Filed Pursuant to Rule 424(b)(3) and Rule 424(c)

Registration No. 333-178418

Prospectus Supplement No. 2

This prospectus relates to a common stock purchase agreement that we entered into with Aspire Capital Fund, LLC (referred to as Aspire Capital or the selling stockholder) on November 11, 2011 and the potential sale by Aspire Capital of up to 8,000,000 shares of our common stock that may occur over the term of the purchase agreement. Of these 8,000,000 shares, 5,689,937 shares have been previously issued to Aspire Capital and 2,310,063 shares may be issued by us to Aspire Capital at our option pursuant to the terms of the purchase agreement.

If and when Aspire Capital elects to sell our shares that it has previously purchased, we will not receive any proceeds from such sale. However, if and when we elect to sell any of the remaining shares to Aspire Capital pursuant to the purchase agreement, which we may do on a periodic basis, we will receive proceeds from such sale of our common stock.

We update this prospectus from time to time, including in connection with the filing of our financial statements. This prospectus supplement no. 2 is being filed to include the information set forth in our Quarterly Report on Form 10-Q for the quarterly period ended June 30, 2013, which was filed with the Securities and Exchange Commission on August 13, 2013 and which is set forth below. This prospectus supplement no. 2 should read in conjunction with the prospectus dated April 5, 2013.

Our common stock is listed on The NASDAQ Capital Market under the symbol ATHX. On August 9, 2013, the last reported sale price per share of our common stock was \$1.72 per share.

Investing in our common stock involves risk. Please read carefully the section entitled Risk Factors on page 7 of the prospectus.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

Prospectus Supplement No. 2 is August 13, 2013

Table of Contents**Athersys, Inc.****Notes to Unaudited Condensed Consolidated Financial Statements**

Three- and Six-Month Periods Ended June 30, 2013 and 2012

1. Background and Basis of Presentation

We are an international biotechnology company that is focused primarily on the field of regenerative medicine and operate in one business segment. Our operations consist primarily of research and product development activities.

The accompanying unaudited condensed consolidated financial statements should be read in conjunction with the audited financial statements and notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2012. The accompanying financial statements have been prepared in accordance with U.S. generally accepted accounting principles (GAAP) for interim financial information and Article 10 of Regulation S-X. Accordingly, since they are interim statements, the accompanying financial statements do not include all of the information and notes required by GAAP for complete financial statements. The accompanying financial statements reflect all adjustments, consisting of normal recurring adjustments, that are, in the opinion of management, necessary for a fair presentation of financial position and results of operations for the interim periods presented. Interim results are not necessarily indicative of results for a full year.

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Our critical accounting policies, estimates and assumptions are described in Management's Discussion and Analysis of Financial Condition and Results of Operations, which is included below in this Quarterly Report on Form 10-Q.

Certain prior year amounts have been reclassified to conform with current year presentations.

2. Net Loss per Share

Basic and diluted net loss per share have been computed using the weighted-average number of shares of common stock outstanding during the period. The table below reconciles the net loss and the number of shares used to calculate basic and diluted net loss per share for the three months ended June 30, 2013, in thousands.

	Three months ended		Six months ended	
	June 30,		June 30,	
	2013	2012	2013	2012
Numerator Diluted:				
Net loss	(5,946)	(3,713)	(15,334)	(8,049)
Less: income from change in fair value of warrants	(164)			
Net loss used to calculate diluted net loss per share	(6,110)	(3,713)	(15,334)	(8,049)
Denominator Diluted:				
Weighted-average shares outstanding	56,028	29,406	54,744	27,477
Potentially dilutive common shares outstanding:				
Warrants	1,813			
Weighted-average shares used to calculate diluted net loss per share	57,841	29,406	54,744	27,477

Table of Contents

We have outstanding options, restricted stock units and warrants that are not used in the calculation of diluted net loss per share because to do so would be antidilutive. The following instruments were excluded from the calculation of diluted net loss per share because their effects would be antidilutive:

	Three months ended		Six months ended	
	June 30,		June 30,	
	2013	2012	2013	2012
Stock options	5,133,518	4,213,501	5,133,518	4,213,501
Restricted stock units	2,910,093	86,197	2,910,093	86,197
Warrants	1,459,026	5,806,853	5,459,027	5,806,853
Total	9,502,637	10,106,551	13,502,638	10,106,551

3. Fair Value of Financial Instruments*Fair Value Measurements*

We classify the inputs used to measure fair value into the following hierarchy:

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities.

Level 2 Adjusted quoted prices in active markets for similar assets or liabilities, or unadjusted quoted prices for identical or similar assets or liabilities in markets that are not active, or significant inputs other than quoted prices that are observable for the asset or liability.

Level 3 Unobservable inputs for the asset or liability.

The following table provides a summary of the fair values of our assets and liabilities measured at fair value on a recurring basis as of June 30, 2013 (in thousands):

Description	Fair Value Measurements at June 30, 2013 Using			
	Balance as of	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Warrant liabilities	\$ 4,704	\$	\$	\$ 4,704

We review and reassess the fair value hierarchy classifications on a quarterly basis. Changes from one quarter to the next related to the observability of inputs in a fair value measurement may result in a reclassification between fair value hierarchy levels. There were no reclassifications for all periods presented.

The estimated fair value of warrants accounted for as liabilities, representing a level 3 fair value measure, was determined on the issuance date and subsequently marked to market at each financial reporting date. The fair value of the warrants is estimated using a Black-Scholes pricing model using the expected volatility based on the historical volatilities of comparable companies from a representative peer group selected based on industry and market capitalization. The fair value of the warrants issued in March 2012 is determined using probability weighted-average assumptions that give consideration to the exercise price repricing feature that is dependent upon the consummation of future qualified offerings, as defined, and requisite stockholder approval. The following inputs were used at June 30, 2013:

Warrants Issued February 2011	Warrants Issued March 2012
-------------------------------------	-------------------------------

Edgar Filing: ATHERSYS, INC / NEW - Form 424B3

Expected volatility	71.4%	70.9%
Risk-free interest rate	0.66%	0.66%
Expected life (in years)	2.59	3.70
Fair value at June 30, 2013 (in thousands)	\$ 524	\$ 4,180

Table of Contents

A rollforward of fair value measurements using significant unobservable inputs (Level 3) for the warrants is as follows (in thousands):

	Three months ended June 30, 2013		Six months ended June 30, 2013
		Balance January 1, 2013	\$ 2,709
Balance April 1, 2013	\$ 5,272		
Exercise of warrants	(352)	Exercise of warrants	(352)
(Gain) loss included in income from change in fair value of warrants for the period	(216)	Loss (gain) included in expense from change in fair value of warrants for the period	2,347
Balance June 30, 2013	\$ 4,704	Balance June 30, 2013	\$ 4,704

4. Collaborative Arrangements and Revenue Recognition*Pfizer*

In 2009, we entered into a collaboration with Pfizer Inc. (Pfizer) to develop and commercialize our MultiStem[®] product candidate to treat inflammatory bowel disease (IBD) for the worldwide market. Under the terms of the agreement, we received a non-refundable up-front payment from Pfizer and research funding and support through June 2012. In addition, we are eligible to receive milestone payments upon the successful achievement of certain development, regulatory and commercial milestones, for which we evaluated the nature of the events triggering these contingent payments and concluded that these events constituted substantive milestones that will be recognized as revenue in the period in which the underlying triggering event occurs. No significant milestone revenue has been recognized to date.

Pfizer pays us for manufacturing product for clinical development and commercialization purposes. Pfizer has responsibility for development, regulatory and commercialization and will pay us tiered royalties on worldwide commercial sales of MultiStem IBD products. Alternatively, in lieu of royalties and certain commercialization milestones, we may elect to co-develop with Pfizer and the parties will share development and commercialization expenses and profits/losses on an agreed basis beginning at Phase III clinical development.

We evaluated the facts and circumstances of the agreement and determined the Pfizer agreement had multiple deliverables that should be combined into a single unit of accounting. We recognized the license and technology access fee and research and development funding ratably on a straight-line basis over the estimated performance period, which was completed mid-2012, and measured manufacturing revenue beginning upon the culmination of the earnings process and recognized it over the performance period of the bundled unit of accounting.

RTI Biologics, Inc.

In 2010, we entered into an agreement with RTI Biologics, Inc. (RTI) to develop and commercialize biologic implants using our technology for certain orthopedic applications in the bone graft substitutes market. Under the terms of the agreement, we received a \$5.0 million license fee in installments through December 2012.

We are also eligible to receive cash payments upon the successful achievement of certain commercial milestones. We evaluated the nature of the events triggering these contingent payments and concluded that these events are substantive and that revenue will be recognized in the period in which each underlying triggering event occurs. In addition, we will receive tiered royalties on worldwide commercial sales, if any, of implants using our technologies. No milestone or royalty revenue has been recognized to date.

5. Stock-based Compensation

Our equity incentive plans authorize an aggregate of 11,500,000 shares of common stock for awards to employees, directors and consultants, as amended in June 2013. These incentive plans authorize the issuance of equity-based compensation in the form of stock options, stock appreciation rights, restricted stock, restricted stock units, performance shares and units, and other stock-based awards.

Table of Contents

As of June 30, 2013, a total of 3,438,958 shares were available for issuance under our equity incentive plans, and stock options and restricted stock units to purchase an aggregate of 8,043,611 shares of common stock were outstanding. In June 2013, we granted 1,077,928 stock options and 151,964 restricted stock units to our employees and directors pursuant to our annual incentive programs. In the three-month period ended June 30, 2013, we issued 7,612 shares of common stock related to restricted stock units that vested during the period.

In April 2013, our Board of Directors approved arrangements whereby our executive officers agreed to terminate prior incentive agreements in return for one-time grants of restricted stock units and for the ability to receive routine annual grants of equity-based awards. We had established the incentive agreements in 2005, prior to our common stock being publicly traded, in connection with restructuring our internal programs and as a retention and motivation tool, which provided our executives financial participation in the event of certain merger or acquisition or asset sale transactions. In June 2013, 2,700,000 restricted stock units that vest ratably on a quarterly basis over three years were granted to the executive officers in exchange for the termination of their incentive agreements. Also, our executive officers were awarded in June 2013 stock option grants as part of the routine annual awards.

For the three-month period ended June 30, 2013 and 2012, stock-based compensation expense was approximately \$196,000 and \$133,000, respectively. At June 30, 2013, total unrecognized estimated compensation cost related to unvested stock-based awards was approximately \$6,723,000, which is expected to be recognized by the end of 2017 using the straight-line method.

6. Issuance of Common Stock and Warrants

In October 2012, we completed a public offering generating net proceeds of approximately \$18.3 million through the issuance of 19,802,000 shares of common stock at a price of \$1.01 per share. In November 2012, the underwriters exercised in full their right to purchase an additional 2,970,300 shares of common stock, solely to cover over-allotments. The exercise of the full over-allotment option generated an additional \$2.8 million of net proceeds.

In March 2012, we completed a private placement financing generating net proceeds of approximately \$8.1 million through the issuance of 4,347,827 shares of common stock and five-year warrants to purchase 4,347,827 shares of common stock with an exercise price of \$2.07 per share. The securities were sold in multiples of a fixed combination of one share of common stock and a warrant to purchase one share of common stock at an offering price of \$2.07 per fixed combination, and the warrants include price protection in the event we sell stock below the exercise price, as defined. As a result of the October 2012 public offering and in accordance with the terms of the warrants, we sought and obtained stockholder approval in February 2013 to reduce the exercise price of these warrants to \$1.01 per share. In connection with this private placement, our former lenders were entitled to a milestone payment in the amount of \$900,000, of which 75% was settled through the issuance of our common stock at \$1.94 per share to the former lenders at our election.

In November 2011, we entered into an equity purchase agreement, which provides that Aspire Capital Fund, LLC (Aspire Capital) is committed to purchase up to an aggregate of \$20.0 million of shares of our common stock over a two-year term, subject to our election to sell any such shares. Under the agreement, we have the right to sell shares, subject to certain volume limitations and a minimum floor price, at a modest discount to the prevailing market price. As part of the agreement, Aspire Capital made an initial investment of \$1.0 million in us through the purchase of 666,667 shares of our common stock at \$1.50 per share in 2011, and received 266,667 additional shares as compensation for its commitment. In 2012, we sold an additional 800,000 shares to Aspire Capital at an average price of \$1.57 per share. During the quarter ended June 30, 2013, we sold 2,075,000 shares to Aspire Capital at an average price of \$1.85 per share, and during the six-month period ended June 30, 2013, we sold 3,398,305 shares to Aspire Capital at an average price of \$1.73 per share. From its inception through August 1, 2013, we have sold 5,064,972 shares and received aggregate gross proceeds of approximately \$8.4 million under the equity purchase agreement.

As of June 30, 2013, we had the following outstanding warrants to purchase shares of common stock:

Number of Underlying Shares	Exercise Price	Expiration
149,026	\$ 5.00	June 8, 2014
1,310,000	\$ 3.55	February 2, 2016
4,000,001	\$ 1.01	March 14, 2017

5,459,027

Table of Contents

7. Warrant Liabilities

We account for common stock warrants as either liabilities or as equity instruments depending on the specific terms of the warrant agreement. Registered common stock warrants that could require cash settlement are accounted for as liabilities. We classify these warrant liabilities on the consolidated balance sheet as a non-current liability, which is revalued at fair value at each balance sheet date subsequent to the initial issuance. We use the Black-Scholes valuation model to value the warrant liability at its fair value. Changes in the fair market value of the warrant are reflected in the consolidated statement of operations as income (expense) from change in fair value of warrants.

The warrants we issued in both the March 2012 private placement and the February 2011 registered direct offering each contain a provision for net cash settlement in the event that there is a fundamental transaction (e.g., merger, sale of substantially all assets, tender offer, or share exchange). If a fundamental transaction occurs in which the consideration issued consists of all cash or stock in a non-public company, then the warrant holder has the option to receive cash equal to a Black Scholes value of the remaining unexercised portion of the warrant. Further, the March 2012 warrants include price protection in the event we sell stock below the exercise price, as defined, and the exercise price was reduced in February 2013 to \$1.01 per share as a result of the October 2012 public offering.

The warrants have been classified as liabilities, as opposed to equity, due to the potential cash settlement upon the occurrence of certain events as described above, and are recorded at their fair values at each balance sheet date. As of June 30, 2013, we have received proceeds of approximately \$352,000 from the exercise of March 2012 warrants aggregating to 347,826 shares of common stock being issued.

8. Income Taxes

We have net operating loss and research and development tax credit carryforwards that may be used to reduce future taxable income and tax liabilities. Our deferred tax assets have been fully offset by a valuation allowance due to our cumulative losses. As a result of our most recent equity offerings, all of the net operating loss and credit carryforwards have been significantly limited for use under Section 382 of the Internal Revenue Code.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

This discussion and analysis should be read in conjunction with our financial statements and notes thereto included in this Quarterly Report on Form 10-Q and the audited financial statement and notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2012. Operating results are not necessarily indicative of results that may occur in future periods.

Overview and Recent Developments

We are an international biotechnology company that is focused primarily on the field of regenerative medicine. We have established a portfolio of therapeutic product development programs to address significant unmet medical needs in multiple disease areas. We are developing our lead platform product, MultiStem[®], a patented and proprietary allogeneic stem cell product that has been evaluated in two completed Phase I clinical trials and is currently being evaluated in two ongoing Phase II clinical trials. Our current clinical development programs are focused on treating inflammatory and immune disorders, neurological conditions, cardiovascular disease, and other conditions. We are also applying our pharmaceutical discovery capabilities to identify and develop small molecule compounds with potential applications in indications such as obesity, related metabolic conditions and certain neurological conditions. These represent major areas of clinical need, as well as substantial commercial opportunities.

Current Programs

By applying our proprietary MultiStem cell therapy product, we have established therapeutic product development programs treating inflammatory and immune disorders, neurological conditions, cardiovascular disease, and other conditions. To date, we have advanced five programs to the clinical development stage, including the following:

Inflammatory Bowel Disease: MultiStem is being evaluated in an ongoing Phase II clinical study involving administration of MultiStem to patients suffering from ulcerative colitis (UC), the most common form of IBD. This study is being conducted with our partner, Pfizer, in UC patients who have an inadequate response or are refractory to current treatment. It is a double blind, placebo controlled trial designed to include up to 126 patients and began enrolling in 2011. Enrollment is ongoing and initial results are expected in early 2014.

Ischemic Stroke: In an ongoing Phase II clinical study, we are evaluating the administration of MultiStem to patients who have suffered an ischemic stroke. In contrast to treatment with thrombolytics, which must be administered within 3 to 4 hours after a stroke, we are treating patients one to two days after the stroke has occurred. In preclinical studies, administration of a single dose of MultiStem, even several days after a stroke, resulted in significant and durable improvements. This double blind, placebo-controlled trial is being conducted at leading stroke centers across the United States and may include sites in Europe. The study is expected to enroll approximately 136 patients. We completed the first patient cohorts, and the independent safety monitoring committee found in 2012 that MultiStem was safe and well tolerated at both of the doses evaluated. Patient enrollment is ongoing and for the remainder of the trial, patients are being randomized to receive either high dose MultiStem or placebo. We anticipate having initial results for the study in the first half of 2014.

Acute Myocardial Infarction: We have evaluated the administration of MultiStem in a Phase I clinical study to patients who have suffered an acute myocardial infarction (AMI). In 2010, we announced preliminary results for this study, demonstrating a favorable safety profile and encouraging signs of improvement in heart function among patients that exhibited severely compromised heart function prior to treatment. This data was published in a leading peer reviewed scientific journal in 2012. One-year follow-up data suggested that the benefit observed was sustained over time. We have completed preliminary planning for a Phase II trial and plan to initiate a trial in 2014 with funding of up to \$2.8 million from a federal grant in support of the study.

Hematopoietic Stem Cell Transplant / GvHD: We completed a Phase I clinical study of the administration of MultiStem to patients suffering from leukemia or certain other blood-borne cancers in which patients undergo radiation therapy and then receive a hematopoietic stem cell (HSC) transplant. Such patients are at significant risk for serious complications, including graft-versus-host disease (GvHD), an imbalance of immune system function caused by transplanted immune cells that attack various tissues and organs in the patient. In 2011 and in 2012, we released data from the study, which demonstrated the safety of MultiStem in this indication and suggested that MultiStem may have a beneficial effect in reducing the incidence and severity of GvHD, as well as providing other benefits. This program has been assigned orphan drug designation from the FDA, which provides us with seven years of market exclusivity upon approval and certain other benefits. We have met with the FDA and received feedback regarding our proposed plans for the next phase of clinical development in this area, and are finalizing the study design. Based on current plans, we are preparing to be ready to start this study in 2014, but the initiation will depend on the progress in our other clinical trials and the achievement of certain business development and financial objectives.

Table of Contents

We are also collaborating with a leading transplant group at the University of Regensburg in Germany that has recently obtained authorization to initiate an institutional sponsored clinical trial exploring the administration of MultiStem in patients following a liver transplant. We plan to provide some financial support for this investigator-sponsored Phase I study and provide the product to conduct the trial.

In addition to our current and anticipated clinical development activities, we are engaged in preclinical development and evaluation of MultiStem in other inflammatory and immune, neurological and cardiovascular disease areas, as well as certain other indications. We conduct such work both through our own internal research efforts and through a broad network of collaborations we have established with investigators at leading research institutions across the United States and in Europe.

We are in discussions with third parties about collaborating in the development of MultiStem for certain programs and may enter into one or more business partnerships to advance these programs.

We have also collaborated with RTI on the development of products for certain orthopedic applications in the bone graft substitutes market using our stem cell technologies, and have received \$5.0 million in license fees. We will also receive royalty revenue from product sales should they occur, as well as potential additional milestone payments.

We are also engaged in the development of novel small molecule therapies to treat obesity and other conditions, such as schizophrenia. Currently, we are focused on the development of potent, highly selective compounds that act through stimulation of a specific receptor in the brain, the 5HT_{2c} serotonin receptor. We are conducting preclinical evaluation of novel compounds that we have developed that exhibit favorable attributes, including outstanding receptor selectivity, as well as greater potency and activity than other 5HT_{2c} agonists. We have also demonstrated our compounds are complementary with other agents and believe these compounds could achieve best in class weight loss, as well as a superior safety and tolerability profile. Furthermore, we have evaluated certain compounds in preclinical models of schizophrenia that exhibit an attractive selectivity profile and also observed that these compounds exhibit potent effects. We may elect to enter into a partnership to advance the development of our 5HT_{2c} agonist program, either for the treatment of obesity, schizophrenia, or both indications.

Financial

We have incurred losses since inception of operations in 1995 and had an accumulated deficit of \$249 million at June 30, 2013. Our losses have resulted principally from costs incurred in research and development, clinical and preclinical product development, acquisition and licensing costs, and general and administrative costs associated with our operations. We have used the financing proceeds from equity and debt offerings and other sources of capital to develop our technologies, to discover and develop therapeutic product candidates, to develop business collaborations and to acquire certain technologies and assets.

In August 2013, we were awarded a federal grant that is expected to provide up to \$2.8 million in support for a Phase II clinical study evaluating the administration of MultiStem to patients who have suffered an AMI.

As of June 30, 2013, we have received proceeds of approximately \$352,000 from the exercise of March 2012 warrants aggregating 347,826 shares of common stock.

In November 2011, we entered into an equity purchase agreement, which provides that Aspire Capital is committed to purchase up to an aggregate of \$20.0 million of shares of our common stock over a two-year term, subject to our election to sell any such shares. Under the agreement, we have the right to sell shares, subject to certain volume limitations and a minimum floor price, at a modest discount to the prevailing market price. As part of the agreement, Aspire Capital made an initial investment of \$1.0 million in us through the purchase of 666,667 shares of our common stock at \$1.50 per share in 2011, and received 266,667 additional shares as compensation for its commitment. In 2012, we sold an additional 800,000 shares to Aspire Capital at an average price of \$1.57 per share. During the quarter ended June 30, 2013, we sold 2,075,000 shares to Aspire Capital at an average price of \$1.85 per share, and during the six-month period ended June 30, 2013, we sold 3,398,305 shares to Aspire Capital at an average price of \$1.73 per share. From its inception through August 1, 2013, we have issued 5,064,972 shares and received aggregate gross proceeds of approximately \$8.4 million under the equity purchase agreement.

Table of Contents**Results of Operations**

Since our inception, our revenues have consisted of license fees, contract revenues and milestone payments from our collaborators, and grant proceeds primarily from federal, state and foundation grants. We have derived no revenue from the commercial sale of therapeutic products to date. Research and development expenses consist primarily of external clinical and preclinical study fees, manufacturing costs, salaries and related personnel costs, legal expenses resulting from intellectual property prosecution processes, facility costs, and laboratory supply and reagent costs. We expense research and development costs as they are incurred. We expect to continue to make significant investments in research and development to enhance our technologies, advance clinical trials of our product candidates, expand our regulatory affairs and product development capabilities, conduct preclinical studies of our product and manufacture our product candidates. General and administrative expenses consist primarily of salaries and related personnel costs, professional fees and other corporate expenses. We expect to continue to incur substantial losses through at least the next several years.

The following tables set forth our revenues and expenses for the periods indicated and amounts are stated in thousands.

Revenues

	Three months ended		Six months ended	
	June 30,		June 30,	
	2013	2012	2013	2012
Contract revenue	\$ 194	\$ 2,270	\$ 278	\$ 4,733
Grant revenue	377	387	619	671
	\$ 571	\$ 2,657	\$ 897	\$ 5,404

	\$ 1,555	\$ 1,162	\$ 3,062	\$ 2,421

Three Months Ended June 30, 2013 and 2012

Revenues. Revenues decreased to \$0.6 million for the three months ended June 30, 2013 from \$2.7 million in the comparable period in 2012, reflecting a \$2.0 million decrease in our Pfizer contract revenues. Our 2012 contract revenues included the amortization of Pfizer payments, including a \$6.0 million non-refundable up-front license fee, research and development funding, and payments for manufacturing services over the estimated performance period that ended in June 2012. Absent any new collaborations, we expect our contract revenues to continue in 2013 at a reduced level from 2012, and to be comprised of reimbursements from Pfizer for outsourced central processing costs for the clinical product, potential RTI royalty payments, and potential license and milestone payments from Bristol-Myers Squibb. Grant revenue remained consistent at \$0.4 million for the three months ended June 30, 2013 and 2012. Our grant revenues may fluctuate from period to period based on the timing of grant-related activities and the award of new grants, such as the federal grant that was awarded in August 2013 in support of our AMI program.

Research and Development Expenses. Research and development expenses increased to \$5.1 million for the three months ended June 30, 2013 from \$5.0 million in the comparable period in 2012. The increase related primarily to an increase in patent legal fees of \$193,000 and an increase in personnel costs of \$160,000 for the quarter ended June 30, 2013 from the comparable 2012 period. These increases were partially offset by a decrease in clinical and preclinical development costs of \$145,000 and a decrease in sponsored research costs of \$154,000 during the period. The increase in patent legal costs resulted from increased patent prosecution costs during the period. The increase in personnel costs related to the addition over the past twelve months of personnel supporting our preclinical and clinical programs and annual merit increases in salaries. The decrease in clinical and preclinical development costs for the three months ended June 30, 2013 related to costs associated with our MultiStem clinical trials, including contract research organization costs and clinical manufacturing costs. Sponsored research costs decreased primarily due to a decrease in grant-funded programs that require collaboration with certain academic research institutions. Our annual research and development expenses are not expected to increase significantly through 2013 as compared to 2012 unless we receive proceeds from additional financing or business development activities to fund advancement of additional clinical programs. Other than external expenses for our clinical and preclinical programs, we do not track our research expenses by project; rather, we track such expenses by the type of cost

incurred.

Table of Contents

General and Administrative Expenses. General and administrative expenses increased to \$1.6 million for the three months ended June 30, 2013 from \$1.2 million in the comparable period in 2012. The \$0.4 million increase was due primarily to an increase in other general and administrative costs of \$257,000 related to advisory and other external service providers, an increase of \$72,000 in legal and professional fees, and an increase in personnel costs of \$58,000 for the three months ended June 30, 2013 from the comparable period in 2012. We expect our general and administrative expenses to continue at similar levels as 2012 for the remainder of 2013.

Depreciation. Depreciation expense increased to \$86,000 for the three months ended June 30, 2013 from \$80,000 in the comparable period in 2012 due to depreciation on new capital purchases.

Other Income (Expense), net. Other income (expense), net, for the three month period ended June 30, 2013 and 2012 was income of \$15,000 and expense of \$5,000, respectively, representing a combination of interest income and expense, foreign currency gains and losses, and any realized gains and losses on the sale of our assets.

Income (Expense) from Change in Fair Value of Warrants. Income of \$216,000 was recognized during the three months ended June 30, 2013 for the market value change in our warrant liabilities, and expense of \$96,000 was recognized during the three months ended June 30, 2012.

Six Months Ended June 30, 2013 and 2012

Revenues. Revenues decreased to \$0.9 million for the six months ended June 30, 2013 from \$5.4 million in the comparable period in 2012, reflecting, in part, a \$3.9 million decrease in our Pfizer contract revenues. Our 2012 contract revenues included the amortization of Pfizer payments, including a \$6.0 million non-refundable up-front license fee, research and development funding, and payments for manufacturing services over the estimated performance period that ended in June 2012. Absent any new collaboration, we expect our contract revenues to continue in 2013 at a reduced level from 2012, and to be comprised of reimbursements from Pfizer for outsourced central processing costs for the clinical product, potential RTI royalty payments, and potential license and milestone payments from Bristol-Myers Squibb. Grant revenue remained relatively consistent during the six month periods ended June 30, 2013 and 2012. Our grant revenues may fluctuate from period to period based on the timing of grant-related activities and the award of new grants.

Research and Development Expenses. Research and development expenses increased to \$10.7 million for the six months ended June 30, 2013 from \$10.6 million in the comparable period in 2012. The increase of \$87,000 related primarily to an increase in patent legal fees of \$222,000, an increase in personnel costs of \$128,000 and an increase in research supplies of \$83,000 during the six months ended June 30, 2013 compared to the 2012 period. These increases were partially offset by a decrease in clinical and preclinical development costs of \$228,000 and a decrease in sponsored research costs of \$174,000. The increase in patent legal costs resulted from increased patent prosecution costs during the period. The increase in personnel costs related to the addition over the past twelve months of personnel supporting our preclinical and clinical programs and annual merit increases in salaries. The decrease in clinical and preclinical development costs for the six months ended June 30, 2013 related primarily to costs associated with our MultiStem clinical trials, including contract research organization costs and clinical manufacturing costs. Sponsored research costs decreased primarily due to a decrease in grant-funded programs that require collaboration with certain academic research institutions. Our annual research and development expenses are not expected to increase significantly through 2013 as compared to 2012 unless we receive proceeds from additional financing or business development activities to fund advancement of additional clinical programs. Other than external expenses for our clinical and preclinical programs, we do not track our research expenses by project; rather, we track such expenses by the type of cost incurred.

General and Administrative Expenses. General and administrative expenses increased to \$3.1 million for the six months ended June 30, 2013 from \$2.4 million in the comparable period in 2012. The \$0.7 million increase was due primarily to an increase in other general and administrative costs of \$367,000 related to advisory and other external service providers, an increase in legal and professional fees of \$198,000 and an increase of \$94,000 in personnel costs for the six months ended June 30, 2013 from the comparable period in 2012. We expect our general and administrative expenses to continue at similar levels as 2012 for the remainder of 2013.

Table of Contents

Depreciation. Depreciation expense increased to \$171,000 for the six months ended June 30, 2013 from \$155,000 in the comparable period in 2012 due to depreciation on new capital purchases.

Other Income (Expense), net. Other income (expense), net, includes interest income and expense, foreign currency gains and losses, realized gains and losses on the sale of our assets, and cash and stock-based milestone payments (which aggregated \$952,000 in the six month period ended June 30, 2012) paid to our former lenders in connection with our equity offerings. Also, in the six-month period ended June 30, 2012, we recognized a gain of \$183,000 related to an equity-method investment that was liquidated in the period.

Income (Expense) from Change in Fair Value of Warrants. Expense of \$2.3 million was recognized during the six months ended June 30, 2013 for the market value change in our warrant liabilities, and income of \$479,000 was recognized during the six months ended June 30, 2012.

Liquidity and Capital Resources

Our sources of liquidity include our cash balances and any available-for-sale securities on hand. At June 30, 2013, we had \$18.9 million in cash and cash equivalents and no available-for-sale securities. We have primarily financed our operations through business collaborations, grant funding and equity financings. We conduct all of our operations through our subsidiary, ABT Holding Company. Consequently, our ability to fund our operations depends on ABT Holding Company's financial condition and its ability to make dividend payments or other cash distributions to us. There are no restrictions such as government regulations or material contractual arrangements that restrict the ability of ABT Holding Company to make dividend and other payments to us.

In October 2012, we completed a public offering generating net proceeds of approximately \$18.3 million through the issuance of 19,802,000 shares of common stock at a price of \$1.01 per share. In November 2012, the underwriters exercised in full their right to purchase an additional 2,970,300 shares of common stock, solely to cover over-allotments. The exercise of the full over-allotment option generated an additional \$2.8 million of net proceeds.

In March 2012, we completed a private placement financing generating net proceeds of approximately \$8.1 million through the issuance of 4,347,827 shares of common stock and five-year warrants to purchase 4,347,827 shares of common stock with an exercise price of \$2.07 per share. The securities were sold in multiples of a fixed combination of one share of common stock and a warrant to purchase one share of common stock at an offering price of \$2.07 per fixed combination. The warrants have anti-dilution price protection, subject to certain exceptions. As a result of the October 2012 public offering and in accordance with the terms of the warrants, we sought and obtained stockholder approval in February 2013 to reduce the exercise price of these warrants to \$1.01 per share. As of June 30, 2013, we have received proceeds of approximately \$352,000 from the exercise of March 2012 warrants aggregating 347,826 shares of common stock.

We entered into an equity purchase agreement in 2011, which provides that Aspire Capital is committed to purchase up to an aggregate of \$20.0 million of shares of our common stock over a two-year term, subject to our election to sell any such shares. Under the agreement, we have the right to sell shares, subject to certain volume limitations and a minimum floor price, at a modest discount to the prevailing market price. As part of the agreement, Aspire Capital made an initial investment of \$1.0 million in us through the purchase of 666,667 shares of our common stock at \$1.50 per share in 2011, and received 266,667 additional shares as compensation for its commitment. In 2012, we sold an additional 800,000 shares to Aspire Capital at an average price of \$1.57 per share. During the quarter ended June 30, 2013, we sold 2,075,000 shares to Aspire Capital at an average price of \$1.85 per share, and during the six-month period ended June 30, 2013, we sold 3,398,305 shares to Aspire Capital at an average price of \$1.73 per share. From its inception through August 1, 2013, we have issued 5,064,972 shares and received aggregate gross proceeds of approximately \$8.4 million under the equity purchase agreement.

In connection with our equity offerings, our former lenders were entitled to milestone payments until the remaining balance of an original \$2.25 million milestone was paid in cash and stock. We made cash and stock-based milestone payments of \$1.3 million to our former lenders during the year ended December 31, 2012, which settled the final balance of this contingent obligation, paying 75% of the milestone through the issuance of our common stock. The former lenders also received in 2007 seven-year warrants to purchase 149,026 shares of common stock with an exercise price of \$5.00. The exercise of such warrants could provide us with cash proceeds. None of these warrants were exercised as of June 30, 2013.

Table of Contents

Under the terms of our agreement with Pfizer, we are eligible to receive milestone payments of up to \$105 million upon the successful achievement of certain development, regulatory and commercial milestones, though there can be no assurance that we will achieve any milestones. No significant milestone payments have been received as of June 30, 2013. Pfizer pays us for manufacturing product for clinical development and commercialization purposes. Pfizer has responsibility for development, regulatory and commercialization and will pay us tiered royalties on worldwide commercial sales of MultiStem IBD products. Alternatively, in lieu of royalties and certain commercialization milestones, we may elect to co-develop with Pfizer and the parties will share development and commercialization expenses and profits/losses on an agreed basis beginning at Phase III clinical development.

Under the terms of our RTI agreement, we are eligible to receive cash payments upon the successful achievement of certain commercial milestones, though there can be no assurance that such milestones will be achieved, and no milestone payments have been received as of June 30, 2013. In addition, we will receive tiered royalties on any worldwide commercial sales of implants using our technologies.

We remain entitled to receive license fees for targets that were delivered to Bristol-Myers Squibb under our completed 2001 collaboration, as well as milestone payments and royalties on compounds developed by Bristol-Myers Squibb using our technology, though there can be no assurance that we will achieve any such milestones or royalties.

In April 2012, we entered into an arrangement with the Global Cardiovascular Innovation Center and the Cleveland Clinic Foundation in which we are entitled to proceeds of up to \$500,000 in the form of a forgivable loan to fund certain remaining preclinical work using MultiStem to treat congestive heart failure and for preparing the program for an investigational new drug application, or IND, with the FDA. Interest on the loan accrues at a fixed rate of 4.25% per annum, and is added to the outstanding principal. The loan will be forgiven based on the achievement of a certain milestone, unrelated to the preclinical work, within three to four years. As of June 30, 2013, we had drawn \$166,000 of this financing.

We will require substantial additional funding in order to continue our research and product development programs, including preclinical evaluation and clinical trials of our product candidates. At June 30, 2013, we had available cash and cash equivalents of \$18.9 million. As a result, we intend to meet our short-term liquidity needs with available cash. Over the longer term, we will make use of available cash, but will have to generate additional funding to meet our needs. We are actively exploring business development opportunities for certain of our MultiStem programs and our small molecule 5HT_{2c} program, as well as grant-funding opportunities. Additionally, we are raising capital from time to time through the equity purchase agreement with Aspire Capital, subject to its volume and price limitations. We also manage our cash by deferring certain discretionary costs and staging certain development costs to extend our operational runway, as needed. Over time, we may consider the sale of additional equity securities, or possibly borrowing from financing institutions.

Our capital requirements over time depend on a number of factors, including progress in our clinical development programs, our clinical and preclinical pipeline of additional opportunities and their stage of development, additional external costs such as payments to contract research organizations and contract manufacturing organizations, additional personnel costs, and the costs in filing and prosecuting patent applications and enforcing patent claims. The availability of funds impacts our ability to advance multiple clinical programs concurrently, and any shortfall in funding could result in our having to delay or curtail research and development efforts. Further, these requirements may change at any time due to technological advances, business development activity or competition from other companies. We cannot assure you that adequate funding will be available to us or, if available, that it will be available on acceptable terms.

We expect to continue to incur substantial losses through at least the next several years and may incur losses in subsequent periods. The amount and timing of our future losses are highly uncertain. Our ability to achieve and thereafter sustain profitability will be dependent upon, among other things, successfully developing, commercializing and obtaining regulatory approval or clearances for our technologies and products resulting from these technologies.

Table of Contents

Cash Flow Analysis

Net cash used in operating activities was \$12.5 million for the six months ended June 30, 2013 and \$10.4 million for the six months ended June 30, 2012, representing the use of cash to fund operations, clinical trials, and preclinical and process development activities. Net cash used in operating activities has fluctuated significantly over the past several quarters primarily due to the decline in contract revenues and the timing of the payment of clinical trial and process development costs. Our collaboration with Pfizer provided revenues over a performance period that ended in June 2012. We anticipate that net cash used in operating activities will continue at similar levels for the remaining quarters of 2013.

Net cash used in investing activities was \$0.3 million for the six months ended June 30, 2013, and net cash provided by investing activities was \$4.0 million for the six months ended June 30, 2012. The fluctuations from period to period were due primarily to the maturity dates of investments. Purchases of equipment were \$273,000 and \$237,000 for the six month periods ended June 30, 2013 and 2012, respectively. We anticipate that our overall capital equipment expenditures will be similar in 2013 compared to 2012.

Net cash provided from financing activities was \$6.2 million for the six months ended June 30, 2013 and \$8.5 million for the six months ended June 30, 2012 primarily as a result of our equity offerings during each of those periods and the use of the Aspire Capital equity purchase agreement.

Investors in our March 2012 private placement received five-year warrants to purchase an aggregate of 4,347,827 shares of common stock with an exercise price of \$1.01 per share, as adjusted, and investors in our February 2011 registered direct offering received five-year warrants to purchase an aggregate of 1,310,000 shares of common stock with an exercise price of \$3.55 per share. The exercise of such warrants could provide us with cash proceeds. As of June 30, 2013, we have received proceeds of approximately \$352,000 from the exercise of March 2012 warrants aggregating in the issuance of 347,826 shares of common stock.

We have no off-balance sheet arrangements.

Critical Accounting Policies and Management Estimates

The SEC defines critical accounting policies as those that are, in management's view, important to the portrayal of our financial condition and results of operations and demanding of management's judgment. Our discussion and analysis of financial condition and results of operations are based on our consolidated financial statements, which have been prepared in accordance with U.S. generally accepted accounting principles, or GAAP. The preparation of these financial statements requires us to make estimates on experience and on various assumptions that we believe are reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from those estimates. A description of these accounting policies and estimates is included in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations in our Annual Report on Form 10-K for the year ended December 31, 2012. There have been no material changes in our accounting policies and estimates as described in our Annual Report. For additional information regarding our accounting policies, see Note B to the Consolidated Financial Statements in our Annual Report on Form 10-K for the year ended December 31, 2012.

Cautionary Note on Forward-Looking Statements

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 that involve risks and uncertainties. These forward-looking statements relate to, among other things, the expected timetable for development of our product candidates, our growth strategy, and our future financial performance, including our operations, economic performance, financial condition, prospects, and other future events. We have attempted to identify forward-looking statements by using such words as anticipates, believes, can, continue, could, estimates, expects, intends, may, plans, potential, should, will, or may. These forward-looking statements are only predictions and are largely based on our current expectations. These forward-looking statements appear in a number of places in this Quarterly Report on Form 10-Q.

In addition, a number of known and unknown risks, uncertainties, and other factors could affect the accuracy of these statements. Some of the more significant known risks that we face are the risks and uncertainties inherent in the process of discovering, developing, and commercializing products that are safe and effective for use as human therapeutics, including the uncertainty regarding market acceptance of our product candidates and our ability to generate revenues. These risks may cause our actual results, levels of activity, performance, or achievements to differ materially from any future results, levels of activity, performance, or achievements expressed or implied by these forward-looking statements.

Table of Contents

Other important factors to consider in evaluating our forward-looking statements include:

uncertainty regarding market acceptance of our product candidates and our ability to generate revenues, including MultiStem for the treatment of IBD, AML, stroke and other disease indications, and the prevention of GvHD;

our ability to raise capital to fund our operations;

final results from our MultiStem clinical trials;

the possibility of delays in, adverse results of, and excessive costs of the development process;

our ability to successfully initiate and complete clinical trials and obtain all necessary regulatory approvals to commercialize our product candidates;

changes in external market factors;

changes in our industry's overall performance;

changes in our business strategy;

our ability to protect our intellectual property portfolio;

our possible inability to realize commercially valuable discoveries in our collaborations with pharmaceutical and other biotechnology companies;

our ability to meet milestones under our collaboration agreements;

our collaborators' ability to continue to fulfill their obligations under the terms of our collaboration agreement;

the success of our efforts to enter into new strategic partnerships and advance our programs;

our possible inability to execute our strategy due to changes in our industry or the economy generally;

changes in productivity and reliability of suppliers; and

the success of our competitors and the emergence of new competitors.

Although we currently believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee our future results, levels of activity or performance. We undertake no obligation to publicly update forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law. You are advised, however, to consult any further disclosures we make on related subjects in our reports on Forms 10-Q, 8-K and 10-K furnished to the SEC. You should understand that it is not possible to predict or identify all risk factors. Consequently, you should not consider any such list to be a complete set of all potential risks or uncertainties.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

Interest Rate Risk

Our exposure to interest rate risk is related to our investment portfolio and our borrowings. Fixed rate investments and borrowings may have their fair market value adversely impacted from changes in interest rates. Due in part to these factors, our future investment income may fall short of expectations. Further, we may suffer losses in investment principal if we are forced to sell securities that have declined in market value due to changes in interest rates. We invest our excess cash primarily in debt instruments of the United States government and its agencies and corporate debt securities, and as of June 30, 2013, we had no investments. When we invest, we have been investing conservatively due to the current economic conditions and have prioritized liquidity and the preservation of principal in lieu of potentially higher returns. As a result, we have experienced no losses on the principal of our investments.

We enter into loan arrangements with financial institutions when needed and when available to us. At June 30, 2013, we had no borrowings outstanding other than a \$166,000 forgivable note payable associated with local grant funding bearing fixed, forgivable interest of 4.25% per annum.

Item 4. Controls and Procedures.

Disclosure controls and procedures

Our management, under the supervision of and with the participation of our Chief Executive Officer and our Vice President of Finance, has evaluated the effectiveness of our disclosure controls and procedures, as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934, as of the end of the period covered by this quarterly report on Form 10-Q. Based upon this evaluation, our Chief Executive Officer and Vice President of Finance have concluded that, as of the end of the period covered by this quarterly report on Form 10-Q, our disclosure controls and procedures were effective.

Changes in internal control over financial reporting

During the second quarter of 2013, there has been no change in our internal control over financial reporting (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934) that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents**PART II. OTHER INFORMATION****Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**

During the quarter ended June 30, 2013, we sold an aggregate of 2,075,000 shares of common stock to Aspire Capital at an average purchase price of \$1.85 per share. Each issuance of these unregistered shares qualifies as an exempt transaction pursuant to Section 4(2) of the Securities Act of 1933. Each issuance qualified for exemption under Section 4(2) of the Securities Act of 1933 because none involved a public offering. Each offering was not a public offering due to the number of persons involved, the manner of the issuance and the number of securities issued. In addition, in each case Aspire Capital had the necessary investment intent.

Item 6. Exhibits.

Exhibit No.	Description
3.1	Certificate of Incorporation of Athersys, Inc., as amended as of June 28, 2013
10.1	Athersys, Inc. Amended and Restated 2007 Long-Term Incentive Plan (Amended and Restated Effective June 18, 2013) (incorporated herein by reference to Exhibit 10.1 to the registrant's Current Report on Form 8-K (Commission No. 000-52108) filed with the Commission on June 18, 2013)
10.2	Form of Amendment No. 2 to Incentive Agreement by and between Advanced Biotherapeutics, Inc. and Athersys, Inc.'s named executive officers, and acknowledged by Athersys, Inc. and ReGenesys, LLC (incorporated herein by reference to Exhibit 10.1 to the registrant's Current Report on Form 8-K (Commission No. 000-52108) filed with the Commission on June 20, 2013)
10.3	Form of Restricted Stock Unit Agreement (incorporated herein by reference to Exhibit 10.2 to the registrant's Current Report on Form 8-K (Commission No. 000-52108) filed with the Commission on June 20, 2013)
31.1	Certification of Gil Van Bokkelen, Chairman and Chief Executive Officer, pursuant to SEC Rules 13a-14(a) and 15d-14(a) adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
31.2	Certification of Laura K. Campbell, Vice President of Finance, pursuant to SEC Rules 13a-14(a) and 15d-14(a) adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
