1. Notice of Convocation of the Ordinary General Meeting of Shareholders for the 111th Business Term

To Our Shareholders

We are pleased to present our notice of convocation of the Ordinary General Meeting of Shareholders for the 111th business term (from January 1, 2011 to December 31, 2011).

In its 111th business term, the Canon Group, seizing on the strength of the sudden global economic recovery that began in the previous year, started its new five-year plan, Phase IV (2011 to 2015) of our Excellent Global Corporation Plan, to fully take on the challenge of achieving Sound Growth again. This term, however, became a challenging year with a series of calamities beginning with the Great East Japan Earthquake and continuing with economic recovery deceleration, mainly in Europe and the U.S., unprecedented yen appreciation, and devastating flooding in Thailand.

In the face of these challenges, our concerted efforts to restore lowered production activities caused by the disasters, and ongoing production reforms, which have paid off with cost reductions and other benefits, resulted in an increase in net income, although sales declined.

Regarding the dividend, we will propose a term-end dividend of 60.00 yen per share at the Ordinary General Meeting of Shareholders for the 111th Business Term. This is in appreciation for the ongoing support of our shareholders and a reflection of the realization of stable shareholder returns. Combined with the interim dividend (60.00 yen per share), dividends for this year will be 120.00 yen per share, the same amount paid for the 110th business term.

Looking to the future, business conditions are still unpredictable and are likely to defy optimism for some time. We, however, remain united in our commitment to move ahead and keep on making our best efforts to further improve our business results.

We look forward to your continued support and encouragement.

BUSINESS REPORT (From January 1, 2011 to December 31, 2011)

1. Current Conditions of the Canon Group

(1) Business Progress and Results

General Business Conditions

During the current business term, the global economy generally achieved a mild recovery. Nevertheless, with economic weakness in Europe and the U.S., as well as other contributing factors, the already-mild pace of recovery slowed even further in the second half.

DreamLabo 5000

In contrast with the notable decelerations of the economic recoveries in the U.S., which is wrestling with seemingly intractable employment and housing problems, and Europe, which is plagued by fiscal instability, the Chinese and Indian economies continued to expand on robust domestic demand as other emerging economies in general traced upward trends. The Japanese economy, meanwhile, faced difficult conditions resulting from the Great East Japan Earthquake. Production activities just beginning to recover from that disaster suffered an additional blow from devastating flooding in Thailand. Combined with other factors, these caused the Japanese economy to contract for the year.

During the current business term, the Canon Group embarked on its new five-year plan, Phase IV (2011 to 2015) of our Excellent Global Corporation Plan, under which our goal is to become one of the world's top 100 companies in terms of key management indicators. Efforts to implement that plan, however, were put on hold by the Great East Japan Earthquake, which damaged production facilities and disrupted component deliveries, making restoration of our production activities our top priority. With concerted efforts, we succeeded in getting our production facilities up and running more quickly than anticipated and turned our attention to recover sales volume. However, with the devastating autumn flooding in Thailand, our production activities suffered another blow that again demanded our full attention to minimize that impact and recover from it.

In foreign exchange markets, the yen rapidly marked major increases to the mid-70-yen level against the U.S. dollar and the 100-yen level against the euro.

Despite these developments, however, the Canon Group still moved forward with the advancement of key Phase IV strategies, looking ahead to the achievement of our objectives in 2015.

The markets in which the Canon Group competes were generally characterized by another year of mild recovery in demand for network digital multifunction devices and large-format inkjet printers, and overall growth in demand for laser printers, despite a slowdown in Europe. Digital single lens reflex cameras (SLRs) enjoyed overall steady growth in demand, and compact digital cameras and inkjet printers saw demand growth particularly in emerging economies. Semiconductor lithography equipment experienced solid demand, while demand for LCD lithography equipment for large-size panels was stagnant.

To begin with, as part of our effort to achieve the overwhelming No. 1 position in all core businesses and expand related and peripheral businesses, we worked with Océ N.V. on joint development and launched a production printer as an office-related product, and completed preparations for entering the commercial photo printer market with our new DreamLabo 5000 entry in the inkjet printer-related area.

We signaled our intent of full-fledged entry into the digital high resolution production industry represented by Hollywood movies with our announcement in November of the new CINEMA EOS SYSTEM comprising components such as 4K (4 times the pixel count of the full HD standard) compatible, high-resolution EF Cinema Lenses, and an interchangeable-lens video camcorder.

CINEMA EOS SYSTEM

[Scene at an exhibition held at Paramount Studios in the U.S.](#)

Meanwhile, to comprehensively reinforce global sales capabilities, we further strengthened our sales system in the still-growing Chinese market and worked to develop business in the Indian, Russian and other emerging markets. We also constructed the Canon Business Imaging Online cloud service platform for furthering the global development of cloud services that will help to boost office productivity and improve work processes. In this connection, we additionally took steps to create ties with leading IT and cloud-computing companies.

On other fronts, we moved to optimize inventories to help ensure we always have the proper amount of high-demand products on hand and do not miss sales opportunities, further reduced our logistics expenses, and cut our cost ratios through steps like implementing further use of man-machine cell production based on the combination of human and machine-based production and increasing the automation of consumables production. We also strove to reduce expenses by stepping up efficiency management in all of our work processes.

Furthermore, completing a step in developing new business through globalized diversification, we completed construction of the Advanced Medical Device Development and Clinical Research Center in June, marking a major step forward in bringing innovative new medical devices into practical use. This new facility, which will focus on the development of medical imaging equipment and on clinical research, is part of an industry-academia alliance project that is being pursued with Kyoto University to expand our business in the field of medical equipment.

As a result of various ways to further our business described above, despite declined sales due to the extremely difficult business conditions created by the impacts of rapid yen appreciation and natural disasters, net income increased for this business term.

We recorded net sales of 3,557.4 billion yen (down 4.0% from the previous term), income before income taxes of 374.5 billion yen (down 4.7%), and net income attributable to Canon Inc. of 248.6 billion yen (up 0.8%), all on a consolidated basis. On a non-consolidated basis, we recorded net sales of 2,160.7 billion yen (down 6.7%), ordinary profit of 282.1 billion yen (up 2.7%), and net income of 173.2 billion yen (up 13.6%).

1 During the current business term, despite extremely difficult conditions in the business environment such as the historical yen appreciation, the Great East Japan Earthquake, and the flooding in Thailand, the entire Group united together to quickly recover production that was affected by the earthquake and the flooding. As a result of such concerted efforts to increase production and expand sales, net sales only declined 4.0% in comparison to the previous term on a consolidated basis.

2 In addition, as a result of the gross profit ratio improvement by accelerating production reform activities and expenses reduction by evolving further efficiencies, we achieved an increase in net income attributable to Canon Inc. of 0.8% in comparison to the previous term on a consolidated basis.

Office Business Unit

The market for office network digital multifunction devices enjoyed stronger global demand for color machines and about the same level of demand as the previous term including monochrome machines. While production suffered a temporary setback due to the impacts of the Great East Japan Earthquake, output had rebounded to nearly normal levels by autumn and sales had risen, as well. Against that backdrop the imageRUNNER ADVANCE C5000/C2000 series and other color machines recorded solid gains in both unit sales and sales revenues.

* Shown equipped with options including two Joinable POD deck A1 units

imagePRESS C7010VPS

First jointly developed product with Océ N.V., combining our multifunctional color production printer, which boasts outstanding image quality and fine-details approaching that of offset printing, with an Océ printer controller.

In the market for digital production printers, color machines led major unit and revenue gains mainly in the European and Asian & Oceania regions, while the imageRUNNER ADVANCE 8105 PRO and other high-speed, monochrome machines performed well in the Japanese market and the imagePRESS C7010VP recorded solid results in the U.S. market. Taken together, unit sales and sales revenues both surpassed results for the previous term. In addition, sales of the imagePRESS C7010VPS, the first jointly developed product with Océ N.V., got off to a smooth start.

Satera LBP7010C

Compact color laser printer for home offices and small to mid-sized businesses, boasting excellent characteristics in both basic performance and environmental friendliness.

Led by new products, multifunction devices for small to mid-size businesses and personal-use continued to perform strongly in Europe and Asia, surpassing previous term's results for both unit sales and revenues. In Japan and the U.S., despite price reductions leading to slight year-on-year sales revenue declines, unit sales were basically maintained.

OEM-brand laser printers sold in greater numbers during the first half of the year, even with the impacts of the Great East Japan Earthquake. In the second half, however, cooling of the European market and flooding in Thailand, which hurt the output of some products, caused unit sales to fall slightly from the previous term. For the term as a whole, although unit sales of color machines came in slightly below previous term's level, as monochrome machines increased unit sales with large demand, overall unit sales surpassed the prior-year result. Canon-brand products, meanwhile, recorded lower unit sales in the U.S. and Asia mainly as a result of price reduction by competitors and worsening market

conditions, but strong unit sales of the new Satera LBP7010C in Japan and Europe pushed total unit sales for the current term past the figure for the previous term.

In the area of large-format inkjet printers, we launched the new imagePROGRAF iPF8300S/6300S, which offers the high image quality needed for graphic arts and greatly improved speed, in February. Efforts to expand sales of all products in this category were not enough to prevent a minor unit sales decline in Europe, but resulted in steady growth in all other regions. A key contributor to this result was the long-selling imagePROGRAF iPF700 series, which enjoys strong market support.

As a result of the above, sales for this business unit decreased by 3.5% on a consolidated basis and by 8.0% on a non-consolidated basis, both in comparison to the previous term.

imagePROGRAF iPF6300S

Large-format inkjet printer that supports large sizes up to A1, capable of handling needs ranging from poster printing to proofing (color proofing) all with the best balance of high speed and high image quality.

Consumer Business Unit

Despite anemic demand growth in Japan, digital SLR cameras continued to enjoy increasing demand at the global level. With the Canon Group having reversed nearly all of the impacts of production losses caused by the earthquake by summer, and sales efforts concentrated on the entry-level EOS KISS X5/X4/X50 and advanced amateur EOS 5D MarkII/7D/60D models, EOS series cumulative production reached 50 million units in September. In and after November, the flooding in Thailand caused some component shortages, but unit sales and revenues both marked solid gains for the term. Interchangeable lens sales also chalked up steady gains, with cumulative production of the EF LENS series reaching 60 million in January and 70 million a scant nine months later in October.

EOS Kiss X5

Entry-level model digital SLR camera equipped with advanced fully automatic Scene Intelligent Auto mode and the Vari-angle Clear View LCD monitor making it possible to shoot from any angle.

Compact digital cameras experienced moderately lower demand in the leading industrialized countries but strong growth in emerging economies. Under such conditions, efforts to boost sales of products like the IXY 210F/410F, PowerShot SX230 HS, and IXY 600F fell short of previous term's results in terms of both unit sales and revenues due to component shortages caused by the earthquake in Japan and the flooding in Thailand.

In the digital video camcorder market, which is in an overall declining trend, we focused our sales efforts on high-definition products like the HFR21/20/200 and HFM41/40/400, for which greater demand is anticipated.

PowerShot S100

Compact camera equipped with F2.0 new-design lens, Canon's original-technology high-sensitivity CMOS sensor and the HS SYSTEM with inclusion of the latest imaging engine DIGIC 5 that achieves staggeringly high image quality. The broadcast equipment market is undergoing its own change as the shift to digital broadcasting in countries throughout the world drives strong demand for high-definition broadcast lenses. Responding to that trend, we have succeeded in selling greater numbers of portable lenses and maintaining our large market share.

Demand for inkjet printers continued to grow in emerging economies, while flattening out in European and other leading industrialized countries, ending the term with performance at the previous term's level globally. Under such circumstances, we strengthened our product line by introducing the PIXUS MG6230, which comes in three colors and is cloud-compatible, and other new products meeting a diverse range of needs and emphasizing ease of use. Combined with efforts to increase sales of all products, even while the effects of the flooding in Thailand and yen appreciation forced sales revenues to decline, we succeeded in producing a year-on-year increase in unit sales. Meanwhile, sales of consumables remained solid. To boost profitability going forward, we took a step toward expanding our business activities by announcing the launch of the DreamLabo 5000, a new product for the commercial photo printer market.

PIXUS MG6230

Wireless LAN compatible inkjet multifunction printer for house hold use equipped with features to suit various lifestyles such as PIXUS Cloud Link, allowing photos and data uploaded to the Internet to be directly printed without a PC and Silent Mode, reducing the bulk of operation noise.

Regarding the image scanner market, which is declining overall, we maintained our No. 1 unit sales share at the global level.

As a result of the above, sales for this business unit decreased by 5.7% on a consolidated basis and by 3.5% on a non-consolidated basis, both in comparison to the previous term.

Industry and Others Business Unit

Supported by strong demand for products like smartphones, active capital investment in NAND flash memory and image sensor production facilities has maintained strong demand for i-line steppers in our semiconductor lithography equipment business, and faster-than-expected recoveries of production facilities from the Great East Japan Earthquake paved the way for significant increases in both unit sales and revenue. In July, we launched our first i-line stepper for back-end manufacturing, the FPA-5510iV, which is made to work with next-generation semiconductor packaging TSV three-dimensional chip layouts.

FPA-5510iV

As for LCD lithography equipment, capital investment in equipment for the small to mid-size LCD panels used in products like smartphones was strong, while investment in equipment used to manufacture large-size panels for products like televisions the equipment at which Canon excels was weak. Both unit sales and revenues, therefore, were down for the term.

Our first i-line stepper for back-end manufacturing that is optimized for 3D mounting, realizing high resolution, high throughput, and high overlay accuracy.

In medical equipment, the CXDI-50 series and CXDI-70C Wireless products led buoyant sales of our mainstay digital radiography systems in the U.S. and Asia, making it possible to end the term with increases in both unit sales and revenues. Meanwhile, in ophthalmic devices, efforts to increase sales of our CR-2 non-mydratic digital retinal camera, our newly introduced TX-20 tonometer, and other products were unsuccessful in boosting unit sales, but, primarily with a large sale in Australia, sales revenues managed to keep pace with previous term.

CXDI-80C Wireless

Compact and highly sensitive digital radiography system, adopting a world-first 11 x 14 cassette-sized wireless system.

Sales for document scanners manufactured by Canon Electronics Inc. also matched the previous term's performance as a decline, due to stagnation in sales of check scanners (Image Scanners specialized for scanning bills and check) to North American financial institutions and other unwelcome developments, was made up for by higher sales in Japan, Europe and other locations.

Sales of organic EL display manufacturing equipment made by Tokki Corporation (company name changed to Canon Tokki Corporation as of January 1, 2012) recorded significant gains from vigorous capital investment by organic EL panel manufacturers.

Die bonders made by Canon Machinery Inc. booked lower sales as semiconductor manufacturers cut back on capital investments, but FA system-related devices, riding the continuation of previous term's strong order activity for facilities related to secondary batteries for automobiles in places like China and South Korea, recorded a significant sales increase.

imageFORMULA DR-M160

High-speed, large-volume document scanner compact enough to be installed on a desk side or counter, possessing reliable paper feeding capability and a robust case.

Sales of the film deposition equipments, made by Canon ANELVA Corporation, for magnetic heads and discs fell, while LED film deposition equipment rose, and semiconductor film deposition equipment maintained the previous term's level.

As a result of the above, sales for this business unit decreased by 2.8% on a consolidated basis and by 23.7% on a non-consolidated basis, both in comparison to the previous term.

(2) Facilities Investment

The investment in facilities during this term totaled 226.9 billion yen (86.8 billion yen by the Company), which are mainly as follows:

(3) Management Perspectives

Summarizing the prospects for the global economy at this time, it appears that a considerable amount of time will be needed for the economic recoveries in the U.S. and European leading countries to pick up speed once again. Meanwhile, emerging economies are expected to continue to grow though at a slightly slower pace. Japan's economy will likely head into a mild recovery driven by reconstruction demand in the wake of the Great East Japan Earthquake.

In the 112th business term, the second year of Phase IV (2011-2015) of our Excellent Global Corporation Plan, we aim to again return to a path of growth, overcoming such challenges as the earthquake and the flooding. Our basic policy for this year is to pursue fundamental reforms, embracing the challenging environment as an opportunity to leap forward. Under this theme, we will construct a solid foundation for growth as a means to accomplish our Phase IV goals.

In order to achieve our targets, we have set and will actively pursue the following eight priority goals.

1. Thoroughly Boost the Competitiveness of Current Core Products

Refine and further accelerate development and design capabilities with the aid of information technologies in order to make possible the planning and timely launch of exceptional products and services that are unmatched by the competition. Focus on the creation of products and services that integrate cloud computing to quickly seize business opportunities in this new era.

2. Successfully Launch and Expand New Businesses

Carve out new business segments through the launch of strategic products such as DreamLabo and the CINEMA EOS SYSTEM. For the practical application of promising new technologies, aim to realize their early commercialization and actively make use of M&A opportunities as needed.

3. Thoroughly Strengthen Sales Capacity in Accordance with Market Characteristics

In leading industrialized countries, expand market shares and increase income by strengthening direct sales, solutions and service businesses of Group companies. In emerging economies, aim to achieve sales growth that exceeds the market growth by putting in place sales approaches and systems tailored to the actual circumstances in each individual economy.

4. Relentlessly Pursue Cost Reductions while Accelerating the Optimization of Global Production

Evolve automated production, in-house production, and other measures taken to date, and explore cost reductions through new concepts and technical innovations. Furthermore, while minimizing transportation costs, strive to position manufacturing bases and allocate production in ways that minimize costs and risks from an overall perspective, taking into account all possible factors including foreign exchange rates, tax policies, workforce, procurement, and logistics.

5. Establish R&D Structure and Cultivate Technologies that will Open Future Possibilities

Establish R&D centers in the U.S. and Europe, and aim to create continuous innovation among these facilities and those in Japan. Also, cultivate basic technologies in the fields of medical and industrial equipment, which we have positioned as core next-generation business domains.

6. Achieve Total Optimization of Company-Wide Business Processes

Thoroughly utilize the Canon Group's integrated IT systems to the greatest extent possible to achieve overall optimization of all business processes such as development, production, sales, and services.

7. Further Instill a Commitment to Quality First

Targeting in the elimination of quality problems by further evolving management approaches to quality defects and working to thoroughly embed quality at an early stage, from the product planning and design phases.

Edgar Filing: CANON INC - Form 6-K

8. Strengthen Foundation as an Excellent Company

Strengthen global management functions, and develop human resources who will lead changes. Promote thorough compliance and execute the Canon Environmental Vision based on the newly drafted Canon Group CSR Activity Policy.

A Committee that manages and oversees this initiative promotes compliance activities to develop law-abiding, independent and strong individuals with a high sense of ethics.
- (ii) Policies and measures set forth by the Committee above are implemented throughout the Company with the assistance of compliance staff assigned to each division.
- (iii) Each division establishes internal rules and guidelines to help ensure that Directors, Executive Officers and employees thoroughly understand the laws and regulations of Japan and other countries.
- (iv) The Company ensures Directors, Executive Officers and employees the implementation of the basic policy that provides not to have any relation with antisocial forces under any circumstances, and also maintains and improves the cooperation structure with external institutions such as police by establishing a department in charge.
- (v) The Company's internal auditing, legal, and other divisions work to strengthen compliance through law-abidance guidance and monitoring on its business activities.
- (vi) An in-house hotline system is employed to promote internal self-checks to prevent illegal or unethical activities and help prevent improprieties.

(2) System for Maintaining and Managing Information Relating to the Performance of Duties by Directors

- (i) Information relating to the performance of duties by Directors is maintained and managed in accordance with the Company's basic rules for document management addressing the creation, sending and receiving, storage, retention, and destruction of documents, and other in-house rules.
- (ii) A system is established that enables Directors, Corporate Auditors, and internal auditing to access this information anytime.

(3) Rules and Other Systems Regarding Management of Risk of Loss

- (i) Important matters are carefully deliberated at the Executive Committee and in other Management Committees on specific action plans to eliminate or reduce business risks.
- (ii) Business processes are specified and risks are evaluated based on guidelines set forth by a committee that oversees financial risk management to ensure the accuracy and reliability of financial reporting. This must be documented in writing, and the status of control activity is regularly confirmed to make risk management effectively work.
- (iii) A risk management system is created through the formulation and observance of various in-house rules to protect the Company from diversifying risks (quality, environmental, disaster, information-related, export management, etc.) and maintain public faith. In particular, Basic Policies Regarding Product Safety has been established, which govern efforts in supplying customers with safe products that will allow comfortable and satisfactory use.
- (iv) Wide-ranging audits of various types and promotion of the in-house hotline system by internal auditing are carried out for the early detection and resolution of risks.

(4) System for Assuring Directors Efficient Execution of Duties

- (i) The Executive Committee and Management Committees are established and important matters are carefully deliberated in advance by Directors, Executive Officers and relevant managers to promote prompt and appropriate decision making by Directors.
- (ii) Based on explanation of management policies in long-term management plans, the Company goals are given concrete shape in medium-term plans, and each division is thoroughly informed of the content of these plans. Furthermore, annual and quarterly short-term plans and monthly budgetary control are used to monitor performance progress, through which the Company makes optimum use of management resources.

(5) System for Ensuring Appropriate Operations of the Corporate Group Comprised of Corporation, its Parent Companies and Subsidiaries

- (i) Based on the Canon Group Code of Conduct, the Company promotes Groupwide compliance and infuses an awareness of compliance and corporate ethics to share as a set of common values for the Group.
- (ii) Policies and measures set forth by the Committee managing and overseeing the Canon Group Code of Conduct are implemented at each Group company by compliance staff assigned to it.
- (iii) The internal auditing, legal, and other divisions enhance compliance by providing guidance and monitoring with regard to the observance of laws in the business activities of all Group companies.
- (iv) The soundness and efficiency of the Group's business activities are ensured through the formulation of Groupwide medium-term plans and deliberations in the Management Committee.

(6) Matters Regarding Employees Who Assist the Duties of Corporate Auditors When Corporate Auditors Request Assignment of Such Employees

- (i) A division is established specifically to assist Corporate Auditors with their duties.
- (ii) Full-time employees of a requisite number are assigned to the division.

(7) Matters Regarding Independence of the Employees in (6) Above From Directors

- (i) The division is an organization independent of the Board of Directors.
- (ii) Changes in the division's personnel require the prior consent of the Board of Corporate Auditors.

(8) System for Directors and Employees to Report to Corporate Auditors and System for Other Types of Reporting to Corporate Auditors

- (i) Directors promptly report to Corporate Auditors matters that may have a significant impact on the Company when such matters emerge or are likely to emerge.
- (ii) Directors, Executive Officers and employees deliver reports periodically to Corporate Auditors regarding matters Directors and the Corporate Auditors have previously agreed upon in consultations.
- (iii) Corporate Auditors attend the Executive Committee and other important meetings.
- (iv) An in-house hotline system is adopted to allow Corporate Auditors to receive information from employees.

(9) Other Systems for Securing the Effectiveness of Auditing by Corporate Auditors

- (i) Corporate Auditors periodically receive reports from accounting auditors.
- (ii) The Company establishes the systems for providing cooperation and allowing field audits of internal divisions and affiliates to be performed efficiently by Corporate Auditors.

Notes to Consolidated Financial Statements

<Notes to Basic Significant Matters Regarding Preparation of Consolidated Financial Statements>

Significant Accounting Policies

1. Group Position

The number of consolidated subsidiaries was 277, and the number of affiliated companies accounted for by the equity method was 11.

2. Basis of Presentation

The consolidated financial statements are prepared in accordance with U.S. generally accepted accounting principles (US GAAP) pursuant to the provision of paragraph 1, Article 120-2 of the Company Accounting Regulations. However, certain disclosures required under US GAAP are omitted pursuant to the same provision.

3. Cash Equivalents

All highly liquid investments acquired with an original maturity of three months or less are considered to be cash equivalents.

4. Translation of Foreign Currencies

Assets and liabilities denominated in foreign currencies are translated at the rate of exchange in effect at the balance sheet date. Exchange differences are charged or credited to income. Assets and liabilities of subsidiaries located outside Japan are translated into Japanese yen at the rates of exchange in effect at the balance sheet date and income and expense items are translated at the average exchange rates prevailing during the year. The resulting translation adjustments are reported in other comprehensive income (loss).

5. Inventories

Inventories are stated at the lower of cost or market value. Cost is determined by the average method for domestic inventories and principally the first-in, first-out method for overseas inventories.

6. Investments

Canon accounts for its debt and marketable equity securities as follows. Held-to-maturity securities are recorded at amortized cost, adjusted for the amortization or accretion of premiums or discounts. Available-for-sale securities are recorded at fair value. Unrealized holding gains and losses, net of the related tax effect, on available-for-sale securities are excluded from earnings and are reported in other comprehensive income (loss) until realized. Realized gains and losses are determined on the average cost method.

7. Property, Plant and Equipment

Property, plant and equipment are depreciated principally by the declining- balance method.

8. Goodwill and Other Intangible Assets

Goodwill and other intangible assets with indefinite useful lives are not amortized, but are instead tested for impairment at least annually in the fourth quarter of each year, or more frequently if indicators of potential impairment exist. Intangible assets with finite useful lives are amortized over the respective estimated useful lives. Software is amortized on a straight-line basis over the period of three to five years. Customer relationships are amortized principally by the declining-balance method over the period of five years.

9. Impairment of Long-Lived Assets

Long-lived assets, such as property, plant and equipment, and acquired intangibles subject to amortization, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. If the carrying amount of the asset exceeds its estimated undiscounted future cash flows, an impairment charge is recognized in the amount by which the carrying amount of the asset exceeds the fair value of the asset.

10. Basis of Recording Allowances

Edgar Filing: CANON INC - Form 6-K

(Allowance for doubtful accounts)

An allowance for doubtful accounts is provided based on credit loss history and an evaluation of any specific doubtful accounts.

(Accrued pension and severance cost)

Pension and severance cost is accrued based on the projected benefit obligations and the fair value of plan assets at the balance sheet date. Unrecognized actuarial loss is recognized by amortizing a portion in excess of a corridor (i.e., 10% of the greater of the projected benefit obligations or the fair value of plan assets) using the straight-line method over the average remaining service period of employees. Unrecognized prior service cost or credit is amortized using the straight-line method over the average remaining service period of employees.

11. Taxes Collected from Customers

Taxes collected from customers and remitted to governmental authorities are excluded from revenues, cost and expenses in consolidated statements of income.

12. Stock-Based Compensation

Canon measures stock-based compensation cost at the grant date, based on the fair value of the award, and recognizes the cost on a straight-line basis over the requisite service period.

13. Net Income Attributable to Canon Inc. Stockholders Per Share

Basic net income attributable to Canon Inc. stockholders per share is computed by dividing net income by the weighted-average number of common shares outstanding during each year. Diluted net income attributable to Canon Inc. stockholders per share includes the effect from potential issuance of common stock based on the assumption that all stock options were exercised.

<Notes to Financial Instruments>

1. Status of Financial Instruments

Canon invests in highly safe and short-term financial instruments.

Canon has certain financial instruments such as trade receivables and securities. Canon reduces the customer credit risk related to trade receivables in accordance with its credit management policy. At December 31, 2011, a major customer accounted for approximately 17% of consolidated trade receivables. Securities consist primarily of equity securities of the companies with which Canon has a business relationship.

Derivative financial instruments are comprised principally of foreign exchange contracts to reduce the risk. Canon does not hold or issue derivative financial instruments for trading and speculative purposes.

2. Fair Value of Financial Instruments

The estimated fair values of Canon's financial instruments as of December 31, 2011 are set forth below. The following summary excludes cash and cash equivalents, trade receivables, finance receivables, noncurrent receivables, short-term loans, trade payables and accrued expenses for which fair values approximate their carrying amounts. The following summary excludes non-marketable equity securities accounted for under the cost method (balance sheet amount 14,583 million yen) as it was not practicable to estimate the fair value of such investments.

	Carrying amount	Estimated fair value	(Millions of yen) Difference
Available-for-sale securities	20,278	20,278	-
Long-term debt, including current portion	(7,070)	(7,053)	17
Foreign exchange contracts:			
Assets	4,718	4,718	-
Liabilities	(2,610)	(2,610)	-

The following methods and assumptions are used to estimate the fair value in the above table.

Available-for-sale securities

Available-for-sale securities are recorded at fair value.

Long-term debt

The fair values of Canon's long-term debt instruments are based on the present value of future cash flows associated with each instrument discounted using current market borrowing rates for similar debt instruments of comparable maturity.

Foreign exchange contracts

The fair values of foreign exchange contracts are measured based on the market price obtained from financial institutions.

<Note to Real Estate for Rent and Others>

There was no significant item.

<Note to Significant Subsequent Event>

On February 2, 2012, the Board of Directors of the Company approved a plan to repurchase up to 16 million shares of the Company's common stock at a cost of up to 50,000 million yen for the period from February 3, 2012 to March 19, 2012. Such repurchases are intended to improve capital efficiency and ensure flexible capital strategy.

Topics

TOPICS 1

Providing Aid to Reopen Fishing Ports in the Tohoku Region

In August, as part of the Signal of Hope Project, a handover ceremony was held to mark the delivery of freight containers for fisheries operations at the Onagawa and Ishinomaki Fish Markets in Miyagi Prefecture.

Through this project, refrigeration containers for frozen fish have been provided to local industry organizations to facilitate the quick resumption of fisheries operations and fishing port functions in the Tohoku region, which suffered damage and loss as a result of the Great East Japan Earthquake. As one of the project's corporate sponsors, Canon contributed a total of 100 million yen including funding for the containers as well as office equipment and other items.

The ceremony was attended by many relevant fisheries people and they expressed their gratitude at the ceremony.

TOPICS 2

School Children Invited to the Musical CATS

In September, Canon and the Shiki Theater Company organized Canon Cats Week at the Canon Cats Theater in Yokohama.

The event was held to commemorate the second anniversary of the opening of the Canon Cats Theater. Its objective was to contribute to nurturing children's sensibilities and enhancing their awareness of the arts, by providing an opportunity for young people to enjoy a professional theater performance. Over the six-day period, a total of 4,255 junior high school students from local schools, including students who had transferred from areas hit by the Great East Japan Earthquake as well as disabled students and their chaperones, were invited to enjoy performances of CATS.

TOPICS 3

Providing Flooding Relief Efforts in Thailand

In November, the Canon Group provided a donation of 50 million yen in total as relief for victims of the Thailand flooding, which occurred due to record-setting heavy rainfall, and support for recovery efforts in the affected regions. In addition, Canon Marketing (Thailand) provided 1,000 sets of emergency relief kits that included food and medical supplies. The kits were distributed free of charge to the afflicted regions such as Ayutthaya and Chai Nat.

TOPICS 4

Supporting Health Checks for Children in Vietnam

In July, as one of their social and cultural support activities, Canon Vietnam conducted the program Health check and Gifts donation for unprivileged children, which provides health checks to children living under severe conditions in Vietnam.

This program has been continuously carried out since 2007, and last year, approximately 800 children received health checks. The children also received daily necessities and educational supplies donated by Canon.

TOPICS 5

Foster Educational Environments in China

In China, the Canon Group endorsed Project Hope, a program that makes schooling possible for children who face difficulties in going to school for economic reasons. Since 1995, the Canon Group has been providing funds to build and start up schools as well as donating office equipment and the like.

In June, the imaging school was opened to provide children with an opportunity to gain experience using cameras.
