VIVO, THE SOUTHERN HEMISPHERE'S LARGEST WIRELESS COMMUNICATION GROUP, ANNOUNCES FIRST QUARTER 2005 CONSOLIDATED RESULTS OF TELESP CELULAR PARTICIPAÇÕES S.A.

São Paulo - Brasil, April 28, 2005 – Telesp Celular Participações S.A. (TCP) (BOVESPA: TSPP3 (ON = Common Shares) / TSPP4 (PN = Preferred Shares); NYSE: TCP), announced today its consolidated results for first quarter 2005 (1Q05). The Company's operating and financial information, except as otherwise indicated, is presented in Brazilian reais in accordance with Brazilian Corporate Law. TCP controls: (i) 100% of the share capital of Telesp Celular S.A. (TC); (ii) 100% of the share capital of Global Telecom S.A. (GT); and (iii) 90.2% of the voting capital (51.4% of the total capital), excluding treasury shares, of Tele Centro Oeste Celular Participações S.A. (TCO).

Telesp Celular Participações (controlling shareholder of Tele Centro Oeste Participações S.A.), along with Tele Leste Celular Participações S.A., Tele Sudeste Celular Participações S.A. and Celular CRT Participações S.A., make up the assets of the joint venture undertaken by Telefónica Móviles and Portugal Telecom that operates under the **VIVO** brand, *Top of Mind* on the Brazilian market. In April 2005, VIVO Group reached 27 million customers, thus consolidating its market leadership .

HIGHLIGHTS TCP 1Q05 First **3G** cellular operator in Latin America . A key tool for the company's innovation strategy, which was possible due to the CDMA2000 1xEV-DO technology.

Absolute **leadership** in innovation and variety of services launched on the market. Successful in the **differentiation** strategy as regards its competitors as a result of the provision of innovating services".

TCP's **customer base** has risen 25.6% over 1Q04, recording 17,949 thousand customers.

In relation to 1Q04, the **post-paid customers base** increased by 5.8%, showing the successful campaigns for obtaining customers in this market segment.

SAC recorded a 8.5% reduction, as compared to 4Q04, despite the strong competition and marketing campaigns turned to different market segments.

Monthly **churn** at 1.5% in 1Q05, with 0.3 p.p. reduction in relation to 4Q04, showing the successful customer retention campaigns, despite the strong competition.

The R\$ 675.0 million **EBITDA** represents a 10.2% increase in relation to 4Q04. **EBITDA Margin** of 40.1% in 1Q05, in spite of being operating in one of the most competitive markets in the world, with high growth potential.

TCP's **accrued losses** decreased by 58.3% as compared to the 4Q04, totaling R\$ 97.9 million.

Sustained growth of **data revenues** , which increased by 25. 0% over last year, accounting for 5.7% of the net services revenue in 1Q05.

The qualified base for **data services** has already reached 84% in 1Q05.

Productivity increase in 1Q05 was 21.4% in relation to 1Q04, showing the growing improvement in operating efficiency.

VIVO

VIVO celebrated two years in April, recording more than 27 million customers. In these two outstanding years of operations marked by the largest community of customers in Brazil , bringing together innovation and the biggest CDMA coverage in the domestic territory. The adoption of the most advanced technology has made it possible for the company to offer several new products and innovations, such as the following services: *Vivo Agenda* , *Vivo Localiza* , *Olho Vivo* , state-of-the-art corporate solutions, interactive games such as *Vivo em Ação* , downloads of games, video and songs, in addition to the capability to watch goals in both the Brazilian and European soccer championships which are provided by VIVO on an exclusive basis.

Quality Policy

Among the strategic goals the implementation of the processes management resulted in the Company being awarded **ISO 9001:2000 certification** . Such policy is aligned with " **Mission** " expressed by the Chief Executive Officer: *"To meet the customers' needs and make them loyal to the company as a result of the quality and innovation of our products and services, offered by committed and skilled professionals. To keep market leadership along with profitable growth, thus generating value to the shareholders and seeking permanent improvement of processes and results. To consolidate the company's image, contributing to the development of our society."*

Distribution Channels On March 31, 2005, TCP had 202 own sales points, in addition to an efficient network of accredited dealers, whether exclusive or not, totaling about 5,350 sales points, which are able to market services and cellular phones, thus making the Company also a leader in number of distribution channels.

Technological Innovations

VIVO and *Banco do Brasil* have launched the *Download Banking* system through cellular phone. This service allows access to *Banco do Brasil* accounts through VIVO cellular phone, with the same convenience and safety as in the *Internet Banking* . Initial transactions available are account balance and statement consultation, payment of bills and convention fees, transfer of funds between BB accounts, recharge of pre-paid cellular phones and donations to the Zero Hunger

Program. This facility is available from the VIVO *Downloads* service, and allows computer applications to be downloaded into compatible cellular phones and to be used in the same way as in a regular microcomputer.

In February VIVO launched the new Chat service, which provides users with a larger number of interactive options. Provided with more commands, chat rooms and much more fun, the new version enables more intelligent and intuitive navigation, making conversation quicker and in real time. Having been on the air since December 2004, VIVO's Chat has already recorded 17 thousand daily users.

Basis for Presentation of Results The partial *Bill & Keep* (B&K) system was implemented in July 2003, under which payment for use of local network among SMP operators is not made unless traffic rate among them exceeds 55%, that causes an impact on interconnection revenue and cost.

Some information disclosed for 1Q04 and 4Q04 may have been re-classified, as applicable, for comparison purposes. Figures disclosed are subject to differences, due to rounding-up procedures.

Operating Highlights of Telesp Celular Participações (TCP) Continued market leadership as a result of the increase in the **customer base** by 25.6% over 1Q04, reaching 17,949 thousand customers, despite strong competition in the cellular telephone market. It is important to emphasize also the company's accounting practices, being extremely severe with frauds, disconnections and subscriptions, thus aggregating reliability and transparency to its figures.

In 1Q05, **post-paid net additions** increased by 172.7% over the same period of last year, reflecting the Company's successful commercial actions turned to this segment. **Share of net additions** in 1Q05 was 18.5%, in a strongly competitive environment, which recorded a drop in the prices of medium and high cost handsets offered by the competitors.

SAC decreased by 8.5% in 1Q05 over 4Q04, as a result of seasonal differences between the periods and increase in the prices of low cost handsets after the end of Christmas promotions .

The **churn** at 1.5% in the quarter, with a drop of 0.3 p.p. in relation to 4Q04, having remained under control and showing the success of campaigns adopted by the Company for ensuring customer loyalty, as for example, the points program, which offers discounts to customers for changes of handsets.

The **blended ARPU** of R\$ 28.2 recorded a 10.8% reduction in relation to 4Q04, basically due to seasonal differences between the periods. Year-to-year variation is due to the customer mix effect, drop in incoming ARPU due to incoming traffic migration from fixed to mobile towards mobile to mobile, in addition to the Bill & Keep effect and right planning programs (customer profile adequacy plans) effected in the post-paid service users base. It must be highlighted that VU-M was not updated in the quarter.

The **post-paid MOU** remained almost stable in relation to 1Q04, despite the reduction in the incoming MOU, which was fully offset by the increase in the outgoing MOU. Total MOU in 1Q05 decreased by 6.0% in relation to 4Q04, as a result of reduced use during the vacations period, reduction in minute bonus, mix change and reduction in incoming traffic.

The customer/employee ratio (**productivity**) in 1Q05 increased by 21.4% and 2.3% in relation to 1Q04 and 4Q04, respectively, due to the Company's continuous programs to obtain organizational and process synergies, integration and rationalization.

Net Services Revenue The net services revenue grew 2.1% in relation to 1Q04, recording R\$ 1,503.9 million in the quarter. It must be emphasized that the outgoing services revenue recorded a 6.8% increase in 1Q05, despite the *right planning* program. This increase, however, was partially offset by a reduction in the incoming revenue, as a result of the transition from fixed-mobile traffic to mobile-mobile traffic, with consequent drop in interconnection revenue and the *Bill & Keep* effect. The 5.8% drop in relation to 4Q04 was caused by seasonal differences between the periods and strong competition.

We must point out that no increase has been recorded up to the end of the first quarter, in the VU-M, as it had occurred in February of the previous years.

Data revenues in 1Q05 were up 25.0% over last year, representing 5.7% of the net service revenues in the quarter. This increase has continued to occur due to a more widespread access and use of such services, in addition to the services launched on the market in 2004, such as *Vivo Agenda* , *Vivo Encontra* and *Vivo Downloads* . The SMS accounted for 70.0% of data revenues in 1Q05. Average number of SMS messages sent per month in the quarter was some 80 million.

The successful services turned to the high value and corporate market also contributed to keep the sustainable increase of data service revenues. VIVO has played an outstanding role in launching innovating services and integrated solutions, such as "Vivo Direto" (*Push to Talk* in the cellular phone) and *Vivo Entrega* .

Personnel Costs Personnel cost increased in 1Q05 over 1Q04, mainly due to the collective bargaining agreement signed in December 2004, which approved a 6.0% adjustment to salaries, besides a 4.3% increase in the headcount.

Cost of Services Rendered Increase of 6.6% in the cost of services rendered in 1Q05, when compared to the previous quarter, is mainly due to the adequacy of an accounting practice for the Fistel fee relating to controlled company TCO and to the increase in the cost of

outsourced services, arising out of an increase in the maintenance expenses relating to the switching platform (equipment modernization). Such increases were partially offset by lower interconnection costs, due to seasonal differences between the periods. The increase recorded in "Leased lines" is due to an increase in the rentals of circuits, which is explained by the plant growth.

Selling Expenses

The Company placed priority efforts on ensuring loyalty from medium and high price ranges, which is evidenced by a reduction in its Churn in relation to 4Q04. In 1Q05, the Company's strategy was to keep its market leadership without destroying value.

Services selling expenses recorded a 27.5% decrease in relation to 4Q04, caused by a reduction in net additions in the period and also by the cost of third parties services, especially commissions paid to its distribution network and marketing expenses.

In 1Q05, the provision for bad debtors (PDD) was represented 2.3% of the gross revenue (1.5% in 1Q04), reflecting the increase in the contract customer base.

General and Administrative Expenses

General and administrative expenses recorded 9.4% decrease in relation 1Q04. Such variation was due to the successful structural costs reduction program and to the high level of synergy achieved among the Group Companies; that also impacted the 4Q04, together with non-recurrent effects. Except for this effects, general expenses would remain stable.

Other Operating Revenues / Expenses

The Company recorded an improvement in its income when compared to the same period of the previous year. In relation to 4Q04, the 70.5% drop (non-recurring) was caused by the recovery (in December 2004) of expenses with reversal of liabilities with suppliers.

EBITDA

Considering the period seasonality and the strong commercial activity recorded in 1Q05, the evolution achieved followed the strategy adopted by the Company to add value to its operation. In this context, EBITDA (earnings before interests, taxes, depreciation and amortization) was R\$ 675.0 million, up 10.2% in relation to 4Q04. EBITDA margin was 40.1% in 1Q05, 8.8 p.p. above the margin recorded in the previous quarter.

EBITDA margin for services in 1Q05, excluding revenue and selling costs of handsets, was 50.5%.

Depreciation and Amortization

Depreciation and amortization remained stable in relation to recorded 4Q04. The increase in 1Q05 over 4Q04 was impacted by the amortization of the premium ascertained in the acquisition of Global Telecom, which amortization started in 2005.

Financial Revenues (Expenses) Net financial expenses in 1Q05 decreased by R\$ 121.6 million in relation to 4Q04, mainly due to the reduction in the indebtedness caused by the December 2004 capital increase. The lower financial expenses in 1Q05 was also caused by the PIS and COFINS incidence on the allocation of interests on own capital for December 2004 (rate of 9.25% on R\$ 90.3 million for TCO and R\$ 39.8 million for TCP), which is not repeated in 1Q05, in addition to smaller losses arising out of hedge operations in the coverage of suppliers in 1Q05.

In the comparison between 1Q05 and 1Q04, TCP's net financial expense remained almost stable, counterbalancing the increase in interest rates occurred in the period (3.76% in 1Q04 and 4.18% in 1Q05), with a reduction in the spreads obtained upon the renewal of the transactions.

Non-operating Result A positive result of R\$ 2.9 million was recorded in 1Q05, against a negative result of R\$ 52.6 million in the previous quarter, due to the retirement and replacement of analog equipment by the CDMA 1xRTT network, as a consequence of the technological evolution.

Net Result The Company recorded losses in the period, of R\$ 97.9 million, 58.3% down in relation to the losses posted in 4Q04.

Indebtedness

On March 31, 2005, TCP's debts related to loans and financings amounted to R\$ 5,215.1 million (R\$ 4,963.2 million on December 31, 2004), 60.2% of which is nominated in foreign currency. The Company has signed exchange rate hedging contracts thus protecting 100% of its debt against foreign exchange volatility. This debt was offset by cash and financial investments (R\$ 978.1 million) and by derivative assets and liabilities (R\$ 42,9 million payable) resulting in a net debt of R\$ 4,279.9 million, a 12.4% increase in relation to December 2004 .

Short-term debt represented 60.2% of total debt on March 31, 2005. Short-term includes maturity of public promissory notes issued in the domestic market in the amount of R\$ 1 billion.

The net cash reduction in relation to December 2004 is due, mainly, to the Fistel inspection and operating fee (TFF) paid in March of every year (Anatel), and to the handset suppliers referring to deliveries effected in the end of 2004 for the Christmas campaign .

Capital Expenditures (Capex) Investments effected in the quarter totaled R\$ 410.9 million, representing a 18.5% decrease in relation to the total amount invested in 4Q04. Investments are basically due to the following factors: (i) more accelerated migration from TDMA to CDMA technology, thus keeping up with the GSM operators, which have also migrated from TDMA; (ii) consolidation and rationalization of information systems, especially billing, customer care, prepaid platforms and SAP management systems; and (iii) continued quality and expansion of the coverage provided by the company in order to meet the customer base growth .

Operating Cashflow The positive operating cash flow in any of the periods evidences that TCP has generated funds from its operations that are sufficient to implement its capital expenditures program, having recorded R\$ 264.1 million in the quarter, 145.0% higher than in 4Q04.

Capital Market In 1Q05, the value of TCP's common shares (ON) and preferred shares (PN) decreased by 1.0% and 11.3%, respectively, while the Bovespa (São Paulo Stock Exchange) index rose 1.6%. Between January to March 2005, the Company's PN shares were traded in 100% of the trading sessions, resulting in an average daily trading volume of R\$ 13.7 million. By the end of 1Q05, ON and PN shares were traded at R\$ 4.95 and R\$ 6.38, respectively, per lot of one thousand shares.

The price of TCP's Level II ADRs dropped by 12.1% in the quarter, in face of a 2.6% decrease in the Dow Jones index. Average daily volume of TCP ADRs traded on the

NYSE in 1Q05 was US\$ 6.9 million. The closing price of TCP's ADRs in the quarter was US\$ 5.98.

Reverse Stock Split

The Board of Directors of the Company submitted the proposal for reverse split of TCP's 1,582,563,526,803 book-entry, registered shares, with no face value to the Special Meeting of Shareholders held on 04/01/2005, of which 552,896,931,154 are common shares and 1,029,666,595,649 are preferred shares of its capital stock, in the proportion of two thousand and five hundred (2,500) shares for one (1) share of the respective type, converting them into 633,025,410 book-entry, registered shares, with no face value, of which 221,158,772 are common shares and 411,866,638 are preferred shares, in accordance with the provisions in Article 12 of Law no. 6404/76, as further amended.

No ADRs grouping will be effected in the United States of America, only the number of shares for each ADR will change on May 4, 2005, namely, from 2,500 shares for each ADR to one (1) share for each ADR. Therefore, no fractional shares will result in the ADRs program, differently from what will occur in the Brazilian transaction.

TCP's authorized capital should be also changed by the same proportion, being reduced from 1.8 trillion shares to 720 million shares, with consequent amendment to the Company's Bylaws.

Subsequent Events

At a meeting of TCP's Board of Directors held on 04/25/2005, a resolution was passed approving the 2nd issue of debentures of the Company, for public distribution, comprised of 100,000 simple, non-convertible, book-entry type, unsecured debentures, in two series, guaranteed by Telesp Celular S.A., with unit face value of R\$ 10,000.00 ("Debentures"), maturing within 10 years from the issue date, namely, 05/01/2005 ("Issue Date"), totaling R\$ 1,000,000,000.00 ("Offering" or "Issue"). The Offering will be made within the scope of the First Securities Distribution Program of the Company, filed with the CVM (Brazilian Securities and Exchange Commission), with 2-year tenor and limit of up to R\$ 2,000,000,000.00. The funds raised through this Offering will be used for refinancing the debt referring to the 3rd issued of promissory notes of the Company. The application for registration of the Offering is under examination with the CVM.

Further information on the above described transaction may be obtained from our web site: www.vivo.com.br/ir

Social Responsibility

VIVO has carried out an environment awareness action under Verão VIVO Program, holding several events in coastal regions of Brazil in January and February. For such purpose, it has been provided support by VIVO Institute, which sponsored the production of 25,000 copies of book " *A Água Nossa de Cada Dia* " (Our Everyday Water), with drawings and authorship by Ziraldo. Focused on clean sea water, the book provides basic guidelines to children and adults on environment preservation, with the purpose of stimulating citizenship.

In February, VIVO Institute opened "Espaço VIVO Voluntário" (VIVO Voluntary Space) in São Paulo, a production center for Braille materials. Such Space will enable VIVO volunteers to produce Braille contents requested by VIVO Institute's partner institutions in all the area covered by VIVO operators. Accordingly, the Program will contribute to teach blind children and adults to read, making it easier for them to have access to information.

"Caravana do Esporte", an ESPN Brazil Project was launched on March 8, being sponsored by VIVO Institute, which will take sport-related activities to some low-income regions in Brazilian North, Northeast and Central-West regions for 10 months. These trips will be taped and exhibited in 10 documentaries as from April. The implementation of "Caravana do Esporte" project will be possible thanks to the sponsorship provided by Vivo Institute, the alliance with the UNICEF and partnerships with several consecrated athletes. "Caravana do Esporte" intends to assist five thousand children and young people of 10 cities indicated by the UNICEF.

VIVO Institute and Ayrton Senna Institute have sponsored an event for mobilization and calling of mayors in Tocantins state for the 2005 edition of *Acelera Tocantins* and *Se Liga Tocantins* programs, which aim at correcting student/school grade unbalance. The results of programs developed in 2004 thanks for the partnership between Ayrton Senna Institute and VIVO Institute, were also presented.

The Efort Partnership for Digital Inclusion was also launched in March, being comprised of Efort Institute, VIVO Institute, Furnas Centrais Elétricas, *São Paulo* City Hall, Social Security Institute and Office of the Federal Attorney-General, having for goal the inclusion of young people, adults and elderly people with special education needs in the labor market. VIVO Institute contributed to the project through donation of equipment for assembling a fully-adapted telecenter, which houses microcomputers with special software (amplifiers and text readers for blind people), lifting platform (for taking deficient people to the auditorium) and Braille printers.

Main Prizes, Awards and Events VIVO was nominated, for the second consecutive year, as one of the mobile telephone operators that mostly respect consumers within mobile telephone category, during the Marketing Show sponsored by Consumidor Moderno magazine.

Ipsos-ASI, a division of Ipsos-Brasil research institute focused on communication evaluation (advertising effectiveness) has selected only three campaigns as the most effective in 2004. Among them is VIVO's Mother's Day campaign.

VIVO sponsors the second edition of the Open Air event, which will be held in the Capitals of three States in this year. VIVO Open Air, which was a great success last year, allows public audiences to watch open air movies. In this year the event was held from March 10 to 31, in the city of São Paulo . In Rio de Janeiro , it will be held until April 28 th and, for the first time in Brasília, it will be held from May 11 to 29. One hundred thousand people are expected to attend the events in the three cities.

VIVO was present at Telexpo 2005, the main IT and Telecom event in Latin America, which was held in March, in São Paulo . The exhibition was used for showing the entire portfolio of the products and services offered by the Group, divided into five families: "VIVO Encontra", "VIVO Inovando", "VIVO 3G", "VIVO Pagamentos" and "VIVO Empresas ".

VIVO has sponsored significant Carnival actions in the cities of São Paulo , Rio de Janeiro and Salvador . One of the noteworthy projects was Digital Carnival, which offered a set of services based on the theme of Brazilian most traditional parade. VIVO service, in partnership with Nokia, offered images and sounds of the main Samba schools of Rio de Janeiro .

VIVO entered into a partnership with the Brazilian Soccer Confederation for sponsoring the Brazilian Soccer Teams, in the following categories: main male and female and basic team. Valid for ten years, the partnership includes distribution of multimedia contents through the operator's cellular handsets, in addition to application of VIVO brand on accessories, some soccer team transportation vehicles and, in special, on training uniforms .

*Operating
Highlights of
Telesp Celular
(TC)*

Continued market leadership as a result of the increase in the **customer base** by 16.1% over 1Q04, reaching 9,255 thousand customers. Aggregate net additions in the quarter decreased in relation to 4Q04, due to the seasonal differences between the periods and the increase of the entry barriers after the Christmas campaign, as well as, the focus on the retention of high value clients during the quarter.

SAC decreased by 13.9% in relation to 4Q04, as a result of period seasonality and increase in the prices of low cost handsets after the end of Christmas promotions.

The **churn** remained stabled, having recorded 1.7% in the third consecutive quarter, despite intense competition, confirming the success of the commercial practices adopted for ensuring customer loyalty.

The **blended ARPU** of R\$ 31.4 recorded a 9.7% reduction in relation to 4Q04, basically due to seasonal differences between the periods. Year-to-year variation is due to the customer mix effect, drop in incoming ARPU due to incoming traffic migration from fixed to mobile towards mobile to mobile, in addition to the Bill & Keep effect and right planning programs (customer profile adequacy plans) effected in the post-paid service users base. It must be highlighted that VU-M was not updated in the quarter.

Total MOU decreased by 4.5% in the comparison between 1Q05 and 4Q04, reflecting a four-minute decrease, due to the reduction in minutes bonus and drop in the incoming traffic. Post-paid MOU remained stable in relation to the 1Q04 and 4Q04.

Improvement in operation **productivity** can be measured by the increase in 1Q05 of 14.3% and 1.1% in relation to 1Q04 and 4Q04, respectively, showing the efficiency gains earned by the operator.

***Operating
Highlights of
Global Telecom
(GT)***

Increase in the **customer base** by 41.3% over 1Q04 and by 2.6% over 4Q04, reaching 2,646 thousand customers. Share of net additions in 1Q05 was 14.7%, in an intensive competition environment, which recorded a drop in prices of medium and high range handsets offered by the competitors, as a result of the commercial aggressiveness.

SAC decreased by 5.1% in relation to 1Q04, despite increased pressures with subsidies, commissions and advertising caused by an aggressive competition and entry of a new competitor.

Churn reduced in 0.1 p.p. in relation to 1Q04, reflecting the Company's successful initiatives to ensure customer loyalty and customer retention, in a market which, as from September, has 4 operators.

The **blended ARPU** of R\$ 21.6 recorded a 3.6% reduction in relation to 4Q04, basically due to seasonal differences between the periods. Year-to-year variation is due to the customer mix effect, drop in incoming ARPU due to incoming traffic migration from fixed to mobile towards mobile to mobile, in addition to the Bill & Keep effect and right planning programs (customer profile adequacy plans) effected in the post-paid service users base. It must be highlighted that VU-M was not updated in the quarter. Year over year, an increase of 11.5% was registered in the post-paid ARPU.

The **post-paid MOU** increased by 2.7%, representing a 4-minute increase in 1Q05, in relation to 4Q04. Total MOU recorded a 3.0% drop in relation to the previous quarter,

caused by the reduction in the prepaid customer base MOU, which represent 88.4% of the total.

Synergy and efficiency gains obtained by the operator have fostered the upward **productivity** trend, with productivity having grown 51.3% and 7.6% in relation to 1Q04 and 4Q04, respectively.

**Consolidated
TCO's Operating
Highlights**

Continued market leadership as a result of the increase in the **customer base** by 35.8% in the last 12 months, despite strong competition in the cellular telephone market. It is important to emphasize also the company's accounting practices, being extremely severe with frauds, disconnections and subscriptions, thus aggregating reliability and transparency to its figures.

Net additions totaled 227 thousand customers in 1Q05, in a market which, as from September, has 4 operators in all the regions. TCO has continued to keep its leadership, with a 50.2% **market share**, despite the strong competition in the period.

SAC decreased by 8.5% in 1Q05 over 4Q04, as a result of period seasonality and increase in the prices of low cost handsets after the end of Christmas promotions.

The **churn** at 1.3% recorded a drop of 1.0 p.p. in relation to 4Q04, thus confirming the success of the commercial practices adopted for the purpose of ensuring customer loyalty, even though operating in a strongly competitive market.

The **blended ARPU** of R\$ 26.2 recorded a 14.1% reduction in relation to 4Q04, basically due to seasonal differences between the periods. Year-to-year variation is due to the customer mix effect, drop in incoming ARPU due to incoming traffic migration from fixed to mobile towards mobile to mobile, in addition to the Bill & Keep effect and right planning programs (customer profile adequacy plans) effected in the post-paid service users base. It must be highlighted that VU-M was not updated in the quarter. The 1Q05 pos-paid ARPU increased by 2.3% in relation to the 1Q04, due to the increase of the outgoing ARPU.

The **post-paid MOU** increased by 11.2% in relation to 1Q04, representing a 19-minute increase. Total MOU was impacted by the changes in the customer mix.

The efficiency gains in the operations can be measured by the **productivity** increase of 50.1% and 6.0% in relation to 1Q04 and 4Q04, respectively, due to the Company's continuous search for organizational and process synergies, integration and rationalization.
