## **CAUTIONARY STATEMENT REGARDING FORWARD LOOKING STATEMENTS**

As a matter of policy, the Company does not provide forecasts of future financial performance. The statements made in this Form 10-Q Quarterly Report which are not historical facts are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Such forward-looking statements often contain or are prefaced by words such as “believe”, “will” and “expect.” These statements are based on current expectations, estimates and projections about our business based, in part, on assumptions made by management. These statements are not guarantees of future performance and involve risks, uncertainties and assumptions that are difficult to predict. As a result of a number of factors, our actual results could differ materially from those set forth in the forward-looking statements. Certain factors that might cause the Company’s actual results to differ materially from those in the forward-looking statements include, without limitation, general business conditions, the demand for the Company’s services, competitive market pressures, the ability of the Company to attract and retain qualified personnel for regular full-time placement and contract assignments, the possibility of incurring liability for the Company’s business activities, including the activities of its contract employees and events affecting its contract employees on client premises, and the ability to attract and retain qualified corporate and branch management, as well as those risks discussed in the Company’s annual report on Form 10-K for the year ended September 30, 2014, and in other documents which we file with the Securities and Exchange Commission. Any forward-looking statements speak only as of the date on which they are made, and the Company is under no obligation to (and expressly disclaims any such obligation to) and does not intend to update or alter its forward-looking statements whether as a result of new information, future events or otherwise.

## **NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)**

### **1. Description of Business**

General Employment Enterprises, Inc. (the “Company”, “us”, “our” or “we”) was incorporated in the State of Illinois in 1962 and is the successor to employment offices doing business since 1893 and provides staffing services through a network of branch offices located in major metropolitan areas throughout the United States. The Company’s professional staffing services provide information technology, engineering and accounting professionals to clients on either a regular placement basis or a temporary contract basis. The Company’s industrial staffing business provides weekly temporary staffing for light industrial clients in Ohio.

### **2. Significant Accounting Policies and Estimates**

The accompanying unaudited condensed consolidated financial statements of the Company have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Article 8 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete consolidated financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation have been included. Operating results for the three month period ended December 31, 2014 are not necessarily indicative of the results that may be expected for the year ending September 30, 2015. The unaudited condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and footnotes thereto included in the Company's Annual Report on Form 10-K for the year ended September 30, 2014 as filed on December 22, 2014.

#### *Liquidity*

The Company has experienced significant losses and negative cash flows from operations in the past. Management has implemented a strategy which included cost reduction efforts, consolidation of certain back office activities to gain efficiencies as well as identifying strategic acquisitions, financed primarily through the issuance of stock and convertible debt, to improve the overall profitability and cash flows of the Company. In 2013, the Company entered into a three year revolving credit agreement with ACF Finco I LP (formerly Keltic) to provide working capital financing. The agreement allows ACF Finco I LP to advance the Company funds based on a percentage of eligible invoices. Management believes with current cash flow from operations, the preferred offering below and the availability under the ACF Finco I LP loan agreement, the Company will have sufficient liquidity for the next 12 months.

On November 14, 2014, the Company entered into a Securities Purchase Agreement with 18 individuals who collectively have subscribed to purchase a total of 200,000 shares of Preferred Stock from the Company for a total purchase price of \$2,000,000. The purchase price is being held in escrow pending a closing of the transactions set forth in the Agreement. The net proceeds to the Company from the offering will be approximately \$2,000,000, with approximately \$1,000,000 to be used as working capital and the remaining \$1,000,000 for marketing, acquisitions, expansion and to further the operations of the Company. The Preferred Stock was designated by the Company on December 15, 2014 through the filing of a Certificate of Designation of Series A Convertible Preferred Stock with the Illinois Secretary of State. Each share of Preferred Stock is initially convertible, at the election of the holder, into 50 shares of the Company's Common Stock. The foregoing conversion ratio is subject to standard adjustment mechanisms, as set forth in the Designation. The Company completed this transaction on January 8, 2015.

On August 7, 2014, the Company issued a Convertible Note (the "Note") with an original principal balance of \$632,500 to Brio Capital Master Fund LTD ("Brio"), for a purchase price of \$550,000. The Note matures on February 6, 2016, and is payable in thirteen monthly installments of \$48,654, commencing in the sixth month post-closing. Brio has the right, however not the obligation, six months after closing, to convert all or any part of the outstanding Note into the Company's common stock at an initial conversion price of \$0.20 per share. The Company can force conversion if the Company's common stock trades at 250% greater than the conversion price for 20 consecutive trading days. On February 6, 2015, Brio converted \$250,000 of the note into 1,250,000 shares of common stock.

*Principles of Consolidation*

The condensed unaudited consolidated financial statements include the accounts and transactions of the Company and its wholly-owned subsidiaries. All inter-company accounts and transactions are eliminated in consolidation.

*Estimates and Assumptions*

Management makes estimates and assumptions that can affect the amounts of assets and liabilities reported as of the date of the condensed consolidated financial statements, as well as the amounts of reported revenues and expenses during the periods presented. Those estimates and assumptions typically involve expectations about events to occur subsequent to the balance sheet date, and it is possible that actual results could ultimately differ from the estimates. If differences were to occur in a subsequent period, the Company would recognize those differences when they became known. Significant matters requiring the use of estimates and assumptions include, but may not be limited to, deferred income tax valuation allowances, accounts receivable allowances, accounting for acquisitions, accounting for derivatives and evaluation of impairment. Management believes that its estimates and assumptions are reasonable, based on information that is available at the time they are made.

*Revenue Recognition*

Direct hire placement service revenues are recognized when applicants accept offers of employment, less a provision for estimated losses due to applicants not remaining employed for the Company's guarantee period. Contract staffing service revenues are recognized when services are rendered.

Falloffs and refunds during the period are reflected in the unaudited condensed consolidated statements of operations as a reduction of placement service revenues and was \$133,000 and \$104,000 as of December 31, 2014 and 2013 respectively.

*Cost of Contract Staffing Services*

The cost of contract services includes the wages and the related payroll taxes and employee benefits of the Company's employees while they work on contract assignments.

*Cash and Cash Equivalents*

Highly liquid investments with a maturity of three months or less when purchased are considered to be cash equivalents. At December 31, 2014 and September 30, 2014, there were no cash equivalents. The Company maintains deposits in financial institutions in excess of amounts guaranteed by the Federal Deposit Insurance Corporation. Cash and cash equivalents are maintained at financial institutions and, at times, balances may exceed federally insured limits. We have never experienced any losses related to these balances. Beginning in 2013, insurance coverage reverted to \$250,000 per depositor at each financial institution, and our non-interest bearing cash balances may from time to time exceed federally insured limits.

*Accounts Receivable*

The Company extends credit to its various customers based on evaluation of the customer's financial condition and ability to pay the Company in accordance with the payment terms. An allowance for placement fall-offs is recorded, as a reduction of revenues, for estimated losses due to applicants not remaining employed for the Company's guarantee period. An allowance for doubtful accounts is recorded, as a charge to bad debt expense, where collection is considered to be doubtful due to credit issues. These allowances together reflect management's estimate of the potential losses inherent in the accounts receivable balances, based on historical loss statistics and known factors impacting its customers. The nature of the contract service business, where companies are dependent on employees for the production cycle allows for a small accounts receivable allowance. Based on management's review of accounts receivable, an allowance for doubtful accounts of approximately \$425,000 and \$395,000 is considered necessary as of December 31, 2014 and September 30, 2014, respectively. The Company charges uncollectible accounts against the allowance once the invoices are deemed unlikely to be collectible.

### *Property and Equipment*

Property and equipment are recorded at cost. Depreciation expense is calculated on a straight-line basis over estimated useful lives of five years for computer equipment and two to ten years for office equipment, furniture and fixtures. The Company capitalizes computer software purchased or developed for internal use and amortizes it over an estimated useful life of five years. The carrying value of property and equipment is reviewed for impairment whenever events or changes in circumstances indicate that it may not be recoverable. If the carrying amount of an asset group is greater than its estimated future undiscounted cash flows, the carrying value is written down to the estimated fair value. There was no impairment of property and equipment for the three month periods ended December 31, 2014 and 2013.

### *Goodwill*

Goodwill represents the excess of cost over the fair value of the net assets acquired in the various acquisitions. The Company assesses goodwill for impairment at least annually. Testing goodwill for impairment allows the Company to first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If the entity determines that this threshold is not met, then performing the two-step impairment test is unnecessary. An impairment loss would be recognized to the extent the carrying value of goodwill exceeds its implied fair value.

### *Fair Value Measurement*

The Company follows the provisions of the accounting standard which defines fair value, establishes a framework for measuring fair value and enhances fair value measurement disclosure. Under these provisions, fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (i.e., the “exit price”) in an orderly transaction between market participants at the measurement date.

The standard establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use on unobservable inputs by requiring that the most observable inputs be used when available. Observable inputs are inputs that market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the Company. Unobservable inputs are inputs that reflect the Company’s assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The hierarchy is described below:

Level 1: Quoted prices (unadjusted) in active markets that are accessible at the measurement date for assets or liabilities. The fair value hierarchy gives the highest priority to Level 1 inputs.

Level 2: Observable prices that are based on inputs not quoted on active markets, but corroborated by market data.

Level 3: Unobservable inputs are used when little or no market data is available. The fair value hierarchy gives the lowest priority to Level 3 inputs.

The fair value of the Company's current assets and current liabilities, excluding the derivative liability, approximate their carrying values due to their short term nature. The carrying value of the Company's long-term liabilities and the derivative liability represents their fair value based on level 3 inputs, as further discussed in note 8. The Company's goodwill and other intangible assets are measured at fair value on a non-recurring basis using level 3 inputs.

#### *Derivative Financial Instruments*

The Company does not use derivative instruments to hedge exposure to cash flow, market or foreign currency risk. Terms of convertible promissory note instruments are reviewed to determine whether or not they contain embedded derivative instruments that are required under ASC 815 "*Derivative and Hedging*" (ASC 815) to be accounted for separately from the host contract, and recorded on the balance sheet at fair value. The fair value of derivative liabilities, if any, is required to be revalued at each reporting date, with corresponding changes in fair value recorded in current period operating results.

Freestanding warrants issued by the Company in connection with the issuance or sale of debt and equity instruments are considered to be derivative instruments and are evaluated and accounted for in accordance with the provisions of ASC 815. Pursuant to ASC 815, an evaluation of specifically identified conditions is made to determine whether fair value of warrants issued is required to be classified as equity or as a derivative liability.

#### *Intangible Assets*

Customer relationships and trade names were recorded at their estimated fair value at the date of acquisition and are amortized over their estimated useful lives ranging from two to ten years using both accelerated and straight-line methods.

#### *Loss per Share*

Basic loss per share is computed by dividing net loss attributable to common stockholders by the weighted average common shares outstanding for the period. Diluted loss per share is computed giving effect to all potentially dilutive common shares. Potentially dilutive common shares may consist of incremental shares issuable upon the exercise of stock options and warrants and the conversion of notes payable to common stock. In periods in which a net loss has been incurred, all potentially dilutive common shares are considered anti-dilutive and thus are excluded from the calculation. There were no common share equivalents for the three months ended December 31, 2014 and 2013.

#### *Advertising Expenses*

The majority of the Company's advertising expense budget is used to support the Company's business. Most of the advertisements are in print or internet media, with expenses recorded as they are incurred. For the three months ended December 31, 2014 and 2013, included in selling, general and administrative expenses was advertising expense totaling approximately \$207,000 and \$162,000, respectively.

#### *Impairment of Long-lived Assets*

The Company records an impairment of long-lived assets used in operations, other than goodwill, when events or circumstances indicate that the asset might be impaired and the estimated undiscounted cash flows to be generated by those assets over their remaining lives are less than the carrying amount of those items. The net carrying value of assets not recoverable is reduced to fair value, which is typically calculated using the discounted cash flow method.

The Company did not record any impairment during the three months ended December 31, 2014 and 2013.

*Stock-Based Compensation*

The Company accounts for stock-based awards to employees in accordance with applicable accounting principles, which requires compensation expense related to share-based transactions, including employee stock options, to be measured and recognized in the financial statements based on a determination of the fair value of the stock options. The grant date fair value is determined using the Black-Scholes-Merton (“Black-Scholes”) pricing model. For all employee stock options, we recognize expense over the requisite service period on an accelerated basis over the employee’s requisite service period (generally the vesting period of the equity grant). The Company’s option pricing model requires the input of highly subjective assumptions, including the expected stock price volatility, expected term, and forfeiture rate. Any changes in these highly subjective assumptions significantly impact stock-based compensation expense.

Options awarded to purchase shares of common stock issued to non-employees in exchange for services are accounted for as variable awards in accordance with applicable accounting principles. Such options are valued using the Black-Scholes option pricing model.

### *Income Taxes*

We record a provision for income taxes for the anticipated tax consequences of the reported results of operations using the asset and liability method. Under this method, we recognize deferred tax assets and liabilities for the expected future tax consequences of temporary differences between the financial reporting and tax basis of assets and liabilities, as well as for operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using the tax rates that are expected to apply to taxable income for the years in which those tax assets and liabilities are expected to be realized or settled. We record a valuation allowance to reduce our deferred tax assets to the net amount that we believe is more likely than not to be realized.

Due to the private sale of shares of common stock to LEED HR during fiscal 2012 and the resulting change in control, the Company may be limited by Section 382 of the Internal Revenue Code as to the amount of net operating losses that may be used in future years.

We recognize tax benefits from uncertain tax positions only if we believe that it is more likely than not that the tax position will be sustained on examination by the taxing authorities based on the technical merits of the position. Although we believe that we have adequately reserved for our uncertain tax positions, we can provide no assurance that the final tax outcome of these matters will not be materially different. We make adjustments to these reserves when facts and circumstances change, such as the closing of a tax audit or the refinement of an estimate. To the extent that the final tax outcome of these matters is different than the amounts recorded, such differences will affect the provision for income taxes in the period in which such determination is made and could have a material impact on our financial condition and operating results.

### *Reclassification*

Certain reclassifications have been made to the financial statements as of and for the three months ended December 31, 2013 to conform to the current year presentation.

### *Segment Data*

The Company has two operating business segments a) Contract staffing services, and b) Direct hire placement. These operating segments were determined based primarily on how the chief operating decision maker views and evaluates our operations. Operating results are regularly reviewed by the chief operating decision maker to make decisions about resources to be allocated to the segment and to assess its performance. Other factors, including type of business, type of employee, length of employment and revenue recognition are considered in determining these operating

segments.

12

—

### 3. Recent Accounting Pronouncements

On January 9, 2015, the FASB issued ASU 2015-01, *Income Statement – Extraordinary and Unusual Items (Subtopic 225-20): Simplifying Income Statement Presentation by Eliminating the Concept of Extraordinary Items* (“ASU 2015-01”), which eliminates the concept of extraordinary items and the uncertainty in determining when an item is both unusual in nature and infrequent in occurrence. Presently, an event or transaction is presumed to be ordinary activity unless evidence clearly supports the transaction as unusual in nature and infrequent in occurrence. If an event or transaction is determined to be unusual and infrequent, it is deemed to be extraordinary, and is required to be segregated from the results of ordinary operations on the face of the income statement, net of tax, after income from continuing operations, along with other financial statement disclosures. ASU 2015-01 eliminates the concept of extraordinary items from the income statement presentation. Eliminating this concept removes the uncertainty in determining when a transaction is both unusual in nature and infrequent in occurrence. However, the presentation and disclosure guidance for items that are unusual in nature or occur infrequently will be retained and will be expanded to include items that are both unusual in nature and infrequently occurring. ASU 2015-01 aligns U.S. GAAP with International Accounting Standard 1, which prohibits the presentation and disclosure of extraordinary items. ASU 2015-01 is effective for years beginning after December 15, 2015, with early adoption permitted. The Company does not expect that the adoption of ASU 2014-18 will have a material effect on the Company’s consolidated financial statements.

Other recent accounting pronouncements issued by FASB and the SEC did not or are not believed by management to have a material impact on the Company’s present or future financial statements.

### 4. Property and Equipment

Property and equipment, net consisted of the following:

(In thousands)	Useful Lives	December 31 2014	September 30 2014
Computer software	5 years	\$ 1,447	\$ 1,447
Office equipment, furniture and fixtures and leasehold improvements	2 to 10 years	1,413	1,413
Total property and equipment, at cost		2,860	2,860
Accumulated depreciation and amortization		(2,429)	(2,407)
Property and equipment, net		\$ 431	\$ 453

Leasehold improvements are amortized over the term of the lease.

Depreciation expense for the three month periods ended December 31, 2014 and 2013 was approximately \$37,000 and \$44,000, respectively.

## **5. Goodwill and Intangible Assets**

### *Goodwill*

Goodwill represents the excess of cost over the fair value of the net assets acquired from various acquisitions. Goodwill is not amortized. The Company performs a goodwill impairment test annually, by reporting unit, in the fourth quarter of the fiscal year, or whenever potential impairment triggers occur. Should the two-step process be necessary, the first step of the impairment test identifies potential impairment by comparing the fair value of a reporting unit to its carrying value including goodwill. In applying a fair-value-based test, estimates are made of the expected future cash flows to be derived from the reporting unit. Similar to the review for impairment of other long-lived assets, the resulting fair value determination is significantly impacted by estimates of future margins, capital needs, economic trends and other factors. If the carrying value of the reporting unit exceeds its fair value, the second step of the impairment test is performed to measure the amount of impairment loss, if any. The second step of the impairment test compares the implied fair value of the reporting unit goodwill with the carrying amount of that goodwill. An impairment loss would be recognized to the extent the carrying value of goodwill exceeds its implied fair value. There was no impairment recorded during the three month periods ended December 31, 2014 and 2013.

Intangible Assets*As of December 31, 2014*

	<b>(In Thousands)</b>	<b>Cost</b>	<b>Accumulated Amortization</b>	<b>Net Book Value</b>
Customer Relationships	\$	2,690	\$ 1,221	\$ 1,469
Trade Name		17	11	6
	\$	2,707	\$ 1,232	\$ 1,475

*As of September 30, 2014*

	<b>(In Thousands)</b>	<b>Cost</b>	<b>Accumulated Amortization</b>	<b>Net Book Value</b>
Customer Relationships	\$	2,690	\$ 1,137	\$ 1,553
Trade Name		17	10	7
	\$	2,707	\$ 1,147	\$ 1,560

Amortization expense was approximately \$85,000 and \$81,000 for the three months ended December 31, 2014 and 2013, respectively.

The trade names are amortized on a straight – line basis over the estimated useful life of five years. Customer relationships are amortized based on the future undiscounted cash flows over estimated remaining useful lives of three to ten years. Over the next five years, annual amortization expense for these finite life intangible assets will be approximately \$320,000 in 2015, \$320,000 in 2016, \$320,000 in 2017, \$320,000 in 2018 and \$195,000 in 2019.

Long-lived assets, such as purchased intangibles subject to amortization, are reviewed for impairment when events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. The Company regularly evaluates whether events and circumstances have occurred that indicate possible impairment and relies on a number of factors, including operating results, business plans, economic projections, and anticipated future cash flows. The Company uses an estimate of the future undiscounted net cash flows of the related asset or asset group over the remaining life in measuring whether the assets are recoverable.

## 6. Short-term Debt

On September 27, 2013, the Company (“Borrower”) entered into agreements with ACF FINCO I LP (successor-in-interest to Keltic Financial Partners II, LP) (“ACF”) (“Lender”), that provide the Company with long term financing through a six million dollar (\$6,000,000) secured revolving note (the “Note”). The Note has a term of three years and has no amortization prior to maturity. The interest rate for the Note is a fluctuating rate that, when annualized, is equal to the greatest of (A) the Prime Rate plus three and one quarter percent (3.25%), (B) the LIBOR Rate plus six and one quarter percent (6.25%), and (C) six and one half percent (6.50%), with the interest paid on a monthly basis. At December 31, 2014 and 2013 the interest rate was 6.5%. Loan advances pursuant to the Note are based on the accounts receivable balance and other assets. Upon execution of the Note, approximately three million fifty thousand dollars (\$3,050,000) was advanced for the full repayment of the AR Credit Facility and fees from Wells Fargo related to the early termination thereof. At the time of close, there was approximately nine hundred thousand (\$900,000) of availability under the new Note in excess of amounts paid to extinguish the debt and fees with Wells Fargo. The Company incurred certain cash expense and commitment fees related to obtaining the agreement of approximately \$170,000, which has been paid. The Note is secured by all of the Company’s property and assets, whether real or personal, tangible or intangible, and whether now owned or hereafter acquired, or in which it now has or at any time in the future may acquire any right, title or interests. On April 21, 2014, the Company entered into the First Amendment and Waiver to the Loan and Security Agreement with ACF to adjust the covenants. On December 3, 2014, the Company entered into a Second Amendment and Waiver to the Loan and Security Agreement with ACF to adjust the future covenants as outlined below and waived certain defaults. The ACF facility includes certain covenants which require compliance until termination of the agreement. As of the date of this report, the Company was in compliance with all such covenants or had received waivers related thereto.

The Company has several administrative covenants and the following financial covenant:

The Company must maintain the following EBITDA:

(a) The three (3) consecutive calendar month period ending on December 31, 2014, to be a negative number exceeding negative Two Hundred Fifty Thousand and 00/100 Dollars (\$250,000);

(b) The six (6) consecutive calendar month period ending on March 31, 2015, to be a negative number exceeding negative Five Hundred Thousand and 00/100 Dollars (\$500,000);

(c) The nine (9) consecutive calendar month period ending on June 30, 2015, to be a negative number exceeding negative Seven Hundred Fifty Thousand and 00/100 Dollars (\$750,000);

(d) The twelve (12) consecutive calendar month period ending on September 30, 2015, to be a negative number exceeding negative One Million and 00/100 Dollars (\$1,000,000); and

(e) For any period commencing on or after October 1, 2015, no less than such amounts as are established by Lender for such period in Lender's permitted discretion based on the annual financial projections including such period delivered by Borrower.

As of December 31, 2014, the Company was in compliance with the EBITDA covenant and all other administrative covenants. At December 31, 2014, there was approximately \$500,000 available on the line of credit. The interest expense related to the lines of credit for the three months ended December 31, 2014 and 2013 approximated \$79,000 and \$73,000, respectively.

## **7. Accrued Compensation**

In connection with the completion of the sale of shares of common stock to PSQ in fiscal year 2009, the Company's then Chairman, Chief Executive Officer and President (the "former CEO") retired from those positions and his employment agreement with the Company was replaced by a new consulting agreement. On January 31, 2013, he retired from all positions with the Company, however he will continue to receive his monthly payments required

under his consulting agreement. As of December 31, 2014, \$21,000 remains payable under this agreement and is included in accrued compensation.

## 8. Convertible Note

On August 7, 2014, the Company issued a Convertible Note (the "Note") with an original principal balance of \$632,500 to Brio Capital Master Fund LTD ("Brio"), for a purchase price of \$550,000. The Note matures on February 6, 2016, and is payable in thirteen monthly installments of \$48,654, commencing in the sixth month post-closing. Brio has the right, however not the obligation, six months after closing, to convert all or any part of the outstanding Note into the Company's common stock at an initial conversion price of \$0.20 per share. After six months from closing, the conversion price will have a one-time reset to the lower of \$0.20 or 90% of the average of the 3 lowest closing prices for the previous 10 trading days, subject to a floor of \$0.14 per share. The Company can force conversion if the Company's common stock trades at 250% greater than the conversion price for 20 consecutive trading days (see Note 12).

In addition to the Note, the Company issued a warrant to purchase up to 2,371,875 shares of the Company's common stock. The warrant is exercisable at \$0.25 per share, vests 6 months after the closing, and expires 5 years thereafter.

The Convertible Note contains an embedded conversion feature requiring bifurcation and liability treatment. The Company accounted for this conversion feature and the detachable warrants by allocating the proceeds from issuance of the convertible notes to the conversion feature and the warrants. These were based on a relative fair value and the conversion feature was valued by a third party.

To recognize the fair value of the warrants, the Company discounted the note and increased additional paid in capital. The fair value of the conversion feature was approximately \$178,000, the Company discounted the note and created a derivative liability, which will be evaluated each quarter and adjusted for any change in value. For the quarter ended December 31, 2014, the Company recognized interest expense and the amortization of the discount of approximately \$54,000 and recorded a loss on derivative liability of approximately \$3,115,000.

## 9. Equity

On March 31, 2014, the Company entered into a Securities Purchase Agreement (the “SPA”) with Aracle SPF I, LLC (“Aracle”) pursuant to which Aracle and or other subscribed investors had the right to acquire up to 12 units (the “Units”), for \$50,000 per Unit, with each Unit consisting of 250,000 shares of common stock (the “Shares”) of the Company and 125,000 common stock purchase warrants (the “Warrants”). The Warrants are exercisable 6 months after issuance, have a term of 4 years, and have an exercise price of \$0.25 per warrant share. The SPA contains standard representations, warranties, and covenants. In addition, the SPA contains a price adjustment mechanism that requires the Company, with certain exceptions, to issue additional shares of common stock to the investor in the event the Company, within 12 months of the initial closing under the SPA, issues certain equity securities at a price per share less than \$0.20, provided, however, as long as the Company is listed on the NYSE MKT the total number of shares issuable under the foregoing adjustment provision may not exceed 19.9% of the Company’s outstanding shares of common stock on March 30, 2014. Further, in the event the Company is delisted from the NYSE MKT while Aracle owns at least 51% of the Shares issued to it under the SPA, the Company shall issue an additional 3,000,000 shares to Aracle, and the 12 month price adjustment period shall be extended to 36 months. The Company agreed to appoint two new members to the Company’s Board of Directors within 60 days of the initial closing, which new members are subject to the prior approval of Aracle. The Company granted Aracle piggyback registration rights with respect to the Shares and the shares of common stock underlying the Warrants. The Company appointed Mr. Jack Zwick to the Board of Directors and Chairman of the Audit Committee on May 20, 2014, whose appointment was approved by Aracle. The second member has not yet been appointed.

Concurrently with entering into the SPA, the Company and Aracle conducted an initial closing thereunder, in which Aracle purchased 9.5 Units for \$475,000. The Company incurred certain expenses related to the SPA of approximately \$88,000, which were paid from the proceeds.

On April 16, 2014, the Company, Aracle and a second institutional investor (both companies referred to as “Investors”), entered into certain Securities Purchase Agreements (“SPA”) pursuant to which the Investors purchased 2.5 Units for \$125,000. The Company incurred certain expenses related to the SPA of approximately \$7,250, which were paid from the proceeds of this closing.

On November 14, 2014, the Company entered into a Securities Purchase Agreement with 18 individuals who collectively have subscribed to purchase a total of 200,000 shares of Preferred Stock from the Company for a total purchase price of \$2,000,000. The purchase price is being held in escrow pending a closing of the transactions set forth in the Agreement. The net proceeds to the Company from the offering will be approximately \$2,000,000, with approximately \$1,000,000 to be used as working capital and the remaining \$1,000,000 for marketing, acquisitions, expansion and to further the operations of the Company. The Preferred Stock was designated by the Company on December 15, 2014 through the filing of a Certificate of Designation of Series A Convertible Preferred Stock with the Illinois Secretary of State. Each share of Preferred Stock is initially convertible, at the election of the holder, into 50 shares of the Company’s Common Stock. The foregoing conversion ratio is subject to standard adjustment mechanisms, as set forth in the Designation. The Company completed this transaction on January 8, 2015.

*Stock Options*

The Company has recognized compensation expense in the amount of \$52,000 during the quarter ended December 31, 2014, related to the issuance of stock options. The Black-Scholes option pricing model was used to value the options based upon an expected stock price volatility of 97%, a 10 year expected life of the option and a risk free interest rate of 2.75% and 2.71%, respectively. There is approximately \$371,000 of unvested stock compensation that will be recorded over the remaining life of vesting of approximately 2 years.

## 10. Commitments and Contingencies

On April 22, 2013, the Company finalized an Amendment to the Asset Purchase Agreement by and among DMCC Staffing, LLC, an Ohio limited liability company, RFFG of Cleveland, LLC an Ohio limited liability company (each a "Seller" and together, "Sellers"), the Company, and Triad Personnel Services, Inc., an Illinois corporation and wholly owned subsidiary of the Company.

The Company agreed to pay Sellers additional cash consideration of between \$550,000 and \$650,000 depending on the length of payments and 1,100,000 shares of common stock, in full satisfaction of all amounts owed to Seller, related to the Asset Purchase Agreement. The Company issued 1,100,000 shares of common stock on July 2, 2013, which was valued at approximately \$330,000. The Company elected to pay the amount over two years. To date, the Company paid \$275,000 of the cash consideration noted above. The Company has approximately \$160,000, which is included in other current liabilities on the condensed consolidated balance sheet at December 31, 2014, for the liability. There was approximately \$14,000 and \$20,000 of interest recorded for the three month periods ended December 31, 2014 and 2013, respectively.

During 2013, the Company sold vehicles with a value of approximately \$225,000 and leased them back under a 30 month agreement at an interest rate of approximately 23%. At December 31, 2014, approximately \$66,000 is included in other current liabilities related to this transaction.

### Lease

The Company leases space for all of its branch offices, which are located either in downtown or suburban business centers, and for its corporate headquarters. Branch offices are generally leased over periods from three to five years. The corporate office lease expires in 2018. The leases generally provide for payment of basic rent plus a share of building real estate taxes, maintenance costs and utilities.

Rent expense was \$205,000 and \$237,000 for the three month periods ended December 31, 2014 and 2013, respectively. As of December 31, 2014, future minimum lease payments due under non-cancelable lease agreements having initial terms in excess of one year, including certain closed offices, totaled approximately \$904,000, as follows: fiscal 2015 - \$301,000, fiscal 2016 - \$323,000, fiscal 2017 - \$164,000, fiscal 2018 - \$89,000 and thereafter - \$27,000.

## 11. Segment Data

The Company provides the following distinctive services: (a) direct hire placement services, (b) temporary professional services staffing in the fields of information technology, engineering, and accounting, and (c) temporary light industrial staffing. Intersegment net service revenues are not significant. Revenues generated from the temporary professional services staffing and light industrial staffing are classified as contract staffing services revenues in the statements of operations. Selling, general and administrative expenses are not separately allocated among professional services or industrial staffing services within the contract staffing services sector for internal reporting purposes.

Unallocated corporate expenses primarily include, corporate legal expenses, consulting expenses, corporate payroll, audit fees, corporate rent and facility costs, board fees and interest expense.

(In Thousands)	Three Months Ended

## 12. Subsequent Events

Subsequent to year end, a total of 3,094,339 shares of common stock were issued, however no cash was received for these issuances.

1,224,149 shares of common stock were issued related to several cashless warrant conversions.

356,521 shares of common stock were issued to the Board of Directors for services. The Company was relieved of approximately \$71,000 in board fees accrued at December 31, 2014. The Company will record the fair value of the shares at date of issuance as compensation expense, net of any amount already accrued at December 31, 2014.

263,669 shares of common stock were issued to employees of the Company who exercised their stock options on a cashless basis.

Brio converted \$250,000 of its outstanding loan into 1,250,000 shares of the Company's common stock. Based on the closing stock price of \$0.85 per common share, the 1,250,000 shares will convert into approximately \$1,062,500 of equity and the Company will recognize a gain on the conversion on the derivative liability of approximately \$236,000 during the quarter ended March 31, 2015.

On December 11, 2014, General Employment Enterprises, Inc. (the "Company") entered into a Stock Exchange Agreement (the "SCRIBE Agreement") with Brittany M. Dewan as Trustee of the Derek E. Dewan Irrevocable Living Trust II dated the 27<sup>th</sup> of July, 2010, Brittany M. Dewan, individually, Allison Dewan, individually, Mary Menze, individually, and Alex Stuckey, individually (collectively, the "Scribe Shareholders"). Pursuant to the terms of the SCRIBE Agreement the Company will acquire 100% of the outstanding stock of Scribe Solutions Inc., ("Scribe") from the Scribe Shareholders for 640,000 shares of Series A Preferred Stock (the "Preferred Stock") of the Company. In addition, the Company will exchange warrants to purchase up to 6,400,000 shares of the Company's common stock, for \$0.20 per share, with a term of 5 years (the "Warrants"), for Scribe warrants held by two individuals. The issuances of Preferred Stock and Warrants by the Company shall be effected in reliance on the exemptions from registration afforded by Section 4(a)(2) of the Securities Act of 1933, (the "Securities Act"), and Rule 506 of Regulation D promulgated thereunder. The transactions set forth in the SCRIBE Agreement are based on a valuation of Scribe of not less than \$6,400,000.

The transaction has been unanimously approved by the written consent of the Board of Directors of the Company (the "Board") and the holders of a majority of the Company's outstanding common stock. The closing of the transactions set forth in the SCRIBE Agreement is subject to customary conditions to closing, and is expected to occur prior to

March 31, 2015.

**Item Management's Discussion and Analysis of Financial Condition and Results of Operations.  
2.**

**Overview**

The Company was incorporated in the State of Illinois in 1962 and is the successor to employment offices doing business since 1893. The Company provides the following distinctive services: (a) professional placement services specializing in the placement of information technology, engineering, and accounting professionals for direct hire and contract staffing, and (b) temporary staffing services in light industrial staffing.

The Company provides staffing services through a network of branch offices located in major metropolitan areas throughout the United States. The Company's professional staffing services provide information technology, engineering and accounting professionals to clients on either a regular placement basis or a temporary contract basis. The Company's industrial staffing business provides weekly temporary staffing for light industrial clients in Ohio.

Management has implemented a strategy which included cost reduction efforts as well as identifying strategic acquisitions, financed primarily through the issuance of common stock and convertible debt, to improve the overall profitability and cash flows of the Company. We believe our current segments complement one another and position us for future growth.

**Results of Operations – Three Months Ended December 31, 2014 Compared to the Three Months Ended December 31, 2013**

**Results of Operations**

*Net Revenues*

Consolidated net revenues are comprised of the following:

<b>Three Months Ended</b>			
<b>December 31,</b>		<b>\$</b>	<b>%</b>
<b>2014</b>	<b>2013</b>		<b>change</b>

<b>(In thousands)</b>	<b>change</b>				
Placement					
Services	\$ 1,450	\$ 1,738	\$ (288)		(17)%
Professional					
Contract					
Services	1,705	2,176	(471)		(22)
Industrial					
Contract					
Services	6,527	6,893	(366)		(5)
Consolidated					
Net					
Revenues	\$ 9,682	\$ 10,807	\$ (1,125)		(10)%

Consolidated net revenues decreased approximately \$1,125,000 or 10% compared with the same period last year. The Company closed two offices in the industrial contract services division, however this was done as the revenue was determined to be unprofitable and these changes increased the overall profitability of the division. Overall the professional services division had less experienced recruiters working during the period ended December 31, 2014 compared to the prior year, which resulted in the overall decrease in revenue. Management has taken significant action during the course of the year to increase the number of experienced recruiters and improve the profitability of both divisions.

*Cost of Contract Services*

Cost of services includes wages and the related payroll taxes and employee benefits of the Company's employees while they work on contract assignments. Cost of contract services for the three month period ended December 31, 2014 decreased by approximately 12% to approximately \$6,668,000 compared with the prior period of approximately \$7,612,000. Cost of contract services, as a percentage of contract revenue, for the three month period ended December 31, 2014 decreased approximately 1% to 69% compared with the prior period of approximately 70%. The change in the gross margin is related to several factors, including the significant decrease in placement services revenue. The overall decrease in costs of contract services was the result of the decrease in contract revenue. In addition, there was a significant decrease in our workers compensation rates for the state of Ohio, as the rate was decreased by approximately 25% as of July 1, 2014.

Gross Profit percentage by segment:

	<b>Three Months Ended December 31, 2014</b>	<b>Three Months Ended December 31, 2013</b>
<b>Gross Profit Margin %</b>		
Direct hire placement services	100%	100%
Industrial contract services	15.2%	12.9%
Professional contract services	33.7%	31.9%
Combined Gross Profit Margin % (1)	31.1%	29.5%

(1) Includes gross profit from direct hire placements, which all associated costs are recorded as selling, general and administrative expenses.

*Selling, General and Administrative Expenses*

Selling, general and administrative expenses include the following categories:

Compensation in the operating divisions, which includes commissions earned by the Company's employment consultants and branch managers on permanent and temporary placements. It also includes salaries, wages, unrecovered advances against commissions, payroll taxes and employee benefits associated with the management and operation of the Company's staffing offices.

- Administrative compensation, which includes salaries, wages, payroll taxes and employee benefits associated with general management and the operation of the finance, legal, human resources and information technology functions.
- Occupancy costs, which includes office rent, depreciation and amortization, and other office operating expenses.
- Recruitment advertising, which includes the cost of identifying job applicants.
- Other selling, general and administrative expenses, which includes travel, bad debt expense, fees for outside professional services and other corporate-level expenses such as business insurance and taxes.

The Company's largest selling, general and administrative expense is for compensation in the operating divisions. Most of the Company's employment consultants are paid on a commission basis and receive advances against future commissions. When commissions are earned, prior advances are applied against them and the consultant is paid the net amount. At that time, the Company recognizes the full amount as commission expense, and advance expense is reduced by the amount recovered. Thus, the Company's advance expense represents the net amount of advances paid, less amounts applied against commissions.

Selling, general and administrative expenses for the three months ended December 31, 2014 decreased by approximately \$147,000 or 5% compared to the same period last year. The decrease was primarily related to the decrease in sales and management's efforts to reduce costs and eliminate unnecessary expenses. Overall expenses are expected to stabilize during the fiscal year 2015 and slightly decrease as the Company is able to capitalize on the consolidation of the acquisitions.

#### *Interest Expense*

Interest expense for the three months ended December 31, 2014, increased \$27,000, or 23% compared with the same period last year primarily as a result of a change in lender, the interest expense for acquisition payments and higher average borrowings.

#### *Taxes*

There were no credits for income taxes as a result of the pretax losses incurred during the periods because there was not sufficient assurance that future tax benefits would be realized.

### **Liquidity and Capital Resources**

The following table sets forth certain consolidated statements of cash flows data (in thousands):

<b>For the three months ended December</b>	<b>For the three months ended December</b>
--	--

	<b>31, 2014</b>	<b>31, 2013</b>
Cash flows used in operating activities	\$ (850)	\$ (525)
Cash flows used in investing activities	\$ (90)	\$ (126)
Cash flows provided by financing activities	\$ 1,203	\$ 364

As of December 31, 2014, the Company had cash and cash equivalents of approximately \$431,000, which was an increase of approximately \$263,000 from approximately \$168,000 at September 30, 2014. Negative net working capital at December 31, 2014 was approximately \$4,302,000, as compared to negative net working capital of approximately \$909,000 for September 30, 2014. Shareholders' deficiency at December 31, 2014 was approximately \$1,290,000. This is a result of the change in fair value of derivative liability of approximately \$3,115,000, which is a non-cash item. Excluding this, the Company's negative working capital would be approximately \$1,187,000, and shareholder equity would be \$1,825,000.

Net cash used in operating activities for the three months ended December 31, 2014 and 2013 was (\$850,000) and (\$525,000), respectively. The fluctuation is due to the decrease in revenue and resulting decrease in accounts receivable, which were off-set by significant decreases in overall operating liabilities.

Net cash used in investing activities for the three months ended December 31, 2014 and 2013 was (\$90,000) and (\$126,000) respectively. These uses related primarily to acquisition payments and purchasing of fixed assets.

Net cash flow provided by financing activities for the three months ended December 31, 2014 was \$1,203,000 compared to \$364,000 in the three months ended December 31, 2013. Fluctuations in financing activities are attributable to the level of borrowings.

All of the Company's office facilities are leased. As of December 31, 2014, future minimum lease payments under non-cancelable lease commitments having initial terms in excess of one year, including closed offices, totaled approximately \$904,000.

On April 22, 2013, the Company finalized an Amendment to the Asset Purchase Agreement by and among DMCC Staffing, LLC, an Ohio limited liability company, RFFG of Cleveland, LLC an Ohio limited liability company (each a "Seller" and together, "Sellers"), the Company, and Triad Personnel Services, Inc., an Illinois corporation and wholly owned subsidiary of the Company.

The Company agreed to pay the Sellers additional cash consideration of between \$550,000 and \$650,000 depending on the length of payment terms and 1,100,000 shares of common stock, in full satisfaction of all amounts owed to Seller, related to the Asset Purchase Agreement. The Company issued 1,100,000 shares of common stock on July 2, 2013, which was valued at approximately \$330,000. During the year ended September 30, 2013, the Company paid \$200,000 of the cash consideration noted above. The Company accrued \$350,000 at September 30, 2013, for the balance of the liability, however has elected to pay the remaining amount over two years. The total payments over the two years will be approximately \$450,000 with the additional \$100,000 to be recorded as interest expense. During the year ended September 30, 2014, the Company paid approximately \$225,000 to the Sellers, \$150,000 of principle and approximately \$75,000 of interest. The Company has approximately \$160,000 accrued at December 31, 2014 related to the remaining liability.

On September 27, 2013, the Company ("Borrower") entered into agreements with ACF FINCO I LP (successor-in-interest to Keltic Financial Partners II, LP), a limited partnership formed under the laws of the State of Delaware ("ACF") ("Lender") that provide the Company with long term financing through a six million dollar (\$6,000,000) secured revolving note (the "Note"). The Note has a term of three years and has no amortization prior to maturity. The interest rate for the Note is a fluctuating rate that, when annualized, is equal to the greatest of (A) the Prime Rate plus three and one quarter percent (3.25%), (B) the LIBOR Rate plus six and one quarter percent (6.25%),

and (C) six and one half percent (6.50%), with the interest paid on a monthly basis. Loan advances pursuant to the Note are based on the accounts receivable balance and other assets. Upon execution of the Note, approximately three million fifty thousand dollars (\$3,050,000) was advanced for the full repayment of the AR Credit Facility and fees from Wells Fargo related to the early termination thereof. At the time of close, there was approximately nine hundred thousand (\$900,000) of availability under the new Note in excess of amounts paid to extinguish the debt and fees with Wells Fargo. The Company incurred certain cash expense and commitment fees related to obtaining the agreement of approximately \$170,000, which has been paid. The Note is secured by all of the Company's property and assets, whether real or personal, tangible or intangible, and whether now owned or hereafter acquired, or in which it now has or at any time in the future may acquire any right, title or interests. On April 21, 2014, the Company entered into the First Amendment and Waiver to the Loan and Security Agreement with ACF to adjust the covenants. On December 3, 2014, the Company entered into a Second Amendment and Waiver to the Loan and Security Agreement with ACF to adjust the future covenants as outlined below and waived certain defaults. The ACF facility includes certain covenants which require compliance until termination of the agreement. As of the date of this report, the Company was in compliance with all such covenants or had received waivers related thereto.

The Company has several administrative covenants and the following financial covenant:

The Company must maintain the following EBITDA:

(a) The three (3) consecutive calendar month period ending on December 31, 2014, to be a negative number exceeding negative Two Hundred Fifty Thousand and 00/100 Dollars (\$250,000);

(b) The six (6) consecutive calendar month period ending on March 31, 2015, to be a negative number exceeding negative Five Hundred Thousand and 00/100 Dollars (\$500,000);

(c) The nine (9) consecutive calendar month period ending on June 30, 2015, to be a negative number exceeding negative Seven Hundred Fifty Thousand and 00/100 Dollars (\$750,000);

(d) The twelve (12) consecutive calendar month period ending on September 30, 2015, to be a negative number exceeding negative One Million and 00/100 Dollars (\$1,000,000); and

(e) For any period commencing on or after October 1, 2015, no less than such amounts as are established by Lender for such period in Lender's permitted discretion based on the annual financial projections including such period delivered by Borrower.

As of December 31, 2014, the Company was in compliance with the EBITDA covenant and is in compliance with all other administrative covenants. At December 31, 2014, there was approximately \$500,000 available on the line of credit.

On March 31, 2014, the Company entered into a Securities Purchase Agreement (the "SPA") with Aracle SPF I, LLC ("Aracle") pursuant to which Aracle has the right to acquire up to 12 units (the "Units"), for \$50,000 per Unit, with each Unit consisting of 250,000 shares of common stock of the Company and 125,000 common stock purchase warrants. The warrants are exercisable 6 months after issuance, have a term of 4 years, and have an exercise price of \$0.25 per warrant share. The SPA contains standard representations, warranties, and covenants. In addition, the SPA contains a price adjustment mechanism that requires the Company, with certain exceptions, to issue additional shares of common stock to the investor in the event the Company, within 12 months of the initial closing under the SPA, issues certain equity securities at a price per share less than \$0.20, provided, however, as long as the Company is listed on the NYSE MKT the total number of shares issuable under the foregoing adjustment provision may not exceed 19.9% of the Company's outstanding shares of common stock on March 30, 2014. Further, in the event the

Company is delisted from the NYSE MKT while Aracle owns at least 51% of the shares issued to it under the SPA, the Company shall issue an additional 3,000,000 shares to Aracle, and the 12 month price adjustment period shall be extended to 36 months. The Company agreed to appoint two new members to the Company's Board of Directors within 60 days of the initial closing, which new members are subject to the prior approval of Aracle. The Company granted Aracle piggyback registration rights with respect to the shares and the shares of common stock underlying the warrants. The warrants do not include any price protection clause.

Concurrent with the execution of the SPA, the Company and Aracle conducted an initial closing thereunder, in which Aracle purchased 9.5 Units for \$475,000.

On April 16, 2014, the Company, Aracle and a second institutional investor entered into certain Securities Purchase Agreements ("SPA") pursuant to which the investors purchased 2.5 Units for \$125,000.

The Company incurred certain expenses related to the SPA's and the closings thereunder of approximately \$130,000, which were paid from the proceeds for net proceeds of approximately \$470,000.

On August 7, 2014, the Company issued a Convertible Note (the "Note") with an original principal balance of \$632,500 to Brio Capital Master Fund LTD ("Brio"), for a purchase price of \$550,000. The Note matures on February 6, 2016, and is payable in thirteen monthly installments of \$48,654, commencing in the sixth month post-closing. Brio has the right, however not the obligation, six months after closing, to convert all or any part of the outstanding Note into the Company's common stock at an initial conversion price of \$0.20 per share. After six months from closing, the conversion price will have a one-time reset to the lower of \$0.20 or 90% of the average of the 3 lowest closing prices for the previous 10 trading days, subject to a floor of \$0.14 per share. The Company can force conversion if the Company's common stock trades at 250% greater than the conversion price for 20 consecutive trading days.

In addition to the Note, the Company issued a warrant to purchase up to 2,371,875 shares of the Company's common stock. The warrant is exercisable at \$0.25 per share, vests 6 months after the closing, and expires 5 years thereafter.

On November 14, 2014, the Company entered into a Securities Purchase Agreement with 18 individuals who collectively subscribed to purchase a total of 200,000 shares of Preferred Stock from the Company for a total purchase price of \$2,000,000. The Company completed this transaction on January 8, 2015. The net proceeds to the Company from the offering were approximately \$2,000,000, with approximately \$1,000,000 being used as working capital and the remaining \$1,000,000 for marketing, acquisitions, expansion and to further the operations of the Company. The Preferred Stock was designated by the Company on December 15, 2014 through the filing of a Certificate of Designation of Series A Convertible Preferred Stock with the Illinois Secretary of State. Each share of Preferred Stock is initially convertible, at the election of the holder, into 50 shares of the Company's Common Stock. The foregoing conversion ratio is subject to standard adjustment mechanisms, as set forth in the Designation.

On February 6, Brio converted \$250,000 of the outstanding loan into 1,250,000 shares of the Company's common stock. Based on the closing stock price of \$0.85 per common share, the 1,250,000 shares will convert into approximately \$1,062,500 of equity and the Company will recognize a gain on the conversion on the derivative liability of approximately \$236,000 during the second quarter ended March 31, 2015.

In recent years, the Company has incurred significant losses and negative cash flows from operations. Management has implemented a strategy which included cost reduction efforts as well as identifying strategic acquisitions, financed primarily through the issuance of common stock, to improve the overall profitability and cash flows of the Company. Management believes with current cash flow from operations, the preferred offering and the availability under the ACF facility, the Company will have sufficient liquidity for the next 12 months.

### **Off-Balance Sheet Arrangements**

As of December 31, 2014, there were no transactions, agreements or other contractual arrangements to which an unconsolidated entity was a party, under which the Company (a) had any direct or contingent obligation under a guarantee contract, derivative instrument or variable interest in the unconsolidated entity, or (b) had a retained or contingent interest in assets transferred to the unconsolidated entity.

### **Item Quantitative and Qualitative Disclosures About Market Risk.**

**3.**

Not applicable.

**Item Controls and Procedures.**

**4.**

*Disclosure Controls and Procedures*

As of December 31, 2014, the Company's management evaluated, with the participation of its principal executive officer and its principal financial officer, the effectiveness of the Company's disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended (the Exchange Act"). Based on that evaluation, the Company's principal executive officer and its principal financial officer concluded that the Company's disclosure controls and procedures were effective as of December 31, 2014.

*Changes in Internal Control over Financial Reporting*

There were no changes in the Company's internal control over financial reporting or in any other factors that could significantly affect these controls, during the Company's first quarter ended December 31, 2014, that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.
