<b>Total</b>	<b>\$ (427,858)</b>	<b>\$ (1,596,810)</b>	<b>\$</b>	<b>\$ (2,024,668)</b>

During the period ended January 31, 2016, there were no transfers between Level 1 and Level 2.

**Global High Income Fund Inc.****Portfolio of investments January 31, 2016 (unaudited)****Portfolio footnotes**

- <sup>1</sup> Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933. These securities are considered liquid, unless noted otherwise, and may be resold in transactions exempt from registration, normally to qualified institutional buyers. At January 31, 2016, the value of these securities amounted to \$28,261,209 or 15.01% of net assets.
- <sup>2</sup> Security exempt from registration pursuant to Regulation S under the Securities Act of 1933. Regulation S applies to securities offerings that are made outside of the United States and do not involve direct selling efforts in the United States. At January 31, 2016, the value of these securities amounted to \$39,336,370 or 20.89% of net assets.
- <sup>3</sup> Variable or floating rate security The interest rate shown is the current rate as of January 31, 2016 and changes periodically.
- <sup>4</sup> Perpetual investment. Date shown reflects the next call date.
- <sup>5</sup> Security pays, when required, a floating rate that is determined annually based on the Argentina GDP.
- <sup>6</sup> Security is in default.
- <sup>7</sup> Debt security whose principal and/or interest payments are adjusted for inflation, unlike debt securities that make fixed principal and interest payments. The interest rate paid by the securities is fixed, while the principal value rises or falls based on changes in an index. Thus, if inflation occurs, the principal and interest payments on the securities are adjusted accordingly to protect investors from inflationary loss. During a deflationary period, the principal and interest payments decrease, although the securities' principal amounts will not drop below their face amounts at maturity. In exchange for the inflation protection, the securities generally pay lower interest rates than typical government securities from the issuer's country. Only if inflation occurs will securities offer a higher real yield than a conventional security of the same maturity.
- <sup>8</sup> Rate shown reflects annualized yield at January 31, 2016 on zero coupon bond.
- <sup>9</sup> Step bond Coupon rate increases in increments to maturity. Rate disclosed is as of January 31, 2016. Maturity date disclosed is the ultimate maturity date.
- <sup>10</sup> Payments made or received are based on the notional amount.
- <sup>11</sup> If the Fund is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the referenced obligation or (ii) receive a net settlement amount in the form of cash or securities equal to the notional amount of the swap agreement less the recovery value of the referenced obligation.
- <sup>12</sup> Payments from/to the counterparty will be received/made upon the occurrence of bankruptcy and/or restructuring event with respect to the referenced obligation.
- <sup>13</sup> If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or (ii) pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap agreement less the recovery value of the referenced obligation.
- <sup>14</sup> Credit spreads, represented in absolute terms, utilized in determining the market value as of period end serve as an indicator of the current status of the payment/performance risk and represent the likelihood or risk of default or other credit event occurring for the credit derivative. The credit spread of a particular referenced entity reflects the cost of buying/selling protection and may include upfront payments required to be made to enter into the agreement. Wider credit spreads represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement. A credit spread identified as Defaulted indicates a credit event has occurred for the referenced entity.

The Fund calculates its net asset value based on the current market value, where available, for its portfolio securities. The Fund normally obtains market values for its investments from independent pricing sources and broker-dealers. Independent pricing sources may use reported last sale prices, official market closing prices, current market quotations or valuations from computerized evaluation systems that derive values based on comparable investments. An evaluation system incorporates parameters such as security quality, maturity and coupon, and/or research and evaluations by its staff, including review of broker dealer market price quotations, if available, in determining the valuation of the portfolio investments. Investments also maybe valued based on appraisals derived from information concerning the investments or similar investments received from recognized dealers in those holdings. Investments traded in the over-the-counter ( OTC ) market and listed on The NASDAQ Stock Market, Inc. ( NASDAQ ) normally are valued at the NASDAQ Official Closing Price. Other OTC securities are valued at the last bid price on the valuation date available prior to valuation. Investments which are listed on US and foreign stock exchanges normally are valued at the market closing price, the last sale price on the day the securities are valued or, lacking any sales on such day, at the last available bid price. In cases where investments are traded on more than one exchange, the investments are valued on the exchange designated as the primary market by UBS Asset Management (Americas) Inc. ( UBS AM ), the investment advisor of the Fund. If a market value is not readily available from an independent pricing source for a particular investment, that investment is valued at fair value as determined in good faith by or under the direction of the Fund s Board of Directors (the Board ). Various factors may be reviewed in order to make a good faith determination of an investment s fair value. These factors include, but are not limited to, fundamental analytical data relating to the investment; the nature and duration of restrictions on disposition of the investments; and the evaluation of forces which influence the market in which the investments are purchased and sold. Certain investments in which the Fund invests are traded in markets that close before 4:00 p.m., Eastern time. Normally, developments that occur between the close of the foreign markets and 4:00 p.m. Eastern time will not be reflected in the Fund s net asset value. However, if the Fund determines that such developments are so significant that they will materially affect the value of the Fund s investments, the Fund may adjust the previous closing prices to reflect what is believed to be the fair value of these investments as of 4:00 p.m. Eastern time. Investments in open-end investment companies are valued at the daily closing net asset value of the respective investment company. Pursuant to the Fund s use of the practical expedient within ASC Topic 820, investments in non registered investment companies are also valued at the daily net asset value.

The Fund s Board of Directors (the Board ) has delegated to the UBS Asset Management Global Valuation Committee ( GVC ) the responsibility for making fair value determinations with respect to the Fund s portfolio holdings. The GVC is comprised of representatives of management.

The GVC provides reports to the Board at each quarterly meeting regarding any investments that have been fair valued, valued pursuant to standing instructions approved by the GVC, or where non-vendor pricing sources had been used to make fair value determinations when sufficient information exists during the prior quarter. Fair valuation determinations are subject to review at least monthly by the GVC during scheduled meetings. Pricing decisions, processes, and controls over fair value determinations are subject to internal and external reviews, including annual internal compliance reviews and periodic internal audit reviews of security valuations.

The types of investments for which such fair value pricing may be necessary include, but are not limited to: foreign investments under some circumstances, as discussed below, securities of an issuer that has entered into a restructuring; investments whose trading has been halted or suspended; fixed income securities that are in default and for which there is no current market value quotation; and investments that are restricted as to transfer or resale. The need to fair value the Fund s portfolio investments may also result from low trading volume in foreign markets or thinly traded domestic investments, and when a security that is subject to a trading limit or collar on the exchange or market on which it is primarily traded reaches the limit up or limit down price and no trading has taken place at that price. Various factors may be reviewed in order to make a good faith determination of an investment s fair value. These factors include, but are not limited to, fundamental analytical data relating to the investment; the nature and duration of restrictions on disposition of investments; and the evaluation of forces which influence the market in which the investments are purchased and sold. Valuing investments at fair value involves greater reliance on judgment than valuing investments that have readily available market quotations. Fair value determinations can also involve reliance on quantitative models employed by a fair value pricing service.

US Generally Accepted Accounting Principles ( GAAP ) requires disclosure regarding the various inputs that are used in determining the value of the Fund s investments. These inputs are summarized into the three broad levels listed below:

Level 1 Unadjusted quoted prices in active markets for identical investments.

Level 2 Other significant observable inputs, including but not limited to, quoted prices for similar investments, interest rates, prepayment speeds and credit risk.

Level 3 Unobservable inputs inclusive of the Fund s own assumptions in determining the fair value of investments.

A fair value hierarchy has been included near the end of the Fund s Portfolio of investments.

In May 2015, the Financial Accounting Standards Board ( FASB ) issued Accounting Standards Update No. 2015-07, Fair Value Measurement (Topic 820): Disclosures for Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent) ( ASU 2015-07 ). The

## Edgar Filing: GLOBAL HIGH INCOME FUND INC - Form N-Q

modification removes the requirement to categorize within the fair value hierarchy all investments for which fair value is measured using the NAV per share practical expedient. ASU 2015-07 is effective for annual reporting periods beginning after December 15, 2015 and interim periods within those fiscal periods. Management is currently evaluating the implications of these changes and their impact on the financial statements and disclosures.

For more information regarding the Fund's other significant accounting policies, please refer to the Fund's annual report to shareholders dated October 31, 2015.

**Item 2. Controls and Procedures.**

- (a) The registrant's principal executive officer and principal financial officer have concluded that the registrant's disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940, as amended ( "Investment Company Act" )) are effective based on their evaluation of these controls and procedures as of a date within 90 days of the filing date of this document.
  
- (b) The registrant's principal executive officer and principal financial officer are aware of no changes in the registrant's internal control over financial reporting (as defined in Rule 30a-3(d) under the Investment Company Act) that occurred during the registrant's last fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.
