Edgar Filing: Altra Holdings, Inc. - Form 10-K

(Address of principal executive offices)

(Zip Code)

Registrant's telephone number, including area code:

(781) 917-0600

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class	Name of Each Exchange on Which Registered
Common Stock, \$0.001 par value	NASDAQ Global Market

Securities registered pursuant to Section 12(g) of the Act:

NONE

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act. Yes No

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of the registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of the voting and non-voting common stock held by non-affiliates of the registrant based on the closing price (as reported by NASDAQ) of such common stock on the last business day of the registrant's most recently completed second fiscal quarter (July 2, 2011) was approximately \$620.0 million.

As of February 20, 2012, there were 26,942,734 shares of Common Stock, \$0.001 par value per share, outstanding.

DOCUMENTS INCORPORATED BY REFERENCE:

Portions of the following document are incorporated herein by reference into the Part of the Form 10-K indicated.

Item 1. Business
Our Company

Altra Holdings, Inc. is the parent company of Altra Industrial Motion, Inc. (Altra Industrial), and owns 100% of Altra Industrial 's outstanding capital stock. Altra Industrial, directly or indirectly, owns 100% of the capital stock of its 56 subsidiaries. The following chart illustrates a summary of our corporate structure:

We are a leading global designer, producer and marketer of a wide range of mechanical power transmission, or MPT, and motion control products serving customers in a diverse group of industries, including energy, general industrial, material handling, mining, transportation, and turf and garden. Our product portfolio includes industrial clutches and brakes, enclosed gear drives, open gearing, belted drives, couplings, engineered bearing assemblies, linear components, gear motors, electronic drives and other related products. Our products are used in a wide variety of high-volume manufacturing processes, where the reliability and accuracy of our products are critical in both avoiding costly down time and enhancing the overall efficiency of manufacturing operations. Our products are also used in non-manufacturing applications where product quality and reliability are especially critical, such as clutches and brakes for elevators and residential and commercial lawnmowers. For the year ended December 31, 2011, we had net sales of \$674.8 million and net income of \$37.7 million.

We market our products under well recognized and established brands, many of which have been in existence for over 50 years. We believe many of our brands, when taken together with our brands in the same product category have achieved the number one or number two position in terms of consolidated market share and brand awareness in their respective product categories. Our products are either incorporated into products sold by original equipment manufacturers, or OEMs, sold to end users directly or sold through industrial distributors.

We are led by a highly experienced management team that has established a proven track record of execution, successfully completing and integrating major strategic acquisitions and delivering significant growth in both revenue and profits. We employ a comprehensive business process called the Altra Business System, or ABS, which focuses on eliminating inefficiencies from business processes to improve quality, delivery and cost.

In this Annual Report on Form 10-K, the terms Altra Holdings, the Company, we, us and our refer to Altra Holdings, Inc. and its subsidiaries except where the context otherwise requires or indicates.

We file reports and other documents with the Securities and Exchange Commission. You may read and copy documents we file at the SEC 's Public Reference Room at 100 F Street, NE, Washington, D.C. 20549. You should call 1-800-SEC-0330 for more information on the public reference room. Our SEC Filings are also available to you on the SEC 's internet site at <http://www.sec.gov>.

Our internet address is www.altramotion.com. By following the link [Investor Relations](#) and then [SEC filings](#) on our Internet website, we make available, free of charge, our Annual Report on Form 10-K, our Quarterly Reports on Form 10-Q, our Current reports on Form 8-K, and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934 (the [Exchange Act](#)) as soon as reasonably practicable after such forms are filed with or furnished to the SEC. We are not including information contained on or available through our website as a part of, or incorporating such information by reference into, this Annual Report on Form 10-K.

History and Acquisitions

Although we were incorporated in Delaware in 2004, much of our current business has its roots with the prior acquisition by Colfax Corporation, or Colfax, of the MPT group of Zurn Technologies, Inc. in December 1996. Colfax subsequently acquired Industrial Clutch Corp. in May 1997, Nuttall Gear Corp. in July 1997 and the Boston Gear and Delroyd Worm Gear brands in August 1997 as part of Colfax's acquisition of Imo Industries, Inc. In February 2000, Colfax acquired Warner Electric, Inc., which sold products under the Warner Electric, Formsprag Clutch, Stieber and Wichita Clutch brands. Colfax formed Power Transmission Holding, LLC or PTH in June 2004 to serve as a holding company for all of these power transmission businesses. Boston Gear was established in 1877, Warner Electric, Inc. in 1927, and Wichita Clutch in 1949.

On November 30, 2004, we acquired our original core business through the acquisition of PTH from Colfax. We refer to this transaction as the PTH Acquisition.

On October 22, 2004, The Kilian Company, or Kilian, a company formed at the direction of Genstar Capital, then the largest stockholder of Altra Holdings, acquired Kilian Manufacturing Corporation from Timken U.S. Corporation. At the completion of the PTH Acquisition, (i) all of the outstanding shares of Kilian capital stock were exchanged for shares of our capital stock and (ii) Kilian and its subsidiaries were transferred to Altra Industrial.

On February 10, 2006, we purchased all of the outstanding share capital of Hay Hall Holdings Limited, or Hay Hall. Hay Hall was a UK-based holding company established in 1996 that was focused primarily on the manufacture of couplings and clutch brakes. Hay Hall consisted of five main businesses that were niche focused and had strong brand names and established reputations within their primary markets. Through Hay Hall, we acquired 15 strong brands in complementary product lines, improved customer leverage and expanded geographic presence in over 11 countries.

On May 18, 2006, we acquired substantially all of the assets of Bear Linear Inc, or Warner Linear. Warner Linear manufactures high value-added linear actuators which are electromechanical power transmission devices designed to move and position loads linearly for mobile off-highway and industrial applications.

On April 5, 2007, the Company acquired all of the outstanding shares of TB Wood's Corporation, or TB Wood's. TB Wood's is an established designer, manufacturer and marketer of mechanical and electronic industrial power transmission products. In December 2007, the Company divested the TB Wood's electronics division.

On October 5, 2007, we acquired substantially all of the assets of All Power Transmission Manufacturing, Inc., or All Power, a manufacturer of universal joints.

On May 29, 2011, the Company acquired substantially all of the assets and liabilities of Danfoss Bauer GmbH relating to its gear motor business (Bauer). We refer to this transaction as the Bauer Acquisition. Bauer is a European manufacturer of high-quality gear motors, offering engineered solutions to a variety of industries, including material handling, metals, food processing and energy.

Initial Public Offering

In December 2006, the Company completed an initial public offering. The Company offered 3,333,334 of its own shares of common stock, \$0.001 par value per share. In addition, selling stockholders offered 6,666,666 shares of common stock. Proceeds to the Company after the underwriting discount were \$41.9 million.

Secondary Public Offering

In June 2007, we completed a secondary public offering of 12,650,000 shares of our common stock, which included 1,650,000 shares sold as a result of the underwriters' exercise of their overallotment option in full at closing. We received proceeds of \$48.9 million, net of issuance costs. In the offering, we sold 3,178,494 shares of common stock and certain selling stockholders sold 9,471,506 shares of common stock.

Our Industry

Based on industry data supplied by Penton Information Services, we estimate that industrial power transmission products generated sales in the United States of approximately \$34.8 billion in 2011. These products are used to generate, transmit, control and transform mechanical energy. The industrial power transmission industry can be divided into three areas: MPT products; motors and generators; and adjustable speed drives. We compete primarily in the MPT area which, based on industry data, we estimate was a \$18.1 billion market in the United States in 2011.

The global MPT market is highly fragmented, with over 1,000 small manufacturers. While smaller companies tend to focus on regional niche markets with narrow product lines, larger companies that generate annual sales of over \$100 million generally offer a much broader range of products and have global capabilities. Buyers of MPT products are broadly diversified across many sectors of the economy and typically place a premium on factors such as quality, reliability, availability, and design and application engineering support. We believe the most successful industry participants are those that leverage their distribution network, their products' reputations for quality and reliability and their service and technical support capabilities to maintain attractive margins on products and gain market share.

Our Strengths

Leading Market Shares and Brand Names. We believe we hold the number one or number two market position in key products across many of our core platforms. We believe that over 50% of our sales are derived from products where we hold the number one or number two share and brand recognition, assuming our brands in the same product category are taken together, in the markets we serve. In addition, we believe we have recently captured additional market share in several product lines due to our innovative product development efforts and exceptional customer service.

Customized, Engineered Products Serving Niche Markets. We employ approximately 206 non-manufacturing engineers involved with product design, research and development, testing and technical customer support, and we often participate in lengthy design and qualification processes with our customers. Many of our product lines involve a large number of unique parts, are delivered in small order quantities with short lead times, and require varying levels of technical support and responsive customer service. As a result of these characteristics, as well as the essential nature of our products to the efficient operations of our customers, we generate a significant amount of recurring sales with repeat customers.

Aftermarket Sales Supported by Large Installed Base. With a history dating back to 1857 with the formation of TB Woods, we believe we benefit from one of the largest installed customer bases in the industry. The moving, wearing nature of our products necessitates regular replacement and our large installed base of products generates significant aftermarket replacement demand. This has created a recurring revenue stream from a diversified group of end-user customers. For 2011, we estimate that approximately 42% of our revenues were derived from aftermarket sales.

Diversified End Markets. Our revenue base has a balanced exposure across a diverse mix of end-user industries, including energy, food processing, general industrial, material handling, mining, transportation, and turf and garden. We believe our diversified end markets insulate us from volatility in any single industry or type of end-user. In 2011, no single industry represented more than 10% of our total sales. In addition, we are geographically diversified with approximately 34% of our sales coming from outside North America during 2011.

Strong Relationships with Distributors and OEMs. We have over 1,000 direct OEM customers and enjoy established, long-term relationships with the leading industrial MPT distributors, critical factors that contribute to our high base of recurring aftermarket revenues. We sell our products through more than 3,000 distributor outlets worldwide. We believe our scale, expansive product lines and end-user preference for our products make our product portfolio attractive to both large and multi-branch distributors, as well as regional and independent distributors in our industry.

Experienced, High-Caliber Management Team. We are led by a highly experienced management team with over 250 years of cumulative industrial business experience and an average of 14 years with our companies. Our CEO, Carl Christenson, has over 30 years of experience in the MPT industry, while our CFO, Christian Storch, has approximately 24 years of experience. Our management team has established a proven track record of execution, successfully completing and integrating major strategic acquisitions and delivering significant growth and profitability.

The Altra Business System. We benefit from an established culture of lean management emphasizing quality, delivery and cost through the Altra Business System, or ABS. ABS is at the core of our performance-driven culture and drives both our strategic development and operational improvements. We continually evaluate every aspect of our business to identify productivity improvements and cost savings.

Our Business Strategy

Our long-term strategy is to increase our sales through organic growth, expand our geographic reach and product offerings through strategic acquisitions and improve our profitability through cost reduction initiatives. We seek to achieve these objectives through the following strategies:

Leverage Our Sales and Distribution Network. We intend to continue to leverage our established, long-term relationships with the industry's leading national and regional distributors to help maintain and grow our revenues. We seek to capitalize on customer brand preferences for our products to generate pull-through aftermarket demand from our distribution channel. We believe this strategy also allows our distributors to achieve higher profit margins, further enhancing our preferred position with them.

Focus Our Strategic Marketing on New Growth Opportunities. We intend to expand our emphasis on strategic marketing to focus on new growth opportunities in key end-user and OEM markets. Through a systematic process that leverages our core brands and products, we seek to identify attractive markets and product niches, collect customer and market data, identify market drivers, tailor product and service solutions to specific market and customer requirements, and deploy resources to gain market share and drive future sales growth.

Accelerate New Product and Technology Development. We focus on aggressively developing new products across our business in response to customer needs in various markets. Our extensive application-engineering know-how drives both new and repeat sales and we have an established history of innovation with over 200 granted patents and pending patent applications worldwide. In total, new products developed by us during the past three years generated approximately \$76.8 million in revenues during 2011.

Capitalize on Growth and Sourcing Opportunities in the Asia-Pacific Market. We intend to leverage our established sales offices in the Asia Pacific region and expand into regions where we currently do not have sales representation. We are expanding our manufacturing presence in Asia beyond our current plant in Shenzhen, China, with the construction of our new manufacturing facility in Changzhou, China, which is currently expected to be completed during the third quarter of 2012. During 2011, we sourced approximately 26% of our purchases from low-cost countries, resulting in average cost reductions of approximately 54% for these products. Within the next five years, we intend to utilize our sourcing resources in China to increase our current level of low-cost country sourced purchases. We may also consider additional opportunities to outsource some of our production from North American and Western European locations to Asia or lower cost regions.

Continue to Improve Operational and Manufacturing Efficiencies through ABS. We believe we can continue to improve profitability through cost control, overhead rationalization, global process optimization, continued implementation of lean manufacturing techniques and strategic pricing initiatives. Our operating plan,

based on manufacturing centers of excellence, provides additional opportunities to consolidate purchasing processes and reduce costs by sharing best practices across geographies and business lines.

Selectively Pursue Strategic Acquisitions that Complement Our Strong Platform. We have a successful track record of identifying, acquiring and integrating acquisitions. We believe that in the future there may be a number of attractive potential acquisition candidates, in part due to the fragmented nature of the industry. We plan to continue our disciplined pursuit of strategic acquisitions to strengthen our product portfolio, enhance our industry leadership, leverage fixed costs, expand our global footprint, and create value in products and markets that we know and understand.

Products

We produce and market a wide variety of MPT products. Our product portfolio includes industrial clutches and brakes, open and enclosed gearing, couplings, engineered belted drives, engineered bearing assemblies and other related power transmission components which are sold across a wide variety of industries. Our products benefit from our industry leading brand names including Warner Electric, Boston Gear, TB Wood s, Kilian, Nuttall Gear, Ameridrives, Wichita Clutch, Formsprag Clutch, Bibby Transmissions, Stieber, Matrix, Inertia Dynamics, Twiflex, Industrial Clutch, Huco Dynatork, Marland Clutch, Delroyd, Warner Linear, and Bauer Gear Motor. Our products serve a wide variety of end markets including aerospace, energy, food processing, general industrial, material handling, mining, petrochemical, transportation and turf and garden. We primarily sell our products to OEMs and through long-standing relationships with the industry s leading industrial distributors such as Motion Industries, Applied Industrial Technologies, Kaman Industrial Technologies and W.W. Grainger. The following discussion of our products does not include detailed product category revenue because such information is not individually tracked by our financial reporting system and is not separately reported by our general purpose financial statements. Conducting a detailed product revenue internal assessment and audit would involve unreasonable effort and expense as revenue information by product line is not available. We maintain sales information by operating facility, but do not maintain any accounting sales data by product line.

Our products, principal brands and markets and sample applications are set forth below:

Products	Principal Brands	Principal Markets	Sample Applications
Clutches and Brakes	Warner Electric, Wichita Clutch, Formsprag Clutch, Stieber Clutch, Matrix, Inertia Dynamics, Twiflex, Industrial Clutch, Marland Clutch	Aerospace, energy, material handling, metals, turf and garden, mining	Elevators, forklifts, lawn mowers, oil well draw works, punch presses, conveyors
Gearing	Boston Gear, Nuttall Gear, Delroyd, Bauer Gear Motor	Food processing, material handling, metals, transportation	Conveyors, ethanol mixers, packaging machinery, metal processing equipment
Engineered Couplings	Ameridrives, Bibby Transmissions, TB Wood s	Energy, metals, plastics, chemical	Extruders, turbines, steel strip mills, pumps
Engineered Bearing Assemblies	Kilian	Aerospace, material handling, transportation	Cargo rollers, seat storage systems, conveyors
Power Transmission Components			

Edgar Filing: Altra Holdings, Inc. - Form 10-K

Engineered Belted Drives	Warner Electric, Boston Gear, Huco Dynatork, Warner Linear, Matrix, TB Wood s	Material handling, metals, turf and garden	Conveyors, lawn mowers, machine tools
	TB Wood s	Aggregate, HVAC, material handling	Pumps, sand and gravel conveyors, industrial fans

Our products are used in a wide variety of high-volume manufacturing processes, where the reliability and accuracy of our products are critical in both avoiding costly down time and enhancing the overall efficiency of manufacturing operations. Our products are also used in non-manufacturing applications where product quality and reliability are especially critical, such as clutches and brakes for elevators and residential and commercial lawnmowers.

Clutches and Brakes. Clutches are devices which use mechanical, magnetic, hydraulic, pneumatic, or friction type connections to facilitate engaging or disengaging two rotating members. Brakes are combinations of interacting parts that work to slow or stop machinery. We manufacture a variety of clutches and brakes in three main product categories: electromagnetic, overrunning and heavy duty. Our core clutch and brake manufacturing facilities are located in Connecticut, Indiana, Illinois, Michigan, Texas, the United Kingdom, Germany, France and China.

Electromagnetic Clutches and Brakes. Our industrial products include clutches and brakes with specially designed controls for material handling, forklift, elevator, medical mobility, mobile off-highway, baggage handling and plant productivity applications. We also offer a line of clutch and brake products for walk-behind mowers, residential lawn tractors and commercial mowers. While industrial applications are predominant, we also manufacture several vehicular niche applications including on-road refrigeration compressor clutches and agricultural equipment clutches. We market our electromagnetic products under the Warner Electric, Inertia Dynamics and Matrix brand names.

Overrunning Clutches. Specific product lines include indexing and backstopping clutches. Primary industrial applications include conveyors, gear reducers, hoists and cranes, mining machinery, machine tools, paper machinery, packaging machinery, pumping equipment and other specialty machinery. We market and sell these products under the Formsprag, Marland and Stieber brand names.

Heavy Duty Clutches and Brakes. Our heavy duty clutch and brake product lines serve various markets including metal forming, off-shore and land-based oil and gas drilling platforms, mining, material handling, marine applications and various off-highway and construction equipment segments. Our line of heavy duty pneumatic, hydraulic and caliper clutches and brakes are marketed under the Wichita Clutch and Twiflex brand names.

Gearing. Gears reduce the output speed and increase the torque of an electric motor or engine to the level required to drive a particular piece of equipment. These products are used in various industrial, material handling, mixing, transportation and food processing applications. Specific product lines include vertical and horizontal gear drives, speed reducers and increasers, high-speed compressor drives, enclosed custom gear drives, various enclosed gear drive and gear motor configurations and open gearing products such as spur, helical, worm and miter/bevel gears. We design and manufacture a broad range of gearing products under the Boston Gear, Nuttall Gear, Delroyd, and Bauer Gear Motor brand names. We manufacture our gearing products at our facilities in New York, North Carolina, Germany, and Slovakia, and sell to a variety of end markets.

Engineered Couplings. Couplings are the interface between two shafts, which enable power to be transmitted from one shaft to the other. Because shafts are often misaligned, we designed our couplings with a measure of flexibility that accommodates various degrees of misalignment. Our coupling product line includes gear couplings, high-speed disc and diaphragm couplings, elastomeric couplings, grid couplings, universal joints, jaw couplings and spindles. Our coupling products are used in a wide range of markets including power generation, steel and custom machinery industries. We manufacture a broad range of coupling products under the Ameridrives, Bibby and TB Wood's brand names. Our engineered couplings are manufactured in our facilities in Mexico, Michigan, Pennsylvania, Texas, the United Kingdom and Wisconsin.

Engineered Bearing Assemblies. Bearings are components that support, guide and reduce friction of motion between fixed and moving machine parts. Our engineered bearing assembly product line includes ball bearings, roller bearings, thrust bearings, track rollers, stainless steel bearings, polymer assemblies, housed units and custom assemblies. We manufacture a broad range of engineered bearing products under the Kilian brand

name. We sell bearing products to a wide range of end markets, including the general industrial and automotive markets, with a particularly strong OEM customer focus. We manufacture our bearing products at our facilities in New York, Canada and China.

Power Transmission Components. Power transmission components are used in a number of industries to generate, transfer or control motion from a power source to an application requiring rotary or linear motion. Power transmission products are applicable in most industrial markets, including, but not limited to metals processing, turf and garden and material handling applications. Specific product lines include linear actuators, miniature and small precision couplings, air motors, friction materials, hydrostatic drives and other various items. We manufacture or market a broad array of power transmission components under several businesses including Warner Linear, Huco Dynatork, Boston Gear, Warner Electric, TB Wood's and Matrix. Our core power transmission component manufacturing facilities are located in Illinois, Michigan, North Carolina, the United Kingdom and China.

Warner Linear. Warner Linear is a designer and manufacturer of rugged service electromechanical linear actuators for off-highway vehicles, agriculture, turf care, special vehicles, medical equipment, industrial and marine applications.

Huco Dynatork. Huco Dynatork is a leading manufacturer and supplier of a complete range of precision couplings, universal joints, rod ends and linkages.

Other Accessories. Our Boston Gear, Warner Electric, Matrix and TB Wood's businesses make or market several other accessories such as sensors, sleeve bearings, AC/DC motors, shaft accessories, face tooth couplings, mechanical variable speed drives, and fluid power components that are used in numerous end markets.

Engineered Belted Drives. Belted drives incorporate both a rubber-based belt and at least two sheaves or sprockets. Belted drives typically change the speed of an electric motor or engine to the level required for a particular piece of equipment. Our belted drive line includes three types of v-belts, three types of synchronous belts, standard and made-to-order sheaves and sprockets, and split taper bushings. We sell belted drives to a wide range of end markets, including aggregate, energy, chemical and material handling. Our engineered belted drives are primarily manufactured under the TB Wood's brand in our facilities in Pennsylvania and Mexico.

Research and Development and Product Engineering

We closely integrate new product development with marketing, manufacturing and product engineering in meeting the needs of our customers. We have product engineering teams that work to enhance our existing products and develop new product applications for our growing base of customers that require custom solutions. We believe these capabilities provide a significant competitive advantage in the development of high quality industrial power transmission products. Our product engineering teams focus on:

lowering the cost of manufacturing our existing products;

redesigning existing product lines to increase their efficiency or enhance their performance; and

developing new product applications.

Our continued investment in new product development is intended to help drive customer growth as we address key customer needs.

Sales and Marketing

We sell our products in over 70 countries to over 1,000 direct OEM customers and over 3,000 distributor outlets. We offer our products through our direct sales force comprised of 150 company-employed sales associates as well as independent sales representatives. Our worldwide sales and distribution presence enables us to provide timely and responsive support and service to our customers, many of which operate globally, and to capitalize on growth opportunities in both developed and emerging markets around the world.

We employ an integrated sales and marketing strategy concentrated on both key industries and individual product lines. We believe this dual vertical market and horizontal product approach distinguishes us in the marketplace allowing us to quickly identify trends and customer growth opportunities and deploy resources accordingly. Within our key industries, we market to OEMs, encouraging them to incorporate our products into their equipment designs, to distributors and to end-users, helping to foster brand preference. With this strategy, we are able to leverage our industry experience and product breadth to sell MPT and motion control solutions for a host of industrial applications.

Distribution

Our MPT components are either incorporated into end products sold by OEMs or sold through industrial distributors as aftermarket products to end users and smaller OEMs. We operate a geographically diversified business. For the year ended December 31, 2011, we derived approximately 66% of our net sales from customers in North America, 28% from customers in Europe and 6% from customers in Asia and the rest of the world. Our global customer base is served by an extensive global sales network comprised of our sales staff as well as our network of over 3,000 distributor outlets.

Rather than serving as passive conduits for delivery of product, our industrial distributors are active participants in influencing product purchasing decisions in the MPT industry. In addition, distributors play a critical role through stocking inventory of our products, which amplifies the accessibility of our products to aftermarket buyers. It is for this reason that distributor partner relationships are so critical to the success of the business. We enjoy strong established relationships with the leading distributors as well as a broad, diversified base of specialty and regional distributors.

Competition

We operate in highly fragmented and very competitive markets within the MPT market. Some of our competitors have achieved substantially more market penetration in certain of the markets in which we operate, such as helical gear drives, and some of our competitors are larger than us and have greater financial and other resources. In particular, we compete with Emerson Power Transmission Manufacturing LP, Rexnord LLC., and Regal-Beloit Corporation. In addition, with respect to certain of our products, we compete with divisions of our OEM customers. Competition in our business lines is based on a number of considerations including quality, reliability, pricing, availability and design and application engineering support. Our customers increasingly demand a broad product range and we must continue to develop our expertise in order to manufacture and market these products successfully. To remain competitive, regular investment in manufacturing, customer service and support, marketing, sales, research and development and intellectual property protection is required. We may have to adjust the prices of some of our products to stay competitive. In addition, some of our larger, more sophisticated customers are attempting to reduce the number of vendors from which they purchase in order to increase their efficiency. There is substantial and continuing pressure on major OEMs and larger distributors to reduce costs, including the cost of products purchased from outside suppliers such as us. As a result of cost pressures from our customers, our ability to compete depends in part on our ability to generate production cost savings and, in turn, find reliable, cost-effective outside component suppliers or manufacturers for our products. See *Risk Factors Risks Related to our Business We operate in the highly competitive mechanical power transmission industry and if we are not able to compete successfully our business may be significantly harmed.*

Intellectual Property

We rely on a combination of patents, trademarks, copyright, and trade secret laws in the United States and other jurisdictions, as well as employee and third-party non-disclosure agreements, license arrangements, and domain name registrations to protect our intellectual property. We sell our products under a number of registered and unregistered trademarks, which we believe are widely recognized in the MPT industry. With the exception of Boston Gear, Warner Electric, TB Woods, and Bauer we do not believe any single patent, trademark or trade name is material to our business as a whole. Any issued patents that cover our proprietary technology and any of our other intellectual property rights may not provide us with adequate protection or be commercially beneficial to us and, patents applied for, may not be issued. The issuance of a patent is not conclusive as to its validity or its

enforceability. Competitors may also be able to design around our patents. If we are unable to protect our patented technologies, our competitors could commercialize technologies or products which are substantially similar to ours.

With respect to proprietary know-how, we rely on trade secret laws in the United States and other jurisdictions and on confidentiality agreements. Monitoring the unauthorized use of our technology is difficult and the steps we have taken may not prevent unauthorized use of our technology. The disclosure or misappropriation of our intellectual property could harm our ability to protect our rights and our competitive position.

Some of our registered and unregistered trademarks include: Warner Electric, Boston Gear, TB Woods, Kilian, Nuttall Gear, Ameridrives, Wichita Clutch, Formsprag, Bibby Transmissions, Stieber, Matrix, Inertia Dynamics, Twiflex, Industrial Clutch, Huco Dynatork, Marland, Delroyd, Warner Linear and Bauer Gear Motor.

Employees

As of December 31, 2011, we had 3,466 full-time employees, of whom approximately 54% were located in North America, 33% in Europe, and 13% in Asia. Approximately 9% of our full-time factory North American employees are represented by labor unions. In addition, approximately 503 employees or 44% of our European employees are represented by labor unions. Additionally, approximately 59 employees in the TB Woods production facilities in Mexico are unionized under collective bargaining agreements that are subject to annual renewals. We are a party to four U.S. collective bargaining agreements. The agreements will expire in July 2013, October 2013, June 2014, and, October 2014, respectively. With respect to the collective bargaining agreement scheduled to expire in July 2013, we have entered into a plant closing agreement with labor union employees at our South Beloit Manufacturing facility. The facility is substantially closed with the exception of one remaining product line which we expect to close on or before the July 2013 expiry of the relevant collective bargaining agreement.

One of the four U.S. collective bargaining agreements contains provisions for additional, potentially significant, lump-sum severance payments to all employees covered by that agreement who are terminated as the result of a plant closing and one of our collective bargaining agreements contains provisions restricting our ability to terminate or relocate operations. See *Risk Factors Risks Related to Our Business We may be subject to work stoppages at our facilities, or our customers may be subjected to work stoppages, which could seriously impact our operations and the profitability of our business.*

Our European facilities have employees who are generally represented by local and national social works councils which are common in Europe. Social works councils meet with employer industry associations every two to three years to discuss employee wages and working conditions. Our facilities in France and Germany often participate in such discussions and adhere to any agreements reached.

There has been a recent attempt to unionize at our Kilian manufacturing plant in Toronto, Canada. A vote on the formation of the union was held on February 22, 2012; however, the results of the vote will not be known for some time. If the attempt to unionize at our Toronto plant is successful, we will have to negotiate a new collective bargaining agreement which could divert management attention and result in increased operating expenses and lower net income. If we are unable to negotiate an acceptable collective bargaining agreement, our operating expenses could increase significantly as a result of work stoppages, including strikes. Any of these matters could adversely affect our financial condition, results of operations and cash flows.

Suppliers and Raw Materials

We obtain raw materials, component parts and supplies from a variety of sources, generally from more than one supplier. Our suppliers and sources of raw materials are based in both the United States and other countries and we believe that our sources of raw materials are adequate for our needs for the foreseeable future. We do not believe the loss of any one supplier would have a material adverse effect on our business or results of operations. Our principal raw materials are steel and copper. We generally purchase our materials on the open market, where certain commodities such as steel and copper have fluctuated in price significantly in recent years. We have not experienced any significant shortage of our key materials and have not historically engaged in hedging transactions for commodity suppliers.

Seasonality

We experience seasonality in our turf and garden business, which in recent years has represented approximately 7.2% of our net sales. As our large OEM customers prepare for the spring season, our shipments generally start increasing in December, peak in February and March, and begin to decline in April and May. This allows our customers to have inventory in place for the peak consumer purchasing periods for turf and garden products. The June-through-November period is typically the low season for us and our customers in the turf and garden market. Seasonality is also affected by weather and the level of housing starts.

Regulation

We are subject to a variety of government laws and regulations that apply to companies engaged in international operations. These include compliance with the Foreign Corrupt Practices Act, U.S. Department of Commerce export controls, local government regulations and procurement policies and practices (including regulations relating to import-export control, investments, exchange controls and repatriation of earnings). We maintain controls and procedures to comply with laws and regulations associated with our international operations. In the event we are unable to remain compliant with such laws and regulations, our business may be adversely affected.

Environmental and Health and Safety Matters

We are subject to a variety of federal, state, local, foreign and provincial environmental laws and regulations, including those governing health and safety requirements, the discharge of pollutants into the air or water, the management and disposal of hazardous substances and wastes and the responsibility to investigate and cleanup contaminated sites that are or were owned, leased, operated or used by us or our predecessors. Some of these laws and regulations require us to obtain permits, which contain terms and conditions that impose limitations on our ability to emit and discharge hazardous materials into the environment and periodically may be subject to modification, renewal and revocation by issuing authorities. Fines and penalties may be imposed for non-compliance with applicable environmental laws and regulations and the failure to have or to comply with the terms and conditions of required permits. From time to time, our operations may not be in full compliance with the terms and conditions of our permits. We periodically review our procedures and policies for compliance with environmental laws and requirements. We believe that our operations generally are in material compliance with applicable environmental laws and requirements and that any non-compliance would not be expected to result in us incurring material liability or cost to achieve compliance. Historically, the costs of achieving and maintaining compliance with environmental laws and requirements have not been material.

Certain environmental laws in the United States, such as the federal Superfund law and similar state laws, impose liability for the cost of investigation or remediation of contaminated sites upon the current or, in some cases, the former site owners or operators and upon parties who arranged for the disposal of wastes or transported or sent those wastes to an off-site facility for treatment or disposal, regardless of when the release of hazardous substances occurred or the lawfulness of the activities giving rise to the release. Such liability can be imposed without regard to fault and, under certain circumstances, can be joint and several, resulting in one party being held responsible for the entire obligation. As a practical matter, however, the costs of investigation and remediation generally are allocated among the viable responsible parties on some form of equitable basis. Liability also may include damages to natural resources. We have not been notified that we are a potentially responsible party in connection with any sites we currently or formerly owned or operated or for liability at any off-site waste disposal facility.

Executive Officers of Registrant

The following sets forth certain information with regard to our executive officers as of February 20, 2012 (ages are as of December 31, 2011):

Michael L. Hurt (age 66), P.E. has been our Executive Chairman since January 2009. Prior to his current position, Mr. Hurt served as Chief Executive Officer and a director since our formation in 2004. In November 2006, Mr. Hurt was elected as chairman of our board. During 2004, prior to our

formation, Mr. Hurt provided consulting services to Genstar Capital and was appointed Chairman and Chief Executive Officer of Kilian in October 2004. From January 1991 to November 2003, Mr. Hurt was the President and Chief Executive Officer of TB Woods Incorporated, a manufacturer of industrial power transmission products. Prior to TB Woods, Mr. Hurt spent 23 years in a variety of management positions at the Torrington Company, a major manufacturer of bearings and a subsidiary of Ingersoll Rand. Mr. Hurt holds a B.S. degree in Mechanical Engineering from Clemson University and an M.B.A. from Clemson-Furman University.

Carl R. Christenson (age 52) has been our Chief Executive Officer since January 2009 and a director since July 2007. Prior to his current position, Mr. Christenson served as our President and Chief Operating Officer from January 2005 to December 2008. From 2001 to 2005, Mr. Christenson was the President of Kaydon Bearings, a manufacturer of custom-engineered bearings and a division of Kaydon Corporation. Prior to joining Kaydon, Mr. Christenson held a number of management positions at TB Woods Incorporated and several positions at the Torrington Company. Mr. Christenson holds a M.S. and B.S. degree in Mechanical Engineering from the University of Massachusetts and an M.B.A. from Rensselaer Polytechnic.

Christian Storch (age 52) has been our Chief Financial Officer since December 2007. From 2001 to 2007, Mr. Storch was the Vice President and Chief Financial Officer at Standex International Corporation. Mr. Storch also served on the Board of Directors of Standex International from October 2004 to December 2007. Mr. Storch also served as Standex International's Treasurer from 2003 to April 2006 and Manager of Corporate Audit and Assurance Services from July 1999 to 2001. Prior to Standex International, Mr. Storch was a Divisional Financial Director and Corporate Controller at Vossloh AG, a publicly held German transport technology company. Mr. Storch has also previously served as an Audit Manager with Deloitte & Touche, LLP. Mr. Storch holds a degree in business administration from the University of Passau, Germany.

Glenn Deegan (age 45) has been our Vice President, Legal and Human Resources, General Counsel and Secretary since June 2009. Prior to his current position, Mr. Deegan served as our General Counsel and Secretary since September 2008. From March 2007 to August 2008, Mr. Deegan served as Vice President, General Counsel and Secretary of Averion International Corp., a publicly held global provider of clinical research services. Prior to Averion, from June 2001 to March 2007, Mr. Deegan served as Director of Legal Affairs and then as Vice President, General Counsel and Secretary of MacroChem Corporation, a publicly held specialty pharmaceutical company. From 1999 to 2001, Mr. Deegan served as Assistant General Counsel of Summit Technology, Inc., a publicly held manufacturer of ophthalmic laser systems. Mr. Deegan previously spent over six years engaged in the private practice of law and also served as law clerk to the Honorable Francis J. Boyle in the United States District Court for the District of Rhode Island. Mr. Deegan holds a B.S. from Providence College and a J.D. from Boston College.

Gerald Ferris (age 62) has been our Vice President of Global Sales since May 2007 and held the same position with Power Transmission Holdings, LLC, our Predecessor, since March 2002. He is responsible for the worldwide sales of our broad product platform. Mr. Ferris joined our Predecessor in 1978 and since joining has held various positions. He became the Vice President of Sales for Boston Gear in 1991. Mr. Ferris holds a B.A. degree in Political Science from Stonehill College.

Todd B. Patriacca (age 42) has been our Vice President of Finance, Corporate Controller and Treasurer since February 2010. Prior to his current position, Mr. Patriacca served as our Vice President of Finance, Corporate Controller and Assistant Treasurer since October 2008 and previous to that, as Vice President of Finance and Corporate Controller since May 2007 and as Corporate Controller since May 2005. Prior to joining us, Mr. Patriacca was Corporate Finance Manager at MKS Instrument Inc., a semi-conductor equipment manufacturer since March 2002. Prior to MKS, Mr. Patriacca spent over ten years at Arthur Andersen LLP in the Assurance Advisory practice. Mr. Patriacca is a Certified Public Accountant and holds a B.A. in History from Colby College and an M.B.A. and an M.S. in Accounting from Northeastern University.

Craig Schuele (age 48) has been our Vice President of Marketing and Business Development since May 2007 and held the same position with our Predecessor since July 2004. Prior to his current position, Mr. Schuele has been Vice President of Marketing since March 2002, and previous to that he was a Director of Marketing. Mr. Schuele joined our Predecessor in 1986 and holds a B.S. degree in Management from Rhode Island College.

Item 1A. Risk Factors
Risks Related to Our Business

We operate in the highly competitive mechanical power transmission industry and if we are not able to compete successfully our business may be significantly harmed.

We operate in highly fragmented and very competitive markets in the MPT industry. Some of our competitors have achieved substantially more market penetration in certain of the markets in which we operate, such as helical gear drives, and some of our competitors are larger than us and have greater financial and other resources. With respect to certain of our products, we compete with divisions of our OEM customers. Competition in our business lines is based on a number of considerations, including quality, reliability, pricing, availability, and design and application engineering support. Our customers increasingly demand a broad product range and we must continue to develop our expertise in order to manufacture and market these products successfully. To remain competitive, regular investment in manufacturing, customer service and support, marketing, sales, research and development and intellectual property protection is required. In the future we may not have sufficient resources to continue to make such investments and may not be able to maintain our competitive position within each of the markets we serve. We may have to adjust the prices of some of our products to stay competitive.

Additionally, some of our larger, more sophisticated customers are attempting to reduce the number of vendors from which they purchase in order to increase their efficiency. If we are not selected to become one of these preferred providers, we may lose market share in some of the markets in which we compete.

There is substantial and continuing pressure on major OEMs and larger distributors to reduce costs, including the cost of products purchased from outside suppliers. As a result of cost pressures from our customers, our ability to compete depends in part on our ability to generate production cost savings and, in turn, to find reliable, cost effective outside suppliers to source components or manufacture our products. If we are unable to generate sufficient cost savings in the future to offset price reductions, then our gross margin could be materially adversely affected.

Changes in or the cyclical nature of our markets could harm our operations and financial performance.

Our financial performance depends, in large part, on conditions in the markets that we serve and on the U.S. and global economies in general. Some of the markets we serve are highly cyclical, such as the metals, mining, industrial equipment and energy markets. In such an environment, expected cyclical activity or sales may not occur or may be delayed and may result in significant quarter-to-quarter variability in our performance. Any sustained weakness in demand, downturn or uncertainty in cyclical markets may reduce our sales and profitability.

We rely on independent distributors and the loss of these distributors could adversely affect our business.

In addition to our direct sales force and manufacturer sales representatives, we depend on the services of independent distributors to sell our products and provide service and aftermarket support to our customers. We support an extensive distribution network, with over 3,000 distributor locations worldwide. Rather than serving as passive conduits for delivery of product, our independent distributors are active participants in the overall competitive dynamics in the MPT industry. During the year ended December 31, 2011, approximately 35% of our net sales from continuing operations were generated through independent distributors. In particular, sales through our largest distributor accounted for approximately 8% of our net sales for the year ended December 31, 2011. Almost all of the distributors with whom we transact business offer competitive products and services to our customers. In addition, the distribution agreements we have are typically non-exclusive and cancelable by the distributor after a short notice period. The loss of any major distributor or a substantial number of smaller distributors or an increase in the distributors' sales of our competitors' products to our customers could materially reduce our sales and profits.

We must continue to invest in new technologies and manufacturing techniques; however, our ability to develop or adapt to changing technology and manufacturing techniques is uncertain and our failure to do so could place us at a competitive disadvantage.

The successful implementation of our business strategy requires us to continuously invest in new technologies and manufacturing techniques to evolve our existing products and introduce new products to meet our customers' needs in the industries we serve and want to serve. For example, motion control products offer more precise positioning and control compared to industrial clutches and brakes. If manufacturing processes are developed to make motion control products more price competitive and less complicated to operate, our customers may decrease their purchases of MPT products.

Our products are characterized by performance and specification requirements that mandate a high degree of manufacturing and engineering expertise. We believe that our customers rigorously evaluate their suppliers on the basis of a number of factors, including:

product quality and availability;

price competitiveness;

technical expertise and development capability;

reliability and timeliness of delivery;

product design capability;

manufacturing expertise; and

sales support and customer service.

Our success depends on our ability to invest in new technologies and manufacturing techniques to continue to meet our customers' changing demands with respect to the above factors. We may not be able to make required capital expenditures and, even if we do so, we may be unsuccessful in addressing technological advances or introducing new products necessary to remain competitive within our markets. Furthermore, our own technological developments may not be able to produce a sustainable competitive advantage. If we fail to invest successfully in improvements to our technology and manufacturing techniques, our business may be materially adversely affected.

Our operations are subject to international risks that could affect our operating results.

Our net sales outside North America represented approximately 34% of our total net sales for the year ended December 31, 2011. In addition, we sell products to domestic customers for use in their products sold overseas. We also source a significant portion of our products and materials from overseas, a practice which is increasing. Our business is subject to risks associated with doing business internationally, and our future results could be materially adversely affected by a variety of factors, including:

fluctuations in currency exchange rates;

exchange rate controls;

tariffs or other trade protection measures and import or export licensing requirements;

potentially negative consequences from changes in tax laws;

interest rates;

unexpected changes in regulatory requirements;

changes in foreign intellectual property law;

differing labor regulations;

requirements relating to withholding taxes on remittances and other payments by subsidiaries;

restrictions on our ability to own or operate subsidiaries, make investments or acquire new businesses in various jurisdictions;

potential political instability and the actions of foreign governments; and

restrictions on our ability to repatriate dividends from our subsidiaries.

As we continue to expand our business globally, our success will depend, in large part, on our ability to anticipate and effectively manage these and other risks associated with our international operations. However, any of these factors could materially adversely affect our international operations and, consequently, our operating results.

Our operations depend on production facilities throughout the world, many of which are located outside the United States and are subject to increased risks of disrupted production causing delays in shipments and loss of customers and revenue.

We operate businesses with manufacturing facilities worldwide, many of which are located outside the United States including in Canada, China, France, Germany, Mexico, Slovakia, and the United Kingdom. Serving a global customer base requires that we place more production in emerging markets to capitalize on market opportunities and cost efficiencies. Our international production facilities and operations could be disrupted by a natural disaster, labor strike, war, political unrest, terrorist activity or public health concerns, particularly in emerging countries that are not well-equipped to handle such occurrences. Any production disruptions could materially adversely affect our business.

We rely on estimated forecasts of our OEM customers' needs, and inaccuracies in such forecasts could materially adversely affect our business.

We generally sell our products pursuant to individual purchase orders instead of under long-term purchase commitments. Therefore, we rely on estimated demand forecasts, based upon input from our customers, to determine how much material to purchase and product to manufacture. Because our sales are based on purchase orders, our customers may cancel, delay or otherwise modify their purchase commitments with little or no consequence to them and with little or no notice to us. For these reasons, we generally have limited visibility regarding our customers' actual product needs. The quantities or timing required by our customers for our products could vary significantly. Whether in response to changes affecting the industry or a customer's specific business pressures, any cancellation, delay or other modification in our customers' orders could significantly reduce our revenue, impact our working capital, cause our operating results to fluctuate from period to period and make it more difficult for us to predict our revenue. In the event of a cancellation or reduction of an order, we may not have enough time to reduce operating expenses to minimize the effect of the lost revenue on our business and we may purchase too much inventory and spend more capital than expected, which may materially adversely affect our business.

From time to time, our customers may experience deterioration of their businesses. In addition, during periods of economic difficulty, our customers may not be able to accurately estimate demand forecasts and may scale back orders in an abundance of caution. As a result, existing or potential customers may delay or cancel plans to purchase our products and may not be able to fulfill their obligations to us in a timely fashion. Such cancellations, reductions or inability to fulfill obligations could significantly reduce our revenue, impact our working capital, cause our operating results to fluctuate adversely from period to period and make it more difficult for us to predict our revenue.

Disruption of our supply chain could have an adverse effect on our business, financial condition and results of operations.

Our ability, including manufacturing or distribution capabilities, and that of our suppliers, business partners and contract manufacturers, to make, move and sell products is critical to our success. Damage or disruption to our or their manufacturing or distribution capabilities due to weather, natural disaster, fire or explosion, terrorism, pandemics, strikes, repairs or enhancements at our facilities, excessive demand, raw

material shortages, or other reasons, could impair our ability, and that of our suppliers, to manufacture or sell our products. Failure to take adequate steps to mitigate the likelihood or potential impact of such events, or to effectively manage such events if they occur, could adversely affect our business, financial condition and results of operations, as well as require additional resources to restore our supply chain.

The materials used to produce our products are subject to price fluctuations that could increase costs of production and adversely affect our profitability.

The materials used to produce our products, especially copper and steel, are sourced on a global or regional basis and the prices of those materials are susceptible to price fluctuations due to supply and demand trends, transportation costs, government regulations and tariffs, changes in currency exchange rates, price controls, the economic climate and other unforeseen circumstances. From the first quarter of 2004 to the fourth quarter of 2011, the average price of copper and steel has increased approximately 153% and 121%, respectively. If we are unable to continue to pass a substantial portion of such price increases on to our customers on a timely basis, our future profitability may be materially adversely affected. In addition, passing through these costs to our customers may also limit our ability to increase our prices in the future.

We face potential product liability claims relating to products we manufacture or distribute, which could result in our having to expend significant time and expense to defend these claims and to pay material damages or settlement amounts.

We face a business risk of exposure to product liability claims in the event that the use of our products is alleged to have resulted in injury or other adverse effects. We currently have several product liability claims against us with respect to our products. Although we currently maintain product liability insurance coverage, we may not be able to obtain such insurance on acceptable terms in the future, if at all, or obtain insurance that will provide adequate coverage against potential claims. Product liability claims can be expensive to defend and can divert the attention of management and other personnel for long periods of time, regardless of the ultimate outcome. An unsuccessful product liability defense could exceed any insurance that we maintain and could have a material adverse effect on our business, financial condition, results of operations or our ability to make payments under our debt obligations when due. In addition, we believe our business depends on the strong brand reputation we have developed. In the event that our reputation is damaged, we may face difficulty in maintaining our pricing positions with respect to some of our products, which would reduce our sales and profitability.

We also risk exposure to product liability claims in connection with products sold by businesses that we acquire. Although in some cases third parties have retained responsibility for product liabilities relating to products manufactured or sold prior to our acquisition of the relevant business and in other cases the persons from whom we have acquired a business may be required to indemnify us for certain product liability claims subject to certain caps or limitations on indemnification, we cannot assure you that those third parties will in fact satisfy their obligations to us with respect to liabilities retained by them or their indemnification obligations. If those third parties become unable to or otherwise do not comply with their respective obligations including indemnity obligations, or if certain product liability claims for which we are obligated were not retained by third parties or are not subject to these indemnities, we could become subject to significant liabilities or other adverse consequences. Moreover, even in cases where third parties retain responsibility for product liabilities or are required to indemnify us, significant claims arising from products that we have acquired could have a material adverse effect on our ability to realize the benefits from an acquisition, could result in our reducing the value of goodwill that we have recorded in connection with an acquisition, or could otherwise have a material adverse effect on our business, financial condition, or operations.

We may be subject to work stoppages at our facilities, or our customers may be subjected to work stoppages, which could seriously impact our operations and the profitability of our business.

As of December 31, 2011, we had approximately 3,466 full time employees, of whom approximately 51% were employed outside the United States. Approximately 169 of our North American employees, and 503 of our European employees are represented by labor unions. In addition, our employees in Europe are generally represented by local and national social works councils that hold discussions with employer industry associations

regarding wage and work issues every two to three years. Our European facilities, particularly those in France and Germany, may participate in such discussions and be subject to any agreements reached with employees. Additionally, approximately 59 employees in the TB Wood's production facilities in Mexico are unionized under collective bargaining agreements that are subject to annual renewals.

We are a party to four U.S. collective bargaining agreements. The agreements will expire on, July 2013, October 2013, June 2014, and October 2014, respectively. We have entered into a plant closing agreement with labor union employees at our South Beloit manufacturing facility. We expect the facility to close on or before the July 2013 expiry of the relevant collective bargaining agreement. We may be unable to renew these agreements on terms that are satisfactory to us, if at all. In addition, one of our four U.S. collective bargaining agreements contains provisions for additional, potentially significant, lump-sum severance payments to all employees covered by the agreements who are terminated as the result of a plant closing and one of our collective bargaining agreements contains provisions restricting our ability to terminate or relocate operations.

If our unionized workers or those represented by a works council were to engage in a strike, work stoppage or other slowdown in the future, we could experience a significant disruption of our operations. Such disruption could interfere with our ability to deliver products on a timely basis and could have other negative effects, including decreased productivity and increased labor costs. In addition, if a greater percentage of our work force becomes unionized, our business and financial results could be materially adversely affected. Many of our direct and indirect customers have unionized work forces. Strikes, work stoppages or slowdowns experienced by these customers or their suppliers could result in slowdowns or closures of assembly plants where our products are used and could cause cancellation of purchase orders with us or otherwise result in reduced revenues from these customers.

There has been a recent attempt to unionize at our Kilian manufacturing plant in Toronto, Canada. A vote on the formation of the union was held on February 22, 2012; however, the results of the vote will not be known for some time. If the attempt to unionize at our Toronto plant is successful, we will have to negotiate a new collective bargaining agreement which could divert management attention and result in increased operating expenses and lower net income. If we are unable to negotiate an acceptable collective bargaining agreement, our operating expenses could increase significantly as a result of work stoppages, including strikes. Any of these matters could adversely affect our financial condition, results of operations and cash flows.

Changes in employment laws could increase our costs and may adversely affect our business.

Various federal, state and international labor laws govern our relationship with employees and affect operating costs. These laws include minimum wage requirements, overtime, unemployment tax rates, workers' compensation rates paid, leaves of absence, mandated health and other benefits, and citizenship requirements. Significant additional government-imposed increases or new requirements in these areas could materially affect our business, financial condition, operating results or cash flow.

In the event our employee-related costs rise significantly, we may have to curtail the number of our employees or shut down certain manufacturing facilities. Any such actions would not only be costly but could also materially adversely affect our business.

We depend on the services of key executives, the loss of whom could materially harm our business.

Our senior executives are important to our success because they are instrumental in setting our strategic direction, operating our business, maintaining and expanding relationships with distributors, identifying, recruiting and training key personnel, identifying expansion opportunities and arranging necessary financing. Losing the services of any of these individuals could adversely affect our business until a suitable replacement could be found. We believe that our senior executives could not easily be replaced with executives of equal experience and capabilities. Although we have entered into employment agreements with certain of our key domestic executives, we cannot prevent our key executives from terminating their employment with us. We do not maintain key person life insurance policies on any of our executives.

If we lose certain of our key sales, marketing or engineering personnel, our business may be adversely affected.

Our success depends on our ability to recruit, retain and motivate highly skilled sales, marketing and engineering personnel. Competition for these persons in our industry is intense and we may not be able to successfully recruit, train or retain qualified personnel. If we fail to retain and recruit the necessary personnel, our business and our ability to obtain new customers, develop new products and provide acceptable levels of customer service could suffer. If certain of these key personnel were to terminate their employment with us, we may experience difficulty replacing them, and our business could be harmed.

We are subject to environmental laws that could impose significant costs on us and the failure to comply with such laws could subject us to sanctions and material fines and expenses.

We are subject to a variety of federal, state, local, foreign and provincial environmental laws and regulations, including those governing the discharge of pollutants into the air or water, the management and disposal of hazardous substances and wastes and the responsibility to investigate and cleanup contaminated sites that are or were owned, leased, operated or used by us or our predecessors. Some of these laws and regulations require us to obtain permits, which contain terms and conditions that impose limitations on our ability to emit and discharge hazardous materials into the environment and periodically may be subject to modification, renewal and revocation by issuing authorities. Fines and penalties may be imposed for non-compliance with applicable environmental laws and regulations and the failure to have or to comply with the terms and conditions of required permits. From time to time, our operations may not be in full compliance with the terms and conditions of our permits. We periodically review our procedures and policies for compliance with environmental laws and requirements. We believe that our operations generally are in material compliance with applicable environmental laws, requirements and permits and that any lapses in compliance would not be expected to result in us incurring material liability or cost to achieve compliance. Historically, the costs of achieving and maintaining compliance with environmental laws, and requirements and permits have not been material; however, the operation of manufacturing plants entails risks in these areas, and a failure by us to comply with applicable environmental laws, regulations, or permits could result in civil or criminal fines, penalties, enforcement actions, third party claims for property damage and personal injury, requirements to clean up property or to pay for the costs of cleanup, or regulatory or judicial orders enjoining or curtailing operations or requiring corrective measures, including the installation of pollution control equipment or remedial actions. Moreover, if applicable environmental laws and regulations, or the interpretation or enforcement thereof, become more stringent in the future, we could incur capital or operating costs beyond those currently anticipated.

Certain environmental laws in the United States, such as the federal Superfund law and similar state laws, impose liability for the cost of investigation or remediation of contaminated sites upon the current or, in some cases, the former site owners or operators and upon parties who arranged for the disposal of wastes or transported or sent those wastes to an off-site facility for treatment or disposal, regardless of when the release of hazardous substances occurred or the lawfulness of the activities giving rise to the release. Such liability can be imposed without regard to fault and, under certain circumstances, can be joint and several, resulting in one party being held responsible for the entire obligation. As a practical matter, however, the costs of investigation and remediation generally are allocated among the viable responsible parties on some form of equitable basis. Liability also may include damages to natural resources. We have not been notified that we are a potentially responsible party in connection with any sites we currently or formerly owned or operated or with respect to any liabilities relating to any off-site waste disposal facility.

However, there is contamination at some of our current facilities, primarily related to historical operations at those sites, for which we could be liable for the investigation and remediation under certain environmental laws. The potential for contamination also exists at other of our current or former sites, based on historical uses of those sites. We currently are not undertaking any remediation or investigations and our costs or liability in connection with potential contamination conditions at our facilities cannot be predicted at this time because the potential existence of contamination has not been investigated or not enough is known about the environmental conditions or likely remedial requirements. Currently, other parties with contractual liability are addressing or have plans or obligations to address those contamination conditions that may pose a material risk to

human health, safety or the environment. In addition, while we attempt to evaluate the risk of liability associated with our facilities at the time we acquire them, there may be environmental conditions currently unknown to us relating to our prior, existing or future sites or operations or those of predecessor companies whose liabilities we may have assumed or acquired which could have a material adverse effect on our business.

We are being indemnified, or expect to be indemnified by third parties subject to certain caps or limitations on the indemnification, for certain environmental costs and liabilities associated with certain owned or operated sites. Accordingly, based on the indemnification and the experience with similar sites of the environmental consultants who we have hired, we do not expect such costs and liabilities to have a material adverse effect on our business, operations or earnings. We cannot assure you, however, that those third parties will in fact satisfy their indemnification obligations. If those third parties become unable to, or otherwise do not, comply with their respective indemnity obligations, or if certain contamination or other liability for which we are obligated is not subject to these indemnities, we could become subject to significant liabilities.

We may face additional costs associated with our post-retirement and post-employment obligations to employees which could have an adverse effect on our financial condition.

As part of the acquisition of our original core business through the acquisition of PTH from Colfax Corporation, the PTH Acquisition, we agreed to assume pension plan liabilities for active U.S. employees under the Retirement Plan for Power Transmission Employees of Colfax and the Ameridrives International Pension Fund for Hourly Employees Represented by United Steelworkers of America, Local 3199-10, collectively referred to as the Prior Plans. We have established a defined benefit plan, the Altra Industrial Motion, Inc. Retirement Plan or New Plan, mirroring the benefits provided under the Prior Plans. The New Plan accepted a spin-off of assets and liabilities from the Prior Plans, in accordance with Section 414(l) of the Internal Revenue Code, or the Code, with such assets and liabilities relating to active U.S. employees as of the closing of the PTH Acquisition. Given the funded status of the Prior Plans and the asset allocation requirements of Code Section 414(l), liabilities under the New Plan greatly exceed the assets that were transferred from the Prior Plans. The accumulated benefit obligation (not including accumulated benefit obligations of non-U.S. pension plans in the amount of \$5.8 million) was approximately \$29.4 million as of December 31, 2011 while the fair value of plan assets associated with these U.S. plans was approximately \$16.5 million as of December 31, 2011. As the New Plan has a considerable funding deficit, the cash funding requirements are expected to be substantial over the next several years, and could have a material adverse effect on our financial condition. As of December 31, 2011, minimum funding requirements are estimated to be \$1.1 million in 2012, \$1.1 million in 2013, \$1.1 million in 2014, \$1.1 million in 2015, and \$1.1 million in 2016. These amounts are based on actuarial assumptions and actual amounts could be materially different.

Additionally, as part of the PTH Acquisition and Bauer Acquisition, we agreed to assume certain pension plan liabilities related to non-U.S. employees. The accumulated benefit obligations of non-U.S. pension plans were approximately \$5.8 million as of December 31, 2011. There are no assets associated with these plans.

Finally, as part of the PTH Acquisition, we also agreed to assume all post-employment and post-retirement welfare benefit obligations with respect to active U.S. employees. The benefit obligation for post-retirement benefits, which are not funded, was approximately \$0.3 million as of December 31, 2011.

For a description of the post-retirement and post-employment costs, see Note 9 to our audited financial statements included elsewhere in this Form 10-K.

Our future success depends on our ability to integrate acquired companies and manage our growth effectively.

Our growth through acquisitions has placed, and will continue to place, significant demands on our management, operational and financial resources. Realization of the benefits of acquisitions often requires integration of some or all of the acquired companies' sales and marketing, distribution, manufacturing, engineering, finance and administrative organizations. Integration of companies demands substantial attention from senior management and the management of the acquired companies. In addition, we will continue to pursue

new acquisitions, some of which could be material to our business if completed. We may not be able to integrate successfully our recent acquisitions, or any future acquisitions, operate these acquired companies profitably, or realize the potential benefits from these acquisitions.

The market price of our common stock may decline as a result of acquisitions, including the Bauer Acquisition, if, among other things, we are unable to achieve the expected growth in earnings, or if the operational cost savings estimates in connection with the integration of the acquired businesses are not realized, or if the transaction costs related to the acquisitions are greater than expected. The market price of our common stock also may decline if we do not achieve the perceived benefits of the acquisitions as rapidly or to the extent anticipated by financial or industry analysts or if the effect of the acquisitions on our financial results is not consistent with the expectations of financial or industry analysts.

We may not be able to protect our intellectual property rights, brands or technology effectively, which could allow competitors to duplicate or replicate our technology and could adversely affect our ability to compete.

We rely on a combination of patent, trademark, copyright, and trade secret laws in the United States and other jurisdictions, as well as on license, non-disclosure, employee and consultant assignment and other agreements and domain names registrations in order to protect our proprietary technology and rights. Applications for protection of our intellectual property rights may not be allowed, and the rights, if granted, may not be maintained. In addition, third parties may infringe or challenge our intellectual property rights. In some cases, we rely on unpatented proprietary technology. It is possible that others will independently develop the same or similar technology or otherwise obtain access to our unpatented technology. In addition, in the ordinary course of our operations, we pursue potential claims from time to time relating to the protection of certain products and intellectual property rights, including with respect to some of our more profitable products. Such claims could be time consuming, expensive and divert resources. If we are unable to maintain the proprietary nature of our technologies or proprietary protection of our brands, our ability to market or be competitive with respect to some or all of our products may be affected, which could reduce our sales and profitability.

Goodwill and indefinite-lived intangibles comprises a significant portion of our total assets, and if we determine that goodwill or indefinite-lived intangibles become impaired in the future, net income in such years may be materially and adversely affected.

Goodwill represents the excess of cost over the fair market value of net assets acquired in business combinations. Due to the acquisitions we have completed historically, goodwill comprises a significant portion of our total assets. We review goodwill and indefinite-lived intangibles annually for impairment and any excess in carrying value over the estimated fair value is charged to the results of operations. Our review of goodwill and indefinite-lived intangibles in December 2011 resulted in no reduction to the value of such assets in our financial statements. Future reviews of goodwill and indefinite-lived intangibles could result in reductions. Any reduction in net income resulting from the write down or impairment of goodwill and indefinite-lived intangibles could adversely affect our financial results. If economic conditions deteriorate we may be required to impair goodwill and indefinite-lived intangibles in future periods.

Unplanned repairs or equipment outages could interrupt production and reduce income or cash flow.

Unplanned repairs or equipment outages, including those due to natural disasters, could result in the disruption of our manufacturing processes. Any interruption in our manufacturing processes would interrupt our production of products, reduce our income and cash flow and could result in a material adverse effect on our business and financial condition.

Our operations are highly dependent on information technology infrastructure and failures could significantly affect our business.

We depend heavily on our information technology, or IT, infrastructure in order to achieve our business objectives. If we experience a problem that impairs this infrastructure, such as a computer virus, a problem with the functioning of an important IT application, or an intentional disruption of our IT systems by a third party, the resulting disruptions could impede our ability to record or process orders, manufacture and ship in a timely

manner, or otherwise carry on our business in the ordinary course. Any such events could cause us to lose customers or revenue and could require us to incur significant expense to eliminate these problems and address related security concerns.

Computer viruses, malware, and other hacking programs and devices may cause significant damage, delays or interruptions to our systems and operations or to certain of the products that we sell resulting in damage to our reputation and brand names.

Computer viruses, malware, and other hacking programs and devices may attack our infrastructure, industrial machinery, software or hardware causing significant damage, delays or other service interruptions to our systems and operations. Hacking involves efforts to gain unauthorized access to information or systems or to cause intentional malfunctions, loss or corruption of data, software, hardware or other computer equipment. In addition, increasingly sophisticated malware may target real-world infrastructure or product components, including certain of the products that we currently or may in the future sell by attacking, disrupting, reconfiguring and/or reprogramming industrial control software. Hacking, computer viruses, and other malware could result in significant damage to our infrastructure, industrial machinery, systems, or databases. We may incur significant costs to protect our systems and equipment against the threat of, and to repair any damage caused by, computer viruses and hacking. Moreover, if a computer virus or hacking affects our systems or products, our reputation and brand names could be materially damaged and use of our products may decrease.

Our leverage could adversely affect our financial health and make us vulnerable to adverse economic and industry conditions.

We have incurred indebtedness that is substantial relative to our stockholders' investment. As of December 31, 2011, we had approximately \$288.2 million of gross indebtedness outstanding and \$58.5 million available under lines of credit. Our indebtedness has important consequences; for example, it could:

make it more challenging for us to obtain additional financing to fund our business strategy and acquisitions, debt service requirements, capital expenditures and working capital;

increase our vulnerability to interest rate changes and general adverse economic and industry conditions;

require us to dedicate a substantial portion of our cash flow from operations to service our indebtedness, thereby reducing the availability of our cash flow to finance acquisitions and to fund working capital, capital expenditures, research and development efforts and other general corporate activities;

make it difficult for us to fulfill our obligations under our credit and other debt agreements;

limit our flexibility in planning for, or reacting to, changes in our business and our markets; and

place us at a competitive disadvantage relative to our competitors that have less debt.

Substantially all of our assets have been pledged as collateral against any outstanding borrowings under the credit agreement governing Altra Industrial's Revolving Credit Agreement. In addition, the Revolving Credit Agreement requires us to maintain specified financial ratios and satisfy certain financial condition tests, which may require that we take action to reduce our debt or to act in a manner contrary to our business objectives. If an event of default were to occur under the Revolving Credit Agreement, then the lenders could declare all amounts outstanding under the Revolving Credit Agreement with accrued interest, to be immediately due and payable. In addition, our Revolving Credit Agreement and the indentures governing the 8 1/8% senior secured notes due 2016 (the Senior Secured Notes) have cross-default provisions such that a default under either one would constitute an event of default on the other.

The current economic conditions and severe tightening of credit markets may limit our access to additional capital. In particular, the cost of raising money in the credit markets has increased substantially while the availability of funds from those markets has diminished significantly. While currently these conditions have not impaired our ability to access capital under our Revolving Credit Agreement and to finance our operations, there can be no assurance that there will not be a further deterioration in the credit markets, a deterioration in the

financial condition of our lenders or their ability to fund their commitments or, if necessary, that we will be able to find replacement financing on similar or acceptable terms. An inability to access sufficient capital could have an adverse impact on our operations and thus on our operating results and financial position.

Our Senior Secured Notes impose significant operating and financial restrictions, which may prevent us from pursuing our business strategies or favorable business opportunities.

Subject to a number of important exceptions, the indenture governing our Senior Secured Notes and Altra Industrial's Revolving Credit Agreement may limit our and Altra Industrial's ability to:

incur more debt;

pay dividends or make other distributions;

redeem stock;

issue stock of subsidiaries;

make certain investments;

create liens;

reorganize our corporate structure;

enter into transactions with affiliates;

merge or consolidate; and

transfer or sell assets.

The restrictions contained in the indenture governing the Senior Secured Notes and Altra Industrial's Revolving Credit Agreement may prevent us from taking actions that we believe would be in the best interest of our business, and may make it difficult for us to successfully execute our business strategy or effectively compete with companies that are not similarly restricted. A breach of any of these covenants or the inability to comply with the required financial ratios could result in a default under the Senior Secured Notes, Altra Industrial's Revolving Credit Agreement, or the indenture governing the Senior Secured Notes, as applicable. If any such default occurs, the lenders under Altra Industrial's Revolving Credit Agreement and the holders of our Senior Secured Notes and Convertible Notes may elect to declare all of their respective outstanding debt, together with accrued interest and other amounts payable thereunder, to be immediately due and payable. The lenders under Altra Industrial's Revolving Credit Agreement also have the right in these circumstances to terminate any commitments they have to provide further borrowings. In addition, following an event of default under Altra Industrial's Revolving Credit Agreement, the lenders under the facility will have the right to proceed against the collateral granted to them to secure the debt. If the debt under Altra Industrial's Revolving Credit Agreement or the Senior Secured Notes were to be accelerated, our assets may not be sufficient to repay in full the Senior Secured Notes and all of our other debt.

We are subject to tax laws and regulations in many jurisdictions and the inability to successfully defend claims from taxing authorities related to our current or acquired businesses could adversely affect our operating results and financial position.

Edgar Filing: Altra Holdings, Inc. - Form 10-K

We conduct business in many countries, which requires us to interpret the income tax laws and rulings in each of those taxing jurisdictions. Due to the subjectivity of tax laws between those jurisdictions as well as the subjectivity of factual interpretations, our estimates of income tax liabilities may differ from actual payments or assessments. Claims from taxing authorities related to these differences could have an adverse impact on our operating results and financial position.

Continued extreme volatility and disruption in global financial markets could significantly impact our customers, suppliers, weaken the markets we serve and harm our operations and financial performance.

Our financial performance depends, in large part, on conditions in the markets that we serve and on the U.S. and global economies in general. As widely reported, U.S. and global financial markets have been

experiencing extreme disruption in recent years, including, among other things, concerns regarding the stability and viability of major financial institutions, the declining state of the housing markets, a severe tightening in the credit markets, a low level of liquidity in many financial markets, and extreme volatility in credit and equity markets. Given the significance and widespread nature of these nearly unprecedented circumstances, the U.S. and global economies could remain significantly challenged in a recessionary state for an indeterminate period of time. While currently these conditions have not impaired our ability to access credit markets and finance our operations, there can be no assurance that there will not be a further deterioration in financial markets and confidence in major economies. In addition, the recent tightening of credit in financial markets may adversely affect the ability of our customers to obtain financing for significant purchases and operations and could result in a decrease in or cancellation of orders for our products and services as well as impact the ability of our customers to make payments. Similarly, this tightening of credit may adversely affect our supplier base and increase the potential for one or more of our suppliers to experience financial distress or bankruptcy. These conditions would harm our business by adversely affecting our sales, results of operations, profitability, cash flows, financial condition and long-term anticipated growth rate.

If we are unable to successfully implement our new ERP system across the company or such implementation is delayed, our operations may be disrupted or become less efficient.

We have begun the worldwide implementation of a new Enterprise Resource Planning system entitled SAP, with the aim of enabling management to achieve better control over the Company through: improved quality, reliability and timeliness of information; improved integration and visibility of information stemming from different management functions and countries; and optimization and global management of corporate processes. The adoption of the new SAP system, which will replace the existing accounting and management systems, poses several challenges relating to, among other things, training of personnel, communication of new rules and procedures, changes in corporate culture, migration of data, and the potential instability of the new system. In order to mitigate the impact of such critical issues, the Company decided to implement the new SAP system on a step-by-step basis, both geographically and in terms of processes. As a result, we expect the system implementation process to continue for approximately the next 2 years. However, there can be no assurance that the new SAP system will be successfully implemented and failure to do so could have a material adverse effect on our operations. Further, if implementation of the SAP system is delayed, we would continue to use our current system which may not be sufficient to support our planned operations and significant upgrades to the current system may be warranted or required to meet our business needs pending SAP implementation. However, there can be no assurance that the new SAP system will be successfully implemented and failure to do so could have a material adverse effect on the Company's operations.

We may not realize the expected benefits of the Bauer Acquisition because of integration difficulties and other challenges.

The success of the Bauer Acquisition will depend, in part, on our ability to realize the anticipated benefits from integrating Bauer's business with our existing businesses. The integration process may be complex, costly and time-consuming. The difficulties of integrating the operations of Bauer's business include, among others:

failure to implement our business plan for the combined business;

unanticipated issues in integrating manufacturing, logistics, information, communications and other systems;

possible inconsistencies in standards, controls, procedures and policies, and compensation structures between Bauer's structure and our structure;

unanticipated changes in applicable laws and regulations;

failure to retain key employees;

failure to retain key customers;

operating risks inherent in Bauer's business and our business;

the impact on our internal controls and compliance with the regulatory requirements under the Sarbanes-Oxley Act of 2002; and

unanticipated issues, expenses and liabilities.

We may not be able to maintain the levels of revenue, earnings or operating efficiency that each of Altra and Bauer had achieved or might achieve separately. In addition, we may not accomplish the integration of Bauer's business smoothly, successfully or within the anticipated costs or timeframe.

We face risks associated with the Purchase Agreement in connection with the Bauer Acquisition.

In connection with the Bauer Acquisition, we are subject to substantially all the liabilities of Bauer related to the gear motor business we acquired that were not satisfied on or prior to the closing date. There may be liabilities that we underestimated or did not discover in the course of performing our due diligence investigation of Bauer. Under the Purchase Agreement, the seller agreed to provide us with a limited set of representations and warranties, including with respect to outstanding and potential liabilities. However, our remedy from the seller for any breach of certain of those representations and warranties is an action for indemnification, not to exceed \$14.1 million. This cap on damages does not apply to breaches of representations and warranties relating to incorporation, power and authority, insolvency, title to assets, taxes, environmental matters and certain pension claims. Damages resulting from a breach of a representation or warranty could have a material and adverse effect on our financial condition and results of operations, and there is no guarantee that we would actually be able to recover all or any portion of the sums payable to us in connection with such breach.

We may have to invest time and resources to review, test and update Bauer's system of internal control over financial reporting.

Bauer had not previously been subject to periodic reporting as a public company or otherwise prepared separate financial statements relating to the business we acquired. Establishing, testing and maintaining an effective system of internal control over financial reporting requires significant resources and time commitments on the part of our management and our finance and accounting staff, may require additional staffing and infrastructure investments, and would increase our costs of doing business. Moreover, if we discover aspects of Bauer's internal controls that need improvement, we cannot be certain that our remedial measures will be effective. Any failure to implement required new or improved controls, or difficulties encountered in their implementation, could harm our operating results or increase our risk of material weaknesses in internal controls.

We have a significant amount of goodwill and intangible assets on our consolidated financial statements (which increased following the Bauer Acquisition) that is subject to impairment based upon future adverse changes in our business or prospects.

At December 31, 2011, the carrying values of goodwill and identifiable intangible assets on our balance sheet were \$83.8 million and \$77.1 million, respectively. We evaluate indefinite lived intangible assets and goodwill for impairment annually in the fourth quarter, or more frequently if events or changes in circumstances indicate that the asset might be impaired. Indefinite lived intangible assets are impaired and goodwill impairment is indicated when their book value exceeds fair value. The value of goodwill and intangible assets from the allocation of purchase price from the Bauer Acquisition was derived from our business operating plans and is susceptible to an adverse change in demand, input costs or general changes in our business or industry and could require an impairment charge in the future.

Our construction of a new manufacturing facility in China is subject to multiple approvals and uncertainties that could affect our ability to complete the project on schedule or at budgeted cost. We may not realize the expected growth and production savings from the new facility.

The construction of our new manufacturing facility in Changzhou, China is currently expected to be completed during the third quarter of 2012. The construction of this new facility involves numerous regulatory, environmental, political, and legal uncertainties beyond our control. The cost of the facility and the equipment required for the facility will require the expenditure of significant amounts of capital that we plan to finance

through internal cash flows. Moreover, this facility is being built to capture anticipated future growth in demand in the metals and alternative energy businesses and anticipated savings in production costs over our current manufacturing facilities. There are numerous risks and uncertainties that may prevent us from achieving the revenues we currently anticipate from this facility. Some of these risks and uncertainties relate to our ability to: offer new and innovative products to attract and retain a larger customer base; attract additional customers; undertake more contracted projects; maintain effective control of our costs and expenses; respond to evolving social, economic and political changes in China; respond to competitive market conditions; manage risks associated with intellectual property rights; and attract, retain and motivate qualified personnel. If we are unsuccessful in addressing any of these risks and uncertainties and such growth or production savings do not materialize, or should the timeline for our completion of the facility be delayed, we may be unable to achieve our expected investment return, which could adversely affect our results of operations and financial condition.

Item 1B. *Unresolved Staff Comments.*

None.

Item 2. Properties.

In addition to our leased headquarters in Braintree, Massachusetts, we maintain 26 production facilities, thirteen of which are located in the United States, one in Canada, ten in Europe and one each in China and Mexico. The following table lists all of our facilities, other than sales offices and distribution centers, as of December 31, 2011, indicating the location, principal use and whether the facilities are owned or leased.

Location	Brand	Major Products	Sq. Ft.	Possession	Type of Expiration
United States					
Chambersburg, Pennsylvania	TB Wood s	Belted Drives, Couplings, Castings	440,000	Owned	N/A
South Beloit, Illinois	Warner Electric	Electromagnetic Clutches & Brakes	104,288	Owned	N/A

(1) Corporate headquarters and selective customer service functions.

(2) Must give the lessor twelve months notice for termination.

(3) Indefinite lease. Landlord has ability to terminate by December 31, 2012, otherwise, lease cancelable with 2 year notice given.

(4) Plant construction is expected to be completed in the third quarter of 2012.

Item 3. Legal Proceedings.

We are, from time to time, party to various legal proceedings arising out of our business. These proceedings primarily involve commercial claims, product liability claims, intellectual property claims, environmental claims, personal injury claims and workers' compensation claims. We cannot predict the outcome of these lawsuits, legal proceedings and claims with certainty. Nevertheless, we believe that the outcome of any currently existing proceedings should not have a material adverse effect on our business, financial condition and results of operations.

Item 4. Mine Safety Disclosures.

Not applicable

PART II

Item 5. Market for Registrant's Common Equity and Related Stockholder Matters and Issuer Purchases of Equity Securities
Market Information

Our common stock trades on the NASDAQ Global Market under the symbol AIMC. As of February 20, 2012, the number of holders of record of our common stock was approximately 57.

The following table sets forth, for the periods indicated, the high and low sales price for our common stock as reported on The NASDAQ Global Market. Our common stock commenced trading on the NASDAQ Global Market on December 15, 2006.

	U.S. Dollars	
	High	Low
Fiscal year ended December 31, 2011		
Fourth Quarter	\$ 19.08	\$ 10.60
Third Quarter	\$ 25.60	\$ 10.98
Second Quarter	\$ 26.73	\$ 22.28
First Quarter	\$ 24.17	\$ 19.14
Fiscal year ended December 31, 2010		
Fourth quarter	\$ 21.19	\$ 14.22
Third quarter	\$ 15.40	\$ 11.76
Second quarter	\$ 15.90	\$ 11.59
First quarter	\$ 14.00	\$ 9.81

Dividends

We have never declared or paid any cash dividends on our common stock. We currently intend to retain any earnings for use in the operation and expansion of our business and, therefore do not anticipate paying any cash dividends in the foreseeable future. In addition, the Revolving Credit Agreement and the indenture governing the Senior Secured Notes limit our ability to pay dividends or other distributions on our common stock. See Note 11 to the consolidated financial statements.

Securities Authorized for Issuance Under Equity Compensation Plans

The following table presents information concerning our equity compensation plans:

Plan category	Number of Securities to be Issued Upon Exercise of Outstanding Options, Warrants and Rights(a)	Weighted-Average Exercise Price of Outstanding Options, Warrants and Rights(b)	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (Excluding Securities Reflected in Column (a))(c)
Equity compensation plans approved by security holders(1)		\$	293,460
Equity compensation plans not approved by security holders	n/a	n/a	n/a
Total		\$	293,460

(1) The equity compensation plans were approved by the Company's shareholders prior to the initial public offering.

Issuer Repurchases of Equity Securities

Approximate Period	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Dollar Value of Shares That May Yet be Purchased Under The Plans or Programs
<i>October 3, 2011 to October 29, 2011</i>	118	\$ 12.01		\$
<i>October 30, 2011 to November 26, 2011</i>		\$		\$
<i>November 27, 2011 to December 31, 2011</i>	1,680	\$ 17.97		\$

(1) We repurchased these shares of common stock in connection with the vesting of certain stock awards to cover minimum statutory withholding taxes.

Performance Graph

The following graph compares the cumulative total stockholder return on our common stock since the time of our initial public offering, December 15, 2006, through December 31, 2011, with the cumulative total return on shares of companies comprising the S&P Small Cap 600 index and a special Peer Group Index, in each case assuming an initial investment of \$100, assuming dividend reinvestment.

12/31/2006	12/31/2007	3/31/2008	6/30/2008	9/30/2008	12/31/2008	3/31/2009	6/30/2009	9/30/2009	12/31/2009	3/31/2010	6/30/2010	9/30/2010	12/31/2010

Comparability of the information included in the selected financial data has been impacted by the acquisitions of TB Wood's and All Power in 2007, as well as, the acquisition of Bauer in 2011.

**Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.
Cautionary Statement Regarding Forward-Looking Statements**

This Annual Report on Form 10-K contains forward-looking statements, within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, which reflect the Company's current estimates, expectations and projections about the Company's future results, performance, prospects and opportunities. Forward-looking statements include, among other things, the information concerning the Company's possible future results of operations including revenue, costs of goods sold, and gross margin, future profitability, future economic improvement, business and growth strategies, financing plans, the Company's competitive position and the effects of competition, the projected growth of the industries in which we operate, and the Company's ability to consummate strategic acquisitions and other transactions. Forward-looking statements include statements that are not historical facts and can be identified by forward-looking words such as anticipate, believe, could, estimate, expect, intend, plan, may, should, will, would, expressions. These forward-looking statements are based upon information currently available to the Company and are subject to a number of risks, uncertainties, and other factors that could cause the Company's actual results, performance, prospects, or opportunities to differ materially from those expressed in, or implied by, these forward-looking statements. Important factors that could cause the Corporation's actual results to differ materially from the results referred to in the forward-looking statements the Corporation makes in this report include:

the Company's access to capital, credit ratings, indebtedness, and ability to raise additional capital and operate under the terms of the Company's debt obligations;

the risks associated with our debt;

the effects of intense competition in the markets in which we operate;

the Company's ability to successfully execute, manage and integrate key acquisitions and mergers, including the Bauer Acquisition;

the Company's ability to obtain or protect intellectual property rights;

the Company's ability to retain existing customers and our ability to attract new customers for growth of our business;

the effects of the loss or bankruptcy of or default by any significant customer, suppliers, or other entity relevant to the Company's operations;

Edgar Filing: Altra Holdings, Inc. - Form 10-K

the Company's ability to successfully pursue the Company's development activities and successfully integrate new operations and systems, including the realization of revenues, economies of scale, cost savings, and productivity gains associated with such operations;

the Company's ability to complete cost reduction actions and risks associated with such actions;

the Company's ability to control costs;

failure of the Company's operating equipment or information technology infrastructure;

the Company's ability to achieve its business plans, including with respect to an uncertain economic environment;

changes in employment, environmental, tax and other laws and changes in the enforcement of laws;

the accuracy of estimated forecasts of OEM customers and the impact of the current global economic environment on our customers;

fluctuations in the costs of raw materials used in our products;

the Company's ability to attract and retain key executives and other personnel;

work stoppages and other labor issues;

changes in the Company's pension and retirement liabilities;

the Company's risk of loss not covered by insurance;

the outcome of litigation to which the Company is a party from time to time, including product liability claims;

changes in accounting rules and standards, audits, compliance with the Sarbanes-Oxley Act, and regulatory investigations;

changes in market conditions that would result in the impairment of goodwill or other assets of the Company;

changes in market conditions in which we operate that would influence the value of the Company's stock;

the effects of changes to critical accounting estimates; changes in volatility of the Company's stock price and the risk of litigation following a decline in the price of the Company's stock;

the cyclical nature of the markets in which we operate;

the risks associated with the global recession and volatility and disruption in the global financial markets;

political and economic conditions nationally, regionally, and in the markets in which we operate;

Edgar Filing: Altra Holdings, Inc. - Form 10-K

natural disasters, war, civil unrest, terrorism, fire, floods, tornadoes, earthquakes, hurricanes, or other matters beyond the Company's control;

the risks associated with international operations, including currency risks;

the effects of unanticipated deficiencies, if any, in the disclosure controls and internal controls of Bauer;

the risks associated the Company's planned investment in a new manufacturing facility in China; and

other factors, risks, and uncertainties referenced in the Company's filings with the Securities and Exchange Commission, including the Risk Factors set forth in this document

ALL FORWARD-LOOKING STATEMENTS SPEAK ONLY AS OF THE DATE OF THIS REPORT. EXCEPT AS REQUIRED BY LAW, WE UNDERTAKE NO OBLIGATION TO PUBLICLY UPDATE OR RELEASE ANY REVISIONS TO THESE FORWARD-LOOKING STATEMENTS TO REFLECT ANY EVENTS OR CIRCUMSTANCES AFTER THE DATE OF THIS REPORT OR TO REFLECT THE OCCURRENCE OF UNANTICIPATED EVENTS. ALL SUBSEQUENT WRITTEN AND ORAL FORWARD-LOOKING STATEMENTS ATTRIBUTABLE TO US OR ANY PERSON ACTING ON THE COMPANY'S BEHALF ARE EXPRESSLY QUALIFIED IN THEIR ENTIRETY BY THE CAUTIONARY STATEMENTS CONTAINED OR REFERRED TO IN THIS SECTION AND IN OUR RISK FACTORS SET FORTH IN PART I, ITEM 1A OF THIS FORM 10-K AND IN OTHER REPORTS FILED WITH THE SEC BY THE COMPANY.

The following discussion of the financial condition and results of operations of Altra Holdings, Inc. and its subsidiaries should be read together with the Selected Historical Financial Data, and the consolidated financial statements of Altra Holdings, Inc. and its subsidiaries and related notes included elsewhere in this Form 10-K. The following discussion includes forward-looking statements. For a discussion of important factors that could cause actual results to differ materially from the results referred to in the forward-looking statements, see Forward-Looking Statements and Risk Factors. Unless the context requires otherwise, the terms Altra Holdings, the Company, we, us and our refer to Altra Holdings, Inc. and its subsidiaries.

General

We are a leading global designer, producer and marketer of a wide range of MPT and motion control products with a presence in over 70 countries. Our global sales and marketing network includes over 1,000 direct OEM customers and over 3,000 distributor outlets. Our product portfolio includes industrial clutches and brakes, enclosed gear drives, open gearing, couplings, engineered bearing assemblies, linear components, gear motors, and other related products. Our products serve a wide variety of end markets including energy, general industrial, material handling, mining, transportation and turf and garden. We primarily sell our products to a wide range of OEMs and through long-standing relationships with industrial distributors such as Motion Industries, Applied Industrial Technologies, Kaman Industrial Technologies and W.W. Grainger.

While the power transmission industry has undergone some consolidation, we estimate that in 2011 the top five broad-based MPT companies represented approximately 20% of the U.S. power transmission market. The remainder of the power transmission industry remains fragmented with many small and family-owned companies that cater to a specific market niche often due to their narrow product offerings. We believe that consolidation in our industry will continue because of the increasing demand for global distribution channels, broader product mixes and better brand recognition to compete in this industry.

Business Outlook

Our future financial performance depends, in large part, on the conditions in the markets that we serve and on the U.S. and global economies in general. Currently, the demand environment remains positive across most of our early and late cycle end markets and, assuming this trend continues, we expect sales growth to continue as a result of our efforts to take market share and penetrate new high-growth markets and new geographies. We also continue to maintain a strong balance sheet and ample liquidity to pursue strategic acquisitions should appropriate opportunities arise during 2012.

Our strategy focuses on capitalizing on growth opportunities in new and existing markets, increasing our presence in key underpenetrated geographic regions, entering new high-growth markets and pursuing strategic acquisitions. We plan to invest in higher growth emerging markets, and take advantage of operating leverage in our business as our sales continue to grow in nearly all of our end-markets.

Critical Accounting Policies

The methods, estimates and judgments we use in applying our critical accounting policies have a significant impact on the results we report in our financial statements. We evaluate our estimates and judgments on an on-going basis. Our estimates are based upon historical experience and assumptions that we believe are reasonable under the circumstances. Our experience and assumptions form the basis for our judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. Actual results may vary from what our management anticipates and different assumptions or estimates about the future could change our reported results.

We believe the following accounting policies are the most critical in that they are important to the financial statements and they require the most difficult, subjective or complex judgments in the preparation of the financial statements.

Inventory. Inventories are stated at the lower of cost or market using the first-in, first-out (FIFO) method for all of our subsidiaries except TB Wood's. TB Wood's inventory is stated at the lower of current cost or market, principally using the last-in, first-out (LIFO) method. Inventory stated using the LIFO method approximates 11% of total inventory. We state inventories acquired by us through acquisitions at their fair values

at the date of acquisition as determined by us based on the replacement cost of raw materials, the sales price of the finished goods less an appropriate amount representing the expected profitability from selling efforts, and for work-in-process the sales price of the finished goods less an appropriate amount representing the expected profitability from selling efforts and costs to complete.

We periodically review our quantities of inventories on hand and compare these amounts to the historical and expected usage of each particular product or product line. We record as a charge to cost of sales any amounts required to reduce the carrying value of inventories to net realizable value.

Business Combinations. Business combinations are accounted for at fair value. Acquisition costs are generally expensed as incurred and recorded in selling, general and administrative expenses; and changes in deferred tax asset valuation allowances and income tax uncertainties after the acquisition date generally affect income tax expense. The accounting for business combinations requires estimates and judgment as to expectations for future cash flows of the acquired business, and the allocation of those cash flows to identifiable intangible assets, in determining the estimated fair value for assets and liabilities acquired. The fair values assigned to tangible and intangible assets acquired and liabilities assumed are based on management's estimates and assumptions, as well as other information compiled by management, including valuations that utilize customary valuation procedures and techniques. If the actual results differ from the estimates and judgments used in these estimates, the amounts recorded in the financial statements could result in a possible impairment of the intangible assets and goodwill, or require acceleration of the amortization expense of finite-lived intangible assets

Goodwill, Intangibles and other long-lived assets. In connection with our acquisitions, goodwill and intangible assets were identified and recorded at their fair value. We recorded intangible assets for customer relationships, trade names and trademarks, product technology, patents and goodwill. In valuing the customer relationships, trade names, and trademarks, we utilized variations of the income approach. The income approach was considered the most appropriate valuation technique because the inherent value of these assets is their ability to generate current and future income. The income approach relies on historical financial and qualitative information, as well as assumptions and estimates for projected financial information. Projected financial information is subject to risk if our estimates are incorrect. The most significant estimate relates to our projected revenues and profitability. If we do not meet the projected revenues and profitability used in the valuation calculations then the intangible assets could be impaired. In determining the value of customer relationships, we reviewed historical customer attrition rates which were determined to be approximately 5% per year. Most of our customers tend to be long-term customers with very little turnover. While we do not typically have long-term contracts with customers, we have established long-term relationships with customers which make it difficult for competitors to displace us. Additionally, we assessed historical revenue growth within our industry and customers' industries in determining the value of customer relationships. The value of our customer relationships intangible asset could become impaired if future results differ significantly from any of the underlying assumptions. This could include a higher customer attrition rate or a change in industry trends such as the use of long-term contracts which we may not be able to obtain successfully. Customer relationships and product technology and patents are considered finite-lived assets, with estimated lives ranging from 8 years to 16 years. The estimated lives were determined by calculating the number of years necessary to obtain 95% of the value of the discounted cash flows of the respective intangible asset. Goodwill and trade names and trademarks are considered indefinite lived assets. Trade names and trademarks were determined to be indefinite lived assets. Other intangible assets include trade names and trademarks that identify us and differentiate us from competitors, and therefore competition does not limit the useful life of these assets. Additionally, we believe that our trade names and trademarks will continue to generate product sales for an indefinite period.

We have identified six operating segments and concluded that the six operating segments can be aggregated into one reportable segment. Our operating segments have common manufacturing and production processes. Each segment includes machine shops, which use similar equipment and manufacturing techniques. Each of our operating segments are expected to have similar long-term average gross profit margins. Each of our segments uses common raw materials, such as aluminum, steel and copper. The materials are purchased and procurement contracts are negotiated by one global purchasing function. All of our products are sold by one global sales force and are marketed by one global marketing function.

As part of the annual goodwill impairment assessment we estimated the fair value of each of our operating segments using an income approach. We forecasted future cash flows by operating segment for each of the next five years and applied a long term growth rate to the final year of forecasted cash flows. The cash flows were then discounted using our estimated discount rate. The forecasts of revenue and profitability growth for use in the long-range plan and the discount rate were the key assumptions in our intangible fair value analysis

We review the difference between the estimated fair value and net book value of each operating segment. If the excess is less than \$1.0 million, the operating segment could be required to perform a step two goodwill impairment analysis to determine what amount of goodwill is potentially impaired. As of December 31, 2011, each of our operating segments had estimated fair values that were at least \$1.0 million greater than the net book value.

Management believes the preparation of revenue and profitability growth rates for use in the long-range plan and the discount rate requires significant use of judgment. If any of our operating segments do not meet our forecasted revenue and/or profitability estimates, we could be required to perform an interim goodwill impairment analysis in future periods. In addition, if our discount rate increases, we could be required to perform an interim goodwill impairment analysis. We performed a sensitivity analysis on the estimated fair value of our operating segments by decreasing profitability based on our three year historical average increase leaving all other assumptions constant and increasing the discount rate by 5% and 10% leaving all other assumptions constant. We did not identify any operating segment that would be required to perform an interim goodwill impairment analysis as the fair value of our operating segments are substantially in excess of their carrying value.

For our indefinite lived intangible assets, mainly trademarks, we estimated the fair value first by estimating the total revenue attributable to the trademarks for each of the operating segments. Second, we estimated an appropriate royalty rate using the return on assets method by estimating the required financial return on our assets, excluding trademarks, less the overall return generated by our total asset base. The return as a percentage of revenue provides an indication of our royalty rate (between 1.5% and 2%). We compared the estimated fair value of our trademarks with the carrying value of the trademarks and did not identify any impairment.

Long-lived assets, including definite-lived intangible assets, are reviewed for impairment when events or circumstances indicate that the carrying amount of a long-lived asset may not be recovered. Long-lived assets are considered to be impaired if the carrying amount of the asset exceeds the undiscounted future cash flows expected to be generated by the asset over its remaining useful life. If an asset is considered to be impaired, the impairment is measured by the amount by which the carrying amount of the asset exceeds its fair value, and is charged to results of operations at that time. No impairment indicators were noted in either 2009, 2010 or 2011.

In 2009, 2010, and 2011 the Company did not identify any impairments related to goodwill, definite lived intangible assets or indefinite lived intangible assets as the fair value of our operating segments and definite lived intangible assets were substantially in excess of their carrying value.

Income Taxes. We record income taxes using the asset and liability method. Deferred income tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective income tax bases, and operating loss and tax credit carryforwards. We evaluate the realizability of our net deferred tax assets and assess the need for a valuation allowance on a quarterly basis. The future benefit to be derived from our deferred tax assets is dependent upon our ability to generate sufficient future taxable income to realize the assets. We record a valuation allowance to reduce our net deferred tax assets to the amount that may be more likely than not to be realized. To the extent we establish a valuation allowance, an expense will be recorded within the provision for income taxes line on the statement of operations. In periods subsequent to establishing a valuation allowance, if we were to determine that we would be able to realize our net deferred tax assets in excess of our net recorded amount, an adjustment to the valuation allowance would be recorded as a reduction to income tax expense in the period such determination was made.

Results of Operations.

Amounts in thousands

	Year ended December 31, 2011	Year ended December 31, 2010	Year ended December 31, 2009
Net sales	\$ 674,812	\$ 520,162	\$ 452,846
Cost of sales	478,394	366,151	329,825

<i>Gross profit percentage</i>	29.11%	29.61%	27.17%
Selling, general and administrative expenses	113,375	89,478	81,117
Research and development expenses	10,609	6,731	6,261
Gain on settlement of post-retirement benefit plan			(1,467)
Restructuring costs		2,726	7,286
Loss on sale/disposal of assets			545
Income from operations	72,434	55,076	29,279
Interest expense, net	24,035	19,638	32,976
Other non-operating (income) expense, net	(32)	909	981
Income (loss) before income taxes	48,431	34,529	(4,678)
Provision (benefit) for income taxes	10,756	10,004	(2,364)
Net income (loss)	\$ 37,675	\$ 24,525	\$ (2,314)

Year Ended December 31, 2011 Compared with Year Ended December 31, 2010

Amounts in thousands, except percentage data

	December 31, 2011	Year Ended December 31, 2010	Change	%
<i>Net sales</i>	\$ 674,812	\$ 520,162	\$ 154,650	29.7%

Net sales. The increase in sales in 2011 was due to improvement in the end markets we serve compared to 2010 and the acquisition of Bauer. As a result, net sales increased at all of our operating segments. Of the increase in sales, approximately \$65.9 million relates to the additional sales related to the acquisition of Bauer, \$8.9 million relates to the impact of foreign exchange rate changes attributed primarily to the Euro and British Pound Sterling rates compared to 2010, and approximately \$7.9 million relates to the impact of price increases. We forecast that demand in nearly all of our end markets will continue to improve in 2012 and we will benefit from the full year inclusion of Bauer.

Amounts in thousands, except percentage data

	December 31, 2011	Year Ended December 31, 2010	Change	%
<i>Gross Profit</i>	\$ 196,418	\$ 154,011	\$ 42,407	27.5%
<i>Gross Profit as a percent of sales</i>	29.1%	29.6%		

Gross profit. The decrease in gross profit as a percentage of sales was primarily due to increased material costs, specifically related to the price of copper and steel. The inclusion of Bauer negatively effected gross profit as a percentage of sales by approximately 400 basis points. Gross profit was favorably impacted by the effect of foreign exchange of \$3.1 million, primarily related to the Euro and British Pound Sterling, and price increases of \$7.9 million when compared to 2010, off-set by the incorporation of seven months of results for Bauer, which includes an inventory fair value charge of \$0.6 million and lower gross profit margins. We forecast

2012 gross profit as a percentage of sales to increase modestly when compared to 2011 as we continue to pass cost increases through to our customers as well as develop synergies in relation to our integration of Bauer.

Amounts in thousands, except percentage data

	Year Ended			
	December 31, 2011	December 31, 2010	Change	%
<i>Selling, general and administrative expense (SG&A)</i>	\$ 113,375	\$ 89,478	\$ 23,897	26.7%
<i>SG&A as a percent of sales</i>	16.8%	17.2%		

Selling, general and administrative expenses. SG&A increased \$14.4 million due to the acquisition of Bauer, \$3.1 million of acquisition related expenses, as well as the effect of foreign exchange of \$1.2 million. However, due to our cost reduction and containment efforts over the past two years that were focused on headcount reductions and the elimination of non-critical expenses, SG&A as a percentage of sales decreased in 2011 when compared to 2010. We forecast modest increases to our SG&A costs and plan to leverage them on increased sales as we invest in resources to enable us to grow faster in emerging markets and strategic industries in 2012.

Amounts in thousands, except percentage data

	Year Ended			
	December 31, 2011	December 31, 2010	Change	%
<i>Research and development expenses (R&D)</i>	\$ 10,609	\$ 6,731	\$ 3,878	57.6%

Research and development expenses. R&D expenses represented approximately 1% of sales in both periods. \$1.3 million of the increase in R&D expense in 2011 is related to the newly acquired Bauer business. Increased R&D activities as well as headcount additions also attributed to the increase in R&D expense. We do not forecast significant variances in future periods.

Amounts in thousands, except percentage data

	Year Ended			
	December 31, 2011	December 31, 2010	Change	%
<i>Interest Expense, net</i>	\$ 24,035	\$ 19,638	\$ 4,397	22.4%

Interest expense. Net interest expense increased due to the issuance of \$85.0 million of Convertible Notes in March 2011, as well as the repurchase of \$12.0 million of Senior Secured Notes in 2011 at a premium of \$0.3 million, which was recorded as part of interest expense. Due to the repurchase of the Senior Secured Notes, the Company also wrote-off a proportional amount of the deferred financing fees and original issue discount associated with the Senior Secured Notes totaling \$0.4 million which was also recorded as part of interest expense in 2011.

Amounts in thousands, except percentage data

	Year Ended			
	December 31, 2011	December 31, 2010	Change	%
<i>Other non-operating (income) expense, net</i>	\$ (32)	\$ 909	\$ (941)	-104%

Other non-operating (income) expense. Other non-operating (income) expense in both the years ended December 31, 2011 and 2010 primarily relates to changes in foreign currency, primarily the British Pound Sterling and Euro.

Amounts in thousands, except percentage data

	Year Ended			
	December 31, 2011	December 31, 2010	Change	%
<i>Restructuring Expense</i>	\$	\$ 2,726	\$ (2,726)	(100)%

In March 2009, we adopted a restructuring plan (the 2009 Altra Plan) to continue to improve the utilization of our manufacturing infrastructure and to realign our business with economic conditions by

consolidating certain facilities. We substantially concluded our restructuring efforts as of the fourth quarter 2010 and expect no additional expense associated with the 2009 Altra Plan going forward.

Amounts in thousands, except percentage data

	Year Ended		Change	%
	December 31, 2011	December 31, 2010		
<i>Provision for income taxes, continuing operations</i>	\$ 10,756	\$ 10,004	\$ 752	7.5%
<i>Provision for income taxes as a % of income before taxes</i>	22.2%	29.0%		

Provision for income taxes. Income tax expense was \$10.8 million for the year ended December 31, 2011, compared to expense of \$10.0 million for the year ended December 31, 2010. Our effective tax rate was 22.2% and 29.0% for the years ended December 31, 2011 and December 31, 2010, respectively. The decrease in the tax rate was primarily driven by a reduction of the Company's reserve for uncertain tax positions due to a favorable New Jersey court ruling in a case that did not involve the Company. Additionally, the Company released a valuation allowance on state net operating losses related to projected profitability at various of our domestic entities.

Year Ended December 31, 2010 Compared with Year Ended December 31, 2009

Amounts in thousands, except percentage data

	Year Ended		Change	%
	December 31, 2010	December 31, 2009		
<i>Net sales</i>	\$ 520,162	\$ 452,846	\$ 67,316	14.9%

Net sales. The majority of the increase in sales in 2010 was due to improvement in the end markets we serve. All of our operating segments had increased sales in 2010 when compared to 2009 except the Heavy Duty Clutch Brake operating segment. This operating segment serves late cycle markets and was not impacted by the economic recovery until mid 2010. The effect of foreign currency translation did not affect the increase in sales year over year.

Amounts in thousands, except percentage data

	Year Ended		Change	%
	December 31, 2010	December 31, 2009		
<i>Gross Profit</i>	\$ 154,011	\$ 123,021	\$ 30,990	25.2%
<i>Gross Profit as a percent of sales</i>	29.6%	27.2%		

Gross profit. The increase in gross profit as a percentage of sales was primarily due to the impact of cost saving measures put into place in 2009, productivity improvements we have implemented, as well as better overhead absorption as a result of higher production levels. This was partially offset by increases in material costs in the later part of 2010. In addition, we recorded a one time inventory charge for \$2.2 million in 2009 related to the economic downturn. All of our operating segments generated increased gross profit and gross profit as a percentage of sales. The effect of foreign currency translation did not affect the increase in gross profit year over year.

	Year Ended		Change	%
	December 31, 2010	December 31, 2009		
<i>Selling, general and administrative expense (SG&A)</i>	\$ 89,478	\$ 81,117	\$ 8,361	10.3%
<i>SG&A as a percent of sales</i>	17.2%	17.9%		

Selling, general and administrative expenses. SG&A increased due to the reinstatement of certain employee benefits that were temporarily suspended during 2009 as well as an increase in variable operating costs

as a result of increased demand, a one-time healthcare charge and \$0.8 million of acquisition related expenses included within SG&A. However, due to our cost reduction efforts in 2009 that were focused on headcount reduction and the elimination of non-critical expenses, SG&A as a percentage of sales decreased in 2010 when compared to 2009.

<i>Interest Expense, net</i>	\$ 19,638	\$ 32,976	\$ (13,338)	(40.4)%

Interest expense. Net interest expense decreased primarily due to the redemption of our 9% Senior Secured Notes in 2009. In 2009, we incurred a \$5.3 million prepayment premium and we wrote off all unamortized deferred financing costs and original issue discount of \$5.8 million. In addition, in 2010 there was a lower average outstanding debt balance and a lower interest rate. For a more detailed description of the redemption of the 9% Senior Secured Notes and the pay down of the 11.25% Senior Notes, please see Note 10 to our Consolidated Financial Statements in this Form 10-K.

<i>Other non-operating (income) expense, net</i>	\$ 909	\$ 981	\$ (72)	(7)%

Other non-operating (income) expense. We recorded \$0.8 million of realized foreign exchange loss and \$0.3 million of unrealized foreign exchange loss during 2010, mainly due to the Euro weakening when compared to the British Pound Sterling. We recorded \$1.0 million of other expense in 2009 which was primarily related to \$1.1 million of foreign exchange losses recorded during 2009, mainly due to the U.S. Dollar weakening when compared to the British Pound Sterling and Euro.

Amounts in thousands, except percentage data

	Year Ended			
	December 31, 2010	December 31, 2009	Change	%
<i>Restructuring Expense</i>	\$ 2,726	\$ 7,286	\$ (4,560)	(62.6)%

Restructuring In March 2009, we adopted a restructuring plan (the 2009 Altra Plan) to improve the utilization of our manufacturing infrastructure and to realign our business with the current economic conditions. The 2009 Altra Plan was intended to improve operational efficiency by reducing headcount and consolidating certain facilities.

During 2010, we recorded \$2.7 million of restructuring expenses related to the 2009 Altra Plan, of which \$1.2 million was related to severance, \$0.5 million related to moving and relocation, \$0.7 million to other restructuring charges and \$0.3 million was non cash impairment charges.

During 2009, we recorded \$7.3 million of restructuring expenses related to the 2009 Altra Plan, of which \$4.2 million was related to severance, \$0.6 million was related to other restructuring charges (primarily moving and relocation costs), and \$2.5 million was non-cash impairment charges.

Amounts in thousands, except percentage data

	Year Ended		Change	%
	December 31, 2010	December 31, 2009		
<i>Provision (benefit) for income taxes, continuing operations</i>	\$ 10,004	\$ (2,364)	\$ 12,368	(523.2)%
<i>Provision (benefit) for income taxes as a % of income before taxes</i>	29.0%	(50.5)%		

Provision for income taxes. Income tax expense was \$10.0 million for the year ended December 31, 2010, compared to a benefit of \$2.4 million for the year ended December 31, 2009. Our effective tax rate was 29.0% and (50.5%) for the years ended December 31, 2010 and December 31, 2009, respectively. The increase in the tax rate was primarily driven by the increase in taxable earnings in 2010 as we recovered from the impact of the recession in 2009. The tax rate was partially reduced due to the release of a non-U.S valuation allowance in the third quarter of 2010.

Liquidity and Capital Resources

Overview

We finance our capital and working capital requirements through a combination of cash flows from operating activities and borrowings under our senior secured revolving credit facility (*Revolving Credit Agreement*). We expect that our primary ongoing requirements for cash will be for working capital, debt service, capital expenditures, acquisitions and pension plan funding. In the event additional funds are needed, we could borrow additional funds under our Revolving Credit Agreement, attempt to secure new debt, attempt to refinance our 8 1/8% Senior Notes due December 2016 (the *Senior Secured Notes*), or attempt to raise capital in the equity markets. Presently, we have capacity under our Revolving Credit Agreement to borrow \$65.0 million, based on monthly asset collateral calculations, including letters of credit of which we currently have \$6.5 million outstanding. Of this total capacity, we can currently borrow up to \$52.5 million without being required to comply with any financial covenants under the agreement. In order to refinance the existing 8 1/8% Senior Secured Notes, we would incur a pre-payment premium. There can be no assurance however that additional debt financing will be available on commercially acceptable terms, if at all. Similarly, there can be no assurance that equity financing will be available on commercially acceptable terms, if at all.

During 2009, Altra Industrial retired the remaining principal balance of the 11 1/4% Senior Notes (the *Old Senior Notes*), of £3.3 million or \$5.0 million of principal amount, plus accrued and unpaid interest. In connection with the redemption, Altra Industrial incurred \$0.2 million of pre-payment premium and wrote-off the entire remaining balance of \$0.2 million of deferred financing fees, which is recorded as interest expense in the Consolidated Statement of Operations and Comprehensive Income (Loss).

Convertible Senior Notes

In March 2011, the Company issued Convertible Senior Notes (the *Convertible Notes*) due March 1, 2031. The Convertible Notes are guaranteed by the Company's U.S. domestic subsidiaries and are secured by a second priority lien, subject to first priority liens securing our Revolving Credit Agreement and our Senior Secured Notes, on substantially all of our assets and those of our domestic subsidiaries. Interest on the Convertible Notes is payable semi-annually in arrears, on March 1 and September 1 of each year, commencing on September 1, 2011 at an annual rate of 2.75%. Proceeds from the offering were \$81.3 million, net of fees and expenses that were capitalized. The proceeds from the offering were used to fund the Bauer Acquisition, as well as bolster the Company's cash position.

We were in compliance in all material respects with all covenants of the indenture governing the Convertible Notes at December 31, 2011.

Senior Secured Notes

In November 2009, the Company issued \$210 million of Senior Secured Notes. We used the proceeds of the offering of the Senior Secured Notes to repurchase or redeem Altra Industrial's 9% Old Senior Secured Notes.

During 2011, the Company repurchased \$12.0 million of Senior Secured Notes. The Company repurchased the Senior Secured Notes at a premium of \$0.3 million, which was recorded as part of interest expense in 2011. Due to the repurchase of the Senior Secured Notes, the Company also wrote-off a proportional amount of the deferred financing fees and original issue discount associated with the Senior Secured Notes totaling \$0.4 million which was also recorded as part of interest expense in the Consolidated Statement of Operations and Comprehensive Income (Loss) for 2011

The Senior Secured Notes are guaranteed by the Company's U.S. domestic subsidiaries and are secured by a second priority lien, subject to first priority liens securing our Revolving Credit Agreement, on substantially all of our assets and those of our domestic subsidiaries. Interest on the Senior Secured Notes is payable in arrears, semi-annually on June 1 and December 1 of each year, commencing on June 1, 2010. The indenture governing the Senior Secured Notes contains covenants which restrict the Company and its subsidiaries. These restrictions limit or prohibit, among other things, their ability to incur additional indebtedness; repay subordinated indebtedness prior to stated maturities; pay dividends on or redeem or repurchase stock or make other distributions; make investments or acquisitions; sell certain assets or merge with or into other companies; sell stock in our subsidiaries; and create liens on their assets.

We were in compliance in all material respects with all covenants of the indenture governing the Senior Secured Notes at both December 31, 2011 and 2010, respectively.

Borrowings

	Amounts in millions	
	December 31, 2011	December 31, 2010
Debt:		
Revolving Credit Agreement	\$	\$
Convertible Notes	85.0	
Senior Secured Notes	198.0	210.0
Variable rate demand revenue bonds	3.0	5.3
Mortgages	1.8	2.4
Capital leases	0.4	1.3
 Total Debt	 \$ 288.2	 \$ 219.0

Revolving Credit Agreement

Concurrently with the closing of the offering of the Senior Secured Notes, Altra Industrial entered into the Revolving Credit Agreement, that provided for borrowing capacity in an initial amount of up to \$50.0 million (subject to adjustment pursuant to a borrowing base and subject to increase from time to time in accordance with the terms of the credit facility). The Revolving Credit Agreement replaced Altra Industrial's then existing senior secured credit facility, and the TB Wood's existing credit facility.

In November 2011, we amended the Revolving Credit Agreement to increase the borrowing capacity to \$65 million (subject to adjustment pursuant to a borrowing base calculation and subject to increase from time to time in accordance with the terms of the amended credit facility).

Altra Industrial and all of its domestic subsidiaries are borrowers, (collectively, the Borrowers) under the Revolving Credit Agreement. Certain of our existing and subsequently acquired or organized domestic subsidiaries that are not Borrowers do and will guarantee (on a senior secured basis) the Revolving Credit Agreement. Obligations of the other Borrowers under the Revolving Credit Agreement and the guarantees are secured by substantially all of Borrowers' assets and the assets of each of our existing and subsequently acquired or organized domestic subsidiaries that is a guarantor of our obligations under the Revolving Credit Agreement (with such subsidiaries being referred to as the U.S. subsidiary guarantors), including but not limited to: (a) a first-priority pledge of all the capital stock of subsidiaries held by Borrowers or any U.S. subsidiary guarantor (which pledge, in the case of any foreign subsidiary, will be limited to 100% of any non-voting stock and 65% of

the voting stock of such foreign subsidiary) and (b) perfected first-priority security interests in and mortgages on substantially all tangible and intangible assets of each Borrower and U.S. subsidiary guarantor, including accounts receivable, inventory, equipment, general intangibles, investment property, intellectual property, certain real property, cash and proceeds of the foregoing (in each case subject to materiality thresholds and other exceptions).

An event of default under the Revolving Credit Agreement would occur in connection with a change of control, among other things, if: (i) Altra Industrial ceases to own or control 100% of each of its Borrower subsidiaries, or (ii) a change of control occurs under the Senior Secured Notes, or any other subordinated indebtedness.

An event of default under the Revolving Credit Agreement would also occur if an event of default occurs under the indentures governing the Senior Secured Notes or if there is a default under any other indebtedness that any Borrower may have involving an aggregate amount of \$10 million or more and such default: (i) occurs at final maturity of such debt, (ii) allows the lender there under to accelerate such debt or (iii) causes such debt to be required to be repaid prior to its stated maturity. An event of default would also occur under the Revolving Credit Agreement if any of the indebtedness under the Revolving Credit Agreement ceases with limited exception to be secured by a full lien of the assets of Borrowers and guarantors.

As of December 31, 2011 and 2010, we were in compliance in all material respects with all covenant requirements associated with all of our borrowings. As of December 31, 2011, we had no borrowings, \$6.5 million in letters of credit outstanding, and \$58.5 million available under the Revolving Credit Agreement.

Net Cash

	December 31, 2011	December 31, 2010
	(In thousands)	
<i>Cash and cash equivalents</i>	\$ 92,515	\$ 72,723

Cash Flows for 2011

The primary source of funds for our fiscal year 2011 was cash provided by operating activities of \$46.9 million. Net cash used in investing activities of \$89.9 million for the acquisition of Bauer, purchases of property, plant and equipment primarily for investment in manufacturing equipment and our new ERP system, off-set by funds received from the sale of both our Stratford and Chattanooga facilities. Net cash from financing activities of \$64.8 million for 2011 consisted primarily of proceeds from the issuance of our Convertible Notes and off-set by payments for debt issuance costs, the repurchase of \$12.0 million of Senior Secured Notes, redemption of variable rate demand revenue bonds related to the Chattanooga facility, and shares repurchased in lieu of taxes in connection with the vesting of restricted stock awards.

We intend to use our remaining existing cash and cash equivalents and cash flow from operations to provide for our working capital needs and to fund potential future acquisitions, debt service, capital expenditures, pension funding and to repay debt. We believe our future operating cash flows will be sufficient to meet our future operating and capital expenditure cash needs. Furthermore, the existing cash balances and the availability of additional borrowings under our Revolving Credit Agreement provide additional potential sources of liquidity should they be required.

Cash Flows for 2010

The primary source of funds for our fiscal year 2010 was cash provided by operating activities of \$42.8 million. Net cash used in investing activities of \$17.8 million for purchases of property, plant and equipment primarily for investment in manufacturing equipment and our new ERP system. Net cash used in financing activities of \$3.4 million for 2010 consisted primarily of payment of debt costs and shares repurchased in lieu of taxes in connection with the vesting of restricted stock awards.

Capital Expenditures

We made capital expenditures of approximately \$22.2 million and \$17.3 million in the years ended December 31, 2011 and December 31, 2010, respectively. These capital expenditures will support on-going business needs. In 2012, we forecast capital expenditures to be in the range of \$30.0 million to \$35.0 million.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements that provide liquidity, capital resources, market or credit risk support that expose us to any liability that is not reflected in our consolidated financial statements.

Contractual Obligations

The following table is a summary of our contractual cash obligations as of December 31, 2011 (in millions):

	Payments Due by Period						Total
	2012	2013	2014	2015	2016	Thereafter	
Senior Secured Notes ⁽¹⁾	\$	\$	\$	\$	\$	\$ 198.0	\$ 198.0
Convertible Notes ⁽²⁾						85.0	85.0
Operating leases	6.2	5.1	3.7	1.9	1.9	3.8	22.6
Capital leases	0.4						0.4
Mortgage ⁽³⁾	0.7	0.4	0.4	0.3			1.8
Variable Rate Demand Revenue Bonds ⁽⁴⁾						3.0	3.0
Revolving Credit Agreement ⁽⁵⁾							
Total contractual cash obligations	\$ 7.3	\$ 5.5	\$ 4.1	\$ 2.2	\$ 1.9	\$ 289.8	\$ 310.8

- (1) We have semi-annual cash interest requirements due on the Senior Secured Notes with \$16.1 million payable in 2012 through 2015, and \$14.8 million due in 2016 which are not included in the above table.
- (2) We have semi-annual cash interest requirements due on the Convertible Notes with \$2.3 million payable in 2012 through 2016, and \$2.7 million due thereafter which are not included in the above table.
- (3) In June, 2006, our German subsidiary entered into a mortgage on its building in Heidelberg, Germany, with a local bank. The mortgage has a principal of 1.4 million (\$1.8 million) as of December 31, 2011, an interest rate of 2.9% and is payable in monthly installments over the next 5 years.
- (4) In April 2007, as part of the TB Wood's acquisition, we assumed the obligation for payment of interest and principal on the Variable Rate Demand Revenue Bonds related to our San Marcos, Texas facility. These bonds bear variable interest rates and mature in April 2024.
- (5) We have up to \$65.0 million of borrowing capacity, through October 2016, under our Revolving Credit Agreement (including \$30 million available for use for letters of credit). As of December 31, 2011, there were no outstanding borrowings and \$6.5 million of outstanding letters of credit under our Revolving Credit Agreement.

We have cash funding requirements associated with our pension plan. As of December 31, 2011, these requirements were estimated to be \$1.1 million for 2012, \$1.1 million for 2013, \$1.1 million for 2014, \$1.1 million for 2015, and \$1.1 million for 2016, which are not included in the above table. These amounts are based on actuarial assumptions and actual amounts could be materially different.

We may be required to make cash outlays related to our unrecognized tax benefits. However, due to the uncertainty of the timing of future cash flows associated with our unrecognized tax benefits, we are unable to make reasonably reliable estimates of the period of cash settlement, if any, with the respective taxing authorities. Accordingly, unrecognized tax benefits of \$6.2 million as of December 31, 2011, have been excluded from the contractual obligations table above. For further information on unrecognized tax benefits, see Note 8 to the consolidated financial statements.

Stock-based Compensation

Edgar Filing: Altra Holdings, Inc. - Form 10-K

In January 2005, we established the 2004 Equity Incentive Plan that provides for various forms of stock based compensation to our officers and senior level employees.

As of December 31, 2011, there were 211,031 shares of unvested restricted stock outstanding under the plan. The remaining compensation cost to be recognized through 2014 is \$2.3 million. Based on the stock price at December 31, 2011, of \$18.83 per share, the intrinsic value of these awards as of December 31, 2011, was \$4.0 million.

Income Taxes

We are subject to taxation in multiple jurisdictions throughout the world. Our effective tax rate and tax liability will be affected by a number of factors, such as the amount of taxable income in particular jurisdictions, the tax rates in such jurisdictions, tax treaties between jurisdictions, the extent to which we transfer funds between jurisdictions and repatriate income, and changes in law. Generally, the tax liability for each legal entity is determined either (a) on a non-consolidated and non-combined basis or (b) on a consolidated and combined basis only with other eligible entities subject to tax in the same jurisdiction, in either case without regard to the taxable losses of non-consolidated and non-combined affiliated entities. As a result, we may pay income taxes to some jurisdictions even though on an overall basis we incur a net loss for the period.

Seasonality

We experience seasonality in our turf and garden business, which in recent years has represented approximately 7.2% of our net sales. As our large OEM customers prepare for the spring season, our shipments generally start increasing in December, peak in February and March, and begin to decline in April and May. This allows our customers to have inventory in place for the peak consumer purchasing periods for turf and garden products. The June-through-November period is typically the low season for us and our customers in the turf and garden market. Seasonality is also affected by weather and the level of housing starts.

Inflation

Inflation can affect the costs of goods and services we use. The majority of the countries that are of significance to us, from either a manufacturing or sales viewpoint, have in recent years enjoyed relatively low inflation. The competitive environment in which we operate inevitably creates pressure on us to provide our customers with cost-effective products and services.

Recent Accounting Pronouncements

In September 2011, the Financial Accounting Standards Board (FASB) issued guidance to allow entities to use a qualitative approach to determine whether it is more likely than not that the fair value of an operating segment is less than its carrying value. If after performing the qualitative assessment an entity determines it is not more likely than not that the fair value of an operating segment is less than its carrying amount, then performing the two-step impairment test is unnecessary. However if an entity concludes otherwise, then it is required to perform the first step of the two-step goodwill impairment test. The amendments are effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011 with early adoption permitted. The Company is currently evaluating the impact of its pending adoption on the consolidated financial statements.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to various market risk factors such as fluctuating interest rates, changes in foreign currency rates and changes in commodity prices. At present, we do not utilize derivative instruments to manage these risks.

Currency translation. The results of operations of our foreign subsidiaries are translated into U.S. Dollars at the average exchange rates for each period concerned. The balance sheets of foreign subsidiaries are translated into U.S. Dollars at the exchange rates in effect at the end of each period. Any adjustments resulting from the translation are recorded as other comprehensive income. As of December 31, 2011 and 2010, the aggregate total assets (based on book value) of foreign subsidiaries were \$236.5 million and \$152.4 million, respectively, representing approximately 37.6% and 30.0%, respectively, of our total assets (based on book value). Our foreign currency exchange rate exposure is primarily with respect to the Euro and British Pound

Sterling. The approximate exchange rates in effect at December 31, 2011 and 2010, were \$1.29 and \$1.32, respectively to the Euro. The approximate exchange rates in effect at December 31, 2011 and 2010 were \$1.54 and \$1.55, respectively to the British Pound Sterling.

Currency transaction exposure. Currency transaction exposure arises where actual sales, purchases and financing transactions are made by a business or company in a currency other than its own functional currency. Any transactional differences at an international location are recorded in net income on a monthly basis.

Interest rate risk. The majority of our debt is fixed rate debt, however we are subject to market exposure to changes in interest rates on some of our financing activities. This exposure relates to borrowings under our Revolving Credit Agreement, and our Variable Rate Demand Revenue Bonds. Our Revolving Credit Agreement is payable at prime rate plus 0.25% in the case of prime rate loans, or LIBOR rate plus an applicable spread of 2.75% to 3.25%, in the case of LIBOR rate loans. The applicable spread varies depending on the average amount that is unavailable under the Revolving Credit Agreement during the most recent quarter. As of December 31, 2011, we had no borrowings under our Revolving Credit Agreement and \$6.5 million of outstanding letters of credit under our Revolving Credit Agreement. The Variable Rate Demand Revenue Bonds have a variable interest rate that was less than 1% as of December 31, 2011. Due to the minimal amounts of outstanding variable rate debt a hypothetical change in interest rates of 1% would not have a material effect on our near-term financial condition or results of operations.

Commodity Price Exposure. We have exposure to changes in commodity prices principally related to metals including steel, copper and aluminum. From the first quarter of 2004 to the fourth quarter of 2011, the average price of copper and steel has increased approximately 153% and 121%, respectively. We primarily manage our risk associated with such increases through the use of surcharges or general pricing increases for the related products. We do not engage in the use of financial instruments to hedge our commodities price exposure.

Item 8. Financial Statements and Supplementary Data
REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of

Altra Holdings, Inc.

Braintree, Massachusetts

We have audited the accompanying consolidated balance sheets of Altra Holdings, Inc. and subsidiaries (the Company) as of December 31, 2011 and 2010, and the related consolidated statements of operations and comprehensive income (loss), stockholders' equity and cash flows for each of the three years in the period ended December 31, 2011. Our audits also included the financial statement schedule listed in the Index at Item 15. These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Altra Holdings, Inc. and subsidiaries at December 31, 2011 and 2010, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2011, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, such financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, present fairly, in all material respects, the information set forth therein.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2011, based on the criteria established in *Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission* and our report dated February 24, 2012 expressed an unqualified opinion on the Company's internal control over financial reporting.

ALTRA HOLDINGS, INC.

Notes to Consolidated Financial Statements

Amounts in thousands (unless otherwise noted)

1. Description of Business and Summary of Significant Accounting Policies

Basis of Preparation and Description of Business

Headquartered in Braintree, Massachusetts, Altra Holdings, Inc. (the Company), through its wholly-owned subsidiary Altra Industrial Motion, Inc. (Altra Industrial) is a leading multi-national designer, producer and marketer of a wide range of mechanical power transmission products. The Company brings together brands covering over 40 product lines with production facilities in eight countries and sales coverage in over 70 countries. The Company's brands include Boston Gear, Warner Electric, TB Woods, Formsprag Clutch, Ameridrives Couplings, Industrial Clutch, Kilian Manufacturing, Marland Clutch, Nuttall Gear, Stieber Clutch, Wichita Clutch, Twiflex Limited, Bibby Transmissions, Matrix International, Inertia Dynamics, Huco Dynatork, Warner Linear, and Bauer Gear Motor.

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries. All intercompany balances and transactions have been eliminated in consolidation.

Net Income Per Share

Basic earnings per share is based on the weighted average number of common shares outstanding, diluted earnings per share is based on the weighted average number of common shares outstanding and all dilutive potential common equivalent shares outstanding. Common equivalent shares are included in the per share calculations when the effect of their inclusion would be dilutive.

The following is a reconciliation of basic to diluted net income (loss) per share:

	Year Ended December 31,		
	2011	2010	2009
Net income (loss)	37,675	24,525	(2,314)
Shares used in net income per common share - basic	26,526	26,399	25,945
Incremental shares of unvested restricted common stock	163	136	
Shares used in net income per common share - diluted	26,689	26,535	25,945
Earnings per share(amount not in thousands):			
Basic	\$ 1.42	\$ 0.93	\$ (0.09)
Diluted	\$ 1.41	\$ 0.92	\$ (0.09)

The Company excluded 784,890 shares (amount not in thousands) related to the Convertible Notes (See Note 10) from the above earnings per share calculation as these shares were anti-dilutive.

Fair Value of Financial Instruments

The carrying values of financial instruments, including accounts receivable, cash equivalents, accounts payable and other accrued liabilities, approximate their fair values due to their short-term maturities. The carrying amount of the 8 1/8% Senior Secured Notes (the Senior Secured Notes) was \$198.0 million and \$210.0 million at December 31, 2011 and December 31, 2010, respectively. The estimated fair value of the Senior Secured Notes at December 31, 2011 and December 31, 2010 was \$210.4 million and \$221.0 million, respectively, based on the last available trading price for such notes.

The carrying amount of the 2.75% Convertible Notes (the Convertible Notes) was \$85.0 million at December 31, 2011. The estimated fair value of the Convertible Notes at December 31, 2011, was \$79.1 million, based on the last available trading price for such notes.

Included in cash and cash equivalents as of December 31, 2011 and December 31, 2010 are money market fund investments of \$48.9 million and \$34.0 million, respectively, which are reported at fair value based on quoted market prices for such investments (level 1).

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the financial statements. Actual results could differ from those estimates.

Foreign currency translation

Assets and liabilities of subsidiaries operating outside of the United States with a functional currency other than the U.S. Dollar are translated into U.S. Dollars using exchange rates at the end of the respective period. Revenues and expenses are translated at average exchange rates effective during the respective period.

Foreign currency translation adjustments are included in accumulated other comprehensive income (loss) as a separate component of stockholders' equity. Net foreign currency transaction gains and losses are included in the results of operations in the period incurred and included in other non-operating expense (income), net in the accompanying statement of operations and comprehensive income (loss).

Trade Receivables

An allowance for doubtful accounts is recorded for estimated collection losses that will be incurred in the collection of receivables. Estimated losses are based on historical collection experience, as well as a review by management of the status of all receivables. Collection losses have been within the Company's expectations.

Inventories

Inventories are stated at the lower of cost or market using the first-in, first-out (FIFO) method for all entities excluding one of the Company's subsidiaries, TB Wood's. TB Wood's inventory is stated at the lower of cost or market, principally using the last-in, first-out (LIFO) method. Inventory stated using the LIFO method approximates 11% of total inventory.

The cost of inventories acquired by the Company in its acquisitions reflect their fair values at the date of acquisition as determined by the Company based on the replacement cost of raw materials, the sales price of the finished goods less an appropriate amount representing the expected profitability from selling efforts, and for work-in-process the sales price of the finished goods less an appropriate amount representing the expected profitability from selling efforts and costs to complete.

The Company periodically reviews its quantities of inventories on hand and compares these amounts to the expected usage of each particular product or product line. The Company records a charge to cost of sales for any amounts required to reduce the carrying value of inventories to its estimated net realizable value.

Property, Plant and Equipment

Property, plant and equipment are stated at cost, net of accumulated depreciation.

Depreciation of property, plant and equipment, including capital leases is provided using the straight-line method over the estimated useful life of the asset, as follows:

Buildings and improvements	15 to 45 years
Machinery and equipment	2 to 15 years
Capital lease	Life of lease

Improvements and replacements are capitalized to the extent that they increase the useful economic life or increase the expected economic benefit of the underlying asset. Repairs and maintenance expenditures are charged to expense as incurred.

Intangible Assets

Intangibles represent product technology, patents, tradenames, trademarks and customer relationships. Product technology, patents and customer relationships are amortized on a straight-line basis over 8 to 16 years, which approximates the period of economic benefit. The tradenames and trademarks are considered indefinite-lived assets and are not being amortized. Intangibles are stated at fair value on the date of acquisition. At December 31, 2011 and 2010, intangibles are stated net of accumulated amortization incurred since the date of acquisition and any impairment charges.

Goodwill

Goodwill represents the excess of the purchase price paid by the Company for Power Transmission Holding, Inc. (PTH), The Kilian Company (Kilian), Hay Hall Holdings Ltd. (Hay Hall), Bear Linear Inc. (Warner Linear), TB Wood s Corporation (TB Wood s), All Power Transmission Manufacturing, Inc. (All Power), and Bauer over the fair value of the net assets acquired in each of the acquisitions.

Impairment of Goodwill and Indefinite-Lived Intangible Assets

The Company conducts an annual impairment review of goodwill and indefinite lived intangible assets in December of each year, unless events occur which trigger the need for an interim impairment review. In connection with the Company s annual impairment review, goodwill and indefinite lived intangible assets are assessed for impairment by comparing the fair value of the operating segment to the carrying value using a two step approach. In the first step, the Company estimates future cash flows based upon historical results and current market projections, discounted at a market comparable rate. If the carrying amount of the operating segment exceeds the estimated fair value, impairment may be present, the Company would then be required to perform a second step in its impairment analysis. In the second step, the Company would evaluate impairment losses based upon the fair value of the underlying assets and liabilities of the operating segment, including any unrecognized intangible assets, and estimate the implied fair value of the goodwill. An impairment loss is recognized to the extent that a operating segment s recorded value of the goodwill asset exceeded its calculated fair value. In addition, to the extent the implied fair value of any indefinite-lived intangible asset is less than the asset s carrying value, an impairment loss is recognized on those assets. The Company did not identify any impairment of goodwill in 2011, 2010 or 2009.

Preparation of forecasts of revenue and profitability growth for use in the long-range plan and the discount rate require significant use of judgment. Changes to the discount rate and the forecasted profitability could affect the estimated fair value of one or more of the Company s operating segments and could result in a goodwill impairment charge in a future period.

Impairment of Long-Lived Assets Other Than Goodwill and Indefinite-Lived Intangible Assets

Long-lived assets, including definite-lived intangible assets, are reviewed for impairment when events or circumstances indicate that the carrying amount of a long-lived asset may not be recovered. Long-lived assets are considered to be impaired if the carrying amount of the asset exceeds the undiscounted future cash flows expected to be generated by the asset over its remaining useful life. If an asset is considered to be impaired, the impairment is measured by the amount by which the carrying amount of the asset exceeds its fair value, and is charged to results of operations at that time.

The Company did not identify any impairment of long-lived assets in 2009. In 2010 and 2011, in relation to the sale of the Chattanooga facility in 2010 and the Stratford facility in 2011, the Company identified and recorded an impairment with respect to each facility in the amount of \$0.1 million based on their fair market value (Note 5).

Determining fair values based on discounted cash flows requires management to make significant estimates and assumptions, including forecasting of revenue and profitability growth for use in the long-range plan and estimating appropriate discount rates. Changes to the discount rate and the forecasted profitability could affect the estimated fair value of one or more of the Company s operating segments and could result in an impairment charge in a future period.

Debt Issuance Costs

Costs directly related to the issuance of debt are capitalized, included in other non-current assets and amortized using the effective interest method over the term of the related debt obligation. The net carrying value of debt issuance costs was approximately \$7.6 million and \$6.9 million at December 31, 2011 and 2010, respectively.

Revenue Recognition

Product revenues are recognized, net of sales tax collected, at the time title and risk of loss pass to the customer, which generally occurs upon shipment to the customer. Product return reserves are accrued at the time of sale based on the historical relationship between shipments and returns, and are recorded as a reduction of net sales.

Certain large distribution customers receive annual volume discounts, which are estimated at the time the sale is recorded based on the estimated annual sales.

Shipping and Handling Costs

Shipping and handling costs associated with sales are classified as a component of cost of sales.

Warranty Costs

Estimated expenses related to product warranties are accrued at the time products are sold to customers. Estimates are established using historical information as to the nature, frequency, and average costs of warranty claims. See Note 7 to the consolidated financial statements.

Self-Insurance

Certain exposures are self-insured up to pre-determined amounts, above which third-party insurance applies, for medical claims, workers compensation, vehicle insurance, product liability costs and general liability exposure. The accompanying balance sheets include reserves for the estimated costs associated with these self-insured risks, based on historic experience factors and management's estimates for known and anticipated claims. A portion of medical insurance costs are offset by charging employees a premium equivalent to group insurance rates.

Research and Development

Research and development costs are expensed as incurred.

Advertising

Advertising costs are charged to selling, general and administrative expenses as incurred and amounted to approximately \$1.5 million, \$1.1 million and \$1.3 million, for the years ended December 31, 2011, 2010, and 2009, respectively.

Stock-Based Compensation

The Company established the 2004 Equity Incentive Plan, as amended, that provides for various forms of stock-based compensation to officers, directors, key employees and others who make significant contributions to the success of the Company. Expense associated with equity awards is recognized on a straight-line basis over the requisite service period which typically coincides with the vesting period of the grant.

Income Taxes

The Company records income taxes using the asset and liability method. Deferred income tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective income tax bases, and operating loss and tax credit carryforwards. The Company evaluates the realizability of its net deferred tax assets and assesses the need for a valuation allowance on a quarterly basis. The future benefit to be derived from its deferred tax assets is dependent upon the Company's ability to generate sufficient future taxable income to realize the assets. The Company records a valuation allowance to reduce its net deferred tax assets to the amount that may be more likely than not to be realized.

To the extent the Company establishes a valuation allowance on net deferred tax assets generated from operations, an expense will be recorded within the provision for income taxes. In periods subsequent to establishing a valuation allowance on net deferred assets from operations, if the Company were to determine that it would be able to realize its net deferred tax assets in excess of their net recorded amount, an adjustment to the valuation allowance would be recorded as a reduction to income tax expense in the period such determination was made.

We assess our income tax positions and record tax benefits for all years subject to examination, based upon our evaluation of the facts, circumstances and information available at the reporting date. For those tax positions for which it is more likely than not that a tax benefit will be sustained, we record the amount that has a greater than 50% likelihood of being realized upon settlement with the taxing authority that has full knowledge of all relevant information. Interest and penalties are accrued, where applicable. If we do not believe that it is more likely than not that a tax benefit will be sustained, no tax benefit is recognized.

Accumulated Other Comprehensive Income (Loss)

The Company's total accumulated other comprehensive income (loss) is comprised of the following:

	Minimum Pension Asset/ (liability)	Cumulative Foreign Currency Translation Adjustment	Accumulated Other Comprehensive Income (Loss)
Balance at December 31, 2009	\$ 1,068	\$ (15,714)	\$ (14,646)
Balance at December 31, 2010	\$ (882)	\$ (13,789)	\$ (14,671)
Balance at December 31, 2011	\$ (2,485)	\$ (22,591)	\$ (25,076)

2. Recent Accounting Pronouncements

In September 2011, the Financial Accounting Standards Board (FASB) issued guidance to allow entities to use a qualitative approach to determine whether it is more likely than not that the fair value of an operating segment is less than its carrying value. If after performing the qualitative assessment an entity determines it is not more likely than not that the fair value of an operating segment is less than its carrying amount, then performing the two-step impairment test is unnecessary. However if an entity concludes otherwise, then it is required to perform the first step of the two-step goodwill impairment test. The amendments are effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011 with early adoption permitted. The Company is currently evaluating the impact of its pending adoption on the consolidated financial statements.

3. Acquisitions

In May 2011, the Company consummated an agreement to acquire substantially all of the assets and liabilities of Danfoss Bauer GmbH relating to its gear motor business (Bauer) for cash consideration of 43.1 million (\$62.3 million). We refer to this transaction as the Bauer Acquisition. Following closing, the Company made additional payments in the amount of 4.8 million (\$7.0 million) to reflect an adjustment for working capital and 0.1 million (\$0.2 million) to reflect an adjustment for pension liability.

Through the Bauer Acquisition, the Company acquired a European manufacturer of high-quality gear motors, offering engineered solutions to a variety of industries, including material handling, metals, food processing and energy. With the Bauer Acquisition, in addition to a presence in Germany, the Company acquired Bauer's well-established sales network in 15 additional countries in Western and Eastern Europe, China, and the United States.

In connection with the Bauer Acquisition, the Company is subject to substantially all the liabilities of Bauer related to the gear motor business acquired that were not satisfied on or prior to the closing date. There may be liabilities that the Company underestimated or did not discover in the course of performing the Company's due diligence investigation of Bauer. Under the Purchase Agreement, the seller agreed to provide the Company with a limited set of representations and warranties, including with respect to outstanding and potential

liabilities. However, the remedy from the seller for any breach of certain of those representations and warranties is an action for indemnification, not to exceed 14.1 million. This cap on damages does not apply to breaches of representations and warranties relating to incorporation, power and authority, insolvency, title to assets, taxes, environmental matters and certain pension claims. Damages resulting from a breach of a representation or warranty could have a material and adverse effect on the Company's financial condition and results of operations, and there is no guarantee that the Company would actually be able to recover all or any portion of the sums payable in connection with such breach.

The closing date of the Bauer Acquisition was May 29, 2011, and as a result, the Company's consolidated financial statements reflect Bauer's results of operations from the beginning of business on May 30, 2011 forward. Revenue and net loss for the Bauer activity included in the result for the year ended December 31, 2011 were \$65.9 million and \$2.1 million, respectively.

The Company has completed its final purchase price allocation. The purchase price allocation as of the acquisition date is as follows:

Total purchase price, excluding acquisition costs of approximately \$3.1 million	\$ 69,501
Cash and cash equivalents	41
Trade receivables	18,394
Inventories	21,397
Prepaid expenses and other	2,331
Property, plant and equipment	17,974
Intangible assets	15,669
Total assets acquired	\$ 75,806
Accounts payable	3,946
Accrued expenses and other current liabilities	7,589
Other liabilities	2,910
Total liabilities assumed	\$ 14,445
Net assets acquired	61,361
Excess purchase price over fair value of net assets acquired	\$ 8,140

The excess of the purchase price over the fair value of the net assets acquired was recorded as goodwill. The Company expects to develop synergies, such as lower cost country sourcing, global procurement, the ability to cross-sell product, and the ability to penetrate certain geographic areas, as a result of the acquisition of Bauer.

The estimated amounts recorded as intangible assets consist of the following:

Customer relationships, subject to amortization	\$ 12,274
Trade names and trademarks, not subject to amortization	3,395
Total intangible assets	\$ 15,669

Customer relationships are subject to amortization, and will be recognized on a straight-line basis over the estimated useful life of 9 years, which represents the anticipated period over which the Company estimates it will benefit from the acquired assets.

The following table sets forth the unaudited pro forma results of operations of the Company for the year to date periods ended December 31, 2011 and December 31, 2010 as if the Company had acquired Bauer at the beginning of the respective periods. The pro forma information contains the actual operating results of the Company and Bauer, adjusted to include the pro forma impact of (i) additional depreciation expense as a result of estimated depreciation based on the fair value of fixed assets; (ii) additional expense as a result of the estimated amortization of identifiable intangible assets; (iii) additional interest expense associated with the Convertible

Notes issued on March 7, 2011 in connection with the Bauer Acquisition; (iv) elimination of certain acquisition related costs; and (v) the elimination of additional expense as a result of a fair value adjustment to inventory recorded in connection with the acquisition. These pro forma amounts do not purport to be indicative of the results that would have actually been obtained if the acquisitions occurred at the beginning of the respective periods or that may be obtained in the future.

	Pro Forma (unaudited)	
	Year to Date Period Ended	
	December 31, 2011	December 31, 2010
Total revenues	\$ 724,705	\$ 614,629
Net income	\$ 40,441	\$ 18,342
Basic earnings per share	\$ 1.52	\$ 0.69
Diluted earnings per share	\$ 1.52	\$ 0.69

4. Inventories

Inventories located at certain subsidiaries acquired in connection with the TB Woods acquisition are stated at the lower of current cost or market, principally using the last-in, first-out (LIFO) method. All of the Company's remaining subsidiaries are stated at the lower of cost or market, using the first-in, first-out (FIFO) method. The cost of inventory includes direct materials, direct labor and production overhead. Market is defined as net realizable value. Inventories at December 31, 2011 and 2010 consisted of the following:

	December 31, 2011	December 31, 2010
Raw materials	\$ 45,664	\$ 32,826
Work in process	23,838	16,223
Finished goods	56,468	39,168
Inventories, net	\$ 125,970	\$ 88,217

Approximately 11% of total inventories at December 31, 2011, were valued using the LIFO method. The Company recorded as a component of cost of sales, a \$0.7 million and a \$0.2 million provision in the years ended December 31, 2011 and 2010, respectively. If the LIFO inventory was accounted for using the FIFO method, the inventory balance at December 31, 2011 and 2010, would be \$0.5 million higher and \$0.2 million lower, respectively.

5. Property, Plant and Equipment

Property, plant and equipment at December 31, 2011 and 2010, consisted of the following:

	2011	2010
Land	\$ 13,025	\$ 13,037
Buildings and improvements	36,877	34,302
Machinery and equipment	161,995	131,238
	211,897	178,577
Less-Accumulated depreciation	(88,433)	(73,279)
	\$ 123,464	\$ 105,298

In October 2010, the Company entered into a purchase and sale agreement for its facility located in Chattanooga, Tennessee. The Company recorded a \$0.1 million impairment of the Chattanooga facility in 2010. The Company estimated the fair value based on the quoted price listed in the purchase and sale agreement (level 2). The building was classified as an asset held for sale and the associated debt of \$2.3 million was classified as current as of December 31, 2010. The sale of the Chattanooga facility closed on April 14, 2011 for a purchase price of \$1.5 million and, prior to closing, the associated debt was repaid.

The Company owned a vacant building in Stratford, Canada which was classified as held for use as of December 31, 2010. In 2011, the Company sold the Stratford facility for approximately \$0.9 million. Cash was received for \$0.3 million and a note receivable was established for \$0.6 million, which has a term of 10 years and accrues interest at 6% annually.

The Company recorded \$18.4 million, \$15.0 million and \$16.5 million of depreciation expense in the years ended December 31, 2011, 2010, and 2009, respectively.

6. Goodwill and Intangible Assets

Changes in goodwill during the year ended December 31, 2011 and 2010 were as follows:

	2011	2010
Gross goodwill balance as of January 1	\$ 108,707	\$ 110,642
Adjustments related to the acquisition of Bauer	8,140	
Adjustments related to additional purchase price paid		532
Impact of changes in foreign currency and other	(1,238)	(2,467)
Gross goodwill balance as of December 31	115,609	108,707
Accumulated impairment, January 1	(31,810)	(31,810)
Impairment charge during period		
Accumulated impairment, December 31	(31,810)	(31,810)
Net goodwill balance December 31	\$ 83,799	\$ 76,897

Intangibles and related accumulated amortization consisted of the following:

	December 31, 2011		December 31, 2010	
	Cost	Accumulated Amortization	Cost	Accumulated Amortization
Intangible Assets				
Intangible assets not subject to amortization:				
Tradenames and trademarks	\$ 34,125	\$	\$ 30,730	\$
Intangible assets subject to amortization:				
Customer relationships	74,312	29,704	62,038	23,821
Product technology and patents	5,576	5,316	5,435	4,919
Impact of changes in foreign currency	(1,885)		(213)	
Total intangible assets	\$ 112,128	\$ 35,020	\$ 97,990	\$ 28,740

The Company recorded \$6.3 million, \$5.0 million, and \$5.5 million of amortization for the years ended December 31, 2011, 2010 and 2009, respectively.

Customer relationships, product technology and patents are amortized over their useful lives ranging from 8 to 16 years. The weighted average estimated useful life of intangible assets subject to amortization is approximately 11 years.

The estimated amortization expense for intangible assets is approximately \$6.8 million in 2012, \$6.3 million in each of the next four years and then \$11.0 million thereafter.

7. Warranty Costs

Edgar Filing: Altra Holdings, Inc. - Form 10-K

The wholly-owned subsidiaries of Altra Industrial manufacture various products. The contractual warranty period generally ranges from three months to two years with a few extending up to thirty-six months based on the product and application of the product. Estimated expenses related to product warranties are accrued at the time products are sold to customers and are recorded in accruals and other current liabilities on the consolidated balance sheet. Estimates are established using historical information as to the nature, frequency and

Edgar Filing: Altra Holdings, Inc. - Form 10-K

average costs of warranty claims. Changes in the carrying amount of accrued product warranty costs for the year ended December 31, 2011, 2010, and 2009 are as follows:

	December 31, 2011	December 31, 2010	December 31, 2009
Balance at beginning of period	\$ 3,583	\$ 4,047	\$ 4,254
Accrued current period warranty costs	2,374	1,626	1,894
Acquired warranty reserves	1,720		
Payments and adjustments	(2,779)	(2,090)	(2,101)
Balance at end of period	\$ 4,898	\$ 3,583	\$ 4,047

8. Income Taxes

Income (loss) before income taxes by domestic and foreign locations consists of the following:

	December 31, 2011	December 31, 2010	December 31, 2009
Domestic	\$ 34,034	\$ 19,812	\$ (5,711)
Foreign	14,397	14,717	1,033
Total	\$ 48,431	\$ 34,529	\$ (4,678)

The components of the provision (benefit) for income taxes consist of the following:

	December 31, 2011	December 31, 2010	December 31, 2009
Current:			
Federal	\$ 4,506	\$ 20	\$ (2,182)
State	(3,686)	251	314
Non-US	5,057	3,076	1,308
	\$ 5,877	\$ 3,347	\$ (560)
Deferred:			
Federal	\$ 7,949	\$ 7,643	\$ (1,279)
State	(861)	815	(528)
Non-US	(2,209)	(1,801)	3
	4,879	6,657	(1,804)
Provision (benefit) for income taxes	\$ 10,756	\$ 10,004	\$ (2,364)

A reconciliation from the federal statutory rate to the Company's effective tax rate for income taxes is as follows:

	December 31, 2011	December 31, 2010	December 31, 2009
--	----------------------	----------------------	----------------------

Edgar Filing: Altra Holdings, Inc. - Form 10-K

Tax at US federal income tax rate	\$ 16,957	\$ 12,085	\$ (1,637)
State taxes, net of federal income tax effect	1,050	1,010	(617)
Change in tax rate	(236)	(283)	(19)
Foreign taxes	709	1,033	975
Adjustments to accrued income tax liabilities and uncertain tax positions	(3,413)	(1,045)	(1,487)
Valuation allowance	(1,644)	(943)	1,726
Intercompany interest	(1,178)	(1,103)	(1,434)
Tax credits and incentives	(1,243)	(466)	(170)
Other	(246)	(284)	299
Provision (benefit) for income taxes	\$ 10,756	\$ 10,004	\$ (2,364)

The Company and its subsidiaries file a consolidated federal income tax return in the United States, as well as consolidated and separate income tax returns in various states. The Company and its subsidiaries also file consolidated and separate income tax returns in various non-U.S. jurisdictions. In the normal course of business, the Company is subject to examination by taxing authorities in all of these jurisdictions. With the exception of certain foreign jurisdictions, the Company is no longer subject to income tax examinations for the tax years prior to 2007. The Company is currently being audited for its US federal tax return for the tax years 2007 and 2010. Additionally, the Company has indemnification agreements with the sellers of the Colfax PTH, Kilian, Bauer and Hay Hall entities, that provide for reimbursement to the Company for payments made in satisfaction of tax liabilities relating to pre-acquisition periods.

A reconciliation of the gross amount of unrecognized tax benefits excluding accrued interest and penalties is as follows:

	December 31, 2011	December 31, 2010	December 31, 2009
Balance at beginning of period	\$ 6,338	\$ 7,376	\$ 6,213
Increases related to prior year tax positions		353	1,767
Decreases related to prior year tax positions	(2,289)		
Increases related to current year tax positions		277	87
Settlements		(363)	(33)
Lapse of statute of limitations	(526)	(1,305)	(658)
Balance at end of period	\$ 3,523	\$ 6,338	\$ 7,376

At December 31, 2011, the Company had \$6.2 million of net unrecognized tax benefits. If recognized, \$5.5 million would reduce the Company's effective tax rate and \$0.7 million would reduce deferred tax assets resulting in no impact to the effective tax rate.

In 2011, the Company recognized a tax benefit for the reduction of the Company's reserve for uncertain tax positions due to a favorable New Jersey Supreme Court ruling in a case that did not involve the Company. The reserve consisted of approximately \$2.3 million of tax, \$1.8 million of accrued interest and \$0.5 million of penalties. In addition, the Company reversed \$1.4 million of deferred tax assets related to the federal benefit of the accrued state reserve. The net benefit to the Company is approximately \$3.2 million.

The Company recognizes interest and penalties related to unrecognized tax benefits in income tax expense in the consolidated statement of operations. The Company accrued interest and penalties of \$0.6 million (off-set by a \$2.5 million benefit of interest and penalties primarily related to the New Jersey Supreme Court ruling), \$0.4 million, and \$0.5 million during the years ended December 31, 2011, 2010 and 2009, respectively. The total gross amount of interest and penalties related to uncertain tax positions at December 31, 2011, 2010, and 2009 was \$2.7 million, \$4.6 million, and \$4.2 million, respectively. Although it is reasonably possible that a change in the balance of unrecognized tax benefits might occur within the next twelve months, at this time it is not possible to estimate the range of change due to the uncertainty of the potential outcomes.

During 2010, the Company determined that the deferred tax impact of unrealized gains and losses on foreign exchange translation related to an inter-company loan had not been recognized in prior years. As a result, the net deferred tax liability was over-stated and the cumulative foreign currency translation adjustment was under-stated by \$5.3 million at December 31, 2009. Additionally, the currency translation adjustment included in the statement of comprehensive income (loss) was overstated by \$0.4 million for 2009. This non-cash adjustment did not impact any prior statements of operations, and the Company determined that the amounts were not material to its financial statements. The correction of the balances was made in 2010 by increasing other comprehensive income by \$4.1 million with an offset to deferred income taxes.

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. The Company has classified items associated with other comprehensive income to correspond with the deferred tax

item to which it relates. In 2010, these amounts were included as part of expenses not currently deductible. Significant components of the deferred tax assets and liabilities as of December 31, 2011 and 2010 are as follows:

	2011	2010
Deferred tax assets:		
Post-retirement obligations	\$ 2,751	\$ 2,512
Goodwill	(27)	1,739
Tax credits	1,944	2,557
Expenses not currently deductible	10,141	9,768
Net operating loss carryover	6,151	5,551
Other	954	1,094
Total deferred tax assets	21,914	23,221
Valuation allowance for deferred tax assets	(5,000)	(7,279)
Net deferred tax assets	16,914	15,942
Deferred tax liabilities:		
Property, plant and equipment	21,211	15,939
Intangible assets	14,622	15,800
Basis difference convertible debt	9,527	
Other		324
Total deferred liabilities	45,360	32,063
Net deferred tax liabilities	\$ 28,446	\$ 16,121

At December 31, 2011 the Company had state net operating loss (NOL) carry forwards of \$26.3 million, which expire between 2019 and 2031, and non U.S. NOL carryforwards of \$14.5 million, which have an unlimited carryforward period. The NOL carryforwards available are subject to limitations on their annual usage. The Company also has federal and state tax credits of \$2.0 million available to reduce future income taxes that expire between 2013 and 2030.

Valuation allowances are established for deferred tax assets that management believes may not be realized. The Company continually reviews the adequacy of the valuation allowance and recognizes tax benefits only as reassessments indicate that it is more likely than not the benefits will be realized. A valuation allowance of \$5.0 million and \$7.3 million as of December 31, 2011 and December 31, 2010, respectively, has been established due to the uncertainty of realizing the benefits of these net operating losses, tax credits, and other tax attributes. The valuation allowances are primarily related to certain non-U.S. NOL carryforwards, capital loss carryforwards, U.S. federal foreign tax credits and state NOL carryforwards.

A provision has not been made for U.S. or additional non-U.S. taxes on \$23.1 million of undistributed earnings of international subsidiaries that could be subject to taxation if remitted to the U.S. because the Company plans to keep these amounts permanently reinvested outside the U.S. except for instances where the Company has already been subject to tax in the U.S.

9. Pension and Other Employee Benefits

Defined Benefit (Pension) and Postretirement Benefit Plans

The Company sponsors various defined benefit (pension) and postretirement (medical, dental and life insurance coverage) plans for certain, primarily unionized, active employees (those in the employment of the Company at or hired since November 30, 2004).

Edgar Filing: Altra Holdings, Inc. - Form 10-K

The following tables represent the reconciliation of the benefit obligation, fair value of plan assets and funded status of the respective defined benefit (pension) and postretirement benefit plans as of December 31, 2011 and 2010:

	Pension Benefits		Other Benefits	
	Year Ended December 31, 2011	Year Ended December 31, 2010	Year Ended December 31, 2011	Year Ended December 31, 2010
Change in benefit obligation:				
Obligation at beginning of period	\$ 24,098	\$ 25,563	\$ 336	\$ 513
Assumed Bauer pension liability	3,085			
Service cost	167	156	2	2
Interest cost	1,389	1,442	17	20
Curtailments, settlements and special termination benefits		189	24	
Actuarial (gains) losses	2,379	2,640		(117)
Foreign exchange effect	(341)	(289)		
Benefits paid	(1,362)	(5,603)	(83)	(82)
Obligation at end of period	\$ 29,415	\$ 24,098	\$ 296	\$ 336
Change in plan assets:				
Fair value of plan assets, beginning of period	\$ 13,290	\$ 15,701	\$	\$
Assumed Bauer plan assets	327			
Actual return on plan assets	1,149	1,516		
Employer contributions	3,115	1,676	83	82
Benefits paid	(1,362)	(5,603)	(83)	(82)
Fair value of plan assets, end of period	\$ 16,519	\$ 13,290	\$	\$
Funded status	\$ (12,896)	\$ (10,808)	\$ (296)	\$ (336)
Amounts Recognized in the balance sheet consist of:				
Non current assets	\$	\$	\$	\$
Current liabilities				(113)
Non-current liabilities	(12,896)	(10,808)	(296)	(223)
Total	\$ (12,896)	\$ (10,808)	\$ (296)	\$ (336)

For all pension plans presented above, the accumulated and projected benefit obligations exceed the fair value of plan assets. The accumulated benefit obligation at December 31, 2011 and 2010 was \$29.4 million and \$24.1 million, respectively. Non-U.S. pension liabilities recognized in the amounts presented above are \$5.8 million and \$3.2 million at December 31, 2011 and 2010, respectively.

Included in accumulated other comprehensive loss at December 31, 2011 and 2010, is \$1.6 million (net of \$0.9 million in taxes) and \$2.0 million (net of \$1.1 million in taxes), respectively, of unrecognized actuarial losses that have not yet been recognized in net periodic pension cost.

Edgar Filing: Altra Holdings, Inc. - Form 10-K

The discount rate used in the computation of the respective benefit obligations at December 31, 2011 and 2010, presented above are as follows:

	2011	2010
Pension benefits	4.75%	5.50%
Other postretirement benefits	5.75%	5.75%

The following table represents the components of the net periodic benefit cost associated with the respective plans:

	Year Ended December 31, 2011	Pension Benefits Year Ended December 31, 2010	Year Ended December 31, 2009	Year Ended December 31, 2011	Other Benefits Year Ended December 31, 2010	Year Ended December 31, 2009
Service cost	\$ 167	\$ 156	\$ 111	\$ 2	\$ 2	\$ 39
Interest cost	1,389	1,442	1,418	17	20	118
Recognized net actuarial loss				(51)	(160)	(80)
Expected return on plan assets	(1,050)	(1,228)	(1,254)			
Settlement/Curtailment/ Special Termination Benefit		189				(1,467)
Amortization	39	(2)	(22)	(1)	(686)	(939)
Net periodic benefit (income) cost	\$ 545	\$ 557	\$ 253	\$ (33)	\$ (824)	\$ (2,329)

The key economic assumptions used in the computation of the respective net periodic benefit cost for the periods presented above are as follows:

	Year Ended December 31, 2011	Pension Benefits Year Ended December 31, 2010	Year Ended December 31, 2009	Year Ended December 31, 2011	Postretirement Benefits Year Ended December 31, 2010	Year Ended December 31, 2009
Discount rate	5.50%	5.75%	6.25%	5.75%	5.75%	6.25%
Expected return on plan assets	7.75%	7.75%	8.5%	N/A	N/A	N/A
Compensation rate increase	N/A	N/A	N/A	N/A	N/A	N/A

The expected long-term rate of return on assets assumption is 7.75%. The assumption represents the average rate of earnings expected on the funds invested or to be invested to provide for the benefits included in the benefit obligation. The assumption reflects expectations regarding future rates of return for the investment portfolio, with consideration given to the distribution of investments by asset class and historical rates of return for each individual asset class.

Fair Value of Plan Assets

The fair value of the Company's pension plan assets at December 31, 2011 and 2010 by asset category is as follows:

Asset Category	2011 Quoted Prices in Active Markets (Level 1)	2010 Quoted Prices in Active Markets (Level 1)
Equity		
U.S. companies	\$ 3,871	\$ 3,407
International companies	477	1,010
Total equity	4,348	4,417
Fixed income		
U.S. government	796	409
Corporate bonds		
Investment grade	6,983	5,093
High yield	2,467	1,107
Other credit	1,230	2,099
Total fixed income	11,476	8,708
Other (Level 2)	315	
Cash and cash equivalents	380	165
Total assets at fair value	\$ 16,519	\$ 13,290

The asset allocations for the Company's funded retirement plan at December 31, 2011 and 2010, respectively, and the target allocation for 2011, by asset category, are as follows:

Asset Category	Allocation Percentage of Plan Assets at Year-End		
	2011 Actual	2011 Target	2010 Actual
Global Equity	16%	15% - 65%	25%
Investment Grade Mutual Funds	43%	10% - 60%	46%
High Yield Mutual Funds	15%	0% - 30%	8%
Emerging Market Debt	4%	0% - 20%	4%
Government Bonds	5%	0% - 40%	3%
Dynamic Asset Allocation	15%	0% - 50%	13%
Cash	2%	0% - 20%	1%

The investment strategy is to achieve a rate of return on the plan's assets that, over the long-term, will fund the plan's benefit payments and will provide for other required amounts in a manner that satisfies all fiduciary responsibilities. A determinant of the plan's return is the asset allocation policy. The plan's asset mix will be reviewed by the Company periodically, but at least quarterly, to rebalance within the target guidelines. The Company will also periodically review investment managers to determine if the respective manager has performed satisfactorily when compared to the defined objectives, similarly invested portfolios, and specific market indices.

For measurement of the postretirement benefit obligations and net periodic benefit costs, an annual rate of increase in the per capita cost of covered health care benefits of approximately 8.50% was assumed. This rate was assumed to decrease gradually to 5%. The assumed health care trends are a significant component of the postretirement benefit costs. A one-percentage-point change in assumed health care cost trend rates would have the following effects:

	1-Percentage- Point Increase	1-Percentage- Point Decrease
Effect on the December 31, 2011 service and interest cost components	\$ 104	\$ (104)
Effect on the December 31, 2011 post-retirement benefit obligation	\$ 1,167	\$ (1,155)

Expected cash flows

The following table provides the amounts of expected benefit payments, which are made from the plans' assets and includes the participants' share of the costs, which is funded by participant contributions. The amounts in the table are actuarially determined and reflect the Company's best estimate given its current knowledge; actual amounts could be materially different.

	Pension Benefits	Postretirement Benefits
Expected benefit payments (from plan assets)		
2012	\$ 996	\$ 57
2013	1,093	14
2014	1,169	5
2015	1,297	6
2016	1,369	7
Thereafter	7,539	50

The Company contributed \$3.0 million to its U.S. pension plan in 2011. The Company has minimum cash funding requirements associated with its pension plans which are estimated to be \$1.1 million in 2012, \$1.1 million in 2013, \$1.1 million in 2014, \$1.1 million in 2015, and \$1.1 million in 2016.

In March 2009, the Company reached a new collective bargaining agreement with the union at its Erie, Pennsylvania facility. One of the provisions of the new agreement eliminates benefits that employees were entitled to receive through the applicable other post employment benefit plan (OPEB). OPEB benefits will no longer be available to retired or active employees. This resulted in an OPEB settlement gain of \$1.5 million in the year ended December 31, 2009. In addition, no additional years of credited service will be accrued on the defined benefit pension plan effective February 28, 2009. There was no curtailment gain or loss as a result of the change in the pension plan.

Defined Contribution Plans

Under the terms of the Company's defined contribution plans, eligible employees may contribute up to seventy-five percent of their compensation to the plan on a pre-tax basis. During 2009, the Company made matching contributions equal to half of the first six percent of salary contributed by each employee and made a unilateral contribution (including for non-contributing employees). Effective February 2009, the Company's matching contribution was temporarily suspended and effective July 2009, the Company's unilateral contribution was suspended. The Company reinstated both the matching and unilateral contributions by July 2010. The Company's expense associated with the defined contribution plans was \$3.4 million and \$2.4 million during the years ended December 31, 2011 and 2010, respectively.

10. Long-Term Debt

	December 31, 2011	December 31, 2010
Debt:		
Revolving Credit Agreement	\$	\$
Convertible Notes	85,000	
Senior Secured Notes	198,045	210,000
Variable rate demand revenue bonds	3,000	5,300
Mortgages	1,762	2,372
Capital leases	417	1,257
Total debt	288,224	218,929
Less: debt discount, net of accretion	(24,175)	(2,427)
Total long-term debt, net of unaccreted discount	\$ 264,049	\$ 216,502
Less current portion of long-term debt	688	3,393
Total long-term debt	\$ 263,361	\$ 213,109

Convertible Senior Notes

In March 2011, the Company issued Convertible Senior Notes (the "Convertible Notes") due March 1, 2031. The Convertible Notes are guaranteed by the Company's U.S. domestic subsidiaries and are secured by a second priority lien, subject to first priority liens securing our Revolving Credit Agreement and our Senior Secured Notes, on substantially all of our assets and those of our domestic subsidiaries. Interest on the Convertible Notes is payable semi-annually in arrears, on March 1 and September 1 of each year, commencing on September 1, 2011 at an annual rate of 2.75%. Proceeds from the offering were \$81.3 million, net of fees and expenses that were capitalized. The proceeds from the offering were used to fund the Bauer Acquisition, as well as bolster the Company's cash position.

The Convertible Notes will mature on March 1, 2031, unless earlier redeemed, repurchased by the Company or converted, and are convertible into cash or shares, or a combination thereof, at the Company's election. The Convertible Notes are convertible into shares of the Company's common stock based on an initial conversion rate, subject to adjustment, of 36.0985 shares per \$1,000 principal amount of notes (which represents an initial conversion price of approximately \$27.70 per share of our common stock), in certain circumstances. Prior to March 1, 2030, the Convertible Notes are convertible only in the following circumstances: (1) during any fiscal quarter commencing after June 30, 2011 if the last reported sale price of the Company's common stock is greater than or equal to 130% of the applicable conversion price for at least 20 trading days in the period of 30 consecutive trading days ending on the last trading day of the preceding fiscal quarter; (2) during the five business day period after any 10 consecutive trading day period (the "measurement period") in which the trading price per \$1,000 principal amount of notes for each trading day in the measurement period was less than 97% of the product of the last reported sale price of the Company's common stock and the conversion rate on such trading day; (3) if the Convertible Notes have been called for redemption; or (4) upon the occurrence of specified corporate transactions. On or after March 1, 2030, and ending at the close of business on the second business day immediately preceding the maturity date, holders may convert their Convertible Notes at any time, regardless of the foregoing circumstances. Upon conversion, the Company will pay or deliver, as the case may be, cash, shares of common stock, or a combination thereof, at the Company's election. The Company intends to settle the principal amount in cash and any additional amounts in shares of stock.

If a fundamental change occurs, the Convertible Notes are redeemable at a price equal to 100% of the principal amount of the notes to be repurchased, plus accrued and unpaid interest (including contingent interest and additional interest, if any) to, but excluding, the repurchase date. The Convertible Notes are also redeemable

on each of March 1, 2018, March 1, 2021, and March 1, 2026 for cash at a price equal to 100% of the principal amount of the notes to be repurchased, plus accrued and unpaid interest (including contingent interest and additional interest, if any) to, but excluding, the option repurchase date.

On or after March 1, 2015, the Company may call all or part of the Convertible Notes at a redemption price equal to 100% of the principal amount of the Convertible Notes to be redeemed, plus accrued and unpaid interest to, but excluding, the redemption date, plus a make-whole premium payment in cash, shares of the Company's common stock, or combination thereof, at the Company's option, equal to the sum of the present values of the remaining scheduled payments of interest on the Convertible Notes to be redeemed through March 1, 2018 to, but excluding, the redemption date, if the last reported sale price of the Company's common stock for 20 or more trading days in a period of 30 consecutive trading days ending on the trading day prior to the date the Company provides notice of redemption exceeds 130% of the conversion price in effect on each such trading day. On or after March 1, 2018, the Company may redeem for cash all or a portion of the notes at a redemption price of 100% of the principal amount of the Convertible Notes to be redeemed, plus accrued and unpaid interest (including contingent and additional interest, if any) to, but not including, the redemption date.

The Company separately accounted for the debt and equity components of the Convertible Notes to reflect the issuer's non-convertible debt borrowing rate, which interest costs are to be recognized in subsequent periods. The note payable principal balance at the date of issuance of \$85.0 million was bifurcated into a debt component of \$60.5 million and an equity component of \$24.5 million. The difference between the note payable principal balance and the value of the debt component is being accreted to interest expense over the term of the notes. The debt component was recognized at the present value of associated cash flows discounted using a 8.25% discount rate, the borrowing rate at the date of issuance for a similar debt instrument without a conversion feature. The Company paid approximately \$3.7 million of issuance costs associated with the Convertible Notes. The Company recorded \$1.0 million of debt issuance costs as an offset to additional paid-in capital. The balance of \$2.7 million of debt issuance costs is classified as other non-current assets and will be amortized over the term of the notes using the effective interest method.

The carrying amount of the principal amount of the liability component, the unamortized discount, and the net carrying amount are as follows as of December 31, 2011:

	December 31, 2011
Principal amount of debt	\$ 85,000
Unamortized discount	22,240
Carrying value of debt	\$ 62,760

Interest expense associated with the Convertible Notes consisted of the following for the year ended December 31, 2011:

	December 31, 2011
Contractual coupon rate of interest	\$ 1,948
Accretion of Convertible Notes discount and amortization of deferred financing costs	2,539
Interest expense for the Convertible Notes	\$ 4,487

The effective interest yield of the Convertible Notes due in 2031 is 8.5% at December 31, 2011 and the cash coupon interest rate is 2.75%.

Senior Secured Notes

In November 2009, the Company issued 8 1/8% Senior Secured Notes (the Senior Secured Notes) with a face value of \$210 million. Interest on the Senior Secured Notes is payable semi-annually in arrears, on June 1 and December 1 of each year, commencing on June 1, 2010 at an annual rate of 8 1/8%. The effective

interest rate of the Senior Secured Notes was approximately 8.75% after consideration of the \$6.7 million of deferred financing costs (included in other non-current assets which are being amortized over the term using the effective interest method). The principal balance of the Senior Secured Notes matures on December 1, 2016.

The Senior Secured Notes are guaranteed by the Company's U.S. domestic subsidiaries and are secured by a second priority lien, subject to first priority liens securing the Revolving Credit Agreement, on substantially all of the Company's assets and those of its domestic subsidiaries. The indenture governing the Senior Secured Notes contains covenants which restrict the Company and its subsidiaries. These restrictions limit or prohibit, among other things, the Company's ability to incur additional indebtedness; repay subordinated indebtedness prior to stated maturities; pay cash dividends on or redeem or repurchase stock or make other distributions; make investments or acquisitions; sell certain assets or merge with or into other companies; sell stock in our subsidiaries; and create liens on their assets. There are no financial covenants associated with the Senior Secured Notes.

During 2011, the Company repurchased \$12.0 million of Senior Secured Notes. The Company repurchased the Senior Secured Notes at a premium of \$0.3 million, which was recorded as part of interest expense in 2011. Due to the repurchase of the Senior Secured Notes, the Company also wrote-off a proportional amount of the deferred financing fees and original issue discount associated with the Senior Secured Notes totaling \$0.4 million which was also recorded as part of interest expense in the Consolidated Statement of Operations and Other Comprehensive Income (Loss) for 2011.

Tender Offer

The Company used the proceeds of the offering of the Senior Secured Notes to repurchase or redeem the Company's 9% Senior Secured Notes (the Old Senior Secured Notes). On November 10, 2009, the Company commenced a cash tender offer to repurchase any and all of its outstanding Old Senior Secured Notes as of the date thereof at a price equal to \$1,000.00 per \$1,000 principal amount of notes tendered, plus an early tender premium of \$25.00 per \$1,000 principal amount of notes tendered, payable on notes tendered before the early tender deadline. Holders who tendered their Old Senior Secured Notes also agreed to waive any rights to written notice of redemption. With respect to any Old Senior Secured Notes that were not tendered, Altra Holdings redeemed all Old Senior Secured Notes that remained outstanding after the expiration of the tender offer by issuing a notice of redemption on the early tender deadline. On the early tender deadline, Altra Holdings satisfied and discharged all of its obligations under the indenture governing the Old Senior Secured Notes by depositing funds with the depository in an amount sufficient to pay and discharge any remaining indebtedness on the Old Senior Secured Notes upon the consummation of the tender offer.

Revolving Credit Agreement

Concurrently with the closing of the offering of the Senior Secured Notes, Altra Industrial entered into a new senior secured credit facility, (the Revolving Credit Agreement), that provides for borrowing capacity in an initial amount of up to \$50.0 million (subject to adjustment pursuant to a borrowing base and subject to increase from time to time in accordance with the terms of the credit facility). The Revolving Credit Agreement replaced Altra Industrial's then existing senior secured credit facility, (the Old Revolving Credit Agreement), and the TB Wood's existing credit facility, (the Old TB Wood's Revolving Credit Agreement).

In 2011, the Company amended the Revolving Credit Agreement to increase the borrowing base to \$65 million (subject to adjustment pursuant to a borrowing base and subject to increase from time to time in accordance with the terms of the amended credit facility). As part of the amendment, additional financing fees of \$0.3 million were capitalized and will be amortized over the life of agreement.

The Company can borrow up to \$52.5 million under the Revolving Credit Agreement without being required to comply with any financial covenants under the agreement. The Company may use up to \$30.0 million of its availability under the Revolving Credit Agreement for standby letters of credit issued on its behalf, the issuance of which will reduce the amount of borrowings that would otherwise be available to the Company. The Company may re-borrow any amounts paid to reduce the amount of outstanding borrowings; however, all borrowings under the Revolving Credit Agreement must be repaid in full as of October 31, 2016 or the redemption of the Senior Secured Notes, whichever is earlier.

There were no borrowings under the Revolving Credit Agreement at December 31, 2011 and 2010, however, the lender had issued \$6.5 million and \$10.1 million of outstanding letters of credit on behalf of the Company as of December 31, 2011 and 2010, respectively.

Altra Industrial and all of its domestic subsidiaries are borrowers (collectively, Borrowers) under the Revolving Credit Agreement. Certain of our existing and subsequently acquired or organized domestic subsidiaries that are not Borrowers do and will guarantee (on a senior secured basis) the Revolving Credit Agreement. Obligations of the other Borrowers under the Revolving Credit Agreement and the guarantees are secured by substantially all of Borrowers' assets and the assets of each of our existing and subsequently acquired or organized domestic subsidiaries that is a guarantor of our obligations under the Revolving Credit Agreement (with such subsidiaries being referred to as the U.S. subsidiary guarantors), including but not limited to: (a) a first-priority pledge of all the capital stock of subsidiaries held by Borrowers or any U.S. subsidiary guarantor (which pledge, in the case of any foreign subsidiary, will be limited to 100% of any non-voting stock and 65% of the voting stock of such foreign subsidiary) and (b) perfected first-priority security interests in and mortgages on substantially all tangible and intangible assets of each Borrower and U.S. subsidiary guarantor, including accounts receivable, inventory, equipment, general intangibles, investment property, intellectual property, certain real property, and cash and proceeds of the foregoing (in each case subject to materiality thresholds and other exceptions).

An event of default under the Revolving Credit Agreement would occur in connection with a change of control, among other things, if: (i) Altra Industrial ceases to own or control 100% of each of its borrower subsidiaries, or (ii) a change of control occurs under the Senior Secured Notes, or any other subordinated indebtedness.

An event of default under the Revolving Credit Agreement would also occur if an event of default occurs under the indentures governing the Senior Secured Notes or if there is a default under any other indebtedness of any borrower involving an aggregate amount of \$10 million or more and such default: (i) occurs at final maturity of such debt, (ii) allows the lender there under to accelerate such debt or (iii) causes such debt to be required to be repaid prior to its stated maturity. An event of default would also occur under the Revolving Credit Agreement if any of the indebtedness under the Revolving Credit Agreement ceases with limited exception to be secured by a full lien on the assets of Borrowers and guarantors.

Variable Rate Demand Revenue Bonds

In connection with the acquisition of TB Woods, the Company assumed obligations for certain Variable Rate Demand Revenue Bonds outstanding as of the acquisition date. TB Woods had assumed obligations for approximately \$3.0 million and \$2.3 million of Variable Rate Demand Revenue Bonds issued under the authority of the industrial development corporations of the City of San Marcos, Texas and City of Chattanooga, Tennessee, respectively. The Company sold the Chattanooga facility on April 14, 2011 and redeemed the bonds associated with the facility at that time. The bonds associated with the San Marcos facility bear a variable interest rate (less than 1% as of December 31, 2011) and mature in April 2024. The bonds were issued to finance a production facility for TB Woods manufacturing operations in the city of San Marcos and are secured by a letter of credit issued under the terms of the Revolving Credit Agreement.

Mortgage

In June 2006, the Company entered into a mortgage on its building in Heidelberg, Germany with a local bank. In 2009, the Company refinanced the Heidelberg mortgage and increased the amount borrowed by an additional 1.0 million. The new mortgage has an interest rate of 2.9% and is payable in monthly installments over the next six years. As of December 31, 2011 and 2010, the mortgage had a remaining principal of 1.3 million or \$1.8 million, and 1.8 million or \$2.4 million, respectively. The Heidelberg mortgage is payable in monthly installments over the next six years.

Capital Leases

The Company leases certain equipment under capital lease arrangements, whose obligations are included in both short-term and long-term debt. Capital lease obligations amounted to approximately \$0.4 million

and \$1.3 million at December 31, 2011 and 2010, respectively. Assets subject to capital leases are included in property, plant and equipment with the related amortization recorded as depreciation expense.

Old Revolving Credit Agreement

Prior to entering into the Revolving Credit Agreement, the Company maintained the Old Revolving Credit Agreement, a \$30 million revolving borrowings facility with a commercial through its wholly owned subsidiary Altra Industrial. The Old Revolving Credit Agreement was subject to certain limitations resulting from the requirement of Altra Industrial to maintain certain levels of collateralized assets, as defined in the Old Revolving Credit Agreement. Altra Industrial was in compliance with all covenant requirements associated with the Old Revolving Credit Agreement as of the date of refinancing.

Overdraft Agreements

Certain of our foreign subsidiaries maintain overdraft agreements with financial institutions. There were no borrowings as of December 31, 2011, 2010, or 2009 under any of the overdraft agreements.

Old Senior Secured Notes

On November 30, 2004, Altra Industrial issued the Old Senior Secured Notes, with a face value of \$165.0 million. Interest on the Old Senior Secured Notes was payable semiannually, in arrears, on June 1 and December 1 of each year, beginning June 1, 2005, at an annual rate of 9%.

In connection with the acquisition of TB Woods on April 5, 2007, Altra Industrial completed a follow-on offering issuing an additional \$105.0 million of the Old Senior Secured Notes. The additional \$105.0 million had the same terms and conditions as the previously issued Old Senior Secured Notes. The effective interest rate on the Old Senior Secured Notes, after the follow-on offering was approximately 9.6% after consideration of the amortization of \$5.6 million net discount and \$6.5 million of deferred financing costs.

During 2009, Altra Industrial retired all of the outstanding Old Senior Secured Notes. In connection with the pay-down, Altra Industrial incurred \$5.1 million of pre-payment premiums and wrote-off \$3.2 million of deferred financing costs, and \$1.9 million of discount/premium which was recorded as a component of interest expense.

Old Senior Notes

On February 8, 2006, Altra Industrial issued the Old Senior Notes, with a face value of £33 million. Interest on the Old Senior Notes was payable semiannually, in arrears, on August 15 and February 15 of each year, beginning August 15, 2006, at an annual rate of 11.25%. The effective interest rate on the Old Senior Notes was approximately 12.7%, after consideration of the \$0.7 million of deferred financing costs (included in other assets). The Old Senior Notes were to mature on February 13, 2013.

During 2009, Altra Industrial retired the remaining principal balance of the Old Senior Notes, of £3.3 million or \$5.0 million of principal amount, plus accrued and unpaid interest. In connection with the redemption, Altra Industrial incurred \$0.2 million of pre-payment premium and wrote-off the entire remaining balance of \$0.2 million of deferred financing fees, which is recorded as interest expense in the condensed consolidated statement of Operations and Comprehensive income (Loss). The Old Senior Notes were guaranteed on a senior unsecured basis by Altra Industrial's U.S. domestic subsidiaries. The Old Senior Notes contained numerous terms, covenants and conditions, which imposed substantial limitations on the Company.

11. Stockholders Equity

Common Stock (amounts not in thousands)

As of December 31, 2011, there were 90,000,000 shares of common stock authorized and 26,600,056 outstanding.

Preferred Stock

On December 20, 2006, the Company amended and restated its certificate of incorporation authorizing 10,000,000 shares of undesignated Preferred Stock (Preferred Stock). The Preferred Stock may be issued from

time to time in one or more classes or series, the shares of each class or series to have such designations and powers, preferences, and rights, and qualifications, limitations and restrictions as determined by the Company's Board of Directors. There was no Preferred Stock issued or outstanding at December 31, 2011 or 2010.

Restricted Common Stock

The Company's Board of Directors established the 2004 Equity Incentive Plan (as amended, the Plan) that provides for various forms of stock-based compensation to independent directors, officers and senior-level employees of the Company. The restricted shares issued pursuant to the Plan generally vest ratably over a period ranging from immediately to five years from the date of grant, provided, that the vesting of the restricted shares may accelerate upon the occurrence of certain liquidity events, if approved by the Board of Directors in connection with the transactions. Common stock awarded under the Plan is generally subject to restrictions on transfer, repurchase rights, and other limitations and rights as set forth in the applicable award agreements. The shares are valued based on the share price on the date of grant.

The Plan permits the Company to grant restricted stock, among other things, to key employees and other persons who make significant contributions to the success of the Company. The restrictions and vesting schedule for restricted stock granted under the Plan are determined by the Personnel and Compensation Committee of the Board of Directors. Compensation expense recorded (in selling, general, and administrative expense) during the years ended December 31, 2011, 2010 and 2009 was \$2.5 million (\$1.7 million, net of tax), \$2.1 million (\$1.4 million, net of tax), and \$3.2 million (\$2.2 million, net of tax), respectively. Compensation expense is recognized on a straight-line basis over the vesting period.

The following table sets forth the activity of the Company's restricted stock grants to date:

Amounts not in thousands	Shares	Weighted-Average Grant Date Fair Value
Restricted shares unvested January 1, 2011	287,586	\$ 9.66
Shares granted	114,266	\$ 21.94
Shares for which restrictions lapsed	(190,821)	\$ 12.75
Restricted shares unvested December 31, 2011	211,031	\$ 13.52

Total remaining unrecognized compensation cost is approximately \$2.3 million as of December 31, 2011, and will be recognized over a weighted average remaining period of two years. The fair market value of the shares in which the restrictions have lapsed was \$3.3 million, \$6.3 million, and \$4.6 million, during 2011, 2010, and 2009, respectively. Restricted shares granted are valued based on the fair market value of the stock on the date of grant.

12. Concentrations of Credit, Segment Data and Workforce

Financial instruments, which are potentially subject to counter party performance and concentrations of credit risk, consist primarily of trade accounts receivable. The Company manages these risks by conducting credit evaluations of customers prior to delivery or commencement of services. When the Company enters into a sales contract, collateral is normally not required from the customer. Payments are typically due within thirty days of billing. An allowance for potential credit losses is maintained, and losses have historically been within management's expectations. No customer represented greater than 10% of total sales for the years ended December 31, 2011, 2010 and 2009.

The Company is also subject to counter party performance risk of loss in the event of non-performance by counterparties to financial instruments, such as cash and investments. Cash and investments are held by international and well established financial institutions.

The Company has six operating segments that are regularly reviewed by our chief operating decision maker. Each of these operating segments represents a unit that produces mechanical power transmission products. The Company aggregates all of the operating segments into one reportable segment. The six operating segments are expected to have similar long-term average gross profit margins. All of our products are sold by one global sales force and we have one global marketing function with the exception of the newly acquired Bauer

gear motor business for which the Company is developing a plan to integrate sales and marketing activities. Strategic markets and industries are determined for the entire company and then targeted by the brands. All of our operating segments have common manufacturing and production processes. Each segment includes a machine shop which uses similar equipment and manufacturing techniques. Each of our segments uses common raw materials, such as aluminum, steel and copper. The materials are purchased and procurement contracts are negotiated by one global purchasing function.

We serve the general industrial market by selling to original equipment manufacturers (OEM) and distributors. Our OEM and distributor customers serve the general industrial market. Resource allocation decisions such as capital expenditure requirements and headcount requirements are made at a consolidated level and allocated to the individual operating segments.

The following discussion of the Company's products does not include detailed product category revenue because such information is not individually tracked by the Company's financial reporting system and is not separately reported by the Company's general purpose financial statements. Conducting a detailed product revenue internal assessment and audit would involve unreasonable effort and expense as revenue information by product line is not available. The Company maintains sales information by operating facility, but does not maintain any accounting sales data by product line.

Net sales to third parties and property, plant and equipment by geographic region are as follows:

	Net Sales			Property, Plant and Equipment	
	December 31, 2011	December 31, 2010	Year Ended December 31, 2009	December 31, 2011	December 31, 2010
North America (primarily U.S.)	\$ 442,931	\$ 380,588	\$ 326,872	\$ 83,174	\$ 80,395
Europe	191,768	109,749	100,345	35,999	21,392
Asia and other	40,113	29,825	25,629	4,291	3,511
Total	\$ 674,812	\$ 520,162	\$ 452,846	\$ 123,464	\$ 105,298

Net sales to third parties are attributed to the geographic regions based on the country in which the shipment originates. Amounts attributed to the geographic regions for property, plant and equipment are based on the location of the entity, which holds such assets. The net assets of our foreign subsidiaries at December 31, 2011 and 2010 were \$108.8 million and \$92.3 million, respectively.

Approximately 19.4% of the Company's labor force (9.0% and 44.4% in the United States and Europe, respectively) is represented by collective bargaining agreements. The Company is a party to four U.S. collective bargaining agreements. The agreements will expire July 2013, October 2013, June 2014, and October 2014, respectively. The Company intends to renegotiate these contracts as they become due, though there is no assurance that this effort will be successful.

13. Restructuring, Asset Impairment and Transition Expenses

In March 2009, the Company adopted a restructuring plan (2009 Altra Plan) to improve the utilization of the manufacturing infrastructure and to realign the business with the current economic conditions. The 2009 Altra Plan was intended to improve operational efficiency by reducing headcount and consolidating facilities. The Company recorded \$2.7 million and \$7.3 million in restructuring charges associated with the 2009 Altra Plan in 2010 and 2009, respectively. In 2010 and 2009, the Company recorded \$1.2 million and \$4.2 million of severance charges associated with the announcement of certain plant closings and the reduction of the workforce due to the economic conditions at the time. In addition, the Company recorded two asset impairments.

The first was associated with the announcement that the Company would be closing its facility in Mt. Pleasant, Michigan and relocating the manufacturing to certain of the Company's other facilities. In connection with this decision, the Company completed an impairment analysis. The facility which had a carrying value of \$1.4 million was written down to the fair value of \$0.7 million, resulting in an impairment charge of \$0.7 million.

Edgar Filing: Altra Holdings, Inc. - Form 10-K

The Company estimated the fair value using observable inputs (level 2) by reviewing sale prices of comparable buildings in the Mt. Pleasant, Michigan area. The relocation was completed at the end of 2009.

The second was associated with the announcement that the Company would be closing its manufacturing facility in South Beloit, Illinois and relocating the manufacturing operations to certain of the Company's other facilities. In connection with this decision, the Company completed an impairment analysis. The facility which had a carrying value of \$2.1 million was written down to the fair value of \$1.5 million, resulting in an impairment charge of \$0.6 million. The Company estimated the fair value using observable inputs (level 2). The Company reviewed sales prices of comparable buildings in the South Beloit, Illinois area. The Company considers the facility to be substantially closed with the exception of the one remaining production line which is expected to remain open until the third quarter of 2012. In September 2009, the Company negotiated a plant closing agreement with the local union at the South Beloit facility. The Company agreed to pay approximately \$0.7 million in severance and performance bonuses to those employees who remain employed through their termination date. As of December 31, 2011, the Company had a remaining severance accrual of \$0.1 million that the Company expects to pay by July 2013.

The Company's total restructuring expense, by major component for the years ended December 31, 2011, 2010 and 2009, were as follows:

	Year Ended December 31, 2011	Year Ended December 31, 2010	Year Ended December 31, 2009
	2009 Altra Plan	2009 Altra Plan	2009 Altra Plan
Expenses			
Moving and relocation	\$	\$ 455	\$ 332
Severance		1,192	4,213
Other		738	232
Total cash expenses		2,385	4,777
Loss on disposal of fixed assets		341	2,509
Total restructuring expenses	\$	\$ 2,726	\$ 7,286

The following is a reconciliation of the accrued restructuring costs between December 31, 2009 and December 31, 2011

	All Plans
Balance at December 31, 2009	\$ 915
Restructuring expense incurred	2,726
Cash payments	(3,141)
Non-cash loss on impairment of fixed assets	(341)
Balance at December 31, 2010	\$ 159
Restructuring expense incurred	
Cash payments	(69)
Non-cash loss on impairment of fixed assets	
Balance at December 31, 2011	\$ 90

The total restructuring reserve as of December 31, 2011 relates to severance costs to be paid to employees and is recorded in accruals and other current liabilities on the consolidated balance sheet. The Company does not expect to incur any additional restructuring expense in 2012 under the 2009 Altra Plan.

14. Commitments and Contingencies***Minimum Lease Obligations***

The Company leases certain offices, warehouses, manufacturing facilities, automobiles and equipment with various terms that range from a month to month basis to ten year terms and which, generally, include renewal provisions. Future minimum rent obligations under non-cancelable operating and capital leases are as follows:

Year ending December 31:	Operating Leases	Capital Leases
2012	\$ 6,158	\$ 442
2013	5,069	
2014	3,690	
2015	1,910	
2016	1,918	
Thereafter	3,822	
Total lease obligations	\$ 22,567	\$ 442
Less amounts representing interest		(25)
Present value of minimum capital lease obligations		\$ 417

Net rent expense under operating leases for the years ended December 31, 2011, 2010, and 2009 was approximately \$6.9 million, \$4.9 million, and \$4.8 million, respectively.

General Litigation

The Company is involved in various pending legal proceedings arising out of the ordinary course of business. These proceedings primarily involve commercial claims, product liability claims, personal injury claims, and workers' compensation claims. None of these legal proceedings are expected to have a material adverse effect on the results of operations, cash flows, or financial condition of the Company. With respect to these proceedings, management believes that the Company will prevail, has adequate insurance coverage or has established appropriate reserves to cover potential liabilities. Any costs that management estimates may be paid related to these proceedings or claims are accrued when the liability is considered probable and the amount can be reasonably estimated. There can be no assurance, however, as to the ultimate outcome of any of these matters, and if all or substantially all of these legal proceedings were to be determined adversely to the Company, there could be a material adverse effect on the results of operations, cash flows, or financial condition of the Company. As of December 31, 2011 and 2010, the Company cannot estimate the likelihood or potential amount of the liability related to these proceedings. As a result, no amounts were accrued in the accompanying consolidated balance sheets for potential litigation losses at those dates.

The Company also risks exposure to product liability claims in connection with products it has sold and those sold by businesses that the Company acquired. Although in some cases third parties have retained responsibility for product liability claims relating to products manufactured or sold prior to the acquisition of the relevant business and in other cases the persons from whom the Company has acquired a business may be required to indemnify the Company for certain product liability claims subject to certain caps or limitations on indemnification, the Company cannot assure that those third parties will in fact satisfy their obligations with respect to liabilities retained by them or their indemnification obligations. If those third parties become unable to or otherwise do not comply with their respective obligations including indemnity obligations, or if certain product liability claims for which the Company is obligated were not retained by third parties or are not subject to these indemnities, the Company could become subject to significant liabilities or other adverse consequences. Moreover, even in cases where third parties retain responsibility for product liability claims or are required to indemnify the Company, significant claims arising from products that have been acquired could have a material adverse effect on the Company's ability to realize the benefits from an acquisition, could result in the reduction of the value of goodwill that the Company recorded in connection with an acquisition, or could otherwise have a material adverse effect on the Company's business, financial condition, or operations.

Environmental

The Company has not been notified that it is a potentially responsible party in connection with any sites the Company currently or formerly owned or operated or with respect to any liability at any off-site waste disposal facility. However, there is contamination at some of the Company's current facilities, primarily related to historical operations at those sites, for which the Company could be liable for the investigation and remediation under certain environmental laws. The potential for contamination also exists at other of the Company current or former sites, based on historical uses of those sites. The Company currently is not undertaking any remediation or investigations and the costs or liability in connection with potential contamination conditions at these facilities cannot be predicted at this time because the potential existence of contamination has not been investigated or not enough is known about the environmental conditions or likely remedial requirements. Currently, other parties with contractual liability are addressing or have plans or obligations to address those contamination conditions that may pose a material risk to human health, safety or the environment. In addition, while the Company attempts to evaluate the risk of liability associated with these facilities at the time the Company acquired them, there may be environmental conditions currently unknown to the Company relating to prior, existing or future sites or operations or those of predecessor companies whose liabilities the Company may have assumed or acquired which could have a material adverse effect on the Company's business.

The Company is being indemnified, or expects to be indemnified by third parties subject to certain caps or limitations on the indemnification, for certain environmental costs and liabilities associated with certain owned or operated sites. Accordingly, based on the indemnification and the experience with similar sites of the environmental consultants who the Company has hired, the Company does not expect such costs and liabilities to have a material adverse effect on its business, operations or earnings. The Company cannot assure you, however, that those third parties will in fact satisfy their indemnification obligations. If those third parties become unable to, or otherwise do not, comply with their respective indemnity obligations, or if certain contamination or other liability for which the Company is obligated is not subject to these indemnities, the Company could become subject to significant liabilities.

Other Matters

The state of New York Workers' Compensation Board (the Board) has demanded payment from one of the Company's business units of certain amounts the Board alleges are owed in connection with that business unit's past participation in a workers' compensation insurance trust. The amount claimed is currently immaterial and is subject to further adjustment and proceedings and the total amount of potential liability cannot be reasonably estimated as of December 31, 2011.

15. Unaudited Quarterly Results of Operations:

Year ended December 31, 2011

	Fourth Quarter	Third Quarter	Second Quarter	First Quarter

16. Guarantor Subsidiaries

All of the Company's direct and indirect 100% owned U.S. domestic subsidiaries are guarantors of the Company's Senior Secured Notes. The following condensed consolidating financial statements present separately the financial position, results of operations, and cash flows for (a) the Company, as parent, (b) the guarantor subsidiaries of the Company consisting of all of the, directly or indirectly, 100% owned U.S. domestic subsidiaries of the Company, (c) the non-guarantor subsidiaries of the Company consisting of all non-domestic subsidiaries of the Company, and (d) eliminations necessary to arrive at the Company's information on a consolidated basis. These statements are presented in accordance with the disclosure requirements under the Securities and Exchange Commission's Regulation S-X, Rule 3-10. Separate financial statements of the Guarantor Subsidiaries are not presented because their guarantees are full and unconditional and joint and several.
