**Item 2.05 Costs Associated with Exit or Disposal Activities.**

On June 25, 2008, The Goodyear Tire & Rubber Company (the "Company"), as part of its strategy to reduce high-cost manufacturing capacity globally, announced that its South Pacific Tyres business ("SPT") will initiate communications with SPT's associates and union representatives regarding a plan to close SPT's tire manufacturing facility in Somerton, Victoria, Australia by December 31, 2008. The facility, which has about 600 associates, produces radial passenger car and light truck tires. The estimated charges associated with the planned closure are expected to be approximately \$125 million (\$125 million after-tax), of which approximately \$85 million is expected to be cash charges primarily related to severance payments and approximately \$40 million is expected to be non-cash charges primarily related to accelerated depreciation. Charges associated with the plan are expected to be approximately \$75 million (\$75 million after-tax) in the second quarter of 2008 and approximately \$30 million (\$30 million after-tax) in the second half of 2008, with the balance of the charges impacting 2009 and 2010. The plan will eliminate approximately 3 million units of high-cost capacity and is expected to provide annual cost savings of approximately \$35 million.
