

TRIO TECH INTERNATIONAL
Form 10-K
October 02, 2009

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended June 30, 2009

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the Transition Period from ___ to ___

Commission File Number 1-14523

TRIO-TECH INTERNATIONAL
(Exact name of Registrant as specified in its Charter)

California
(State or other jurisdiction of
incorporation or organization)

95-2086631
(I.R.S. Employer
Identification Number)

16139 Wyandotte Street
Van Nuys, California
(Address of principal executive offices)

91406
(Zip Code)

Registrant's Telephone Number: 818-787-7000

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange On which registered
Common Stock, no par value	AMEX

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in rule 405 of the Securities Act.
 Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. R Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of Registrant's knowledge, in a definitive proxy statement or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. R

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definition of "large accelerated filer" "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one): Large Accelerated Filer Accelerated Filer Non-Accelerated Filer (Do not check if a smaller reporting company) Smaller Reporting Company R

Indicate by check mark whether the registrant is a shell company (as defined in rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of voting stock held by non-affiliates of Registrant, based upon the closing price of \$1.76 for shares of the registrant's Common Stock on December 31, 2008, the last business day of the registrant's most recently completed second fiscal quarter as reported by the AMEX, was approximately \$3.6 million. In calculating such aggregate market value, shares of Common Stock held by each officer, director and holder of 5% or more of the outstanding Common Stock (including shares with respect to which a holder has the right to acquire beneficial ownership within 60 days) were excluded because such persons may be deemed to be affiliates. This determination of affiliate status is not necessarily a conclusive determination for other purposes.

The number of shares of Common Stock outstanding as of September 28, 2009 was 3,227,430.

Documents Incorporated by Reference

Part III of this Form 10-K incorporates by reference information from Registrant's Proxy Statement for its 2009 Annual Meeting of Shareholders to be filed with the Commission under Regulation 14A within 120 days of the end of the fiscal year covered by this Form 10-K.

TRIO-TECH INTERNATIONAL

PART I

NOTE CONCERNING FORWARD-LOOKING STATEMENTS

The discussions of Trio-Tech International's (the "Company") business and activities set forth in this Form 10-K and in other past and future reports and announcements by the Company may contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, and assumptions regarding future activities and results of operations of the Company. In light of the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995, the following factors, among others, could cause actual results to differ materially from those reflected in any forward-looking statements made by or on behalf of the Company: market acceptance of Company products and services; changing business conditions or technologies and volatility in the semiconductor industry, which could affect demand for the Company's products and services; the impact of competition; problems with technology; product development schedules; delivery schedules; changes in military or commercial testing specifications which could affect the market for the Company's products and services; difficulties in profitably integrating acquired businesses, if any, into the Company; risks associated with conducting business internationally and especially in Southeast Asia, including currency fluctuations and devaluation, currency restrictions, local laws and restrictions and possible social, political and economic instability; changes in U.S. and global financial and equity markets, including market disruptions and significant interest rate fluctuations; and other economic, financial and regulatory factors beyond the Company's control. We believe customers have tightened and will continue to tighten their spending, resulting in a decline in the demand for electronic products and semiconductor equipment. See the discussions elsewhere in this Form 10-K, including under the heading "Certain Risks That May Affect Our Future Results," for more information. In some cases, you can identify forward-looking statements by the use of terminology such as "may," "will," "expects," "plans," "anticipates," "estimates," "potential," "believe," "impact," "continue," or the negative thereof or other comparable terminology.

Unless otherwise required by law, we undertake no obligation to update forward-looking statements to reflect subsequent events, changed circumstances, or the occurrence of unanticipated events. Important factors that could cause or contribute to such material differences include those discussed in "Item 1A. Risk Factors" in our most recent Annual Report on Form 10-K and Form 10-Q. You are cautioned not to place undue reliance on such forward-looking statements.

ITEM 1 – BUSINESS (IN THOUSANDS, EXCEPT PERCENTAGES AND SHARE AMOUNTS)

Trio-Tech International was incorporated in 1958 under the laws of the State of California. As used herein, the term "Trio-Tech" or "Company" or "we" or "us" or "Registrant" includes Trio-Tech International and its subsidiaries unless the context otherwise indicates. Our mailing address and executive offices are located at 16139 Wyandotte Street, Van Nuys, California 91406, and our telephone number is (818) 787-7000.

With more than 51 years dedicated to the semiconductor and related industries, we have applied our expertise to our global customer base in test services, design, engineering, manufacturing, and distribution.

Table of Contents

Subsequent Events

In April 2009, Trio-Tech International Pte., Ltd. set up a new entity, SHI International Pte., Ltd. ("SHI"), in which Trio-Tech International Pte., Ltd. holds 55% of the ownership interest. On April 7, 2009, SHI entered into a Share Purchase Agreement, pursuant to which SHI has agreed to acquire from Erni Susanto Susi, Dwi Kartikarini and PT SAS International's shares of PT SAS Heavy Industry ("SASHI") for an aggregate cash purchase price of \$10, and a goodwill of \$100. In August 2009 relevant Indonesian Government authorities approved the change of shareholders and hence PT SAS Indonesia is considered acquired 95% by SHI International Pte., Ltd. SASHI engages in business in the oil and gas industries by providing integrated engineering, manufacturing and fabrication services for customers in the oil and gas industries. These include products such as heat transfer equipment, pressure vessels, skid packages, onshore and offshore modules and structures, floating cranes and barges, and steel structures for industrial plants.

In August 2009, Trio-Tech (Malaysia) Sdn. Bhd. ("TTM"), a 55% owned subsidiary of Trio-Tech International Pte., Ltd., purchased a building for a value of RM 12,450 (Malaysian ringgit) or approximately \$3,534 (U.S. dollars), for its testing operations. Prior to this purchase, this property was under lease rental by the Company. On August 24, 2008, TTM obtained a long-term loan of RM 9,625, or approximately \$2,733, offered by a financial institution in Malaysia. This non-revolving long-term loan has a term of fifteen years from the first draw down. The financial institution offered an interest rate at the financial institution's prime rate plus 1.5% per annum or a fixed rate of 7.12% per annum in the first five years and the financial institution's prime rate plus 1.5% per annum thereafter. The Company decided to opt for the bank's prime rate plus 1.5% per annum, interest rate was 4.05% in August 2009 and the loan was disbursed on August 10, 2009.

Future Plans

We plan to expand our market share in the semiconductor industry. In 2009, our Malaysia subsidiary acquired the leased property in Malaysia to assure the prospects of long term support for our customers in Malaysia. Our Suzhou operation is in the process from a production based operation to an engineering service based operation. We also intend to continue to explore new business opportunities to offset the lost testing revenue due to the loss of a contract with one of our major customers. Our new subsidiary, SHI International Pte., Ltd. ("SHI"), in which Trio-Tech International Pte., Ltd. holds 55% of the ownership interest, engages in the oil and gas industries, which we believe will aid in the diversification of our products and services, with the aim of decreasing our risk associated with the involvement in a single industry.

General

Trio-Tech International primarily provides third-party semiconductor testing and burn-in services primarily through its laboratories in Southeast Asia. We also design, manufacture and market equipment and systems to be used in the process of testing semiconductors at our facilities in California and Southeast Asia, and distribute semiconductor processing and testing equipment manufactured by other vendors.

In April 2009, Trio-Tech International Pte., Ltd. set up a new entity, SHI, in which Trio-Tech International Pte., Ltd. holds 55% of the ownership interest. On April 7, 2009, SHI entered into a Share Purchase Agreement, pursuant to which SHI acquired from Erni Susanto Susi, Dwi Kartikarini and PT SAS International shares of PT SAS Heavy Industry ("SASHI") for an aggregate cash purchase price of \$110. The shares of SASHI acquired by SHI pursuant to the Share Purchase Agreement represent approximately 95% of the outstanding shares of SASHI. SASHI engages in engineering and fabrication work for oil and gas companies.

Table of Contents

We have historically operated in three segments: Testing Services, Manufacturing and Distribution. In June 2007, Trio-Tech International Pte., Ltd. established a subsidiary in Chongqing, China. As our investment in the real estate business in Chongqing, China meets the definition and exceeds more than 10% of our combined assets of all operating segments in fiscal 2009, we reported our investment in China as a separate Real Estate Segment, to be in compliance with and in accordance to the Statement of Financial Accounting Standards No. 131 Disclosures about Segments of an Enterprise and Related Information. The financial information on the measurement of profit or loss and total assets for the four segments, as well as geographic area information, can be found under management's discussion and analysis of results of operations and financial conditions, as well as in the financial statements included in this report. Our working capital requirements are covered under management's discussion and analysis of business outlook, liquidity and capital resources.

We currently operate five testing facilities; one in the United States and four in Southeast Asia. These facilities provide customers with a full range of testing services, such as burn-in and product life testing for finished or packaged semiconductors.

Our manufacturing segment manufactures Artic Temperature Controlled Wafer Chucks, which are used for test, characterization and failure analysis of semiconductor wafers, Wet Process Stations, which wash and dry wafers at a series of 100 to 300 additional processing steps after the etching or deposition of integrated circuits, and other microelectronic substrates in what is commonly called the "front-end", or creation of semiconductor circuits. Additionally, we also manufacture centrifuges, leak detectors, HAST (Highly Accelerated Stress Test) systems and "burn-in" systems that are used primarily in the "back-end" of the semiconductor manufacturing process to test finished semiconductor devices and electronic components.

Our distribution segment operates primarily in Southeast Asia. This segment markets and supports distribution of our own manufactured equipment in addition to distributing complementary products supplied by other manufacturers that are used by our customers and other semiconductor and electronics manufacturers. We expanded the distribution business to include a strategic business unit mainly to serve as a distributor of electronic components to customers.

The investment income generated by Trio-Tech (Chongqing) Co., Ltd. ("TTCQ") in fiscal year 2009 and 2008 was classified as part of revenue in the Consolidated Statements of Operations and Comprehensive Income for the years ended June 30, 2009 and 2008.

On January 8, 2009, TTM, a 55% owned subsidiary of Trio-Tech International Pte., Ltd. (which in turn is a wholly-owned subsidiary of the Registrant), entered into a Sales and Purchase Agreement with TS Matrix Properties Sdn. Bhd. ("TSM") whereby TTM agreed to purchase from TSM real property totaling 7,312 square meters in Selangor Darul Ehsan, Malaysia, the address for which is Lot 11A, Jalan SS 8/2, Sg. Way Industrial Zone, 47300 Petaling Jaya, Selangor Darul Ehsan. Prior to this purchase, this property was under lease rental by the Company for its testing operations.

The total cash purchase price to be paid by TTM under the Sales and Purchase Agreement is RM 12,450 (Malaysian ringgit) or approximately \$3,534 (U.S. dollars). Pursuant to the Sales and Purchase Agreement, TTM paid TSM a 10% down payment of RM 1,245, or approximately \$350 (U.S. dollars) through internally generated funds. The consummation of the transaction contemplated by the Sale and Purchase Agreement is subject to the satisfaction of certain conditions. The balance of the purchase price has been paid.

All dollar amounts above are based on the exchange rate as of June 30, 2009, published by the Monetary Authority of Singapore. The foregoing contains certain forward-looking statements which are based on current expectations and assumptions that are subject to risks and uncertainties. Actual results could differ materially because of various factors, including without limitation changes in the exchange rate between Malaysian ringgit and United States

dollars.

-3-

Table of Contents

Information for each segment regarding external customers, profit and loss and total assets may be found in the footnotes to the financial statements included in this Form 10-K, which information is incorporated herein by this reference.

Company History

- 1958 Incorporated in California.
- 1976 The Company formed Trio-Tech International Pte., Ltd. in Singapore.
- 1984 The Company formed the European Electronic Test Center (EETC), a Cayman Islands domiciled subsidiary, to operate a test facility in Dublin, Ireland.
- 1985 The Company's Singapore subsidiary entered into a joint venture agreement, Trio-Tech Malaysia, to operate a test facility in Penang.
- 1986 Trio-Tech International listed on the NASDAQ Small Cap market under the symbol TRTC.
- 1988 The Company acquired the Rotating Test Equipment Product Line of Genisco Technology Corporation.
- 1990 Trio-Tech International acquired Express Test Corporation in California.
Trio-Tech Malaysia opened a new facility in Kuala Lumpur.
- 1992 Trio-Tech Singapore opened Trio-Tech Bangkok, Thailand.
Trio-Tech Singapore achieved ISO 9002 certification.
- 1994 Trio-Tech Malaysia started a new components assembly operation in Batang Kali.
- 1995 Trio-Tech Singapore achieved ISO 9001 certification.
- 1997 In November 1997, the Company acquired KTS Incorporated, dba Universal Systems of Campbell, California.
- 1998 In September 1998, the Company listed on AMEX under the symbol TRT.
- 2000 Trio-Tech Singapore achieved QS 9000 certification.
Trio-Tech Malaysia closed its facility in Batang Kali.
- 2001 The Company divested the Rotating Test Equipment Product Line.
Trio-Tech Malaysia closed its facility in Kuala Lumpur.
- 2003 Trio-Tech Singapore opened a sales office in China known as Trio-Tech (Suzhou) Co., Ltd.
Trio-Tech Malaysia scaled down its facility in Penang.
- 2004 The Company moved its Wet Process Station manufacturing from Campbell, California to Singapore.
Trio-Tech Test Services Pte., Ltd. was renamed Universal (Far East) Pte., Ltd.
Trio-Tech Malaysia acquired a burn-in testing division in Petaling Jaya.
- 2005 Trio-Tech Singapore, Trio-Tech Malaysia and Trio-Tech Bangkok achieved ISO 9001:2000 certification.
Trio-Tech Singapore, Trio-Tech Malaysia and Trio-Tech Bangkok achieved ISO/TS16949, 2002 certification.
Trio-Tech Ireland closed its facility in Ireland.
- 2006 Trio-Tech Singapore acquired a burn-in testing company in Shanghai and changed its name to Trio-Tech (Shanghai) Co., Ltd.

Table of Contents

- 2007 Trio-Tech Singapore achieved ISO 14001, 2004 certification.
Universal (Far East) Pte., Ltd achieved ISO/IEC 17025, 2005 accreditation under SAC-SINGLAS for the field of Testing.
Trio-Tech (Suzhou) started its testing service.
Trio-Tech Singapore established a subsidiary, Trio-Tech (ChongQing) Co., Ltd. in ChongQing, China.
- 2008 Trio-Tech (Suzhou) achieved ISO 9001:2000 certification.
Universal (Far East) Pte., Ltd. obtained ISO/IEC 17025:2005 accreditation under SAC-SINGLAS for the field of Calibration and Measurement.
Universal (Far East) Pte., Ltd. obtained ISO 9001:2000 certification.
Trio-Tech Singapore scaled down its facility in Singapore due to the loss of one of its major customers.
- 2009 Trio-Tech Singapore, Trio-Tech Malaysia, Trio-Tech (Suzhou) and Trio-Tech (Bangkok) were re-certified to ISO 9001-2008 standards.
Trio-Tech Singapore established a subsidiary, SHI International Pte., Ltd. in Singapore.

Background

Global economic conditions worsened over the course of the year, but are anticipated to improve in the coming years. With the global slowdown the demand for electronic and related equipment decreased affecting the semiconductor and ancillary industries. Semiconductor industries are usually highly cyclical, hence the support industries also follow trend.

According to the projections of the Semiconductor Industry Association (SIA) the sales of semi-conductors will begin to rebound in 2010, with year on year growth of 6.5% to \$208.3 billion, followed by 6.5% growth. The 2008 chip market was the fourth successive year of single digit growth. The Semiconductor Industry Association reported in its annual mid-year forecast that projected worldwide sales of semi-conductor are \$195.6 billion in 2009, which is a decline of 21.3% from \$248.6 billion in 2008.

The Wall Street Transcript has in September 2009 published its Semiconductor Equipment and Software Report. In the report, the experts forecast that “semiconductor stocks should see greater upside as businesses start upgrading hardware for Windows 7.”

Testing Services

We own and operate facilities that provide testing services for semiconductor products to ensure that these products meet certain requirements imposed for military, aerospace, industrial and commercial applications. Testing services represented approximately 49% and 45% of net sales for the fiscal years ended June 30, 2009 and 2008, respectively. The net sales in the testing segment decreased by \$8,414 to \$9,758 for the year ended June 30, 2009 as the result of the significant drop in orders from one of our major customers.

We use our own proprietary equipment for certain burn-in, centrifugal and leak tests, and commercially available equipment for various other environmental tests. We conduct the majority of our testing operations in Southeast Asia with facilities in Singapore, Malaysia, Thailand and China. Most of the facilities in Southeast Asia are either ISO9001 or ISO14001 certified. In 2008, one of our testing operations was awarded ISO/ICE 17025: 2005 accreditation under SAC-SINGLAS (Singapore Accreditation Council-Singapore Laboratory Accreditation Scheme) for the fields of Calibration and Measurement. In 2009, Trio-Tech International Pte., Ltd., Trio-Tech Malaysia, Trio-Tech (Suzhou) and Trio-Tech (Bangkok) were re-certified to ISO 9001-2008 standards.

Table of Contents

Testing services are rendered to manufacturers and purchasers of semiconductors and other entities who either lack testing capabilities or whose in-house screening facilities are insufficient for testing devices in order for them to make sure that these products meet military or certain commercial specifications. Customers outsource their test services either to accommodate fluctuations in output or to benefit from economies that can be offered by third party service providers. For those customers with adequate in-house capabilities, we offer testing services for their “overflow” requirements and also provide independent testing verification services.

Our laboratories perform a variety of tests, including stabilization bake, thermal shock, temperature cycling, mechanical shock, constant acceleration, gross and fine leak tests, electrical testing, microprocessor equipment contract cleaning services, static and dynamic burn-in tests, smart burn-in tests, reliability lab services and vibration testing. Our laboratories also perform qualification testing, consisting of intense tests conducted on small samples of output from manufacturers who require qualification of their processes and devices.

Manufacturing Products

We design, develop, manufacture and market equipment for the manufacturing and testing of semiconductor wafers, devices and other electronic components. Revenue from the sale of products manufactured by the Company represented approximately 48% and 54% of net sales for the fiscal years ended June 30, 2009 and 2008, respectively.

Front-End Products

Artic Temperature Controlled Wafer Chucks

Artic Temperature Controlled Chucks are used for test, characterization and failure analysis of semiconductor wafers and such other components at accurately controlled cold and hot temperatures. Several models are available with temperatures ranging from -65°C to +400°C and in diameters from 4 to 12 inches. The finished wafer is put through a series of tests using the Artic Temperature Controlled Chuck in which each separate integrated device on the wafer is tested at accurately controlled temperatures for functionality. After testing, the wafer is "diced" or cut up, and each die is then placed into packaging material, usually plastic or ceramic, with lead wires to permit mounting onto printed circuit boards. These systems provide excellent performance to meet the most demanding customer applications. Several unique mechanical design features, for which patents have been granted, provide excellent mechanical stability under high probing forces and across temperature ranges.

Wet Process Stations

Wet Process Stations are used for cleaning, rinsing and drying semiconductor wafers, flat panel displays magnetic disks, and other microelectronic substrates. After the etching or deposition of integrated circuits, wafers are typically sent through a series of 100 to 300 additional processing steps. At many of these processing steps, the wafer is washed and dried using Wet Process Stations. This product line includes manual, semi-automated and automated Wet Process Stations, and features radial and linear robots, state-of-the-art PC touch-screen controllers and sophisticated scheduling and control software. The Wet Process Station is currently manufactured in Singapore.

Table of Contents

Back-End Products

Autoclaves and HAST (Highly Accelerated Stress Test) Equipment

We manufacture a range of autoclaves and HAST systems and specialized test fixtures. Autoclaves provide pressurized, saturated vapor (100% relative humidity) test environments for fast and easy monitoring of integrated circuit manufacturing processes. HAST equipment, which provide a pressurized high temperature environment with variable humidity, are used to determine the moisture resistance of plastic encapsulated devices. HAST provides a fast and cost-effective alternative to conventional non-pressurized temperature and humidity testing.

Burn-in Equipment and Boards

We manufacture burn-in systems, burn-in boards and burn-in board test systems. Burn-in equipment is used to subject semiconductor devices to elevated temperatures while testing them electrically to identify early product failures and to assure long-term reliability. Burn-in testing approximates, in a compressed time frame, the electrical and thermal conditions to which the device would be subjected during its normal life.

We manufacture the COBIS II burn-in system, which offers state-of-the-art dynamic burn-in capabilities and a Windows-based operating system with full data logging and networking features. We also offer burn-in boards for our BISIC, COBIS and COBIS II burn-in systems and other brands of burn-in systems. Burn-in boards are used to mount devices during high temperature environmental stressing tests.

We build Smart Burn-In (SBI) electrical equipment and System Level Test (SLT) equipment, which are used in the few final stages of testing microprocessor devices. While providing integrated burn-in solutions, we present total burn-in automation solutions to improve products' yield, reduce processing downtime and improve efficiency. In addition, we developed a cooling solution for high power heat dissipation semiconductor devices. This solution involves the cooling or maintaining of the temperature of high power semiconductor devices.

Component Centrifuges and Leak Detection Equipment

Component centrifuges and leak detection equipment are used to test the mechanical integrity of ceramic and other hermetically sealed semiconductor devices and electronic parts for high reliability and aerospace applications. Our centrifuges spin these devices and parts at specific acceleration rates, create gravitational forces (g's) up to 30,000g's, and thereby indicate any mechanical weakness in the devices. Leak detection equipment is designed to detect leaks in hermetic packaging. The first stage of the test includes pressurizing the devices in a tracer gas for fine leaks or fluid for gross leaks. The bubble tester is used for gross leak detection. A visual bubble trail will indicate when a device is defective.

Distribution Activities

The Company's Singapore subsidiary continues to develop its international distribution activities in Southeast Asia. In addition to marketing our own proprietary products, the Singapore subsidiary distributes products that complement other manufacturers based in the United States, Europe, Japan and other countries. The products sold include environmental chambers, handlers, interface systems, vibration systems, and shaker systems, solder ability testers and other manufactured products.

Table of Contents

Revenue from distribution activities represented approximately 1% of net sales for each of the years ended June 30, 2009 and 2008. It is the strategy of management to focus on the sales of our own manufactured products. We believe that requirements for auxiliary services such as equipment services, after-sales installation, and spare parts will be an add-on to our overall business.

Real Estate Segment

In fiscal year 2008, TTCQ invested an aggregate of \$2,196 in Chongqing, China to jointly develop with JiaSheng Property Development Co., Ltd. (“JiaSheng”) a 24.91 acre parcel and to purchase an office space of 827.2 square meters in Chongqing. In the fourth quarter of 2008, we received a return of RMB 5,750; RMB 5,000 (approximately \$732) in initial investment and an additional RMB 750 (approximately \$103) in profit. The Company rented office space to a third party on July 13, 2008 and in fiscal year 2009 this property generated a rental income of \$65.

On October 23, 2008, TTCQ increased their investment and entered into a Memorandum Agreement with JiaSheng to purchase four units of commercial property and two units of residential property, totaling 1,391.70 square meters located in Chongqing, China. The total purchase price was RMB 7,042 (approximately \$1,031). Also on October 23, 2008, the Company entered into a lease agreement with JiaSheng for the six units purchased from JiaSheng pursuant to the Memorandum Agreement. The lease provides for a two year term with an annual rental income of RMB 1,392, or approximately \$204 based on the exchange rate as of June 30, 2009 published by the Monetary Authority of Singapore. The lease started on November 1, 2008 and generated a rental income of \$137 in fiscal year 2009. In fiscal 2009, we also received a profit of \$291 from the real estate that we developed with JiaSheng jointly, which was used to offset the purchase of property in fiscal year 2009.

Revenue from this segment represented approximately 2% and 0.3% of net sales for the fiscal years end June 30, 2009 and 2008, respectively.

Product Research and Development

Research and development costs recorded in our U.S. operation for fiscal 2009 amounted to \$39, which was a decrease of \$16 when compared to \$55 in fiscal 2008. This was due to a decrease in the full time research and development engineer headcount in the U.S. operation.

Marketing, Distribution and Services

We market our products and services worldwide, directly and through independent sales representatives. We have approximately six independent sales representatives operating in the United States and another sixteen in various foreign countries. Of the twenty-two sales representatives, six are representing the distribution segment and sixteen are representing the testing segment and the manufacturing segment. Trio-Tech’s United States marketing efforts are coordinated from its California location. Southeast Asia marketing efforts are assigned to the Company’s subsidiaries located in Singapore. We advertise our products in trade journals and participate in trade shows.

Independent testing laboratories, users, assemblers and manufacturers of semiconductor devices, including many large, well-known corporations, purchase our products and services. These customers depend on the current and anticipated market demand for integrated circuits and products utilizing semiconductor devices. Our ability to maintain close, satisfactory relationships with our customers is essential to our stability and growth. However, because of a high concentration of customers, the loss, reduction, or delay of orders placed by our significant customers, or delays in collecting accounts receivable from our significant customers, could adversely affect our results of operations and financial positions.

Table of Contents

In fiscal 2009 and 2008, sales of equipment and services to all our three largest customers (Advanced Micro Devices, Freescale Semiconductor and Infineon Technology) accounted for approximately 58% (2009) and 80% (2008), respectively, of our total net revenue. During fiscal 2009, we had sales of \$1,516 (8%), \$8,577 (43%) and \$1,537 (8%) to Advanced Micro Devices, Freescale Semiconductor and Infineon Technology, respectively. During fiscal 2008, we had sales of \$16,760 (42%), \$13,777 (34%) and \$1,736 (4%) to Advanced Micro Devices, Freescale Semiconductor and Infineon Technology, respectively. Although the three customers mentioned above are U.S. companies, the revenue generated from them was from their facilities located outside of the U.S. The majority of our sales and services in fiscal years 2009 and 2008 were to customers outside of the United States. See information presented in Note 22 - Business Segments of our consolidated financial statements included in this Form 10-K.

Backlog

The following table sets forth the Company's backlog at the dates indicated (amounts in thousands):

	June 30, 2009	June 30, 2008
Manufacturing backlog	\$1,194	\$3,165
Testing service backlog	345	6,965
Distribution backlog	75	316
	\$1,614	\$10,446

Based upon our past experience, we do not anticipate any significant cancellations or re-negotiation of sales. The purchase orders for manufacturing, testing and distribution businesses generally require delivery within 12 months from the date of the purchase order and certain costs are incurred before delivery. In the event of a cancellation of a confirmed purchase order we require our customers to reimburse us for all costs incurred. We do not anticipate any difficulties in meeting delivery schedules.

Materials and Supplies

Our products are designed by our engineers and are assembled and tested at our facilities in California, China and Singapore. We purchase all parts and certain components from outside vendors for assembly purposes. We have no written contracts with any of our key suppliers. As these parts and components are available from a variety of sources, we believe that the loss of any one of our suppliers would not have a material adverse effect on our results of operations taken as a whole.

Table of Contents

Competition

There are numerous testing laboratories in the areas where we operate that perform a range of testing services similar to those offered by us. However, due to recent severe competition in the Southeast Asia testing and burn-in services industry there has been a reduction in the total number of competitors. As we have sold and anticipate continuing to sell our products to competing laboratories, and other test products are available from many other manufacturers, our competitors are able to offer the same testing capabilities. The relevant testing equipment is also available to semiconductor manufacturers and users who might otherwise use third party testing laboratories, including us, to perform testing. The existence of competing laboratories and the purchase of testing equipment by semiconductor manufacturers and users are potential threats to our future testing services revenue and earnings. Although these laboratories and new competitors may challenge us at any time, we believe that other factors, including reputation, long service history and strong customer relationships, are more important than pricing in determining our position in the market.

The distribution segment sells a wide range of equipment to be used for testing products. We believe that the equipment, components trading and equipment servicing markets are key growth areas in Southeast Asia and hence have focused our marketing efforts on Asia. As the semiconductor equipment industry is highly competitive, the distribution operation faces stiff price competition if the equipment is sold piecemeal. Thus, "add value" has been a key phrase in our sales mission for the past several years. We believe that "add value" will continue to dominate as the key focal point as we offer integrated solutions that draw on the strengths of our technical specialists who have undergone intensive training with our vendors. Equipment is brought into Singapore from various vendors, and depending on customers' specific requirements, is tested and system integrated before distribution, delivery and installation.

The demand for electronic components in fiscal 2009 was on a declining trend in Southeast Asia, due to lower demand in mobile telecommunication equipment, high-end personal computers, notebooks and server chips. As our target customers are mainly multinational contract manufacturers with a worldwide database of suppliers, the most commonly used components became extremely price competitive. The components division of our distribution segment has been competing in the market with various distribution methods, including direct online ordering systems put in place by vendors for the products they are distributing. We do not believe that such online competition is a major competitive factor to our business, as we offer good credit facilities and believe that we have maintained excellent business relationships with our long-term customers.

The semiconductor equipment manufacturing industry is highly competitive and most of our competitors for such equipment are located in Southeast Asia. Some of our electronic device manufacturing customers in Southeast Asia increased their capital equipment in order to meet the increase in production capacity for electronic products. There is no assurance that competition will not increase or that our technological advantages may not be reduced or lost as a result of technological advances by competitors or changes in semiconductor processing technology. In the United States, our manufacturing segment focused on marketing used and refurbished equipment, which some customers are more willing to purchase since it is less expensive than new equipment.

We believe that the principal competitive factors in the manufacturing industry include product performance, reliability, service and technical support, product improvements, price, established relationships with customers and product familiarity. We make every effort to compete favorably with respect to each of these factors. Although we have competitors for our various products, we believe that our products compete favorably with respect to each of the above factors. We have been in business for more than 51 years and have operation facilities mostly located in Southeast Asia. We believe that those factors combined have helped us to establish and consolidate long-term relationships with customers and will allow us to continue doing business with our existing customers upon their relocation to other regions where we have a local presence or are able to reach.

Table of Contents

Patents

The manufacturing segment holds a United States patent granted in 1994 on certain aspects of our Artic temperature test systems. In 2001, we registered a new United States patent (for 21 years) for several aspects of our new range of Artic Temperature Controlled Chucks. Although we believe that these patents are an integral part of our manufacturing segment, the capitalized cost of the patents was written off in fiscal 2002 because of the impairment assessed by our management. In fiscal 2009 and 2008 we did not register any patents within the U.S.

It is typical in the semiconductor industry to receive notices from time to time alleging infringement of patents or other intellectual property rights of others. We do not believe that we infringe the intellectual property rights of any others. However, should any claims be brought against us, the cost of litigating such claims and any damages could materially and adversely affect our business, financial condition, and results of operations.

Employees

In the United States we had approximately 10 full time employees and 413 full time employees in Southeast Asia for a total of approximately 423 employees as of June 30, 2009. None of our employees are represented by a labor union.

As of June 30, 2009, there were approximately 274 employees in the testing segment, 106 employees in the manufacturing segment, 37 employees in the distribution segment, 4 employees in the real estate segment and 2 in the corporate office.

ITEM 1A RISK FACTORS

The following are certain risk factors that could impact our business, financial results and results of operations. Investing in our Common Stock involves risks, including those described below. The risk factors below, among others, should be considered by prospective and current investors in our Common Stock before making or evaluating an investment in our securities. These risk factors could cause actual results and conditions to differ materially from those projected herein. If the risks we face, including those listed below, actually occur, our business, financial condition or results of operations could have a negative impact, and the trading price of our Common Stock could decline, which could cause you to lose all or part of your investment.

Table of Contents

Our operating results are affected by a variety of factors

There are a wide variety of factors that could materially affect our operating results, revenue and profitability or lead to significant variances in quarterly or annual operating results. These factors include, among others, components relating to:

- economic and market conditions in the semiconductor industry;
- loss of key personnel or the shortage of available skilled employees;
- changes in technology in the semiconductor industry, which could affect demand for our products and services;
 - changes in testing processes;
- other technological, economic, financial and regulatory factors beyond our control;
 - the impact of competition;
 - currency fluctuations;
- market acceptance of our products and services;
- the lack of long-term purchase or supply agreements with customers and vendors;
- changes in military or commercial testing specifications, which could affect the market for our products and services;
 - difficulties in profitably integrating acquired businesses, if any, into the Company; and
 - international political or economic events.

Unfavorable changes in these or other factors could materially and adversely affect our financial condition or results of operations. We may not be able to generate revenue growth, and any revenue growth that is achieved may not be sustained. Our business, results of operations and financial condition would be materially adversely affected if operating expenses increased and were not subsequently followed by increased revenues.

Currently unfavorable economic and market conditions, domestically and internationally, may adversely affect our business, financial condition, results of operations and cash flows

We have significant customer sales both in the U.S. and internationally. We are also reliant upon suppliers and distributors in the U.S. and internationally. We are therefore susceptible to adverse U.S. and international economic and market conditions, including the challenging economic conditions that have prevailed and continue to prevail in the U.S. and worldwide. The recent turmoil in the financial markets has resulted in dramatically higher borrowing costs that have made it more difficult (in some cases, prohibitively so) for many companies to obtain credit and fund their working capital obligations. If any of our customers, distributors or suppliers experience serious financial difficulties or cease operations, our business will be adversely affected. In addition, the adverse impact of the credit crisis on consumers is expected to cause consumers to reduce their spending, which will adversely impact demand for consumer products such as certain end products in which our chips are embedded. In addition, prices of certain commodities, including oil, metals, grains and other food products, are volatile and are subject to fluctuations arising from changes in domestic and international supply and demand, labor costs, competition, market speculation, government regulations and periodic delays in delivery. High or volatile commodity prices increase the cost of doing business and adversely affect consumers' discretionary spending. As a result of the difficulty that businesses (including our customers) may have in obtaining credit, the increasing and/or volatile costs of commodities and the decreased consumer spending that is the likely result of the credit market crisis and commodities' price volatility, continued global economic and market turmoil are likely to have an adverse impact on our business, financial condition, results of operations and cash flows.

Table of Contents

Semiconductor industry cycles affect our business

Our business depends primarily upon the capital expenditures of semiconductor manufacturers, assemblers and other testing companies worldwide. These industries in turn depend on the current and anticipated market demand for integrated circuits and products utilizing semiconductor devices. The global semiconductor industry generally, and the semiconductor testing equipment industry in particular, are volatile and cyclical, with periodic capacity shortages and excess capacity. In periods of excess capacity, the industry sharply cuts its purchases of capital equipment, including our distributed products, and reduces testing volumes, including our testing services. Excess capacity also causes downward pressure on the selling prices of our products and services.

Our operating results have been adversely affected by past downturns and slowdowns. There is no assurance that there will not be downturns or slowdowns in the future that may adversely affect our financial condition or operating results. In addition, if one or more of our primary customers reduces its or their purchases or use of our products or testing services, our financial results could be materially and adversely affected. We anticipate that we will continue to be primarily dependent on the semiconductor industry for the foreseeable future.

Rapid technological changes may make our products obsolete or result in decreased prices or increased expenses

Technology changes rapidly in the semiconductor industry and may make our services or products obsolete. Advances in technology may lead to significant price erosion for products that we test with our older testing technologies. Our success will depend in part on our ability to develop and offer more advanced testing technologies and processes in the future, to anticipate both future demand and the technology to supply that demand, to enhance our current products and services, to provide those products and services at competitive prices on a timely and cost-effective basis and to achieve market acceptance of those products and services. To accomplish these goals, we may be required to incur significant engineering expenses. As new products or services are introduced, we may experience warranty claims or product returns. We may not be able to accomplish these goals correctly or timely enough. If we fail in our efforts, our products and services may become less competitive or obsolete.

Our dependence on international sales involves significant risk

Sales and services to customers outside the United States accounted for approximately 91% and 88% of our sales for fiscal 2009 and 2008, respectively. Approximately 95%, and 98% of our net revenues in fiscal 2009 and 2008, respectively, were generated from business in Southeast Asia. We expect that our non-U.S. sales and services will continue to generate the majority of our future revenue. Testing services in Southeast Asia were performed primarily for American companies, and to a lesser extent European companies, selling products and doing business in those regions. International business operations may be adversely affected by many factors, including fluctuations in exchange rates, imposition of government controls, trade restrictions, political, economic and business events and social and cultural differences.

We may incur losses due to foreign currency fluctuations

Significant portions of our revenue are denominated in Singapore dollars, Malaysian ringgit, Thai baht, Chinese yuan and other currencies. Consequently, a portion of our costs, revenue and operating margins may be affected by fluctuations in exchange rates, primarily between the U.S. dollar and such foreign currencies. We are also affected by fluctuations in exchange rates because our reporting currency is the U.S. dollar whereas the functional currencies in our Southeast Asia operations are non-U.S. dollars. Foreign currency translation adjustments resulted in a decrease of \$832 to shareholders' equity for fiscal 2009 and an increase of \$1,548 to shareholders' equity for fiscal 2008.

Table of Contents

We try to reduce our risk of foreign currency fluctuations by purchasing certain equipment and supplies in U.S. dollars and seeking payment, when possible, in U.S. dollars. However, we may not be successful in our attempts to mitigate our exposure to exchange rate fluctuations due to rapid and unpredictable changes. Those fluctuations could have a material adverse effect on the Company's financial results.

We are highly dependent on key personnel

Our success has depended, and to a large extent will depend, on the continued services of S. W. Yong, our Chief Executive Officer and President, Victor H. M. Ting, our Vice President and Chief Financial Officer, our other key senior executives, and engineering, marketing, sales, production and other personnel. We do not have an employment agreement with Mr. Yong or Mr. Ting, but we are the beneficiary of "key man" life insurance in the amount of \$6 million on Mr. Yong and \$2 million on Mr. Ting. The loss of these key personnel, who would be difficult to replace, could harm our business and operating results. Competition for management in our industry is intense and we may be unsuccessful in attracting and retaining the executive management and other key personnel that we require.

We do not rely on patents to protect our products or technology

We hold U.S. patents relating to our pressurization humidity testing equipment and certain aspects of our Artic Temperature test systems. Additionally, in fiscal 2001, we were granted patents for certain aspects of our new range of Artic Temperature Controlled Chucks. However, although we believe our patents are integral to the business of our manufacturing segment, generally we do not rely on patent or trade secret protection for our products or technology. Competitors may develop technologies similar to or more advanced than ours. We cannot assure that our current or future products will not be copied or will not infringe on the patents of others. Moreover, the cost of litigation of any claim or damages resulting from infringement of patents or other intellectual property could adversely affect our business, financial condition and results of operations.

We do not have contracts with key suppliers

We have no written contracts with any of our suppliers. Our suppliers may terminate their relationships with us at any time without notice. There can be no assurance that we will be able to find satisfactory replacement suppliers or that new suppliers will not be more expensive than the current suppliers if any of our suppliers were to terminate their relationship with us.

Intense competition can adversely affect our operating results

The semiconductor equipment and testing industries are intensely competitive. Significant competitive factors include price, technical capabilities, quality, automation, reliability, product availability and customer service. We face competition from established and potential new competitors, many of whom have greater financial, engineering, manufacturing and marketing resources than us. New products or testing facilities offered by our competitors could cause a decline in our revenue or a loss of market acceptance of our existing products and services. Increased competitive pressure could also lead to intensified price-based competition. Price-based competition may result in lower prices, adversely affecting our operating results.

Table of Contents

There are numerous testing laboratories in the areas where we operate that perform a range of testing services similar to those offered by us. However, recent severe competition in the South Asia testing and burn-in services industry has reduced the total number of our competitors. As we have sold and anticipate continuing to sell our products to competing laboratories, and other test products are available from many other manufacturers, our competitors are able to offer the same testing capabilities. The relevant testing equipment is also available to semiconductor manufacturers and users who might otherwise use third party testing laboratories, including us, to perform testing. The existence of competing laboratories and the purchase of testing equipment by semiconductor manufacturers and users are potential threats to our future testing services revenue and earnings. Although these laboratories and new competitors may challenge us at any time, we believe that other factors, including reputation, long service history and strong customer relationships, are more important than pricing in determining our position in the market.

Concentration of customers

Independent testing laboratories, users, assemblers and manufacturers of semiconductor devices, including many large, well-known corporations, purchase our products and services. These customers depend on the current and anticipated market demand for integrated circuits and products utilizing semiconductor devices. Our ability to maintain close, satisfactory relationships with our customers is essential to our stability and growth. However, because of a high concentration of customers, the loss, reduction, or delay of orders placed by our significant customers, or delays in collecting accounts receivable from our significant customers, could adversely affect our results of operations and financial positions.

Loss, reduction or delay of orders from significant customers could adversely affect our financial condition

The semiconductor manufacturing industry is highly concentrated, with a relatively small number of large manufacturers and assemblers accounting for a substantial portion of our revenue from product sales and testing revenue. Our experience has been that sales to particular customers may fluctuate significantly from quarter to quarter and year to year. In fiscal 2009 and 2008, sales of equipment and services to our three largest customers accounted for approximately 58% and 80%, respectively, of our total net revenue. Our ability to maintain close, satisfactory relationships with our customers is essential to our stability and growth. The loss of or reduction or delay in orders from our significant customers, or delays in collecting accounts receivable from our significant customers, could adversely affect our financial condition and results of operations.

Our testing products and services may be adversely affected by our sales of testing equipment

If our testing equipment is purchased by semiconductor manufacturers and assemblers, it may reduce the likelihood that they will make further purchases of such equipment or use our laboratories for testing services. Although military or other specifications require certain testing to be done by independent laboratories, over time other current customers may have less need of our testing services. We believe that there is a growing trend toward outsourcing of the integrated circuit testing process. As a result, we anticipate continued growth in the test laboratory business. However, there is no assurance that this trend will continue. In an attempt to diversify our sales mix, we may seek to develop and introduce new or advanced products, and to acquire other companies in the semiconductor equipment manufacturing business.

Table of Contents

Acquisition and integration of new businesses could disrupt our ongoing business, distract management and employees, increase our expenses or adversely affect our business

A portion of any future growth may be accomplished through the acquisition of other entities. The success of those acquisitions will depend, in part, on our ability to integrate the acquired personnel, operations, products, services and technologies into our organization, to retain and motivate key personnel of the acquired entities and to retain the customers of those entities. We may not be able to identify suitable acquisition opportunities, obtain financing on acceptable terms to bring the acquisition to fruition or to integrate such personnel, operations, products or services. The process of identifying and closing acquisition opportunities and integrating acquisitions into our operations may distract our management and employees, disrupt our ongoing business, increase our expenses and materially and adversely affect our operations. We may also be subject to certain other risks if we acquire other entities, such as the assumption of additional liabilities. We may issue additional equity securities or incur debt to pay for future acquisitions.

Our management has significant influence over corporate decisions

As of September 23, 2009, our officers and directors and their affiliates beneficially owned approximately 27.48% of the outstanding shares of Common Stock. As a result, they may be able to significantly influence matters requiring approval of the shareholders, including the election of directors, and may be able to delay or prevent a change in control of the Company.

We may not pay cash dividends in the future

We declared a cash dividend of eleven cents (U.S. \$0.11) per share payable to the shareholders of record on February 25, 2008. Based on the results from fiscal 2009, we do not anticipate paying a cash dividend with respect to fiscal 2009. There is no assurance that we will, or that we will be able to, pay any cash dividends on our Common Stock in the future. We anticipate that future earnings, if any, will be retained for use in the business or for other corporate purposes. Additionally, California law prohibits the payment of dividends if the Company does not have sufficient retained earnings or cannot meet certain asset to liability ratios.

The market price for our Common Stock is subject to fluctuation

The trading price of our Common Stock has from time to time fluctuated widely. The trading price may similarly fluctuate in the future in response to quarter-to-quarter variations in our operating results, announcements of innovations or new products by us or our competitors, general conditions in the semiconductor industry and other events or factors. In addition, in recent years, broad stock market indices in general, and the securities of technology companies in particular, have experienced substantial price fluctuations on a daily basis. Fluctuations in the trading price of our Common Stock may adversely affect our liquidity.

Our results may be affected by interest rate fluctuations

We do not use derivative financial instruments in our investment portfolio. Our investment portfolio is generally comprised of cash deposits. Our policy is to place these investments in instruments that meet high credit quality standards. These securities are subject to interest rate risk and could decline in value if interest rates fluctuate, and thus subject us to market risk due to those fluctuations. Due to the short duration and conservative nature of our investment portfolio, we do not expect any material loss with respect to our investment portfolio, though no assurances can be given that material losses will not occur.

Table of Contents

The interest rates on our loans and lines of credit range from 2.70% to 7.15% per annum. As of June 30, 2009, the outstanding aggregate principal balance on these loans and lines of credit was approximately \$1,503. These interest rates are subject to change and we cannot predict an increase or decrease in rates, if any. However, an increase in interest rates could have an adverse effect on our financial results.

In April 2009 the interest rates on our loans with a financial institution in Singapore decreased from 3% plus cost of funds to 1% plus cost of funds, while the institution reviewed the credit facility. Trio-Tech International Pte., Ltd., a subsidiary of the Registrant, had certain loans with a financial institution in Singapore, which were in the past quarters classified as short term loans. Since the Singapore operations suffered a loss in fiscal year 2009, the Singapore operations did not fulfill one of their loan covenants which requires the Singapore operations to maintain the debt to EBITDA ratio of no more than 2.5 times at all times during the term of the loan. As a result, the Singapore operations had classified all long-term debt as current liabilities. Management had communicated to the bank and requested for a waiver of this particular loan covenant. As a result, the financial institution waived the required loan covenant as requested but increased the security by requiring us to pledge the fixed deposits of S \$2,000, approximately \$1,380.

ITEM 3 – LEGAL PROCEEDINGS

The Company is, from time to time, the subject of litigation claims and assessments arising out of matters occurring in its normal business operations. In the opinion of management, resolution of these matters will not have a material adverse effect on our financial statements.

There are no material proceedings to which any director, officer or affiliate of the Company, any beneficial owner of more than five percent of the Company's Common Stock, or any associate of such person is a party that is adverse to the Company or its properties.

There was no litigation relating to environmental action which arose from our operations.

ITEM 4 – SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

None.

ITEM 7 – MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (IN THOUSANDS, EXCEPT PERCENTAGES AND SHARE AMOUNTS)

The following discussion and analysis should be read in conjunction with our disclaimer on “Forward-Looking Statements,” “Item 1. Business,” “Item 1A. Risk Factors,” “Item 6. Selected Financial Data” and Consolidated Financial Statements, the notes to those statements and other financial information contained elsewhere in this Annual Report on Form 10-K.

Overview

Trio-Tech International has historically operated in three distinct segments: distribution, manufacturing, testing. In June 2007, Trio-Tech International Pte., Ltd. established a subsidiary Trio-Tech (Chongqing) Co., Ltd. (“TTCQ”) in Chongqing, China to develop certain real estate projects as more fully described elsewhere in this Form 10-K. As our investment in the real estate business in Chongqing, China meets the definition and exceeded more than 10% of our combined assets of all operating segments in fiscal 2009, we reported our investment in China as a separate Real Estate Segment, to be in compliance with and in accordance to the Statement of Financial Accounting Standards No. 131 Disclosures about Segments of an Enterprise and Related Information.

We provide third-party semiconductor testing and burn-in services primarily through our laboratories in Southeast Asia. At or from our facilities in California and Southeast Asia, we also design, manufacture and market equipment and systems to be used in the testing and production of semiconductors, and distribute semiconductor processing and testing equipment manufactured by other vendors.

Geographically, we operate in the U.S., Singapore, Malaysia, Thailand and China. Our major operation activities are conducted in our Singapore and Malaysia operations. Our customers are mainly concentrated in Southeast Asia and they are either semiconductor chip manufacturers or testing facilities that purchase our testing equipment.

In the third quarter of fiscal 2008, one of our major customers ceased their advanced burn-in testing service contract with us due to one of their product lines reaching the end of its life cycle earlier than expected. The net sales in the testing segment decreased by \$8,414 to \$9,758 for the year ended June 30, 2009 as the result of the loss of revenue from this major customer. Management took immediate action to reduce expenses in an effort to match future cash flows and is in the process of developing new customer relationships in China and Malaysia and exploring new business opportunities to offset the lost testing revenue from this contract.

Recently, there has been widespread concern over the instability of the financial markets and their influence on the global economy. We believe that, as a result of the credit market crisis and other macro-economic challenges currently affecting the global economy, the orders from our customers in our testing operations in China were seriously reduced. During the year ended June 30, 2009, there was minimal business activity in our Shanghai testing operation, and there were also no secured orders or backlogs for subsequent periods. Therefore, we expect very little future cash flows from the assets in the Shanghai operation. The Company recorded an impairment loss of \$299 on these assets based on its examination of future undiscounted cash flows in the second quarter of fiscal 2009. In addition, business in the Suzhou operation also began to slow down in the fourth quarter of fiscal 2008 and suffered losses in fiscal 2009. The operation is currently only providing line support, maintenance and training services for one customer. Based on our estimated future undiscounted cash flows, an impairment loss of \$226 was recorded for some of the testing equipment during the second quarter of fiscal 2009. During the third quarter of fiscal 2009, we also recorded an impairment loss of \$98 for some testing equipment in our Malaysia operation, which was beyond repairable conditions.

Table of Contents

In the second quarter of fiscal year 2009, we recorded lease termination expenses of \$164 related to the future minimum rent of two idle plants in the Singapore operation. The non-cancelable lease term for these two plants expires in March 2011 and April 2011. Because neither of these plants have any economic benefit to the Company, management does not currently have further plans for these units, and the ability for the Company to sublease these units does not seem likely, according to SFAS No. 146, Accounting for Costs Associated with Exit or Disposal Activities. The Company accrued the entire future minimum rent up to the end of the lease period in the second quarter of fiscal 2009. This provision for future rental expense increased our cost of goods sold by \$164 in the second quarter of fiscal year 2009.

In fiscal year 2008, TTCQ invested RMB 15,000, equivalent to approximately \$2,196 based on the exchange rate on June 30, 2009 published by the Monetary Authority of Singapore, to jointly develop a piece of property with 24.91 acres with JiaSheng Property Development Co., Ltd. (JiaSheng) located in Chongqing City, China, which is intended for sale after the completion of development. In fiscal year 2008, the investment of RMB 5,000, or approximately \$732, was returned to the Company. The Company also recorded a profit of RMB 750, approximately \$103, in investment income in fiscal year 2008. In accordance with APB 18, The Equity Method of Accounting for Investments in Common Stock, management recorded the transaction using the cost method of accounting.

In fiscal year 2008, TTCQ purchased office space of 827.2 square meters located in Chongqing, China from MaoYe Property Ltd. at the purchase price of RMB 5,554, equivalent to approximately \$813 based on the exchange rate as of June 30, 2009 published by the Monetary Authority of Singapore. The Company rented this property out to a third party on July 13, 2008. The term of the rental agreement was five years with a monthly rental income of RMB 39, or approximately \$6 for the first three years, with an increase of 8% in the fourth year and another 8% in the fifth year. During the year ended June 30, 2009, this property generated a rental income of \$54.

On October 23, 2008, TTCQ entered into a Memorandum Agreement with JiaSheng to purchase four units of commercial property and two units of residential property, totaling 1,391.70 square meters located in Chongqing, China. The total purchase price was RMB 7,042, equivalent to approximately \$1,031 based on the exchange rate as of June 30, 2009 published by the Monetary Authority of Singapore System. In October 2008, the Company made a cash down payment of 10% in the amount of RMB 704, or \$103. In November 2008, the Company paid an additional RMB 2,908 in cash, or \$426, from internally generated funds of the Company. The remaining balance was offset by the investment return the Company earned related to the No. B48 property. The Company and JiaSheng agreed to offset the investment return from the No. B48 property in the BeiPei district of Chongqing City against the purchase price of this commercial and residential property. In addition, the Company charged JiaSheng RMB 130, or \$19, as penalties for the delay in the payment of investment principal and investment income. The penalty was also used to also offset the purchase price of the commercial and residential property. As of June 30, 2009, the Company paid cash in the amount of \$529, and offset amounts of \$290 as the return of investment principal, \$192 as investment income and \$19 as the penalties charged for this new commercial and residential property, totaling \$1,031.

On October 23, 2008, the Company entered into a lease agreement with JiaSheng for the six units purchased from JiaSheng pursuant to the Memorandum Agreement. The lease provides for a two year term with an annual rental income of RMB 1,392, or approximately \$204 based on the exchange rate as of June 30, 2009 published by the Monetary Authority of Singapore. The lease started on November 1, 2008 and generated a rental income of \$137 in fiscal year 2009. The depreciation expenses of the investment property in Chongqing, China were \$75 and the depreciation expenses of our office and office furniture in Chongqing, China were \$15 in fiscal year 2009.

Table of Contents

In April 2009, Trio-Tech International Pte., Ltd. Singapore set up a new entity, SHI International Pte., Ltd. ("SHI"), in which Trio-Tech International Pte., Ltd. holds 55% of the ownership interest. On April 7, 2009, SHI entered into a Share Purchase Agreement, pursuant to which SHI agreed to acquire from Erni Susanto Susi, Dwi Kartikarini and PT SAS International shares of PT SAS Heavy Industry ("SASHI") for an aggregate cash purchase price of \$110. In August 2009, relevant Indonesian government authorities approved the transfer of shares in the Share Purchase agreement. The shares of SASHI acquired by SHI pursuant to the Share Purchase Agreement represent approximately 95% of the outstanding shares of SASHI.

In the context of a challenging economic environment, in order to achieve our goal of attaining a lower breakeven point, we undertook several cost reduction measures. Since the first quarter of fiscal 2009 ending September 30, 2008, we reduced our headcount by approximately 48 employees. Also, on February 27, 2008, our Chief Executive Office, Chief Financial Officer and directors voluntarily decreased their base salary to 50% of the base salary agreed to in July 2007. From the second quarter of 2009 ending December 31, 2008, we implemented four-day work weeks for all the employees in the Singapore operation, which reduced our employee compensation by approximately 20%. These cost cutting actions reduced our general and administrative expenses in the year ended June 30, 2009.

We plan to continue to expand our market share in the semiconductor industry. In 2009, the Malaysian subsidiary acquired the leased property in Malaysia in an effort to assure the prospects of long term support for our customers in Malaysia. Our Suzhou operation is in the process of transforming from a production based operation to an engineering service based operation.

Fiscal 2009 Highlights

- Total revenue decreased by \$20,370, or 50.4%, from \$40,417 for fiscal 2008 to \$20,047 for fiscal 2009.
- Manufacturing segment revenue decreased by \$12,149, or 55.9%, to \$9,582, compared to \$21,732 for fiscal 2008 to \$9,582.
 - Testing segment revenue decreased by \$8,414, or 46.3%, to \$9,758, compared to \$18,172 for fiscal 2008.
 - Distribution segment revenue decreased by \$117, or 28.5%, to \$294, compared to \$411 for fiscal 2008.
 - Real Estate segment revenue increased by \$310, or 301.0% to \$413, compared to \$103 for fiscal 2008.
 - Loss from operations increased by \$1,010 to \$1,966 compared to \$956 for fiscal 2008.
 - Gross profit margins increased by 1.6% to 23.8% for fiscal 2009, compared to 22.2% for fiscal 2008.
- General and administrative expenses decreased by \$2,385, or 30.4%, as compared to \$7,844 for fiscal 2008.
 - Selling expenses decreased by \$278, or 43.1%, to \$367 as compared to \$645 for fiscal 2008.
- We recorded \$623, or \$0.19 per diluted share, in impairment loss due to primarily reducing sales volumes in China, Malaysia and Singapore operations.
- Total assets decreased by \$6,812, or 19.6%, to \$27,947 for fiscal 2009 as compared to \$34,759 for fiscal 2008.
- Total liabilities decreased by \$4,645, or 47.3%, to \$5,165 for fiscal 2009 as compared to \$9,810 for fiscal 2008.
- Working capital decreased by \$6,601 to \$9,302 for fiscal 2009 as compared to \$15,903 for fiscal 2008.
- Shareholders' equity decreased by \$2,277, or 10.3%, to \$19,864 for fiscal 2009 as compared to \$22,141 for 2008.

The highlights above are intended to identify some of our more significant events and transactions during our fiscal year 2009, and recent events that occurred after the fiscal year end. However, these highlights are not intended to be a full discussion of our results for the year. These highlights should be read in conjunction with the following discussion of "Results of Operations" and "Liquidity and Capital Resources" and with our consolidated financial statements and footnotes accompanying this Annual Report.

Table of Contents

Accounts payable decreased by \$1,561 from \$2,586 at June 30, 2008 to \$1,025 at June 30, 2009. The decrease in accounts payable was due to the decrease in material purchases during the year in the Singapore operations as a result of a decrease in backlogs.

Accrued expenses decreased by \$1,267 from \$3,036 at June 30, 2008 to \$1,769 at June 30, 2009. The decrease in accrued expenses was mainly due to a decrease in accrued payroll expenses and provision for bonuses, as the result of a decrease in headcount in the Singapore operations and a reduction of performance bonuses, which were based on group performance. In addition, provision for sales tax, warranty cost and commission also decreased due to a decrease in revenue in fiscal 2009 as compared to fiscal 2008.

As of June 30, 2009, the outstanding loans payable were \$1,503, with interest rates ranging from 2.70% to 7.15% per annum. These loans mature in August 2010. The loans are collateralized by restricted term deposits and by Corporate Guarantee.

Critical Accounting Estimates & Policies

The discussion and analysis of the Company's financial condition presented in this section are based upon our consolidated financial statements, which have been prepared in accordance with generally accepted accounting principles in the United States. During the preparation of the consolidated financial statements, we are required to make estimates and judgments that affect the reported amounts of assets, liabilities, revenue and expenses, and related disclosure of contingent assets and liabilities. On an ongoing basis, we evaluate our estimates and judgments, including those related to sales, returns, pricing concessions, bad debts, inventories, investments, fixed assets, intangible assets, income taxes and other contingencies. We base our estimates on historical experience and on various other assumptions that we believe are reasonable under current conditions. Actual results may differ from these estimates under different assumptions or conditions.

In response to the SEC's Release No. 33-8040, Cautionary Advice Regarding Disclosure about Critical Accounting Policy, we have identified the most critical accounting policies upon which our financial status depends. We determined that those critical accounting policies are related to the inventory valuation, allowance for doubtful accounts, revenue recognition, and income tax. These accounting policies are discussed in the relevant sections in this management's discussion and analysis, including the Recently Issued Accounting Pronouncements discussed below.

Accounts Receivable and Allowance for Doubtful Accounts

During the normal course of business, the Company extends unsecured credit to its customers. Typically, credit terms require payment to be made between 30 to 60 days from the date of the sale. We do not require collateral from our customers. The Company maintains its cash accounts at credit worthy financial institutions.

The Company regularly evaluates and monitors the creditworthiness of each customer on a case-by-case basis. The Company includes any account balances that are determined to be uncollectible, along with a general reserve, in the overall allowance for doubtful accounts. After all attempts to collect a receivable have failed, the receivable is written off against the allowance. Based on the information available to management, the Company believed that its allowance for doubtful accounts was adequate as of June 30, 2009.

Table of Contents

The gross margin as a percentage of revenue in the distribution segment decreased by 0.3%, from 26.5% for fiscal 2008 to 26.2% for fiscal 2009. In terms of dollar amount, gross margin in the distribution segment decreased by 29.4%, from \$109 for fiscal 2008 to \$77 for fiscal 2009, due to a decrease in revenue, as previously discussed. The gross margin in the distribution segment fluctuated during past periods. The gross margin of the distribution segment is not only affected by the market price of our products, but also our product mix, which changes frequently as a result of changes in market demand.

The gross margin as a percentage of revenue in the real estate segment was 81.8% for fiscal 2009. The depreciation expenses of the real estate purchased for investment purpose was \$75 for fiscal year 2009.

Operating Expenses

Operating expenses for the fiscal years ended June 30, 2009 and 2008 were as follows:

(In Thousands)	Years Ended June 30,	
	2009	2008
General and administrative	\$5,459	\$7,844
Selling	\$367	\$645
Research and development	\$39	\$55
Impairment loss	\$623	\$450
Gain on disposal of PP&E	\$(60)	\$(78)
	\$6,428	\$8,916

General and administrative expenses decreased by \$2,039, or 26.0%, from \$7,844 in fiscal 2008 to \$5,805 in fiscal year 2009. The decrease was attributable to a decrease in payroll expenses and a decrease in officer and executive compensation in fiscal 2009. Since March 31, 2008, we undertook several cost reduction actions. We reduced our headcount by approximately 48 employees since September 30, 2008. In the second quarter of 2009, we implemented four-day work weeks for all the employees in the Singapore operation, which reduced our employee compensation by approximately 20%. On February 27, 2008, in view of anticipated reductions in service revenue for fiscal 2008, our Chief Executive Officer, Chief Financial Officer and directors voluntarily decreased their base salary to 50% of the base salary agreed to in July 2007. As a result, our compensation for the officers and executives decreased by \$413 in fiscal 2009.

Selling expenses decreased by \$278, or 43.1%, to \$367 in fiscal year 2009, from \$645 in fiscal 2008, mainly due to a decrease in reduced travelling expenditure and employee headcount and a decrease in commission expenses as a result of fewer commissionable sales in the distribution segment.

Research and development expenses were \$39 for fiscal 2009, a decrease of \$16, or 29.1%, from \$55 for fiscal 2008. The decrease was primarily due to a decrease in full time employee headcount in the U.S. operation.

Table of Contents

Impairment loss increased by \$173 from \$450 in fiscal 2008 to \$623 in fiscal 2009. In the second quarter of fiscal 2009, we recorded an impairment loss of \$525, of which \$299 was related to the fixed assets located in our Shanghai operation and the remaining \$226 was for certain testing equipment located in our Suzhou operation in China. We believe that due to the change in demand for certain burn-in testing services, the negative impact of the international economic financial crisis and the semiconductor industry recession, our existing burn-in testing facilities in the Shanghai operation became obsolete. There was little business activity in the Shanghai operations during the six months ended December 31, 2008, and there were also no secured orders or backlogs for subsequent periods. Therefore, as we expect no future cash flows from those assets based on our best estimate, the carrying value of these assets was written down to zero and the impairment loss was recorded. Business in the Suzhou operation began to slow down in the fourth quarter of fiscal 2008, and suffered losses in fiscal 2009. The operation is currently only providing line support, maintenance and training service for one customer. Based on our best estimate, there will be no future cash flows from certain identified testing equipment. Therefore, the carrying value of these assets was written down to zero and an impairment loss was recorded.

In the third quarter of fiscal 2009, we recorded an impairment loss of \$98 for certain testing equipment located in our Malaysia operation. Some testing equipment in our Malaysia operation was beyond repairable condition and hence was fully impaired as no future cash flows will be generated.

The impairment loss of \$450 in fiscal year 2008 consisted of \$316 from certain advanced burn-in testing equipment in the Singapore operation utilized in connection with the contract that was terminated and also due to a decrease in our testing backlog and projected future sales in our Singapore operation. An impairment of \$72 related to the burn-in board testing system in our Shanghai operation in China due to change in demand for certain burn-in services, which in turn made certain of our existing burn-in facilities obsolete. An impairment of \$57 was related to the building renovations for certain testing projects due to a decrease in the same major customer’s order in our Shanghai operation in China, while \$5 was related to the asset held for sale in Malaysia, which was sold in the fourth quarter of 2008.

Gain on disposal of property, plant and equipment was \$60 in fiscal 2009, a decrease of \$18 as compared to a gain of \$78 in fiscal 2008.

Loss from Operations

Loss from operations in terms of dollar amount, increased by \$1,727 from an income from operations of \$62 in fiscal 2008 to a loss of \$1,655 in fiscal 2009 due to the decrease in revenue, as previously discussed.

Interest Expenses

The interest expenses for fiscal years 2009 and 2008 were as follows:

(In Thousands)	Years Ended June 30,	
	2009	2008
Interest expenses	\$165	\$296

Interest expenses decreased by \$131, or 44.3%, to \$165 for fiscal year 2009 from \$296 in fiscal 2008 due to repayment of the term loan by the Singapore operations.

Table of Contents

Segment Information

The revenue, gross margin and income from each segment for fiscal 2009 and fiscal 2008, respectively, are presented below. As the segment revenue and gross margin for each segment have been discussed in the previous section, only the comparison of income (loss) from operations is discussed below.

Manufacturing Segment

(In Thousands)	Years Ended June 30,	
	2009	2008
Revenue	\$9,582	\$21,731
Gross margin	15.9	14.8
	%	%
Loss from operations	\$(1,624)	\$(46)

Loss from operations in the manufacturing segment increased by \$1,578, to \$1,624 in fiscal 2009 from \$46 in fiscal 2008. The increase in loss from operations was attributable to a decrease of \$1,694 in gross profit, which was offset by a decrease of \$116 in operating expenses. Operating expenses for the manufacturing segment were \$3,147 and \$3,263 for fiscal 2009 and 2008, respectively. The decrease in operating expenses was mainly from the decrease in payroll related expenses as a result of a decrease in employee headcount and our cost cutting actions, as previously discussed.

Testing Segment

(In Thousands)	Years End June 30,	
	2009	2008
Revenue	\$9,758	\$18,172
Gross margin	29.0	30.5
	%	%
(Loss) Income from operations	\$(858)	\$427

Loss from operations in the testing segment in fiscal 2009 was \$512, an increase of \$939, compared to an income from operations of \$427 in fiscal 2008. The increase in operating loss was attributable to a decrease in gross profits of \$2,724, which was offset by a decrease in operating expenses of \$1,785. Operating expenses were \$3,337 and \$5,122 for fiscal years 2009 and 2008, respectively. The decrease in operating expenses was mainly due to a decrease in payroll related expenses as a result of a decrease in employee headcount and our cost cutting actions, as previously discussed. This decrease was offset by an increase in impairment loss of \$254.

Distribution Segment

(In Thousands)	Years Ended June 30,	
	2009	2008
Revenue	\$294	\$411
Gross margin	26.2	26.5
	%	%
Income (Loss) from operations	\$57	\$(249)

Table of Contents

We believe that projected cash flows from operations, borrowing availability under our revolving lines of credit, cash on hand, and trade credit will provide the necessary capital to meet our projected cash requirements for at least the next 12 months. Should we find attractive capital investment, we may seek additional debt or equity financing in order to fund the transaction, in the form of bank financing, convertible debt, or the issuance of Common Stock.

Contractual Obligations

The following contractual obligations servicing table describes our overall future cash obligation based on various current contracts in the next five years:

	Payments Due by Period (at June 30, 2009) (In Thousands)			
	Total	Less than 1 Year	1 - 3 Years	After 3 Years
Notes Payable	1,503	1,266	237	-
Interest on Notes Payable	\$54	\$53	\$1	\$-
Capital Leases	130	78	52	-
Operating Leases (Net)	836	454	382	-
Total	\$2,523	\$1,851	\$672	\$-

Corporate Guarantee Arrangement

The Company provides a corporate guarantee of approximately \$1,725 to one of its subsidiaries in Southeast Asia to secure line-of-credit and term loans from a bank to finance the operations of such subsidiary. With the strong financial position of the subsidiary company, the Company believes this corporate guarantee arrangement will have no material impact on its liquidity or capital resources.

Off Balance Sheet Arrangements

We do not consider the Company to have any material off balance sheet arrangements that have or are reasonably likely to have a current or future effect on the Company's financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.

Restricted Term Deposits

Restricted deposits represent the amounts of cash pledged to secure loans payable granted by financial institutions serves as collateral for public utility agreements such as electricity and water and performance bonds related to customs duty payable. With the strong financial position of the company, the Company believes these restricted term deposits will have no material impact on its liquidity or capital resources.

Table of Contents

ITEM 7A – QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Foreign Currency Exchange Rate Risk

Significant portions of our revenue are denominated in Singapore dollars, Malaysian ringgit, Thai baht, Chinese yuan and other currencies. Consequently, a portion of our costs, revenue and operating margins may be affected by fluctuations in exchange rates, primarily between the U.S. dollar and such foreign currencies. Our financial position and results of operations are also affected by fluctuations in exchange rates between reporting currency (which is in U.S. dollars) and functional currencies used in our operations. Foreign currency translation adjustments resulted in a decrease of \$832 in fiscal 2009 and an increase of \$1,528 in fiscal 2008 to shareholders' equity.

We try to reduce our risk of foreign currency fluctuations by purchasing certain equipment and supplies in U.S. dollars and seeking payment, when possible, in U.S. dollars. However, we may not be successful in our attempts to mitigate our exposure to exchange rate fluctuations. Those fluctuations could have a material adverse effect on the Company's financial results.

Interest Rate Risk

We do not use derivative financial instruments in our investment portfolio. Our investment portfolio is generally comprised of cash deposits. Our policy is to place these investments in instruments that meet high credit quality standards. These securities are subject to interest rate risk and could decline in value if interest rates fluctuate, and thus subject us to market risk due to those fluctuations. Due to the short duration and conservative nature of our investment portfolio, we do not expect any material loss with respect to our investment portfolio, though no assurances can be given that material losses will not occur.

The interest rates on our loans range from 2.70% to 7.15% per annum. These interest rates are subject to change and we cannot predict an increase or decrease in rates, if any. As of June 30, 2009, the outstanding aggregate principal balance on these loans was approximately \$1,503.

Fiscal year ending June 30,	2010	2011	Total	Fair Value
Loans: Denominated in Singapore dollars; interest is at the bank's prime rate (5.53% at June 30, 2009 and 2.517% at June 30, 2008) plus 3.5% per annum	\$1,266	\$237	\$1,503	\$1,503

ITEM 8 - FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

The information called for by this item is included in the Company's consolidated financial statements beginning on page 57 of this Annual Report on Form 10-K.

Table of Contents

ITEM 9 – CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

We engaged Mazars LLP in Singapore as our principal independent registered public accounting firm effective April 20, 2009. We dismissed BDO Raffles (“BDO”), effective March 11, 2009. The decision to change our principal independent registered public accounting firm was approved by our Board of Directors.

The reports of BDO on the Company's consolidated financial statements for fiscal year ended June 30, 2008 did not contain an adverse opinion or disclaimer of opinion, nor were they modified as to uncertainty, audit scope or accounting principles. During the Company's fiscal year ended June 30, 2008, and during the subsequent period through to the date of BDO's dismissal, there were no disagreements between the Company and BDO, whether or not resolved, on any matter of accounting principles or practices, financial statement disclosure, or auditing scope or procedure, which, if not resolved to the satisfaction of BDO, would have caused BDO to make reference thereto in their reports on the Company's audited consolidated financial statements.

During the Company's fiscal year ended June 30, 2008 and the subsequent interim period ended December 31, 2008, which preceded the termination of BDO, other than as is set forth herein, BDO did not advise the Company of any of the following:

- (a) that the internal controls necessary for the Company to develop reliable financial statements did not exist;
- (b) that information had come to BDO's attention that had led it to no longer be able to rely on management's representations, or that had made it unwilling to be associated with the financial statements prepared by management;
- (c) that BDO needed to expand significantly the scope of its audit, or that information had come to BDO's attention that if further investigated may: (i) materially impact the fairness or reliability of either a previously issued audit report or the underlying financial statements, or the financial statements issued or to be issued covering the fiscal period(s) subsequent to the date of the most recent financial statements covered by an audit report (including information that would have prevented it from rendering an unqualified audit report on those financial statements), or (ii) cause it to be unwilling to rely on management's representations or be associated with the Company's financial statements; or
- (d) that information had come to BDO's attention that it had concluded materially impacted the fairness or reliability of either: (i) a previously issued audit report or the underlying financial statements, or (ii) the financial statements issued or to be issued covering the fiscal period subsequent to the date of the most recent financial statements covered by an audit report (including information that, unless resolved to BDO's satisfaction, would prevent it from rendering an unqualified audit report on those financial statements).

On April 20, 2009, the Company engaged Mazars LLP to serve as the independent registered public accounting firm responsible for auditing the Company's financial statements for the fiscal year ending June 30, 2009. The engagement was approved by the Company's Board of Directors.

Except as set forth in the immediately preceding paragraph, neither the Company nor anyone on behalf of the Company consulted Mazars LLP during the two most recent fiscal years and any subsequent interim period prior to engaging Mazars LLP regarding either: (i) the application of accounting principles to a specified transaction, either completed or proposed; or the type of audit opinion that might be rendered on the Company's financial statements, and neither a written report was provided to the Company nor oral advice was provided that the Company concluded was an important factor considered by the Company in reaching a decision as to the accounting, auditing or financial reporting issue; or (ii) any matter that was either the subject of a disagreement (as defined in paragraph (a)(1)(iv) and

the related instructions of Item 304 of Regulation S-K) or a reportable event (as described in paragraph (a)(1)(v) of Item 304 of Regulation S-K).

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders
Trio-Tech International
Van Nuys, California

We have audited the accompanying consolidated balance sheet of Trio-Tech International and Subsidiaries (the “Company”) as of June 30, 2009, and the related consolidated statements of operations and comprehensive income, shareholders' equity and cash flows for the year ended June 30, 2009. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Trio-Tech International and Subsidiaries at June 30, 2009, and the results of their operations and their cash flows for the year ended June 30, 2009 in conformity with accounting principles generally accepted in the United States of America.

with product sales were immaterial and included in the product sales revenue line on the consolidated statements of operations.

GST / Indirect Taxes — The Company's policy is to present taxes collected from customers and remitted to governmental authorities on a net basis. The Company records the amounts collected as a current liability and relieves such liability upon remittance to the taxing authority without impacting revenues or expenses.

-63-

Table of Contents

Other Intangible Assets — The Company adopted the provisions of SFAS No. 142, Goodwill and Other Intangible Assets (“SFAS 142”), effective January 1, 2002. Under SFAS 142, goodwill and indefinite lived intangible assets are not amortized, but are reviewed annually for impairment, or more frequently, if indications of possible impairment exist. , the Company identified a customer relationship as the only intangible asset with a finite life of five years during the process of acquiring the testing business in Malaysia in July 2005. The estimated fair value of this intangible asset was approximately \$482 and is being amortized over a five-year period on a straight-line basis. No impairment loss was recorded during fiscal 2009 and 2008. The intangible assets were fully amortized as of June 30, 2009.

Impairment of Long-Lived Assets — The Company applies the provisions of Statement of Financial Accounting Standard No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets (“SFAS No. 144”), to property, plant and equipment, investment property in China and other intangible assets such as customer relationships. SFAS No. 144 requires that long-lived assets be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable through the estimated undiscounted cash flows expected to result from the use and eventual disposition of the assets. Whenever any such impairment exists, an impairment loss will be recognized for the amount by which the carrying value exceeds the fair value.

Leases — The Company leased certain property, plant and equipment in the ordinary course of business. The leases had varying terms. Some may have included renewal and/or purchase options, escalation clauses, restrictions, penalties or other obligations that the Company considered in determining minimum lease payments. The leases were classified as either capital leases or operating leases, in accordance with SFAS 13, Accounting for Leases. The Company records monthly rent expense equal to the total amount of the payments due in the reporting period over the lease term in accordance with accounting principles accepted by the United States of America. The difference between rent expense recorded and the amount paid is credited or charged to deferred rent, which is included in accrued expenses in the accompanying consolidated balance sheet.

Management expects that in the normal course of business, operating leases will be renewed or replaced by other leases. The future minimum operating lease payments, for which the Company is contractually obligated as of June 30, 2009, are disclosed in the notes to the consolidated financial statements.

Assets under capital leases are capitalized using interest rates appropriate at the inception of each lease and are depreciated over either the estimated useful life of the asset or the lease term on a straight-line basis. The present value of the related lease payments is recorded as a contractual obligation. The future minimum annual capital lease payments are included in the total future contractual obligations as disclosed in Note 13 of the consolidated financial statements.

Comprehensive Income (Loss) — Statement of Financial Accounting Standard No. 130, Reporting Comprehensive Income, (“SFAS No. 130”) establishes standards for reporting and presentation of comprehensive income (loss) and its components in a full set of general-purpose financial statements. The Company has chosen to report comprehensive income (loss) in the statements of operations and comprehensive income (loss). Comprehensive income (loss) is comprised of net income (loss) and all changes to shareholders’ equity except those due to investments by owners and distributions to owners.

Income Taxes — The Company accounts for income taxes using the liability method in accordance with Statement of Financial Accounting Standards No 109, Accounting for Income Taxes (“SFAS No. 109”). SFAS No. 109 requires an entity to recognize deferred tax liabilities and assets. Deferred taxes assets and liabilities are recognized for the future tax consequence attributable to the difference between the tax bases of assets and liabilities and their reported amounts in the financial statements, which will result in taxable or deductible amounts in future years. Further, the effects of enacted tax laws or rate changes are included as part of deferred tax expenses or benefits in the period that covers the

enactment date.

-65-

Table of Contents

The calculation of tax liabilities involves dealing with uncertainties in the application of complex global tax regulations. The Company recognizes potential liabilities for anticipated tax audit issues in the United States and other tax jurisdictions based on its estimate of whether, and the extent to which, additional taxes will be due. If payment of these amounts ultimately proves to be unnecessary, the reversal of the liabilities would result in tax benefits being recognized in the period when the Company determines the liabilities are no longer necessary. If the estimate of tax liabilities proves to be less than the ultimate assessment, a further charge to expense would result.

Retained Earnings — It is the intention of the Company to reinvest earnings of its foreign subsidiaries in the operations of those subsidiaries. Accordingly, no provision has been made for U.S. income and foreign withholding taxes that would result if such earnings were repatriated. These taxes are undeterminable at this time. The amount of earnings retained in subsidiaries were \$13,342 and \$15,439 at June 30, 2009 and 2008, respectively.

Research and Development Costs — The Company incurred research and development costs of \$39 in fiscal 2009 and \$55 in fiscal 2008, which were charged to operating expenses as incurred.

Stock Based Compensation — The Company adopted the fair value recognition provisions under SFAS No. 123R Share Based Payments, using the modified prospective application method. Under this transition method, compensation cost recognized during the twelve months ended June 30, 2009 included the applicable amounts of: (a) compensation cost of all share-based payments granted prior to, but not yet vested as of, July 1, 2005 (based on the grant-date fair value estimated in accordance with the original provisions of SFAS No. 123) and (b) compensation cost for all share-based payments granted subsequent to June 30, 2005.

Earnings per Share — Computation of basic earnings per share is conducted by dividing net income available to common shares (numerator) by the weighted average number of common shares outstanding (denominator) during a reporting period. Computation of diluted earnings per share gives effect to all dilutive potential common shares outstanding during a reporting period. In computing diluted earnings per share, the average market price of common shares for a reporting period is used in determining the number of shares assumed to be purchased from the exercise of stock options. In fiscal year 2009 and 2008, all the outstanding options were excluded in the computation of diluted EPS since they were anti-dilutive.

Fair Values of Financial Instruments — Carrying value of trade accounts receivable, accounts payable, accrued liabilities, and term deposits approximate their fair value due to their short-term maturities. Carrying values of the Company's lines of credit and long-term debt are considered to approximate their fair value because the interest rates associated with the lines of credit and long-term debt are adjustable in accordance with market situations when the Company tries to borrow funds with similar terms and remaining maturities. See Note 23 for detailed discussion of the fair value measurement of financial instruments.

Concentration of Credit Risk — Financial instruments that subject the Company to credit risk compose accounts receivable. The Company performs ongoing credit evaluations of its customers for potential credit losses. The Company generally does not require collateral. The Company believes that its credit policies do not result in significant adverse risk and historically it has not experienced significant credit related losses.

Reclassification — Certain reclassification has been made to the previous year's financial statements to conform to current year presentation, specifically related to segment reporting, with no effect on previously reported net income.

Table of Contents

2. NEW ACCOUNTING PRONOUNCEMENTS

In July 2009, the FASB issued Statement of Financial Accounting Standards No. 168, The FASB Accounting Codification and the Hierarchy of Generally Accepted Accounting Principles (“SFAS. 168”). Statement No. 168 supersedes Statement No. 162 issued in May 2008. Statement No. 168 will become the source of authoritative U.S. generally accepted accounting principles (GAAP) recognized by the FASB to be applied by nongovernmental entities. Rules and interpretive releases of the Securities and Exchange Commission (SEC) under authority of federal securities laws are also sources of authoritative GAAP for SEC registrants. On the effective date of this Statement, the Codification will supersede all then-existing non-SEC accounting and reporting standards. All other non-grandfathered non-SEC accounting literature not included in the Codification will become non-authoritative. This Statement is effective for interim and annual periods ending after September 15, 2009. The adoption of Statement No. 168 is not expected to materially impact the Company’s consolidated financial position or results of operations.

In June 2009 the FASB issued SFAS 167, Amendments to FASB Interpretation No. 46(R) (SFAS 167). SFAS 167 eliminates Interpretation 46(R)’s exceptions to consolidating qualifying special-purpose entities, contains new criteria for determining the primary beneficiary, and increases the frequency of required reassessments to determine whether a company is the primary beneficiary of a variable interest entity. SFAS 167 also contains a new requirement that any term, transaction, or arrangement that does not have a substantive effect on an entity’s status as a variable interest entity, a company’s power over a variable interest entity, or a company’s obligation to absorb losses or its right to receive benefits of an entity must be disregarded in applying Interpretation 46(R)’s provisions. The elimination of the qualifying special-purpose entity concept and its consolidation exceptions means more entities will be subject to consolidation assessments and reassessments. SFAS 167 will be effective January 1, 2010. The adoption of this pronouncement is not expected to have a material impact on the Company’s consolidated financial position and results of operations

In June 2009 the FASB issued SFAS 166, Accounting for Transfers of Financial Assets — an Amendment of FASB Statement No. 140 (SFAS 166). SFAS 166 eliminates the concept of a qualifying special-purpose entity, creates more stringent conditions for reporting a transfer of a portion of a financial asset as a sale, clarifies other sale-accounting criteria, and changes the initial measurement of a transferor’s interest in transferred financial assets. SFAS 166 will be effective January 1, 2010. The adoption of this pronouncement is not expected to have a material impact on the Company’s consolidated financial position and results of consolidated operations.

In May 2009, the FASB issued SFAS No. 165, Subsequent Events. This Statement sets forth: 1) the period after the balance sheet date during which management of a reporting entity should evaluate events or transactions that may occur for potential recognition or disclosure in the financial statements; 2) the circumstances under which an entity should recognize events or transactions occurring after the balance sheet date in its financial statements; and 3) the disclosures that an entity should make about events or transactions that occurred after the balance sheet date. This Statement is effective for interim and annual periods ending after June 15, 2009. The company adopted this Statement in the year ended June 30, 2009. Subsequent events were evaluated through September 28, 2009, the date on which the financial statements were issued. This Statement did not impact the Company’s consolidated financial position and results of operations.

In April 2009, the FASB issued Staff Position (“FSP”) FAS 157-4, Determining Fair Value When the Volume or Level of Activity for the Asset or Liability has Significantly Decreased and Identifying Transactions that are Not Orderly (“FSP FAS157-4”). FSP FAS 157-4 provides additional guidance for estimating fair value in accordance with SFAS No. 157 when the volume and level of activity for the asset or liability have significantly decreased and requires that companies provide interim and annual disclosures of the inputs and valuation technique(s) used to measure fair value. FSP FAS 157-4 is effective for interim and annual reporting periods ending after June 15, 2009 and is to be applied prospectively. This Statement did not have material impact on the Company’s consolidated financial position and

results of consolidated operations.

-67-

Table of Contents

In April 2009, the FASB issued FSP FAS 115-2 and FAS 124-2, Recognition and Presentation of Other-than-Temporary Impairments. FSP FAS 115-2 and FAS 124-2 amends the other-than-temporary impairment guidance to improve the presentation and disclosure of other-than-temporary impairments on debt and equity securities in the financial statements. FSP FAS 115-2 and FAS 124-2 are effective for interim and annual reporting periods ending after June 15, 2009. The Company does not expect the adoption of FSP FAS 115-2 and FAS 124-2 to have a significant impact on its financial statements.

In April 2009, the FASB issued FSP FAS 107-1 and APB 28-1, Interim Disclosures about Fair Value of Financial Instruments. FSP FAS 107-1 and APB 28-1 require disclosures about fair value of financial instruments for interim reporting periods of publicly traded companies as well as in annual financial statements. FSP FAS 107-1 and APB 28-1 are effective for interim and annual reporting periods ending after June 15, 2009. The Company does not believe that the adoption of FSP 107-1 and APB 28-1 will have an impact on the Company's financial statements.

The Company adopted Financial Accounting Standards Board ("FASB") Statement of Financial Accounting Standard ("SFAS") No. 157, Fair Value Measurements ("SFAS 157") on July 1, 2008 for financial assets and liabilities that are recognized or disclosed at fair value in the financial statements on a recurring basis. SFAS 157 defines fair value, establishes a framework for measuring fair value as required by other accounting pronouncements and expands fair value measurement disclosures. The provisions of SFAS 157 are applied prospectively upon adoption and do not have a material impact on our consolidated financial statements. The disclosures required by SFAS 157 are included in Note 23, Fair Value Measurement, to these consolidated financial statements.

The Company adopted SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities—Including an Amendment of FASB Statement No. 115 ("SFAS 159") as of July 1, 2008. SFAS 159 permits entities to elect to measure many financial instruments and certain other items at fair value. We did not elect the fair value option for any assets or liabilities which were not previously carried at fair value. Accordingly, the adoption of SFAS 159 had no impact on our consolidated financial statements.

In April 2008, the Financial Accounting Standards Board ("FASB") issued FASB Staff Position ("FSP") No. SFAS 142-3, Determination of the Useful Life of Intangible Assets ("FSP SFAS 142-3"). FSP SFAS 142-3 amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset under SFAS No. 142, Goodwill and Other Intangible Assets ("SFAS 142"). FSP SFAS 142-3 is effective for financial statements issued for fiscal years beginning after December 15, 2008 and must be applied prospectively to intangible assets acquired after the effective date. The adoption of this statement is not expected to have a material impact on our consolidated financial position or results of operations.

In March 2008, the FASB issued SFAS No. 162, The Hierarchy of Generally Accepted Accounting Principles. This statement identifies the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental entities that are presented in conformity with U.S. GAAP. This statement is effective from November 2008 when the SEC approved the Public Company Accounting Oversight Board amendments to AU Section 411, The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles. The implementation of this statement did not have an impact on the Company's results of operations or financial position.

Table of Contents

In March 2008, the FASB issued FASB Statement No. 161, Disclosures about Derivative Instruments and Hedging Activities. The new standard is intended to improve financial reporting about derivative instruments and hedging activities by requiring enhanced disclosures to enable investors to better understand their effects on an entity's financial position, financial performance, and cash flows. It is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008, with early application encouraged. The Company has not completed its evaluation of the potential impact, if any, of the adoption of SFAS No. 161 on its consolidated financial position, results of operations and cash flows.

In December 2007, the FASB issued Statement of Financial Accounting Standards No. 141 (Revised 2007), Business Combinations, or SFAS No. 141R. SFAS No. 141R will change the accounting for business combinations in a number of areas including the treatment of contingent considerations, pre-acquisition contingencies, transaction costs, in-process research and development, and restructuring costs. Under SFAS No. 141R, an acquiring entity will be required to recognize all the assets acquired and liabilities assumed in a transaction at the acquisition-date fair value with limited exceptions. SFAS No. 141R applies prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. The Company has not completed its evaluation of the potential impact of the adoption SFAS 141R on the accounting for future acquisitions.

In December 2007, the FASB issued Statement of Financial Accounting Standards No. 160, Noncontrolling Interests in Consolidated Financial Statements — An Amendment of ARB No. 51, or SFAS No. 160. SFAS No. 160 establishes new accounting and reporting standards for the non-controlling interest in a subsidiary and for the deconsolidation of a subsidiary. SFAS No. 160 is effective for fiscal years beginning on or after December 15, 2008. The Company is currently evaluating the impact adoption may have on its financial condition or results of operations.

3. INVENTORIES

Inventories consisted of the following:

	June 30, 2009	June 30, 2008
Raw materials	\$ 1,084	\$ 1,297
Works in progress	645	1,797
Finished goods	173	235
Provision for obsolete inventory	(718)	(880)
	\$ 1,184	\$ 2,449

Table of Contents

4. STOCK OPTIONS

As of June 30, 2009, there were outstanding options to purchase 2,750 shares of Common Stock which had been granted pursuant to the 1998 Employee Option Plan, which plan was terminated on December 2, 2005 by the Company's Board of Directors.

On September 24, 2007, the Company's Board of Directors unanimously adopted the 2007 Employee Stock Option Plan and the 2007 Directors Equity Incentive Plan, which were approved by the shareholders on December 3, 2007. The 2007 Employee Stock Option Plan provides for awards of up to 300,000 shares of the Company's Common Stock to employees, consultants and advisors. The 2007 Directors Equity Incentive Plan provides for awards of up to 200,000 shares of the Company's Common Stock to the members of the Board of Directors in the form of non-qualified options and restricted stock. These two plans are administered by the Board, which also establishes the terms of the awards.

Assumptions

The fair value for these awards was estimated using the Black-Scholes option pricing model with the following weighted average assumptions, assuming no expected dividends:

	Years Ended June 30	
	2009	2008
Expected volatility	107.18-145.18 %	110.91-117.70 %
Risk-free interest rate	1.27 - 2.48 %	2.90 %
Expected life (years)	2.00 - 3.25	2.00

The expected volatilities are based on the historical volatility of the Company's stock. The observation is made on a weekly basis. The observation period covered is consistent with the expected life of options. The Company applied Staff Accounting Bulletin (SAB) No. 107 in estimating the expected life of stock options, which, among other provisions, allowed companies without access to adequate historical data about employee exercise behavior to use a simplified approach for estimating the expected term of a "plain vanilla" option grant. The simplified rule for estimating the expected term of such an option was the average of the time to vesting and the full term of the option. The risk-free rate is consistent with the expected terms of the stock options and is based on the United States Treasury yield curve in effect at the time of grant.

Table of Contents

2007 Employee Stock Option Plan

The Company's 2007 Employee Stock Option Plan (the "2007 Employee Plan"), which is shareholder-approved, permits the grant of stock options to its employees of up to 300,000 shares of Common Stock. Under the 2007 Employee Plan, all options must be granted with an exercise price of not less than "fair market value" as of the grant date and the options granted should be exercisable within a maximum of ten years after the date of grant, or such lesser period of time as is set forth in the stock option agreements. The options may be exercisable (a) immediately as of the effective date of the stock option agreement granting the option, or (b) in accordance with a schedule related to the date of the grant of the option, the date of first employment, or such other date as may be set by the Compensation Committee. Generally, options granted under the 2007 Employee Plan are exercisable within five years after the date of grant, and vest over the period as follows: 25% vesting on the grant date and the remaining balance vesting in equal installments on the next three succeeding anniversaries of the grant date. The share-based compensation will be recognized in terms of the grade method over the vesting period. Certain option awards provide for accelerated vesting if there is a change in control (as defined in the 2007 Employee Plan).

During the second quarter of fiscal 2008, pursuant to the 2007 Employee Plan, stock options covering an aggregate of 50,000 shares of Common Stock were granted to certain officers and employees with an exercise price equal to the fair market value of the Company's Common Stock (as defined under the 2007 Employee Plan in conformity with Regulation 409A of the Internal Revenue Code of 1986, as amended) at the date of grant. These options vest over the period as follows: 25% vesting on the grant date, and the balance vesting in equal installments on the next three succeeding anniversaries of the grant date. The fair market value of 50,000 shares of the Company's Common Stock issuable upon exercise of stock options granted was approximately \$277 based on the fair value of \$5.55 per share determined by using the Black Scholes option pricing model.

The Company recognized stock-based compensation expensed of approximately \$135 in the twelve months ended June 30, 2008 under the 2007 Employee Plan. In the fourth quarter of 2008, 6,000 options were forfeited due to employee turnover. The balance of unamortized stock-based compensation of \$118 based on fair value on the grant date related to options granted under the 2007 Employee Plan is expected to be recognized over a period of three years.

As of June 30, 2008, there were outstanding stock options covering 11,000 shares of Common Stock that were fully vested. The weighted-average exercise price was \$9.57, and the weighted average remaining contractual term was 4.43 years. The total intrinsic value of vested employees' stock options during the year ended June 30, 2008 was zero.

During the first quarter of fiscal 2009, pursuant to the 2007 Employee Plan, stock options covering 50,000 shares of Common Stock were granted to certain officers and employees with an exercise price equal to the fair market value of the Company's Common Stock (as defined under the 2007 Employee Plan in conformity with Regulation 409A of the Internal Revenue Code of 1986, as amended) at the date of grant. The fair market value of the 50,000 shares of the Company's Common Stock issuable upon exercise of such stock options was approximately \$136 based on the fair value of \$2.71 per share determined by using the Black Scholes option pricing model.

During the fourth quarter of fiscal 2009, pursuant to the 2007 Employee Plan, stock options covering 197,000 shares of Common Stock were granted to certain officers and employees with an exercise price equal to the fair market value of the Company's Common Stock (as defined under the 2007 Employee Plan in conformity with Regulation 409A of the Internal Revenue Code of 1986, as amended) at the date of grant. The fair market value of the 197,000 shares of the Company's Common Stock issuable upon exercise of such stock options was approximately \$276 based on the fair value of \$1.40 per share determined by using the Black Scholes option pricing model.

Table of Contents

The Company recognized stock-based compensation expense of approximately \$260 in fiscal year 2009 under the 2007 Employee Plan. Unamortized stock-based compensation of \$248 based on fair value on the grant date related to options granted under the 2007 Employee Plan is expected to be recognized over a period of three years.

As of June 30, 2009, there were vested employee stock options covering a total of 80,625 shares of Common Stock. The weighted-average exercise price was \$7.79 and the weighted average remaining contractual term was 4.41 years. The total intrinsic value of vested employee stock options during the year ended June 30, 2009 was zero. A summary of option activities under the 2007 Employee Plan during the year ended June 30, 2009 is presented as follows:

	Options	Weighted-Average Exercise Price	Weighted - Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value
Outstanding at July 1, 2008	44,000	\$9.57	4.43	--
Granted	247,000	\$2.35	4.63	--
Exercised	-	--		
Forfeited or expired	(8,000)	\$7.49		
Outstanding at June 30, 2009	283,000	\$3.32	4.47	--
Exercisable at June 30, 2009	80,625	\$4.09	4.41	--

A summary of the status of the Company's non-vested employee stock options during the year ended June 30, 2009 is presented below:

	Options	Weighted-Average Grant-Date Fair Value
Non-vested at July 1, 2008	33,000	\$ 5.55
Granted	247,000	\$ 1.67
Vested	(69,625)	\$ 2.14
Forfeited	(8,000)	\$ 4.31
Non-vested at June 30, 2009	202,375	\$ 3.84

Table of Contents

2007 Directors Equity Incentive Plan

The 2007 Directors Equity Incentive Plan (the “2007 Directors Plan”), which is shareholder-approved, permits the grant of 200,000 shares of Common Stock to its duly elected non-employee directors in the form of non-qualified options and restricted stock. The exercise price of the non-qualified options is 100% of the fair market value of the underlying shares on the grant date. The options have five-year contractual terms and are generally exercisable immediately as of the grant date.

During the second quarter of 2008, pursuant to the 2007 Directors Plan, stock options covering an aggregate of 60,000 shares of Common Stock were granted to our directors with an exercise price equal to the fair market value of our Common Stock (as defined under the 2007 Directors Plan in conformity with Regulation 409A or the Internal Revenue Code of 1986, as amended) at the date of grant. The fair market value of 60,000 shares of the Company’s Common Stock issuable upon exercise of stock options granted was approximately \$333 based on the fair value of \$5.55 per share determined by the Black Scholes option pricing model. There were no options exercised during the fiscal year ended June 30, 2008. The Company recognized stock-based compensation expense of \$333 for the period ended June 30, 2008 under the 2007 Directors Plan.

During the first quarter of 2009, pursuant to the 2007 Directors Plan, stock options covering 60,000 shares of Common Stock were granted to our directors with an exercise price equal to the fair market value of our Common Stock (as defined under the 2007 Directors Plan in conformity with Regulation 409A or the Internal Revenue Code of 1986, as amended) at the date of grant. The fair market value of the 60,000 shares of the Company’s Common Stock issuable upon exercise of such stock options was approximately \$163 based on the fair value of \$2.71 per share determined by the Black Scholes option pricing model.

During the fourth quarter of 2009, pursuant to the 2007 Directors Plan, we granted stock options covering 80,000 shares of Common Stock to our directors with an exercise price equal to the fair market value of our Common Stock (as defined under the 2007 Directors Plan in conformity with Regulation 409A or the Internal Revenue Code of 1986, as amended) at the date of grant. The fair market value of the 80,000 shares of the Company’s Common Stock issuable upon exercise of such stock options was approximately \$95 based on the fair value of \$1.18 per share determined by the Black Scholes option pricing model.

There were no options exercised under the 2007 Directors Equity Incentive Plan during the years ended June 30, 2009 and 2008. The Company recognized stock-based compensation expense of \$258 and \$333 in the year ended June 30, 2009 and 2008 respectively under the 2007 Directors Plan.

A summary of option activities under the 2007 Directors Plan during the year ended June 30, 2009 is presented as follow:

	Options	Weighted-Average Exercise Price	Weighted - Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value
Outstanding at July 1, 2008	60,000	\$9.57	4.43	--
Granted	140,000	\$3.04	4.46	--
Exercised	--	--		
Forfeited or expired	--	--		

Edgar Filing: TRIO TECH INTERNATIONAL - Form 10-K

Outstanding at June 30, 2009	200,000	\$5.00	4.15	--
Exercisable at June 30, 2009	200,000	\$5.00	4.15	--

Table of Contents

1998 Stock Option Plan

A summary of option activities under the 1998 Plan during the year ended June 30, 2009 is presented as follow:

	Options	Weighted-Average Exercise Price	Weighted - Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value
Outstanding at July 1, 2008	12,550	\$3.03	0.24	--
Granted	--	--		
Exercised	(1,000)	\$2.66		
Forfeited or expired	(8,800)	\$2.66		
Outstanding at June 30, 2009	2,750	\$4.40	0	--
Exercisable at June 30, 2009	2,750	\$4.40	0	--

The intrinsic value of 2,750 options exercisable was zero. Cash received from options exercised in the year ended June 30, 2009 was approximately \$3.

As at June 30, 2009, all options under 1998 plan are fully vested.

5. EARNINGS PER SHARE

In August 2007, the American Stock Exchange notified the Company that there had been an overstatement of the Company's Common Stock outstanding in the amount of 2,062 shares since fiscal year 1998. The overstatement resulted from an error when the Company had incorrectly issued shares in that amount to an employee. This employee returned the wrongly issued share certificate and the matter remained pending until it was finally cleared in the first quarter of fiscal 2008. At that time the shares were canceled, and the number of outstanding shares was corrected.

Options to purchase 485,750 shares of Common Stock at exercise prices ranging from \$1.72 to \$9.57 per share were outstanding as of June 30, 2009. All the outstanding options were excluded in the computation of diluted EPS for fiscal 2009 since they were anti-dilutive.

Options to purchase 116,550 shares of Common Stock at exercise prices ranging from \$2.66 to \$9.57 per share were outstanding as of June 30, 2008. All the outstanding options were excluded in the computation of diluted EPS for fiscal 2008 since they were anti-dilutive.

Table of Contents

The following table is a reconciliation of the weighted average shares used in the computation of basic and diluted EPS for the years presented herein:

	For the Year Ended June 30,	
	2009	2008
Loss Attributable to Common Shares	\$(1,966)	\$(956)
Basic Loss Per Share	(0.61)	(0.30)
Diluted Loss Per Share	(0.61)	(0.30)
Weighted average number of common shares outstanding - basic	3,227	3,226
Dilutive effect of stock options	-	-
Number of shares used to compute earnings per share - diluted	3,227	3,226

6. PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment consisted of the following:

	Estimated Useful Life in Years	2009	June 30, 2008
Building and improvements	3-20	\$ 319	\$ 319
Leasehold improvements	3-27	2,932	3,689
Machinery and equipment	3-7	11,126	9,458
Furniture and fixtures	3-5	828	877
Equipment under capital leases	3-5	531	786
		15,736	15,130
Less:			
Accumulated depreciation and amortization		8,709	6,686
Accumulated amortization on equipment under capital leases		420	308
		\$ 6,607	\$ 8,136

Depreciation and amortization expenses during fiscal 2009 and 2008 were \$2,135 (of which \$112 related to intangible assets) and \$2,715 (of which \$106 related to intangible assets), respectively.

Table of Contents

7. ACCOUNTS RECEIVABLE AND ALLOWANCE FOR DOUBTFUL ACCOUNTS

Accounts receivable are customer obligations due under normal trade terms. The Company sells its products and services to manufacturers in the semiconductor industry. The Company performs continuing credit evaluations of our customers' financial conditions, and although we generally do not require collateral, letters of credit may be required from our customers in certain circumstances.

The following table represents the changes in the allowance for doubtful accounts:

	For the Year Ended June 30,	
	2009	2008
Beginning	\$51	\$42
Additions charged to cost and expenses	128	24
Recovered	(14)	(15)
Ending	\$165	\$51

8. ACCRUED EXPENSES

Accrued expenses consisted of the following:

	For the Year Ended June 30,	
	2009	2008
Payroll and related costs	\$531	\$1,360
Commissions	30	96
Customer deposits	-	108
Legal and audit	102	182
Sales tax	17	7
Utilities	148	198
Warranty	49	113
Accrued purchase of materials and fixed assets	281	154
Provision for re-installment cost	96	167
Insurance	3	2
Withholding tax	-	7
Other professional fees	331	288
Production expenses	-	90
Provision for productivity funds	-	54
Other accrued expenses	181	292
Total	\$1,769	3,036

Table of Contents

9. WARRANTY ACCRUAL

The Company provides one-year warranty coverage for certain products manufactured by the Company. The Company estimates the warranty costs based on the historical rate of warranty returns. The Company periodically assesses the adequacy of its recorded warranty liability and adjusts the amounts as necessary.

	For the Year Ended June 30,	
	2009	2008
Beginning	\$ 113	\$ 211
Additions charged to cost and expenses	-	-
Reversal	(47)	(80)
Actual usage	(17)	(18)
Ending	\$ 49	\$ 113

10. BANK LOANS PAYABLE

Bank loans payable consisted of the following:

	June 30,	
	2009	2008
Note payable denominated in Singapore dollars to a commercial bank for infrastructure investment, maturing in April 2009, bearing interest at the bank's prime rate (4.25% at June 30, 2009 and June 30, 2008) plus 1% per annum, with monthly payments of principal plus interest through April 2009, collateralized by fixed deposits.	\$-	\$54
Note payable denominated in Singapore dollars to a commercial bank for expansion plans in Singapore and China, maturing in August 2010, bearing interest at the bank's prime rate (5.53% and 2.517% at June 30, 2009 and 2008) plus 3.5% per annum, with monthly payments of principal plus interest of \$124 through June 2009, collateralized by Corporate Guarantee. This note payable is secured by cash deposits of \$2,759 as at June 30, 2009, which is reported as non-current assets, restricted term deposits on the consolidated balance sheet.	1,503	2,969
Current portion	(1,266)	(1,403)
Long term portion of bank loans payable	\$237	\$1,620

The bank loan payables non-current portion of \$237 expired in the year ending June 30, 2010.

Effective interest rate was 3.63% for the outstanding loan as of June 30, 2009.

Table of Contents

11. ADOPTION OF FIN 48

The Company adopted FASB Interpretation No. 48 Accounting for Uncertainty in Income Taxes (FIN 48), on July 1, 2007. The Company has recorded a charge to the beginning balance of retained earnings of \$256 as a result of implementing FIN 48. A reconciliation of the beginning and ending amounts of unrecognized tax benefits is as follows:

(in thousands)

Balance at adoption, July 1, 2007	\$ (256)
Additions based on current year tax positions	(74)
Additions for prior year(s) tax positions	(32)
Balance at June 30, 2008	(362)
Additions for current year's(s) tax positions	(71)
Reductions for prior year(s) tax positions	187
Settlement	45
Balance at June 30, 2009	\$ (201)

The Company accrues penalties and interest on unrecognized tax benefits when necessary as a component of penalties and interest expenses, respectively. The Company had not accrued any penalties or interest expenses relating to unrecognized benefits as at June 30, 2009 and 2008.

The major tax jurisdictions in which the Company files income tax returns are the United States, Singapore and Malaysia. The statute of limitations, in general, is open for years 2004 to 2009 for tax authorities in those jurisdictions to audit or examine income tax returns. The Company is under annual review by the government of Singapore. However, the Company is not currently under tax examination in any other jurisdiction.

Table of Contents

12. INCOME TAXES

The Company generates income or loss before income taxes and minority interest in the U.S., Singapore, Thailand and Malaysia and files income tax returns in these countries. The summarized income or loss before income taxes and minority interest in the U.S. and foreign countries for fiscal 2009 and 2008 were as follows:

	For the Year Ended June 30,	
	2009	2008
U.S.	\$58	\$(243)
Foreign	(1,931)	(147)
Total	\$(1,873)	\$(390)

On a consolidated basis, the Company's net income tax provisions (benefits) were as follows:

	For the Year Ended June 30,	
	2009	2008
Federal	\$-	\$-
State	2	5
Foreign	(46)	74
	(44)	79
Deferred:		
Federal	-	-
State	-	-
Foreign	7	137
	\$(51)	\$216

The reconciliation between the U.S. federal tax rate and the effective income tax rate was as follows:

	For the Year Ended June 30,	
	2009	2008
Statutory federal tax rate	(34)	(34)
State taxes, net of federal benefit	(6)	(6)
Foreign tax rate reduction	38	69
Other	(4)	18
Changes in valuation allowance	3	8
Effective rate	(3)	55

At June 30, 2009, the Company had net operating loss carry forwards of approximately \$129 and \$1,745 for federal and state tax purposes, respectively, expiring through 2029. The Company also had tax credit carry forwards of approximately \$863 for federal income tax purposes expiring through 2015.

Table of Contents

The components of deferred income tax assets (liabilities) were as follows:

	For the Year Ended June 30,	
	2009	2008
Deferred tax assets:		
Net operating losses and credits	\$1,565	\$1,004
Inventory valuation	98	171
Depreciation	4	1
Provision for bad debts	2	2
Accrued vacation	12	12
Accrued expenses	3	12
Other	1	24
Total deferred tax assets	1,685	1,226
Deferred tax liabilities:		
Depreciation	(526)	(534)
Other	-	-
Total deferred income tax liabilities	(526)	(534)
Subtotal	1,159	692
Valuation allowance	(1,685)	(1,202)
Net deferred tax liabilities	\$(526)	\$(510)

The valuation allowance increased by \$483 and \$100 in fiscal 2009 and 2008, respectively. Management believed that it was more likely than not that the future benefits from these timing differences would not be realized. Accordingly, a full valuation allowance was provided as of June 30, 2009 and 2008.

For U.S. income tax purposes no provision has been made for U.S. taxes on undistributed earnings of overseas subsidiaries with which the Company intends to continue to reinvest. It is not practicable to estimate the amount of additional tax that might be payable on the foreign earnings if they were remitted as dividends or lent to the Company, or if the Company should sell its stock in the subsidiary. However, the Company believes that the existing U.S. foreign tax credits and net operating losses available would substantially eliminate any additional tax effects.

Table of Contents

13. COMMITMENTS AND CONTINGENCIES

The Company leases certain of its facilities and equipment under long-term agreements expiring at various dates through fiscal 2012. Certain of these leases require the Company to pay real estate taxes and insurance and provide for escalation of lease costs based on certain indices. Future minimum payments under capital leases and non-cancelable operating leases and net rental income under non-cancelable sub-leased properties as of June 30, 2009 were as follows:

Years Ending June 30,	Capital Leases	Operating Leases	Sub-lease Rental Income	Net Operating Leases
2010	\$ 84	\$ 538	\$ 84	\$ 454
2011	56	304	36	268
2012	-	114	-	114
Total future minimum lease payments	140	\$ 956	\$ 120	\$ 836
Less amount representing interest	(10)		
Present value of net minimum lease payments	130			
Less current portion of capital lease obligations	(78)		
Long-term obligations under capital leases	\$ 52			

The Company entered into two sublease agreements with third parties to rent out the properties in Malaysia in December 2007 and March 2008, which expire in November 2009 and June 2010, respectively. Total rental income from subleases amounted to \$119 in fiscal 2009 and \$156 in fiscal 2008.

Total rental expense on all operating leases, cancelable and non-cancelable, amounted to \$1,024 in fiscal 2009 and \$1,301 in fiscal 2008.

The Company is, from time to time, the subject of litigation claims and assessments arising out of matters occurring in its normal business operations. In the opinion of management, resolution of these matters will not have a material adverse effect on the Company's financial statements.

14. TRANSACTIONS IN SHAREHOLDERS' EQUITY

Fiscal 2009

On July 11, 2008, the Board of Directors granted options to acquire up to an aggregate of 50,000 shares of the Company's Common Stock pursuant to the 2007 Employee Stock Option Plan and options to acquire up to an aggregate of 60,000 shares of stock under the 2007 Directors Equity Incentive Plan, all with an exercise price of \$4.81 per share (equal to the market price at the grant date).

On April 13, 2009, the Board of Directors granted options to acquire up to an aggregate of 197,000 shares of the Company's Common Stock pursuant to the 2007 Employee Stock Option Plan and options to acquire up to an aggregate of 80,000 shares of stock under the 2007 Directors Equity Incentive Plan, all with an exercise price of \$1.72 per share (equal to the market price at the grant date).

The options granted to directors vested in full on the grant date. The options granted to the employee have a five-year contractual life and vested 25% on the grant date and will vest as to an additional 25% at each anniversary

date. Under the Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards (SFAS) No. 123R, Share-Based Payments, using the modified prospective application method, the compensation cost recognized was \$518.

-81-

Table of Contents

The Company translates adjustments related to the translation of assets and liabilities outside the U.S. into U.S. dollars, which totaled \$832 as of June 30, 2009.

Fiscal 2008

On September 24, 2007, the Company's Board of Directors unanimously adopted the 2007 Employee Stock Option Plan and the 2007 Directors Equity Incentive Plan, which were approved by the shareholders on December 3, 2007. The 2007 Employee Stock Option Plan provides for awards of up to 300,000 shares of the Company's Common Stock to employees, consultants and advisors in the form of incentive and non-qualified stock options. The 2007 Directors Equity Incentive Plan provides for awards of up to 200,000 shares of the Company's Common Stock to the members of the Board of Directors in the form of non-qualified options and restricted stock. These two plans are administered by the board, which also establishes the terms of the awards.

On December 4, 2007, the Board of Directors granted options to acquire up to an aggregate of 50,000 shares of the Company's Common Stock pursuant to the 2007 Employee Stock Option Plan and options to acquire up to an aggregate of 60,000 shares of stock under the 2007 Directors Equity Incentive Plan, all with an exercise price of \$9.57 per share (equal to the market price at the grant date). The options granted to directors vested in full on the grant date. The options granted to the employee have a five-year contractual life and vested 25% on the grant date and will vest as to an additional 25% at each anniversary date. Under the Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards (SFAS) No. 123R, Share-Based Payments, using the modified prospective application method, the compensation cost recognized was \$468.

15. CONCENTRATION OF CUSTOMERS

The Company had three major customers that accounted for the following accounts receivable and sales during the fiscal years ended:

Years Ended June 30,

	2009		2008	
Sales				
- Customer A	8	%	42	%
- Customer B	43	%	34	%
- Customer C	8	%	4	%
Accounts Receivable				
- Customer A	11	%	17	%
- Customer B	40	%	52	%
- Customer C	16	%	9	%

Table of Contents

16. INVESTMENT PROPERTY IN CHONGQING, CHINA

The following table presents the Company’s investment in China in fiscal 2009. The exchange rate is based on the exchange rate on June 30, 2009 published by the Monetary Authority of Singapore.

	Investment Date	Investment Amount	
		(RMB)	(U.S. Dollars)
Investment in property with JiaSheng	08/28/07	10,000	1,464
Investment in property with JiaSheng	12/17/07	5,000	732
Purchase of investment property (MaoYe)	01/04/08	5,554	813
Return of investment in property purchased in 2007 with JiaSheng	06/26/08	(5,000)	(732)
Return on investment in property with JiaSheng	10/23/08	(1,988)	(291)
Purchase of investment property	10/23/08	7,042	1,031
Depreciation		(557)	(82)
Total investments in China		RMB 20,051	\$ 2,935

In June 2007, Trio-Tech International Pte., Ltd. established a subsidiary in Chongqing, China. This newly established subsidiary, Trio-Tech (Chongqing) Co., Ltd., has a registered capital of RMB 20,000 (Chinese yuan), or equivalent to approximately U.S. \$2,600, and is wholly owned by Trio-Tech International Pte., Ltd. In June 2007, Trio-Tech International Pte., Ltd. infused \$2,600 to Trio-Tech (Chongqing) Co., Ltd. to fulfill the capital injection obligation of Trio-Tech (Chongqing) Co., Ltd. The source of the funds was from the proceeds from the disposition of short-term deposits by Trio-Tech International Pte., Ltd.

On August 27, 2007, Trio-Tech (Chongqing) Co., Ltd. entered into a Memorandum Agreement with JiaSheng Property Development Co., Ltd. “JiaSheng” to jointly develop a piece of property with 24.91 acres owned by JiaSheng located in Chongqing City, China, which is intended for sale after the completion of development. Pursuant to the signed agreement, the capital to be invested by Trio-Tech (Chongqing) Co., Ltd. was RMB 10,000, equivalent to approximately U.S. \$1,464 based on the exchange rate on June 30, 2009 published by the Monetary Authority of Singapore. On August 28, 2007, Trio-Tech (Chongqing) Co., Ltd. transferred the required amount from its bank account into a special bank account jointly monitored by both Trio-Tech (Chongqing) Co., Ltd. and JiaSheng. The investment was accounted under the cost method.

Table of Contents

On October 22, 2007, the parties received approval from the Chinese District Zoning Regulation Bureau to increase the square meters of the buildings specified in the original Memorandum Agreement dated August 27, 2007 by 9,885 square meters. As a result, the construction costs of the proposed building project also increased. On November 15, 2007, Trio-Tech (Chongqing) Co., Ltd. entered into a Supplement Agreement to the Memorandum Agreement dated August 27, 2007 with JiaSheng. The purpose of this Supplement Agreement was to document another agreement reached by both parties regarding the additional capital infusion to be committed by the respective parties in order to finance the increase in construction costs. The Supplement Agreement did not modify the terms and obligations of both parties specified in the original Memorandum Agreement. Under the terms of the Supplement Agreement, the Company agreed to invest an additional RMB 9,000, or approximately U.S. \$1,317 based on the exchange rate as of June 30, 2009 published by the Monetary Authority of Singapore. On December 17, 2007, Trio-Tech (Chongqing) Co., Ltd. received a list of additional costs incurred for this project, which were RMB 4,000 less than the estimated cost of RMB 9,000. Accordingly, the Company only transferred RMB 5,000, approximately U.S. \$732, from its bank account into the special bank account jointly monitored by both Trio-Tech (Chongqing) Co., Ltd. and JiaSheng. After that additional capital infusion, the equity ratio owned by the Company in that joint venture was 20%.

On January 4, 2008, Trio-Tech (Chongqing) Co., Ltd. entered into a Memorandum Agreement with MaoYe Property Ltd. to purchase an office space of 827.2 square meters on the 35th floor of a 40 story high office building located in Chongqing, China. The total cash purchase price was RMB 5,554 (Chinese yuan), equivalent to approximately U.S. \$813 based on the exchange rate as of June 30, 2009 published by the Monetary Authority of Singapore. Under the terms of the agreement, the Company paid the purchase price in full on January 4, 2008. The Company rented this property to a third party on July 13, 2008. The term of the rental agreement was five years with a monthly rental income of RMB 39, or approximately \$6 for the first three years, with an increase of 8% in the fourth year and another 8% in the fifth year. In fiscal year 2009, this property generated a rental income of \$54.

In the fourth quarter of 2008, the investment of RMB 5,000, approximately U.S. \$732 based on the exchange rate as of June 30, 2009 published by the Monetary Authority of Singapore, was returned to the Company, which reduced the investment in this project to \$1,464. After that return of investment, the equity ratio owned by the Company in that joint venture was 15%. The Company also recorded a profit of RMB 750, approximately \$103, in investment income in the fourth quarter of 2008.

In October 2008, the Company received a second return on investment principal of RMB 1,988, or \$291, and investment income of RMB 1,312, or \$192, from JiaSheng. The investment income was part of the return on investment based on the total investment amount of RMB 15,000, or \$2,195. After the second return of investment, the equity ratio owned by the Company in that joint venture was 13%. This investment return was used to offset the purchase of new commercial and residential investment property from JiaSheng as discussed below.

Table of Contents

On October 23, 2008, Trio-Tech (Chongqing) Co., Ltd. entered into a Memorandum Agreement with JiaSheng to purchase four units of commercial property and two units of residential property, totaling 1,391.70 square meters, at JiaSheng Jingyun Huafu Project located at No. 17 Puyun Avenue in Chongqing, China. The total purchase price was RMB 7,042, approximately \$1,031 based on the exchange rate as of June 30, 2009 published by the Monetary Authority of Singapore. In October 2008, the Company made a cash down payment of 10% in the amount of RMB 704, or \$103. In November 2008, the Company paid an additional RMB 2,908 in cash, or \$426, from internally generated funds of the Company. The Company and JiaSheng agreed to offset the remaining purchase price for this commercial and residential property with the investment returns from the No. B48 property in the BeiPei district of Chongqing City. In addition, the Company charged JiaSheng RMB 130, or \$19, in penalties for the delay in the payment of investment principal and investment income. The penalty was also used to offset the purchase price of the commercial and residential property. As of June 30, 2009, the Company paid cash in the amount of \$529, and offset amounts of \$291 as the return of investment principal, \$192 as investment income and \$19 as penalties charged for this new commercial and residential property totaling \$1,031. The Company has not received the title for this property as of the filing date of this Form 10-K, as the seller is in the process of making the payments of all taxes due so that the documents can be received and the transfer can take place.

On October 23, 2008 the Company entered into a lease agreement with JiaSheng for the six units purchased from JiaSheng pursuant to the Memorandum Agreement. The lease provides for a two year term with an annual rental income of RMB 1,392, or approximately \$204. The lease started on November 1, 2008 and generated a rental income of \$137 in fiscal 2009. The depreciation expenses of the investment property in Chongqing, China were \$75 and the depreciation expenses of our office and office furniture in Chongqing, China were \$15 in fiscal year 2009.

17. DIVIDEND PAID TO SHAREHOLDERS

On February 12, 2008, the Board of Directors of Registrant declared a cash dividend of eleven cents (\$0.11) per share payable to the shareholders of record on February 25, 2008. The total number of shares issued and outstanding as of February 25, 2008 was 3,226,430 and the total amount of the cash dividends paid on March 25, 2008 was \$354.

18. OTHER EXPENSES

Other expenses consisted of the following:

	Year Ended June 30,	
	2009	2008
Interest income	\$112	\$258
Other rental income	141	59
Exchange loss	212	(561)
Other miscellaneous (loss) income	(162)	88
Total	\$303	\$(156)

Table of Contents

19. IMPAIRMENT LOSS

The Company applies the provisions of Statement of Financial Accounting Standard No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets (“SFAS No. 144”) to property, plant and equipment, investment in property, China and other intangible assets. SFAS No. 144 requires that long-lived assets be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable through the estimated undiscounted cash flows expected to result from the use and eventual disposition of the asset. Whenever any such impairment exists, an impairment loss will be recognized for the amount by which the carrying value exceeds the fair value.

In fiscal 2009, the Company recorded an impairment loss of \$623 based on its examination of future undiscounted cash flows, which were generated by the subsidiaries where certain long-lived assets (certain fixed assets) were used. Of such amount, an impairment loss of \$525 was recorded in the second quarter of fiscal year 2009. An impairment loss of \$296 related to the fixed assets located in our Shanghai operation and the remaining \$226 was for certain testing equipment located in our Suzhou operation in China. Management believes that due to the change in demand for certain burn-in testing services, the negative impact of the international economic financial crisis and the semiconductor industry recession, our existing burn-in testing facilities in the Shanghai operation became obsolete. There was little business activity in the Shanghai operations during the six months ended December 31, 2008, and there were also no secured orders or backlogs for subsequent periods. Therefore, as management expects no future cash flows from those assets based on our best estimates, the carrying value of these assets was written down to zero and the impairment loss was recorded. Business in the Suzhou operation began to slow down in the fourth quarter of fiscal 2008, and suffered losses in fiscal 2009. The operation is currently only providing line support, maintenance and training service for one customer. Based on our best estimates, there will be no future cash flows from certain identified testing equipment. Therefore, the carrying value of these assets was written down to zero and an impairment loss was recorded.

During the third quarter of fiscal 2009, the Company recorded an impairment loss of \$98, which was for certain testing equipment located in the Malaysia operation. Some testing equipment in the Malaysia operation was beyond repairable conditions and hence was fully impaired as no future cash flows will be generated.

In fiscal 2008, the Company recorded an impairment loss of approximately \$450 based on its examination of future undiscounted cash flows, which were generated by the subsidiaries where certain long-lived assets (certain fixed assets) were used. Of such amount, an impairment loss of \$5 was recorded in the second quarter of fiscal year 2008, which related to the assets held for sale in Malaysia that was sold in the fourth quarter of fiscal 2008, and impairment loss of \$316 was from certain advanced burn-in testing equipment in the Singapore operation utilized in connection with the contract that was terminated, and also due to a decrease in our testing backlog and projected future sales in the Singapore operation. An additional \$72 of impairment loss was for the burn-in board testing service in the Shanghai operation in China due to the change in demand for certain burn-in testing services, which in turn made certain of our existing burn-in facilities obsolete. A further impairment loss of \$57 was for building renovations for certain testing projects due to a decrease in orders from the same major customer in the Shanghai operations in China.

Table of Contents

20. BUSINESS SEGMENTS

We have historically operated in three segments: Testing Services, Manufacturing and Distribution. In June 2007, Trio-Tech International Pte., Ltd. established a subsidiary in Chongqing, China. As our investment in the real estate business in Chongqing, China meets the definition and exceeds more than 10% of our combined assets of all operating segments in fiscal 2009, we reported our investment in China as a separate Real Estate Segment, to be in compliance with and in accordance to the Statement of Financial Accounting Standards No.131 Disclosures about Segments of an Enterprise and Related Information. The financial information on the measurement of profit or loss and total assets for the four segments, as well as geographic area information, can be found under management's discussion and analysis of results of operations and financial conditions, as well as in the financial statements included in this report. Our working capital requirements are covered under management's discussion and analysis of business outlook, liquidity and capital resources.

The Company operates principally in four industry segments: the testing service industry (that performs structural and electronic tests of semiconductor devices), the designing and manufacturing of equipment (that tests the structural integrity of integrated circuits and other products), the distribution of various products from other manufacturers in Southeast Asia, and real estate business (which invests in commercial and residential properties) in Chongqing, China.

The revenue allocated to individual countries was based on where the customers were located. The allocation of the cost of equipment, the current year investment in new equipment and depreciation expense were made on the basis of the primary purpose for which the equipment was acquired.

All inter-segment sales were sales from the manufacturing segment to the testing and distribution segment. Total inter-segment sales were \$223 in fiscal 2009 and \$133 in fiscal 2008. Corporate assets mainly consisted of cash and prepaid expenses. Corporate expenses mainly consisted of salaries, insurance, professional expenses and directors' fees.

Table of Contents

22. LINE OF CREDIT

Our credit rating provides the Company with ready and adequate access to funds in global markets. At June 30, 2009, the Company had available unused short-term lines of credit totaling \$12,970. The Company only paid banks fees to maintain the line of credit held at Trio-Tech Malaysia Sdn. Bhd. which resulted in \$2 during the 2009 fiscal year. There was no fee for the unused line of credit in Bangkok and Singapore.

Entity with Facility	Type of Facility	Interest Rate	Expiration Date	Credit Limitation	Unused Credit
Trio-Tech Malaysia	Line of Credit	Prime rate (1.55% as of June 30, 2009) plus 2.5% per annum	June 2010	\$ 88	\$ 88
Trio-Tech Bangkok	Line of Credit	Prime rate (6.51% as of June 30, 2009) plus 1% per annum	October 2009	139	139
Trio-Tech Singapore	Line of Credit	Prime rate (5.28% as of June 30, 2009) plus 0.25% per annum	May 2010	12,743	12,743
Total				\$ 12,970	\$ 12,970

23. FAIR VALUE MEASUREMENTS

In September 2006, the Financial Accounting Standards Board issued SFAS 157, Fair Value Measurements. SFAS 157 provides enhanced guidance for using fair value to measure assets and liabilities. Under the standard, fair value refers to the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between participants in the market in which the reporting entity transacts its business. SFAS 157 clarifies the principle that fair value should be based on the assumptions market participants would use when pricing the asset or liability. In support of this principle, SFAS 157 establishes a fair value hierarchy that prioritizes the information used to develop those assumptions. Under the standard, fair value measurements would be separately disclosed by level within the fair value hierarchy. Effective July 1, 2008, the Company adopted the provisions of SFAS 157 as it relates to financial assets and financial liabilities.

The following methods and assumptions were used by the Company in estimating its fair value disclosures for financial instruments:

Cash and cash equivalents: The carrying amount reported in the balance sheet for cash and cash equivalents approximates its far value because of the short-term maturity of these instruments.

Accounts receivable and accounts payable: The carrying amounts reported in the balance sheet for accounts receivable and accounts payable approximate their fair values because of the short-term maturity of these instruments.

Long-term and short-term debt: The carrying amounts of the Company's borrowings under its short-term credit arrangements approximate their values. The fair values of the Company's long-term debt are estimated using discounted cash flow analyses, based on the Company's current incremental borrowing rates for similar types of borrowing arrangements. As of June 30, 2009, the Company had no non-interest bearing long-term debt outstanding with a related party.

Table of Contents

There are no significant differences between the carrying amounts and fair values of the Company's financial instruments as of June 30, 2009 and 2008.

The following table provides a summary of the assets and liabilities that are measured at fair value on a recurring basis as of June 30, 2009:

	As of June 30, 2009	Basis of Fair Value Measurements		
		Quoted Prices in Active Markets for Identical Assets Level 1	Significant Other Observable Inputs Level 2	Significant Unobservable Inputs Level 3
Assets				
Short-term deposits	\$1,994	\$1,994	\$--	\$ -
Restricted term deposit	3,437	3,437		
Total assets measured at fair value	\$5,431	\$5,431	\$--	\$ -
Percentage of total assets	19	% 19	% --	-

As noted above, the fair value of the Company's term deposits is determined using quoted market prices in active markets. Since the Company's term deposits are fixed rate deposits, there is an active, readily tradable market value based on quoted prices. We based our estimates on such prices (Level 1 pricing) as of June 30, 2009, or the measurement date. Active markets are those in which transactions occur in significant frequency and volume to provide pricing information on an on-going basis. Since valuations are based on quoted prices that are readily and regularly available in an active market, the valuation of these term deposits does not entail a significant degree of judgment.

24. MINORITY INTEREST

Minority interest represents the minority stockholders' proportionate share of 45% of the equity of Trio-Tech Malaysia, also 45% interest in the newly formed company SHI, a subsidiary of Trio-Tech International Pte., Ltd., which is a subsidiary of the Company.

25. LOAN COVENANT VIOLATION

As the Company suffered a loss in the first three quarters of fiscal 2009, the Singapore operations did not fulfill one of their loan covenants which requires the Company to maintain the debt to EBITDA ratio of no more than 2.5 times at all times during the term of the loan. As a result, the Company had classified all long-term debt as current liabilities for the first three quarters of fiscal 2009. Management has communicated to the bank and requested a waiver of this particular loan covenant. As a result, on June 28, 2009 the financial institution waived the required loan covenant as requested, but increased the security by requiring us to pledge the fixed deposits of S \$2,000, approximately \$1,380.

Table of Contents

26. RELATED PARTY TRANSACTIONS

During the second quarter of fiscal 2009, the Company purchased four units of commercial property and two units of residential property in Chongqing China from JiaSheng. JiaSheng and the Company were parties to the Agreement entered into on August 27, 2007 and the Supplement Agreement entered into on November 15, 2007 relating to an investment in the No. B48 lot in the BeiPei district of Chongqing, China as discussed in Note 16. The purchase price was approximately \$1,031.

On October 23, 2008 the Company entered into a lease agreement with JiaSheng for the six units purchased from JiaSheng pursuant to the Memorandum Agreement. The lease provides for a two year term with an annual rental income of RMB 1,392, or approximately \$204. The lease started on November 1, 2008.

27. OPERATING LEASES

Operating leases arise from the leasing of the Company's commercial and residential real estate investment property in China and Malaysia. Initial lease terms generally range from 24 to 60 months. Depreciation expense for assets subject to operating leases is provided primarily on the straight-line method over a period of twenty years in amounts necessary to reduce the carrying amount of the asset to its estimated residual value. Depreciation expense relating to the property held as investments in operating leases was \$75 for fiscal 2009.

Investments in operating leases as at June 30:

	2009	2008
Investment property in China	\$1,844	\$813
Accumulated depreciation	(75)	-
Net investments in operating leases	\$1,769	\$813

Future minimum rental payments to be received on non-cancellable (Bei Bei District only) operating leases are contractually due as follows as of June 30, 2009:

Year Ending June 30,	Amount
2010	\$68
2011	68
2012	73
2013	73
2014	3
Thereafter	-

Table of Contents

28. TERM DEPOSITS

	June 30,	
	2009	2008
Short-term deposits	\$ 1,994	\$ 7,746
Restricted term deposits	3,437	-
	\$ 5,431	\$ 7,746

Restricted deposits represent the amounts of cash pledged to secure loans payable granted by financial institutions and serve as collateral for public utility agreements such as electricity and water and performance bonds related to customs duty payable and are classified as non-current assets, as they relate to long-term obligations. Short term deposits represent bank deposits which do not qualify as cash equivalents.

29. SUBSEQUENT EVENT

In April 2009, Trio-Tech International Pte., Ltd. set up a new entity, SHI International Pte., Ltd. ("SHI"), in which Trio-Tech International Pte., Ltd. holds 55% of the ownership interest. On April 7, 2009, SHI entered into a Share Purchase Agreement, pursuant to which SHI agreed to acquire from Erni Susanto Susi, Dwi Kartikarini and PT SAS International's shares of PT SAS Heavy Industry ("SASHI") for an aggregate cash purchase price of \$10, and a goodwill of \$100. In August 2009 relevant Indonesian government authorities approved the change of shareholders and hence PT SAS Indonesia is considered acquired 95% by SHI International Pte., Ltd. SASHI engages in business in the oil and gas industries by providing integrated engineering, manufacturing and fabrication services for customers in the oil and gas industries. These include products such as heat transfer equipment, pressure vessels, skid packages, onshore and offshore modules and structures, floating cranes and barges, and steel structures for industrial plants.

In August 2009, Trio-Tech (Malaysia) Sdn. Bhd. ("TTM"), a 55% owned subsidiary of Trio-Tech International Pte., Ltd., purchased a building for a value of RM 12,450 (Malaysian ringgit) or approximately \$3,534 (U.S. dollars), for its testing operations. Prior to this purchase, this property was under lease rental by the Company. On August 24, 2008, TTM obtained a long-term loan of RM 9,625, or approximately \$2,733, offered by a financial institution in Malaysia. This non-revolving long-term loan has a term of fifteen years from the first draw down. The financial institution offered an interest rate at the financial institution's prime rate plus 1.5% per annum or a fixed rate of 7.12% per annum in the first five years and the financial institution's prime rate plus 1.5% per annum thereafter. The Company decided to opt for the bank's prime rate plus 1.5% per annum, and the loan was released on August 10, 2009.
