2. BASIS OF PREPARATION AND PRESENTATION OF THE FINANCIAL STATEMENTS

2.a) Basis of Preparation and Presentation

The individual and consolidated quarterly financial statements (ITRs) are presented in thousands of Brazilian reais (except as otherwise mentioned) and have been prepared based on the accounting practices adopted in Brazil, as well as on the rules issued by the Brazilian Securities and Exchange Commission (CVM), with due regard to the accounting standards set forth in the corporation law (Law no. 6404/76), which include the new provisions introduced, amended and revoked by Laws no. 11.638, dated December 28, 2007 and no. 11.941, dated May 27, 2009 (former Provisional Measure no. 449, dated December 03, 2008), with further regard, also, to the rules applicable to telecommunication service concessionaires.

The changes in the accounting practices arising from application of Laws No. 11,638 and No. 11,941 have been measured and registered by the Company based on the following accounting pronouncements issued by the Accounting Pronouncements Committee ("CPC") and approved by the Brazilian Securities and Exchange Committee (CVM) and by the Federal Accounting Council ("CFC"):

The authorization to complete the preparation of these Quarterly Financial Statements was given at the Executive Committee’s Meeting held on April 20, 2010.

The periods of disclosure of the subsidiaries’ information in the consolidated statements coincide with those of the controlling shareholder.

All assets and liabilities balances, revenues and expenses arising out of transactions among the consolidated companies were eliminated in the consolidated statements.

No information by segment was stated, once the Company in one sole operating segment of provision of mobile telecommunication services.

The CVM determined that the IFRS must be adopted for consolidated financial statements of publicly-held companies from 2010 on. Consequently, for the fiscal year to be ended on December 31, 2010, the Company shall present its consolidated financial statements in accordance with the IFRS, as issued by the International Accounting Standard Board – IASB.

2.b) Effect of the adjustments of the application of CPCs 15 to 40 and change to the accounting practices

The accounting practices and the calculation methods were uniformly applied in the consolidated companies and are consistent with those used in the previous year, except for the application of the CPCs and interpretations issued during fiscal year 2009 (note 2a), whose impacts on the financial statements are detailed as follows:

2.b1) Deferred income and social contribution taxes: The amounts of deferred income and social contribution taxes were posted to current assets, to the extent of their expected realization. As determined in CPC 32, the total deferred taxes are to be posted to non-current assets (note 6). Accordingly, the Company reclassified the deferred taxes of the comparative periods to non-current assets and recognized the deferred taxes ascertained in the application of the adjustments provided for in the CPCs in this same item of the ITRs (note 6).

2.b2) Inspection and Installation Rate (TFI): This rate corresponds to the amounts that are monthly paid on net additions of new customers. They were amortized during the estimated period of customer retention, equivalent to 24 months. Upon the adoption of all the CPCs already issued and with the purpose of making its accounting practices compliant with the best international practices, the Company started recognizing such amounts directly in the income statement in the “Cost of Services Rendered”, in item “Taxes, charges and contributions” (note 20). Due adjustments were

made on a retrospective basis, as required in CPC 23.

2.b3) Court deposits: The amounts of court deposits granted as guarantee of civil, labor and tax proceedings were stated in the balance sheet as a reduction of the respective liabilities, complying with the provisions set forth in CVM Resolution no. 489/05. Upon the adoption of CPC 25 (and revocation of CVM Resolution no. 489/05), the Company reclassified the referred court deposits to current assets and non-current assets, according to the expected realization term (note 7).

2.b4) Post-employment benefit plans: The subsidiaries started recognizing the Net Actuarial Assets of the post-employment benefit plans, to the extent of the surplus recoverability restrictions applicable to sponsors of Brazilian pension plans. Such Net Actuarial Assts were not recognized prior to the adoption of CPC33. Actuarial gains and losses referring to the post-employment benefit plans and the amounts referring to surplus recoverability limitations due to refunds or reductions in future contributions are being immediately recognized as other comprehensive income, and do not impact any more the operating income (note 27).

2.b5) Capitalized financial charges: The financial charges provided for in certain loan and financing agreements relating to investment activities were capitalized based on the average amount of works in progress, pursuant to CVM resolution no. 193 (revoked by CVM Resolution no. 577) and Official Release CVM/SNC/SEP 01/2007. The capitalized financial charges were depreciated pursuant to the same criteria of useful life as determined for the item of property, plant & equipment to which they were attributed (note 11).

2.b6) Acquisition of non-controlling shareholders' shares and premium: In accordance with the Brazilian accounting practices prior to CPC 15, a premium was recorded upon the acquisition of shares for prices in excess of the book value thereof. Upon the adoption of CPC 15, the transition date of which is January 01, 2009, the effects of all the transactions of acquisition of non-controlling shareholders' shares started being recorded in the shareholders' equity to the extent there is no change in the shareholding control. Consequently, such transactions do not generate premium or results any more and the premium previously generated in the acquisitions from non-controlling shareholders, including expenses being capitalized in the process, was eliminated towards the shareholders' equity of the Company (note 18).

2.b7) Deferred Assets: Upon the adoption of CPC 13 on January 01, 2008, the Company and its subsidiaries elected to keep the recognized balances in the deferred asset group until the complete amortization thereof. The pre-operating expenses balance recorded as deferred assets prior to January 01, 2009 refers to pre-operating expenses of Global Telecom (Vivo's predecessor company) and to the network formation costs in the Northeast region, which were amortized pursuant to the straight line method, within 10 years. After review by the Company, and with the purpose of making their accounting practices compliant with the best international practice, the Company and its subsidiaries elected to write-off such amounts as a counter-entry to the shareholders' equity. The due adjustments were made on a retrospective basis, as required in CPC 23.

2.b8) Recognition of multi-element transaction revenues: In order to meet the requirements in CPC 30, the amounts of minutes included in the multi-element transactions started being segregated and shown in the income statement as a service revenue to the extent such services were used by customers. The due adjustments were made on a prospective basis (note 17).

2.b9) Donations and Subventions Reserve: The amounts of network equipment donated by suppliers were posted to a specific reserve account, in the shareholders' equity. After review by the Company and with the purpose of making its accounting practices compliant with the best international practice and as set forth in Law no. 11.638/07, such amounts were transferred to "Deferred Revenue" (in current liabilities) and are amortized for the term the equipment is in service. The due adjustments were made on a retrospective basis, as required in CPC 23.

2.b10) Supplementary Dividends: According to previous Brazilian law, Companies could recognize dividends supplementary to the minimum mandatory dividend as of the closing date of the fiscal year based on the proposal for allocation of the net profit of the year. Upon the adoption of CPC 24, supplementary dividends must be recognized at the time they are approved by the competent managing bodies. Accordingly, the Company reversed the amounts of supplementary dividends which had been recorded at December 31, 2009 and were not yet approved at a General Shareholders Meeting. The amounts receivable from its subsidiaries have been already confirmed in the General Shareholders Meeting held on March 31, 2010. The amounts of supplementary dividends payable to the shareholders shall be confirmed at the General Shareholders Meeting to be held in April 2010 (notes 18 and 33).

2.b11) Minority interest: This refers to the effects of the minority interest in the adjustments made by the Company, arising out of the adoption of the new accounting pronouncements.

2.b12) Shareholders' equity: This refers to the effects of the controlling shareholders' interest in the adjustments made by the Company, arising out of the adoption of the new accounting pronouncements (note 18).

2.b13) Equity Method: This refers to the amounts calculated pursuant to the equity method, arising out of the application of the adjustments made in the subsidiaries, as provided for in the CPCs (note 10).

2.b14) Disclosure of infrastructure swap costs and revenues: the amounts of revenues and costs referring to agreements contemplating mutual provision, among different operators, of network infrastructure assets with the same technical features, prices, contractual conditions and similar nature of use, started being disclosed on a net basis in the revenues and costs. The due adjustments were made on a prospective basis, as required in CPC 30 (notes 20 and 23).

2.b15) Roaming: The amounts referring to invoicing and transfer of domestic and international roaming, which were previously posted to the current liabilities (under "Suppliers and accounts payable" – Amounts to be transferred to other operators), are now considered by the subsidiaries as revenue, at the time of the invoicing, and as costs, at the time of the transfer, pursuant to the definition of agent and principal described in CPC 30. The due adjustments were made on a prospective basis, as required in CPC 30 (notes 19 and 20).

2.b16) Reclassifications in the income statement: As a result of the application of the CPCs and with the purpose of making the Quarterly Information/Quarterly Statements compliant with the accounting practices adopted by their controlling shareholders, the Company and its subsidiaries made some reclassifications in their income statements, as described below:

- Rewarding program expenses and reversals: they were reclassified from "Other operating revenues, net" to "Gross telecommunication service revenues".
- Recovery of network maintenance costs and other expenses: they were reclassified from "Other operating revenues, net" to "Cost of services rendered", "Selling expenses" and "General and administrative expenses"; and
- Tax credits on purchase of goods: they were reclassified from "Other operating revenues, net" to "Cost of goods sold".

In the tables below, and for comparison purposes, the Company presents a brief description and the amounts corresponding to the impacts generated in the consolidated balance sheet as of December 31, 2009, in the shareholders' equity for fiscal years 2009 and 2008, and in the controlling company's and consolidated income statement for the three-month period ended on March 31, 2009. The referred adjustments and reclassifications were already applied to the accounting information presented for 2010.

- a) Tax loss and negative tax base: represents the amount recorded by the subsidiaries, which will be offset up to the limit of 30% of the tax base computed in the coming fiscal years and subject to no statute of limitations. The Company did not record the potential deferred income and social contribution tax credit that would arise from the use of the tax bases in the amount of R\$736,502 at March 31, 2010 (R\$688,023 at December 31, 2009), given the uncertainty, at this time, as to the Company's ability to generate future taxable results to ensure realization of these deferred taxes.
- b) Tax credit incorporated: represented by the net balance of goodwill and provision for maintenance of the integrity of the shareholders' equity (note 6.2). Realization occurs proportionally to the amortization of the goodwill in its subsidiaries, in a period from 5 to 10 years. Studies performed by independent consultants hired during the corporate reorganization process support the recovery of such amounts within the above referred time.
- c) Tax credits on temporary differences: their realization will occur upon payment of the provisions, effective loss on bad debts or realization of inventories, as well as reversal of other provisions. The Company did not record the potential deferred income and social contribution tax credit that would arise from the use of the provisions in the amount of R\$155,167 at March 31, 2010 (R\$154,757 at December 31, 2009), given the uncertainty, at this time, as to the Company's ability to generate future taxable results to ensure realization of these deferred taxes.

The Company and its subsidiaries prepared technical feasibility studies, approved by the Board of Directors, which indicated the full recovery of deferred tax amounts recognized at December 31, 2009, as defined in CVM Instruction No. 371. During the three-month period ended at March 31, 2010, no relevant fact occurred which might indicate any limitations to the full recovery of the amounts of deferred taxes recognized by the subsidiaries.

6.2 Tax credit incorporated – Corporate Reorganization

Prior to the mergers, provisions were booked for maintenance of the stockholders' equity of the merged company and, consequently, the net assets that were merged represent, essentially, the tax benefit arising out of the possibility of deduction of the incorporated goodwill.

Included in the accounting records held for corporate and tax purposes by the Company and its subsidiaries are specific accounts related to incorporated goodwill and provision and corresponding amortization, reversal and tax credit, the balances of which are as follows:

b) Premium on the acquisition of minority interest

Pursuant to the Brazilian accounting practices prior to CPC 15, a premium was recorded at the time of the acquisition of shares for prices above their book value, generated by the difference between the book value of the shares purchased and the fair value of the transaction. After the adoption of CPC 15, the transition date of which is January 01, 2009, the effects of all the transactions of acquisition of shares held by minority shareholders started being recorded in the shareholders' equity where there is no change in the shareholding control. Consequently, such transactions do not generate any premium or results now and the premium previously generated in the acquisitions from minority shareholders, including expenses capitalized in the process, were adjusted towards the shareholders' equity of the Company, in the amount of R\$1,749,650, according to the transactions described below:

Edgar Filing: Vivo Participacoes S.A. - Form 6-K

- The amount of R\$1,258,853, referring to the premium generated from the merger of shares (exchange of shares) of Telemig, Telemig Participações and Vivo Participações and the capitalized expenses relating to such process.
- The amount of R\$490,797, referring to the premium generated in the process of acquisition of minority interest of Tele Centro Oeste Celular Participações S.A., in 2004 and 2005. As permitted in the Brazilian law, before the adoption of CPC 15 such goodwill was amortized until December 31, 2007.

c) Capital Reserves

c.1) Premium Reserve

This reserve represents the excess of value at the time of the issuance or capitalization in relation to the basic value of the share at the issuance date.

c.2) Special Premium Reserve

This reserve was booked as a result of the corporate reorganization processes described in note 6.2, as a counter-entry to the net assets transferred, and represents the future tax benefit to be earned by amortization of the premium transferred. The portion of special premium reserve corresponding to the benefit may be, at the end of each fiscal year, capitalized to the benefit of the controlling shareholder, with the issue of new shares. The capital increase is subject to the preemptive rights of the non-controlling shareholders, proportionally to their respective interests, by kind and class of share, at the time of the issue, with the amounts paid upon the exercise of such right to be directly delivered to the controlling shareholder, pursuant to the provisions in CVM Instruction no. 319/99.

With the capitalization effected in the first quarter of 2009, all the amount of tax benefit was capitalized to the benefit of the controlling shareholders; consequently, there will not be further capitalization relating to such specific tax benefits in the future.

c.3) Tax Incentives

These represent the amounts invested in tax incentives in previous fiscal years. The balance recorded by the Company was originated from the merger of Tele Centro Oeste Celular Participações S.A., occurred on February 22, 2006.

d) Profit Reserves

d.1) Legal Reserve

The legal reserve is booked by allocation of 5% of the net profit for the year, up to the limit of 20% of the paid-up capital stock or 30% of the capital stock added by the capital reserves. As from such limit, allocations to this reserve are no longer mandatory, as set forth in Art. 193 of Law no. 6404/76.

d.2) Reserve for Expansion

The reserve for expansion was booked with the purpose of holding funds for financing additional investments of fixed and current capital by allocation of up to 100% of the remaining net profit, after the legal determinations and the balance of the retained profits account. This reserve is supported by a capital budget approved at the shareholders' meetings.

d.3) Reserve for Contingencies and Treasury Shares

The amounts recorded result from the spin-off of Companhia Riograndense de Telecomunicações – CRT and are designed to guarantee an eventual court decision rendered with respect to judicial actions concerning capitalizations for fiscal years 1996 and 1997 occurred in that company.

e) Retained Earnings

As described in note 2, the adjustments to the balances at the transition date, for compliance with the CPCs issued during fiscal year 2009, applicable as from 2010, were appropriated to this item, totaling the amount of R\$344,370.

Pursuant to a change introduced by Law no. 11.638/07, the net profit for the year shall be fully allocated in conformity with the provisions set forth in articles 193 to 197 of Law no. 6.404/76.

f) Dividends and Interest on Own Capital

The preferred shares do not have voting rights, except in the cases provided for in articles 9 and 10 of the Bylaws, but are ensured priority in the reimbursement of the capital stock, without premium, the right to share the dividend to be distributed, corresponding to a minimum of 25% of net income for the fiscal year, calculated in accordance with article 202 of Brazilian Corporation law, and priority in receiving minimum non-cumulative dividends equivalent to the higher of the following amounts:

f.1) 6% (six per cent) per year on the amount resulting from the division of the subscribed capital by the total number of Company's shares, or;

f.2) 3% (three per cent) per year on the amount resulting from the division of the shareholders' equity by the total number of Company's shares, and also the right to share the distributed profit under the same conditions applicable to common shares, after the common shares have been ensured of a dividend equal to the minimum priority dividend established for the preferred shares.

Because the interest on own capital added to the amounts of the per share dividends, as decided in the General Shareholders' Meeting held on March 19, 2009, total the minimum mandatory value, as from December 02, 2009, starting date for payment of the dividends for fiscal year 2008, the holders of preferred shares are no longer entitled to full vote right.

At December 31, 2009 (before the adoption of the new pronouncements issued by the CPC, note 2), the proposed dividends were calculated as follows:

	12.31.09

Proposed additional dividend	6,676
Proposed dividend and interest on shareholders' equity	818,881

The amount of R\$611,925, referring to supplementary dividends to be distributed, was posted to the shareholders' equity, in the "proposed supplementary dividends" account, as determined in ICPC 08, and shall be actually allocated after approval by the General Shareholders' Meeting to be held in the 1st semester of 2010 (note 33).

Interest on own capital and dividends not claimed by the shareholders are forfeited in 3 (three) years from the date of the beginning of payment, as set forth in article 287, subparagraph II, item a), of Law No. 6404/76.

g) Other comprehensive income

26. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (CONSOLIDATED)

The Company and its subsidiaries have entered into transactions involving financial instruments, the risks of which are actively managed by means of a set of initiatives, procedures and comprehensive operating policies.

The Company's and its subsidiaries' financial instruments are presented in compliance with CVM Resolution no. 604, dated November 19, 2009, which approved Technical Pronouncements CPCs 38, 39 and 40, and with CVM Instruction 475, dated December 17, 2008.

The Company and its subsidiaries have proceeded to the evaluation of their financial assets and liabilities against market values, using the available information and proper evaluation methodologies. However, the interpretation of market data and the selection of evaluation methods require considerable discretion and estimates in order to calculate the most adequate realization value. In consequence, the estimates presented do not necessarily indicate the amounts realizable in the current market. The use of different market hypothesis and/or methodologies may have a material effect on the estimated realization values.

a) General considerations

b) Considerations on risk factors which may affect the Company's and its subsidiaries' business

The main market risks to which the Company and its subsidiaries are exposed in the conduct of their activities are:

b.1) Liquidity Risk

The liquidity risks consist of the Company and its subsidiaries eventually lacking of sufficient funds for meeting their commitments due to the different currencies and settlement terms of their rights and obligations.

The Company and its subsidiaries structure the maturity dates of the non-derivative financial agreements, as shown in note 15, and of their respective derivatives as shown in the payments schedule disclosed in the referred note, in such manner as not to affect its liquidity.

The control of the liquidity and of the cash flow of the Company and of its subsidiaries is daily monitored by the Company's Management, in such way as to ensure that the operating cash generation and the previous fund raising, as necessary, are sufficient to meet its schedule of commitments, not generating liquidity risks to the Company and its subsidiaries.

b.2) Credit Risk

The credit risk arises out of the eventual difficulty to collect the amounts payable by its customers for the telecommunication services rendered to them and the sales of handsets to the distributors network.

The Company and its subsidiaries are also subject to the credit risk related to their financial investments and accounts receivable for swap transactions.

The credit risk involved in the rendering of telecommunications services is minimized by a strict control of the customer base and active management of customers' default, by means of clear policies regarding the sale of post-paid handsets. The customer base of its subsidiaries has, predominantly, a prepaid system, which requires the prior charging and consequently entails no credit risk.

The credit risk in the sale of handsets and "pre-activated" prepaid cards is managed under a conservative credit policy, by means of modern management methods, including the application of "credit scoring" techniques, analysis of financial statements and information, and consultation to commercial data bases, in addition to request of guarantees.

In relation to the credit risk in connection with the financial institutions, the Company and its subsidiaries act in such a manner as to diversify this exposure among various world-class financial institutions.

b.3) Interest Rate and Inflation Risk

The interest rate risk arises out of the portion of the debt referenced to the CDI rate and of the liability positions in derivatives (exchange hedge and IPCA) contracted at floating rates, which may have a negative effect on the financial expenses in case of an unfavorable change in the interest rates. The balance of financial investments, indexed at the CDI rate, partially offsets such effect.

The debt to the BNDES is indexed to the TJLP rate. In July 2009, a reduction in the rate to 6.00% per year was announced, with a positive impact on such portion of the debt. Until March 31, 2010 the rate remained at 6.00% per year.

The inflation rate risk arises out of the debentures of Telemig Celular, indexed to the IPCA, which may negatively affect the financial expenses in case of an unfavorable change in such index.

In order to reduce the exposure to the local variable interest rate (CDI), the Company and its subsidiaries invest the cash surplus of R\$782,790, mainly, in short term financial investments (Bank Deposit Certificates) indexed to the CDI rate.

b.4) Exchange Rate Risk

This risk arises out of the possibility of losses on account of exchange rate fluctuations, which may increase the liabilities and expenses arising out of loans and purchase commitments in foreign currency.

The Company and its subsidiaries have contracted financial derivative transactions (exchange hedge) so as to protect themselves against exchange rate fluctuations arising out of foreign currency loans. The instruments used were swap contracts.

The table below summarizes the net exposure of the Company and its subsidiaries to the exchange rate factor at March 31, 2010 and at December 31, 2009:

	Consolidated			
	03.31.10		12.31.09	
	US\$	¥	US\$	¥
Loans and financing	(423,016)	(1,411,865)	(419,584)	(1,404,398)
Loans and financing - UMBNDES (*)	(2,108)	-	(2,485)	-
Derivative instruments	424,238	1,411,865	421,070	1,404,398
Total (insufficient coverage)	(886)	-	(999)	-

(*) UMBNDES is a monetary unit prepared by the BNDES, made-up of a foreign currencies basket, the main currency being the North-American Dollar, for which reason the Company and its subsidiaries consider it upon reviewing the

risk coverage related to the exchange rate fluctuations.

In addition to the amounts informed above, Vivo records non-financial liabilities in foreign currency referring to other obligations to its suppliers. At March 31, 2010 and at December 31, 2009 the balances of other liabilities in foreign currency were US\$32,925 thousand and €11,961 thousand.

c) Transactions with Derivatives

The Company and Vivo entered into swap contracts in foreign currency at several exchange rates, in notional amounts at March 31, 2010 of US\$415,441 thousand, and JPY 1,338,853, (US\$415,637 thousand, and JPY 1,338,853 thousand at December 31, 2009). At March 31, 2010, the Company and Vivo had no interest rate swap contracts indexed to the IGPM rate (notional amount of R\$110,000 at December 31, 2009).

At October 15, 2009, a swap contract was entered into, which was indexed to the IPCA as for assets, and to the CDI, as for liabilities, in the notional amount of R\$72,000, in order to cover the exposure of the flows of the 3rd series of the 4th Issue of debentures to the variation of the IPCA rate. Upon being contracted, this swap was recognized as a fair value hedge.

As required by Law no. 11,638/07, the Company and Vivo started applying CPC 14 (amended by CPCs 38, 39 and 40) since the transition date on January 01, 2007. CPC 14, as well as CPCs 38, 29 and 40, must be applied to all derivative instruments, and requires that such instruments are stated in the balance sheet at their fair value. Changes to the fair value of the derivatives are recognized in the income statement, save in case of compliance with specific criteria such as hedge accounting.

The derivative financial instruments intended for hedge and the respective items subject matter of hedge are monthly adjusted to the fair value, with due regard to the following: for those financial instruments classified as fair value hedge and evaluated as effective, the valuation or devaluation of the fair value of the item which is the hedge instrument and of the item subject matter of hedge must be recorded as a counter-entry to a proper revenue or expense account, in the income of the year.

The Company and Vivo calculate the effectiveness of these hedges on a continuous basis (at least quarterly) and, at March 31, 2010, the contracted hedges showed to be effective in relation to the debts subject matter of such coverage. As long as these derivative contracts are identified as hedge accounting according to CPC 14, the covered debt is also adjusted to the fair value in conformity with the fair value hedge rules.

The CVM, by Resolution no. 550, issued on October 17, 2008, and by Instruction no. 475, issued on December 17, 2008, provided for that publicly-held companies are required to disclose, in a specific explanatory note, qualitative and quantitative information about all their derivative financial instruments, either recognized or not as assets or liabilities in their balance sheet.

d) Risk Management Policy

All contracting of derivative financial instruments of the Company and of Vivo is intended for protection against foreign exchange risk and variations in foreign and local interest rates arising out of financial debts, pursuant to a corporate policy of risk management. Accordingly, eventual variations in the risk factors generate an inverse effect on the subject matter they are intended to protect. Therefore, there are no derivative financial instruments for speculation purposes and 99.8% of the financial exchange liabilities are hedged.

The Company and Vivo keep internal controls in relation to their derivative instruments which, in the opinion of the Management, are adequate for controlling risks associated to each strategy of market action. The results obtained by the Company and by Vivo in relation to their derivative financial instruments show that the Management has properly

managed risks.

e) Fair values of the derivative financial instruments

The valuation method used for calculating the market value of the loans, financing, debentures and derivatives was the discounted cash flow, considering expectancy of settlement or receipt of liabilities and assets at the market rates prevailing at March 31, 2010.

The fair values are calculated by projecting the future flows of the transactions, using the BM&F Bovespa curves and bringing them to present value using market DI rates for swaps disclosed by the BM&F Bovespa.

The market values of the exchange coupon swaps x CDI were obtained using the market exchange rates in effect at March 31, 2010 and the rates projected by the market which were obtained from the currency coupon curves. For calculating the coupon of the positions indexed in foreign currency the linear convention of 360 calendar days was adopted and for calculating the coupon of the positions indexed to the CDI the exponential convention of 252 business days was adopted.

The financial instruments disclosed below are recorded with the CETIP, all of them being classified as swaps, not requiring a margin deposit.

At March 31, 2010, the Company and Vivo recorded balances in assets (net of IRRF – withholding income tax) in the amount of R\$150,480 (R\$151,760 at December 31, 2009) and in liabilities in the amount of R\$143,014 (R\$162,388 at December 31, 2009), stated in the financial statements in order to reflect the derivatives positions.

Gains and losses in the three-month period ended on March 31, 2010, grouped by contracts executed, were recorded in the income accounts (note 24), as required in CVM Resolution 550/08.

f) Analysis of sensibility to the risk variables of the Company and its subsidiaries

CVM Instruction 475, dated December 17, 2008, provides for that publicly-held companies are required to disclose a statement of sensibility analysis for each type of market risk deemed by the management to be material, to which the

entity is exposed at the closing date of each period, including all the transactions with derivative financial instruments.

In compliance with the provisions above, each of the transactions with financial derivatives was evaluated considering a probable realization scenario and two scenarios which may generate adverse results to the Company and to Vivo.

In the probable scenario, the premise of realizing what the market has been signaling in the future market curves (currency and interest) of the BM&F Bovespa was considered. Thus, in the probable scenario, there is no impact on the fair value of the financial instruments already presented above. For the adverse scenarios, deterioration of 25% and 50%, respectively, was considered in the risk variables until the maturity date of the financial instruments.

As the Company and Vivo have only derivative instruments for hedging their financial debt, changes in the scenarios are accompanied by the respective hedge objects, thus showing that the effects thereof are almost null. At March 31, 2010, for these transactions, the Company and Vivo stated the balance of the subject matter (debt) and of the derivative financial instrument (hedge) in separate lines of the sensibility analysis table, in order to inform on the net exposure of the Company and of Vivo, in each of the three mentioned scenarios, as shown below:

Operation	Risk	Probable	Deterioration 25%	Deterioration 50%
Hedge (Asset position)	Derivatives (Risk reduction USD)	755,568	982,468	1,227,386

	Net exposure in each scenario	(828,033)	(900,205)	(970,965)
	Net effect of change in fair value		(72,172)	(142,932)

Sensibility Analysis – Net Exposure

Risk Variable	Scenario I	Scenario II	Scenario III
USD	1.781	2.2263	2.6715

Edgar Filing: Vivo Participacoes S.A. - Form 6-K

JPY	0.0191	0.0238	0.0286
IPCA	4.83%	6.04%	9.06%
CDI	8.59%	10.74%	12.89%

The net exposure in CDI shown in the sensibility analysis does not reflect all the exposure of the Company and of Vivo to the local interest rate, once, as mentioned before, the Company and Vivo have debts indexed to the CDI, which has a natural hedge, and has short term financial investments based on the variation of the CDI (R\$782,790 at March 31, 2010).

For calculation of the net exposure, all the derivatives were considered at their fair value, as well as the associated debts (hedged elements).

The fair values, shown in the table above, depart from a portfolio position at March 31, 2010, however they do not reflect an estimate of realization due to the market dynamism, constantly monitored by the Company and by Vivo. The use of different premises may significantly affect the estimates.

27. POST-EMPLOYMENT BENEFIT PLANS

The table below describes the plans which the Company and its subsidiaries sponsor with the respective types of benefits.

<u>Plan</u>	<u>Type (1)</u>	<u>Entity</u>	<u>Sponsor</u>
PBS-A	DB	Sistel	Vivo and Telemig, jointly with other telecommunication companies originated from the privatization of the Telebrás.
PAMA	DB	Sistel	Vivo and Telemig, jointly with other telecommunication companies originated from the privatization of the Telebrás.
PBS	DB	VisãoPrev	Vivo, Telemig and Vivo Participações
VIVO PREV	Hybrid	VisãoPrev	Vivo
TCOPREV	Hybrid	VisãoPrev	Vivo
VISÃO	Hybrid	VisãoPrev	Vivo
CELPREV	Hybrid	Sistel	Telemig and Vivo Participações

Vivo, together with other companies belonging to the former Telebrás System, sponsor private pension plans and medical assistance plans for retired employees under the same conditions as published for the last fiscal year, as follows: i) PBS-A; ii) PAMA; iii) PBS-Telesp Celular, PBS-TCO, PBS Tele Sudeste Celular and PBS Tele Leste Celular; iv) TCP Prev and TCO Prev Plans; and v) Visão Celular Benefit Plans - Celular CRT, Telerj Celular, Telest Celular, Telebahia Celular and Telergipe Celular.

The PBS-A and PAMA plans are managed by Fundação SISTEL de Seguridade Social – SISTEL.

Vivo sponsors the Vivo-Prev plan, which is an individual plan of defined contribution, managed by Visão Prev. Vivo's contributions to this plan are equal to the participants' contributions, varying from 0% to 8% of the participation wage, as a function of the percentage chosen by the participant.

Vivo, through its actuarial consultants, has prepared studies considering the impact of ordinary action no. 04/081.668-0, brought by ASTEL against Fundação Sistel de Seguridade Social, in which Telefonica and Telesp Celular (a company that was merged into Vivo) are mentioned, in addition to SISTEL, which action is related to the change in the costing system and review of other PAMA benefits. Based on the opinion of its tax consultants, the Management believes that at this time there is no payment risk, and at March 31, 2010 the chance of loss was classified as possible. At March 31, 2010 the amount in question was R\$1,613 (R\$1,517 at December 31, 2009).

Edgar Filing: Vivo Participacoes S.A. - Form 6-K

Telemig individually sponsors a defined retirement benefits plan - Plano PBS Telemig. Besides the benefit of supplementation, medical assistance (PAMA) is provided to retired employees and to their dependents, at shared cost.

Telemig also sponsors the CelPrev, a defined contribution plan. Three types of contributions may be made by the participant, namely: (a) basic regular contribution: variable percentage from 0% to 2% of his/her participation wage; (b) additional regular contribution: variable percentage from 0% to 6% of the portion of his/her participation wage that exceeds 10 Standard Reference Units of the Plan; and (c) voluntary contribution: percentage to be freely chosen by the participant and applied on his/her participation wage. Four types of contributions may be made by the sponsor, namely: (a) basic regular contribution: contribution equal to the participant's basic regular contribution, after deduction of the contribution for defraying the cost of the sickness allowance benefit and the contribution for defraying administrative expenses; (b) additional regular contribution: equal to the participant's additional regular contribution, deducted by the administrative expense; (c) eventual contribution: voluntary contribution, at such frequency as may be determined by the sponsor; and (d) special contribution: contribution exclusively intended to those sponsor's employees who are not members of the PBS plan and who were admitted in the plan within 90 days after the effective date of the CelPrev.

All revenues and expenses relating to the defined benefit plans and to the hybrid benefit plans, such as employer's contributions, current service costs, interest cost and expected return on the assets of the plans are directly recognized in the income of the Company.

The actuarial gains and losses referring to the defined benefit plans and hybrid benefit plans, in addition to the limits on surplus recoverability due to refunds or reduction in future contributions, are being immediately recognized as other comprehensive income, not generating any impact on the operating profit of the Company.

Actuarial provisions relating to the plans mentioned above are recorded in "Other liabilities" (Note 17) or "Prepaid Expenses" (note 8), as applicable.

Following is a breakdown of the amount recorded as net actuarial liability (asset) held by the Company for the defined benefit retirement plans and retired employees medical assistance plans at March 31, 2010 and at December 31, 2009, as well as the other information required in CPC 33 regarding such plans:

h) Expected Long-Term Investments Yield

The expected investment yield rates were determined as from the expected long-term profitability and weighted for each category of assets of the benefit plans. The breakdown of the assets of the plans is positioned at September 30, 2009. The allocation goal takes into consideration the expected long term breakdown of the assets in each investment category, in accordance with the investment policy applicable to each plan.

Expected yield rates were suggested for each investment category, based on the long-term projections supplied by Tendências Consultoria and ANDIMA data, among others, as described below:

- Pre-fixed bonds: average rate, weighted by the portfolio value of the LTN's and NTN-F's available on the market (source: ANDIMA);
- Exchange securities: SELIC rate, weighted by the exchange variation projected for the next 10 years (source: Tendências);
- Fixed income assets: variation of the average nominal internal interest rate, projected for the next 10 years (source: Tendências);
- Assets referenced to inflation: average rate, weighted by the portfolio of the NTN-B's and NTN-C's available on the market (source: ANDIMA);
- Variable income assets: the historic risk premium was adopted, as calculated by the consulting actuarial agent;
- Loans to participants: CDI or the plan's actuarial goal, whichever is higher;
- Real Properties: the actuarial target of the plan was used by the plan administrator.
