MuniVest Fund, Inc.

Semi-Annual Report
February 28, 2005

MuniVest Fund, Inc.

The Benefits and Risks of Leveraging

MuniVest Fund, Inc. utilizes leveraging to seek to enhance the yield and net asset value of its Common Stock. However, these objectives cannot be achieved in all interest rate environments. To leverage, the Fund issues Preferred Stock, which pays dividends at prevailing short-term interest rates, and invests the proceeds in long-term municipal bonds. The interest earned on these investments, net of dividends to Preferred Stock, is paid to Common Stock shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share net asset value of the Fund's Common Stock. However, in order to benefit Common Stock shareholders, the yield curve must be positively sloped; that is, short-term interest rates must be lower than long-term interest rates. At the same time, a period of generally declining interest rates will benefit Common Stock shareholders. If either of these conditions change, then the risks of leveraging will begin to outweigh the benefits.

To illustrate these concepts, assume a fund's Common Stock capitalization of \$100 million and the issuance of Preferred Stock for an additional \$50 million, creating a total value of \$150 million available for investment in long-term

Edgar Filing: MUNIVEST FUND INC - Form N-CSRS

municipal bonds. If prevailing short-term interest rates are approximately 3% and long-term interest rates are approximately 6%, the yield curve has a strongly positive slope. The fund pays dividends on the \$50 million of Preferred Stock based on the lower short-term interest rates. At the same time, the fund's total portfolio of \$150 million earns the income based on long-term interest rates. Of course, increases in short-term interest rates would reduce (and even eliminate) the dividends on the Common Stock.

In this case, the dividends paid to Preferred Stock shareholders are significantly lower than the income earned on the fund's long-term investments, and therefore the Common Stock shareholders are the beneficiaries of the incremental yield. However, if short-term interest rates rise, narrowing the differential between short-term and long-term interest rates, the incremental yield pickup on the Common Stock will be reduced or eliminated completely. At the same time, the market value of the fund's Common Stock (that is, its price as listed on the American Stock Exchange) may, as a result, decline. Furthermore, if long-term interest rates rise, the Common Stock's net asset value will reflect the full decline in the price of the portfolio's investments, since the value of the fund's Preferred Stock does not fluctuate. In addition to the decline in net asset value, the market value of the fund's Common Stock may also decline.

As a part of its investment strategy, the Fund may invest in certain securities whose potential income return is inversely related to changes in a floating interest rate ("inverse floaters"). In general, income on inverse floaters will decrease when short-term interest rates increase and increase when short-term interest rates decrease. Investments in inverse floaters may be characterized as derivative securities and may subject the Fund to the risks of reduced or eliminated interest payments and losses of invested principal. In addition, inverse floaters have the effect of providing investment leverage and, as a result, the market value of such securities will generally be more volatile than that of fixed-rate, tax-exempt securities. To the extent the Fund invests in inverse floaters, the market value of the Fund's portfolio and the net asset value of the Fund's shares may also be more volatile than if the Fund did not invest in these securities. As of February 28, 2005, the percentage of the Fund's total net assets invested in inverse floaters was 11.36%, before the deduction of Preferred Stock.

Swap Agreements

The Fund may also invest in swap agreements, which are over-the-counter contracts in which one party agrees to make periodic payments based on the change in market value of a specified bond, basket of bonds, or index in return for periodic payments based on a fixed or variable interest rate or the change in market value of a different bond, basket of bonds or index. Swap agreements may be used to obtain or reduce exposure to a bond or market without owning or taking physical custody of securities. Swap agreements involve the risk that the party with whom the Fund has entered into the swap will default on its obligation to pay the Fund and the risk that the Fund will not be able to meet its obligations to pay the other party to the agreement.

MUNIVEST FUND, INC.

FEBRUARY 28, 2005

A Letter From the President

Dear Shareholder

Financial markets broadly posted positive returns over the most recent reporting period, with international equities providing some of the most impressive results.

Edgar Filing: MUNIVEST FUND INC - Form N-CSRS

Total Returns as of February 28, 2005	6-month	12-month
U.S. equities (Standard & Poor's 500 Index)	+ 9.99%	+ 6.98%
International equities (MSCI Europe Australasia Far East Index)	+21.18	+18.68
Fixed income (Lehman Brothers Aggregate Bond Index)	+ 1.26	+ 2.43
Tax-exempt fixed income (Lehman Brothers Municipal Bond Index)	+ 2.40	+ 2.96
High yield bonds (Credit Suisse First Boston High Yield Index)	+ 7.53	+11.21

The U.S. economy has continued to show resilience in the face of the Federal Reserve Board's (the Fed) continued interest rate hikes and, more recently, higher oil prices. The Fed's measured tightening program recently brought the federal funds rate to 2.75% en route to a more "neutral" short-term interest rate target (relative to inflation). Since the U.S. presidential election, progress has been monitored on many fronts in Washington, although concerns remain about the structural problems of debt and deficits, as reflected by a significant decline in the U.S. dollar.

U.S. equities ended 2004 in a strong rally, but remained in a fairly narrow trading range for the first two months of 2005. Divergences were notable among sectors, with energy emerging as a clear leader. On the positive side, corporations have accelerated their hiring plans, capital spending remains reasonably robust and merger-and-acquisition activity has increased. Offsetting the positives are slowing corporate earnings growth, renewed energy price concerns and the potential for an economic slowdown. International equities, particularly in Asia, have benefited from higher economic growth rates (China recorded growth of 9.3% in 2004), stronger currencies and relatively reasonable valuations.

The major action in the bond market has been a flattening of the yield curve. As short-term interest rates continued to rise, yields on the long end of the curve remained relatively stable -- even declining at certain points since the Fed's monetary tightening program began in June 2004. This phenomenon has been largely attributed to continued foreign interest in U.S. bonds, which has served to absorb much of the excess supply. By period-end, many believed long-term yields were long overdue for a rise.

Looking ahead, the environment is likely to be a challenging one for investors, with diversification and selectivity becoming increasingly important themes. With this in mind, we encourage you to meet with your financial advisor to review your goals and asset allocation and to rebalance your portfolio, as necessary, to ensure it remains aligned with your objectives and risk tolerance. As always, we thank you for trusting Merrill Lynch Investment Managers with your investment assets, and we look forward to serving you in the months and years ahead.

Sincerely,

/s/ Robert C. Doll, Jr.

Robert C. Doll, Jr.
President and Director

A Discussion With Your Fund's Portfolio Manager

Fund performance exceeded its comparable Lipper category average for the period, benefiting from a focus on lower-rated, higher-yielding securities -- an area of the municipal market that continued to outperform.

Describe the recent market environment relative to municipal bonds.

Despite broadly positive economic conditions, long-term bond yields declined during the past six months as bond prices, which move opposite yields, generally rose. Gross domestic product (GDP) growth was recently revised to 3.8% for the fourth quarter of 2004, similar to the 4% rate recorded in the third quarter. For 2004 as a whole, real GDP grew at a 4.4% rate, well ahead of 2003's annual rate of 3%. The improving economic activity was largely offset by inflationary trends remaining in the 1.5% - 2% range. Also helping to boost bond prices was strong currency-related demand for long-term U.S. Treasury issues on the part of many foreign governments.

Over the past six months, long-term U.S. Treasury bond yields declined 21 basis points (.21%) to 4.72% at February 28, 2005. However, the Federal Reserve Board (the Fed) continued to raise short-term interest rates, moving its federal funds target rate recently to 2.75%. The Fed's series of interest rate hikes, and the expectation for a continuation of the monetary tightening program, pressured shorter-maturity bond yields higher throughout the period. The yield on the 10-year Treasury note stood at 4.36% at the end of February, an increase of 26 basis points over the six-month period.

A generally positive technical environment supported higher bond prices in the long end of the municipal bond market. Recent bond issuance has been heavily weighted in the 10-year - 20-year maturity range, leading to a moderate scarcity of bonds maturing in 30 years - 35 years. Investor demand was solid throughout the period and increased in the latter months. The most current statistics from the Investment Company Institute indicate that long-term municipal bond funds saw net new cash flows of \$870 million in January 2005. This represented a considerable improvement from January 2004, which experienced net cash outflows of \$224 million. As measured by the Bond Buyer Revenue Bond Index, the yield on A-rated revenue bonds maturing in 30 years declined 16 basis points to 4.93% at the end of February. AAA-rated issues maturing in 30 years, as reported by Municipal Market Data, declined 19 basis points to 4.51%. Conversely, shorter-maturity municipal bond yields increased, responding to rising U.S. Treasury note yields and increased supply pressures. AAA-rated tax-exempt bonds maturing in 10 years yielded 3.65% at the end of February, representing an increase of 15 basis points over the period.

During the past six months, more than \$175 billion in new long-term tax-exempt bonds was underwritten, essentially unchanged versus the same period a year ago. In the last three months, the pace of new issuance increased. Approximately \$91 billion in long-term tax-exempt bonds was issued during that time, an increase of 12% compared to the same three months a year ago. New-issue municipal volume is expected to be easily manageable in early 2005, continuing to support the tax-exempt market's favorable technical position.

Finally, long-term tax-exempt bond yield ratios have remained in the 88% - 95% range relative to taxable bonds, at or above their recent historic average of 85% - 88%. These attractive yield ratios should continue to attract both traditional and non-traditional investors to the municipal market.

Edgar Filing: MUNIVEST FUND INC - Form N-CSRS

How did the Fund perform during the period in light of the existing market conditions?

For the six-month period ended February 28, 2005, the Common Stock of MuniVest Fund, Inc. had net annualized yields of 6.72% and 7.09%, based on a period-end per share net asset value of \$10.09 and a per share market price of \$9.55, respectively, and \$.336 per share income dividends. Over the same period, the total investment return on the Fund's Common Stock was +5.46%, based on a change in per share net asset value from \$9.91 to \$10.09, and assuming reinvestment of all distributions.

The Fund's total return, based on net asset value, exceeded the +4.96% average return of the Lipper General Municipal Debt Funds (Leveraged) category for the six-month period. (Funds in this Lipper category invest primarily in municipal debt issues rated in the top four credit-rating categories. These funds can be leveraged via use of debt, preferred equity and/or reverse repurchase agreements.) The Fund was able to achieve the outperformance despite its modest defensive positioning during a period when long-term tax-exempt bond yields declined slightly. Benefiting performance over the past six months was the Fund's above-average yield and the continued outperformance of our lower-rated holdings, such as A-rated hospital or corporate-backed debt.

4

MUNIVEST FUND, INC. FEBRUARY 28, 2005

For a description of the Fund's total investment return based on a change in the per share market value of the Fund's Common Stock (as measured by the trading price of the Fund's shares on the American Stock Exchange), and assuming reinvestment of dividends, please refer to the Financial Highlights section of this report. As a closed-end fund, the Fund's shares may trade in the secondary market at a premium or discount to the Fund's net asset value. As a result, total investment returns based on changes in the market value of the Fund's Common Stock can vary significantly from total investment returns based on changes in the Fund's net asset value.

What changes were made to the portfolio during the period?

Along with a rise in long-term municipal bond prices, we have seen increased demand for higher-yielding tax-exempt securities. In recent months, much of the new net cash flows into municipal bond funds has been directed into "high yield" tax-exempt funds. The demand in this area of the market has helped generate significant price appreciation for the Fund's lower-rated issues. We will be monitoring the price improvement of these lower-rated issues. Should it continue and/or intensify, we would look to reduce some of the Fund's exposure to lower-rated issues. Higher-quality securities could then be purchased at historically attractive yield differentials.

During the period, we also took advantage of the continued appreciation in California state-related issues. Overall exposure to these bonds was reduced by approximately 2.5%, allowing the Fund to benefit from the recent price improvements. The proceeds from the sales were largely invested in New Jersey securities, where we found an attractive buying opportunity as supply increased and prices fell. Specifically, a number of large New Jersey issues were marketed in early October 2004, resulting in a temporary increase in New Jersey municipal bond yields.

For the six-month period ended February 28, 2005, the Fund's Auction Market Preferred Stock (AMPS) had average yields as follows: Series A, 1.38%; Series B, 1.60%; Series C, 1.71%; Series D, 1.36%; Series E, 1.53%; and Series F, 1.60%. Continued short-term interest rate increases by the Fed have modestly boosted the Fund's borrowing costs throughout the past six months. While we believe the

Edgar Filing: MUNIVEST FUND INC - Form N-CSRS

majority of the Fed's monetary tightening actions have already occurred, we expect additional increases in the federal funds rate until at least midyear. Despite the recent rate hikes, the Fund's borrowing costs remain quite low on a historical basis and the leveraging of the Preferred Stock has continued to generate a material income benefit to the Fund's Common Stock shareholders. However, should the spread between short-term and long-term interest rates narrow, the benefits of leverage will decline and, as a result, reduce the yield on the Fund's Common Stock. At the end of the period, the Fund's leverage amount, due to AMPS, was 35.04% of total net assets. (For a more complete explanation of the benefits and risks of leveraging, see page 2 of this report to shareholders.)

How would you characterize the Fund's position at the close of the period?

The Fund ended the period with a defensive posture, and we expect to maintain that structure in the coming months. Rising short-term interest rates, an expanding domestic economy, and increasing commodity prices (especially oil) are all textbook indicators for rising long-term interest rates.

Nevertheless, bond yields are still near their historic lows and, under the circumstances, we believe the more prudent strategy is to maintain our emphasis on higher-yielding issues rather than more interest rate-sensitive securities. The Fund also will remain fully invested in order to enhance shareholder income. Given the municipal bond market's strong technical position, including favorable supply/demand dynamics, we expect the tax-exempt market to perform well relative to its taxable counterpart.

Fred K. Stuebe
Vice President and Portfolio Manager

Notes to Financial Statements

1. Significant Accounting Policies:

MuniVest Fund, Inc. (the "Fund") is registered under the Investment Company Act of 1940, as amended, as a non-diversified, closed-end management investment company. The Fund's financial statements are prepared in conformity with U.S. generally accepted accounting principles, which may require the use of management accruals and estimates. Actual results may differ from these estimates. These unaudited financial statements reflect all adjustments, which are, in the opinion of management, necessary to present a fair statement of the results for the interim period. All such adjustments are of a normal, recurring nature. The Fund determines and makes available for publication the net asset value of its Common Stock on a daily basis. The Fund's Common Stock is listed on the American Stock Exchange under the symbol MVF. The following is a summary of significant accounting policies followed by the Fund.

(a) Valuation of investments -- Municipal bonds are traded primarily in the over-the-counter markets and are valued at the last available bid price in the over-the-counter market or on the basis of values as obtained by a pricing service. Pricing services use valuation matrixes that incorporate both dealer-supplied valuations and valuation models. The procedures of the pricing service and its valuations are reviewed by the officers of the Fund under the general direction of the Board of Directors. Such valuations and procedures are reviewed periodically by the Board of Directors of the Fund. Financial futures contracts and options thereon, which are traded on exchanges, are valued at their closing prices as of the close of such exchanges. Options written or purchased are valued at the last sale price in the case of exchange-traded options. In the case of options traded in the over-the-counter market, valuation is the last asked price (options written) or the last bid price (options purchased). Swap agreements are valued by quoted fair values received daily by the Fund's pricing service. Short-term investments with a remaining maturity of 60 days or less are valued at amortized cost, which approximates market value, under which method the investment is valued at cost and any premium or discount is amortized on a straight line basis to maturity. Investments in open-end investment companies are valued at their net asset value each business day. Securities and other assets for which market quotations are not readily available are valued at fair value as determined in good faith by or under the direction of the Board of Directors of the Fund.

(b) Derivative financial instruments -- The Fund may engage in various portfolio investment strategies both to increase the return of the Fund and to hedge, or protect its exposure to interest rate movements and movements in the securities markets. Losses may arise due to changes in the value of the contract or if the counterparty does not perform under the contract.

o Financial futures contracts -- The Fund may purchase or sell financial futures contracts and options on such futures contracts. Futures contracts

Edgar Filing: MUNIVEST FUND INC - Form N-CSRS

are contracts for delayed delivery of securities at a specific future date and at a specific price or yield. Upon entering into a contract, the Fund deposits and maintains as collateral such initial margin as required by the exchange on which the transaction is effected. Pursuant to the contract, the Fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in value of the contract. Such receipts or payments are known as variation margin and are recorded by the Fund as unrealized gains or losses. When the contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

- o Options -- The Fund may purchase and write call and put options. When the Fund writes an option, an amount equal to the premium received by the Fund is reflected as an asset and an equivalent liability. The amount of the liability is subsequently marked-to-market to reflect the current market value of the option written. When a security is purchased or sold through an exercise of an option, the related premium paid (or received) is added to (or deducted from) the basis of the security acquired or deducted from (or added to) the proceeds of the security sold. When an option expires (or the Fund enters into a closing transaction), the Fund realizes a gain or loss on the option to the extent of the premiums received or paid (or gain or loss to the extent the cost of the closing transaction exceeds the premium paid or received).

Written and purchased options are non-income producing investments.

- o Forward interest rate swaps -- The Fund may enter into forward interest rate swaps. In a forward interest rate swap, the Fund and the counterparty agree to make periodic net payments on a specified notional contract amount, commencing on a specified future effective date, unless terminated earlier. When the agreement is closed, the Fund records a realized gain or loss in an amount equal to the value of the agreement.

Notes to Financial Statements (concluded)

(c) Income taxes -- It is the Fund's policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable income to its shareholders. Therefore, no federal income tax provision is required.

(d) Security transactions and investment income -- Security transactions are recorded on the dates the transactions are entered into (the trade dates). Realized gains and losses on security transactions are determined on the identified cost basis. Dividend income is recorded on the ex-dividend dates. Interest income is recognized on the accrual basis. The Fund amortizes all premiums and discounts on debt securities.

(e) Dividends and distributions -- Dividends from net investment income are declared and paid monthly. Distributions of capital gains are recorded on the ex-dividend dates.

2. Investment Advisory Agreement and Transactions with Affiliates:

The Fund has entered into an Investment Advisory Agreement with Fund Asset Management, L.P. ("FAM"). The general partner of FAM is Princeton Services, Inc. ("PSI"), an indirect, wholly-owned subsidiary of Merrill Lynch & Co. ("ML & Co."), which is the limited partner.

Edgar Filing: MUNIVEST FUND INC - Form N-CSRS

FAM is responsible for the management of the Fund's portfolio and provides the necessary personnel, facilities, equipment and certain other services necessary to the operations of the Fund. For such services, the Fund pays a monthly fee at an annual rate of .50% of the Fund's average daily net assets, including assets acquired from the sale of Preferred Stock. The Investment Adviser has agreed to waive its management fee by the amount of management fees the Fund pays to FAM indirectly through its investment in the Merrill Lynch Institutional Tax-Exempt Fund. For the six months ended February 28, 2005, FAM reimbursed the Fund in the amount of \$13,941.

For the six months ended February 28, 2005, the Fund reimbursed FAM \$9,886 for certain accounting services.

Certain officers and/or directors of the Fund are officers and/or directors of FAM, PSI, and/or ML & Co.

3. Investments:

Purchases and sales of investments, excluding short-term securities, for the six months ended February 28, 2005, were \$252,223,863 and \$221,777,394 respectively.

4. Capital Stock Transactions:

Common Stock

At February 28, 2005, the Fund had one class of shares of Common Stock, par value \$.10 per share, of which 150,000,000 shares were authorized.

Preferred Stock

Auction Market Preferred Stock are redeemable shares of Preferred Stock of the Fund with a par value of \$.025 per share and a liquidation preference of \$25,000 per share plus accrued and unpaid dividends, that entitle their holders to receive cash dividends at an annual rate that may vary for the successive dividend periods for each series. The Fund is authorized to issue 10,000,000 shares of Preferred Stock. The yields in effect at February 28, 2005 were as follows: Series A, 1.85%; Series B, 1.84%; Series C, 1.859%; Series D, 1.809%; Series E, 1.80%; and Series F, 1.84%.

Shares issued and outstanding for the six months ended February 28, 2005 remained constant. During the year ended August 31, 2004, shares increased by 2,360 shares from the issuance of an additional series of Preferred Stock.

The Fund pays commissions to certain broker-dealers at the end of each auction at an annual rate ranging from .25% to .375% calculated on the proceeds of each auction. For the six months ended February 28, 2005, Merrill Lynch, Pierce, Fenner & Smith Incorporated, an affiliate of FAM, received \$207,835 as commissions.

5. Capital Loss Carryforward:

On August 31, 2004, the Fund had a net capital loss carryforward of \$25,236,756, of which \$7,556,873 expires in 2008 and \$17,679,883 expires in 2009. This amount will be available to offset like amounts of any future taxable gains.

6. Subsequent Event:

The Fund paid a tax-exempt income dividend to holders of Common Stock in the amount of \$.056000 per share payable on March 30, 2005 to shareholders of record on March 15, 2005.

NR (Not Rated)	0.9

Dividend Policy

The Fund's dividend policy is to distribute all or a portion of its net investment income to its shareholders on a monthly basis. In order to provide shareholders with a more stable level of dividend distributions, the Fund may at times pay out less than the entire amount of net investment income earned in any particular month and may at times in any particular month pay out such accumulated but undistributed income in addition to net investment income earned in that month. As a result, the dividends paid by the Fund for any particular month may be more or less than the amount of net investment income earned by the Fund during such month. The Fund's current accumulated but undistributed net investment income, if any, is disclosed in the Statement of Net Assets, which comprises part of the financial information included in this report.
