

FIRST COMMUNITY BANCSHARES INC /NV/
Form 10-Q/A
September 06, 2012

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 10-Q/A

(Amendment No. 1)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarter ended June 30, 2012

Commission file number 000-19297

FIRST COMMUNITY BANCSHARES, INC.

(Exact name of registrant as specified in its charter)

Edgar Filing: FIRST COMMUNITY BANCSHARES INC /NV/ - Form 10-Q/A

(State or other jurisdiction of incorporation)	(IRS Employer Identification No.)
P.O. Box 989 Bluefield, Virginia (Address of principal executive offices)	24605-0989 (Zip Code)
(276) 326-9000 (Registrant's telephone number, including area code)	

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Class Common Stock, \$1.00 Par Value; 20,008,181 shares outstanding as of August 3, 2012

EXPLANATORY NOTE

We are filing this Amendment No. 1 on Form 10-Q/A to our Quarterly Report on Form 10-Q for the quarter ended June 30, 2012 (the Form 10-Q), which was originally filed with the Securities and Exchange Commission on August 14, 2012, to amend:

Part I, Item 3, Quantitative and Qualitative Disclosures about Market Risk, to correct interest rate sensitivity in regards to the impact on net interest income.

Part II, Item 6, Exhibits, to furnishing the Interactive Data File as Exhibit 101 in accordance with Rule 405 of Regulation S-T. Exhibit 101 to this report furnishes the following items from the Form 10-Q formatted in eXtensible Business Reporting Language (XBRL): (i) Condensed Consolidated Balance Sheets at June 30, 2012 (Unaudited), and December 31, 2011; (ii) Condensed Consolidated Statements of Income (Unaudited) for the three and six months ended June 30, 2012 and 2011; (iii) Condensed Consolidated Statements of Comprehensive Income for the three and six months ended June 30, 2012 and 2011; (iv) Condensed Consolidated Statements of Stockholders' Equity (Unaudited) for the six months ended June 30, 2012 and 2011; (v) Condensed Consolidated Statements of Cash Flows (Unaudited) for the six months ended June 30, 2012 and 2011; and (vi) Notes to the Unaudited Condensed Consolidated Financial Statements. In addition to the Interactive Data File, we have updated the reference to Exhibit 3(i), the Amended and Restated Bylaws of the Company, to the Current Report on Form 8-K dated and filed on August 28, 2012.

No other changes have been made to the Form 10-Q. This Amendment does not reflect events that have occurred after the August 14, 2012 filing date of the Form 10-Q, or modify or update the disclosures presented therein, except to reflect the amendment(s) described above.

PART I. FINANCIAL INFORMATION

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Our profitability is dependent to a large extent upon net interest income, which is the difference between interest income on interest-earning assets, such as loans and securities, and interest expense on interest-bearing liabilities, such as deposits and borrowings. Our Company, like other financial institutions, is subject to interest rate risk to the degree that interest-earning assets reprice differently than interest-bearing liabilities. We manage our mix of assets and liabilities with the goal of limiting exposure to interest rate risk, ensuring adequate liquidity, and coordinating sources and uses of funds while maintaining an acceptable level of net interest income given the current interest rate environment.

Our primary component of operational revenue, net interest income, is subject to variation as a result of changes in interest rate environments in conjunction with unbalanced repricing opportunities on earning assets and interest-bearing liabilities. Interest rate risk has four primary components: repricing risk, basis risk, yield curve risk and option risk. Repricing risk occurs when earning assets and paying liabilities reprice at differing times as interest rates change. Basis risk occurs when the underlying rates on the assets and liabilities the institution holds change at different levels or in varying degrees. Yield curve risk is the risk of adverse consequences as a result of unequal changes in the spread between two or more rates for different maturities for the same instrument. Lastly, option risk is due to embedded options, often put or call options, given or sold to holders of financial instruments.

To mitigate the effect of changes in the general level of interest rates, we manage repricing opportunities and thus, our interest rate sensitivity. We seek to control our interest rate risk exposure to insulate net interest income and net earnings from fluctuations in the general level of interest rates. To measure our exposure to interest rate risk, quarterly simulations of net interest income are performed using financial models that project net interest income through a range of possible interest rate environments including rising, declining, most likely and flat rate scenarios. We use a simulation model that captures all earning assets, interest-bearing liabilities, and off-balance sheet financial instruments and combines the various factors affecting rate sensitivity into an earnings outlook and estimates of the economic value of equity for a range of assumed interest rate scenarios. The results of these simulations indicate the existence and severity of interest rate risk in each of those rate environments based upon the current balance sheet position, assumptions as to changes in the volume and mix of interest-earning assets and interest-paying liabilities and our estimate of yields to be attained in those future rate environments and rates that will be paid on various deposit instruments and borrowings. These assumptions are inherently uncertain and, as a result, the model cannot precisely predict the impact of fluctuations in interest rates on net interest income. Actual results will differ from simulated results due to timing, magnitude, and frequency of interest rate changes, as well as changes in market conditions and our strategies. However, the earnings simulation model is currently the best tool available to us and the industry for managing interest rate risk.

We have established policy limits for tolerance of interest rate risk in various interest rate scenarios. In addition, the policy addresses exposure limits to changes in the economic value of equity according to predefined policy guidelines. The most recent simulation indicates that current exposure to interest rate risk is within our defined policy limits.

The following table summarizes the impact of immediate and sustained rate shocks in the interest rate environment on net interest income and the economic value of equity. The model simulates plus 300 to minus 100 basis point changes from the base case rate simulation and illustrates the prospective effects of hypothetical interest rate changes over a twelve-month time period. This modeling technique, although useful, does not take into account all strategies that management might undertake in response to a sudden and sustained rate shock as depicted. Also, as market conditions vary from those assumed in the sensitivity analysis, actual results will also differ due to prepayment and refinancing levels likely deviating from those assumed, the varying impact of interest rate change caps or floors on adjustable rate assets, the potential effect of changing debt service levels on customers with adjustable rate loans, depositor early withdrawals and product preference changes, and other internal and external variables. As of June 30, 2012, the Federal Open Market Committee maintained a target range for federal funds of 0 to 25 basis points, rendering a complete downward shock of 200 basis points meaningless; accordingly, downward rate scenarios are limited to minus 100 basis points. In the downward rate shocks presented, benchmark interest rates are assumed at levels with floors near 0%.

June 30, 2012				
<i>(Amounts in thousands, except basis points)</i>	Change in		Change in	
Increase (Decrease) in Interest Rates/Basis Points	Net Interest Income	Percent Change	Economic Value of Equity	Percent Change
300	\$ 8,431	9.6	\$ 13,715	3.0
200	5,220	5.9	10,911	2.4
100	2,110	2.4	5,737	1.3
(100)	595	0.7	(15,305)	(3.3)

December 31, 2011				
<i>(Amounts in thousands, except basis points)</i>	Change in Net		Change in Economic	
Increase (Decrease) in Interest Rates/Basis Points	Interest Income	Percent Change	Value of Equity	Percent Change
300	\$ 8,881	13.0	\$ (7,278)	(2.4)
200	6,124	9.0	(1,557)	(0.5)
100	3,355	4.9	1,957	0.7
(100)	(826)	(1.2)	(19,977)	(6.7)

During the next twelve months we have more assets than liabilities projected to reprice. As a result, projected net interest income will increase as benchmark rates increase. If benchmark interest rates decrease further than current levels, projected net interest income will remaining roughly level.

Impact of Inflation and Changing Prices

The consolidated financial statements and notes thereto presented herein have been prepared in accordance with GAAP, which requires the measurement of financial position and operating results in terms of historical dollars without considering the changes in the relative purchasing power of money over time due to inflation. The primary effect of inflation on our operations is reflected in increased operating costs. In management's opinion, interest rates have a greater impact on our consolidated performance than do the effects of general levels of inflation. Interest rates do not necessarily fluctuate in the same direction or to the same extent as the price of goods and services.
