UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934

For the quarterly period ended June 30, 2011

or
 TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934

For the transition period from _____ to _____

Commission File Number 1-13752

Smith-Midland Corporation
(Exact name of Registrant as specified in its charter)
Delaware
(State or other jurisdiction of
of incorporation or organization)

54-1727060
(I.R.S. Employer
Identification No.)

5119 Catlett Road, P.O. Box 300
Midland, VA 22728
(Address, zip code of principal executive offices)

(540) 439-3266
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer

Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Common Stock, \$.01 par value, outstanding as of August 5, 2011: 4,785,262 shares, net of treasury shares

SMITH-MIDLAND CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

NOTE 1. – INTERIM FINANCIAL REPORTING

Basis of Presentation

The accompanying condensed consolidated financial statements were prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information, and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, we have condensed or omitted certain information and footnote disclosures that are included in our annual financial statements. These condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements and the related notes included in our Annual Report on Form 10-K for the year ended December 31, 2010. The December 31, 2010 balance sheet was derived from audited financial statements included in the Form 10-K.

In the opinion of management, these condensed consolidated financial statements reflect all adjustments (which consist of normal, recurring adjustments) necessary for a fair presentation of the financial position and results of operations and cash flows for the periods presented. The results disclosed in the condensed consolidated statements of income are not necessarily indicative of the results to be expected in any future periods.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Revenue Recognition

Smith-Midland Corporation (the "Company") primarily recognizes revenue on the sale of its standard precast concrete products at shipment date, including revenue derived from any projects to be completed under short-term contracts. Installation of the Company's standard products is typically performed by the customer; however, in some circumstances, the Company will install certain products which are accomplished at the time of delivery. The installation activities are usually completed the day of delivery or the following day. In utility building sales, the majority of the buildings are erected on the Company's site and delivered completely installed.

Leasing fees are paid at the beginning of the lease agreement and recorded to a deferred revenue account. As the revenue is earned each month during the contract, the amount earned is recorded as lease income and an equivalent amount is debited to deferred revenue.

Royalties are recognized as revenue as they are earned. The Company licenses certain other precast companies to produce its licensed products to our engineering specifications under licensing agreements. The agreements are typically for five year terms and require royalty payments from 4% to 6% which are paid on a monthly basis. The revenue from licensing agreements is recognized in the month earned.

Certain sales of Soundwall, architectural precast panels and Slenderwall™ concrete products revenue is recognized using the percentage of completion method for recording revenues on long term contracts pursuant to ASC 605-35-25. The contracts are executed by both parties and clearly stipulate the requirements for progress payments

and a schedule of delivery dates. Provisions for estimated losses on contracts are made in the period in which such losses are determined.

Shipping revenues are recognized in the period the shipping services are provided to the customer.

Smith-Midland products are typically sold pursuant to an implicit warranty as to merchantability only. Warranty claims are reviewed and resolved on a case by case method. Although the Company does incur costs for these types of expense, historically the amount of expense is immaterial.

NOTE 2. – NET INCOME PER COMMON SHARE

Basic earnings per common share exclude all dilutive stock options and are computed using the weighted average number of common shares outstanding during the period. The diluted earnings per common share calculation reflect the potential dilutive effect of securities that could share in earnings of an entity. Outstanding options excluded from the diluted earnings per share calculation because they would have an anti-dilutive effect were 254,166 and 308,166 for the three months ended June 30, 2011 and 2010, and 254,166 and 258,166 for the six months ended June 30, 2011 and 2010, respectively.

	Three Months Ended June 30,	
	2011	2010
Basic earnings per share		
Income available to common shareholder	\$254,544	\$511,195
Weighted average shares outstanding	4,796,649	4,702,882
Basic earnings per share	\$0.05	\$0.11
Diluted earnings per share		
Income available to common shareholder	\$254,544	\$511,195
Weighted average shares outstanding	4,796,649	4,702,882
Dilutive effect of stock options	88,120	83,930

Total weighted average shares outstanding	4,839,510	4,807,240

Diluted earnings per share	\$0.09	\$0.21
----------------------------	--------	--------

9

NOTE 3. – STOCK OPTIONS

In accordance with ASC 718, stock option expense for the three months ended June 30, 2011 and 2010 was \$8,522 and \$10,917, respectively and for the six months ended June 30, 2011 and 2010 was \$17,043 and \$25,532, respectively. The Company uses the Black-Scholes option-pricing model to measure the fair value of stock options granted to employees. The Company did not issue any stock options for the six months ended June 30, 2011.

The following table summarized options outstanding at June 30, 2011

	Number of Shares	Weighted Average Exercise Price
Balance, December 31, 2010	587,965	\$1.59
Granted	—	—
Forfeited	—	—
Exercised	(122,000) (0.86
Outstanding options at end of quarter	465,965	1.78
Outstanding exercisable options at end of quarter	465,965	1.78

The intrinsic value of outstanding and exercisable options at June 30, 2011 was approximately \$111,000 .

NOTE 4. – SUBSEQUENT EVENTS

Through the date of the filing of this Form 10-Q, the Company has evaluated events and transactions occurring subsequent to June 30, 2011 and has determined that there have been no significant events or transactions that provide additional evidence about conditions of the Company that existed as of the balance sheet date except for the following. The Company's line of credit in the amount of \$2,000,000 and its equipment guidance line in the amount of \$1,000,000 matured on July 7, 2011. No amounts were outstanding under these lines of credit during the quarter ended June 30, 2011 or at the time of maturity. The Company is currently in discussions with Summit Community Bank regarding the lines of credit and expects, but there can be no assurance, that the lines will be renewed by the end of the third quarter.

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements

This Quarterly Report and related documents include “forward-looking statements” within the meaning of Section 27A of the Securities Act and Section 21E of the Exchange Act. Forward-looking statements involve known and unknown risks, uncertainties and other factors which could cause the Company's actual results, performance (financial or operating) or achievements expressed or implied by such forward looking statements not to occur or be realized. Such forward looking statements generally are based upon the Company's best estimates of future results, performance or achievement, based upon current conditions and the most recent results of operations. Forward-looking statements may be identified by the use of forward-looking terminology such as “may,” “will,” “expect,” “believe,” “estimate,” “anticipate,” “continue,” or similar terms, variations of those terms or the negative of those terms. Potential risks and uncertainties include, among other things, such factors as:

our level of indebtedness and ability to satisfy the same,

the continued availability of financing in the amounts, at the times, and on the terms required, to support our future business and capital projects,

the extent to which we are successful in developing, acquiring, licensing or securing patents for proprietary products,

changes in economic conditions specific to any one or more of our markets (including the availability of public funds

10

and grants for construction),

• changes in general economic conditions, such as the current weakness in construction in 2011 in the Company's primary service area,

• adverse weather which inhibits the demand for our products,

• our compliance with governmental regulations,

• the outcome of future litigation,

• on material construction projects, our ability to produce and install product that conforms to contract specifications and in a time frame that meets the contract requirements,

• the cyclical nature of the construction industry,

• our exposure to increased interest expense payments should interest rates change,

• the Company's Board of Directors, which is composed of four members, has only one outside, independent director,

• the Company does not have an audit committee; the Board of Directors functions in that role,

• the Company's Board of Directors does not have a member that qualifies as an audit committee financial expert as defined in SEC regulations, and

• the other factors and information disclosed and discussed in other sections of this report, and in our Annual Report on Form 10-K for the fiscal year ended December 31, 2010.

Investors and shareholders should carefully consider such risks, uncertainties and other information, disclosures and discussions which contain cautionary statements identifying important factors that could cause actual results to differ materially from those provided in the forward-looking statements. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Overview

The Company invents, develops, manufactures, markets, leases, licenses, sells, and installs a broad array of precast concrete products for use primarily in the construction, utilities and farming industries. The Company's customers are primarily general contractors and federal, state, and local transportation authorities located in the Mid-Atlantic, Northeastern, and Midwestern regions of the United States. The Company's operating strategy has involved producing innovative and proprietary products, including Slenderwall™, a patented, lightweight, energy efficient concrete and steel exterior wall panel for use in building construction; J-J Hooks® Highway Safety Barrier, a positive-connected highway safety barrier; Sierra Wall, a sound barrier primarily for roadside use; and Easi-Set® transportable concrete buildings, also patented. In addition, the Company produces custom order precast concrete products with various architectural surfaces, as well as generic highway sound barriers, utility vaults, and farm products such as cattleguards and water and feed troughs.

The Company was incorporated in Delaware on August 2, 1994. Prior to a corporate reorganization completed in October 1994, the Company conducted its business primarily through Smith-Midland Virginia, which was incorporated in 1960 as Smith Cattleguard Company, a Virginia corporation, and which subsequently changed its

name to Smith-Midland Corporation in 1985. The Company's principal offices are located at 5119 Catlett Road, Midland, Virginia 22728 and its telephone number is (540) 439-3266. As used in this report, unless the context otherwise requires, the term the "Company" refers to Smith-Midland Corporation and its subsidiaries.

The Company's results of operations for the six months ended June 30, 2011 were below that of the same period in 2010, however, management was able to produce positive results in an industry in which profitability has not been the norm for the past several years. While the Company has seen an increase in bidding activity over the first half of 2011, intense competition for jobs in the geographical areas serviced by the Company has caused a decrease in profit margins for the larger construction projects. Management has diligently worked to improve on its profit margins by improving production processes and working more closely with its major suppliers to obtain raw materials at the lowest possible prices. The Company's overall performance for 2011 will not only depend on how quickly the construction industry improves but also how effective

management is in improving its production processes and reducing raw material costs.

Results of Operations

Three months ended June 30, 2011 compared to the three months ended June 30, 2010

Revenue By Type

	2011	2010	Change	% of Change

Total Revenue	\$7,145,058	\$7,691,567	\$(546,509)	(7)%

Wall Sales – Wall sales are generally large contracts issued by general contractors for production and delivery of a specific wall panel for a specific construction project. Changes in the mix of wall sales depend on what contracts are in production during the period. Overall wall sales decreased significantly during three months ended June 30, 2011 due to the winding down of the production of a large soundwall job in Maryland. During the period, the Company acquired two new wall contracts, one being architectural precast and the other Slenderwall™ precast walls. The architectural contract will start in August 2011 and the Slenderwall™ contract will start in September 2011. There were no Slenderwall™ or miscellaneous wall sales for the same period in 2010. Miscellaneous wall sales for the period consisted mainly of retaining wall panels and special panels for several smaller wall contracts.

Barrier Sales – Barrier sales decreased by 50% during the three months ended of June 30, 2011 compared to the same period in 2010. The decrease in sales relates primarily to the slowdown in federal and state government contracts for road projects. The Company believes that sales of barrier will continue to moderate during the remainder of the year as it is anticipated that federal and state government contracts for road projects will increase only slightly, if at all, during the remainder of the year.

Easi-Set® and Easi-Span® Building Sales – Building sales increased slightly during the three months ended June 30, 2011 compared to the same period in 2010. The increase in building sales relates to a slight up-tick seen in the number of jobs being quoted by the Company in the building market. Management believes building sales will continue to improve slightly during the remainder of 2011.

Utility and Farm Product Sales – Utility and farm product sales decreased slightly for the three months ended June 30, 2011 compared to the same period 2010. The decrease in utility products relates to the completion of a contract for utility manholes for a state highway project in northern Virginia. The Company is aggressively seeking sales of utility products through its marketing and sales staff to maintain and improve sales over the remainder of 2011.

Miscellaneous Product Sales – Miscellaneous products are products produced and sold that do not meet the criteria defined for other revenue categories. For the current period, miscellaneous sales increased by 194% over the same period in 2010. The increase in sales relates to an increased sales effort in miscellaneous products as well as the availability of miscellaneous contracts bidding. Sales includes the manufacture of panels for a Maryland railway station and underground storage facilities. The continued increase in miscellaneous product sales depends in part on the continued availability of these type of jobs and improvement in the construction industry.

Royalty Income – Royalty revenue decreased by 26% during the three months ended June 30, 2011, compared to the same period in 2010, as a result of the continued weakness in federal and state government spending. The Company has increased its advertising expense and is actively working with licensees to help promote their products to increase royalty revenues.

Barrier Rentals – Barrier rentals decreased for the three months ended June 30, 2011 compared to the same period in 2010, primarily due to a large short-term rental contract for a one time project made in the same period of 2010. As previously indicated in the barrier sales section above, the Company anticipates that federal and state government contracts for road projects will increase only slightly during, if at all, the remainder of 2011.

Shipping and Installation – Shipping and installation revenue increased by \$645,799 for the three months ended June 30, 2011 compared to the same period in 2010 due in part to the shipping of soundwall panels which were manufactured and sold in 2010 and early 2011; such panels will not be completely shipped until approximately the end of August 2011. In addition, the Company is currently producing several architectural and Slenderwall™ contracts which require installation as opposed to soundwall panels which normally do not require installation by the Company. Shipping and installation revenue is expected to remain above 2010 levels for the remainder of the year.

Cost of Goods Sold – Total cost of goods sold for the three months ended June 30, 2011 was \$5,392,727, a decrease of \$170,676, or 3%, from \$5,563,403 for the same period in 2010. Total cost of goods sold, as a percentage of total revenue, not including royalties, was 79% for the three months ended June 30, 2011 up from 77% for the same period in 2010. The increase in cost of goods sold as a percentage of total revenue, excluding royalties, was primarily attributable to increases in steel and fuel prices and a product mix that contained several less profitable contracts. The Company is continually seeking to improve its manufacturing processes to help offset these rising costs.

General and Administrative Expenses – For the three months ended June 30, 2011, the Company's general and administrative expenses increased by \$84,226, or 13%, to \$725,660 from \$641,434 during the same period in 2010. The increase in expense primarily resulted from an increase in use tax charged on installation of wall panels and a slight increase in salaries and benefits. As noted in the revenue analysis discussed above, the increase in installation revenue resulted from a significant increase in architectural and Slenderwall™ panel sales for the period. General and administrative expense as a percentage of total revenue was 10% and 8% for the three months ended June 30, 2011 and 2010, respectively.

Selling Expenses – Selling expenses for the three months ended June 30, 2011 increased to \$634,282 from \$613,719 for the same period in 2010, or 3%. There were no significant changes in expense categories during the compared periods.

Operating Income – The Company had operating income for the three months ended June 30, 2011 of \$392,389 compared to operating income of \$873,011 for the same period in 2010, a decrease of \$480,622, or 55%. The decrease in operating income was primarily the result of decreased sales, increased cost of goods sold as a percentage of revenues and increased general and administrative and selling expenses.

Interest Expense – Interest expense was \$37,544 for the three months ended June 30, 2011 compared to \$46,051 for the same period in 2010. The decrease of \$8,507, or 18%, was due primarily to payment of notes payable over the past year.

Income Tax Expense – The Company had income tax expense of \$145,000 for the three months ended June 30, 2011 compared to \$320,993 for the same period in 2010.

Net Income – The Company had net income of \$254,544 for the three months ended June 30, 2011, compared to net income of \$511,195 for the same period in 2010.

Six months ended June 30, 2011 compared to the six months ended June 30, 2010

Revenue By Type

	2011	2010	Change	% of Change
Product Sales:				
Soundwall Sales	\$1,265,695	\$5,215,958	\$(3,950,263)	(76)%

 Total Revenue	 \$14,760,445	 \$14,043,586	 \$716,859	 5%

Wall Sales – Wall sales are generally large contracts issued by general contractors for production and delivery of a specific wall panel for a specific construction project. Changes in the mix of wall sales depend on what contracts are in production during the period. Overall wall sales decreased significantly during the first six months of 2011. The Company acquired several architectural and Slenderwall™ contracts during late 2010 and first quarter of 2011 for production over the remaining year. There were no Slenderwall™ sales for the same period in 2010. During the first three months of 2011, the Company completed production on a large contract that was in process throughout 2010 for the manufacture and delivery of soundwall in the state of Maryland, however, shipping of the completed wall panels will continue through August of 2011. Miscellaneous wall sales for the period consisted mainly of retaining wall panels and special panels for several smaller wall contracts.

Barrier Sales – Barrier sales decreased by 30% for the six months ended June 30, 2011 compared to the same period in 2010. The decrease in sales relates primarily to the slowdown in federal and state government contracts for road projects. The Company anticipates that sales of barrier will moderate during the remainder of the year as it is anticipated that federal and state government contracts for road projects will increase only slightly, if at all, during the remainder of the year.

Easi-Set® and Easi-Span® Building Sales – Building sales increased moderately during the six months ended June 30, 2011 compared to the same period in 2010. The increase in building sales relates to a slight up-tick seen in the number of jobs being quoted by the Company in the building market. Management believes building sales will continue to improve slightly during the remainder of 2011.

Utility and Farm Product Sales – Utility and farm product sales increased moderately for the six months ended June 30, 2011

compared to the same period 2010. The increase relates to a contract awarded to the Company for utility manholes for a state highway project in northern Virginia which was completed in the second quarter of 2011 and an increased sales and marketing effort.

Miscellaneous Product Sales – Miscellaneous products are products produced and sold that do not meet the criteria defined for other revenue categories. The increase in sales relates to an increased sales effort in miscellaneous products as well as the availability of miscellaneous contracts bidding. Sales includes the manufacture of panels for a Maryland railway station and underground storage facilities. The continued increase in miscellaneous product sales depends in part on the continued availability of these type of jobs and improvement in the construction industry.

Royalty Income – Royalty revenue decreased by 26% during the six months ended June 30, 2011, compared to the same period in 2010, as a result of the continued weakness in federal and state government spending. The Company has increased its advertising expense and is actively working with licensees to help promote their products to increase royalty revenues.

Barrier Rentals – Barrier rentals decreased for the six months ended June 30, 2011 compared to the same period in 2010, primarily due to a large short-term rental contract made in the same period of 2010. As previously indicated, it is anticipated that federal and state government contracts for road projects will increase only slightly, if at all, during the remainder of 2011.

Shipping and Installation – Shipping and installation revenue increased by \$1,433,475 for the six months ended June 30, 2011 compared to the same period in 2010 due in part to the shipping of soundwall panels which were manufactured in 2010; such panels will not be completely shipped until approximately the end of August 2011. In addition, the Company is currently producing several architectural and Slenderwall™ contracts which require installation as opposed to soundwall panels which normally do not require installation by the Company. Shipping and installation revenue is expected to remain above 2010 levels for the remainder of the year.

Cost of Goods Sold – Total cost of goods sold for the six months ended June 30, 2011 was \$11,414,166, an increase of \$1,483,221, or 15%, from \$9,930,945 for the same period in 2010. Total cost of goods sold, as a percentage of total revenue, not including royalties, was 81% for the six months ended June 30, 2011 up from 76% for the same period in 2010. The increase in cost of goods sold as a percentage of total revenue, excluding royalties, was primarily attributable to increases in steel and fuel prices and a product mix that contained several less profitable contracts. The Company is continually seeking to improve its manufacturing processes to help offset these rising costs.

General and Administrative Expenses – For the six months ended June 30, 2011, the Company's general and administrative expenses increased by \$267,925, or 22%, to \$1,491,683 from \$1,223,758 during the same period in 2010. The increase in expense primarily resulted from an increase in use tax charged on installation of wall panels and a slight increase in salaries and benefits. As noted in the revenue analysis discussed above, the increase in installation revenue resulted from a significant increase in architectural and Slenderwall™ panel sales for the period. General and administrative expense as a percentage of total revenue was 10% and 9% for the six months ended June 30, 2011 and 2010, respectively.

Selling Expenses – Selling expenses for the six months ended June 30, 2011 increased to \$1,194,588 from \$1,181,500 for the same period in 2010, or 1%. There were no significant changes in expense categories during the compared periods.

Operating Income – The Company had operating income for the six months ended June 30, 2011 of \$660,008 compared to operating income of \$1,707,383 for the same period in 2010, a decrease of \$1,047,375, or 61%. The decrease in operating income was primarily the result of increased cost of goods sold and increased general and

administrative expenses.

Interest Expense – Interest expense was \$72,322 for the six months ended June 30, 2011 compared to \$88,499 for the same period in 2010. The decrease of \$16,177, or 18%, was due primarily to payment of notes payable over the past year.

Income Tax Expense – The Company had income tax expense of \$248,000 for the six months ended June 30, 2011 compared to \$628,000 for the same period in 2010.

Net Income – The Company had net income of \$442,436 for the six months ended June 30, 2011, compared to net income of \$1,011,453 for the same period in 2010.

Liquidity and Capital Resources

The Company has financed its capital expenditures and its operating requirements for the first six months of 2011 primarily from cash balances and a note payable to a bank in the amount of \$575,000. The note was in respect of the proceeds of a bank loan obtained by the Company in April 2011 to finance improvements to its existing commercial building site. The Company had \$3,599,851 of debt obligations at June 30, 2011, of which \$449,174 was scheduled to mature within twelve months. During the six months ended June 30, 2011, the Company made repayments of outstanding debt in the amount \$200,920.

The Company's line of credit in the amount of \$2,000,000 and its equipment guidance line in the amount of \$1,000,000 matured on July 7, 2011. No amounts were outstanding under these lines of credit during the quarter ended June 30, 2011 or at the time of maturity. The Company is currently in discussions with Summit Community Bank regarding the lines of credit and expects, but there can be no assurance, that the lines will be renewed by the end of the third quarter.

At June 30, 2011, the Company had cash totaling \$3,552,136 compared to cash totaling \$2,573,168 on December 31, 2010. The increase in cash is primarily the result of the collection of accounts receivable during the period. During the six months ended June 30, 2011, operating activities provided \$780,520 of cash, investing activities absorbed \$280,750, and financing activities provided \$479,198.

Capital spending totaled \$301,678 for the six months ended June 30, 2011, as compared to \$785,683 for the same period in 2010. The 2011 expenditures were primarily for the upgrade and replacement of property and equipment used in the production process. The Company plans to make additional capital expenditures for routine equipment replacement, productivity improvements, and plant upgrades, which are planned through 2011 based on the continued achievement of operating goals and the availability of funds. The Company is still evaluating its total capital expenditure plans for 2011.

As a result of the Company's existing variable rate debt burden, the Company is sensitive to changes in the prevailing interest rates. Increases in such rates may materially and adversely affect the Company's ability to finance its operations either by increasing the Company's cost to service its current debt, or by creating a more burdensome refinancing environment. Each 1% increase in interest rates affecting the Company's outstanding debt will reduce income by approximately \$35,000 annually.

The Company's cash flow from operations is affected by production schedules set by contractors, which generally provide for payment 35 to 75 days after the products are produced. This payment schedule may result in liquidity problems for the Company because it must bear a portion of the cost of production before it receives payment from its customers. The Company's average days sales outstanding, excluding the effect of unbilled revenue, increased from 67 days for the year ended December 31, 2010 to 84 days for the six months ended June 30, 2011. The increase in days sales outstanding is attributable to several large contracts requiring monies be retained until final inspection. In addition, the current economic conditions have lengthened the average time to pay. Although no assurances can be given, the Company believes that anticipated cash flow from operations and the anticipated lines of credits will be sufficient to finance the Company's operations for at least the next twelve months.

The Company's inventory was \$2,481,353 at June 30, 2011 and at December 31, 2010 was \$1,844,667 or an increase of \$636,686. Inventory turnover was 8.3 for the six months ended June 30, 2011 and 7.3 for the six months ended December 31, 2010, annualized.

Critical Accounting Policies and Estimates

The Company's critical accounting policies are more fully described in its Summary of Accounting Policies to the Company's consolidated financial statements on Form 10-K for the year ended December 31, 2010. The preparation of financial statements in conformity with accounting principles generally accepted within the United States requires management to make estimates and assumptions in certain circumstances that affect amounts reported in the accompanying financial statements and related notes. In preparing these financial statements, management has made its best estimates and judgments of certain amounts included in the financial statements, giving due consideration to materiality. The Company does not believe there is a great likelihood that materially different amounts would be reported related to the accounting policies described below, however, application of these accounting policies involves the exercise of judgment and the use of assumptions as to future uncertainties and as a result, actual results could differ from these estimates.

The Company evaluates the adequacy of its allowance for doubtful accounts at the end of each quarter. In performing this evaluation, the Company analyzes the payment history of its significant past due accounts, subsequent cash collections on

these accounts and comparative accounts receivable aging statistics. Based on this information, along with other related factors, the Company develops what it considers to be a reasonable estimate of the uncollectible amounts included in accounts receivable. This estimate involves significant judgment by the management of the Company. Actual uncollectible amounts may differ from the Company's estimate.

The Company recognizes revenue on the sale of its standard precast concrete products at shipment date, including revenue derived from any projects to be completed under short-term contracts. Installation services for precast concrete products, leasing and royalties are recognized as revenue as they are earned on an accrual basis. Licensing fees are recognized under the accrual method unless collectability is in doubt, in which event revenue is recognized as cash is received. Certain sales of Soundwall, Slenderwall™, and other architectural concrete products are recognized upon completion of units produced under long-term contracts. When necessary, provisions for estimated losses on these contracts are made in the period in which such losses are determined. Changes in job performance, conditions and contract settlements that affect profit are recognized in the period in which the changes occur. Unbilled trade accounts receivable represents revenue earned on units produced for a specific customer contract and not yet billed.

Seasonality

The Company services the construction industry primarily in areas of the United States where construction activity may be inhibited by adverse weather during the winter. As a result, the Company may experience reduced revenues from December through February and realize a more significant part of its revenues during the other months of the year. The Company may experience lower profits, or losses, during the winter months, and as such, must have sufficient working capital to fund its operations at a reduced level until the spring construction season. The failure to generate or obtain sufficient working capital during the winter may have a material adverse effect on the Company.

Inflation

Raw material costs for the Company, steel, cement, aggregates and other direct materials used in production remained relatively stable during 2010; however, the Company has experienced some increases in steel and fuel costs during the first six months of 2011.

Sales Backlog

As of August 2, 2011, the Company's sales backlog was approximately \$8.1 million, as compared to approximately \$11.0 million at the same date in 2010. It is estimated that substantially all of the projects in the sales backlog will be produced within 12 months. The Company also maintains a regularly occurring repeat customer business, which should be considered in addition to the ordered production backlog described above. These orders typically have a quick turn around and represent purchases of a significant portion of the Company's inventoried standard products, such as highway safety barrier, utility and Easi-Set® and Easi-Span® building products. Historically, this regularly occurring repeat customer business has ranged from \$5.0 million to \$7.0 million annually.

ITEM 3. Quantitative and Qualitative Disclosures About Market Risk

Not Applicable

ITEM 4. Controls and Procedures

(a) Disclosure controls and procedures

We carried out our evaluation, under the supervision and with the participation of our management, including our chief executive officer and chief financial officer, of the effectiveness of our disclosure controls and procedures as of the end of the period covered by this report, pursuant to Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended. Based on this evaluation, the chief executive officer and chief financial officer have concluded that the Company's disclosure controls and procedures were effective at June 30, 2011.

(b) Changes in Internal Control over Financial Reporting

There has been no change in the Company's internal control over financial reporting during the three months ended June 30, 2011 that has materially affected, or is reasonably likely to materially affect, its internal control over financial reporting.

PART II — OTHER INFORMATION

ITEM 1. Legal Proceedings

The Company is not presently involved in any litigation of a material nature.
