Table of Contents

FINANCIAL HIGHLIGHTS

Fulfilment of 2015 operating guidance, upgraded in July 2015.

Commercial activity intensified, improving the competitive position in key markets and high-value services.

- g Strong year-on-year organic growth of fibre customers (+30%), Pay TV (+12%), Smartphones (+29%) and LTE (3.0x, reported).
- g Significant improvement in customer base value, with revenue per access growing (+1.9% vs. 2014) and a churn improvement across the board in high-value services.

Revenues increased by 4.0% organically (+8.7% reported) to 47,219 million euros in 2015.

- g Mobile data revenues improvement (+16.9% year-on-year organic in 2015; +18.7% in the quarter), underpinned by non-SMS data growth (+25.3% in 2015; +27.8% in the quarter).
- g Revenues in October-December totalled 11,881 million euros and grew 3.3% year-on-year organic

OIBDA growth improved in 2015 (+3.6% organic) to 11,414 million euros; 14,926 million euros underlying (-1.5%).

- g OIBDA in the fourth quarter (401 million euros) was affected by various non-recurrent factors:
 - g i) Provision for restructuring expenses (-3,122 million euros in total; -2,896 in T. España, -190 in Other Companies, -29 in T. Hispanoamérica and -7 in T. Deutschland); ii) provision for Telefónica Foundation to meet its financing needs for the following years (-325 million); iii) provision for the optimisation of the distribution network in Spain (-30 million); iv) valuation adjustments of companies (-23 million).
 - g And other factors that had a positive impact: i) final agreement related to the purchase price of E-plus (+102 million euros); ii) outcome of the spectrum swap in Mexico (+79 million); iii)

expiration of an account payable in Brazil (+98 million); iv) capital gains due to the sale of real estate assets in T. España (+22 million); v) tower sales in Latin America (+18 million).

- g OIBDA in the quarter grew by 3.8% organic year-on-year driven by T. Deutschland and T. Brasil.
- g Organic OIBDA margin in October-December stood at 32.2% (+0.2 percentage point year-on-year) thanks to revenue growth, efficiency gains and synergies. In January-December, margin remained stable at 31.6%.

Operating cash flow in the year returned to growth (OIBDA-CapEx, +1.9% organic).

- g CapEx increased by 5.0% year-on-year organic, focused on the growth and transformation of networks and systems.
- g Operating cash flow made significant progress in the quarter (+17.6% organic).

Underlying net income amounted to 5,787 million euros in 2015 (+29.7% year-on-year) and basic earnings per share stood at 1.12 euros (+23.9%) in underlying terms. Net income for the fourth quarter was impacted by extraordinary factors, mentioned previously.

Solid free cash flow generation before spectrum payments in the quarter (4,821 million euros; +1.6%), increasing to 0.98 euros per share. In the quarter, free cash flow reached 2,307 million euros, improving virtually in all lines.

Net financial debt totalled 49,921 million euros. The leverage ratio considering the sale of O2 UK stood at 2.38x.

Telefónica **España**, which consolidated DTS from 1 May 2015, increased its commercial activity in the quarter, achieving net additions of 145 thousand accesses in Fusión, 272 thousand in fibre, 56 thousand in broadband, 88 thousand in Pay TV, 90 thousand in contract mobile and reducing the net loss in fixed lines to 59 thousand.

Table of Contents

T. España revenues (excluding DTS) accelerated to 0.8% year-on-year in the quarter and OIBDA was affected by an extraordinary provision (2,926 million euros) mainly associated with a voluntary employment suspension plan which will be implemented in 2016 and 2017 and will improve efficiency in coming years.

In the fourth quarter, Telefónica **Brasil** strengthened its leadership in the mobile segment, after capturing 69% of new contract accesses, and reinforced its position in fibre and Pay TV. Revenues maintained solid growth of 3.4% year-on-year due to the accelerated adoption of mobile data and the positive performance of fibre and Pay TV. OIBDA increased by 7.3% year-on-year and reflected efficiency measures focused on cost containment and the initial capture of synergies.

In **Germany**, commercial activity in the quarter remained high and focused on retaining value customers. The level of profitability was notable, reflecting both the growing contribution of integration synergies and the optimisation of commercial spend. Thus, organic year-on-year OIBDA growth in the quarter accelerated significantly to 35.5% and organic OIBDA margin expanded by 5.9 percentage points to 23.9%.

T. **Hispanoamérica** registered an improvement in its commercial activity in the quarter, particularly in higher value services (record net additions in mobile contract, migration to higher speeds in broadband and boost in Pay TV). In organic terms, revenues increased by 8.1% year-on-year and OIBDA by 4.0%, despite the higher commercial activity and an environment marked by the depreciation of most currencies in the region against the US dollar.

Telefónica announces guidance¹ and confirms shareholder remuneration for 2016:

- g Revenue growth: expected to be >4% year-on-year.
- g OIBDA margin: stabilizing vs. 2015.
- g CapEx/Sales excluding spectrum: at around 17%.
- g Net Financial Debt/OIBDA ratio: <2.35x, adjusted for the closing of the sale of O2 UK.
- g Dividend for 2016 of 0.75 euros per share in cash, subject to the closing of the sale of O2 UK. Additionally, the amortisation of Treasury stock for a total of 1.5% share capital will be proposed at

the 2016 AGM (subject to the closing of the sale of O2 UK).

¹ Operational guidance 2016:

2015 adjusted base: Revenues (46,757 million euros), Margin OIBDA (31.5%) and CapEx (ex-spectrum) to sales ratio (16.8%)

ü Excludes:

- i T. Venezuela results from January-December 2015.
- i OIBDA excludes additionally tower sales, the provision for restructuring costs, the provision to optimise the distribution network in Spain, the provision for Telefónica Foundation, write-downs and the final settlement agreement related to the acquisition of E-Plus.
- i CapEx excludes additionally spectrum acquisition and the Real Estate efficiency plan.

ü Includes:

- i Since May 2015, GVT results consolidated in T. Brasil results and DTS results in T. España results.

2016E guidance:

- ü Assumes **constant exchange rates as of 2015** (average FX in 2015) **and maintaining current Company perimeter.**

ü Excludes:

- i T. Venezuela results.
- i OIBDA excludes additionally: write-downs, capital gains/losses from the disposal of companies, tower sales, material non-recurring impacts and restructuring costs.
- i CapEx excludes additionally spectrum acquisition and the Real Estate efficiency plan.

Financial guidance 2016:

Net financial debt / OIBDA both adjusted for the closing of the sale of O2 UK.

Table of Contents

Comments from César Alierta, Executive Chairman:

The Digitalisation of the economy is now a reality which is already bringing about significant changes in society; changes that will accelerate in the next years. The growth of connections, data traffic and innovation is going to be exponential and is going to translate into real improvements in terms of productivity, employment and economic growth and, ultimately, into important social progress. The telecom sector is at the centre of that revolution, however new skills are required to capture its full potential.

We must adapt the commercial offering in order to satisfy the growing needs of our customers, characterised by increasingly higher data consumption (data traffic increased by 40% in 2015 and mobile data traffic by 48%, boosted by video usage). In this respect, in 2015, our Fibre customers increased by 30%, LTE customers tripled, smartphones advanced by 29% and Pay TV by 12%. This translated into higher value customers, both in terms of higher average revenue per access and increasing loyalty, and, therefore, into revenue growth acceleration to 4.0% organic in 2015.

The growing demand for data also requires adapting the networks, a trend which Telefónica began earlier than others. In 2015, we once again invested 17% of our revenues, which, together with spectrum acquisitions, positioned our investment level at 9,578 million euros. This effort enabled us to have in Spain the most extensive fibre-to-the-home network (14.3 million premises passed) and with more customers connected in Europe, to reach more than 17 million premises passed with fibre in Brazil, or achieve an LTE penetration in Europe of 75% and 43% in Latin America.

Meanwhile, the digital economy also requires more agile, more efficient and more responsible companies. As a consequence, in 2015 we launched efficiency plans, which shall be reflected in profitability improvements, and we have allocated financial resources to Telefónica Foundation in order to continue driving digital education, democratising access to quality knowledge for millions of students. Telefónica is currently ranked the third Company in the world in terms of education investment.

As such, 2015 has been a very positive year, in which we have met our objectives. In 2016 growth and data monetisation will accelerate, while we maximise the efficiencies from integration and simplification, and we boost our innovation and Big Data capabilities. We expect that all of this will be reflected in improvements in the key financial figures: revenue growth higher than 4%, margins stabilising while we maintain strong levels of investment, recover full-cash dividend payment (75 cents per share) and strengthen financial flexibility.

- Reconciliation included in the excel spreadsheets.

Notes:

- 2014 and 2015 reported figures include hyperinflationary adjustments in Venezuela in both years.

- The comparative figures for October-December 2014 have been modified with respect to those presented at the close of December 2014, solely for comparative purposes, due to the conversion to SICAD II 50 VEF/USD of those operations referenced to the Venezuelan bolivar in the first, second and third quarters of 2014. In the January-December 2015 period the consolidated financial statements use the exchange rate of the Venezuelan bolivar set at the denominated SIMADI (as of 31 December this rate was set at 199 Venezuelan bolivars fuertes per dollar).

- From the first quarter of 2015 Telefónica UK's operations are reported as discontinued operations within the Telefónica Group and their assets and liabilities are classified as held for sale, in compliance with the IFRS, as a result of the signing of the definitive sale agreement of the company in March 2015. For comparative purposes, 2014 results are reported using these same criteria.

- Organic criteria: Assumes constant exchange rates as of 2014 (average FX in 2014). Excludes the impact of hyperinflationary adjustments in Venezuela in both years and O2 UK results for both years after being classified as discontinued operations, and considers constant perimeter of consolidation. In OIBDA and OI terms, excludes write-downs, capital gains/losses from the sale of companies, tower sales, material non-recurring impacts and restructuring costs mainly related to the voluntary employment suspension plan in Spain and to integration processes in Germany and Brazil and the simplification programme. CapEx also excludes investment in spectrum and the Real Estate efficiency plan.

- OIBDA and OI are presented before brand fees and management fees.

- OIBDA margin calculated as OIBDA over revenues.

(1) The reported figures have been adjusted including DTS in Telefónica España's perimeter of consolidation since 1 May 2015. The reported figures up to September included DTS in Other Companies and Eliminations (Telefónica Group).

(2) E-Plus has been consolidated since 1 October 2014.

(3) GVT has been consolidated since 1 May 2015.

(4) T. Ireland has been removed from the consolidation perimeter since 1 July 2014.

| <u>Key Holdings of the Telefónica Group</u> | 64 |
| <u>Changes to the Perimeter</u> | 65 |

The financial information related to January-December 2015 contained in this document has been prepared under International Financial Reporting Standards (IFRS), as adopted by the European Union, which do not differ for the purposes of the Telefónica Group, from IFRS as issued by the International Accounting Standards Board (IASB). For comparative purposes only, the comparative figures for January-December 2014 have been modified with respect to those presented as of end of December 2014 following the consideration of T. UK as a discontinued operation in compliance with IFRS rules. Also for comparative purposes only, the comparative figures for October-December 2014 have been modified with respect to those presented as of end of December 2014, due to the conversion to SICAD

II (50 VEF/USD) of those operations referenced to the Venezuelan bolivar in the first, second and third quarter of 2014. The financial information for October-December 2014 presented as of end of December 2014 and prepared under IFRS as adopted by the European Union, can be found in the tables Selected Financial Data , available in www.telefonica.com/investors. This information is unaudited.

Telefónica's management model, regional and integrated, means that the legal structure of the companies is not relevant for the release of Group financial information, and therefore, the operating results of each of these business units are presented independently, regardless of their legal structure. For the purpose of presenting information on a business unit basis, revenue and expenses arising from invoicing among companies within Telefónica's perimeter of consolidation for the use of the brand and management contracts have been excluded from the operating results for each business unit. This breakdown of the results does not affect Telefónica's consolidated earnings.

The English language translation of the consolidated financial statements originally issued in Spanish has been prepared solely for the convenience of English speaking readers. Despite all the efforts devoted to this translation, certain omissions or approximations may subsist. Telefónica, its representatives and employees decline all responsibility in this regard. In the event of a discrepancy, the Spanish-language version prevails.

Table of Contents

01

CONSOLIDATED RESULTS

In 2015, Telefónica made firm progress towards long-term profitable and sustainable growth, at the same time as improving its competitive position in key markets. Thus, commercial activity, focused on growth and quality services (fibre, smartphones, LTE, Pay TV), intensified, underpinning revenue growth acceleration (+4.0% organic year-on-year).

At the same time, the savings obtained from integration synergies in Germany and Brazil and the efficiencies generated by the simplification programme contributed to OIBDA improvement (+3.6% organic year-on-year) and the return to growth of operating cash flow (+1.9% organic year-on-year). On the other hand, basic earnings per share in underlying terms reached 1.12 euros in 2015, increasing 23.9% year-on-year.

In the fourth quarter, year-on-year performance reflected the consolidation of GVT's results in Telefónica Brasil and DTS in T. España (both since 1 May 2015). Likewise, Telefónica UK has been reported as a discontinued operation within Telefónica Group and its assets and liabilities are classified as held for sale in compliance with International Financial Reporting Standards (IFRS), as a result of the signing of the definitive sale agreement in March 2015.

Total **accesses** at December, grew by 2% year-on-year (-1% organic) to 322.3 million, underpinned by T. Hispanoamérica (+2%) which represented 42% of the total, despite the fact that the performance of accesses in the fourth quarter was impacted by the application of more restrictive criteria when calculating prepay accesses in T. Brasil (net loss of 6.8 million customers). High-value customers' organic growth remained strong: fibre (+30% year-on-year), Pay TV (+12%), smartphones (+29%) and LTE (3.0x, reported). Churn evolution was also noteworthy, posting improvement in high-value segments.

g Mobile accesses stood at 247.1 million (-1% year-on-year) and were affected by the more restrictive calculation of the prepay base in T. Brasil. In the contract segment (+6% year-on-year), all regions posted year-on-year growth: T. Brasil +10% after capturing 69% of new accesses in the quarter, T. Hispanoamérica (+6%) obtained quarterly net additions of 732 thousand customers (3.3x year-on-year), T. España (+2%) net additions accelerated to 90 thousand customers in the quarter (1.6x year-on-year) and T. Deutschland (+2%) achieved net additions of 198 thousand customers in October-December. Thus, contract customer quarterly net additions reached 1.7 million for the Group, the highest level in six quarters.

g Smartphones reached 112.9 million after growing by 1.4 times vs. 2014, with penetration increasing 15 percentage points to 48%. Contract smartphone penetration stood at 71% (+12 percentage points year-on-year) and, in prepay, penetration stood at 38% (+15 percentage points year-on-year). LTE customers (29.7 million; 3.0x year-on-year) accounted for 12% of total mobile accesses (+8 percentage points year-on-year) after capturing record net additions of 6.1 million (+42% year-on-year), underpinned by T. Brasil (+2.7 million; 3.1x) and T. Hispanoamérica (+2.3 million; 2.6x).

- g **Retail broadband** accesses totalled 21.0 million and grew 19% vs. December of last year (+2% in organic terms), underpinned by T. Brasil (1.8x; +4% organic). A key highlight is the quarterly net gain of T. España (+56 thousand accesses), the highest recorded since the launch of Fusión .

- g **Fibre** accesses stood at 6.1 million and increased 30% year-on-year in organic terms, mainly due to T. España (+69% year-on-year; 2.2 million customers). It is important to highlight the positive trend of fibre customers weight in T. Brasil, already reaching 53% of the retail broadband base (+5 percentage points year-on-year).

- g The total **Pay TV** base reached 8.3 million, 12% more in organic terms than at December 2014 driven by Hispanoamérica (+16%), T. España (+10%) and T. Brasil (+10%), and reached net additions of 117 thousand customers in the quarter.

Table of Contents

Fourth quarter results were affected by the depreciation of Latin American currencies against the euro, particularly the Brazilian real, the Venezuelan bolivar, the Colombian peso and the Argentine peso. Thus, the evolution of exchange rates deducted 9.1 percentage points from revenue performance and 11.8 percentage points from OIBDA growth (-4.4 percentage points and -5.0 percentage points respectively, in 2015).

These depreciations also reduced payments in euros related to CapEx, taxes, interest and minorities, offsetting the negative effect of exchange rate evolution on OIBDA and mitigating its impact on cash flow generation.

On the other hand, the incorporation of GVT and DTS in the perimeter of consolidation contributed 5.7 percentage points to reported year-on-year revenue growth in the quarter and 4.6 percentage points to OIBDA performance (+8.8 percentage points and +5.4 percentage points, respectively in 2015).

Revenues increased by 3.3% year-on-year organic in the quarter (stable in reported terms) to 11,881 million euros, driven by T. Hispanoamérica and T. Brasil and mobile data revenues.

Thus, mobile data revenues grew in organic terms by 18.7% year-on-year in the quarter (+16.9% in January-December) and represented 42% of mobile service revenues (+5 percentage points year-on-year), due to higher smartphone penetration (+15 percentage points year-on-year) and the growing weight of LTE customers (+8 percentage points). In turn, non-SMS data revenue growth improved sequentially by 1 percentage point to 27.8% organic year-on-year (+25.3% in 2015) and represented 82% of data revenues (+5 percentage points year-on-year). Another key highlight was the higher unitary usage of data traffic by LTE customers (63% higher vs. 3G customers), which translated into double-digit ARPU growth and also resulted in more efficient network usage.

In January-December revenues totalled 47,219 million euros and maintained a solid growth rate of 4.0% in organic terms compared to the same period of the previous year (+8.7% reported). Particularly noteworthy were T. Hispanoamérica, with double digit growth, and T. Brasil, whose year-on-year growth rate accelerated to c.a. 5%.

On the other hand, excluding the impact of regulation, revenues grew by 4.1% year-on-year in organic terms in the fourth quarter and by 5.0% in 2015.

The diversification of the Company's assets was evident in the revenue structure. Thus, T. España, T. Deutschland and T. Brasil accounted for 66% of revenues in 2015, while T. Hispanoamérica represented 30%, both percentages stable vs. the previous year.

The annual results and particularly those of the quarter were affected by various non-recurring impacts:

- g Restructuring costs: in the fourth quarter, with the aim of enhancing future efficiency and representing a step further in the transformation and simplification processes which the Group is implementing, a provision of 3,122 million euros was booked. Per segment, it is important to highlight the Voluntary Employment Suspension Plan in T. España (2,896 million euros) and the restructuring expenses in T. Hispanoamérica (29 million euros), T. Deutschland (7 million euros) and Other Companies and Eliminations (190 million euros). This provision affected personnel expenses (3,119 million euros) and other net income/expense (3 million euros).

- g Other non-recurring items in the fourth quarter included: i) a provision to provide Telefónica Foundation with the adequate financial structure for future years (325 million euros), ii) a provision in Spain to optimise the distribution network (30 million euros) and iii) valuation adjustments in Other Companies and Eliminations (23 million euros).

- g Meanwhile, in the fourth quarter other positive impacts were recorded, such as the final agreement related to the purchase price of E-Plus in Germany (102 million euros), the outcome of the spectrum swap in Mexico (79 million euros), the expiration of an account payable in Brazil (98 million euros), the sale of real estate assets in T. España (impact of 22 million euros on OIBDA) and tower sales in Latin America (18 million euros on OIBDA).

- g In January-December 2015, total restructuring costs amounted to 3,212 million euros: T. España (2,896 million euros), T. Deutschland (74 million euros), T. Hispanoamérica (38 million euros), T. Brasil (7 million euros) and Other Companies and Eliminations (198 million euros). This provision affected personnel expenses (3,143 million euros) and other net income/expense (69 million euros).

Table of Contents

Operating expenses stood at 12,089 million euros in October-December 2015, 5.0% more vs. the same period of the previous year in organic terms (+35.7% reported) due to higher expenses in T. Hispanoamérica and T. Brasil, associated with increased commercial intensity and the depreciation of the majority of Latin American currencies against the US dollar, although this was partially offset by savings in T. Deutschland derived from integration synergies. Compared to the previous quarter, the organic evolution of operating expenses remained virtually stable (+0.2 percentage points year-on-year) due to greater efficiencies in commercial spend and lower network and systems costs.

In 2015, expenses totalled 37,132 million euros and grew 4.6% year-on-year organic (+20.6% reported).

Breakdown by component:

- g **Supplies** for the quarter, 3,371 million euros (+1.0% year-on-year organic), reflected higher handset consumption (higher weight of high-end handsets) and the increase in content costs, partially offset by the positive impact of lower interconnection costs. The organic year-on-year growth rate decelerated 0.4 percentage points vs. the third quarter, mainly due to a lower volume of handset sales in the prepay segment of T. Hispanoamérica.
- g **Personnel expenses** amounted to 4,811 million euros in October-December with the provision for non-recurrent restructuring costs mentioned before (3,119 million euros in the fourth quarter; 3,143 million euros in January-December) impacting the year-on-year evolution. In organic terms, these expenses grew by 5.4% vs. the same period in 2014, affected mainly by inflationary pressures in certain Latin American countries.

The average headcount in 2015, excluding O2 UK, stood at 125,892 employees and increased 11.5% year-on-year (-2.8% year-on-year including in 2014 the equivalent average headcount of E-Plus, GVT and DTS).

- g **Other operating expenses** totalled 3,907 million euros in the fourth quarter and increased 8.8% year-on-year organic, due to the impact of inflation in certain Latin American countries, the depreciation vs. the dollar of most currencies in the region, higher network and system costs related to the transformation of the Company and increased commercial intensity, which more than offset the savings associated with the simplification measures undertaken. This item included a non-recurrent provision of 325 million euros, reflecting the Group's firm commitment to Fundación Telefónica, to provide the Foundation with the adequate financial structure for future years to serve several social projects, central to them being the digital education for children and young people.

Other net income increased to 232 million euros in the quarter, and mainly included an adjustment in T. Deutschland for the final agreement related to the acquisition of E-Plus (an impact of 102 million euros on OIBDA), the positive impact in T. Brasil of the expiration of an account payable (98 million euros on OIBDA) and a provision in Spain to optimise the distribution network (30 million euros).

Gains on sale of fixed assets totalled 158 million euros in the fourth quarter, and mainly included the outcome of the spectrum swap with AT&T in Mexico (impact of 79 million euros on OIBDA), the sale of real estate assets in T. España (impact of 22 million euros on OIBDA) and tower sales (18 million euros impact on OIBDA, mainly in Chile and Brazil).

In 2015, this item increased to 275 million euros and was mainly comprised of the outcome of the spectrum swap with AT&T in Mexico (79 million euros impact on OIBDA), the sale of real estate assets in T. España (impact of 73 million euros on OIBDA), tower sales (impact of 65 million euros on OIBDA) and the sale of yourfone GmbH in Germany (15 million euros of OIBDA impact).

Table of Contents

Operating Income Before Depreciation and Amortization (OIBDA) for the fourth quarter reached 401 million euros, affected by non-recurrent factors mentioned, and would have reached 3,781 million euros underlying.

In organic terms, OIBDA increased 3.8% vs. the same period of 2014, underpinned by the strong growth of T. Deutschland (+35.5%), reflecting significant integration synergies, T. Brasil (+7.3%), associated with solid revenue performance and efficiency measures focused on cost control, and T. Hispanoamérica (+4.0%; +1.0 percentage point vs. the previous quarter).

In January-December 2015, OIBDA (11,414 million euros) improved its pace of growth in organic terms (+3.6%) vs. 2014. OIBDA would have reached 14,926 million euros in underlying terms.

Thus, **OIBDA margin** in the fourth quarter stood at 32.2% in organic terms and expanded 0.2 percentage points vs. the same period of the previous year. This year-on-year growth enabled the full year 2015 margin to remain stable vs. 2014, thanks to revenue growth acceleration, higher cost containment and the tangible benefits of synergies generated from the integration of the acquired companies.

Depreciation and amortisation, 2,161 million euros in October-December, increased 1.6% in organic terms vs. the same quarter of 2014 mainly due to the amortisation of the new spectrum acquired in Brazil and Spain and the higher investments. In January-December 2015, depreciation and amortization increased to 8,517 million (+3.5% year-on-year organic). Total depreciation and amortisation charges arising from purchase price allocation processes totalled 191 million euros in the quarter (745 million euros in 2015).

Operating income (OI) reached -1,760 million euros in October-December, affected by the aforementioned non-recurrent impacts, and increased 6.5% year-on-year in organic terms (+3.7% year-on-year organic in January-December).

Net financial expenses in 2015 increased to 2,581 million euros, 7.1% lower than the previous year. The negative exchange rate differences increased to 620 million euros, mainly due to the impact of the adoption of the Venezuelan bolivar exchange rate set at SIMADI. Excluding exchange rate differences, these expenses stood at 1,961 million euros and improved 21.2% (528 million euros), primarily due to the lower cost of debt in euros (146 million euros), leveraged by the reduction of fixed-rate debt and the capture of the lower euro short-term rates, and the divestment of the Group's entire stake in Telecom Italia, S.p.A. (404 million euros). This was partially offset by other effects that had a negative impact of 22 million euros, including the monetary correction for the inflation in Venezuela net of higher expenses in Latin American currencies, revision of contingencies and mark to market of other equity items.

The effective cost of debt in the last twelve months, excluding exchange rate differences and the positive impact of the divestment in Telecom Italia, S.p.A., stood at 4.69%, 57 basis points lower year-on-year.

In the fourth quarter of 2015 there was a tax income of 313 million euros, mainly due to the recognition of the tax credit derived from the aforementioned provision for restructuring expenses. In January-December 2015, **corporate income tax** reached 13 million euros and also included activation of tax credits in Spain in the second quarter of 2015.

Profit from discontinued operations for October-December totalled 394 million euros (104 million euros in the same period of 2014), impacted by the cessation of depreciation and amortisation since the signing of the final sale agreement of Telefónica's operations in the United Kingdom. In 2015 this item reached 2,582 million euros, with

1,412 million euros corresponding to the impact of deferred tax assets resulting from the estimation of the difference in Telefónica, S.A. between the fiscal value and the agreed value for the sale of Telefónica's UK operations (which are expected to materialise in the foreseeable future when they are made definitively deductible in the sale), reduced by the amount corresponding to the tax amortisation of goodwill.

Table of Contents

Profit attributable to minority interests reduced net income for the quarter by 95 million euros, 122 million more than in the same period of the previous year mainly due to higher results attributed to minority interests in T. Deutschland. In January-December, minorities reduced net income by 135 million euros, 116 million euros less than in 2014, mainly due to lower results attributed to minority interests in T. Brasil and T. Colombia.

As a consequence of the previous items, **consolidated net income** for the fourth quarter of 2015 stood at -1,832 million euros (769 million in underlying terms), affected by the non-recurring impacts mentioned above. In 2015, net income reached 2,745 million euros, or 5,787 million euros in underlying terms (+29.7% vs. 2014).

Basic earnings per share in underlying terms increased to 1.12 euros in January-December 2015 (+23.9% year-on-year) and 0.14 euros in the fourth quarter (-43.8% year-on-year).

In 2015, the Company took yet another step forward in its ongoing investment plan focused on growth and transformation of networks and systems, having dedicated 75% of the total, excluding spectrum acquisition, to these projects. Thus, **CapEx** grew in 2015 by 5.0% organic year-on-year to 9,578 million euros (+10.3% in reported terms), including 1,585 million euros of spectrum acquisition (76% of the total in Germany in the second quarter).

Operating cash flow (OIBDA-CapEx) sequentially accelerated its year-on-year organic growth in the fourth quarter by 11.1 percentage points to 17.6%. In 2015, operating cash flow returned to growth, after increasing by 1.9% year-on-year in organic terms.

Operating cash flow excluding spectrum in underlying terms, reached 1,302 million euros in October-December and 6,872 million euros in 2015.

Interest payments in 2015 totalled 2,410 million euros, a 3.8% year-on-year reduction despite the increase in average debt (+6.5%). Net financial payments accounted for 4.8% of the net average debt in the year.

Payment for taxes amounted to 664 million euros in 2015, 443 million euros less than the previous year, primarily due to tax recoveries on definitive tax filings of previous years. Excluding the impact on income before taxes of the provision for the aforementioned restructuring costs, the effective cash tax rate stood at 18.8%.

Working capital in the fourth quarter of 2015 generated a cash flow of 2,500 million euros, driven by the various management measures, including: (i) extended payment terms with suppliers or with the factoring firm where those had been discounted, for 838 million euros, (ii) factoring of accounts receivable, (iii) lower CapEx payments vs. accruals in the period and (iv) expenses derived from the provision made to Telefónica Foundation, to be paid in the coming years.

In January-December 2015, working capital contributed positively to a cash flow generation of 1,855 million euros (2,390 million 2014) due to management measures implemented throughout the year.

Operations with minority shareholders totalled 537 million euros in 2015, 211 million euros more than the previous year, mainly due to higher dividend payments in Germany and Brazil in 2015.

Cash flow from discontinued operations totalled 675 million euros in the year (531 million in 2014).

Free cash flow excluding spectrum payments grew by 1.6% in 2015 to 4,821 million euros. In the fourth quarter, free cash flow generation amounted to 2,307 million euros (2.6x year-on-year).

Net financial debt stood at 49,921 million euros at December 2015, increasing 4,834 million euros year-on-year. Factors explaining the debt increase included: i) 6,934 million euros in net financial investments including changes in the perimeter of consolidation; ii) shareholder remuneration (dividends, treasury stock and hybrid coupons) totalling 4,188 million euros; iii) spectrum payments of 1,307 million euros; iv) the payment of labour-related commitments (721 million euros) mainly related to early retirement and v) other factors affecting the valuation of liabilities amounting to 1,185 million euros (mainly due to the refinancing of commercial liabilities). Conversely, noteworthy factors reducing

Table of Contents

the debt included: i) free cash flow generation before spectrum payment of 4,821 million euros; ii) capital increase of Telefónica S.A. of 3,003 million euros; iii) the contribution of minority shareholders in Telefónica Brasil's capital increase, totalling 1,258 million euros; and iv) the issuance of capital instruments for a total of 419 million euros.

In the fourth quarter, net debt increased by 231 million euros mainly due to: i) shareholder remuneration (including payment of dividends, purchase of treasury stock and payment of capital instrument coupons) of 799 million euros; ii) net financial investments of 241 million euros; iii) payment of labour-related commitments (150 million euros) and iv) other factors affecting the valuation of liabilities amounting to 1,350 million euros (mainly due to the refinancing of commercial liabilities). Contrarily, free cash flow generation before spectrum payments reduced debt by 2,310 million euros.

The leverage ratio (net debt over OIBDA¹) in the last 12 months at the end of December 2015 stood at 2.91 times. Considering the closing of the sale of O2 UK, the ratio stood at 2.38 times.

In 2015, **Telefónica's financing activity** reached around 18 billion equivalent euros, without considering the re-financing of commercial paper and short-term bank loans, 26% of which was obtained as capital (equity and hybrids) and the rest as financial debt. Activity was mainly focused on financing the GVT acquisition as well as on strengthening the liquidity position, refinancing maturing debt and actively managing the cost of debt, through the extension of the maturity of the credit lines and the reduction of credit margins. The capital increases of Telefónica, S.A., for a total of 3.0 billion euros, and Telefónica Brasil, S.A. for 16.1 billion Brazilian reais, were completed during the second quarter, in connection with the financing of the acquisition of GVT. The capital increase at Telefónica Brasil, S.A. was subscribed in a 25.2% by minority shareholders (approximately 1.2 billion euros).

In February 2015, a syndicated credit line was signed with 33 financial entities for the sum of 2.5 billion euros and maturing in February 2020. In parallel, the economic terms of the syndicated credit facility signed in February 2014, for an amount of 3.0 billion euros, were modified. The maturities of both syndicated facilities have been recently extended one year to February 2021 and February 2020, respectively. Likewise, in September 2015, a key highlight was the first issuance of the year in the bond market in euros, totalling 1.0 billion euros and maturing in 6 years, with a historic record-low coupon paid by Telefónica for a euro issuance. In November 2015, Telefónica signed a credit line for the sum of 3.0 billion euros and maturing in February 2018 with seven financial entities, allowing Telefónica to address part of the debt maturing in the first quarter of 2016 with this transaction and to use the already existing liquidity position to cover the maturities of subsequent years.

In Hispanoamerica, Telefónica subsidiaries tapped financing markets in January-December 2015 for a total approximate amount of 1,722 million equivalent euros. It is worth highlighting the hybrid issuance from Colombia Telecomunicaciones, S.A. ESP in the first quarter for a total of 500 million US dollars.

In the first quarter, T. Deutschland closed financing agreements for an amount of 300 million euros through the issuance of debt instruments in the local market (schuldscheindarlehen and namensschuldverschreibung), with different maturity terms until 2032.

Throughout the year, Telefónica Group obtained funding for a total 927 million equivalent euros, by means of extending payment terms with suppliers or with the factoring firm where those had been discounted.

¹ 12 month rolling, not considering O2 UK discontinuation, incorporating DTS and GVT OIBDA corresponding to January - April 2015 and excluding the non-recurring impact from restructuring costs in the 12 months rolling and the firm commitments relating to the Telefónica Foundation's social activities

Table of Contents

Meanwhile, Telefónica, S.A. and its holding companies continued with their issuance activity under the various Commercial Paper Programmes (Domestic and European), increasing the outstanding amount to approximately 1,497 million euros at the end of December.

Telefónica maintained undrawn committed credit lines with different credit institutions for an approximate amount of 13,684 million euros, with around 12,497 million euros maturing in more than 12 months, which, along with the adjusted cash position, placed liquidity at 19.1 billion euros.

Definitions

Organic Growth: Assumes constant average exchange rates from 2014. Excludes the impact of hyperinflationary adjustments in Venezuela in both years and O2 UK results for both years after being classified as discontinued operations, and considers a constant perimeter of consolidation. In OIBDA and OI terms, excludes write-downs, capital gains/losses from the sale of companies, tower sales, material non-recurring impacts and restructuring costs mainly related to the Voluntary Employment Suspension Plan in Spain and to the integration processes in Germany and Brazil and the simplification programme. CapEx also excludes investment in spectrum and the Real Estate efficiency plan.

Underlying Growth: Reported figures excluding the impact of write-downs, capital gains/losses from the sale of companies, tower sales, material non-recurring impacts and restructuring costs mainly related to the Voluntary Employment Suspension Plan in Spain and to the integration processes in Germany and Brazil and the simplification programme, as well as depreciation and amortization charges from purchase price allocation processes.

Digital Services

(year-on-year changes in organic terms)

In the fourth quarter of 2015, Digital Services revenues stood at 1,068 million euros, 15.1% higher than in the same period of 2014 (3,758 million in January-December; +23.6% year-on-year).

Per area, highlights include:

- g **Video** revenues reached 628 million euros, 14.0% higher than in October-December 2014 (2,142 million euros in 2015; +27.3% year-on-year), decelerating the rate of growth mainly due to DTS revenue trend.

Revenues continue to be supported by the solid growth of pay TV accesses, with quarterly net additions of 117 thousand, resulting in a total base of 8.3 million in December (4.6 million of which are satellite TV), 12% higher than in 2014, driven by Brazil (+10% year-on-year), Hispanoamerica (+16%) and Spain (+10%, including DTS).

Main highlights for the quarter include: i) in Spain, the agreements to include in Movistar+ TV the UEFA Champions League and UEFA Europa League 2016-2018, and La Liga and the Copa de S.M. el Rey until 2019, ii) Hispanoamerica, the announcement of the launch of VoD and linear TV channels in seven new countries in 2016 (Ecuador, Uruguay, Panama, Costa Rica, El Salvador, Guatemala and Nicaragua).

- g In the area of **Security**, revenues in October-December (74 million euros) grew by 22.8% year-on-year (282 million in January-December; +34.7% year-on-year).

In the **Consumer** segment, following the new technical assistance launches in Brazil, accesses with security products reached 10.8 million in December (+46% year-on-year). Additionally, 5 million customers safely store their digital data with the Personal Cloud service. In the **Corporate** segment, new agreements were signed with several sector-leading Partners, such as Alien Vault, BlueCoat, Intel Security, Palo Alto Networks, RSA and Vaultive for the joint development of cybersecurity products.

- g **M2M** revenues reached 47 million euros in the quarter and increased by 35.9% year-on-year (169 million in 2015; +16.5%), driven by new energy efficiency projects in Spain launched in the third quarter that enable companies to save up to 30% in energy expenditure. The launch of the global connectivity service IoT 4G-LTE over the Telefónica's leading Smart M2M platform should also be noted.

Table of Contents

- g **Cloud** revenues in the quarter increased by 25.5% year-on-year to 112 million euros (402 million euros in 2015, +28.7% year-on-year). One of the main highlights was the global collaboration agreement reached with Huawei to drive the migration of companies' traditional IT services to the cloud in a scalable, reliable manner and at a competitive price and 600 thousand Office 365 licenses commercialised to SMEs.

- g **In Financial Services**, revenues reached 73 million euros in the last three months (+14.4% year-on-year) and 284 million over the twelve months (+13.0% year-on-year).

- g **In Big Data**, highlights include the purchase of Synergic Partners, a consultancy firm specialised in advanced data analytics and pioneer in the development of strategic Big Data solutions. Likewise, in December a joint venture was created together with China Unicom to develop Big Data services in China, using Smart Steps technology developed by Telefónica.

- g **Telefónica Open Future** with the aim of observing, detecting and capturing external innovation in order to make it available to the Company's customers, closed 2015 as one of the most relevant corporate investors in innovation across Europe and Latin America. Thus, in 2015 more than 350 startups entered the programme. The positive performance of the portfolio in 2015 is a key highlight, with outstanding rounds of financing (such as Job&Talent, CartoDB or Tado) and a good turnover rate of investee companies, with significant exits of startups such as Trustev and Marfeel. Similarly, Telefónica Open Future contributed to the incorporation of innovation both in the business offer, as demonstrated by the recent agreement with the Job&Talent job search platform for Telefonica's customers access to exclusive services, as well as in the greater efficiencies achieved through improved internal processes.

- g Meanwhile, in the area of **Global Device Management**, smartphones accounted for 83% of devices purchased in the fourth quarter (+11 percentage points year-on-year), of which 56% were LTE handsets (+28 percentage points year-on-year). Likewise, in the fourth quarter, the Company was the first in Europe to launch a device with the Cyanogen operating system (enhancing user experience with a more customisable interface and greater levels of privacy and security).

Telefónica Global Resources

Throughout 2015, TGR, has consolidated as the technological reference for the Group, supporting growth in the operating businesses, enabling end-to-end digitalisation and accelerating transformation. Additionally, it has focused on creating value and generating efficiencies through the simplification and development of infrastructures, enabling improved service quality.

The **Global Network and Operations area** advanced on the deployment of ultra broadband (UBB), both in terms of coverage and quality, as well as in the All-IP transformation, the creation of global centres and the commitment to innovation.

The investment in UBB has been focused on offering excellent connectivity, increasing speed, reliability and improving the quality and security of the network. As such, the network is prepared to cope with the strong growth in data traffic (+38% year-on-year in the fourth quarter), driven by both mobile broadband (+40% year-on-year), and by fixed broadband (+38%; video traffic: +48%). At the end of 2015:

- g Premises passed with fibre to the home totalled 19 million, 14 million in Spain and 5 million in Brazil. Additionally, GVT contributed with 12 million premises passed with fibre to the cabinet, taking the total number of homes covered with fibre in Brazil to 17 million.

Table of Contents

- g In LTE, coverage in Europe and Latin America reached 75% and 43% of the population, respectively; base stations in service increased to more than 33 thousand and 98% of 3G and LTE base stations are connected via IP and fibre to the transmission network. As a result, LTE customers tripled year-on-year, reaching already 29.7 million customers.
- g In terms of the development of All-IP technology, the main highlights include: 1) the launch of VoLTE in Germany, 2) the commencement of the switch-off of the legacy networks in Spain and the of legacy transport networks and, 3) the reduction of IP layers, with the deployment of new IP architecture in the core and in transport, starting with access centres in Spain.

Furthermore, 2015 saw the creation of Global Device Centres (equipment design such as HGU *Home Gateway Unit* in Spain or HomeBox2 in Germany), progress in the transformation of OSS *Operating Support Systems* (for example, the Integrated Field Force Management project increased labour productivity by 5% year-on-year in 2015 and significantly reduced the back office) and Video synergies generation, thanks to taking best practices to all operating businesses in the Group (high availability of global platforms DTH, Cable, IPTV and the deployment of the OTT Video Service).

Finally, in innovation, highlights include: 1) the deployment of LTE-Advanced with various carriers; 2) the progress in virtualisation (automation of the deployment of VNFs *Virtualised Network Functions*, validation and certification of VNFs in the reference laboratory, NFV *Network Function Virtualisation* and the first multivendor concept trial in the industry of SDN *Software Defined Networks* in wireless transport) and 3) progress in 5G (Research and Innovation laboratory 5TONIC, in partnership with IMDEA Networks, for the development and deployment of 5G technologies).

The **Global IT area** reached a new record in IT Service Delivery, reducing the number of critical incidents by 40% vs. last year, and delivered significant transformation, with almost all operating business included in the *Full Stack* processes and applications programmes, with benefits starting to materialise (13% of customers have migrated to the new *Full Stacks*). Thus, in 2015 Argentina migrated the mobile business and Mexico completed the migration of the prepay segment, while all countries from Telefónica Hispanoamérica have deployed global B2B presales capabilities.

In parallel, the foundations have been laid for digital capabilities in Business Intelligence and *Big Data* in practically all of the operating businesses.

Finally, throughout the year, the transformation has been reinforced by the continuous effort and execution of simplification measures, with the closing of 3 Data Centres, the reduction of 321 applications and 8% of servers, while virtualisation increased by 5.7 percentage points.

Notes:

- The comparative figures for October-December 2014 have been modified with respect to those presented at the close of December 2014, solely for comparative purposes, due to the conversion to SICAD II 50 VEF/USD of those operations referenced to the Venezuelan bolivar in the first, second and third quarters of 2014. In the

January-December 2015 period the consolidated financial statements use the exchange rate of the Venezuelan bolivar set at the denominated SIMADI (as of 31 December this rate was set at 199 Venezuelan bolivars fuertes per dollar).

- From the first quarter of 2015 Telefónica UK's operations are reported as discontinued operations within the Telefónica Group and their assets and liabilities are classified as held for sale, in compliance with the IFRS, as a result of the signing of the definitive sale agreement of the company in March 2015. For comparative purposes, 2014 results are reported using these same criteria.

- The weighted average number of ordinary shares outstanding during the period has been obtained applying the IAS rule 33 Earnings per share. Thereby, the weighted average of shares held as treasury stock have not been taken into account as outstanding shares. On the other hand, the denominator is retrospectively adjusted for transactions that have changed the number of shares outstanding without a corresponding change in equity (as if such transactions had occurred at the beginning of the earliest period presented). For instance, the bonus share issue carried out to meet the scrip dividends paid in 2014 and in 2015, has been taken into account. Also, the ordinary shares that would be issued upon the conversion of the mandatorily convertible notes issued on 24 September 2014 are included in the calculation of earnings per share from that date.

- Continuing operations earnings per share is calculated dividing profit for the period from continuing operations including non-controlling interests, adjusted for the net coupon corresponding to Other equity instruments, by the weighted average number of ordinary shares outstanding during the period.

- Discontinued operations per share is calculated dividing profit for the period from discontinued operations by the weighted average number of ordinary shares outstanding during the period.

- Basic earnings per share ratio is calculated dividing Net Income, adjusted for the net coupon corresponding to Other equity instruments, by the weighted average number of ordinary shares outstanding during the period.

- 2014 and 2015 reported figures include hyperinflationary adjustments in Venezuela in both years.

- Group consolidated results consolidate GVT and DTS results since 1 May 2015, consolidate E-Plus results since the fourth quarter 2014 and deconsolidate Telefónica Ireland's results since the third quarter 2014.

| = Free Cash Flow per share (euros) | 0.71 | 0.81 | (11.9) |

Notes:

Edgar Filing: TELEFONICA S A - Form 6-K

- From the first quarter of 2015 Telefónica UK's operations are reported as discontinued operations within the Telefónica Group and their assets and liabilities are classified as held for sale, in compliance with the IFRS, as a result of the signing of the definitive sale agreement of the company in March 2015. For comparative purposes, 2014 results are reported using these same criteria.

- The comparative figures for October-December 2014 have been modified with respect to those presented at the close of December 2014, solely for comparative purposes, due to the conversion to SICAD II 50 VEF/USD of those operations referenced to the Venezuelan bolivar in the first, second and third quarters of 2014. In the January-December 2015 period the consolidated financial statements use the exchange rate of the Venezuelan bolivar set at the denominated SIMADI (as of 31 December this rate was set at 199 Venezuelan bolivars fuertes per dollar).

- The concept Free Cash Flow reflects the amount of cash flow available to remunerate Telefónica S.A. Shareholders, to protect solvency levels (financial debt and commitments), and to accommodate strategic flexibility.

- The differences with the caption Net Free Cash Flow after CapEx included in the table presented above, are related to Free Cash Flow being calculated before payments related to commitments (payment of labour commitments) and after operations with minority shareholders, due to cash recirculation within the Group.

- 2014 and 2015 reported figures include the hyperinflationary adjustments in Venezuela in both years.

(1) Includes cash received from dividends paid by subsidiaries that are not fully consolidated.

(2) Figures in million euros. 2015 includes: 978 in Germany, 196 in Argentina, 68 in Ecuador, 49 in Spain, 8 in Colombia, 6 in Chile and 2 in Nicaragua. 2014 includes: 545 in Brazil, 166 in Argentina, 93 in Colombia, 82 in Panama and 2 in Nicaragua.

(3) In 2015 includes the contribution of minorities in the share capital increase of Telefónica Brasil, the sale of Telecom Italia S.p.A., the sale of yourfone GmbH, the payment for the purchase of GVT and DTS and the purchase of a minority stake in Mediaset Premium. In 2014, includes the sale of T. Czech Republic, the sale of T. Ireland and the acquisition to Mediaset of its 22% stake in DTS, the acquisition of E-Plus, the capital increase of Telefónica Deutschland and the sale of 2% stake in China Unicom

(4) Dividends paid by Telefónica S.A., operations with treasury stock, issuance of shares, issuance of undated deeply subordinated securities, issuance of mandatorily convertible bonds into Telefónica S.A. shares and operations with minority shareholders from subsidiaries that are consolidated through the equity method.

(5) In 2015 includes 3,019 million euros related to restructuring cost provision, mainly in Spain.

- Notes:

- From the first quarter of 2015 Telefónica's operations in the United Kingdom are reported as discontinued operations within the Telefónica Group and their assets and liabilities are classified as held for sale, in compliance with the IFRS, as a result of the signing of the definitive sale agreement of the company in March 2015.

- 2015 reported figures include the hyperinflationary adjustments in Venezuela.

(1) Includes Non current interest-bearing debt and 1,073 million euros of Non-current trade and other payables.

(2) Includes Current interest-bearing debt and 462 million euros of Other current payables .

(3) Includes Current financial assets , 5,793 million euros of Non-current financial assets and 321 million euros of Trade and other current receivables .

(4) Mainly in Spain. This amount is detailed in the captions Long-term provisions and Short-term provisions and other liabilities of the Statement of Financial Position, and is the result of adding the following items: Provision for Pre-retirement, Social Security Expenses and Voluntary Severance , Group Insurance , Technical Reserves , Provisions for Pension Funds of Other Companies and Voluntary Employment Suspension Plan .

(5) Amount included in the caption Non-current financial assets of the Statement of Financial Position. Mostly related to investments in fixed income securities and long-term deposits that cover the materialization of technical reserves of the Group insurance companies.

(6) Net present value of tax benefits arising from the future payments related to actual workforce reduction commitments.

(7) OIBDA 12 month rolling, not considering O2 UK discontinuation, incorporating DTS and GVT OIBDA corresponding to January - April 2015 and excluding the non-recurring impact from restructuring costs in the 12 months rolling and the firm commitments relating to the Telefónica Foundation s social activities.

02

TELEFÓNICA ESPAÑA

Telefónica España's financial and operating results consolidate DTS from 1 May 2015, the date upon which it was incorporated into the Telefónica Group perimeter. In order to facilitate year-on-year comparisons, the organic change also includes DTS from 1 May to 31 December 2014.

The commercial activity in the quarter was underpinned by the quality of the Company's assets and by the positive reception of the new convergent offer Movistar Fusión+ launched in July, as well as by the promotion that included all TV Premium Extra content for 9.90 euros/month, launched in August, to which almost 700 thousand customers were subscribed, highlighting the solid TV and ultrafast fibre proposal, in an economic environment in which private consumption continued to improve.

It is worth noting the reduction in churn in 2015, particularly noticeable following the elimination of permanent contracts in Fusión on 1 August, which, together with the improved performance in gross additions, translated into very positive commercial results. As such, annual net additions of broadband almost doubled vs. 2014, in fibre grew by 25%, growth returned in contract mobile (234 thousand accesses) and in fixed telephony the net loss decreased by 31%.

This was reflected in a significant improvement in T. España's revenues (excluding DTS), which accelerated their growth in the fourth quarter to +0.8% year-on-year (+0.6 percentage points vs. the third quarter).

Meanwhile, T. España's revenues, including the consolidation of DTS, increased 6.0% year-on-year in the fourth quarter (-2.0% organic), and the margin stood at 40.2% organic (42.1% in the year).

It must be noted that the aforementioned margins exclude the impact of tower sales and the extraordinary provision of 2,926 million euros booked in this quarter and associated mainly with a voluntary employment suspension plan which shall be implemented in 2016 and 2017. Thus, the results in the next financial years shall benefit from average annual savings in direct expenses in the region of 370 million euros from 2017, with a positive impact on cash flow generation from the first year.

Likewise, the continuous effort to improve the quality and coverage of the networks (14.3 million premises passed with fibre and 75% population coverage with LTE), the integration of the most complete content offer (including all football until 2019) and the launch of the exclusive Movistar#0 channel in February 2016 contributed to strengthening a solid starting position from which to approach 2016.

On the other hand, regarding the process of the commercial offering redefinition and subsequent to the close of the year, highlights included: i) increased mobile data allowance from 2GB to 3GB in all the main Fusión lines and additional mobile lines, with an update of the monthly charges for both services (+3 euros VAT included) in February; ii) update of tariffs in the fixed broadband non-convergent services portfolio (+3 euros VAT included) in January; iii) update of tariffs in the Vive contract mobile portfolio, except Vive 45, (+1 euro VAT included) also in January. Additionally, in December a new prepay mobile portfolio was launched including 4G mobile data which improved the positioning of the offering in this segment.

Telefónica España **accesses** stood at 42.0 million at the end of the year, following the incorporation of DTS satellite TV accesses (0.9 million in December) with retail accesses growing 3.1% year-on-year to 36.9 million (-2.3% in 2014). Excluding this impact, total accesses remained practically stable (-0.4% year-on-year).

- g **Movistar Fusión** improved its quarterly net additions to 145 thousand accesses (126 thousand in July-September), reaching 4.2 million customers and 1.5 million additional mobile lines, and maintained solid year-on-year growth (+13% and +8% respectively), representing in the consumer segment 81% of fixed broadband customers and 63% in contract mobile.

Table of Contents

The capture of high-value customers continued to prevail since, out of the Movistar Fusión quarterly additions, 90% incorporated new services, 50% corresponded to completely new Movistar customers, and 47% took out ultrafast fibre.

It is worth noting the strong growth in the penetration of high-value services in Movistar Fusión ; 32% of customers enjoy ultrafast fibre of 100 or 300 Mb (+11 percentage points year-on-year) and 62% Pay TV (+18 percentage points year-on-year).

The ARPU for the quarter increased by 7.3% year-on-year to 74.4 euros due to the impact of the repositioning of tariffs since May 2015 and the migration towards higher value bundles (fibre and TV).

However, in the quarter the ARPU growth year-on-year was partially offset by the impact of the TV Premium Extra promotion for 9.90 euros/month until 31 December, although it should be mentioned that following the end of the promotion the uptake of TV packages by customers has been very positive.

Compared to the previous quarter, the ARPU evolution reflected the higher seasonal consumption in certain services during the summer months.

On the other hand, churn stood at 1.2%, stable both year-on-year and quarter-on-quarter.

g **Retail fixed telephony** accesses (-4% compared to December 2014), presented once again their best quarterly performance since the launch of Movistar Fusión in 2012, with a net loss of 59 thousand accesses (-442 thousand in the year) underpinned by higher gross additions (+7% year-on-year) and reduced churn (1.3%, -0.2 percentage points year-on-year).

g **Retail broadband** accesses presented net additions of 56 thousand accesses in the quarter, the highest number since the launch of Movistar Fusión (and more than four times those of the fourth quarter of 2014), and 76 thousand in the year, adding up to 6.0 million (+1% year-on-year), thanks to the higher volume of gross additions of fibre (+22%) and improved churn performance (1.4% in the quarter and in the year, -0.1 percentage points year-on-year in both cases).

The quarterly ARPU reached 30.0 euros (+17.2% year-on-year), impacted by the greater weight of TV and ultra broadband customers and the allocation of Movistar Fusión revenues.

Fibre accesses increased from October to December by 272 thousand and recorded a new record in annual net additions (906 thousand) taking the base to 2.2 million (1.7x compared to 2014), accounting for 37% of total fixed broadband accesses (+15 percentage points year-on-year). Meanwhile, two thirds of fibre accesses benefitted from the new speeds (30 and 300 Mb) launched in May.

Ultrafast fibre accesses of 100 or 300 Mb (with additional ARPU of 12 euros, VAT included) increased to 1.5 million (69% of total fibre accesses), following a new record in net additions in the quarter (152 thousand; 499 thousand in the year) driven by the growth in additions (+24% year-on-year) and the containment of churn (1.0%, +0.1 percentage points year-on-year), and continued to reflect customers preference for higher speeds (63% of fibre gross additions).

Fibre to the home coverage continued to be a European benchmark and reached 14.3 million premises passed, 4.0 million more than in 2014 (+0.9 million in the quarter).

- g **Pay TV** accesses totalled 3.7 million, 10% more compared to December 2014 in organic terms, and included 926 thousand DTS satellite TV accesses. Net additions from October to December improved sequentially to 88 thousand accesses, as a result of 242 thousand net additions in T. España (without DTS) and the lower quarterly net loss of DTS accesses, affected by the migration of customers to Movistar .

Table of Contents

The quarterly churn excluding DTS (1.6%; +0.5 percentage points year-on-year; +0.2 percentage points vs. the third quarter) was slightly impacted by the elimination of permanent contracts in a market with intense commercial activity, ending the year at 1.3%, stable year-on-year.

g The total base of **mobile accesses** stood at 17.3 million, 2.0% lower than in 2014. The **contract** base accelerated its growth throughout the year, to 2% year-on-year in December, with net additions of 90 thousand accesses in October-December as a main highlight (1.6x higher than the same period of 2014). Stripping out M2M, quarterly mobile contract net additions would increase to 17 thousand accesses (+53% year-on-year) with a weaker portability performance vs. the previous quarter in an environment of higher competitive intensity during the Christmas campaign.

Nevertheless, the better performance in the portability balance in 2015 is worth highlighting (-162 thousand versus -508 thousand in 2014) which enabled mobile contract net additions, excluding M2M, to turn positive again throughout the year (+68 thousand vs. -113 thousand in 2014).

Contract churn excluding M2M remained at 1.3% in the fourth quarter (stable versus the previous quarter, -0.2 percentage points year-on-year).

ARPU reached 15.2 euros in the quarter (-2.2% year-on-year), although it was strongly conditioned by the different allocation of revenue of convergent bundles.

g **Smartphone** penetration at the end of the year increased to 66% of the base (+6 percentage points year-on-year) and continued to be the principal lever of data traffic increase (+67% year-on-year). LTE coverage reached 75% of the population, accelerating 9 percentage points vs. September (+17 percentage points vs. 2014) thanks to the boost from the implementation of the 800 MHz band once the interferences with the TDT were cleaned up. Thus, LTE customers totalled 3.3 million, almost doubling those of one year ago, and LTE penetration stood at 21% (+10 percentage points year-on-year).

Revenue included DTS contribution from 1 May 2015 and reached 3,220 million euros in the quarter (+6.0% year-on-year) and 12,402 in the year (+3.2% year-on-year). In organic terms, revenue decreased by 2.0% year-on-year in October-December (-2.1% in January-December).

Excluding the incorporation of DTS, revenue in the fourth quarter increased by 0.8% (+0.2% the previous quarter) and decreased by 1.0% in 2015, reflecting a significant recovery vs. the decline of 7.2% recorded in 2014.

The mobile-fixed revenue breakdown is becoming less and less relevant due to the allocation of revenue of a convergent offer with high penetration. However:

g

Fixed business revenue (2,483 million euros in October-December) increased 0.5% year-on-year organic due to the repositioning of tariffs, the higher revenues in retail broadband, wholesale TV and IT services, and despite the negative DTS contribution (-4.1 percentage points to the organic change). Customer repositioning after the end of the TV promotion is expected to generate incremental revenue of around 30 million euros in the first quarter of 2016 (vs. the fourth quarter).

- g **Mobile business revenue** (1,117 million euros in the fourth quarter) declined 1.9% year-on-year organic, reflecting renewed tariffs, higher mobile data revenue and the decline in MVNOs wholesale revenue. The year-on-year performance improved sequentially (-2.6% in the third quarter) due to higher handset sales (+6.6% year-on-year; +1.5% in the previous quarter).

Table of Contents

Operating expenses include DTS from 1 May 2015 and reached 4,952 million euros in October-December and 10,526 in the year. Nonetheless, they were impacted by the provision of 2,896 million euros accrued as personnel expenses in the quarter, associated with a Voluntary Employment Suspension Plan within the framework of a broad social agreement. In organic terms, operating expenses including DTS increased 0.4% year-on-year in October-December (-0.1% in 2015) due to higher personnel costs not offset by lower supplies.

It should be underlined that gross content costs in the quarter increased 2.6% year-on-year organic, with individual year-on-year performance in T.España (ex-DTS) and DTS not being representative due to the allocation criteria. Meanwhile, net content costs (of TV wholesale revenue) reduced 8.0% year-on-year organic in the quarter.

Breakdown by item:

- g **Supplies** (867 million euros in October-December) declined by 2.6% organic year-on-year (-2.7% in January-December) mainly due to the reduction in interconnection and network equipment expenses.

The worse year-on-year performance of these expenses in the quarter vs. the previous one (-8.3% in July-September) is primarily due to the positive impact of the assets valuation adjustment made in the third quarter in DTS (38 million euros) and to a lesser extent, to the higher growth of gross cost of TV contents and the increased purchase of mobile handsets.

- g **Personnel expenses** (582 million in the quarter before the abovementioned provision) increased 4.4% year-on-year organic affected by a higher expense in incentives in October-December, and 4.0% in the year, reflecting the resumption of the Company's contribution to the pension plan from the third quarter of 2014.

At the end of 2015, the total headcount of Telefónica España stood at 32,171 employees including DTS.

- g **Other operating expenses** (608 million euros in October-December) increased by 1.2% organically (-0.5% in January-December) due to higher real estate and network expenses, and due to the payment of the fee for the 800 MHz band from April 2015. Nevertheless, the year-on-year performance improved in the quarter (+3.2% in the third quarter).

Due to the allocation criteria of content costs already mentioned, the year-on-year evolution of OIBDA at T. España (ex-DTS) is not representative.

OIBDA including the consolidation of DTS since 1 May (with a contribution of 35 million euros) reached 2,336 million euros in 2015, strongly impacted by the extraordinary provisions in the quarter.

OIBDA in the fourth quarter would stand at 1,272 million excluding non-recurrent impacts, with a year-on-year decline of 6.4% without including those factors: i) provision for an amount of 2,926 million euros (2,896 million in personnel expenses and 30 million in other net income (expense) associated to a optimisation plan for the distribution channel); ii) capital gains from the sale of real estate (22 million in the fourth quarter of 2015 vs 41 million in the

fourth quarter of 2014); iii) capital gains from the sale of towers (136 million in the fourth quarter of 2014).

In 2015 the following should also be considered: i) capital gains from the sale of real estate in the first nine months of the year (51 million euros); ii) an assets valuation adjustment in DTS (38 million euros in the third quarter of 2015); iii) capital gains from the sale of towers (38 million in the first quarter of 2015 vs. 55 million in the first nine months of 2014).

As such, **OIBDA margin** in organic terms (affected in part by the incorporation of DTS) stood at 40.2% in October-December and at 42.1% in January-December, with a year-on-year decline of 2.4 percentage points in the quarter and 1.0 percentage points in the year.

CapEx including DTS from 1 May 2015 reached 1,827 million euros, and increased by 4.5% year-on-year organic (+5.5% reported) due to the continuous investment in growth projects.

TELEFÓNICA DEUTSCHLAND

(year-on-year changes in organic terms)

In 2015, Telefónica Deutschland maintained market momentum, increasing slightly mobile service revenue market share while at the same time successfully delivering its improved integration targets (280 million euros in 2015). Mobile service revenue came in broadly stable as guided for the full year, with continued strength in the partner business. As a result of the accelerated execution of synergies and the optimisation of commercial costs, Telefónica Deutschland also achieved its upgraded OIBDA guidance. In 2016, the Company will be moving from integration to transformation and will push ahead with core projects such as network integration, IT transformation and brand migration.

Commercially, Telefónica Deutschland launched a new VDSL campaign at the end of December 2015, supporting its positioning with regards to convergence. In addition, in early February 2016 the company launched Blue One , bringing together various fixed/mobile product combination under a single brand name. Additionally, it continued to follow a focused approach based on retaining its value customers after the re-launch of Blau and the enhanced O2 Blue All-in .

The **total access base** grew 1% year-on-year and stood at 48.4 million at the end of December, mainly explained by a 2% increase of the mobile base (43.1 million). Operating highlights:

- g The **contract mobile customer base** grew 2% year-on-year and reached 19.1 million, with a broadly stable 44% share over the total mobile base. The **prepay access base** increased 3% year-on-year to 24.0 million.
- g **Smartphone** penetration reached 54%, up 1 percentage points quarter-on-quarter driven by the continued growth of LTE customers to almost 8 million at the end of December 2015 (+13% quarter-on-quarter). Thus, LTE penetration improved by 2 percentage points quarter-on-quarter to 19%.
- g **Contract net additions** improved to 198 thousand in October-December (+17% quarter-on-quarter) and reached 709 thousand in January-December (excluding a base adjustment of 400 thousand inactive customers mainly in the business segment in the fourth quarter of 2015 and 428 thousand in the same period of 2014, with no impact on revenues), driven by the continued strong performance of the partner segment.

Prepay registered net disconnections of 24 thousand in the quarter, after the strong performance from ethnic brands during the summer. For the full year, delivered 629 thousand net additions, 33% more than in 2014 due to the strong contribution from partner brands.

- g **Contract churn** (excluding M2M) improved by 0.2 percentage points year-on-year in the fourth quarter to 1.7% and was stable quarter-on-quarter (excluding the customer base adjustment) as a result of the continued focus on retention.

- g **Mobile ARPU** was 10.5 euros in October-December period (-3.2% year-on-year) while contract ARPU stood at 16.9 euros (-4.3% year-on-year) as a result of the higher share of wholesale customers in the base. **Data ARPU** was at 5.5 euros in the quarter (-3.7% year-on-year), explained by the continued decline of SMS volumes while non-SMS data ARPU improved and grew 1.3% year-on-year (flat in the third quarter).

- g The **retail broadband access** trend continued to improve. Net disconnections declined to 5 thousand in the fourth quarter (-13 thousand in the third quarter) and -46 thousand for January to December 2015, more than halving those of the previous year. VDSL was once again the main growth engine, with 73 thousand net additions in October-December (+12% year-on-year) and 260 thousand in 2015 (+55% year-on-year).

- g **Data traffic** increased 36% in the fourth quarter (+45% year-on-year in 2015) as a result of a growing LTE customer base and higher usage of music and video streaming.

Table of Contents

Revenues improved their year-on-year growth trend to +2.0% in the fourth quarter (-1.1% in the third quarter) to 2,059 million euros, as a result of increased rate of variation of handset sales leveraged on regular Christmas promotions. For the full year, revenues increased 1.2% year-on-year and totalled 7,888 million euros (+42.9% year-on-year reported).

Mobile service revenues were broadly stable year-on-year (+0.1%) at 5,532 million euros for the period January-December, while in October-December declined by 1.0% year-on-year to 1,378 million euros as a result of the increasing share of the partner segment within the customer base, which had a dilutive effect due to the revenue shift from retail to wholesale.

Mobile data revenues reached 712 million euros in the fourth quarter (-1.5% year-on-year) driven by declining SMS-usage while full year performance was mainly flat at 2,840 million euros (+0.2% year-on-year). Mobile data revenues over total mobile service revenue was 51%, stable vs 2014. **Non-SMS data revenue** amounted to 517 million euros in the last three months (+3.7% year-on-year) and 2,034 million euros in the full year (+4.9% year-on-year), thanks to the increasing demand of LTE devices. As such, non-SMS data represents 72% of mobile data revenues, 4 percentage points higher than in 2014.

The Company's data monetisation strategy continues to deliver, driven by upselling mechanisms and the successful data automation tool. The rate of automatic extensions of the monthly data allowance increased to 77% of the opted-in customer base in the fourth quarter (54% in the previous one). Also, the adoption of tariff mix in the O2 contract premium business further improved, with the share of new customers opting for a tariff with more than 1GB increasing to 40%.

Handset sales saw an improved performance in October-December (+17.9% year-on-year vs +2.7% in July-September), delivering revenues of 413 million euros and 1,300 million euros in January-December (+16.3% year-on-year).

Fixed revenues year-on-year posted a better performance in the last quarter (-3.2% vs -9.5% in the third quarter) to 266 million euros mainly reflecting the better performance of retail FBB. In 2015, fixed revenues reached 1,043 million euros (-8.3% year-on-year).

Operating expenses were 1,631 million euros in October-December and declined 4.0% year-on-year in organic terms (excluding restructuring costs of 7 million euros in 2015 and 401 million euros in 2014) associated principally with the early capture of integration synergies, in particular in personnel expenses. For January to December, OpEx totalled 6,226 million euros (-3.3% year-on-year). Breakdown by component:

- g **Supplies** declined 2.0% to 747 million euros in the quarter, mainly as a result of lower year-on-year interconnection costs. For the full year, supplies amounted to 2,712 million euros of which 53% were hardware costs of sales and 41% interconnection costs.

- g **Personnel expenses** in the last three months dropped 18.2% year-on-year organic to 155 million euros, mainly resulting from the benefits derived from the execution of the first wave of the restructuring

programme (completed the execution of the 2015 leaver programme, thereby restructuring 800 full time equivalents out of a total target of 1,600). In 2015, these expenses reached 655 million euros, of which 76% were fixed base salaries.

- g **Other operating expenses** totalled 729 million euros in the last quarter of the year, 2.5% lower year-on-year, partly as a result of lower commercial costs. In 2015 were 2,859 million euros, with commercial costs representing 64% of the total.

OIBDA (586 million euros) growth continued to accelerate in the quarter and grew by 35.5% year-on-year (+28.5% in the third quarter) in organic terms (excluding restructuring costs of 7 million euros and the final settlement agreement related to the acquisition of E-Plus of 102 million euros, as well as restructuring costs of 401 million euros in the same period of 2014).

Table of Contents

The strong growth in OIBDA reflected the Company's more efficient commercial strategy to focus on retention over acquisition as well as the early capture of integration synergies, with the latter representing more than 50% of the year-on-year OIBDA growth in the fourth quarter.

As a result, OIBDA for the full year totalled 1,858 million euros (+2.5x year-on-year in reported terms). In organic terms (excluding restructuring costs in 2015: 73 million euros; 2014: 414 million euros and the above mentioned positive settlement of 102 million euros in the fourth quarter 2015) and the disposal of 'yourfone' (15 million euros) OIBDA increased by 19.9% year-on-year.

As a result, the **OIBDA margin** excluding the previously mentioned non-recurrent impacts stood at 23.9% in the fourth quarter (+5.9 percentage points year-on-year) and at 23.0% for 2015 (+3.6 percentage points year-on-year).

CapEx amounted to 2,230 million euros (1.2 billion euros related to spectrum) and declined 11.1% year-on-year excluding spectrum. The strong year-on-year decline reflects the realisation of synergies which outweighed network integration costs and investments in the accelerated LTE rollout, with outdoor coverage reaching the targeted 75% at year-end.

Operating Cash Flow (OIBDA-CapEx) excluding spectrum reached 826 million euros, more than double vs 2014 (in organic terms and excluding the impact from the disposal of 'yourfone' previously mentioned).

Notes:

- The operational data include E-Plus from 1 October 2014.

- ARPU: monthly average revenue divided by the monthly average accesses of the period.

- Voice traffic is defined as minutes used by the company customers, both outbound and inbound. On-net traffic is only included once (outbound), and promotional traffic is included. Traffic not associated to the Company's mobile customers (roaming-in, MVNOs, interconnection of third parties and other business lines) is excluded. Traffic volume non rounded.

- Data traffic is defined as Terabytes used by the company customers, both upload and download (1TByte = 10¹² bytes). Promotional traffic is included. Traffic not associated to the Company's mobile customers (roaming-in, MVNOs, interconnection of third parties and other business lines) is also included. Traffic volume non rounded.

(1) Excludes M2M.

TELEFÓNICA BRASIL

(year-on-year changes in organic terms)

Telefónica Brasil closed 2015 with a substantial improvement in its competitive position in the market. Thus, in the mobile business, it is worth noting the strengthening of its leadership in higher value segments, which allowed it to capture the whole growth in the year of mobile service revenues and, in the fixed business, to boost the transformation towards fiber and pay TV following the integration of GVT, enabling fixed business revenues to return to year-on-year growth after 4 years of decline.

In the fourth quarter, revenues and OIBDA maintained solid year-on-year growth with an expansion in profitability driven mainly by the acceleration in the adoption of mobile data, the positive performance of fibre and pay TV and the efficiencies achieved in operating expenses. At the same time, the commencement of the capture of synergies compensated at the expenses level the negative impacts associated with the macroeconomic situation.

On the other hand, it is worth noting that results were affected by the cut in termination rates in the mobile business (-33.0%) and of the fixed-mobile retail tariff (VC: -23.3%) from 24 February 2015, which reduced revenue growth by 2.7 percentage points in 2015. In 2016, the reduction in mobile rates shall be 33%, applicable from February 2016.

Telefónica manages 96.9 million **accesses** in Brazil 6% lower year-on-year due to the reduction in prepay mobile accesses, a result of the more restrictive calculation of accesses, which are partially offset by the growth in mobile contract, broadband and Pay TV.

In the **mobile business**:

- g **Mobile accesses** reached 73.3 million and decreased by 8% year-on-year reflecting the decline of prepay accesses (-18% year-on-year; net losses of 6.8 million customers in the quarter, -9.4 million in the year). On the other hand, contract accesses grew by 10% year-on-year.

Thus, Vivo strengthened its leadership in the higher value segments, reaching a contract market share of 42.4% (+0.6 percentage points year-on-year), after capturing 69% of the new accesses in the quarter (50% in the year). At the same time, it maintained its leadership in total accesses with a market share of 28.4%. The focus on value accesses permitted the increase in market share of mobile revenues to 40.3% (+5.2 percentage points year-on-year).

In contract, net additions amounted to 639 thousand accesses in the quarter (2.7 million accesses in the year), highlighting the stability in churn levels despite the deterioration of the macroeconomic situation (1.8% in the fourth quarter, stable year-on-year). In the quarter, the change in the commercial offering of contract plans is worth noting, with higher volume of data and delivered minutes and the inclusion of the innovative Vivo Bis concept (data not consumed in the current month rolls over to the following month).

Meanwhile, **smartphones** increased their penetration to 60% (+19 percentage points year-on-year) following a 33% year-on-year growth. The strong acceleration of LTE accesses in the last three months should be noted, multiplying by

4 times year-on-year to reach 10.2 million accesses (15% penetration), following the increase in coverage to 183 cities (47% of population coverage) maintaining its leadership in the segment with a share of 37.5%.

Table of Contents

g Thus, **data traffic** posted strong year-on-year growth (+10% in the quarter, +28% in the year) with a growing traffic contribution from 4G networks (39% of traffic in the main cities in Brazil). Meanwhile, **voice traffic** continued to increase year-on-year (+1% in the quarter; +3% in the year).

g **ARPU** grew year-on-year by 3.0% in the quarter (+1.6% in the year) driven by the strong growth in data ARPU, which continued to accelerate its growth to 40.5% (+31.5% in the year). The strong boost in data consumption more than offset the negative effect of lower incoming ARPU impacted by the reduction of termination rates. Outgoing ARPU increased by 6.9% year-on-year (+6.4% in the year).

The main operating figures in the **fixed business** in the last three months were affected by the homogenisation of calculation criteria of accesses with GVT (with no impact on revenue performance), reflected by net losses of 222 thousand accesses in the traditional business, 62 thousand in fixed broadband accesses and 41 thousand in the pay TV business.

g **Traditional accesses** (14.7 million) decreased year-on-year by 2% affected by the previously mentioned homogenisation criteria and due to lesser commercial focus on fixed wireless accesses, partially offset by the positive performance of GVT accesses and by the improvement showed in copper accesses.

g **Retail broadband accesses** amounted to 7.1 million accesses increasing 4% year-on-year. It is worth mentioning the growing weight in fibre accesses, already accounting for 53% of the base (+5 percentage points year-on-year) after reaching 3.8 million accesses (587 thousand with FTTH technology) which translated into a progressive improvement in the quality of the base (ARPU year-on-year growth of 5.7% in the quarter; +6.6% in the year). The coverage of premises passed with FTTx stood at 16.6 million (4.7 million premises passed with FTTH in Sao Paolo). Thus, the Company has strengthened its positioning in the highest value segments capturing 52% of new accesses in the market in the year for speeds above 34 Mb.

g **Pay TV accesses** increased year-on-year by 10% to 1.8 million despite the slowdown in year-on-year growth in the quarter as a result of the previously mentioned criteria unification, the change of television platform and the impact of higher handset costs due to the depreciation of the real against the USD. The growth in the weight of IPTV accesses (16% of gross additions and 10% of total accesses) enabled ARPU to continue accelerating its year-on-year growth (+7.8% in the quarter). Thus, Telefónica Brasil closed 2015 having captured all new pay TV access in the market in 2015.

Revenues for the fourth quarter of the year totalled 2,587 million, showing a solid year-on-year growth of 3.4% with a positive contribution from both the fixed business (for the third consecutive quarter) and the mobile, and despite the deterioration in the macroeconomic situation and the impact of regulatory changes (impact of -2.5 percentage points in year-on-year growth in the quarter; -2.7 percentage points in the year). Revenues totalled 11,060 million euros in the year (+4.5% year-on-year).

Mobile business revenues reached 1,526 million euros in the quarter, and grew 3.3% year-on-year (+6.2% in the year); the year-on-year growth slowed slightly compared to the previous quarter due to the lower growth from handset sales and due to the strong boost to revenues in the fourth quarter of the previous year related to the commencement of measures adopted to improve the monetisation of data services.

- g **Mobile service revenues** (1,444 million euros in the quarter) increased by 2.7% year-on-year (+5.3% in the year) underpinned by the growth in contract accesses and penetration of mobile data services, offsetting the reduction in termination rates (reducing year-on-year growth in the fourth quarter by 2.9 percentage points; -3.0 percentage points in the year) and lower consumption, mainly in prepay, as a result of the worsened macroeconomic situation.

Data revenues reflected the boost in the penetration of 4G accesses and of smartphones, and presented further improvement in year-on-year growth of 37.6% in the quarter (+34.5% in the year), already accounting for 49% of

Table of Contents

service revenues (+13 percentage points year-on-year). Non-SMS data revenues represented 85% of total data revenues in the quarter (+5 percentage points year-on-year) and increased 45.4% year-on-year (+44.1% in the year).

- g **Handset revenues** increased by 16.4% year-on-year in the quarter as a result of the higher unit price of handsets (greater weight of value gross additions and due to the price adjustment to transfer the depreciation of Brazilian real against the USD). Nevertheless, year-on-year growth decelerated compared to the previous quarter (+36.8%), a reflection of lower commercial activity of handset sales.

Fixed business revenues (1,060 million euros in the quarter) maintained a solid rate of growth (+3.5% year-on-year in the quarter; +1.9% in the year) thanks to the growing contribution from revenue growth in Sao Paulo (+1.0 percentage points in the quarter; -0.3 percentage points in the year) and from the contribution of GVT (+2.5 percentage points in the quarter; +2.2 percentage points in the year). The impact of regulation reduced 2.1 percentage points the year-on-year growth in the quarter (-2.5 percentage points in the year).

- g Thus, **broadband and new services revenues** accelerated their year-on-year growth to 10.9% in the quarter (+9.3% in the year) thanks to the increase and the higher quality of the base both in broadband and in pay TV, reflected in the aforementioned increase of ARPU.

- g **Voice and access revenues** decreased 2.3% compared to the fourth quarter of 2014 (-3.5% in the year) affected by regulatory impacts and fixed-mobile substitution.

Operating expenses (1,741 million euros) decelerated their year-on-year growth to 5.6% in the quarter (+6.1% in the year; +6.6% in the third quarter) due to the continuous efficiency measures implemented by the Company to offset the negative effects of the macroeconomic situation and the depreciation of the Brazilian real against the USD.

- g **Supplies** (593 million euros in the fourth quarter) grew by 5.3% year-on-year (+4.4% in the year) as a result of the higher average cost of handsets (impact of the depreciation of the real against the dollar and of the greater weight of high-end devices) and of the higher content expense (strong growth of pay TV users). These effects were partially offset by the positive impact of the reduction of termination rates.

- g **Personnel expenses** (262 million euros in the quarter) increased by 5.5% (+3.5% in the year) as a result of the internalisation of a subcontract (257 employees in September and increasing to 757 in December) and of inflation. Nevertheless, the continued efficiency effort was reflected in a year-on-year growth lower than the adjustment for salaries made since September 2015. Year-on-year growth excludes the expenses associated with the headcount restructuring plan (7 million in the year 2015 and 68 million in the fourth quarter of 2014).

- g **Other operating expenses** (885 million euros in the quarter) increased by 5.9% year-on-year in the quarter (+7.8% in the year) mainly associated with the higher commercial costs and the higher energy expense. In the quarter, however, the deceleration in year-on-year growth is notable due to the lower provision for bad debt out of revenue (-0.2 percentage points year-on-year), following the measures implemented by the Company to control its impact.

OIBDA amounted to 983 million euros in the quarter (including 9 million euros from the sale of non-strategic towers) and increased by 7.3% year-on-year positively impacted by the solid performance of revenues and the containment and efficiency measures taken to limit the growth of expenses. It also reflects the non-recurring positive impact of the expiration of an account payable in Brazil (98 million euros). OIBDA in the year reached 3,573 million euros (+2.9% year-on-year).

Thus, the **OIBDA margin** stood at 38.0% in the quarter (+1.3 percentage points year-on-year) and at 32.3% in the year (-0.5 percentage points year-on-year).

Table of Contents

CapEx in the year 2015 amounted to 2,105 million euros (-1.1% year-on-year), and was mainly devoted to expanding coverage and improving capacity in 3G and 4G mobile networks, as well as to the deployment of the fibre network both in transport and access.

Thus, the **operating cash flow (OIBDA-CapEx)** totalled 1,468 million euros and increased by 9.3% compared to the previous year.

TELEFÓNICA HISPANOAMÉRICA

(year-on-year changes in organic terms)

Telefónica Hispanoamérica closed 2015 with solid year-on-year growth both of revenues and OIBDA and with a gradual improvement in the commercial activity of value customers. Thus, in the fourth quarter mobile contract net additions reached record levels, more than three times higher than those recorded in the same period of 2014. Meanwhile, in the fixed business, the commercial results reflected the success of the service-bundling strategy, with a growing migration of customers towards higher speeds in broadband and a significant boost in pay TV penetration.

The **total accesses** of Telefónica Hispanoamérica reached 134.6 million at the end of the year (+2% year-on-year). In the **mobile business**, highlights include:

- g **Mobile accesses** totalled 113.3 million, up 3% year-on-year, with a significant growth acceleration in contract accesses (+6% year-on-year), representing 22% of the total (+1 percentage point year-on-year). Thus, net additions in the fourth quarter reached 2.1 million accesses, with 732 thousand in contract (an historic record for the Company and more than three times higher than those of the fourth quarter of 2014) recording strong growth in Mexico, Peru, Colombia and Chile and consolidating the change in the trend which began in mid-2015. In prepay, net additions of 1.3 million accesses were recorded, 34% lower than in the fourth quarter of 2014 due to higher competitive intensity mainly in Chile and in Peru.

Smartphones reached a penetration of 37% at the end of the year (+10 percentage points year-on-year) with the access base growing by 44% year-on-year. At the same time, penetration of LTE handsets continued to grow progressively and in December 2015 reached 8% (+6 percentage points year-on-year) to 8.3 million accesses, with a population coverage of 41%.

- g The **ARPU** increased in October-December by 3.9% year-on-year (+6.1% in January-December), slowing in the quarter mainly due to the repositioning of Mexico's commercial offering and the different seasonality of tariff updates in Argentina. Thus, traffic continued with a strong growth trend in both **voice traffic** (+11% in the quarter; +9% in the year) and data traffic (+78% in the quarter; +64% in the year).

On the other hand, the **fixed business** highlights include:

- g **Fixed telephony accesses** stood at 12.8 million at December 2015 (-4% year-on-year) with net losses of 205 thousand accesses in the quarter (-545 thousand in the year).

- g **Fixed broadband accesses** reached 5.6 million accesses, 4% year-on-year more than in December 2014, and recorded quarterly net additions of 24 thousand accesses and 231 thousand in 2015. The continued improvement in quality levels was reflected in the increased average speed and, therefore, the access base with speeds above 4Mb increased by 4 percentage points year-on-year to 54%.

- g **Pay TV accesses** posted solid year-on-year growth of 16% reaching 2.8 million accesses, with net additions of 70 thousand accesses in October-December and 380 thousand in January-December, the highest level of net additions ever recorded in a year by Telefónica in Hispanoamérica.

Revenues in the fourth quarter increased by 8.1% year-on-year reaching 3,622 million euros (+10.1% year-on-year in January-December to 14,387 million euros), slowing in the quarter mainly due to a change in the trend of handset sales (-5.0% year-on-year in the fourth quarter, +13.7% in the third), higher regulatory impact (deducting 1.6 percentage points from the change in the quarter; -1.3 percentage points in the year) and the reduced contribution to growth of the service revenues in Mexico and Argentina.

Table of Contents

In reported terms, revenues in the fourth quarter remained virtually stable in the year-on-year comparison (+0.1%), increasing by 9.4% year-on-year in the year.

- g **Mobile service revenues** increased by 8.8% in the October-December period (+10.6% in January-December) reflecting the previously mentioned deceleration of ARPU. **Data** revenues increased by 26.0% year-on-year in the quarter (+23.6% in the year) boosted by non-SMS revenues (+44.0% year-on-year; +39.5% in the year), already representing 87% of the total data revenues (+11 percentage points year-on-year).
- g **Handset sales** decreased by 5.0% year-on-year in the quarter (+7.4% in 2015), reflecting the increased commercial intensity in Mexico with a greater level of subsidies, lesser availability of handsets in Venezuela and, on the other hand, the adjustment in the sales price of handsets to incorporate the currency depreciation effect against the USD.
- g **Fixed business revenues** posted another quarter of solid year-on-year performance, increasing by 10.6% (+10.0% in the year), fostered by **broadband and new service revenues**, (+21.2% in the quarter; +20.5% in January-December) accounting for 67% of fixed business revenues (+6 percentage points year-on-year). Meanwhile, **voice and access revenues** decreased by 7.3% year-on-year (-10.5% in January-December).

Operating expenses increased by 13.3% year-on-year in the fourth quarter totalling 2,652 million euros (+12.1%, totalling 10,329 million euros in the year). Breakdown by component:

- g **Supplies** (1,060 million euros in the fourth quarter), up 3.9% year-on-year, significantly slowed their growth (+7.2% year-on-year in January-December) due to lower handset sales. On the other hand, the reduction of termination rates in Mexico, Colombia, Chile and Peru translated into a positive impact on its year-on-year comparison.
- g **Personnel expenses** (445 million euros in the quarter) increased by 19.5% in the fourth quarter (+16.0% year-on-year in 2015), excluding the impact of the provision for restructuring costs carried out both in 2015 (38 million euros in the year, 29 million of which in the fourth quarter) and in 2014 (99 million euros entirely in the fourth quarter). The average workforce remained stable year-on-year.
- g **Other operating expenses** (1,147 million euros in October-December) rose by 20.9% year-on-year (+15.5% year-on-year in January-December) affected by inflation, the management of higher volumes of both data and voice traffic and the solid commercial activity.

OIBDA for October-December totalled 1,124 million euros, up 4.0% year-on-year. In 2015, it totalled 4,356 million growing by 7.2% year-on-year excluding 18 million euros from the sale of non-strategic towers, mainly in Chile in

2015 (9 million in the fourth quarter), and 4 million in 2014. Furthermore, it incorporates a positive impact of 79 million euros in Mexico resulting from the spectrum swap with AT&T conducted in December 2015.

In reported terms, the OIBDA increased by 1.2% year-on-year in the fourth quarter and by 7.1% in the year.

Thus, the **OIBDA margin** stood at 31.0% in October-December (-1.3 percentage points year-on-year) and at 30.3% in January-December (-0.8 percentage points) given the increased commercial effort (with greater weight in the highest value segments).

CapEx totalled 3,060 million euros in 2015, 17.2% more than in 2014 (excluding 338 million euros of spectrum acquisition in 2015 and 405 millions in 2014). Investment is mainly devoted to the deployment of 3G and 4G networks, with significant efforts to expand the coverage of this latest technology, as well as to the continuous improvement of the transport network to support the growing consumption of data traffic.

Thus, the **Operating Cash Flow (OIBDA-CapEx)** for the year 2015 stood at 1,296 million euros, representing a year-on-year decline of 7.0% (+5.7% in reported terms).

Note:

- The comparative figures for October-December 2014 have been modified with respect to those presented at the close of December 2014, solely for comparative purposes, due to the conversion to SICAD II 50 VEF/USD of those operations referenced to the Venezuelan bolivar in the first, second and third quarters of 2014. In the January-December 2015 period the consolidated financial statements use the exchange rate of the Venezuelan bolivar

Edgar Filing: TELEFONICA S A - Form 6-K

set at the denominated SIMADI (as of 31 December this rate was set at 199 Venezuelan bolivars fuertes per dollar).

- OIBDA before management and brand fees.

- 2014 and 2015 reported figures include the hyperinflationary adjustments in Venezuela in both years.

Table of Contents**Telefónica Argentina**

(year-on-year changes in organic terms)

Telefónica Argentina ended 2015 with solid year-on-year revenue and OIBDA growth, despite the slowdown in growth in the quarter due to the different seasonality in the tariff updates in 2015 and 2014 and the impact of lower consumption.

Likewise, it should be highlighted that the acquisition of value customers continued in the quarter after posting positive contract net additions for the second consecutive quarter. Additionally, LTE accesses adoption was significantly boosted, after reaching a coverage of 65% of the population at the end of the year.

The Company managed 26.9 million **accesses** (+1% year-on-year). In the **mobile business** it is worth highlighting:

- g **Mobile accesses** amounted to 20.4 million (+2% year-on-year) after recording positive net additions for the second consecutive quarter (560 thousand accesses; 367 thousand in the year) as the first half of the year was affected by the limited availability of handsets in the market.

In contract, quarterly net additions reached 111 thousand accesses in the quarter (-110 thousand in the year) and in prepay 449 thousand accesses (477 thousand in the year), highlighting in both cases the sequential churn reduction to 1.3% and 2.3% respectively. The widespread reduction in the levels of subsidies in the market since November has resulted in lower gross additions than in the fourth quarter of 2014.

- g Significant increase in **smartphones** penetration (37%; +6 percentage points year-on-year) after the access base grew by 21%. This positive performance was driven in the last two quarters by the strategic focus on the rapid adoption of LTE, which already amounted to 1.7 million, after posting net additions of 790 thousand accesses in the fourth quarter (1.3 million in the last two quarters).
- g **Data traffic** increased by 2.2 times year-on-year in the quarter (almost 2x increase in the year), highlighting the growing contribution from LTE traffic, which at December 2015 accounted for more than 30% of total traffic. **Voice traffic** decreased by 8% year-on-year in the quarter (+2% in the year), reflecting the slowdown in the levels of consumption in the economy.
- g **ARPU** increased by 12.0% compared to the fourth quarter of 2014 (+22.3% in the year) and reflected the success of the promotions in prepay and better monetisation of services, although in the quarter there was a slowdown in growth as a result of seasonality in the schedule for the tariff updates in 2015 and 2014 and lower level of consumption.

Regarding commercial activity in the **fixed business**:

- g **Traditional fixed accesses** amounted to 4.6 million (-2% year-on-year) following net losses of 27 thousand accesses in the quarter (-92 thousand accesses in the year), as a consequence of the reduced commercial activity partially offset by maintaining the downward trend in churn (-0.1 percentage points year-on-year in the quarter and sequentially).

- g **Retail broadband accesses** totalled 1.9 million (+1% year-on-year) with net additions in the quarter of 4 thousand accesses (11 thousand in the year), also highlighting churn performance, which remained at benchmark levels (1.3%; stable year-on-year), and the progressive increase in the quality of the base.

Revenues amounted to 983 million euros in the quarter maintaining a solid year-on-year growth levels (+18.0% in the quarter; 3,915 million euros in the year, +21.5%) in both the mobile and fixed businesses.

Table of Contents

Thus, **mobile business revenues** amounted to 641 million euros in the quarter increasing by 17.2% year-on-year (+20.2% in the year).

- g **Mobile service revenues** increased by 16.6% year-on-year in the quarter (+22.9% in the year) underpinned by the growth in ARPU and the accesses base.
- g **Data revenues** accelerated their growth in the fourth quarter to 30.2% year-on-year (+20.4% in the year) as a result of the significant increase in the smartphones base, mainly with LTE technology. Thus, data revenues accounted for 45% of service revenues in the quarter, and 79% of data revenues are already non-SMS revenues (+22 percentage points year-on-year).

Fixed business revenues totalled 342 million euros and grew 19.6% (+24.0% in the year).

- g **Broadband and new services revenues** increased by 26.7% year-on-year in the quarter (+32.6% year-on-year in the year), mainly as a result of the improved quality of the base. Thus, these revenues already accounted for 59% of fixed revenues (+4 percentage points year-on-year).
- g **Voice and access revenues** increased by 7.0% year-on-year in the quarter (+12.2% in the year) supported by the higher ARPU. The slowdown in year-on-year growth in the quarter was explained by the lower levels of consumption.

Operating expenses totalled 769 million euros in the quarter, 31.3% more than in the same period of 2014 (+22.9% in the year) excluding 13.5 million euros associated with the headcount reduction plan in the fourth quarter of 2014. This increase is mainly due to the increase in inflation (mainly impacting on personnel and customer service expenses) and higher commercial expenses associated with the growth of value customers (contract and LTE), partially offset by the efficiency measures implemented by the company. Likewise, the year-on-year performance is affected by a positive impact posted in the fourth quarter of the previous year related to the renegotiation of commercial debt with suppliers.

OIBDA amounted to 224 million euros in the fourth quarter and decreased by 11.2% year-on-year (+17.2% in the year), as a consequence of the revenues and expenses performances described above. The **OIBDA margin** stood at 22.6% in the quarter (-6.0 percentage points year-on-year) and 25.4% in the year (-0.4 percentage points).

CapEx totalled 938 million euros, with a 38.8% year-on-year increase devoted to the expansion of capacity and coverage mainly of the 4G network, as well as the fixed networks.

Thus, **operating cash flow (OIBDA-CapEx)** totalled 68 million euros and decreased by 18.5% compared to the previous year.

Table of Contents
Telefónica Chile

(year-on-year changes in organic terms)

During 2015, Telefónica Chile consolidated its leadership position in the market, highlighting the progress made in the high-value segments. Thus, in the fixed business, especially noteworthy was the expansion of the pay TV business and the progressive adoption of high-speed broadband plans and, in the mobile business, the focus on acquisition and retention of higher-quality customers.

Thus, revenues and OIBDA in 2015 posted a solid performance year-on-year against a backdrop marked by the intense competitive levels and by the impact of regulatory changes (since 25 January reduction of the mobile termination rates of 16% and since 5 May in the fixed network termination rates of 8%).

Telefónica managed 13.2 million **accesses** in Chile (-5% year-on-year). In the **mobile business** highlights include:

- g **Mobile accesses** stood at 9.9 million (-7% year-on-year), although it should be noted that the growth in contract accesses increased to 4% after posting quarterly net additions of 59 thousand accesses (117 thousand in the year) recording yet another quarter of positive balance in portability (+25 thousand accesses; +78 thousand in the year). Meanwhile, prepay accesses posted net losses of 273 thousand accesses in October-December mainly due to higher competition intensity.
- g **Smartphones** amounted to 2.9 million accesses (+3% year-on-year) and recorded net additions of 56 thousand accesses in the fourth quarter (86 thousand in 2015), reaching a penetration of 31% (+3 percentage points year-on-year). LTE accesses (1.1 million in December 2015) more than doubled year-on-year due to the accelerated deployment of LTE coverage (76%; +12 percentage points year-on-year).
- g Thus, **data traffic** accelerated its year-on-year growth to 64% in October-December (+47% in January-December). Meanwhile, **voice traffic** also improved its year-on-year growth rate to 5% in the last three months (+1% year-on-year in 2015).
- g **ARPU** remained stable year-on-year in the fourth quarter (+0.2%; +1.0% in the year) highlighting the strong expansion of data ARPU that accelerated to 32.9% year-on-year in the quarter (+26.9% in 2015).

Regarding commercial activity in the **fixed business**, broadband and pay TV maintained the positive performance shown throughout the year thanks to the service-bundling strategy and a differentiated offer.

g

Traditional fixed accesses stood at 1.5 million in December (-6% year-on-year), with a net loss of 24 thousand accesses in the fourth quarter (-93 thousand in the year).

- g Retail broadband accesses grew by 6% year-on-year to 1.1 million and recorded quarterly net additions of 6 thousand accesses (60 thousand in 2015). It is worth mentioning the quality increase of the customer base due to the progressive migration of accesses towards higher speed plans, with 77% of the base in speeds above 4Mb (+6 percentage points year-on-year). Additionally, the focus was maintained on the deployment of high-speed broadband with 354 thousand premises passed with fibre and 351 thousand premises with VDSL at the end of the year.

- g Pay TV accesses amounted to 645 thousand (+7% year-on-year), with net additions of 4 thousand accesses in October-December (43 thousand in January-December) supported by a differentiated offer in both the content and the platform capacities.

Revenues in the fourth quarter of 2015 reached 536 million euros and decreased 0.6% year-on-year (2,220 million in the year; +1.7% year-on-year) impacted by the lower handset revenues (-42.4% year-on-year in the quarter; -17.7% in

Table of Contents

the year) and the negative effect of regulation (which reduced by 0.7 percentage points the growth of revenues in the quarter; -1.7 percentage points in the year). On the other hand, it should be highlighted the positive performance of fixed business revenues with solid growth throughout the whole year.

Mobile business revenues amounted to 301 million euros and decreased by 5.5% year-on-year in the fourth quarter (1,292 million euros; -0.9% year-on-year in the year).

g **Mobile service revenues** stood at 278 million euros in the last three months and remained stable year-on-year (+1.2% in 2015) impacted by the reduction in termination rates (reducing year-on-year growth by 1.2 percentage points in the quarter; -2.0 percentage points in the year). It should be highlighted the increase in **data revenues** that accelerated to 30.2% year-on-year in the quarter (+27.2% in the year) and accounted for 39% of mobile service revenues (+9 percentage points year-on-year). Non-SMS data revenues grew by 30.8% year-on-year in the quarter (+29.6% in the year) driven by the higher smartphone penetration and reached 94% of data revenues.

g **Handset revenues** decreased 42.4% year-on-year in October-December (-17.7% in January-December) due to the direct sale of prepaid handsets through third party distribution channels, resulting both in lower revenues and in lower expenses.

Fixed business revenues amounted to 235 million euros in the last three months of the year and showed a solid year-on-year growth of 6.4% (+5.4% year-on-year in 2015) driven by broadband and TV revenues, and despite the negative impact of the regulatory changes (+6.6% year-on-year in the quarter stripping out this effect; +6.9% in the year).

g **Broadband and new services revenues** increased by 14.5% year-on-year in the quarter (+15.6% in 2015) reflecting the strong growth of broadband and pay TV accesses. Thus, these revenues accounted for 69% of fixed business revenues (+5 percentage points year-on-year).

g **Voice and access revenues** decreased 8.3% year-on-year in the quarter (-12.0% in the year) affected by the aforementioned regulatory changes and by the fixed-mobile substitution effect.

Operating expenses totalled 370 million euros in the quarter and fell by 0.5% year-on-year (1,521 million euros in 2015; +2.2% year-on-year) due to the higher rationality in commercial expenses, which more than offset the higher network expenses. Additionally, they included a non-recurring impact of 9 million euros due to the headcount restructuring plan in the fourth quarter of 2015 (8 million euros in the fourth quarter of 2014).

OIBDA reached 194 million euros in the fourth quarter and remained broadly stable year-on-year (760 million in 2015; +1.1% year-on-year). In addition to the above mentioned restructuring costs, OIBDA includes 17 million euros from the sale of non-strategic towers (9 million in the fourth quarter) and, in 2014, 4 million (1 million in the fourth quarter). Thus, **OIBDA margin** stood at 36.2% in the quarter (stable year-on-year) and 34.2% in the year (-0.2 percentage points year-on-year).

CapEx totalled 433 million euros in 2015 (-4.7% year-on-year organic, excluding 6 million euros from the acquisition of spectrum in the first quarter of 2015) and was mainly allocated to the accelerated deployment of the 4G network, the increase in 3G capacity and the continued improvement of the fixed network quality, both in the transport and in the access.

Thus, **operating cash flow (OIBDA-CapEx)** stood at 327 million euros in 2015 (+9.8% year-on-year).

Table of Contents

Telefónica Perú

(year-on-year changes in organic terms)

In the fourth quarter, Telefónica Perú showed a solid acceleration in revenues and OIBDA growth derived both from the success of the strategy of acquisition and retention of contract accesses implemented throughout the year, as well as from the strong growth in the fixed broadband and pay TV accesses.

At the end of the year, the Company managed 22.2 million **accesses** (+1%). In the **mobile business** highlights include:

- g **Mobile accesses** stood at 16.8 million, stable year-on-year supported by the positive performance of contract accesses (+13% year-on-year) that already represent 34% of the total (+4 percentage points year-on-year). Prepay accesses fell by 6% compared to year end 2014 in a highly competitive environment.

As a result of the strategic focus on the growth of value accesses, **smartphones** more than doubled year-on-year (32% of total accesses, +17 percentage points year-on-year) and LTE accesses amounted to 1.4 million (penetration of 8%).

- g **Net additions** totalled 13 thousand accesses in the quarter (-4 thousand in the year), supported by the contract segment, after reaching the highest net additions of the last 9 quarters (255 thousand accesses, 659 thousand in the year) due to the success of the commercial strategy, with a new portfolio of plans that boosted gross additions and migrations from prepay; churn also improved (1.8%; -0.1 percentage points). On the other hand, net losses of 242 thousand accesses in the quarter were recorded in prepay (-663 thousand in the year), affected by the highly competitive environment and by the aforementioned boost of contract migrations.

- g **Voice traffic** accelerated its year-on-year growth in the quarter to 23% (+16% in January-December), as a result of the success of the new commercial plans. Likewise, **data traffic** accelerated its growth in the quarter (2.5x compared to October-December 2014; 2.2x in January-December), driven by the promotion of unlimited traffic for 3 months which promoted the adoption of 4G.

- g **ARPU** decreased year-on-year by 3.6% compared to the fourth quarter of 2014 (-1.7% in the year), affected by the reduction of the termination rates applied since April, and the repositioning of tariffs. Data ARPU continued to show a positive trend (+5.3% year-on-year in the quarter, +19.0% in January-December), although it was impacted by the abovementioned launch of the unlimited traffic promotion for 3 months .

Regarding the **fixed business**, particularly noteworthy once again was the success of the bundling campaigns (Completa tu Trío), underpinned by the differential attributes of the pay TV offer, resulting in 56% of the traditional business accesses base now being bundled services (+8 percentage points year-on-year):

- g Traditional fixed accesses totalled 2.6 million at the end of the year (-4% year-on-year) after posting net losses of 38 thousand accesses in the quarter (-118 thousand accesses in the year).

- g Retail broadband accesses reached 1.6 million in December 2015 (+8% year-on-year) and posted net additions of 19 thousand accesses in the quarter (120 thousand customers in January-December), a result of the successful service-bundling strategy, which translated into a reduction of churn to the lowest level in the last four years (1.8%; -0.4 percentage points year-on-year). Likewise, it is worth mentioning that 73% of the customer base is now on speeds equal to or above 4 Mb.

- g Pay TV accesses stood at 1.2 million customers at the end of the year (+27% year-on-year) and recorded net additions of 53 thousand accesses in the quarter (253 thousand in the year) supported both by own-produced and exclusive content (Peruvian football league) and by the digitalisation of the network (with a higher number of channels in high definition and greater platform functionality).

Table of Contents

Revenues totalled 695 million euros in the fourth quarter and accelerated their year-on-year growth to 3.4%, due to an acceleration in the monetisation of fixed services and despite being affected by the impact of regulation mainly in the mobile business (this effect deducted 3.5 percentage points from the year-on-year growth in the quarter and 2.1 percentage points in the year). In January-December revenues increased to 2,766 million euros (+3.5% year-on-year).

Mobile business revenues stood at 391 million euros in the quarter (+0.3% compared to October-December 2014; +2.9% in January-December).

- g **Mobile service revenues** decreased by 0.2% in the fourth quarter (+4.2% year-on-year in the year), affected by a very competitive environment, and by the regulation effect previously mentioned (+5.5% year-on-year in the fourth quarter; +8.0% in the year, stripping out this impact).

On the other hand, **data revenues** recorded a year-on-year growth in the quarter of 6.2% (+23.1% in the year) and accounted for 31% of service revenues (+2 percentage points year-on-year). Non-SMS data revenues increased by 18.4% in the quarter (+32.9% in January-December), already accounting for 95% of mobile data revenues (+10 percentage points year-on-year).

- g **Handset revenues** increased by 4.5% in the quarter, reverting the trend seen throughout the rest of the year (-6.4% in the year), as a consequence of the larger mix of mid and high range handsets commercialised during the Christmas campaign.

Fixed business revenues stood at 304 million euros in October-December and accelerated to 7.7% year-on-year (+4.3% in January-December).

- g **Broadband and new service revenues** accounted for 77% of total revenues in the fourth quarter (+11 percentage points year-on-year) and increased by 26.4% year-on-year (+15.6% in January-December), as a result of a better customer mix (more premium bundles in pay TV), which translated into ARPU year-on-year growth of 1.5%, and of a strong growth in both TV and broadband accesses.

- g **Voice and access revenues** decreased by 27.6% year-on-year in the quarter (-16.6% in the year), affected by a new reduction in service rates in November 2015 (-23.8% year-on-year stripping out the regulatory impact in the quarter, -14.9% in January-December).

Operating expenses reached 456 million euros in the quarter and decreased by 1.1% year-on-year, reverting the trend of year-on-year increases (+6.0% year-on-year in January-December) due to a greater rationalisation of the commercial expense and due to greater efficiencies achieved in general expenses, and include 2 million euros of restructuring costs in the fourth quarter of 2015 (65 million in the same quarter of 2014). Likewise, the year-on-year comparison reflects the impact of the exchange rates on expenses denominated in US dollars and network maintenance operating expenses, as well as lower termination costs due to the reduction in termination rates previously mentioned.

OIBDA stood at 253 million euros in the fourth quarter and increased by 12.1% year-on-year (943 million in the year; -1.5%) as a result of the growth in revenues and the improved costs performance in the quarter. Thus, the **OIBDA margin** reached 36.4% in the quarter (+2.8 percentage points year-on-year) and 34.1% in the year (-1.7 percentage points year-on-year).

CapEx amounted to 491 million euros in 2015 (+9.3% year-on-year) and reflected an increase in the investment both in fixed broadband (with loops cut to increase the speed of the base, deployment of higher capacity networks and digitalisation of the TV base), and in the mobile business, with higher capacity to maintain quality due to the growing data demand.

Thus, **operating cash flow (OIBDA-CapEx)** totalled 452 million euros in the year (-10.7% year-on-year).

(1) Excludes M2M.

Table of Contents**Telefónica Colombia**

(year-on-year changes in organic terms)

In the fourth quarter of the year, Telefónica Colombia consolidated the improved operating performance in the mobile contract segment, following the restructuring of the plans portfolio in May 2015, and showed a solid performance in pay TV, boosting year-on-year revenue growth and a significant sequential improvement in the OIBDA margin. Meanwhile, revenues continued to be affected by the 42% reduction in termination rates from 1 January 2015, which reduced the year-on-year growth in revenues by 4.2 percentage points in the quarter.

Telefónica Colombia reached 15.8 million **accesses** at the end of the year (+1% year-on-year). Regarding operating performance of the **mobile business**:

- g **Mobile accesses** stood at 12.9 million, stable year-on-year, following net additions of 241 thousand accesses in the quarter (54 thousand in the year). The commercial activity in contract is worth highlighting, with the highest quarterly net additions of the last 2 years (72 thousand accesses; 126 thousand in the year), an improvement in gross additions (+22% year-on-year) and in churn (1.8%, -0.3 percentage points year-on-year), all of which was driven by the restructuring of the offer and of the distribution channels.

The prepaid segment also showed a solid performance, with quarterly net additions of 169 thousand accesses (-72 thousand in the year) and an increase in the average top-up amount of 15.6% versus the fourth quarter of 2014 (accesses with frequent top-ups remained stable year-on-year). Likewise it is worth noting the launch in January 2016 of new **Todo en uno** plans, strengthening the offer with integrated services plan (voice, data and SMSs).

The strong performance of the higher-value accesses is reflected, in turn, by accelerated growth both in **smartphones** (4.2 million, +25% year-on-year), with a penetration of 35% (+7 percentage points year-on-year) and in LTE accesses (1.1 million), reaching a penetration of 9%.

- g **Voice traffic** accelerated its growth in the quarter to 9% year-on-year in the fourth quarter (+5% in the year), driven by the good performance of the contract segment. **Data traffic** recorded growth of 44% year-on-year (+48% in January-December) boosted by the focus on the widening of the usage of data services, thanks to the growth of smartphones and LTE accesses.

- g **ARPU** decreased by 7.5% year-on-year in the quarter (-8.2% in the year), affected by the reduction of the termination rates and the repositioning of tariffs in the new plans. Data ARPU accelerated its growth rate (+13.1% in the quarter, +11.7% in January-December), thanks to higher data consumption per access.

Regarding the **fixed business**, commercial activity in the quarter was affected by a one-time incident in an outsourced company for customer service and installation support. By services:

- g **Traditional fixed accesses** reached 1.4 million at the end of the year (-2% year-on-year) and posted net losses of 18 thousand accesses in the quarter (-30 thousand accesses in the year).

- g **Retail broadband accesses** stood at 1.0 million (+4% year-on-year), and recorded net losses of 4 thousand accesses in the quarter affected by the above mentioned incident (+39 thousand accesses in the year). It is worth highlighting the success of the service-bundling offer and the improved speed mix (with 35% of customers at speeds equal to or higher than 4 Mb, +6 percentage points year-on-year).

- g **Pay TV accesses** stood at 489 thousand at the end of the year (+17% year-on-year) after recording net additions of 18 thousand accesses in the quarter (+73 thousand accesses in January-December), resulting from the success of high definition channels, more content and the introduction since August of the Win Sports channel (which includes Colombian football league content). The improved commercial offer enabled improvement in the bundles mix, translating into ARPU growth of 8.5% in the quarter (+6.1% in the year).

Table of Contents

Revenues reached 358 million euros in the fourth quarter and consolidated the year-on-year growth trend (+0.3% year-on-year), supported by the acceleration of the fixed business. In the year, revenues reached 1,508 million euros and remained broadly stable compared to 2014 (-0.1% year-on-year). Meanwhile, year-on-year growth reflected the strong decline in termination rates (+3.9% in October-December stripping out this impact; +3.4% in January-December).

Mobile business revenues amounted to 224 million euros in the fourth quarter (-2.4% year-on-year; -1.6% in the year).

- g **Mobile service revenues** recorded a decline of 5.4% year-on-year in the quarter (-4.2% in January-December) and reflected both the commercial repositioning with the new portfolio of plans and the reduction in termination rates (+0.8% year-on-year in the quarter stripping out this effect; +1.7% in the year).

Data revenues increased by 13.6% vs. the fourth quarter of 2014 (+13.3% in January-December) and accounted for 32% of mobile service revenues (+5 percentage points year-on-year). Non-SMS revenues grew by 14.6% year-on-year (+15.9% in the year) accounting for almost all data revenues (98%; +1 percentage point year-on-year).

- g **Handset revenues** reflected the increase in commercial activity and grew year-on-year by 21.4% in the quarter (+23.0% in the year).

Fixed business revenues accelerated in the quarter to 5.3% year-on-year (+2.4% in 2015) and amounted to 134 million euros.

- g **Broadband and new services revenues** (62% of fixed revenues; +4 percentage points year-on-year) improved its growth sequentially to 12.2% year-on-year in the quarter (+7.3% in the year), driven by the growth in the customer base and the improvement in pay TV ARPU.

- g **Voice and access revenues** decreased by 3.9% year-on-year in October-December (-3.8% in January-December), as a result of the fixed-mobile substitution effect and the lower customer base.

Operating expenses totalled 242 million euros in the quarter, increasing by 6.2% year-on-year in organic terms (excluding 3 million euros of restructuring costs and 2 million in the fourth quarter of the previous year) and 0.8% in January-December, affected in the quarter by higher commercial expenses, the impact of the exchange rate over costs denominated in foreign currency and higher operating expenses associated with network and systems due to the network deployment, offsetting the savings derived from operating efficiencies linked to the simplification processes and distribution mix improvement and to the lower interconnection costs.

Thus, **OIBDA** reached 130 million euros in the quarter and decreased by 5.4% year-on-year (547 million euros in the year, -0.6% year-on-year), mainly as a result of the higher commercial expenses, although it improved sequentially due to the growth in revenues.

The **OIBDA margin** stood at 36.3% (-2.3 percentage points year-on-year in the quarter) and in January-December it remained virtually stable at 36.2% (-0.2 percentage points year-on-year).

CapEx amounted to 342 million euros in 2015 (+1.2% year-on-year excluding 111 million euros for the spectrum renewal in the first quarter of 2014), and reflected the Company's commitment to continuous improvement through the deployment and maintenance of high capacity mobile networks (3G and 4G) and fixed networks (higher speed broadband).

Thus, **operating cash flow (OIBDA-CapEx)** totalled 205 million euros in the year (-3.3% year-on-year).

Notes:

- ARPU: monthly average revenue divided by the monthly average accesses of the period.

- Voice traffic is defined as minutes used by the company customers, both outbound and inbound. On-net traffic is only included once (outbound), and promotional traffic is included. Traffic not associated to the Company's mobile customers (roaming-in, MVNOs, interconnection of third parties and other business lines) is excluded. Traffic volume non rounded.

- Data traffic is defined as Terabytes used by the company customers, both upload and download (1TByte = 10¹² bytes). Promotional traffic is included. Traffic not associated to the Company's mobile customers (roaming-in, MVNOs, interconnection of third parties and other business lines) is also included. Traffic volume non rounded.

(1) Excludes M2M.

Table of Contents**Telefónica México**

(year-on-year changes in organic terms)

In 2015, Telefónica México showed significant progress in its competitive position with a progressive commercial restructuring. In this way, the offer portfolio has continued adapting to the new regulatory environment and improving its efficiency in its distribution channel, translating into a strong growth of 15% in mobile accesses.

Thus, the commercial boost and economies of scale generated were reflected in the solid revenue performance and significant improvement in profitability in the year. In the fourth quarter, revenues remained virtually stable year-on-year, reflecting the positive revenue performance in the same period of 2014, the repositioning in the contract plans portfolio and greater promotional intensity in prepay.

On the other hand, OIBDA showed a strong year-on-year expansion and reflected a positive impact of 79 million euros due to the spectrum swap settled in the quarter with AT&T (Telefónica delivered 2x5 MHz in the AWS band in certain regions of the country in exchange for 2x5 MHz in the 1900 MHz band in the same regions), offsetting the significant increase in commercial expenses, after setting a new record in commercial activity in the quarter.

Likewise, the year's results were also affected by the application of the asymmetric regulation of termination rates in the dominant operator's network (zero cents per minute) since 14 August 2014 (with no impact on year-on-year comparison in the fourth quarter). On the other hand, on 12 August 2015 the IFT regulator (Federal Telecommunications Institute) confirmed the application of the termination rates cut in non-dominant mobile operators networks from that date (-19% for voice termination; -83% for SMS termination).

Telefónica México **accesses** grew by 13% year-on-year to 26.3 million accesses.

- g **Mobile accesses** stood at 24.9 million (+15% year-on-year). It worth noting the strong acceleration in the year-on-year increase in contract accesses in the second half of the year (+22% vs +2% at June 2015).
- g **Net additions** in the fourth quarter registered a new historic record with 1.5 million accesses (3.2 million in the year). In contract, net additions amounted to 168 thousand accesses in the quarter (+32 thousand in the fourth quarter of 2014) and 327 thousand in the year (-4 thousand in the year 2014) following the success of the launch of the new **Vas a Volar** plans (which increase the data and minutes allowance included in the plan).

In prepay, net additions increased to 1.3 million access in the quarter (+22% year-on-year) and 2.9 million in the year (more than doubled that of the previous year).

- g **Smartphones** increased 90% year-on-year, reaching a penetration of 42% (+17 percentage points). LTE accesses amounted to 1.8 million (7% penetration) after population coverage was expanded by 12

percentage points to 37%.

- g **ARPU** in the fourth quarter decreased by 10.2% year-on-year (-5.6% in the year) affected both by the change in the commercial offering, resulting in lower average tariff in voice and data, and by the positive performance shown in the fourth quarter of the previous year. **Data ARPU** decreased year-on-year in the quarter by 12.2%(-6.3% in the year), as a result of commercial intensity and the significant reduction in termination rates in SMS.

- g **Voice traffic** increased by 12% year-on-year in the quarter (+16% in the year), while **data traffic** grew by 73% in the quarter (+64% in the year), as a result of the growth in LTE accesses and smartphones and the promotions launched. A main highlight was the growth in traffic per user in the contract segment which increased 35% year-on-year in the quarter (+16% in the year), as a consequence of the elasticity shown due to the launch of the new plans.

Table of Contents

Revenues amounted to 427 million euros in the quarter remaining virtually stable compared with the previous year (-0.1% year-on-year) and reached 1,783 million euros in the whole year (+7.6%). Performance in the past three months was conditioned by the competitive intensity, lower handset revenues (reducing year-on-year growth in the quarter by 3.4 percentage points; +0.4 percentage points in the year), the negative impact of the reduction in termination rates(-3.0 percentage points year-on-year growth in the quarter; -1.4 percentage points in the year), and the positive performance of revenues in the fourth quarter of 2014.

- g **Mobile service revenues** (374 million euros) grew by 4.0% year-on-year (+8.4% in the whole year) driven by the strong growth in accesses. Excluding the impact of termination rates, service revenues would grow 7.5% (+10.0% in the year).

Data revenues grew in the quarter by 1.2% (-6.1% in the year), very much affected by both the competitive intensity, which resulted in the slowdown in year-on-year non-SMS data growth (+13.2% in the quarter, +22.4% in the year), and the reduction of SMS termination rates commented previously. Non-SMS data revenues accounted for 82% of total data revenues.

- g **Handset sales** decreased by 21.4% year-on-year in the fourth quarter (+3.1% in the year), due to greater gross additions without handset sales and the selective increase in the subsidy of contract handsets.

Operating expenses totalled 368 million euros in the final quarter of the year and increased by 12.5% year-on-year (excluding 4 million euros associated with the headcount restructuring plan in the fourth quarter of 2015 and 11 million euros in the fourth quarter of 2014) and reached 1,401 million euros in the whole year (+4.1% year-on-year). The acceleration in the pace of growth in the quarter was mainly due to greater commercial expenses (+20.9% year-on-year in the quarter; +10.7% in the year). Likewise, the quarter reflected, for the first time in the year, a homogeneous year-on-year comparison of the change in the termination rate in the dominant operator's network, applied since August 2014 included a non-recurring impact of 4 million euros due to the headcount restructuring plan in the fourth quarter of 2015 (11 million euros in the fourth quarter of 2014). The other expenses reflected the efficiency plans implemented and the increasing generation of economies of scale.

OIBDA amounted to 133 million euros in the quarter, growing by 19.7% year-on-year (481 million euros in the year; +38.7% year-on-year) with the positive impact of the spectrum swap mentioned previously and, conversely, affected by the strong commercial effort.

Thus, **OIBDA margin** stood at 31.1% in the quarter (+5.3 percentage points year-on-year) and at 27.0% in the year (+6.1 percentage points) reflecting the benefits of growing scale and asymmetric regulation, which the boost in commercial activity up to record levels both in the quarter and in the whole year.

CapEx amounted to 266 million euros in the year, increasing by 1.8% year-on-year and was mainly devoted to both the development and improvement in 3G and 4G mobile networks and the distribution channel.

Thus, **operating cash flow (OIBDA-CapEx)** totalled 215 million euros and more than doubled that of 2014.

bytes used by the company customers, both upload and download (1TByte = 10¹² bytes). Promotional traffic is included. Traffic not for MVNOs, interconnection of third parties and other business lines) is also included. Traffic volume non rounded.

Table of Contents**Telefónica Venezuela y Centroamérica**

(year-on-year changes in organic terms)

In 2015, Telefónica continued to strengthen its differential position in Venezuela and Central America due to its innovative offer and the quality of its network, with a positive trend in revenues and OIBDA, supported by strong increases in traffic.

The reported results in Venezuela as of December 2015 were affected by the Company's decision to adopt an exchange rate for the Venezuelan bolivar of 199 bolivars fuertes per dollar (last assignment of SIMADI), which was effective since the second quarter of 2015.

Regarding the business' operating performance at the end of 2015:

- g **Accesses** stood at 24.4 million and grew 5% year-on-year. In Venezuela, accesses totalled 11.8 million (-1% year-on-year) and in Central America 12.7 million (+11% year-on-year).
- g **Mobile accesses** amounted to 22.7 million (+6% year-on-year). In Venezuela, these accesses reached 10.6 million (-1% year-on-year) and recorded a net loss of 155 thousand accesses in the fourth quarter (-78 thousand access in the year) affected by the limited availability of handsets. In Central America, they totalled 12.1 million and increased by 12% year-on-year after posting a historic record in the quarterly volume of gross additions. Thus, Central America closed the year with net additions of 506 thousand accesses in October-December (1.3 million in January-December 2015).
- g **Churn** for the fourth quarter stood at 2.9% (2.8% in 2015). It is worth noting the contract churn in Venezuela at 0.9% both in the quarter and in the year (stable year-on-year in both cases), which continued to be a benchmark in the region.
- g **Smartphones** grew by 26% year-on-year and reached a penetration of 40% (+6 percentage points year-on-year), consolidating their position as the main lever for access growth. In Venezuela, penetration continued advancing and reached 54% (+5 percentage points year-on-year) and in Central America the base of smartphones increased by 64% to 3.3 million (27% penetration).
- g **Voice traffic** increased by 15% year-on-year in the last three months (+12% in the year) mainly driven by higher traffic per access in Venezuela (+19% in the quarter, +20% in 2015). Likewise **data traffic** accelerated its growth to 60% year-on-year in the quarter (+54% year-on-year in the year), due to the strong expansion of smartphones.

- g Thus, **ARPU** for the region increased by 24.5% year-on-year in the fourth quarter (+27.9% in the year) with data ARPU standing out (+57.4% in the quarter; +56.7% in 2015).

- g **Pay TV accesses** in Venezuela grew by 2% year-on-year to 478 thousand after recording a net loss in October-December of 4 thousand accesses (+11 thousand accesses in January-December) due to the lower availability of decoders.

Revenues amounted to 414 million euros in the fourth quarter of 2015 and increased by 29.7% year-on-year (1,379 million in 2015; +33.2% year-on-year). In Venezuela, revenues stood at 175 million euros (+59.7% year-on-year in the quarter; +74.9% in the year). In Central America, they totalled 240 million euros and increased by 4.0% year-on-year in the fourth quarter (+4.2% in the year).

- g **Mobile service revenues** stood at 380 million euros and increased by 37.8% year-on-year in October-December (+31.7% in January-December) driven by higher traffic and higher consumption of mobile data. In Venezuela, they increased by 81.7% year-on-year in the quarter (+72.5% in the year) and in Central America, they increased by 4.1% in the last three months (+4.2% in 2015).

Table of Contents

Data revenues increased by 67.2% year-on-year in the fourth quarter (+58.3% in the year) and accounted for 31% of mobile service revenues (+2 percentage points year-on-year). Non-SMS data revenues grew by 90.0% year-on-year in the fourth quarter (+83.2% in 2015) driven by higher smartphone penetration and accounted for 87% of data revenues (+11 percentage points versus October-December 2014).

- g **Handset revenues** decreased by 25.4% year-on-year in the final quarter of the year (+52.0% in 2015) due to the limited availability of handsets in Venezuela.

Operating expenses totalled 303 million euros in the quarter (+29.8% year-on-year; +42.4% in the year) mainly affected by the widespread increase in prices and by the negative impact of the exchange rate adjustment over dollarised expenses in Venezuela. The improvement in the fourth quarter performance is associated with lower commercial expenses due to the lower volume of handset sales in Venezuela.

OIBDA stood at 121 million euros in the fourth quarter and accelerated its growth to 34.7% year-on-year (342 million in the year; +16.2% year-on-year). The quarterly **OIBDA margin** stood at 29.1% and returned to postyear-on-year growth (+1.2 percentage points) after 5 consecutive quarters with declines. In 2015, the margin stood at 24.8% (-4.1 percentage points year-on-year).

CapEx totalled 317 million euros in 2015 (+69.6% year-on-year, excluding 39 million euros of spectrum in Venezuela and 82 million euros in Panama in 2014) reflecting the continuous improvement in the network and infrastructures in the region.

Thus, **operating cash flow (OIBDA-CapEx)** stood at 26 million euros in 2015 (27 million in 2014).

Comparative figures for October-December 2014 have been modified with respect to those presented at the close of December 2014, solely for the purpose of the conversion to SICAD II 50 VEF/USD of those operations referenced to the Venezuelan bolivar in the first, second and third quarters of 2014. For the October-December 2015 period the consolidated financial statements use the exchange rate of the Venezuelan bolivar set at the denominated rate (this rate was set at 199 Venezuelan bolivars fuertes per dollar).

Operating income is presented before management and brand fees.

Operating income figures include the hyperinflationary adjustments in Venezuela in both years. For comparative purposes and to facilitate the interpretation of the changes vs. 2014, variations in local currency of the headings affected by the hyperinflation adjustments are reported excluding the impact of these adjustments.

Operating income in Central America includes Guatemala, Panama, El Salvador, Nicaragua and Costa Rica.

Operating income in Venezuela does not include hyperinflationary adjustments.

Operating income in the United States includes operations in Panama, Nicaragua and Venezuela.

For comparative purposes, the quarterly data for 2014 are reported adjusting the exchange rate in Venezuela from SICAD I to SICAD II for the Telefónica Group, Hispanoamérica and Venezuela and Central America following the adoption of SICAD II 50 VEF/USD in the first quarter of 2014.

Revenue is defined as monthly average revenue divided by the monthly average accesses of the period.

Traffic is defined as minutes used by the company customers, both outbound and inbound. On-net traffic is only included once (outbound and inbound promotional traffic is included. Traffic not associated to the Company's mobile customers (roaming-in, MVNOs, interconnection of third parties for business lines) is excluded. Traffic volume non rounded.

Traffic is defined as Terabytes used by the company customers, both upload and download (1TByte = 10¹² bytes). Promotional traffic is included. Traffic not associated to the Company's mobile customers (roaming-in, MVNOs, interconnection of third parties and other business lines) is excluded. Traffic volume non rounded.

Central America includes Guatemala, Panama, El Salvador, Nicaragua and Costa Rica.

comparative purposes and in order to facilitate the interpretation of the year-on-year change versus 2014 results, the variation in the ARPU in Venezuela is reported excluding the impact of the hyperinflation adjustment.

affected by the disconnection of 1.8 million inactive accesses in Central America in the fourth quarter of 2014.

cludes M2M.

not include hyperinflation adjustment.

ADDENDA

Changes to the Perimeter

In the first nine months of 2015 the following changes have been made to the perimeter of consolidation:

g On 28 May, after obtaining all the pertinent regulatory authorisations, the acquisition of Global Village Telecom, S.A. and its holding GVT Participações, S.A., (GVT), from Vivendi, S.A. was approved, as well as the issuance of Telefónica Brasil shares to Vivendi, S.A. as partial payment of GVT's sale price. Consequently, the closing of this acquisition for an amount of 4,663 million euros (through payment in cash and debt assumption) as well as the delivery of 12% of the share capital of the new Telefónica Brasil, resulting from the integration, were formalised. On the other hand, and in accordance with the regulatory and competition commitments assumed, Vivendi, S.A. exchanged with Telefónica, S.A. 4.5% of this percentage for 8% of Telecom Italia's ordinary shares in June.

GVT and its subsidiaries are included in the perimeter of consolidation of Telefónica Group through the full consolidation method.

On July 29, Telefónica committed to deliver treasury shares representing 0.95% of its share capital to Vivendi, S.A., in exchange for preferred shares of Telefónica Brasil, S.A, representing approximately 3.5% of its share capital. The agreement, which was subject to approval by the Brazilian competition authority (CADE), was finally executed on 16 September.

g In June 2015 the company Telco TE, S.p.A. was newly-incorporated, 100% owned by Telefónica. After the demerger of Telco, S.p.A., Telefónica received through this company the proportional shares of Telecom Italia, S.p.A (14.72% of its ordinary share capital), to which it was entitled in accordance with its stake in Telco, S.p.A.

As of 30 June, Telefónica had already completed the divestment of its entire stake in Telecom Italia, S.p.A in accordance with the regulatory and competition commitments assumed.

The new company owned by Telefónica, Telco TE, S.p.A. is included in the perimeter of consolidation by the full consolidation method.

g On 30 April, after obtaining the required regulatory approval, Telefónica de Contenidos, S.A.U. acquired 56% of DTS Distribuidora de Televisión por Satélite, S.A. (DTS). DTS and its subsidiaries are included in the perimeter of consolidation of Telefónica Group through the full consolidation method. Telefónica's previous stake in DTS was consolidated through the equity method.

- g On 24 March 2015, Telefónica reached a definitive agreement for the sale of its operations in the UK (O2 UK) to Hutchison Whampoa Group.

After the signing of definitive agreement, O2 UK continues as of 30 September 2015 to be part of the perimeter of consolidation of Telefónica Group, although it is now being reported as a discontinued operation and its assets and liabilities as held for sale, in compliance with the IFRS.

Completion of the transaction is subject, among other usual conditions, to the approval of the applicable regulatory authorities and the obtaining of waivers to certain change of control provisions.

- g The sale of yourfone GmbH was closed on 2 January 2015. The company, which was consolidated through the full consolidation method, has been removed from the perimeter of consolidation.

DISCLAIMER

This document contains forward-looking statements regarding intentions, expectations or forecasts related to the Telefónica Group (hereinafter, the Company or Telefónica). These statements include financial forecasts and estimates based on underlying premises, statements regarding plans, objectives and expectations that make reference to different matters, including, the customer base and its evolution, growth of the different business lines and of the global business, the market share, possible acquisitions, divestitures or other transactions, Company results and other aspects related to the activity and situation of the Company.

The forward-looking statements or forecasts contained herein can be identified, in certain cases, through the use of words such as expectation , anticipation , purpose , belief or similar expressions, or the corresponding negative forms through the own predictive nature of all issues referring to strategies, plans or intentions. These forward-looking statements or forecasts do not represent, by their own nature, any guarantee of future fulfilment, and are subject to risks, uncertainties and other relevant factors that could cause the final developments and results to differ substantially from the ones put forward through these intentions, expectations or forecasts. These risks and uncertainties include those identified in the documents containing more comprehensive information filed by Telefónica before the different supervisory Authorities of the securities markets in which its shares are listed and, in particular, the Spanish National Securities Market Commission.

The content of this statement must be taken into account by any individual or entity who may have to adopt a decision, or elaborate or disseminate opinions related to the securities issued by the Company, and, in particular, by analysts and investors that may be examining this document. Except as required by applicable laws, Telefónica is not required to inform publicly of the result of any review it may perform concerning these statements to adapt them to events or circumstances taking place after this document, including changes in the Company s business, in its business development strategy or any other unexpected circumstance.

This document may contain summarized or non-audited information. To this regard, the information contained herein must be read as a whole and is subject to all the public information available, including, if any, other documents released by the Company that may contain more detailed information.

Finally, it is hereby stated that neither this report or any of its contents should be interpreted as a securities purchase, sale or exchange offer, or a request for offers regarding the purchase, sale or exchange of securities, or a recommendation or advice regarding any security.
