**Washington, D.C. 20549**

**FORM 10-Q**

(Mark One)

[ √ ] **QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

**For the quarterly period ended March 25, 2017**

**OR**

[ ] **TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

**Commission file number 001-04298**

**COHU, INC.**

*(Exact name of registrant as specified in its charter)*

| | |
|---|---|
| **Delaware**<br>*(State or other jurisdiction of incorporation or organization)* | **95-1934119**<br>*(I.R.S. Employer Identification No.)* |
| **12367 Crosthwaite Circle, Poway, California** | **92064-6817**<br>*(Zip Code)* |

*(Address of principal executive offices)*

**Registrant's telephone number, including area code (858) 848-8100**

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company or emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

As of April 17, 2017 the Registrant had 27,330,645 shares of its $1.00 par value common stock outstanding.

**Cohu, Inc.**

**Notes to Unaudited Condensed Consolidated Financial Statements**

March 25, 2017

**1. Summary of Significant Accounting Policies**

**Basis of Presentation**

Our fiscal years are based on a 52- or 53-week period ending on the last Saturday in December. The condensed consolidated balance sheet at December 31, 2016 has been derived from our audited financial statements at that date. The interim condensed consolidated financial statements as of March 25, 2017 (also referred to as "the first quarter of fiscal 2017" and "the first three months of fiscal 2017") and March 26, 2016 (also referred to as "the first quarter of fiscal 2016" and "the first three months of fiscal 2016") are unaudited. However, in management's opinion, these financial statements reflect all adjustments (consisting only of normal, recurring items) necessary to provide a fair presentation of our financial position, results of operations and cash flows for the periods presented. The first quarter of fiscal 2017 was comprised of 12 weeks and 2016 was comprised of 13 weeks.

Our interim results are not necessarily indicative of the results that should be expected for the full year. For a better understanding of Cohu, Inc. and our financial statements, we recommend reading these interim condensed consolidated financial statements in conjunction with our audited financial statements for the year ended December 31, 2016, which are included in our 2016 Annual Report on Form 10-K, filed with the U. S. Securities and Exchange Commission ("SEC"). In the following notes to our interim condensed consolidated financial statements, Cohu, Inc. is referred to as "Cohu", "we", "our" and "us".

Certain prior year amounts have been restated as a result of our early adoption of Accounting Standards Update ("ASU") No. 2016-09, Compensation - Stock Compensation (Topic 718): *Improvements to Employee Share-Based Payment Accounting* (ASU 2016-09). While the effective date of ASU 2016-09 was for fiscal years beginning after December 15, 2016, earlier adoption was permitted and we elected to adopt ASU 2016-09 during the fourth quarter of fiscal 2016.

As part of our adoption of ASU 2016-09 we elected to eliminate the use of an estimated forfeiture rate and recognize actual forfeitures as they occur. This amendment was adopted on a modified retrospective basis and, as a result, our share-based compensation for the first quarter of fiscal 2016 was revised and is approximately $0.2 million lower, under the new method, than what was previously reported.

**Discontinued Operations**

On June 10, 2015, we sold our microwave communications equipment segment, Broadcast Microwave Services, Inc. ("BMS"). See Note 6, "Discontinued Operations" for additional information. Unless otherwise indicated, all amounts herein relate to continuing operations.

**Concentration of Credit Risk**

Financial instruments that potentially subject us to significant credit risk consist principally of cash equivalents, short-term investments and trade accounts receivable. We invest in a variety of financial instruments and, by policy, limit the amount of credit exposure with any one issuer.

Trade accounts receivable are presented net of allowance for doubtful accounts of $0.1 million at both March 25, 2017 and December 31, 2016, respectively. Our customers include semiconductor manufacturers and semiconductor test subcontractors and other customers located throughout many areas of the world. While we believe that our allowance for doubtful accounts is adequate and represents our best estimate at March 25, 2017, we will continue to monitor customer liquidity and other economic conditions, which may result in changes to our estimates regarding collectability.

**Segment Information**

We applied the provisions of Accounting Standards Codification ("ASC") Topic 280, *Segment Reporting*, ("ASC 280"), which sets forth a management approach to segment reporting and establishes requirements to report selected segment information quarterly and to report annually entity-wide disclosures about products, major customers and the geographies in which the entity holds material assets and reports revenue. An operating segment is defined as a component that engages in business activities whose operating results are reviewed by the chief operating decision maker and for which discrete financial information is available. Based on the provisions of ASC 280, we have determined that our identified operating segments qualify for aggregation under ASC 280 due to similarities in their customers, their economic characteristics, and the nature of products and services provided. As a result, we report in one segment, semiconductor equipment and the financial information disclosed herein materially represents all of the financial information related to our semiconductor equipment segment.

**Cohu, Inc.**

**Notes to Unaudited Condensed Consolidated Financial Statements**

March 25, 2017

**Goodwill, Other Intangible Assets and Long-lived Assets**

We evaluate goodwill for impairment annually and when an event occurs or circumstances change that indicate that the carrying value may not be recoverable. We test goodwill for impairment by first comparing the book value of net assets to the fair value of the reporting units. If the fair value is determined to be less than the book value, a second step is performed to compute the amount of impairment as the difference between the estimated fair value of goodwill and the carrying value. We estimated the fair values of our reporting units primarily using the income approach valuation methodology that includes the discounted cash flow method, taking into consideration the market approach and certain market multiples as a validation of the values derived using the discounted cash flow methodology. Forecasts of future cash flows are based on our best estimate of future net sales and operating expenses, based primarily on customer forecasts, industry trade organization data and general economic conditions.

We conduct our annual impairment test as of October 1st of each year, and have determined there was no impairment as of October 1, 2016 as we determined that the estimated fair values of our reporting units exceeded their carrying values on that date. Other events and changes in circumstances may also require goodwill to be tested for impairment between annual measurement dates. As of March 25, 2017 we do not believe there have been any events or circumstances that would require us to perform an interim goodwill impairment review. In the event we determine that an interim goodwill impairment review is required, in a future period, the review may result in an impairment charge, which would have a negative impact on our results of operations.

Long-lived assets, other than goodwill, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the assets might not be recoverable. Conditions that would necessitate an impairment assessment include a significant decline in the observable market value of an asset, a significant change in the extent or manner in which an asset is used, or any other significant adverse change that would indicate that the carrying amount of an asset or group of assets may not be recoverable. For long-lived assets, impairment losses are only recorded if the asset’s carrying amount is not recoverable through its undiscounted, probability-weighted future cash flows. We measure the impairment loss based on the difference between the carrying amount and estimated fair value.

**Foreign Currency Translation**

Assets and liabilities of our wholly owned foreign subsidiaries that use the U.S. Dollar as their functional currency are re-measured using exchange rates in effect at the end of the period, except for nonmonetary assets, such as inventories and property, plant and equipment, which are re-measured using historical exchange rates. Revenues and costs are re-measured using average exchange rates for the period, except for costs related to those balance sheet items that are re-measured using historical exchange rates. Gains and losses on foreign currency transactions are recognized as incurred. Certain of our foreign subsidiaries have designated the local currency as their functional currency and, as a result, their assets and liabilities are translated at the rate of exchange at the balance sheet date, while revenue and expenses are translated using the average exchange rate for the period. During the three months ended March 25, 2017 and March 26, 2016 we recognized foreign exchange losses of $1.3 million and $0.5 million, respectively, in our consolidated statement of operations. Cumulative translation adjustments resulting from the translation of the financial statements are included as a separate component of stockholders’ equity.

**Share-Based Compensation**

We measure and recognize all share-based compensation under the fair value method. Our estimate of share-based compensation expense requires a number of complex and subjective assumptions including our stock price volatility, employee exercise patterns (expected life of the options) and related tax effects. The assumptions used in calculating the fair value of share-based awards represent our best estimates, but these estimates involve inherent uncertainties and the application of management judgment. Although we believe the assumptions and estimates we have made are reasonable and appropriate, changes in assumptions could materially impact our reported financial results.

**Cohu, Inc.**

**Notes to Unaudited Condensed Consolidated Financial Statements**

March 25, 2017

Reported share-based compensation is classified, in the condensed consolidated interim financial statements, as follows *(in thousands)*:

| | Three Months Ended | |
|---|---|---|
| | March 25, 2017 | March 26, 2016 |
| Cost of sales | $83 | $93 |
| Research and development | 316 | 294 |
| Selling, general and administrative | 1,318 | 1,350 |
| Total share-based compensation | 1,717 | 1,737 |
| Income tax benefit | (75) | (40) |
| Total share-based compensation, net | $1,642 | $1,697 |

**Income (Loss) Per Share**

Basic income (loss) per common share is computed by dividing net income (loss) by the weighted-average number of common shares outstanding during the reporting period. Diluted income (loss) per share includes the dilutive effect of common shares potentially issuable upon the exercise of stock options, vesting of outstanding restricted stock and performance stock units and issuance of stock under our employee stock purchase plan using the treasury stock method. In loss periods, potentially dilutive securities are excluded from the per share computations due to their anti-dilutive effect. For purposes of computing diluted income (loss) per share, stock options with exercise prices that exceed the average fair market value of our common stock for the period are excluded. For the three months ended March 25, 2017, approximately 258,000 shares of common stock were excluded from the computation.

The following table reconciles the denominators used in computing basic and diluted income (loss) per share *(in thousands)*:

| | Three Months Ended | |
|---|---|---|
| | March 25, 2017 | March 26, 2016 |
| Weighted average common shares | 26,978 | 26,317 |
| Effect of dilutive stock options | 1,274 | - |
| | 28,252 | 26,317 |

**Revenue Recognition**

Our net sales are derived from the sale of products and services and are adjusted for estimated returns and allowances, which historically have been insignificant. We recognize revenue when there is persuasive evidence of an arrangement, title and risk of loss have passed, delivery has occurred or the services have been rendered, the sales price is fixed or determinable and collection of the related receivable is reasonably assured. Title and risk of loss generally pass to our customers upon shipment. In circumstances where either title or risk of loss pass upon destination or acceptance, we defer revenue recognition until such events occur.

Revenue for established products that have previously satisfied a customer's acceptance requirements and provide for full payment tied to shipment is generally recognized upon shipment and passage of title. In certain instances, customer payment terms may provide that a minority portion (e.g. up to 20%) of the equipment purchase price be paid only upon customer acceptance. In those situations, the majority portion (e.g. 80%) of revenue where the contingent payment is tied to shipment and the entire product cost of sale are recognized upon shipment and passage of title and the minority portion of the purchase price related to customer acceptance is deferred and recognized upon receipt of customer acceptance. In cases where a prior history of customer acceptance cannot be demonstrated or from sales where customer payment dates are not determinable and in the case of new products, revenue is deferred until customer acceptance has been received. Our post-shipment obligations typically include installation and standard warranties. The estimated fair value of installation related revenue is recognized in the period the installation is performed. Service revenue is recognized ratably over the period of the related contract or upon completion of the services if they are short-term in nature. Spares, kit and contactor revenue is generally recognized upon shipment.

**Cohu, Inc.**

**Notes to Unaudited Condensed Consolidated Financial Statements**

March 25, 2017

Certain of our equipment sales are accounted for as multiple-element arrangements. A multiple-element arrangement is a transaction which may involve the delivery or performance of multiple products, services, or rights to use assets, and performance may occur at different points in time or over different periods of time. For arrangements containing multiple elements, the revenue relating to the undelivered elements is deferred using the relative selling price method utilizing estimated sales prices until delivery of the deferred elements. We limit the amount of revenue recognition for delivered elements to the amount that is not contingent on the future delivery of products or services, future performance obligations or subject to customer-specified return or adjustment.

On shipments where sales are not recognized, gross profit is generally recorded as deferred profit in our consolidated balance sheet representing the difference between the receivable recorded and the inventory shipped. At March 25, 2017, we had deferred revenue totaling approximately $5.7 million and deferred profit of $4.8 million. At December 31, 2016, we had deferred revenue totaling approximately $9.3 million and deferred profit of $6.9 million. The periodic decrease is a result of the recognition of previously deferred revenue.

A small number of customers historically have been responsible for a significant portion of our net sales. Significant customer concentration information is as follows:

| | Three Months Ended | |
|---|---|---|
| | March 25, 2017 | March 26, 2016 |
| Customers individually accounting for more than 10% of net sales | one | two |
| Percentage of net sales | 20% | 32% |

**Comprehensive Loss**

Our accumulated other comprehensive loss balance totaled approximately $23.9 million and $27.9 million at March 25, 2017 and December 31, 2016, respectively, and was attributed to all non-owner changes in stockholders' equity and consists of, on an after-tax basis where applicable, foreign currency adjustments resulting from the translation of certain of our subsidiary accounts where the functional currency is not the U.S. Dollar and adjustments related to postretirement benefits. Reclassification adjustments from accumulated other comprehensive income during the first three months of fiscal 2017 and 2016 were not significant.

**Retiree Medical Benefits**

We provide post-retirement health benefits to certain executives and directors under a noncontributory plan. The net periodic benefit cost incurred during the first three months of fiscal 2017 and 2016 was not significant.

**Recent Accounting Pronouncements**

*Recently Adopted Accounting Pronouncements* – In July 2015, the Financial Accounting Standards Board ("FASB") issued ASU No. 2015-11, *Simplifying the Measurement of Inventory*. Under this guidance, inventory should be measured at the lower of cost and net realizable value. Subsequent measurement is unchanged for inventory measured using LIFO or the retail inventory method. The adoption of this authoritative guidance did not impact our Consolidated Financial Statements.

*Recently Issued Accounting Pronouncements* – In January 2017, the FASB issued ASU No. 2017-04, *Simplifying the Test for Goodwill Impairment*. It eliminates Step 2 from the goodwill impairment test and an entity should recognize an impairment charge for the amount by which the carrying amount of goodwill exceeds the reporting unit's fair value, not to exceed the carrying amount of goodwill. This guidance is effective for annual and any interim impairment tests in fiscal years beginning after December 15, 2019. We do not expect this guidance to have any impact on our Consolidated Financial Statements.

In January 2017, the FASB issued ASU No. 2017-01, *Clarifying the Definition of a Business.* It revises the definition of a business and provides a framework to evaluate when an input and a substantive process are present in an acquisition to be considered a business. This guidance is effective for annual periods beginning after December 15, 2017. We do not expect this guidance to have any impact on our Consolidated Financial Statements.

In November 2016, the FASB issued ASU No. 2016-18, *Restricted Cash.* It requires that amounts generally described as restricted cash and restricted cash equivalents should be included with cash and cash equivalents when reconciling the beginning-of-period and end-of-period total amounts shown on the statement of cash flows. This guidance is effective for interim and annual reporting periods beginning after December 15, 2017. We do not expect this guidance to have a material impact on our Consolidated Financial Statements.

**Cohu, Inc.**

**Notes to Unaudited Condensed Consolidated Financial Statements**

March 25, 2017

In August 2016, the FASB issued ASU No. 2016-15, *Classification of Certain Cash Receipts and Cash Payments.* It provides guidance on eight specific cash flow issues with the objective of reducing the existing diversity in practice in how they are classified in the statement of cash flows. This guidance is effective for interim and annual reporting periods beginning after December 15, 2017. Early adoption is permitted, provided that all of the amendments are adopted in the same period. We do not expect this guidance to have a material impact on our Consolidated Financial Statements.

In February 2016, the FASB issued ASU No. 2016-02, *Leases (Topic 842).* Under this guidance, lessees will be required to recognize a right-of-use asset and a lease liability for all operating leases defined under previous GAAP. This guidance is effective for interim and annual reporting periods beginning after December 15, 2018. The new guidance must be adopted using a modified retrospective transition, and provides for certain practical expedients. We are currently evaluating the impact of this new standard on our financial reporting, but recognizing the lease liabilities and related right-of-use assets will impact our balance sheet.

In May 2014, the FASB issued Accounting Standards Update No. 2014-09, *Revenue from Contracts with Customers (Topic 606)* (ASU 2014-09), which amends the existing accounting standards for revenue recognition. In August 2015, the FASB issued ASU No. 2015-14, *Revenue from Contracts with Customers (Topic 606): Deferral of the Effective Date*, which delays the effective date of ASU 2014-09 by one year. The FASB also agreed to allow entities to choose to adopt the standard as of the original effective date. In March 2016, the FASB issued Accounting Standards Update No. 2016-08, *Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations (Reporting Revenue Gross versus Net)* (ASU 2016-08) which clarifies the implementation guidance on principal versus agent considerations. The guidance includes indicators to assist an entity in determining whether it controls a specified good or service before it is transferred to the customers. The new revenue recognition standard will be effective for us in the first quarter of 2018, with the option to adopt it in the first quarter of 2017. We will adopt the new standard effective December 31, 2017, which is the first day of our 2018 fiscal year. The new standard also permits two methods of adoption: retrospectively to each prior reporting period presented (full retrospective method), or retrospectively with the cumulative effect of initially applying the guidance recognized at the date of initial application (the modified retrospective method). We currently anticipate adopting the standard using the modified retrospective method. We are still in the process of completing our analysis on the impact this guidance will have on our Consolidated Financial Statements and related disclosures. Based on our preliminary review of our customer agreements, we currently expect that our revenue will continue to be recognized at a point in time, generally upon shipment of products to customers, consistent with our current revenue recognition model.  In certain instances, when customer payment terms provide that a minority portion (e.g. up to 20%) of the equipment purchase price be paid only upon customer acceptance, recognition of revenue may occur sooner under the new model.

**Cohu, Inc.**

**Notes to Unaudited Condensed Consolidated Financial Statements**

March 25, 2017

**2. Business Acquisitions, Goodwill and Other Purchased Intangible Assets**

*Kita*

On January 4, 2017, we completed the acquisition of all of the outstanding share capital of Kita Manufacturing Co., LTD. and Kita USA, Inc. (together "Kita") (the "Acquisition"), Kita, headquartered in Osaka, Japan, and with operations in Attleboro, Massachusetts and Kyoto, Japan, designs, manufactures and sells spring probe contacts used in final test contactors, probe cards, PCB test boards and connectors sold to customers worldwide. The acquisition of Kita was a strategic transaction to expand our total available market, extend our market leadership and broaden our product offerings. In connection with the Acquisition, during the three months ended March 25, 2017 and March 26, 2016 we incurred acquisition related costs, which were expensed as selling, general and administrative costs totaling $0.2 million and $0.1 million, respectively.

The Acquisition has been accounted for in conformity with FASB Accounting Standards Codification 805, Business Combinations ("ASC 805"). The total purchase price consisted of the following (*in thousands*):

| | |
|---|---|
| Cash paid to Kita shareholders | $15,000 |
| Fair value of contingent consideration | 2,251 |
| Total purchase price | $17,251 |

The contingent consideration represents the estimated fair value of future payments totaling up to $3.0 million we would be required to make as a result of Kita achieving annual revenue and EBITDA targets in 2017 and 2018 as specified in the purchase agreement. The contingent consideration payable has been classified as level 3 in the fair value hierarchy. See Note 3, "Financial Instruments Measured at Fair Value" for additional information on the three-tier fair value hierarchy. We have not finalized the purchase price allocation. Accordingly, the preliminary purchase price allocation shown below could materially change as the fair values of the tangible and intangible assets acquired and liabilities assumed and the related income tax effects are finalized during the remainder of the measurement period (which will not exceed 12 months from the acquisition closing date). The acquisition was nontaxable and certain of the assets acquired, including goodwill and intangibles, will not be deductible for tax purposes. The preliminary allocation of the purchase price to the assets acquired and liabilities assumed based on their estimated fair values was as follows (*in thousands*):

| | |
|---|---|
| Current assets, including cash received | $10,148 |
| Fixed assets | 12,751 |
| Other assets | 2,290 |
| Intangible assets subject to amortization | 4,650 |
| Goodwill | 3,083 |
| Total assets acquired | 32,922 |
| Liabilities assumed | (15,671) |
| Net assets acquired | $17,251 |

Kita's results of operations were included in, but not material to, Cohu's consolidated statements of operations and comprehensive income commencing January 4, 2017 and sales during the three-month period ended March 25, 2017 were $4.1 million. Prior to the acquisition by Cohu, Kita only prepared consolidated financial information on a bi-annual basis and due to the availability of comparable information, it is impracticable to present the amounts of revenues and earnings of Kita for the three-month period ended March 26, 2016.

*Goodwill and Intangible Assets*

Changes in the carrying value of goodwill during the year ended December 31, 2016 and the three-month period ended March 25, 2017 were as follows (*in thousands*):

| | Goodwill |
|---|---|
| Balance, December 26, 2015 | $60,264 |
| Impact of currency exchange | (1,415) |
| Balance, December 31, 2016 | 58,849 |
| Additions | 3,083 |
| Impact of currency exchange | 1,116 |
| Balance, March 25, 2017 | $63,048 |

Purchased intangible assets, subject to amortization are as follows (*in thousands*):

| | March 25, 2017 | | | December 31, 2016 | |
|---|---|---|---|---|---|
| | Gross Carrying Amount | Accumulated Amortization | Remaining Useful Life (years) | Gross Carrying Amount | Accumulated Amortization |
| Ismeca technology | $26,895 | $ 14,428 | 3.8 | $26,191 | $ 13,241 |
| Trade names | 5,498 | 573 | 13.5 | 5,353 | 468 |
| | $32,393 | $ 15,001 | | $31,544 | $ 13,709 |

Amounts presented above exclude purchased intangible assets totaling $4.7 million, net of amortization of $0.2 million, generated as a result of the Acquisition as these amounts are preliminary and subject to change. Amortization expense related to intangible assets in the first quarter of fiscal 2017 and 2016 was $1.1 million and $1.8 million, respectively. The year-over-year decrease in amortization is a result of certain intangible assets that became fully amortized in the prior year. Changes in the carrying values of these intangible assets are a result of the impact of fluctuations in currency exchange rates.

**Cohu, Inc.**

**Notes to Unaudited Condensed Consolidated Financial Statements**

March 25, 2017

**3. Financial Instruments Measured at Fair Value**

Our cash, cash equivalents, and short-term investments consisted primarily of cash and other investment grade securities. We do not hold investment securities for trading purposes. All short-term investments are classified as available-for-sale and recorded at fair value. Investment securities are exposed to market risk due to changes in interest rates and credit risk and we monitor credit risk and attempt to mitigate exposure by making high-quality investments and through investment diversification.

Gains and losses on investments are calculated using the specific-identification method and are recognized during the period in which the investment is sold or when an investment experiences an other-than-temporary decline in value. Factors that could indicate an impairment exists include, but are not limited to: earnings performance, changes in credit rating or adverse changes in the regulatory or economic environment of the asset. Gross realized gains and losses on sales of short-term investments are included in interest income. Realized gains and losses for the periods presented were not significant.

Investments that we have classified as short-term, by security type, are as follows *(in thousands)*:

| | March 25, 2017 | | | |
|---|---|---|---|---|
| | Amortized Cost | Gross Unrealized Gains | Gross Unrealized Losses [1] | Estimated Fair Value |
| Corporate debt securities [2] | $12,306 | $ 1 | $ 2 | $ 12,305 |
| Government-sponsored enterprise securities | 8,701 | - | 3 | 8,698 |
| Bank certificates of deposit | 750 | 1 | - | 751 |
| Foreign government security | 615 | - | - | 615 |
| | $22,372 | $ 2 | $ 5 | $ 22,369 |

| | December 31, 2016 | | | |
|---|---|---|---|---|
| | Amortized Cost | Gross Unrealized Gains | Gross Unrealized Losses [1] | Estimated Fair Value |
| Corporate debt securities [2] | $22,513 | $ 1 | $ 6 | $ 22,508 |

| | | | | |
|---|---|---|---|---|
| Government-sponsored enterprise securities | 8,109 | - | 1 | 8,108 |
| Bank certificates of deposit | 750 | 1 | - | 751 |
| Foreign government security | 623 | - | - | 623 |
| | $31,995 | $ 2 | $ 7 | $ 31,990 |

(1) As of March 25, 2017 there were $18.5 million of investments in our portfolio in a loss position. As of December 31, 2016 the cost and fair value of investments with loss positions were approximately $26.6 million. We evaluated the nature of these investments, credit worthiness of the issuer and the duration of these impairments to determine if an other-than-temporary decline in fair value had occurred and concluded that these losses were temporary and we have the ability and intent to hold these investments to maturity.

(2) Corporate debt securities include investments in financial and other corporate institutions. No single issuer represents a significant portion of the total corporate debt securities portfolio.

**Cohu, Inc.**

**Notes to Unaudited Condensed Consolidated Financial Statements**

March 25, 2017

Effective maturities of short-term investments are as follows *(in thousands)*:

| | March 25, 2017 | | December 31, 2016 | |
|---|---|---|---|---|
| | Amortized Cost | Estimated Fair Value | Amortized Cost | Estimated Fair Value |
| Due in one year or less | $21,757 | $ 21,754 | $31,372 | $ 31,367 |
| Due after one year through three years | 615 | 615 | 623 | 623 |
| | $22,372 | $ 22,369 | $31,995 | $ 31,990 |

Accounting standards pertaining to fair value measurements establish a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value. These tiers include: Level 1, defined as observable inputs such as quoted prices in active markets; Level 2, defined as inputs other than quoted prices in active markets that are either directly or indirectly observable; and Level 3, defined as unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions. When available, we use quoted market prices to determine the fair value of our investments, and they are included in Level 1. When quoted market prices are unobservable, we use quotes from independent pricing vendors based on recent trading activity and other relevant information, and they are included in Level 2.

The following table summarizes, by major security type, our financial instruments that are measured at fair value on a recurring basis and are categorized using the fair value hierarchy *(in thousands)*:

| | Fair value measurements at March 25, 2017 using: | | | |
|---|---|---|---|---|
| | Level 1 | Level 2 | Level 3 | Total estimated fair value |
| Cash | $57,777 | $- | $ - | $57,777 |

| | | | | |
|---|---|---|---|---|
| Corporate debt securities | - | 20,500 | - | 20,500 |
| Government-sponsored enterprise securities | - | 8,698 | - | 8,698 |
| Money market funds | - | 17,864 | - | 17,864 |
| Bank certificates of deposit | - | 751 | - | 751 |
| Foreign government security | - | 615 | - | 615 |
| | $57,777 | $48,428 | $ - | $106,205 |

| | Fair value measurements at December 31, 2016 using: | | | |
|---|---|---|---|---|
| | Level 1 | Level 2 | Level 3 | Total estimated fair value |
| Cash | $70,279 | $- | $ - | $70,279 |
| Foreign government security | - | 623 | - | 623 |
| Corporate debt securities | - | 24,108 | - | 24,108 |
| Government-sponsored enterprise securities | - | 8,108 | - | 8,108 |
| Money market funds | - | 24,166 | - | 24,166 |
| Bank certificates of deposit | - | 751 | - | 751 |
| | $70,279 | $57,756 | $ - | $128,035 |

**Notes to Unaudited Condensed Consolidated Financial Statements**

March 25, 2017

## 4. Employee Stock Benefit Plans

Our 2005 Equity Incentive Plan (the “2005 Plan”) is a broad-based, long-term retention program intended to attract, motivate, and retain talented employees as well as align stockholder and employee interests. Awards that may be granted under the program include, but are not limited to, non-qualified and incentive stock options, restricted stock units, and performance stock units. We settle employee stock option exercises, employee stock purchase plan purchases, and the vesting of restricted stock units, and performance stock units with newly issued common shares. At March 25, 2017, there were 1,421,287 shares available for future equity grants under the 2005 Equity Incentive Plan.

### Stock Options

Stock options may be granted to employees, consultants and directors to purchase a fixed number of shares of our common stock. The exercise prices of options granted are at least equal to the fair market value of our common stock on the dates of grant and options vest and become exercisable in annual increments that range from one to four years from the date of grant. Stock options granted under the 2015 Plan have a maximum contractual term of ten years. In the first three months of fiscal 2017 we did not grant any stock options and we issued 143,668 shares of our common stock on the exercise of options that were granted previously.

At March 25, 2017, we had 1,497,499 stock options outstanding. These options had a weighted-average exercise price of $10.55 per share, an aggregate intrinsic value of approximately $10.1 million and the weighted average remaining contractual term was approximately 3.8 years.

At March 25, 2017, we had 1,404,967 stock options outstanding that were exercisable. These options had a weighted-average exercise price of $10.60 per share, an aggregate intrinsic value of $9.4 million and the weighted average remaining contractual term was approximately 3.7 years.

### Restricted Stock Units

We grant restricted stock units ("RSUs") to certain employees, consultants and directors. RSUs vest in annual increments that range from one to four years from the date of grant. Prior to vesting, RSUs do not have dividend equivalent rights, do not have voting rights and the shares underlying the restricted stock units are not considered issued and outstanding. New shares of our common stock will be issued on the date the RSUs vest net of the minimum statutory tax withholding requirements to be paid by us on behalf of our employees. As a result, the actual number of shares issued will be fewer than the actual number of RSUs outstanding at March 25, 2017.

In the first three months of fiscal 2017 we awarded 299,170 RSUs and we issued 274,562 shares of our common stock on vesting of previously granted awards. At March 25, 2017, we had 1,105,067 restricted stock units outstanding with an aggregate intrinsic value of approximately $19.1 million and the weighted average remaining vesting period was approximately 2.6 years.

**Performance Stock Units**

We also grant performance stock units ("PSUs") to senior executives as a part of our long-term equity compensation program. The number of shares of common stock that will ultimately be issued to settle PSUs granted in 2017 and 2016 ranges from 25% to 200% and is determined based on certain performance criteria over a three-year measurement period. For PSUs granted in 2015, the number of shares of common stock issued to settle PSUs granted is determined based on a two-year measurement period. The performance criteria for the PSUs are based on a combination of the Company's annualized Total Shareholder Return ("TSR") for the performance period and the relative performance of the Company's TSR compared with the annualized TSR of certain peer companies for the performance period. PSUs granted in 2017 and 2016 vest 100% on the third anniversary of their grant and PSUs granted in 2015 vest 50% on the second and third anniversary of their grant, respectively.

We estimated the fair value of the PSUs using a Monte Carlo simulation model on the date of grant. Compensation expense is recognized ratably over the derived service period. New shares of our common stock will be issued on the date the PSUs vest net of the minimum statutory tax withholding requirements to be paid by us on behalf of our employees. As a result, the actual number of shares issued will be fewer than the actual number outstanding at March 25, 2017.

**Cohu, Inc.**

**Notes to Unaudited Condensed Consolidated Financial Statements**

March 25, 2017

In the first three months of fiscal 2017, we awarded 176,031 PSUs and we issued 184,680 shares of our common stock on vesting of previously granted awards. At March 25, 2017, we had 352,059 PSUs outstanding with an aggregate intrinsic value of approximately $6.1 million and the weighted average remaining vesting period was approximately 2.1 years.

**Employee Stock Purchase Plan (ESPP)**

The Cohu, Inc. 1997 Employee Stock Purchase Plan (“the Plan”) provides for the issuance of shares of our common stock. Under the Plan, eligible employees may purchase shares of Cohu common stock through payroll deductions at a price equal to 85 percent of the lower of the fair market value of Cohu common stock at the beginning or end of each 6-month purchase period, subject to certain limits. During the first three months of fiscal 2017, no shares of our common stock were sold to our employees under the Plan leaving 700,484 shares available for future issuance.

**5. Income Taxes**

For the three months ended March 25, 2017, we used the estimated effective tax rate (“ETR”) expected to be applicable for the full fiscal year in computing our tax provision. The ETR on income (loss) from continuing operations for the three months ended March 25, 2017 and March 26, 2016 was 16.7% and (15.1)%, respectively. The tax provision in 2017 and 2016 differs from the U.S. federal statutory rate primarily due to the lack of a benefit on our domestic losses as a result of our valuation allowance on deferred tax assets, foreign income taxed at lower rates, changes in our deferred tax asset valuation allowance, state taxes and interest related to unrecognized tax benefits.

Other than for foreign currency exchange rate changes and the Kita Acquisition, there was no material change to our unrecognized tax benefits and related accrued interest and penalties during the three-month periods ended March 25, 2017 and March 26, 2016.

**6. Discontinued Operations**

In June 2015, we sold all of the outstanding stock of BMS for $4.9 million in cash and up to $2.5 million of contingent cash consideration. Our decision to sell this non-core business resulted from management's determination that it was no longer a strategic fit within our organization. As part of the divestiture of BMS at June 27, 2015, we recorded a long-term contingent consideration receivable that has been classified as Level 3 in the fair value hierarchy. See Note 3, "Financial Instruments Measured at Fair Value" for additional information on the three-tier fair value hierarchy. The contingent consideration represents the estimated fair value of future payments we are due from the buyer should BMS achieve specified annual revenue targets in certain years as specified in the sale agreement. The periodic fair value of the contingent consideration is determined through the use of the Monte Carlo simulation model. There was no adjustment to the contingent consideration receivable recorded in the first quarter of 2017 and the value was $0.3 million at March 25, 2017.

**7. Contingencies**

From time-to-time we are involved in various legal proceedings, examinations by various tax authorities and claims that have arisen in the ordinary course of our business. The outcome of any litigation is inherently uncertain. While there can be no assurance, we do not believe at the present time that the resolution of these matters will have a material adverse effect on our assets, financial position or results of operations.

**Cohu, Inc.**

**Notes to Unaudited Condensed Consolidated Financial Statements**

March 25, 2017

**8. Guarantees and Other Obligations**

**Product Warranty**

Our products are generally sold with warranty periods that range from 12 to 36 months following sale or acceptance. Parts and labor are covered under the terms of the warranty agreement. The warranty provision is based on historical and projected experience by product and configuration.

Changes in accrued warranty were as follows (*in thousands*):

| | Three Months Ended | |
|---|---|---|
| | March 25, 2017 | March 26, 2016 |
| Balance at beginning of period | $4,350 | $4,886 |
| Warranty expense accruals | 1,736 | 1,820 |
| Warranty payments | (1,191) | (1,488) |
| Warranty liability assumed | 50 | - |
| Balance at end of period | $4,945 | $5,218 |

Accrued warranty amounts expected to be incurred after one year are included in noncurrent other accrued liabilities in the condensed consolidated balance sheet. These amounts total $0.7 million at March 25, 2017 and $0.6 million at December 31, 2016.

**Borrowings**

*Revolving Lines of Credit*

As a result of the Acquisition, we assumed a series of revolving credit facilities with various financial institutions in Japan. The credit facilities renew monthly and provide Kita with access to working capital totaling up to $6.3 million. At March 25, 2017 total borrowings outstanding under the revolving lines of credit was $3.2 million. As these credit facility agreements renew monthly, they have been included in short-term borrowings in our condensed consolidated balance sheet. The revolving lines of credit are denominated in Japanese Yen and, as a result, amounts disclosed herein will fluctuate as a result of changes in currency exchange rates.

*Term Loans*

As a result of the Acquisition, as of March 25, 2017 we assumed long-term term loans from a series of Japanese financial institutions totaling $7.1 million primarily related to the expansion of Kita's facility in Osaka, Japan. The loan amounts outstanding are collateralized by the facility and land. The loans carry interest rates ranging from 0.05% to 1.43% and expire at various dates through 2034. At March 25, 2017, $1.2 million of the term loans have been included in current installments of long-term debt in our condensed consolidated balance sheet. The term loans are denominated in Japanese Yen and, as a result, amounts disclosed herein will fluctuate as a result of changes in currency exchange rates.

*Lines of Credit*

We have two available lines of credit which provide one of our wholly owned subsidiaries with borrowings of up to a total of 2.5 million Swiss Francs. At March 25, 2017 and December 31, 2016, no amounts were outstanding under the lines of credit.

*Standby Letters of Credit*

During the ordinary course of business, from time-to-time we provide standby letters of credit instruments to certain parties as required. As of March 25, 2017, no amounts were outstanding under standby lines of credit.

**Cohu, Inc.**

**Managements's Discussion and Analysis of Financial Condition and Results of Operations**

March 25, 2017

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

*This Form 10-Q contains certain forward-looking statements including expectations of market conditions, challenges and plans, within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended, and is subject to the Safe Harbor provisions created by that statute. Such forward-looking statements are based on management’s current expectations and beliefs, including estimates and projections about our business and include, but are not limited to, statements concerning financial position, business strategy, and plans or objectives for future operations. Forward-looking statements are not guarantees of future performance, and are subject to certain risks, uncertainties, and assumptions that are difficult to predict and may cause actual results to differ materially from management’s current expectations. Such risks and uncertainties include those set forth in this Quarterly Report on Form 10-Q and our 2016 Annual Report on Form 10-K under the heading “Item 1A. Risk Factors”. The forward-looking statements in this report speak only as of the time they are made, and do not necessarily reflect management’s outlook at any other point in time. We undertake no obligation to publicly update any forward-looking statements, whether as a result of new information, future events, or for any other reason, however, readers should carefully review the risk factors set forth in other reports or documents we file from time to time with the SEC after the date of this Quarterly Report.*

**OVERVIEW**

Cohu is a leading supplier of semiconductor test and inspection handlers, micro-electro mechanical system (MEMS) test modules, test contactors and thermal subsystems used by global semiconductor manufacturers and test subcontractors. Our business is significantly dependent on capital expenditures by semiconductor manufacturers and test subcontractors, which in turn is dependent on the current and anticipated market demand for semiconductors that is subject to seasonal trends. We expect that the semiconductor equipment industry will continue to be seasonal and volatile in part because consumer electronics, the principal end market for integrated circuits, is a highly dynamic industry and demand has traditionally fluctuated.

During the quarter ended March 25, 2017, we saw a continued increase in the demand for our products, with our net sales increasing 15% compared to the quarter ended December 31, 2016 and 23% from the quarter ended March 26, 2016. This demand is driven, primarily, by semiconductor equipment products used for the testing devices used in automotive, mobility and IoT (Internet of Things) markets. Customer test cell utilization remains strong and we believe demand for our products will continue to be strong over the next quarter. Long-term, we continue to see momentum in the automotive and mobile markets and are optimistic about the long-term prospects for the

semiconductor equipment industry due to the increasing technological functionality of mobile devices, growing integrated circuit and LED content in automobiles and consumer products, and expanding applications in industrial. We are focused on growing our market share in the mobility, automotive and solid state markets and expanding into the test contacting and wafer level package test markets.

**Application of Critical Accounting Estimates and Policies**

Our discussion and analysis of our financial condition and results of operations is based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses and related disclosure of contingent assets and liabilities. We base our estimates on historical experience, forecasts and on various other assumptions that are believed to be reasonable under the circumstances, however actual results may differ from those estimates under different assumptions or conditions. The methods, estimates and judgments we use in applying our accounting policies have a significant impact on the results we report in our financial statements. Some of our accounting policies require us to make difficult and subjective judgments, often as a result of the need to make estimates of matters that are inherently uncertain.

Our critical accounting estimates that we believe are the most important to an investor's understanding of our financial results and condition and require complex management judgment include:

- revenue recognition, including the deferral of revenue on sales to customers, which impacts our results of operations;
- estimation of valuation allowances and accrued liabilities, specifically product warranty, inventory reserves and allowance for bad debts, which impact gross margin or operating expenses;
- the recognition and measurement of current and deferred income tax assets and liabilities, unrecognized tax benefits and the valuation allowance on deferred tax assets, which impact our tax provision;
- the assessment of recoverability of long-lived assets including goodwill and other intangible assets, which primarily impacts gross margin or operating expenses if we are required to record impairments of assets or accelerate their depreciation or amortization; and
- the valuation and recognition of share-based compensation, which impacts gross margin, research and development expense, and selling, general and administrative expense.

**Cohu, Inc.**

**Management's Discussion and Analysis of Financial Condition and Results of Operations**

March 25, 2017

Below, we discuss these policies further, as well as the estimates and judgments involved. We also have other policies that we consider key accounting policies; however, these policies typically do not require us to make estimates or judgments that are difficult or subjective.

***Revenue Recognition:*** We generally recognize revenue upon shipment and title passage for established products (i.e., those that have previously satisfied customer acceptance requirements) that provide for full payment tied to shipment. Revenue for products that have not previously satisfied customer acceptance requirements or from sales where customer payment dates are not determinable is recognized upon customer acceptance. In certain instances, customer payment terms may provide that a minority portion (e.g. up to 20%) of the equipment purchase price be paid only upon customer acceptance. In those situations, the majority portion (e.g. 80%) of revenue where the contingent payment is tied to shipment and the entire product cost of sale are recognized upon shipment and passage of title and the minority portion of the purchase price related to customer acceptance is deferred and recognized upon receipt of customer acceptance. For arrangements containing multiple elements the revenue relating to the undelivered elements is deferred using the relative selling price method utilizing estimated sales prices until delivery of the deferred elements. We limit the amount of revenue recognition for delivered elements to the amount that is not contingent on the future delivery of products or services, future performance obligations or subject to customer-specified return or adjustment. On shipments where sales are not recognized, gross profit is generally recorded as deferred profit in our consolidated balance sheet, representing the difference between the receivable recorded and the inventory shipped.

***Accounts Receivable:*** We maintain an allowance for doubtful accounts for estimated losses resulting from the inability of our customers to make required payments. If the financial condition of our customers deteriorates, resulting in an impairment of their ability to make payments, additional allowances may be required.

***Inventory:*** The valuation of inventory requires us to estimate obsolete or excess inventory as well as inventory that is not of saleable quality. The determination of obsolete or excess inventory requires us to estimate the future demand for our products. The demand forecast is a direct input in the development of our short-term manufacturing plans. We record valuation reserves on our inventory for estimated excess and obsolete inventory and lower of cost or market concerns equal to the difference between the cost of inventory and the estimated market value based upon assumptions about future product demand, market conditions and product selling prices. If future product demand, market conditions or product selling prices are less than those projected by management or if continued modifications to products are required to meet specifications or other customer requirements, increases to inventory reserves may be required which would have a negative impact on our gross margin.

***Income Taxes:*** We estimate our liability for income taxes based on the various jurisdictions where we conduct business. This requires us to estimate our (i) current taxes; (ii) temporary differences that result from differing treatment of certain items for tax and accounting purposes and (iii) unrecognized tax benefits. Temporary differences result in deferred tax assets and liabilities that are reflected in the consolidated balance sheet. The deferred tax assets are analyzed and reduced by a valuation allowance by jurisdiction, if, based upon all available evidence, it is more likely than not that some or all of the deferred tax assets will not be realized. Establishing, reducing or increasing a valuation allowance in an accounting period generally results in an increase or decrease in tax expense in the statement of operations. We must make significant judgments to determine the provision for income taxes, deferred tax assets and liabilities, unrecognized tax benefits and any valuation allowance to be recorded against deferred tax assets. Our gross deferred tax asset balance as of March 25, 2017 was approximately $49.4 million, with a valuation allowance of approximately $46.1 million. Our deferred tax assets consist primarily of reserves and accruals that are not yet deductible for tax and tax credit and net operating loss carryforwards.

***Segment Information:*** We applied the provisions of ASC Topic 280, *Segment Reporting*, ("ASC 280"), which sets forth a management approach to segment reporting and establishes requirements to report selected segment information quarterly and to report annually entity-wide disclosures about products, major customers and the geographies in which the entity holds material assets and reports revenue. An operating segment is defined as a component that engages in business activities whose operating results are reviewed by the chief operating decision maker and for which discrete financial information is available. Based on the provisions of ASC 280, we have determined that our identified operating segments qualify for aggregation under ASC 280 due to similarities in their customers, their economic characteristics, and the nature of products and services provided. As a result, we report in one segment, semiconductor equipment.

**Cohu, Inc.**

**Management's Discussion and Analysis of Financial Condition and Results of Operations**

March 25, 2017

***Goodwill, Other Intangible Assets and Long-lived Assets:*** We evaluate goodwill for impairment annually and when an event occurs or circumstances change that indicate that the carrying value may not be recoverable. We test goodwill for impairment by first comparing the book value of net assets to the fair value of the reporting units. If the fair value is determined to be less than the book value, a second step is performed to compute the amount of impairment as the difference between the estimated fair value of goodwill and the carrying value. We estimated the fair values of our reporting units primarily using the income approach valuation methodology that includes the discounted cash flow method, taking into consideration the market approach and certain market multiples as a validation of the values derived using the discounted cash flow methodology. Forecasts of future cash flows are based on our best estimate of future net sales and operating expenses, based primarily on customer forecasts, industry trade organization data and general economic conditions.

We conduct our annual impairment test as of October 1st of each year, and have determined there was no impairment as of October 1, 2016 as we determined that the estimated fair values of our reporting units exceeded their carrying values on that date. Other events and changes in circumstances may also require goodwill to be tested for impairment between annual measurement dates. As of March 25, 2017 we do not believe there have been any events or circumstances that would require us to perform an interim goodwill impairment review. In the event we determine that an interim goodwill impairment review is required, in a future period, the review may result in an impairment charge, which would have a negative impact on our results of operations.

Long-lived assets, other than goodwill, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the assets might not be recoverable. Conditions that would necessitate an impairment assessment include a significant decline in the observable market value of an asset, a significant change in the extent or manner in which an asset is used, or any other significant adverse change that would indicate that the carrying amount of an asset or group of assets may not be recoverable. For long-lived assets, impairment losses are only recorded if the asset’s carrying amount is not recoverable through its undiscounted, probability-weighted future cash flows. We measure the impairment loss based on the difference between the carrying amount and estimated fair value.

***Warranty:*** We provide for the estimated costs of product warranties in the period sales are recognized. Our warranty obligation estimates are affected by historical product shipment levels, product performance and material and labor costs incurred in correcting product performance problems. Should product performance, material usage or labor repair costs differ from our estimates, revisions to the estimated warranty liability would be required.

***Contingencies:*** We are subject to certain contingencies that arise in the ordinary course of our businesses which require us to assess the likelihood that future events will confirm the existence of a loss or an impairment of an asset. If a loss or asset impairment is probable and the amount of the loss or impairment is reasonably estimable, we accrue a charge to operations in the period such conditions become known.

***Share-based Compensation:*** Share-based compensation expense related to stock options is recorded based on the fair value of the award on its grant date, which we estimate using the Black-Scholes valuation model. Share-based compensation expense related to restricted stock unit awards is calculated based on the market price of our common stock on the grant date, reduced by the present value of dividends expected to be paid on our common stock prior to vesting of the restricted stock unit. Share-based compensation on performance stock units with market-based goals is calculated using a Monte Carlo simulation model on the date of the grant.

**Recent Accounting Pronouncements**

For a description of accounting changes and recent accounting pronouncements, including the expected dates of adoption and estimated effects, if any, on our consolidated financial statements, see Note 1, "Recent Accounting Pronouncements" in Part I, Item 1 of this Form 10-Q.

**RESULTS OF OPERATIONS**

On January 4, 2017, we completed the acquisition of Kita and the results of its operations have been included in our consolidated financial statements since that date. The following table summarizes certain operating data as a percentage of net sales:

| | **Three Months Ended** | |
|---|---|---|
| | **March 25, 2017** | **March 26, 2016** |
| Net sales | 100.0 % | 100.0 % |
| Cost of sales | (60.2 %) | (70.7 %) |
| Gross margin | 39.8 % | 29.3 % |
| Research and development | (12.1 %) | (11.7 %) |
| Selling, general and administrative | (17.8 %) | (19.9 %) |
| Income (loss) from operations | 9.9 % | (2.3 %) |

20

**Cohu, Inc.**

**Management's Discussion and Analysis of Financial Condition and Results of Operations**

March 25, 2017

**First Quarter of Fiscal 2017 Compared to First Quarter of Fiscal 2016**

***Net Sales***

Our consolidated net sales increased 23.3% to $81.1 million in 2017, compared to net sales of $65.8 million in 2016. Global demand for back-end semiconductor test and assembly equipment is seasonal in part because consumer electronics, the principal end market for integrated circuits, is a highly dynamic industry and demand has traditionally fluctuated. Consolidated net sales in the first quarter of 2017 are up from 2016 as a result of the improving business conditions within the semiconductor industry and our success in growing share in the test handler and test contactor markets. Our increased sales were driven by demand for equipment for testing semiconductor devices used in automotive, mobility and IoT (Internet of Things) markets. Consolidated net sales in the first quarter of 2017 also include the net sales of Kita, totaling $4.1 million which was acquired on January 4, 2017.

***Gross Margin***

Gross margin consists of net sales less cost of sales. Cost of sales consists primarily of the cost of materials, assembly and test labor, and overhead from operations. Our gross margin can fluctuate due to a number of factors, including, but not limited to, the mix of products sold, product support costs, inventory reserve adjustments, and utilization of manufacturing capacity. Our gross margin, as a percentage of net sales, was 39.8% in 2017 and 29.3% in 2016. As compared to the prior year, gross margin in the first quarter of 2017 has benefitted from lower manufacturing costs as a result of our transition of volume handler manufacturing from the U.S. and Europe to Asia, as well as a significant increase in business volume which enabled us to better leverage our fixed costs and lower charges for excess and obsolete inventory. The first quarter of 2017 benefitted $0.6 million in lower intangible asset amortization due to certain assets being fully amortized in 2016 off-set, in part, by the amortization of $0.3 million of purchase accounting inventory step-up adjustment recorded as a result of our acquisition of Kita.

As highlighted above, our gross margin can be impacted by charges to cost of sales related to excess, obsolete and lower of cost or market inventory issues. We compute the majority of our excess and obsolete inventory reserve

requirements using a one-year inventory usage forecast. During the first quarter of fiscal 2017 and 2016, we recorded charges to cost of sales of approximately $0.1 million and $0.8 million for excess and obsolete inventory, respectively. While we believe our reserves for excess and obsolete inventory and lower of cost or market concerns are adequate to cover known exposures at March 25, 2017, reductions in customer forecasts or continued modifications to products, as a result of our failure to meet specifications or other customer requirements, may result in additional charges to operations that could negatively impact our results of operations and gross margin in future periods.

***Research and Development Expense ("R&D Expense")***

R&D expense consists primarily of salaries and related costs of employees engaged in ongoing research, product design and development activities, costs of engineering materials and supplies, and professional consulting expenses. R&D expense was $9.8 million or 12.1% of net sales in 2017, compared to $7.7 million or 11.7% in 2016. New product development programs resulted in higher R&D labor and material expense in 2017. R&D expense in 2016 benefitted from $0.6 million of reimbursements received under a cost-sharing arrangement with a customer. No reimbursements were received in the first quarter of 2017. The first quarter of 2017 includes $0.4 million of incremental R&D costs due to the acquisition of Kita.

***Selling, General and Administrative Expense ("SG&A Expense")***

SG&A expense consists primarily of salaries and benefit costs of employees, commission expense for independent sales representatives, product promotion and costs of professional services. SG&A expense was $14.5 million or 17.8% of net sales in 2017, compared to $13.1 million or 19.9% in 2016. SG&A expense in 2017 was higher as a result of increased business volume. Our SG&A expense has also been negatively affected by the weakening of the U.S. Dollar, which resulted in the recognition of $1.3 million and $0.5 million in foreign currency transaction losses in the first quarter of 2017 and 2016, respectively. SG&A expense also includes costs incurred specifically related to the Kita acquisition totaling $0.2 million and $0.1 million in the first quarter of 2017 and 2016, respectively. The first quarter of 2017 includes $0.8 million of incremental SG&A costs due to the acquisition of Kita.

***Income Taxes***

For the three months ended March 25, 2017, we used the estimated effective tax rate ("ETR") expected to be applicable for the full fiscal year in computing our tax provision. The ETR on income (loss) from continuing operations for the three months ended March 25, 2017 and March 26, 2016 was 16.7% and (15.1)%, respectively. The tax provision in 2017 and 2016 differs from the U.S. federal statutory rate primarily due to the lack of a benefit on our domestic losses as a result of our valuation allowance on deferred tax assets, foreign income taxed at lower rates, changes in our deferred tax asset valuation allowance, state taxes and interest related to unrecognized tax benefits.

21

**Cohu, Inc.**

**Management's Discussion and Analysis of Financial Condition and Results of Operations**

March 25, 2017

Other than for foreign currency exchange rate changes and the Kita Acquisition, there was no material change to our unrecognized tax benefits and related accrued interest and penalties during the three-month periods ended March 25, 2017 and March 26, 2016.

***Income from Continuing Operations and Net Income***

As a result of the factors set forth above, our income from continuing operations and net income was $6.8 million in 2017. In 2016, our loss from continuing operations and net loss was $1.7 million.

## LIQUIDITY AND CAPITAL RESOURCES

Our primary business is dependent on capital expenditures by semiconductor manufacturers and test subcontractors that are, in turn, dependent on the current and anticipated market demand for semiconductors. The cyclical and volatile nature of demand for semiconductor equipment, our primary industry, makes estimates of future revenues, results of operations and net cash flows difficult.

Our primary historical source of liquidity and capital resources has been cash flow generated by our operations and we manage our businesses to maximize operating cash flows as our primary source of liquidity. We use cash to fund growth in our operating assets and to fund new products and product enhancements primarily through research and development. As of March 25, 2017, $60.4 million of our cash and cash equivalents was held by our foreign subsidiaries. If these funds are needed for our operations in the U.S., we may be required to accrue and pay U.S. taxes if we repatriate these funds. Except for certain geographic locations where we have curtailed operations and from which repatriation would not result in incremental U.S. or foreign withholding tax, our intent is to indefinitely reinvest these funds in our foreign operations and we have no current plans that would require us to repatriate these funds to the U.S.

**Liquidity**

***Working Capital:*** The following summarizes our cash, cash equivalents, short-term investments and working capital:

| *(in thousands)* | March 25, 2017 | December 31, 2016 | Decrease | Percentage Change |
|---|---|---|---|---|
| Cash, cash equivalents and short-term investments | $106,205 | $128,035 | $(21,830) | (17.1 %) |
| Working capital | $172,283 | $176,460 | $(4,177 ) | (2.4 %) |

**Cash Flows**

***Operating Activities:*** Operating cash flows for the first three months of fiscal 2017 consist of our net income, adjusted for non-cash expenses and changes in operating assets and liabilities. These adjustments include depreciation expense on property, plant and equipment, share-based compensation expense, amortization of intangible assets and deferred income taxes. Our net cash used in operating activities in the first three months of fiscal 2017 totaled $7.2 million. Excluding the impact of the acquisition of Kita, net cash used in operating activities was impacted by changes in current assets and liabilities and included increases in accounts receivable of $15.8 million, inventories of $4.7 million and accounts payable of $5.4 million. The increase in accounts receivable resulted from a sequential increase in product shipments and the timing of the resulting cash conversion cycle. Material purchases made to fulfill customer orders for equipment expected to ship in future quarters led to an increase in our consolidated inventory balance and accounts payable increased as a result of the timing of cash payments made to our suppliers and vendors. Deferred profit decreased $2.1 million as a result of the recognition of certain sales that had been previously deferred in accordance with our revenue recognition policy.

***Investing Activities:*** Investing cash flows consist primarily of cash used for capital expenditures in support of our businesses, proceeds from investment maturities, asset disposals and cash used for purchases of investments and business acquisitions. Net cash used in investing activities in the first three months of fiscal 2017 totaled $3.5 million and was primarily the result of $11.7 million used for the acquisition of Kita, net of $3.3 million of cash received. The acquisition of Kita was a strategic transaction to expand our total available market, extend our market leadership and broaden our product offerings. Investing activities in the first quarter of 2017 were also impacted by $17.7 million in net proceeds from sales and maturities of short-term investments offset by $8.1 million in cash used for purchases of short-term investments. We invest our excess cash, in an attempt to seek the highest available return while preserving capital, in short-term investments since excess cash is only temporarily available and may be required for a business related purpose. Additions to property, plant and equipment of $1.4 million were made to support the operating and development activities of our business.

**Cohu, Inc.**

**Management's Discussion and Analysis of Financial Condition and Results of Operations**

March 25, 2017

***Financing Activities:*** Cash flows from financing activities consist primarily of net proceeds from the issuance of common stock under our stock option and employee stock purchase plans and cash used to pay dividends to our stockholders. We issue stock options and maintain an employee stock purchase plan as components of our overall employee compensation. In the first three months of fiscal 2017, we used cash totaling $1.0 million, net of $1.9 million of cash generated by stock issuances, to repurchase common stock to settle the minimum statutory tax withholding requirements paid by us on behalf of our employees upon vesting of restricted and performance stock awards. We paid dividends totaling $1.6 million, or $0.06 per common share. On April 25, 2017, Cohu's Board of Directors approved a quarterly cash dividend of $0.06 per share payable on July 28, 2017, to shareholders of record on June 16, 2017. Future quarterly dividends are subject to our cash liquidity, capital availability and periodic determinations by our Board of Directors that cash dividends are in the best interests of our stockholders. Total repayments of long-term debt during the first three months of fiscal 2017 totaled $0.5 million.

**Capital Resources**

In connection with the acquisition of Kita on January 4, 2017, we assumed a series of revolving credit facilities with various financial institutions in Japan. The credit facilities renew monthly and provide Kita with access to working capital totaling up to $6.3 million. At March 25, 2017 total borrowings outstanding under the revolving lines of credit was $3.2 million. As these credit facility agreements renew monthly, they have been included in short-term borrowings in our condensed consolidated balance sheet. We also assumed long-term term loans from a series of Japanese financial institutions totaling $7.1 million primarily related to the expansion of Kita’s facility in Osaka, Japan The loan amounts outstanding are collateralized by the facility and land. The loans carry interest rates ranging from 0.05% to 1.43% and expire at various dates through 2034. At March 25, 2017, $1.2 million of the term loans have been included in current installments of long-term debt in our condensed consolidated balance sheet. The revolving lines of credit and term loans are denominated in Japanese Yen and, as a result, amounts will fluctuate as a result of changes in currency exchange rates.

We have a secured letter of credit facility (the “Secured Facility”) under which Bank of America, N.A., has agreed to administer the issuance of letters of credit on our behalf. The Secured Facility requires us to maintain deposits of cash or other approved investments, which serve as collateral, in amounts that approximate our outstanding letters of credit. As of March 25, 2017, no amounts were outstanding under standby letters of credit under the Secured Facility.

We also have credit agreements with multiple financial institutions under which they administer lines of credit on behalf of our wholly owned Ismeca subsidiary. The agreements provide Ismeca with 2.5 million Swiss Francs of available credit and at March 25, 2017, no amounts were outstanding. We expect that we will continue to make capital expenditures to support our business and we anticipate that present working capital will be sufficient to meet our operating requirements for at least the next twelve months.

**Contractual Obligations and Off-Balance Sheet Arrangements**

***Contractual Obligations:*** Our significant contractual obligations consist of liabilities for debt, operating leases, unrecognized tax benefits, pensions, post-retirement benefits and warranties. As a result of the acquisition of Kita on January 4, 2017, our contractual obligations for debt increased approximately $10.3 million, of which approximately $1.2 million will be due in the remainder of 2017, $1.3 million will be due in 2018, $0.9 million will be due in 2019, $0.3 million will be due in both years 2020 and 2021 and $6.3 million thereafter.

***Purchase Commitments:*** From time to time, we enter into commitments with our vendors and outsourcing partners to purchase inventory at fixed prices or in guaranteed quantities. We are not able to determine the aggregate amount of such purchase orders that represent contractual obligations, as purchase orders may represent authorizations to purchase rather than binding agreements. Our purchase orders are based on our current manufacturing needs and are fulfilled by our vendors within relatively short time horizons. We typically do not have significant agreements for the purchase of raw materials or other goods specifying minimum quantities or set prices that exceed our expected requirements for the next three months.

***Off-Balance Sheet Arrangements:*** During the ordinary course of business, we provide standby letters of credit instruments to certain parties as required. As of March 25, 2017, no amounts were outstanding under standby letters of credit.

## Item 3. Quantitative and Qualitative Disclosures About Market Risk.

**Investment and Interest Rate Risk.**

At March 25, 2017, our investment portfolio included short-term, fixed-income investment securities with a fair value of approximately $22.4 million. These securities are subject to interest rate risk and will likely decline in value if interest rates increase. Our future investment income may fall short of expectations due to changes in interest rates or we may suffer losses in principal if we are forced to sell securities that decline in market value due to changes in interest rates. As we classify our short-term securities as available-for-sale, no gains or losses are recognized due to changes in interest rates unless such securities are sold prior to maturity or declines in fair value are determined to be other-than-temporary. Due to the relatively short duration of our investment portfolio, an immediate ten percent change in interest rates would have no material impact on our financial condition or results of operations.

We evaluate our investments periodically for possible other-than-temporary impairment by reviewing factors such as the length of time and extent to which fair value has been below cost basis, the financial condition of the issuer and our ability and intent to hold the investment for a period of time sufficient for anticipated recovery of market value. As of March 25, 2017, we had $18.5 million of investments with loss positions. We evaluated the nature of these investments, credit worthiness of the issuer and the duration of these impairments and concluded that these losses were temporary and we have the ability and intent to hold these investments to maturity.

**Foreign Currency Exchange Risk.**

We have operations in several foreign countries and conduct business in the local currency in these countries. As a result, we have risk associated with currency fluctuations as the value of foreign currencies fluctuate against the U.S. dollar, in particular the Swiss Franc, Euro, Malaysian Ringgit, Chinese Yuan, Philippine Peso and, with the acquisition of Kita, the Japanese Yen. These fluctuations can impact our reported earnings.

Fluctuations in currency exchange rates also impact the U.S. Dollar amount of our net investment in foreign operations. The assets and liabilities of our foreign subsidiaries are translated into U.S. Dollars at the exchange rates in effect at the fiscal year-end balance sheet date. Income and expense accounts are translated at an average exchange rate during the year which approximates the rates in effect at the transaction dates. The resulting translation adjustments are recorded in stockholders’ equity as a component of accumulated other comprehensive income. As a result of fluctuations in certain foreign currency exchange rates in relation to the U.S. Dollar as of March 25, 2017 compared to December 31, 2016, our stockholders’ equity increased by $4.0 million.

Based upon the current levels of net foreign assets, a hypothetical 10% devaluation of the U.S. Dollar as compared to these currencies as of March 25, 2017 would result in an approximate $18.7 million positive translation adjustment recorded in other comprehensive income within stockholders' equity. Conversely, a hypothetical 10% appreciation of the U.S. Dollar as compared to these currencies as of March 25, 2017 would result in an approximate $18.7 million negative translation adjustment recorded in other comprehensive income within stockholders' equity.

**Item 4. Controls and Procedures.**

**(a) Evaluation of Disclosure Controls and Procedures.** Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we evaluated the effectiveness of our disclosure controls and procedures, as such term is defined in Rules 13a-15(e) and 15d-15(e) promulgated under the Securities Exchange Act of 1934, as amended. Based on this evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures were effective as of the end of the period covered by this quarterly report.

It should be noted that any system of controls, however well designed and operated, can provide only reasonable, and not absolute, assurance that the objectives of the system are met. In addition, the design of any control system is based in part upon certain assumptions about the likelihood of future events. Because of these and other inherent limitations of control systems, there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions, regardless of how remote. Our disclosure controls and procedures are designed to provide reasonable assurance of achieving their objectives and our principal executive officer and principal financial officer concluded that our disclosure controls and procedures were effective at the reasonable assurance level.

**(b) Changes in Internal Control over Financial Reporting.** There have been no changes in our internal control over financial reporting during the most recent fiscal quarter that has materially affected, or is reasonable likely to materially affect our internal control over financial reporting.

**Part II OTHER INFORMATION**

**Item 1. Legal Proceedings.**

The information set forth above under Note 7 contained in the "Notes to Unaudited Condensed Consolidated Financial Statements" of this Form 10-Q is incorporated herein by reference.

**Item 1A. Risk Factors.**

*The risks described below may not be the only risks we face. Additional risks that we do not currently believe are material may also impair our business operations. The risk factors set forth below with an asterisk (*) next to the title contain changes to the description of the risk factors associated with our business as previously disclosed in Item 1A to our 2016 Annual Report on Form 10-K. If any of the events or circumstances described in the following risks occur, our business, financial condition, results of operations or cash flows could suffer, and the trading price of our common stock and our market capitalization could decline.*

***We are exposed to risks associated with acquisitions, investments and divestitures.***

We have made, and may in the future make, acquisitions of, or significant investments in, businesses with complementary products, services and/or technologies such as our acquisition of Kita, which was completed on January 4, 2017. Acquisitions and investments involve numerous risks, including, but not limited to:

- difficulties and increased costs in connection with integration of the personnel, operations, technologies and products of acquired businesses;
- increasing the scope, geographic diversity and complexity of our business;
- diversion of management’s attention from other operational matters;
- the potential loss of key employees or customers of Cohu or acquired businesses;
- lack of synergy, or the inability to realize expected synergies, resulting from the acquisition;
- failure to commercialize purchased technology; and
- the impairment of acquired intangible assets and goodwill that could result in significant charges to operating results in future periods.

We may be required to finance future acquisitions and investments through a combination of borrowings, proceeds from equity or debt offerings and the use of cash, cash equivalents and short-term investments.

Mergers, acquisitions and investments are inherently risky and the inability to effectively manage these risks could materially and adversely affect our business, financial condition and results of operations. At March 25, 2017, we had goodwill and net purchased intangible assets balances of $63.0 million and $22.1 million, respectively.

***We are making investments in new products to enter new markets, which may adversely affect our operating results; these investments may not be successful.***

Given the highly competitive and rapidly evolving technology environment in which we operate, we believe it is important to develop new product offerings to meet strategic opportunities as they evolve. This includes developing products that we believe are necessary to meet the future needs of the marketplace. We are currently investing in new product development programs to enable us to compete in the test contactor and wafer level package (WLP) probing markets. We expect to continue to make investments and we may at any time, based on product need or marketplace demand, decide to significantly increase our product development expenditures in these or other products. The cost of investments in new product offerings can have a negative impact on our operating results and there can be no assurance that any new products we develop will be accepted in the marketplace or generate material revenues for us.

***We are exposed to the risks of operating a global business.***

We are a global corporation with offices and subsidiaries in certain foreign locations to manufacture our products, support our sales and services to the global semiconductor industry and, as such, we face risks in doing business abroad. Certain aspects inherent in transacting business internationally could negatively impact our operating results, including:

- costs and difficulties in staffing and managing international operations;
- legislative or regulatory requirements and potential changes in or interpretations of requirements in the United States and in the countries in which we manufacture or sell our products;
- trade restrictions, including treaty changes, sanctions and the suspension of export licenses;
- compliance with and changes in import/export tariffs and regulations;
- difficulties in enforcing contractual and intellectual property rights;
- longer payment cycles;
- local political and economic conditions;
- potentially adverse tax consequences, including restrictions on repatriating earnings and the threat of "double taxation"; and
- fluctuations in foreign currency exchange rates against the U.S. Dollar, which can affect demand for our products and increase our costs.

Additionally, managing geographically dispersed operations presents difficult challenges associated with organizational alignment and infrastructure, communications and information technology, inventory control, customer relationship management, terrorist threats and related security matters and cultural diversities. If we are unsuccessful in managing such operations effectively, our business and results of operations will be adversely affected.

**** We have manufacturing operations in Asia. Our inability to manage multiple manufacturing sites and to secure raw materials meeting our quality, cost and other requirements, or failures by our suppliers to perform, could harm our sales, service levels and reputation.***

Our reliance on overseas manufacturers exposes us to significant risks including complex management, foreign currency, legal, tax and economic risks, which we may not be able to address quickly and adequately. In addition, it is time consuming and costly to qualify overseas supplier relationships. Therefore, if we should fail to effectively manage overseas manufacturing operations or if one or more of them should experience delays, disruptions or quality control problems, or if we had to change or add additional manufacturing sites, our ability to ship products to our customers could be delayed. Also, the addition of overseas manufacturing locations increases the demands on our administrative and operations infrastructure and the complexity of our supply chain management. If our overseas manufacturing locations are unable to meet our manufacturing requirements in a timely manner, our ability to ship products and to realize the related revenues when anticipated could be materially affected.

Our suppliers are subject to the fluctuations in general economic cycles, and the global economic conditions may impact their ability to operate their business. They may also be impacted by the increasing costs of raw materials,

labor and distribution, resulting in demands for less attractive contract terms or an inability for them to meet our requirements or conduct their own businesses. The performance and financial condition of a supplier may cause us to alter our business terms or to cease doing business with a particular supplier, or change our sourcing practices generally, which could in turn adversely affect our own business and financial condition.

***Failure of critical suppliers to deliver sufficient quantities of parts in a timely and cost-effective manner could adversely impact our operations.***

We use numerous vendors to supply parts, components and subassemblies for the manufacture of our products. It is not always possible to maintain multiple qualified suppliers for all of our parts, components and subassemblies. As a result, certain key parts may be available only from a single supplier or a limited number of suppliers. In addition, suppliers may cease manufacturing certain components that are difficult to replace without significant reengineering of our products. On occasion, we have experienced problems in obtaining adequate and reliable quantities of various parts and components from certain key suppliers. Our results of operations may be materially and adversely impacted if we do not receive sufficient parts to meet our requirements in a timely and cost effective manner.

***The semiconductor industry we serve is highly volatile and unpredictable.***

Visibility into our markets is limited. The semiconductor equipment business is highly dependent on the overall strength of the semiconductor industry. Historically, the semiconductor industry has been highly cyclical with recurring periods of oversupply and excess capacity, which often have had a significant effect on the semiconductor industry's demand for capital equipment, including equipment of the type we manufacture and market. We anticipate that the markets for newer generations of semiconductors and semiconductor equipment may also be subject to similar cycles and severe downturns. Any significant reductions in capital equipment investment by semiconductor integrated device manufacturers and test subcontractors will materially and adversely affect our business, financial position and results of operations. In addition, the volatile and unpredictable nature of semiconductor equipment demand has in the past and may in the future expose us to significant excess and obsolete and lower of cost or market inventory write-offs and reserve requirements. In 2016, 2015 and 2014, we recorded pre-tax inventory-related charges of approximately $1.1 million, $2.4 million, and $2.6 million, respectively, primarily as a result of changes in customer forecasts.

***Due to the nature of our business, we need continued access to capital, which if not available to us or if not available on favorable terms, could harm our ability to operate or expand our business.***

Our business requires capital to finance accounts receivable and product inventory that is not financed by trade creditors when our business is expanding. If cash from available sources is insufficient or cash is used for unanticipated needs, we may require additional capital sooner than anticipated.

We believe that our existing sources of liquidity, including cash resources and cash provided by operating activities will provide sufficient resources to meet our working capital and cash requirements for at least the next twelve months. In the event we are required, or elect, to raise additional funds, we may be unable to do so on favorable terms, or at all, and may incur expenses in raising the additional funds and future indebtedness could adversely affect our operating results and severely limit our ability to plan for, or react to, changes in our business or industry. We could also be limited by financial and other restrictive covenants in credit arrangements, including limitations on our borrowing of additional funds and issuing dividends. If we choose to issue new equity securities, existing stockholders may experience dilution, or the new equity securities may have rights, preferences or privileges senior to those of existing holders of common stock. If we cannot raise funds on acceptable terms, we may not be able to take advantage of future opportunities or respond to competitive pressures or unanticipated requirements. Any inability to raise additional capital when required could have an adverse effect on our business and operating results.

***The semiconductor equipment industry in general and the test handler market in particular, is highly competitive.***

The semiconductor test handler industry is intensely competitive and we face substantial competition from numerous companies throughout the world. The test handler industry, while relatively small in terms of worldwide market size compared to other segments of the semiconductor equipment industry, has several participants resulting in intense competitive pricing pressures. Future competition may include companies that do not currently supply test handlers. Some of our competitors are part of larger corporations that have substantially greater financial, engineering, manufacturing and customer support capabilities and provide more extensive product offerings. In addition, there are

emerging semiconductor equipment companies that provide or may provide innovative technology incorporated in products that may compete successfully against our products. We expect our competitors to continue to improve the design and performance of their current products and introduce new products with improved performance capabilities. Our failure to introduce new products in a timely manner, the introduction by our competitors of products with perceived or actual advantages, or disputes over rights to use certain intellectual property or technology could result in a loss of our competitive position and reduced sales of, or margins on our existing products. We believe that competitive conditions in the semiconductor test handler market have intensified over the last several years. This intense competition has adversely impacted our product average selling prices and gross margins on certain products. If we are unable to reduce the cost of our existing products and successfully introduce new lower cost products we expect these competitive conditions to negatively impact our gross margin and operating results in the foreseeable future.

***Semiconductor equipment is subject to rapid technological change, product introductions and transitions which may result in inventory write-offs, and our new product development involves numerous risks and uncertainties.***

Semiconductor equipment and processes are subject to rapid technological change. We believe that our future success will depend in part on our ability to enhance existing products and develop new products with improved performance capabilities. We expect to continue to invest heavily in research and development and must manage product transitions successfully, as introductions of new products, including the products obtained in our acquisitions, may adversely impact sales and/or margins of existing products. In addition, the introduction of new products by us or by our competitors, the concentration of our revenues in a limited number of large customers, the migration to new semiconductor testing methodologies and the custom nature of our inventory parts increases the risk that our established products and related inventory may become obsolete, resulting in significant excess and obsolete inventory exposure. This exposure resulted in charges to operations during each of the years in the three-year period ended December 31, 2016. Future inventory write-offs and increased inventory reserve requirements could have a material adverse impact on our results of operations and financial condition.

The design, development, commercial introduction and manufacture of new semiconductor equipment is an inherently complex process that involves a number of risks and uncertainties. These risks include potential problems in meeting customer acceptance and performance requirements, integration of the equipment with other suppliers' equipment and the customers' manufacturing processes, transitioning from product development to volume manufacturing and the ability of the equipment to satisfy the semiconductor industry's constantly evolving needs and achieve commercial acceptance at prices that produce satisfactory profit margins. The design and development of new semiconductor equipment is heavily influenced by changes in integrated circuit assembly, test and final manufacturing processes and integrated circuit package design changes. We believe that the rate of change in such processes and integrated circuit packages is accelerating. As a result of these changes and other factors, assessing the market potential and commercial viability of handling, MEMS, system-level and burn-in test equipment is extremely difficult and subject to a great deal of risk. In addition, not all integrated circuit manufacturers employ the same manufacturing processes. Differences in such processes make it difficult to design standard test products that can achieve broad market acceptance. As a result, we might not accurately assess the semiconductor industry's future equipment requirements and fail to design and develop products that meet such requirements and achieve market acceptance. Failure to accurately assess customer requirements and market trends for new semiconductor test products may have a material adverse impact on our operations, financial condition and results of operations.

The transition from product development to the manufacture of new semiconductor equipment is a difficult process and delays in product introductions and problems in manufacturing such equipment are common. We have in the past and may in the future experience difficulties in manufacturing and volume production of our new equipment. In addition, as is common with semiconductor equipment, after sale support and warranty costs have typically been significantly higher with new products than with our established products. Future technologies, processes and product developments may render our current or future product offerings obsolete and we might not be able to develop, introduce and successfully manufacture new products or make enhancements to our existing products in a timely manner to satisfy customer requirements or achieve market acceptance. Furthermore, we might not realize acceptable profit margins on such products.

***Global economic conditions may have an impact on our business and financial condition in ways that we currently cannot predict.***

Our operations and financial results depend on worldwide economic conditions and their impact on levels of business spending. Continued uncertainties may reduce future sales of our products and services. While we believe we have a strong customer base and have experienced strong collections in the past, if the current market conditions deteriorate, we may experience increased collection times and greater write-offs, either of which could have a material adverse effect on our cash flow.

In addition, the tightening of credit markets and concerns regarding the availability of credit may make it more difficult for our customers to raise capital, whether debt or equity, to finance their purchases of capital equipment, including the products we sell. Delays in our customers' ability to obtain such financing, or the unavailability of such financing would adversely affect our product sales and revenues and therefore harm our business and operating results. We cannot predict the timing, duration of or effect on our business of an economic slowdown or the timing or strength of a subsequent recovery.

***A limited number of customers account for a substantial percentage of our net sales.***

A small number of customers have been responsible for a significant portion of our net sales. During the past five years, the percentage of our sales derived from these significant customers has varied greatly. Such variations are due to changes in the customers' business, consolidation within the semiconductor industry and their purchase of products from our competitors. It is common in the semiconductor test handler industry for customers to purchase equipment from more than one equipment supplier, increasing the risk that our competitive position with a specific customer may deteriorate. No assurance can be given that we will continue to maintain our competitive position with these or other significant customers. Furthermore, we expect the percentage of our revenues derived from significant customers will vary greatly in future periods. The loss of, or a significant reduction in, orders by these or other significant customers as a result of competitive products, market conditions including end market demand for our customers' products, outsourcing final semiconductor test to test subcontractors that are not our customers or other factors, would have a material adverse impact on our business, financial condition and results of operations. Furthermore, the concentration of our revenues in a limited number of large customers is likely to cause significant fluctuations in our future annual and quarterly operating results.

***If we cannot continue to develop, manufacture and market products and services that meet customer requirements for innovation and quality, our revenue and gross margin may suffer.***

The process of developing new high technology products and services and enhancing existing products and services is complex, costly and uncertain, and any failure by us to anticipate customers' changing needs and emerging technological trends accurately could significantly harm our market share and results of operations. In addition, in the course of conducting our business, we must adequately address quality issues associated with our products and services, including defects in our engineering, design and manufacturing processes, as well as defects in third-party components included in our products. To address quality issues, we work extensively with our customers and suppliers and engage in product testing to determine the cause of quality problems and appropriate solutions. Finding solutions to quality issues can be expensive and may result in additional warranty, replacement and other costs, adversely affecting our profits. In addition, quality issues can impair our relationships with new or existing customers and adversely affect our reputation, which could lead to a material adverse effect on our operating results.

***The seasonal nature of the semiconductor equipment industry places enormous demands on our employees, operations and infrastructure.***

The semiconductor equipment industry is characterized by dramatic and sometimes rapid changes in demand for its products. These are generally dictated by introduction of new consumer products, launch of new model vehicles, implementation of new communications infrastructure, or in response to an increase in industrial equipment and machinery that utilizes semiconductors. A number of other factors including changes in integrated circuit design and packaging may affect demand for our products. Sudden changes in demand for semiconductor equipment have a significant impact on our operations. We have in the past and may in the future experience difficulties, particularly in manufacturing, in training and recruiting the large number of additions to our workforce. The volatility in headcount and business levels, combined with the seasonal nature of the semiconductor industry, may require that we invest substantial amounts in new operational and financial systems, procedures and controls. We may not be able to successfully adjust our systems, facilities and production capacity to meet our customers' changing requirements. The inability to meet such requirements will have an adverse impact on our business, financial position and results of

operations.

***The loss of key personnel could adversely impact our business.***

Certain key personnel are critical to our business. Our future operating results depend substantially upon the continued service of our key personnel, many of whom are not bound by employment or non-competition agreements. Our future operating results also depend in significant part upon our ability to attract and retain qualified management, manufacturing, technical, engineering, marketing, sales and support personnel. Competition for qualified personnel, particularly those with technical skills, is intense, and we cannot ensure success in attracting or retaining qualified personnel. In addition, the cost of living in the San Diego, California, Kolbermoor, Germany and La Chaux-de-Fonds, Switzerland areas, where the majority of our development personnel are located, is high and we have had difficulty in recruiting prospective employees from other locations. There may be only a limited number of persons with the requisite skills and relevant industry experience to serve in these positions and it may become increasingly difficult for us to hire personnel over time. Our business, financial condition and results of operations could be materially adversely affected by the loss of any of our key employees, by the failure of any key employee to perform in his or her current position, or by our inability to attract and retain skilled employees.

***Third parties may violate our proprietary rights or accuse us of infringing upon their proprietary rights.***

We rely on patent, copyright, trademark and trade secret laws to establish and maintain proprietary rights in our technology and products. Any of our proprietary rights may expire due to patent life, or be challenged, invalidated or circumvented. In addition, from time to time, we receive notices from third parties regarding patent or copyright claims. Any such claims, with or without merit, could be time-consuming to defend, result in costly litigation, divert management's attention and resources and cause us to incur significant expenses. In the event of a successful claim of infringement against us and our failure or inability to license the infringed technology or to substitute similar non-infringing technology, our business, financial condition and results of operations could be adversely affected.

***A majority of our revenues are generated from exports to foreign countries, primarily in Asia, that are subject to economic and political instability and we compete against a number of Asian test handling equipment suppliers.***

The majority of our export sales are made to destinations in Asia. Political or economic instability, particularly in Asia, may adversely impact the demand for capital equipment, including equipment of the type we manufacture and market. In addition, we face intense competition from a number of Asian suppliers that have certain advantages over United States ("U.S.") suppliers, including us. These advantages include, among other things, proximity to customers, favorable tariffs and affiliation with significantly larger organizations. In addition, changes in the amount or price of semiconductors produced in Asia could impact the profitability or capital equipment spending programs of our foreign and domestic customers.

***Unanticipated changes in our tax provisions or exposure to additional income tax liabilities could affect our profitability.***

We are subject to income and other taxes in the U.S. and numerous foreign jurisdictions. Our tax liabilities are affected by, among other things, the amounts our affiliated entities charge each other for intercompany transactions. We may be subject to ongoing tax examinations in various jurisdictions. Tax authorities may disagree with our intercompany charges or other matters and assess additional taxes. While we regularly assess the likely outcomes of these examinations to determine the appropriateness of our tax provision, tax audits are inherently uncertain and an unfavorable outcome could occur. An unanticipated, unfavorable outcome in any specific period could harm our operating results for that period or future periods. The financial cost and management attention and time devoted to defending income tax positions may divert resources from our business operations, which could harm our business and profitability. Tax examinations may also impact the timing and/or amount of our refund claims. In addition, our effective tax rate in the future could be adversely affected by changes in the mix of earnings in countries with differing statutory tax rates, changes in the valuation of our deferred tax assets and liabilities, changes in tax laws and the discovery of new information in the course of our tax return preparation process. In particular, the carrying value of our deferred tax assets and the utilization of our net operating loss and credit carryforwards are dependent on our ability to generate future taxable income in the U.S and other countries. Furthermore, these carryforwards may be subject to annual limitations as a result of changes in Cohu's ownership.

In addition, in October 2015, the Organization for Economic Co-operation and Development (OECD) issued its reports on the 15 focus areas identified in its Action Plan on Base Erosion and Profit Shifting ("BEPS"). Some BEPS

measures will require treaty based or legislative action by countries. The final impact of BEPS on Cohu's income tax provision and liability is currently not quantifiable and is likely to result in additional recordkeeping and administrative cost to implement certain of its requirements.

***Compliance with regulations may impact sales to foreign customers and impose costs.***

Certain products and services that we offer require compliance with U.S. and other foreign country export and other regulations. Compliance with complex U.S. and other foreign country laws and regulations that apply to our international sales activities increases our cost of doing business in international jurisdictions and could expose us or our employees to fines and penalties. These laws and regulations include import and export requirements, the U.S. State Department International Traffic in Arms Regulations (“ITAR”) and U.S. and other foreign country laws such as the Foreign Corrupt Practices Act (“FCPA”), and local laws prohibiting corrupt payments to governmental officials. Violations of these laws and regulations could result in fines, criminal sanctions against us, our officers or our employees, prohibitions on the conduct of our business and damage to our reputation. Although we have implemented policies and procedures designed to ensure compliance with these laws, there can be no assurance that our employees, contractors or agents will not violate our policies, or that our policies will be effective in preventing all potential violations. Any such violations could include prohibitions on our ability to offer our products and services to one or more countries, and could also materially damage our reputation, our brand, our international expansion efforts, our ability to attract and retain employees, our business and our operating results. Further, defending against claims of violations of these laws and regulations, even if we are successful, could be time-consuming, result in costly litigation, divert management’s attention and resources and cause us to incur significant expenses.

In addition to government regulations regarding sale and export, we are subject to other regulations regarding our products. For example, the U.S. Securities and Exchange Commission has adopted disclosure rules for companies that use conflict minerals in their products, with substantial supply chain verification requirements if the materials come from, or could have come from, the Democratic Republic of the Congo or adjoining countries. These new rules and verification requirements will impose additional costs on us and on our suppliers, and may limit the sources or increase the cost of materials used in our products. Further, if we are unable to certify that our products are conflict free, we may face challenges with our customers that could place us at a competitive disadvantage, and our reputation may be harmed.

***Our business and operations could suffer in the event of security breaches.***

Attempts by others to gain unauthorized access to information technology systems are becoming more sophisticated and are sometimes successful. These attempts, which might be related to industrial or other espionage, include covertly introducing malware to our computers and networks and impersonating authorized users, among others. We seek to detect and investigate all security incidents and to prevent their recurrence, but in some cases, we might be unaware of an incident or its magnitude and effects. The theft, unauthorized use or publication of our intellectual property and/or confidential business information could harm our competitive position, reduce the value of our investment in research and development and other strategic initiatives or otherwise adversely affect our business. To the extent that any security breach results in inappropriate disclosure of our customers' or licensees' confidential information, we may incur liability as a result. In addition, we may be required to devote additional resources to the security of our information technology systems.

***The occurrence of natural disasters and geopolitical instability caused by terrorist attacks and other threats may adversely impact our operations and sales.***

Our Corporate headquarters is located in San Diego, California, our Asian sales and service headquarters is located in Singapore and the majority of our sales are made to destinations in Asia. In addition, we have manufacturing plants in Malaysia, Philippines and Japan. These regions are known for being vulnerable to natural disasters and other risks, such as earthquakes, tsunamis, fires, and floods, which at times have disrupted the local economies. A significant earthquake or tsunami could materially affect operating results. We are not insured for most losses and business interruptions of this kind, and presently have limited redundant, multiple site capacity in the event of a natural disaster. In the event of such disaster, our business would suffer.

***Our financial and operating results may vary and fall below analysts' estimates, which may cause the price of our common stock to decline.***

Our operating results may fluctuate from quarter to quarter due to a variety of factors including, but not limited to:

- seasonal nature of the semiconductor equipment industry;
- timing and amount of orders from customers and shipments to customers;
- inability to recognize revenue due to accounting requirements;
- inventory writedowns;
- inability to deliver solutions as expected by our customers; and
- intangible and deferred tax asset writedowns.

Due to these factors or other unanticipated events, quarter-to-quarter comparisons of our operating results may not be reliable indicators of our future performance. In addition, from time to time our quarterly financial results may fall below the expectations of the securities and industry analysts who publish reports on our company or of investors in general. This could cause the market price of our stock to decline, perhaps significantly.

***We have experienced significant volatility in our stock price.***

A variety of factors may cause the price of our stock to be volatile. In recent years, the stock market in general, and the market for shares of high-technology companies in particular, including ours, have experienced extreme price fluctuations, which have often been unrelated to the operating performance of affected companies. During the three-year period ended December 31, 2016 the price of our common stock has ranged from $14.43 to $9.14. The price of our stock may be more volatile than the stock of other companies due to, among other factors, the unpredictable and seasonal nature of the semiconductor industry, our significant customer concentration, intense competition in the test handler industry, our limited backlog and our relatively low daily stock trading volume. The market price of our common stock is likely to continue to fluctuate significantly in the future, including fluctuations related and unrelated to our performance.
