FOURTH QUARTER AND YEAR 2008 CONSOLIDATED RESULTS

February 13, 2009 – VIVO Participações S.A. announces today its consolidated results for the fourth quarter 2008 (4Q08) and for year 2008. The Company’s operating and financial information, except as otherwise indicated, is presented in Brazilian Reais in accordance with Brazilian Corporate Law, and the comparable figures refer to the fourth quarter 2007 (4Q07), except as otherwise mentioned.

The conclusion of the acquisition of Telemig Celular Participações, the launching of the 3.5G – WCDMA/HSUPA network – with the largest WCDMA coverage in Brazil, the beginning of operation in the Northeast states, among many other achievements, converged to one sole goal: to provide the best services for the individuals to be able to connect themselves – whenever wished, however wished, wherever wished, every time more. Thus, we fostered the company in a network, which brings along a lot of opportunities for people to develop themselves, progress and live better. Thus acting, we fed a virtuous cycle which is reflected on the self-sustainable evolution of our own business, closing year 2008 with the best result since Vivo was organized.

HIGHLIGHTS

- In December, **Vivo’s customer base** reached 44,945 thousand customers, with a 29.80% market share, reaffirming its **leadership** in the domestic market;
- From an inorganic view point, the customer base grew 34.2% and, on a combined basis with Telemig, 20.2%, in the comparison between 4Q08 and the same period of last year;
- In 4Q08, Vivo managed to attract 2,668 thousand new customers, with 27.1% in market share of **net additions**. In the year-to-date, it recorded 7,561 thousand new customers;
- In December 2008, the **WCDMA** network already served 314 municipalities with this technology.
- The **GSM operation achieved more than 30.4 million** accesses, representing 67.8% of the total customer base;
- **Service Revenue** of R\$3,788.8 million, an increase of 26.9% as for an inorganic basis (14.2% as for a combined basis) over 4Q07 and of 4.0% over 3Q08;
- Self-supported **data and VAS revenue**, which grew 35.1% as for an inorganic growth and 20.8% in a combined comparison in relation to 4Q07, representing 10% of the net service revenue in 4Q08;
- **ARPU** of R\$ 29.1 in the quarter, due to the usage stimulation campaigns;
- **EBITDA margin** in the quarter of 32.7% **growing 6.6 percentile points** over 4Q07. **EBITDA** reached R\$ 1,396.3 million in the quarter, a growth of 53.7% from an inorganic view point and 42.6% in a combined comparison over 4Q07;
- In the **year-to-date 2008**, the **EBITDA** reached R\$ 4,867.5 million, an increase of 37.3% in relation to the year-to-date for the previous year. The **EBITDA margin** of 30.8% is 5.2 percentile points higher in the

*Market Cap R\$ 10,415 million as
of 12/31/2008*

comparison between the periods;

- The **allowance for doubtful accounts** was R\$ 59.5 million in the quarter, representing 1.0% of the gross revenue, which represents a reduction of 28.2% in relation to 4Q07;
- Net profit of R\$ 215.5 million in the quarter, 60.9% higher than the figure recorded for the previous quarter. In the year-to-date 2008, calculated according to corporate criteria, such amount came to R\$ 389.7 million.
- The **net debt** recorded the amount of **R\$ 5,302.1 million** in 4Q08, due to investments made along the year. All the financial debt is hedged against exchange variation;
- A dividend proposal of R\$1.0959 per common and preferred share, will be submitted to the General Shareholders Meeting.

MESSAGE FROM THE PRESIDENT AND CEO

From any view point of analysis, 2008 was an excellent year for Vivo. We reaffirmed our market leadership with a market share of 29.8%. This means that, out of the 150.6 million Brazilians owning cellular phones in the end of December 2008, 44.9 million were our customers. In terms of revenue per user, our share was still higher, approximately 33%. The financial income earned in the year is extremely significant. The net operating revenue grew 14.2% over 2007, recording R\$ 15,819.1 million. The EBITDA margin of 30.8% on the operating revenue is 5.2 percentile points higher than it was last year. In the same comparison, the net profit calculated in accordance with the corporate law reverted the negative result recorded in the previous year, totaling R\$ 389.7 million.

Undoubtedly, year 2008 was a period of major achievements, among which are our starting to operate in Minas Gerais state, the opening of our operations in the Northeast region, and the launching of 3.5G – WCDMA/HSUPA services. But what is in the core of these and other achievements is something to be sought in a strategy that started to be developed in middle 2005, demanding firm and courageous decisions. We fought fraud and cloning problems, unified systemic platforms and carried out a corporate reorganization. We made a daring decision: to build a GSM network (which technology became the prevailing one) overlapping the CDMA network, in such manner that our customers could be able to talk in the whole domestic territory and in more than 170 countries. In 2007, we acquired Telemig Celular, in order to start operating in Minas Gerais state, as well as the 1.9 (Northeast) and 3G bands. These actions were responsible for giving rise to the 2008 achievements.

Connecting people is our business, doing it with the best quality is our focus. Accordingly, we have become trustworthy to our customers, employees, partners, society, our investors and shareholders. Thus, 2008 results deserve to be reviewed beyond their significant figures. They were generated as from a consistent strategy, pursued by Vivo on a determined and courageous manner in the last years and which serves as basis for its future in a self-supported growth route.

ROBERTO LIMA
President and CEO

Basis for presentation of results

Figures disclosed are subject to differences, due to rounding-up procedures. Information for 4Q07, 2007 year-to-date and 2008 year-to-date was prepared in combination with the results of Telemig Celular Participações, thus allowing comparison with the current quarter results, in which Telemig data are already consolidated and, whenever applicable, re-classified.

Operating Cash Flow

EBITDA Growth contributes to generation of Operating Cash Flow. The Operating Cash Flow (EBITDA-CAPEX) recorded a positive result of R\$ 76.5 million in the quarter and of R\$ 851.9 million in the year-to-date, which was stimulated by the growth in the EBITDA, even with increased investment in 4Q08. This fact, added to the variation in the working capital, in the year-to-date, has accounted for a positive result of R\$ 202.1 million.

Capital Expenditures (CAPEX)

Investments in 4Q08 as a result of launching of the WCDMA/HSUPA network, increase of capacity and Northeast coverage. The expenditures provided the increase in the GSM/EDGE capacity and continuance with the expansion of the footprint of the WCDMA/HSUPA network (wireless high speed data traffic), allowing Vivo to offer broadband services (Vivo ZAP 3.5 G), Digital TV and Video-Call. The company closed the year with coverage in more than 3,000 cities. CAPEX in 4Q08 represents 30.9% of the net revenue. In the year-to-date, the investments total R\$ 4,015.6 million (corresponding to 25.4% of the net revenue), mostly applied to acquisition of the licenses. The coverage of 314 municipalities with 3.5G consolidates the leadership of this technology.

OPERATING HIGHLIGHTS

The offers in 2008 were focused on selected growth and value customers, mainly in high end segments.

- The customer base at the end of the 4Q08 reached **44,945 thousand customers**, of which more than **30.4** million in GSM technology, representing an increase of 20.2% in relation to 4Q07 and of 6.3% in relation to 3Q08. The promotions implemented during the quarter and all over the year, the quality differential, the attractiveness of the services, the special efforts to value the customer base and the portfolio of plans and handsets contributed to such growth, keeping Vivo in an absolute leadership position, with 29.8% market share in the end of the quarter.
- **Net additions** in 4Q08 totaled **2,668 thousand new customers**, with a market share of net additions of 27.1%. Activations in GSM and WCDMA technology, which represent 95.2% of total activities, contributed to a consistent, self-sustainable and profitable growth. Being positioned as the best choice in telephone services and best quality, the Company has kept its focus on attracting and retaining high-end customers, maintaining rationality and seeking positive results.

Rationality in the acquisition cost and services attractiveness reduce SAC by 21.6% in the year-to-date 2008

- SAC of R\$ 74 in the 4Q08 decreased by 24.5% in relation to 4Q07 and by 2.6% in relation to 3Q08. The reduction was achieved as a result of more competitive offers, lower expenses with customer acquisition subsidies, especially due to higher efficiency of the owned shops, in addition to reduction in publicity and commission expenses, even though with an intense commercial activity in 4Q08. Added to this reduction is a greater participation of handsets and SIM CARDS in the GSM technology, which have a lower cost.

Churn of 2.5% in the quarter, relatively constant in 2008

- **Churn** of 2.5% in the quarter, with a slight increase of 0.2 percentile points in relation to 4Q07, and a slight reduction in relation to 3Q08, remains relatively stable, reflecting Vivo's success in its efforts to retain customers. In the comparison of year-to-date 2008 (2.6%) to 2007 (2.4%), the Churn recorded a slight increase, explained by more aggressive competition and acquisition actions focused on chip sets (SIM cards), whose offers effected until 3Q08 stimulated part of the customers to change their number.
- In 4Q08, Vivo continued to make its best efforts towards loyalty and retention of customer, focusing on high-end customers and the DDDs (long-distance area code) of the regions comprised in the first stage of the Number Portability system, seeking to minimize the effects of this event on the post-paid customer base.

The Reward Program has continued to be strongly used in the exchange of handsets and in the armoring of the customer base, being consolidated as the main relationship tool.

With the beginning of the operations in the Northeast region, Vivo started operating all over Brazil increasing the competitiveness and quality of the offers to customers needing a countrywide service.

Growth of the customer base arithmetically dilutes the ARPU.

- The **ARPU** of R\$ 29.1 in the quarter recorded a reduction of 5.8% in relation to 4Q07, despite the 20.2% increase in the customer base in the last 12 months. When compared to 3Q08, the ARPU remained almost stable, especially for the growth of 2.4% in the outgoing ARPU. The increase in the average recharge per customer and the 18.2% growth in the data ARPU are worthy of mention, especially in the postpaid segment in 2008 in comparison with the previous year. This result is due, mainly, to the peer-to-peer SMS service and the sale of VAS for supporting mobile e-mailing services. It is important to consider, further, that due to the amount of additions in the last quarter there was an arithmetic dilution in the ARPU.

The outgoing ARPU has grown more than the incoming ARPU, constantly decreasing the dependence on revenue from interconnection traffic.

Stimulation of on-net and mobile-fixed traffic.

- The **Blended MOU** increased by 6.3% in 4Q08 in relation to 4Q07, with an increase of 22.7% in the outgoing MOU. The campaigns conducted in the period stimulated the outgoing traffic, reducing the interconnection dependence. In the comparison with 3Q08, which period was still marked by the promotional actions started in the previous quarter due to holidays, the blended MOU decreased by 4.5%.

Growth of the outgoing traffic due to the campaigns.

- The **total traffic recorded a 29.5% growth in 4Q08** in relation to 4Q07, with emphasis to the 49.1% increase in the outgoing traffic. In the comparison with 3Q08, the traffic had a slight growth of 0.5%, even considering the promotional actions mentioned above. Worthy of mention is the on net mobile-fixed and mobile-mobile on net outgoing voice traffic, which recorded a positive variation of 43.4% and of 67.2%, respectively, in comparison with 4Q07.

OPERATING REVENUE

Growth of 14.7% in the net service revenue in the year-to-date 2008

Total **net revenue** grew 14.0% over 4Q07, due to the growth in the service revenue, which represents growth in all components. Such growth is a result of the natural growth in the customer base, of the actions for stimulation of the recharges and of the sale of products and VAS. In relation to 3Q08, the total net revenue increased by 4.7%, with highlight for the 10.4% increase in the revenue from handsets, as a result of the commercial activity.

The quality of customer base ensures sustainable growth of revenues

The increase of 17.5% in "**access and usage revenue**", when compared to 4Q07, is mainly due to the increase in the total outgoing revenue, by 18.6%. This was due to the quality and the increase of the customer base and the growth in the total outgoing traffic because of the incentive to usage. When compared to 3Q08, there was an increase of 9.1% in the access and usage revenue as a result of the growth in the customer base, in addition to the stimulation for usage in campaigns directed to the customer base.

Continuous growth of data revenue and VAS.

Data revenue plus VAS has continued to represent 10.0% of the Total Service Revenue, having recorded a growth of 20.8% in 4Q08 over 4Q07. Several factors contributed to this: increase in the number of customers with access to Vivo Zap (mobile internet), of customers with Blackberry handsets and SmartMail, and the increase in the use of SMS Interactivity, which recorded a growth of more than 400%. The peer to peer SMS has continued to be the largest selling service, accounting for 46% of the data and VAS revenue. In December, Vivo had more than 7 million sole users and more than 570 million of page views in WAP. The stimulation for usage is achieved by campaigns and broadcast and development of thematic portals, such as "Eu Vivo Cinema" ("Camp Rock" and 007 Quantum of Solace") and "Vivo na Música". Mallu Magalhães, who won success in My Space, launched her 1st album in October 2008 only to Vivo customers.

OPERATING COSTS

Strict control over structural costs contributes to keeping growth profitable.

The 18.0% increase in the **cost of the services rendered** in 4Q08, when compared with 4Q07, is the result of a 12.2% increase in the interconnection costs caused by an increase in the total outgoing traffic and an increase in the Fistel fee, due to the growth of the customer base, in addition to an increase in the leased lines. In comparison with 3Q08, which is positively impacted by the end of co-billing renegotiations, it recorded a growth of 6.4% related to the increase in leased lines expenses and third-party services. In the year-to-date 2008, this item recorded an increase of 16.6% due to the growth in interconnection expenses, Fistel Fee and third-party services, mainly in plant maintenance.

Commercial and operational efficiency.

Despite the increased commercial activity and the 21.7% growth in gross additions, the **cost of goods sold** in 4Q08 recorded an increase of 7.2% in relation to 4Q07. Worthy of mention: this rate is lower than the evolution of the commercial activity in the period. The growth is due to the foreign exchange appreciation between the two periods. In the year-to-date 2008, the increase of 10.6% has the same components mentioned above.

In the 4Q08, the **selling expenses** grew 1.5% over 4Q07, reflecting the increase in expenses with third-party services, such as: publicity and advertising, outsourced labor and client care. The increase was almost fully offset by a reduction in the allowance for doubtful accounts. In the comparison with 3Q08, selling expenses increased by 3.4%, as

a result of expenses with third-party services, especially publicity and advertising, and other expenses with materials for points of sale, having been offset by a reduction in the allowance for doubtful accounts.

Allowance for doubtful accounts under control, despite the intense commercial activity.

Both in relation to 4Q07 and to 3Q08, the allowance for doubtful accounts in 4Q08 showed a reduction of 28.2% and of 17.1%, respectively. The amount of R\$ 59.5 million represents 1.0% of the total gross revenue, the lowest index since Vivo was organized. The drop is of 0.6 percentile points in relation to the 4Q07 (1.6% of the gross revenue) and of 0.2 percentile points in relation to 3Q08 (1.2% of the gross revenue). In the year-to-date 2008 in comparison to 2007, the allowance for doubtful accounts were reduced by 20.1%. In this quarter besides the collection actions and the strict control when granting credit, the result was positively impacted by the corporate segment credit recovery and by the same strategy through our campaigns that gave incentives to use thirteenth (13th) salary in the individual segment.

The **general and administrative expenses** decreased by 58.3% in 4Q08 in relation to 4Q07, mainly due to the decrease in expenses with third-party services, especially technical assistance. In the comparison with 3Q08, the decrease was of 52.4%, reflecting lower expenses with third-party services, especially consulting, and others related to technical-administrative services, as well as settlements with suppliers.

Other Operating Revenue/Expenses recorded revenue of R\$ 35.3 million. This result was possible because of the reduction of expenses with taxes, duties and contributions and the drop in the provisions for contingencies, in addition to the increase in the revenue from fines. The comparison with 3Q08 also presents an increase in the revenues from recovered expenses, impacted by the increase in the provision for contingencies. As set forth in MP 449/08, the amounts which were previously accounted for as non-operating Revenues/Expenses started being posted to this account. The change resulted in a negative impact of R\$ 2.3 million in this quarter, causing a direct effect on the EBITDA of the same amount.

EBITDA

EBITDA margin of 32.7%. EBITDA recorded an increase of 42.6% in the 4Q08 over the 4Q07 and of 37.3% in the year-to-date 2008

The **EBITDA** (earnings before interests, taxes, depreciation and amortization) in the 4Q08 was R\$ 1,396.3 million, an increase of 42.6% in relation to 4Q07. The EBITDA margin of 32.7% represents an increase of 6.6 percentile points. When compared to 3Q08, which already recorded an excellent result, the EBITDA had a 5.4% increase, with margin growing 0.2 percentile points. The result recorded in 4Q08 reflects the continued growth in the revenues due to the increase in the customer base, combined to a lower increase of costs, especially the structural costs, which were kept under strict control. This progress is also due to the stability in the cost of goods sold, made possible by the sales of GSM handsets, at lower acquisition cost.

DEPRECIATION AND AMORTIZATION

Depreciation and amortization expenses recorded an increase of 4.1% in relation to 4Q07, due to the depreciation of TDMA and CDMA technologies and to the digital ERBs, in addition to the amortization of the goodwill by the acquisition of Telemig. When compared to 3Q08, it recorded an increase of 6.6%, due to the investments made in the period.

Charges on the financing of 3G licenses are reflected on the increase of the financial expenses.

The net financial expenses of Vivo increased in the comparison between 4Q08 and 3Q08 by R\$ 90.7 million. This variation is explained, mainly, by the recognition of the additional extraordinary provision made in the 3Q08 in the amount of R\$67.0 million due to the recognition of financing charges of 3G licenses (pursuant to the conditions contained in the Invitation to Auction, the amount of the financing is adjusted to the IST – Telecommunication Services Index – added by 1% monthly) acquired by its subsidiary, Vivo S/A, with Anatel arising out of the reversal of the expected payment without charges until December 11, 2008 and by the extraordinary effect of the assessment of PIS/COFINS taxes on the allocation of the Interest on Own Capital in the amount of R\$ 25.3 million.

In relation to 4Q07, Vivo's financial expense increased by R\$ 179.9 million, mainly due to the recognition of the provision for charges on the financing of the 3G licenses acquired from Anatel, as detailed above, and to the increase in the net debt generated by the disbursements in the amount of R\$ 2,664.5 million required for the acquisition of Telemig Celular Participações S/A (Control, Voluntary Public Offering and Mandatory Public Offering).

In the comparison between year-to-date 2008 and 2007, Vivo's financial expenses increased by R\$ 193.6 million. In addition to the above mentioned effects of increase in the net debt due to the disbursements generated in the acquisition of Telemig and recognition of financing charges in connection with the 3G licenses, the increase expense (R\$ 13.9 million) in 2008 for PIS/COFINS on the allocation of the Interest on Own Capital is worthy of mention, as well as the increase effective interest rate in 2008 (12.37% in 2008 and 11.77% in 2007).

(**) UMBND - prepared by the BNDES, it is a basket of foreign currencies unit, US dollar predominant

The Company has chosen the financing with ANATEL for the 3G licenses The Company closed year 2008 with a debt of R\$ 8,003.1 million (R\$ 4,539.3 million in the end of 2007), of which 31% is denominated in foreign currency, being fully protected by hedge transactions. The debt recorded at December 31, 2008 was offset by the funds available in cash and financial investments (R\$ 2,271.7 million) and by derivative assets and liabilities (R\$ 429.3 million receivable), resulting in a net debt of R\$ 5,302.1 million (R\$ 2,088.9 million at December 31, 2007).

In the comparison between the net debt in 4Q08 versus 4Q07, there was an increase of R\$ 3,213.2 million, due to the large amount of investments along the year, among which worthy of mention are the acquisition of 3G licenses in the amount of R\$ 1,201.2 million and the acquisition of Telemig Celular Participações S/A in the amount of R\$ 2,664.5 million (R\$ 1,233.1 million for the share control, R\$ 527.5 million referring to the Voluntary Public Offering and R\$ 903.9 million referring to the Mandatory Public Offering), offset by cash generation in the period.

Having adhered to the financing of the 3G license, the company managed to keep holding its cash position at a time of market turbulence and also extending its debt profile. The cost of the financing was pursuant to the IST (Telecommunications Industry Index) plus interest of 1% monthly. The payment shall be made in six equal and annual installments, with maturity dates within up to 36, 48, 60, 72, 84 and 96 months counted as from April 29, 2008 (date of execution of the instrument of authorization for use of radiofrequencies).

The debt profile has improved. In 4Q07, 56% of the debt was at long term; in 4Q08, 61%. This change in the debt composition has occurred due to increased funding from structured transactions (BNDES and BNB) and use of the credit facility for the 3G license made available at the auction held by Anatel.

Net Profit of R\$ 215.5 million.

A Net Profit of R\$ 215.5 million was recorded in the quarter, pursuant to the corporate law. The operating profit (EBIT) grew 199.5% when compared to the 4Q07, recording R\$ 578.6 million in the quarter. In the year-to-date, the net profit was R\$ 389.7 million. This result is stated according to the corporate law.

Capital Market.

The shares of Vivo Participações were traded in 100% of the trading floor sessions of the São Paulo Stock Exchange and of the New York Stock Exchange in this quarter. The common shares devaluated by 16.8% while the preferred shares recorded a decrease of 9.4%, always in comparison with the last trading day in the quarter.

Dividends and Interest on Own Capital.

On December 17, 2008, the Board of Directors of the Company, approved the crediting of interest on own capital, pursuant to article 9 of Law 9.249/95 and Resolution n.º 207/96 of the Brazilian Securities and Exchange Commission, in the total amount of R\$ 161,113,275.00 (R\$ 0.438528010149 per common and preferred share), with deduction of 15% withholding income tax, resulting in total net interest of R\$ 136,946,283.75 (R\$ 0.372748808626 per common and preferred share, except for shareholders proven to be tax-immune or exempted).

The corresponding credit shall be posted to the accounting records of the Company based on the shareholding position as of December 30, 2008, that is, the shares are ex-interest as from January 02, 2009

The amount of the interest on own capital, net of the applicable withholding income tax, shall be deducted from the amount of the mandatory dividend and of the statutory dividend of the common and preferred shares, for fiscal year 2008, for all effects provided for in the corporate law.

Edgar Filing: Vivo Participacoes S.A. - Form 6-K

The Management has further proposed the payment of dividends in the amount of R\$ 265,685,315.22 (R\$ 0.723158613772 per common and preferred share), resulting in a total net amount of Interest on Own Capital plus Dividends of R\$ 1.095907422398 per common and preferred share, which shall be confirmed at the General Shareholders Meeting to be held in 2009.

FORWARD-LOOKING STATEMENTS

Edgar Filing: Vivo Participacoes S.A. - Form 6-K

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
