HSBC HOLDINGS PLC

### **Interim Report 2011**

#### Certain defined terms

Unless the context requires otherwise, HSBC Holdings means HSBC Holdings plc and HSBC, the Group, we, us and our refers to HSBC Holdings together with its subsidiaries. Within this document, the Hong Kong Special Administrative Region of the People's Republic of China is referred to as Hong Kong. When used in the terms shareholders equity and total shareholders equity, shareholders means holders of HSBC Holdings ordinary shares and those preference shares classified as equity. The abbreviations US\$m and US\$bn represents millions and billions (thousands of millions) of US dollars, respectively.

#### Interim financial statements and notes

HSBC s Interim Consolidated Financial Statements and Notes thereon, as set out on pages 171 to 218, have been prepared in accordance with the Disclosure Rules and Transparency Rules of the Financial Services Authority and International Accounting Standard (IAS) 34 Interim Financial Reporting as issued by the International Accounting Standards Board (IASB) and as endorsed by the European Union (EU). The consolidated financial statements of HSBC at 31 December 2010 were prepared in accordance with International Financial Reporting Standards (IFRSs) as issued by the IASB, and as endorsed by the EU. EU-endorsed IFRSs may differ from IFRSs as issued by the IASB if, at any point in time, new or amended IFRSs have not been endorsed by the EU. At 31 December 2010, there were no unendorsed standards effective for the year ended 31 December 2010 affecting the consolidated financial statements at that date, and there was no difference between IFRSs endorsed by the EU and IFRSs issued by the IASB in terms of their application to HSBC. Accordingly, HSBC s financial statements for the year ended 31 December 2010 were prepared in accordance with IFRSs as issued by the IASB. At 30 June 2011, there were no unendorsed standards effective for the period ended 30 June 2011 affecting these interim consolidated financial statements, and there was no difference between IFRSs endorsed by the EU and IFRSs issued by the IASB in terms of their application to HSBC.

HSBC uses the US dollar as its presentation currency because the US dollar and currencies linked to it form the major currency bloc in which HSBC transacts and funds its business. Unless otherwise stated, the information presented in this document has been measured in accordance with IFRSs.

When reference is made to underlying or underlying basis in tables or commentaries, comparative information has been expressed at constant currency (see page 10) eliminating the impact of fair value movements in respect of credit spread changes on HSBC s own debt and adjusted for the effects of acquisitions and disposals.

HSBC HOLDINGS PLC

### **Interim Report 2011**

Headquartered in London, HSBC is one of the world's largest banking and financial services organisations and one of the industry's most valuable brands. We provide a comprehensive range of financial services to around 89 million customers through two customer groups, Retail Banking and Wealth Management (formerly Personal Financial Services) and Commercial Banking, and two global businesses, Global Banking and Markets and Global Private Banking.

Our international network covers 87 countries and territories in six geographical regions: Europe, Hong Kong, Rest of Asia-Pacific, Middle East and North Africa, North America and Latin America.

With listings on the London, Hong Kong, New York, Paris and Bermuda stock exchanges, shares in HSBC Holdings plc are held by over 220,000 shareholders in 129 countries and territories.

# **Highlights**

Profit attributable to ordinary shareholders of US\$8.9bn, up 35% on 1H10 and 46% on 2H10.

Earnings per share of US\$0.51, up 34% on 1H10 and 46% on 2H10.

Net assets per share of US\$8.59, up 17% on 1H10 and 8% on 2H10.

Reported pre-tax profit of US\$11.5bn, up 3% on 1H10, and 45% on 2H10.

Profitable in all regions, with profits up in Hong Kong, Rest of Asia-Pacific, Latin America, Middle East and North Africa and North America.

Cost efficiency ratio of 57.5% compared with 50.9% in 1H10 and 59.9% in 2H10.

Return on average ordinary shareholders equity of 12.3%, up from 10.4% in 1H10, and 8.9% in 2H10.

Dividends declared in respect of 2011 totalling US\$0.18 per ordinary share, up 12.5%.

Core tier 1 ratio increased from 10.5% to 10.8% during the period, driven by profit generation. Cover theme

An evening view of the Central Elevated Walkway in Hong Kong s business district. Used by tens of thousands of commuters every day, this walkway forms a vital artery through the heart of Asia s pre-eminent financial centre, which hosts over 190 banks and deposit-taking companies from all over the world.

# **Cautionary statement regarding forward-looking statements**

This Interim Report 2011 contains certain forward-looking statements with respect to the financial condition, results of operations and business of HSBC. These forward-looking statements represent HSBC s expectations or beliefs concerning future events and involve known and unknown risks and uncertainties that could cause actual results, performance or events to differ, in some instances materially, from those expressed or implied in such statements. For example, certain of the market risk disclosures, some of which are only estimates and, therefore, could be materially different from actual results, are dependent on key model characteristics and assumptions and are subject to various limitations. Certain statements that are not historical facts, such as those that include the words potential, value at risk, expects, anticipates, objective, intends, seeks, plans, believes, estimates, and similar expressions or variations on such expressions may be considered forward-looking statements.

Written and/or oral forward-looking statements may also be made in the periodic reports to the US Securities and Exchange Commission, summary financial statements to shareholders, proxy statements, offering circulars and prospectuses, press releases and other written materials and in oral statements made by HSBC s Directors, officers or employees to third parties, including financial analysts.

Forward-looking statements involve inherent risks and uncertainties. Readers are cautioned that a number of factors could cause actual results to differ, in some instances materially, from those anticipated or implied in any forward-looking statement. Forward-looking statements speak only as of the date they are made, and it should not be assumed that they have been revised or updated in the light of new information or future events. Past performance cannot be relied on as a guide to future performance. Trends and factors that are expected to affect HSBC s results of operations are described in the Interim Management Report . A more detailed cautionary statement is given on page 379 of the *Annual Report and Accounts 2010*.

HSBC HOLDINGS PLC

Overview (continued)

# **Group Chairman s Statement**

Good progress has been made during the first half of 2011 in setting the necessary course to build further sustainable value from HSBC s many advantaged positions in attractive markets and customer-facing businesses. The priorities, set out in the Strategy Day which Stuart Gulliver, Group Chief Executive, presented with his team in early May this year, are now being actioned, as Stuart sets out clearly in his review. Against the backdrop of the significant regulatory change which is under way, our clear focus is to concentrate HSBC s capital allocation and resources on the market segments which we are best able to serve competitively and efficiently.

Our ability to make progress on these strategic issues has been enhanced by a period of relative stability in operating performance as revenue strength in the faster growing economies continued to offset the constraining impact of the wind-down of our exit portfolios. With credit experience also continuing to improve, earnings per share for the first half of 2011 of US\$0.51 were 34% higher than those delivered in the first half of last year. The Group Chief Executive s review describes in more detail the drivers of this encouraging performance.

As foreshadowed when we reported our 2010 results, the Board has declared two interim dividends of US\$0.09 per ordinary share in respect of 2011, with the second interim dividend payable on 6 October 2011 to holders of record on 18 August 2011 on the Hong Kong Overseas Branch Register and 19 August 2011 on the Principal Register in the United Kingdom or on the Bermuda Overseas Branch Register. These dividends are 12.5% higher than those declared at the comparable stages last year.

Given the intense current focus amongst the regulatory and political communities on bank capital strength, it is very positive to note both that our capital position strengthened during the period and that we comfortably passed the European Banking Authority s industry wide stress test, the results of which were made public on 15 July 2011. The Group s core tier 1 ratio, which is the ratio most critically monitored by regulators, increased to 10.8% at 30 June 2011 from 10.5% at 31 December 2010 and 9.9% at 30 June 2010.

There has been significant further activity on the regulatory reform front in the period. The Independent Commission on Banking in the UK published its Interim Report on 11 April 2011 and we submitted our comments on its preliminary conclusions on 4 July 2011 in line with the timetable laid down. HSBC has been very actively involved in the debate around one of the principal reform ideas raised in this report, namely the concept of structurally ring-fencing certain of the core activities contained within UK-incorporated universal banks; in our case this would affect our UK subsidiary, HSBC Bank plc. The objective of ring-fencing certain activities from other activities is to facilitate the resolution and continuation of the core activities contained within the ring-fence, at little or no cost to the taxpayer in the event of a future crisis.

Much of the ongoing debate is around assessing the likely impact of various alternative ring-fencing definitions on credit supply to the real economy in the UK and on the competitiveness of UK-incorporated banks. We believe the critical judgements ultimately to be made must consider two principal factors. The first of these is how any restructuring will likely affect the quantum and cost of credit supply to the real economy. The second is whether the benefit of this incremental restructuring on top of the aggregate of all the reform measures already in hand under Basel III and EU directives outweighs the considerable cost and time commitment involved.

In another major new development, the Basel Committee and the Financial Stability Board have now issued consultation documents concerning additional capital requirements for banks identified as global systemically important financial institutions. Incremental common equity of between 1% and 2.5% of risk-weighted assets on top of Basel III requirements is being proposed. We expect HSBC will fall at the higher end of incremental capital requirements. This level of capital is consistent with the expectation of Basel III common

4

#### **Table of Contents**

HSBC HOLDINGS PLC

Overview (continued)

equity tier 1 ratio levels of between 9.5% and 10.5% referred to in our Annual Report and Accounts 2010.

The pace and quantum of regulatory reform continues to increase at the same time as the global economy appears to be losing momentum in its recovery. We are concerned about the possible pro-cyclical impacts of further deleveraging of the global economy arising from the regulatory reform agenda, at the same time as sovereign credit concerns and fiscal consolidation challenges become more critical.

Financial markets globally will likely be volatile over the rest of this year and into 2012 as participants assess and react to the possibility of political constraints preventing timely or optimal economic decisions. The global economy is currently facing many such situations, ranging from reaching a sustainable solution to eurozone sovereign indebtedness through dealing with the impact of inflationary pressures and commodity price increases on developing economies, supporting social reform and cohesion in the Middle East, balancing the growth imperative in the faster-growing economies with the consequences of asset price bubbles and, most importantly, negotiating a long-term framework for budget discipline and related financing in the United States.

Finally, I am delighted to report how effectively the new management team under the leadership of Stuart Gulliver is working together and making progress, under the governance and supervision of the Board, in delivering the strategic agenda which has been agreed. There is much to do and, as noted above, the current economic backdrop contains many challenges. However, the mood in the organisation is upbeat and there is real commitment and enthusiasm to tackle the tasks ahead of us.

D J Flint, Group Chairman

1 August 2011

5

# Table of Contents HSBC HOLDINGS PLC Overview (continued)

# **Group Chief Executive s Review**

HSBC s financial performance improved.

Reported profit before tax was US\$11.5bn, up 3% from 1H10 and 45% from 2H10.

Profit attributable to ordinary shareholders was US\$8.9bn, up 35% from 1H10 and 46% from 2H10.

Return on average ordinary shareholders equity was 12.3%, up from 10.4% in 1H10 and 8.9% in 2H10.

The cost efficiency ratio was 57.5%, up from 50.9% in 1H10 but down from 59.9% in 2H10.

The advances-to-deposits ratio was 78.7%, up from 77.9% in 1H10 and 78.1% in 2H10.

We declared two interim dividends in respect of 2011 totalling US\$0.18 per ordinary share, up 12.5% year on year.

The core tier 1 capital ratio was 10.8% at 30 June 2011, compared with 10.5% at 31 December 2010.

#### Progress on strategy

HSBC s global network covers the majority of world trade and capital flows, and provides access to faster-growing economies as well as the mature economies where wealth is stored. In May, we articulated our strategy to become the world s leading international bank by building on this distinctive position to leverage global economic and demographic trends. We also outlined our plans to deploy capital more efficiently, to improve cost efficiency and to target growth in selected markets. We are making progress in all three areas:

First, as a result of our portfolio review and application of a five-filter framework, we announced a number of closures and disposals. These included the closure of our retail businesses in Russia and Poland and the disposal of three insurance businesses. More materially, in the US we are progressing the strategic review of our credit card business, and announced the disposal of 195 non-strategic branches, principally in upstate New York.

Second, we are targeting US\$2.5-3.5bn of sustainable cost savings by 2013. Since the start of 2011, we have begun operational restructurings in Latin America, the US, the UK, France and the Middle East which will reduce headcount by around 5,000. We launched a programme to reduce the costs of our head office and global support functions. We also initiated more efficient business operating models for Commercial Banking and Retail Banking and Wealth Management. We expect there will be some 25,000 job losses by the end of 2013, although we plan to recruit in support of our strategic initiatives.

Third, we continued to position the business for growth. We increased revenues in target markets and we made progress in wealth management, where we saw higher investment income, especially in Asia, and funds under management in Global Asset Management reached a record high at the end of the period.

#### Revenues

At US\$35.7bn, total Group revenues were stable compared with 1H10 and up 9% compared with 2H10.

We recorded double-digit revenue growth in Hong Kong, Rest of Asia-Pacific and Latin America compared with 1H10.

As we had forecast, revenue declined in the US as we continued to manage down balances in the run-off portfolios, and in Balance Sheet Management as positions matured. Along with many peers, we saw weaker Credit and Rates revenues in Europe in Global Banking and Markets.

#### Loan impairment charges

Loan impairment charges were US\$5.3bn compared with US\$7.5bn in 1H10 and US\$6.5bn in 2H10.

Most of the improvement was in the US. The Consumer Finance run-off and Cards portfolios

6

HSBC HOLDINGS PLC

Overview (continued)

recorded lower balances as well as improved delinquency rates, although we saw a slowing of delinquency trend improvements in the second quarter.

In Global Banking and Markets, loan impairment charges and other credit risk provisions were lower.

#### Cost efficiency

The cost efficiency ratio rose from 50.9% to 57.5% compared with 1H10. Reflecting strategic investment in the business, key drivers behind the increase were higher staff numbers, wage inflation, and other costs related to business growth. We also reported a number of notable cost items during the period.

The cost efficiency ratio fell compared with 59.9% in 2H10 as we controlled discretionary spend and took action to make sustainable savings.

Significantly, on a quarterly basis, the cost efficiency ratio was 54.4% in 2Q11, lower than in each of the previous three quarters. **Balance sheet** 

Compared with year-end 2010, customer account balances increased by 7% or US\$91.3bn to US\$1.3 trillion, with most of the increase in Europe and Asia.

Compared with year-end 2010, total customer loan balances increased by 8% or US\$79.5bn to US\$1.0 trillion, rising in all regions except North America, where we managed down balances in the Consumer Finance portfolios.

The core tier 1 ratio increased during the period from 10.5% at the end of 2010 to 10.8%, driven primarily by profit generation. **Economic outlook** 

# We remain positive on the outlook for emerging markets. We expect a soft landing in China and we believe Hong Kong is well-equipped to mitigate overheating pressures. We expect continued growth in the rest of Asia-Pacific and Latin America and take comfort from the focus of the authorities on managing inflationary pressures. In the Middle East, the outlook for the Gulf Cooperation Council economies is also positive.

In the developed world, growth in the US and Europe is likely to remain sluggish as long as the impact of high debt levels and government budget cuts weigh on economic activity. In the UK, we remain concerned that regulatory actions being contemplated and the ongoing regulatory uncertainty will constrain the supply of credit to the real economy and contribute to sub-par economic growth.

In closing, I would add that I am pleased with these results, which mark a first step in the right direction on what will be a long journey.

S T Gulliver, Group Chief Executive

1 August 2011

7

SBC HOLDINGS PLC	
Verview (continued)	

# **Principal activities**

HSBC is one of the largest banking and financial services organisations in the world, with a market capitalisation of US\$177bn at 30 June 2011.

Through our subsidiaries and associates, we provide a comprehensive range of banking and related financial services. Headquartered in London, we operate through long-established businesses and have an international network of around 7,500 offices in 87 countries and territories in six geographical regions: Europe, Hong Kong, Rest of Asia-Pacific, Middle East and North Africa (MENA), North America and Latin America. Within these regions, a comprehensive range of financial services is offered to personal, commercial, corporate, institutional, investment and private banking clients. Services are delivered primarily by domestic banks, typically with large retail deposit bases.

#### **HSBC** s values

The role of HSBC s values in daily operating practice has taken on increased significance in the context of the global financial crisis, with changes to regulatory policy, investor confidence and society s view of the role of banks. We expect our executives and staff to act with courageous integrity in the execution of their duties.

HSBC s values are being:

dependable and doing the right thing;

open to different ideas and cultures; and

connected with our customers, communities, regulators and each other.

We have strengthened our values-led culture by embedding HSBC s values into our operating standards, training, development and employee induction, and through the personal sponsorship of senior executives. These initiatives will continue in 2011 and beyond.

# Strategic direction

HSBC s objective is to deliver sustainable long-term value to shareholders through consistent earnings and superior risk-adjusted returns. We have a clear strategy to become the leading international bank, based on two main elements which are aligned with the key trends shaping the global economy:

international connectivity we are strengthening our presence in those markets and businesses that are most relevant to global trade and capital flows; and

economic development and wealth creation we are investing to capture wealth creation in the selected markets and focusing on retail banking only in those markets where we can achieve profitable scale.

#### To deliver on our strategy, we are taking action in three areas:

**Capital deployment** we are improving the way we deploy capital as part of our efforts to achieve our targeted return on equity of 12% to 15% over the business cycle. We have introduced a strategic framework assessing each of our businesses on a set of five strategic evaluation criteria, namely international connectivity, economic development, profitability, cost efficiency and liquidity. The results of this review determine whether we invest in, turn around, continue with or exit businesses;

**Cost efficiency** we have launched a transformation programme to achieve sustainable cost savings of between US\$2.5bn and US\$3.5bn over the next three years. Sustainable cost savings are intended to facilitate self-funded growth in key markets and investment in new products, processes and technology, and provide a buffer against regulatory and inflationary headwinds; and

**Growth** we continue to position ourselves for growth. We are increasing our relevance in fast-growing markets and in wealth management, and are improving the collaboration between our international network of businesses, particularly between Commercial Banking and Global Banking and Markets.

The objectives and incentives of management are aligned to delivering the strategy. Progress is measured through our quarterly financial performance and will be reviewed at the annual Strategy Investor Day.

Table of Contents
HSBC HOLDINGS PLC
Overview (continued)
Top and emerging risks
All of our activities involve, to varying degrees, the measurement, evaluation, acceptance and management of risk or combinations of risks which we assess on a Group-wide basis. We classify certain risks as top or emerging . A top risk is a current, visible risk with the potential to have a material effect on our financial results or our reputation. An emerging risk is one with large unknown components which could have a material impact on our long-term strategy. Top and emerging risks are viewed as falling under the following four broad categories:
challenges to our business operations;
challenges to our governance and internal control systems;
macro-economic and geopolitical risk; and
macro-prudential and regulatory risks to our business model. The top and emerging risks are summarised below:
Challenges to our business operations
Challenges to our operating model in an economic downturn (in developed countries) and rapid growth (in emerging markets)
Internet crime and fraud
Challenges to our governance and internal control systems
Level of change creating operational complexity

Information security risk

#### Macro-economic and geopolitical risk

Eurozone crisis, US deficit and elevated risk from potentially overheating economies in emerging markets

Increased geopolitical risk in the Middle East and North Africa

#### Macro-prudential and regulatory risks to our business model

Regulatory change impacting our business model and Group profitability

Regulatory and legislative requirements affecting conduct of business

A detailed account of HSBC s challenges and uncertainties is provided on pages 84 to 88. Further comments on expected risks and uncertainties are made throughout the Interim Management Report, particularly in the section on Risk.

#### **Basis of preparation**

The results of customer groups and global businesses are presented in accordance with the accounting policies used in the preparation of HSBC s consolidated financial statements. Our operations are closely integrated and, accordingly, the presentation of customer group and global business data includes internal allocations of certain items of income and expense. These allocations include the costs of certain support services and Group Management Office (GMO) functions, to the extent that these can be meaningfully attributed to operational business lines. While such allocations have been made on a systematic and consistent basis, they necessarily involve a degree of subjectivity.

Where relevant, income and expense amounts presented include the results of inter-segment funding as well as inter-company and inter-business line transactions. All such transactions are undertaken on arm s length terms.

# Reconciliation of reported and underlying profit before tax

In addition to results reported on an IFRSs basis, we measure our performance internally on a like-for-like basis by eliminating the effects of foreign currency translation differences, acquisitions and disposals of subsidiaries and businesses, and fair value movements on own debt attributable to credit spread where the net result of such movements will be zero upon maturity of the debt; all of which distort period-on-period comparisons. We refer to this as our underlying performance.

Reported results include the effects of the above items. They are excluded when monitoring progress against operating plans and past results because management believes that the underlying basis more accurately reflects operating performance.

#### **Constant currency**

Constant currency comparatives for the half-years to 30 June 2010 and 31 December 2010, used in the 2011 commentaries, are computed by retranslating into US dollars for non-US dollar branches, subsidiaries, joint ventures and associates:

the income statements for the half-years to 30 June 2010 and 31 December 2010 at the average rates of exchange for the half-year to 30 June 2011; and

the balance sheets at 30 June 2010 and 31 December 2010 at the rates of exchange ruling at 30 June 2011.

No adjustment has been made to the exchange rates used to translate foreign currency-denominated assets and liabilities into the functional currencies of any HSBC branches, subsidiaries, joint ventures or associates.

When reference is made to constant currency in tables or commentaries, comparative data reported in the functional currencies of HSBC s operations have been translated at the appropriate exchange rates applied in the current period on the basis described above.

#### **Underlying performance**

The tables below compare our underlying performance for the half-year to 30 June 2011 with the half-years to 30 June 2010 and 31 December 2010. Equivalent tables are provided for each of HSBC s customer groups, global businesses and geographical segments on www.hsbc.com and on pages 37a and 79a.

The foreign currency translation differences reflect the relative weakening of the US dollar against most major currencies.

The following acquisitions and disposals were adjusted for in arriving at the underlying comparison:

the gain of US\$62m on reclassification of Bao Viet Holdings (Bao Viet) from an available-for-sale asset to an associate in January 2010;

the gain of US\$66m on sale of our stake in Wells Fargo HSBC Trade Bank in March 2010;

the gain of US\$107m on disposal of HSBC Insurance Brokers Limited in April 2010;

the dilution gains which arose on our holding in Ping An Insurance (Group) Company of China, Limited (Ping An) following the issue of share capital to third parties in both May 2010 and June 2011 of US\$188m and US\$181m, respectively;

the loss on the sale of our investment in British Arab Commercial Bank plc in 2010;

the gain of US\$74m on the deconsolidation of private equity funds following the management buy-out of Headland Capital Partners Ltd (formerly known as HSBC Private Equity (Asia) Ltd) in November 2010;

the operating results of Eversholt Rail Group for the half year to 30 June 2010 and the gain on the sale of US\$255m in December 2010.

HSBC HOLDINGS PLC

# **Interim Management Report** (continued)

Reported profit before tax of US\$11.5bn in the first half of 2011 was 3% higher than in the first half of 2010, 13% on an underlying basis, with a continued reduction in loan impairment charges more than offsetting higher operating costs. The difference between reported and underlying results is explained on page 10. Except where otherwise stated, the commentaries in the Financial Summary are on an underlying basis.

Net operating income before loan impairment charges and other credit risk provisions ( revenue ) was marginally higher than in the first half of 2010. Revenue rose across Hong Kong, Rest of Asia-Pacific and Latin America supported by strong lending growth, notably in Commercial Banking ( CMB ) and Global Banking and Markets ( GB&M ), and increasing trade and transaction volumes. This was coupled with growth in investment and insurance income in Retail Banking and Wealth Management ( RBWM ) as markets improved. We also recorded sustained growth in our mortgage portfolios, notably in the UK and Hong Kong. Offsetting these factors were the ongoing decrease in balances in North America in the Cards and run-off portfolios. Performance in GB&M was affected by lower revenues in legacy Credit, and in Balance Sheet Management.

Loan impairment charges and other credit risk provisions were US\$2.4bn or 32% lower than in the first half of 2010 and the lowest reported since the first half of 2006, reflecting the benefits of our exit strategies for higher risk portfolios, ongoing risk management, a sustained trend towards higher quality, more secure lending and a general improvement in credit quality. This was most notable in North America in HSBC Finance as we continued the managed run-off of our sub-prime mortgage portfolio and the loss experience on credit card portfolios improved.

Operating expenses of US\$20.5bn were 10% higher than in the first half of 2010, reflecting increased headcount, wage inflation in key markets and ongoing investment in strategic projects in GB&M and in the branch network, as well as a number of notable items. These included an increase of US\$477m in restructuring costs which were incurred as a result of actions taken following the review of our businesses announced on the Strategy Day and the ongoing review of our cost base. In addition, operating expenses included provisions relating to customer redress programmes of US\$611m, including a provision in respect of the adverse judgement in the Judicial Review relating to sales of payment protection insurance (PPI) in the UK. This was offset by a credit of US\$587m resulting from a change in the inflation measure used to calculate the defined benefit obligation of the HSBC Bank (UK) Pension Scheme defined benefit plan for deferred pensions (for further details see Note 5 on page 183). As a result of the increasing costs, our cost efficiency ratio for the first half of 2011 was 57.5%, higher than in the first half of 2010 and outside our target range. Significantly, however, it improved compared with both the second half of 2010 and the first quarter of 2011.

Reported profit after tax was US\$2.5bn or 35% higher than in the first half of 2010, reflecting the increase in profit before tax and a lower tax charge in the first half of 2011. The latter included the benefit of deferred tax now eligible to be recognised in respect of foreign tax credits, partly offset by a current period tax charge in respect of prior periods. The tax charge in the first half of 2010 was exceptionally high as it included US\$1.6bn attributable to a taxable gain arising from an internal reorganisation within our North American operations.

HSBC HOLDINGS PLC

**Interim Management Report** (continued)

# Group performance by income and expense item

#### Net interest income

	30 June	Half-year to 30 June	31 December
	2011 US\$m	2010 US\$m	2010 US\$m
Interest income Interest expense	31,046 (10,811)	28,686 (8,929)	29,659 (9,975)
Net interest income <sup>18</sup> (US\$m)	20,235	19,757	19,684
Average interest-earning assets (US\$m)	1,607,626	1,431,458	1,512,462
Gross interest yield <sup>19</sup> (%)	3.89	4.04	3.89
Net interest spread <sup>20</sup> (%)	2.37	2.68	2.43
Net interest margin <sup>21</sup> (%)	2.54	2.78	2.58
For footnotes, see page 81			

Net interest income increased by 2% compared with the first half of 2010. On an underlying basis, net interest income was broadly in line with the first half of 2010, as significant balance growth was offset by continuing pressure on spreads.

Average loans and advances to customers grew strongly in the first half of 2011, particularly in commercial lending in CMB and GB&M Group-wide and mortgages in the UK and Hong Kong. The benefit to interest income from higher balances was partly offset by the effect of declining yields on lending, as we continued to reposition the customer loan portfolio towards higher quality assets and reduce our exposure to higher yielding unsecured personal lending, coupled with intensive competition in certain markets.

The average balance of loans and advances to banks and financial investments also rose due to higher placements with central and commercial banks and this, together with rising yields in Asia, led to an increase in interest income. This was partly offset by Balance Sheet Management, where revenues continued to fall as higher-yielding positions matured and the opportunity to maintain yields on reinvestment was limited by the prevailing low interest rate environment, notably in Europe.

The increase in interest income was offset by higher interest expense on customer accounts and debt issued by the Group. Average customer account balances grew significantly, notably in Hong Kong and Rest of Asia-Pacific, reflecting the growth in

customer numbers and the success of deposit campaigns. The cost of funds across the Group also rose, driven by base rate increases and higher rates paid to customers in competitive markets.

The interest expense on debt issued by the Group also rose, reflecting a general rise in credit spreads in the financial sector which led to an increase in the cost of funds for new issuances in most regions during the second half of 2010 and the first half of 2011.

Net interest income includes the expense of internally funding trading assets, while related revenue is reported in Net trading income. The cost of funding these assets rose as a result of growth in average trading assets. In reporting our customer group and global business results, this cost is included within Net trading income.

The net interest spread decreased due to lower yields on loans and advances to customers as we continued to target higher quality assets, and the rising cost of funds relating to customer accounts and debt issued by the Group. Our net interest margin fell by a lesser amount due to the benefit from net free funds. The increase in net free funds was partly attributable to a rise in funding in line with the growth in trading assets. In addition, customers held more funds in liquid non-interest bearing current accounts in the low interest rate environment. The rise in the Group s cost of funds also contributed to the benefit from net free funds.

	10.044	10.405	10.712
Fee income	10,944	10,405	10,712
Less: fee expense	(2,137)	(1,887)	(1,875)
Net fee income	8,807	8,518	8,837

Reported net fee income rose by 3.4% to US\$8.8bn, and was in line on an underlying basis.

Fee income from wealth management products increased considerably within Asia and Europe, due to higher transaction volumes. This was particularly so for unit trusts in Hong Kong and funds under management in Europe, where growth was driven by stronger investment performance due to improved market conditions.

Trade-related fee income increased, notably in Hong Kong and the Rest of Asia-Pacific region due to higher trade and transaction volumes.

Net fee income related to cards increased in the first half of 2011, notably in the UK and in Hong Kong due to higher transaction volumes which were driven by increased retail spending and customer promotions. This was partly offset in North America,

where reduced late and overlimit fees reflected lower delinquency and an increased willingness by customers to pay down their credit card debt, combined with the effects of lower balances and changes to charging practices under the Credit Card Accountability, Responsibility and Disclosure Act ( CARD Act ).

Underwriting fees increased in GB&M as we increased our market share of global bond issuance volumes in the first half of 2011.

The negligible income from Taxpayer Financial Services in the US resulted from the decision to exit the business.

Fee expenses increased, notably in GB&M, which benefited from higher recoveries from the securities investment conduits in the first half of 2010

# Interim Management Report (continued)

#### Net trading income

	Half-year to		
	30 June	30 June	31 December
	2011	2010	2010
	US\$m	US\$m	US\$m
Trading activities	3,615	3,419	2,289
Net interest income on trading activities	1,581	1,242	1,288
Gain/(loss) on termination of hedges	5	(3)	3
Other trading income hedge ineffectiveness:			
on cash flow hedges	2	(24)	15
on fair value hedges	(77)	17	21
Non-qualifying hedges	(314)	(1,099)	42
Net trading income <sup>22,23</sup>	4,812	3,552	3,658
For footnotes, see page 81.			

Reported net trading income was US\$4.8bn, 35% higher than in the first half of 2010. On an underlying basis, it rose by 23%.

This increase was driven by lower adverse fair value movements on non-qualifying hedges compared with the first half of 2010. These instruments are derivatives entered into as part of a documented interest rate management strategy for which hedge accounting was not, or could not be, applied. They are principally cross-currency and interest rate swaps used to economically hedge fixed rate debt issued by HSBC Holdings and floating rate debt issued by HSBC Finance Corporation (HSBC Finance). Long-term US interest rates declined during the first half of 2011 but to a lesser extent than in the corresponding period in 2010, and the decrease relative to sterling and euro rates was also less pronounced, benefiting net trading income in North America and Europe. The size and direction of the changes in fair value of non-qualifying hedges that are recognised in the income statement can be volatile from period to period, but do not alter the cash flows expected as part of the documented interest rate management strategy for both the instruments and the underlying economically hedged assets and liabilities.

Net interest income earned on trading activities increased by 21%, attributable to a rise in holdings of government and government agency debt securities. The cost of internally funding these assets also

increased, but this interest expense is reported under Net interest income and excluded from net trading income.

In GB&M, net income from trading activities declined, mainly driven by Rates, largely due to lower favourable fair value movements on structured liabilities as credit spreads widened to a lesser extent than in the first half of 2010. The decline was partly offset by higher revenues as customer demand for structured products increased.

This was partly offset by a rise in Equities revenues as improved competitive positioning helped capture increasing client flows, particularly during the global rally in the first quarter of 2011.

In addition, net trading income included favourable foreign exchange movements on trading assets held as economic hedges of foreign currency debt designated at fair value. These offset adverse foreign exchange movements on the foreign currency debt which are reported in Net income from financial instruments designated at fair value .

The decline in GB&M was offset by other movements, notably in RBWM in North America where, in the first half of 2011, provisions for mortgage loan repurchase obligations associated with loans previously sold were lower. This related mainly to mortgages originated through broker channels. We regard these mortgage loan repurchase obligations as trading assets.

J			

The accounting policies for the designation of financial instruments at fair value and the treatment of the associated income and expenses are described in Notes 2i and 2b of the *Annual Report and Accounts 2010*, respectively.

The majority of the financial liabilities designated at fair value relate to certain fixed-rate long-term debt issues whose rate profile has been changed to floating through interest rate swaps as part of a documented interest rate management strategy. The movement in fair value of these long-term debt issues includes the effect of our credit spread changes and any ineffectiveness in the economic relationship between the related swaps and own debt. As credit spreads widen or narrow, accounting profits or losses, respectively, are booked. The size and direction of the changes in the credit spread on our debt and ineffectiveness, which are recognised in the income statement, can be volatile from period to period, but do not alter the cash flows envisaged as part of the documented interest rate management strategy. As a consequence, fair value movements arising from changes in our own credit spread on long-term debt and other fair value movements on the debt and related derivatives are not regarded internally as part of managed performance and are therefore not allocated to

customer groups or global businesses, but are reported in Other . Credit spread movements on own debt are excluded from underlying results, and related fair value movements are not included in the calculation of regulatory capital.

We reported a net expense from financial instruments designated at fair value of US\$0.1bn in the first half of 2011 compared with net income of US\$1.1bn in the first half of 2010. On an underlying basis, the equivalent figures were income of US\$43m and an expense of US\$5m, respectively. The difference between the reported and underlying results arose from the exclusion from the latter of the credit spread-related movements in the fair value of our own long-term debt, on which we reported adverse fair value movements of US\$143m in the first half of 2011 and favourable movements of US\$1.1bn in the first half of 2010. The adverse fair value movements during the first half of 2011 were driven by the tightening of credit spreads in Europe and North America, compared with widening credit spreads in the first half of 2010.

Net income arising from financial assets held to meet liabilities under insurance and investment contracts reflected investment gains in the period as equity markets improved, compared with losses in the first half of 2010. This predominantly affected

18

HSBC HOLDINGS PLC

### **Interim Management Report** (continued)

the value of assets held to support unit-linked insurance and investment contracts in the UK and Hong Kong and participating contracts in France, while gains in Brazil were higher than in the comparable period in 2010.

The investment gains arising from the improved equity markets resulted in a corresponding increase in liabilities to customers, reflecting the extent to which unit-linked policyholders, in particular, participate in the investment performance of the associated asset portfolio. Where the gains relate to assets held to back investment contracts, the corresponding increase in liabilities to customers is also recorded under Net income from financial

instruments designated at fair value . This is in contrast to gains related to assets held to back insurance contracts or investment contracts with discretionary participation features ( DPF ), where the corresponding increase in liabilities to customers is recorded under Net insurance claims incurred and movement in liabilities to policyholders .

Net income from financial instruments designated at fair value also included adverse foreign exchange movements on foreign currency debt designated at fair value, issued as part of our overall funding strategy, with an offset from trading assets held as economic hedges reported in Net trading income .

#### Gains less losses from financial investments

	30 June	Half-year to 30 June	31 December
	2011	2010	2010
Net gains/(losses) from disposal of:	US\$m	US\$m	US\$m
debt securities	306	382	182
equity securities	213	223	293
other financial investments	(3)	(8)	1
	516	597	476
Impairment of available-for-sale equity securities	(31)	(40)	(65)
Gains less losses from financial investments	485	557	411

Net gains from financial investments decreased by 13% and 5% on a reported and an underlying basis, respectively, the latter excluding an accounting gain from the reclassification of Bao Viet as an associate following the purchase of additional shares in the first half of 2010.

The decline was driven by lower net gains on the disposal of debt securities, including available-for-sale government debt securities and mortgage-backed

securities, mostly due to the high level of realised gains in Hong Kong and Rest of Asia-Pacific in the first half of 2010.

The decrease was partly offset by an increase in net gains on the disposal of available-for-sale equity investments, and a lower level of impairments on available-for-sale investments reflecting a general improvement in the economic environment.

#### Net earned insurance premiums

	30 June	Half-year to 30 June	31 December
	2011	2010	2010
	US\$m	US\$m	US\$m
Gross insurance premium income Reinsurance premiums	6,928 (228)	5,902 (236)	5,707 (227)
Net earned insurance premiums	6,700	5,666	5,480

Net earned insurance premiums increased by 18% and 14% on a reported and an underlying basis, respectively. This was primarily attributable to the continued growth of the life insurance business, particularly in Hong Kong.

In Hong Kong, sales of unit-linked and deferred annuity products rose. This resulted from increased demand for insurance products, together with higher levels of renewals from a larger in-force book of

business. Sales were also higher in Rest of Asia-Pacific, particularly in Singapore and Malaysia, driven by successful sales initiatives and increased demand for insurance products as economic conditions in the region continued to improve.

Investment products with DPF continued to generate strong net earned premium income in France, driven by successful targeted sales campaigns. Life insurance premiums in the UK were

HSBC HOLDINGS PLC

## **Interim Management Report** (continued)

also higher, due to increased sales of a unit-linked product driven by our enhanced distribution capabilities.

In Latin America, net earned premium growth was strong, particularly for credit-related, term life and unit-linked products in Brazil, reflecting the improved economic environment and an increase in

the salesforce. In Argentina, repricing initiatives drove higher premiums on the motor book.

The above growth was partly offset by a reduction in premiums resulting from the non-renewal and transfer to third parties of certain contracts in our Irish business, and the run-off of the legacy motor book in the UK.

#### Other operating income

	30 June	Half-year to 30 June	31 December
	2011	2010	2010
	US\$m	US\$m	US\$m
Rent received	75	297	238
Losses recognised on assets held for sale	(4)	(100)	(163)
Valuation gains/(losses) on investment properties	38	(8)	101
Gain on disposal of property, plant and equipment, intangible assets and non-financial investments	27	274	427
Gains arising from dilution of interests in associates	181	188	
Change in present value of in-force long-term insurance business	658	325	380
Other	310	502	101
Other operating income	1,285	1,478	1,084

Reported other operating income of US\$1.3bn decreased by 13% in the first half of 2011. Income in the period included a gain of US\$181m arising from a further dilution of our holding in Ping An following its issue of share capital to a third party. Income in the first half of 2010 also included a gain of US\$188m following a dilution of our holding in Ping An, a gain of US\$107m from the sale of HSBC Insurance Brokers, a gain of US\$66m from the disposal of our interest in the Wells Fargo HSBC Trade Bank and a write-down of US\$47m resulting from an agreement to sell our shareholding in British Arab Commercial Bank plc. The first half of 2010 also included rent received as a component of the operating result of Eversholt Rail Group which was sold in December 2010.

On an underlying basis, excluding these items, other operating income increased by 13% as the non-recurrence of gains of US\$194m and US\$56m

recognised in 2010 on the sale and leaseback of our Paris and New York headquarters, respectively, was more than offset by favourable movements in the present value of in-force ( PVIF ) long-term insurance business. The calculation of the PVIF asset was refined during the period to bring greater comparability and consistency across our insurance operations, which led to a gain of US\$243m (see footnote 27 on page 81). Higher sales of life insurance products, notably in Hong Kong, also contributed to the increase in the PVIF asset.

Net losses recognised on assets held for sale declined as a US\$77m loss recognised on the sale of the US vehicle finance servicing operations and associated US\$1.0bn loan portfolio in the first half of 2010 did not recur. In addition, the first half of 2011 included gains on the sale of buildings including the sale and leaseback of branches in Mexico.

20

HSBC HOLDINGS PLC

### **Interim Management Report** (continued)

### Net insurance claims incurred and movement in liabilities to policyholders

Insurance claims incurred and movement in liabilities to policyholders:
gross
reinsurers share
næ

30 June	Half-year to 30 June	31 December
2011	2010	2010
US\$m	US\$m	US\$m
6,761 (144)	5,281 (160)	6,688 (42)
6,617	5,121	6,646

For footnote, see page 81.

Net insurance claims incurred and movement in liabilities to policyholders increased by 29% on a reported basis and by 26% on an underlying basis

Additional reserves were established for new business written, driven by premium growth in Hong Kong, Rest of Asia-Pacific, Latin America and Europe, reflecting sales campaigns and improved market conditions.

Further increases in the movement in liabilities to policyholders resulted from gains on the fair value of the assets held to support policyholder funds as equity markets improved, particularly on unit-linked contracts in the UK and Hong Kong and on investment contracts with DPF in France, compared with losses in the first half of 2010. Gains on the fair

value of the assets held to support unit-linked contracts in Brazil increased compared with the equivalent period in 2010.

The gains or losses experienced on the financial assets designated at fair value held to support insurance contract liabilities and investment contracts with DPF are reported in Net income from financial instruments designated at fair value .

The non-renewal and transfer to third parties of certain contracts in the Irish business and the run-off of the legacy motor book in the UK resulted in a decrease in net insurance claims incurred and movement in liabilities to policyholders, partly offsetting the above.

#### Loan impairment charges and other credit risk provisions

		Half-year to

Customer impaired loans	25,982	27,887	28,091
Customer loan impairment allowances	18,732	22,033	20,083

On a reported basis loan impairment charges and other credit risk provisions decreased from US\$7.5bn to US\$5.3bn, a decline of 30% compared with the first half of 2010 and 32% on an underlying

basis. Within this, collectively assessed allowances and individually assessed impairment allowances fell by 31% and 43%, respectively.

HSBC HOLDINGS PLC

### **Interim Management Report** (continued)

At 30 June 2011, the aggregate balance of customer loan impairment allowances was US\$18.7bn. This represented 2% of gross loans and advances to customers (net of reverse repos and settlement accounts) compared with 3% at 30 June 2010.

The improvement in loan impairment charges and other credit risk provisions was seen across all regions. The most significant diminution in loan impairment charges was in RBWM in North America due to the continued decline in the run-off portfolios and the ongoing reduction of outstanding credit card debt by customers in the Card and Retail Services business, as well as a general improvement in credit quality. In addition, credit quality also improved for our RBWM business in Europe, reflecting the continued shift from unsecured to secured lending. Loan impairment charges and other credit risk provisions in GB&M and CMB also declined.

Impairments on available-for-sale debt securities were broadly in line with the first half of 2010.

In North America, loan impairment charges and other credit risk provisions fell by 33% to US\$3bn, representing 62% of the Group s reduction in loan impairment charges and other credit risk provisions compared with the first half of 2010.

Loan impairment charges in our Consumer Lending and Mortgage Services businesses in the US fell by 30% to US\$2.2bn, driven by lower lending balances, delinquency and write-off levels as the portfolios continued to run off. These decreases were partly offset by an incremental charge resulting from changes to economic assumptions on the pace of recovery in home prices and delays in the timing of expected cash flows as a consequence of the suspension of foreclosure activity which began in late 2010.

In Card and Retail Services, loan impairment charges fell by 47% to US\$705m. The decrease was driven by lower lending balances reflecting fewer active accounts and consumers—continued efforts to reduce their credit card debt. The easing in economic conditions, lower delinquency levels and higher recovery rates were also factors in the reduction.

In Europe, loan impairment charges and other credit risk provisions decreased by 26% to US\$1.2bn. In RBWM, loan impairment charges declined due to improved delinquency trends across both the secured and unsecured portfolios, reflecting enhanced credit risk management practices, improved collections and the effects of the low interest rate environment in the UK. In CMB, loan

impairment charges and other credit risk provisions fell by US\$69m, driven by lower customer-specific impairments.

In Europe we recorded an impairment of US\$105m in the first half of 2011 in respect of available-for-sale Greek sovereign debt. Further information on our exposures to countries in the eurozone, is provided in Areas of special interest wholesale lending on page 98.

In the Middle East and North Africa, loan impairment charges and other credit risk provisions declined by 77% to US\$99m, primarily in our GB&M business, due to the non-recurrence of impairment charges against a small number of large corporate customers in the United Arab Emirates (UAE) in the first half of 2010. In our RBWM business, loan impairment charges also reduced, by 59% to US\$58m, due to lower lending balances and a significant improvement in delinquency rates driven by the repositioning of the loan book, higher quality lending and strengthened collections practices.

Loan impairment charges and other credit risk provisions in Latin America decreased by 8% to US\$820m, primarily in RBWM. This was mainly in the credit card portfolios in Mexico due to the managed decline of riskier portfolios and lower delinquency rates as a result of tightened underwriting criteria, better collections practices and improved credit conditions. In our CMB portfolios, loan impairment charges and other credit risk provisions declined by 3% to US\$180m, principally as improved economic conditions resulted in lower specific impairment charges against commercial real estate exposures in Mexico.

In the Rest of Asia-Pacific region, loan impairment charges decreased by 36%, notably in RBWM as certain unsecured lending portfolios continued to be managed down in India. This reduction was partly offset by the non-recurrence of impairment releases in GB&M that occurred

in the first half of 2010.

In Hong Kong, loan impairment charges and other credit risk provisions fell by 60% to US\$25m, primarily from the non-recurrence of a specific impairment charge in GB&M along with higher recoveries and a reduction in the level of collective loan impairment allowances in the first half of 2011. Despite the low level of impairment charges in the region, we remained vigilant on maintaining underwriting standards and continued to focus on maintaining high levels of asset quality.

Global Private Banking	66.1	62.7	68.9
For footnote, see page 81.			

Operating expenses increased by 13% to US\$20.5bn on a reported basis. On an underlying basis, they increased by 10% and 2% compared with the first and second halves of 2010, respectively. There were a number of significant items during the first half of 2011, notably US\$611m of provisions relating to customer redress programmes in the UK, including a provision of US\$455m in respect of the adverse judgement in the Judicial Review relating to sales of PPI. Litigation costs increased in the US. This was offset by a credit of US\$587m resulting from a change in the inflation measure used to calculate the defined benefit obligation in the UK for deferred

pensions. In the first half of 2010, payroll and bonus taxes in the UK and France amounting in aggregate to US\$398m (US\$367m as reported) and the US pension curtailment, which generated accounting credits of US\$148m, were recorded.

The growth in business volumes, which was primarily in Hong Kong, Rest of Asia-Pacific and Latin America and was partly driven by expansion during 2010 and the first half of 2011, was supported by a rise in staff numbers as we recruited selectively. Overall average staff numbers (expressed in full-time equivalents) grew by 3% over the comparable

HSBC HOLDINGS PLC

## **Interim Management Report** (continued)

period and by 2% over the second half of 2010. Higher wages and salaries reflected the rising demand for talent in certain countries, union-agreed salary increases and an acceleration in the expense recognition for deferred bonus awards of US\$138m as employees now have a better understanding of the likely nature of their deferred awards. (See page 80).

GB&M continued to develop the operational capabilities of their Prime Services and equity market products and expanded their Rates and Foreign Exchange e-commerce platforms, which resulted in higher costs.

Marketing and advertising costs increased, primarily in support of the Group brand through the sponsorship of various activities.

In order to improve cost efficiency and organisational effectiveness we initiated a Group-wide review during the period which resulted in restructuring costs of US\$477m, primarily in the US, Latin America and Europe, which included impairments on certain software projects now deferred or cancelled.

## Share of profit in associates and joint ventures

	30 June 2011 US\$m	Half-year to 30 June 2010 US\$m	31 December 2010 US\$m
Associates Bank of Communications Co., Limited Ping An Insurance (Group) Company of China, Limited Industrial Bank Co., Limited The Saudi British Bank Other	642	467	520
	469	377	471
	199	146	181
	171	101	60
	56	84	72
Share of profit in associates Share of profit in joint ventures	1,537	1,175	1,304
	19	12	26
Share of profit in associates and joint ventures	1,556	1,187	1,330

The share of profit in associates and joint ventures was US\$1.6bn, an increase of 31% compared with the first half of 2010 on a reported basis and 27% on an underlying basis. This increase was driven by higher contributions from the mainland China associates as they capitalised on the robust economic conditions in the country.

Our share of profits from the Bank of Communications Co., Limited ( Bank of

Communications ) was 32% higher than in the first half of 2010 from strong loan growth, an improvement in deposit spreads as base rates increased and expanding fee-based revenue streams. Profits from Ping An also rose, driven by strong sales growth and the performance of the insurance, banking and wealth management business. Profits from Industrial Bank Co., Limited (Industrial Bank) similarly increased as a result of continued strong loan growth.

## Tax expense

	30 June	Half-year to 30 June	31 December
	2011	2010	2010
	US\$m	US\$m	US\$m
Profit before tax Tax expense	11,474 (1,712)	11,104 (3,856)	7,933 (990)
Profit after tax	9,762	7,248	6,943
Effective tax rate	14.9%	34.7%	12.5%

Our tax charge in the first half of 2011 was 55.6% lower than in the first half of 2010 on a reported basis. The lower tax charge in the first half of 2011 included the benefit of deferred tax now eligible to be recognised in respect of foreign tax credits, partly offset by a current period tax charge in respect of prior periods.

The tax charge in the first half of 2010 included US\$1.6bn attributable to a taxable gain arising from an internal reorganisation within our North American operations. The resulting reported effective tax rate for the first half of 2011 was 14.9% compared with 34.7% for the first half of 2010

HSBC HOLDINGS PLC

#### **Interim Management Report** (continued)

Movement from 31 December 2010 to 30 June 2011

Total reported assets were US\$2.7 trillion, 10% higher than at 31 December 2010. Underlying assets, excluding the effect of currency movements, increased by 7%. Strong deposit gathering activities across all regions led to significant growth in customer accounts, which enabled us to support our customers borrowing requirements. Growth in trading assets reflected an improvement in trading activity in the first half of 2011 and an increase in our share of global bond issuances for clients. We remain well capitalised and strongly liquid.

The following commentary is on an underlying basis, compared with the balance sheet at 31 December 2010.

#### Assets

Cash and balances at central banks rose by 16% due to higher overnight balances with central banks in North America and Asia. This was partly offset by lower residual cash from daily operations placed with central banks in Europe.

Trading assets grew by 20%. Holdings of debt securities, including government and government agency debt securities, increased, reflecting both our role as primary market maker and customer demand. Settlement account balances, which vary considerably in proportion to the level of trading activity, also grew significantly. Higher reverse repo balances were attributable to an increase in client trading and the development of repo products across the regions.

Financial assets designated at fair value were broadly in line with 31 December 2010 levels.

Derivative assets fell by 4%, largely driven by a reduction in the fair value of interest rate contracts in Europe as the euro yield curve moved upwards, coupled with higher netting as we increased our trading through clearing houses. This was partly offset by an increase in the fair value of foreign exchange contracts due to higher levels of client demand.

Loans and advances to banks increased by 5% due to a rise in term placements with commercial and central banks, particularly in Asia.

Loans and advances to customers rose by 6% with increases in all regions except North America. This reflected targeted customer lending growth in CMB and GB&M, mainly in Europe, Hong Kong and Rest of Asia-Pacific, as the economic environment improved and trade flows rose. Mortgage balances increased in Hong Kong and the

UK as we continued to reposition RBWM towards higher quality secured lending and focus on target markets. This was partly offset by the planned decline in lending balances in the run-off portfolios in North America, coupled with a reduction in credit card advances as our customers continued to pay down their credit card debt.

Financial investments rose by 2% due to purchases of government, government agency and highly rated corporate debt securities, in line with the growth in deposit balances.

Other assets increased by 13% due to a rise in items in the course of collection, reflecting increased activity within the central clearing system, notably in Hong Kong.

#### Liabilities

Deposits by banks increased by 9% due to a rise in funds placed with HSBC by other financial institutions including higher balances relating to our Payments and Cash Management business.

Customer accounts were 5% higher. Strong growth was seen across most customer groups and regions, reflecting an increase in customer numbers and the success of promotional deposit campaigns. Repo balances also rose in Europe, driven by higher customer activity.

*Trading liabilities* grew by 24% due to an increase in settlement account balances which vary in proportion to the volume of trading activity. Repo balances increased to finance a rise in long inventory and client-driven trading positions. Short bond positions also rose, in line with the growth in the Rates portfolio.

Financial liabilities designated at fair value rose by 9% due to debt issuances by HSBC entities in Europe in the first half of 2011. This was partly offset by debt maturities that were not replaced in North America due to lower funding requirements as the consumer finance portfolios continued to decline.

Derivative businesses are managed within market risk limits and, as a consequence, the decrease in the value of *derivative liabilities* broadly matched that of derivative assets.

Debt securities in issue remained in line with 31 December 2010 levels as new issuances in Europe and Latin America were largely offset by lower funding requirements in North America in line with the reduction in lending balances.

Liabilities under insurance contracts grew by 6%, driven by higher sales and renewals of life insurance products in Hong Kong.

26

HSBC HOLDINGS PLC

## Interim Management Report (continued)

Other liabilities rose by 10% due to an increase in items in the course of transmission to other banks in Hong Kong, corresponding with the increase in items in the course of collection above.

## **Equity**

*Total shareholders* equity increased by 6%, driven by profits generated during the period and a reduction in the negative balance of the available-for-sale reserve reflecting a rise in market prices.

In the first half of 2011, the effect of acquisitions and disposals was not significant.

HSBC HOLDINGS PLC

## Interim Management Report (continued)

## **Economic profit/(loss)**

Our internal performance measures include economic profit/(loss), a calculation which compares the return on financial capital invested in HSBC by our shareholders with the cost of that capital. We price our cost of capital internally and the difference between that cost and the post-tax profit attributable to ordinary shareholders represents the amount of economic profit/(loss) generated. In order to concentrate on external factors rather than measurement bases, we emphasise the trend in economic profit/(loss) ahead of absolute amounts.

Our long-term cost of capital is reviewed annually and is 11% for 2011; this remains unchanged from 2010. We use the Capital Asset Pricing Model to determine our cost of capital. The following commentary is on a reported basis.

#### Economic profit/(loss)

The return on invested capital increased by 2.0 percentage points to 11.4%, which is broadly in line with our benchmark cost of capital. Our economic profit was US\$0.3bn, an increase of US\$1.5bn compared with a loss at 30 June 2010, due to an increase in profit attributable to shareholders. This was predominantly driven by a lower tax charge as well as an increase in reported profit before tax due to lower loan impairment charges across all regions, notably in the US, partly offset by an increase in costs.

The increase in average invested capital reflected higher retained earnings and an increase in the average foreign exchange reserves primarily due to the effect of euro and sterling rate movements on our underlying assets.

Retail Banking and Wealth Management	30
Commercial Banking	32
Global Banking and Markets	34
Global Private Banking	36
Other Other	37
Reconciliation of reported and underlying profit/(loss) before tax	37a
Analysis by customer group and global business	38

#### **Summary**

HSBC s senior management reviews operating activity on a number of bases, including by geographical region and by customer group and global business. Capital resources are allocated and performance is assessed primarily by geographical region, as presented on page 41.

In addition to utilising information by geographical region, management assesses performance through two customer groups, Retail Banking and Wealth Management ( RBWM ),

(formerly Personal Financial Services ( PFS )) and Commercial Banking ( CMB ), and two global businesses, Global Banking and Markets ( GB&M ) and Global Private Banking ( GPB ). RBWM incorporates the Group s consumer finance businesses.

With effect from 1 March 2011, our Global Asset Management business was moved from GB&M to RBWM. This resulted in a reallocation between the two of US\$181m and US\$140m in profit before tax in the first and second halves of 2010, respectively, and in total assets of US\$3bn and US\$3.3bn at 30 June 2010 and 31 December 2010, respectively. All periods presented have been adjusted accordingly.

The commentaries below present customer groups and global businesses followed by geographical regions. Performance is discussed in this order because certain strategic themes, business initiatives and trends affect more than one geographical region. All commentaries are on an underlying basis (see page 10) unless stated otherwise.

#### Strategic direction

RBWM s aim is to provide consistent and high quality retail banking and wealth management services to our customers. We will provide retail banking services in markets where we already have scale or where scale can be built over time and we will implement standardised distribution and service models to ensure we can deliver them more efficiently. As wealth creation continues to grow in both developed and emerging markets, we will leverage our global propositions such as Premier and our bancassurance and asset management capabilities to deepen our existing customer relationships and the penetration of our wealth management services.

We focus on three strategic imperatives:

developing world class wealth management for retail customers;

leveraging global expertise in retail banking; and

portfolio management to drive superior returns.

For footnotes, see page 81.

#### **Review of performance**

As announced last year, RBWM was created with effect from 1 March 2011, bringing together the PFS, insurance and Global Asset Management businesses under a unified management structure. This will enable us to drive our strategy of streamlining our retail banking businesses and developing world class wealth management services for retail customers.

RBWM reported a profit before tax of US\$3.1bn in the first half of 2011, more than double that in the first half of 2010. This was largely attributable to a decline in loan impairment charges, particularly in the US, where delinquency trends continued to improve following the managed reduction in the run-off portfolios.

We continued to rebalance revenue and profit contribution with growth in our priority markets, offsetting declines in run-off portfolios in the US.

Revenue increased by 3%, as income rose in Hong Kong and Rest of Asia-Pacific from an increase in the sales of wealth management products. In Europe, revenue rose as a result of increased lending, notably in mortgages, and net insurance income, driven by successful targeted sales campaigns, particularly in France. Net interest income increased in Rest of Asia-Pacific and Latin America from higher volumes. Deposit spreads increased in parts of Rest of Asia-Pacific due to increases in interest rates, particularly in mainland China, India and Malaysia. This was partly offset by reductions in North America due to lower lending balances in both the run-off portfolio and in the Card and Retail Services business. In a number of markets, particularly Mexico, India and the UAE, we continued to reposition our lending portfolio to lower risk, lower yielding assets. Europe, Hong Kong and Rest of Asia-Pacific benefited from an increase in PVIF due to refinement to the calculation of the PVIF asset (see footnote 27).

Loan impairment charges fell by 34%, reflecting the managed decline of riskier portfolios, and enhanced collection processes and underwriting practices. The loan book continued to decline in the US, and some high risk portfolios in Latin America, Rest of Asia-Pacific and Middle East and North Africa were managed down.

Operating expenses increased by 10% to US\$10.7bn. The rise in costs resulted mainly from increases in front office headcount in Hong Kong, Rest of Asia-Pacific and Brazil as we

30

HSBC HOLDINGS PLC

## **Interim Management Report** (continued)

invested in these key growth markets, coupled with wage inflation in certain markets. Operating expenses included US\$589m of provisions relating to customer redress programmes in the UK, including a provision in respect of the adverse judgement in the Judicial Review relating to sales of PPI. Litigation provisions increased in the US. Operating costs also rose as we wrote off certain previously capitalised software development expenses and incurred other restructuring costs as part of our new strategic priorities. This was partly offset by a credit of US\$264m resulting from a change in the inflation measure used to calculate the defined benefit obligation in the UK for deferred pensions.

The share of profits from associates increased by 18%, mainly in Ping An due to an increase in profits driven by strong sales growth and the performance of its wealth management businesses and banking businesss.

#### Developing world class wealth management for retail customers

Our World Selection global investment offering continued to grow and total assets under management were US\$9.0bn at 30 June 2011, compared with US\$7.2bn at 31 December 2010.

Our insurance operations performed strongly in the first half of 2011, with increased net earned premiums compared with 2010. This was driven by a growing demand for life insurance products. The improved outlook for investment markets in 2011 generated increased demand for wealth products in Asia and a rise in new business sales in Hong Kong. In Latin America, increased premium income reflected an improving economic environment and investment in the sales network, notably in Brazil. The contribution from our investment in Ping An also increased, driven by growth in its life insurance business.

Global Asset Management increased management fees by 6% on the first half of 2010, most notably in Europe, Hong Kong and Latin America. Funds under management ( FuM ) reached a record period-end high of US\$449bn of which emerging markets FuM were US\$135bn. This represented growth in

total FuM of 10% and emerging markets FuM of 14% compared with the first half of 2010. The increasing focus on our wealth management proposition generated US\$4.4bn of net inflows in the first half of 2011 compared with US\$1.3bn in 2010.

#### Leveraging global expertise in retail banking

We enhanced our services with a number of innovative developments, including the launch of renminbi-denominated deposits in an additional seven markets across Asia in the first half of 2011, and extended our mobile banking solution to Canada, Malaysia and Singapore.

We continued to grow mortgage lending in the UK and in Asia, particularly in Hong Kong where our volume growth in mortgages enabled us to maintain our market leadership. In Australia, Singapore and Malaysia we increased mortgage balances through targeted marketing campaigns. Customer account balances also grew in Rest of Asia-Pacific, reflecting an increase in customer numbers, and in Europe due to competitive pricing and acquisition campaigns.

#### Portfolio management to drive superior returns

During the first half of 2011, we continued to reposition our operations and optimise our businesses. In line with this, in April, we announced the sale of HSBC Afore, our pension administration business in Mexico, which is expected to be completed in the third quarter of 2011. Also in April, following a strategic review of our operations in Russia, we announced our withdrawal from the retail business, and have now agreed the sale of some elements of this business.

In May 2011, we sold our Insurance Captive Management business which provided third party property and third party insurance claim administration services. This is part of our strategy to focus our insurance business on connectivity to core banking customers and wealth management product offerings.

In July, we announced the sale of our UK motor insurance portfolio and the closure of retail banking operations in Poland.

#### Strong revenue growth from

#### the sale of GB&M products

#### Strategic direction

CMB aims to be the banking partner of choice for international businesses by building on our rich heritage, international capabilities and relationships to enable connectivity and support trade and capital flows around the world, thereby strengthening our leading position in international business and trade.

#### We focus on four strategic imperatives:

focus on faster-growing markets while connecting revenue and investment flows with developed markets;

enhance collaboration with GB&M, providing capital market access and a wider range of sophisticated risk management and liquidity products to the growing mid-market corporates;

capture growth in international small and medium-sized enterprises; and

drive efficiency gains through adopting a global operating model.

For footnotes, see page 81.

#### **Review of performance**

In the first half of 2011, CMB reported a profit before tax of US\$4.2bn, US\$1.0bn or 31% higher than in the first half of 2010. On an underlying basis, profit before tax also increased by 31%, reflecting higher lending balances and an expansion in world trade, in particular in the faster-growing markets. Income from our associate, Bank of Communications, also increased reflecting strong loan growth and wider spreads. Profit before tax grew in all regions except North America where we are investing in areas of strong international connectivity.

Customer lending balances rose from the end of 2010 by 9% to US\$268bn, primarily in Asia, Europe and Latin America, driven by the expanding trade flows and increased business activity. Demand for credit remained strong in Hong Kong, Malaysia and Brazil. Lending balances also increased in the UK by 2% to US\$69.9bn.

Credit quality improved as our exposure to higher risk portfolios was managed down and the economic environment generally improved. As a result, loan impairment charges and other credit risk provisions declined by 14%. In the first half of 2011, there was a marked decline in loan impairment charges against specific exposures in Europe while, in North America, there were notable falls in loan impairment charges.

In the first half of 2011, CMB grew customer account balances by 3% to US\$301bn, with significant growth in Asia and Latin America driven partly by new customer acquisitions.

Shift towards faster-growing markets while connecting with developed markets

Revenue increased by 12%, primarily in Latin America (specifically Brazil, Mexico and Argentina), Hong Kong and the Rest of Asia-Pacific region (specifically mainland China, India and Singapore). This was driven by lending to meet higher credit demand as a result of improved trade and business volumes, and deposit balance growth. Net fee income also increased from rising sales of trade, payments and cash management, investment and Global Markets products.

In line with our aspiration to double our trade revenue over the medium term, we merged our Trade and Supply Chain and Receivables Finance businesses, allowing us to build on the scale of our trade business to expand our receivables

HSBC HOLDINGS PLC

#### **Interim Management Report** (continued)

finance offerings from the existing base of 23 countries.

In the first half of 2011, our trade revenue was US\$1bn, an increase of 26% compared with the first half of 2010. Significantly, growth in our trade revenue was more than eight times that of world GDP growth, reflecting our concentration in the faster growing markets.

Our geographic presence across both mature and faster-growing markets allowed us to capitalise on the rising levels of international trade and investment flows. We achieved a significant number of mandates to provide cross-border payments and cash management solutions for our corporate customers, reinforcing the importance of our geographic network to this customer segment.

In the first half of 2011, the number of successful cross-border referrals increased by 43% compared with the first half of 2010, with a transaction value of over US\$12bn. Notably, 66% of this increase came from mainland China, demonstrating its significance to CMB.

We continued to strengthen our position as a leading international bank for renminbi product offerings through product innovation in over 50 locations on six continents. In the first half of 2011, we were the first international bank to provide commercial banking customers with a dedicated renminbi Business Card in Hong Kong, minimising their foreign exchange risk, and in Singapore we expanded our renminbi capabilities, including an e-platform for payments in the currency.

#### Enhance collaboration with GB&M

Our customers benefit from the diversity of products and services available from a universal bank. This includes Global Markets products provided to CMB customers with more complex requirements, as well as GPB and Premier services for our business customers personal wealth requirements.

CMB revenue generated from the sale of Global Markets products grew strongly compared with the first half of 2010, with strong momentum in Asia and Latin America.

## Capture growth in international SMEs

We are focusing our Business Banking propositions on attracting the growing number of internationally aspirant small and medium-sized enterprises (SME s). 82% of SMEs in Hong Kong rate us as the best bank for international business and in the UK we have over 130 International Commercial Managers to support the Business Banking segment.

In the Middle East and North Africa, we pledged a second US\$100m during the period to SME customers in the UAE engaged in cross-border business and the amount has been fully utilised.

In Mexico, we launched the HSBC Business Card to facilitate working capital requirements and more effectively service the needs of our SME client base. Despite muted demand, CMB increased gross new lending to UK SMEs by 20% as we continued to support this important

sector and assist new business start-ups. We are in line with our targets as set out in the Merlin Agreement between the major UK banks and the UK government.

Drive efficiency gains through adopting a global operating model

We continue to enhance and tailor CMB s direct banking solutions to improve our customer experience. We recognise our customers are increasingly more technologically oriented and CMB will continue to invest in and expand the transactional functionality and information services we offer. For example, in the UK, we were one of the first international financial institutions to offer a dedicated Business Mobile Banking iApp, achieving almost 70,000 downloads in the first month. For our corporate segment customers, HSBCnet for Mobile was piloted in 40 countries in the first half of 2011, with a further 25 countries due to go live by the end of 2011, subject to regulatory approvals.

Operating expenses rose by 3% to US\$3.5bn. Excluding a credit of US\$212m resulting from a change in the inflation measure used to calculate the defined benefit obligation in the UK for deferred pensions, they increased by 9% to US\$3.7bn. On the same basis, after adjusting for this credit, our cost efficiency ratio improved from 49.2% to 47.8%, reflecting a disciplined approach to managing the cost base. In the Rest of Asia-Pacific region, the cost efficiency ratio improved by 2 percentage points to 47.2% despite inflationary pressures and the addition of almost 200 new staff as we expanded our business in this strategically important market.

#### Strategic direction

GB&M continues to pursue its well established emerging markets-led and financing-focused strategy, with the objective of being a leading global wholesale bank. This strategy has evolved to include a greater emphasis on connectivity, leveraging the Group s extensive distribution network.

We focus on four strategic imperatives:

reinforce client coverage and client-led solutions for major government, corporate and institutional clients;

continue to defend core, enhance existing and build new capabilities in major hubs to support the delivery of an integrated suite of products and services;

enhance collaboration with other customer groups, particularly CMB, to deliver incremental revenues; and

focus on business re-engineering to ensure the efficiency of our platform.

For footnotes, see page 81.

#### **Review of performance**

GB&M reported profit before tax of US\$4.8bn, 12% lower than in the first half of 2010 as a result of the challenging trading environment, which was dominated by uncertainty around eurozone sovereign debt. On an underlying basis, profit before tax declined by 16% as a result of lower revenues in legacy Credit, and in Balance Sheet Management, coupled with the cost of continued strategic investment. These factors were partly offset by higher revenues in Global Banking, Equities and Securities Services and a significant decrease in loan impairment charges.

We continued to leverage our unique geographical franchise and global connectivity, particularly focused on South-South trade corridors, to capitalise on opportunities presented by growing international trade flows. We also focused on connecting with other areas of HSBC, notably CMB, where gross revenues from the cross-sale of GB&M products increased, and GPB through the Family Office partnership. Investment in people and infrastructure continued during the first half of 2011 to enhance our product offerings. These strategic initiatives include the development of Prime Services and equity market capabilities together with the expansion of the Rates and Foreign Exchange e-commerce platforms which remain key to supporting our customer-focused strategy over the long term through enhanced competitive positioning.

Net operating income before loan impairment charges and other credit risk provisions decreased by 9%. This was primarily due to lower income in Balance Sheet Management, reflecting the continuing effect of prevailing low interest rates and flattening yield curves. Legacy Credit was affected by lower recoveries generated from the securities investment conduits, a reduction in effective yields and lower holdings of legacy assets. Revenues in Credit were also affected by the re-emergence of uncertainty in the eurozone sovereign credit markets in the

second quarter of 2011. Trading income from structured liabilities declined, mainly in Rates, due to lower favourable fair value movements as credit spreads widened to a lesser extent than a year ago; a gain of US\$60m compared with a reported gain of US\$255m in the first half of 2010.

Loan impairment charges and other credit risk provisions were significantly lower than both halves of 2010. Loan impairment charges were US\$70m compared with the US\$233m in the

Total operating income	9,689	10,320	8,592

For footnotes, see page 81.

first half of 2010, driven by a general improvement in the credit environment and the non-recurrence of significant impairment charges taken against a small number of clients in 2010. Credit risk provisions fell by US\$29m to US\$263m, despite a US\$65m charge recorded in respect of Greek sovereign debt in the first half of 2011. Asset-backed securities accounted for US\$238m of US\$263m, compared with impairments of US\$256m reported in the first half of 2010.

Operating expenses increased, reflecting continued investment in GB&M platforms to deliver revenue growth and improved process automation in light of increasing competition and changing regulatory demands. Performance costs rose due to increased amortisation charges for previous years—performance shares and accelerated expense recognition for future deferred bonus awards. Offsetting these factors was a credit of US\$111m in the first half of 2011 arising from a change in the inflation measure used to calculate the defined benefit obligation in the UK for deferred pensions. In addition, the first half of 2010 included the cost of payroll and bonus taxes in the UK and

France on certain bonuses paid in respect of 2009. The cost efficiency ratio, at 50.2%, was 6.2 percentage points higher than in the first half of 2010 reflecting both our investment in the business and the effect of prevailing market conditions on income.

Global Markets delivered first half revenues in excess of US\$5bn for the third consecutive year in a very uncertain trading environment. The decrease compared with the first half of 2010 was mainly due to a decline in legacy Credit, as noted above. Credit revenues were also affected by the re-emergence of eurozone sovereign debt concerns in the second quarter of 2011, resulting in a decline in client activity and a general widening of credit spreads. These were partly offset by improved performance in primary markets as HSBC increased its market share of global bond issuance volumes. Revenues in Rates declined due to lower favourable fair value movements on structured liabilities, partly offset by higher customer demand for structured products. Equities revenues rose as improved competitive positioning helped capture increasing client flows, particularly during the global rally in the first quarter of 2011. Securities Services revenues increased by 14%, benefiting from balance growth in Europe, higher spreads in Asia and Latin America and increased transaction volumes.

Global Banking revenues rose by 12% as it maintained its focus on deepening key client relationships. This growth was led by continued momentum in project and export finance. Lending revenues were broadly in line, as higher income fuelled by asset growth in Asia, was offset by narrower spreads and limited demand in Europe and North America as clients in developed markets focused on refinancing existing facilities. Payments and Cash Management revenue rose by 24%, driven by Asia, with higher net interest income reflecting strong growth in deposit balances and wider spreads following interest rate rises in certain markets; fee income also benefited from growth in transaction volumes.

Revenues in Balance Sheet Management continued to reduce as higher-yielding positions matured and the opportunity for maintaining yields on reinvestment was limited by the prevailing low interest rate environment. Gains on disposal of securities in the available-for-sale portfolio also fell from the high level of realised gains primarily in Hong Kong and Rest of Asia-Pacific in the first half of 2010.

#### Strategic direction

GPB serves high-net worth customers with complex and international needs. We focus on four strategic imperatives:

further expand our business in the domestic and faster-growing markets through the recruitment of front office staff and the delivery of faster-growing market products to clients in developed markets;

continue to leverage our intra-Group strengths, including referrals with CMB and RBWM and our Family Office Partnership with GB&M;

increase our managed assets, through building on our expertise in alternative investments, faster-growing markets and foreign exchange; and

continue to invest in front-office systems with strong data security, while maintaining a focus on risk management and cost control. For footnotes, see page 81.

#### **Review of performance**

Reported profit before tax was US\$552m, marginally lower than in the first half of 2010 on both a reported and an underlying basis, as strong revenue growth, driven by increases in client assets under management and activity levels, was offset by a rise in costs and impairment charges.

Although clients remained cautious in the prevailing market environment, risk appetite showed signs of improvement. Net fee income rose as a result of higher transaction volumes and growth in average client assets under management, driven by net new money inflows and our focus on faster growing markets. Demand for lending continued to recover which, together with improved spreads, led to higher net interest income.

The increase in operating expenses was primarily driven by the strengthening of the Swiss franc (see footnote 51), which accounts for a significant proportion of our cost base, together with higher costs incurred as a result of the developing regulatory environment, the hiring of front office staff to cover faster growing markets and an acceleration in the expense recognition for deferred bonus awards. A restructuring programme started in the first half of 2011, the benefits of which are expected in future reporting periods.

Loan impairment charges and other credit risk provisions increased, due to the impairment of available-for-sale debt securities. Client assets

30 Jun	Half-year to 30 Jun	31 Dec
2011	2010	2010
US\$bn	US\$bn	US\$bn

At beginning of period Net new money Value change Exchange/other	390	367	354
	13	7	6
	1	(4)	17
	12	(16)	13
At end of period	416	354	390

Reported client assets, which include funds under management and cash deposits, increased due to US\$13bn of net new money inflows, together with favourable foreign exchange and market movements. Net new money continued to benefit from intra-Group referrals and strong inflows from Asia and Latin America. As a result, reported Total client assets, the equivalent to many industry definitions of assets under management which includes some non-financial assets held in client trusts, increased by 11% since 31 December 2010 to US\$556bn.

#### in Latin America and centralisation of processes

For footnotes, see page 81.

Notes

Reported loss before tax of US\$1.2bn compared with a profit before tax of US\$540m in the first half of 2010. This included losses of US\$143m on the fair value of HSBC s own debt attributable to a narrowing in credit spreads compared with gains of US\$1.1bn in the first half of 2010. In addition, reported profits included a gain of US\$62m on the reclassification of Bao Viet as an associate in the first half of 2010 and accounting gains of US\$188m and US\$181m in the first halves of 2010 and 2011, respectively, arising from the dilution of our shareholding in Ping An following its issue of share capital to third parties. On an underlying basis, the loss before tax increased by 57% to US\$1.2bn. For a description of the main items reported under Other, see footnote 38.

Net interest expense substantially comprised interest expense on long-term debt issued by HSBC Holdings.

Net trading expense fell by US\$350m, primarily driven by lower adverse fair value movements on non-qualifying hedges, mainly cross-currency swaps used to economically hedge fixed rate long-term debt issued by HSBC Holdings. This was the result of a less pronounced decrease in long-term US interest rates relative to sterling and euro interest rates than in the first half of 2010.

Net expense from financial instruments designated at fair value of US\$143m compared with income of US\$112m in the first half of 2010 due to adverse fair value movements from interest and exchange rate ineffectiveness in the hedging of long-term debt designated at fair value issued by HSBC Holdings and our European and North American subsidiaries.

Other operating income reduced as gains of US\$250m recognised from the sale and leaseback of our Paris and New York headquarters did not recur.

Operating expenses increased by 18% to US\$3.3bn driven by restructuring costs in Latin America of US\$149m as we took measures to improve efficiencies and processes in order to reduce the future cost base of our operations. The increasing number of centralised operational and migrated activities also contributed to higher costs in the period. These costs were previously incurred directly by customer groups, but are now recorded in Other and charged to customer groups through a recharge mechanism with income reported as Other operating income.
