of the remediation activity at the sites in New Jersey and at the Calcasieu River Estuary in Louisiana and the factors that could result in the need for additional environmental remediation reserves at those sites are described above. Initial remedial actions are occurring at the three operating plant sites in the chemicals businesses. These three operating plant sites are in Barberton, Ohio, Lake Charles, La., and Natrium, W.Va. At Barberton, PPG has completed a Facility Investigation and Corrective Measure Study (CMS) under USEPA's Resource Conservation and Recycling Act (RCRA) Corrective Action Program. PPG has been implementing the remediation alternatives recommended in the CMS using a performance-based approach with USEPA Region V oversight. However, USEPA Region V has transferred its oversight authority to the Ohio Environmental Protection Agency (OEPA). The Barberton Corrective Action Permit was issued by Ohio EPA on September 24, 2010. The OEPA has largely accepted the remedial recommendations of PPG. Similarly, the Company has completed a Facility Investigation and CMS for the Lake Charles facility under the oversight of the LDEQ. The LDEQ has accepted the proposed remedial alternatives. PPG received notice of LDEQ issuance of the final Hazardous Waste Post-Closure/HSWA Permit on June 28, 2010. The Permit was issued in final form on September 23, 2010. Planning for or implementation of these proposed alternatives is in progress. At Natrium, a facility investigation has been completed and initial interim remedial measures have been implemented to mitigate soil impacts. There is additional investigation of groundwater contamination ongoing which may indicate the need for further remedial actions to address specific areas of the facility. Preliminary engineering design of a groundwater treatment system is underway.

Table of Contents

With respect to certain waste sites, the financial condition of any other potentially responsible parties also contributes to the uncertainty of estimating PPG's final costs. Although contributors of waste to sites involving other potentially responsible parties may face governmental agency assertions of joint and several liability, in general, final allocations of costs are made based on the relative contributions of wastes to such sites. PPG is generally not a major contributor to such sites.

The impact of evolving programs, such as natural resource damage claims, industrial site reuse initiatives and state remediation programs, also adds to the present uncertainties with regard to the ultimate resolution of this unreserved exposure to future loss. The Company's assessment of the potential impact of these environmental contingencies is subject to considerable uncertainty due to the complex, ongoing and evolving process of investigation and remediation, if necessary, of such environmental contingencies, and the potential for technological and regulatory developments.

Other Matters

The U.S. Department of Commerce's Bureau of Industry and Security and the U.S. Department of Justice are conducting an ongoing investigation into potential violations of U.S. export control laws related to the exportation of small quantities (approximately 1,000 gallons) of protective coatings for potential use in Pakistan in 2006. The Company is cooperating in this matter. The Company, with the assistance of outside counsel, has conducted an investigation into these potential violations of the U.S. export control laws, and has responded to administrative and federal grand jury subpoenas. The Company has also made a disclosure of certain U.S. export control violations to the U.S. Department of Commerce related to this matter. Violations of the export control laws may result in civil, administrative or criminal fines or penalties, loss of export privileges, debarment or a combination of these penalties. At this time, the Company is unable to determine the outcome of the government's investigation or its possible effect on the Company.

PPG is a defendant in a matter in the California State Court in San Francisco in which plaintiffs claim that PPG and other defendants manufactured a defective product, the dry cleaning solvent perchloroethylene (PCE), and failed to provide adequate warnings regarding the environmental risks associated with the use of PCE. The plaintiffs claimed the defendants are responsible for remediation of soil and groundwater contamination at numerous dry cleaner sites in Modesto, California. In 2006, a Phase 1 trial was conducted as to four sites. The jury returned a verdict in the amount of \$3.1 million against PPG, The Dow Chemical Company, Vulcan, Oxy, and R.R. Street. The verdict was not apportioned.

Subsequent to the Phase 1 verdict, Vulcan and Oxy settled. In 2008, trial commenced on 18 Phase 2 Sites. Prior to submission of the case to the jury, the Court granted non-suit motions filed by all the defendants that limited PPG's potential liability to one of the 18 sites. The damages sought at this one site totaled \$27 million. A jury verdict in the amount of \$18 million was returned against PPG and The Dow Chemical Company on May 18, 2009. The verdict was not apportioned. The jury was not able to reach a verdict on the statute of limitations issue on the site in question. PPG and Dow appealed the trial court's refusal to decide the statute of limitations issue and to set the issue for retrial. In July 2009, the Superior Court ordered the trial court to decide the issue without re-trial. On August 24, 2009, the trial court issued an opinion finding that the City's claims were barred by the statute of limitations. The effect of the ruling was to nullify the jury's Phase 2 damage award. In October 2009, the trial court held a non-jury trial of the Redevelopment Authority's damage claims under the Polanco Act for certain remediation and investigative costs incurred to date. On March 26, 2010, the court issued a Tentative Decision finding that none of the Defendants were liable under the Polanco Act. The Redevelopment Authority's claims under this California statute related to four sites and totaled approximately \$1 million. After considering objections filed by several parties, the court entered a final decision in favor of the defendants on June 3, 2010. The court will combine the Phase 1 and Phase 2 verdicts and decide what amount of prior settlements will be applied to the final verdict. The allocation of prior settlements will be the subject of briefing and a court decision prior to the entry of a final judgment. It is likely that the parties will appeal the court's decision.

Table of Contents

The Company accrues for product warranties at the time the products are sold based on historical claims experience. As of September 30, 2010 and December 31, 2009, the reserve for product warranties was \$8 million. Pretax charges against income for product warranties and the related cash outlays were not material for the three and nine months ended September 30, 2010 and 2009.

The Company had outstanding letters of credit and surety bonds of \$165 million and guarantees of \$100 million as of September 30, 2010. The Company does not believe any loss related to such guarantees is likely.

21. Reportable Segment Information

PPG is a multinational manufacturer with 13 operating segments that are organized based on the Company's major products lines. These operating segments are also the Company's reporting units for purposes of testing goodwill for impairment. The operating segments have been aggregated based on economic similarities, the nature of their products, production processes, end-use markets and methods of distribution into six reportable business segments.

The Performance Coatings reportable segment is comprised of the refinish, aerospace, architectural coatings Americas and Asia Pacific and protective and marine coatings operating segments. This reportable segment primarily supplies a variety of protective and decorative coatings, sealants and finishes along with paint strippers, stains and related chemicals, as well as transparencies and transparent armor.

The Industrial Coatings reportable segment is comprised of the automotive, industrial and packaging coatings operating segments. This reportable segment primarily supplies a variety of protective and decorative coatings and finishes along with adhesives, sealants, inks and metal pretreatment products.

The Architectural Coatings EMEA reportable segment is comprised of the architectural coatings EMEA operating segment. This reportable segment primarily supplies a variety of coatings under a number of brands and purchased sundries to painting contractors and consumers in Europe, the Middle East and Africa.

The Optical and Specialty Materials reportable segment is comprised of the optical products and silicas operating segments. The primary Optical and Specialty Materials products are Transitions® lenses, sunlenses, optical lens materials, amorphous precipitated silica products and Teslin® synthetic printing sheet. Transitions® lenses are processed and distributed by PPG's 51%-owned joint venture with Essilor International.

The Commodity Chemicals reportable segment is comprised of the chlor-alkali and derivatives operating segment. The primary chlor-alkali and derivative products are chlorine, caustic soda, vinyl chloride monomer, chlorinated solvents, calcium hypochlorite, ethylene dichloride, hydrochloric acid and phosgene derivatives.

Table of Contents

The Glass reportable segment is comprised of the performance glazings and fiber glass operating segments. This reportable segment primarily supplies flat glass and continuous-strand fiber glass products.

Reportable segment net sales and segment income (loss) for the three and nine months ended September 30, 2010 and 2009 were as follows:

	Three Months Ended Sept. 30		Nine Months Ended Sept. 30	
	2010	2009	2010	2009
	(Millions)			
Net sales:				
Performance Coatings	\$ 1,103	\$ 1,075	\$ 3,179	\$ 3,069
Industrial Coatings	927	824	2,759	2,209
Architectural Coatings - EMEA	512	559	1,448	1,495
Optical and Specialty Materials	288	257	873	757
Commodity Chemicals	370	287	1,058	967
Glass	260	223	727	626
Total (a)	\$ 3,460	\$ 3,225	\$ 10,044	\$ 9,123
Segment income (loss):				
Performance Coatings	\$ 174	\$ 155	\$ 491	\$ 402
Industrial Coatings	86	58	299	70
Architectural Coatings - EMEA	50	59	111	117
Optical and Specialty Materials	82	67	250	188
Commodity Chemicals	60	19	116	144
Glass	32	(6)	45	(40)
Total	484	352	1,312	881
Legacy items (b)	(16)	(11)	(40)	(48)
Business restructuring (Note 6) (c)				(186)
Asbestos settlement net	(3)	(3)	(9)	(10)
Interest expense, net of interest income	(37)	(40)	(112)	(124)
Unallocated stock based compensation (Note 19)	(11)	(8)	(34)	(21)
Other unallocated corporate expense net(d)	(31)	(15)	(113)	(75)
Income before income taxes	\$ 386	\$ 275	\$ 1,004	\$ 417

- (a) Intersegment net sales for the three and nine months ended September 30, 2010 and 2009 were not material.
- (b) Legacy items include current costs related to former operations of the Company, including pension and other postretirement benefit costs, certain environmental remediation costs and certain charges for legal matters, including a charge related to flat glass antitrust matters in the third quarter of 2010, and other matters. Legacy items also include the equity earnings/(loss) from PPG's approximate 40 percent investment in Pittsburgh Glass Works (former automotive glass and services business). These legacy items are excluded from the segment income (loss) that is used to evaluate the performance of the operating segments.
- (c) For the nine months ended September 30, 2009, business restructuring includes charges of \$41 million for the Performance Coatings segment, \$93 million for the Industrial Coatings segment, \$13 million for the Architectural Coatings - EMEA segment, \$12 million for the Optical and Specialty Materials segment, \$6 million for the Commodity Chemicals segment, \$13 million for the Glass segment, and \$8 million for corporate. These costs were considered to be unusual and non-recurring and did not reduce the segment earnings used to evaluate the performance of the operating segments.

Edgar Filing: PPG INDUSTRIES INC - Form 10-Q

- (d) The increase in corporate unallocated costs in 2010 is due to higher variable pay and benefit costs. In addition, changes in foreign currency conversion rates used to translate foreign denominated corporate receivables and payables resulted in unfavorable earnings impacts in comparison with the prior year.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Performance in Third Quarter of 2010 Compared to Third Quarter of 2009

Performance Overview

Sales increased 7% in the third quarter of 2010 to \$3,460 million compared to \$3,225 million for the third quarter of 2009. Higher volumes accounted for 6% of this increase. Increases in selling prices were mostly offset by the negative effect of foreign currency translation.

Cost of sales, exclusive of depreciation and amortization, increased by \$119 million for the third quarter of 2010 to \$2,108 million compared to \$1,989 million for the third quarter of 2009. Cost of sales as a percentage of sales was 61% for the third quarter of 2010 compared to 62% for the third quarter of 2009. This improvement was the result of favorable prices and lower manufacturing costs, slightly exceeding the negative impact of cost inflation.

Selling, general and administrative expenses increased by \$7 million in the third quarter of 2010 compared to the third quarter of 2009. However, these expenses declined as a percent of sales from 22.7% in the third quarter of 2009 to 21.4% in the third quarter of 2010. The increase in selling, general and administrative expenses is a result of our higher sales volumes and inflation offset by currency and our cost reduction measures.

Other charges increased to \$28 million in the third quarter of 2010 as compared to \$20 million in the third quarter of 2009 due to higher environmental expense in 2010. Other earnings increased to \$63 million in the third quarter of 2010 as compared to \$56 million for the third quarter of 2009. This increase was primarily due to higher equity earnings.

The effective tax rate on pretax earnings was 24.4 percent for the third quarter of 2010 compared to 32.7 percent for the third quarter of 2009. The third quarter 2010 and 2009 effective tax rates include a tax benefit of 38 percent on the adjustment to increase the current value of the Company's obligation under the proposed asbestos settlement. The third quarter 2010 effective rate also includes a \$3 million benefit as a result of enacted changes in statutory tax rates and a \$6 million benefit from a catch-up adjustment from reducing the effective tax rate from 28 percent to 27 percent in the third quarter. The effective tax rate was 27 percent on remaining pretax earnings for the third quarter of 2010. The effective tax rate was 33 percent on remaining pretax earnings for the third quarter of 2009. This decline in our projected full year effective tax rate in 2010 is primarily the result of shifts in the geographic mix of projected full year results.

Performance of Reportable Business Segments

Performance Coatings sales increased 3% to \$1,103 million for the third quarter of 2010 compared to \$1,075 million for the third quarter of 2009. Sales increased due to increased selling prices. Overall for the segment, volumes remained level with the prior year. However, lower sales volumes in the architectural coatings Americas and Asia/Pacific business offset volume growth in the refinish, aerospace, and protective and marine coatings businesses. Segment income was \$174 million for the third quarter of 2010 compared to \$155 million for the third quarter of 2009. The increase in earnings resulted from higher selling prices, an improved sales mix and favorable cost performance which exceeded the impact of inflation.

Industrial Coatings sales increased 13% to \$927 million for the third quarter of 2010 compared to \$824 million for the third quarter of 2009. Sales increased 14% due to higher sales volumes, especially in the automotive coatings and industrial coatings businesses, and in all regions. Segment income was \$86 million for the third quarter of 2010 compared to \$58 million for the same quarter in 2009. Factors increasing segment income were improved sales volumes and lower manufacturing and overhead costs, while raw material and other cost inflation reduced segment income.

Table of Contents

Architectural Coatings - EMEA (Europe, Middle East and Africa) sales decreased 8% to \$512 million for the third quarter of 2010 compared to \$559 million for the third quarter of 2009. Sales declined due to the negative impact of foreign currency translation. The increases realized as a result of increased selling prices and the positive impact of several small acquisitions offset the negative impact of lower volumes. Segment income was \$50 million for the third quarter of 2010 compared to \$59 million for the same quarter in 2009. Half of the decrease in segment income was the result of the negative impacts of foreign currency, while lower volumes and raw material inflation offset somewhat by higher selling prices accounted for the remainder of the decrease.

Optical and Specialty Materials sales increased 12% to \$288 million for the third quarter of 2010 compared to \$257 million for the third quarter of 2009. The sales increase was due to volume growth in both the optical products and silicas businesses. Segment income was \$82 million for the third quarter of 2010 compared to \$67 million for the same quarter in 2009. The increase in segment income was primarily the result of higher sales volumes offset slightly by increased selling and advertising costs to support the sales growth.

Commodity Chemicals sales increased 29% to \$370 million for the third quarter of 2010 compared to \$287 million for the third quarter of 2009. Sales improved due to higher volumes and pricing increases. Segment income was \$60 million for the third quarter of 2010 compared to \$19 million for the same quarter in 2009. Segment income increased in large part due to higher sales pricing and volumes with some offset from the impact of higher maintenance and environmental costs and inflation.

Glass sales increased \$37 million to \$260 million for the third quarter of 2010 compared to \$223 million for the third quarter of 2009. The sales improvement is largely due to improved fiber glass volumes partially offset by the effects of currency. Price gains in the fiber glass business were offset by declines in the performance glazings business. Segment income was \$32 million for the third quarter of 2010 compared to a segment loss of \$6 million for the same quarter in 2009. The increase in segment income was due to the improved fiber glass volumes, as well as reduced manufacturing costs and higher equity earnings and royalty income.

Performance in the First Nine Months of 2010 Compared to First Nine Months of 2009

Performance Overview

Sales increased 10% for the first nine months of 2010 to \$10,044 million compared to \$9,123 million for the first nine months of 2009. Higher volumes accounted for an increase of 9 percent. There was also a slight positive impact from favorable foreign currency.

Cost of sales, exclusive of depreciation and amortization, increased by \$523 million for the first nine months of 2010 to \$6,128 million compared to \$5,605 million for the first nine months of 2009. This increase corresponds with the increase in sales. Cost of sales as a percentage of sales was approximately 61% for the first nine months of 2010 and 2009.

Selling, general and administrative expenses increased by \$32 million in the first nine months of 2010 compared to the first nine months of 2009 due to higher sales volumes and the impact of inflation and currency, offset by overhead cost reduction actions taken in response to the decline in the global economy in early 2009. Selling, general and administrative costs as a percentage of sales declined from 23.9% to 22.0% in 2010.

Table of Contents

Interest expense declined from \$144 million in the first nine months of 2009 to \$137 million in the first nine months of 2010, reflective of the lower debt balances in 2010.

The business restructuring charge of \$186 million in the first nine months of 2009 represents costs of a restructuring plan focused on further reducing PPG's global cost structure.

Other charges increased to \$65 million in the first nine months of 2010 compared to \$49 million in the same period in 2009. The increase was due primarily to higher environmental and litigation settlement costs. Other earnings increased to \$152 million in the first nine months of 2010 as compared to \$110 million for the first nine months of 2009. This increase was largely due to higher equity earnings, including increases in our equity income from PPG's investment in the former automotive glass and services business and our Asian fiber glass joint ventures.

The effective tax rate on pretax earnings was 35 percent for the first nine months of 2010 compared to 37 percent for the first nine months of 2009. Income tax expense for the nine months ended September 30, 2010 includes expense of \$85 million resulting from the reduction of our previously provided deferred tax asset related to our accrued retiree medical costs. The deferred tax asset was reduced due to tax law changes included in health care legislation enacted by Congress in March 2010 that included a provision to reduce the amount of retiree medical costs that will be deductible after December 31, 2012. Income tax expense also includes a \$3 million benefit as a result of enacted changes in statutory tax rates. The effective tax rate for the first nine months of 2009 includes a tax benefit of 24 percent related to the business restructuring charge. The effective tax rates for 2010 and 2009 include a tax benefit of 38 percent on the adjustment to increase the current value of the Company's obligation relating to asbestos claims under the proposed settlement. The effective tax rate was 27 percent on the remaining pretax earnings for the first nine months of 2010 compared to 33 percent for the first nine months of 2009. This decline in our projected full year 2010 effective tax rate is the result of shifts in the geographic mix of projected full year results.

Net income (attributable to PPG) and earnings per share assuming dilution (attributable to PPG) are summarized below:

(Millions, except per share amounts)		
Nine Months ended September 30, 2010		
	Net Income	
	\$	EPS
Net income (attributable to PPG)	\$ 564	\$ 3.39
Net income (attributable to PPG) includes:		
Charge related to change in U.S. tax law (U.S. Patient Protection and Affordable Care Act)	85	0.51
Charge related to asbestos settlement ⁽¹⁾	6	0.03
(Millions, except per share amounts)		
Nine Months ended September 30, 2009		
	Net Income	
	\$	EPS
Net income (attributable to PPG)	\$ 194	\$ 1.17
Net income (attributable to PPG) includes:		
Business restructuring charge	141	0.86
Charge related to asbestos settlement ⁽¹⁾	6	0.04

(1) Net increase in the current value of the Company's obligation relating to asbestos claims under the proposed asbestos settlement.

Table of Contents

Performance of Reportable Segments

Performance Coatings sales increased 4% to \$3,179 million for the first nine months of 2010 compared to \$3,069 million for the first nine months of 2009. Sales increased due to higher pricing and favorable currency. Volume declined slightly as reduced volume in the architectural coatings Americas and Asia Pacific business more than offset improved volume in the refinish business. Segment income was \$491 million for the first nine months of 2010 compared to \$402 million for the first nine months of 2009. An improved sales mix, favorable foreign currency and lower manufacturing and overhead costs increased segment income. The impact of inflation on segment earnings was offset by higher selling prices.

Industrial Coatings sales increased 25% to \$2,759 million for the first nine months of 2010 compared to \$2,209 million for the first nine months of 2009. Sales increased primarily due to higher sales volumes, most notably in the automotive and industrial businesses. This segment experienced volume increases in all major regions. Sales also increased due to pricing and foreign currency. Segment income was \$299 million for the first nine months of 2010 compared to \$70 million for the same period in 2009. The higher sales volume was the significant factor resulting in increased segment earnings. Lower manufacturing and overhead costs, favorable currency and higher pricing were offset by the negative impact of inflation, particularly in raw materials.

Architectural Coatings - EMEA sales decreased 3% to \$1,448 million for the first nine months of 2010 compared to \$1,495 million for the same period in 2009. Sales have decreased primarily due to the negative impact of foreign currency translation. The increases realized as a result of higher selling prices and the impact of acquisitions offset the negative impact of lower volumes. Segment income was \$111 million for the first nine months of 2010 compared to \$117 million for the same period in 2009. The decrease in earnings is also due to the negative impact of currency as the benefits of higher selling prices and lower overhead costs were offset by the impact of inflation and lower sales volume.

Optical and Specialty Materials sales increased 15% to \$873 million for the first nine months of 2010 compared to \$757 million for the first nine months of 2009 due to higher sales volume in both the optical products and silicas businesses. Segment income was \$250 million for the first nine months of 2010 compared to \$188 million for the same period in 2009. The increase in segment income was primarily the result of the higher sales volumes and lower manufacturing costs offset slightly by higher advertising costs to support the growth in optical sales.

Commodity Chemicals sales increased 9% to \$1,058 million for the first nine months of 2010 compared to \$967 million for the first nine months of 2009. Sales improved due to higher sales volumes that were partially offset by lower selling prices. Segment income was \$116 million for the first nine months of 2010 compared to \$144 million for the same period in 2009. Segment income decreased primarily due to the negative impact of lower selling prices and higher input costs, offset partially by higher volumes and lower manufacturing and overhead costs.

Glass sales increased 16% to \$727 million for the first nine months of 2010 compared to \$626 million for the first nine months of 2009. Sales increased primarily due to higher fiber glass volumes offset somewhat by lower selling prices, primarily in the performance glazings business. Segment income was \$45 million for the first nine months of 2010 compared to a segment loss of \$40 million for the same period in 2009. The improvement in segment earnings was due to the positive impact of the higher fiber glass sales volumes, improvement in manufacturing costs associated with much higher production throughput and higher equity earnings offset somewhat by lower selling prices.

Table of Contents

Liquidity and Capital Resources

Cash from operating activities for the nine months ended September 30, 2010 was \$698 million versus cash from operations of \$760 million for the comparable period of 2009. PPG has made approximately \$220 million of 2010 cash pension contributions, while pension contributions in the first nine months of 2009 totaled \$210 million. Cash from operations and the Company's debt capacity are expected to continue to be sufficient to fund operating activities, capital spending, including acquisitions, dividend payments, debt service, amounts due under the proposed asbestos settlement, share repurchases, and contributions to pension plans.

The ratio of total debt, including capital leases, to total debt and equity was 45% and 47% at September 30, 2010 and December 31, 2009, respectively.

We did not have a mandatory contribution to make to our U.S. defined benefit pension plans in 2010; however, we made a voluntary contribution to these plans in the third quarter of 2010 totaling \$150 million. We expect to make mandatory contributions to our non-U.S. plans in 2010 of approximately \$90 million, of which approximately \$67 million was made by September 30, 2010.

In August 2010, PPG entered into a three-year credit agreement with several banks and financial institutions (the Credit Agreement). The Credit Agreement provides for a \$1.2 billion unsecured revolving credit facility. In connection with entering this Credit Agreement the Company terminated its \$650 million and its \$1 billion revolving credit facilities that were each set to expire in 2011. There were no outstanding amounts due under either revolving facility at the time of their termination. The Company has the ability to increase the size of the Credit Agreement by up to an additional \$300 million, subject to the receipt of lender commitments and other conditions. The Credit Agreement will terminate and all amounts outstanding will be due and payable on August 5, 2013.

In October of 2009, the Company entered into an agreement with a counterparty to repurchase up to 1.2 million shares of the Company's stock of which 1.1 million shares were purchased in the open market. The counterparty held the shares until September of 2010 when the Company paid \$65 million and took possession of these shares.

PPG recorded a one-time aftertax charge in the first quarter 2010 of \$85 million, or 51 cents per share, as a result of a change in U.S. tax law included in the U.S. Patient Protection and Affordable Care Act enacted in March 2010. Under the prior tax law, the total amount paid for prescription drug costs for retirees over the age of 65 was tax deductible. Beginning in 2013, however, these costs will only be deductible to the extent they exceed the amount of the annual subsidy PPG receives from the U.S. government under Medicare Part D. As a result of this change, the Company's deferred tax asset, which reflects the future tax deductibility of these post retirement costs, had to be reduced. This resulted in a charge against earnings in the period that the change in the tax law was enacted, as required by the accounting guidance for income taxes.

While this charge will not have a cash impact in 2010, the \$85 million represents the loss of future tax benefits beginning in 2013. The Company estimates a negative cash impact of approximately \$4 million aftertax in 2013, with the remainder realized over the many future years that these retiree prescription drug costs are expected to be paid.

PPG is evaluating this complex legislation and the impacts it will have on the Company in addition to the increased tax cost associated with this change in U.S. tax law. The Company will also consider potential actions it could take to ensure that the Company's health care costs do not increase significantly as a result of this legislation.

Table of Contents

New Accounting Standards

See Note 2, *Newly Adopted Accounting Standards*, to the accompanying condensed consolidated financial statements for further details of recently adopted accounting pronouncements.

Commitments and Contingent Liabilities, including Environmental Matters

PPG is involved in a number of lawsuits and claims, both actual and potential, including some that it has asserted against others, in which substantial monetary damages are sought. See Part II, Item 1, *Legal Proceedings* of this Form 10-Q and Note 20, *Commitments and Contingent Liabilities*, to the accompanying condensed consolidated financial statements for a description of certain of these lawsuits, including a description of the proposed asbestos settlement. As discussed in Part II, Item 1 and Note 20, although the result of any future litigation of such lawsuits and claims is inherently unpredictable, management believes that, in the aggregate, the outcome of all lawsuits and claims involving PPG, including asbestos-related claims in the event the PPG Settlement Arrangement described in Note 20 does not become effective, will not have a material effect on PPG's consolidated financial position or liquidity; however, any such outcome may be material to the results of operations of any particular period in which costs, if any, are recognized.

It is PPG's policy to accrue expenses for environmental contingencies when it is probable that a liability has been incurred and the amount of loss can be reasonably estimated. Reserves for environmental contingencies are exclusive of claims against third parties and are generally not discounted. In management's opinion, the Company operates in an environmentally sound manner and the outcome of the Company's environmental contingencies will not have a material effect on PPG's financial position or liquidity; however, any such outcome may be material to the results of operations of any particular period in which costs, if any, are recognized. Management anticipates that the resolution of the Company's environmental contingencies will occur over an extended period of time.

As of September 30, 2010 and December 31, 2009, PPG had reserves for environmental contingencies totaling \$282 million and \$287 million, respectively, of which \$64 million and \$59 million, respectively, were classified as current liabilities. Pretax charges against income for environmental remediation costs totaled \$7 million and \$19 million, respectively, for the three and nine months ended September 30, 2010, and \$4 million and \$9 million, respectively, for the three and nine months ended September 30, 2009, and are included in *Other charges* in the accompanying condensed consolidated statement of income. Cash outlays related to such environmental remediation aggregated \$11 million and \$23 million, respectively, for the three and nine months ended September 30, 2010, and \$7 million and \$19 million, respectively, for the three and nine months ended September 30, 2009. The impact of foreign currency translation decreased the liability by \$1 million in the first nine months of 2010.

In addition to the amounts currently reserved for environmental remediation, the Company may be subject to loss contingencies related to environmental matters estimated to be as much as \$200 million to \$300 million, which range is unchanged since December 31, 2009. Such unreserved losses are reasonably possible but are not currently considered to be probable of occurrence. This range of reasonably possible unreserved loss relates to environmental matters at a number of sites; however, about 50% of this range relates to additional costs at the former chromium manufacturing plant site and related sites in Jersey City, N.J., and about 30% relates to the Calcasieu River Estuary and the three operating PPG plant sites in the Company's chemicals businesses. The loss contingencies related to these sites include significant unresolved issues such as the nature and extent of contamination at these sites and the methods that may have to be employed to remediate them.

Table of Contents

Management expects cash outlays for environmental remediation costs to be approximately \$35 million in 2010 and to range from \$50 million to \$70 million annually through 2014. It is possible that technological, regulatory and enforcement developments, the results of environmental studies and other factors could alter the Company's expectations with respect to charges against income and future cash outlays. Specifically, the level of expected cash outlays is highly dependent upon activity related to the former chromium manufacturing plant site in New Jersey as discussed above.

Forward-Looking Statements

The Private Securities Litigation Reform Act of 1995 provides a safe harbor for forward-looking statements made by or on behalf of the Company. Management's Discussion and Analysis and other sections of this Quarterly Report contain forward-looking statements that reflect the Company's current views with respect to future events and financial performance.

You can identify forward-looking statements by the fact that they do not relate strictly to current or historic facts. Forward-looking statements are identified by the use of the words aim, believe, expect, anticipate, intend, estimate, project, outlook, forecast and other expressions that indicate future events and trends. Any forward-looking statement speaks only as of the date on which such statement is made, and the Company undertakes no obligation to update any forward looking statement, whether as a result of new information, future events or otherwise. You are advised, however, to consult any further disclosures we make on related subjects in our reports to the Securities and Exchange Commission. Also, note the following cautionary statements.

Many factors could cause actual results to differ materially from the Company's forward-looking statements. Such factors include global economic conditions, increasing price and product competition by foreign and domestic competitors, fluctuations in cost and availability of raw materials, the ability to maintain favorable supplier relationships and arrangements, the realization of anticipated cost savings from restructuring initiatives, difficulties in integrating acquired businesses and achieving expected synergies therefrom, economic and political conditions in international markets, the ability to penetrate existing, developing and emerging foreign and domestic markets, foreign exchange rates and fluctuations in such rates, the impact of future legislation, the impact of environmental regulations, unexpected business disruptions and the unpredictability of existing and possible future litigation, including litigation that could result if the proposed asbestos settlement does not become effective. However, it is not possible to predict or identify all such factors. Consequently, while the list of factors presented here and in the Company's Form 10-K for the year ended December 31, 2009 under the caption "Item 1A Risk Factors" are considered representative, no such list should be considered to be a complete statement of all potential risks and uncertainties. Unlisted factors may present significant additional obstacles to the realization of forward-looking statements.

Consequences of material differences in the results compared with those anticipated in the forward-looking statements could include, among other things, business disruption, operational problems, financial loss, legal liability to third parties, other factors set forth in "Item 1A Risk Factors" of the Company's Form 10-K for the year ended December 31, 2009 and similar risks, any of which could have a material adverse effect on the Company's consolidated financial condition, results of operations or liquidity.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk

With the exception of the change in the fair value of PPG's cross currency swaps, there were no material changes in the Company's exposure to market risk from December 31, 2009. As of September 30, 2010 and December 31, 2009, the aggregate fair value of these swaps was a liability of \$182 million and \$308 million, respectively. A 10% increase in the value of the euro to the U.S. dollar would have had an unfavorable effect on the fair value of these swap contracts and increased the liability by \$157 million and \$182 million at September 30, 2010 and December 31, 2009, respectively.

Item 4. Controls and Procedures

a. Evaluation of disclosure controls and procedures. Based on their evaluation as of the end of the period covered by this Form 10-Q, the Company's principal executive officer and principal financial officer have concluded that the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act")) are effective to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms and to ensure that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the Company's management, including its principal executive and principal financial officers, as appropriate, to allow timely decisions regarding required disclosure.

b. Changes in internal control. There were no changes in the Company's internal control over financial reporting that occurred during the Company's most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Table of Contents

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

PPG is involved in a number of lawsuits and claims, both actual and potential, including some that it has asserted against others, in which substantial monetary damages are sought. These lawsuits and claims, the most significant of which are described below, relate to contract, patent, environmental, product liability, antitrust and other matters arising out of the conduct of PPG's current and past business activities. To the extent that these lawsuits and claims involve personal injury and property damage, PPG believes it has adequate insurance; however, certain of PPG's insurers are contesting coverage with respect to some of these claims, and other insurers, as they had prior to the asbestos settlement described below, may contest coverage with respect to some of the asbestos claims if the settlement is not implemented. PPG's lawsuits and claims against others include claims against insurers and other third parties with respect to actual and contingent losses related to environmental, asbestos and other matters.

The result of any future litigation of such lawsuits and claims is inherently unpredictable. However, management believes that, in the aggregate, the outcome of all lawsuits and claims involving PPG, including asbestos-related claims in the event the settlement described below does not become effective, will not have a material effect on PPG's consolidated financial position or liquidity; however, such outcome may be material to the results of operations of any particular period in which costs, if any, are recognized.

For over 30 years, PPG has been a defendant in lawsuits involving claims alleging personal injury from exposure to asbestos. For a description of asbestos litigation affecting the Company and the terms and status of the proposed asbestos settlement arrangement, see Note 20, Commitments and Contingent Liabilities to the accompanying condensed consolidated financial statements under Part I, Item 1 of this Form 10-Q.

As described in Note 20, the Company continues to cooperate with the U.S. Department of Commerce's Bureau of Industry and Security and with the U.S. Department of Justice in connection with their ongoing investigation relating to potential violations of the U.S. export control laws. At this time, the Company is unable to determine the outcome of the government's investigation or its possible effect on the Company.

Over the past several years, the Company and others have been named as defendants in several cases in various jurisdictions claiming damages related to exposure to lead and remediation of lead-based coatings applications. PPG has been dismissed as a defendant from most of these lawsuits and has never been found liable in any of these cases.

A Notice of Intent (NOI) to file a Citizen Suit under the federal Clean Water Act has been received by PPG from the West Virginia Rivers Coalition and Oceana. The NOI alleges that PPG exceeded permitted discharge limits at its Natrium, West Virginia plant. The West Virginia Department of Environmental Protection filed suit in State Court for the permit exceedances covered by the NOI and informed PPG that it intended to seek a civil penalty. Prior to the expiration of the 60-day notice period, a lawsuit was filed in state court by the West Virginia Department of Environmental Protection (WVDEP) for the same alleged violations described in the Citizen Suit NOI, blocking the Citizen Suit for the time being. Following extensive negotiations with WVDEP, PPG signed a Consent Order on June 10, 2010 to resolve the lawsuit initiated by the agency, which was entered by the court on August 18, 2010. The settlement calls for the payment of a cash civil penalty of \$1.02 million in four installments and a commitment to spend an additional \$350,000 for supplemental environmental projects. PPG will also be required to complete certain facility improvements designed to ensure the facility's compliance with the mercury limits in its water discharge permit by July 2011, which are designed to achieve compliance with the facility's water discharge permit. The Company has completed a pilot study to evaluate several wastewater treatment technologies for this purpose. Preliminary engineering design is underway for a treatment system which is currently projected to cost between \$4 million and \$6 million. The Company has accrued a reserve of \$5.3 million at September 30, 2010 related to this matter.

Table of Contents

PPG received a Consolidated Compliance Order and Notice of Proposed Penalty (CO/NOPP) from the Louisiana Department of Environmental Quality (DEQ) in February 2006 alleging violation of various requirements of its Lake Charles, La. facility s air permit based largely upon permit deviations self-reported by PPG. The CO/NOPP did not contain a proposed civil penalty. PPG filed a request for hearing and has engaged DEQ in settlement discussions. Since 2006, PPG has held discussions with DEQ to try to resolve the CO/NOPP. In April 2009, PPG offered to settle all of its self-reported air permit deviations through the first half of 2008 for a proposed penalty of \$130,000. DEQ responded to this settlement offer by asking PPG to make another offer that includes all potential violations through the end of 2009. PPG has increased its offer to settle this matter to \$171,000.

Item 1A. Risk Factors

There were no material changes in the Company s risk factors from the risks disclosed in the Company s Form 10-K for the year ended December 31, 2009.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Directors who are not also Officers of the Company receive common stock equivalents pursuant to the PPG Industries, Inc. Deferred Compensation Plan for Directors (PPG Deferred Compensation Plan for Directors). Common stock equivalents are hypothetical shares of common stock having a value on any given date equal to the value of a share of common stock. Common stock equivalents earn dividend equivalents that are converted into additional common stock equivalents but carry no voting rights or other rights afforded to a holder of common stock. The common stock equivalents credited to directors under both plans are exempt from registration under Section 4(2) of the Securities Act of 1933 as private offerings made only to directors of the Company in accordance with the provisions of the plans.

Under the PPG Deferred Compensation Plan for Directors, each director may elect to defer the receipt of all or any portion of the compensation paid to such director for serving as a PPG director. All deferred payments are held in the form of common stock equivalents. Payments out of the deferred accounts are made in the form of common stock of the Company (and cash as to any fractional common stock equivalent). In the third quarter of 2010, the directors, as a group, were credited with 2,268 common stock equivalents under this plan. The value of each common stock equivalent, when credited, ranged from \$61.05 to \$70.77.

Table of Contents**Issuer Purchases of Equity Securities**

The following table summarizes the Company's stock repurchase activity for the three months ended September 30, 2010:

Month	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Programs ⁽¹⁾	Maximum Number of Shares That May Yet Be Purchased Under the Programs
July 2010				
Repurchase program	254,798	\$ 68.68	254,798	5,498,646
Other transactions ⁽²⁾	1,850	66.80		
August 2010				
Repurchase program	654,455	66.93	654,455	4,844,191
Other transactions ⁽²⁾	1,523	67.05		
September 2010				
Repurchase program ⁽³⁾	1,721,465	62.74	1,721,465	3,122,726
Other transactions ⁽²⁾	8,842	69.98		
Total quarter ended September 30, 2010				
Repurchase program ⁽⁴⁾	2,630,718	\$ 64.36	2,630,718	3,122,726
Other transactions ⁽²⁾	12,215	\$ 69.44		

- (1) Shares may be repurchased under a 10 million share repurchase program approved by PPG's Board of Directors in October 2005 as well as an additional 5 million share repurchase program approved in December 2009. These programs do not have an expiration date.
- (2) Includes shares withheld or certified to in satisfaction of the exercise price and/or tax withholding obligation by holders of employee stock options who exercised options granted under the Company's equity compensation plans.
- (3) In September 2010, PPG settled its agreement with a counterparty under which the counterparty purchased 1,111,300 shares of PPG stock at an average price of \$57.87 per share. These amounts are included in the September activity reported in the table above.
- (4) In October 2010, PPG's Board of Directors approved an additional 10 million share repurchase program, which shares are not included in the maximum number of shares that could be repurchased at September 30, 2010 presented in the table above. This program does not have an expiration date and was effective immediately.
