FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q contains statements reflecting assumptions, expectations, projections, intentions or beliefs about future events that are intended as forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. All statements included in this report, other than statements of historical fact, that address activities, events or developments that we expect, believe or anticipate will or may occur in the future are forward-looking statements. These statements appear in a number of places, including Management's Discussion and Analysis of Financial Condition and Results of Operations. These statements represent our reasonable judgment on the future based on various factors and using numerous assumptions and are subject to known and unknown risks, uncertainties and other factors that could cause our actual results and financial position to differ materially from those contemplated by the statements. You can identify these statements by the fact that they do not relate strictly to historical or current facts. They use words such as anticipate, believe, estimate, expect, forecast, may, should, plan, project and other words of similar meaning. In particular, these include, but are not limited to, statements relating to the following:

projected operating or financial results, including anticipated cash flows from operations and asset sale proceeds;

expectations regarding capital expenditures, interest expense and other payments;

our beliefs and assumptions relating to our liquidity position, including our ability to adapt to changing market conditions; and

our ability to compete effectively for market share with industry participants.

Any or all of our forward-looking statements may turn out to be wrong. They can be affected by inaccurate assumptions or by known or unknown risks, uncertainties and other factors including, among others:

supply, demand, prices and other market conditions for steel and other commodities;

the timing and extent of changes in commodity prices;

the effects of competition on our business lines;

the condition of the steel and metal markets generally, which will be affected by interest rates, foreign currency fluctuations and general economic conditions;

the ability of our counterparties to satisfy their financial commitments;

tariffs and other government regulations relating to our products and services;

adverse developments in our relationship with both our key employees and unionized employees;

Edgar Filing: METALS USA HOLDINGS CORP. - Form 10-Q

operational factors affecting the ongoing commercial operations of our facilities, including catastrophic weather-related damage, regulatory approvals, permit issues, unscheduled blackouts, outages or repairs, unanticipated changes in fuel costs or availability of fuel emission credits or workforce issues;

our ability to operate our businesses efficiently, manage capital expenditures and costs (including general and administrative expenses) and generate earnings and cash flow;

restrictive covenants in our indebtedness that may adversely affect our operational flexibility;

general political conditions and developments in the United States and in foreign countries whose affairs affect supply, demand and markets for steel, other metals and metal products;

our ability to retain key employees; and

our expectations with respect to our acquisition activity.

In addition, there may be other factors that could cause our actual results to be materially different from the results referenced in the forward-looking statements, some of which are included elsewhere in this report, including Management's Discussion and Analysis of Financial Condition and Results of Operations. Many of these factors will be important in determining our actual future results. Consequently, no forward-looking statement can be guaranteed. Our actual future results may vary materially from those expressed or implied in any forward-looking statements. All forward-looking statements contained in this report are qualified in their entirety by this cautionary statement. Forward-looking statements speak only as of the date they are made, and we disclaim any obligation to update any forward-looking statements to reflect events or circumstances after the date of this report, except as otherwise required by applicable law.

METALS USA HOLDINGS CORP. AND SUBSIDIARIES

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(dollars in millions)

1. Basis of Presentation and Summary of Significant Accounting Policies

Metals USA Holdings Corp. (Metals USA Holdings) and its wholly-owned subsidiaries, Flag Intermediate Holdings Corporation (Flag Intermediate) and Metals USA, Inc. (Metals USA) are referred to collectively herein as the Company, we or our. Metals USA prior to its November 30, 2005 acquisition by Apollo Management V L.P. (Apollo Management and together with its affiliated investment entities Apollo or Apollo V) (the Merger) is referred to herein as the Predecessor Company. The condensed consolidated financial statements include the accounts of Metals USA Holdings, Flag Intermediate, and Metals USA and its subsidiaries. Intercompany accounts and transactions have been eliminated in the condensed consolidated financial statements.

The interim condensed consolidated financial statements included herein are unaudited; however, they include adjustments of a normal recurring nature which, in our opinion, are necessary to present fairly the interim condensed consolidated financial information as of and for the periods indicated. Accounting measurements at interim dates inherently involve greater reliance on estimates than at year-end. The results of operations for the interim periods presented are not necessarily indicative of the results to be expected for the entire year. These statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Company s Annual Report on Form 10-K for the fiscal year ended December 31, 2010.

Use of Estimates The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (GAAP) requires management to make estimates and assumptions that affect (i) the reported amounts of assets and liabilities, (ii) the disclosure of contingent assets and liabilities known to exist as of the date the financial statements are published, and (iii) the reported amount of net sales and expenses recognized during the periods presented. Adjustments made with respect to the use of estimates often relate to improved information not previously available. Uncertainties with respect to such estimates and assumptions are inherent in the preparation of financial statements; accordingly, actual results could differ from these estimates.

Fair Value of Financial Assets and Liabilities Accounting Standards Codification (ASC) Topic 820 Fair Value Measurements and Disclosures (ASC 820) defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. ASC 820 classifies the inputs used to measure fair value into the following hierarchy:

Level 1 Quoted prices in active markets for identical assets or liabilities.

Level 2 Observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. The Company s interest rate swap derivatives are valued using market data which is derived by combining certain inputs with quantitative models and processes to generate interest rate forward curves and discount factors (see Note 5).

Level 3 Unobservable inputs that are supported by little or no market activity, but which are significant to the fair value of the assets or liabilities as determined by market participants.

Table of Contents**METALS USA HOLDINGS CORP. AND SUBSIDIARIES****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

(dollars in millions)

Liabilities measured at fair value on a recurring basis are summarized below:

	September 30, 2011	Fair Value Measurements at Reporting Date Using		
		Level 1	Level 2	Level 3
Interest rate swaps	\$ 0.6	\$	\$ 0.6	\$
	December 31, 2010			
Interest rate swaps	\$ 2.3	\$	\$ 2.3	\$

Our receivables, payables, prepayments and accrued liabilities are current assets and obligations and, accordingly, the recorded values are believed by management to approximate fair value. Our 11^{1/8}% Senior Secured Notes due 2015 (the Metals USA Notes) are thinly traded public debt instruments; accordingly, their market prices at any balance sheet date may not be representative of the prices which would be derived from a more active market. The fair value of publicly traded debt is determined based on quoted market prices. The fair value of the Company's debt that is not traded and is fixed-rate is estimated by discounting the interest payments and principal amount at the Company's current borrowing rate (yield to maturity). For floating rate debt that is not traded, fair value is not sensitive to interest rates since coupons float with Treasury or London Interbank Offered Rate (LIBOR) yields, and book value is a reasonable approximation of fair value after considering the stability of the Company's default risk. The estimated fair value of current and long-term debt at September 30, 2011 and December 31, 2010 was \$488.6 and \$357.5, respectively.

New Accounting Pronouncements

In December 2010, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2010-29 *Business Combinations (Topic 805): Disclosure of Supplementary Pro Forma Information for Business Combinations* (ASU 2010-29) which amended ASC Topic 805 *Business Combinations* to specify that if a public entity presents comparative financial statements, the entity should disclose revenue and earnings of the combined entity as though the business combination that occurred during the year had occurred as of the beginning of the comparable prior annual reporting period only. The ASU also expands the supplemental pro forma disclosures under ASC Topic 805 to include a description of the nature and the amount of material, nonrecurring pro forma adjustments directly attributable to the business combination included in the reported pro forma revenue and earnings. The ASU is effective prospectively for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2010. We have disclosed the required information in accordance with ASU 2010-29 as it relates to the Trident acquisition described in Note 2 below.

In June 2011, the FASB issued ASU No. 2011-05 *Comprehensive Income (Topic 220): Presentation of Comprehensive Income* (ASU 2011-05) which will amend some of the guidance in ASC Topic 220 *Comprehensive Income* regarding how companies must present comprehensive income. The main provisions of ASU 2011-05 provide that an entity that reports items of other comprehensive income has the option to present comprehensive income in either a single statement or two separate statements. A single statement would contain the components of net income and total net income, the components of other comprehensive income and total other comprehensive income, and a total for all comprehensive income. In a two-statement approach, an entity must present the components of net income and total net income in the first statement. That statement must be immediately followed by a financial statement that presents the components of other comprehensive income, a total for other comprehensive income, and a total for all comprehensive income. The ASU is intended to increase

Table of Contents

METALS USA HOLDINGS CORP. AND SUBSIDIARIES

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(dollars in millions)

the prominence of other comprehensive income in financial statements and to facilitate convergence of U.S. GAAP and International Financial Reporting Standards. The amendments in ASU 2011-05 are to be applied retrospectively. For public entities, the ASU is effective for fiscal years and interim periods within those years beginning after December 15, 2011. The Company expects to include the expanded disclosures about comprehensive income within its financial statements beginning in the first quarter of 2012. ASU 2011-05 impacts presentation only and will have no effect on the Company's financial condition, results of operations, or cash flows.

In September 2011, the FASB issued ASU No. 2011-08 *Intangibles - Goodwill and Other (Topic 350): Testing Goodwill for Impairment* (ASU 2011-08) which amends the guidance in ASC Topic 350 *Intangibles - Goodwill and Other* on testing goodwill for impairment. ASU 2011-08 permits an entity to make a qualitative assessment of whether it is more likely than not that a reporting unit's fair value is less than its carrying amount before applying the two-step goodwill impairment test. If an entity concludes that it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, it would not be required to perform the two-step impairment test for that reporting unit. The ASU's objective is to simplify how an entity tests goodwill for impairment. ASU 2011-08 is effective for annual and interim goodwill impairment tests performed in fiscal years beginning after December 15, 2011. Early adoption is permitted. The Company does not expect the provisions of ASU 2011-08 to have a material impact on its financial statements.

2. Acquisitions

The Richardson Trident Company

On March 11, 2011, we acquired all of the issued and outstanding stock of The Richardson Trident Company (Trident). Trident's results of operations have been included in the condensed consolidated statement of operations since the date of acquisition. Trident is a general line metal service center with fabricating capabilities designed to service the oil and gas industry, and is also a wholesale distributor of metals, plastics and electronic parts. Trident operates under The Richardson Trident Company and The Altair Company trade names. Trident's principal facility is in Richardson, Texas with branch locations in Houston, Austin, El Paso, Harlingen and Odessa, Texas; Tulsa, Oklahoma; Olathe, Kansas; Los Angeles, California; Boston, Massachusetts and Thomasville, Georgia. The Company paid \$90.4 in cash for the stock of Trident, which included \$54.2 for the repayment of Trident debt, and \$1.8 in the form of a note payable, for a total purchase price of \$92.2. The purchase was funded with borrowings under our \$500.0 amended and restated senior secured asset-based credit facility due 2015 (the ABL facility).

The excess of the aggregate purchase price over the estimated fair value of the net assets acquired was \$8.2, which was allocated to goodwill. Goodwill arising from the acquisition consists largely of the synergies and economies of scale expected from combining the operations of Metals USA and Trident. All of the goodwill was assigned to the Company's Flat Rolled and Non-Ferrous Segment (see Note 4). The Trident acquisition was a taxable business combination and as such, the entire amount of the goodwill recognized is expected to be deductible for income tax purposes.

Table of Contents**METALS USA HOLDINGS CORP. AND SUBSIDIARIES****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

(dollars in millions)

The estimated amount of goodwill and related allocations of the fair values assigned to assets acquired and liabilities assumed are based on preliminary data and are subject to change based on the final valuation of tangible and intangible assets. The following table presents the allocation of the acquisition cost to the assets acquired and liabilities assumed, based on their estimated fair values:

Cash	\$ 2.3
Accounts receivable, trade	17.2
Inventories	18.1
Other current assets	0.1
Property and equipment	47.8
Customer list intangible asset	19.0
Trade name intangible asset	3.3
Goodwill	8.2
Total assets acquired	116.0
Accounts payable and accrued liabilities	23.8
Note payable	1.8
Total liabilities assumed	25.6
Net assets acquired	\$ 90.4

Results for the nine months ended September 30, 2011 include operating results from the Trident acquisition from the date of the acquisition closing. Trident contributed \$42.6 and \$90.9 of incremental sales and \$3.1 and \$6.1 of incremental operating income for the three and nine months ended September 30, 2011, respectively. Acquisition-related costs for the nine months ended September 30, 2011 amounted to approximately \$1.5 and are included in selling, general and administrative expenses in the Company's condensed consolidated statement of operations. The customer list intangible asset will be amortized on an accelerated basis over twelve years based on its estimated useful life.

Trident provides a broad range of metals and processing services with a product mix that emphasizes aluminum, stainless steel and nickel. The majority of Trident's customer base operates in the oil and gas services sector. Trident also serves customers in the aerospace, defense and transportation industries. Processing services include precision sawing, boring, honing, slitting, sheeting, shearing and turning. Trident also offers supply chain solutions such as just-in-time delivery and value-added components required by original equipment manufacturers. As a result of the acquisition, we expect to increase our non-ferrous and value-added processing product and service offerings in the geographic areas and end markets that Trident currently serves.

The following unaudited pro forma information presents our consolidated results of operations as if the Trident acquisition had occurred on January 1, 2010, after the effect of certain adjustments, including increased depreciation expense resulting from recording fixed assets at fair value, interest expense on the acquisition debt, amortization of certain identifiable intangible assets, severance costs for certain Trident employees that were terminated as of the acquisition date, certain other non-recurring costs that we will not incur after taking control of Trident, and a provision for income taxes for Trident, which was previously treated as an S-Corporation.

**Three Months Ended
September 30,**

**Nine Months Ended

Table of Contents**METALS USA HOLDINGS CORP. AND SUBSIDIARIES****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(dollars in millions)*****Ohio River Metal Services***

On December 31, 2010, we acquired all of the issued and outstanding stock of Ohio River Metal Services (ORMS), located in Jeffersonville, Indiana. The results of operations of ORMS have been included in the condensed consolidated statement of operations since the date of acquisition. ORMS operates a flat rolled metal service center that provides metal products and processing services to customers throughout the Ohio River Valley area. The purchase price for ORMS was \$17.9, including the assumption of \$8.4 of long-term debt, and was funded with borrowings under the ABL facility. The excess of the aggregate purchase price over the estimated fair value of the net assets acquired was \$0.4, which was allocated to goodwill. The following table presents the allocation of the acquisition cost to the assets acquired and liabilities assumed, based on their estimated fair values:

Cash	\$ 0.5
Accounts receivable, trade	2.6
Inventories	4.9
Other current assets	0.1
Property and equipment	18.3
Fulfillment contract intangible asset	0.8
Goodwill	0.4
 Total assets acquired	 27.6
 Accounts payable and accrued liabilities	 5.7
Long-term debt	8.4
Interest rate swaps	0.6
Deferred tax liabilities	3.3
Other noncurrent liabilities	0.1
 Total liabilities assumed	 18.1
 Net assets acquired	 \$ 9.5

The fulfillment contract intangible asset will be amortized on a straight-line basis over fifteen years based on its estimated useful life. The pro forma effects of the ORMS acquisition would not have been material to our results of operations for the three and nine months ended September 30, 2010 and, therefore, are not presented.

Table of Contents**METALS USA HOLDINGS CORP. AND SUBSIDIARIES****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

(dollars in millions)

J. Rubin & Co.

On June 28, 2010, we acquired all of the issued and outstanding stock of J. Rubin & Co. (J. Rubin) for \$19.0. J. Rubin's results of operations have been included in the condensed consolidated statement of operations since the date of acquisition. J. Rubin is a metal service center business that operates in Illinois, Wisconsin and Minnesota with a broad product mix consisting of carbon steel bars, carbon plate and laser-cut flat-rolled products. J. Rubin's product mix and processing services are provided to a diverse range of end markets. The purchase price was funded with existing cash, \$17.8 of which was paid at closing and \$1.2 of which was placed in escrow to secure the seller's indemnity obligations. The purchase price included \$6.0 for the repayment of J. Rubin debt at closing. The excess of the aggregate purchase price over the estimated fair value of the net assets acquired was \$3.5, which was allocated to goodwill. The following table presents the allocation of the acquisition cost to the assets acquired and liabilities assumed, based on their estimated fair values:

Accounts receivable, trade	\$ 3.8
Inventories	5.8
Other current assets	0.2
Property and equipment	9.7
Customer list intangible asset	2.0
Goodwill	3.5
Total assets acquired	25.0
Accounts payable and accrued liabilities	2.5
Deferred tax liabilities	3.5
Total liabilities assumed	6.0
Net assets acquired	\$ 19.0

The customer list intangible asset is being amortized on an accelerated basis over ten years based on its estimated useful life. The pro forma effects of the J. Rubin acquisition would not have been material to our results of operations for the three and nine months ended September 30, 2010 and, therefore, are not presented.

3. Inventories

Inventories consist of the following:

	September 30, 2011	December 31, 2010
Raw materials		
Plates and Shapes	\$ 151.5	\$ 138.6
Flat Rolled and Non-Ferrous	177.1	108.3
Building Products	5.6	5.4

Edgar Filing: METALS USA HOLDINGS CORP. - Form 10-Q

Total raw materials	334.2	252.3
Work-in-process and finished goods		
Flat Rolled and Non-Ferrous	37.6	29.3
Building Products	11.9	9.2
Total work-in-process and finished goods	49.5	38.5
Total inventories	\$ 383.7	\$ 290.8

(dollars in millions)

4. Goodwill and Intangible Assets

The changes in the carrying amounts of goodwill by segment for the nine months ended September 30, 2011 are as follows:

	As of December 31, 2010	Acquisitions/ Purchase Accounting Adjustments	Realization of Tax Benefits	As of September 30, 2011
Plates and Shapes				
Gross Goodwill and Carrying Amount of Goodwill	\$ 14.9	\$	\$ (0.3)	\$ 14.6
Flat Rolled and Non-Ferrous				
Gross Goodwill and Carrying Amount of Goodwill	24.4	8.2		32.6
Building Products				
Gross Goodwill and Carrying Amount of Goodwill	2.2			2.2
Corporate				
Gross Goodwill	10.0		(1.6)	8.4
Impairments	(4.2)			(4.2)
Carrying Amount of Goodwill	5.8		(1.6)	4.2
Consolidated Total				
Gross Goodwill	51.5	8.2	(1.9)	57.8
Impairments	(4.2)			(4.2)
Carrying Amount of Goodwill	\$ 47.3	\$ 8.2	\$ (1.9)	\$ 53.6

Additions to goodwill recorded at the Flat Rolled and Non-Ferrous segment for the nine months ended September 30, 2011 are attributable to the Trident acquisition, which closed on March 11, 2011, discussed in Note 2. Reductions to goodwill at the Corporate and Plates and Shapes segments for the nine months ended September 30, 2011 are due to the realization of tax benefits for tax-deductible goodwill recognized in connection with the Merger and the acquisition of Port City Metal Services (Port City) in May 2006, both of which were taxable business combinations.

The carrying amounts of the Company's intangible assets are as follows:

	September 30, 2011	December 31, 2010
Customer lists	\$ 61.8	\$ 42.8
Less: Accumulated amortization	(41.0)	(38.8)
	\$ 20.8	\$ 4.0
Trade names	\$ 6.6	\$ 3.3

Edgar Filing: METALS USA HOLDINGS CORP. - Form 10-Q

Less: Accumulated amortization	(1.0)	(0.7)
	\$ 5.6	\$ 2.6
Fulfillment contract	\$ 0.8	\$ 0.8
Less: Accumulated amortization		
	\$ 0.8	\$ 0.8

Table of Contents**METALS USA HOLDINGS CORP. AND SUBSIDIARIES****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

(dollars in millions)

During the nine months ended September 30, 2011, we acquired \$19.0 of customer list intangible assets and \$3.3 of trade name intangible assets as a result of the Trident acquisition discussed in Note 2.

Aggregate amortization expense for the three months ended September 30, 2011 and 2010 was \$0.6 and \$0.9, respectively. Aggregate amortization expense for the nine months ended September 30, 2011 and 2010 was \$2.4 and \$3.0, respectively.

Aggregate remaining amortization of our intangible assets is as follows:

For the Year Ending December 31,	Estimated Amortization Expense
2011 (remaining 3 months)	\$ 0.6
2012	\$ 3.6
2013	\$ 3.5
2014	\$ 3.3
2015	\$ 3.0
Thereafter	\$ 13.2

5. Derivatives

In February 2008, \$250.0 notional amount of outstanding borrowings under the ABL facility was swapped from a floating LIBOR-based rate to a fixed rate. The swaps entitled us to receive quarterly payments of interest at a floating rate indexed to three-month LIBOR and pay a fixed rate that ranged from 2.686% to 2.997%, converting a portion of the outstanding borrowings on our ABL facility from a floating rate obligation to a fixed rate obligation. Pretax realized gains and losses from the Company's ABL facility interest rate swaps which were recognized in earnings during the nine months ended September 30, 2011 amounted to \$0.1 of additional interest expense, consisting of \$1.8 of settlements, offset by \$1.7 of changes in the fair value of derivatives. The Company's ABL facility interest rate swaps expired during the second quarter of 2011.

In November 2004 and December 2007, ORMS, which we acquired on December 31, 2010 (see Note 2), entered into two separate interest rate swap agreements in connection with the Jeffersonville, Indiana Industrial Revenue Bonds (IRBs) discussed in Note 8. The notional amounts under these swaps correspond to the principal amounts of the IRBs, which were a combined \$7.1 as of September 30, 2011, and are reduced on an annual basis as the IRBs are redeemed. Under the swaps, the notional amounts under the Jeffersonville IRBs were swapped from a floating rate based on a rate established by the Securities Industry and Financial Market Association (SIFMA) to fixed rates of 4.00% and 3.75%, converting the outstanding borrowings on the Jeffersonville IRBs from floating rate obligations to fixed rate obligations. Pretax realized losses from the Company's Jeffersonville IRB interest rate swaps recognized in earnings during the nine months ended September 30, 2011 were \$0.3, with approximately \$0.2 of settlements and \$0.1 of changes in the fair value of derivatives.

We account for gains and losses on our interest rate swap derivatives based on realized and unrealized amounts. Realized gains and losses are determined by actual derivative settlements during the period. Unrealized gains and losses are based on the periodic mark to market valuation of our derivative contracts in place. The primary objective for our use of interest rate swaps is to reduce our exposure to changes in interest rates and to manage variable interest rate exposure to achieve greater flexibility in meeting overall financial objectives.

Table of Contents**METALS USA HOLDINGS CORP. AND SUBSIDIARIES****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

(dollars in millions)

The following table presents the location within the condensed consolidated balance sheet of all assets and liabilities associated with the Company's outstanding derivatives at September 30, 2011 and December 31, 2010.

Derivatives not designated as hedging instruments under	ASC 815	Balance Sheet Location	Asset Derivatives		Liability Derivatives	
			Fair Value at September 30, 2011	Fair Value at December 31, 2010	Fair Value at September 30, 2011	Fair Value at December 31, 2010
Interest rate swaps		Accrued liabilities	\$	\$	\$	\$ 1.9
		Other long-term liabilities			0.6	0.4
Total derivatives not designated as hedging instruments under ASC 815			\$	\$	\$ 0.6	\$ 2.3
Total Derivatives			\$	\$	\$ 0.6	\$ 2.3

The following tables present the pretax impact of the Company's derivative instruments within the condensed consolidated statements of operations for the three and nine months ended September 30, 2011 and 2010. Pretax realized gains and losses from derivatives which are recognized in earnings are included in interest expense in the condensed consolidated statements of operations.

	Derivatives Not Designated as Hedging Instruments			
	Amount Recognized as Interest Expense from Derivatives			
	Three months ended September 30,		Nine months ended September 30,	
	2011	2010	2011	2010
Interest rate swaps	\$ 0.2	\$ 0.7	\$ 0.3	\$ 2.4

The Company's credit exposure related to interest rate swaps is represented by the fair value of swap agreements with a net positive fair value (asset position) to the Company at the reporting date. At such times, the outstanding instruments expose the Company to credit loss in the event of nonperformance by the counterparty to the agreements. However, we have not experienced any credit loss as a result of counterparty nonperformance in the past. Our credit risk exposure with respect to our interest rate swaps is limited to a single counterparty, which we monitor based on credit ratings. As of September 30, 2011, our interest rate swap derivatives had net negative fair values (liability positions).

6. Other Assets

Other assets consist of the following:

	September 30, 2011	December 31, 2010
Deferred financing costs	\$ 10.2	\$ 8.9
Deferred debt offering costs	3.0	3.6

Edgar Filing: METALS USA HOLDINGS CORP. - Form 10-Q

Other	1.2	1.0
Total other assets	\$ 14.4	\$ 13.5

Aggregate amortization of debt issuance costs for the three and nine months ended September 30, 2011 was \$0.7 and \$2.1, respectively.
Aggregate amortization of debt issuance costs for the three and nine months ended

Table of Contents**METALS USA HOLDINGS CORP. AND SUBSIDIARIES****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

(dollars in millions)

September 30, 2010 was \$0.8 and \$2.7, respectively. For the nine months ended September 30, 2010, \$1.1 of deferred debt issuance cost amortization was accelerated in connection with the extinguishment of debt during the period.

7. Accrued Liabilities

Accrued liabilities consist of the following:

	September 30, 2011	December 31, 2010
Salaries and employee benefits	\$ 14.8	\$ 10.8
Income taxes	3.2	2.1
Taxes, other than income	4.2	2.8
Interest	8.9	3.3
Insurance	5.5	5.2
Audit and tax fees	0.8	0.5
Warranty liability	0.6	0.5
Lease terminations	0.2	0.4
Merger consideration Predecessor Company common shares outstanding		0.6
Current portion of interest rate swap liability		1.9
Other	2.2	2.5
Total accrued liabilities	\$ 40.4	\$ 30.6

8. Debt

Debt consists of the following:

	September 30, 2011	December 31, 2010
Senior Secured Asset-Based Revolving Credit Facility (ABL facility)	\$ 243.4	\$ 106.0
11 1/8% Senior Secured Notes due 2015 (Metals USA Notes)	226.3	226.3
Industrial Revenue Bonds (IRBs)	12.8	13.4
Obligations under capital leases and other	2.1	0.8
Total debt	484.6	346.5
Less current portion of debt	1.0	1.1
Total long-term portion of debt	\$ 483.6	\$ 345.4

The weighted average interest rates under the ABL facility for the three and nine months ended September 30, 2011 were 2.62% and 2.93%, respectively. The weighted average interest rates under the ABL facility for the three and nine months ended September 30, 2010 were 2.19% and 2.09%, respectively.

Senior Secured Asset-Based Revolving Credit Facility

On December 17, 2010, Flag Intermediate, Metals USA, and certain subsidiaries of Metals USA entered into an amended and restated loan and security agreement (the "ABL Credit Agreement") with the lenders party thereto and Bank of America, N.A., as administrative agent and collateral agent. Flag Intermediate and Metals USA are wholly-owned subsidiaries of Metals USA Holdings Corp.

Table of Contents

METALS USA HOLDINGS CORP. AND SUBSIDIARIES

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(dollars in millions)

The ABL Credit Agreement provides for borrowings of up to \$500.0 of Tranche A commitments and \$35.0 of first-in last-out (FILO) Tranche A-1 commitments (which may be increased up to \$750.0 at the option of Metals USA, including \$35.0 under the FILO tranche)), 5-year, senior secured asset-based credit facility (the ABL facility) that amended and restated Metals USA 's then-existing \$625.0 senior secured asset-based credit facility that was scheduled to mature on November 30, 2011.

On March 9, 2011, we activated \$25.0 of the FILO tranche under the ABL facility. The ABL facility permits us to borrow on a revolving basis through the earlier of November 30, 2015 and 60 days prior to the scheduled maturity of the Metals USA Notes, unless the Metals USA Notes are refinanced to a date more than 5 years and 60 days after the closing date of the ABL facility and/or repaid prior to such date. Substantially all of our subsidiaries are borrowers under the ABL facility.

On August 10, 2011, we amended the ABL facility by reducing the borrowing costs on the Tranche A commitments by 75 basis points and reducing the borrowing costs on the FILO tranche by 62.5 basis points. Under the amendment, the maturity date of the ABL facility was extended to the earlier of August 10, 2016 and 60 days prior to the scheduled maturity of the Metals USA Notes, unless the Metals USA Notes are refinanced to a date more than 5 years and 60 days after the closing date of the ABL facility and/or repaid prior to such date. The ABL facility remains subject to the same acceleration provision with respect to the maturity of the Metals USA Notes described below.

Borrowing Base. The maximum availability under the ABL facility is based on eligible receivables and eligible inventory, subject to certain reserves. Our borrowing availability fluctuates daily with changes in eligible receivables and inventory, less outstanding borrowings and letters of credit. The borrowing base is equal to:

85% of the net amount of eligible accounts receivable, plus

the lesser of (x) 80% of the lesser of the original cost or market value of eligible inventory and (y) 90% of the net orderly liquidation value of eligible inventory, plus

an incremental amount of the lesser of (x) the maximum commitments under the FILO tranche and (y) the sum of (i) 5% of the net amount of eligible accounts receivable and (ii) 5% of the net orderly liquidation value of eligible inventory during the effectiveness of any FILO tranche, less

reserves.

The ABL facility provides sub-limits for up to \$25.0 of swingline loans and up to \$100.0 for the issuance of letters of credit. Both the face amount of any outstanding letters of credit and any swingline loans will reduce borrowing availability under the ABL facility on a dollar-for-dollar basis.

As of September 30, 2011, we had \$446.6 of eligible collateral, \$243.4 in outstanding advances, \$25.9 in open letters of credit and \$177.3 of additional borrowing capacity.

Guarantees and Security. Substantially all of our subsidiaries are defined as borrowers under the ABL Credit Agreement. The obligations under the ABL facility are guaranteed by Flag Intermediate and certain of our domestic subsidiaries and are secured by a first-priority lien and security interest in, among other things, accounts receivable, inventory and deposit accounts of Flag Intermediate, Metals USA and the subsidiaries of Metals USA party to the ABL Credit Agreement and a second-priority lien and security interest in, among other things, substantially all other tangible and intangible personal and real property owned by such companies, subject to certain exceptions.

Table of Contents**METALS USA HOLDINGS CORP. AND SUBSIDIARIES****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(dollars in millions)**

Interest Rate and Fees. At Metals USA's option, interest accrues on the loans made under the ABL facility at either LIBOR plus a specified margin (set at 1.75% (3.25% for the FILO tranche) as of September 30, 2011), or the base rate (which is based off of the federal funds rate plus 0.50%, Bank of America's prime rate or LIBOR plus 1.00%), plus a specified margin (set at 0.75% (2.25% for the FILO tranche) as of September 30, 2011). Under the ABL facility amendment that was executed on August 10, 2011, the specified margins over LIBOR were reduced by 75 basis points for the Tranche A Commitments and 62.5 basis points for the FILO tranche. The marginal rates vary based on our average monthly excess availability (as defined in the ABL Credit Agreement). The applicable base rate and the effective LIBOR rate for the loans made under the ABL facility were 3.25% and 0.374%, respectively, as of September 30, 2011.

A commitment fee is payable on any unused commitment equal to 0.25% per annum to the lenders under the ABL facility if utilization under the facility exceeds 40.0% of the total commitments under the facility and a commitment fee equal to 0.375% per annum if utilization under the facility is less than or equal to 40.0% of the total commitments under the facility. Customary letter of credit fees are also payable, as applicable.

Certain Conditions Precedent and Covenants. As a condition precedent to any borrowing or issuance of a letter of credit, a material adverse effect shall not have occurred or exist. The ABL facility contains customary representations, warranties and covenants, including limitations on our ability to incur or guarantee additional debt, subject to certain exceptions, pay dividends, or make redemptions and repurchases, with respect to capital stock, repay debt, create or incur certain liens, make certain loans or investments, make acquisitions or investments, engage in mergers, acquisitions, asset sales, and engage in certain transactions with affiliates. The ABL facility requires a lock-box arrangement for collection of accounts receivable and proceeds from sales of inventory. Metals USA may make withdrawals from the lock-box unless an event of default exists or borrowing availability is less than the greater of (i) \$50.0 and (ii) 12.5% of the lesser of (A) the borrowing base (not to exceed \$62.5) and (B) the aggregate commitment. We do not have to maintain a minimum fixed charge coverage ratio (FCCR) as long as our borrowing availability is greater than or equal to the greater of (i) \$45.0 and (ii) 10% of the lesser of the borrowing base and the aggregate commitment (the Minimum Availability). We must maintain an FCCR of at least 1.0 to 1.0 if borrowing availability falls below the Minimum Availability. For purposes of determining covenant compliance, the FCCR is determined by dividing (i) the sum of Adjusted EBITDA (as defined in the ABL Credit Agreement) minus income taxes paid in cash (excluding certain specified deferred taxes) minus non-financed capital expenditures by (ii) the sum of certain distributions paid in cash, cash interest expense and scheduled principal reductions on debt, and is calculated based on such amounts for the most recent period of four consecutive fiscal quarters for which financial statements are available. FCCR and Adjusted EBITDA are each calculated on a pro forma basis. As of September 30, 2011, our FCCR was 2.78.

Certain Events of Default and Remedies. The ABL facility contains events of default with respect to: default in payment of principal when due, default in the payment of interest, fees or other amounts after a specified grace period, material breach of the representations or warranties, default in the performance of covenants, a default that causes or permits acceleration under any indebtedness with a principal amount in excess of a specified amount, certain bankruptcy events, certain ERISA violations, invalidity of certain security agreements or guarantees, material judgments, or a change of control. In the event of default, the ABL Credit Agreement may permit a majority of the lenders to: (i) restrict the amount of or refuse to make revolving loans; (ii) cause customer receipts to be applied against borrowings under the ABL facility which would cause Metals USA to suffer a rapid loss of liquidity and restrict the ability to operate on a day-to-day basis; (iii) restrict or refuse to provide letters of credit; or ultimately; (iv) terminate the commitments and the agreement; or (v) declare any or all obligations to be immediately due and payable if such default is not cured in the specified period required. Any payment default or acceleration under the ABL facility would also result in a default under the Metals USA Notes that would provide the holders of the Metals USA Notes with the right to demand immediate repayment.

Table of Contents

METALS USA HOLDINGS CORP. AND SUBSIDIARIES

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(dollars in millions)

Costs related to the establishment of the ABL facility, in addition to subsequent amendments to the ABL facility, were capitalized and are being charged to interest expense over the life of the ABL facility. Unamortized financing costs of \$10.2 and \$8.9 were included in other non-current assets as of September 30, 2011 and December 31, 2010, respectively.

11 1/8% Senior Secured Notes Due 2015

On November 30, 2005, Flag Acquisition Corporation (Flag Acquisition) sold \$275.0 aggregate principal amount of the Metals USA Notes. The Metals USA Notes bear interest at a rate per annum equal to 11 1/8%, payable semi-annually in arrears, on June 1 and December 1 of each year, commencing on June 1, 2006. The Metals USA Notes will mature on December 1, 2015. We may redeem some or all of the Metals USA Notes at any time on or after December 1, 2010 at a predetermined redemption price plus accrued and unpaid interest and additional interest, if any, to the applicable redemption date. If we experience a change of control and we do not redeem the Metals USA Notes, we will be required to make an offer to repurchase the Metals USA Notes at a price equal to 101% of the principal amount, plus accrued and unpaid interest and additional interest, if any, to the date of repurchase.

As a result of the Merger, Metals USA assumed the obligations of Flag Acquisition including the Metals USA Notes. All domestic operating subsidiaries of Metals USA have agreed, jointly and severally with Flag Intermediate (Guarantors), to unconditionally and irrevocably guarantee Metals USA's obligations under the Metals USA Notes and Indenture dated as of November 30, 2005. Additionally, Flag Intermediate has unconditionally guaranteed to be a primary obligor of the due and punctual payment and performance of the obligations under the Indenture.

Metals USA Holdings is not a guarantor of the Metals USA Notes. There is a limitation on the amount of funds which can be transferred by the Guarantors to Metals USA Holdings in the form of dividends. Such amount available for distribution shall be increased by an amount equal to 50% of Consolidated Net Income, as defined, or reduced by an amount equal to 100% of Consolidated Net Loss, as defined. As of September 30, 2011, \$22.8 was available for general distribution under the restricted payment covenant contained in the Indenture governing the Metals USA Notes.

The indebtedness evidenced by the Metals USA Notes and the guarantees will rank: equally with all of our and the Guarantors' existing and future senior indebtedness; junior in priority as to collateral that secures the ABL facility on a first-priority lien basis with respect to our and the Guarantors' obligations under the ABL facility, any other debt incurred after December 1, 2005 that has a priority security interest relative to the Metals USA Notes in the collateral that secures the ABL facility, any hedging obligations related to the foregoing debt and all cash management obligations incurred with any lender under the ABL facility; equal in priority as to collateral that secures the Metals USA Notes and the guarantees on a first-priority lien basis with respect to our and the Guarantors' obligations under any other equivalent priority lien obligations incurred after December 1, 2005; and senior to all of our and the Guarantors' existing and future subordinated indebtedness. The Metals USA Notes will also be effectively junior to the liabilities of any non-guarantor subsidiaries.

The Metals USA Notes contain covenants that are customary for similar debt instruments, including limitations on our or the Guarantors' ability to incur or guarantee additional debt, subject to certain exceptions, pay dividends, or make redemptions and repurchases with respect to capital stock, create or incur certain liens, make certain loans or investments, make acquisitions or investments, engage in mergers, acquisitions, asset sales and sale lease-back transactions, and engage in certain transactions with affiliates.

Table of Contents

METALS USA HOLDINGS CORP. AND SUBSIDIARIES

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(dollars in millions)

The Metals USA Notes Indenture contains certain customary events of default, including (subject, in some cases, to customary cure periods thresholds) defaults based on (1) the failure to make payments under the Metals USA Notes Indenture when due, (2) breach of covenants, (3) cross-defaults to other material indebtedness, (4) bankruptcy events and (5) material judgments.

Costs related to the establishment of the Metals USA Notes were capitalized and are being charged to interest expense over the life of the Metals USA Notes. Unamortized issuance costs of \$3.0 and \$3.6 were included in other non-current assets as of September 30, 2011 and December 31, 2010, respectively.

Industrial Revenue Bonds

Metals USA is a conduit bond obligor on IRBs issued by the municipalities of Muskogee, Oklahoma and Jeffersonville, Indiana. The IRBs are secured by certain real estate, leasehold improvements and equipment acquired with proceeds from the IRBs. The Muskogee IRB is due in one lump sum of \$5.7 on May 1, 2023. The Jeffersonville IRBs had principal amounts outstanding of \$2.9 and \$4.2 as of September 30, 2011, and are being redeemed in varying amounts annually through August 2021 and December 2027, respectively. The interest rates assessed on the IRBs vary from month to month. As of September 30, 2011, the weighted average variable interest rate on the IRBs was 0.34%. See Note 5 for a discussion of fixed interest rates payable on the Jeffersonville IRBs under interest rate swap agreements.

9. Stockholders' Equity

Common Stock

In accordance with our amended and restated certificate of incorporation, we are authorized to issue 140,000,000 shares of common stock, \$.01 par value. At September 30, 2011, 37,059,236 shares were issued and 37,058,507 shares were outstanding.

Preferred Stock

Also in accordance with our amended and restated certificate of incorporation, Metals USA Holdings is authorized to issue 10,000,000 shares of preferred stock, \$.01 par value. At September 30, 2011, no shares of preferred stock were issued and outstanding.

Treasury Stock

At September 30, 2011, 729 shares of the Company's common stock were held as treasury stock at a cost of \$15.01 per share. All such shares were used to satisfy applicable tax withholding obligations for certain participants upon vesting of restricted stock awards as described under *Restricted Stock* in Note 10 below.

10. Stock-Based Compensation

Total stock-based compensation expense recognized for the three and nine months ended September 30, 2011 was \$0.4 and \$1.2, respectively. Total stock-based compensation expense recognized for the three and nine months ended September 30, 2010 was \$0.5 and \$0.7, respectively. Stock-based compensation expense is included in our condensed consolidated statements of operations in selling, general and administrative expense.

(dollars in millions)

2005 Stock and Incentive Plan

Metals USA Holdings Amended and Restated 2005 Stock and Incentive Plan (the 2005 Plan) permits the issuance of options and restricted stock awards to employees and directors of the Company. The 2005 Plan has reserved for issuance up to 2.4 million shares of common stock. The 2005 Plan has two tranches of options, Tranche A and Tranche B. Tranche A options vest on a pro-rata basis over five years, have a term of ten years, and expire if not exercised. Tranche B options, which include both a service and a performance condition, vest on the eighth anniversary of the date of grant or earlier dependent on the satisfaction of an internal rate of return on capital invested, have a term of ten years from date of grant, and expire if not exercised.

Tranche A Options

As of September 30, 2011, Tranche A options for 401,232 shares were outstanding, 389,553 of which were exercisable. The weighted average exercise price of these options is \$3.21 per share, with an aggregate intrinsic value of \$2.3. The Tranche A options have a weighted average remaining contractual life of approximately 4.3 years. Compensation expense associated with the Tranche A options has been fully recognized as of September 30, 2011.

Tranche B Options

As of September 30, 2011, Tranche B options for 47,112 shares were outstanding, all of which were exercisable. The weighted average exercise price of these options is \$2.30 per share, with an aggregate intrinsic value of \$0.3. The Tranche B options have a weighted average remaining contractual life of approximately 4.2 years. Compensation expense associated with the Tranche B options has been fully recognized as of September 30, 2011.

2010 Long-Term Incentive Plan

On March 19, 2010, our Board of Directors adopted, and our stockholders approved, the Metals USA Holdings 2010 Long-Term Incentive Plan (the 2010 Plan). The purposes of the 2010 Plan are to further the growth and success of Metals USA and to reward and incentivize the outstanding performance of our key employees, directors, consultants and other service providers by aligning their interests with those of stockholders through equity-based compensation and enhanced opportunities for ownership of shares of our common stock.

Subject to adjustment, the 2010 Plan authorizes the issuance of up to 2.6 million shares of common stock pursuant to the grant or exercise of nonqualified stock options, incentive stock options, stock appreciation rights, restricted stock, restricted stock units and other equity-based awards.

The 2010 Plan is administered by our Board of Directors or the Compensation Committee thereof, or such other committee of the Board of Directors as the Board of Directors may designate from time to time (the Committee). Among other things, the Committee has the authority to select individuals to whom awards may be granted, to determine the type of award, to determine the terms and conditions of any such awards, including vesting terms, to interpret the terms and provisions of the 2010 Plan and awards granted thereunder and to otherwise administer the plan.

Stock Options

On September 13, 2010, pursuant to the 2010 Plan, 632,000 options to acquire the Company s common stock were granted to certain members of our management and to members of our Board of Directors with an

Table of Contents**METALS USA HOLDINGS CORP. AND SUBSIDIARIES****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

(dollars in millions)

exercise price equal to the fair market value as of the date of the grant. The options granted to management vest ratably over four years and have a contractual term of ten years. The options granted to the members of our Board of Directors vest ratably over three years and also have a contractual term of ten years.

The fair value of the 2010 Plan option awards was estimated on the date of grant using a Black-Scholes option valuation model using the following valuation assumptions:

Expected dividend yield	0%
Expected stock price volatility	62.5%
Risk free interest rate	1.51%
Expected life (in years) management options	5.0
Expected life (in years) Board of Director options	4.0
Exercise price	\$ 13.17

As of September 30, 2011, outstanding options granted under the 2010 Plan had no intrinsic value (i.e. the fair market value of the Company's common stock was less than the options' exercise price), with approximately \$2.8 of total unrecognized compensation expense remaining to be amortized over a weighted average period of 2.6 years.

Restricted Stock

On September 13, 2010, pursuant to the 2010 Plan, 130,100 shares of restricted stock were granted to certain members of our management and to members of our Board of Directors. The awards granted to management vest ratably over four years, while the awards granted to the members of our Board of Directors vest ratably over three years. The fair value of the restricted stock granted was \$13.17 per share, determined based on the fair value of the Company's common stock on the grant date. During the three months ended September 30, 2011, 34,394 shares of restricted stock vested. As of September 30, 2011, approximately \$1.1 of total unrecognized compensation expense was expected to be recognized over a weighted average period of 2.6 years.

11. Income Taxes

The provision for income taxes is determined by applying an estimated annual effective income tax rate to income before income taxes. The rate is based on the most recent annualized forecast of pretax income, permanent book differences and tax credits. The Company's effective tax rate for the nine months ended September 30, 2011 was 37.3% compared to an effective tax rate of 46.0% for the nine months ended September 30, 2010. The decrease in the tax rate in 2011 is primarily due to the impact of state taxes and permanent items on the respective levels of pre-tax book income.

As of September 30, 2011 and December 31, 2010, our unrecognized tax benefits totaled \$8.7 and based on the contingent and uncertain nature of our liability, we are unable to make an estimate of the period of potential cash settlement, if any, with the respective taxing authorities. The total amount of unrecognized tax benefits that, if recognized, would impact the Company's effective tax rate is \$0.2 for the nine months ended September 30, 2011.

We file numerous consolidated and separate income tax returns in the United States and Canada. We are no longer subject to U.S. Federal income tax examinations for years before 2006 and are no longer subject to state and local, or foreign income tax examinations for years before 2000.

Table of Contents**METALS USA HOLDINGS CORP. AND SUBSIDIARIES****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

(dollars in millions)

We account for any applicable interest and penalties on uncertain tax positions as a component of income tax expense. As of September 30, 2011, the liability for uncertain tax positions includes interest and penalties of \$2.9 of which \$0.2 is included in our statement of operations and impacted the Company's overall effective income tax rate for the nine months ended September 30, 2011.

12. Segment Information

The following tables show summarized financial information for our reportable segments. The amounts shown as an operating loss under the column heading "Corporate and Other" consist primarily of general and administrative costs that are not allocated to the segments. The reconciliation of operating income to net income before income taxes is shown within the condensed consolidated statements of operations and therefore is not separately presented.

	Three Months Ended September 30,				
	Plates and Shapes	Flat Rolled and Non-Ferrous	Building Products	Corporate and Other	Total
2011:

Table of Contents**METALS USA HOLDINGS CORP. AND SUBSIDIARIES****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(dollars in millions)**

For the three months ended September 30, 2011, ORMS and Trident contributed a combined \$54.3 and \$3.9 of incremental net sales and operating income, respectively, versus the same period of 2010. For the nine months ended September 30, 2011, J. Rubin, ORMS and Trident contributed a combined \$140.2 and \$9.2 of incremental net sales and operating income, respectively, versus the same period of 2010.

During the nine months ended September 30, 2011, our Building Products Segment recorded a gain of approximately \$0.7 resulting from a settlement with the previous owners of the Dura-Loc (now Allmet) roofing business we acquired in 2006 to cover pre-acquisition warranty claims.

13. Commitments and Contingencies*Letters of Credit*

Letters of credit outstanding at September 30, 2011 amounted to \$25.9 and consisted primarily of letters of credit issued in conjunction with the IRBs (see Note 8) and other letters of credit that support our property and casualty insurance program. All letters of credit reduce the amount available to borrow under the ABL facility.

Pension Fund Withdrawal Obligation

During 2007, we discontinued our participation in a multiemployer pension fund. In connection with our cessation of contributions to the plan, we were assessed a withdrawal liability of approximately \$5.6, which we are paying in monthly installments through 2021. Our total withdrawal liability, including interest and amortization charges, amounted to approximately \$6.2 and \$6.7 as of September 30, 2011 and December 31, 2010, respectively.

Contingencies

From time to time, we are involved in a variety of claims, lawsuits and other disputes arising in the ordinary course of business. We believe the resolution of these matters and the incurrence of their related costs and expenses should not have a material adverse effect on our consolidated financial position, results of operations, cash flows or liquidity.

14. Comprehensive Income

The following table sets forth comprehensive income, net of applicable taxes, for the three and nine months ended September 30, 2011 and 2010.

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2011	2010	2011	2010
Net income	\$ 16.7	\$ 5.8	\$ 50.6	\$ 8.4
Other comprehensive income:				
Foreign currency translation adjustments	(0.3)	0.1	(0.3)	0.1
Unrealized gains on derivatives		0.1	0.1	0.5
Total comprehensive income	\$ 16.4	\$ 6.0	\$ 50.4	\$ 9.0

Table of Contents**METALS USA HOLDINGS CORP. AND SUBSIDIARIES****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(dollars in millions)****15. Earnings Per Share**

Basic earnings per share is calculated by dividing net income by the weighted average number of common shares outstanding during the period, including the weighted average impact of any shares issued during the year. Diluted earnings per share calculations also include the dilutive effect of stock options and non-vested restricted stock.

The weighted average number of shares used to determine basic and diluted earnings per share was:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2011	2010	2011	2010
Weighted average shares outstanding basic	37,058,507	37,024,842	37,036,187	32,707,057
Effect of dilution:				
Stock options	280,456	278,123	282,977	291,639
Restricted stock			1,709	
Weighted average shares outstanding diluted	37,338,963	37,302,965	37,320,873	32,998,696
Antidilutive stock options and restricted stock excluded from calculation	625,400	632,000	625,400	632,000

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This section contains statements that constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. See disclosure presented on the inside of the front cover of this Form 10-Q for cautionary information with respect to such forward-looking statements. Readers should refer to Risk Factors included in our Annual Report on Form 10-K for risk factors that may affect future performance.

Overview

All references to the Company, we or our include Metals USA Holdings, Flag Intermediate, its wholly-owned subsidiary Metals USA, and the wholly-owned subsidiaries of Metals USA.

We believe that we are a leading provider of value-added processed carbon steel, stainless steel, aluminum and specialty metals, as well as manufactured metal components. For the nine months ended September 30, 2011, approximately 95% of our revenue was derived from our metals service center and processing activities, which are segmented into two groups: Flat Rolled and Non-Ferrous Group and Plates and Shapes Group. The remaining portion of our revenue was derived from our Building Products Group, which principally manufactures and sells aluminum products related to the residential remodeling industry. We purchase metal from primary producers that generally focus on large volume sales of unprocessed metals in standard configurations and sizes. In most cases, we perform the customized, value-added processing services required to meet the specifications provided by end-users. Our Plates and Shapes Group and Flat Rolled and Non-Ferrous Group customers are in multiple industries, including aerospace, automotive industry manufacturing, defense, heavy equipment, marine transportation, commercial construction, office furniture manufacturing, and energy and oilfield services. Our Building Products Group customers are primarily distributors and contractors engaged in the residential remodeling industry.

Industry Trends

Metals Service Centers

U.S. steel consumption declined dramatically during the 2009 recession. 2009 U.S. steel consumption was less than 70% of 2008 U.S. steel consumption and significantly outpaced GDP declines. Consequently, annual growth in steel demand in 2010 exceeded prior year figures by more than 14% as U.S. industrial production recovered slowly. 2010 domestic steel mill utilization rates averaged approximately 70%. During the first nine months of 2011, domestic steel mill utilization rates increased slightly, averaging approximately 73%. North American steel consumption is forecasted to increase by approximately 11% during 2011 as most steel consuming industries continue a modest recovery.

World steel production resumed growth in 2010 following the 2009 global recession. China has continued to dominate global steel production and consumption, accounting for roughly half of the total global steel market. Chinese steel production levels and growth characteristics have created significant demand on iron ore and metallurgical coal which has generally outpaced global supply. As a result, merchant prices for both iron ore and metallurgical coal have persistently trended higher and now trade near historical peaks. We believe this upward price trend will continue.

During the first nine months of 2011, steel prices have been relatively stable when compared to the significantly volatile periods of 2008, 2009 and 2010. Given current market conditions, steel prices are predominately influenced by raw material input costs, namely iron ore and metallurgical coal. We believe that in the absence of any unanticipated macro-economic disruptions, no near term catalyst that would materially alter current price trends is visible on the horizon.

Table of Contents*Building Products*

The downturn in the housing and mortgage markets has caused significant contraction in the home improvement remodeling industry. Research indicates that remodeling activity is pro-cyclical with both new residential construction and the broader economy, but remodeling lags homebuilding by several quarters. The high cyclical nature of remodeling activity appears to be driven by discretionary improvements, similar to the products sold by our building products business, which are quite volatile. Improvement spending is expected to be much more cyclical and more sensitive to upturns and downturns in the general economy, whereas maintenance and repair spending is expected to be fairly stable over time.

While the pace of the decline in homeowner remodeling projects appears to be moderating, increased remodeling activity does not seem likely to materialize until further signs of recovery emerge in the broader housing market. Although lower financing costs are reducing the cost of financing home improvement projects, weak home prices and decreased cost recovery for most types of remodeling projects continue to discourage upper-end remodeling improvements.

Product demand for the Company's Building Products Group may be influenced by numerous factors such as interest rates, general economic conditions, consumer confidence and other factors beyond our control. Declines in existing home sales and improvement remodeling expenditures due to such factors could continue to limit the pace of the segment's recovery.

Results of Operations

The following unaudited consolidated financial information reflects our historical financial statements.

Consolidated Results Three Months Ended September 30, 2011 Compared to September 30, 2010

	2011	%	2010	%
	(In millions, except percentages)			
Net sales	\$ 492.3	100.0%	\$ 345.3	100.0%
Cost of sales (exclusive of operating and delivery, and depreciation and amortization shown below)	379.8	77.1%	268.9	77.9%
Operating and delivery	44.0	8.9%	33.5	9.7%
Selling, general and administrative	28.3	5.7%	19.6	5.7%
Depreciation and amortization	5.0	1.0%	4.4	1.3%
Gain on sale of assets	(0.1)	0.0%		
Operating income	35.3	7.2%	18.9	5.5%
Interest expense	9.3	1.9%	8.7	2.5%
Other expense, net	0.1	0.0%		
Income before income taxes	25.9	5.3%	10.2	3.0%
Provision for income taxes	9.2	1.9%	4.4	1.3%
Net income	\$ 16.7	3.4%	\$ 5.8	1.7%

Net sales. Net sales increased \$147.0 million, or 42.6%, from \$345.3 million for the three months ended September 30, 2010 to \$492.3 million for the three months ended September 30, 2011. The increase was primarily attributable to a 24.9% increase in shipments, in addition to a 16.2% increase in average realized prices for our Flat Rolled and Non-Ferrous and Plates and Shapes Product Groups. Net sales for our Building Products Group increased \$1.5 million, or 6.5%, for the third quarter of 2011 versus the third quarter of 2010. Results for the quarter ended September 30, 2011 include operating results from the Trident acquisition, which closed on March 11, 2011, and the ORMS acquisition, which closed on December 31, 2010. Trident and ORMS contributed a combined \$54.3 million of incremental sales for the quarter ended September 30, 2011. Excluding

Table of Contents

the Trident and ORMS acquisitions, net sales increased \$92.7 million, or 28.8% for the quarter ended September 30, 2011 versus the same quarter of 2010, which primarily resulted from a 14.9% increase in average realized prices and an 11.7% increase in shipments. Markets exhibited sufficient supply tightness to sustain modestly higher prices in the most recent quarter. The increase in volumes occurred as a consequence of increased demand in core steel consuming end-use markets which include energy and oilfield services, heavy equipment and automotive industry manufacturers, lawn and garden equipment manufacturers, truck transportation and household appliance manufacturers, while growth in non-residential construction and marine transportation markets continues to be slow. In addition to the volume and price increases discussed above, the year-over-year increase in net sales resulted from continued optimization of the Company's product mix to better match demand in certain markets and to differentiate our products and services from competitors.

Cost of sales. Cost of sales increased \$110.9 million, or 41.2%, from \$268.9 million for the three months ended September 30, 2010 to \$379.8 million for the three months ended September 30, 2011. The increase was primarily attributable to a 24.9% increase in shipments for our Flat Rolled and Non-Ferrous and Plates and Shapes Product Groups, in addition to a 14.5% increase in average cost per ton. Cost of sales for our Building Products Group increased \$1.9 million, or 12.2%. The Trident and ORMS acquisitions added a combined \$40.9 million of incremental cost of sales for the quarter ended September 30, 2011. Excluding the Trident and ORMS acquisitions, average cost per ton increased 13.6% and shipments increased 11.7% over the same period of 2010. The increase in average cost per ton was largely attributable to higher steelmaking raw material prices, which are a significant driver of steel price trends. The increase in volumes that contributed to higher cost of sales during the third quarter of 2011 was primarily attributable to an increase in steel demand in certain sectors, as discussed above. Cost of sales as a percentage of net sales decreased from 77.9% for the three months ended September 30, 2010 to 77.1% for the same period of 2011.

Operating and delivery. Operating and delivery expenses increased \$10.5 million, or 31.3%, from \$33.5 million for the three months ended September 30, 2010 to \$44.0 million for the three months ended September 30, 2011. The increase was a result of higher variable costs associated with increased shipments, most notably higher labor costs of approximately \$3.9 million and higher freight costs of approximately \$2.4 million. In addition, Trident and ORMS added a combined \$4.4 million of incremental operating and delivery expenses for the third quarter of 2011. As a percentage of net sales, operating and delivery expenses decreased from 9.7% for the three months ended September 30, 2010 to 8.9% for the three months ended September 30, 2011.

Selling, general and administrative. Selling, general and administrative expenses increased \$8.7 million, or 44.4%, from \$19.6 million for three months ended September 30, 2010 to \$28.3 million for the three months ended September 30, 2011. Higher salaries of approximately \$2.4 million in addition to an approximate \$2.1 million increase in incentive compensation contributed to the period-over-period increase. Trident and ORMS added a combined \$4.2 million of incremental selling, general and administrative expenses for the third quarter of 2011. As a percentage of net sales, selling, general and administrative expenses remained level at 5.7% for the three months ended September 30, 2011 and the three months ended September 30, 2010.

Depreciation and amortization. Depreciation and amortization expense increased \$0.6 million, or 13.6%, from \$4.4 million for the three months ended September 30, 2010 to \$5.0 million for the three months ended September 30, 2011. The increase is primarily attributable to increases in fixed assets resulting from our growth through acquisitions over the past year and from increased capital spending, as our investments in new equipment have grown in line with higher business activity levels. Net property and equipment as of September 30, 2011 was \$241.4 million compared to \$183.2 million as of September 30, 2010. As a percentage of net sales, depreciation and amortization expenses decreased from 1.3% for the three months ended September 30, 2010 to 1.0% for the three months ended September 30, 2011.

Operating income. Operating income increased \$16.4 million, or 86.8%, from \$18.9 million for the three months ended September 30, 2010 to \$35.3 million for the three months ended September 30, 2011. The increase was primarily a result of the increase in net sales discussed above, in addition to the impact associated with the

Table of Contents

acquisitions of Trident and ORMS, which contributed a combined \$3.9 million of incremental operating income for the three months ended September 30, 2011. As a percentage of net sales, operating income increased from 5.5% for the three months ended September 30, 2010 to 7.2% for the three months ended September 30, 2011.

Interest expense. Interest expense increased \$0.6 million, or 6.9%, from \$8.7 million for the three months ended September 30, 2010 to \$9.3 million for the three months ended September 30, 2011. The increase was due to higher borrowings and a higher average facility rate on the ABL facility. The weighted average outstanding balance on our ABL facility increased from \$72.8 million for the three months ended September 30, 2010 to \$242.1 million for the three months ended September 30, 2011. Borrowings under the ABL facility were used to fund the Trident and ORMS acquisitions, in addition to higher working capital needs between the two periods.

Income taxes. Income tax expense for the three months ended September 30, 2011 was \$9.2 million, resulting in an overall effective tax rate of 35.5%, compared to income tax expense of \$4.4 million and overall effective tax rate of 43.1% for the three months ended September 30, 2010. Our effective tax rate differs from the federal statutory rate due to state taxes, certain valuation allowances on state and Canadian deferred tax assets, as well as provisions for uncertain tax positions.

Net income. Net income increased \$10.9 million, or 187.9%, from \$5.8 million for the three months ended September 30, 2010 to \$16.7 million for the three months ended September 30, 2011. The variance was primarily due to the improved operating performance of our metal service center businesses resulting from increases in end market demand and metal prices, ongoing and permanent cost reductions over the last year, and improved returns resulting from aggressive working capital management.

Consolidated Results Nine Months Ended September 30, 2011 Compared to September 30, 2010

	2011	%	2010	%
	(In millions, except percentages)			
Net sales	\$ 1,430.2	100.0%	\$ 968.2	100.0%
Cost of sales (exclusive of operating and delivery, and depreciation and amortization shown below)	1,092.4	76.4%	744.5	76.9%
Operating and delivery	131.0	9.2%	97.7	10.1%
Selling, general and administrative	83.0	5.8%	60.4	6.2%
Depreciation and amortization	15.4	1.1%	13.4	1.4%
Gain on sale of property and equipment			(0.1)	0.0%
Advisory agreement termination charge			3.3	0.3%
Operating income	108.4	7.6%	49.0	5.1%
Interest expense	27.6	1.9%	29.9	3.1%
Loss on extinguishment of debt			3.5	0.4%
Other expense, net	0.1	0.0%		
Income before income taxes	80.7	5.6%	15.6	1.6%
Provision for income taxes	30.1	2.1%	7.2	0.7%
Net income	\$ 50.6	3.5%	\$ 8.4	0.9%

Net sales. Net sales increased \$462.0 million, or 47.7%, from \$968.2 million for the nine months ended September 30, 2010 to \$1,430.2 million for the nine months ended September 30, 2011. The increase was primarily attributable to a 35.0% increase in shipments, in addition to an 11.7% increase in average realized prices for our Flat Rolled and Non-Ferrous and Plates and Shapes Product Groups. Net sales for our Building Products Group increased \$2.4 million, or 3.8% for the nine months ended September 30, 2011 compared to the same period of 2010. Results for the nine months ended September 30, 2011 include operating results from the Trident acquisition, which closed on March 11, 2011, and the ORMS acquisition, which closed on December 31, 2010. In addition, results for the nine months ended September 30, 2011 include a full nine months of operating results from the J. Rubin acquisition, which closed on June 28, 2010. Trident, ORMS and J. Rubin contributed a

Table of Contents

combined \$140.2 million of incremental sales for the nine months ended September 30, 2011. Excluding the Trident, ORMS and J. Rubin acquisitions, net sales increased \$321.8 million, or 35.9%, for the nine months ended September 30, 2011 versus the same period of 2010, which primarily resulted from an 18.4% increase in shipments and a 14.6% increase in average realized prices. The increase in prices and volumes is attributable to the cyclical nature of the metal consuming industries supported by our products and services. The economic recovery that has continued through the first nine months of 2011 has translated into increased metal consumption as industrial production continues to gradually expand. We continue to experience weaker demand in industries tied to non-residential construction and offshore oil and gas drilling.

According to data from the Metals Service Center Institute, year-to-date actual shipments for the service center industry through September 2011 are up 15.9% over the same period of 2010. Inventory levels have remained relatively stable through the first nine months of 2011. Despite a cautious economic outlook, business conditions have remained generally favorable for the first nine months of 2011 compared to the same period of 2010.

Cost of sales. Cost of sales increased \$347.9 million, or 46.7%, from \$744.5 million for the nine months ended September 30, 2010 to \$1,092.4 million for the nine months ended September 30, 2011. The increase was primarily attributable to a 35.0% increase in shipments for our Flat Rolled and Non-Ferrous and Plates and Shapes Product Groups, in addition to a 10.6% increase in average cost per ton. Cost of sales for our Building Products Group increased \$3.2 million, or 7.2%. The Trident, ORMS and J. Rubin acquisitions added a combined \$103.5 million of incremental cost of sales for the nine months ended September 30, 2011. Excluding the Trident, ORMS and J. Rubin acquisitions, shipments increased 18.4% and average cost per ton increased 13.8% over the same period of 2010. The increase in volumes that contributed to higher cost of sales during the first nine months of 2011 was primarily attributable to the factors that affected the increase in net sales discussed above. Cost of sales as a percentage of net sales decreased from 76.9% for the nine months ended September 30, 2010 to 76.4% for the same period of 2011.

Operating and delivery. Operating and delivery expenses increased \$33.3 million, or 34.1%, from \$97.7 million for the nine months ended September 30, 2010 to \$131.0 million for the nine months ended September 30, 2011. The increase was a result of higher variable costs associated with increased shipments, most notably higher labor costs of approximately \$13.2 million and higher freight costs of approximately \$8.0 million. In addition, Trident, ORMS and J. Rubin added a combined \$14.5 million of incremental operating and delivery expenses for the first nine months of 2011. As a percentage of net sales, operating and delivery expenses decreased from 10.1% for the nine months ended September 30, 2010 to 9.2% for the nine months ended September 30, 2011.

Selling, general and administrative. Selling, general and administrative expenses increased \$22.6 million, or 37.4%, from \$60.4 million for nine months ended September 30, 2010 to \$83.0 million for the nine months ended September 30, 2011. Higher salaries of approximately \$6.3 million in addition to an approximate \$7.2 million increase in incentive compensation contributed to the period-over-period increase. Trident, ORMS and J. Rubin added a combined \$10.3 million of incremental selling, general and administrative expenses for the first nine months of 2011. We also incurred costs of approximately \$1.5 million during the first nine months of 2011 which were primarily attributable to the Trident acquisition, which closed in March 2011. As a percentage of net sales, selling, general and administrative expenses decreased from 6.2% for the nine months ended September 30, 2010 to 5.8% for the nine months ended September 30, 2011.

Depreciation and amortization. Depreciation and amortization expense increased \$2.0 million, or 14.9%, from \$13.4 million for the nine months ended September 30, 2010 to \$15.4 million for the nine months ended September 30, 2011. The increase is primarily attributable to increases in fixed assets resulting from our growth through acquisitions over the past year and from increased capital spending, as our investments in new equipment have grown in line with higher business activity levels. Net property and equipment as of September 30, 2011 was \$241.4 million compared to \$183.2 million as of September 30, 2010. As a percentage of net sales, depreciation and amortization expenses decreased from 1.4% for the nine months ended September 30, 2010 to 1.1% for the nine months ended September 30, 2011.

Table of Contents

Operating income. Operating income increased \$59.4 million, or 121.2%, from \$49.0 million for the nine months ended September 30, 2010 to \$108.4 million for the nine months ended September 30, 2011. The increase was primarily a result of the increase in net sales discussed above, in addition to the impact associated with the acquisitions of Trident, ORMS and J. Rubin, which contributed a combined \$9.2 million of incremental operating income for the nine months ended September 30, 2011. The increase in operating income during the first nine months of 2011 was also partially attributable to the absence of a one-time, \$3.3 million charge to operating expense for the termination of our advisory agreement with Apollo in connection with our initial public offering of common stock (IPO) during the second quarter of 2010. As a percentage of net sales, operating income increased from 5.1% for the nine months ended September 30, 2010 to 7.6% for the nine months ended September 30, 2011.

Interest expense. Interest expense decreased \$2.3 million, or 7.7%, from \$29.9 million for the nine months ended September 30, 2010 to \$27.6 million for the nine months ended September 30, 2011. The decrease was due to the redemption of Metals USA Holdings Senior Floating Rate PIK Toggle Notes due 2012 (the 2007 Notes) in May 2010, partially offset by increased interest expense associated with higher borrowings and a higher average facility rate on the ABL facility. The weighted average outstanding balance on our ABL facility increased from \$74.9 million for the nine months ended September 30, 2010 to \$207.1 million for the nine months ended September 30, 2011. Borrowings under the ABL facility were used to fund the Trident and ORMS acquisitions, in addition to higher working capital needs between the two periods.

Income taxes. Income tax expense for the nine months ended September 30, 2011 was \$30.1 million, resulting in an overall effective tax rate of 37.3%, compared to income tax expense of \$7.2 million and overall effective tax rate of 46.0% for the nine months ended September 30, 2010. Our effective tax rate differs from the federal statutory rate due to state taxes, certain valuation allowances on state and Canadian deferred tax assets, as well as provisions for uncertain tax positions.

Net income. Net income increased from \$8.4 million for the nine months ended September 30, 2010 to \$50.6 million for the nine months ended September 30, 2011. The variance was primarily due to the improved operating performance of our metal service center businesses resulting from increases in end market demand and metal prices, ongoing and permanent cost reductions over the last year, and improved returns resulting from aggressive working capital management.

Segment Results Three Months Ended September 30, 2011 Compared to September 30, 2010

	Net Sales	Operating Costs and Expenses	Operating Income (Loss)	Capital Spending	Tons Shipped ⁽¹⁾	
	(in millions, except tons)				Direct	Toll
2011:						
Plates and Shapes	\$ 191.3	\$ 171.3	\$ 20.0	\$ 1.9	139	7
Flat Rolled and Non-Ferrous	279.7	259.1	20.6	4.5	168	30
Building Products	24.7	23.8	0.9			
Corporate and other	(3.4)	2.8	(6.2)		(3)	
Total	\$ 492.3	\$ 457.0	\$ 35.3	\$ 6.4	304	37
2010:						
Plates and Shapes	\$ 144.4	\$ 134.7	\$ 9.7	\$ 0.5	128	9
Flat Rolled and Non-Ferrous	180.1	168.0	12.1	0.1	132	6

(1) Shipments are expressed in thousands of tons and are not an applicable measure for the Building Products Group.

Table of Contents

Plates and Shapes. Net sales increased \$46.9 million, or 32.5%, from \$144.4 million for the three months ended September 30, 2010 to \$191.3 million for the three months ended September 30, 2011. The increase was primarily attributable to a 24.3% increase in average realized prices, in addition to a 6.6% increase in shipments for the three months ended September 30, 2011 compared to the three months ended September 30, 2010. Product demand for the Plates and Shapes Group is more transactional in nature and is typically associated with industries and end markets that show strength during later stages of economic cycles. While we experienced increased demand from the defense and oilfield services end markets during the third quarter of 2011, the non-residential construction sector, which has been a key metal consuming end market for us in the past, continued to experience weak demand by historical standards.

Increases in demand for both structural steel and steel scrap led to increases in the producer price of structural steel during the first nine months of 2011. Currently, structural steel remains readily available in the U.S. market, with service centers holding approximately two to three months of inventory on hand. Mill delivery lead times are relatively short with lower seasonal demand expected for the remainder of the year.

Operating costs and expenses increased \$36.6 million, or 27.2%, from \$134.7 million for the three months ended September 30, 2010 to \$171.3 million for the three months ended September 30, 2011. The increase was primarily attributable to a 21.2% increase in average cost per ton, in addition to a 6.6% increase in shipments for the three months ended September 30, 2011 compared to the three months ended September 30, 2010. Operating costs and expenses as a percentage of net sales decreased from 93.3% for the three months ended September 30, 2010 to 89.5% for the three months ended September 30, 2011.

Operating income increased \$10.3 million, or 106.2%, from \$9.7 million for the three months ended September 30, 2010 to \$20.0 million for the three months ended September 30, 2011. The increase primarily resulted from the increase in net sales discussed above, in addition to lower operating costs and expenses as a percentage of net sales as we continue to focus on controlling our operating costs in order to maintain our margins. Operating income as a percentage of net sales increased from 6.7% for the three months ended September 30, 2010 to 10.5% for the three months ended September 30, 2011.

Flat Rolled and Non-Ferrous. Net sales increased \$99.6 million, or 55.3%, from \$180.1 million for the three months ended September 30, 2010 to \$279.7 million for the three months ended September 30, 2011. Trident and ORMS contributed a combined \$54.3 million of incremental sales for the quarter ended September 30, 2011. The remaining increase was primarily attributable to a 17.4% increase in shipments, in addition to a 6.6% increase in average realized prices for the three months ended September 30, 2011 compared to the three months ended September 30, 2010. Our recent acquisitions caused shipments during the third quarter of 2011 to include a larger proportion of toll processed tonnage than our historical norm. Toll processing describes performing processing services on customer-owned material. Net sales for toll processing equates to the processing service fee charged to the customer. Sales of non-ferrous metals accounted for approximately 41% of the segment's sales product mix for the third quarter of 2011, compared to approximately 37% for the third quarter of 2010. The significant growth in volume for our Flat Rolled and Non-Ferrous Group is attributable to solid demand in selected end-user markets during the third quarter of 2011, including energy and oilfield services, heavy equipment and automotive industry manufacturers, lawn and garden equipment manufacturers, truck transportation and household appliance manufacturers.

Operating costs and expenses increased \$91.1 million, or 54.2%, from \$168.0 million for the three months ended September 30, 2010 to \$259.1 million for the three months ended September 30, 2011. Trident and ORMS contributed a combined \$50.4 million of incremental operating costs and expenses to the segment for the third quarter of 2011. The remaining increase was primarily attributable to a 17.4% increase in shipments, in addition to a 6.9% increase in average cost per ton. Operating costs and expenses as a percentage of net sales decreased from 93.3% for the three months ended September 30, 2010 to 92.6% for the three months ended September 30, 2011.

Table of Contents

Operating income increased by \$8.5 million, or 70.2%, from \$12.1 million for the three months ended September 30, 2010 to \$20.6 million for the three months ended September 30, 2011. The increase was primarily attributable to the increase in volumes, combined with the increase in average realized prices discussed above. Trident and ORMS contributed a combined \$3.9 million of incremental operating income for the three months ended September 30, 2011. Operating income as a percentage of net sales increased from 6.7% for the three months ended September 30, 2010 to 7.4% for the same period of 2011.

Building Products. Net sales increased \$1.5 million, or 6.5%, from \$23.2 million for the three months ended September 30, 2010 to \$24.7 million for the three months ended September 30, 2011. Although the Building Products segment experienced revenue growth during the third quarter of 2011 compared to the third quarter of 2010, this segment of our business continues to be affected by lower consumer spending on residential remodeling due to the effects of the economic recession. Weak job growth, high unemployment, declining home prices and subdued consumer confidence, in addition to decreased access to affordable credit for homeowners and residential remodeling contractors, have contributed to volatility in home improvement spending.

Operating costs and expenses increased \$1.8 million, or 8.2%, from \$22.0 million for the three months ended September 30, 2010 to \$23.8 million for the three months ended September 30, 2011. Operating costs and expenses as a percentage of net sales increased from 94.8% for the three months ended September 30, 2010 to 96.4% for the three months ended September 30, 2011.

Operating income decreased from \$1.2 million for the three months ended September 30, 2010 to \$0.9 million for the three months ended September 30, 2011. Operating income as a percentage of net sales was 3.6% for the quarter ended September 30, 2011 versus 5.2% for the quarter ended September 30, 2010.

Corporate and other. This category reflects certain administrative costs and expenses management has not allocated to its industry segments. These costs include compensation for executive officers, insurance, professional fees for audit, tax and legal services and data processing expenses. The negative net sales amount represents the elimination of intercompany sales. The operating loss increased \$2.1 million for the three months ended September 30, 2011 as compared to the three months ended September 30, 2010 due primarily to higher professional fees and higher expenses associated with incentive compensation as a result of the underlying growth and improved performance of the business.

Segment Results Nine Months Ended September 30, 2011 Compared to September 30, 2010

	Net Sales	Operating Costs and Expenses	Operating Income (Loss)	Capital Spending	Tons Shipped ⁽¹⁾	
	(in millions, except tons)				Direct	Toll

(1) Shipments are expressed in thousands of tons and are not an applicable measure for the Building Products Group.

Table of Contents

Plates and Shapes. Net sales increased \$185.3 million, or 46.0%, from \$402.8 million for the nine months ended September 30, 2010 to \$588.1 million for the nine months ended September 30, 2011. The increase was primarily attributable to a 21.3% increase in shipments, in addition to a 20.3% increase in average realized prices for the nine months ended September 30, 2011 compared to the nine months ended September 30, 2010. While we experienced increased demand from the defense and energy services end markets during the first nine months of 2011, the non-residential construction sector, which has been a key metal consuming end market for us in the past, continued to experience weak demand by historical standards.

Operating costs and expenses increased \$148.4 million, or 39.8%, from \$372.6 million for the nine months ended September 30, 2010 to \$521.0 million for the nine months ended September 30, 2011. The increase was primarily attributable to a 21.3% increase in shipments, in addition to a 19.2% increase in the average cost per ton for the nine months ended September 30, 2011 compared to the nine months ended September 30, 2010. We incurred approximately \$0.6 million of facility closure and severance expenses related to the closure of a Plates and Shapes location in Hayward, California during the first quarter of 2011, which contributed to the increase in operating costs and expenses versus the prior year. Operating costs and expenses as a percentage of net sales decreased from 92.5% for the nine months ended September 30, 2010 to 88.6% for the nine months ended September 30, 2011.

Operating income increased \$36.9 million, or 122.2%, from \$30.2 million for the nine months ended September 30, 2010 to \$67.1 million for the nine months ended September 30, 2011. The increase primarily resulted from the increase in net sales discussed above, in addition to lower operating costs and expenses as a percentage of net sales, as we continue to focus on cost control. Operating income as a percentage of net sales increased from 7.5% for the nine months ended September 30, 2010 to 11.4% for the nine months ended September 30, 2011.

Flat Rolled and Non-Ferrous. Net sales increased \$276.6 million, or 54.3%, from \$509.1 million for the nine months ended September 30, 2010 to \$785.7 million for the nine months ended September 30, 2011. Trident, ORMS and J. Rubin contributed a combined \$140.2 million of incremental sales for the nine months ended September 30, 2011. The remaining increase was primarily attributable to a 16.3% increase in shipments, in addition to a 9.5% increase in average realized prices for the nine months ended September 30, 2011 compared to the nine months ended September 30, 2010. Our recent acquisitions caused shipments during the first nine months of 2011 to include a larger proportion of toll processed tonnage than our historical norm. Toll processing describes performing processing services on customer-owned material. Net sales for toll processing equates to the processing service fee charged to the customer. Sales of non-ferrous metals accounted for approximately 39% of the segment's sales product mix for the first nine months of 2011, compared to approximately 38% for the first nine months of 2010. Our Flat Rolled and Non-Ferrous Group experienced increased demand in the automotive, heating and air conditioning equipment, lawn and garden equipment and aerospace equipment markets during the first nine months of 2011.

Operating costs and expenses increased \$252.0 million, or 53.3%, from \$472.9 million for the nine months ended September 30, 2010 to \$724.9 million for the nine months ended September 30, 2011. Trident, ORMS and J. Rubin contributed a combined \$131.0 million of incremental operating costs and expenses to the segment for the first nine months of 2011. The remaining increase was primarily attributable to a 16.3% increase in shipments, in addition to a 9.6% increase in average cost per ton. Operating costs and expenses as a percentage of net sales decreased from 92.9% for the nine months ended September 30, 2010 to 92.3% for the nine months ended September 30, 2011.

Operating income increased \$24.6 million, or 68.0%, from \$36.2 million for the nine months ended September 30, 2010 to \$60.8 million for the nine months ended September 30, 2011. The increase was primarily attributable to the increase in volumes, combined with the increase in average realized prices discussed above. Trident, ORMS and J. Rubin contributed a combined \$9.2 million of incremental operating income for the nine months ended September 30, 2011. Operating income as a percentage of net sales increased from 7.1% for the nine months ended September 30, 2010 to 7.7% for the same period of 2011.

Table of Contents

Building Products. Net sales increased \$2.4 million, or 3.8%, from \$63.7 million for the nine months ended September 30, 2010 to \$66.1 million for the nine months ended September 30, 2011. Although the Building Products segment experienced top-line growth during the first nine months of 2011 compared to the same period of 2010, this segment of our business continues to be affected by lower consumer spending on residential remodeling due to the effects of the economic recession. Weak job growth, high unemployment, declining home prices and subdued consumer confidence, in addition to decreased access to affordable credit for homeowners and residential remodeling contractors, have contributed to volatility in home improvement spending.

Operating costs and expenses increased \$2.2 million, or 3.5%, from \$63.6 million for the nine months ended September 30, 2010 to \$65.8 million for the nine months ended September 30, 2011. Operating costs and expenses as a percentage of net sales decreased from 99.8% for the nine months ended September 30, 2010 to 99.6% for the nine months ended September 30, 2011.

Operating income increased from \$0.1 million for the nine months ended September 30, 2010 to \$0.3 million for the nine months ended September 30, 2011. Results for the first nine months of 2011 include a non-recurring gain of approximately \$0.7 million resulting from a settlement with the previous owners of the Dura-Loc (now Allmet) roofing business we acquired in 2006 to cover pre-acquisition warranty claims.

Corporate and other. This category reflects certain administrative costs and expenses management has not allocated to its industry segments. These costs include compensation for executive officers, insurance, professional fees for audit, tax and legal services and data processing expenses. The negative net sales amount represents the elimination of intercompany sales. The operating loss increased \$2.3 million for the nine months ended September 30, 2011 as compared to the nine months ended September 30, 2010 due primarily to higher professional fees and higher expenses associated with incentive compensation as a result of the underlying growth and improved performance of the business.

Liquidity and Capital Resources

Our primary sources of short-term liquidity are borrowings under the ABL facility and our cash flow from operations. We believe these resources will be sufficient to meet our working capital and capital expenditure requirements for the next twelve months.

Our borrowing availability fluctuates daily with changes in eligible accounts receivable and inventory, less outstanding borrowings and letters of credit. See *Financing Activities* below. As of September 30, 2011, we had \$446.6 million of eligible collateral, \$243.4 million in outstanding advances, \$25.9 million in open letters of credit and \$177.3 million of additional borrowing capacity. As of September 30, 2011, we had \$13.4 million of cash on hand.

We generally meet long-term liquidity requirements, the repayment of debt and investment funding needs, through additional borrowings under the ABL facility and the issuance of debt securities. As of September 30, 2011, our debt consisted of \$243.4 million of outstanding borrowings under the ABL facility, \$226.3 million principal amount of the Metals USA Notes, IRBs with \$12.8 million principal amount outstanding and \$2.1 million of capital leases and other obligations. We believe that cash flow from operations, supplemented by cash available under the ABL facility, will be sufficient to enable us to meet our debt service and operational obligations as they come due for at least the next twelve months.

With respect to long-term liquidity, we believe that we will be able to meet our working capital, capital expenditure and debt service obligations. Our ability to meet long-term liquidity requirements is subject to obtaining additional debt and/or equity financing. Decisions by lenders and investors to enter into such transactions with us will depend upon a number of factors, such as our historical and projected financial performance, compliance with the terms of our current credit agreements, industry and market trends, the availability of capital, and the relative attractiveness of alternative lending or investment opportunities.

Table of Contents

Operating and Investing Activities

Although we do not produce any metal, our financial performance is affected by changes in metal prices. When metal prices rise, the prices at which we are able to sell our products generally increase over their historical costs; accordingly, our working capital (which consists primarily of accounts receivable and inventory) tends to increase. Conversely, when metal prices fall, our working capital tends to decrease. Our working capital (current assets less current liabilities) increased from \$380.2 million at December 31, 2010 to \$509.8 million at September 30, 2011.

Changes in metal prices also affect our liquidity because of the time difference between our payment for our raw materials and our collection of cash from our customers. We sell our products and typically collect our accounts receivable within 45 days after the sale; however, we tend to pay for replacement materials (which are more expensive when metal prices are rising) over a much shorter period, primarily to benefit from early-payment discounts that are substantially higher than our cost of incremental debt. As a result, when metal prices are rising, we tend to draw more on the ABL facility to cover the cash flow cycle from material purchase to cash collection. When metal prices fall, we can replace our inventory at lower cost and, thus, generally do not need to access the ABL facility as much to cover the cash flow cycle. We believe that cash flow from operations, supplemented by cash available under the ABL facility, will be sufficient to enable us to meet our debt service and operational obligations as they come due for at least the next twelve months. Additionally, we intend to look for value-added businesses that we can acquire at reasonable prices. We intend to use cash flows from operations and excess cash available under the ABL facility to fund future acquisitions.

The following discussion of the principal sources and uses of cash should be read in conjunction with our condensed consolidated statements of cash flows included in our condensed consolidated financial statements for the nine months ended September 30, 2011.

During the nine months ended September 30, 2011, net cash used in operating activities was \$38.6 million. During the first nine months of 2011, our working capital increased as we experienced increasing prices and end market demand. Increases of \$70.9 million in our accounts receivable balance and \$74.8 million in our inventory value were the primary contributors to operating cash outflows for the period. Accounts receivable increased due to stronger sales which were primarily driven by sharply higher shipments versus the same period of the prior year. During the nine months ended September 30, 2010, net cash used in operating activities was \$47.7 million. During the first nine months of 2010, our working capital increased as we experienced modestly increasing prices and slowly recovering end market demand. Increases of \$32.8 million in our accounts receivable balance and \$43.2 million in our inventory value were the primary contributors to operating cash outflows for the period. We also paid \$23.2 million of PIK Interest, as defined in the Indenture governing the 2007 Notes, in connection with the redemption of the 2007 Notes.

Net cash used in investing activities was \$98.0 million for the nine months ended September 30, 2011, and consisted primarily of \$88.1 million of acquisition costs, net of cash acquired, for the Trident acquisition, which closed on March 11, 2011, and capital expenditures of \$10.1 million. Net cash used in investing activities was \$21.0 million for the nine months ended September 30, 2010, and consisted primarily of capital expenditures of \$2.2 million and \$19.0 million of cash paid for the J. Rubin acquisition, which closed in June 2010.

Net cash provided by financing activities was \$133.4 million for the nine months ended September 30, 2011, which consisted of net borrowings on the ABL facility of \$137.4 million offset by \$2.9 million of cash paid for loan financing costs and \$1.1 million of debt repayments. Net cash provided by financing activities was \$75.1 million for the nine months ended September 30, 2010, and consisted primarily of net proceeds from our April 2010 IPO of \$221.2 million, offset by the repayments of long-term debt of \$146.7 million related to the redemption of the 2007 Notes.

Table of Contents

Covenant Compliance

Adjusted EBITDA

Adjusted EBITDA (as defined by the loan and security agreement governing the ABL facility and the Indenture governing the Metals USA Notes) is defined as EBITDA further adjusted to exclude certain non-cash and non-recurring items. Adjusted EBITDA is not a defined term under GAAP and should not be used as an alternative to net income as an indicator of operating performance or to cash flow as a measure of liquidity.

Fixed Charge Coverage Ratio

Under the ABL facility, the FCCR is determined on a rolling four-quarter period, often referred to as a last-twelve month period, by dividing (1) the Adjusted EBITDA of Metals USA minus income taxes paid in cash minus non-financed capital expenditures by (2) the sum of certain distributions paid in cash, cash interest expense and scheduled principal reductions on debt paid by Metals USA. Should borrowing availability under the ABL facility fall below Minimum Availability, we must maintain a FCCR of at least 1.0 to 1.0, measured on a trailing four-quarter basis. As of September 30, 2011, our borrowing availability under the ABL facility was \$177.3 million. In addition, the FCCR is an important measure of our liquidity and affects our ability to take certain actions, including paying dividends to stockholders and making acquisitions.

Because access to debt capital is currently and in the future will continue to be important to us, we believe that the inclusion of supplementary adjustments to EBITDA applied in presenting Adjusted EBITDA are appropriate to provide additional information to investors to demonstrate compliance with the covenants in our debt agreements. Failure to comply with the FCCR covenant of the ABL facility can result in limiting our long-term growth prospects by hindering our ability to incur future indebtedness or grow through acquisitions. As of September 30, 2011, our FCCR was 2.78. As of September 30, 2011, we had \$177.3 million of additional borrowing capacity under the ABL facility.

Although the Indenture governing the Metals USA Notes also contains covenants that restrict our ability to incur indebtedness and pay dividends based on our FCCR, the definition and application of the FCCR contained in the Indenture differs from the definition and application of the FCCR in the ABL facility in that the numerator of the FCCR as defined in the Indenture does not include cash income taxes or non-financed capital expenditures and the denominator of the FCCR as defined in the Indenture does not include the sum of certain distributions paid in cash and scheduled principal reductions on debt, and separate FCCRs are required under certain circumstances. See [Financing Activities](#) below.

The Indenture governing the Metals USA Notes contains covenants that restrict our ability to take certain actions, such as incurring additional debt and making certain acquisitions, if we are unable to meet defined Adjusted EBITDA to fixed charge coverage ratios (as defined). The covenants in the Indenture require us to have an Adjusted EBITDA to fixed charge coverage ratio (measured on a trailing four-quarter basis and calculated differently from the fixed charge coverage ratio as defined by the ABL facility) of 2.0 to 1.0 to incur ratio indebtedness. Based on the calculations for the trailing four quarters, we are able to satisfy these covenants and incur additional indebtedness under these ratios, including for acquisition purposes, under our Indenture.

Pro Forma Adjusted EBITDA

Pro Forma Adjusted EBITDA is defined as Adjusted EBITDA (as discussed above) with additions for the Adjusted EBITDA of recent acquisitions as though we owned those businesses for the twelve-month period ended September 30, 2011. Adjusted EBITDA on a Pro Forma Basis, as defined in our debt agreements, is a non-GAAP measure used in the calculation of our Consolidated Total Debt Ratio, as defined by the Indenture governing the Metals USA Notes. As of September 30, 2011, our Consolidated Total Debt Ratio was 3.25 based on a trailing twelve-month Pro Forma Adjusted EBITDA of \$149.1 million.

Table of Contents

Our inability to satisfy the terms of the negative covenants in our debt agreements do not, by themselves, constitute covenant violations or events of default. Rather, they are event-related restrictions that may limit or prohibit the Company from taking certain corporate actions. As of September 30, 2011, we were not restricted under any of the negative covenants in our debt agreements.

Limitations of Adjusted EBITDA

There are material limitations associated with making the adjustments to our earnings to calculate Adjusted EBITDA and using such a non-GAAP financial measure as compared to the most directly comparable GAAP financial measure. For instance, Adjusted EBITDA does not include:

interest expense, and because we have borrowed money in order to finance our operations, interest expense is a necessary element of our costs and ability to generate revenue;

income tax expense, and because the payment of taxes is part of our operations, income tax expense is a necessary element of our costs and ability to operate; and

depreciation and amortization expense, and because we use capital assets, depreciation and amortization expense is a necessary element of our costs and ability to generate revenue.

In addition, fixed charges should not be considered an alternative to interest expense.

Table of Contents

Below is a reconciliation of net income to EBITDA, Adjusted EBITDA, Pro Forma Adjusted EBITDA, and net cash used in operating activities:

	Three Months Ended September 30,		Nine Months Ended September 30,		Twelve Months Ended September 30,
	2011	2010	2011	2010	2011
Net income	\$ 16.7	\$ 5.8	\$ 50.6	\$ 8.4	\$ 53.7
Depreciation and amortization ⁽¹⁾	5.5	4.9	16.9	14.9	21.8
Interest expense	9.3	8.7	27.6	29.9	36.6
Loss on extinguishment of debt				3.5	
Provision for income taxes	9.2	4.4
