PART I

Item 1. BUSINESS

General

Founded in 1938 in Portland, Oregon, as a small, family-owned, regional hat distributor and incorporated in 1961, Columbia Sportswear Company has grown to become a global leader in the design, sourcing, marketing and distribution of active outdoor apparel, footwear, accessories and equipment. Unless the context indicates otherwise, the terms we, us, our, the Company and Columbia refer to Columbia Sportswear Company and its consolidated subsidiaries.

We design, develop, market and distribute active outdoor apparel, footwear, accessories and equipment under four primary brands: Columbia®, Mountain Hardwear®, Sorel® and Montrail®. As one of the largest outdoor apparel and footwear companies in the world, our products have earned an international reputation for innovation, quality and performance. Our products feature innovative technologies and designs that protect outdoor enthusiasts from the elements, increase comfort and make outdoor activities more enjoyable. Our brands complement each other to address the diverse outdoor performance needs of a wide variety of outdoor consumer segments.

Our brands are distributed through a mix of wholesale distribution channels, independent distributors, our own direct-to-consumer channels (retail stores and e-commerce) and licensees. In 2010, our products were sold in over 100 countries. We employ creative marketing strategies designed to increase demand and reinforce consumer awareness of our brands. All of our products are manufactured by independent factories located outside the United States.

The popularity of outdoor activities, changing design trends and consumer adoption of innovative performance technologies affect consumer demand for our products. Therefore, we seek to influence, anticipate and respond to trends and shifts in consumer preferences by adjusting the mix of available product offerings, developing new products with innovative performance features and designs, and by creating persuasive and memorable marketing communications to drive consumer awareness and demand. Failure to anticipate or respond to consumer needs and preferences in a timely and adequate manner could have a material adverse effect on our sales and profitability.

Our business is subject to many risks and uncertainties that may have a material adverse effect on our financial condition, results of operations or cash flows. Some of these risks and uncertainties are described below under Item 1A, Risk Factors.

Seasonality and Variability of Business

Our business is affected by general seasonal trends common to the outdoor, apparel, footwear, accessories and equipment industries and is heavily dependent upon discretionary consumer spending patterns. Our products are designed to address performance needs of consumers who participate in diverse outdoor activities during the spring/summer and fall/winter seasons. Our annual net sales are weighted more heavily toward the fall/winter season, while our operating expenses are more equally distributed throughout the year. As a result, the majority of our operating profits are generated in the second half of the year. Sales and profits tend to be highest in the third calendar quarter. The expansion of our direct-to-consumer operations beginning in 2008 has increased the proportion of sales and profits that we generate in the fourth calendar

quarter.

Results of operations in any period should not be considered indicative of the results to be expected for any future period, particularly in light of persistent volatility in general economic conditions. Sales of our products are subject to substantial cyclical fluctuation, the effects of unseasonable weather conditions, and the continued popularity of outdoor activities as part of an active lifestyle in key markets. The current economic environment in

Table of Contents

key markets, coupled with challenging supply chain capacity constraints, has reduced the predictability of our business. In addition, our fourth quarter results are more variable because they rely more heavily on fall weather patterns which can stimulate wholesale customer reorders or, conversely, result in cancellations.

For further discussion regarding the effects of the macro-economic environment on our business, see Part II, Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations.

Products

We provide high quality apparel, footwear, accessories and equipment for use in a wide range of outdoor activities by men, women and youth, designed to keep the consumer warm or cool, dry and protected. A large percentage of our products are also worn for casual or leisure purposes. The durability, functionality and affordability of our products make them ideal for a wide range of outdoor activities. Our products serve a broad range of consumers including elite mountain climbers, winter outdoor enthusiasts, hunting and fishing enthusiasts, top endurance trail runners, and outdoor-inspired consumers. We also market licensed collegiate apparel and accessories under our Columbia brand.

We develop and manage our merchandise in four principal categories: (1) outerwear, (2) sportswear, (3) footwear and (4) accessories and equipment. The following table presents the net sales and approximate percentages of net sales attributable to each of our principal product categories for each of the last three years ended December 31 (dollars in millions):

	2010		2009		2008	
	Net Sales	% of Sales	Net Sales	% of Sales	Net Sales	% of Sales
Outerwear	\$ 560.8	37.8%	\$ 482.5	38.8%	\$ 491.7	37.3%
Sportswear	555.8	37.5	472.5	38.0	540.9	41.0
Footwear	270.2	18.2	214.6	17.2	217.2	16.5
Accessories and equipment	96.7	6.5	74.4	6.0	68.0	5.2
Total	\$ 1,483.5	100.0%	\$ 1,244.0	100.0%	\$ 1,317.8	100.0%

Outerwear

We design, develop, market and distribute outerwear products for men, women and youth under our Columbia and Mountain Hardwear brands. Outerwear is our most established and iconic product category, and incorporates the cumulative design, fabrication, fit and construction technologies that we have pioneered over several decades and that we continue to innovate. Our outerwear is designed to protect the wearer from the harsher inclement weather commonly encountered in fall and winter outdoor activities, such as skiing, snowboarding, hiking, hunting, fishing and adventure travel.

Sportswear

Edgar Filing: COLUMBIA SPORTSWEAR CO - Form 10-K

We design, develop, market and distribute sportswear products for men, women and youth under our Columbia and Mountain Hardwear brands. Our sportswear products incorporate various fabrication and construction technologies that protect consumers from the outdoor elements and enable consumers to enjoy the outdoors longer and in greater comfort year round. Our sportswear products are designed to be worn as a layering system with our outerwear and footwear products during fall and winter outdoor activities, or individually during milder weather commonly encountered during spring and summer outdoor activities such as hiking, fishing, trail running and water sports. Mountain Hardwear-branded sportswear consists primarily of performance apparel designed for mountaineering, backpacking, rock climbing and adventure sports. Our Columbia and Mountain Hardwear sportswear product assortments also include casual styles designed to appeal to a broader consumer base.

Table of Contents

Footwear

We design, develop, market and distribute footwear products for men and women under our Columbia, Sorel and Montrail brands and for youth under our Columbia and Sorel brands. Our footwear products seek to address the needs of outdoor consumers who participate in activities that typically involve challenging or unusual terrain in a variety of weather and trail conditions. Our footwear products include durable, lightweight hiking boots, trail running shoes, rugged cold weather boots for activities on snow and ice, sandals for use in amphibious activities, and casual shoes for everyday use. Our Sorel brand primarily offers premium cold weather footwear for men and women with an increasing focus on young, fashion-conscious female consumers.

Accessories and Equipment

We design, develop, market and distribute a line of Columbia-branded accessories and equipment, including bags, packs, headwear, scarves and gloves. These products incorporate many of our performance technologies and complement our apparel and footwear collections to protect consumers during a multitude of outdoor activities in virtually any climate. We also design, develop, market and distribute a line of Mountain Hardwear accessories and equipment that includes technically-advanced tents, sleeping systems, backpacks, headwear and gloves. These products are designed for mountaineering, ultralight backpacking and camping.

Product Design and Innovation

We believe our product innovation efforts are a key factor in our past and future success. We are committed to designing innovative and functional products for consumers who participate in a wide range of competitive and recreational outdoor activities, enabling them to enjoy those activities longer and in greater comfort by keeping them warm or cool, dry and protected. We also place significant value on product designs and fit (the overall appearance and image of our products) that, along with technical performance features, distinguish our products in the marketplace.

Our research and development efforts are led by an internal team of specialists who work closely with independent suppliers to develop products that provide the unique performance benefits needed by consumers during outdoor activities. We have established working relationships with specialists in the fields of chemistry, biochemistry, engineering, industrial design, materials research, graphic design, electronics and related fields. We utilize these relationships, along with consumer feedback, to develop and test innovative performance products, processes, packaging and displays. We believe that these efforts, coupled with our technical innovation efforts, represent key factors in the past and future success of our products.

In September 2010, we acquired OutDry Technologies S.r.l., which owns the intellectual property and other assets comprising the OutDry® brand and related business including patented and patent-pending construction methods that bond a waterproof, breathable membrane directly to the inside of the outermost layer of a shoe or glove.

Intellectual Property

Edgar Filing: COLUMBIA SPORTSWEAR CO - Form 10-K

We own many trademarks, including Columbia Sportswear Company®, Columbia®, Sorel®, Mountain Hard Wear®, Montrail®, OutDry®, Pacific Trail®, the Columbia diamond shaped logo, the Mountain Hardwear nut logo and the Sorel polar bear logo, as well as many other trademarks relating to our brands, products, styles and technologies. We believe that our trademarks are an important factor in creating a market for our products, in identifying the Company, and in differentiating our products from competitors' products. We have design, process and utility patents as well as pending patent applications in the United States and other nations. We file applications for United States and foreign patents for inventions, designs and improvements that we believe have commercial value; however, these patents may or may not ultimately be issued. We believe our success primarily depends on our ability to continue offering innovative solutions to consumer needs through design, research,

Table of Contents

development and production advancements rather than our ability to secure patents. The technologies, processes and designs described in issued patents are incorporated into many of our most important products and expire at various times. We vigorously protect these proprietary rights against counterfeit reproductions and other infringing activities. Additionally, we license our Columbia trademarks across a range of apparel, footwear, accessories and equipment.

Sales and Distribution

We sell our products through a mix of wholesale distribution channels, independent distributors, our own direct-to-consumer channels and licensees. The majority of our sales are generated through wholesale channels which include small, independently operated specialty outdoor and sporting goods stores, regional, national and international sporting goods chains, and large regional, national and international department store chains. We sell our products to independent distributors in various countries where we generally do not have direct sales operations.

We sell our products directly to consumers through our own network of branded and outlet retail stores in each of our geographic segments, and online operations in the United States and LAAP segments, with additional e-commerce sites in other geographic markets planned for 2011. Our direct-to-consumer operations are designed to elevate consumer perception of our brands, increase consumer and retailer awareness of and demand for our products, model compelling retail environments for our products and build stronger emotional brand connections with consumers over time. Our branded retail stores allow us to showcase a broad selection of products and to support the brand's positioning with fixtures and imagery that may then be replicated and offered for use by our wholesale customers. These stores provide high visibility for our brands and products and help us to monitor the needs and preferences of consumers. In addition, we operate outlet stores, which serve an important role in our overall inventory management by allowing us to sell a significant portion of excess, discontinued and out-of-season products while maintaining the integrity of our brands. E-commerce sales are a small but growing portion of our total direct-to-consumer sales.

We operate in four geographic segments: (1) United States, (2) Latin America and Asia Pacific (LAAP), (3) Europe, Middle East and Africa (EMEA), and (4) Canada, which are reflective of our internal organization, management, and oversight structure. Each geographic segment operates predominantly in one industry: the design, development, marketing and distribution of active outdoor apparel, including outerwear, sportswear, footwear and accessories and equipment. The following table presents net sales to unrelated entities and approximate percentages of net sales by geographic segment for each of the last three years (dollars in millions):

	2010		2009		2008	
	Net Sales	% of Sales	Net Sales	% of Sales	Net Sales	% of Sales
United States	\$ 881.0	59.4%	\$ 736.9	59.2%	\$ 727.7	55.2%
LAAP	263.4	17.7	203.2	16.3	198.2	15.0
EMEA	222.4	15.0	197.4	15.9	267.2	20.3
Canada	116.7	7.9	106.5	8.6	124.7	9.5
Total	\$ 1,483.5	100.0%	\$ 1,244.0	100.0%	\$ 1,317.8	100.0%

United States

The United States accounted for 59.4% of our net sales for 2010. We sell our products in the United States to approximately 3,500 wholesale customers and through our own direct-to-consumer channels. As of December 31, 2010, we operated 41 outlet retail stores and 8 branded retail stores in various locations in the United States as well as three e-commerce websites, www.columbia.com, www.mountainhardwear.com and

Edgar Filing: COLUMBIA SPORTSWEAR CO - Form 10-K

www.sorel.com. We plan to begin selling our Montrail products online in the United States in early 2011. In addition, we earn licensing income in the United States based on our licensees' sale of licensed products.

Table of Contents

We distribute the majority of our products sold to United States wholesale customers and our own retail stores from distribution centers that we own and operate in Portland, Oregon and Robards, Kentucky. In some instances, we arrange to have products shipped from the independent factories that manufacture our products through third party logistics vendors and/or directly to customer-designated facilities in the United States.

LAAP

The LAAP region accounted for 17.7% of our net sales for 2010. We sell our products in the LAAP region to approximately 270 wholesale customers in Japan and Korea and to approximately 14 independent distributors that sell to approximately 1,100 wholesale customers in locations throughout the LAAP region, including Australia, New Zealand, Latin America and Asia. In addition, as of December 31, 2010, we operated 40 branded retail stores and 13 outlet retail stores in Japan and Korea within our LAAP region. We also sell Columbia, Mountain Hardwear, Sorel and Montrail products through e-commerce websites in Japan and Korea. In addition, we earn licensing income in our LAAP region based on our distributors' sale of licensed products.

We distribute our products to wholesale customers, our own retail stores and licensed stores in Japan through an independent logistics company that owns and operates a warehouse located near Tokyo, Japan. We distribute our products to wholesale customers, our own retail stores and licensed stores in Korea from a leased warehouse near Seoul, Korea. The majority of sales to our LAAP distributors are shipped directly from the independent factories that manufacture our products.

EMEA

Sales in our EMEA region accounted for 15.0% of our net sales for 2010. We sell our products in the EMEA region to approximately 4,700 wholesale customers and to approximately 13 independent distributors that sell to approximately 800 wholesale customers in locations throughout the EMEA region, including Russia, portions of Europe, the Middle East and Africa. In addition, as of December 31, 2010, we operated 7 outlet retail stores and 3 branded retail stores in various locations in Western Europe.

We distribute the majority of our products sold to EMEA wholesale customers and our own retail stores from a distribution center that we own and operate in Cambrai, France. The majority of sales to our EMEA distributors are shipped directly from the independent factories that manufacture our products.

Canada

Sales in Canada accounted for 7.9% of our net sales for 2010. We sell our products in Canada to approximately 1,300 wholesale customers. In addition, as of December 31, 2010, we operated two outlet retail stores in Canada.

We distribute the majority of our products sold to Canadian wholesale customers through two distribution centers in Strathroy, Ontario. We lease one of these facilities and own the other facility. In some instances, we arrange to have products shipped directly from the independent

factories that manufacture our products to customer-designated facilities in Canada.

Marketing

We believe our brand names and trademarks provide a competitive advantage and help to differentiate our products in the marketplace. Marketing programs are an integral part of our global strategy to build brand equity, raise global brand relevance and awareness, infuse our brands with excitement and stimulate consumer demand for our products worldwide. During 2010, the cost of our marketing programs represented approximately 5.3% of net sales.

Table of Contents

Our integrated marketing efforts are designed to deliver consistent messages about the performance benefits, innovative technologies and styling of our products. We rely most heavily on advertising distributed through the Internet, including e-commerce and social media sites; television and print publications; consumer-focused and customer-focused events; branded retail stores in selected high-profile locations; enhanced branded displays and merchandising techniques executed in stores in partnership with various wholesale customers; and consumer and trade public relations efforts.

We work closely with our key wholesale customers to reinforce our brand message through cooperative online, television, radio and print advertising campaigns, as well as in stores using visual merchandising display tools dedicated exclusively to selling our merchandise on a year-round basis. We drive alignment through established seasonal initiatives and provide our wholesale customers, regional offices, and international distributors with creative direction and materials to convey consistent messages.

We employ a staff of in-store marketing and merchandising coordinators, who visit our customers' retail locations in major cities around the world to ensure that our products are favorably presented. We also reinforce our marketing and product innovation messages through selected sponsorships of key outdoor influencers, organizations and teams who serve as inspirational models of excellence to consumers and also through sponsorship of selected outdoor events and competitions.

Our global internet marketing sites are used by consumers to research our products' features and benefits, to interact with content created to inform and entertain about each brand and its technologies, to be directed to nearby retailers where they can purchase our products, and to directly purchase products for delivery in the United States. Other unaffiliated consumer websites provide information about our brands and products and may direct consumers to our wholesale customers where they can purchase our products.

Working Capital Utilization

We design, develop, market and distribute our products, but do not own or operate manufacturing facilities. As a result, most of our capital is invested in short-term working capital assets, including cash and cash equivalents, short-term investments, accounts receivable from customers, and finished goods inventory. At December 31, 2010, working capital assets accounted for approximately 77% of total assets. As a result, the degree to which we efficiently utilize our working capital assets can have a significant impact on our profitability, cash flows and return on invested capital. The overall goals of our working capital management efforts are to maintain the minimum level of inventory necessary to deliver goods on time to our customers to satisfy end consumer demand, and to minimize the cycle time from the purchase of inventory from our suppliers to the collection of accounts receivable balances from our customers.

Demand Planning and Inventory Management

As a branded consumer products company, inventory represents one of the largest and riskiest capital commitments in our business model. We design and develop our seasonal product lines 12 to 18 months in advance of their availability to consumers in retail stores. As a result, our ability to forecast and produce the individual product styles that match ultimate seasonal wholesale customer and end-consumer demand and to deliver products to our customers in a timely and cost-effective manner can significantly affect our sales, gross margins and profitability. For this reason, we maintain and continue to make substantial investments in information systems, processes and personnel that support our ongoing demand planning efforts. The goals of our demand planning efforts are to develop a collaborative forecast that drives the timely purchase of an adequate amount of inventory to satisfy demand, to minimize transportation and expediting costs necessary to deliver products to customers by their requested delivery dates, and to minimize excess inventory to avoid liquidating excess, end-of-season goods at discounted prices. Failure to achieve our demand planning goals could reduce our revenues and/or increase our costs, which would negatively impact our gross margins,

profitability and brand strength.

Table of Contents

In order to manage inventory risk, we use incentive discounts to encourage our wholesale customers and distributors to place advance orders at least six months in advance of scheduled delivery. We use those advance orders, together with forecasted demand from our direct-to-consumer operations, market trends, historical data, customer and sales feedback and other important factors to estimate the volumes of each product to purchase from our suppliers around the world. From the time of initial order through production, receipt and delivery, we attempt to manage our inventory to reduce risk.

Our inventory management efforts cannot entirely eliminate inventory risk due to the inherently unpredictable nature of consumer demand, the ability of customers to cancel their orders prior to shipment, and other variables that affect our customers' ability to take delivery of their advance orders when originally scheduled. To minimize our purchasing costs, the time necessary to fill customer orders and the risk of non-delivery, we place a significant amount of orders for our products with independent factories prior to receiving all of our customers' orders and we maintain an inventory of select products that we anticipate will be in greater demand. In addition, we build calculated amounts of inventory to support estimated at-once orders from customers and auto-replenishment orders on certain long-lived styles.

Credit and Collection

We extend credit to our customers based on an assessment of each customer's financial condition, generally without requiring collateral. To assist us in scheduling production with our suppliers and delivering seasonal products to our customers on time, we offer customers discounts for placing advance orders and extended payment terms for taking delivery before peak seasonal shipping periods. These extended payment terms increase our exposure to the risk of uncollectible receivables. In order to manage the inherent risks of customer receivables, we maintain and continue to invest in information systems, processes and personnel skilled in credit and collections. In some markets and with some customers we use credit insurance or standby letters of credit to minimize our risk of credit loss.

Sourcing and Manufacturing

We do not own or operate manufacturing facilities and virtually all of our products are manufactured to our specifications by independent factories located outside the United States. We generally do not maintain long-term manufacturing commitments. We believe that the use of independent factories enables us to substantially limit our capital expenditures and avoid the costs and risks associated with owning and operating large production facilities and managing large labor forces. We also believe that the use of independent factories greatly increases our production capacity, maximizes our flexibility and improves our product pricing. We manage our supply chain from a global perspective and adjust as needed to changes in the global production environment, including political risks, factory capacity, import limitations and costs, raw material costs, availability and cost of labor and transportation costs. However, without long-term or reserved commitments, there is no assurance that we will be able to secure adequate or timely production capacity or favorable pricing terms.

Our apparel is manufactured in more than 13 countries with Vietnam and China accounting for approximately 68% of our 2010 apparel production. Our footwear is manufactured in three countries, with China and Vietnam accounting for approximately 93% of our 2010 footwear production.

Our five largest apparel factory groups accounted for approximately 20% of 2010 global apparel production, with the largest factory group accounting for 7% of 2010 global apparel production. Our five largest footwear factory groups accounted for approximately 81% of 2010 global footwear production, with the largest factory group accounting for 34% of 2010 global footwear production. In addition, a single vendor supplies substantially all of the zippers used in our products. These apparel, footwear and zipper suppliers have multiple factory locations, thus reducing the risk that unfavorable conditions at a single factory or location will have a material adverse effect on our business.

Table of Contents

We maintain 13 manufacturing liaison offices in a total of seven Asian countries. We also maintain a manufacturing liaison office in Richmond, California. Personnel in these manufacturing liaison offices are direct employees of Columbia, and are responsible for overseeing production at our independent factories. We believe that having employees physically located in these regions enhances our ability to monitor factories for compliance with our policies, procedures and standards related to quality, delivery, pricing and labor practices. Our quality assurance process is designed to ensure that our products meet our quality standards. We believe that our quality assurance process is an important and effective means of maintaining the quality and reputation of our products. In addition, independent contractors that manufacture products for us are subject to our Standards of Manufacturing Practices (SMP). Columbia manufactures products around the world and values legal, ethical and fair treatment of people involved in manufacturing our products. Each factory producing products for us is monitored regularly against these standards. Additional information about SMP and corporate responsibility programs may be found at www.columbia.com.

Backlog

We typically receive the majority of our advance orders from our wholesale customers and independent distributors for the fall and spring seasons by March 31 and September 30, respectively, based upon customer ordering deadlines that we establish. As a result, our order backlog at each of March 31 and September 30 has historically been a meaningful indicator of anticipated sales to wholesale customers and independent distributors for the corresponding future period. Accordingly, we disclose our backlog at March 31 and at September 30 in our Quarterly Reports on Form 10-Q for those respective periods, rather than at December 31. Generally, orders are subject to cancellation prior to the date of shipment.

Advance orders for our owned retail stores and e-commerce websites are not included in backlog. Accordingly, to the extent that order cancellations from wholesale customers and independent distributors deviates from historical averages, and our retail and e-commerce sales grow to represent a larger proportion of our total sales, our advance order backlog may become less indicative of anticipated sales for corresponding future periods.

Competition

The markets for outerwear, sportswear, footwear, accessories and equipment are highly competitive. In each of our geographic markets, we face significant competition from numerous and varying competitors. Some of our large wholesale customers also market competitive apparel, footwear, accessories and equipment under their own private labels. Our licensees operate in very competitive markets, such as those for apparel, footwear, sunglasses and watches. In addition, our direct-to-consumer channels expose us to competitors who operate retail stores in outlet malls and key metropolitan markets, as well as competitors who sell product online. We believe that the primary competitive factors in the market for active outerwear, sportswear, footwear, accessories and equipment are brand strength, product innovation, product design, functionality, durability and price.

Government Regulation

Many of our international shipments are subject to existing or potential governmental tariff and non-tariff barriers to trade, such as import duties and potential safeguard measures that may limit the quantity of various types of goods that may be imported into the United States and other countries. These trade barriers often represent a material portion of the cost of the merchandise. Our products are also subject to domestic and foreign product safety and environmental standards, laws and other regulations, which are increasingly restrictive and complex. Although we diligently monitor these standards and restrictions, the United States or other countries may impose new or adjusted quotas, duties, safety requirements, material restrictions, or other restrictions or regulations, any of which could have a material adverse effect on our financial

condition, results of operations or cash flows.

Table of Contents**Employees**

At December 31, 2010, we had the following full-time equivalent employees, based in the following regions:

United States	2,096
Asia	970
Europe	397
Canada	163
	3,626

We file with the Securities and Exchange Commission (SEC) our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and all amendments to those reports, proxy statements and registration statements. You may read and copy any material we file with the SEC at the SEC's Public Reference Room at 100 F Street, NE, Washington, D.C. 20549. You may also obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. In addition, the SEC maintains an internet site at <http://www.sec.gov> that contains reports, proxy and information statements, and other information regarding issuers, including us, that file electronically. We make available free of charge on or through our website at www.columbia.com our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to these reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act as soon as reasonably practicable after we file these materials with the SEC.

Item 1A. RISK FACTORS

In addition to the other information contained in this Form 10-K, the following risk factors should be considered carefully in evaluating our business. Our business, financial condition, results of operations or cash flows may be materially adversely affected by any of these risks. Please note that additional risks not presently known to us or that we currently deem immaterial may also impair our business and operations.

Our Success Depends on Our Business Strategies

Our business strategies are to achieve sustainable, profitable growth by creating innovative products, elevating consumer perception of our brands, increasing consumer and retailer awareness and demand for our products, creating compelling retail environments, and building stronger emotional brand connections with consumers over time. We intend to pursue these strategies across our portfolio of brands, product categories and geographic markets. We face many challenges in implementing our business strategies. For example, our focus on innovation depends on our ongoing ability to identify, develop or secure rights to product improvements or developments through internal research, joint developments, acquisitions or licenses. However, these innovations and developments may not be profitable or have the desired effect of increasing demand for our products. The failure to implement our business strategies successfully could have a material adverse effect on our financial condition, results of operations or cash flows.

Edgar Filing: COLUMBIA SPORTSWEAR CO - Form 10-K

To implement our business strategies, we must continue to modify various aspects of our business, to maintain and enhance our information systems and operations to respond to increased demand and to attract, retain and manage qualified personnel. Changes in our business may place an increasing strain on management, financial, product design, marketing, distribution and other resources, and we may have operating difficulties as a result. For example, in support of our strategic initiatives, we are making significant investments in our business processes and information technology infrastructure that require significant management attention and corporate resources. In addition, we may need to adapt our information technology systems and business processes to

Table of Contents

integrate business acquisitions. These business initiatives involve many risks and uncertainties that, if not managed effectively, may have a material adverse effect on our financial condition, results of operations or cash flows.

Our business strategies and related increased expenditures could also cause our operating margin to decline if we are unable to offset our increased spending with increased sales or gross margins, or comparable reductions in other operating costs. If our sales or gross margins decline or fail to grow as planned and we fail to sufficiently leverage our operating expenses, our profitability will decline. This could result in a decision to delay, reduce, modify or terminate our strategic business initiatives, which could have a material adverse effect on our financial condition, results of operations or cash flows.

We Depend on Independent Factories

Our products are produced by independent factories worldwide. We do not own or operate any production facilities. Although we enter into purchase order commitments with these independent factories each season, we generally do not maintain long-term manufacturing commitments with them. Without long-term or reserve commitments, in a capacity-constrained environment, there is no assurance that we will be able to secure adequate or timely production capacity or favorable pricing if growth or product demand differs from our forecasts. Independent factories may fail to perform as expected or our competitors may obtain production capacities that effectively limit or eliminate the availability of these resources to us. If an independent manufacturer fails to ship orders in a timely manner or to meet our standards or if we are unable to obtain necessary capacities, we may miss delivery deadlines or incur additional costs, which may result in cancellation of orders, refusal to accept deliveries, a reduction in purchase prices or increased costs, any of which could have a material adverse effect on our financial condition, results of operations or cash flows.

Reliance on independent factories also creates quality control risks. In a capacity-constrained environment, we may need to use sub-contracted manufacturers to fulfill demand and these manufacturers may have less experience producing our products or lower overall capabilities, which could result in compromised quality of our products. A failure in our quality control program may result in diminished product quality, which in turn could result in increased order cancellations and returns, decreased consumer demand for our products, or product recalls (or other regulatory actions), any of which could have a material adverse effect on our financial condition, results of operations or cash flows.

If an independent manufacturer violates labor or other laws, or engages in practices that are not generally accepted as ethical in our key markets, we may be subject to production disruptions or significant negative publicity that could result in long-term damage to our brand images, consumer demand for our products may decrease, and in some circumstances parties may attempt to assert that we are liable for the independent manufacturer's practices, any of which could have a material adverse effect on our financial condition, results of operations or cash flows.

We May be Adversely Affected by Volatility in Global Production and Transportation Costs and Capacity

Our product costs are subject to substantial fluctuation based on:

Availability and quality of raw materials;

Edgar Filing: COLUMBIA SPORTSWEAR CO - Form 10-K

The prices of oil, cotton and other raw materials whose prices are determined by global commodity markets and can be very volatile;

Changes in labor markets and wage rates paid by our independent factory partners, which are often mandated by centralized governments in the countries where our products are manufactured, particularly in China and Vietnam;

Interest rates and currency exchange rates;

Table of Contents

Availability of skilled labor and production capacity at independent factories; and

General economic conditions.

Following a long period of generally stable-to-declining input costs, the apparel and footwear industry appears to be entering what may become a prolonged period of inflationary pressure on some or all of these input costs, resulting in increased costs to produce our products.

In addition, since the majority of our products are manufactured outside of our principal sales markets, our products must be transported by third parties over large geographical distances. Shortages in ocean freight capacity, airfreight capacity and volatile fuel costs can result in rapidly changing transportation costs. For example, during 2010, shortages of sourcing and transportation capacity, combined with later-than-optimal production of advance orders, caused us to rely more heavily on airfreight to achieve timely delivery to our customers, resulting in significantly higher freight costs. Because we price our products in advance and the external cost changes may be difficult to predict, we may not be able to pass all or a portion of such higher costs on to our customers or adjust our pricing structure in a timely manner in order to remain competitive, which could have a material adverse effect on our financial condition, results of operations or cash flows.

Our Sales and Profitability May be Adversely Affected by Increased Product Costs and

Reduced Selling Prices

The apparel industry is subject to significant pressures on pricing and input costs caused by many factors, including intense competition, constrained sourcing capacity and related inflationary pressures, consolidation in the retail industry, pressure from retailers to reduce the costs of products and changes in consumer demand. These factors may cause us to experience increased costs, reduce our sales prices to retailers and consumers or experience reduced sales in response to increased prices, any of which could cause our operating margin to decline if we are unable to offset these factors with reductions in operating costs and could have a material adverse effect on our financial condition, results of operations or cash flows.

Attracting superior retail channel partners and improving the sales productivity of our customers each depend on various factors, including the strength of our brand names, our ability to design and source innovative products, competitive conditions, the availability of desirable locations and the negotiation of terms with customers. Future terms with customers may be less favorable to us than those under which we now operate. Large wholesale customers in particular increasingly seek to transfer various costs of business to their vendors, such as the cost of lost profits from promotional activity and product price markdowns, which could cause our gross margins to decline if we are unable to offset price reductions with comparable reductions in operating costs.

We May be Adversely Affected by Volatile Economic Conditions

We are a consumer products company and are highly dependent on consumer discretionary spending patterns and the purchasing patterns of our wholesale customers as they attempt to match their seasonal purchase volumes to volatile consumer demand. In addition, as we have expanded our base of retail stores, we have increased our direct exposure to the risks associated with volatile and unpredictable consumer discretionary spending patterns. As global economic conditions continue to be volatile or economic uncertainty remains, trends in consumer discretionary spending also become unpredictable and subject to reductions due to uncertainties about the future and credit constraints. Consumer demand for our products may not reach our sales targets, or may decline, when there is an economic downturn or economic uncertainty in our key markets, particularly markets in North America and our EMEA region. Our sensitivity to economic cycles and any related fluctuation in consumer

demand may have a material adverse effect on our financial condition, results of operations or cash flows.

Table of Contents

We Rely on Our Highly Customized Information Management Systems

Our business is increasingly reliant on information technology. Information systems are used across our supply chain and retail operations, from design to distribution and sales, and are used as a method of communication among employees, with our subsidiaries and liaison offices overseas and with our customers and retail stores. We also rely on our information systems to allocate resources, manage product data, develop demand and supply plans and forecast operating results. System failures, breaches of confidential information or service interruptions may occur as the result of a number of factors, including computer viruses, programming errors, hacking or other unlawful activities by third parties and disasters, or our failure to properly maintain systems redundancy or to protect, repair, maintain or upgrade our systems. Any breach or interruption of critical business information systems could have a material adverse effect on our financial condition, results of operations or cash flows.

Our primary enterprise resource planning system is highly customized to our business. As a result, the availability of internal and external resources with the expertise to maintain our enterprise resource planning system is limited. As we implement our direct-to-consumer initiatives and plan for future growth, our customized enterprise resource planning system may inhibit our ability to operate efficiently, which could have an adverse effect on our results of operations. For example, our enterprise resource planning system may not be compatible with other systems to support desired functionality for our operations.

Initiatives to Upgrade Our Information Technology Infrastructure Involve Many Risks Which Could Result In, Among Other Things, Business Interruptions and Higher Costs

We regularly implement business process improvement initiatives to optimize our performance. Our current business process initiatives include, but are not limited to, plans to improve business results through standardization of business processes and technology that support our supply chain and go-to-market strategies through implementation of an integrated enterprise resource planning software solution by SAP over the next few years. We may experience difficulties when we transition to new or upgraded systems and processes, including loss of data and decreases in productivity as our personnel become familiar with new systems. In addition, transitioning to new or upgraded systems will require significant capital investments and personnel resources. Difficulties in implementing new or upgraded information systems or significant system failures could disrupt our operations and have a material adverse effect on our financial condition, results of operations or cash flows.

We expect implementation of this new information technology infrastructure to have a pervasive impact on our business processes and information systems across a significant portion of our operations, including our finance operations. As a result, we will experience significant changes in our internal controls over financial reporting as our implementation progresses. If we are unable to successfully implement this system, including harmonizing our systems, data and processes, our ability to process transactions accurately and efficiently may be affected, and any unsuccessful implementation could have an adverse effect on our capital resources, financial condition, results of operations and liquidity.

Our Results of Operations Could be Materially Harmed If We Are Unable to Accurately Match Supply Forecast with Consumer Demand for Our Products

Many factors may significantly affect demand for our products, including, among other things, economic conditions, fashion trends, consumer preferences and weather, making it difficult to accurately forecast demand for our products and our future results of operations. To minimize our purchasing costs, the time necessary to fill customer orders and the risk of non-delivery, we place a significant amount of orders for our products with independent factories prior to receiving all of our customers' orders, and we maintain an inventory of various products that we anticipate will be in greater demand. In addition, customers are generally allowed to cancel orders prior to shipment with sufficient notice.

Table of Contents

Factors that could affect our ability to accurately forecast demand for our products include:

An increase or decrease in consumer demand for our products or for products of our competitors;

For certain demand and supply planning functions, we rely on manual processes and judgment that are subject to human error;

Our failure to accurately forecast customer acceptance of new products;

New product introductions by competitors;

Unanticipated changes in general market conditions or other factors, which may result in cancellations of orders or a reduction or increase in the rate of reorders placed by retailers; and

Weak economic conditions or consumer confidence, which could reduce demand for discretionary items such as our products.

In some cases, our production orders may not match actual demand, which could result in our inability to deliver product in a timely manner, higher transportation costs to expedite delivery and higher inventory levels. During periods of weak economic conditions we may experience a significant increase in the volume of order cancellations by our customers, including cancellations resulting from the bankruptcy, liquidation or contraction of certain customers' operations. We may not be able to sell all of the products we have ordered from independent factories or that we have in our inventory. Inventory levels in excess of customer demand may result in inventory write-downs and the sale of excess inventory at discounted prices through discount direct-to-consumer channels, which could have a material adverse effect on our brand image, financial condition, results of operations or cash flows.

Conversely, if we underestimate demand for our products or if our independent factories are unable to supply products when we need them, we may experience inventory shortages. Inventory shortages may prevent us from fulfilling customer orders, delay shipments to customers, negatively affect customer relationships, result in increased costs to expedite production and delivery, and diminish our ability to build brand loyalty. Shipments delayed due to limited factory capacity or other factors could result in order cancellations by our customers, which could have a material adverse effect on our financial condition, results of operations or cash flows.

We May be Adversely Affected by Weather Conditions

Our business is adversely affected by unseasonable weather conditions. A significant portion of the sales of our products is dependent in part on the weather and may decline in years in which weather conditions do not favor the use of these products. Periods of unseasonably warm weather in the fall or winter or unseasonably cold or wet weather in the spring and summer may have a material adverse effect on our financial condition, results of operations or cash flows. Inventory accumulation by our wholesale customers resulting from unseasonable weather in one season may negatively affect orders in future seasons, which may have a material adverse effect on our financial condition, results of operations or cash flows.

Our International Operations Involve Many Risks

We are subject to the risks generally associated with doing business internationally. These risks include the effects of foreign laws and regulations, changes in consumer preferences, foreign currency fluctuations, political unrest, terrorist acts, military operations, disruptions or delays in shipments, disease outbreaks and changes in economic conditions in countries in which we manufacture or sell products. These factors, among others, may affect our ability to sell products in international markets, our ability to manufacture products or procure materials, and our cost of doing business. If any of these or other factors make the conduct of business in a particular country undesirable or impractical, our business may be materially and adversely affected. As we expand our operations in geographic scope and product categories, we anticipate intellectual property disputes

Table of Contents

will increase as well, making it more expensive and challenging to establish and protect our intellectual property rights and to defend against claims of infringement by others.

As a global company, we determine our income tax liability in various competing tax jurisdictions based on a careful analysis and interpretation of local tax laws and regulations. This analysis requires a significant amount of judgment and estimation and is often based on various assumptions about the future actions of the local tax authorities. These determinations are the subject of periodic domestic and foreign tax audits. Although we accrue for uncertain tax positions, our accrual may be insufficient to satisfy unfavorable findings, which by their nature cannot be predicted with certainty. Unfavorable audit findings and tax rulings may result in payment of taxes, fines and penalties for prior periods and higher tax rates in future periods, which may have a material adverse effect on our financial condition, results of operations or cash flows. Changes in tax law or our interpretation of tax laws and the resolution of current and future tax audits could significantly affect the amounts provided for income taxes in our consolidated financial statements.

Moreover, if we encounter a significant need for liquidity domestically or at a particular location that we cannot fulfill through borrowings, equity offerings or other internal or external sources, we may experience unfavorable tax and earnings consequences as a result of cash transfers. These adverse consequences would occur, for example, if the transfer of cash into the United States is taxed and no offsetting foreign tax credit is available to offset the U.S. tax liability, resulting in lower earnings. Furthermore, we may be prohibited from transferring cash from a country such as China. Foreign exchange ceilings imposed by local governments and the sometimes lengthy approval processes that foreign governments require for international cash transfers may delay our internal cash transfers from time to time.

In addition, many of our imported products are subject to duties, tariffs or other import limitations that affect the cost and quantity of various types of goods imported into the United States or into our other sales markets. Any country in which our products are produced or sold may eliminate, adjust or impose new import limitations, duties, tariffs, anti-dumping penalties or other charges or restrictions, any of which could have a material adverse effect on our financial condition, results of operations or cash flows.

Our Business and Reputation May be Adversely Affected by Actions of Independent Contractors

We contract with many independent contractors outside of the United States to manufacture our products, and we also have license agreements that permit unaffiliated parties to manufacture or contract to manufacture products using our trademarks. We impose, and require our licensees to impose, on those contractors Standards of Manufacturing Practices and other environmental, health and safety standards for the benefit of workers and compliance with product safety and other laws. However, from time to time contractors may not comply with these standards or applicable local law, or our licensees may not require their contractors to comply with these standards or applicable local law. Significant or continuing noncompliance with these standards and laws by one or more contractors could harm our reputation and, as a result, could have an adverse effect on our financial condition, results of operations or cash flows.

We Operate in Very Competitive Markets

The markets for outerwear, sportswear, footwear, accessories and equipment are highly competitive, as are the markets for our licensed products. In each of our geographic markets, we face significant competition from global and regional branded apparel, footwear, accessories and equipment companies.

Edgar Filing: COLUMBIA SPORTSWEAR CO - Form 10-K

Retailers who are our customers often pose our most significant competitive threat by marketing apparel, footwear and equipment under their own private labels. For example, in the United States, several of our largest customers have developed significant private label brands during the past decade that compete directly with our products. These retailers have assumed an increasing degree of inventory risk in their private label products and, as a result, may first cancel advance orders with us in order to manage their own inventory levels downward during weak economic cycles.

Table of Contents

We also compete with other companies for the production capacity of independent factories that manufacture our products and for import capacity. Many of our competitors are significantly larger than us, have substantially greater financial, distribution, marketing and other resources than we have, and have achieved greater brand strength than we have.

Increased competition may result in reduced access to production capacity, reductions in display areas in retail locations, reductions in sales, or reductions in our profit margins, any of which may have a material adverse effect on our financial condition, results of operations or cash flows.

We May be Adversely Affected by the Financial Health of our Customers

Sluggish economies and consumer uncertainty regarding future economic prospects in our key markets have had an adverse effect on the financial health of our customers, some of whom have filed or may file for protection under bankruptcy laws, which may in turn have a material adverse effect on our results of operations and financial condition. We extend credit to our customers based on an assessment of the customer's financial condition, generally without requiring collateral. To assist in the scheduling of production and the shipping of seasonal products, we offer customers discounts for placing advance orders and extended payment terms for taking delivery before the peak shipping season. These extended payment terms increase our exposure to the risk of uncollectible receivables. In addition, we face increased risk of order reduction or cancellation or reduced availability of credit insurance coverage when dealing with financially ailing retailers or retailers struggling with economic uncertainty. Some of our significant wholesale customers have liquidated or reorganized, while others have had financial difficulties in the past and have recently experienced tightened credit markets and sales declines and reduced profitability, which in turn has an adverse effect on our business. We may reduce our level of business with customers experiencing financial difficulties and may not be able to replace that business with other customers, which could have a material adverse effect on our financial position, results of operations or cash flows.

We May be Adversely Affected by Global Credit Market Conditions

Economic downturns and economic uncertainty generally affect global credit markets. Our vendors, customers and other participants in our supply chain may require access to credit markets in order to do business. Credit market conditions may slow our collection efforts as customers find it more difficult to obtain necessary financing, leading to higher than normal accounts receivable. This could result in greater expense associated with collection efforts and increased bad debt expense. Credit conditions may impair our vendors' ability to finance the purchase of raw materials or general working capital needs to support our production requirements, resulting in a delay or non-receipt of inventory shipments during key seasons.

Historically we have limited our reliance on debt to finance our working capital, capital expenditures and investing activity requirements. We expect to fund our future capital expenditures with existing cash, expected operating cash flows and credit facilities, but if the need arises to finance additional expenditures, we may need to seek additional funding. Our ability to obtain additional financing will depend on many factors, including prevailing market conditions, our financial condition, and our ability to negotiate favorable terms and conditions. Financing may not be available on terms that are acceptable or favorable to us, if at all.

We May be Adversely Affected by Retailer Consolidation

When our wholesale customers combine their operations through mergers, acquisitions, or other transactions, their consolidated order volume may decrease while their bargaining power and the competitive threat they pose by marketing products under their own private labels may

increase. Some of our significant customers have consolidated their operations in the past, which in turn has had a negative effect on our business. Future retailer consolidations could have a material adverse effect on our financial condition, results of operations or cash flows.

Table of Contents

We Rely on Technical Innovation and Functional Design to Compete in the Market for our Products

Technical innovation and functional design of footwear, apparel, and equipment is essential to distinguish our products in the marketplace and achieve commercial success. Research and development plays a key role in technical innovation. We rely upon specialists in the fields of chemistry, biochemistry, engineering, industrial design, electronics and related fields, guided by consumer feedback, to develop and test innovative performance products. Although we are committed to designing innovative and functional products that deliver relevant performance benefits to consumers who participate in a wide range of competitive and recreational outdoor activities, if we fail to introduce technical innovation in our products that address consumers' performance expectations, demand for our products could decline.

As we strive to achieve technical innovations, we face a greater risk of inadvertent infringements of third party rights or compliance issues. In addition, technical innovations often involve more complex manufacturing processes. More complex manufacturing processes may lead to higher instances of quality issues, and if we experience problems with the quality of our products, we may incur substantial expense to remedy the problems. Failure to successfully bring to market technical innovations in our product lines could have a material adverse effect on our financial condition, results of operations or cash flows.

We Face Risks Associated with Consumer Preferences and Fashion Trends

Changes in consumer preferences or consumer interest in outdoor activities may have a material adverse effect on our business. In addition, changes in fashion trends may have a greater impact than in the past as we expand our offerings to include more product categories in more geographic areas. We also face risks because our business requires us and our customers to anticipate consumer preferences. Our decisions about product designs often are made far in advance of consumer acceptance. Although we try to manage our inventory risk through early order commitments by retailers, we must generally place a significant portion of our seasonal production orders with our independent factories before we have received all of a season's orders, and orders may be cancelled by customers before shipment. If we or our customers fail to anticipate and respond to consumer preferences, we may have lower sales, excess inventories and lower profit margins, any of which could have a material adverse effect on our financial condition, results of operations or cash flows.

Our Success Depends on Our Use and Protection of Intellectual Property Rights

Our registered and common law trademarks and our patented or patent-pending designs and technologies have significant value and are important to our ability to differentiate our products from our competitors and to create and sustain demand for our products. We also place significant value on our trade dress, the overall appearance and image of our products. From time to time, we discover products that are counterfeit reproductions of our products or that otherwise infringe on our proprietary rights. Counterfeiting activities typically increase as brand recognition increases, especially in markets outside the United States. Increased instances of counterfeit manufacture and sales may adversely affect our sales and our brand and result in a shift of consumer preference away from our products. The actions we take to establish and protect trademarks and other proprietary rights may not be adequate to prevent imitation of our products by others or to prevent others from seeking to block sales of our products as violations of proprietary rights. In markets outside of the United States, it may be more difficult for us to establish our proprietary rights and to successfully challenge use of those rights by other parties. We also license our proprietary rights to third parties. Failure to choose appropriate licensees and licensed product categories may dilute or harm our brand image. In addition to our own intellectual property rights, many of the intellectual property rights in the technology, fabrics and processes used to manufacture our products are generally owned or controlled by our suppliers and are generally not unique to us. In those cases, we may not be able to adequately protect our products or differentiate the performance characteristics and fabrications from those of our competitors. Actions or decisions in the management of our intellectual property portfolio may affect the strength of our brands, which may in turn have a material adverse effect on our financial condition, results of operations or cash flows.

Table of Contents

Although we have not been materially inhibited from selling products in connection with patent, trademark and trade dress disputes, as we focus on innovation in our product lines, extend our brands into new product categories and expand the geographic scope of our marketing, we may become subject to litigation based on allegations of the infringement of intellectual property rights of third parties, including third party trademark, copyright and patent rights. An increasing number of our products include technologies and/or designs for which we have obtained or applied for patent protection. Failure to successfully obtain and maintain patents on these innovations could negatively affect our ability to market and sell our products. Future litigation also may be necessary to defend against such claims or to enforce and protect our intellectual property rights. Any intellectual property litigation may be costly and may divert management's attention from the operation of our business. Adverse determinations in any litigation may result in the loss of our proprietary rights, subject us to significant liabilities or require us to seek licenses from third parties, which may not be available on commercially reasonable terms, if at all. This may have a material adverse effect on our financial condition, results of operations or cash flows.

Our Success Depends on Our Distribution Facilities

Our ability to meet customer expectations, manage inventory, complete sales and achieve objectives for operating efficiencies depends on the proper operation of our existing distribution facilities, the development or expansion of additional distribution capabilities and the timely performance of services by third parties, including those involved in shipping product to and from our distribution facilities. In the United States, we rely primarily on our distribution centers in Portland, Oregon and Robards, Kentucky; in Canada, we rely primarily on our distribution facilities in Strathroy, Ontario; and in Europe, we rely primarily on our distribution center in Cambrai, France.

Our distribution facilities in the United States and France are highly automated, which means that their operations are complicated and may be subject to a number of risks related to computer viruses, the proper operation of software and hardware, electronic or power interruptions, and other system failures. Risks associated with upgrading or expanding these facilities may significantly disrupt or increase the cost of our operations. For example, in addition to supporting our traditional wholesale business, our existing distribution facilities have been modified to enable them to also support our new e-commerce sales in the United States. Failure to successfully maintain and update these modifications could disrupt our wholesale and e-commerce shipments and may have a material adverse effect on our financial condition, results of operations or cash flows.

Our current distribution facilities are designed to handle significantly greater volumes of product shipments than our business is currently generating, especially our European distribution center in Cambrai, France. The fixed costs associated with owning, operating and maintaining these large, highly-automated distribution centers during a period of economic weakness or declining sales could result in lower operating efficiencies and financial deleverage. This fixed cost structure may make it difficult for us to maintain profitability if sales volumes decline for an extended period of time and could have a material adverse effect on our financial condition, results of operations or cash flows.

Our distribution facilities may also be interrupted by disasters, such as earthquakes (which are known to occur in the Northwestern United States), tornadoes or fires. We maintain business interruption insurance, but it may not adequately protect us from the adverse effect that may be caused by significant disruptions in our distribution facilities.

We May be Adversely Affected by Currency Exchange Rate Fluctuations

Although the majority of our product purchases are denominated in U.S. dollars, the cost of these products may be affected by the relative changes in the value of the local currency of the manufacturer. Price increases caused by currency exchange rate fluctuations may make our products less competitive or have an adverse effect on our margins. Our international revenues and expenses generally are derived from sales

and operations in currencies other than the U.S. dollar. Because the functional currency of many of our subsidiaries is not the U.S.

Table of Contents

dollar, we are exposed to potentially material gains or losses from the remeasurement of U.S. dollar monetary transactions into the respective functional currencies. Currency exchange rate fluctuations may also disrupt the business of the independent factories that produce our products by making their purchases of raw materials more expensive and more difficult to finance. As a result, currency fluctuations may have a material adverse effect on our financial condition, results of operations or cash flows.

Our Investments May be Adversely Affected by Market Conditions

Our investment portfolio is subject to a number of risks and uncertainties. Changes in market conditions, such as those that accompany an economic downturn or economic uncertainty, may negatively affect the value and liquidity of our investment portfolio, perhaps significantly. Our ability to find diversified investments that are both safe and liquid and that provide a reasonable return may be impaired, resulting in lower interest income, less diversification, longer investment maturities and/or higher other-than-temporary impairments.

We May be Adversely Affected by Labor Disruptions

Our business depends on our ability to source and distribute products in a timely manner. Labor disputes at independent factories where our goods are produced, shipping ports, transportation carriers, retail stores or distribution centers create significant risks for our business, particularly if these disputes result in work slowdowns, lockouts, strikes, or other disruptions during our peak manufacturing and importing seasons, and may have a material adverse effect on our business, potentially resulting in cancelled orders by customers, unanticipated inventory accumulation, and reduced revenues and earnings.

We Depend on Key Suppliers

Some of the materials that we use may be available from only one source or a very limited number of sources. For example, some specialty fabrics are manufactured to our specification by one source or a few sources, and a single vendor supplies substantially all of the zippers used in our products. From time to time, we have difficulty satisfying our raw material and finished goods requirements. Although we believe that we can identify and qualify additional independent factories to produce these materials as necessary, there are no guarantees that additional independent factories will be available. In addition, depending on the timing, any changes may result in increased costs or production delays, which may have a material adverse effect on our financial condition, results of operations or cash flows.

We Depend on Key Personnel

Our future success will depend in part on the continued service of key personnel and our ability to attract, retain and develop key managers, designers, sales people and others. We face intense competition for these individuals worldwide, and there is a significant concentration of well-funded apparel and footwear competitors in and around our headquarters in Portland, Oregon. We may not be able to attract qualified new employees or retain existing employees, which may have a material adverse effect on our financial condition, results of operations or cash flows.

Our Business Is Affected by Seasonality

Our business is affected by the general seasonal trends common to the outdoor apparel industry. Our products are marketed on a seasonal basis and our product mix is weighted substantially toward the fall season. Our annual net sales are weighted more heavily toward the fall/winter season, while our operating expenses are more equally distributed throughout the year. As a result, the majority of our operating profits are generated in the second half of the year. The expansion of our direct-to-consumer operations has had a modest effect on the seasonality of our business, increasing the proportion of sales and profits that we generate in the fourth calendar quarter. This seasonality, along with other factors that are beyond our control and that are discussed elsewhere in this section, may adversely affect our business and cause our results of operations to fluctuate. Results of operations in any period should not be considered indicative of the results to be expected for any future period.

Table of Contents

Our Products Are Subject to Increasing Product Regulations and We Face Risks of Product Liability and Warranty Claims

Our products are subject to increasingly stringent and complex domestic and foreign product labeling and performance and safety standards, laws and other regulations. These requirements could result in greater expense associated with compliance efforts, and failure to comply with these regulations could result in a delay, non-delivery or mandated recall or destruction of inventory shipments during key seasons or in other financial penalties. Significant or continuing noncompliance with these standards and laws could harm our reputation and, as a result, could have a material adverse effect on our financial condition, results of operations or cash flows.

Our products are used in outdoor activities, sometimes in severe conditions. Product recalls or product liability claims in the future, resulting from the alleged failure of our products, could have a material adverse effect on our financial condition, results of operations or cash flows. Some of our products carry warranties for defects in quality and workmanship. We maintain a warranty reserve for future warranty claims, but the actual costs of servicing future warranty claims may exceed the reserve, which may also have a material adverse effect on our financial condition, results of operations or cash flows.

Our Common Stock Price May Be Volatile

The price of our common stock has fluctuated substantially since our initial public offering. Our common stock is traded on the NASDAQ Global Select Market. Factors such as general market conditions, fluctuations in financial results, variances from financial market expectations, changes in earnings estimates by analysts, or announcements by us or our competitors may cause the market price of our common stock to fluctuate, perhaps substantially.

Insiders Control a Majority of Our Common Stock and May Sell Shares

Three related shareholders, Timothy Boyle, Gertrude Boyle and Sarah Bany, beneficially own a majority of our common stock. As a result, if acting together, they can effectively control matters requiring shareholder approval without the cooperation of other shareholders. Shares held by these three insiders are available for resale, subject to the requirements of, and the rules under, the Securities Act of 1933 and the Securities Exchange Act of 1934. The sale or the prospect of the sale of a substantial number of these shares may have an adverse effect on the market price of our common stock.

(1) These individuals are considered Executive Officers of Columbia.

Gertrude Boyle has served as Chairman of the Board of Directors since 1983. Columbia was founded by her parents in 1938 and managed by her husband, Neal Boyle, from 1964 until his death in 1970. Mrs. Boyle also served as our President from 1970 to 1988. Mrs. Boyle is Timothy P. Boyle's mother.

Edgar Filing: COLUMBIA SPORTSWEAR CO - Form 10-K

Timothy P. Boyle joined Columbia in 1971 as General Manager and has served as President and Chief Executive Officer since 1988. He has been a member of the Board of Directors since 1978. Mr. Boyle is also a member of the Board of Directors of Northwest Natural Gas Company and Craft Brewers Alliance, Inc. Mr. Boyle is Gertrude Boyle's son.

Michael W. Blackford joined Columbia in September 2005 as a Senior Apparel Designer and was promoted to Design Director of Men's Apparel & Equipment in May 2006. In February 2008 he was promoted to Director

Table of Contents

of Global Innovation and named Vice President of Global Innovation in August 2010. Prior to joining Columbia, Mr. Blackford held various positions in design, brand management and sourcing at Sierra Designs.

Kerry W. Barnes joined Columbia in January 2007 as Vice President of Retail. From 2001 to 2006, Mr. Barnes served as the Director of Retail Stores for adidas AG. From 1981 to 2001, Mr. Barnes held various retail positions at Foot Locker, Inc. including Director of Outlet Stores and Regional Vice President of the West Coast.

Timothy C. Bartels joined Columbia in July 2008 as Vice President of Global Footwear Sales. Mr. Bartels served as Vice President of Global Sales for Keen Footwear from 2006 to 2008 and Vice President of Sales for DC Shoes, Inc. (a division of Quiksilver, Inc.) from 2002 to 2006. From 1987 to 2002, Mr. Bartels held a variety of sales management and sales leadership roles at NIKE, Inc.

Peter J. Bragdon became Vice President and General Counsel, Secretary of Columbia in July 2004 and was named Senior Vice President of Legal and Corporate Affairs, General Counsel and Secretary in January 2010. From 1999 to January 2003, Mr. Bragdon served as Senior Counsel and Director of Intellectual Property for Columbia. Mr. Bragdon served as Chief of Staff in the Oregon Governor's office from January 2003 through June 2004. From 1993 to 1999, Mr. Bragdon was an attorney in the corporate securities and finance group at Stoel Rives LLP. Mr. Bragdon served as Special Assistant Attorney General for the Oregon Department of Justice for seven months in 1996.

Thomas B. Cusick joined Columbia in September 2002 as Corporate Controller, was named Vice President and Corporate Controller in March 2006, was named Vice President and Chief Accounting Officer in May 2008, was named Vice President, Chief Financial Officer and Treasurer in January 2009, and was named Senior Vice President, Chief Financial Officer and Treasurer in January 2010. From 1995 to 2002, Mr. Cusick worked for Cadence Design Systems (and OrCAD, a company acquired by Cadence in 1999), which operates in the electronic design automation industry, in various financial management positions. From 1990 to 1995, Mr. Cusick was an accountant with KPMG LLP.

Daniel A. Dougherty joined Columbia in December 1997 and was named Vice President of Global Distribution in October 2009. From 1989 to 1996, Mr. Dougherty worked for Glen Oaks Industries, Inc., where he served as Vice President of Distribution. Prior to that, Mr. Dougherty served as Vice President at both Fussell & Associates, Inc. and Burton & Associates, Inc.

Mitchell C. Fields joined Columbia in October 2006 as National Sales Manager of Men's Apparel and was named Vice President of Global Apparel Sales in June 2008. From 2002 to 2006, Mr. Fields served as Director of Sales for Callaway Golf Footwear. From 1984 to 2001, Mr. Fields held various sales management positions at NIKE, Inc. including Director of Sales for Nike Golf and Director of Replenishment.

James T. Gorman joined Columbia in October 2009 as Vice President Footwear Manufacturing. From 2001 to 2009, Mr. Gorman was President and Founder of Momentum Brand Group, LLC. From 1997 to 2000, Mr. Gorman served as President of PUMA North America, Inc., and from 1994 to 1997, Mr. Gorman served as CEO of Diadora America, Inc. From 1990 to 1993, Mr. Gorman was Senior Vice President Logistics for adidas A.G., and from 1972 to 1990, Mr. Gorman held several key positions at NIKE, Inc., including Divisional Vice President.

Daniel G. Hanson joined Columbia in September 1989 and held various management positions in sales and marketing until 1996, when he became Director of Marketing Communications. In March 2006 Mr. Hanson was named Vice President of Marketing. From 1982 to 1989, Mr. Hanson worked for Helly Hansen AS, where he served as United States Marketing Manager from 1986 to 1989.

Table of Contents

Lisa A. Kulok joined Columbia in February 2008 as Senior Director of Global Planning and was named Vice President of Global Marketplace Planning and Customer Operations in October 2009. From 1987 to 2007, Ms. Kulok held various leadership positions at NIKE, Inc., including USA Apparel Marketplace Planning Director and Director of Regional Planning.

Michael W. McCormick joined Columbia in August 2006 as Vice President of Sales and was named Executive Vice President of Global Sales and Marketing in October 2008. From 2003 to 2006, Mr. McCormick served as Chief Marketing Officer for Golf Galaxy, Inc. From 2000 to 2002, Mr. McCormick served as Executive Vice President Global Sales for Callaway Golf Company, and from 1992 to 2000, Mr. McCormick worked for NIKE, Inc. in various sales management positions, including Director of National Sales.

Mark J. Nenow joined Columbia in May 2007 as Vice President of Global Footwear Merchandising. From 2006 to 2007, Mr. Nenow served as Vice President of Global Footwear Merchandising at Brooks Sports. From 1995 to 2006, Mr. Nenow worked for NIKE, Inc., where he held various product line management positions in the running and outdoor categories. Prior to his footwear career, Mr. Nenow was a professional track and field athlete and held the American track record for the 10,000 meters from 1986 to 2003.

Susan S. Parham joined Columbia in January 2010 as Vice President Global Apparel, Accessories and Equipment. From 1998 to 2010, Ms. Parham served as President and Founder of the consulting firm Lessons Learned. From 1990 to 1998, Ms. Parham held several leadership positions at NIKE, Inc., including Director of U.S. Apparel Merchandising and General Merchandising Manager of Nike Retail.

Susan G. Popp joined Columbia in April 1997 as Human Resources Manager and was named Human Resources Director in May 2004. In March 2006, Ms. Popp was named Vice President of Global Human Resources. Prior to joining Columbia, Ms. Popp held various Human Resource positions, including at NIKE, Inc. from 1996 to 1997.

Bryan L. Timm joined Columbia in June 1997 as Corporate Controller and was named Chief Financial Officer in July 2002. In 2003 Mr. Timm was named Vice President, Chief Financial Officer and Treasurer and in October 2008 he was named Executive Vice President and Chief Operating Officer and continued to serve in the role of Chief Financial Officer until January 2009. From 1991 to 1997, Mr. Timm held various financial management positions for Oregon Steel Mills, Inc. From 1986 to 1991, Mr. Timm was an accountant with KPMG LLP. Mr. Timm is a member of the Board of Directors of Umpqua Holdings Corporation.

William Tung joined Columbia in September 2003 and was named Vice President of International Sales and Operations in December 2004. In October 2008, he was named Vice President of Latin America and Asia Pacific. From 2002 to 2003, Mr. Tung worked for The Body Shop International PLC as Regional Director of North Asia. He was employed by The Rockport Company from 1994 to 2002 where he served in a variety of capacities, most recently as Vice President of Europe. From 1991 to 1994, Mr. Tung worked for Prince Racquet Sports (a division of Benetton Sportsystems) as Sales and Marketing Manager of Asia-Pacific.

Patrick J. Werner joined Columbia in April 2004 as the Director of Apparel Sportswear Sourcing and was named Vice President of Global Apparel Manufacturing in November 2006. Prior to Columbia, Mr. Werner held several key apparel sourcing manufacturing compliance roles at NIKE, Inc., where he worked from 1981 until 2004.

Paul E. Zaengle joined Columbia in June 2008 as Senior Director, E-commerce and was named Vice President E-commerce in August 2010. Prior to joining Columbia, Mr. Zaengle served as Vice President, Interactive Technology at Polo Ralph Lauren where he led the strategy.

Edgar Filing: COLUMBIA SPORTSWEAR CO - Form 10-K

technology, production and design efforts behind the award-winning Polo.com e-commerce and interactive marketing platforms. Prior to joining Polo in 2001, Mr. Zaengle held leadership positions in the technology services department at the City of Santa Clarita, California.

Table of Contents**PART II****Item 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES**

Our common stock is listed on the NASDAQ Global Select Market and trades under the symbol COLM. At February 25, 2011, we had approximately 440 shareholders of record.

Following are the quarterly high and low closing prices for our Common Stock for the years ended December 31, 2010 and 2009:

	HIGH	LOW	DIVIDENDS DECLARED
2010			
First Quarter	\$ 53.68	\$ 39.22	\$ 0.18
Second Quarter	\$ 60.09	\$ 46.67	\$ 0.18
Third Quarter	\$ 58.86	\$ 44.43	\$ 0.18
Fourth Quarter	\$ 61.89	\$ 51.61	\$ 1.70
2009			
First Quarter	\$ 35.93	\$ 25.22	\$ 0.16
Second Quarter	\$ 37.53	\$ 29.90	\$ 0.16
Third Quarter	\$ 42.87	\$ 30.05	\$ 0.16
Fourth Quarter	\$ 45.00	\$ 37.60	\$ 0.18

Our current dividend policy is dependent on our earnings, capital requirements, financial condition, restrictions imposed by our credit agreements, and other factors considered relevant by our Board of Directors. For various restrictions on our ability to pay dividends, see Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, and Note 8 of Notes to Consolidated Financial Statements.

Table of Contents**Performance Graph**

The line graph below compares the cumulative total shareholder return of our Common Stock with the cumulative total return of the Standard & Poor's (S&P) 400 Mid-Cap Index and the Russell 3000 Textiles Apparel Manufacturers for the period beginning December 31, 2005 and ending December 31, 2010. The graph assumes that \$100 was invested on December 31, 2005, and that any dividends were reinvested.

Historical stock price performance should not be relied on as indicative of future stock price performance.

Columbia Sportswear Company**Stock Price Performance****December 31, 2005 December 31, 2010****Total Return Analysis**

Issuer Purchases of Equity Securities

Since the inception of the Company's stock repurchase plan in 2004 through December 31, 2010, the Board of Directors has authorized the repurchase of up to \$500,000,000 of the Company's common stock. As of December 31, 2010, the Company had repurchased 9,190,890 shares under this program for an aggregate purchase price of approximately \$421,237,000. Shares of the Company's common stock may be purchased in the open market or through privately negotiated transactions, subject to market conditions. The repurchase program does not obligate the Company to acquire any specific number of shares or to acquire shares over any specified period of time.

The Company did not repurchase any equity securities during the three months ended December 31, 2010.
