UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, DC 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934
For the fiscal year ended December 31, 2018
001-35542
(Commission File Number)

(Exact name of registrant as specified in its charter)

Pennsylvania 27-2290659
(State or other jurisdiction of (I.R.S. Employer
incorporation or organization) Identification Number)
1015 Penn Avenue
Suite 103
Wyomissing PA 19610
(Address of principal executive offices)
(610) 933-2000
(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class	Name of Each Exchange on which Registered
Voting Common Stock, par value \$1.00 per share	New York Stock Exchange
Fixed-to-Floating Rate Non-Cumulative Perpetual Preferred Stock, Series C, par value \$1.00 per share	New York Stock Exchange
Fixed-to-Floating Rate Non-Cumulative Perpetual Preferred Stock, Series D, par value \$1.00 per share	New York Stock Exchange
Fixed-to-Floating Rate Non-Cumulative Perpetual Preferred Stock, Series E, par value \$1.00 per share	New York Stock Exchange
Fixed-to-Floating Rate Non-Cumulative Perpetual Preferred Stock, Series F, par value \$1.00 per share	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark whether the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark whether the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was

Edgar Filing: Customers Bancorp, Inc. - Form 10-K

required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check One):

Large accelerated filer Accelerated filer

Non-accelerated filer Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of common stock held by non-affiliates of the registrant was approximately \$833,232,801 as of June 30, 2018, based upon the closing price quoted on the New York Stock Exchange for such date. Shares of common stock held by each executive officer and director have been excluded because such persons may under certain circumstances be deemed to be affiliates. This determination of executive officer or affiliate status is not necessarily a conclusive determination for other purposes.

On February 22, 2019, 31,080,573 shares of common stock were outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's definitive proxy statement to be delivered to shareholders in connection with the 2019 Annual Meeting of Shareholders are incorporated by reference into Part III of this Annual Report.

FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K, as well as other written or oral communications made from time to time by us, contains forward-looking information within the meaning of the safe harbor provisions of the U.S. Private Securities Litigation Reform Act of 1995. These statements relate to future events or future predictions, including events or predictions relating to future financial performance, and are generally identifiable by the use of forward-looking terminology such as “believe,” “expect,” “may,” “will,” “should,” “plan,” “intend,” or “anticipate” or the negative thereof or comparable terminology. Forward-looking statements reflect numerous assumptions, estimates and forecasts as to future events. No assurance can be given that the assumptions, estimates and forecasts underlying such forward-looking statements will accurately reflect future conditions, or that any guidance, goals, targets or projected results will be realized. The assumptions, estimates and forecasts underlying such forward-looking statements involve judgments with respect to, among other things, future economic, competitive, regulatory and financial market conditions and future business decisions, which may not be realized and which are inherently subject to significant business, economic, competitive and regulatory uncertainties and known and unknown risks, including the risks described under “Risk Factors” in this Annual Report on Form 10-K, as such factors may be updated from time to time in our filings with the SEC, including our Quarterly Reports on Form 10-Q. Our actual results may differ materially from those reflected in the forward-looking statements.

In addition to the risks described in the “Risk Factors” section of this Annual Report on Form 10-K and the other reports we file with the SEC, important factors to consider and evaluate with respect to such forward-looking statements include:

- Changes in external competitive market factors that might impact our results of operations;
- Changes in laws and regulations, including without limitation changes in capital requirements under Basel III;
- Changes in our business strategy or an inability to execute our strategy due to the occurrence of unanticipated events;
- Local, regional and national economic conditions and events, including real estate values, and the impact they may have on us and our customers;
- Costs and effects of regulatory and legal developments, including official and unofficial interpretations by regulatory agencies of laws and regulations, the results of regulatory examinations and the outcome of regulatory or other governmental inquiries and proceedings, such as fines or restrictions on our business activities;
- Our ability to attract deposits and other sources of liquidity;
- Changes in the financial performance and/or condition of our borrowers;
- Our ability to access the capital markets to fund our operations and future growth;
- Changes in the level of non-performing and classified assets and charge-offs;
- Changes in estimates of future loan loss reserve requirements based upon the periodic review thereof under relevant regulatory and accounting requirements;
- Inflation, interest rate, securities market and monetary fluctuations;
- Timely development and acceptance of new banking products and services and perceived overall value of these products and services by users, including the products and services being developed and introduced to the market by the BankMobile division of Customers Bank;
- Changes in consumer spending, borrowing and saving habits;
- Technological changes;
- Significant disruption in the technology platforms on which we rely, including security failures, cyberattacks or other breaches of our systems or those of our customers, partners or service providers;
- Continued volatility in the credit and equity markets and its effect on the general economy;
- Effects of changes in accounting policies and practices, as may be adopted by the regulatory agencies, as well as the Public Company Accounting Oversight Board, the Financial Accounting Standards Board and other accounting standard setters;
- Our ability to identify potential candidates for, and consummate, acquisition or investment transactions;
- The timing of acquisition, investment, or disposition transactions;
-

Constraints on our ability to consummate an attractive acquisition or investment transaction because of significant competition for these opportunities;

3

Table of Contents

• The businesses of Customers Bank and any acquisition targets or merger partners and subsidiaries not integrating successfully or such integration being more difficult, time-consuming or costly than expected;

• Material differences in the actual financial results of merger and acquisition activities compared with expectations, such as with respect to the full realization of anticipated cost savings and revenue enhancements within the expected time frame;

• Our ability to successfully implement our growth strategy, increase market share, control expenses and maintain liquidity;

• Customers Bank's ability to pay dividends to Customers Bancorp;

• Risks relating to BankMobile, including:

• The possibility that the expected benefits of retaining BankMobile for 2 - 3 years may not be achieved;

• Material variances in the adoption rate of BankMobile's services by new students and/or the usage rate of BankMobile's services by current student customers compared to our expectations;

• The levels of usage of other BankMobile student customers following graduation of additional product and service offerings of BankMobile or Customers Bank, including mortgages and consumer loans, and the mix of products and services used;

• Our ability to implement changes to BankMobile's product and service offerings under current and future regulations and governmental policies;

• Our ability to effectively manage revenue and expense fluctuations that may occur with respect to BankMobile's student-oriented business activities, which result from seasonal factors related to the higher-education academic year;

• BankMobile's ability to successfully implement its growth strategy, including the successful national launch of its existing white label deposit partnership and the development of other white label relationships, and control expenses.

You are cautioned not to place undue reliance on any forward-looking statements we make, which speak only as of the date they are made. We do not undertake any obligation to release publicly or otherwise provide any revisions to any forward-looking statements we may make, including any forward-looking financial information, to reflect events or circumstances occurring after the date hereof or to reflect the occurrence of unanticipated events, except as may be required under applicable law.

Table of Contents

CUSTOMERS BANCORP, INC. AND SUBSIDIARIES

PART I

Item 1. Business

Customers Bancorp, Inc. (the “Bancorp” or “Customers Bancorp”) is a bank holding company engaged in banking activities through its wholly owned subsidiary, Customers Bank (“Customers Bank” or the “Bank”), collectively referred to as “Customers” herein. Customers Bank is principally a commercial bank that has a branch-light strategy that serves its customers through a single-point-of-contact private banking strategy. In addition, Customers Bank has BankMobile, a division of Customers Bank, which offers state-of-the-art high-tech digital banking services to consumers, students and the “under banked” nationwide, along with “Banking as a Service” offerings with white label partners.

Business Summary

Customers Bancorp, through its wholly owned subsidiary Customers Bank, provides financial products and services to small and middle market businesses, not-for-profits, and consumers through its branches and offices in Southeastern Pennsylvania (Bucks, Berks, Chester, Philadelphia and Delaware Counties); Rye Brook, New York (Westchester County); Hamilton, New Jersey (Mercer County); Boston, Massachusetts; Providence, Rhode Island; Portsmouth, New Hampshire (Rockingham County); Manhattan and Melville, New York; Washington, D.C.; and Chicago, Illinois. Customers Bank also provides liquidity to the mortgage market nationwide through the operation of its loans to mortgage banking businesses. At December 31, 2018, Customers had total assets of \$9.8 billion, including loans, net of the allowance for loan losses (including loans held for sale and loans receivable, mortgage warehouse, at fair value) of \$8.5 billion, total deposits of \$7.1 billion and shareholders’ equity of \$1.0 billion.

Customers differentiates itself through its unique single-point-of-contact business strategy executed by very experienced management teams. Customers’ strategic plan is to become a leading regional bank holding company through organic core loan and deposit growth and value-added acquisitions. Customers differentiates itself from its competitors through its focus on exceptional customer service supported by state-of-the-art technology. The primary customers of Customers Bank are privately held businesses, business customers, not-for-profit organizations and consumers. Customers Bank also focuses on certain low-cost specialty lending areas such as multi-family/commercial real estate lending and lending to commercial mortgage banking businesses. Customers Bank’s lending activities are funded in part by deposits from its branch-light business model, which seeks higher deposit levels per branch than a typical bank, combined with lower branch operating expenses, without sacrificing exceptional customer service and its digital bank deposit offerings. Customers also creates franchise value through its disciplined approach to acquisitions, both in terms of identifying targets and structuring transactions. Enterprise risk management is an important part of the strategies Customers employs.

Customers launched BankMobile as a key strategic initiative in January 2015, recognizing the product delivery flexibility demanded by the millennial generation and the low cost of the smart phone delivery channel. BankMobile refers to Customers’ efforts to build a full-service bank that is accessible to our customers anywhere and anytime through the customer’s smartphone or other web-enabled device. As part of the BankMobile strategic initiative, on June 15, 2016, Customers completed the acquisition of substantially all the assets and the assumption of certain liabilities of the OneAccount Student Checking and Refund Management Disbursement Services business from Higher One. Higher One was acquired by a subsidiary of Blackboard, Inc. in third quarter 2016, and we continue to refer to that combined business as “Higher One” throughout this document. BankMobile, including the Disbursement business, provides a nationwide deposit-aggregation platform. BankMobile focuses on the aggregation of low-cost deposits and currently offers no or low-fee banking, higher than average interest rates on savings and access to over 55,000 ATMs across the U.S. Customers believes that consolidating BankMobile with the Disbursement business uniquely positions it to become the graduating students’ “bank for life” and service each graduate’s financial needs throughout their life. BankMobile’s revenues are largely derived from interchange and card revenue, deposit fees, university card and disbursement fees and university subscription revenue. It is BankMobile’s strategy to disrupt traditional banks’ retail branch customer service delivery model and become the bank of choice for life of college students and middle-income and under-banked Americans using its low-cost digital delivery platform and superior deposit products, serve as a white label deposit partner to large companies, and disrupt payday lenders and high-cost

check lenders by making low-cost quality banking services available to key under-banked markets. BankMobile has focused on the development of its "Banking as a Service" model, including research and development, and technology and product development for its white label partner. BankMobile has obtained and is applying for patents and copyrights to protect key elements of its products and delivery methods. This intellectual property will allow BankMobile to continue to differentiate its business from potential competitors.

7

Table of Contents

The management team of Customers consists of experienced banking executives led by its Chairman and CEO, Jay Sidhu, who joined Customers in June 2009. Mr. Sidhu brings over 40 years of banking experience, including 20 years as the CEO and Chairman of Sovereign Bancorp. In addition to Mr. Sidhu, a number of the members of the current management team have experience working together at Sovereign with Mr. Sidhu. Many other team members who have joined Customers' management team have significant experience helping build and lead other banking organizations. Combined, the Customers management team has significant experience in building a banking organization, completing and integrating mergers and acquisitions and developing valuable community and business relationships in its core markets.

Background and History

Customers Bancorp was incorporated in Pennsylvania in April 2010 to facilitate a reorganization into a bank holding company structure pursuant to which Customers Bank became a wholly owned subsidiary of Customers Bancorp (the "Reorganization") on September 17, 2011. Customers Bancorp's corporate headquarters are located at 1015 Penn Avenue, Wyomissing, Pennsylvania 19610. The main telephone number is (610) 933-2000.

The deposits of Customers Bank are insured by the FDIC. Customers Bank's home office is located at 99 Bridge Street, Phoenixville, Pennsylvania 19460. The main telephone number is (610) 933-2000. BankMobile is a division of Customers Bank, first marketing its deposit products beginning in January 2015. As a division of Customers Bank, BankMobile's deposits are also insured by the FDIC.

Executive Summary

Customers' Markets

Market Criteria

Customers looks to grow organically as well as through selective acquisitions in its current and prospective markets. Customers believes that there is significant opportunity to both enhance its presence in its current markets and enter new complementary markets that meet its objectives. Customers focuses on markets that it believes are characterized by some or all of the following:

- Population density;
- Concentration of business activity;
- Attractive deposit bases;
- Significant market share held by large banks;
- Advantageous competitive landscape that provides opportunity to achieve meaningful market presence;
- Lack of consolidation in the banking sector and corresponding opportunities for add-on transactions;
- Potential for economic growth over time; and
- Management experience in the applicable markets.

BankMobile products are delivered to customers nationwide via its digital delivery channels, such as a smartphone or other web-enabled device. The BankMobile business is currently focused on millennials, now the largest generation in the United States, developing white label relationships with large companies that wish to expand their relationships with their retail customers and employees and the under-banked who can utilize a low-cost banking services provider. As a general retail deposit product and related services provider, the BankMobile segment does not have a dependency on a particular customer, but is focused on providing deposit services to college students who receive federal government loans or grants and to customers of its white label partners. BankMobile currently provides deposit products and services to students on over 700 college and university campuses. Besides the student disbursements, BankMobile has focused on the development of its "Banking as a Service" model. In late November 2018, BankMobile's first white label banking partnership went live in beta test phase, offering BankMobile's best in class banking products to the partner's broad customer base.

Table of Contents

Current Markets

Customers' target market is broadly defined as extending from the Greater Washington, D.C. area to Boston, Massachusetts roughly following Interstate 95. As of December 31, 2018, Customers had bank branches or LPOs serving residents and businesses in the following locations:

Market	Offices	Type
Berks County, PA	4	Branch
Boston, MA	1	LPO
Mercer County, NJ	1	Branch/LPO
New York, NY	1	LPO
Philadelphia-Southeastern, PA	9	Branch/LPO
Portsmouth, NH	1	LPO
Providence, RI	1	LPO
Suffolk County, NY	1	LPO
Westchester County, NY	1	Branch/LPO
Chicago, IL	1	LPO
Washington, D.C.	1	LPO

Customers believes its target market has highly attractive demographic, economic and competitive dynamics that are consistent with its objectives and favorable to executing its organic core loan and deposit growth and acquisition strategies.

The BankMobile suite of deposit products and services is provided nationally through digital delivery channels, such as a smartphone or other web-enabled device. The BankMobile deposit products and services are available nationwide throughout the United States. Customers believes that digital delivery without geographic limitations is the future of retail banking.

Prospective Markets

The organic core loan and deposit growth strategy of Customers focuses on expanding market share in its existing and contiguous markets by generating deposits, loan and fee-based services through its Concierge Banking® high-touch single-point-of-contact personalized service supported by state-of-the-art technology for its commercial, consumer, not-for-profit and specialized lending markets. While Customers has not acquired any banks since 2011, its bank acquisition strategy is focused where such acquisitions further Customers' objectives and meet its critical success factors. Customers will also consider other acquisitions that will contribute to its banking business. As Customers evaluates potential acquisition and asset purchase opportunities, it believes that there are many banking institutions that continue to face credit challenges, capital constraints and liquidity issues and that lack the scale and management expertise to manage the regulatory burden. The BankMobile suite of deposit products and services is delivered through digital delivery channels, such as a smartphone or other web-enabled device across the United States. As such, the product does not have geographic limitations. Currently, BankMobile is focused on the market for deposits but is continuing the development of loan products and relationships with market place lenders that will facilitate competing in loan markets, either as a direct lender or referral to other lenders.

Competitive Strengths

- Experienced and respected management team. An integral element of Customers' business strategy is to capitalize on and leverage the prior experience of its executive management team. The management team is led by Chairman and CEO, Jay Sidhu, who is the former CEO and Chairman of Sovereign Bancorp. In addition to Mr. Sidhu, a number of the members of the current management team of Customers have experience working together at Sovereign with Mr. Sidhu, including Richard Ehst, President and Chief Operating Officer, as well as Jim Collins, Chief Administration Officer. During their tenure at Sovereign, these individuals established a track record of producing strong financial results, integrating acquisitions, managing risk, working with regulators and achieving organic growth and expense control. Team leaders Timothy Romig, Pennsylvania and New Jersey Banking Group Executive Vice President; Steve Issa, New England Marketing President and Chief Lending Officer and Lyle Cunningham, Executive Vice President, Managing Director & Market President - New York Metro, Chicago, and Washington D.C. and Specialty

Finance; all with over 30 years of experience. Ken Keiser, Director of Multi-Family and Investment Commercial Real Estate Lending, leads the commercial real estate and multi-family lending group and brings more than 40 years of experience including oversight of the Mid-Atlantic commercial real estate group at Sovereign. In addition, the banking to mortgage companies group, which

Table of Contents

primarily includes commercial loans (warehouse facilities) to residential mortgage originators is led by Glenn Hedde, President of Warehouse Lending, who brings more than 28 years of experience in this sector. This team has significant experience in successfully building a banking organization as well as existing valuable community and business relationships in our core markets.

Unique Asset and Deposit Generation Strategies. Customers focuses on local market lending combined with relatively low-risk specialty lending segments. Local market asset generation provides various types of business lending products and consumer lending products, such as mortgage loans and home equity loans. Customers has also established a multi-family and commercial real estate product line that is focused on the Mid-Atlantic region, particularly New York City. The strategy is to focus on obtaining deposits and refinancing existing loans with other banks, using teams recruited from other banks, conservative underwriting standards and minimizing costs. Through the multi-family and commercial real estate product, Customers earns interest and fee income and generates commercial deposits. Customers also maintains a specialty lending business, commercial loans to mortgage originators, which is a national business where Customers Bank provides liquidity to non-depository mortgage companies to fund their mortgage pipelines and meet other business needs. Through the loans to mortgage banking businesses, Customers earns interest and fee income and generates core deposits.

BankMobile Strategy. Customers launched BankMobile as a key strategic initiative in January 2015, recognizing the product delivery flexibility demanded by the millennial generation and the low cost of the smartphone delivery channel. BankMobile refers to Customers' efforts to build a full-service bank that is accessible to its customers anywhere and anytime through the customer's smartphone or other web-enabled device. BankMobile provides a nationwide deposit-aggregation platform. BankMobile principally has a "banking as a service" business model and focuses on the aggregation of low-cost deposits and currently offers no or low-fee banking, higher than average interest rates on savings and access to over 55,000 ATMs across the U.S. Customers believes that consolidating BankMobile with the acquired Disbursement business uniquely positions BankMobile to service 1 million students across America and to become the graduating students "bank for life" and service each graduate's financial needs throughout their life. Successful execution of the BankMobile strategy, including its consolidation with the Disbursement business through colleges and universities across America and similar white-label partnerships, greatly accelerates BankMobile's ability to achieve profitability. BankMobile's revenues are largely derived from interchange and card revenue, deposit fees, university card and disbursement fees and university subscription revenue.

Attractive low-credit risk profile. Customers has sought to maintain high asset quality and moderate credit risk by using conservative underwriting standards and early identification of potential problem assets. Customers has also formed a SAG to manage classified and NPAs. As of December 31, 2018, only \$27.5 million, or 0.32%, of Customers Bank's total loan portfolio was non performing.

Superior Community Banking Model. Customers expects to drive organic core loan and deposit growth by employing its Concierge Banking® and single-point-of-contact strategies, which provide specific relationship managers or private bankers for all customers, delivering an appointment banking approach available 12 hours a day, seven days a week. This allows Customers to provide services in a personalized, convenient and expeditious manner. This approach, coupled with superior technology, including remote account opening, remote deposit capture, mobile banking and the first fee-free mobile digital bank, BankMobile, results in a competitive advantage over larger institutions, which management believes contributes to the profitability of its franchise and allows Customers Bank to generate core deposits. The "high-tech, high-touch," model requires less staff and smaller branch locations to operate, thereby significantly reducing operating costs.

Acquisition Expertise. The depth of Customers' management team and their experience working together and successfully completing acquisitions provides unique insight in identifying and analyzing potential markets and acquisition targets. The experience of Customers' team, which includes the acquisition and integration of over 35 institutions, as well as numerous asset and branch acquisitions, provides a substantial advantage in pursuing and consummating future acquisitions. Additionally, management believes Customers' strengths in structuring transactions to limit its risk, its experience in the financial reporting and regulatory process related to troubled bank acquisitions, and its ongoing risk management expertise, particularly in problem loan workouts, collectively enable it to capitalize on the potential of the franchises it acquires. With Customers' depth of operational experience in

connection with completing merger and acquisition transactions, it expects to be able to integrate and reposition acquired franchises cost-efficiently with a minimum disruption to customer relationships. Customers believes its ability to operate efficiently is enhanced by its centralized risk-management structure, its access to attractive labor and real estate costs in its markets, and an infrastructure that is unencumbered by legacy systems. Furthermore,

Table of Contents

Customers anticipates additional expense synergies from the integration of its acquisitions, which it believes will enhance its financial performance.

Segments

Beginning in third quarter 2016, Customers revised its segment financial reporting to reflect the manner in which its chief operating decision makers had begun allocating resources and assessing performance subsequent to Customers' acquisition of the Disbursement business from Higher One and the combination of that business with the BankMobile technology platform late in second quarter 2016.

Management has determined that Customers' operations consist of two reportable segments - Customers Bank Business Banking and BankMobile. Each segment generates revenues, manages risk, and offers distinct products and services to targeted customers through different delivery channels. The strategy, marketing and analysis of these segments vary considerably. For more information on Customers' reportable operating segments, see NOTE 22 - BUSINESS SEGMENTS to the consolidated financial statements.

Products

Customers offers a broad range of traditional loan and deposit banking products and financial services, and non-traditional products and services through the successful launch of BankMobile in January 2015, to its commercial and consumer customers. Customers offers an array of lending products to cater to its customers' needs, including commercial mortgage warehouse loans, multi-family and commercial real estate loans, business banking, small business loans, equipment financing, residential mortgage loans and other consumer loans. Customers also offers traditional deposit products, including commercial and consumer checking accounts, non-interest-bearing demand accounts, MMDA, savings accounts, time deposit accounts and cash management services. Prior to January 2015, deposit products were available to customers only through branches of Customers Bank. With the successful launch of BankMobile, the acquisition of the Disbursement business from Higher One and the combination of that business with the BankMobile platform and its white-label partnership, Customers is able to provide banking to millennials, students, middle class American families and underserved consumers throughout the United States.

BankMobile is focused on providing quality low-cost deposit products and related services to its customers, such as no-or-low-fee checking, no opening balance requirements, instant virtual debit cards and similar customer friendly technology enabled services. Customers can also obtain cash free of any fees from over 55,000 ATMs in the United States. BankMobile has developed its capabilities to deliver retail loan products, such as personal loans and credit cards to its customers, either as a referral or direct lender, as its technological capabilities have developed. In late November 2018, BankMobile's first white label banking partnership went live in beta test phase, offering BankMobile's best in class banking products to the partner's broad customer base.

Lending Activities

Customers Bank focuses its lending efforts on the following lending areas:

Commercial Lending – Customers' focus is on Business Banking (i.e., commercial and industrial lending), including Small and Middle Market Business Banking (including SBA loans), Commercial Loans to Mortgage Companies, and to a lesser extent Multi-Family and Commercial Real Estate Lending, and

Consumer Lending – local-market mortgage and home equity lending.

Commercial Lending

Customers' commercial lending activities are divided into five groups: Business Banking, Small and Middle Market Business Banking, Multi-Family and Commercial Real Estate Lending, Mortgage Banking Lending and Equipment Finance. This grouping is designed to allow for greater resource deployment, higher standards of risk management, strong asset quality, lower interest-rate risk and higher productivity levels.

The commercial lending group focuses primarily on companies with annual revenues ranging from \$1 million to \$100 million, which typically have credit requirements between \$0.5 million and \$10 million.

The small and middle market business banking platform originates loans, including SBA loans, through the branch network sales force and a team of dedicated relationship managers. The support administration of this platform is centralized including risk management, product management, marketing, performance tracking and overall strategy. Credit and sales training has been established for Customers' sales force, ensuring that it has small business experts in place providing appropriate financial

Table of Contents

solutions to the small business owners in its communities. A division approach focuses on industries that offer high asset quality and are deposit rich to drive profitability.

The goal of Customers' multi-family lending group is to manage a portfolio of high-quality multi-family loans within Customers' covered markets while cross-selling other products and services. These lending activities primarily target the refinancing of loans with other banks using conservative underwriting standards and provide purchase money for new acquisitions by borrowers. The primary collateral for these loans is a first-lien mortgage on the multi-family property, plus an assignment of all leases related to such property. During the years ended December 31, 2018 and 2017, Customers originated approximately \$355 million and \$1.2 billion, respectively, of multi-family loans. As part of its strategic initiatives, Customers is deemphasizing its lower-yielding multi-family lending activities and focusing on growing relationship-based commercial and industrial lending activities.

The goal of commercial loans to mortgage companies is to provide liquidity to mortgage companies. The loans are predominately short-term facilities used by mortgage companies to fund their pipelines from closing of individual mortgage loans until their sale into the secondary market. Most of the individual mortgage loans that collateralize our commercial loans to mortgage companies are insured or guaranteed by the U.S. Government through one of its programs, such as FHA, VA, or they are conventional loans eligible for sale to Fannie Mae and Freddie Mac.

Customers is currently expanding its product offerings to mortgage companies to meet a wider array of business needs. During the years ended December 31, 2018 and 2017, Customers Bank funded \$27.2 billion and \$30.1 billion of mortgage loans, respectively, to mortgage originators via warehouse facilities. The commercial loans to mortgage companies are reported as loans receivable, mortgage warehouse, at fair value.

The equipment finance group offers equipment financing and leasing products and services for a broad range of asset classes. It services vendors, dealers, independent finance companies, bank-owned leasing companies and strategic direct customers in the plastics, packaging, machine tool, construction, transportation and franchise markets. As of December 31, 2018 and 2017, Customers had \$172.9 million and \$152.5 million, respectively, of equipment finance loans outstanding. As of December 31, 2018 and 2017, Customers had \$54.5 million and \$26.6 million of equipment finance leases, respectively. As of December 31, 2018 and 2017, Customers had \$54.5 million and \$21.7 million, respectively, of operating leases entered into under this program, net of accumulated depreciation of \$4.8 million and \$0.5 million, respectively.

As of December 31, 2018 and 2017, Customers Bank had \$7.8 billion and \$8.4 billion, respectively, in commercial loans outstanding, composing approximately 91.6% and 96.2%, respectively, of its total loan portfolio, which includes loans held for sale and loans receivable, mortgage warehouse, at fair value. During the years ended December 31, 2018 and 2017, the Bank originated \$600 million and \$1.4 billion, respectively, of commercial loans, exclusive of multi-family loan originations and loans to mortgage originators via warehouse facilities.

Consumer Lending

Customers provides home equity and residential mortgage loans to customers. Underwriting standards for home equity lending are conservative, and lending is offered to solidify customer relationships and grow relationship revenues in the long term. This lending is important in Customers' efforts to grow total relationship revenues for its consumer households. These areas also support Customers' commitment to lower-and-moderate-income families in its market area. Customers plans to expand its product offerings in real estate secured consumer lending, as well as other consumer lending activities, and has announced its entry into the non-QM residential mortgage market.

Customers Bank has launched a community outreach program in Philadelphia to finance homeownership in urban communities. As part of this program, Customers is offering an "Affordable Mortgage Product." This community outreach program is penetrating the underserved population, especially in low-and moderate income neighborhoods. As part of this commitment, a loan production office was opened in Progress Plaza, 1501 North Broad Street, Philadelphia, PA. The program includes homebuyer seminars that prepare potential homebuyers for homeownership by teaching money management and budgeting skills, including the financial responsibilities that come with having a mortgage and owning a home. The "Affordable Mortgage Product" is offered throughout Customers' assessment areas. As of December 31, 2018 and 2017, Customers had \$721.8 million and \$329.8 million, respectively, in consumer loans outstanding, comprising 8.4% and 3.8%, respectively, of Customers' total loan portfolio. During the years ended December 31, 2018 and 2017, Customers purchased \$398.5 million and \$264.1 million of consumer loans,

respectively.

Private Banking

Beginning in 2013, Customers introduced a Private Banking model for its commercial clients in the major markets within its geographic footprint. This unique model provides unparalleled service to customers through an in-market team of experienced

12

Table of Contents

private bankers. Acting as a single-point-of-contact for all the banking needs of Customers' commercial clients, these private bankers deliver the whole bank – not only to its clients, but to their families, their management teams and their employees, as well. With a world-class suite of sophisticated cash management products, these private bankers deliver on Customers' "high-tech, high-touch" strategy and provide real value to its mid-market commercial clients. Customers opened its first private banking representative office in Manhattan in second quarter 2013, and eventually, all of its markets will be served by private bankers.

Deposit Products and Other Funding Sources

Customers offers a variety of deposit products to its customers, including checking accounts, savings accounts, MMDA and other deposit accounts, including fixed-rate, fixed-maturity retail time deposits ranging in terms from 30 days to five years, individual retirement accounts, and non-retail time deposits consisting of jumbo certificates greater than or equal to \$100,000. Using its high touch supported by high tech model, Customers has experienced strong growth in core deposits. Customers also utilizes wholesale deposit products, money market and certificates of deposit obtained through listing services and borrowings from the FHLB as a sources of funding. These funding sources offer attractive funding costs in comparison to traditional sources of funding given the current interest-rate environment.

Financial Products and Services

In addition to traditional banking activities, Customers provides other financial services to its customers, including: mobile phone banking, internet banking, wire transfers, electronic bill payment, lock box services, remote deposit capture services, courier services, merchant processing services, cash vault, controlled disbursements, positive pay and cash management services (including account reconciliation, collections and sweep accounts). In January 2015, Customers successfully launched BankMobile, America's first mobile platform based full-service consumer bank. In June 2016, Customers acquired the Disbursement business of Higher One and subsequently combined that business with the BankMobile platform. The Disbursement business assists higher educational institutions in their distributions of Title IV monies to students. In combining the businesses, BankMobile serviced over 1.0 million active deposit accounts at December 31, 2018.

Competition

Customers competes with other financial institutions for deposit and loan business. Competitors include other commercial banks, savings banks, savings and loan associations, insurance companies, securities brokerage firms, credit unions, finance companies, mutual funds, money market funds and certain government agencies. Financial institutions compete principally on the quality of the services rendered, interest rates offered on deposit products, interest rates charged on loans, fees and service charges, the convenience of banking office locations and hours of operation and in the consideration of larger commercial borrowers, lending limits.

Many competitors are significantly larger than Customers and have significantly greater financial resources, personnel and locations from which to conduct business. In addition, Customers is subject to regulation, while certain of its competitors are not. Non-regulated companies face relatively few barriers to entry into the financial services industry. Customers' larger competitors enjoy greater name recognition and greater resources to finance wide ranging advertising campaigns. Customers competes for business principally on the basis of high-quality, personal service to customers, customer access to Customers' decision makers and competitive interest and fee structure. Customers also strives to provide maximum convenience of access to services by employing innovative delivery vehicles such as internet banking, and the convenience of Concierge Banking® and our single-point-of-contact business model. Customers' current market is primarily served by large national and regional banks, with a few larger institutions capturing more than 50% of the deposit market share. Customers' large competitors primarily utilize expensive, branch-based models to sell products to consumers and small businesses, which requires Customers' larger competitors to price their products with wider margins and charge more fees to justify their higher expense base. While maintaining physical branch locations remains an important component of Customers' strategy, Customers utilizes an operating model with fewer and less expensive locations, thereby lowering overhead costs and allowing for greater pricing flexibility.

BankMobile competes for deposit customers with traditional bank branches that may have a physical presence near the university and college campuses it serves, large national banks, as well as smaller regional or local banks, with other student and disbursement businesses, both banks and prepaid card providers, and with local and national loan

providers. Banks providing student disbursement services include PNC, Wells Fargo Bank, and U.S. Bank. BankMobile continues to develop strategies to white label deposit products to commercial entities, again competing with traditional bank deposit product branch

Table of Contents

delivery channels. In late November 2018, BankMobile's first white label banking partnership went live in beta test phase, offering BankMobile's best in class banking products to the partner's broad customer base.

Employees

As of December 31, 2018, Customers had 827 full-time equivalent team members, including approximately 247 team members dedicated to the BankMobile business segment.

Available Information

Customers Bancorp's internet website address is www.customersbank.com. Information on Customers Bancorp's website is not part of this Annual Report on Form 10-K. Investors can obtain copies of Customers Bancorp's Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and any amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended, on Customers Bancorp's website (accessible under "About Us" – "Investor Relations" – "SEC Filings") as soon as reasonably practicable after Customers Bancorp has filed such materials with, or furnished them to, the Securities and Exchange Commission. Customers Bancorp will also furnish a paper copy of such filings free of charge upon request. Customers Bancorp's filings can also be accessed at the SEC's internet website: www.sec.gov.

SUPERVISION AND REGULATION

GENERAL

Customers Bancorp is subject to extensive regulation, examination and supervision by the Pennsylvania Department of Banking and Securities and, as a member of the Federal Reserve System, by the Federal Reserve Board. Federal and state banking laws and regulations govern, among other things, the scope of a bank's business, the investments a bank may make, the reserves against deposits a bank must maintain, terms of deposit accounts, loans a bank makes, the interest rates it charges and collateral it takes, the activities of a bank with respect to mergers and consolidations and the establishment of branches.

PENNSYLVANIA BANKING LAWS

Pennsylvania banks that are Federal Reserve members may establish new branch offices only after approval by the Pennsylvania Department of Banking and Securities and the Federal Reserve Board. Approval by these regulators can be subject to a variety of factors, including the convenience and needs of the community, whether the institution is sufficiently capitalized and well managed, issues of safety and soundness, the institution's record of meeting the credit needs of its community, whether there are significant supervisory concerns with respect to the institution or affiliated organizations, and whether any financial or other business arrangement, direct or indirect, involving bank "insiders" (directors, officers, employees and 10%-or-greater shareholders) which involves terms and conditions more favorable to the insiders than would be available in a comparable transaction with unrelated parties.

Under the Pennsylvania Banking Code, Customers Bank is permitted to branch throughout Pennsylvania.

Pennsylvania law also provides Pennsylvania state-chartered banks elective parity with the power of national banks, federal thrifts, and state-chartered institutions in other states as authorized by the FDIC, subject to a required notice to the Pennsylvania Department of Banking and Securities. The Pennsylvania Banking Code also imposes restrictions on payment of dividends, as well as minimum capital requirements.

In October 2012, Pennsylvania enacted three laws known as the "Banking Law Modernization Package," all of which became effective on December 24, 2012. The intended goal of the law, which applies to Customers Bank, is to modernize Pennsylvania's banking laws and to reduce regulatory burden at the state level where possible, given the increased regulatory demands at the federal level as described below.

The law also permits banks to disclose formal enforcement actions initiated by the Department, clarifies that the Department has examination and enforcement authority over subsidiaries as well as affiliates of regulated banks and bolsters the Department's enforcement authority over its regulated institutions by clarifying its ability to remove directors, officers and employees from institutions for violations of laws or orders or for any unsafe or unsound practice or breach of fiduciary duty. Changes to existing law also allow the Department to assess civil money penalties of up to \$25,000 per violation.

The law also sets a new standard of care for bank officers and directors, applying the same standard that exists for non-banking corporations in Pennsylvania. The standard is one of performing duties in good faith, in a manner reasonably believed to be in the best interests of the institutions and with such care, including reasonable inquiry, skill

and diligence, as a person of ordinary prudence would use under similar circumstances. Directors may rely in good faith on information, opinions and reports

Table of Contents

provided by officers, employees, attorneys, accountants or committees of the board, and an officer may not be held liable simply because he or she served as an officer of the institution.

Interstate Branching. Federal law allows the Federal Reserve and FDIC, and the Pennsylvania Banking Code allows the Pennsylvania Department of Banking and Securities, to approve an application by a state banking institution to acquire interstate branches. For more information on federal law, see the discussion under “Federal Banking Laws – Interstate Branching” that follows.

Pennsylvania banking laws authorize banks in Pennsylvania to acquire existing branches or branch de novo in other states and also permit out-of-state banks to acquire existing branches or branch de novo in Pennsylvania.

In April 2008, Banking Regulators in the States of New Jersey, New York and Pennsylvania entered into a Memorandum of Understanding (the “Interstate MOU”) to clarify their respective roles, as home and host state regulators, regarding interstate branching activity on a regional basis pursuant to the Riegle-Neal Amendments Act of 1997. The Interstate MOU establishes the regulatory responsibilities of the respective state banking regulators regarding bank regulatory examinations and is intended to reduce the regulatory burden on state-chartered banks branching within the region by eliminating duplicative host state compliance exams.

Under the Interstate MOU, the activities of branches Customers established in New Jersey or New York would be governed by Pennsylvania state law to the same extent that federal law governs the activities of the branch of an out-of-state national bank in such host states. Issues regarding whether a particular host state law is preempted are to be determined in the first instance by the Pennsylvania Department of Banking and Securities. In the event that the Pennsylvania Department of Banking and Securities and the applicable host state regulator disagree regarding whether a particular host state law is pre-empted, the Pennsylvania Department of Banking and Securities and the applicable host state regulator would use their reasonable best efforts to consider all points of view and to resolve the disagreement.

FEDERAL BANKING LAWS

Interstate Branching. The Riegle-Neal Interstate Banking and Branching Efficiency Act of 1994 (called the “Interstate Act”), among other things, permits bank holding companies to acquire banks in any state. A bank may also merge with a bank in another state. Interstate acquisitions and mergers are subject, in general, to certain concentration limits and state entry rules relating to the age of the bank. Under the Interstate Act, the responsible federal regulatory agency is permitted to approve the acquisition of less than all of the branches of an insured bank by an out-of-state bank or bank holding company without the acquisition of an entire bank, only if the law of the state in which the branch is located permits. Under the Interstate Act, branches of state-chartered banks that operate in other states are covered by the laws of the chartering state, rather than the host state. The Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (“Dodd-Frank Act”) created a more permissive interstate branching regime by permitting banks to establish de novo branches in any state if a bank chartered by such state would have been permitted to establish the branch. For more information on interstate branching under Pennsylvania law, see “Pennsylvania Banking Laws – Interstate Branching” above.

Prompt Corrective Action. Federal banking law mandates certain “prompt corrective actions,” which Federal banking agencies are required to take, and certain actions which they have discretion to take, based upon the capital category into which a Federally regulated depository institution falls. Regulations have been adopted by the Federal bank regulatory agencies setting forth detailed procedures and criteria for implementing prompt corrective action in the case of any institution that is not adequately capitalized. Under the rules, an institution will be deemed to be “adequately capitalized” or better if it exceeds the minimum Federal regulatory capital requirements. However, it will be deemed “undercapitalized” if it fails to meet the minimum capital requirements, “significantly undercapitalized” if it has a common equity tier 1 risk-based capital ratio that is less than 3.0%, or has a total risk-based capital ratio that is less than 6.0%, a Tier 1 risk-based capital ratio that is less than 4.0%, or a leverage ratio that is less than 3.0%, and “critically undercapitalized” if the institution has a ratio of tangible equity to total assets that is equal to or less than 2.0%. The rules require an undercapitalized institution to file a written capital restoration plan, along with a performance guaranty by its holding company or a third party. In addition, an undercapitalized institution becomes subject to certain restrictions including a prohibition on the payment of dividends, a limitation on asset growth and expansion, and in certain cases, a limitation on the payment of bonuses or raises to senior executive officers and a prohibition on

the payment of certain “management fees” to any “controlling person.” Institutions that are classified as undercapitalized are also subject to certain additional supervisory actions, including increased reporting burdens and regulatory monitoring, a limitation on the institution’s ability to make acquisitions, open new branch offices, or engage in new lines of business, obligations to raise additional capital, restrictions on transactions with affiliates and restrictions on interest rates paid by the institution on deposits. In certain cases, bank regulatory agencies may require replacement of senior executive officers or directors or sale of the institution to a willing purchaser. If an institution is deemed to be “critically undercapitalized” and

Table of Contents

continues in that category for four quarters, the statute requires, with certain narrowly limited exceptions, that the institution be placed in receivership.

Safety and Soundness; Regulation of Bank Management. The Federal Reserve Board possesses the power to prohibit a bank from engaging in any activity that would be an unsafe and unsound banking practice and in violation of the law. Moreover, Federal law enactments have expanded the circumstances under which officers or directors of a bank may be removed by the institution's Federal supervisory agency; restricted and further regulated lending by a bank to its executive officers, directors, principal shareholders or related interests thereof; restricted management personnel of a bank from serving as directors or in other management positions with certain depository institutions whose assets exceed a specified amount or which have an office within a specified geographic area; and restricted management personnel from borrowing from another institution that has a correspondent relationship with the bank for which they work.

Capital Rules. Federal banking agencies have issued certain "risk-based capital" guidelines, which supplemented existing capital requirements. In addition, the Federal Reserve Board imposes certain "leverage" requirements on member banks. Banking regulators have authority to require higher minimum capital ratios for an individual bank or bank holding company in view of its circumstances.

The risk-based capital guidelines require all banks and bank holding companies to maintain capital levels in compliance with "risk-based capital" ratios. In these ratios, the on-balance-sheet assets and off-balance sheet exposures are assigned a risk-weight based upon the perceived and historical risk of incurring a loss of principal from that exposure. The risk-based capital rules are designed to make regulatory capital requirements more sensitive to differences in risk profiles among banks and bank holding companies and to minimize disincentives for holding liquid assets.

The risk-based capital rules also may consider interest-rate risk. Institutions with interest-rate risk exposure above a normal level would be required to hold extra capital in proportion to that risk. Customers currently monitors and manages its assets and liabilities for interest-rate risk, and management believes that the interest-rate risk rules which have been implemented and proposed will not materially adversely affect its operations.

The Federal Reserve Board's "leverage" ratio rules require member banks which are rated the highest in the composite areas of capital, asset quality, management, earnings and liquidity to maintain a ratio of "Tier 1" capital to "adjusted total assets" of not less than 3.0%. For banks which are not the most highly rated, the minimum "leverage" ratio will range from 4.0% to 5.0%, or higher at the discretion of the Federal Reserve Board, and is required to be at a level commensurate with the nature of the level of risk of the bank's condition and activities.

For purposes of the capital requirements, "Tier 1," or "core," capital is defined to include common shareholders' equity and certain noncumulative perpetual preferred stock and related surplus. "Tier 2," or "qualifying supplementary," capital is defined to include a bank's allowance for loan losses up to 1.25% of risk-weighted assets, plus certain types of preferred stock and related surplus, certain "hybrid capital instruments" and certain term subordinated debt instruments.

Capital Rules. In July 2013, the Federal Reserve approved final rules that substantially amend the regulatory risk-based capital rules applicable to the Bancorp and Customers Bank. The FDIC and the OCC have subsequently approved these rules. The final rules were adopted following the issuance of proposed rules by the Federal Reserve in June 2012 and implement the "Basel III" regulatory capital reforms and changes required by the Dodd-Frank Act. "Basel III" refers to two consultative documents released by the Basel Committee on Banking Supervision in December 2009, the rules text released in December 2010 and loss absorbency rules issued in January 2011, which include significant changes to bank capital, leverage and liquidity requirements.

The rules include risk-based capital and leverage ratios, planned to be phased in from 2015 to 2019, and refine the definition of what constitutes "capital" for purposes of calculating those ratios. Effective January 1, 2015, the new minimum capital level requirements applicable to the Bancorp and Customers Bank under the final rules were:

- (i) a common equity Tier 1 risk-based capital ratio of 4.5%;
- (ii) a Tier 1 risk-based capital ratio of 6%;
- (iii) a total risk-based capital ratio of 8% and
- (iv) a Tier 1 leverage ratio of 4% for all institutions.

The final rules also establish a "capital conservation buffer" above the new regulatory minimum capital requirements.

The capital conservation buffer will be phased-in over four years beginning on January 1, 2016, as follows: the maximum buffer will be 0.625% of risk-weighted assets for 2016, 1.25% for 2017, 1.875% for 2018, and 2.5% for 2019 and thereafter.

Table of Contents

Effective January 1, 2018, the minimum capital level requirements (including the capital conservation buffer) applicable to the Bancorp and Customers Bank under the final rules are:

- (i) a common equity Tier 1 capital ratio of 6.375%;
- (ii) a Tier 1 risk-based capital ratio of 7.875%; and
- (iii) a total risk-based capital ratio of 9.875%.

Considering the capital conservation buffer, to avoid limitations on certain actions or activities, banks will be required to maintain the following ratios beginning January 1, 2019:

- (i) a common equity Tier 1 capital ratio of 7.0%;
- (ii) a Tier 1 risk-based capital ratio of 8.5%; and
- (iii) a total risk-based capital ratio of 10.5%.

Under the final rules, institutions are subject to limitations on paying dividends, engaging in share repurchases and paying discretionary bonuses if their capital levels fall below the minimum capital level plus capital conservation buffer amount. These limitations establish a maximum percentage of eligible retained income that could be utilized for such actions.

Basel III provided discretion for regulators to impose an additional buffer, the “countercyclical buffer,” of up to 2.5% of common equity Tier 1 capital to take into account the macro-financial environment and periods of excessive credit growth. However, the final rules permit the countercyclical buffer to be applied only to “advanced approach banks” (i.e., banks with \$250 billion or more in total assets or \$10 billion or more in total foreign exposures), which currently excludes the Bancorp and Customers Bank. The final rules also implement revisions and clarifications consistent with Basel III regarding the various components of Tier 1 capital, including common equity, unrealized gains and losses, as well as certain instruments that will no longer qualify as Tier 1 capital, some of which will be phased out over time. However, the final rules provide that small depository institution holding companies with less than \$15 billion in total assets as of December 31, 2009, (which includes the Bancorp) will be able to permanently include non-qualifying instruments that were issued and included in Tier 1 or Tier 2 capital prior to May 19, 2010, as additional Tier 1 or Tier 2 capital until they redeem such instruments or until the instruments mature.

In addition, the final rules provide for smaller banking institutions (less than \$250 billion in consolidated assets) an opportunity to make a one-time election to opt out of including most elements of AOCI in regulatory capital. Importantly, the opt-out excludes from regulatory capital not only unrealized gains and losses on available-for-sale debt securities, but also accumulated net gains and losses on cash-flow hedges and amounts attributable to defined benefit postretirement plans. Customers Bank selected the opt-out election in its March 31, 2015 Call Report. The final rules also contain revisions to the prompt corrective action framework, which is designed to place restrictions on insured depository institutions, including Customers Bank, if their capital levels begin to show signs of weakness. These revisions took effect on January 1, 2015. Under the prompt corrective action requirements, which are designed to complement the capital conservation buffer, insured depository institutions will be required to meet the following increased capital level requirements in order to qualify as “well capitalized:”

- (i) a common equity Tier 1 capital ratio of 6.5%;
- (ii) a Tier 1 risk-based capital ratio of 8%;
- (iii) a total risk-based capital ratio of 10%; and
- (iv) a Tier 1 leverage ratio of 5%.

The final rules set forth certain changes for the calculation of risk-weighted assets, which were required to be utilized as of January 1, 2015. The standardized approach final rule utilizes an increased number of credit-risk exposure categories and risk weights and also addresses:

- (i) an alternative standard of creditworthiness consistent with Section 939A of the Dodd-Frank Act;
- (ii) revisions to recognition of credit-risk mitigation;
- (iii) rules for risk weighting of equity exposures and past-due loans;
- (iv) revised capital treatment for derivatives and repo-style transactions and
- (v) disclosure requirements for top-tier banking organizations with \$50 billion or more in total assets that are not subject to the “advance approach rules” that apply to banks with greater than \$250 billion in consolidated assets.

Table of Contents

In addition, in December 2018, the U.S. federal banking agencies finalized rules that would permit bank holding companies and banks to phase-in, for regulatory capital purposes, the day-one impact of the new current expected credit loss accounting rule on retained earnings over a period of three years.

As of December 31, 2018 and 2017, Customers Bank and the Bancorp met all capital adequacy requirements to which they were subject. For additional information on Customers' regulatory capital ratios, refer to "NOTE 17 – REGULATORY MATTERS" to the consolidated financial statements.

Dodd-Frank Wall Street Reform and Consumer Protection Act. The Dodd-Frank bill was enacted by Congress on July 15, 2010, and was signed into law by President Obama on July 21, 2010. Among many other provisions, the legislation:

- established the Financial Stability Oversight Council, a federal agency acting as the financial system's systemic risk regulator with the authority to review the activities of significant bank holding companies and non-bank financial firms, to make recommendations and impose standards regarding capital, leverage, conflicts and other requirements for financial firms and to impose regulatory standards on certain financial firms deemed to pose a systemic threat to the financial health of the U.S. economy;

- created a new CFPB within the U.S. Federal Reserve, which has substantive rule-making authority over a wide variety of consumer financial services and products, including the power to regulate unfair, deceptive or abusive acts or practices;

- permitted state attorney generals and other state enforcement authorities broader power to enforce consumer protection laws against banks;

- authorized federal regulatory agencies to ban compensation arrangements at financial institutions that give employees incentives to engage in conduct that could pose risks to the nation's financial system;

- granted the U.S. Government resolution authority to liquidate or take emergency measures with regard to troubled financial institutions, such as bank holding companies, that fall outside the existing resolution authority of the FDIC; required that the amount of any interchange fee charged by a debit card issuer with respect to a debit card transaction must be reasonable and proportional to the cost incurred by the issuer. On June 29, 2011, for banks with assets of \$10 billion or greater, the Federal Reserve Board set the interchange rate cap at \$0.21 per transaction and 5 basis points multiplied by the value of the transaction;

- gave the FDIC substantial new authority and flexibility in assessing deposit insurance premiums, which may result in increased deposit insurance premiums for Customers in the future;

- increased the deposit insurance coverage limit for insurable deposits to \$250,000 generally, and removes the limit entirely for transaction accounts;

- permitted banks to pay interest on business demand deposit accounts;

- extended the national bank lending (or loans-to-one-borrower) limits to other institutions;

- prohibited banks subject to enforcement action such as a memorandum of understanding from changing their charter without the approval of both their existing charter regulator and their proposed new charter regulator; and

- imposed new limits on asset purchase and sale transactions between banks and their insiders.

The EGRRCPA was signed into law by President Trump on May 24, 2018 and directs the Federal Reserve Board to monitor emerging risks to financial stability and enact supervision and prudential standards applicable to bank holding companies with total assets of \$250 billion or more and non-bank covered companies designated as systematically important by the Financial Stability Oversight Council. In general, the EGRRCPA increases the statutory asset threshold, defined in the Dodd-Frank Act, above which the Federal Reserve is required to apply these enhanced prudential standards from \$50 billion to \$250 billion and immediately raised the asset threshold for stress testing from \$10 billion to \$100 billion for bank holding companies. Bank holding companies with \$250 billion or more in total consolidated assets remain fully subject to the Dodd-Frank Act's enhanced prudential standards requirements. As a result, Customers is no longer subject to stress testing regulations or any requirement to publish the results of our stress testing. Customers will continue to perform certain stress tests internally and incorporate the economic models and information developed through our stress testing program into our risk management and business planning activities.

In July 2018, the Federal Reserve stated that it would no longer require bank holding companies with less than \$100 billion in total consolidated assets to comply with the modified version of the liquidity coverage ratio. In addition, in October 2018, the federal bank regulators proposed to revise their liquidity requirements so that banking organizations that are not global

Table of Contents

systemically important banks and have less than \$250 billion in total consolidated assets and less than \$75 billion in each of off-balance-sheet exposure, nonbank assets, cross-jurisdictional activity and short-term wholesale funding would not be subject to any liquid coverage ratio or net stable funding ratio requirements.

In February 2014, the Federal Reserve adopted rules to implement certain of these enhanced prudential standards. Beginning in 2015, the rules require publicly traded bank holding companies with \$10 billion or more in total consolidated assets to establish risk committees and require bank holding companies with \$50 billion or more in total consolidated assets to comply with enhanced liquidity and overall risk management standards. Customers has established a risk committee and is in compliance with this requirement. In October 2018, the Federal Reserve and the other federal bank regulators proposed rules that would tailor the application of the enhanced prudential standards to bank holding companies and depository institutions pursuant to the EGRRCPA amendments, including by raising the asset threshold for application of many of these standards. For example, all publicly traded bank holding companies with \$50 billion or more in total consolidated assets would be required to maintain a risk committee.

Many of these provisions are subject to further rule making and to the discretion of regulatory bodies, including Customers Bank's primary federal banking regulator, the Federal Reserve. It is not possible to predict at this time the extent to which regulations authorized or mandated by the Dodd-Frank Act and EGRRCPA will impose requirements or restrictions on Customers Bank in addition to or different from the provisions summarized above.

Regulatory Reform and Legislation. From time to time, various legislative and regulatory initiatives are introduced in Congress and state legislatures, as well as by regulatory agencies. Such initiatives may include proposals to expand or contract the powers of bank holding companies and depository institutions or proposals to substantially change the financial institution regulatory system. Such legislation could change banking statutes and the operating environment of Customers in substantial and unpredictable ways. If enacted, such legislation could increase or decrease the cost of doing business, limit or expand permissible activities or affect the competitive balance among banks, savings associations, credit unions and other financial institutions. Customers cannot predict whether any such legislation will be enacted, and, if enacted, the effect that it, or any implementing regulations, would have on its financial condition or results of operations. A change in statutes, regulations or regulatory policies applicable to Customers or our subsidiaries could have a material effect on our business, financial condition and results of operations.

Deposit Insurance Assessments. Customers Bank's deposits are insured by the FDIC up to the limits set forth under applicable law and are subject to deposit insurance premium assessments. The FDIC imposes a risk-based deposit premium assessment system, which was amended pursuant to the Federal Deposit Insurance Reform Act of 2005 (the "Act"). Under this system, the amount of FDIC assessments paid by an individual insured depository institution, like Customers Bank, is based on the level of perceived risk incurred in its activities. The FDIC places a depository institution in one of four risk categories determined by reference to its capital levels and supervisory ratings. In addition, in the case of those institutions in the lowest risk category, the FDIC further determines its assessment rates based on certain specified financial ratios.

In February 2011, the FDIC adopted a final rule modifying the risk-based assessment system and setting initial base assessment rates beginning in April 2011, ranging from 2.5 to 45 basis points of Tier I capital.

In addition to deposit insurance assessments, banks are subject to assessments to pay the interest on Financing Corporation bonds. The Financing Corporation was created by Congress to issue bonds to finance the resolution of failed thrift institutions. The FDIC sets the Financing Corporation assessment rate every quarter.

Community Reinvestment Act. Under the Community Reinvestment Act of 1977, the record of a bank holding company and its subsidiary banks must be considered by the appropriate Federal banking agencies, including the Federal Reserve Board, in reviewing and approving or disapproving a variety of regulatory applications including approval of a branch or other deposit facility, office relocation, a merger and certain acquisitions. Federal banking agencies have demonstrated an increased readiness to deny applications based on unsatisfactory CRA performance. The Federal Reserve Board is required to assess Customers' record to determine if it is meeting the credit needs of the community, including the low-and-moderate-income neighborhoods that it serves. The Financial Institutions Reform, Recovery, and Enforcement Act of 1989 amended the CRA to require, among other things, that the Federal Reserve Board make publicly available an evaluation of the bank's record of meeting the credit needs of its entire community, including low-and-moderate-income neighborhoods. This evaluation includes a descriptive rating (outstanding,

satisfactory, needs to improve or substantial noncompliance) and a statement describing the basis for the rating. Incentive Compensation. In June 2010, the Federal Reserve Board, OCC and FDIC issued comprehensive final guidance on incentive compensation policies intended to ensure that the incentive compensation policies of banking organizations do not undermine the safety and soundness of such organizations by encouraging excessive risk-taking. The guidance, which covers all employees that have the ability to materially affect the risk profile of an organization, either individually or as part of a

Table of Contents

group, is based upon the key principles that a banking organization's incentive compensation arrangements should (i) provide incentives that do not encourage risk-taking beyond the organization's ability to effectively identify and manage risks, (ii) be compatible with effective internal controls and risk management and (iii) be supported by strong corporate governance, including active and effective oversight by the organization's board of directors.

The Federal Reserve Board will review, as part of the regular, risk-focused examination process, the incentive compensation arrangements of banking organizations, such as Customers, that are not "large, complex banking organizations." These reviews will be tailored to each organization based on the scope and complexity of the organization's activities and the prevalence of incentive compensation arrangements. The findings of the supervisory initiatives will be included in reports of examination. Deficiencies will be incorporated into the organization's supervisory ratings, which can affect the organization's ability to make acquisitions and take other actions.

Enforcement actions may be taken against a banking organization if its incentive compensation arrangements, or related risk-management control or governance processes, pose a risk to the organization's safety and soundness, and the organization is not taking prompt and effective measures to correct the deficiencies.

In addition, Section 956 of the Dodd-Frank Act required certain regulators (including the FDIC, SEC and Federal Reserve Board) to adopt requirements or guidelines prohibiting excessive compensation. In April and May 2016, the Federal Reserve, jointly with five other federal regulators, published a proposed rule in response to Section 956 of the Dodd-Frank Act, which requires implementation of regulations or guidelines to: (i) prohibit incentive-based payment arrangements that encourage inappropriate risks by certain financial institutions by providing excessive compensation or that could lead to material financial loss and (ii) require those financial institutions to disclose information concerning incentive-based compensation arrangements to the appropriate federal regulator.

The proposed rule identifies three categories of institutions that would be covered by these regulations based on average total consolidated assets, applying less prescriptive incentive-based compensation program requirements to the smallest covered institutions (Level 3) and progressively more rigorous requirements to the larger covered institutions (Level 1). Under the proposed rule, Customers would fall into the smallest category (Level 3), which applies to financial institutions with average total consolidated assets greater than \$1 billion and less than \$50 billion. The proposed rules would establish general qualitative requirements applicable to all covered entities, which would include (i) prohibiting incentive arrangements that encourage inappropriate risks by providing excessive compensation; (ii) prohibiting incentive arrangements that encourage inappropriate risks that could lead to a material financial loss; (iii) establishing requirements for performance measures to appropriately balance risk and reward; (iv) requiring board of director oversight of incentive arrangements and (v) mandating appropriate record keeping. Under the proposed rule, larger financial institutions with total consolidated assets of at least \$50 billion would also be subject to additional requirements applicable to such institutions' "senior executive officers" and "significant risk-takers." These additional requirements would not be applicable to Customers because it currently has less than \$50 billion in total consolidated assets. Comments on the proposed rule were due by July 22, 2016. As of the date of this document, the final rule has not yet been published by these regulators.

Consumer Protection Laws. Customers Bank is subject to a variety of consumer protection laws, including the Truth in Lending Act, the Truth in Savings Act adopted as part of the FDICIA, the Equal Credit Opportunity Act, the Home Mortgage Disclosure Act, the Electronic Funds Transfer Act, the Real Estate Settlement Procedures Act and the regulations adopted thereunder. In the aggregate, compliance with these consumer protection laws and regulations involves substantial expense and administrative time on the part of Customers.

UDAP and UDAAP. Banking regulatory agencies have increasingly used a general consumer protection statute to address "unethical" or otherwise "bad" business practices that may not necessarily fall directly under the purview of a specific banking or consumer finance law. The law of choice for enforcement against such business practices has been Section 5 of the FTC Act, which is the primary federal law that prohibits unfair or deceptive acts or practices, referred to as "UDAP," and unfair methods of competition in or affecting commerce. "Unjustified consumer injury" is the principal focus of the FTC Act. Prior to the Dodd-Frank Act, there was little formal guidance to provide insight to the parameters for compliance with UDAP laws and regulations. However, UDAP laws and regulations have been expanded under the Dodd-Frank Act to apply to "unfair, deceptive or abusive acts or practices," referred to as "UDAAP," which have been delegated to the CFPB for supervision. The CFPB has published its first Supervision and

Examination Manual that addresses compliance with and the examination of UDAAP.

Bank Holding Company Regulation

As a bank holding company, Customers Bancorp is also subject to additional regulation.

The Bank Holding Company Act requires the Bancorp to secure the prior approval of the Federal Reserve Board before it owns or controls, directly or indirectly, more than five percent (5%) of the voting shares or substantially all of the assets of any bank.

Table of Contents

It also prohibits acquisition by the Bancorp of more than five percent (5%) of the voting shares of, or interest in, or all or substantially all of the assets of, any bank located outside of the state in which a current bank subsidiary is located unless such acquisition is specifically authorized by laws of the state in which such bank is located. A bank holding company is prohibited from engaging in or acquiring direct or indirect control of more than five percent (5%) of the voting shares of any company engaged in non-banking activities unless the Federal Reserve Board, by order or regulation, has found such activities to be so closely related to banking or managing or controlling banks as to be a proper incident thereto. In making this determination, the Federal Reserve Board considers whether the performance of these activities by a bank holding company would offer benefits to the public that outweigh the possible adverse effects. Applications under the Bank Holding Company Act and the Change in Control Act are subject to review, based upon the record of compliance of the applicant with the CRA.

The Bancorp is required to file an annual report with the Federal Reserve Board and any additional information that the Federal Reserve Board may require pursuant to the Bank Holding Company Act. Further, under Section 106 of the 1970 amendments to the Bank Holding Company Act and the Federal Reserve Board's regulations, a bank holding company and its subsidiaries are prohibited from engaging in certain tie-in arrangements in connection with any extension of credit or provision of credit or provision of any property or services. The so-called "anti-tie-in" provisions state generally that a bank may not extend credit, lease, sell property or furnish any service to a customer on the condition that the customer obtains additional credit or service from the bank, or on the condition that the customer not obtain other credit or service from a competitor.

The Federal Reserve Board permits bank holding companies to engage in non-banking activities so closely related to banking or managing or controlling banks as to be a proper incident thereto. A number of activities are authorized by Federal Reserve Board regulation, while other activities require prior Federal Reserve Board approval. The types of permissible activities are subject to change by the Federal Reserve Board.

Item 1A. Risk Factors

Risks Related to the Bancorp's Banking Operations

If our allowance for loan losses is insufficient to absorb losses in our loan portfolio, our earnings could decrease. Lending money is a substantial part of our business, and each loan carries a certain risk that it will not be repaid in accordance with its terms or that any underlying collateral will not be sufficient to assure repayment. This risk is affected by, among other things:

- the financial condition and cash flows of the borrower and/or the project being financed;
- the changes and uncertainties as to the future value of the collateral, in the case of a collateralized loan;
- the discount on the loan at the time of its acquisition and capital, which could have regulatory implications;
- the duration of the loan;
- the credit history of a particular borrower; and
- changes in economic and industry conditions.

At December 31, 2018, Customers' allowance for loan losses totaled \$40.0 million, which represents 0.56% of total loans held for investment (excluding loans receivable mortgage warehouse at fair value). Management makes various assumptions and judgments about the collectibility of our loan portfolio, including the creditworthiness of our borrowers and the probability of their making payments, as well as the value of real estate and other assets serving as collateral for the repayment of many of our loans.

In determining the amount of the allowance for loan losses, significant factors considered include loss experience in particular segments of the portfolio, trends and absolute levels of classified and criticized loans, trends and absolute levels in delinquent loans, trends in risk ratings, trends in industry and Customers' charge-offs by particular segments and changes in existing general economic and business conditions affecting our lending areas and the national economy. If our assumptions are incorrect, our allowance for loan losses may not be sufficient to cover losses inherent in our loan portfolio, resulting in additions to the allowance.

Management reviews and re-estimates the allowance for loan losses quarterly. Additions to our allowance for loan losses as a result of management's reviews and re-estimates could materially decrease net income. Our regulators, as an integral part of their examination process, periodically review our allowance for loan losses and may require us to increase our allowance for loan losses by recognizing additional provisions for loan losses charged to expense, or to

decrease our allowance for loan losses

21

Table of Contents

by recognizing loan charge-offs, net of recoveries. Any such additional provisions for loan losses or charge-offs, as required by these regulatory agencies, could have a material adverse effect on our financial condition and results of operations.

Planned changes in the composition of our loan portfolio may expose us to increased lending risks.

As we continue to maintain our assets at \$10 billion or less, we intend to continue emphasizing the origination of commercial loans, including specialty loans and loans to mortgage banking businesses while deemphasizing our multi-family loan portfolio. Our focus will be on funding commercial and industrial and consumer loan growth with the run-off of our multi-family loan portfolio. Changes in the composition of our loan portfolio could have a significant adverse effect on our overall credit profile, which could result in a higher percentage of non-accrual loans, increased provision for loan losses, and an increased level of net charge-offs, all of which could have a material and adverse effect on our financial condition and results of operations. Consumer loans are particularly affected by economic conditions, including interest rates, the rate of unemployment, housing prices, the level of consumer confidence, changes in consumer spending, and the number of personal bankruptcies. A weakening in business or economic conditions, including higher unemployment levels or declines in home prices could adversely affect borrowers' ability to repay their loans, which could negatively impact our credit performance.

Our emphasis on commercial, multi-family/commercial real estate and mortgage warehouse lending may expose us to increased lending risks.

We intend to continue emphasizing the origination of commercial loans and specialty loans, including loans to mortgage banking businesses. Commercial loans, including multi-family and commercial real estate loans, can expose a lender to risk of non-payment and loss because repayment of the loans often depends on the successful operation of a business or property and the borrower's cash flows. Such loans typically involve larger loan balances to single borrowers or groups of related borrowers compared to one-to-four-family residential mortgage loans. In addition, we may need to increase our allowance for loan losses in the future to account for an increase in probable credit losses associated with such loans. Also, we expect that many of our commercial borrowers will have more than one loan outstanding with us. Consequently, an adverse development with respect to one loan or one credit relationship can expose us to a significantly greater risk of loss compared to an adverse development with respect to a one-to-four-family residential mortgage loan.

As a lender to mortgage banking businesses, we provide financing to mortgage bankers by purchasing, subject to resale under a master repurchase agreement, the underlying residential mortgages on a short-term basis pending the ultimate sale of the mortgages to investors. We are subject to the risks associated with such lending, including, but not limited to, the risks of fraud, bankruptcy and possible default by the borrower, closing agents and the residential borrower on the underlying mortgage, any of which could result in credit losses. The risk of fraud associated with this type of lending includes, but is not limited to, settlement process risks, the risk of financing nonexistent loans or fictitious mortgage loan transactions, or the risk that collateral delivered is fraudulent or non-existent, creating a risk of loss of the full amount financed on the underlying residential mortgage loan, or in the settlement processes. In first quarter 2013, fraud was discovered in our commercial mortgage warehouse loan portfolio. Additional fraudulent transactions could have a material adverse effect on our financial condition and results of operations.

Our lending to commercial mortgage businesses is a significant part of our assets and earnings. This business is subject to seasonality of the mortgage lending business, and volumes are likely to decline if interest rates increase, generally. A decline in the rate of growth, volume or profitability of this business unit, or a loss of its leadership could adversely affect our results of operations and financial condition.

As of December 31, 2018, we had \$7.8 billion in commercial loans outstanding, approximately 91.6% of our total loan portfolio, which includes loans held for sale and loans receivable mortgage warehouse at fair value.

Decreased origination, volume and pricing decisions of competitors may adversely affect our profitability.

We currently operate a residential mortgage banking business but plan to expand our origination, sale and servicing of residential mortgage loans in the future. We also began selling recent multi-family loan originations to third parties in third quarter 2014. Changes in market interest rates and pricing decisions by our loan competitors may adversely affect demand for our residential-mortgage and multi-family loan products, the revenue realized on the sale of loans and revenues received from servicing such loans for others, and ultimately reduce our net income. New regulations,

increased regulatory reviews, changes in the structure of the secondary mortgage markets that we utilize to sell mortgage loans or other rule changes that could affect the multi-family resale market may be introduced and may increase costs and make it more difficult to operate a residential mortgage origination business or sell multi-family loans.

Table of Contents

Federal Home Loan Bank of Pittsburgh may not pay dividends or repurchase capital stock in the future.

On December 23, 2008, the Federal Home Loan Bank of Pittsburgh announced that it would voluntarily suspend the payment of dividends and the repurchase of excess capital stock until further notice. The FHLB announced at that time that it expected its ability to pay dividends and add to retained earnings to be significantly curtailed due to low short-term interest rates, an increased cost of maintaining liquidity, OTTI charges and constrained access to debt markets at attractive rates. While the FHLB resumed payment of dividends and capital stock repurchases in 2012, capital stock repurchases from member banks are reviewed on a quarterly basis by the FHLB, and there is no guarantee that such dividends and capital stock repurchases will continue in the future. As of December 31, 2018, the Bank held \$67.3 million of FHLB capital stock.

The fair value of our investment securities can fluctuate due to market conditions. Adverse economic performance can lead to adverse security performance and other-than-temporary impairment.

As of December 31, 2018, the fair value of our investment securities portfolio was \$665.0 million. We have historically followed a conservative investment strategy, with concentrations in securities that are backed by government-sponsored enterprises. In the future, we may seek to increase yields through more aggressive strategies, which may include a greater percentage of corporate securities, structured credit products or non-agency mortgage-backed securities. Factors beyond our control can significantly influence the fair value of securities in our portfolio and can cause potential adverse changes to the fair value of these securities. These factors include, but are not limited to, rating agency actions in respect of the securities, defaults by the issuer or with respect to the underlying securities, and changes in market interest rates and continued instability in the capital markets. Any of these factors, among others, such as a change in management's intent to hold the securities until recovery in fair value, could cause OTTI and realized and/or unrealized losses in future periods and declines in OCI, which could have a material adverse effect on us. The process for determining whether impairment of a security is other than temporary usually requires complex, subjective judgments about the future financial performance and liquidity of the issuer and any collateral underlying the security in order to assess the probability of receiving all contractual principal and interest payments on the security.

During the year ended December 31, 2017, Customers recorded OTTI losses of \$12.9 million related to its equity holdings in Religare Enterprises, Ltd. ("Religare") for the full amount of the decline in fair value from the cost basis established at December 31, 2016 through September 30, 2017, because Customers no longer had the intent to hold these securities until a recovery in fair value. At December 31, 2017, the fair value of the Religare equity securities was \$3.4 million which resulted in an unrealized gain of \$1.0 million being recognized in AOCI with no adjustment for deferred taxes as Customers did not have a tax strategy in place capable of generating sufficient capital gains to utilize any capital losses resulting from the Religare investment. At December 31, 2018, Customers continues to not have a tax strategy in place capable of generating sufficient capital gains to utilize any capital losses resulting from the Religare impairment. The adoption of ASU 2016-01, Recognition and Measurement of Financial Assets and Financial Liabilities, on January 1, 2018 resulted in a cumulative effect adjustment to Customers' consolidated balance sheet with a \$1.0 million reduction in AOCI and a corresponding increase in retained earnings related to the December 31, 2017 unrealized gain on the Religare equity securities. In accordance with the new accounting guidance, changes in the fair value of the Religare equity securities since adoption are recorded directly in earnings, which resulted in an unrealized loss of \$1.6 million being recognized in other non-interest income in the accompanying consolidated statements of income for the year ended December 31, 2018. At December 31, 2018, the fair value of the Religare equity securities was \$1.7 million.

Changes to estimates and assumptions made by management in preparing financial statements could adversely affect our business, operating results, reported assets and liabilities, financial condition and capital levels.

Changes to estimates and assumptions made by management in connection with the preparation of our consolidated financial statements could adversely affect the reported amounts of assets and liabilities and the reported amounts of income and expenses. The preparation of our consolidated financial statements requires management to make certain critical accounting estimates and assumptions that could affect the reported amounts of assets and liabilities and the reported amounts of income and expense during the reporting periods. Changes to management's assumptions or estimates could materially and adversely affect our business, operating results, reported assets and liabilities, financial

condition and capital levels.

Changes in accounting standards and policies can be difficult to predict and can materially impact how we record and report our financial results.

Our accounting policies and methods are fundamental to how we record and report our financial condition and results of operations. From time to time, the FASB or the SEC changes the financial accounting and reporting standards or the policies that govern the preparation of our financial statements. These changes can be difficult to predict and can materially impact how we record and report our financial condition and results of operations. We could be required to apply new or revised guidance

Table of Contents

retrospectively, which may result in the revision of prior period financial statements by material amounts. The implementation of new or revised accounting guidance could have a material adverse effect on our financial results or net worth. Notably, the FASB recently issued a new framework for estimating the allowance for loan and lease losses that could significantly alter the current estimate as well as other elements of the U.S. banking model.

Downgrades in U.S. Government and federal agency securities could adversely affect us.

The long-term impact of the downgrade of the U.S. Government and federal agencies from an AAA to an AA+ credit rating is still uncertain. However, in addition to causing economic and financial market disruptions, the downgrade, and any future downgrades and/or failures to raise the U.S. debt limit if necessary in the future, could, among other things, materially adversely affect the market value of the U.S. and other government and governmental agency securities owned by us, the availability of those securities as collateral for borrowing and our ability to access capital markets on favorable terms, as well as have other material adverse effects on the operation of our business and our financial results and condition. In particular, it could increase interest rates and disrupt payment systems, money markets, and long-term or short-term fixed-income markets, adversely affecting the cost and availability of funding, which could negatively affect profitability. Also, the adverse consequences as a result of the downgrade could extend to the borrowers of the loans we make and, as a result, could adversely affect our borrowers' ability to repay their loans.

We may not be able to maintain consistent earnings or profitability.

Although we made profit for the years 2011 through 2018, there can be no assurance that we will be able to remain profitable in future periods, or, if profitable, that our overall earnings will remain consistent or increase in the future. Our earnings also may be reduced by increased expenses associated with increased assets, such as additional employee compensation expense, and increased interest expense on any liabilities incurred or deposits solicited to fund increases in assets. If earnings do not grow proportionately with our assets or equity, our overall profitability may be adversely affected.

Continued or worsening general business and economic conditions could materially and adversely affect us.

Our business and operations are sensitive to general business and economic conditions in the United States. If the U.S. economy experiences worsening conditions such as a recession, we could be materially and adversely affected. Weak economic conditions may be characterized by deflation, instability in debt and equity capital markets, a lack of liquidity and/or depressed prices in the secondary market for mortgage loans, increased delinquencies on loans, residential and commercial real estate price declines and lower home sales and commercial activity. Adverse changes in any of these factors could be detrimental to our business. Our business is also significantly affected by monetary and related policies of the U.S. Federal Government, its agencies and government-sponsored entities. Adverse changes in economic factors or U.S. Government policies could have a negative effect on us.

Over the last several years, there have been several instances where there has been uncertainty regarding the ability of Congress and the President collectively to reach agreement on federal budgetary and spending matters. A period of failure to reach agreement on these matters, particularly if accompanied by an actual or threatened government shutdown, may have an adverse impact on the U.S. economy. Additionally, a prolonged government shutdown may inhibit our ability to evaluate borrower creditworthiness and originate and sell certain government-backed loans.

The geographic concentration in the Northeast and Mid-Atlantic regions makes our business susceptible to downturns in the local economies and depressed banking markets, which could materially and adversely affect us.

Our loan and deposit activities are largely based in the Northeast and Mid-Atlantic regions. As a result, our financial performance depends upon economic conditions in these regions. These regions experienced deteriorating local economic conditions in the past economic cycle, and a downturn in the regional real estate market could harm our financial condition and results of operations because of the geographic concentration of loans within these regions, and because a large percentage of the loans are secured by real property. If there is decline in real estate values, the collateral value for our loans will decrease, and our probability of incurring losses will increase as the ability to recover on defaulted loans by selling the underlying real estate will be lessened.

Additionally, we have made a significant investment in commercial real estate loans. Often in a commercial real estate transaction, repayment of the loan is dependent on the property generating sufficient rental income to service the loan. Economic conditions may affect a tenant's ability to make rental payments on a timely basis, and may cause some

tenants not to renew their leases, each of which may impact the debtor's ability to make loan payments. Further, if expenses associated with commercial properties increase dramatically, a tenant's ability to repay, and therefore the debtor's ability to make timely

Table of Contents

loan payments, could be adversely affected. All of these factors could increase the amount of NPLs, increase our provision for loan losses and reduce our net income.

Our business is highly susceptible to credit risk.

As a lender, we are exposed to the risk that our customers will be unable to repay their loans according to the contractual terms and that the collateral securing the payment of their loans (if any) may not be sufficient to assure repayment. The risks inherent in making any loan include risks with respect to the ability of borrowers to repay their loans and, if applicable, the period of time over which the loan is repaid, risks relating to proper loan underwriting and guidelines, risks resulting from changes in economic and industry conditions, risks inherent in dealing with individual borrowers and risks resulting from uncertainties as to the future value of collateral. Similarly, we have credit risk embedded in our securities portfolio. Our credit standards, policies and procedures are designed to reduce the risk of credit losses to a low level but may not prevent us from incurring substantial credit losses.

Additionally, we may restructure originated or acquired loans if we believe the borrowers are experiencing problems servicing the debt pursuant to current terms, and we believe the borrower is likely to fully repay their restructured obligations. We may also be subject to legal or regulatory requirements for restructured loans. With respect to restructured loans, we may grant concessions to borrowers experiencing financial difficulties in order to facilitate repayment of the loan by a reduction of the stated interest rate for the remaining life of the loan to lower than the current market rate for new loans with similar risk or an extension of the maturity date.

We depend on our executive officers and key personnel to implement our strategy and could be harmed by the loss of their services.

We believe that the implementation of our strategy will depend in large part on the skills of our executive management team, and our ability to motivate and retain these and other key personnel. Accordingly, the loss of service of one or more of our executive officers or key personnel could reduce our ability to successfully implement our growth strategy and materially and adversely affect us. Leadership changes will occur from time to time, and if significant resignations occur, we may not be able to recruit additional qualified personnel. We believe our executive management team possesses valuable knowledge about the banking industry and that their knowledge and relationships would be very difficult to replicate. Although our CEO and President have entered into employment agreements with us, it is possible that they may not complete the term of their employment agreement or may choose not to renew it upon expiration.

Our customers also rely on us to deliver personalized financial services. Our strategic model is dependent upon relationship managers and private bankers who act as a customer's single point of contact to us. The loss of the service of these individuals could undermine the confidence of our customers in our ability to provide such personalized services. We need to continue to attract and retain these individuals and to recruit other qualified individuals to ensure continued growth. In addition, competitors may recruit these individuals in light of the value of the individuals' relationships with their customers and communities, and we may not be able to retain such relationships absent the individuals. In any case, if we are unable to attract and retain our relationship managers and private bankers and recruit individuals with appropriate skills and knowledge to support our business, our growth strategy, business, financial condition and results of operations may be adversely affected.

Our success also depends on the experience of our branch managers and lending officers and on their relationships with the customers and communities they serve. The loss of these key personnel could negatively impact our banking operations. The loss of key senior personnel, or the inability to recruit and retain qualified personnel in the future, could have a material adverse effect on us.

Potential limitations on incentive compensation contained in proposed federal agency rulemaking may adversely affect our ability to attract and retain our highest performing team members.

In April 2011 and May 2016, the Federal Reserve, other federal banking agencies and the SEC jointly published proposed rules designed to implement provisions of the Dodd-Frank Act prohibiting incentive compensation arrangements that would encourage inappropriate risk taking at covered financial institutions, which includes a bank or bank holding company with \$1 billion or more in assets, such as we. It cannot be determined at this time whether or when a final rule will be adopted, and whether compliance with such a final rule will substantially affect the manner in which we structure compensation for our executives and other team members. Depending on the nature and

application of the final rules, we may not be able to successfully compete with certain financial institutions and other companies that are not subject to some or all of the rules to retain and attract executives and other high-performing team members. If this were to occur, relationships that we have established with our clients may be impaired and our business, financial condition and results of operations could be adversely affected, perhaps materially.

Table of Contents

We face significant competition from other financial institutions and financial services providers, which may materially and adversely affect us.

Commercial and consumer banking is highly competitive. Our markets contain a large number of community and regional banks as well as a significant presence of the country's largest commercial banks. We compete with other state and national financial institutions, including savings and loan associations, savings banks and credit unions, for deposits and loans. In addition, we compete with financial intermediaries, such as consumer finance companies, mortgage banking companies, insurance companies, securities firms, mutual funds and several government agencies, as well as major retailers, in providing various types of loans and other financial services. Some of these competitors may have a long history of successful operations in our markets, greater ties to local businesses and more expansive banking relationships, as well as better established depositor bases. Competitors may also have greater resources and access to capital and may possess other advantages such as operating more ATMs and conducting extensive promotional and advertising campaigns or operating a more developed Internet platform. Competitors may also exhibit a greater tolerance for risk and behave more aggressively with respect to pricing in order to increase their market share.

The financial services industry could become even more competitive as a result of legislative, regulatory and technological changes and continued consolidation. Increased competition among financial services companies due to the recent consolidation of certain competing financial institutions may adversely affect our ability to market our products and services. Technological advances have lowered barriers to entry and made it possible for banks to compete in our market without a retail footprint by offering competitive rates, as well as non-banks to offer products and services traditionally provided by banks. Our ability to compete successfully depends on a number of factors, including, among others:

- the ability to develop, maintain and build upon long-term customer relationships based on high quality, personal service, effective and efficient products and services, high ethical standards and safe and sound assets;
- the scope, relevance and competitive pricing of products and services offered to meet customer needs and demands;
- the ability to provide customers with maximum convenience of access to services and availability of banking representatives;
- the ability to attract and retain highly qualified team members to operate our business;
- the ability to expand our market position;
- customer access to our decision makers and customer satisfaction with our level of service; and
- the ability to operate our business effectively and efficiently.

Failure to perform in any of these areas could significantly weaken our competitive position, which could materially and adversely affect us.

Like other financial services institutions, our asset and liability structures are monetary in nature. Such structures are affected by a variety of factors, including changes in interest rates, which can impact the value of financial instruments held by us.

Like other financial services institutions, we have asset and liability structures that are essentially monetary in nature and are directly affected by many factors, including domestic and international economic and political conditions, broad trends in business and finance, legislation and regulation affecting the national and international business and financial communities, monetary and fiscal policies, inflation, currency values, market conditions, the availability and terms (including cost) of short-term or long-term funding and capital, the credit capacity or perceived creditworthiness of customers and counterparties and the level and volatility of trading markets. Such factors can impact customers and counterparties of a financial services institution and may impact the value of financial instruments held by a financial services institution.

Our earnings and cash flows largely depend upon the level of our net interest income, which is the difference between the interest income we earn on loans, investments and other interest earning assets, and the interest we pay on interest bearing liabilities, such as deposits and borrowings. Because different types of assets and liabilities may react differently and at different times to market interest-rate changes, changes in interest rates can increase or decrease our net interest income. When interest-bearing liabilities mature or reprice more quickly than interest-earning assets in a period, an increase in interest rates would reduce net interest income. Similarly, when interest-earning assets mature or

reprice more quickly, and because the magnitude of repricing of interest-earning assets is often greater than interest-bearing liabilities, falling interest rates would reduce net interest income.

Table of Contents

Accordingly, changes in the level of market interest rates affect our net yield on interest-earning assets and liabilities, loan and investment securities portfolios and our overall financial results. Changes in interest rates may also have a significant impact on any future loan origination revenues. Changes in interest rates also have a significant impact on the carrying value of a significant percentage of the assets, both loans and investment securities, on our balance sheet. We may incur debt in the future, and that debt may also be sensitive to interest rates and any increase in interest rates could materially and adversely affect us. Interest rates are highly sensitive to many factors beyond our control, including general economic conditions and policies of various governmental and regulatory agencies, particularly the Federal Reserve. Adverse changes in the Federal Reserve's interest-rate policies or other changes in monetary policies and economic conditions could materially and adversely affect us.

Uncertainty about the future of LIBOR may adversely affect our business.

LIBOR and certain other interest rate "benchmarks" are the subject of recent national, international, and other regulatory guidance and proposals for reform. These reforms may cause such benchmarks to perform differently than in the past or have other consequences which cannot be predicted. On July 27, 2017, the United Kingdom's Financial Conduct Authority, which regulates LIBOR, publicly announced that it intends to stop persuading or compelling banks to submit information to the administrator of LIBOR after 2021. The announcement indicates that the continuation of LIBOR on the current basis cannot be guaranteed after 2021. While there is no consensus on what rate or rates may become accepted alternatives to LIBOR, a group of market participants convened by the Federal Reserve, the Alternative Reference Rate Committee, has selected the Secured Overnight Finance Rate as its recommended alternative to LIBOR. The Federal Reserve Bank of New York started to publish the Secured Overnight Financing Rate in April 2018. The Secured Overnight Financing Rate is a broad measure of the cost of overnight borrowings collateralized by Treasury securities that was selected by the Alternative Reference Rate Committee due to the depth and robustness of the U.S. Treasury repurchase market. At this time, it is impossible to predict whether the Secured Overnight Financing Rate will become an accepted alternative to LIBOR.

The market transition away from LIBOR to an alternative reference rate, such as the Secured Overnight Financing Rate, is complex and could have a range of adverse effects on our business, financial condition and results of operations. In particular, any such transition could:

- adversely affect the interest rates paid or received on, the revenue and expenses associated with or the value of Customers' LIBOR-based assets and liabilities, which include certain variable rate securities and loans, cash flow hedges, derivatives not designated as hedging instruments, subordinated debt, Customers' Series C preferred stock, Customers' Series D preferred stock, Customers' Series E preferred stock and Customers' Series F preferred stock;
- adversely affect the interest rates paid or received on, the revenue and expenses associated with or the value of other securities or financial arrangements, given LIBOR's role in determining market interest rates globally;
- prompt inquiries or other actions from regulators in respect of Customers' preparation and readiness for the replacement of LIBOR with an alternative reference rate; and
- result in disputes, litigation or other actions with counterparties regarding the interpretation and enforceability of certain fallback language in LIBOR-based contracts and securities.

The transition away from LIBOR to an alternative reference rate will require the transition to or development of appropriate systems and analytics to effectively transition Customers' risk management and other processes from LIBOR-based products to those based on the applicable alternative reference rate, such as the Secured Overnight Financing Rate. There can be no guarantee that these efforts will successfully mitigate the operational risks associated with the transition away from LIBOR to an alternative reference rate.

The manner and impact of the transition from LIBOR to an alternative reference rate, as well as the effect of these developments on our funding costs, loan and investment and trading securities portfolios, asset-liability management, and business, is uncertain.

We are dependent on our information technology and telecommunications systems and third-party servicers, and systems failures, interruptions or breaches of security could have a material adverse effect on us.

Our business is highly dependent on the successful and uninterrupted functioning of our information technology and telecommunications systems and third-party servicers. We outsource many of our major systems, such as data processing, loan servicing and deposit processing systems. The failure of these systems, or the termination of a

third-party software license or service agreement on which any of these systems is based, could interrupt our operations. Because our information technology and telecommunications systems interface with and depend on third-party systems, we could experience service denials if demand for such services exceeds capacity or such third-party systems fail or experience interruptions. If significant, sustained

Table of Contents

or repeated, a system failure or service denial could compromise our ability to operate effectively, damage our reputation, result in a loss of customer business, and/or subject us to additional regulatory scrutiny and possible financial liability, any of which could have a material adverse effect on us.

We continue to evaluate and implement upgrades and changes to our information technology systems, some of which are significant. Upgrades involve replacing existing systems with successor systems, making changes to existing systems or cost-effectively acquiring new systems with new functionality. We are aware of inherent risks associated with replacing these systems, including accurately capturing data and system disruptions, and believe we are taking appropriate action to mitigate the risks through testing, training, and staging implementation, as well as ensuring appropriate commercial contracts are in place with third-party vendors supplying or supporting our information technology initiatives. However, there can be no assurances that we will successfully launch these systems as planned or that they will be implemented without disruptions to our operations. Information technology system disruptions, if not anticipated and appropriately mitigated, or failure to successfully implement new or upgraded systems, could have a material adverse effect on our results of operations. Also, we may have to make a significant investment to repair or replace these systems and could suffer loss of critical data and interruptions or delays in our operations.

In addition, we provide our customers with the ability to bank remotely, including online, over the Internet and over the telephone. The secure transmission of confidential information over the Internet and other remote channels is a critical element of remote banking. Our network could be vulnerable to unauthorized access, computer viruses, phishing schemes and other security breaches. We may be required to spend significant capital and other resources to protect against the threat of security breaches and computer viruses or to alleviate problems caused by security breaches or viruses. To the extent that our activities or the activities of our customers involve the storage and transmission of confidential information, security breaches and viruses could expose us to claims, regulatory scrutiny, litigation and other possible liabilities. Any inability to prevent security breaches or computer viruses could also cause existing customers to lose confidence in our systems and could materially and adversely affect us.

Additionally, financial products and services have become increasingly technology-driven. Our ability to meet the needs of our customers competitively and in a cost-efficient manner is dependent on the ability to keep pace with technological advances and to invest in new technology as it becomes available. Certain competitors may have greater resources to invest in technology and may be better equipped to market new technology-driven products and services. The ability to keep pace with technological change is important, and the failure to do so could have a material adverse impact on our business and therefore on our financial condition and results of operations.

Loss of, or failure to adequately safeguard, confidential or proprietary information may adversely affect our operations, net income or reputation.

We regularly collect, process, transmit and store significant amounts of confidential information regarding our customers, team members and others. This information is necessary for the conduct of our business activities, including the ongoing maintenance of deposit, loan, investment management and other account relationships for our customers, and receiving instructions and affecting transactions for those customers and other users of our products and services. In addition to confidential information regarding our customers, team members and others, we compile, process, transmit and store proprietary, non-public information concerning our own business, operations, plans and strategies. In some cases, this confidential or proprietary information is collected, compiled, processed, transmitted or stored by third parties on our behalf.

Information security risks have generally increased in recent years because of the proliferation of new technologies and the increased sophistication and activities of perpetrators of cyber-attacks. A failure in or breach of our operational or information security systems or those of our third-party service providers, as a result of cyber-attacks or information security breaches or due to team member error, malfeasance or other disruptions could adversely affect our business, result in the disclosure or misuse of confidential or proprietary information, damage our reputation, increase our costs and/or cause losses. As a result, cyber security and the continued development and enhancement of the controls and processes designed to protect our systems, computers, software, data and networks from attack, damage or unauthorized access remain a priority for us.

If this confidential or proprietary information were to be mishandled, misused or lost, we could be exposed to significant regulatory consequences, reputational damage, civil litigation and financial loss. Mishandling, misuse or

loss of this confidential or proprietary information could occur, for example, if the confidential or proprietary information were erroneously provided to parties who were not permitted to have the information, either by fault of the systems or our team members, or the systems or employees of third parties which have collected, compiled, processed, transmitted or stored the information on our behalf, where the information is intercepted or otherwise inappropriately taken by third parties or where there is a failure or breach of the network, communications or information systems which are used to collect, compile, process, transmit or store the information.

Table of Contents

Although we employ a variety of physical, procedural and technological safeguards to protect this confidential and proprietary information from mishandling, misuse or loss, these safeguards do not provide absolute assurance that mishandling, misuse or loss of the information will not occur, or that if mishandling, misuse or loss of the information did occur, those events would be promptly detected and addressed. Additionally, as information security risks and cyber threats continue to evolve, we may be required to expend additional resources to continue to enhance our information security measures and/or to investigate and remediate any information security vulnerabilities.

Our directors and executive officers can influence the outcome of shareholder votes and, in some cases, shareholders may not have the opportunity to evaluate and affect the investment decision regarding potential investment, acquisition or disposition transactions.

As of December 31, 2018, our directors and executive officers, as a group, owned a total of 2,311,485 shares of common stock and exercisable options to purchase up to an additional 692,535 shares of common stock, which potentially gives them, as a group, the ability to control approximately 9.69% of the outstanding common stock. In addition, a director of Customers Bank who is not a director of Customers Bancorp owns an additional 23,036 shares of common stock, which if combined with the directors and officers of Customers Bancorp, potentially gives them, as a group, the ability to control approximately 9.76% of the outstanding common stock. We believe ownership of stock causes directors and officers to have the same interests as shareholders, but it also gives them the ability to vote as shareholders for matters that are in their personal interest, which may be contrary to the wishes of other shareholders. Shareholders will not necessarily be provided with an opportunity to evaluate the specific merits or risks of one or more potential investment, acquisition or disposition transactions. Any decision regarding a potential investment or acquisition transaction will be made by our board of directors. Except in limited circumstances as required by applicable law, consummation of an acquisition will not require the approval of holders of common stock.

Accordingly, shareholders may not have an opportunity to evaluate and affect the board of directors' decision regarding most potential investment or acquisition transactions and/or certain disposition transactions.

In connection with the Disbursement business, we depend on our relationship with higher education institutions and, in turn, student usage of our products and services for future growth of our BankMobile business.

The future growth of our BankMobile business depends, in part, on our ability to enter into agreements with higher education institutions. Our contracts with these clients can generally be terminated at will and, therefore, there can be no assurance that we will be able to maintain these clients. We may also be unable to maintain our agreements with these clients on terms and conditions acceptable to us. In addition, we may not be able to continue to establish new relationships with higher education institution clients. The termination of our current client contracts or our inability to continue to attract new clients could have a material adverse effect on our business, financial condition and results of operations.

Establishing new client relationships and maintaining current ones are also essential components of our strategy for attracting new student customers, deepening the relationships we have with existing customers and maximizing customer usage of our products and services. A reduction in enrollment, a failure to attract and maintain student customers, as well as any future demographic or other trends that reduce the number of higher education students could materially and adversely affect BankMobile's capability for both revenue and cash generation and, as a result, could have a material adverse effect on our business, financial condition and results of operations.

BankMobile's Disbursement business depends on the current government financial aid regime that relies on the outsourcing of financial aid disbursements through higher education institutions.

In general, the U.S. Federal Government distributes financial aid to students through higher education institutions as intermediaries. BankMobile's Disbursement business provides our higher education institution clients an electronic system for improving the administrative efficiency of this refund disbursement process. If the government, through legislation or regulatory action, restructures the existing financial aid regime in such a way that reduces or eliminates the intermediary role played by financial institutions serving higher education institutions or limits or regulates the role played by service providers such as we, our business, results of operations and BankMobile's prospects for future growth could be materially and adversely affected.

A change in the availability of financial aid, as well as U.S. budget constraints, could materially and adversely affect our financial performance by reducing demand for BankMobile's services.

The higher education industry depends heavily upon the ability of students to obtain financial aid. As part of our contracts with our higher education institution clients that use BankMobile's Disbursement business services, students' financial aid and other refunds are sent to us for disbursement. The fees that we charge most of our Disbursement business higher education institution clients are based on the number of financial aid disbursements that we make to students. In addition, our

29

Table of Contents

relationships with Disbursement business higher education institution clients provide us with a market for BankMobile. Consequently, a change in the availability or amount of financial aid that restricts client use of our Disbursement business service or otherwise limits our ability to attract new higher education institution clients could materially and adversely affect our financial performance. Also, decreases in the amount of financial aid disbursements from higher education institutions to students could materially and adversely affect our financial performance. Future legislative and executive-branch efforts to reduce the U.S. federal budget deficit or worsening economic conditions may require the government to severely curtail its financial aid spending, which could materially and adversely affect our business, financial condition and results of operations.

Providing disbursement services to higher education institutions is an uncertain business; if the market for BankMobile's products does not continue to develop, we will not be able to grow this portion of our business. The success of BankMobile's Disbursement business will depend, in part, on our ability to generate revenues by providing financial transaction services to higher education institutions and their students. The market for these services has evolved, and the long-term viability and profitability of this market is unproven. Our business will be materially and adversely affected if we do not develop and market products and services that achieve and maintain market acceptance. Outsourcing disbursement services may not become as widespread in the higher education industry as we anticipate, and our products and services may not achieve continued commercial success. Also, the DOE has proposed issuing prepaid cards directly to students, which may have the effect of reducing the need for outsourcing disbursement services or the volume of activity processed by the disbursement services. In addition, higher education institution clients could discontinue using our services and return to in-house disbursement solutions. If the outsourcing of disbursement services does not become as widespread as we anticipate, if higher education institution clients return to their prior methods of disbursement, or if prepaid card services displace the current disbursement process, our growth prospects, business, financial condition and results of operations could be materially and adversely affected.

Our business and future success may suffer if we are unable to successfully implement our strategy to convert student deposit customers to lifetime BankMobile customers.

A significant component of our growth strategy is dependent on our ability to have students of our higher education institution clients select BankMobile during the refund disbursement selection process and to convert those student BankMobile customers, along with the existing student customers we acquired through the Disbursement business acquisition, into lifetime customers with BankMobile as their primary banking relationship. In particular, our growth strategy depends on our ability to successfully cross-sell our core banking products and services to these student customers after they graduate from college. We may not be successful in implementing this strategy because these student customers and potential student customers may believe our products and services are unnecessary or unattractive. Our failure to sell our products and services to students after they graduate and to attract new student customers could have a material adverse effect on our prospects, business, financial condition and results of operations.

Breaches of security measures, unauthorized access to or disclosure of data relating to our higher education institution clients or BankMobile and student BankMobile account holders, computer viruses or unauthorized software ("malware"), fraudulent activity and infrastructure failures could materially and adversely affect our reputation or harm our business.

Companies that process and transmit cardholder information have been specifically and increasingly targeted by sophisticated criminal organizations in an effort to obtain the information and utilize it for fraudulent transactions. The encryption software and the other technologies we use to provide security for storage, processing and transmission of confidential customer and other information may not be effective to protect against data-security breaches. The risk of unauthorized circumvention of our security measures has been heightened by advances in computer capabilities and the increasing sophistication of hackers.

Unauthorized access to our computer systems or those of our third-party service providers, could result in the theft or publication of the information or the deletion or modification of sensitive records, and could cause interruptions in our operations. Any inability to prevent security breaches could damage our relationships with our higher education institution customers, cause a decrease in transactions by individual cardholders, expose us to liability for

unauthorized purchases and subject us to network fines. These claims also could result in protracted and costly litigation. If unsuccessful in defending that litigation, we might be forced to pay damages and/or change our business practices. Further, a significant data-security breach could lead to additional regulation, which could impose new and costly compliance obligations. Any material increase in our costs resulting from litigation or additional regulatory burdens being imposed upon us or litigation could have a material adverse effect on our operating revenues and profitability.

In addition, our higher education institution clients and student BankMobile account holders disclose to us certain “personally identifiable” information, including student contact information, identification numbers and the amount of credit balances, which they expect we will maintain in confidence. It is possible that hackers, customers or team members acting unlawfully or

Table of Contents

contrary to our policies or other individuals, could improperly access our or our vendors' systems and obtain or disclose data about our customers. Further, because customer data may also be collected, stored or processed by third-party vendors, it is possible that these vendors could intentionally, negligently or otherwise disclose data about our clients or customers.

We rely to a large extent upon sophisticated information technology systems, databases and infrastructure, and take reasonable steps to protect them. However, due to their size, complexity, content and integration with or reliance on third-party systems, they are vulnerable to breakdown, malicious intrusion, natural disaster and random attack, all of which pose a risk of exposure of sensitive data to unauthorized persons or to the public.

A cybersecurity breach of our information systems could lead to fraudulent activity such as identity theft, losses on the part of our banking customers, additional security costs, negative publicity and damage to our reputation and brand. In addition, our customers could be subject to scams that may result in the release of sufficient information concerning themselves or their accounts to allow others unauthorized access to their accounts or our systems (e.g., "phishing" and "smishing"). Claims for compensatory or other damages may be brought against us as a result of a breach of our systems or fraudulent activity. If we are unsuccessful in defending against any resulting claims against us, we may be forced to pay damages, which could materially and adversely affect our financial condition and results of operations.

Because the techniques used to obtain unauthorized access, disable or degrade service or sabotage systems change frequently and often are not recognized until launched against a target, we may be unable to anticipate these techniques or to implement adequate preventative measures.

Further, computer viruses or malware could infiltrate our systems, thus disrupting our delivery of services and making our applications unavailable. Although we utilize several preventative and detective security controls in our network, they may be ineffective in preventing computer viruses or malware that could damage our relationships with our merchant customers, cause a decrease in transactions by individual cardholders, or cause us to be in non-compliance with applicable network rules and regulations.

In addition, a significant incident of fraud or an increase in fraud levels generally involving our products could result in reputational damage to us, which could reduce the use of our products and services. Such incidents could also lead to a large financial loss as a result of the protection for unauthorized purchases we provide to BankMobile customers given that we may be liable for any uncollectible account holder overdrafts and any other losses due to fraud or theft. Such incidents of fraud could also lead to regulatory intervention, which could increase our compliance costs.

Compliance with the various complex laws and regulations is costly and time consuming, and failure to comply could have a material adverse effect on our business. Additionally, increased regulatory requirements on our services may increase our costs, which could materially and adversely affect our business, financial condition and results of operations. Accordingly, account data breaches and related fraudulent activity could have a material adverse effect on our future growth prospects, business, financial condition and results of operations.

A disruption to our systems or infrastructure could damage our reputation, expose us to legal liability, cause us to lose customers and revenue, result in the unintentional disclosure of confidential information or require us to expend significant efforts and resources or incur significant expense to eliminate these problems and address related data and security concerns. The harm to our business could be even greater if such an event occurs during a period of disproportionately heavy demand for our products or services or traffic on our systems or networks.

Prior to our acquisition of the Disbursement business, the Federal Reserve Board and FDIC took regulatory enforcement action against Higher One, which subjected us to regulatory inquiry and potential regulatory enforcement action, which may result in liabilities adversely affecting our business, financial conditions and/or results of operations or in reputational harm.

Since August 2013 until the acquisition of the Disbursement business, we provided deposit accounts and services to college students through Higher One, which had relationships with colleges and universities in the United States, using Higher One's technological services. Because Higher One was not a bank, it had to partner with one or more banks to provide the deposit accounts and services to students. Higher One and one of Higher One's former bank partners (the "predecessor bank"), announced in May 2014 that the Federal Reserve Board notified them that certain disclosures and operating processes of these entities may have violated certain laws and regulations and may result in penalties and restitution. In May 2014, the Federal Reserve also informed us, as one of Higher One's bank partners,

that it was recommending a regulatory enforcement action be initiated against us based on the same allegations. In July 2014, the predecessor bank referenced above, which no longer is a partner with Higher One, entered into a consent order to cease and desist with the Federal Reserve Board pursuant to which it agreed to pay a total of \$3.5 million in civil money penalties and an additional amount that it may be required to pay in restitution to students in the event Higher One is

31

Table of Contents

unable to pay the restitution obligations, if any, imposed on Higher One (“back-up restitution”). We believe that the circumstances of its relationship with Higher One and the student customers are different than the relationship between the predecessor bank and Higher One and the student customers.

In December 2015, Higher One entered into consent orders with both the Federal Reserve Board and the FDIC. Under the consent order with the Federal Reserve Board, Higher One agreed to pay \$2.2 million in civil money penalties and \$24 million in restitution to students. Under the consent order with the FDIC, Higher One agreed to pay an additional \$2.2 million in civil money penalties and \$31 million in restitution to students. In addition, a third partner bank, which is regulated by the FDIC, also entered into a consent order to cease and desist with the FDIC pursuant to which it agreed to pay \$1.8 million in civil money penalties and an additional amount in restitution to students in the event Higher One is unable to meet its restitution obligation.

We believe that we identified key critical alleged compliance deficiencies within 30 days of first accepting deposits through our relationship with Higher One and caused such deficiencies to be remediated within approximately 120 days. In addition, we understand that the total amount of fees that Higher One collected from students who opened accounts with us during the relevant time period is substantially less than the total fees that Higher One collected from students who opened deposit accounts at the other partner banks during the relevant time period. In addition, as Higher One paid the restitution and deposited such monies to pay the required restitution, we did not expect that backup restitution would be required.

Nonetheless, as previously disclosed, we had been in discussions with the Federal Reserve Board regarding these matters from 2013 and in an effort to move forward, on December 6, 2016, we agreed to the issuance by the Federal Reserve Board of a combined Order to Cease and Desist and Order of Assessment of a Civil Money Penalty Issued Upon Consent Pursuant to the Order and agreed to a penalty of \$960 thousand. We had previously set aside a reserve for the civil money penalty and made payment in 2016.

We remain subject to the jurisdiction and examination of the Federal Reserve Board, and further action could be taken to the extent we do not comply with the terms of the Order or if the Federal Reserve Board were to identify additional violations of applicable laws and regulations. Any further action could have a material adverse effect on our business, financial conditions and/or results of operations or our reputation.

Termination of, or changes to, the MasterCard association registration could materially and adversely affect our business, financial condition and results of operations.

The student checking account debit cards issued in connection with the Disbursement business are subject to MasterCard association rules that could subject us to a variety of fines or penalties that may be levied by MasterCard for acts or omissions by us or businesses that work with us. The termination of the card association registration held by us or any changes in card association or other network rules or standards, including interpretation and implementation of existing rules or standards, that increase the cost of doing business or limit our ability to provide our products and services could materially and adversely affect our business, financial condition and results of operations.

Our business and future success may suffer if we are unable to continue to successfully implement our strategy for BankMobile.

The effective use of technology can increase efficiency and enable financial institutions to better serve customers and to reduce costs. However, some new technologies, including BankMobile, are not fully tested, and we may incur substantial expenses and devote significant management time and resources in order for BankMobile to compete effectively. Revenue generated from BankMobile’s very-low-fee banking strategy may not perform as well as we expect or enhance the value of our business as a whole, and it could materially and adversely affect our financial condition and results of operations. Additionally, the anticipated benefits of our white label program may not be realized to the extent forecasted, or Customers may incur substantial expenses in the operation of the white label program that outweigh the benefits realized, if any, which could have a material and adverse affect on our financial condition and results of operations. Also, if the benefits of BankMobile do not meet the expectations of financial or industry analysts, the market price of our common stock may decline.

While we retain and operate BankMobile, we will continue to face the risks and challenges associated with the BankMobile business.

As long as we retain and operate BankMobile, we will continue to face the risks and challenges associated with the BankMobile business, including those relating to the integration of the Disbursement business and the successful launch and operation of the white label program. We cannot assure you that we will be able to address and manage these risks so as to

32

Table of Contents

preserve or increase the value of BankMobile, and any failure to preserve or increase the value of BankMobile could adversely affect the business of Customers as a whole and our ability to otherwise dispose of BankMobile on favorable terms, or at all.

If our total assets exceed \$10 billion while we retain and operate BankMobile, our business and potential for future success could be materially adversely affected.

Under federal law and regulation, if our total assets exceed \$10 billion as of December 31 of each year, we will no longer qualify as a small issuer of debit cards and we will not receive the optimal debit card processing fee. Failure to qualify for the small issuer exception would result in a significant reduction in interchange fee income and could result in the BankMobile segment operating unprofitably, charging additional fees to students to replace the lost revenue, or the loss of our existing white label partner.

We intend to engage in acquisitions of other businesses from time to time. These acquisitions may not produce revenue or earnings enhancements or cost savings at levels, or within time frames, originally anticipated and may result in unforeseen integration difficulties.

We regularly evaluate opportunities to strengthen our current market position by acquiring and investing in banks and in other complementary businesses, or opening new branches, and when appropriate opportunities arise, subject to regulatory approval, we plan to engage in acquisitions of other businesses and in opening new branches. Such transactions could, individually or in the aggregate, have a material effect on our operating results and financial condition, including short and long-term liquidity. Our acquisition activities could be material to our business. For example, we could issue additional shares of Voting Common Stock in a purchase transaction, which could dilute current shareholders' value or ownership interest. These activities could require us to use a substantial amount of cash or other liquid assets and/or incur debt. In addition, if goodwill recorded in connection with acquisitions were determined to be impaired, then we would be required to recognize a charge against our earnings, which could materially and adversely affect our results of operations during the period in which the impairment was recognized. Our acquisition activities could involve a number of additional risks, including the risks of:

- incurring time and expense associated with identifying and evaluating potential acquisitions and negotiating the terms of potential transactions, resulting in our attention being diverted from the operation of our existing business;
- using inaccurate estimates and judgments to evaluate credit, operations, management and market risks with respect to the target institution or assets;
- being potentially exposed to unknown or contingent liabilities of banks and businesses we acquire;
- being required to expend time and expense to integrate the operations and personnel of the combined businesses;
- experiencing higher operating expenses relative to operating income from the new operations;
- creating an adverse short-term effect on our results of operations;
- losing key team members and customers as a result of an acquisition that is poorly received; and
- incurring significant problems relating to the conversion of the financial and customer data of the entity being acquired into our financial and customer product systems.

Additionally, in evaluating potential acquisition opportunities, we may seek to acquire failed banks through FDIC-assisted acquisitions. While the FDIC may, in such acquisitions, provide assistance to mitigate certain risks, such as sharing in exposure to loan losses and providing indemnification against certain liabilities, of the failed institution, we may not be able to accurately estimate our potential exposure to loan losses and other potential liabilities, or the difficulty of integration, in acquiring such institutions.

Depending on the condition of any institutions or assets that are acquired, any acquisition may, at least in the near term, materially adversely affect our capital and earnings and, if not successfully integrated following the acquisition, may continue to have such effects. We cannot assure you that we will be successful in overcoming these risks or any other problems encountered in connection with pending or potential acquisitions. Our inability to overcome these risks could have an adverse effect on levels of reported net income, return on equity and return on assets and the ability to achieve our business strategy and maintain market value.

Our acquisitions generally will require regulatory approvals, and failure to obtain them would restrict our growth. We intend to complement and expand our business by pursuing strategic acquisitions of community banking franchises and other businesses. Generally, any acquisition of target financial institutions, banking centers or other

banking assets by us may

33

Table of Contents

require approval by, and cooperation from, a number of governmental regulatory agencies, possibly including the Federal Reserve, the OCC and the FDIC, as well as state banking regulators. In acting on applications, federal banking regulators consider, among other factors:

- the effect of the acquisition on competition;
- the financial condition, liquidity, results of operations, capital levels and future prospects of the applicant and the bank(s) involved;
- the quantity and complexity of previously consummated acquisitions;
- the managerial resources of the applicant and the bank(s) involved;
- the convenience and needs of the community, including the record of performance under CRA;
- the effectiveness of the applicant in combating money laundering activities; and
- the extent to which the acquisition would result in greater or more concentrated risks to the stability of the United States banking or financial system.

Such regulators could deny our application based on the above criteria or other considerations, which could restrict our growth, or the regulatory approvals may not be granted on terms that are acceptable to us. For example, we could be required to sell banking centers as a condition to receiving regulatory approvals, and such a condition may not be acceptable to us or may reduce the benefit of any acquisition.

The success of future transactions will depend on our ability to successfully identify and consummate acquisitions of banking franchises that meet our investment objectives. Because of the intense competition for acquisition opportunities and the limited number of potential targets, we may not be able to successfully consummate acquisitions on attractive terms, or at all, that are necessary to grow our business.

Our acquisition history should be viewed in the context of the recent opportunities available to us as a result of the confluence of our access to capital at a time when market dislocations of historical proportions resulted in attractive asset acquisition opportunities. As conditions change, we may prove to be unable to execute our acquisition strategy, which could materially and adversely affect us. The success of future transactions will depend on our ability to successfully identify and consummate transactions with target banking franchises that meet our investment objectives. There are significant risks associated with our ability to identify and successfully consummate these acquisitions. There are a limited number of acquisition opportunities, and we expect to encounter intense competition from other banking organizations competing for acquisitions and also from other investment funds and entities looking to acquire financial institutions. Many of these entities are well established and have extensive experience in identifying and consummating acquisitions directly or through affiliates. Many of these competitors possess ongoing banking operations with greater financial, technical, human and other resources and access to capital than we do, which could limit the acquisition opportunities we pursue. Our competitors may be able to achieve greater cost savings, through consolidating operations or otherwise, than we could. These competitive limitations give others an advantage in pursuing certain acquisitions. In addition, increased competition may drive up the prices for the acquisitions we pursue and make the other acquisition terms more onerous, which would make the identification and successful consummation of those acquisitions less attractive to us. Competitors may be willing to pay more for acquisitions than we believe is justified, which could result in our having to pay more for them than we prefer or to forego the opportunity. As a result of the foregoing, we may be unable to successfully identify and consummate acquisitions on attractive terms, or at all, that are necessary to grow our business.

We will generally establish the pricing of transactions and the capital structure of banking franchises to be acquired by us on the basis of financial projections for such banking franchises. In general, projected operating results will be based on the judgment of our management team. In all cases, projections are only estimates of future results that are based upon assumptions made at the time that the projections are developed, and the projected results may vary significantly from actual results. General economic, political and market conditions can have a material adverse impact on the reliability of such projections. In the event that the projections made in connection with our acquisitions, or future projections with respect to new acquisitions, are not accurate, such inaccuracies could materially and adversely affect us.

Some institutions we could acquire may have distressed assets, and there can be no assurance that we will be able to realize the value predicted from these assets or that we will make sufficient provision for future losses in the value of,

or accurately estimate the future write-downs taken in respect of, these assets.

Loan portfolios and other assets acquired in transactions may experience increases in delinquencies and losses in the loan portfolios, or in amounts that exceed initial forecasts developed during the due diligence investigation prior to acquiring those

Table of Contents

assets. In addition, asset values may be impaired in the future due to factors that cannot currently be predicted, including deterioration in economic conditions and subsequent declines in collateral values and credit quality indicators. Any of these events could adversely affect the financial condition, liquidity, capital position and value of institutions acquired and of our business as a whole. Further, as a registered bank holding company, if we acquire bank subsidiaries, they may become subject to cross-guaranty liability under applicable banking law. If we do so and any of the foregoing adverse events occur with respect to one subsidiary, they may adversely affect other subsidiaries. Asset valuations are estimates of value, and there is no certainty that we will be able to sell assets of target institutions at the estimated value, even if it is determined to be in our best interests to do so. The institutions we may target may have substantial amounts of asset classes for which there is currently limited or no marketability.

As a result of an investment or acquisition transaction, we may be required to take write-downs or write-offs, restructuring and impairment or other charges that could have a significant negative effect on our financial condition and results of operations.

We conduct due diligence investigations of target institutions we intend to acquire. Due diligence is time consuming and expensive due to the operations, accounting, finance and legal professionals who must be involved in the due diligence process. Even if extensive due diligence is conducted on a target institution with which we may be combined, this diligence may not reveal all material issues that may affect a particular target institution, and factors outside our control, or the control of the target institution, may later arise. If, during the diligence process, we fail to identify issues specific to a target institution or the environment in which the target institution operates, we may be forced to later write down or write off assets, restructure operations or incur impairment or other charges that could result in reporting losses. These charges may also occur if we are not successful in integrating and managing the operations of the target institution with which we combine. In addition, charges of this nature may cause us to violate net-worth or other covenants to which we may be subject as a result of assuming preexisting debt held by a target institution or by virtue of obtaining debt financing.

Resources could be expended in considering or evaluating potential investment or acquisition transactions that are not consummated, which could materially and adversely affect subsequent attempts to locate and acquire or merge with another business.

We anticipate that the investigation of each specific target institution and the negotiation, drafting and execution of relevant agreements, disclosure documents and other instruments will require substantial management time and attention and substantial costs for accountants, attorneys and others. If a decision is made not to complete a specific investment or acquisition transaction, the costs incurred up to that point for the proposed transaction likely would not be recoverable. Furthermore, even if an agreement is reached relating to a specific target institution, we may fail to consummate the investment or acquisition transaction for any number of reasons, including those beyond our control. Any such event will result in a loss of the related costs incurred and could result in additional costs or expenses, which could materially and adversely affect subsequent attempts to locate and acquire or merge with another institution and our reported earnings.

If we do not open new branches or do not achieve targeted profitability on new branches, earnings may be reduced. Our ability to open or acquire branches is subject to regulatory approvals. We cannot predict whether the banking regulators will agree with our growth plans or if or when they will provide the necessary branch approvals. Numerous factors contribute to the performance of a new branch, such as a suitable location, competition, our ability to hire and retain qualified personnel, and the effectiveness of our marketing strategy. It takes time for a new branch to generate significant deposits and loan volume to offset expenses, some of which, like salaries and occupancy expense, are relatively fixed costs. Additionally, there can be no assurance that any of these new branches will ever become profitable. During the period of time before a branch can become profitable, operating a branch will negatively impact net income.

To the extent that we are unable to increase loans through organic core loan growth, we may be unable to successfully implement our growth strategy, which could materially and adversely affect us.

In addition to growing our business through strategic acquisitions, we also intend to grow our business through organic core loan growth. While loan growth has been strong, and our loan balances have increased over the last several fiscal years, much of the loan growth came from multi-family and commercial real estate lending. If we are

unsuccessful in diversifying our loan originations, or if we do not grow the existing business lines, our results of operations and financial condition could be negatively impacted.

35

Table of Contents

We may not be able to effectively manage our growth.

Our future operating results and financial condition depend to a large extent on our ability to successfully manage our growth. Our growth has placed, and it may continue to place, significant demands on our operations and management. Whether through additional acquisitions or organic growth, our current plan to expand our business is dependent upon our ability to:

- continue to implement and improve our operational, credit underwriting and administration, financial, accounting, enterprise risk management and other internal and disclosure controls and procedures and our reporting systems and processes in order to manage a growing number of client relationships;
- comply with changes in, and an increasing number of, laws, rules and regulations, including those of any national securities exchange on which any of our securities become listed;
- scale our technology and other systems' platforms;
- maintain and attract appropriate staffing;
- operate profitably or raise capital; and
- support our asset growth with adequate deposits, funding and liquidity while expanding our net interest margin and meeting our customers' and regulators' liquidity requirements.

We may not successfully implement improvements to, or integrate, our management information and control systems, credit underwriting and administration, internal and disclosure controls, and procedures and processes in an efficient or timely manner and may discover deficiencies in existing systems and controls. In particular, our controls and procedures must be able to accommodate an increase in loan volume in various markets and the infrastructure that comes with new banking centers and banks. Our growth strategy may divert management from our existing business and may require us to incur additional expenditures to expand our administrative and operational infrastructure and, if we are unable to effectively manage and grow our banking franchise, including to the satisfaction of our regulators, we could be materially and adversely affected. In addition, if we are unable to manage our current and future expansion in our operations, we may experience compliance, operational and regulatory problems and delays, have to slow our pace of growth or even stop our market and product expansion, or have to incur additional expenditures beyond current projections to support such growth, any one of which could materially and adversely affect us. If we experience difficulties with the development of new business activities or the integration process of acquired businesses, the anticipated benefits of any particular acquisition may not be realized fully, or at all, or may take longer to realize than expected. Additionally, we may be unable to recognize synergies, operating efficiencies and/or expected benefits within expected time frames and cost projections, or at all. We also may not be able to preserve the goodwill of an acquired financial institution. Our growth could lead to increases in our legal, audit, administrative and financial compliance costs, which could materially and adversely affect us.

If our techniques for managing risk are ineffective, we may be exposed to material unanticipated losses.

In order to manage the significant risks inherent in our business, we must maintain effective policies, procedures and systems that enable us to identify, monitor and control our exposure to material risks, such as credit, interest rate, operational, legal and reputational risks. Our risk management methods may prove to be ineffective due to their design, implementation or the degree to which we adhere to them, or as a result of the lack of adequate, accurate or timely information or otherwise. If our risk management efforts are ineffective, we could suffer losses that could have a material adverse effect on our business, financial condition or results of operations. In addition, we could be subject to litigation, particularly from our customers, and sanctions or fines from regulators. Our techniques for managing the risks we face may not fully mitigate the risk exposure in all economic or market environments, including exposure to risks that we might fail to identify or anticipate.

We are dependent upon maintaining an effective system of internal controls to provide reasonable assurance that transactions and activities are conducted in accordance with established policies and procedures and are captured and reported in the financial statements. Failure to comply with the system of internal controls may result in events or losses which could adversely affect our operations, net income, financial condition, reputation and compliance with laws and regulations.

Our system of internal controls, including internal controls over financial reporting, is an important element of our risk-

management framework. Management regularly reviews and seeks to improve our internal controls, including annual review of key policies and procedures and annual review and testing of key internal controls over financial reporting. Any system of internal controls, however well designed and operated, is based in part on certain assumptions and expectations of employee conduct and can only provide reasonable, not absolute, assurance that the objectives of the internal control structure are met. Any failure or circumvention of our controls and procedures, or failure to comply with regulations related to controls and

Table of Contents

procedures, could have a material adverse effect on our operations, net income, financial condition, reputation, compliance with laws and regulations, or may result in untimely or inaccurate financial reporting.

As previously disclosed, in November 2018, Customers determined that its previously issued consolidated financial statements as of and for the years ended December 31, 2017, 2016 and 2015, the related report of BDO included in the 2017 Form 10-K filed on February 23, 2018, and interim consolidated financial statements as of and for the three months ended March 31, 2018 and 2017 and the three and six months ended June 30, 2018 and 2017 (collectively, the "Affected Periods"), should no longer be relied upon because of misclassifications of cash flow activities associated with Customers' commercial mortgage warehouse lending activities between operating and investing activities on its consolidated statements of cash flows because the related loan balances were incorrectly classified as held for sale rather than held for investment on its consolidated balance sheets. These misclassifications had no effect on total cash balances, total loans, the allowance for loan losses, total assets, total capital, regulatory capital ratios, net interest income, net interest margin, net income to shareholders, basic or diluted EPS, return on average assets, return on average equity, the efficiency ratio, asset quality ratios or any other key performance metric, including non-GAAP performance metrics, that Customers routinely discusses with analysts and investors. Customers filed an amended Annual Report on Form 10-K/A for the fiscal year ended December 31, 2017 and amended Quarterly Reports on Form 10-Q/A for the quarterly periods ended March 31, 2018 and June 30, 2018 on November 30, 2018 to present the restated financial statements and related disclosures.

In connection with the restatement, management determined that a material weakness existed in internal control over financial reporting solely with respect to the misclassification of cash flows associated with Customers' commercial mortgage warehouse lending activities between operating and investing activities on its consolidated statements of cash flows because the related loan balances were incorrectly classified as held for sale rather than held for investment.

Customers conducted a comprehensive analysis of the classifications of cash flows within its consolidated statements of cash flows and established new accounting policies and disclosure control procedures for the classification and reporting of its mortgage warehouse lending transactions on the consolidated balance sheet and statements of cash flows. These efforts have remediated the identified material weakness in internal control over financial reporting as of December 31, 2018.

As management continues to evaluate and work to enhance internal control over financial reporting, it may determine that additional measures are required to address control deficiencies or strengthen internal control over financial reporting. If Customers' remediation efforts do not operate effectively or if it is unsuccessful in implementing or following its remediation efforts, this may result in untimely or inaccurate reporting of Customers' financial results. We may not be able to meet the cash flow requirements of our loan funding obligations, deposit withdrawals, or other business needs and fund our asset growth unless we maintain sufficient liquidity.

We must maintain sufficient liquidity to fund our balance sheet growth in order to successfully grow our revenues, make loans, and repay deposit and other liabilities as these mature or are drawn. This liquidity can be gathered in both wholesale and non-wholesale funding markets. Our asset growth over the past few years has been funded with various forms of deposits and wholesale funding, including brokered and wholesale time deposits, FHLB advances and Federal funds line borrowings. Total wholesale deposits including brokered and municipal deposits were 28.7% of total deposits at December 31, 2018. Our gross loan to deposit ratio was 119.6% at December 31, 2018, and our loan to deposit ratio excluding the mortgage warehouse portfolio funded in part by short-term FHLB borrowings was 99.96% at December 31, 2018. Wholesale funding can cost more than deposits generated from our traditional branch system and customer relationships and is subject to certain practical limits such as our liquidity policy limits, our available collateral for FHLB borrowings capacity and Federal funds line limits with our lenders. Additionally, regulators consider wholesale funding beyond certain points to be imprudent and might suggest or require that future asset growth be reduced or halted. In the absence of appropriate levels and mix of funding, we might need to reduce interest-earning asset growth through the reduction of current production, sales of loans and/or the sale of participation interests in future and current loans. This might reduce our future growth and net income.

The amount of funds loaned to us is generally dependent on the value of the eligible collateral pledged and our financial condition. These lenders could reduce the percentages loaned against various collateral categories, eliminate

certain types of collateral and otherwise modify or even terminate their loan programs, if further disruptions in the capital markets occur. Any change to or termination of our borrowings from the FHLB or correspondent banks could have an adverse effect on our profitability and financial condition, including liquidity.

We may not be able to develop and retain a strong core deposit base and other low-cost, stable funding sources.

We depend on checking, savings and money market deposit account balances and other forms of customer deposits as a primary source of funding for our lending activities. We expect that our future loan growth will largely depend on our ability to

Table of Contents

retain and grow a strong, low-cost deposit base. Because 24.3% of our deposit base as of December 31, 2018 was time deposits, it may prove harder to maintain and grow our deposit base than would otherwise be the case, especially since many of these deposits currently pay interest at above-market rates. As of December 31, 2018, \$1.5 billion, or 84.2%, of our total time deposits, are scheduled to mature through December 31, 2019. We are working to transition certain of our customers to lower-cost traditional bank deposits as higher-cost funding, such as time deposits, mature. If interest rates increase, whether due to changes in inflation, monetary policy, competition or other factors, we would expect to pay higher interest rates on deposits, which would increase our funding costs and compress our net interest margin. We may not succeed in moving our deposits to lower-yielding savings and transactions products, which could materially and adversely affect us. In addition, with concerns about bank failures over the past several years and the end of the FDIC's non-interest transaction deposit guarantee program on December 31, 2012, customers, particularly those who may maintain deposits in excess of insured limits, have become concerned about the extent to which their deposits are insured by the FDIC. Our customers may withdraw deposits to ensure that their deposits with us are fully insured and may place excess amounts in other institutions or make investments that are perceived as being more secure and/or higher yielding. Further, even if we are able to maintain and grow our deposit base, deposit balances can decrease when customers perceive alternative investments, such as the stock market, will provide a better risk/return tradeoff. If customers move money out of bank deposits, we could lose a relatively low-cost source of funds, increasing our funding costs and reducing our net interest income and net income. Deposit balances associated with the BankMobile business segment can vary over the course of the year, from a seasonal low of approximately \$358 million in June when student enrollment is lower to a high of as much as \$732 million in September when student enrollment is high and individual account balances are generally at their peak. Additionally, any such loss of funds could result in lower loan originations and growth, which could materially and adversely affect our results of operations and financial condition, including liquidity.

Our "high-touch" personalized service banking model may be replicated by competitors.

We expect to drive organic growth by employing our Concierge Banking® and single-point-of-contact strategies, which provide specific relationship managers or private bankers for all customers. Many of our competitors provide similar services, and others may replicate our model. Our competitors may have greater resources than we do and may be able to provide similar services more quickly, efficiently and extensively. To the extent others replicate our model, we could lose what we view as a competitive advantage, and our financial condition and results of operations may be adversely affected.

Competitors' technology-driven products and services and improvements to such products and services may adversely affect our ability to generate core deposits through mobile banking.

Our organic growth strategy focuses on, among other things, expanding market share through our "high-tech" model, which includes remote account opening, remote deposit capture, mobile and digital banking. These technological advances, such as BankMobile, are intended to allow us to generate additional core deposits at a lower cost than generating deposits through opening and operating branch locations. Some of our competitors may have greater resources to invest in technology and may be better equipped to market new technology-driven products and services. This may result in limiting, reducing or otherwise adversely affecting our growth strategy in this area and our access to deposits through mobile banking. In addition, to the extent we fail to keep pace with technological changes or incur respectively large expenses to implement technological changes, our business, financial condition and results of operations may be adversely affected.

We may suffer losses due to minority investments in other financial institutions or related companies.

From time to time, we may make or consider making minority investments in other financial institutions or technology companies in the financial services business. If we do so, we may not be able to influence the activities of companies in which we invest and may suffer losses due to these activities. Investments in foreign companies could pose additional risks as a result of distance, language barriers and potential lack of information (for example, foreign institutions, including foreign financial institutions, may not be obligated to provide as much information regarding their operations as those in the United States). Our investment in Religare, which is a diversified financial services company in India, represents such an investment. In fourth quarter 2016, we announced our decision to exit our investment in Religare. As a result of that decision, we recorded an impairment loss of \$7.3 million in earnings in

fourth quarter 2016 and adjusted our cost basis of the Religare securities to their estimated fair value of \$15.2 million at December 31, 2016. During the year ended December 31, 2017, Customers recorded OTTI losses of \$12.9 million related to its equity holdings in Religare for the full amount of the decline in fair value from the cost basis established at December 31, 2016 through September 30, 2017, because Customers no longer had the intent to hold these securities until a recovery in fair value. At December 31, 2017, the fair value of the Religare equity securities was \$3.4 million which resulted in an unrealized gain of \$1.0 million being recognized in AOCI with no adjustment for deferred taxes as Customers did not have a tax strategy in place capable of generating sufficient capital gains to utilize any capital losses resulting from the Religare investment. At December 31, 2018, Customers continues to not have a tax strategy in place capable

Table of Contents

of generating sufficient capital gains to utilize any capital losses resulting from the Religare impairment. The adoption of ASU 2016-01, Recognition and Measurement of Financial Assets and Financial Liabilities, on January 1, 2018 resulted in a cumulative effect adjustment to Customers' consolidated balance sheet with a \$1.0 million reduction in AOCI and a corresponding increase in retained earnings related to the December 31, 2017 unrealized gain on the Religare equity securities. In accordance with the new accounting guidance, changes in the fair value of the Religare equity securities since adoption are recorded directly in earnings, which resulted in an unrealized loss of \$1.6 million being recognized in other non-interest income in the accompanying consolidated statements of income for the year ended December 31, 2018. As of December 31, 2018, the fair value of the Religare equity securities was \$1.7 million. Future declines in the market price per share of the Religare common stock and adverse changes in foreign currency exchange rates, may have an adverse effect on our financial condition and results of operations.

We are required to hold capital for United States bank regulatory purposes to support our investment in Religare securities.

Under the U.S. capital adequacy rules, which became effective as of January 1, 2015, we have to hold risk-based capital based on the amount of Religare common stock we own. Based upon the implementation of the final U.S. capital adequacy rules, these investments are currently subject to risk weighting of 100% of the amount of the investment; however, to the extent future aggregated carrying value of certain equity exposures exceeds 10% of our then total capital, risk weightings of 300% may apply. Any capital that is required to be used to support our Religare investment will not be available to support our United States operations or Customers Bank, if needed.

Risks Relating to the Regulation of Our Industry

Our business, financial condition, results of operations and future prospects could be adversely affected by the highly regulated environment in which we operate.

As a bank holding company, we are subject to federal supervision and regulation. Federal regulation of the banking industry, along with tax and accounting laws, regulations, rules and standards, may limit our operations significantly and control the methods by which we conduct business, just as they limit those of other banking organizations. In addition, compliance with laws and regulations can be difficult and costly, and changes to laws and regulations can impose additional compliance costs. The Dodd-Frank Act, which imposes significant regulatory and compliance changes on financial institutions, is an example of this type of federal regulation. Many of these regulations are intended to protect depositors, customers, the public, the banking system as a whole, or the FDIC insurance funds, not stockholders. Regulatory requirements and discretion affect our lending practices, capital structure, investment practices, dividend policy and many other aspects of our business. There are laws and regulations which restrict transactions between us and our subsidiaries. These requirements may constrain our operations, and the adoption of new laws and changes to or repeal of existing laws may have a further impact on our business, financial condition, results of operations and future prospects. Also, the burden imposed by those federal and state regulations may place banks in general, including Customers Bank in particular, at a competitive disadvantage compared to their non-banking competitors. We are also subject to requirements with respect to the confidentiality of information obtained from clients concerning their identities, business and personal financial information, employment and other matters. We require our team members to agree to keep all such information confidential, and we monitor compliance. Failure to comply with confidentiality requirements could result in material liability and adversely affect our business, financial condition, results of operations and future prospects.

Bank holding companies and financial institutions are extensively regulated and currently face an uncertain regulatory environment. Applicable laws, regulations, interpretations, enforcement policies and accounting principles have been subject to significant changes in recent years and may be subject to significant future changes. Future changes may have a material adverse effect on our business, financial condition and results of operations.

Federal and state regulatory agencies may adopt changes to their regulations or change the manner in which existing regulations are applied or interpreted. We cannot predict the substance or effect of pending or future legislation or regulation or the application of laws and regulations on us. Compliance with current and potential regulation, as well as regulatory scrutiny, may significantly increase our costs, impede the efficiency of our internal business processes, require us to increase our regulatory capital and limit our ability to pursue business opportunities in an efficient manner by requiring us to expend significant time, effort and resources to ensure compliance and respond to any

regulatory inquiries or investigations. In addition, press coverage and other public statements that assert some form of wrongdoing by financial services companies (including press coverage and public statements that do not involve us) may result in regulatory inquiries or investigations, which, independent of the outcome, may be time-consuming and expensive and may divert time, effort and resources from our business. Evolving regulations and guidance concerning executive compensation may also impose limitations on us that affect our ability to compete successfully for executive and management talent.

Table of Contents

In addition, given the current economic and financial environment, regulators may elect to alter standards or the interpretation of the standards used to measure regulatory compliance or to determine the adequacy of liquidity, certain risk management or other operational practices for financial services companies in a manner that impacts our ability to implement our strategy and could affect us in substantial and unpredictable ways and could have a material adverse effect on our business, financial condition and results of operations. Furthermore, the regulatory agencies have extremely broad discretion in their interpretation of the regulations and laws and their interpretation of the quality of our loan portfolio, securities portfolio and other assets. If any regulatory agency's assessment of the quality of our assets, operations, lending practices, investment practices, capital structure or other assets of our business differs from our assessment, we may be required to take additional charges or undertake or refrain from undertaking actions that would have the effect of materially reducing our earnings, capital ratios and share price.

We operate in a highly regulated environment, and the laws and regulations that govern our operations, corporate governance, executive compensation and accounting principles, or changes in them, or our failure to comply with them, could materially and adversely affect us.

We are subject to extensive regulation, supervision and legislation that govern almost all aspects of our operations. Intended to protect customers, depositors and the FDIC's DIF and not our shareholders, these laws and regulations, among other matters, prescribe minimum capital requirements, impose limitations on our business activities, limit the dividends or distributions that we can pay, restrict the ability of our subsidiary bank to engage in transactions with the Bancorp, and impose certain specific accounting requirements on us that may be more restrictive and may result in greater or earlier charges to earnings or reductions in our capital than generally accepted accounting principles. Compliance with laws and regulations can be difficult and costly, and changes to laws and regulations often impose additional compliance costs and may make certain products impermissible or uneconomic. Our failure to comply with these laws and regulations, even if the failure follows good faith effort or reflects a difference in interpretation, could subject us to restrictions on our business activities, reputational harm, fines and other penalties, any of which could materially and adversely affect us. Further, any new laws, rules and regulations could make compliance more difficult or expensive and also materially and adversely affect us.

Our use of third-party vendors and our other ongoing third-party business relationships are subject to increasing regulatory requirements and attention.

We regularly use third-party vendors as part of our business and have other ongoing business relationships with other third parties. These types of third-party relationships are subject to increasingly demanding regulatory requirements and attention by federal banking regulators. Regulation requires us to perform enhanced due diligence, perform ongoing monitoring and control our third party vendors and other ongoing third-party business relationships. In certain cases, we may be required to renegotiate our agreements with these vendors to meet these enhanced requirements, which could increase our costs. We expect that our regulators will hold us responsible for deficiencies in our oversight and control of our third-party relationships and in the performance of the parties with which we have these relationships. As a result, if our regulators conclude that we have not exercised adequate oversight and control over our third party vendors or other ongoing third-party business relationships or that such third parties have not performed appropriately, we could be subject to enforcement actions, including civil money penalties or other administrative or judicial penalties or fines as well as requirements for customer remediation, any of which could have a material adverse effect on our business, financial condition or results of operations.

We are subject to numerous laws and governmental regulations and to regular examinations by our regulators of our business and compliance with laws and regulations, and our failure to comply with such laws and regulations or to adequately address any matters identified during our examinations could materially and adversely affect us. Federal banking agencies regularly conduct comprehensive examinations of our business, including our compliance with applicable laws, regulations and policies. Examination reports and ratings (which often are not publicly available) and other aspects of this supervisory framework can materially impact the conduct, organic and acquisition growth and profitability of our business. Our regulators have extensive discretion in their supervisory and enforcement activities and may impose a variety of remedial actions, conditions or limitations on our business operations if, as a result of an examination, they determined that our financial condition, capital resources, asset quality, earnings prospects, management, liquidity or other aspects of any of our operations had become unsatisfactory, or that we or

our management were in violation of any law, regulation or policy. Examples of those actions, conditions or limitations include enjoining “unsafe or unsound” practices, requiring affirmative actions to correct any conditions resulting from any asserted violation of law, issuing administrative orders that can be judicially enforced, directing increases in our capital, assessing civil monetary penalties against our officers or directors, removing officers and directors and, if a conclusion was reached that the offending conditions cannot be corrected, or there is an imminent risk of loss to depositors, terminating our deposit insurance. Other actions, formal or informal, that may be imposed could restrict our growth, including regulatory denials to expand branches, relocate, add subsidiaries and

Table of Contents

affiliates, expand into new financial activities or merge with or purchase other financial institutions. The timing of these examinations, including the timing of the resolution of any issues identified by our regulators in the examinations and the final determination by them with respect to the imposition of any remedial actions, conditions or limitations on our business operations, is generally not within our control. We also could suffer reputational harm in the event of any perceived or actual noncompliance with certain laws and regulations. If we become subject to such regulatory actions, we could be materially and adversely affected.

Other litigation and regulatory actions, including possible enforcement actions, could subject us to significant fines, penalties, judgments or other requirements resulting in increased expenses or restrictions on our business activities. Our business is subject to increased litigation and regulatory risks as a result of a number of factors, including the highly regulated nature of the financial services industry and the focus of state and federal prosecutors on banks and the financial services industry generally. This focus has only intensified since the latest financial crisis, with regulators and prosecutors focusing on a variety of financial institution practices and requirements. We may, from time to time, be the subject of subpoenas, requests for information, reviews, investigations and proceedings (both formal and informal) by governmental agencies regarding our business. Legal or regulatory actions may subject us to substantial compensatory or punitive damages, significant fines, penalties, obligations to change our business practices or other requirements resulting in increased expenses, diminished income and damage to our reputation. Our involvement in any such matters, even if the matters are ultimately determined in our favor, could also cause significant harm to our reputation and divert management attention from the operation of our business. Further, any settlement, consent order or adverse judgment in connection with any formal or informal proceeding or investigation by government agencies may result in litigation, investigations or proceedings as other litigants and government agencies begin independent reviews of the same activities. As a result, the outcome of legal and regulatory actions could be material to our business, results of operations, financial condition and cash flows, depending on, among other factors, the level of our earnings for that period and could have a material adverse effect on our business, financial condition or results of operations.

The FDIC's restoration plan and the related increased assessment rate could materially and adversely affect us. The FDIC insures deposits at FDIC-insured depository institutions up to applicable limits. The amount of a particular institution's deposit insurance assessment is based on that institution's risk classification under an FDIC risk-based assessment system. An institution's risk classification is assigned based on its capital levels and the level of supervisory concern the institution poses to its regulators. We are generally unable to control the amount of premiums that we are required to pay for FDIC insurance. If there are additional bank or financial institution failures, we may be required to pay even higher FDIC premiums than the recently increased levels. Any future additional assessments, increases or required prepayments in FDIC insurance premiums may materially and adversely affect us, including reducing our profitability or limiting our ability to pursue certain business opportunities.

The Federal Reserve may require us to commit capital resources to support our subsidiary bank.

As a matter of policy, the Federal Reserve, which examines us and our subsidiaries, expects a bank holding company to act as a source of financial and managerial strength to a subsidiary bank and to commit resources to support such subsidiary bank. Under the "source of strength" doctrine, the Federal Reserve may require a bank holding company to make capital injections into a troubled subsidiary bank and may charge the bank holding company with engaging in unsafe and unsound practices for failure to commit resources to such a subsidiary bank. In addition, the Dodd-Frank Act directs the federal bank regulators to require that all companies that directly or indirectly control an insured depository institution to serve as a source of strength for the institution. Under this requirement, we could be required to provide financial assistance to Customers Bank or any other subsidiary banks we may own in the future should they experience financial distress.

A capital injection may be required at times when we do not have the resources to provide it, and therefore, we may be required to borrow the funds or raise additional equity capital from third parties. Any loans by a holding company to its subsidiary bank are subordinate in right of payment to deposits and to certain other indebtedness of the subsidiary bank. In the event of a bank holding company's bankruptcy, the bankruptcy trustee will assume any commitment by the holding company to a federal bank regulatory agency to maintain the capital of a subsidiary bank. Moreover, bankruptcy law provides that claims based on any such commitment will be entitled to a priority of payment over the

claims of the holding company's general unsecured creditors, including the holders of its indebtedness. Any financing that must be done by the holding company in order to make the required capital injection may be difficult and expensive and may not be available on attractive terms, or at all, which likely would have a material adverse effect on us.

41

Table of Contents

The long-term impact of the new regulatory capital standards and the capital rules on U.S. banks is uncertain. In September 2010, the Basel Committee on Banking Supervision, announced an agreement to a strengthened set of capital requirements for internationally active banking organizations in the United States and around the world, known as Basel III. Basel III narrowed the definition of capital, introduced requirements for minimum Tier 1 common capital, increased requirements for minimum Tier 1 capital and total risk-based capital, and changed risk-weighting methodologies. Basel III is being phased in over time until fully phased in by January 1, 2019.

In July 2013, the Federal Reserve adopted a final rule regarding new capital requirements pursuant to Basel III. These rules, which became effective on January 1, 2015, for community banks, increased the required amount of regulatory capital that we must hold, and failure to comply with the capital rules will lead to limitations on the dividend payments to us by Customers Bank and other elective distributions.

In December 2017, the Basel Committee on Banking Supervision published standards that it described as the finalization of the Basel III regulatory framework (commonly referred to as Basel IV). Among other things, these standards revise the Basel Committee's standardized approach for credit risk and provide a new standardized approach for operational risk capital. Under the Basel framework, these standards will generally be effective on January 1, 2022, with an aggregate output floor phasing in through January 1, 2027. Under the current U.S. capital rules, operational risk capital requirements and a capital floor apply only to advanced-approaches institutions and not to us. The impact of Basel IV on us will depend on the manner in which it is implemented by the federal bank regulators. Various provisions of the Dodd-Frank Act increase the capital requirements of bank holding companies, such as we, and non-bank financial companies that are supervised by the Federal Reserve. The leverage and risk-based capital ratios of these entities may not be lower than the leverage and risk-based capital ratios for insured depository institutions. The Basel III changes and other regulatory capital requirements will likely result in generally higher regulatory capital standards for us.

We face a risk of noncompliance and enforcement action with the Bank Secrecy Act and other anti-money laundering statutes and regulations.

The federal Bank Secrecy Act, the Uniting and Strengthening America by PATRIOT Act and other laws and regulations require financial institutions, among other duties, to institute and maintain an effective anti-money laundering program and file suspicious activity and currency transaction reports as appropriate. The federal Financial Crimes Enforcement Network, established by the U.S. Treasury Department to administer the Bank Secrecy Act, is authorized to impose significant civil money penalties for violations of those requirements and has recently engaged in coordinated enforcement efforts with the individual federal banking regulators, as well as the U.S. Department of Justice, Drug Enforcement Administration and IRS. There is also increased scrutiny of compliance with the rules enforced by OFAC. If our policies, procedures and systems are deemed deficient or the policies, procedures and systems of the financial institutions that we have already acquired or may acquire in the future are deficient, we would be subject to liability, including fines and regulatory actions (such as restrictions on our ability to pay dividends and the necessity to obtain regulatory approvals to proceed with certain aspects of our business plan, including our acquisition plans), which could materially and adversely affect us. Failure to maintain and implement adequate programs to combat money laundering and terrorist financing could also have serious reputational consequences for us.

Federal, state and local consumer lending laws may restrict our ability to originate certain mortgage loans or increase our risk of liability with respect to such loans and could increase our cost of doing business.

Federal, state and local laws have been adopted that are intended to eliminate certain lending practices considered "predatory." These laws prohibit practices such as steering borrowers away from more affordable products, selling unnecessary insurance to borrowers, repeatedly refinancing loans and making loans without a reasonable expectation that the borrowers will be able to repay the loans irrespective of the value of the underlying property. It is our policy not to make predatory loans, but these laws create the potential for liability with respect to our lending and loan investment activities. They increase our cost of doing business and, ultimately, may prevent us from making certain loans and cause us to reduce the average percentage rate or the points and fees on loans that we do make.

Loans that we make through certain federal programs are dependent on the Federal Government's continuation and support of these programs and on our compliance with their requirements.

We participate in various U.S. Government agency guarantee programs, including programs operated by the SBA. We are responsible for following all applicable U.S. Government agency regulations, guidelines and policies whenever we originate loans as part of these guarantee programs. If we fail to follow any applicable regulations, guidelines or policies associated with

Table of Contents

a particular guarantee program, any loans we originate as part of that program may lose the associated guarantee, exposing us to credit risk to which we would not otherwise have been exposed or underwritten as part of our origination process for U.S. Government agency guaranteed loans, or result in our inability to continue originating loans under such programs. The loss of any guarantees for loans we have extended under U.S. Government agency guarantee programs or the loss of our ability to participate in such programs could have a material adverse effect on our business, financial condition or results of operations.

In connection with our acquisition of the Disbursement business, we are subject to further substantial federal and state governmental regulation related to the Disbursement business that could change and thus force us to make modifications to the Disbursement business. Compliance with the various complex laws and regulations is costly and time consuming, and failure to comply could have a material adverse effect on our business. Additionally, increased regulatory requirements on the Disbursement business may increase costs, which could materially and adversely affect our business, financial condition and/or operating results.

As a third-party servicer under the Title IV regulations, we are directly or indirectly subject to a variety of federal and state laws and regulations. Our contracts with most of our higher education institution clients require us to comply with applicable laws and regulations, including:

- Title IV of the Higher Education Act of 1965, or Title IV;
 - the Family Educational Rights and Privacy Act of 1975;
 - the USA PATRIOT Act and related anti-money laundering requirements; and
- certain federal rules regarding safeguarding personal information, including rules implementing the privacy provisions of GLBA.

Higher Education Regulations

Third-Party Servicer. Because of the services we provide to some institutions with regard to the handling of Title IV funds, we are considered a “third-party servicer” under the Title IV regulations. Those regulations require a third-party servicer to submit annually a compliance audit conducted by outside independent auditors that cover the servicer’s Title IV activities. Each year we must submit a “Compliance Attestation Examination of the Title IV Student Financial Assistance Programs” audit to the DOE, which includes a report by an independent audit firm. This yearly compliance audit submission to DOE provides comfort to our higher education institution clients that we are in compliance with the third-party servicer regulations that may apply to us. We also provide this compliance audit report to clients upon request to help them fulfill their compliance audit obligations as Title IV participating institutions.

Under DOE’s regulations, a third-party servicer that contracts with a Title IV institution acts in the nature of a fiduciary in the administration of Title IV programs. Among other requirements, the regulations provide that a third-party servicer is jointly and severally liable with its client institution for any liability to DOE arising out of the servicer’s violation of Title IV or its implementing regulations, which could subject us to material fines related to acts or omissions of entities beyond our control. DOE is also empowered to limit, suspend or terminate the violating servicer’s eligibility to act as a third-party servicer and to impose significant civil penalties on the violating servicer. Additionally, on behalf of our higher education institution clients, we are required to comply with DOE’s cash management regulations regarding payment of financial aid credit balances to students and providing bank accounts to students that may be used for receiving such payments. In the event DOE concluded that we had violated Title IV or its implementing regulations and should be subject to one or more of these sanctions, our business and results of operations could be materially and adversely affected. There is limited enforcement and interpretive history of Title IV regulations.

On May 18, 2015, DOE published its NPRM on program integrity and improvement issues. Final rules relating to Title IV cash management were published in the Federal Register on October 30, 2015. The Final Rules included, among others, provisions related to (i) restrictions on the ability of higher education institutions and third-party servicers like us to market financial products to students including sending unsolicited debit cards to students, (ii) prohibitions on the assessment of certain types of account fees on student account holders and (iii) requirements related to ATM access for student account holders that became effective as of July 1, 2016. Although the complete impact of the Final Rules are unknown, there could be a significant negative impact on the Disbursement business and, in turn, our business.

FERPA. Our higher education institution clients are subject to FERPA, which provides, with certain exceptions, that an educational institution that receives any federal funding under a program administered by DOE may not have a policy or practice of disclosing education records or “personally identifiable information” from education records, other than directory information, to third parties without the student’s or parent’s written consent. Our higher education institution clients that use

Table of Contents

the Disbursement business services disclose to us certain non-directory information concerning their students, including contact information, student identification numbers and the amount of students' credit balances. We believe that our higher education institution clients may disclose this information to us without the students' or their parents' consent pursuant to one or more exceptions under FERPA. However, if DOE asserts that we do not fall into one of these exceptions or if future changes to legislation or regulations require student consent before our higher education institution clients can disclose this information to us, a sizable number of students may cease using our products and services, which could materially and adversely affect our business, financial condition and results of operations. Additionally, as we are indirectly subject to FERPA, we may not permit the transfer of any personally identifiable information to another party other than in a manner in which a higher education institution may disclose it. In the event that we re-disclose student information in violation of this requirement, FERPA requires our clients to suspend our access to any such information for a period of five years. Any such suspension could have a material adverse effect on our business, financial condition and results of operations.

State Laws. We may also be subject to similar state laws and regulations, including those that restrict higher education institutions from disclosing certain personally identifiable information of students. State attorneys general and other enforcement agencies may monitor our compliance with state and federal laws and regulations that affect our business, including those pertaining to higher education and banking, and conduct investigations of our business that are time consuming and expensive and could result in fines and penalties that have a material adverse effect on our business, financial condition and results of operations.

Additionally, individual state legislatures may propose and enact new laws that restrict or otherwise affect our ability to offer our products and services as we currently do, which could have a material adverse effect on our business, financial condition and results of operations.

Reviews performed by the Internal Revenue Service and state taxing authorities for the fiscal years that remain open for investigation may result in a change to income taxes recorded in our consolidated financial statements and adversely affect our results of operations.

We are subject to U.S. federal income tax as well as income tax of various states primarily in the mid-Atlantic region of the United States. Years that remain open for potential review by (i) the IRS are 2015 through 2017 and (ii) state taxing authorities are 2013 through 2017. The results of these reviews could result in increased recognition of income tax expense in our consolidated financial statements as well as possible fines and penalties.

Our financial results may be adversely affected by changes in U.S. and non-U.S. tax and other laws and regulations. On December 22, 2017, H.R.1, commonly known as the Tax Cuts and Jobs Act, was signed into law. The Tax Act includes many provisions that effected Customers' income tax expenses, including reducing its corporate federal tax rate from 35% to 21% effective January 1, 2018. As a result of the rate reduction, Customers was required to re-measure, through income tax expense in the period of enactment, its deferred tax assets and liabilities using the enacted rate at which Customers expected them to be recovered or settled. The re-measurement of the net deferred tax asset resulted in additional income tax expense of \$5.5 million recorded in fourth quarter 2017.

Also on December 22, 2017, the SEC released SAB 118 to address any uncertainty or diversity of views in practice in accounting for the income tax effects of the Act in situations where a registrant does not have the necessary information available, prepared or analyzed in reasonable detail to complete this accounting in the reporting period that includes the enactment date. SAB 118 allowed for a measurement period not to extend beyond one year from the Act's enactment date to complete the necessary accounting.

Customers recorded provisional amounts of deferred income taxes using reasonable estimates in three areas where information necessary to complete the accounting was not available, prepared or analyzed as follows: (i) the deferred tax liability for temporary differences between the tax and financial reporting bases of fixed assets principally due to the accelerated depreciation under the Act which allowed for full expensing of qualified property purchased and placed in service after September 27, 2017; (ii) the deferred tax asset for temporary differences associated with accrued compensation was awaiting final determinations of amounts that were paid and deducted on the 2017 income tax returns and (iii) the deferred tax liability for temporary differences associated with equity investments in partnerships were awaiting receipt of Schedules K-1 from outside preparers, which was necessary to determine the 2017 tax impact from these investments.

In a fourth area, Customers made no adjustments to deferred tax assets representing future deductions for accrued compensation that were subject to new limitations under Internal Revenue Code Section 162(m) which, generally, limits the

Table of Contents

annual deduction for certain compensation paid to certain team members to \$1 million. There was uncertainty in applying the newly enacted rules to existing contracts, and Customers was seeking further clarifications before completing its analysis.

Customers completed the calculations for the provisional items with the completion of the 2017 tax returns and completed the analysis of the Section 162(m) rules after further guidance was issued. The impact of the completed calculations to the re-measurement of the deferred taxes resulted in an immaterial change and the analysis of the 162(m) rules resulted in no adjustment.

Risks Relating to Our Securities

Risks Relating to Our Voting Common Stock

The trading volume in our common stock may generally be less than that of other larger financial services companies. Although the shares of our common stock are listed on the NYSE, the trading volume in our common stock may generally be less than that of many other larger financial services companies. A public trading market having the desired characteristics of depth, liquidity and orderliness depends upon the presence in the marketplace of willing buyers and sellers of our common stock at any given time, which presence will be dependent upon the individual decisions of investors, over which we have no control. Illiquidity of the stock market, or in the trading of our common stock on the NYSE, could have a material adverse effect on the value of your shares, particularly if significant sales of our common stock, or the expectation of significant sales, were to occur.

We do not expect to pay cash dividends on our common stock in the foreseeable future, and our ability to pay dividends is subject to regulatory limitations.

We have not historically declared nor paid cash dividends on our common stock, and we do not expect to do so in the near future. Any future determination relating to our dividend policy will be made at the discretion of our board of directors and will depend on a number of factors, including earnings and financial condition, liquidity and capital requirements, the general economic and regulatory climate, the ability to service any equity or debt obligations senior to the common stock, our planned growth in assets and other factors deemed relevant by the board of directors. We must be current in the payment of dividends to holders of our Series C, Series D, Series E and Series F Preferred Stock before any dividends can be paid on our common stock.

In addition, as a bank holding company, we are subject to general regulatory restrictions on the payment of cash and in-kind dividends. Federal bank regulatory agencies have the authority to prohibit bank holding companies from engaging in unsafe or unsound practices in conducting their business, which, depending on the financial condition and liquidity of the holding company at the time, could include the payment of dividends. Further, various federal and state statutory provisions limit the amount of dividends that our bank subsidiary can pay to us as its holding company without regulatory approval. See “Market Price of Common Stock and Dividends – Dividends on Common Stock” below for further detail regarding restrictions on our ability to pay dividends.

We may issue additional shares of our common stock in the future which could adversely affect the value or voting power of our outstanding common stock.

Actual or anticipated issuances or sales of substantial amounts of our common stock in the future could cause the value of our common stock to decline significantly and make it more difficult for us to sell equity or equity-related securities in the future at a time and on terms that we deem appropriate. The issuance of any shares of our common stock in the future also would, and equity-related securities could, dilute the percentage ownership interest held by shareholders prior to such issuance. Actual issuances of our common stock could also significantly dilute the voting power of the common stock.

We have also made grants of restricted stock units and stock options with respect to shares of our common stock to our directors and certain team members. We may also issue further equity-based awards in the future. As such shares are issued upon vesting and as such options may be exercised and the underlying shares are or become freely tradeable, the value or voting power of our common stock may be adversely affected, and our ability to sell more equity or equity-related securities could also be adversely affected.

At December 31, 2018, we are not required to issue any additional equity securities to existing holders of our common stock on a preemptive basis. Therefore, additional common stock issuances, directly or through convertible or exchangeable securities, warrants or options, will generally dilute the holdings of our existing holders of common

stock, and such issuances or the perception of such issuances may reduce the market price of our common stock. Our outstanding preferred stock has

45

Table of Contents

preference on distribution payments, periodically or upon liquidation, which could eliminate or otherwise limit our ability to make distributions to holders of our common stock. Because our decision to issue debt or equity securities or incur other borrowings in the future will depend on market conditions and other factors beyond our control, the amount, timing, nature or success of our future capital-raising efforts is uncertain. Thus, holders of our common stock bear the risk that our future issuances of debt or equity securities or our incurrence of other borrowings will negatively affect the value of our common stock.

Future issuances of debt securities, which would rank senior to our common stock upon our liquidation, and future issuances of equity securities, which would dilute the holdings of our existing holders of common stock and may be senior to our common stock for the purposes of making distributions, periodically or upon liquidation, may negatively affect the market price of our common stock.

In the future, we may issue debt or equity securities or incur other borrowings. Upon our liquidation, holders of our debt securities and other loans and preferred stock will receive a distribution of our available assets before holders of our common stock. If we incur debt in the future, our future interest costs could increase and adversely affect our liquidity, cash flows and results of operations.

Provisions in our articles of incorporation and bylaws may inhibit a takeover of us, which could discourage transactions that would otherwise be in the best interests of our shareholders and could entrench management.

Provisions of our articles of incorporation and bylaws and applicable provisions of Pennsylvania law and the federal Change in Bank Control Act may delay, inhibit or prevent someone from gaining control of our business through a tender offer, business combination, proxy contest or some other method even though some of our shareholders might believe a change in control is desirable. They might also increase the costs of completing a transaction in which we acquire another financial services business, merge with another financial institution or sell our business to another financial institution. These increased costs could reduce the value of the shares held by our shareholders upon completion of these types of transactions.

Shareholders may be deemed to be acting in concert or otherwise in control of us and our bank subsidiaries, which could impose prior approval requirements and result in adverse regulatory consequences for such holders.

We are a bank holding company regulated by the Federal Reserve. Any entity (including a “group” composed of natural persons) owning 25% or more of a class of our outstanding shares of voting stock, or a lesser percentage if such holder or group otherwise exercises a “controlling influence” over us, may be subject to regulation as a “bank holding company” in accordance with the BHCA. In addition, (i) any bank holding company or foreign bank with a U.S. presence is required to obtain the approval of the Federal Reserve under the BHCA to acquire or retain 5% or more of a class of our outstanding shares of voting stock and (ii) any person other than a bank holding company may be required to obtain prior regulatory approval under the Change in Bank Control Act to acquire or retain 10% or more of our outstanding shares of voting stock. Any shareholder that is deemed to “control” the company for bank regulatory purposes would become subject to prior approval requirements and ongoing regulation and supervision. Such a holder may be required to divest amounts equal to or exceeding 5% of the voting shares of investments that may be deemed incompatible with bank holding company status, such as an investment in a company engaged in non-financial activities. Regulatory determination of “control” of a depository institution or holding company is based on all of the relevant facts and circumstances. Potential investors are advised to consult with their legal counsel regarding the applicable regulations and requirements.

Our common stock owned by holders determined by a bank regulatory agency to be acting in concert would be aggregated for purposes of determining whether those holders have control of a bank or bank holding company. Each shareholder obtaining control that is a “company” would be required to register as a bank holding company. “Acting in concert” generally means knowing participation in a joint activity or parallel action towards the common goal of acquiring control of a bank or a parent company, whether or not pursuant to an express agreement. The manner in which this definition is applied in individual circumstances can vary and cannot always be predicted with certainty. Many factors can lead to a finding of acting in concert, including where: (i) the shareholders are commonly controlled or managed; (ii) the shareholders are parties to an oral or written agreement or understanding regarding the acquisition, voting or transfer of control of voting securities of a bank or bank holding company; (iii) the shareholders each own stock in a bank and are also management officials, controlling shareholders, partners or trustees of another

company or (iv) both a shareholder and a controlling shareholder, partner, trustee or management official of such shareholder own equity in the bank or bank holding company.

46

Table of Contents

The FDIC's policy statement imposing restrictions and criteria on private investors in failed bank acquisitions will apply to us and our investors.

In August 2009, the FDIC issued a policy statement imposing restrictions and criteria on private investors in failed bank acquisitions. The policy statement is broad in scope and both complex and potentially ambiguous in its application. In most cases, it would apply to an investor with more than 5% of the total voting power of an acquired depository institution or its holding company; but in certain circumstances, it could apply to investors holding fewer voting shares. The policy statement will be applied to us if we make additional failed bank acquisitions from the FDIC or if the FDIC changes its interpretation of the policy statement or determines at some future date that it should be applied because of our circumstances.

Investors subject to the policy statement could be prohibited from selling or transferring their interests for three years. They also would be required to provide the FDIC with information about the investor and all entities in the investor's ownership chain, including information on the size of the capital fund or funds, its diversification, its return profile, its marketing documents, and its management team and business model. Investors owning 80% or more of two or more banks or savings associations would be required to pledge their proportionate interests in each institution to cross-guarantee the FDIC against losses to the DIF.

Under the policy statement, the FDIC also could prohibit investment through ownership structures involving multiple investment vehicles that are owned or controlled by the same parent company. Investors that directly or indirectly hold 10% or more of the equity of a bank or savings association in receivership also would not be eligible to bid to become investors in the deposit liabilities of that failed institution. In addition, an investor using ownership structures with entities that are domiciled in bank-secrecy jurisdictions would not be eligible to own a direct or indirect interest in an insured depository institution unless the investor's parent company is subject to comprehensive consolidated supervision as recognized by the Federal Reserve, and the investor enters into certain agreements with the U.S. bank regulators regarding access to information, maintenance of records and compliance with U.S. banking laws and regulations. If the policy statement applies, we (including any failed bank we acquire) could be required to maintain a ratio of Tier 1 common equity to total assets of at least 10% for a period of three years and thereafter maintain a capital level sufficient to be well capitalized under regulatory standards during the remaining period of ownership of the investors. Bank subsidiaries also may be prohibited from extending any new credit to investors that own at least 10% of our equity.

Risks Relating to Our Fixed-to-Floating-Rate Non-Cumulative Perpetual Preferred Stock, Series C, Series D, Series E and Series F

The shares of our Series C, Series D, Series E and Series F Preferred Stock are equity securities and are subordinate to our existing and future indebtedness.

The shares of Series C, Series D, Series E and Series F Preferred Stock are equity interests in Customers Bancorp and do not constitute indebtedness of Customers Bancorp or any of our subsidiaries and rank junior to all of our existing and future indebtedness and other non-equity claims with respect to assets available to satisfy claims against us, including claims in the event of our liquidation. If we are forced to liquidate our assets to pay our creditors, we may not have sufficient funds to pay amounts due on any or all of the Series C, Series D, Series E and Series F Preferred Stock then outstanding.

We may not pay dividends on the shares of Series C, Series D, Series E and Series F Preferred Stock.

Dividends on the shares of Series C, Series D, Series E and Series F Preferred Stock are payable only if declared by our board of directors or a duly authorized committee of the board. As a bank holding company, we are subject to general regulatory restrictions on the payment of cash dividends. Federal bank regulatory agencies have the authority to prohibit bank holding companies from engaging in unsafe or unsound practices in conducting their business, which, depending on the financial condition and liquidity of the holding company at the time, could include the payment of dividends. Further, various federal and state statutory provisions limit the amount of dividends that our bank subsidiary can pay to us as its holding company without regulatory approval.

Dividends on the shares of Series C, Series D, Series E and Series F Preferred Stock are non-cumulative.

Dividends on the shares of Series C, Series D, Series E and Series F Preferred Stock are payable only when, as and if authorized and declared by our board of directors or a duly authorized committee of the board. Consequently, if our

board of directors or a duly authorized committee of the board does not authorize and declare a dividend for any dividend period, holders of the Series C, Series D, Series E and Series F Preferred Stock will not be entitled to receive any such dividend, and such unpaid dividend will cease to accrue or be payable. If we do not declare and pay dividends on the Series C, Series D,

Table of Contents

Series E and Series F Preferred Stock, the market prices of the shares of Series C, Series D, Series E and Series F Preferred Stock may decline.

Our ability to pay dividends on the shares of Series C, Series D, Series E and Series F Preferred Stock is dependent on dividends and distributions we receive from our subsidiaries, which are subject to regulatory and other limitations. Our principal source of cash flow is dividends from Customers Bank. We cannot assure you that Customers Bank will, in any circumstances, pay dividends to us. If Customers Bank fails to make dividend payments or other permitted distributions to us, and sufficient cash is not otherwise available, we may not be able to make dividend payments on the Series C, Series D, Series E and Series F Preferred Stock. Various federal and state statutes, regulations and rules limit, directly or indirectly, the amount of dividends that our banking and other subsidiaries may pay to us without regulatory approval. In particular, dividend and other distributions from Customers Bank to us would require notice to or approval of the applicable regulatory authority. There can be no assurances that we would receive such approval. In addition, our right to participate in any distribution of assets of any of our subsidiaries upon the subsidiary's liquidation or otherwise, and, as a result, the ability of a holder of Series C, Series D, Series E and Series F Preferred Stock to benefit indirectly from such distribution, will be subject to the prior claims of preferred equity holders and creditors of that subsidiary, except to the extent that any of our claims as a creditor of such subsidiary may be recognized. As a result, shares of the Series C, Series D, Series E and Series F Preferred Stock are effectively subordinated to all existing and future liabilities and any outstanding preferred equity of our subsidiaries. Holders of Series C, Series D, Series E and Series F Preferred Stock should not expect us to redeem their shares when they first become redeemable at our option or on any particular date thereafter, and our ability to redeem the shares will be subject to the prior approval of the Federal Reserve.

Our Series C, Series D, Series E and Series F Preferred Stock are perpetual equity securities, meaning that they have no maturity date or mandatory redemption date, and the shares are not redeemable at the option of the holders thereof. Any determination we make at any time to propose a redemption of the Series C, Series D, Series E and Series F Preferred Stock will depend upon a number of factors, including our evaluation of our capital position, the composition of our shareholders' equity and general market conditions at that time. In addition, our right to redeem the Series C, Series D, Series E and Series F Preferred Stock is subject to any limitations established by the Federal Reserve. Under the Federal Reserve's risk-based capital guidelines applicable to bank holding companies, any redemption of the Series C, Series D, Series E and Series F Preferred Stock is subject to prior approval of the Federal Reserve. There can be no assurance that the Federal Reserve will approve any such redemption. We may be able to redeem the Series C, Series D, Series E and Series F Preferred Stock before their initial redemption dates upon a "regulatory capital treatment event."

We may be able to redeem the Series C, Series D, Series E and Series F Preferred Stock before their respective initial redemption dates, in whole but not in part, upon the occurrence of certain events involving the capital treatment of the Series C, Series D, Series E and Series F Preferred Stock, as applicable. In particular, upon our determination in good faith that an event has occurred that would constitute a "regulatory capital treatment event," with respect to a particular series of the preferred stock, we may redeem that particular series of securities in whole, but not in part, upon the prior approval of the Federal Reserve.

Holders of Series C, Series D, Series E and Series F Preferred stock have limited voting rights.

Holders of Series C, Series D, Series E and Series F Preferred Stock have no voting rights with respect to matters that generally require the approval of voting shareholders. However, holders of Series C, Series D, Series E and Series F Preferred Stock will have the right to vote in the event of non-payments of dividends under certain circumstances, with respect to authorizing classes or series of preferred stock senior to the Series C, Series D, Series E and Series F Preferred Stock, as applicable, and with respect to certain fundamental changes in the terms of the Series C, Series D, Series E and Series F Preferred Stock, as applicable, or as otherwise required by law.

General market conditions and unpredictable factors could adversely affect market prices for the Series C, Series D, Series E and Series F Preferred Stock.

There can be no assurance regarding the market prices for the Series C, Series D, Series E and Series F Preferred Stock. A variety of factors, many of which are beyond our control, could influence the market prices, including:

- whether we declare or fail to declare dividends on the series of preferred stock from time to time;

Table of Contents

our operating performance, financial condition and prospects or the operating performance, financial condition and prospects of our competitors;
real or anticipated changes in the credit ratings (if any) assigned to the Series C, Series D, Series E and Series F Preferred Stock or our other securities;
our creditworthiness;
changes in interest rates and expectations regarding changes in rates;
our issuance of additional preferred equity;
the market for similar securities;
developments in the securities, credit and housing markets, and developments with respect to financial institutions generally; and
economic, financial, corporate, securities market, geopolitical, regulatory or judicial events that affect us, the banking industry or the financial markets generally.

The Series C, Series D, Series E and Series F Preferred Stock may not have an active trading market.

Although the shares of Series C, Series D, Series E and Series F Preferred Stock are listed on the NYSE, an active trading market may not be established or maintained for the shares, and transaction costs could be high. As a result, the difference between bid and ask prices in any secondary market could be substantial.

The Series C, Series D, Series E and Series F Preferred Stock may be junior or equal in rights and preferences to preferred stock we may issue in the future.

Our Series C, Series D, Series E and Series F Preferred Stock rank equally. Although we do not currently have outstanding preferred stock that ranks senior to the Series C, Series D, Series E and Series F Preferred Stock, the Series C, Series D, Series E and Series F Preferred Stock may rank junior to other preferred stock we may issue in the future that by its terms is expressly senior in rights and preferences to the Series C, Series D, Series E and Series F Preferred Stock, although the affirmative vote or consent of the holders of at least two-thirds of all outstanding shares of the affected class of preferred stock is required to issue any shares of stock ranking senior in rights and preferences to such class. Any preferred stock that ranks senior to the Series C, Series D, Series E and Series F Preferred Stock in the future would have priority in payment of dividends and the making of distributions in the event of any liquidation, dissolution or winding up of Customers Bancorp. Additional issuances by us of preferred stock ranking equally with Series C, Series D, Series E and Series F Preferred Stock do not generally require the approval of holders of the Series C, Series D, Series E and Series F Preferred Stock.

Risks Relating to Our Debt Securities

Our 4.625% Senior Notes and 3.95% Senior Notes contain limited covenants.

The terms of our 4.625% Senior Notes and 3.95% Senior Notes generally do not prohibit us from incurring additional debt or other liabilities. If we incur additional debt or liabilities, our ability to pay our obligations on the 4.625% Senior Notes and 3.95% Senior Notes could be adversely affected. In addition, the terms of our 4.625% Senior Notes and 3.95% Senior Notes do not require us to maintain any financial ratios or specific levels of net worth, revenues, income, cash flows or liquidity and, accordingly, do not protect holders of those notes in the event that we experience material adverse changes in our financial condition or results of operations. Holders of the 4.625% Senior Notes and 3.95% Senior Notes also have limited protection in the event of a highly leveraged transaction, reorganization, default under our existing indebtedness, restructuring, merger or similar transaction.

Our ability to make interest and principal payments on the 4.625% Senior Notes and 3.95% Senior Notes is dependent on dividends and distributions we receive from our subsidiaries, which are subject to regulatory and other limitations. Our principal source of cash flow is dividends from Customers Bank. We cannot assure you that Customers Bank will, in any circumstances, pay dividends to us. If Customers Bank fails to make dividend payments to us, and sufficient cash is not otherwise available, we may not be able to make interest and principal payments on the 4.625% Senior Notes and 3.95% Senior Notes. Various federal and state statutes, regulations and rules limit, directly or indirectly, the amount of dividends that our banking and other subsidiaries may pay to us without regulatory approval. In particular, dividend and other distributions from Customers Bank to us would require notice to or approval of the applicable regulatory authority. There can be no assurances that we would receive such approval.

Table of Contents

In addition, our right to participate in any distribution of assets of any of our subsidiaries upon the subsidiary's liquidation or otherwise, and, as a result, the ability of a holder of the 4.625% Senior Notes and 3.95% Senior Notes to benefit indirectly from such distribution will be subject to the prior claims of preferred equity holders and creditors of that subsidiary, except to the extent that any of our claims as a creditor of such subsidiary may be recognized. As a result, the 4.625% Senior Notes and 3.95% Senior Notes are effectively subordinated to all existing and future liabilities and any outstanding preferred equity of our subsidiaries.

We may not be able to generate sufficient cash to service our debt obligations, including our obligations under the 4.625% Senior Notes and 3.95% Senior Notes.

Our ability to make payments on and to refinance our indebtedness, including the 4.625% Senior Notes and 3.95% Senior Notes will depend on our financial and operating performance, including dividends payable to us from Customers Bank, which are subject to prevailing economic and competitive conditions and to certain financial, business and other factors beyond our control. We may be unable to maintain a level of cash flows from operating activities sufficient to permit us to pay the principal, premium, if any, and interest on our indebtedness, including the notes.

If our cash flows and capital resources and dividends from Customers Bank are insufficient to fund our debt service obligations, we may be unable to provide new loans, other products or to fund our obligations to existing customers and otherwise implement our business plans. As a result, we may be unable to meet our scheduled debt service obligations. In the absence of sufficient operating results and resources, we could face substantial liquidity problems and might be required to dispose of material assets or operations to meet our debt service and other obligations or seek to restructure our indebtedness, including the notes. We may not be able to consummate these transactions, and these proceeds may not be adequate to meet our debt service obligations then due.

The 4.625% Senior Notes and 3.95% Senior Notes are our unsecured obligations. The 4.625% Senior Notes and 3.95% Senior Notes will rank equal in right of payment with all of our secured and unsecured senior indebtedness and will rank senior in right of payment to all of our subordinated indebtedness. Although the 4.625% Senior Notes and 3.95% Senior Notes are "senior notes," they will be effectively subordinate to all liabilities of our subsidiaries, including secured indebtedness.

The 4.625% Senior Notes and 3.95% Senior Notes may not have an active trading market.

The 4.625% Senior Notes and 3.95% Senior Notes are not listed on any securities exchange, and there is no active trading market for these notes. In addition to the other factors described below, the lack of a trading market for the 4.625% Senior Notes and 3.95% Senior Notes may adversely affect the holder's ability to sell the notes and the prices at which the notes may be sold.

The prices realizable from sales of the 4.625% Senior Notes and 3.95% Senior Notes in any secondary market also will be affected by the supply and demand of the notes, the interest rate, the ranking and a number of other factors, including:

- yields on U.S. Treasury obligations and expectations about future interest rates;
- actual or anticipated changes in our financial condition or results, including our levels of indebtedness;
- general economic conditions and expectations regarding the effects of national policies;
- investors' views of securities issued by both holding companies and similar financial service firms; and
- the market for similar securities.

(1)Includes one BankMobile administrative office.

Customers leases all of the above branches, limited purpose and administrative office properties from third parties. Customers believes that its offices are sufficient for its present operations.

The Bank branch locations, which range in size from approximately 1,400 to 6,100 square feet, have leases which expire between 2019 and 2025.

The total minimum net cash lease payments for our current branches, limited purpose and administrative amount to approximately \$465 thousand per month.

Item 3. Legal Proceedings

Halbreiner Matter

On December 16, 2016, Elizabeth Halbreiner and Robert Halbreiner (“Plaintiffs”) filed a Second Amended Complaint captioned Elizabeth Halbreiner and Robert Halbreiner, v. Customers Bank, Robert B.White, Richard A. Ehst, Thomas Jastrem, Timothy D. Romig, Andrew Bowman, Michael Fuoco, Saldutti Law Group f/k/a Saldutti, LLC a/k/a Saldutti Law, LLC, Robert L. Saldutti, LLC, Robert L. Saldutti, Esquire, Brian J. Schaffer, Esquire, Robert Lieber, Jr., Esquire, Jay Sidhu, James Zardecki, Zardecki Associates LLC, No. 01419 in the First Judicial District of Pennsylvania, Court of Common Pleas of Philadelphia, Trial Division. In this Second Amended Complaint, the Plaintiffs generally allege that Customers Bank, and the other named defendants, conspired to misuse the legal system for improper purposes and it also alleges defamation, false light, tortious interference with contractual relations, infliction of emotional distress, negligent infliction of emotional distress and loss of

Table of Contents

consortium. On January 6, 2017, Customers Bank filed Preliminary Objections to the Complaint seeking dismissal of the Plaintiff's claims against Customers Bank and the employees of Customers Bank named as co-defendants. On April 6, 2017, the Court dismissed certain counts and determined to allow certain other counts to proceed. Customers Bank intends to vigorously defend itself against these allegations but is currently unable to predict the outcome of this lawsuit and therefore cannot determine the likelihood of loss nor estimate a range of possible loss.

Lifestyle Healthcare Group, Inc. Matter

On January 9, 2017, Lifestyle Healthcare Group, Inc., et al ("Plaintiffs") filed a Complaint captioned Lifestyle Healthcare Group, Inc.; Fred Rappaport; Victoria Rappaport; Lifestyle Management Group, LLC Trading as Lifestyle Real Estate I, LP; Lifestyle Real Estate I GP, LLC; Daniel Muck; Lifestyle Management Group, LLC; Lifestyle Management Group, LLC Trading as Lifestyle I, LP D/B/A Lifestyle Medspa, Plaintiffs v. Customers Bank, Robert White; Saldutti Law, LLC a/k/a Saldutti Law Group; Robert L. Saldutti, Esquire; and Michael Fuoco, Civil Action No. 01206, in the First Judicial District of Pennsylvania, Court of Common Pleas of Philadelphia. In this Complaint, which is related to the Halbreiner Matter described above, the Plaintiffs generally allege wrongful use of civil proceedings and abuse of process in connection with a case filed and later dismissed in federal court, titled, Customers Bank v. Fred Rappaport, et al., U.S.D.C.E.D. Pa., No. 15-6145. On January 30, 2017, Customers Bank filed Preliminary Objections to the Complaint seeking dismissal of Plaintiff's claims against Customers Bank and Robert White, named as co-defendants. In response to the Preliminary Objections, Lifestyle filed an Amended Complaint against Customers Bank and Robert White. Customers Bank has filed Preliminary Objections to the Second Amended Complaint seeking dismissal of Plaintiff's claim against Customers Bank and Robert White, named as co-defendants. The Court has dismissed certain counts and determined to allow certain other counts to proceed. Customers Bank intends to vigorously defend itself against these allegations but is currently unable to predict the outcome of this lawsuit and therefore cannot determine the likelihood of loss nor estimate a range of possible loss.

United States Department of Education Matter

In third quarter 2018, Customers received a FPRD letter dated September 5, 2018 from the DOE regarding a focused program review of Higher One's/Customers Bank's administration, as a third party servicer, of the programs authorized pursuant to Title IV of the Higher Education Act of 1965. The DOE program review covered the award years beginning in 2013 through the FPRD issuance date, including the time period when Higher One was acting as the third party servicer prior to Customers' acquisition of the Disbursement business on June 15, 2016. The FPRD determined that, with respect to students enrolled at specified partner institutions, Higher One/Customers did not provide convenient fee-free access to ATMs or bank branch offices in such locations as required by the DOE's cash management regulations. Those regulations, which were in effect during the period covered by the program review and were revised during that period, seek, among other purposes, to ensure that students can make fee-free cash withdrawals. The FPRD determined that students incurred prohibited costs in accessing Title IV credit balance funds, and the FPRD classifies those costs as financial liabilities of Customers. The FPRD also requires Customers to take prospective action to increase ATM access for students at certain of its partner institutions. Customers disagrees with the FPRD and has elected to appeal the FPRD, including the asserted financial liabilities of \$6.5 million, and a request for review has been submitted to trigger an administrative process before the DOE's Office of Hearing and Appeals. Customers intends to vigorously defend itself against the financial liabilities established in the FPRD through that administrative appeals process and it further intends to pursue resolution of the FPRD's prospective action requirements during the appeals resolution process. The matter is in its early stages. Customers is currently unable to predict the outcome of the appeal and resolution efforts, and therefore cannot determine the likelihood of loss nor estimate a range of possible loss. Customers does not believe that this matter will have a material effect on the consolidated financial statements.

PART II

Item 5. Market For Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Trading Market for Common Stock

Our common stock is traded on the NYSE under the symbol "CUBI."

As of February 22, 2019, there were approximately 397 registered shareholders of Customers Bancorp's common stock. Certain shares are held in "nominee" or "street" name and accordingly, the number of beneficial owners of such shares is not known or included in the foregoing number.

Dividends on Common Stock

Customers Bancorp historically has not paid any cash dividends on its shares of common stock and does not expect to do so in the foreseeable future.

Any future determination relating to our dividend policy will be made at the discretion of Customers Bancorp's board of directors and will depend on a number of factors, including earnings and financial condition, liquidity and capital requirements, the general economic and regulatory climate, ability to service any equity or debt obligations senior to our common stock, including obligations to pay dividends to the holders of Customers Bancorp's issued and outstanding shares of preferred stock and other factors deemed relevant by the Board of Directors.

In addition, as a bank holding company, Customers Bancorp is subject to general regulatory restrictions on the payment of cash dividends. Federal bank regulatory agencies have the authority to prohibit bank holding companies from engaging in unsafe or unsound practices in conducting their business, which, depending on the financial condition and liquidity of the holding company at the time, could include the payment of dividends. Further, various federal and state statutory provisions limit the amount of dividends that bank subsidiaries can pay to their parent holding company without regulatory approval. Generally, subsidiaries are prohibited from paying dividends when doing so would cause them to fall below the regulatory minimum capital levels, and limits exist on paying dividends in excess of net income for specified periods.

Beginning January 1, 2015, the ability to pay dividends and the amounts that can be paid will be limited to the extent the Bank's capital ratios do not exceed the minimum required levels plus 250 basis points, as these requirements are phased in through January 1, 2019. See "Item 1, Business - Federal Banking Laws" for more information relating to restrictions on the Bank's ability to pay dividends to the Bancorp and the Bancorp's payment of dividends.

Issuer Purchases of Equity Securities

On November 26, 2013, the Bancorp's board of directors authorized a stock repurchase plan in which the Bancorp could acquire up to 5% of its current outstanding shares at prices not to exceed a 20% premium over the then current book value. On December 11, 2018, the Bancorp's board of directors amended the terms of the 2013 stock repurchase plan to adjust the repurchase terms and book value measurement date such that Customers is authorized to purchase shares of common stock at prices not to exceed the book value per share of Customers' common stock measured as of September 30, 2018. The repurchase program has no expiration date but may be suspended, modified or discontinued at any time, and the Bancorp has no obligation to repurchase any amount of its common stock under the program. As of December 31, 2018, the remaining authorized shares for stock repurchases under this program is 31,351 shares.

Table of Contents

Common stock repurchase activity during the fourth quarter 2018 was as follow:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares purchased as part of publicly announced plans or programs	Maximum number of shares that may yet be purchased under the plans or programs
October 1 - October 31, 2018	—	\$ —	—	750,551
November 1 - November 30, 2018	—	—	—	750,551
December 1 - December 31, 2018	719,200	18.04	719,200	31,351
Total	719,200	\$ 18.04	719,200	

EQUITY COMPENSATION PLANS

The following table provides certain summary information as of December 31, 2018, concerning our compensation plans (including individual compensation arrangements) under which shares of our common stock may be issued.

Plan Category	Number of Securities to be Issued upon Exercise of Outstanding Options and Rights (#)	Weighted-Average Exercise Price of Outstanding Options (\$) ⁽²⁾	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (Excluding Securities Reflected in the First Column) (#)
Equity Compensation Plans			
Approved by Security Holders ⁽¹⁾	3,405,185	\$ 22.13	1,311,743 ⁽³⁾
Equity Compensation Plans Not			
Approved by Security Holders	N/A	N/A	N/A

Includes shares of common stock that may be issued upon the exercise of awards granted or rights accrued under (1) the Amended and Restated Customers Bancorp, Inc. 2004 Incentive Equity and Deferred Compensation Plan, Customers Bancorp, Inc. 2010 Plan, the BRRP and Customers Bancorp, Inc. Amended and Restated 2014 ESPP.

(2) Does not include restricted stock units and stock awards for which, by definition, there exists no exercise price.

Does not include securities available for future issuance under the BRRP as there is no specific number of shares (3) reserved under this plan. By its terms, the plan links the award of restricted stock units to the annual performance awards identified with the participants in the BRRP.

Common Stock Performance Graph

The following graph compares the performance of our common stock over the period from December 31, 2013, to December 31, 2018, to that of the total return index for the SNL Mid-Atlantic U.S. Bank Index, SNL U.S. Bank NASDAQ Index and SNL U.S. Bank NYSE Index, assuming an investment of \$100 on December 31, 2013. The SNL U.S. Bank NYSE Index was added to the performance graph because the Bancorp changed the listing of its common stock to the NYSE from NASDAQ in December 2014. In calculating total annual shareholder return, reinvestment of

dividends, if any, is assumed. Customers Bancorp obtained the information contained in the performance graph from SNL Financial.

Table of Contents

The graph below is furnished under this Part II, Item 5. of this Annual Report on Form 10-K and shall not be deemed to be “soliciting material” or to be “filed” with the Commission or subject to Regulation 14A or 14C or to the liabilities of Section 18 of the Exchange Act of 1934, as amended.

Item 6. Selected Financial Data

Customers Bancorp, Inc. and Subsidiaries

The following table presents Customers Bancorp's summary consolidated financial data. Customers Bancorp derived the balance sheet data as of December 31, 2018, 2017, 2016, 2015 and 2014 and the income statement data for the years ended December 31, 2018, 2017, 2016, 2015 and 2014, from its audited financial statements. The summary consolidated financial data should be read in conjunction with, and is qualified in their entirety by, Customers Bancorp's financial statements and the accompanying notes and the other information included elsewhere in this Annual Report on Form 10-K.

(1) The FDIC loss sharing receivable, net of the clawback liability, was included in "Accrued interest payable and other liabilities" as of December 31, 2015. The FDIC loss sharing arrangements were terminated during 2016.

(2) Borrowings includes FHLB advances, Federal funds purchased, Subordinated debt and other borrowings.

Customers' selected financial data contains non-GAAP financial measures calculated using non-GAAP amounts. These measures include net interest margin tax equivalent, tangible common equity and tangible book value per common share and tangible common equity to tangible assets. Management uses these non-GAAP measures to present historical periods comparable to the current period presentation. In addition, management believes the use of these non-GAAP measures provides additional clarity when assessing the Bancorp's financial results and use of equity. These disclosures should not be viewed as substitutes for results determined to be in accordance with U.S. GAAP, nor are they necessarily comparable to non-GAAP performance measures that may be presented by other entities. Customers Bancorp calculates tangible common equity by excluding intangible assets from total shareholders' equity. Tangible book value per common share equals tangible common equity divided by common shares outstanding. The non-GAAP tax-equivalent basis uses a marginal tax rate of 26% for the year ended December 31, 2018 and a marginal tax rate of 35% for the years ended December 31, 2017, 2016, 2015 and 2014 to approximate interest income as a taxable asset.

(4) Excludes loans receivable, mortgage warehouse, at fair value which are not evaluated for impairment and do not have an allowance for loan loss.

Table of Contents

A reconciliation of shareholders' equity to tangible common equity and other related amounts is set forth below.

	2018	2017	2016	2015	2014	
(in thousands, except per share data)						
Total shareholders' equity (GAAP)	\$956,816	\$920,964	\$855,872	\$553,902	\$443,145

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

This Management's Discussion and Analysis should be read in conjunction with "Business - Executive Summary" and the Bancorp's consolidated financial statements and related notes for the year ended December 31, 2018.

Critical Accounting Policies

Customers has adopted various accounting policies that govern the application of U.S. GAAP and that are consistent with general practices within the banking industry in the preparation of its consolidated financial statements.

Customers' significant accounting policies are described in NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES AND BASIS OF PRESENTATION to Customers' audited financial statements.

Certain accounting policies involve significant judgments and assumptions by Customers that have a material impact on the carrying value of certain assets and liabilities. Customers considers these accounting policies to be critical accounting policies. The judgments and assumptions used are based on historical experience and other factors, which are believed to be reasonable under the circumstances. Because of the nature of the judgments and assumptions management makes, actual results could differ from these judgments and estimates, which could have a material impact on the carrying values of Customers' assets and liabilities and results of operations.

The critical accounting policies that are both important to the portrayal of Customers' financial condition and results of operations and require complex, subjective judgments are the accounting policies for the following: Allowance for Loan

Table of Contents

Losses, PCI Loans, Deferred Income Taxes, Unrealized Gains and Losses on Available-for-Sale Securities and OTTI Analysis, Fair Values of Financial Instruments, Share-Based Compensation and Goodwill and Other Intangible Assets. These critical accounting policies and material estimates, along with the related disclosures, are reviewed by Customers' Audit Committee of the Board of Directors.

Allowance for Loan Losses

Customers maintains an allowance for loan losses at a level management believes is sufficient to absorb estimated credit losses incurred as of the report date. Management's determination of the adequacy of the allowance for loan losses is based on periodic evaluations of the loan portfolio and other relevant factors. However, these evaluations are inherently subjective as they require significant estimates by management. Consideration is given to a variety of factors in establishing these estimates including historical losses, peer and industry data, current economic conditions, size and composition of the loan portfolio, existence and level of loan concentrations, delinquency statistics, criticized and classified assets and impaired loans, results of internal loan reviews, borrowers' perceived financial and management strengths, adequacy of underlying collateral, dependence on collateral, present value of expected future cash flows and other relevant factors. These factors may be susceptible to significant change. To the extent actual outcomes differ from management's estimates, additional provisions for loan losses may be required which may adversely affect Customers' results of operations in the future.

Subsequent to the acquisition of PCI loans, estimates of cash flows expected to be collected are updated each reporting period based on updated assumptions regarding default rates, loss severities and other factors that are reflective of current market conditions. Subsequent decreases in expected cash flows will generally result in a provision for loan losses. Subsequent increases in expected cash flows will generally result in a reversal of the provision for loan losses to the extent of prior charges. Please see below for additional discussions related to the accounting for PCI loans.

Purchased Credit-Impaired Loans

For certain acquired loans that have experienced a deterioration of credit quality, Customers follows the accounting guidance in ASC 310-30, Loans and Debt Securities Acquired with Deteriorated Credit Quality. PCI loans are loans that were acquired in business combinations or asset purchases with evidence of credit deterioration since origination to the date acquired, and for which it is probable that all contractually required payments will not be collected.

Evidence of credit-quality deterioration as of the purchase date may include information such as past-due and non-accrual status, borrower credit scores and recent loan-to-value percentages.

The fair value of loans with evidence of credit deterioration is recorded net of a nonaccretable difference and, if appropriate, an accretable yield. The difference between contractually required payments at acquisition and the cash flows expected to be collected at acquisition is the nonaccretable difference, which is not included in the carrying amount of acquired loans. Subsequent to acquisition, estimates of cash flows expected to be collected are updated each reporting period based on updated assumptions regarding default rates, loss severities, and other factors that are reflective of current market conditions. Subsequent decreases in the estimated cash flows of the loan will generally result in a provision for loan losses. Subsequent increases in cash flows will generally result in a reversal of the provision for loan losses to the extent of prior charges or a reclassification of the difference from nonaccretable to accretable with a positive impact on accretion of interest income in future periods. Further, any excess of cash flows expected at the time of acquisition over the estimated fair value is referred to as the accretable yield and is recognized in interest income over the remaining life of the loan when there is a reasonable expectation about the amount and timing of those cash flows.

PCI loans acquired may be aggregated into one or more pools, provided that the loans have common risk characteristics. A pool is then accounted for as a single asset with a single composite interest rate and an aggregate expectation of cash flows. On a quarterly basis, Customers re-estimates the total cash flows (both principal and interest) expected to be collected over the remaining life of each pool. These estimates incorporate assumptions regarding default rates, loss severities, the amounts and timing of prepayments and other factors that reflect then-current market conditions. If the timing and/or amounts of expected cash flows on PCI loans are determined not to be reasonably estimable, no interest is accreted, and the loans are reported as non-accrual loans; however, when the timing and amounts of expected cash flows for PCI loans are reasonably estimable, interest is accreted, and the loans

are reported as performing loans. Charge-offs are not recorded on PCI loans until actual losses exceed the estimated losses that were recorded as purchase-accounting adjustments at acquisition date.

Deferred Income Taxes

Customers provides for deferred income taxes using the liability method whereby deferred tax assets are recognized for deductible temporary differences, and deferred tax liabilities are recognized for taxable temporary differences.

Temporary differences are the differences between the reported amounts of assets and liabilities in the financial statements and their tax

Table of Contents

basis. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of enactment.

On December 22, 2017, the Tax Act was enacted into law. The Tax Act contained several key tax provisions including the reduction in the corporate federal tax rate from 35% to 21% effective January 1, 2018. As a result, Customers was required to re-measure, through income tax expense, its deferred tax assets and liabilities using the enacted rate at which it expected them to be recovered or settled. In December 2017, the SEC issued SAB 118, Income Tax Accounting Implications of the Tax Cuts and Jobs Act, which allowed companies to record provisional amounts during a measurement period not to extend beyond one year of the enactment date. At December 31, 2017, Customers recorded provisional amounts of deferred income taxes using reasonable estimates in areas where information necessary to complete the accounting was not available, prepared or analyzed. In 2018, Customers completed the calculations for the provisional items with the completion of the 2017 tax returns. The impact of the completed calculations to the re-measurement of the deferred taxes resulted in an immaterial change. See NOTE 14 - INCOME TAXES to Customers' audited financial statements for additional information.

Unrealized Gains and Losses on Investment Securities Available for Sale and Other-Than-Temporary Impairment Analysis

Customers obtains estimated fair values of debt securities from independent valuation services and brokers. In developing these fair values, the valuation services and brokers use estimates of cash flows based on historical performance of similar instruments in similar rate environments. Debt securities available for sale consist primarily of mortgage-backed securities issued by U.S. government-sponsored agencies. Customers uses various indicators in determining whether a security is other-than-temporarily impaired including, for debt securities, when it is probable that the contractual interest and principal will not be collected. The debt securities are monitored for changes in credit ratings because adverse changes in credit ratings could indicate a change in the estimated cash flows of the underlying collateral or issuer.

Customers considers the issuer's financial condition, capital strength and near-term prospects to determine whether an impairment is temporary or other than temporary. Customers also considers the volatility of a security's price in comparison to the market as a whole and any recoveries or declines in fair value subsequent to the balance sheet date. If management determines that the impairment is other than temporary, the entire amount of the impairment as of the balance sheet date is recognized in earnings even if the decision to sell the security has not been made. The fair value of the security becomes the new amortized cost basis of the investment and is not adjusted for subsequent recoveries in fair value.

At December 31, 2018, management evaluated its available-for-sale debt securities for OTTI. The unrealized losses associated with the available-for-sale debt securities were not considered to be other than temporary at December 31, 2018, because the losses were related to changes in interest rates and did not affect the expected cash flows of the underlying collateral or issuer. Customers does not intend to sell these securities, and it is not more likely than not that Customers will be required to sell the securities before recovery of the amortized cost basis.

Beginning January 1, 2018, equity securities are carried at their current fair value, with changes in fair value reported in earnings in the period in which they occur. Equity securities without readily determinable fair values are carried at cost, minus impairment, if any, plus or minus changes resulting from observable price changes in orderly transactions for identical or similar investments. Previously, changes in the fair value of equity securities designated as available for sale were deferred in AOCI. The adoption of the new accounting standard resulted in an \$1.0 million increase to beginning retained earnings and a \$1.0 million decrease to beginning AOCI at January 1, 2018.

Fair Value

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants (also referred to as an exit price), other than in a forced or liquidation sale as of the measurement date. Management estimates the fair values of financial instruments using a variety of valuation methods. When financial instruments are actively traded and have quoted market prices, the quoted market prices are used for fair value. When the financial instruments are not actively traded, other observable market inputs, such as quoted prices of securities with similar characteristics, may be used, if available, to determine fair value. When

observable market prices do not exist, Customers estimates fair value using unobservable data. The valuation methods and inputs consider factors such as types of underlying assets or liabilities, rates of estimated credit losses, interest rates or discount rates and collateral. The best estimate of fair value involves assumptions including, but not limited to, various performance indicators, such as historical and projected default and recovery rates, credit ratings, current delinquency rates, loan-to-value ratios and the possibility of obligor refinancing. U.S. GAAP requires the use of fair values in determining the carrying values of certain assets and liabilities, as well as for specific disclosures. The most significant uses of fair values include commercial loans to mortgage banking businesses, residential mortgage loans originated with an intent to sell, available-for-sale investment securities, derivative assets and

Table of Contents

liabilities, impaired loans and foreclosed property and the net assets acquired in business combinations. For additional information, see NOTE 18 – DISCLOSURES ABOUT FAIR VALUE OF FINANCIAL INSTRUMENTS to Customers' audited financial statements.

Share-Based Compensation

Customers recognizes compensation expense for share-based awards in accordance with ASC 718, Compensation – Stock Compensation. The expense recognized for awards of stock options and restricted stock units is based on the fair value of the awards on the date of grant, with compensation expense recognized over the service period, which is usually the vesting period. For performance-based awards, compensation cost is recognized over the vesting period as long as it remains probable that the performance conditions will be met. If the service or performance conditions are not met, Customers reverses previously recorded compensation expense upon forfeiture. Customers generally utilizes the Black-Scholes option-pricing model to estimate the fair value of each option on the date of grant. The Black-Scholes model takes into consideration the exercise price of the option, the expected life of the option, the current price of the underlying stock and its expected volatility, expected dividends on the stock and the current risk-free interest rate for the expected life of the option. Customers' estimate of the fair value of a stock option is based on expectations derived from its limited historical experience and may not necessarily equate to market value when fully vested. The fair value of the restricted stock units is generally determined based on the closing market price of Customers' common stock on the date of grant.

Goodwill and Other Intangible Assets

Goodwill represents the excess of the purchase price over the fair value of identifiable net assets of businesses acquired through business combinations accounted for under the acquisition method. Other intangible assets represent purchased assets that lack physical substance but can be distinguished from goodwill because of contractual or other legal rights. Intangible assets that have finite lives, such as customer and university relationship intangibles and non-compete agreements, are amortized over their estimated useful lives and subject to periodic impairment testing. Goodwill and other intangible assets are reviewed for impairment annually as of October 31 and between annual tests when events and circumstances indicate that impairment may have occurred. If there is a goodwill impairment charge, it will be the amount by which the reporting unit's carrying amount exceeds its fair value; however, the loss recognized should not exceed the total amount of goodwill allocated to that reporting unit. The same one-step impairment test is applied to goodwill at all reporting units. Customers applies a qualitative assessment for its reporting units to determine if the one-step quantitative impairment test is necessary.

Intangible assets subject to amortization are reviewed for impairment under ASC 360, Property, Plant, and Equipment, which requires that a long-lived asset or asset group be tested for recoverability whenever events or changes in circumstances indicate that the carrying value may not be recoverable. The carrying value of a long-lived asset is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset.

Overview

Like most financial institutions, Customers derives the majority of its income from interest it receives on its interest-earning assets, such as loans and investments. Customers' primary source of funds for making these loans and investments is its deposits and borrowings, on which it pays interest. Consequently, one of the key measures of Customers' success is the amount of its net interest income, or the difference between the income on its interest-earning assets and the expense on its interest-bearing liabilities, such as deposits and borrowings. Another key measure is the spread between the yield earned on these interest-earning assets and the rate paid on these interest-bearing liabilities, which is referred to as net interest margin.

There is credit risk inherent in all loans, so Customers maintains an allowance for loan losses to absorb probable losses on existing loans that may become uncollectible. Customers maintains this allowance by charging a provision for loan losses against its operating earnings. Customers has included a detailed discussion of this process, as well as several tables describing its allowance for loan losses, in NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES AND BASIS OF PRESENTATION and NOTE 7 - LOANS RECEIVABLE AND ALLOWANCE FOR LOAN LOSSES to Customers' audited financial statements.

BankMobile, a division of Customers Bank, derives a majority of its revenue from interchange and card revenue and deposit fees. As previously disclosed, Customers intends to retain and operate BankMobile for the next 2 - 3 years.

Table of Contents

2019 Economic Outlook

Building off of another strong year in 2018, the growth of the U.S. economy is expected to slow in 2019. Real GDP is projected in the 2.00% to 2.50% range in 2019, which will be driven, in part, by a healthy labor market and continued consumer spending. Additionally, while inflation remains just under the Federal Reserve's target of 2.0% on a year-over-year basis, it is expected to remain around that level over the medium term. With respect to interest rates, the Federal Reserve is expected to stabilize the overnight rate, with no additional rate increases expected throughout 2019.

While the economic outlook in the U.S. remains optimistic in the short run (aside from any potential impact of the recent U.S. government shutdown), keeping the economy on a sustainable path over the longer term will most likely become more challenging. Potential concerns for the longer term economic outlook include the continued flattening of the yield curve and an increasingly inverted yield curve (which may or may not signal a future recession), the risk of economic overheating in the near future, and concerns surrounding the long term fiscal position of the U.S. (e.g., the federal deficit, rising debt service costs, increasing entitlement spending as the Baby Boomers retire). Overall, the Bancorp's management is optimistic that 2019 will generally show a slight decrease in economic growth experienced in 2018, with continued moderate growth in the Bank's market area and unemployment remaining at current levels during the year.

Results of Operations

The following discussion of Customers Bancorp's consolidated results of operations should be read in conjunction with its consolidated financial statements, including the accompanying notes. Please refer to Critical Accounting Policies in this Management's Discussion and Analysis and NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES AND BASIS OF PRESENTATION to Customers' audited financial statements for information concerning certain significant accounting policies and estimates applied in determining reported results of operations.

The following table sets forth the condensed statements of income for the years ended December 31, 2018 and 2017:

(dollars in thousands)	For the Years Ended December 31,			
	2018	2017	Change	Percentage Change
Net interest income	\$257,877	\$267,343	\$(9,466)	(3.5)%
Provision for loan losses	5,642	6,768	(1,126)	(16.6)%
Total non-interest income	58,998	78,910	(19,912)	(25.2)%
Total non-interest expense	220,179	215,606	4,573	2.1%
Income before income taxes	91,054	123,879	(32,825)	(26.5)%
Income tax expense	19,359	45,042	(25,683)	(57.0)%
Net income	71,695	78,837	(7,142)	(9.1)%
Preferred stock dividends	14,459	14,459	—	—%
Net income available to common shareholders	\$57,236	\$64,378	\$(7,142)	(11.1)%

Customers reported net income available to common shareholders of \$57.2 million for the year ended December 31, 2018, compared to \$64.4 million for the year ended December 31, 2017. Factors contributing to the change in net income available to common shareholders for the year ended December 31, 2018 compared to the year ended December 31, 2017 were as follows:

Net interest income

The \$9.5 million decrease in net interest income for the year ended December 31, 2018 compared to the year ended December 31, 2017 primarily resulted from the narrowing of net interest margin, tax equivalent, by 15 basis points, to 2.58%, for the year ended December 31, 2018, from 2.73% for the year ended December 31, 2017. The margin compression is driven by higher funding costs as the cost of interest-bearing liabilities increased by 64 basis points for the year ended December 31, 2018 compared to the year ended December 31, 2017. The impact of higher funding costs was offset in part by higher yields on interest earning assets, which increased 37 basis points for the year ended

December 31, 2018 compared to the year ended December 31, 2017. The average balance of interest earning assets increased \$0.2 billion to \$10.0 billion for the year ended December 31, 2018 when compared to \$9.8 billion for the year ended December 31, 2017.

Provision for loan losses

The \$1.1 million decrease in the provision for loan losses for the year ended December 31, 2018 compared to the year ended December 31, 2017 primarily resulted from a year over year decline in the provision for impaired loans of \$2.4 million and a

Table of Contents

year over year increase in the release of the allowance estimate resulting from improved asset quality and lower incurred losses on purchased credit-impaired loans than previously estimated of \$0.4 million. These year over year decreases in the provision were offset in part by a provision increase from loan growth of \$1.7 million, primarily in the commercial and industrial and consumer loan portfolios, for the year ended December 31, 2018 compared to the year ended December 31, 2017. There were no significant changes in Customers' methodology for estimating the allowance for loan losses or policies regarding charge-offs in 2018.

Non-interest income

The \$19.9 million decrease in non-interest income for the year ended December 31, 2018 compared to the year ended December 31, 2017 resulted primarily from losses realized from the sale of lower-yielding investment securities of \$18.7 million in 2018, compared to gains of \$8.8 million realized from the sale of investment securities in 2017, decreases in interchange and card revenue of \$10.8 million, deposit fees of \$2.2 million and a reduction in mortgage warehouse transaction fees of \$2.2 million. These decreases were offset in part by increases in commercial lease income of \$4.7 million and other non-interest income of \$5.9 million for the year ended December 31, 2018 compared to the year ended December 31, 2017, and an impairment loss of \$12.9 million recognized on investment securities in 2017.

Non-interest expense

The \$4.6 million increase in non-interest expense for the year ended December 31, 2018 compared to the year ended December 31, 2017 primarily resulted from increases in salaries and employee benefits of \$9.3 million, occupancy of \$0.6 million, FDIC assessments, non-income taxes, and regulatory fees of \$0.7 million, merger and acquisition related expenses of \$4.0 million, commercial lease depreciation of \$3.9 million, and advertising and promotion of \$1.0 million. These increases were offset in part by decreases in technology, communications and bank operations of \$1.4 million, professional services of \$7.8 million, provision for operating losses of \$0.8 million and other non-interest expense of \$4.6 million for the year ended December 31, 2018 compared to the year ended December 31, 2017.

Income tax expense

The \$25.7 million decrease in income tax expense for the year ended December 31, 2018 compared to the year ended December 31, 2017 primarily resulted from the lowering of the corporate tax rate from 35% to 21% under the Tax Act, which became effective January 1, 2018 and a decrease in pre-tax income \$32.8 million between the years.

Preferred stock dividends

Preferred stock dividends were \$14.5 million for the years ended December 31, 2018 and 2017. There were no changes to the amount of preferred stock outstanding or the dividends paid during 2018 and 2017.

The following table sets forth the condensed statements of income for the years ended December 31, 2017 and 2016:

(dollars in thousands)	For the Years Ended December 31,				Percentage Change
	2017	2016	Change		
Net interest income	\$267,343	\$249,497	\$17,846	7.2	%
Provision for loan losses	6,768	3,041	3,727	122.6	%
Total non-interest income	78,910	56,370	22,540	40.0	%
Total non-interest expense	215,606	178,231	37,375	21.0	%
Income before income taxes	123,879	124,595	(716)	(0.6)	%
Income tax expense	45,042	45,893	(851)	(1.9)	%
Net income	78,837	78,702	135	0.2	%
Preferred stock dividends	14,459	9,515	4,944	52.0	%
Net income available to common shareholders	\$64,378	\$69,187	\$(4,809)	(7.0)	%

Customers reported net income available to common shareholders of \$64.4 million for the year ended December 31, 2017, compared to \$69.2 million for the year ended December 31, 2016. Factors contributing to the change in net income available to common shareholders for the year ended December 31, 2017 compared to the year ended

December 31, 2016 were as follows:

63

Table of Contents

Net interest income

The \$17.8 million increase in net interest income for the year ended December 31, 2017 compared to the year ended December 31, 2016 primarily resulted from an increase in the average balance of interest-earning assets of \$1.0 billion, offset in part by a narrowing of net interest margin, tax equivalent of 11 basis points to 2.73% for the year ended December 31, 2017 from 2.84% for the year ended December 31, 2016.

Provision for loan losses

The \$3.7 million increase in the provision for loan losses for the year ended December 31, 2017 compared to the year ended December 31, 2016 primarily resulted from an increase in net charge-offs to \$6.1 million for the year ended December 31, 2017 compared to \$1.7 million for the year ended December 31, 2016.

Non-interest income

The \$22.5 million increase in non-interest income for the year ended December 31, 2017 compared to the year ended December 31, 2016 primarily resulted from increases in interchange and card revenue of \$16.8 million, deposit fees of \$2.0 million, gains on sales of investment securities of \$8.8 million, bank-owned life insurance of \$2.5 million, gains on sale of SBA and other loans of \$0.5 million and commercial lease income of \$0.6 million. These increases were offset in part by decreases in mortgage warehouse transactional fees of \$2.2 million, impairment losses on investment securities of \$5.7 million and other non-interest income of \$0.7 million for the year ended December 31, 2017 compared to the year ended December 31, 2016.

Non-interest expense

The \$37.4 million increase in non-interest expense for the year ended December 31, 2017 compared to the year ended December 31, 2016 primarily resulted from increases in salaries and employee benefits of \$14.9 million, technology, communication and bank operations of \$19.0 million, professional services of \$7.4 million, occupancy of \$0.8 million, provision for operating losses of \$2.9 million and commercial lease depreciation of \$0.5 million. These increases were offset in part by decreases in FDIC assessments, non-income taxes, and regulatory fees of \$5.2 million, merger and acquisition related expenses of \$0.8 million, other real estate owned of \$1.4 million and other non-interest expense of \$1.1 million for the year ended December 31, 2017 compared to the year ended December 31, 2016.

Income tax expense

The \$0.9 million decrease in income tax expense for the year ended December 31, 2017 compared to the year ended December 31, 2016 primarily resulted from a \$10.7 million income tax benefit from the exercise of employee stock options and vesting of restricted stock units for the year ended December 31, 2017, offset in part by a fourth quarter 2017 deferred tax asset re-measurement charge of \$5.5 million as a result of the enactment of the Tax Act and basis difference adjustment of \$4.5 million related to OTTI charges recorded during 2017 on equity securities.

Preferred stock dividends

The \$4.9 million increase in preferred stock dividends for the year ended December 31, 2017 compared to the year ended December 31, 2016 resulted from a full year of dividends paid on the Series E and Series F Preferred Stock issued in April 2016 and September 2016, respectively.

Table of Contents

NET INTEREST INCOME

Net interest income (the difference between the interest earned on loans, investments and interest-earning deposits with banks, and interest paid on deposits, borrowed funds and subordinated debt) is the primary source of Customers' earnings. The following table summarizes Customers' net interest income and related interest spread and net interest margin for the years ended December 31, 2018, 2017 and 2016.

	For the Years Ended December 31,								
	2018			2017			2016		
	Average balance	Interest income or expense	Average yield or cost	Average balance	Interest income or expense	Average yield or cost	Average balance	Interest income or expense	Average yield or cost

(1) For presentation in this table, average balances and the corresponding average yields for investment securities are based upon historical cost, adjusted for OTTI and amortization of premiums and accretion of discounts.

(2) Includes owner occupied commercial real estate loans.

(3) Includes non-accrual loans, the effect of which is to reduce the yield earned on loans, and deferred loan fees.

Non-GAAP tax-equivalent basis, using an estimated marginal tax rate of 26% for the year ended December 31, 2018 and 35% for the years ended December 31, 2017, and 2016, presented to approximate interest income as a taxable asset. Management uses non-GAAP measures to present historical periods comparable to the current period

(4) presentation. In addition, management believes the use of these non-GAAP measures provides additional clarity when assessing Customers' financial results. These disclosures should not be viewed as substitutes for results determined to be in accordance with U.S. GAAP, nor are they necessarily comparable to non-GAAP performance measures that may be presented by other entities.

Table of Contents

The following table presents the dollar amount of changes in interest income and interest expense for the major categories of interest-earning assets and interest-bearing liabilities. Information is provided for each category of interest-earning assets and interest-bearing liabilities with respect to (i) changes attributable to volume (i.e., changes in average balances multiplied by the prior-period average rate) and (ii) changes attributable to rate (i.e., changes in average rate multiplied by prior-period average balances). For purposes of this table, changes attributable to both rate and volume which cannot be segregated have been allocated proportionately to the change due to volume and the change due to rate.

	2018 vs. 2017			2017 vs. 2016		
	Increase (decrease) due to change in			Increase (decrease) due to change in

Net interest income	\$(17,734)	\$8,268	\$(9,466)	\$(10,536)	\$28,382	\$17,846

For the years ended December 31, 2018 and 2017

Net interest income was \$257.9 million for the year ended December 31, 2018, a decrease of \$9.5 million, or 3.5%, when compared to net interest income for the year ended December 31, 2017, of \$267.3 million. The decrease in net interest income in 2018 was primarily attributable to the narrowing of Customers' net interest margin (tax equivalent) by 15 basis points, to 2.58% for the year ended December 31, 2018, from 2.73% for the year ended December 31, 2017. This margin compression was driven by higher funding costs, as rising interest rates increased the cost of interest-bearing liabilities by 64 basis points compared to the prior year. Most notably, the cost of certificates of deposits and money market accounts increased by 62 and 74 basis points, respectively, and the cost of borrowings, primarily short-term FHLB advances, increased by 50 basis points. The impact of higher funding costs was offset in part by higher yields on interest earning assets, which increased 37 basis points, primarily driven by higher yields on commercial loans to mortgage companies, commercial and industrial loans, and investment securities of 72, 55, and 41 basis points, respectively. The increased yield on investment securities partially reflects the third quarter 2018 sale of \$495 million of lower-yielding investment securities. The average balance of interest-earning assets also increased \$0.2 billion, or 1.9%, to \$10.0 billion for the year ended December 31, 2018, when compared to \$9.8 billion for the year ended December 31, 2017, primarily driven by growth in commercial and industrial loans and investment securities and offset in part by decreases in the average balances in commercial loans to mortgage companies. The

average balance of multi-family loans of \$3.5 billion and \$3.6 billion remained relatively flat between the years ended December 31, 2018 and 2017, respectively, reflecting management's efforts to re-mix the balance sheet to focus on higher-yielding assets.

Table of Contents

For the years ended December 31, 2017 and 2016

Net interest income was \$267.3 million for the year ended December 31, 2017, an increase of \$17.8 million, or 7.2%, when compared to net interest income for the year ended December 31, 2016, of \$249.5 million. The increase in net interest income in 2017 was primarily attributable to an increase in the average balance of interest-earning assets of \$1.0 billion, or 11.7%, to \$9.8 billion for the year ended December 31, 2017, when compared to \$8.8 billion for the year ended December 31, 2016, offset in part by the narrowing of Customers' net interest margin (tax equivalent) by 11 basis points to 2.73% for the year ended December 31, 2017 from 2.84% for the year ended December 31, 2016.

PROVISION FOR LOAN LOSSES

For more information about the provision and Customers' allowance for loan losses methodology and loss experience, see Critical Accounting Policies, FINANCIAL CONDITION - LOANS, CREDIT RISK and ASSET QUALITY herein and NOTE 2 – SIGNIFICANT ACCOUNTING POLICIES AND BASIS OF PRESENTATION to Customers' audited financial statements.

Customers maintains an allowance for loan losses to cover estimated probable losses incurred as of the balance sheet date on loans held for investment that are not reported at their fair value on a recurring basis. The allowance for loan losses is increased through periodic provisions for loan losses that are charged as an expense on the consolidated statements of income and is reduced by charge-offs, net of recoveries. The loan portfolio is reviewed quarterly to evaluate the performance of the portfolio and the adequacy of the allowance for loan losses. The allowance for loan losses is estimated as of the end of each quarter and compared to the balance recorded in the general ledger, net of charge-offs and recoveries. The allowance is adjusted to the estimated allowance for loan losses balance with a corresponding charge (or debit) to the provision for loan losses.

For the years ended December 31, 2018 and 2017

During 2018, the provision for loan losses was \$5.6 million, a decrease of \$1.1 million from provision expense of \$6.8 million in 2017. The 2018 provision expense included \$4.0 million for loan growth and \$3.2 million for impaired loans, offset in part by a \$1.5 million release of the allowance estimate resulting from improved asset quality and lower incurred losses on purchased credit-impaired loans than previously estimated. Of the \$5.6 million provision for loan losses recorded in 2018, \$4.2 million related to the other consumer loan portfolio, \$2.5 million related to the commercial and industrial loan portfolio and \$1.1 million related to the residential real estate loan portfolio, reflecting Customers' efforts to re-mix the balance sheet to focus on these higher-yielding portfolios. These provision expenses were offset in part by benefits (or negative provisions) of \$0.7 million and \$1.3 million recognized on the multi-family and non-owner occupied commercial real estate portfolios, respectively, largely resulting from run-off in these portfolios. The 2017 provision expense included \$2.3 million for loan portfolio growth and \$5.6 million for impaired loans, offset in part by a \$1.1 million release of the allowance estimate resulting from improved asset quality and lower incurred losses on purchased credit-impaired loans than previously estimated. Of the \$6.8 million provision for loan losses recorded in 2017, \$5.1 million related to the commercial and industrial loan portfolio, including owner occupied commercial real estate, and \$0.6 million related to the multi-family loan portfolio. Net charge-offs in 2018 totaled \$3.7 million compared to net charge-offs of \$6.1 million in 2017. There were no significant changes in Customers' methodology for estimating its allowance for loan losses, or policies regarding charge-offs, in 2018.

For the years ended December 31, 2017 and 2016

During 2017, the provision for loan losses was \$6.8 million, an increase of \$3.7 million from a provision of \$3.0 million in 2016. Net charge-offs in 2017 totaled \$6.1 million compared to net charge-offs of \$1.7 million in 2016. The 2016 provision included a benefit of \$0.3 million attributable to FDIC loss sharing arrangements. There were no significant changes in Customers' methodology for estimating its allowance for loan losses, or policies regarding charge-offs, in 2017.

For more information about the provision and the allowance for loan losses, see NOTE 7 - LOANS RECEIVABLE AND ALLOWANCE FOR LOAN LOSSES to Customers' audited financial statements.

Table of Contents

NON-INTEREST INCOME

The tables below present the various components of non-interest income for the years ended December 31, 2018, 2017 and 2016.

For the years ended December 31, 2018 and 2017

	For the Years		Change	Percentage	Change
	Ended	December 31,			
	2018	2017			
(amounts in thousands)					
Interchange and card revenue	\$30,695	\$41,509	\$(10,814)	(26.1)	%
Deposit fees	7,824	10,039	(2,215)	(22.1)	%
Bank-owned life insurance	7,620	7,219	401	5.6	%
Mortgage warehouse transactional fees	7,158	9,345	(2,187)	(23.4)	%
Commercial lease income	5,354	647	4,707	727.5	%
Gains on sale of SBA and other loans	3,294	4,223	(929)	(22.0)	%
Mortgage banking income	606	875	(269)	(30.7)	%
Impairment loss on investment securities	—	(12,934)	12,934	(100.0)	%
(Loss) gain on sale of investment securities	(18,659)	8,800	(27,459)	(312.0)	%
Other	15,106	9,187	5,919	64.4	%
Total non-interest income	\$58,998	\$78,910	\$(19,912)	(25.2)	%

Interchange and card revenue

The \$10.8 million decrease in interchange and card revenue for the year ended December 31, 2018 compared to the year ended December 31, 2017 primarily resulted from reduced transaction volumes at the BankMobile business segment of \$5.3 million and \$5.5 million of debit card interchange expense recorded as a reduction in non-interest income beginning on January 1, 2018, following the adoption of ASC 606 as described in NOTE 2 – SIGNIFICANT ACCOUNTING POLICIES AND BASIS OF PRESENTATION. Amounts reported for interchange and card revenue for periods prior to the adoption of this standard are still presented gross, and the corresponding interchange expenses are reported as a component of non-interest expense.

Deposit fees

The \$2.2 million decrease in deposit fees for the year ended December 31, 2018 compared to the year ended December 31, 2017 primarily resulted from reduced transaction volumes at the BankMobile business segment.

Mortgage warehouse and transactional fees

The \$2.2 million decrease in mortgage warehouse transactional fees for the year ended December 31, 2018 compared to the year ended December 31, 2017 primarily resulted from lower transaction volumes and reduced per transaction fees in Customers' mortgage warehouse business, as higher interest rates are driving an overall decline in demand for new and refinanced mortgage loans industry-wide.

Commercial lease income

Commercial lease income represents income earned on commercial operating leases generated by Customers' Equipment Finance Group. The \$4.7 million increase in income from commercial leases for the year ended December 31, 2018 compared to the year ended December 31, 2017 resulted from a full year of operating lease arrangements being offered by Customers' Equipment Finance Group during 2018.

Gains on sale of SBA and other loans

The \$0.9 million decrease in gains on sale of SBA and other loans for the year ended December 31, 2018 compared to the year ended December 31, 2017 was primarily the result of a \$1.2 million loss realized from the sale of \$54.6 million lower-yielding multi-family loans during 2018 as part of Customers' efforts to remix its balance sheet.

Table of Contents

Impairment loss on investment securities

There were no OTTI losses on investment securities for the year ended December 31, 2018. Customers recorded OTTI losses on investment securities of \$12.9 million for the full amount of the decline in the fair values of equity securities below their cost basis during 2017.

(Loss) gain on sale of investment securities

For the year ended December 31, 2018, Customers realized a loss of \$18.7 million from the sale of \$495 million of lower-yielding investment securities, compared to gains of \$8.8 million for the year ended December 31, 2017.

Other non-interest income

The \$5.9 million increase in other non-interest income for the year ended December 31, 2018 compared to the year ended December 31, 2017 primarily resulted from \$4.8 million of gains realized in 2018 from the terminations of three interest rate swaps previously designated as cash flow hedges.

For the years ended December 31, 2017 and 2016

	For the Years Ended		Change	Percentage Change	
	December 31, 2017	2016			
(amounts in thousands)					
Interchange and card revenue	\$41,509	\$24,681	\$16,828	68.2	%
Deposit fees	10,039	8,067	1,972	24.4	%
Mortgage warehouse transactional fees	9,345	11,547	(2,202)	(19.1)	%
Gain on sale of investment securities	8,800	25	8,775	35,100.0	%
Bank-owned life insurance	7,219	4,736	2,483	52.4	%
Gains on sale of SBA and other loans	4,223	3,685	538	14.6	%
Mortgage banking income	875	969	(94)	(9.7)	%
Commercial lease income	647	—	647	100.0	%
Impairment loss on investment securities	(12,934)	(7,262)	(5,672)	78.1	%
Other	9,187	9,922	(735)	(7.4)	%
Total non-interest income	\$78,910	\$56,370	\$22,540	40.0	%

Interchange and card revenue

The \$16.8 million increase in interchange and card revenue for the year ended December 31, 2017 compared to the year ended December 31, 2016 primarily resulted from a full year of BankMobile Disbursement operations, which was acquired in June 2016.

Deposit fees

The \$2.0 million increase in deposit fees for the year ended December 31, 2017 compared to the year ended December 31, 2016 primarily resulted from a full year of BankMobile Disbursement operations, which was acquired in June 2016.

Mortgage warehouse transactional fees

The \$2.2 million decrease in mortgage warehouse transactional fees for the year ended December 31, 2017 compared to the year ended December 31, 2016 primarily resulted from a reduction in the volume of warehouse transactions.

Gain on sale of investment securities

The \$8.8 million increase in gain on sales of investment securities resulted from increased sale activity for the year ended December 31, 2017 compared to the year ended December 31, 2016. During the year ended December 31, 2017, proceeds from the sales of investment securities available for sale were \$0.8 billion compared to only \$2.9 million for the year ended December 31, 2016.

Table of Contents

Bank-owned life insurance

The \$2.5 million increase in BOLI income for the year ended December 31, 2017 compared to the year ended December 31, 2016 primarily resulted from the increased investment in BOLI policies during 2017.

Impairment loss on investment securities

The \$5.7 million increase in impairment losses for the year ended December 31, 2017 compared to the year ended December 31, 2016 resulted from further declines in the fair value of other than temporarily impaired equity securities.

NON-INTEREST EXPENSE

The tables below present the various components of non-interest expense for the years ended December 31, 2018, 2017 and 2016.

For the years ended December 31, 2018 and 2017

	For the Years		Change	Percentage	
	Ended December 31, 2018	2017		Change	Change
(amounts in thousands)					
Salaries and employee benefits	\$104,841	\$95,518	\$9,323	9.8	%
Technology, communication and bank operations	44,454	45,885	(1,431)	(3.1)	%
Professional services	20,237	28,051	(7,814)	(27.9)	%
Occupancy	11,809	11,161	648	5.8	%
FDIC assessments, non-income taxes, and regulatory fees	8,642	7,906	736	9.3	%
Provision for operating losses	5,616	6,435	(819)	(12.7)	%
Merger and acquisition related expenses	4,391	410	3,981	971.0	%
Commercial lease depreciation	4,388	522	3,866	740.6	%
Advertising and promotion	2,446	1,470	976	66.4	%
Loan workout	2,183	2,366	(183)	(7.7)	%
Other real estate owned	449	570	(121)	(21.2)	%
Other	10,723	15,312	(4,589)	(30.0)	%
Total non-interest expense	\$220,179	\$215,606	\$4,573	2.1	%

Salaries and employee benefits

The \$9.3 million increase in salaries and employee benefits for the year ended December 31, 2018 compared to the year ended December 31, 2017 primarily resulted from salary increases for existing team members and increased headcount as Customers hired new team members in the existing and new markets its serves, including new locations in Philadelphia, Chicago and Washington D.C. Included in salaries and employee benefits for the year ended December 31, 2018 was \$1.9 million of executive severance expense.

Technology, communications, and bank operations

Technology, communications, and bank operations expenses decreased \$1.4 million for the year ended December 31, 2018 compared to the year ended December 31, 2017. Technology, communications and bank operations for the year ended December 31, 2018 excludes \$5.5 million of debit and prepaid card interchange expense as a result of new revenue recognition guidance on January 1, 2018 following the adoption of ASC 606 as described in NOTE 2 – SIGNIFICANT ACCOUNTING POLICIES AND BASIS OF PRESENTATION. For the year ended December 31, 2017, debit and prepaid card interchange expense was \$5.9 million. When presented on a consistent basis, technology, communication and bank operations expense increased \$4.5 million for the year ended December 31, 2018 compared to the year ended December 31, 2017, as a result of the continued investment in the BankMobile segment infrastructure and Customers' 2018 system conversion.

Professional services

The \$7.8 million decrease in professional services for the year ended December 31, 2018 compared to the year ended December 31, 2017 primarily resulted from a reduction in expenses for consulting, legal, outside services, and other professional fees as management continues its efforts to monitor and control expenses.

Table of Contents

Occupancy

The \$0.6 million increase in occupancy for the year ended December 31, 2018 compared to the year ended December 31, 2017 primarily resulted Customers' expanded geographical presence, including new locations in Philadelphia, Chicago and Washington D.C. during 2018.

FDIC assessments, non-income taxes, and regulatory fees

The \$0.7 million increase in FDIC assessments, non-income taxes, and regulatory fees for the year ended December 31, 2018 compared to the year ended December 31, 2017 primarily resulted from expanded operations during the 2018 year, including additional state franchise tax filings and growth in Customers' shareholders equity impacting the Pennsylvania Bank Shares Tax.

Provision for operating losses

The provision for operating losses decreased \$0.8 million for the year ended December 31, 2018 compared to the year ended December 31, 2017. The provision for operating losses primarily consists of Customers' estimated liability for losses resulting from fraud or theft-based transactions that have generally been disputed by deposits account holders, mainly from its BankMobile Disbursement business, but where such disputes have not been resulted as of the end of the reporting period. The reserve is based on historical rates of loss on such transactions. The decrease is primarily attributable to the timing of the fraud or theft-based transactions along with the level of overall deposit balances at the BankMobile Disbursement business.

Merger and acquisition related expenses

The \$4.0 million increase in merger and acquisition related expenses for the year ended December 31, 2018 compared to the year ended December 31, 2017 was primarily related to the planned spin-off and merger of BankMobile. Upon termination of the spin-off and merger agreement between Customers and Flagship Community Bank on October 18, 2018, Customers recognized expenses of \$2.7 million for amounts that, under the terms of the agreement, would have been reimbursed by Flagship Community Bank only upon completion of the spin off and merger.

Commercial lease depreciation

The \$3.9 million increase in depreciation expense on commercial lease depreciation for the year ended December 31, 2018 compared to the year ended December 31, 2017 resulted from a full year of operating lease arrangements being offered by Customers' Equipment Finance Group.

Advertising and promotion

The \$1.0 million increase in advertising and promotion expenses for the year ended December 31, 2018 compared to the year ended December 31, 2017 primarily resulted from Customers' expanded geographical locations and product line offerings in 2018.

Other non-interest expenses

The \$4.6 million decrease in other non-interest expenses for the year ended December 31, 2018 compared to the year ended December 31, 2017 primarily was generated by expense reimbursements from a white label collaboration and numerous specific cost saves, which reflects management's continued efforts to monitor and control expenses.

Table of Contents

For the years ended December 31, 2017 and 2016

	For the Years Ended		Change	Percentage Change	
	December 31, 2017	2016			
(amounts in thousands)					
Salaries and employee benefits	\$95,518	\$80,641	\$14,877	18.4	%
Technology, communication and bank operations	45,885	26,839	19,046	71.0	%
Professional services	28,051	20,684	7,367	35.6	%
Occupancy	11,161	10,327	834	8.1	%
FDIC assessments, non-income taxes, and regulatory fees	7,906	13,097	(5,191)	(39.6)	%
Provision for operating losses	6,435	3,517	2,918	83.0	%
Loan workout	2,366	2,063	303	14.7	%
Advertising and promotion	1,470	1,549	(79)	(5.1)	%
Merger and acquisition related expenses	410	1,195	(785)	(65.7)	%
Commercial lease depreciation	522	—	522	100.0	%
Other real estate owned	570	1,953	(1,383)	(70.8)	%
Other	15,312	16,366	(1,054)	(6.4)	%
Total non-interest expense	\$215,606	\$178,231	\$37,375	21.0	%

Salaries and employee benefits

The \$14.9 million increase in salaries and employee benefits for the year ended December 31, 2017 compared to the year ended December 31, 2016 primarily resulted from salary increases as well as a higher average number of full-time equivalent employees, primarily resulting from a full year of BankMobile Disbursement operations.

Technology, communication and bank operations

The \$19.0 million increase in technology, communication and bank operations for the year ended December 31, 2017 compared to the year ended December 31, 2016 primarily resulted from increases in the core processing system and conversion-related expenses of \$10.6 million. There were also increases in interchange expenses of \$5.5 million, reflecting a full year of BankMobile Disbursement operations and non-capitalizable software development costs of \$4.9 million resulting from the continued development and support of the BankMobile technology platform. These increases were offset in part by a \$3.9 million one-time expense for technology-related expenses in 2016.

Professional Services

The \$7.4 million increase in professional services expense for the year ended December 31, 2017 compared to the year ended December 31, 2016 primarily resulted from increased customer service-related expenses of \$4.8 million resulting from a full year of BankMobile Disbursement operations, increased legal expenses of \$1.0 million associated with the planned divestment of BankMobile and increased consulting and other professional services to support the ongoing operations of the Bank and BankMobile.

Occupancy

The \$0.8 million increase in occupancy expense for the year ended December 31, 2017 compared to the year ended December 31, 2016 primarily resulted from a full year of operations of the BankMobile Disbursement business, as well as increased business activity in existing and new markets, requiring additional team members and facilities.

FDIC assessments, non-income taxes, and regulatory fees

The \$5.2 million decrease in FDIC assessments, non-income taxes, and regulatory fees for the year ended December 31, 2017 compared to the year ended December 31, 2016 primarily resulted from a lower insurance assessment charged by the FDIC as the FDIC's DIF reached a targeted ratio.

Provision for operating losses

The \$2.9 million increase in the provision for operating losses for the year ended December 31, 2017 compared to the year ended December 31, 2016 primarily resulted from the accrual for the estimated liability for a full year of operations of the BankMobile Disbursement business in 2017. The reserve is based on historical rates of loss on such transactions. The provision for operating losses primarily consists of Customers' estimated liability for losses resulting

from fraud or theft-based

72

Table of Contents

transactions that have generally been disputed by deposit account holders, mainly from its BankMobile Disbursement business, but where such disputes have not been resolved as of the end of the reporting period.

Merger and acquisition related expenses

Merger and acquisition related expenses decreased \$0.8 million for the year ended December 31, 2017 compared to the year ended December 31, 2016. The merger and acquisition related expenses for 2016 included Customers' acquisition of the BankMobile Disbursement business in June 2016.

Other real estate owned

The \$1.4 million decrease in OREO expenses for the year ended December 31, 2017 compared to the year ended December 31, 2016 primarily resulted from a \$1.2 million reduction in valuation adjustments on the OREO properties year over year.

Other non-interest expenses

The \$1.1 decrease in other non-interest expenses for the year ended December 31, 2017 compared to the year ended December 31, 2016 primarily was generated by numerous specific cost saves in 2017.

INCOME TAXES

The table below presents income tax expense and the effective tax rate for the years ended December 31, 2018, 2017 and 2016.

	For the Years Ended December 31,			2018 vs. 2017		2017 vs. 2016	
	2018	2017	2016	Change	Percentage change	Change	Percentage change
(dollars in thousands)							
Income before income tax expense	\$91,054	\$123,879	\$124,595	\$(32,825)	(26.5)%	\$(716)	(0.6)%
Income tax expense	19,359	45,042	45,893	(25,683)	(57.0)%	(851)	(1.9)%
Effective tax rate	21.3	% 36.4	% 36.8	%			

For the years ended December 31, 2018 and 2017

The income tax expense and effective tax rate include both federal and state income taxes. The \$25.7 million decrease in income tax expense for the year ended December 31, 2018 compared to the year ended December 31, 2017 was primarily attributable to the lowering of the federal corporate tax rate from 35% to 21% due to the Tax Act becoming effective on January 1, 2018, and a decrease in pre-tax income of \$32.8 million. State income taxes, net of the federal benefit, resulted in a 4.47% increase to the federal tax rate for the year ended December 31, 2018. This increase was offset in part by BOLI income, which generated a 1.70% effective tax rate decrease and the income tax benefit from the vesting of restricted stock units and exercise of employee stock options which generated a 0.60% effective tax rate decrease. In fourth quarter 2017, Customers recorded a deferred tax asset re-measurement charge to its income tax expense of \$5.5 million as a result of the enactment of the Tax Act. This one-time tax effect was offset by a \$10.7 million benefit from exercise of employee stock options, principally by Customers' CEO, and vesting of restricted stock units. For additional information, see NOTE 14 - INCOME TAXES to Customers' audited financial statements.

For the years ended December 31, 2017 and 2016

There was a \$0.9 million decrease in income tax expense for the year ended December 31, 2017 compared to the year ended December 31, 2016. In fourth quarter 2017, Customers recorded a deferred tax asset re-measurement charge to its income tax expense of \$5.5 million, or a 4.44% effective tax rate increase, as a result of the enactment of the Tax Act in December 2017. In 2017, Customers also had unrecorded basis difference in foreign subsidiaries of \$4.5 million, or a 3.65% effective tax rate increase, related to the OTTI charges recorded during 2017 on equity securities held by these foreign subsidiaries. These adjustments were offset in their entirety by a \$10.7 million benefit, or 8.67% effective tax rate reduction, from exercises of employee stock options, principally by Customers' CEO, and vesting of restricted stock units.

Table of Contents

FINANCIAL CONDITION

GENERAL

At December 31, 2018 and 2017, total assets were \$9.8 billion. Customers continues to focus on optimizing balance sheet mix, enhancing liquidity, improving capital, expanding net interest margin, and maximizing the return on average assets. Efforts improved loan mix year over year, as commercial and industrial loans, excluding commercial loans to mortgage companies, increased \$312 million and mortgages and other consumer loans increased \$392 million. Customers decreased lower yielding multi-family loans and commercial non-owner occupied real estate loans by \$361 million and \$93.6 million, respectively. Commercial mortgage warehouse loans were \$1.5 billion at December 31, 2018, down \$0.3 billion from \$1.8 billion at December 31, 2017, primarily due to the general slowdown of mortgage originations and refinancing across the United States.

Total liabilities were \$8.9 billion at December 31, 2018. This represented a \$42.0 million, or 0.5%, decrease from total liabilities of \$8.9 billion at December 31, 2017. Consistent with management's focus on improving margin, Customers grew lower cost deposits by \$342.1 million to replace higher cost FHLB advances during 2018.

The following table sets forth certain key condensed balance sheet data:

	December 31,			
	2018	2017	Change	Percentage Change
(amounts in thousands)				
Cash and cash equivalents	\$62,135	\$146,323	\$(84,188)	(57.5)%
Investment securities available for sale, at fair value	665,012	471,371	193,641	41.1%
Loans held for sale (includes \$1,507 and \$1,886, respectively, at fair value)	1,507	146,077	(144,570)	(99.0)%
Loans receivable, mortgage warehouse, at fair value	1,405,420	1,793,408	(387,988)	(21.6)%
Loans receivable	7,138,074	6,768,258	369,816	5.5%
Total loans receivable, net of allowance for loan losses	8,503,528	8,523,651	(20,129)	(0.2)%
Total assets	9,833,429	9,839,555	(6,130)	(0.1)%

Subordinated debt	108,977	108,880	97	0.1%
Total liabilities	8,876,608	8,918,591	(41,982)	(0.5)%
Total shareholders' equity	956,816	920,964	35,852	3.9%
Total liabilities and shareholders' equity	9,833,429	9,839,555	(6,130)	(0.1)%

CASH AND CASH EQUIVALENTS

Cash and cash equivalents include cash and due from banks and interest-earning deposits. Cash and due from banks consists mainly of vault cash and cash items in the process of collection. Cash and due from banks were \$17.7 million and \$20.4 million at December 31, 2018 and 2017, respectively. The cash and cash due from banks balances vary from day to day, primarily due to fluctuations in customers' deposits with the Bank.

Interest-earning deposits consist mainly of cash deposits at the FRB. Interest-earning deposits were \$44.4 million and \$125.9 million at December 31, 2018 and 2017, respectively. The balance of interest-earning deposits varies from day to day, depending on several factors, such as fluctuations in customers' deposits with Customers, payment of checks drawn on customers' accounts and strategic investment decisions made to maximize Customers' net interest income, while effectively managing interest-rate risk and liquidity.

INVESTMENT SECURITIES

The investment securities portfolio is an important source of interest income and liquidity. It consists of mortgage-backed securities (guaranteed by an agency of the United States government), corporate securities, and marketable equity securities. In addition to generating revenue, the investment portfolio is maintained to manage interest-rate risk, provide liquidity, provide

Table of Contents

collateral for other borrowings and diversify the credit risk of interest-earning assets. The portfolio is structured to optimize net interest income, given changes in the economic environment, liquidity position and balance sheet mix. At December 31, 2018, investment securities totaled \$665.0 million compared to \$471.4 million at December 31, 2017. The increase was primarily the result of purchases of agency-guaranteed mortgage-backed securities and corporate securities totaling of \$763.2 million, largely during first quarter 2018. The increase was offset in part by the sale of \$494.8 million of lower-yielding securities, and maturities, calls and principal repayments totaling \$44.3 million for the year ended December 31, 2018.

For financial reporting purposes, available-for-sale debt securities are carried at fair value. Unrealized gains and losses on available-for-sale debt securities are included in OCI and reported as a separate component of shareholders' equity, net of the related tax effect. Beginning January 1, 2018, changes in the fair value of marketable equity securities previously classified as available for sale are recorded in earnings in the period in which they occur and are no longer deferred in AOCI. Amounts previously recorded to AOCI were reclassified to retained earnings on January 1, 2018. See NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES AND BASIS OF PRESENTATION for additional information related to the adoption of ASU 2016-01, Recognition and Measurement of Financial Assets and Financial Liabilities.

The following table sets forth the amortized cost of the investment securities at December 31, 2018 and 2017.

	December 31,	
	2018	2017
(amounts in thousands)		
Available for sale securities		
Agency-guaranteed residential mortgage-backed securities	\$311,267	\$186,221
Agency-guaranteed commercial real estate mortgage-backed securities	—	238,809
Corporate notes	381,407	44,959
Equity securities ⁽¹⁾	—	2,311
	\$692,674	\$472,300

Includes equity securities issued by a foreign entity that are being measured at fair value with changes in fair value recognized directly in earnings effective January 1, 2018 as a result of adopting ASU 2016-01, Recognition and Measurement of Financial Assets and Financial Liabilities (see NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES AND BASIS OF PRESENTATION for additional information related to the adoption of this new standard).

The following table sets forth information about the maturities and weighted-average yield of the securities portfolio. Yields are not reported on a tax-equivalent basis.

	December 31, 2018						Fair Value Total
	Amortized Cost						
	< 1yr	1-5 years	5-10 years	After 10 years	No specific maturity	Total	
(amounts in thousands)

Weighted-Average Yield	—%	—%	4.02	% 3.86	% 3.50	% 3.78	%

The mortgage-backed securities in the portfolio were issued by Fannie Mae, Freddie Mac, and Ginnie Mae and contain guarantees for the collection of principal and interest on the underlying mortgages.

LOANS

Existing lending relationships are primarily with small and middle market businesses and individual consumers primarily in Southeastern Pennsylvania (Bucks, Berks, Chester, Philadelphia and Delaware Counties); Rye Brook, New York (Westchester County); Hamilton, New Jersey (Mercer County); Boston, Massachusetts; Providence, Rhode Island; Portsmouth, New Hampshire (Rockingham County); Manhattan and Melville, New York; Washington, D.C.; and Chicago, Illinois. The portfolio

75

Table of Contents

of loans to mortgage banking businesses is nationwide. The loan portfolio consists primarily of loans to support mortgage banking companies' funding needs, multi-family/commercial real estate and commercial and industrial loans. Customers continues to focus on small and middle market business loans to grow its commercial lending efforts, particularly its commercial and industrial loan portfolio and its specialty mortgage lending business, and has announced its entry into non-QM residential mortgage lending and plans to increase its consumer lending activities. In addition, Customers has been deemphasizing its multi-family business and has significantly limited originations of loans yielding less than 5.25% in order to reduce net interest margin compression.

Commercial Lending

Customers' commercial lending is divided into five groups: Business Banking, Small and Middle Market Business Banking, Multi-Family and Commercial Real Estate Lending, Mortgage Banking Lending and Equipment Finance. This grouping is designed to allow for greater resource deployment, higher standards of risk management, strong asset quality, lower interest- rate risk and higher productivity levels.

The commercial lending group focuses primarily on companies with annual revenues ranging from \$1 million to \$100 million, which typically have credit requirements between \$0.5 million and \$10 million.

The small and middle market business banking platform originates loans, including SBA loans, through the branch network sales force and a team of dedicated relationship managers. The support administration of this platform is centralized including risk management, product management, marketing, performance tracking and overall strategy. Credit and sales training has been established for Customers' sales force, ensuring that it has small business experts in place providing appropriate financial solutions to the small business owners in its communities. A division approach focuses on industries that offer high asset quality and are deposit rich to drive profitability.

In 2009, Customers launched its lending to mortgage banking businesses products, which primarily provides financing to mortgage bankers for residential mortgage originations from loan closing until sale in the secondary market. Many providers of liquidity in this segment exited the business in 2009 during a period of market turmoil. Customers saw an opportunity to provide liquidity to this business segment at attractive spreads. There was also the opportunity to attract escrow deposits and to generate fee income in this business. The underlying residential loans are taken as collateral for Customers' commercial loans to the mortgage companies. As of December 31, 2018 and 2017, commercial loans to mortgage banking businesses totaled \$1.4 billion and \$1.8 billion, respectively, and are reported as loans receivable, mortgage warehouse, at fair value on the consolidated balance sheet.

The goal of Customers' multi-family lending group is to build a portfolio of high-quality multi-family loans within Customers' covered markets while cross-selling other products and services. These lending activities primarily target the refinancing of loans with other banks using conservative underwriting standards and provide purchase money for new acquisitions by borrowers. The primary collateral for these loans is a first-lien mortgage on the multi-family property, plus an assignment of all leases related to such property. As of December 31, 2018, Customers had multi-family loans of \$3.3 billion outstanding, comprising approximately 38.4% of the total loan portfolio, compared to \$3.6 billion, or approximately 41.9% of the total loan portfolio, at December 31, 2017.

The equipment finance group offers equipment financing and leasing products and services for a broad range of asset classes. It services vendors, dealers, independent finance companies, bank-owned leasing companies and strategic direct customers in the plastics, packaging, machine tool, construction, transportation and franchise markets. As of December 31, 2018 and 2017, Customers had \$172.9 million and \$152.5 million, respectively, of equipment finance loans outstanding. As of December 31, 2018 and 2017, Customers had \$54.5 million and \$26.6 million of equipment finance leases, respectively. As of December 31, 2018 and 2017, Customers had \$54.5 million and \$21.7 million, respectively, of operating leases entered into under this program, net of accumulated depreciation of \$4.8 million and \$0.5 million, respectively.

As of December 31, 2018, Customers had \$7.8 billion in commercial loans outstanding, totaling approximately 91.6% of its total loan portfolio, which includes loans held for sale and loans receivable, mortgage warehouse, at fair value, compared to commercial loans outstanding of \$8.4 billion, comprising approximately 96.2% of its total loan portfolio, at December 31, 2017.

Consumer Lending

Customers provides home equity and residential mortgage loans to customers. Underwriting standards for home equity lending are conservative, and lending is offered to solidify customer relationships and grow relationship revenues in the long term. This lending is important in Customers' efforts to grow total relationship revenues for its consumer households. As of December 31, 2018, Customers had \$721.8 million in consumer loans outstanding, or 8.4% of the total loan portfolio,

76

Table of Contents

compared to \$329.8 million, or 3.8% of the total loan portfolio, as of December 31, 2017. During the year ended December 31, 2018, Customers purchased \$398.5 million of residential mortgages and other consumer loans from third party financial institutions. Customers plans to expand its product offerings in real estate secured consumer lending, as well as other consumer lending activities, including the non-QM residential mortgage market and unsecured consumer lending.

Customers has launched a community outreach program in Philadelphia to finance homeownership in urban communities. As part of this program, Customers is offering an "Affordable Mortgage Product." This community outreach program is penetrating the underserved population, especially in low-and-moderate-income neighborhoods. As part of this commitment, a loan production office was opened in Progress Plaza, 1501 North Broad Street, Philadelphia, PA. The program includes homebuyer seminars that prepare potential homebuyers for homeownership by teaching money management and budgeting skills, including the financial responsibilities that come with having a mortgage and owning a home. The "Affordable Mortgage Product" is offered throughout Customers' assessment areas.

Loans Held for Sale

The composition of loans held for sale was as follows:

	December 31,				
	2018	2017	2016	2015	2014
(amounts in thousands)					
Commercial loans:					
Multi-family loans at lower of cost or fair value	\$—	\$144,191	\$—	\$39,257	\$99,791
Total commercial loans held for sale	—	144,191	—	39,257	99,791
Consumer loans:					
Residential mortgage loans, at fair value	1,507	1,886	695	2,857	3,649
Loans held for sale	\$1,507	\$146,077	\$695	\$42,114	\$103,440

At December 31, 2018, loans held for sale totaled \$1.5 million, or 0.02% of the total loan portfolio, and \$146.1 million, or 1.7% of the total loan portfolio, at December 31, 2017. Loans held for sale are carried on the balance sheet at either fair value (due to the election of the fair value option) or at the lower of cost or fair value. An allowance for loan losses is not recorded on loans that are classified as held for sale.

Table of Contents

Total Loans Receivable

The composition of total loans receivable (excluding loans held for sale) was as follows:

	December 31,				
	2018	2017	2016	2015	2014
(amounts in thousands)					
Loans receivable, mortgage warehouse, at fair value	\$1,405,420	\$1,793,408	\$2,116,815	\$1,754,950	\$1,332,019
Loans receivable:					
Commercial:					
Multi-family	3,285,297	3,502,381	3,214,999	2,909,439	2,208,405
Commercial and industrial (including owner occupied commercial real estate)	1,951,277	1,633,818	1,382,343	1,111,400	785,669
Commercial real estate non-owner occupied	1,125,106	1,218,719	1,193,715	956,255	839,310
Construction	56,491	85,393	64,789	87,240	49,718
Total commercial loans receivable	6,418,171	6,440,311	5,855,846	5,064,334	3,883,102
Consumer:					
Residential real estate	566,561	234,090	193,502	271,613	297,395
Manufactured housing	79,731	90,227	101,730	113,490	126,731
Other	74,035	3,547	3,483	3,708	4,433
Total consumer loans receivable	720,327	327,864	298,715	388,811	428,559
Loans receivable	7,138,498	6,768,175	6,154,561	5,453,145	4,311,661
Deferred (fees) costs and unamortized (discounts) premiums, net	(424)	83	76	334	512
Allowance for loan losses	(39,972)	(38,015)	(37,315)	(35,647)	(30,932)
Total loans receivable, net of allowance for loan losses	\$8,503,522	\$8,523,651	\$8,234,137	\$7,172,782	\$5,613,260

Customers' total loan receivable portfolio includes loans receivable which are reported at fair value based on an election made to account for these loans at their fair value and loans receivable which are primarily reported at their outstanding unpaid principal balance, net of charge-offs, deferred costs and fees, and unamortized premiums and discounts and are evaluated for impairment.

Loans receivable, mortgage warehouse, at fair value

The mortgage warehouse product line provides financing to mortgage companies nationwide from the time of origination of the underlying mortgage loans until the mortgage loans are sold into the secondary market. As a mortgage warehouse lender, Customers provides a form of financing to mortgage bankers by purchasing for resale the underlying residential mortgages on a short-term basis under a master repurchase agreement. These loans are reported as loans receivable, mortgage warehouse, at fair value on the consolidated balance sheets. Because these loans are reported at their fair value, they do not have an allowance for loan loss and are therefore excluded from allowance for loan loss related disclosures. At December 31, 2018, all of Customers' commercial mortgage warehouse loans were current in terms of payment.

Customers is subject to the risks associated with such lending, including, but not limited to, the risks of fraud, bankruptcy and default of the mortgage banker or of the underlying residential borrower, any of which could result in credit losses. Customers' mortgage warehouse lending team members monitor these mortgage originators by obtaining financial and other relevant information to reduce these risks during the lending period. Loans receivable, mortgage warehouse, at fair value totaled \$1.4 billion and \$1.8 billion at December 31, 2018 and 2017, respectively. The \$0.4 billion decrease was attributable to the general slowdown of mortgage originations across the United States.

Loans receivable

Loans receivable (excluding loans receivable, mortgage warehouse, at fair value), net of the allowance for loan losses, increased by \$0.4 billion to \$7.1 billion at December 31, 2018, from \$6.7 billion at December 31, 2017. The increase in loans receivable, net of the allowance for loan losses, was attributable to higher balances in the residential real

estate and commercial and industrial (including owner occupied commercial real estate) loan portfolios, with each portfolio increasing by \$0.3 billion from December 31, 2017, partially offset by the multi-family portfolio, which decreased by \$0.2 billion from December 31,

Table of Contents

2017. The fluctuations were the result of Customers' strategic efforts to reduce the lower-yielding loans in the multi-family portfolio and replace them with higher yielding commercial and industrial and consumer loans. The following table presents Customers' commercial loans receivable (excluding loans receivable, mortgage warehouse, at fair value) as of December 31, 2018 based on the remaining term to contractual maturity, and presents the amount of those loans with predetermined fixed rates and floating or adjustable rates:

	Within one year	After one but within five years	After five years	Total
(amounts in thousands)				
Commercial loans:				
Multi-family	\$225,046	\$1,125,296	\$1,934,955	\$3,285,297
Commercial and industrial (including owner occupied commercial real estate)	246,338	1,036,381	668,558	1,951,277
Commercial real estate non-owner occupied	149,615	602,604	372,887	1,125,106
Construction	4,991	20,728	30,772	56,491
Total commercial loans	\$625,990	\$2,785,009	\$3,007,172	\$6,418,171
Amount of such loans with:				
Predetermined rates	\$390,296	\$1,833,987	\$450,867	\$2,675,150
Floating or adjustable rates	235,694	951,022	2,556,305	3,743,021
Total commercial loans	\$625,990	\$2,785,009	\$3,007,172	\$6,418,171

CREDIT RISK

Customers manages credit risk by maintaining diversification in its loan portfolio, establishing and enforcing prudent underwriting standards and collection efforts and continuous and periodic loan classification reviews. Management also considers the effect of credit risk on financial performance by reviewing quarterly and maintaining an adequate allowance for loan losses. Credit losses are charged when they are identified, and provisions are added when it is estimated that a loss has occurred, to the allowance for loan losses at least quarterly. The allowance for loan losses is estimated at least quarterly.

The provision for loan losses was \$5.6 million, \$6.8 million, and \$3.0 million for the years ended December 31, 2018, 2017 and 2016, respectively. The allowance for loan losses maintained for loans receivable (excluding loans held for sale and loans receivable, mortgage warehouse, at fair value) was \$40.0 million, or 0.56% of loans receivable, at December 31, 2018, and \$38.0 million, or 0.56% of loans receivable, at December 31, 2017. Net charge-offs were \$3.7 million for the year ended December 31, 2018, a decrease of \$2.4 million compared to \$6.1 million for the year ending December 31, 2017. The decrease in net charge-offs year over year was mainly driven by lower net charge-offs in the commercial and industrial loan portfolio.

Customers had no loans that were covered under loss sharing arrangements with the FDIC as of December 31, 2018 and 2017. On July 11, 2016, Customers entered into an agreement to terminate all existing rights and obligations pursuant to the loss sharing agreements with the FDIC. In connection with the termination agreement, Customers paid the FDIC \$1.4 million as final payment under these agreements. The negotiated settlement amount was based on net losses incurred on the covered assets through September 30, 2015, adjusted for cash payments to and receipts from the FDIC as part of the December 31, 2015 and March 31, 2016 certifications. Consequently, loans and OREO previously reported as covered assets pursuant to the loss sharing agreements were no longer presented as covered assets as of June 30, 2016. Customers considered the covered loans in estimating the allowance for loan losses and considered recovery of estimated credit losses from the FDIC in the FDIC indemnification asset.

Table of Contents

The table below presents Customers' allowance for loan losses, excluding the effects of the FDIC receivable for the periods prior to the termination of the FDIC loss sharing agreement, for the periods indicated.

	For the Years Ended December 31,				
	2018	2017	2016	2015	2014
(amounts in thousands)

Net charge-offs as a percentage of average loans receivable	0.05 %	0.09 %	0.03 %	0.26 %	0.09 %

(1) Charge-offs and recoveries on PCI loans that are accounted for in pools are recognized on a net basis when the pool matures.

(2) Includes owner occupied commercial real estate loans.

(3) The provision amounts exclude the benefit/(cost) of the FDIC loss sharing arrangements of \$0.3 million, \$(3.9) million and \$(4.7) million, for the years ended December 31, 2016, 2015 and 2014, respectively.

The allowance for loan losses is based on a quarterly evaluation of the loan portfolio and is maintained at a level that management considers adequate to absorb probable losses incurred as of the balance sheet date. All commercial loans, with the exception of commercial mortgage warehouse loans, which are reported at fair value, are assigned internal credit-risk ratings, based upon an assessment of the borrower, the structure of the transaction and the available collateral and/or guarantees. All loans are monitored regularly by the responsible officer, and the risk ratings are adjusted when considered appropriate. The risk assessment allows management to identify problem loans timely. Management considers a variety of factors and recognizes the inherent risk of loss that always exists in the lending process. Management uses a disciplined methodology to estimate an appropriate level of allowance for loan losses. Refer to Critical Accounting Policies herein and NOTE 2 – SIGNIFICANT ACCOUNTING POLICIES AND BASIS OF PRESENTATION to Customers' audited financial statements for further discussion on management's methodology for estimating the allowance for loan losses.

Approximately 81% of Customers' commercial real estate, commercial and residential construction, consumer residential and commercial and industrial loan types have real estate as collateral (collectively, "the real estate portfolio"). Customers' lien position on the real estate collateral will vary on a loan-by-loan basis and will change as a result of changes in the value of the collateral. Current appraisals providing current value estimates of the property are received when Customers' credit group determines that the facts and circumstances have significantly changed since the date of the last appraisal, including that real estate values have deteriorated. The credit committee and loan officers review loans that are 15 or more days delinquent and all non-accrual loans on a periodic basis. In addition, loans where the loan officers have identified a "borrower of interest" are discussed to determine if additional analysis is necessary to apply the risk-rating criteria properly. The risk ratings for the real estate loan portfolio are determined

based upon the current information available, including but not limited to discussions with the borrower, updated financial information, economic conditions within the geographic area and other factors that may affect the cash flow of the loan. If a loan is individually evaluated for impairment, the collateral value or discounted cash flow analysis is generally used to determine the estimated fair value of the underlying collateral, net of estimated selling costs, and compared to the outstanding loan balance to determine the amount of reserve necessary, if any. Appraisals used in this evaluation process are typically less than two years aged. For loans where real estate is not the primary source of collateral, updated financial information is obtained, including accounts receivable and inventory aging reports and relevant supplemental

Table of Contents

financial data to estimate the fair value of the loan, net of estimated selling costs, and compared to the outstanding loan balance to estimate the required reserve.

These impairment measurements are inherently subjective as they require material estimates, including, among others, estimates of property values in appraisals, the amounts and timing of expected future cash flows on individual loans, and general considerations for historical loss experience, economic conditions, uncertainties in estimating losses and inherent risks in the various credit portfolios, all of which require judgment and may be susceptible to significant change over time and as a result of changing economic conditions or other factors. Pursuant to ASC 310-10-35 Loan Impairment and ASC 310-40 Troubled Debt Restructurings by Creditors, impaired loans, consisting primarily of non-accrual and restructured loans, are considered in the methodology for determining the allowance for loan losses. Impaired loans are generally evaluated based on the expected future cash flows or the fair value of the underlying collateral (less estimated costs to sell) if principal repayment is expected to come from the sale or operation of such collateral.

The following table shows the allowance for loan losses by various loan portfolios as of December 31, 2018, 2017, 2016, 2015 and 2014:

	December 31, 2018		2017		2016		2015		2014

ASSET QUALITY

Customers divides its loan receivable portfolio into two categories to analyze and understand loan activity and performance: loans receivable that were originated and loans receivable that were acquired. Customers further segments the originated and acquired loan receivables by loan product or other characteristic generally defining a shared characteristic with other loans in the same group. Customers' originated loans were subject to the current underwriting standards that were put in place in 2009. Management believes this segmentation better reflects the risk

in the portfolio and the various types of reserves that are available to absorb loan losses that may emerge in future periods. Credit losses from originated loans are absorbed by the allowance for loan losses. Credit losses from acquired loans are absorbed by the allowance for loan losses, nonaccretable difference fair value marks and cash reserves. As described below, the allowance for loan losses is intended to absorb only those losses estimated to have been incurred after acquisition; whereas the fair value mark and cash reserves absorb losses estimated to have been embedded in the acquired loans at acquisition. The schedule that follows includes both loans held for sale and loans held for investment.

(1) Commercial & industrial loans, including owner occupied commercial real estate loans.

(2) Does not include loans receivable, mortgage warehouse, at fair value.

Originated Loans

Originated loans (excluding loans held for sale and loans receivable, mortgage warehouse, at fair value) totaled \$6.5 billion, or 90.7% of loans receivable, at December 31, 2018, compared to \$6.4 billion, or 95.1% of loans receivable, at December 31,

Table of Contents

2017. The management team adopted new underwriting standards that management believes better limits risks of loss in 2009 and has worked to maintain these standards. Only \$21.7 million, or 0.34% of originated loans, were non-performing at December 31, 2018, compared to \$20.0 million, or 0.31% of originated loans, at December 31, 2017. The originated loans were supported by an allowance for loan losses of \$35.5 million (0.55% of originated loans) and \$33.3 million (0.52% of originated loans) at December 31, 2018 and 2017, respectively.

Loans Acquired

At December 31, 2018, total acquired loans were \$662.8 million, or 9.3% of loans receivable, compared to \$328.8 million, or 4.9% of loans receivable, at December 31, 2017. Non-performing acquired loans totaled \$5.8 million and \$6.4 million at December 31, 2018 and 2017, respectively. When loans are acquired, they are recorded on the balance sheet at fair value. Acquired loans include purchased portfolios, FDIC failed-bank acquisitions and unassisted acquisitions. Of the manufactured housing loans purchased prior to 2012, \$46.6 million were supported by a \$0.5 million cash reserve at December 31, 2018, compared to \$51.9 million supported by a cash reserve of \$0.6 million at December 31, 2017. The cash reserve was created as part of the purchase transaction to absorb losses and is maintained in a demand deposit account at the Bank. All current losses and delinquent interest are absorbed by this reserve and any recoveries of those losses, as well as the proceeds from the sale of the repossessed properties securing the loans, are placed back into the reserve. For the manufactured housing loans purchased in 2012, the seller has an obligation to pay the Bank the full payoff amount of the defaulted loan, including any principal, unpaid interest or advances on the loans, once the borrower vacates the property. At December 31, 2018, \$26.5 million of these loans were outstanding, compared to \$31.4 million at December 31, 2017.

The price paid for acquired loans considered management's judgment as to the credit and interest rate risk inherent in the portfolio at the time of purchase. Every quarter, management reassesses the risk and adjusts the cash flow forecast to incorporate changes in the credit outlook. Generally, a decrease in forecasted cash flows for a purchased loan will result in a provision for loan losses, and absent charge-offs, an increase in the allowance for loan losses. Acquired loans have a significantly higher percentage of NPLs than originated loans. Management acquired these loans with the expectation that NPL levels would be elevated, and therefore incorporated that expectation into the price paid.

Customers has assigned these loans to its SAG, a team that focuses on workouts for these acquired NPAs. Total acquired loans were supported by reserves (allowance for loan losses and cash reserves) of \$5.0 million (0.75% of total acquired loans) and \$5.4 million (1.64% of total acquired loans) at December 31, 2018 and 2017, respectively. Customers manages its credit risk through the diversification of the loan portfolio and the application of policies and procedures designed to foster sound credit standards and monitoring practices. While various degrees of credit risk are associated with substantially all investing activities, the lending function carries the greatest degree of potential loss. At December 31, 2018 and 2017, NPLs to total loans was 0.32% and 0.30%, respectively. Total reserves to NPLs was 147.2% and 146.4% at December 31, 2018 and 2017, respectively.

The tables below set forth non-accrual loans, NPAs and asset quality ratios:

	December 31,

Total non-performing loans	\$27,494	\$26,415	\$17,792	\$10,771	\$11,733

(1) Includes owner occupied commercial real estate loans.

Customers seeks to manage credit risk through the diversification of the loan portfolio and the application of credit underwriting policies and procedures designed to foster sound credit standards and monitoring practices. While various degrees of credit risk are associated with substantially all investing activities, the lending function carries the greatest degree of potential loss.

Asset quality assurance activities include careful monitoring of borrower payment status and the periodic review of borrower current financial information to ensure ongoing financial strength and borrower cash flow viability.

Customers has established credit policies and procedures, seeks the consistent application of those policies and procedures across the organization and adjusts policies as appropriate for changes in market conditions and applicable regulations.

Problem Loan Identification and Management

To facilitate the monitoring of credit quality within the commercial and industrial, multi-family, commercial real estate and construction portfolios and for purposes of analyzing historical loss rates used in the determination of the allowance for loan losses for the respective portfolio segment, Customers utilizes the following categories of risk ratings: pass (there are six risk ratings for pass loans), special mention, substandard, doubtful or loss. The risk-rating categories, which are derived from standard regulatory rating definitions, are assigned upon initial approval of credit to borrowers and updated regularly thereafter. Pass ratings, which are assigned to those borrowers who do not have identified potential or well-defined weaknesses and for whom there is a high likelihood of orderly repayment, are updated periodically based on the size and credit characteristics of the borrower. All other categories are updated on a quarterly basis, generally during the month preceding the end of the calendar quarter. While assigning risk ratings involves judgment, the risk-rating process allows management to identify riskier credits in a timely manner and allocate the appropriate resources to manage the loans.

Customers assigns a special mention rating to loans that have potential weaknesses that deserve management's close attention. If not addressed, these potential weaknesses may, at some future date, result in the deterioration of the repayment prospects for the loan and Customers' financial position. At December 31, 2018 and 2017, special mention loans were \$126.2 million and \$99.3 million, respectively.

Table of Contents

Risk ratings are not established for residential real estate, home equity loans, installment loans and other consumer loans mainly because these portfolios consist of a larger number of homogeneous loans with smaller balances. Instead, these portfolios are evaluated for risk mainly based on aggregate payment history through the monitoring of delinquency levels and trends.

A regular reporting and review process is in place to provide for proper portfolio oversight and control and to monitor those loans identified as problem credits by management. This process is designed to assess Customers' progress in working toward a solution and to assist in determining an appropriate allowance for loan losses. All loan work-out situations involve the active participation of management and are reported regularly to the Board of Directors. When a loan becomes delinquent for 90 days or more, or earlier if considered appropriate, the loan is assigned to Customers' Special Asset Group for workout or other resolution.

Loan charge-offs are determined on a case-by-case basis. Loans are generally charged off when principal is likely to be unrecoverable and after appropriate collection steps have been taken. Loan charge-offs are proposed by the SAG and approved by the Board of Directors.

Loan policies and procedures are reviewed internally for possible revisions and changes on a regular basis. In addition, these policies and procedures, together with the loan portfolio, are reviewed on a periodic basis by various regulatory agencies and by our internal, external and loan review auditors, as part of their examination and audit procedures.

Troubled Debt Restructurings

At December 31, 2018, 2017 and 2016, there were \$19.2 million, \$20.4 million and \$16.4 million, respectively, in loans categorized as a TDR. TDRs are reported as impaired loans in the period of their restructuring and are evaluated to determine whether they should be placed on non-accrual status. In subsequent years, a TDR may be returned to accrual status if the borrower satisfies a minimum six-month performance requirement; however, it will remain classified as impaired. Generally, Customers requires sustained performance for nine months before returning a TDR to accrual status.

Modification of PCI loans that are accounted for within loan pools in accordance with the accounting standards for PCI loans does not result in the removal of these loans from the pool even if the modification would otherwise be considered a TDR. Accordingly, as each pool is accounted for as a single asset with a single composite interest rate and an expectation of cash flows, modifications of loans within such pools are not reported as TDRs.

TDR modifications primarily involve interest-rate concessions, extensions of term, deferrals of principal and other modifications. Other modifications typically reflect other nonstandard terms which Customers would not offer in non-troubled situations. During the years ended December 31, 2018, 2017 and 2016, loans aggregating \$1.7 million, \$8.1 million and \$6.6 million, respectively, were modified in TDRs. TDR modifications of loans within the commercial and industrial category were primarily interest-rate concessions, deferrals of principal and other modifications; modifications of commercial real estate loans were primarily deferrals of principal, extensions of term and other modifications; modifications of residential real estate loans were primarily interest-rate concessions and deferrals of principal; and modifications of manufactured housing loans were primarily interest rate concessions, extensions of term and deferrals of principal. As of December 31, 2018 and 2017, except for one commercial and industrial loan with an outstanding commitment of \$1.5 million and \$2.1 million, respectively, there were no other commitments to lend additional funds to debtors whose loans have been modified in TDRs. There were no commitments to lend additional funds to debtors whose terms were modified in TDRs at December 31, 2016.

As of December 31, 2018, four manufactured housing loans totaling \$0.1 million that were modified in TDRs within the past twelve months defaulted on payments. As of December 31, 2017, five manufactured housing loans totaling \$0.2 million that were modified in TDRs within the past twelve months defaulted on payments. As of December 31, 2016, eight manufactured housing loans totaling \$0.2 million, one commercial real estate non-owner occupied loan of \$1.8 million and one residential real estate loan of \$0.1 million, that were modified in TDRs within the related past twelve months defaulted on payments.

Loans modified in TDRs are evaluated for impairment. The nature and extent of impairment of TDRs, including those that have experienced a subsequent default, is considered in the determination of an appropriate level of allowance for credit losses. For the year ended December 31, 2018, there were no allowances recorded as a result of TDR

modifications. For the year ended December 31, 2017, there was one allowance resulting from TDR modifications totaling \$1 thousand for one manufactured housing loan. There were no allowances recorded as a result of TDR modifications during 2016.

Table of Contents**ACCRUED INTEREST RECEIVABLE**

Accrued interest receivable increased by \$5.9 million, or 22.0%, to \$33.0 million at December 31, 2018, from \$27.0 million at December 31, 2017. This increase was primarily associated with the increase in investment securities and an increase in the yield on interest-earning assets.

BANK PREMISES AND EQUIPMENT AND OTHER ASSETS

Bank premises and equipment, net of accumulated depreciation and amortization, totaled \$11.1 million and \$12.0 million at December 31, 2018 and 2017, respectively. The decrease in bank premises and equipment, net of accumulated depreciation and amortization, resulted from depreciation and amortization expenses totaling \$2.7 million recorded in 2018 offset in part by purchases of bank premises and equipment of \$1.8 million. For additional information, see NOTE 8 - BANK PREMISES AND EQUIPMENT to Customers' audited financial statements. Customers Bank's restricted stock holdings at December 31, 2018 and 2017, were \$89.7 million and \$105.9 million, respectively. These holdings consist of stock of the Federal Reserve Bank, the FHLB and Atlantic Community Bankers Bank and are required as part of our relationship with these banks.

Other assets at December 31, 2018 and 2017 totaled \$185.7 million and \$131.5 million, respectively, and consisted primarily of deferred taxes, assets leased under operating leases through Customers' Equipment Finance Group, prepaid expenses, and mark-to-market adjustments for interest-rate swaps. During 2018 and 2017, Customers Bank leased various types of equipment to its Equipment Finance Group customers. The net carrying value of the leased assets was \$54.5 million and \$21.7 million, which includes accumulated depreciation of \$4.8 million and \$0.5 million as of December 31, 2018 and 2017, respectively.

The cash surrender value of BOLI increased by \$6.8 million to \$264.6 million at December 31, 2018, from \$257.7 million at December 31, 2017. Presented within bank-owned life insurance on the consolidated balance sheet is the cash surrender value of the SERP balances of \$3.1 million and \$3.3 million at December 31, 2018 and 2017, respectively. For additional information, see NOTE 12 - EMPLOYEE BENEFIT PLANS to Customers' audited financial statements.

DEPOSITS

The Bank offers a variety of deposit accounts, including checking, savings, MMDA and time deposits. Deposits are primarily obtained from Customers' geographic service area and nationwide through branchless digital banking, deposit brokers, listing services and other relationships.

The components of deposits at December 31, 2018, 2017, and 2016, were as follows:

	December 31,			2018 vs.	2018 vs.	
	2018	2017	2016	2017	2017	
				Change	Percentage	Change
(amounts in thousands)						
Demand, non-interest bearing	\$ 1,122,171	\$ 1,052,115	\$ 966,058	\$ 70,056	6.7	%
Demand, interest bearing	803,948	523,848	339,398	280,100	53.5	%
Savings, including MMDA	3,481,936	3,318,486	3,166,557	163,450	4.9	%
Time, \$100,000 and over	792,370	1,284,855	2,106,905	(492,485)	(38.3)	%
Time, other	941,811	620,838	724,857	320,973	51.7	%
Total deposits	\$ 7,142,236	\$ 6,800,142	\$ 7,303,775	\$ 342,094	5.0	%

Total deposits were \$7.1 billion at December 31, 2018, an increase of \$0.3 billion, or 5.0%, from \$6.8 billion at December 31, 2017. Transaction deposits increased by \$0.5 billion, or 10.5%, to \$5.4 billion at December 31, 2018, from \$4.9 billion at December 31, 2017. This increase was primarily driven by Customers' initiative to improve its net interest margin by expanding its sources of lower-cost funding. These efforts led to increases in non-interest bearing demand deposits of \$70.1 million, interest bearing demand deposits of \$280.1 million and savings, including MMDA, of \$163.5 million. These increases were offset in part by decreases in time deposits of \$0.2 billion, or 9.0%, to \$1.7 billion at December 31, 2018, from \$1.9 billion at December 31, 2017.

At December 31, 2018, Customers had \$1.2 billion in state and municipal deposits to which it had pledged \$1.7 billion of available borrowing capacity through the FHLB to the depositors through a letter of credit arrangement.

Table of Contents

Time deposits greater than \$250,000 totaled \$0.5 billion, \$0.8 billion and \$1.2 billion at December 31, 2018, 2017, and 2016, respectively.

Average deposit balances by type and the associated average rate paid are summarized below:

	For the Years ended December 31,					
	2018		2017		2016	
	Average Balance	Average Rate Paid	Average Balance	Average Rate Paid	Average Balance	Average Rate Paid
(amounts in thousands)						
Demand, non-interest bearing	\$ 1,189,638	0.00 %	\$ 1,187,324	0.00 %	\$ 873,599	0.00 %
Demand, interest-bearing	630,335	1.49 %	386,819	0.82 %	190,279	0.56 %
Savings, including MMDA	3,553,773	1.77 %	3,379,844	1.02 %	3,124,262	0.62 %
Time deposits	2,066,896	1.87 %	2,392,095	1.25 %	2,633,425	1.06 %
Total	\$ 7,440,642		\$ 7,346,082		\$ 6,821,565	

At December 31, 2018, the scheduled maturities of time deposits greater than \$100,000 were as follows:

	December 31, 2018
(amounts in thousands)	
3 months or less	\$ 341,976
Over 3 through 6 months	133,157
Over 6 through 12 months	144,149
Over 12 months	173,087
Total	\$ 792,369

For additional information, see NOTE 9 - DEPOSITS to Customers' audited financial statements.

FHLB ADVANCES AND OTHER BORROWINGS

Borrowed funds from various sources are generally used to supplement deposit growth and meet other operating needs. Customers' borrowings generally include short-term and long-term advances from the FHLB, federal funds purchased, senior unsecured notes and subordinated debt. Subordinated debt is also considered as Tier 2 capital for certain regulatory calculations. Customers strategically views the short-term FHLB advances as funding, in part, the commercial loans to the mortgage banking businesses.

Short-term debt

Short-term debt at December 31, 2018, 2017, and 2016, was as follows:

	December 31,					
	2018		2017		2016	
	Amount	Rate	Amount	Rate	Amount	Rate
(amounts in thousands)						
FHLB advances	\$ 1,248,070	2.62 %	\$ 1,611,860	1.47 %	\$ 688,800	0.85 %
Federal funds purchased	187,000	2.60 %	155,000	1.50 %	83,000	0.74 %
Total short-term borrowings	\$ 1,435,070		\$ 1,766,860		\$ 771,800	

For additional information on Customers' short-term debt, see NOTE 10 – BORROWINGS to Customers' audited financial statements.

Table of Contents

Long-term debt

FHLB Advances

At December 31, 2018, Customers had no long-term FHLB advances.

Customers had a total maximum borrowing capacity with the FHLB of \$4.1 billion and with the FRB of \$102.5 million at December 31, 2018. Customers had a total maximum borrowing capacity with the FHLB of \$4.3 billion and with the FRB of \$142.5 million at December 31, 2017. Amounts can be borrowed as short-term or long-term. As of December 31, 2018 and 2017, advances under these arrangements were secured by certain assets, which included qualifying loans of Customers Bank of \$5.2 billion and \$5.5 billion, respectively.

Senior notes

On July 31, 2018, the 6.375% senior notes with an aggregate principal amount of \$63.3 million issued by Customers Bancorp in July and August 2013 matured and were paid in full.

In June 2017, Customers Bancorp issued \$100 million of senior notes at 99.775% of face value. The price to purchasers represents a yield-to-maturity of 4.0% on the fixed coupon rate of 3.95%. The senior notes mature in June 2022. The net proceeds to Customers after deducting the underwriting discount and estimated offering expenses were approximately \$98.6 million. The net proceeds were contributed to Customers Bank for purposes of its working capital needs and the funding of its organic growth.

On June 26, 2014, Customers Bancorp closed a private-placement transaction in which it issued \$25.0 million of 4.625% senior notes due June 2019. Interest is paid semi-annually in arrears in June and December.

Subordinated debt

On June 26, 2014, Customers Bank closed a private-placement transaction in which it issued \$110.0 million of fixed-to-floating rate subordinated notes due 2029. The subordinated notes bear interest at an annual fixed rate of 6.125% until June 26, 2024, and interest is paid semiannually. From June 26, 2024, the subordinated notes will bear an annual interest rate equal to three-month LIBOR plus 344.3 basis points until maturity on June 26, 2029.

Customers Bank has the ability to call the subordinated notes, in whole or in part, at a redemption price equal to 100% of the principal balance at certain times on or after June 26, 2024. The subordinated notes qualify as Tier 2 capital for regulatory capital purposes.

SHAREHOLDERS' EQUITY

Shareholders' equity increased by \$35.9 million, or 3.9%, to \$956.8 million at December 31, 2018, from \$921.0 million at December 31, 2017. The primary components of the net increase were as follows:

- net income of \$71.7 million for the year ended December 31, 2018;
- share-based compensation expense of \$8.6 million for the year ended December 31, 2018; and
- issuance of common stock under share-based compensation arrangements of \$3.8 million for the year ended December 31, 2018.

These increases were offset in part by:

- other comprehensive loss of \$21.0 million for the year ended December 31, 2018, arising primarily from unrealized losses on available-for-sale debt securities;
- preferred stock dividends of \$14.5 million for the year ended December 31, 2018; and
- repurchases of shares of Customers' common stock totaling \$13.0 million.

Shareholders' equity increased by \$65.1 million, or 7.6%, to \$921.0 million at December 31, 2017, from \$855.9 million at December 31, 2016. The primary components of the net increase were as follows:

- net income of \$78.8 million for the year ended December 31, 2017;
- OCI of \$4.5 million for the year ended December 31, 2017, arising primarily from unrealized gains on available-for-sale securities and cash flow hedges; and
- share-based compensation expense of \$6.1 million for the year ended December 31, 2017;

Table of Contents

These increases were offset in part by:

• preferred stock dividends of \$14.5 million for the year ended December 31, 2017; and
 • issuance of common stock under share-based compensation arrangements of \$11.0 million for the year ended December 31, 2017.

Shareholders' equity increased by \$302.0 million to \$855.9 million at December 31, 2016, from \$553.9 million at December 31, 2015. The primary components of the net increase were as follows:

• net income of \$78.7 million for the year ended December 31, 2016;

• OCI of \$3.1 million for the year ended December 31, 2016, arising primarily from unrealized gains on available-for-sale securities;

• share-based compensation expense of \$6.2 million for the year ended December 31, 2016;

• issuance of 6,700,000 shares of preferred stock, resulting in an increase to shareholders' equity of \$161.9 million; and

• issuance of 2,641,677 shares of common stock, resulting in an increase to shareholders' equity of \$64.0 million.

These increases were offset in part by:

• preferred stock dividends of \$9.5 million for the year ended December 31, 2016; and

• issuance of common stock under share-based compensation arrangements of \$4.0 million for the year ended December 31, 2016.

For more information regarding the issuance of preferred and common stock and dividends paid to preferred shareholders, see NOTE 11 - SHAREHOLDERS' EQUITY to Customers' audited financial statements.

LIQUIDITY

Liquidity for a financial institution is a measure of that institution's ability to meet depositors' needs for funds, to satisfy or fund loan commitments and for other operating purposes. Ensuring adequate liquidity is an objective of the asset/liability management process. Customers coordinates its management of liquidity with its interest-rate sensitivity and capital position and strives to maintain a strong liquidity position.

Customers' investment portfolio provides periodic cash flows through regular maturities and receipts of periodic payments and can be used as collateral to secure additional liquidity funding. Our principal sources of funds are proceeds from common and preferred stock issuances, deposits, debt issuances, principal and interest payments on loans and other funds from operations. Borrowing arrangements are maintained with the FHLB and the FRB to meet short-term liquidity needs. As of December 31, 2018, Customers' borrowing capacity with the FHLB was \$4.1 billion, of which \$1.2 billion was utilized in borrowings and commitments; and \$1.7 billion of available capacity was used to collateralize state and municipal deposits. As of December 31, 2017, Customers' borrowing capacity with the FHLB was \$4.3 billion, of which \$1.6 billion was utilized in borrowings and commitments; and \$1.8 billion of available capacity was used to collateralize state and municipal deposits. As of December 31, 2018 and 2017, Customers' borrowing capacity with the FRB was \$102.5 million and \$142.5 million, respectively.

The table below summarizes Customers' cash flows for the years indicated:

(amounts in thousands)	For the Years Ended		Change	Percentage Change
	2018	2017		
Net cash provided by operating activities	\$97,474	\$62,193	\$35,281	56.7 %
Net cash used by investing activities	(104,098)	(565,125)	461,027	(81.6)%
Net cash (used in) provided by financing activities	(77,564)	384,546	(462,110)	(120.2)%
Net increase (decrease) in cash and cash equivalents	\$(84,188)	\$(118,386)	\$34,198	(28.9)%

Cash flows provided by operating activities

Cash provided by operating activities for the years ended December 31, 2018 and 2017 of \$97.5 million and \$62.2 million, respectively, primarily resulted from net income of \$71.7 million for the year ended December 31, 2018 and net income of \$78.8 million for the year ended December 31, 2017.

Table of Contents

Cash flows used in investing activities

Cash used in investing activities of \$104.1 million for the year ended December 31, 2018 primarily resulted from purchases of investment securities available for sale of \$0.8 billion and purchases of loans of \$0.4 billion. These uses of cash were offset in part by cash provided by investing activities of \$0.5 billion from the proceeds from sales of investment securities available for sale, net proceeds from repayments of mortgage warehouse loans of \$0.4 billion, and proceeds from the sales of loans of \$0.1 billion.

Cash used in investing activities of \$565.1 million for the year ended December 31, 2017 primarily resulted from purchases of investment securities available for sale of \$0.8 billion, a net increase in loans of \$1.0 billion, and purchases of loans of \$0.3 billion. These uses of cash were offset in part by cash provided by investing activities of \$0.8 billion from the proceeds from sales of investment securities available for sale, proceeds from repayments of mortgage warehouse loans of \$0.3 billion, and proceeds from the sales of loans of \$0.5 billion.

Cash flows (used in) provided by financing activities

Cash used in financing activities of \$77.6 million for the year ended December 31, 2018 primarily resulted from a decrease in short-term borrowed funds from the FHLB of \$363.8 million, repayments of long-term debt of \$63.3 million, payments of preferred stock dividends of \$14.5 million and repurchases of common stock of \$13.0 million, offset in part by a \$342.1 million increase in deposits and a \$32.0 million increase in federal funds purchased.

Cash provided by financing activities of \$384.5 million for the year ended December 31, 2017 primarily resulted from an increase in short-term borrowed funds from the FHLB of \$743.1 million, an increase in federal funds purchased of \$72.0 million, offset in part by a \$503.6 million decrease in deposits, payments of preferred stock dividends of \$14.5 million, and payment of employee taxes withheld from share-based awards of \$14.8 million.

Overall, based on our core deposit base and available sources of borrowed funds, management believes that Customers has adequate resources to meet its short-term and long-term cash requirements for the foreseeable future.

CAPITAL ADEQUACY

The Bank and Customers Bancorp are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet the minimum capital requirements can result in certain mandatory, and possibly additional discretionary, actions by regulators that, if undertaken, could have a direct material effect on Customers' financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Bank and Bancorp must meet specific capital guidelines that involve quantitative measures of their assets, liabilities and certain off-balance sheet items, as calculated under the regulatory accounting practices. The capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors. Prompt corrective action provisions are not applicable to bank holding companies.

Quantitative measures established by regulation to ensure capital adequacy require the Bank and the Bancorp to maintain minimum amounts and ratios (set forth in the following table) of common equity Tier 1, Tier 1, and total capital to risk-weighted assets, and Tier 1 capital to average assets (as defined in the regulations). At December 31, 2018 and 2017, the Bank and the Bancorp met all capital adequacy requirements to which they were subject to.

Table of Contents

Generally, to comply with the regulatory definition of adequately capitalized, or well capitalized, respectively, or to comply with the Basel III capital requirements, an institution must at least maintain the common equity Tier 1, Tier 1 and total risk based capital ratios and the Tier 1 leverage ratio in excess of the related minimum ratios set forth in the following table.

(amounts in thousands)	Actual		Minimum Capital Levels to be Classified as:					
	Amount	Ratio	Adequately Capitalized		Well Capitalized		Basel III Compliant	
	Amount	Ratio	Amount	Ratio	Amount	Ratio	Amount	Ratio
December 31, 2018								
Common equity Tier 1 (to risk-weighted assets)

The capital ratios above reflect the capital requirements under "Basel III" adopted effective during first quarter 2015 and the capital conservation buffer phased in beginning January 1, 2016. Failure to maintain the required capital conservation buffer will result in limitations on capital distributions and on discretionary bonuses to executive officers. As of December 31, 2018, the Bank and Customers Bancorp were in compliance with the Basel III requirements. See NOTE 17 - REGULATORY MATTERS to Customers' audited financial statements for additional discussion regarding regulatory capital requirements.

Capital Ratios

Customers continued to build its capital during 2018. In general, for the past few years, capital growth has been achieved by retained earnings, increases in capital from sales of common stock and issuance of preferred stock and

subordinated debt. During 2018 and 2017, Customers Bancorp did not issue any preferred stock or common stock in public offerings. For more information relating to preferred and common stock, see NOTE 11 - SHAREHOLDERS' EQUITY to Customers' audited financial statements.

Table of Contents

Customers is unaware of any current recommendations by the regulatory authorities which, if they were to be implemented, would have a material effect on its liquidity, capital resources, or operations.

The maintenance of appropriate levels of capital is an important objective of Customers' asset and liability management process. Through its initial capitalization and subsequent offerings, Customers believes it has continued to maintain a strong capital position. Since first quarter 2015, Customers Bank's board of directors has declared a quarterly cash dividend to the Bank's sole shareholder, Customers Bancorp. Cash dividends declared by the Bank and paid to Customers Bancorp during 2018 and 2017, include the following:

\$7.8 million declared on January 25, 2017, and paid on March 13, 2017;
 \$7.8 million declared on April 26, 2017, and paid on June 12, 2017;

 \$14.5 million declared on January 30, 2019, and payable on March 10, 2019.

OFF-BALANCE SHEET ARRANGEMENTS

Customers is involved with financial instruments and other commitments with off-balance sheet risks. Financial instruments with off-balance sheet risks are incurred in the normal course of business to meet the financing needs of the Bank's customers. These financial instruments include commitments to extend credit, including unused portions of lines of credit and standby letters of credit. Those instruments involve, to varying degrees, elements of credit risk in excess of the amount recognized on the balance sheets.

With commitments to extend credit, exposures to credit loss in the event of non-performance by the other party to the financial instrument is represented by the contractual amount of those instruments. The same credit policies are used in making commitments and conditional obligations as are used for on-balance-sheet instruments. Because they involve credit risk similar to extending a loan, these financial instruments are subject to the Bank's credit policy and other underwriting standards.

As of December 31, 2018 and 2017, the following off-balance sheet commitments, financial instruments and other arrangements were outstanding:

	December 31,	
	2018	2017
(amounts in thousands)		
Commitments to fund loans	\$345,608	\$333,874
Unfunded commitments to fund mortgage warehouse loans	1,537,900	1,567,139
Unfunded commitments under lines of credit and credit cards	867,131	485,345
Letters of credit	55,659	39,890
Other unused commitments	4,822	6,679

Commitments to fund loans, unfunded commitments to fund mortgage warehouse loans, unfunded commitments under lines of credit and letters of credit and credit cards are agreements to extend credit to or for the benefit of a customer in the ordinary course of the Bank's business.

Commitments to fund loans and unfunded commitments under lines of credit may be obligations of the Bank as long as there is no violation of any condition established in the contract. Because many of the commitments are expected to expire without having been drawn upon, the total commitment amounts do not necessarily represent future cash requirements. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. The Bank evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if the Bank deems it to be necessary upon extension of credit, is based on management's credit evaluation. Collateral held varies but may include personal or commercial real estate, accounts receivable, inventory and equipment.

Table of Contents

Mortgage warehouse loan commitments are agreements to fund the pipelines of mortgage banking businesses from closing of individual mortgage loans until their sale into the secondary market. Most of the individual mortgage loans are insured or guaranteed by the U.S. Government through one of its programs, such as FHA or VA, or they are conventional loans eligible for sale to Fannie Mae and Freddie Mac. These commitments generally fluctuate monthly based on changes in interest rates, refinance activity, new home sales and laws and regulation.

Outstanding letters of credit written are conditional commitments issued by the Bank to guarantee the performance of a customer to a third party. Letters of credit may obligate the Bank to fund draws under those letters of credit whether or not a customer continues to meet the conditions of the extension of credit. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers.

CONTRACTUAL OBLIGATIONS

The following table sets forth contractual obligations and other commitments representing required and potential cash outflows as of December 31, 2018. Interest on subordinated notes and senior notes was calculated using the current contractual interest rates.

Contractual cash obligations

	Within one year	After one but within three year	After three but within five years	More than five years	Total

Total contractual cash obligations	\$5,039,784	\$593,018	\$347,317	\$360,643	\$6,340,762

⁽¹⁾ Represents commitments funding in approximately one-to-three years that are subject to unscheduled requests for payment.

NEW ACCOUNTING PRONOUNCEMENTS

For information about the impact that recently adopted or issued accounting guidance will have on us, refer to NOTE 2 – SIGNIFICANT ACCOUNTING POLICIES AND BASIS OF PRESENTATION to Customers' audited financial statements.

Item 7A. Quantitative and Qualitative Disclosure About Market Risk**Interest Rate Sensitivity**

The largest component of Customers' net income is net interest income, and the majority of its financial instruments are interest rate sensitive assets and liabilities with various term structures and maturities. One of the primary

objectives of management is to optimize net interest income while minimizing interest rate risk. Interest rate risk is derived from timing differences in the

93

Table of Contents

repricing of assets and liabilities, loan prepayments, deposit withdrawals and differences in lending and funding rates. Customers' asset/liability committee actively seeks to monitor and control the mix of interest rate sensitive assets and interest rate sensitive liabilities.

Customers uses two complementary methods to analyze and measure interest rate sensitivity as part of the overall management of interest rate risk; they are income simulation modeling and estimates of EVE. The combination of these two methods provides a reasonably comprehensive summary of the levels of interest rate risk of Customers' exposure to time factors and changes in interest rate environments.

Income simulation modeling is used to measure interest rate sensitivity and manage interest rate risk. Income simulation considers not only the impact of changing market interest rates upon forecasted net interest income but also other factors such as yield curve relationships, the volume and mix of assets and liabilities, customer preferences and general market conditions.

Through the use of income simulation modeling, Customers has estimated the net interest income for the year ending December 31, 2019, based upon the assets, liabilities and off-balance sheet financial instruments in existence at December 31, 2018. Customers has also estimated changes to that estimated net interest income based upon interest rates rising or falling immediately ("rate shocks"). For upward rate shocks modeling a rising rate environment, current market interest rates were increased immediately by 100, 200 and 300 basis points. For downward rate shocks modeling a falling rate environment, current market rates were decreased immediately by 100 and 200 basis points due to the limitations of the current low interest rate environment that renders the Down 300 rate shock impractical. The downward rate shocks modeled will be revisited in the future if necessary and will be contingent upon additional Federal Reserve interest rate hikes. The following table reflects the estimated percentage change in estimated net interest income for the year ending December 31, 2019, resulting from changes in interest rates.

Net change in net interest income

Rate Shocks	% Change
Up 3%	(15.7)%
Up 2%	(9.8)%
Up 1%	(4.5)%
Down 1%	3.9 %
Down 2%	6.7 %

EVE estimates the discounted present value of asset and liability cash flows. Discount rates are based upon market prices for comparable assets and liabilities. Upward and downward rate shocks are used to measure volatility of EVE in relation to a constant rate environment. For upward rate shocks modeling a rising rate environment, current market interest rates were increased immediately by 100, 200 and 300 basis points. For downward rate shocks modeling a falling rate environment, current market rates were decreased immediately by 100 and 200 basis points due to the limitations of the current low interest rate environment that renders the Down 300 rate shocks impractical. The downward rate shocks modeled will be revisited in the future if necessary and will be contingent upon additional Federal Reserve interest rate hikes. This method of measurement primarily evaluates the longer-term repricing risks and options in Customers Bank's balance sheet.

The following table reflects the estimated EVE at risk and the ratio of EVE to EVE adjusted assets at December 31, 2018, resulting from the referenced shocks to interest rates.

Rate Shocks From base

Up 3%	(22.8)%
Up 2%	(13.3)%
Up 1%	(5.7)%
Down 1%	3.8 %
Down 2%	6.5 %

The matching of assets and liabilities may also be analyzed by examining the extent to which such assets and liabilities are interest rate sensitive and by monitoring a bank's interest rate sensitivity "gap." An asset or liability is considered interest rate sensitive within a specific time period if it will mature or reprice within that time period. The

interest rate sensitivity gap is defined as the difference between the amount of interest earning assets maturing or repricing within a specific time period and the amount of interest bearing liabilities maturing or repricing within that time period.

Table of Contents

The following table sets forth the amounts of interest-earning assets and interest-bearing liabilities outstanding at December 31, 2018, that are anticipated, based upon certain assumptions, to reprice or mature in each of the future time periods shown. Except as stated below, the amount of assets and liabilities shown that reprice or mature during a particular period were determined in accordance with the earlier of term to repricing or the contractual maturity of the asset or liability. The table sets forth an approximation of the projected repricing of assets and liabilities at December 31, 2018, on the basis of contractual maturities, anticipated prepayments and scheduled rate adjustments within a three-month period and subsequent selected time intervals. The loan amounts in the table reflect principal balances expected to be repaid and/or repriced as a result of contractual amortization and anticipated prepayments of adjustable and fixed-rate loans and as a result of contractual-rate adjustments on adjustable-rate loans.

Interest sensitivity gap	\$820,880	\$(344,010)	\$(352,055)	\$613,761	\$1,104,324	\$(1,842,900)	

Edgar Filing: Customers Bancorp, Inc. - Form 10-K

Cumulative interest sensitivity gap		\$476,870	\$124,815	\$738,576	\$1,842,900	\$—	
Cumulative interest sensitivity gap to total assets	8.4	% 4.9	% 1.3	% 7.6	% 18.8	% 0.0	%
Cumulative interest-earning assets to cumulative interest-bearing liabilities	136.4	% 118.6	% 107.2	% 124.9	% 144.5	% 123.2	%

(a) Includes loans held for sale

As shown above, Customers has a positive cumulative gap (cumulative interest-sensitive assets are higher than cumulative interest-sensitive liabilities) within the next year, which generally indicates that an increase in rates may lead to an increase in net interest income, and a decrease in rates may lead to a decrease in net interest income.

Interest rate sensitivity gap analysis measures whether assets or liabilities may reprice but does not capture the ability to reprice or the range of potential repricing on assets or liabilities. Thus, indications based on a negative or positive gap position need to be analyzed in conjunction with other interest rate risk management tools.

Management believes that the assumptions and combination of methods utilized in evaluating estimated net interest income are reasonable. However, the interest rate sensitivity of our assets, liabilities and off-balance sheet financial instruments, as well as the estimated effect of changes in interest rates on estimated net interest income, could vary substantially if different assumptions were to be used or actual experience were to differ from the assumptions used in the model.

Opinion on the Consolidated Financial Statements

We have audited the accompanying consolidated balance sheets of Customers Bancorp, Inc. (the “Company”) and subsidiaries as of December 31, 2018 and 2017, the related consolidated statements of income, comprehensive income, changes in shareholders’ equity, and cash flows for each of the three years in the period ended December 31, 2018, and the related notes (collectively referred to as the “consolidated financial statements”). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company and subsidiaries at December 31, 2018 and 2017, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2018, in conformity with accounting principles generally accepted in the United States of America.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (“PCAOB”), the Company’s internal control over financial reporting as of December 31, 2018, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (“COSO”) and our report dated March 1, 2019 expressed an unqualified opinion thereon.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on the Company’s consolidated financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

Opinion on Internal Control over Financial Reporting

We have audited Customers Bancorp, Inc.'s (the "Company's") internal control over financial reporting as of December 31, 2018, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (the "COSO criteria"). In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2018, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB"), the consolidated balance sheets of Customers Bancorp, Inc. (the "Company") and subsidiaries as of December 31, 2018 and 2017, the related consolidated statements of income, comprehensive income, changes in shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2018, and the related notes and our report dated March 1, 2019 expressed an unqualified opinion thereon.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying "Item 9A, Management's Report on Internal Control over Financial Reporting". Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB. We conducted our audit of internal control over financial reporting in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

CUSTOMERS BANCORP, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
NOTE 1 – DESCRIPTION OF THE BUSINESS

Customers Bancorp, Inc. (the “Bancorp” or “Customers Bancorp”) is a bank holding company engaged in banking activities through its wholly owned subsidiary, Customers Bank (the “Bank”), collectively referred to as “Customers” herein. The consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States (“U.S. GAAP”) and pursuant to the rules and regulations of the Securities and Exchange Commission (“SEC”).

Customers Bancorp, Inc. and its wholly owned subsidiaries, Customers Bank, and non-bank subsidiaries, serve residents and businesses in Southeastern Pennsylvania (Bucks, Berks, Chester, Philadelphia and Delaware Counties); Rye Brook, New York (Westchester County); Hamilton, New Jersey (Mercer County); Boston, Massachusetts; Providence, Rhode Island; Portsmouth, New Hampshire (Rockingham County); Manhattan and Melville, New York; Washington D.C.; Chicago, Illinois; and nationally for certain loan and deposit products. The Bank has 13 full-service branches and provides commercial banking products, primarily loans and deposits. In addition, Customers Bank also administratively supports loan and other financial products, including equipment finance leases, to customers through its limited-purpose offices in Boston, Massachusetts; Providence, Rhode Island; Portsmouth, New Hampshire; Manhattan and Melville, New York; Philadelphia, Pennsylvania; Washington D.C.; and Chicago, Illinois. The Bank also provides liquidity to residential mortgage originators nationwide through commercial loans to mortgage companies. Through BankMobile, a division of Customers Bank, Customers offers state of the art high tech digital banking services to consumers, students, and the "under banked" nationwide, along with "Banking as a Service" offerings with white label partners.

Customers Bank is subject to regulation of the Pennsylvania Department of Banking and Securities and the Federal Reserve Bank and is periodically examined by those regulatory authorities. Customers Bancorp has made certain equity investments through its wholly owned subsidiaries CB Green Ventures Pte Ltd. and CUBI India Ventures Pte Ltd.

NOTE 2 – SIGNIFICANT ACCOUNTING POLICIES AND BASIS OF PRESENTATION

Basis of Presentation

The accounting and reporting policies of Customers Bancorp, Inc. and subsidiaries are in conformity with U.S. GAAP and predominant practices of the banking industry. The preparation of financial statements requires management to make estimates and assumptions that affect the reported balances of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant change in the near-term relate to the determination of the allowance for loan losses, credit deterioration and expected cash flows of purchased-credit-impaired loans, valuation of deferred tax assets, OTTI losses on securities, fair values of financial instruments, fair value of share-based compensation awards and annual goodwill and intangible asset impairment analysis.

Principles of Consolidation

The accompanying consolidated financial statements include the accounts of the parent company and its wholly owned subsidiaries, including Customers Bank, CB Green Ventures Pte Ltd. and CUBI India Ventures Pte Ltd., as well as Customers Bank's wholly owned subsidiaries, BankMobile Technologies, Inc., Customers Commercial Finance, LLC and Devon Service PA LLC. All significant intercompany balances and transactions have been eliminated in consolidation.

Cash and Cash Equivalents and Statements of Cash Flows

Cash and cash equivalents include cash on hand, amounts due from banks and interest-bearing deposits with banks with a maturity date of three months or less and are recorded at cost. The carrying value of cash and cash equivalents is a reasonable estimate of its approximate fair value. Changes in the balances of cash and cash equivalents are reported on the consolidated statements of cash flows. Cash receipts from the repayment or sale of loans are classified within the statement of cash flows based on management's original intent upon origination of the loan, as prescribed by accounting guidance related to the statement of cash flows. Commercial mortgage warehouse loans are classified

as held for investment and presented at "Loans receivable, mortgage warehouse, at fair value" on the consolidated balance sheets and the cash flow activities associated with these commercial mortgage warehouse lending activities are reported as investing activities on the consolidated statements of cash flows.

Table of Contents

Restrictions on Cash and Amounts due from Banks

Customers Bank is required to maintain average balances at a certain level of cash and amounts on deposit with the Federal Reserve Bank. Customers Bank generally maintains balances in excess of the required levels at the Federal Reserve Bank. At December 31, 2018 and 2017, these required reserve balances were \$58.4 million and \$164.7 million, respectively.

Business Combinations

Business combinations are accounted for by applying the acquisition method in accordance with ASC 805, Business Combinations. Under the acquisition method, identifiable assets acquired and liabilities assumed are measured at their fair values as of the date of acquisition and are recognized separately from goodwill. The results of operations of the acquired entity are included in the consolidated statement of income from the date of acquisition. Customers recognizes goodwill when the acquisition price exceeds the estimated fair value of the net assets acquired.

Investment Securities

Customers acquires securities, largely mortgage-backed securities and corporate notes, to effectively utilize cash and capital and to generate earnings. Security transactions are recorded as of the trade date. Debt securities are classified at the time of acquisition as available for sale, HTM or trading, and their classification determines the accounting as follows:

Available for sale: Investment securities classified as available for sale are those debt securities that Customers intends to hold for an indefinite period of time but not necessarily to maturity. Investment securities available for sale are carried at fair value. Unrealized gains or losses are reported as increases or decreases in AOCI, net of the related deferred tax effect. Realized gains or losses, determined on the basis of the cost of the specific securities sold, are included in earnings and recorded on the trade date. Premiums and discounts are recognized in interest income using the interest method over the terms of the securities.

Held to maturity: Investment securities classified as HTM are those debt securities that Customers has both the intent and ability to hold to maturity regardless of changes in market conditions, liquidity needs, or changes in general economic conditions. These securities are carried at cost, adjusted for the amortization of premiums and accretion of discounts, computed by a method which approximates the interest method over the terms of the securities. There were no securities classified as HTM as of December 31, 2018 and 2017.

Equity securities: Equity securities are carried at their fair value, with changes in fair value reported in income beginning in 2018. Equity securities without readily determinable fair values are carried at cost, minus impairment, if any, plus or minus changes resulting from observable price changes in orderly transactions for identical or similar investments. For years ended December 31, 2017 and prior, equity securities were classified as available for sale and carried at fair value, with unrealized gains or losses reported as increases or decreases in AOCI, net of the related deferred tax effect.

For available-for-sale and held-to-maturity debt securities, management periodically assesses whether the securities are other than temporarily impaired. OTTI means that management believes a security's decline in fair value below its amortized cost basis is due to factors that could include the issuer's inability to pay interest or dividends, its potential for default and/or other factors. When a held-to-maturity or available-for-sale debt security is assessed for OTTI, management has to first consider (a) whether Customers intends to sell the security, and (b) whether it is more likely than not that Customers will be required to sell the security prior to recovery of its amortized cost basis.

If one of these circumstances applies to a security, an OTTI loss is recognized in the consolidated statements of income equal to the full amount of the decline in fair value below the amortized cost basis. If neither of these circumstances applies to a security, but Customers does not expect to recover the entire amortized cost basis, an OTTI has occurred that must be separated into two categories for debt securities: (a) the amount related to a credit loss and (b) the amount related to other factors. In determining the amount of OTTI attributable to credit loss, management compares the present value of cash flows expected to be collected to the amortized cost basis of the security. The portion of the total OTTI attributed to a credit loss is recognized in earnings (as the difference between the fair value and the present value of the estimated cash flows expected to be collected), while the amount related to all other factors is recognized in AOCI. The total OTTI loss is presented in the statement of income, less the portion recognized in AOCI. When a debt security becomes other-than-temporarily impaired, its amortized cost basis is reduced to reflect

the portion of the total impairment related to credit loss.

On January 1, 2018, Customers adopted the new accounting standard for financial instruments, which requires equity securities to be measured at fair value, except those accounted for under the equity method of accounting, with changes in fair value recognized in earnings in the period in which they occur and will no longer be deferred in AOCI. The adoption of this guidance resulted in an \$1.0 million increase to beginning retained earnings and a \$1.0 million decrease to beginning AOCI.

Table of Contents

Loan Accounting Framework

The accounting for a loan depends on management's strategy for the loan and on whether the loan was credit impaired at the date of acquisition. The Bank accounts for loans based on the following categories:

- Loans held for sale,
- Loans at fair value,
- Loans receivable and
- Purchased loans.

The discussion that follows describes the accounting for loans in these categories.

Loans Held for Sale and Loans at Fair Value

Loans originated or acquired by Customers with the intent to sell them in the secondary market are carried either at the lower of cost or fair value, determined in the aggregate, or at fair value, depending upon an election made at the time the loan is originated. These loans are generally sold on a non-recourse basis with servicing released. Gains and losses on the sale of loans accounted for at the lower of cost or fair value are recognized in earnings based on the difference between the proceeds received and the carrying amount of the loans, inclusive of deferred origination fees and costs, if any.

As a result of changes in events and circumstances or developments regarding management's view of the foreseeable future, loans not originated or acquired with the intent to sell may subsequently be designated as held for sale. These loans are transferred to the held-for-sale portfolio at the lower of amortized cost or fair value. When the recorded investment of the loan exceeds its fair value at the date of transfer to the held-for-sale portfolio, the excess will be recognized as a charge against the allowance for loan losses to the extent the loan's reduction in fair value has already been provided for in the allowance for loan losses. Any subsequent lower of cost or fair value adjustments are recognized as a valuation allowance with charges recognized in non-interest income.

Loans originated or acquired by Customers with the intent to sell them for which fair value accounting is elected are reported at fair value, with changes in fair value recognized in earnings in the period in which they occur. Upon sale, any difference between the proceeds received and the carrying amount of the loan is recognized in earnings. No fees or costs related to such loans are deferred, so they do not affect the gain or loss calculation at the time of sale.

An allowance for loan losses is not maintained on loans designated as held for sale or reported at fair value.

Loans Receivable - Mortgage Warehouse, at Fair Value

Certain mortgage warehouse lending transactions subject to master repurchase agreements are designated as loans receivable, mortgage warehouse and reported at fair value based on an election made to account for the loans at fair value. Pursuant to these agreements, Customers funds the pipelines for these mortgage lenders by sending payments directly to the closing agents for funded loans and receives proceeds directly from third party investors when the loans are sold into the secondary market. Commercial warehouse mortgage loans are classified as held for investment and presented as "Loans receivable, mortgage warehouse, at fair value" on the consolidated balance sheets.

An allowance for loan losses is not maintained on loans reported at fair value.

Loans Receivable

Loans receivable that management has the intent and ability to hold for the foreseeable future or until maturity or payoff are reported at their outstanding unpaid principal balances, net of an allowance for loan losses and any deferred fees. Interest income is accrued on the unpaid principal balance. Loan origination fees, net of certain direct origination costs, are deferred and recognized as an adjustment of the yield (interest income) of the related loans using the level-yield method without anticipating prepayments. Customers is generally amortizing these amounts over the contractual life of the loans.

The accrual of interest is generally discontinued when the contractual payment of principal or interest has become 90 days past due or when management has doubts about further collectibility of principal or interest, even though the loan is currently performing. A loan may remain on accrual status if it is in the process of collection and is well secured.

When a loan is placed on non-accrual status, unpaid accrued interest previously credited to income is reversed.

Interest received on non-accrual loans is generally applied against principal until all principal has been recovered.

Thereafter, payments are recognized as interest

Table of Contents

income until all unpaid amounts have been received. Generally, loans are restored to accrual status when the obligation is brought current and has performed in accordance with the contractual terms for a minimum of six months, and the ultimate collectibility of the total contractual principal and interest is no longer in doubt.

Purchased Loans

Customers believes that the varying circumstances under which it purchases loans and the diverse credit quality of loans purchased should drive the decision as to whether loans in a portfolio should be deemed to be PCI loans.

Therefore, loan purchases are evaluated on a case-by-case basis to determine the appropriate accounting treatment.

Loans acquired that do not have evidence of credit deterioration at the purchase date are accounted for in accordance with ASC 310-20, Nonrefundable Fees and Other Costs, and loans acquired with evidence of credit deterioration since origination and for which it is probable that all contractually required payments will not be collected are accounted for in accordance with ASC 310-30, Loans and Debt Securities Acquired with Deteriorated Credit Quality.

Loans that are purchased that do not have evidence of credit deterioration

Purchased performing loans are initially recorded at fair value and include credit and interest rate marks associated with acquisition accounting adjustments. Purchase premiums or discounts are subsequently amortized or accreted as an adjustment to yield over the estimated contractual lives of the loans. There is no allowance for loan losses established at the acquisition date for acquired performing loans. An allowance for loan losses is recorded for any credit deterioration in these loans subsequent to acquisition.

Loans that are purchased that have evidence of credit deterioration since origination and for which it is probable that all contractually required payments will not be collected

For these types of loan purchases, evidence of deteriorated credit quality may include past-due and non-accrual status, borrower credit scores and recent loan-to-value percentages.

The fair value of loans with evidence of credit deterioration is recorded net of a nonaccretable difference and accretable yield. The difference between contractually required payments at acquisition and the cash flows expected to be collected at acquisition is the nonaccretable difference that is not included in the carrying amount of acquired loans. Subsequent to acquisition, estimates of cash flows expected to be collected are updated each reporting period based on updated assumptions regarding default rates, loss severities and other factors that are reflective of current market conditions. Subsequent decreases in expected cash flows will generally result in a provision for loan losses.

Subsequent increases in expected cash flows will result in a reversal of the provision for loan losses to the extent of prior charges or a reclassification of the difference from nonaccretable to accretable with a positive impact on accretion of interest income in future periods. Further, any excess of cash flows expected at acquisition over the estimated fair value is referred to as the accretable yield and is recognized in interest income over the remaining life of the loan when there is a reasonable expectation about the amount and timing of those cash flows.

PCI loans acquired in the same fiscal quarter may be aggregated into one or more pools, provided that the loans have similar risk characteristics. A pool is then accounted for as a single asset with a single composite interest rate and an aggregate expectation of cash flows. On a quarterly basis, Customers re-estimates the total cash flows (both principal and interest) expected to be collected over the remaining life of each pool. These estimates incorporate assumptions regarding default rates, loss severities, the amounts and timing of prepayments and other factors that reflect the then-current market conditions. If the timing and/or amounts of expected cash flows on PCI loans are determined not to be reasonably estimable, no interest is accreted, and the loans are reported as non-accrual loans; however, when the timing and amounts of expected cash flows for PCI loans are reasonably estimable, interest is accreted, and the loans are reported as performing loans.

Allowance for Loan Losses

The allowance for loan losses is established as losses that are estimated to have occurred and are recognized through provisions for loan losses. Loans deemed to be uncollectible are charged against the allowance for loan losses, and subsequent recoveries, if any, are credited to the allowance for loan losses. The allowance for loan losses is maintained at a level considered appropriate to absorb probable incurred loan losses inherent in the loan portfolio as of the reporting date.

Customers segments its loan portfolio into groups of loans with similar risk characteristics for purposes of estimating the allowance for loan losses.

Customers' loan groups include multi-family, commercial and industrial, owner and non-owner occupied commercial real estate, construction, residential real estate, manufactured housing, other consumer and PCI loans. SBA loans are further

108

Table of Contents

segmented. Customers also further segments its residential real estate portfolio into two classes based upon certain risk characteristics: first-mortgage loans and home equity loans and lines of credit. The remaining loan groups are also considered classes for purposes of monitoring and assessing credit quality based on certain risk characteristics. Additionally, within each loan group the acquired loans that are accounted for under ASC 310-10 are further segmented.

The total allowance for loan losses consists of an allowance for impaired loans, a general allowance for losses and may also include residual non-specific reserve amounts. The allowance for loan losses is maintained at a level considered adequate to provide for losses that are estimated to have been incurred. Management performs a quarterly assessment of the adequacy of the allowance for loan losses, which is based on Customers' past loan loss experience, known and inherent risks in the portfolio, adverse situations that may affect the borrower's ability to repay, the estimated value of any underlying collateral, composition of the loan portfolio, current economic conditions, peer and industry data and other relevant factors. This evaluation is inherently subjective as it requires material estimates that may be susceptible to significant revision as more information becomes available. Customers' current methodology for determining the allowance for loan losses is based on historical loss rates, peer and industry data, current economic conditions, risk ratings, allowances on loans identified as impaired and other qualitative adjustments as considered appropriate.

The impaired-loan component of the allowance for loan losses generally relates to loans for which it is probable that Customers will be unable to collect all amounts due according to the contractual terms of the loan agreements. Customers analyzes certain loans in its portfolio for impairment in accordance with ASC 310-10-35. Customers' impaired loans generally include loans that have been (i) placed on non-accrual, (ii) restructured in a TDR, regardless of their payment status and (iii) charged-off to their net realizable value. For such loans, an allowance is established when the (i) discounted cash flows, (ii) collateral value or (iii) the impaired loan estimated fair value is lower than the carrying value of the loan.

The general component of the allowance for loan losses covers groups of loans by loan class, including commercial loans not considered impaired, as well as smaller balance homogeneous loans, such as residential real estate, home equity loans, home equity lines of credit and other consumer loans. These pools of loans are evaluated for loss exposure based upon industry, peer or Customers' historical loss rates for each of these groups of loans. After determining the appropriate historical loss rate for each group of loans, management considers current qualitative or environmental factors that are likely to cause estimated credit losses as of the evaluation date to differ from the historical loss experience. The overall effect of these factors is recorded as an adjustment that, as appropriate, increases or decreases the historical loss rate applied to the loan group. The qualitative factors that management generally considers include the following:

- National, regional and local economic and business conditions, including review of changes in the unemployment rate;
- Volume and severity of past-due loans, non-accrual loans and classified loans;
- Lending policies and procedures, including underwriting standards and historically based loss/collection, charge-off and recovery practices;
- Nature and volume of the portfolio;
- Existence and effect of any credit concentrations and changes in the level of such concentrations;
- Risk ratings;
- Changes in the values of collateral for collateral dependent loans;
- Changes in the quality of the loan review system;
- Experience, ability and depth of lending management and staff; and
- Other external factors, such as changes in the legal, regulatory or competitive environment.

A residual reserve may be maintained to cover uncertainties that could affect management's estimate of probable losses. The residual reserve amount reflects the margin of imprecision inherent in the underlying assumptions used in the methodologies for estimating credit losses in the loan portfolio.

The discussion that follows describes Customers' underwriting policies for its primary lending activities and its credit monitoring and charge-off practices.

Commercial and industrial loans are underwritten after evaluating historical and projected profitability and cash flow to determine the borrower's ability to repay its obligation as agreed. Commercial and industrial loans are made primarily based on the identified cash flow of the borrower and secondarily on the underlying collateral supporting the loan facility. Accordingly, the repayment of a commercial and industrial loan depends primarily on the creditworthiness of the borrower (and any guarantors), while liquidation of collateral is a secondary and often insufficient source of repayment.

Table of Contents

Construction loans are underwritten based upon a financial analysis of the developers and property owners and construction cost estimates, in addition to independent appraisal valuations. These loans rely on the value associated with the project upon completion. These cost and valuation amounts used are estimates and may be inaccurate. Construction loans generally involve the disbursement of substantial funds over a short period of time with repayment substantially dependent upon the success of the completed project. Sources of repayment of these loans would be permanent financing upon completion or sales of the developed property. These loans are closely monitored by on-site inspections and are considered to be of a higher risk than other real estate loans due to their ultimate repayment being sensitive to general economic conditions, availability of long-term financing, interest-rate sensitivity and governmental regulation of real property.

Commercial real estate and multi-family loans are subject to the underwriting standards and processes similar to commercial and industrial loans, in addition to those underwriting standards for real estate loans. These loans are viewed primarily as cash flow dependent and secondarily as loans secured by real estate. Repayment of these loans is generally dependent upon the successful operation of the property securing the loan, or the principal business conducted on the property securing the loan, to generate sufficient cash flows to service the debt. In addition, the underwriting considers the amount of the principal advanced relative to the property value. Commercial real estate and multi-family loans may be adversely affected by conditions in the real estate markets or the economy in general. Management monitors and evaluates commercial real estate and multi-family loans based on cash flow estimates, collateral valuation and risk-rating criteria. Customers also utilizes third-party experts to provide environmental and market valuations. Substantial effort is required to underwrite, monitor and evaluate commercial real estate and multi-family loans.

Residential real estate loans are secured by one-to-four dwelling units. This group is further divided into first mortgage and home equity loans. First mortgages are originated at a loan to value ratio of 80% or less. Home equity loans have additional risks as a result of typically being in a second position or lower in the event collateral is liquidated.

Manufactured housing loans are loans that are secured by the manufactured housing unit where the borrower may or may not own the underlying real estate and therefore have a higher risk than a residential real estate loan.

Other consumer loans consist of loans to individuals originated through Customers' retail network or through purchases and are typically secured by personal property or are unsecured. Consumer loans have a greater credit risk than residential loans because of the difference in the underlying collateral, if any. The application of various federal and state bankruptcy and insolvency laws may limit the amount that can be recovered on such loans.

Delinquency status and other borrower characteristics are used to monitor loans and identify credit risks, and the general reserves are established based on the expected net charge-offs, adjusted for qualitative factors.

Charge-offs on commercial and industrial, construction, multi-family and commercial real estate loans are recorded when management estimates that there are insufficient cash flows to repay the contractual loan obligation based upon financial information available and valuation of the underlying collateral. Shortfalls in the underlying collateral value for loans determined to be collateral dependent are charged-off immediately.

Customers also takes into account the strength of any guarantees and the ability of the borrower to provide value related to those guarantees in determining the ultimate charge-off or allowance associated with an impaired loan. Accordingly, Customers may charge-off a loan to a value below the net appraised value if it believes that an expeditious liquidation is desirable under the circumstance, and it has legitimate offers or other indications of interest to support a value that is less than the net appraised value. Alternatively, Customers may carry a loan at a value that is in excess of the appraised value in certain circumstances, such as when Customers has a guarantee from a borrower that Customers believes has realizable value. In evaluating the strength of any guarantee, Customers evaluates the financial wherewithal of the guarantor, the guarantor's reputation and the guarantor's willingness and desire to work with Customers. Customers then conducts a review of the strength of a guarantee on a frequency established as the circumstances and conditions of the borrower warrant.

Customers records charge-offs for residential real estate, consumer and manufactured housing loans after 120 days of delinquency or sooner when cash flows are determined to be insufficient for repayment. Customers may also charge-off these loans below the net appraised valuation if Customers holds a junior-mortgage position in a piece of

collateral whereby the risk to acquiring control of the property through the purchase of the senior-mortgage position is deemed to potentially increase the risk of loss upon liquidation due to the amount of time to ultimately market the property and the volatile market conditions. In such cases, Customers may abandon its junior mortgage and charge-off the loan balance in full.

Estimates of cash flows expected to be collected for PCI loans are updated each reporting period. If Customers estimates decreases in expected cash flows to be collected after acquisition, Customers charges the provision for loan losses and establishes an allowance for loan losses.

Table of Contents

Credit Quality Factors

Commercial and industrial, multi-family, commercial real estate and construction loans are each assigned a numerical rating of risk based on an internal risk-rating system. The risk rating is assigned at loan origination and indicates management's estimate of credit quality. Risk ratings are reviewed on a periodic or "as needed" basis. Residential real estate, manufactured housing and other consumer loans are evaluated primarily based on payment activity of the loan. Risk ratings are not established for residential real estate, home equity loans, manufactured housing loans and installment loans, mainly because these portfolios consist of a larger number of homogeneous loans with smaller balances. Instead, these portfolios are evaluated for risk mainly based on aggregate payment history (through the monitoring of delinquency levels and trends). For additional information about credit quality factor ratings refer to NOTE 7 – LOANS RECEIVABLE AND ALLOWANCE FOR LOAN LOSSES.

Impaired Loans

A loan is generally considered impaired when, based on current information and events, it is probable that Customers will be unable to collect all amounts due according to the contractual terms of the loan agreement. Customers' impaired loans generally include loans that have been (i) placed on non-accrual, (ii) restructured in a TDR, regardless of their payment status and (iii) charged-off to their net realizable value. Factors considered by management in determining impairment include payment status, collateral value and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record and the amount of the shortfall in relation to the principal and interest owed.

Impairment is generally measured on a loan-by-loan basis for commercial and construction loans by the present value of expected future cash flows discounted at the loan's original effective interest rate, the loan's obtainable market price or the fair value of the collateral if the loan is collateral dependent. The fair value of the collateral is measured based on the value of the collateral securing the loans, less estimated costs to liquidate the collateral. Collateral may be in the form of real estate or business assets including equipment, inventory and accounts receivable. The vast majority of Customers' collateral is real estate. The value of real estate collateral is determined utilizing an income or market valuation approach based on an appraisal conducted by an independent, third-party licensed appraiser using observable market data. The value of business equipment is based upon an outside appraisal if deemed significant or the net book value on the applicable business' financial statements if not considered significant, using observable market data. Similarly, values for inventory and accounts receivable collateral are based on financial statement balances or aging reports.

Goodwill and Other Intangible Assets

Goodwill represents the excess of the purchase price over the identifiable net assets of businesses acquired through business combinations accounted for under the acquisition method. Other intangible assets represent purchased assets that lack physical substance but can be distinguished from goodwill because of contractual or other legal rights.

Intangible assets that have finite lives, such as customer and university relationships and non-compete agreements, are amortized over their estimated useful lives and are subject to impairment testing.

Goodwill and other intangible assets are reviewed for impairment annually as of October 31 and between annual tests when events and circumstances indicate that impairment may have occurred. If there is a goodwill impairment charge, it will be the amount by which the reporting unit's carrying amount exceeds its fair value; however, the loss recognized should not exceed the total amount of goodwill allocated to that reporting unit. The same one-step impairment test is applied to goodwill at all reporting units. Customers applies a qualitative assessment for its reporting units to determine if the one-step quantitative impairment test is necessary.

Intangible assets subject to amortization are reviewed for impairment under ASC 360 which requires that a long-lived asset or asset group be tested for recoverability whenever events or changes in circumstances indicate that the carrying value may not be recoverable. The carrying value of a long-lived asset is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset.

As part of its qualitative assessment, Customers reviewed regional and national trends in current and expected economic conditions, examining indicators such as GDP growth, interest rates and unemployment rates. Customers also considered its own historical performance, expectations of future performance and other trends specific to the banking industry. Based on its qualitative assessment, Customers determined that there was no evidence of impairment on the balance of goodwill and other intangible assets. As of December 31, 2018 and 2017, goodwill and other intangible assets totaled \$16.5 million and \$16.3 million, respectively.

Table of Contents**FHLB, Federal Reserve Bank and other restricted stock**

FHLB, Federal Reserve Bank and other restricted stock represents required investment in the capital stock of the FHLB, the Federal Reserve Bank and Atlantic Community Bankers Bank and is carried at cost. Total restricted stock as of December 31, 2018 and 2017, was \$89.7 million and \$105.9 million, respectively, which included \$67.3 million and \$83.7 million, respectively, of FHLB stock.

Other Real Estate Owned

Real estate properties acquired through, or in lieu of, loan foreclosure are initially recorded at fair value less estimated costs to sell at the date of foreclosure, establishing a new cost basis. After foreclosure, valuations are periodically performed by third-party appraisers, and the real estate is carried at the lower of its carrying amount or fair value less estimated costs to sell. Any declines in the fair value of the real estate properties below the initial cost basis are recorded through a valuation allowance. Increases in the fair value of the real estate properties net of estimated selling costs will reverse the valuation allowance but only up to the costs basis which was established at the initial measurement date. Revenue and expenses from operations and changes in the valuation allowance are included in earnings.

Bank-Owned Life Insurance

Bank-owned life insurance policies insure the lives of officers of Customers and name Customers as beneficiary. Non-interest income is generated tax free (subject to certain limitations) from the increase in value of the policies' underlying investments made by the insurance company. Cash proceeds received from the settlement of the bank-owned life insurance policies are tax-free and can be used to partially offset costs associated with employee compensation and benefit programs.

Bank Premises and Equipment

Bank premises and equipment are recorded at cost less accumulated depreciation and amortization. Depreciation and amortization is computed on the straight-line method over the estimated useful lives of the related assets. Leasehold improvements are amortized over the shorter of the term of the lease or estimated useful life, unless extension of the lease term is reasonably assured.

Lessor Operating Leases

Leased assets under operating leases are carried at amortized cost net of accumulated depreciation and any impairment charges. The depreciation expense of the leased assets is recognized on a straight-line basis over the contractual term of the leases up to their expected residual value. The expected residual value and, accordingly, the monthly depreciation expense, may change throughout the term of the lease. Operating lease rental income for leased assets is recognized in other non-interest income on a straight-line basis over the lease term. Customers periodically reviews its leased assets for impairment. An impairment loss is recognized if the carrying amount of the leased asset exceeds its fair value and is not recoverable. The carrying amount of leased assets is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the lease payments and the estimated residual value upon the eventual disposition of the equipment. During 2018, Customers leased various types of equipment to customers within its commercial and industrial loan portfolio. The net carrying value of the leased assets was \$54.5 million and \$21.7 million, which included accumulated depreciation of \$4.8 million and \$0.5 million, as of December 31, 2018 and 2017, respectively, and is presented in other assets in Customers' consolidated balance sheets. As of December 31, 2018, the leases have a weighted-average term of 4.6 years.

The following table presents the future lease nonresidual rental payments due from customers for equipment on operating leases:

	December 31, 2018
(amounts in thousands)	
2019	\$ 8,347
2020	9,735
2021	8,810
2022	5,815
2023	3,663

Thereafter 2,518
Total minimum payments \$ 38,888

Treasury Stock

Common stock purchased for treasury is recorded at cost.

Income Taxes

Customers accounts for income taxes under the liability method of accounting for income taxes. The income tax accounting guidance results in two components of income tax expense: current and deferred. Current income tax expense reflects taxes to be paid or refunded for the current period by applying the provisions of the enacted tax law to the taxable income or excess of deductions over revenues. Customers determines deferred income taxes using the liability (or balance sheet) method. Under this method, the net deferred tax asset or liability is based on the tax effects of the differences between the book and tax bases of assets and liabilities, and enacted changes in tax rates and laws are recognized in the period in which they occur.

A tax position is recognized if it is more likely than not, based on the technical merits, that the tax position will be realized or sustained upon examination. The term more likely than not means a likelihood of more than 50 percent; the term upon examination includes resolution of the related appeals or litigation process. A tax position that meets the more-likely-than-not recognition threshold is initially and subsequently measured as the largest amount of tax benefit that has a greater than 50 percent likelihood of being realized upon settlement with a taxing authority that has full knowledge of all relevant information. The determination of whether or not a tax position has met the more-likely-than-not recognition threshold considers the facts, circumstances and information available at the reporting date and is subject to management's judgment.

In assessing the realizability of federal or state deferred tax assets, management considers whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during periods in which those temporary differences become deductible. Management considers the scheduled reversal of deferred tax liabilities, projected future taxable income and prudent, feasible and permissible as well as available tax planning strategies in making this assessment. Based on the level of historical taxable income and projections for future taxable income over the periods in which the deferred tax assets are deductible as well as available tax planning strategies, management believes it is more likely than not that Customers will realize the benefits of these deferred tax assets.

On December 22, 2017, the Tax Act was enacted into law. The Tax Act contained several key tax provisions including the reduction in the corporate federal tax rate from 35% to 21% effective January 1, 2018. As a result, Customers was required to re-measure, through income tax expense, its deferred tax assets and liabilities using the enacted rate at which it expected them to be recovered or settled. In December 2017, the SEC issued SAB 118, Income Tax Accounting Implications of the Tax Cuts and Jobs Act, which allowed companies to record provisional amounts during a measurement period not to extend beyond one year of the enactment date. See NOTE 14 - INCOME TAXES for additional information.

Share-Based Compensation

Customers has four active share-based compensation plans. Share-based-compensation accounting guidance requires that the compensation cost relating to share-based-payment transactions be recognized in earnings. The cost is measured based on the grant-date fair value of the equity instruments issued. The Black-Scholes model is used to estimate the fair value of stock options, while the closing market price of Customers' common stock on the date of grant is generally used for restricted stock awards.

Compensation cost for all share-based awards is calculated and recognized over the team member's service period, generally defined as the vesting period. For performance-based awards, compensation cost is recognized over the vesting period as long as it remains probable that the performance conditions will be met. If the service or performance conditions are not met, Customers reverses previously recorded compensation expense upon forfeiture. Customers' accounting policy election is to recognize forfeitures as they occur.

In 2014, the shareholders of Customers Bancorp approved an ESPP. Because the purchase price under the plan is 85% (a 15% discount to the market price) of the fair market value of a share of common stock on the first day of each quarterly subscription period, the plan is considered to be a compensatory plan under current accounting guidance. Therefore, the entire amount of the discount is recognizable compensation expense. See NOTE 13 - SHARE-BASED COMPENSATION for additional information.

Transfers of Financial Assets

Transfers of financial assets, including loan participations sold, are accounted for as sales when control over the assets has been surrendered (settlement date). Control over transferred assets is generally considered to have been surrendered when (i) the

113

Table of Contents

assets have been isolated from Customers, (ii) the transferee obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets, and (iii) Customers does not maintain effective control over the transferred assets through an agreement to repurchase them before their maturity. If the sale criteria are met, the transferred financial assets are removed from Customers' balance sheet, and a gain or loss on sale is recognized. If the sale criteria are not met, the transfer is recorded as a secured borrowing with the assets remaining on Customers' balance sheet, and the proceeds received from the transaction recognized as a liability.

Segment Information

In connection with the acquisition of the Disbursement business from Higher One and the combination of that business with the BankMobile technology platform late in second quarter 2016, Customers' chief operating decision makers began allocating resources and assessing performance for two distinct business segments, "Customers Bank Business Banking" and "BankMobile." The Customers Bank Business Banking segment is delivered predominately to commercial customers in Southeastern Pennsylvania, New York, New Jersey, Massachusetts, Rhode Island, New Hampshire, Washington D.C., and Illinois through a single point of contact business model and provides liquidity to residential mortgage originators nationwide through commercial loans to mortgage companies. The BankMobile segment provides state-of-the-art high-tech digital banking and disbursement services to consumers, students and the "under banked" nationwide, along with "Banking as a Service" offerings with existing and potential white label partners. BankMobile, as a division of Customers Bank, is a full service bank that is accessible to customers anywhere and anytime through the customer's smartphone or other web-enabled device. Prior to third quarter 2016, Customers operated in one business segment, "Community Banking." Additional information regarding reportable segments can be found in NOTE 22 - BUSINESS SEGMENTS.

Derivative Instruments and Hedging

ASC 815, Derivatives and Hedging, provides the disclosure requirements for derivatives and hedging activities with the intent to provide users of financial statements with an enhanced understanding of: (i) how and why an entity uses derivative instruments, (ii) how the entity accounts for derivative instruments and the related hedged items and (c) how derivative instruments and the related hedged items affect an entity's financial position, financial performance and cash flows. Further, qualitative disclosures are required that explain the objectives and strategies for using derivatives, as well as quantitative disclosures about the fair value and gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative instruments.

As required by ASC 815, Customers records all derivatives on the balance sheet at fair value. The accounting for changes in the fair value of derivatives depends on the intended use of the derivative, whether Customers has elected to designate a derivative in a hedging relationship and apply hedge accounting and whether the hedging relationship has satisfied the criteria necessary to apply hedge accounting. Derivatives designated and qualifying as hedges of the exposure to changes in the fair value of an asset, liability or firm commitment attributable to a particular risk, such as interest-rate risk, are considered fair value hedges. Derivatives designated and qualifying as hedges of the exposure to variability in expected future cash flows or other types of forecasted transactions, are considered cash flow hedges. Derivatives may also be designated as hedges of the foreign currency exposure of a net investment in a foreign operation. Hedge accounting generally provides for the matching of the timing of gain or loss recognition on the hedging instrument with the recognition of the changes in the fair value of the hedged asset or liability that are attributable to the hedged risk in a fair value hedge or the earnings effect of the hedged forecasted transactions in a cash flow hedge. Customers may enter into derivative contracts that are intended to economically hedge certain of its risks; even though hedge accounting does not apply, or Customers elects not to apply hedge accounting.

Prior to first quarter 2014, none of Customers' financial derivatives were designated in qualifying hedge relationships in accordance with the applicable accounting guidance. As such, all changes in fair value of the financial derivatives were recognized directly in earnings. Beginning in March 2014, Customers entered into pay-fixed interest-rate swaps to hedge the variable cash flows associated with the forecasted issuance of debt. Customers documented and designated these interest-rate swaps as cash flow hedges. The effective portion of changes in the fair value of financial derivatives designated and qualifying as cash flow hedges is recorded in AOCI and is subsequently reclassified into earnings in the period in which the hedged forecasted transaction affects earnings. The ineffective portion of the change in fair value of the financial derivatives is recognized directly to interest expense. Amounts reported in AOCI

related to financial derivatives will be reclassified to interest expense as interest payments are made on Customers' variable-rate debt. As of December 31, 2018, Customers had six financial derivatives designated in qualifying cash flow hedge relationships with a notional aggregate balance of \$750.0 million. As of December 31, 2017, Customers had nine financial derivatives designated in qualifying cash flow hedge relationships with a notional aggregate balance of \$550.0 million.

Table of Contents

Customers has also purchased and sold credit derivatives to either hedge or participate in the performance risk associated with some of its counterparties. These derivatives were not designated in hedge relationships for accounting purposes and are being recorded at their fair value, with fair value changes recorded directly in earnings. At December 31, 2018 and 2017, Customers had an outstanding notional balance of credit derivatives of \$94.9 million and \$80.5 million, respectively.

In accordance with the FASB's fair value measurement guidance, Customers made an accounting policy election to measure the credit risk of its derivative financial instruments that are subject to master netting agreements on a net basis by counterparty portfolio. See NOTE 19 - DERIVATIVE INSTRUMENTS for additional information.

Comprehensive Income (Loss)

Comprehensive income (loss) consists of net income (loss) and other comprehensive income (loss). Other comprehensive income (loss) includes changes in unrealized gains and losses on debt securities available for sale arising during the period and reclassification adjustments for realized gains and losses on debt securities available for sale included in net income. Other comprehensive income (loss) also includes the effective portion of changes in fair value of financial derivatives designated and qualifying as cash flow hedges. Cash flow hedge amounts classified as comprehensive income are subsequently reclassified into earnings in the period that the hedged forecasted transaction affects earnings.

Earnings per Share

Basic EPS represents net income available to common shareholders divided by the weighted-average number of common shares outstanding during the period. Diluted EPS includes all potentially dilutive common shares outstanding during the period. Potential common shares that may be issued related to outstanding stock options, restricted stock units and warrants are determined using the treasury stock method.

Loss Contingencies

Loss contingencies, including claims and legal, regulatory and governmental actions and proceedings arise in the ordinary course of business. In accordance with applicable accounting guidance, Customers establishes an accrued liability when those matters present loss contingencies that are both probable and estimable. In such cases, there may be an exposure to loss in excess of any amounts accrued. As a matter develops, Customers, in conjunction with any outside counsel handling the matter, evaluates on an ongoing basis whether such matter presents a loss contingency that is probable and estimable. Once the loss contingency is deemed to be both probable and estimable, Customers will establish an accrued liability and record a corresponding amount of litigation-related expense. Customers continues to monitor the matter for further developments that could affect the amount of the accrued liability that has been previously established. Management does not believe there are any such matters that will have a material effect on the consolidated financial statements that are not currently accrued for.

Collaborative Arrangements

In the normal course of business, Customers may enter into collaborative arrangements primarily to develop and commercialize banking products to their partners' customers. Collaborative arrangements are contractual agreements with third parties that involve a joint operating activity where both Customers and the collaborating partner are active participants in the activity and are exposed to the significant risks and rewards of the activity. Collaborative activities typically include research and development, technology, product development, marketing, and day-to-day operations of the banking product. These arrangements often require the sharing of revenues and expense. Net interest income, non-interest income, and non-interest expenses incurred pursuant to these arrangements are reported net of any payments due to or amounts due from Customers' collaboration partners. Reimbursement of non-interest expenses are allocated to other non-interest expense and are recognized at the time the collaborative party becomes obligated to pay. Each collaboration is unique in nature.

For the years ended December 31, 2018 and 2017, Customers recognized \$8.4 million and \$2.4 million, respectively, in expense reimbursements from collaborative arrangements. There were no such reimbursements during the year ended December 31, 2016. There was no revenue sharing with partners during the years ended December 31, 2018, 2017, and 2016.

Accounting Standards Adopted in 2018 (continued)

Standard	Summary of guidance	Effects on Financial Statements
<p>ASU 2017-12, Targeted Improvements to Accounting for Hedging Activities</p> <p>Issued August 2017</p>	<p>Aligns the entity's risk management activities and financial reporting for hedging relationships.</p> <p>Amends the existing hedge accounting model and expands an entity's ability to hedge nonfinancial and financial risk components and reduce complexity in fair value hedges of interest-rate risk.</p> <p>Eliminates the requirement to separately measure and report hedge ineffectiveness and generally requires the entire change in the fair value of a hedging instrument to be presented in the same income statement line item as the hedge item.</p> <p>Changes certain documentation and assessment requirements and modifies the accounting for components excluded from the assessment of hedge effectiveness.</p> <p>Effective for fiscal years beginning after December 15, 2018. Early adoption is permitted.</p> <p>In October 2018, the FASB issued ASU 2018-16 "Derivatives and Hedging (Topic 815): Inclusion of the SOFR OIS Rate as a Benchmark Interest Rate for Hedge Accounting Purposes," which permits the OIS rate based on SOFR as a U.S. benchmark interest rate for hedge accounting purposes.</p>	<p>Customers early adopted on January 1, 2018.</p> <p>With the early adoption, Customers is able to pursue additional hedging strategies including the ability to apply fair value hedge accounting to a specified pool of assets by excluding the portion of the hedged items related to prepayments, defaults and other events.</p> <p>These additional hedging strategies will allow Customers to better align the accounting and financial reporting of its hedging activities with the economic objectives thereby reducing the earnings volatility resulting from these hedging activities.</p> <p>The adoption did not have a significant impact on Customers' financial condition, results of operations and consolidated financial statements.</p>
<p>ASU 2017-09, Compensation - Stock Compensation: Scope of Modification Accounting</p> <p>Issued May 2017</p>	<p>Clarifies when to account for a change to the terms or conditions of a share-based-payment award as a modification in ASC 718.</p> <p>Provides that modification accounting is only required if the fair value, vesting conditions, or the classification of the award as equity or a liability changes as a result of the change in terms or conditions.</p> <p>Effective January 1, 2018 on a prospective basis for awards modified on or after the adoption date.</p>	<p>Customers adopted on January 1, 2018.</p> <p>The adoption did not have a significant impact on Customers' financial condition, results of operations and consolidated financial statements.</p>
<p>ASU 2017-05, Clarifying the Scope of Asset Derecognition Guidance and Accounting for Partial Sales of Nonfinancial Assets</p> <p>Issued February 2017</p>	<p>Clarifies the scope and application of the accounting guidance on the sale of nonfinancial assets to non-customers, including partial sales.</p> <p>Clarifies that if substantially all of the fair value of the assets that are promised to the counterparty in a contract is concentrated in nonfinancial assets, then all of the financial assets promised to the counterparty are in substance nonfinancial assets within the scope of Subtopic 610-20.</p> <p>Effective January 1, 2018 on a prospective basis.</p>	<p>Customers adopted on January 1, 2018.</p> <p>The adoption did not have a significant impact on Customers' financial condition, results of operations and consolidated financial statements.</p>

ASU 2017-01, Clarifying the Definition of a Business Issued January 2017	<p>Narrows the definition of a business and clarifies that to be considered a business, the fair value of gross assets acquired (or disposed of) should not be concentrated in a single identifiable asset or a group of similar identifiable assets.</p> <p>Also clarifies that in order to be considered a business, an acquisition would have to include an input and a substantive process that together will significantly contribute to the ability to create an output.</p> <p>Effective January 1, 2018 on a prospective basis.</p>	<p>Customers adopted on January 1, 2018.</p> <p>The adoption did not have a significant impact on Customers' financial condition, results of operations and consolidated financial statements.</p>
ASU 2016-18, Statement of Cash Flows: Restricted Cash Issued November 2016	<p>Requires inclusion of restricted cash in cash and cash equivalents when reconciling the beginning-of-period total amounts shown on the statement of cash flows.</p> <p>Effective January 1, 2018 and requires retrospective application to all periods presented.</p>	<p>Customers adopted on January 1, 2018.</p> <p>The adoption did not result in any significant impact on Customers' financial condition, results of operations and consolidated financial statements, including its consolidated statement of cash flows, and therefore did not result in a retrospective application.</p>

Standard	Summary of guidance	Effects on Financial Statements
<p>ASU 2016-16, Income Taxes (Topic 740): Intra-Entity Transfers of Assets Other Than Inventory</p> <p>Issued October 2016</p>	<p>Requires an entity to recognize the income tax consequences of an intra-entity transfer of an asset other than inventory when the transfer occurs.</p> <p>Eliminates the current exception for all intra-entity transfers of an asset other than inventory that requires deferral of the tax effects until the asset is sold to a third party or otherwise recovered through use.</p> <p>Effective January 1, 2018 on a modified retrospective basis.</p> <p>Aims to reduce the existing diversity in practice with regards to the classification of the following specific items in the statement of cash flows:</p> <ol style="list-style-type: none"> 1. Cash payments for debt prepayment or debt extinguishment costs should be classified as a financing activity. 2. Cash paid by an acquirer soon after a business combination for the settlement of a contingent consideration liability recognized at the acquisition date will be classified in investing activities. 3. Cash proceeds received from the settlement of insurance claims will be classified on the basis of the related insurance coverage (i.e., the nature of the loss). 4. Cash proceeds received from the settlement of bank-owned life insurance policies will be classified as cash inflows from investing activities. 5. A transferor's beneficial interest obtained in a securitization of financial assets will be disclosed as a non-cash activity, and cash received from beneficial interests will be classified in investing activities. <p>Effective January 1, 2018 and requires retrospective application to all periods presented.</p>	<p>Customers adopted on January 1, 2018.</p> <p>The adoption of the ASU did not have a significant impact on Customers' financial condition, results of operations and consolidated financial statements.</p>
<p>ASU 2016-15, Statement of Cash Flow: Classification of Certain Cash Receipts and Cash Payments</p> <p>Issued August 2016</p>	<p>Customers adopted on January 1, 2018.</p> <p>The adoption did not result in any significant impact on Customers' financial condition, results of operations and consolidated financial statements, including its consolidated statement of cash flows, and therefore it did not result in a retrospective application.</p>	
<p>ASU 2016-04, Liabilities - Extinguishment of Liabilities: Recognition of</p>	<p>Requires issuers of prepaid stored-value products (such as gift cards, telecommunication cards, and traveler's checks), to derecognize the financial liability related to those products for breakage.</p>	<p>Customers adopted on January 1, 2018.</p> <p>The adoption of this ASU did not have a significant impact on</p>

Breakage for Certain
Prepaid Stored-Value
Products

Breakage is the value of prepaid stored-value products that is not redeemed by consumers for goods, services or cash.

Customers' financial condition, results of operations and consolidated financial statements.

Issued March 2016

The amendments in this ASU provide a narrow scope exception to the guidance in Subtopic 405-20 to require that breakage be accounted for consistent with the breakage guidance in Topic 606.

Effective January 1, 2018 on a modified retrospective basis.

Standard	Summary of guidance	Effects on Financial Statements
<p>ASU 2016-01, Recognition and Measurement of Financial Assets and Financial Liabilities</p> <p>Issued January 2016</p>	<p>Requires equity investments with certain exceptions to be measured at fair value with changes in fair value recognized in net income.</p> <p>Simplifies the impairment assessment of equity investments without readily determinable fair values by requiring a qualitative assessment to identify impairment.</p> <p>Eliminates the requirement for public entities to disclose the methods and significant assumptions used to estimate the fair value that is required to be disclosed for financial instruments measured at amortized cost on the balance sheet.</p> <p>Requires public business entities to use the exit price notion when measuring the fair value of financial instruments for disclosure purposes.</p> <p>Requires an entity to present separately in OCI the portion of the change in fair value of a liability resulting from a change in the instrument-specific credit risk when the entity has elected to measure the liability at fair value in accordance with the fair value option for financial instruments.</p> <p>Requires separate presentation of financial assets and financial liabilities by measurement category and form of financial asset on the balance sheet or in the accompanying notes to the financial statements.</p> <p>Clarifies that an entity should evaluate the need for a valuation allowance on a deferred tax asset related to available-for-sale securities.</p> <p>Effective January 1, 2018 on a modified retrospective basis.</p>	<p>Customers adopted on January 1, 2018 using a modified retrospective approach.</p> <p>The adoption of this ASU resulted in a cumulative-effect adjustment that resulted in a \$1.0 million reduction in AOCI and a corresponding increase in retained earnings for the same amount.</p> <p>The \$1.0 million represented the net unrealized gain on Customers' investment in Religare equity securities at December 31, 2017, as disclosed in NOTE 5 - INVESTMENT SECURITIES.</p> <p>Customers also refined its calculation to determine the fair value of its held-for- investment loan portfolio for disclosure purposes using an exit price notion as part of adopting this ASU. The refined calculation did not have a significant impact on Customers' fair value disclosures.</p>
<p>ASU 2014-09, Revenue from Contracts with Customers (Topic 606)</p> <p>Issued May 2014</p>	<p>Supersedes the revenue recognition requirements in ASC 605.</p> <p>Requires an entity to recognize revenue for the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services.</p> <p>The amendment includes a five-step process to assist an entity in achieving the main principle(s) of revenue recognition under ASC 605.</p> <p>Reframed the structure of the indicators of when an entity is acting as an agent and focused</p>	<p>Customers adopted on January 1, 2018 on a modified retrospective basis.</p> <p>Because the ASU does not apply to revenue associated with leases and financial instruments (including loans and securities), Customers concluded that the new guidance did not have a material impact on the elements of its consolidated statements of operations most closely associated with leases and financial instruments (such as interest income,</p>

on evidence that an entity is acting as the principal or agent in a revenue transaction.

Requires additional qualitative and quantitative disclosures relating to the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers.

Effective January 1 , 2018 and can either be applied retrospectively to each prior reporting period presented or as a cumulative effect adjustment as of the date of adoption (modified retrospective approach).

interest expense and securities gains or losses).

Customers has identified its deposit-related fees, service charges, debit and prepaid card interchange income and university fees to be within the scope of the standard.

Customers has also completed its review of the related contracts and its evaluation of certain costs related to these revenue streams and determined that its debit and prepaid card interchange income, previously reported on a gross basis for periods prior to adoption, will need to be presented on a net basis under this ASU, as Customers is the agent.

The adoption of this ASU did not have a significant impact on Customers' financial condition, results of operations and consolidated financial statements. Additional discussion related to the adoption and the required quantitative and qualitative disclosures are included in NOTE 23 - NON-INTEREST REVENUES.

Table of Contents

Accounting Standards Adopted on January 1, 2019

Standard	Summary of guidance	Effects on Financial Statements
ASU 2018-07, Compensation - Stock Compensation (Topic 718): Improvements to Non-employee Share-Based Payment Accounting Issued June 2018	<p>Expands the scope of Topic 718, Compensation - Stock Compensation, which currently only includes share-based payments issued to employees, to also include share-based payments issued to non-employees for goods and services.</p> <p>Applies to all share-based payment transactions in which a grantor acquires goods or services from non-employees to be used or consumed in a grantor's own operations by issuing share-based payment awards.</p> <p>With the amended guidance from ASU 2018-07, non-employees share-based payments are measured with an estimate of the fair value of the equity the business is obligated to issue at the grant date (the date that the business and the stock award recipient agree to the terms of the award).</p> <p>Compensation would be recognized in the same period and in the same manner as if the entity had paid cash for goods or services instead of stock.</p> <p>Effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018, with early adoption permitted.</p>	<p>Customers adopted this ASU on January 1, 2019. The adoption of this ASU did not have a significant impact on Customers' financial condition, results of operations and consolidated financial statements.</p>
ASU 2017-11, Accounting for Certain Financial Instruments with Down Round Features Issued July 2017	<p>Changes the classification analysis of certain equity-linked financial instruments (or embedded features) with down round features.</p> <p>When determining whether certain financial instruments should be classified as liabilities or equity instruments, a down round feature no longer precludes equity classification when assessing whether the instrument is indexed to an entity's own stock. As a result, a freestanding equity-linked financial instrument (or embedded conversion option) would no longer be accounted for as a derivative liability at fair value as a result of the existence of a down round feature.</p> <p>For freestanding equity-classified financial instruments, the amendments require entities to recognize the effect of the down round feature when it is triggered. That effect is treated as a dividend and as a reduction of net income available to common shareholders in basic EPS.</p> <p>Effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018, with early adoption permitted.</p>	<p>Customers adopted this ASU on January 1, 2019. The adoption of this ASU did not have a significant impact on Customers' financial condition, results of operations and consolidated financial statements.</p>

ASU 2017-08, Receivables-Nonrefundable Fees and Other Costs: Premium Amortization on Purchased Callable Debt Securities Issued March 2017	Requires that premiums for certain callable debt securities held be amortized to their earliest call date. Effective for Customers beginning after December 15, 2018, with early adoption permitted. Adoption of this new guidance must be applied on a modified retrospective approach.	Customers adopted this ASU on January 1, 2019. The adoption of this ASU did not have a significant impact on Customers' financial condition, results of operations and consolidated financial statements.

Table of Contents

Accounting Standards Adopted on January 1, 2019 (continued)

Standard	Summary of guidance	Effects on Financial Statements
	<p>Supersedes the current lease accounting guidance for both lessees and lessors under ASC 840, Leases.</p> <p>From the lessee's perspective, the new standard establishes a ROU model that requires a lessee to record a ROU asset and a lease liability on the balance sheet for all leases with terms longer than 12 months.</p> <p>Leases will be classified as either finance or operating, with classification affecting the pattern of expense recognition in the income statement for lessees.</p>	<p>Customers adopted this ASU on January 1, 2019.</p> <p>Customers recognized a lease liability and a corresponding ROU asset of approximately \$25 million at January 1, 2019.</p>
	<p>This ASU will require lessors to account for leases using an approach that is substantially similar to the existing guidance for sales-type, direct financing leases and operating leases.</p> <p>Effective beginning after December 15, 2018 with early adoption permitted.</p> <p>In July 2018, the FASB issued ASU 2018-11 "Leases (Topic 842): Targeted Improvements," which provides lessees the option to apply the new leasing standard to all open leases as of the adoption date. Prior to this ASU issuance, a modified retrospective transition approach was required.</p> <p>In December 2018, the FASB issued ASU 2018-20 "Leases (Topic 842): Narrow-Scope Improvements for Lessors," which provides lessors a policy election to not evaluate whether certain sales taxes and other similar taxes are lessor costs or lessee costs. Additionally, the update requires certain lessors to exclude from variable payments lessor costs paid by lessees directly to third parties.</p>	<p>The increase in assets is expected to lower Customers' regulatory capital ratios by approximately four basis points.</p> <p>Customers does not expect material changes to the recognition of operating lease expense in its consolidated statements of income.</p> <p>Customers adopted certain practical expedients available under the new guidance, which will not require it to (1) reassess whether any expired or existing contracts contain leases, (2) reassess the lease classification for any expired or existing leases, (3) reassess initial direct costs for any existing leases, and (4) evaluate whether certain sales taxes and other similar taxes are lessor costs. Additionally, Customers elected to apply the new lease guidance at the adoption date, rather than at the beginning of the earliest period presented and will continue to present the comparative periods under Topic 840. Customers did not adopt the hindsight practical expedient.</p>
ASU 2016-02, Leases Issued February 2016

Standard	Summary of guidance	Effects on Financial Statements
<p>ASU 2018-18, Collaborative Arrangements (Topic 808): Clarifying the Interaction Between Topic 808 and Topic 606</p> <p>Issued November 2018</p>	<p>Clarifies that certain transactions between collaborative arrangement participants should be accounted for as revenue under Topic 606 when the collaborative arrangement participant is a customer in the context of a unit of account. In those situations, all the guidance in Topic 606 should be applied, including recognition, measurement, presentation, and disclosure requirements.</p> <p>Adds unit-of-account guidance in Topic 808 to align with the guidance in Topic 606 when an entity is assessing whether the collaborative arrangement or a part of the arrangement is within scope of Topic 606.</p> <p>Requires that in a transaction with a collaborative arrangement participant that is not directly related to sales to third parties, presenting the transaction together with revenue recognized under Topic 606 is precluded if the collaborative arrangement participant is not a customer.</p> <p>Effective for fiscal year beginning after December 15, 2019 and interim periods within those fiscal years. Early adoption permitted.</p>	<p>Customers is currently evaluating the expected impact of this ASU on its financial condition, results of operations and consolidated financial statements.</p>
<p>ASU 2018-15, Internal-Use Software (Subtopic 350-40): Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That Is a Service Contract</p> <p>Issued August 2018</p>	<p>Clarifies that service contracts with hosting arrangements must follow internal-use software guidance Subtopic 350-40 when determining which implementation costs to capitalize as an asset related to the service contract and which costs to expense.</p> <p>Also clarifies that capitalized implementation costs of a hosting arrangement that is a service contract are to be amortized over the term of the hosting arrangement, which includes the noncancelable period of the arrangement plus options to extend the arrangement if reasonably certain to exercise.</p> <p>Clarifies that existing impairment guidance in Subtopic 350-40 must be applied to the capitalized implementation costs as if they were long-lived assets.</p> <p>Applied either retrospectively or prospectively to all implementation costs incurred after the date of adoption.</p> <p>Effective for fiscal year beginning after December 15, 2019 and interim periods within those fiscal years. Early adoption permitted.</p>	<p>Customers is currently evaluating the expected impact of this ASU on its financial condition, results of operations and consolidated financial statements.</p>

Table of Contents

Standard	Summary of guidance	Effects on Financial Statements
<p>ASU 2016-13, Financial Instruments - Credit Losses: Measurement of Credit Losses on Financial Instruments Issued June 2016</p>	<p>Requires an entity to utilize a new impairment model known as the current expected credit loss model to estimate lifetime expected credit loss and record an allowance that, when deducted from the amortized cost basis of the financial asset (including HTM securities), presents the net amount expected to be collected on the financial asset.</p> <p>Replaces today's "incurred loss" approach and is expected to result in earlier recognition of credit losses.</p> <p>For available-for-sale debt securities, entities will be required to record allowances for credit losses rather than reduce the carrying amount, as they do today under the OTTI model, and will be allowed to reverse previously established allowances in the event the credit of the issuer improves.</p> <p>Simplifies the accounting model for PCI debt securities and loans.</p> <p>Effective beginning after December 15, 2019 with early adoption permitted.</p> <p>Adoption can be applied through a cumulative-effect adjustment to retained earnings as of the beginning of the first reporting period in which the guidance is adopted.</p>	<p>Customers has established a company-wide, cross-discipline governance structure, which provides implementation oversight and continues evaluating the impact of this ASU and reviewing the loss modeling requirements consistent with lifetime expected loss estimates.</p> <p>Customers has selected a third-party vendor to assist in the implementation process of its new model, which will include different assumptions used in calculating credit losses, such as estimating losses over the estimated life of a financial asset and will consider expected future changes in macroeconomic conditions.</p> <p>Customers continues to evaluate data requirements, methodologies, and forecasting options to utilize within the new model. Additionally, Customers is evaluating how to properly segment its loan portfolio.</p> <p>Customers has completed preliminary runs of the new model and continues to evaluate the results as it prepares to run two methodologies parallel in 2019.</p> <p>The adoption of this ASU may result in an increase to Customers' allowance for loan losses which will depend upon the nature and characteristics of Customers' loan portfolio at the adoption date, as well as the macroeconomic conditions and forecasts at that date.</p> <p>Customers does not intend to early adopt this new guidance.</p>

Table of Contents

NOTE 3 – EARNINGS PER SHARE

The following are the components and results of Customers' earnings per common share calculations for the periods presented.

	For the Years Ended December 31,		
	2018	2017	2016
(amounts in thousands, except share and per share data)			
Net income available to common shareholders	\$57,236	\$ 64,378	\$ 69,187
Weighted-average number of common shares outstanding – basic	31,570,118	30,659,320	27,596,020
Share-based compensation plans	658,739	1,917,451	2,221,517
Warrants	4,241	19,906	196,113
Weighted-average number of common shares – diluted	32,233,098	32,596,677	30,013,650
Basic earnings per common share	\$1.81	\$ 2.10	\$ 2.51
Diluted earnings per common share	1.78	1.97	2.31

The following is a summary of securities that could potentially dilute basic earnings per common share in future periods that were not included in the computation of diluted earnings per common share because either the performance conditions for certain of the share-based compensation awards have not been met or to do so would have been anti-dilutive for the periods presented.

	For the Years Ended December 31,		
	2018	2017	2016
Anti-dilutive securities:			
Share-based compensation plans	1,138,251	1,059,225	894,720
Warrants	—	—	52,242
Total anti-dilutive securities	1,138,251	1,059,225	946,962

Table of Contents

NOTE 4 - CHANGES IN ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS) BY COMPONENT

The following table presents the changes in accumulated other comprehensive income (loss) by component for the years ended December 31, 2018 and 2017. All amounts are presented net of tax. Amounts in parentheses indicate reductions to AOCI.

(amounts in thousands)	Available-for-Sale Securities			Unrealized Gains (Losses) on Cash Flow Hedges	Total
	Unrealized Gains (Losses)	Foreign Currency Items	Total Unrealized Gains (Losses)		
Balance, December 31, 2016	\$ (2,681)	\$ —	\$ (2,681)	\$ (2,211)	\$ (4,892)
Current period:					
Other comprehensive income before reclassifications	7,800	88	7,888	406	8,294
Amounts reclassified from accumulated other comprehensive income to net income ⁽¹⁾	(5,368)	—	(5,368)	1,607	(3,761)
Net current-period other comprehensive income	2,432	88	2,520	2,013	4,533
Balance, December 31, 2017	(249)	88	(161)	(198)	(359)
Reclassification of the income tax effects of the Tax Cuts and Jobs Act ⁽²⁾	(256)	—	(256)	(42)	(298)
Reclassification of the of net unrealized gains on equity securities ⁽²⁾	(953)	(88)	(1,041)	—	(1,041)
Balance after reclassification adjustments on January 1, 2018	(1,458)	—	(1,458)	(240)	(1,698)
Current period:					
Other comprehensive income (loss) before reclassifications	(34,091)	—	(34,091)	1,477	(32,614)
Amounts reclassified from accumulated other comprehensive income (loss) to net income ⁽¹⁾	13,808	—	13,808	(2,159)	11,649
Net current-period other comprehensive income (loss)	(20,283)	—	(20,283)	(682)	(20,965)
Balance, December 31, 2018	\$ (21,741)	\$ —	\$ (21,741)	\$ (922)	\$ (22,663)

Reclassification amounts for available-for-sale debt securities are reported as gain or loss on sale of investment securities on the consolidated statements of income. During the years ended December 31, 2018 and 2017, reclassification amounts of \$18.7 million (\$13.8 million net of taxes), and \$8.8 million (\$5.4 million net of taxes) were reported as loss and gains on sale of investment securities on the consolidated statements of income, respectively. Impairment losses recorded during the year ended December 31, 2017 were not previously deferred in accumulated other comprehensive income (loss) because Customers decided to sell the securities as of December 31, 2016. Reclassification amounts for cash flow hedges are reported as either interest expense on FHLB advances

(1) on the consolidated statements of income or other non-interest income on the consolidated statements of income for gains recognized from the discontinuance of cash flow hedge accounting for certain interest rate swaps. During the year ended December 31, 2018, a reclassification amount of \$95 thousand (\$70 thousand net of taxes) was reported as a reduction to interest expense on FHLB advances on the consolidated statements of income. A reclassification amount of \$2.8 million (\$2.1 million net of taxes) was reported as other non-interest income on the consolidated statements of income from the discontinuance of cash flow hedge accounting for certain interest rate swaps. During the year ended December 31, 2017, a reclassification amount of \$2.6 million (\$1.6 million net of taxes) was reported as interest expense on FHLB advances on the consolidated statements of income.

(2) Amounts reclassified from accumulated other comprehensive income (loss) on January 1, 2018 as a result of the adoption of ASU 2018-02 and ASU 2016-01 resulted in a decrease in accumulated other comprehensive income of \$1.3 million and a corresponding increase in retained earnings for the same amount. See NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES AND BASIS OF PRESENTATION for more information.

Table of Contents

NOTE 5 – INVESTMENT SECURITIES

The amortized cost and approximate fair value of investment securities as of December 31, 2018 and 2017, are summarized as follows:

	December 31, 2018			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
(amounts in thousands)				
Available-for-sale debt securities				
Agency-guaranteed residential mortgage-backed securities	\$311,267	\$ —	\$(5,893)	\$305,374
Corporate notes ⁽¹⁾	381,407	920	(24,407)	357,920
Available-for-sale debt securities	\$692,674	\$ 920	\$(30,300)	663,294
Equity securities ⁽²⁾				1,718
Total investment securities, at fair value				\$665,012

(1) Includes corporate securities issued by other bank holding companies.

Includes equity securities issued by a foreign entity that are being measured at fair value with changes in fair value recognized directly in earnings effective January 1, 2018 as a result of adopting ASU 2016-01, Recognition and

(2) Measurement of Financial Assets and Financial Liabilities (see NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES AND BASIS OF PRESENTATION for additional information related to the adoption of this new standard).

	December 31, 2017			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
(amounts in thousands)				
Available-for-sale securities				
Agency-guaranteed residential mortgage-backed securities	\$186,221	\$ 36	\$(2,799)	\$183,458
Agency-guaranteed commercial real estate mortgage-backed securities	238,809	432	(769)	238,472
Corporate notes ⁽¹⁾	44,959	1,130	—	46,089
Equity securities ⁽²⁾	2,311	1,041	—	3,352
Total available-for-sale securities, at fair value	\$472,300	\$ 2,639	\$(3,568)	\$471,371

(1) Includes subordinated debt issued by other bank holding companies.

(2) Includes equity securities issued by a foreign entity.

The following table shows proceeds from the sale of available-for-sale securities, gross gains and gross losses on those sales of securities:

	For the Years Ended		
	December 31,		
	2018	2017	2016
(amounts in thousands)			
Proceeds from sale of available-for-sale securities	\$476,182	\$769,203	\$2,852
Gross gains	\$—	\$8,808	\$26
Gross losses	(18,659)	(8)	(1)
Net (losses) gains	\$(18,659)	\$8,800	\$25

These (losses)/gains were determined using the specific identification method and were reported as (loss) gain on sale of investment securities included in non-interest income on the consolidated statements of income.

Table of Contents

The following table shows available-for-sale debt securities by stated maturity. Debt securities backed by mortgages have expected maturities that differ from contractual maturities because borrowers have the right to call or prepay and are, therefore, classified separately with no specific maturity date:

	December 31, 2018	
	Available for Sale	Amortized Fair
	Cost	Value
(amounts in thousands)		
Due in one year or less	\$—	\$—
Due after one year through five years	—	—

Total	\$615,410	\$(30,300)	\$ —	—	—\$615,410	\$(30,300)

(1) Includes corporate securities issued by other bank holding companies.

	December 31, 2017					
	Less than 12 months		12 months or more		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
(amounts in thousands)						
Available-for-sale debt securities						
Agency-guaranteed residential mortgage-backed securities	\$104,861	\$(656)	\$66,579	\$(2,143)	\$171,440	\$(2,799)
Agency-guaranteed commercial mortgage-backed securities	115,970	(740)	6,151	(29)	122,121	(769)
Total	\$220,831	\$(1,396)	\$72,730	\$(2,172)	\$293,561	\$(3,568)

At December 31, 2018, there were twenty-six available-for-sale debt securities with unrealized losses in the less-than-twelve-month category and no available-for-sale debt securities with unrealized losses in the twelve-month-or-more category. The unrealized losses on the mortgage-backed securities are guaranteed by government-sponsored entities and primarily relate to changes in market interest rates. The unrealized losses on the corporate notes relate to securities with no company specific concentration. The unrealized losses were due to an upward shift in interest rates that resulted in a negative impact on the respective notes' fair value. All amounts related to the mortgage-backed securities and the corporate notes are expected to be recovered when market prices recover or at maturity. Customers does not intend to sell these securities, and it is not more likely than not that Customers will be required to sell the securities before recovery of the amortized cost basis.

During the year ended December 31, 2017, Customers recorded OTTI losses of \$12.9 million related to its equity holdings in Religare Enterprises, Ltd. ("Religare") for the full amount of the decline in fair value from the cost basis established at December 31, 2016 through September 30, 2017, because Customers no longer has the intent to hold these securities until a

127

Table of Contents

recovery in fair value. At December 31, 2017, the fair value of the Religare equity securities was \$3.4 million which resulted in an unrealized gain of \$1.0 million being recognized in AOCI with no adjustment for deferred taxes as Customers did not have a tax strategy in place capable of generating sufficient capital gains to utilize any capital losses resulting from the Religare investment. At December 31, 2018, Customers continues to not have a tax strategy in place capable of generating sufficient capital gains to utilize any capital losses resulting from the Religare impairment.

As described in NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES AND BASIS OF PRESENTATION, the adoption of ASU 2016-01, Recognition and Measurement of Financial Assets and Financial Liabilities, on January 1, 2018 resulted in a cumulative effect adjustment to Customers' consolidated balance sheet with a \$1.0 million reduction in AOCI and a corresponding increase in retained earnings related to the December 31, 2017 unrealized gain on the Religare equity securities. In accordance with the new accounting guidance, changes in the fair value of the Religare equity securities since adoption are recorded directly in earnings, which resulted in an unrealized loss of \$1.6 million being recognized in other non-interest income in the accompanying consolidated statements of income for the year ended December 31, 2018. At December 31, 2018, the fair value of the Religare equity securities was \$1.7 million. At December 31, 2018 and 2017, Customers Bank had pledged investment securities with fair values aggregating to \$23.0 million and \$16.9 million, respectively, as collateral against its borrowings primarily with the FHLB and an unused line of credit with another financial institution. These counterparties do not have the ability to sell or repledge these securities.

At December 31, 2018, and 2017, no securities holdings of any one issuer, other than the U.S. Government and its agencies, amounted to greater than 10% of shareholder's equity.

NOTE 6 – LOANS HELD FOR SALE

The composition of loans held for sale as of December 31, 2018 and 2017, was as follows:

	December 31,	
	2018	2017
(amounts in thousands)		
Commercial loans:		
Multi-family loans, at lower of cost or fair value	\$—	\$144,191
Total commercial loans held for sale	—	144,191
Consumer loans:		
Residential mortgage loans, at fair value	1,507	1,886
Loans held for sale	\$1,507	\$146,077

Effective March 31, 2018, Customers Bank transferred \$129.7 million of multi-family loans from loans held for sale to loans receivable (held for investment) because the Bank no longer has the intent to sell these loans. Customers Bank transferred these loans at their carrying value, which approximated their fair value at the time of transfer.

Effective June 30, 2017, Customers Bank transferred \$150.6 million of multi-family loans from loans receivable (held for investment) to loans held for sale. Customers Bank transferred these loans at their carrying value, which was lower than the estimated fair value at the time of transfer. At December 31, 2017, the carrying value of these loans approximates their fair value. Accordingly, a lower of cost or fair value adjustment was not recorded as of December 31, 2017. See NOTE 2 – SIGNIFICANT ACCOUNTING POLICIES AND BASIS OF PRESENTATION for more information on the reclassification of loans previously reported as held for sale.

Table of Contents

NOTE 7 – LOANS RECEIVABLE AND ALLOWANCE FOR LOAN LOSSES

The following table presents loans receivable as of December 31, 2018 and 2017:

	December 31,	
	2018	2017
(amounts in thousands)		
Loans receivable, mortgage warehouse, at fair value	\$1,405,420	\$1,793,408
Loans receivable:		
Commercial:		
Multi-family	3,285,297	3,502,381
Commercial and industrial (including owner occupied commercial real estate)	1,951,277	1,633,818
Commercial real estate non-owner occupied	1,125,106	1,218,719
Construction	56,491	85,393
Total commercial loans receivable	6,418,171	6,440,311
Consumer:		
Residential real estate	566,561	234,090
Manufactured housing	79,731	90,227
Other	74,035	3,547
Total consumer loans receivable	720,327	327,864
Loans receivable	7,138,498	6,768,175
Deferred (fees) costs and unamortized (discounts) premiums, net	(424)	83)
Allowance for loan losses	(39,972)	(38,015)
Total loans receivable, net of allowance for loan losses	\$8,503,522	\$8,523,651

Customers' total loans receivable portfolio includes loans receivable which are reported at fair value based on an election made to account for these loans at fair value and loans receivable which are predominately reported at their outstanding unpaid principal balance, net of charge-offs and deferred costs and fees and unamortized premiums and discounts and are evaluated for impairment.

Loans receivable, mortgage warehouse, at fair value:

Mortgage warehouse loans consist of commercial loans to mortgage companies. These mortgage warehouse lending transactions are subject to master repurchase agreements. As a result of the contractual provisions, for accounting purposes control of the underlying mortgage loan has not transferred and the rewards and risks of the mortgage loans are not assumed by Customers. The mortgage warehouse loans receivable are designated as loans held for investment and reported at fair value based on an election made to account for the loans at fair value. Pursuant to the agreements, Customers funds the pipelines for these mortgage lenders by sending payments directly to the closing agents for funded mortgage loans and receives proceeds directly from third party investors when the underlying mortgage loans are sold into the secondary market. The fair value of the mortgage warehouse loans is estimated as the amount of cash initially advanced to fund the mortgage, plus accrued interest and fees, as specified in the respective agreements. The interest rates on these loans are variable, and the lending transactions are short-term, with an average life of 23 days from purchase to sale. The primary goal of these lending transactions is to provide liquidity to mortgage companies. At December 31, 2018 and 2017, all of Customers' commercial mortgage warehouse loans were current in terms of payment. As these loans are reported at their fair value, they do not have an allowance for loan loss and are therefore excluded from allowance for loan losses related disclosures.

Table of Contents

Loans receivable:

The following tables summarize loans receivable by loan type and performance status as of December 31, 2018 and 2017:

	December 31, 2018

Total	\$17,070	\$ 2,743	\$19,813	\$26,415	\$6,695,032	\$ 26,915	\$6,768,175

(1) Includes past-due loans that are accruing interest because collection is considered probable.

(2) Loans where next payment due is less than 30 days from the report date.

Purchased-credit-impaired loans aggregated into a pool are accounted for as a single asset with a single composite interest rate and an aggregate expectation of cash flows, and the past due status of the pools, or that of the individual loans within the pools, is not meaningful. Due to the credit impaired nature of the loans, the loans are

(3) recorded at a discount reflecting estimated future cash flows and the Bank recognizes interest income on each pool of loans reflecting the estimated yield and passage of time. Such loans are considered to be performing.

Purchased-credit-impaired loans that are not in pools accrete interest when the timing and amount of their expected cash flows are reasonably estimable, and are reported as performing loans.

(4) Amounts exclude deferred costs and fees, unamortized premiums and discounts, and the allowance for loan losses.

(5) Manufactured housing loans purchased in 2010 are supported by cash reserves held at the Bank that are used to fund past-due payments when the loan becomes 90 days or more delinquent. Subsequent purchases are subject to

varying provisions in the event of borrowers' delinquencies.

As of December 31, 2018 and 2017, the Bank had \$0.2 million and \$0.3 million, respectively, of residential real estate held in OREO. As of December 31, 2018 and 2017, the Bank had initiated foreclosure proceedings on \$2.1 million and \$1.6 million, respectively, in loans secured by residential real estate.

losses
Certain manufactured housing loans were purchased in August 2010. A portion of the purchase price may be used to reimburse the Bank under the specified terms in the purchase agreement for defaults of the underlying borrower and other specified items. At December 31, 2018 and 2017, funds available for reimbursement, if necessary, were \$0.5 million and \$0.6 million, respectively. Each quarter, these

Table of Contents

funds are evaluated to determine if they would be sufficient to absorb the probable incurred losses within the manufactured housing portfolio.

Impaired Loans - Individually Evaluated for Impairment

The following tables present the recorded investment (net of charge-offs), unpaid principal balance and related allowance by loan type for impaired loans that were individually evaluated for impairment as of December 31, 2018 and 2017, and the average recorded investment and interest income recognized for the years ended December 31, 2018, 2017 and 2016. Purchased-credit-impaired loans are considered to be performing and are not included in the tables below.

Troubled Debt Restructurings

At December 31, 2018, 2017 and 2016, there were \$19.2 million, \$20.4 million and \$16.4 million, respectively, in loans reported as TDRs. TDRs are reported as impaired loans in the calendar year of their restructuring and are evaluated to determine whether they should be placed on non-accrual status. In subsequent years, a TDR may be returned to accrual status if it satisfies a minimum performance requirement of six months, however, it will remain classified as impaired. Generally, the Bank requires sustained performance for nine months before returning a TDR to accrual status. Modifications of PCI loans that are accounted for within loan pools in accordance with the accounting standards for PCI loans do not result in the removal of these loans from the pool even if the modifications would otherwise be considered a TDR. Accordingly, as each pool is accounted for as a single asset with a single composite interest rate and an aggregate expectation of cash flows, modifications of loans within such pools are not considered TDRs.

The following table presents total TDRs based on loan type and accrual status at December 31, 2018, 2017, and 2016. Nonaccrual TDRs are included in the reported amount of total non-accrual loans.

	December 31, 2018			2017			2016

Table of Contents

The following table presents loans modified in a TDR by type of concession for the years ended December 31, 2018, 2017 and 2016. There were no modifications that involved forgiveness of debt for the years ended December 31, 2018, 2017 and 2016.

	For the Years Ended December 31,		
	2018	2017	2016
	Number Recorded of Investment Loans	Number Recorded of Investment Loans	Number Recorded of Investment Loans
(dollars in thousands)			
Extensions of maturity	2 \$ 60	5 \$ 6,497	3 \$ 1,995
Interest-rate reductions	39 1,615	35 1,574	61 4,621
Total	41 \$ 1,675	40 \$ 8,071	64 \$ 6,616

The following table provides, by loan type, the number of loans modified in TDRs and the related recorded investment for the years ended December 31, 2018, 2017 and 2016.

	For the Years Ended December 31,		
	2018	2017	2016
	Number Recorded of Investment Loans	Number Recorded of Investment Loans	Number Recorded of Investment Loans
(dollars in thousands)			
Commercial and industrial	— \$ —	4 \$ 6,437	1 \$ 76
Commercial real estate non-owner occupied	— —	— —	1 1,844
Residential real estate	2 352	— —	4 2,410
Manufactured housing	38 1,310	36 1,634	58 2,286
Other consumer	1 13	— —	— —
Total loans	41 \$ 1,675	40 \$ 8,071	64 \$ 6,616

As of December 31, 2018 and 2017, except for one commercial and industrial loan with an outstanding commitment of \$1.5 million and \$2.1 million, respectively, there were no other commitments to lend additional funds to debtors whose loans have been modified in TDRs. There were no commitments to lend additional funds to debtors whose terms were modified in TDRs at December 31, 2016.

As of December 31, 2018, four manufactured housing loans totaling \$0.1 million that were modified in TDRs within the past twelve months that defaulted on payments. As of December 31, 2017, five manufactured housing loans totaling \$0.2 million that were modified in TDRs within the past twelve months that defaulted on payments. As of December 31, 2016, eight manufactured housing loans totaling \$0.2 million, one commercial real estate non-owner occupied loan of \$1.8 million and one residential real estate loan of \$0.1 million that were modified in TDRs within the past twelve months defaulted on payments.

Loans modified in TDRs are evaluated for impairment. The nature and extent of impairment of TDRs, including those which have experienced a subsequent default, is considered in the determination of an appropriate level of allowance for loan losses. For the year ended December 31, 2018, there were no allowances recorded as a result of TDR modifications. For the year ended December 31, 2017, there was one allowance resulting from TDR modifications totaling \$1 thousand for one manufactured housing loan. There were no allowances recorded as a result of TDR modifications during 2016.

Purchased-Credit-Impaired Loans

The changes in accretable yield related to PCI loans for the years ended December 31, 2018, 2017 and 2016, were as follows:

Allowance for Loan Losses and the FDIC Loss Sharing Receivable and Clawback Liability

In 2010, Customers acquired certain loans pursuant to FDIC-assisted transactions in which losses from resolution of the nonperforming loans were eligible for partial reimbursement by the FDIC. Subsequent to the purchase date, the expected cash flows on the covered loans were subject to evaluation. Decreases in the present value of expected cash flows on the covered loans were recognized by increasing the allowance for loan losses with a related charge to the provision for loan losses. At the same time, the FDIC loss sharing receivable balance was increased reflecting an estimated future collection from the FDIC, which was recorded as a reduction to the provision for loan losses. If the expected cash flows on the covered loans increased such that a previously recorded impairment could be reversed, Customers recorded a reduction in the allowance for loan losses (with a related credit to the provision for loan losses) accompanied by a reduction in the FDIC loss sharing receivable balance (with a related charge to the provision for loan losses). Increases in expected cash flows on covered loans and decreases in expected cash flows from the FDIC loss sharing receivable, when there were no previously recorded impairments, were considered together and recognized over the remaining life of the loans as interest income. Decreases in the valuations of OREO covered by the loss sharing agreements were recorded net of the estimated FDIC receivable as an increase to OREO expense (a component of non-interest expense).

As part of the FDIC loss sharing agreements, Customers also assumed a potential liability to be paid within 45 days subsequent to the maturity or termination of the loss sharing agreements that was contingent upon actual losses incurred over the life of the agreements relative to the expected losses and the consideration paid upon acquisition of the failed institutions. Due to cash receipts on the covered assets in excess of the original expectations of the FDIC, Customers anticipated that it would be required to pay an amount to the FDIC at the end of the loss sharing agreements.

Customers presented the FDIC Loss Sharing Receivable, net of the Clawback liability on the consolidated balance sheets. In the event the Clawback liability exceeded the FDIC Loss Sharing Receivable balance, the net liability amount was presented in "Accrued interest payable and other liabilities" on the consolidated balance sheets.

On July 11, 2016, Customers entered into an agreement to terminate all existing rights and obligations pursuant to the loss sharing agreements with the FDIC. In connection with the termination agreement, Customers paid the FDIC \$1.4 million as final payment under these agreements. The negotiated settlement amount was based on net losses incurred on the covered assets through September 30, 2015, adjusted for cash payments to and cash receipts from the FDIC as part of the December 31, 2015 and March 31, 2016 certifications. Consequently, loans and OREO previously reported as covered assets pursuant to the loss sharing agreements were no longer presented as covered assets as of June 30, 2016.

The following table presents changes in the allowance for loans losses and the FDIC loss sharing receivable, including the effect of the estimated Clawback liability for the years ended December 31, 2018, 2017 and 2016.

	Allowance for Loan Losses			FDIC Loss Sharing Receivable

Table of Contents

Credit Quality Indicators

The allowance for loan losses represents management's estimate of probable losses in Customers' loans receivable portfolio, excluding commercial mortgage warehouse loans carried under the fair value option. Multi-family, commercial and industrial, owner occupied commercial real estate, non-owner occupied commercial real estate and construction loans are rated based on an internally assigned risk rating system which is assigned at the time of loan origination and reviewed on a periodic, or on an "as needed" basis. Residential real estate loans, manufactured housing and other consumer loans are evaluated based on the payment activity of the loan.

To facilitate the monitoring of credit quality within the multi-family, commercial and industrial, owner occupied commercial real estate, non-owner occupied commercial real estate, and construction loan portfolios, and for purposes of analyzing historical loss rates used in the determination of the allowance for loan losses for the respective loan portfolios, the Bank utilizes the following categories of risk ratings: pass/satisfactory (includes risk rating 1 through 6), special mention, substandard, doubtful and loss. The risk rating categories, which are derived from standard regulatory rating definitions, are assigned upon initial approval of credit to borrowers and updated periodically thereafter. Pass/satisfactory ratings, which are assigned to those borrowers who do not have identified potential or well-defined weaknesses and for whom there is a high likelihood of orderly repayment, are updated periodically based on the size and credit characteristics of the borrower. All other categories are updated on a quarterly basis during the month preceding the end of the calendar quarter. While assigning risk ratings involves judgment, the risk-rating process allows management to identify riskier credits in a timely manner and allocate the appropriate resources to manage those loans.

The risk rating grades are defined as follows:

"1" – Pass/Excellent

Loans rated 1 represent a credit extension of the highest quality. The borrower's historic (at least five years) cash flows manifest extremely large and stable margins of coverage. Balance sheets are conservative, well capitalized, and liquid. After considering debt service for proposed and existing debt, projected cash flows continue to be strong and provide ample coverage. The borrower typically reflects broad geographic and product diversification and has access to alternative financial markets.

"2" – Pass/Superior

Loans rated 2 are those for which the borrower has a strong financial condition, balance sheet, operations, cash flow, debt capacity and coverage with ratios better than industry norms. The borrowers of these loans exhibit a limited leverage position, are virtually immune to local economies, and are in stable growing industries. The management team is well respected, and the company has ready access to public markets.

"3" – Pass/Strong

Loans rated 3 are those loans for which the borrowers have above average financial condition and flexibility; more than satisfactory debt service coverage; balance sheet and operating ratios are consistent with or better than industry peers; operate in industries with little risk; move in diversified markets; and are experienced and competent in their industry. These borrowers' access to capital markets is limited mostly to private sources, often secured, but the borrower typically has access to a wide range of refinancing alternatives.

"4" – Pass/Good

Loans rated 4 have a sound primary and secondary source of repayment. The borrower may have access to alternative sources of financing, but sources are not as widely available as they are to a higher-grade borrower. These loans carry a normal level of risk with very low loss exposure. The borrower has the ability to perform according to the terms of the credit facility. The margins of cash flow coverage are satisfactory but vulnerable to more rapid deterioration than the higher-quality loans.

"5" – Satisfactory

Loans rated 5 are extended to borrowers who are considered to be a reasonable credit risk and demonstrate the ability to repay the debt from normal business operations. Risk factors may include reliability of margins and cash flows, liquidity, dependence on a single product or industry, cyclical trends, depth of management, or limited access to alternative financing sources. The borrower's historical financial information may indicate erratic performance, but current trends are positive and the quality of financial information is adequate, but is not as detailed and sophisticated

as information found on higher grade loans. If adverse circumstances arise, the impact on the borrower may be significant.

“6” – Satisfactory/Bankable with Care

Loans rated 6 are those for which the borrower has higher than normal credit risk; however, cash flow and asset values are generally intact. These borrowers may exhibit declining financial characteristics, with increasing leverage and decreasing liquidity and may have

136

Table of Contents

limited resources and access to financial alternatives. Signs of weakness in these borrowers may include delinquent taxes, trade slowness and eroding profit margins.

“7” – Special Mention

Loans rated 7 are credit facilities that may have potential developing weaknesses and deserve extra attention from the account manager and other management personnel. In the event potential weaknesses are not corrected or mitigated, deterioration in the ability of the borrower to repay the debt in the future may occur. This grade is not assigned to loans that bear certain peculiar risks normally associated with the type of financing involved, unless circumstances have caused the risk to increase to a level higher than would have been acceptable when the credit was originally approved. Loans where significant actual, not potential, weaknesses or problems are clearly evident are graded in the category below.

“8” – Substandard

Loans are rated 8 when the loans are inadequately protected by the current sound worth and payment capacity of the obligor or of the collateral pledged, if any. Loans so classified must have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt and are characterized by the distinct possibility that the company will sustain some loss if the weaknesses are not corrected.

“9” – Doubtful

The Bank assigns a doubtful rating to loans that have all the attributes of a substandard rating with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable. The possibility of loss is extremely high, but because of certain important and reasonable specific pending factors that may work to the advantage of and strengthen the credit quality of the loan, its classification as an estimated loss is deferred until its more exact status may be determined. Pending factors may include a proposed merger or acquisition, liquidation proceeding, capital injection, perfecting liens on additional collateral or refinancing plans.

“10” – Loss

The Bank assigns a loss rating to loans considered uncollectible and of such little value that their continuance as an active asset is not warranted. Amounts classified as loss are immediately charged off.

Risk ratings are not established for certain consumer loans, including residential real estate, home equity, manufactured housing, and installment loans, mainly because these portfolios consist of a larger number of homogeneous loans with smaller balances. Instead, these portfolios are evaluated for risk mainly based upon aggregate payment history through the monitoring of delinquency levels and trends and are classified as performing and non-performing.

The following tables present the credit ratings of loans receivable as of December 31, 2018 and 2017.

December 31, 2018

	Commercial Multi-family and Industrial	Commercial Real Estate Owner Occupied	Commercial Real Estate Non-Owner Occupied	Commercial Real Estate Non-Owner Occupied	Commercial Real Estate Non-Owner Occupied	Residential Real Estate	Residential Real Estate	Manufacturing Housing	Other Consumer	Total ⁽³⁾

(1) Includes residential real estate, manufactured housing, and other consumer loans not subject to risk ratings.

(2) Includes residential real estate, manufactured housing, and other consumer loans that are past due and still accruing interest or on nonaccrual status.

(3) Excludes commercial mortgage warehouse loans carried under the fair value option.

Loan Purchases and Sales

Purchases and sales of loans were as follows for the years ended December 31, 2018, 2017 and 2016:

	For the Years Ended December 31,		
	2018	2017	2016
(amounts in thousands)			
Purchases ⁽¹⁾			
Residential real estate	\$368,402	\$264,090	\$—
Other consumer	30,066	—	—
Total	\$398,468	\$264,090	\$—
Sales ⁽²⁾			
Multi-family	\$(54,638)	\$(226,831)	\$—
Commercial and industrial ⁽³⁾	(32,263)	(19,974)	(23,731)
Commercial real estate owner occupied ⁽³⁾	(20,218)	(19,813)	(15,342)
Residential real estate	—	(191,574)	—
Other consumer	—	—	—
Total	\$(107,119)	\$(458,192)	\$(39,073)

(1) The purchase price was 99.9% and 99.4% of loans outstanding for the years ended December 31, 2018 and 2017, respectively. There were no loan purchases during the year ended December 31, 2016.

(2) Loan sales resulted in a net gain of \$3.3 million, \$4.2 million and \$3.7 million for the years ended December 31, 2018, 2017 and 2016, respectively.

(3) Primarily sales of SBA loans.

None of the purchases and sales during the years ended December 31, 2018, 2017 and 2016 materially affected the credit profile of Customers' related loan portfolio.

Loans Pledged as Collateral

Customers has pledged eligible real estate loans as collateral for potential borrowings from the FHLB and FRB in the amount of \$5.4 billion and \$5.5 billion at December 31, 2018 and 2017, respectively.

Table of Contents

NOTE 8 – BANK PREMISES AND EQUIPMENT

The components of bank premises and equipment as of December 31, 2018 and 2017, were as follows:

	Expected Useful Life	December 31,	
		2018	2017
(amounts in thousands)			
Leasehold improvements	3 to 25 years	\$14,080	\$14,028
Furniture, fixtures and equipment	5 to 10 years	7,110	6,447
IT equipment	3 to 5 years	8,645	8,002
Automobiles	3 to 5 years	455	506
		30,290	28,983
Accumulated depreciation and amortization		(19,227)	(17,028)
Total		\$11,063	\$11,955

Depreciation expense and amortization of leasehold improvements, which are included on the consolidated statements of income in occupancy expenses, were \$2.7 million, \$2.8 million and \$2.5 million for the years ended December 31, 2018, 2017 and 2016, respectively.

Future minimum rental commitments pursuant to non-cancelable leases as of December 31, 2018, were as follows:

	December 31, 2018
(amounts in thousands)	
2019	\$ 5,577
2020	5,135
2021	4,513
2022	3,885
2023	2,856
Thereafter	4,699
Total minimum payments	\$ 26,665

Rent expense was approximately \$5.8 million, \$5.2 million and \$4.7 million for the years ended December 31, 2018, 2017 and 2016, respectively. A majority of the leases provide for the payment of taxes, maintenance, insurance and certain other expenses applicable to the leased premises. Many of the leases contain extension provisions and escalation clauses. These leases are generally renewable and may, in certain cases, contain renewal provisions and options to expand and contract space and terminate the leases at predetermined contractual dates. In addition, escalation clauses may exist, which are tied to a predetermined rate or may change based on a specified percentage increase or the Consumer Price Index.

NOTE 9 – DEPOSITS

The components of deposits at December 31, 2018 and 2017, were as follows:

	December 31,	
	2018	2017
(amounts in thousands)		
Demand, non-interest bearing	\$1,122,171	\$1,052,115
Demand, interest bearing	803,948	523,848
Savings, including money market deposit accounts	3,481,936	3,318,486
Time, \$100,000 and over	792,370	1,284,855
Time, other	941,811	620,838
Total deposits	\$7,142,236	\$6,800,142

Table of Contents

The scheduled maturities for time deposits at December 31, 2018, were as follows:

	December 31, 2018
(amounts in thousands)	
2019	\$1,459,919
2020	172,903
2021	81,148
2022	17,147
2023	3,064
Total time deposits	\$1,734,181

Time deposits greater than \$250,000 totaled \$0.5 billion and \$0.8 billion at December 31, 2018 and 2017, respectively.

Included in the savings and MMDA balances above were \$556.5 million and \$654.8 million of brokered money market deposits at December 31, 2018 and 2017, respectively. Also included in time, other balances above were \$800.2 million and \$504.3 million of brokered time deposits, respectively, at December 31, 2018 and 2017.

Demand deposit overdrafts reclassified as loans were \$3.4 million and \$2.0 million at December 31, 2018 and 2017, respectively.

NOTE 10 – BORROWINGS**Short-term debt**

Short-term debt at December 31, 2018 and 2017, was as follows:

	December 31,		2017	
	2018	Rate	Amount	Rate
(amounts in thousands)				
FHLB advances	\$1,248,070	2.62%	\$1,611,860	1.47%
Federal funds purchased	187,000	2.60%	155,000	1.50%
Total short-term debt	\$1,435,070		\$1,766,860	

The following is a summary of additional information relating to Customers' short-term debt:

	December 31,		
	2018	2017	2016
(amounts in thousands)			
FHLB advances			
Maximum outstanding at any month end	\$2,622,165	\$2,283,250	\$1,697,800
Average balance during the year	1,526,180	1,415,755	965,293
Weighted-average interest rate during the year	2.05	% 1.44	% 0.95
Federal funds purchased			
Maximum outstanding at any month end	195,000	238,000	137,000
Average balance during the year	156,652	163,466	84,514
Weighted-average interest rate during the year	1.92	% 1.19	% 0.58

At December 31, 2018 and 2017, Customers Bank had aggregate availability under federal funds lines totaling \$522.0 million and \$310.0 million, respectively.

Table of Contents

Long-term debt
FHLB advances

Customers had a total maximum borrowing capacity with the FHLB of \$4.1 billion and with the FRB of \$102.5 million at December 31, 2018. Customers had a total maximum borrowing capacity with the FHLB of \$4.3 billion and with the FRB of \$142.5 million at December 31, 2017. Amounts can be borrowed as short-term or long-term. As of December 31, 2018 and 2017, advances under these arrangements were secured by certain assets, which included qualifying loans of Customers Bank of \$5.2 billion and \$5.5 billion, respectively.

Senior notes

In July 2018, the 6.375% senior notes with an aggregate principal amount of \$63.3 million issued by Customers Bancorp in July and August 2013 matured and were paid in full.

In June 2017, Customers Bancorp issued \$100 million of senior notes at 99.775% of face value. The price to purchasers represents a yield-to-maturity of 4.0% on the fixed coupon rate of 3.95%. The senior notes mature in June 2022. The net proceeds to Customers Bancorp after deducting the underwriting discount and offering expenses were \$98.6 million. The net proceeds were contributed to Customers Bank for purposes of its working capital needs and the funding of its organic growth.

On June 26, 2014, Customers Bancorp closed a private placement transaction in which it issued \$25.0 million of 4.625% senior notes that will mature in June 2019. Interest is paid semi-annually in arrears in June and December.

Subordinated debt

On June 26, 2014, Customers Bank closed a private-placement transaction in which it issued \$110.0 million of fixed-to-floating rate subordinated notes due in 2029. The subordinated notes bear interest at an annual fixed rate of 6.125% until June 26, 2024, and interest is paid semiannually. From June 26, 2024, the subordinated notes will bear an annual interest rate equal to three-month LIBOR plus 344.3 basis points until maturity on June 26, 2029.

Customers Bank has the ability to call the subordinated notes, in whole or in part, at a redemption price equal to 100% of the principal balance at certain times on or after June 26, 2024. The subordinated notes qualify as Tier 2 capital for regulatory capital purposes.

NOTE 11 – SHAREHOLDERS’ EQUITY

Common Stock

During 2018 and 2017, Customers Bancorp did not issue any shares of its common stock pursuant to public offerings. During 2016, Customers Bancorp issued shares of its common stock pursuant to the following public offerings:

On November 9, 2016, Customers Bancorp issued 2,415,000 shares of common stock at a price to the public of \$25.00 per share as part of an underwritten public offering. Customers received proceeds of \$58.3 million from the offering, after deducting offering costs.

On August 11, 2016, Customers Bancorp entered into an At Market Issuance Sales Agreement with FBR Capital Markets & Co., Keefe, Bruyette & Woods, Inc. and Maxim Group LLC. Customers Bancorp has authorized the sale, at its discretion, of shares of its common stock, in an aggregate offering amount up to \$50 million under the Sales Agreement. Customers issued 219,386 shares in connection with this Sales Agreement during 2016 receiving proceeds of \$5.5 million, net of offering costs.

The net proceeds from the common stock offerings was used for general corporate purposes, which included working capital and the funding of organic growth at Customers Bank.

In November 2013, Customers Bancorp announced that its Board of Directors had authorized a stock repurchase plan in which it could acquire up to 5% of its current outstanding shares at prices not to exceed a 20% premium over the then current book value. In December 2018, Customers Bancorp announced that its Board of Directors amended the terms of the November 2013 stock repurchase plan to allow purchases to be made at prices not to exceed the book value per share of Customers' common stock measured as of September 30, 2018. The repurchase program may be suspended, modified or discontinued at any time, and the Bancorp has no obligation to repurchase any amount of its common stock under the program. In December 2018, Customers Bancorp repurchased 719,200 shares of its common stock at a weighted average price of \$18.04. There was no stock repurchased during 2017 or 2016.

Table of Contents

At December 31, 2018, there were no warrants outstanding to purchase shares of Customers Bancorp's common stock. At December 31, 2017, there were 35,187 warrants outstanding to purchase shares of Customers Bancorp's common stock at a price of \$21.38.

Preferred Stock

Customers Bancorp currently has four series of preferred stock outstanding. During 2018 and 2017, Customers Bancorp did not issue any preferred stock.

Preferred stock issued during 2016 included the following:

On September 16, 2016, Customers Bancorp issued 3,400,000 shares of Series F Preferred Stock par value \$1.00 per share, at a price of \$25.00 per share in a public offering. Dividends on the Series F Preferred Stock accrue and are payable quarterly in arrears, at a fixed rate per annum equal to 6.00% from the original issue date to, but excluding, December 15, 2021, and thereafter at a floating rate per annum equal to three-month LIBOR on the related dividend determination date plus a spread of 4.762% per annum. Customers received proceeds of \$82.2 million from the offering, after deducting offering costs.

On April 28, 2016, Customers Bancorp issued 2,300,000 shares of Series E Preferred Stock par value \$1.00 per share, at a price of \$25.00 per share in a public offering. Dividends on the Series E Preferred Stock accrue and are payable quarterly in arrears, at a fixed rate per annum equal to 6.45% from the original issue date to, but excluding, June 15, 2021, and thereafter at a floating rate per annum equal to three-month LIBOR on the related dividend determination date plus a spread of 5.14% per annum. Customers received proceeds of \$55.6 million from the offering, after deducting offering costs.

On January 29, 2016, Customers Bancorp issued 1,000,000 shares of Series D Preferred Stock par value \$1.00 per share, at a price of \$25.00 per share in a public offering. Dividends on the Series D Preferred Stock accrue and are payable quarterly in arrears, at a fixed rate per annum equal to 6.50% from the original issue date to, but excluding, March 15, 2021, and thereafter at a floating rate per annum equal to three-month LIBOR on the related dividend determination date plus a spread of 5.09% per annum. Customers received proceeds of \$24.1 million from the offering, after deducting offering costs.

Preferred stock issued during 2015 included the following:

On May 18, 2015, Customers Bancorp issued 2,300,000 shares of Series C Preferred Stock par value \$1.00 per share, at a price of \$25.00 per share in a public offering. Dividends on the Series C Preferred Stock accrue and are payable quarterly in arrears, at a fixed rate per annum equal to 7.00% from the original issue date to, but excluding, June 15, 2020, and thereafter at a floating rate per annum equal to three-month LIBOR on the related dividend determination date plus a spread of 5.30% per annum. Customers received proceeds of \$55.6 million from the offering, after deducting offering costs.

The net proceeds from the preferred stock offerings were used for general corporate purposes, which included working capital and the funding of organic growth at Customers Bank.

Dividends on the Series C, Series D, Series E and Series F Preferred Stock are not cumulative. If Customers Bancorp's board of directors or a duly authorized committee of the board does not declare a dividend on the Series C, Series D, Series E and Series F Preferred Stock in respect of a dividend period, then no dividend shall be deemed to have accrued for such dividend period, be payable on the applicable dividend payment date, or be cumulative, and Customers Bancorp will have no obligation to pay any dividend for that dividend period, whether or not the board of directors or a duly authorized committee of the board declares a dividend on the Series C, Series D, Series E, and Series F Preferred Stock for any future dividend period.

The Series C, Series D, Series E and Series F Preferred Stock have no stated maturity, are not subject to any mandatory redemption, sinking fund or other similar provisions and will remain outstanding unless redeemed at Customers Bancorp's option. Customers Bancorp may redeem the Series C, Series D, Series E and Series F Preferred Stock at its option, at a redemption price equal to \$25.00 per share, plus any declared and unpaid dividends (without regard to any undeclared dividends), (i) in whole or in part, from time to time, on any dividend payment date on or after June 15, 2020, for the Series C Preferred Stock, March 15, 2021, for the Series D Preferred Stock, June 15, 2021, for the Series E Preferred Stock and December 15, 2021, for the Series F Preferred Stock and or (ii) in whole but not in part, within 90 days following the occurrence of a regulatory capital treatment event. Any redemption of the Series

C, Series D, Series E and Series F Preferred Stock is subject to prior approval of the Federal Reserve Board. The Series C, Series D, Series E and Series F Preferred Stock qualify as Tier 1 capital under regulatory capital guidelines. Except in limited circumstances, the Series C, Series D, Series E and Series F Preferred Stock do not have any voting rights.

Table of Contents

Preferred stock dividends paid during 2018 included the following:

On December 17, 2018, Customers made the following dividend payments to preferred shareholders of record as of November 30, 2018:

- a cash dividend on its Series C Preferred Stock of \$0.4375 per share;
- a cash dividend on its Series D Preferred Stock of \$0.40625 per share;
- a cash dividend on its Series E Preferred Stock of \$0.403125 per share; and
- a cash dividend on its Series F Preferred Stock of \$0.375 per share.

On September 17, 2018, Customers made the following dividend payments to preferred shareholders of record as of August 31, 2018:

- a cash dividend on its Series C Preferred Stock of \$0.4375 per share;
- a cash dividend on its Series D Preferred Stock of \$0.40625 per share;
- a cash dividend on its Series E Preferred Stock of \$0.403125 per share; and
- a cash dividend on its Series F Preferred Stock of \$0.375 per share.

On June 15, 2018, Customers made the following dividend payments to preferred shareholders of record as of May 31, 2018:

- a cash dividend on its Series C Preferred Stock of \$0.4375 per share;
- a cash dividend on its Series D Preferred Stock of \$0.40625 per share;
- a cash dividend on its Series E Preferred Stock of \$0.403125 per share; and
- a cash dividend on its Series F Preferred Stock of \$0.375 per share.

On March 15, 2018, Customers made the following dividend payments to preferred shareholders of record as of February 28, 2018:

- a cash dividend on its Series C Preferred Stock of \$0.4375 per share;
- a cash dividend on its Series D Preferred Stock of \$0.40625 per share;
- a cash dividend on its Series E Preferred Stock of \$0.403125 per share; and
- a cash dividend on its Series F Preferred Stock of \$0.375 per share.

Preferred stock dividends paid during 2017 included the following:

On December 15, 2017, Customers made the following dividend payments to preferred shareholders of record as of November 30, 2017:

- a cash dividend on its Series C Preferred Stock of \$0.4375 per share;
- a cash dividend on its Series D Preferred Stock of \$0.40625 per share;
- a cash dividend on its Series E Preferred Stock of \$0.403125 per share; and
- a cash dividend on its Series F Preferred Stock of \$0.375 per share.

On September 15, 2017, Customers made the following dividend payments to preferred shareholders of record as of August 31, 2017:

- a cash dividend on its Series C Preferred Stock of \$0.4375 per share;
- a cash dividend on its Series D Preferred Stock of \$0.40625 per share;
- a cash dividend on its Series E Preferred Stock of \$0.403125 per share; and
- a cash dividend on its Series F Preferred Stock of \$0.375 per share.

On June 15, 2017, Customers made the following dividend payments to preferred shareholders of record as of May 31, 2017:

- a cash dividend on its Series C Preferred Stock of \$0.4375 per share;
- a cash dividend on its Series D Preferred Stock of \$0.40625 per share;

- a cash dividend on its Series E Preferred Stock of \$0.403125 per share; and
- a cash dividend on its Series F Preferred Stock of \$0.375 per share.

Preferred stock dividends paid during 2016 included the following:

On December 15, 2016, Customers made the following dividend payments to preferred shareholders of record as of November 30, 2016:

- a cash dividend on its Series C Preferred Stock of \$0.4375 per share;
- a cash dividend on its Series D Preferred Stock of \$0.40625 per share;
- a cash dividend on its Series E Preferred Stock of \$0.403125 per share; and
- a cash dividend on its Series F Preferred Stock of \$0.370833 per share.

On September 15, 2016, Customers made the following dividend payments to preferred shareholders of record as of August 31, 2016:

- a cash dividend on its Series C Preferred Stock of \$0.4375 per share;
- a cash dividend on its Series D Preferred Stock of \$0.40625 per share; and
- a cash dividend on its Series E Preferred Stock of \$0.403125 per share.

On June 15, 2016, Customers made the following dividend payments to preferred shareholders of record as of May 31, 2016:

- a cash dividend on its Series C Preferred Stock of \$0.4375 per share;
- a cash dividend on its Series D Preferred Stock of \$0.40625 per share; and
- a cash dividend on its Series E Preferred Stock of \$0.210521 per share.

On March 15, 2016, Customers made the following dividend payments to preferred shareholders of record as of February 29, 2016:

- a cash dividend on its Series C Preferred Stock of \$0.4375 per share and
- a cash dividend on its Series D Preferred Stock of \$0.2076 per share.

NOTE 12 – EMPLOYEE BENEFIT PLANS

401(k) Plan

Customers has a 401(k) profit sharing plan whereby eligible team members may contribute amounts up to the annual IRS statutory contribution limit. Customers provides a matching contribution equal to 50% of the first 6% of the contribution made by the team member. Employer contributions for the years ended December 31, 2018, 2017 and 2016, were \$2.1 million, \$1.9 million, and \$1.6 million, respectively.

Supplemental Executive Retirement Plan

Customers entered into a SERP with its Chairman and CEO that provides annual retirement benefits for a 15-year period upon the later of his reaching the age of 65 or when he terminates employment. The SERP is a defined-contribution type of deferred-compensation arrangement that is designed to provide a target annual retirement benefit of \$300,000 per year for 15 years starting at age 65, based on an assumed constant rate of return of 7% per year. The level of retirement benefit is not guaranteed by Customers, and the ultimate retirement benefit can be less than or greater than the target. Customers funds its obligations under the SERP with the increase in cash surrender value of a life insurance policy on the life of the Chairman and CEO which

Table of Contents

it owns. The present value of the amount owed as of December 31, 2018 and 2017 was \$4.3 million and \$4.6 million, respectively, and was included in other liabilities.

NOTE 13 – SHARE-BASED COMPENSATION PLANS

Summary

During 2010, the shareholders of Customers Bancorp approved the 2010 Plan, and during 2012, the shareholders of Customers Bancorp approved the 2004 Plan. The purpose of these plans is to promote the success and enhance the value of Customers Bancorp by linking the personal interests of the members of the Board of Directors, team members, officers and executives of Customers to those of the shareholders of Customers and by providing such individuals with an incentive for outstanding performance in order to generate superior returns to shareholders of Customers. The 2010 Plan and 2004 Plan are intended to provide flexibility to Customers in its ability to motivate, attract and retain the services of members of the Board of Directors, team members, officers and executives of Customers. Stock options and restricted stock units normally vest on the third or fifth anniversary of the grant date provided the grantee remains employed by Customers or continues to serve on the Board. With respect to certain stock options granted under the 2010 Plan, vested options shall be exercisable only when Customers' fully diluted tangible book value will have increased by 50% from the date of grant. Share-based awards generally provide for accelerated vesting if there is a change in control (as defined in the Plans). No stock options may be exercisable for more than 10 years from the date of grant.

The 2010 and 2004 Plans are administered by the Compensation Committee of the Board of Directors. The 2010 Plan provides exclusively for the grant of stock options, some or all of which may be structured to qualify as Incentive Stock Options, to team members, officers and executives. The maximum number of shares of common stock which may be issued under the 2010 Plan is 3,666,667 shares. The 2004 Plan provides for the grant of options, some or all of which may be structured to qualify as Incentive Stock Options if granted to team members, stock appreciation rights, restricted stock, restricted stock units and unrestricted stock to team members, officers, executives and members of the Board of Directors. The maximum number of shares of common stock which may be issued under the 2004 Plan is 2,750,000 shares. At December 31, 2018, the aggregate number of shares of common stock available for grant under these plans was 1,311,743 shares.

On January 1, 2011, Customers initiated a BRRP. This is a restricted stock unit plan. Team members eligible to participate in the BRRP include the CEO and other senior management and highly compensated team members as determined by the Compensation Committee at its sole discretion. Under the BRRP, a participant may elect to defer not less than 25%, nor more than 50%, of his or her bonus payable with respect to each year of participation. Shares of common stock having a value equal to the portion of the bonus deferred by a participant are allocated to an annual deferral account, and a matching amount equal to an identical number of shares of common stock is also allocated to the annual deferral account. A participant becomes 100% vested in the annual deferral account on the fifth anniversary date of the initial funding of the account, provided he or she remains continuously employed by Customers from the date of funding to the anniversary date.

Vesting is accelerated in the event of involuntary termination other than for cause, retirement at or after age 65, death, termination on account of disability or a change in control of Customers. Participants were first eligible to make elections under the BRRP with respect to their bonuses for 2011, which were payable in first quarter 2012. The BRRP does not provide for a specific number of shares to be reserved; by its terms, the award of restricted stock units under this plan is limited by the amount of cash bonuses paid to the participants in the plan. At December 31, 2018, non-vested restricted stock units outstanding under this plan totaled 254,976.

Share-based-compensation expense relating to stock options and restricted stock units is recognized on a straight-line basis over the vesting periods of the awards and is a component of salaries and employee benefits expense. Total share-based-compensation expense for 2018, 2017 and 2016, was \$8.6 million, \$6.1 million and \$6.2 million, respectively. At December 31, 2018, there was \$20.4 million of unrecognized compensation cost related to all non-vested share-based-compensation awards. This cost is expected to be recognized through December 2023.

In 2014, the shareholders of Customers Bancorp approved the 2014 ESPP. The ESPP is intended to encourage team member participation in the ownership and economic progress of Customers. This plan is intended to qualify as an ESPP within the meaning of the Internal Revenue Code and is administered by the Compensation Committee of the

Board of Directors.

Under the ESPP, team members may elect to purchase shares of Customers' common stock through payroll deduction. Because the purchase price under the plan is 85% of the fair market value of a share of common stock on the first day of each quarterly subscription period (a 15% discount to the market price), Customers' ESPP is considered to be a compensatory plan under current accounting guidance. Therefore, the entire amount of the discount is recognizable compensation expense. ESPP expense for 2018, 2017 and 2016 was \$141 thousand, \$132 thousand, and \$103 thousand, respectively.

145

Table of Contents

Stock Options

Customers estimated the fair value of each option on the date of grant generally using the Black-Scholes option pricing model. The risk-free interest rate was based upon the zero-coupon Treasury rates in effect on the grant date of the options based on the expected life of the option. Expected volatility was based upon limited historical information because Customers' common stock has only been traded since February 2012. Expected life was management's estimate which took into consideration the vesting requirement, generally three or five years.

During 2018, options to purchase an aggregate of 10,000 shares of Customers Bancorp voting common stock were granted to certain officers and team members. The exercise price for the options granted was equal to the closing price of Customers Bancorp's voting common stock on the date of grant. The options issued are subject to a three-year waterfall vesting and expire after ten years.

The following table presents the weighted-average assumptions used and the resulting weighted-average fair value of each option granted for the periods presented.

	2018	2017	2016
Weighted-average risk-free interest rate	2.87 %	2.35 %	1.84 %
Expected dividend yield	— %	— %	— %
Weighted-average expected volatility	25.47 %	25.05 %	23.39 %
Weighted-average expected life (in years)	7.00	7.00	7.00
Weighted-average fair value of each option granted	\$10.05	\$8.68	\$7.61

The following table summarizes stock option activity for the year ended December 31, 2018:

	Number of Shares	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term in Years	Aggregate Intrinsic Value
(dollars in thousands, except weighted-average exercise price)				
Outstanding, December 31, 2017	2,718,694	\$ 21.52		
Granted	10,000	29.48		
Exercised	(197,918)	14.06		\$ 3,123
Forfeited	(10,250)	21.96		
Outstanding, December 31, 2018	2,520,526	\$ 22.13	6.40	\$ 2,311
Exercisable at December 31, 2018	849,303	\$ 16.29	3.68	\$ 2,276

Cash received from the exercise of the stock options during the year ended December 31, 2018 was \$2.8 million. The tax benefit realized for the tax deductions from option exercises totaled \$0.7 million in 2018.

A summary of the status of Customers' non-vested options at December 31, 2018, and changes during the year ended December 31, 2018, is as follows:

	Options	Weighted-Average exercise price
Non-vested at December 31, 2017	2,621,731	\$ 21.85
Granted	10,000	29.48
Vested	(950,258)	16.22
Forfeited	(10,250)	21.96
Non-vested at December 31, 2018	1,671,223	25.10

Restricted Stock Units

The fair value of restricted stock units granted under the 2004 Plan is generally determined based on the closing market price of Customers' common stock on the date of grant. The fair value of restricted stock units granted under the BRRP is measured as of the date on which such portion of the bonus would have been paid had the deferral not been elected.

Beginning in 2018, the Compensation Committee recommended and the Board of Directors approved a new compensation plan which incorporates performance metrics into the restricted stock awards for certain of Customers' key officers. Specifically, 40% of the restricted stock units granted as long term incentive compensation will vest ratably over three years. The remaining

146

Table of Contents

60% will vest upon Customers meeting certain performance metrics, including total shareholder return, return on average common equity, and average NPAs to total assets over a three-year period relative to the performance of its peer group. The performance conditions are considered probable.

There were 433,614 restricted stock units granted during the year ended December 31, 2018. Of the aggregate restricted stock units granted, 17,373 were granted under the BRRP and are subject to five-year cliff vesting. The remaining 416,241 units were granted under the 2004 Plan and are subject to either a three-year waterfall vesting (with one third of the amount vesting annually) or a three-year cliff vesting, with 31,257 of those units also subject to the performance metrics described above.

The table below presents the status of the restricted stock units at December 31, 2018, and changes during the year ended December 31, 2018:

	Restricted Stock Units	Weighted- Average Grant- Date Fair Value
Outstanding and unvested at December 31, 2017	590,036	\$ 24.74
Granted	433,614	23.63
Vested	(97,414)	25.66
Forfeited	(41,577)	27.05
Outstanding and unvested at December 31, 2018	884,659	23.99

Customers has a policy that permits its directors to elect to receive shares of common stock in lieu of their cash retainers. During the year ended December 31, 2018, Customers issued 37,377 shares of common stock with a fair value of \$1.0 million to the directors as compensation for their services. The fair values were generally determined based on the closing price of the common stock the day before the shares were issued.

NOTE 14 – INCOME TAXES

The components of income tax expense were as follows:

	For the Years Ended December 31,		
	2018	2017	2016
(amounts in thousands)			
Current	\$10,056	\$29,924	\$48,472
Deferred	9,303	15,118	(2,579)
Income tax expense	\$19,359	\$45,042	\$45,893

Effective tax rates differ from the federal statutory rate of 21% at December 31, 2018, and at 35% at December 31, 2017 and 2016, which was applied to income before income tax expense, due to the following:

	For the Years Ended December 31,					
	2018		2017		2016	
	Amount	% of pretax income	Amount	% of pretax income	Amount	% of pretax income
(amounts in thousands)						
Federal income tax at statutory rate	\$19,121	21.00 %	\$43,357	35.00 %	\$43,608	35.00 %
State income tax, net of federal benefit	4,067	4.47	3,835	3.10	4,548	3.65
Tax-exempt interest, net of disallowance	(360)	(0.40)	(381)	(0.31)	(237)	(0.19)
Bank-owned life insurance	(1,547)	(1.70)	(2,675)	(2.16)	(1,716)	(1.38)
Equity-based compensation	(547)	(0.60)	(10,741)	(8.67)	(3,659)	(2.94)
Non-deductible executive compensation	230	0.25	654	0.53	—	—
Unrecorded basis difference in foreign subsidiaries	343	0.38	4,527	3.65	2,830	2.27
Enactment of federal tax reform	(21)	(0.02)	5,505	4.44	—	—
Other	(1,927)	(2.12)	961	0.78	519	0.42

Edgar Filing: Customers Bancorp, Inc. - Form 10-K

Table of Contents

Customers accounts for income taxes under the liability method of accounting for income taxes. The income tax accounting guidance results in two components of income tax expense: current and deferred. Current income tax expense reflects taxes to be paid or refunded for the current period by applying the provisions of the enacted tax law to the taxable income or excess of deductions over revenues. Customers determines deferred income taxes using the liability (or balance sheet) method. Under this method, the net deferred tax asset or liability is based on the tax effects of the differences between the book and tax bases of assets and liabilities, and enacted changes in tax rates and laws are recognized in the period in which they occur.

A tax position is recognized if it is more likely than not, based on the technical merits, that the tax position will be realized or sustained upon examination. The term more likely than not means a likelihood of more than 50 percent; the terms examined and upon examination also include resolution of the related appeals or litigation process, if any. A tax position that meets the more likely than not recognition threshold is initially and subsequently measured as the largest amount of tax benefit that has a greater than 50 percent likelihood of being realized upon settlement with a taxing authority that has full knowledge of all relevant information. The determination of whether or not a tax position has met the more likely than not recognition threshold considers the facts, circumstances and information available at the reporting date and is subject to management's judgment.

At December 31, 2018 and 2017, Customers had no ASC 740-10 unrecognized tax benefits. Customers does not expect the total amount of unrecognized tax benefits to significantly increase within the next twelve months.

Customers recognizes interest and penalties on unrecognized tax benefits in other expense.

Realization of deferred tax assets is dependent upon the generation of future taxable income or the existence of sufficient taxable income within the carry-back period. A valuation allowance is provided when it is more likely than not that some portion of the deferred tax assets will not be realized. In assessing the need for a valuation allowance, management considers the scheduled reversal of the deferred tax liabilities, the level of historical taxable income and the projected future taxable income over the periods in which the temporary differences comprising the deferred tax assets will be deductible. Based on its assessment, management determined that no valuation allowance was necessary at December 31, 2018 and 2017.

On December 22, 2017, H.R.1, commonly known as the Tax Cuts and Jobs Act, was signed into law. The Tax Act includes many provisions that affected Customers' income tax expenses, including reducing its corporate federal tax rate from 35% to 21% effective January 1, 2018. As a result of the rate reduction, Customers was required to re-measure, through income tax expense in the period of enactment, its deferred tax assets and liabilities using the enacted rate at which Customers expected them to be recovered or settled. The re-measurement of the net deferred tax asset resulted in additional income tax expense of \$5.5 million during fourth quarter 2017.

Also on December 22, 2017, the SEC released SAB 118 to address any uncertainty or diversity of views in practice in accounting for the income tax effects of the Tax Act in situations where a registrant does not have the necessary information available, prepared or analyzed in reasonable detail to complete this accounting in the reporting period that includes the enactment date. SAB 118 allowed for a measurement period not to extend beyond one year from the Tax Act's enactment date to complete the necessary accounting.

Customers recorded provisional amounts of deferred income taxes using reasonable estimates in three areas where information necessary to complete the accounting was not available, prepared or analyzed as follows: (i) the deferred tax liability for temporary differences between the tax and financial reporting bases of fixed assets principally due to the accelerated depreciation under the Tax Act which allowed for full expensing of qualified property purchased and placed in service after September 27, 2017; (ii) the deferred tax asset for temporary differences associated with accrued compensation was awaiting final determinations of amounts that were paid and deducted on the 2017 income tax returns and (iii) the deferred tax liability for temporary differences associated with equity investments in partnerships were awaiting receipt of Schedules K-1 from outside preparers, which was necessary to determine the 2017 tax impact from these investments.

In a fourth area, Customers made no adjustments to deferred tax assets representing future deductions for accrued compensation that were subject to new limitations under Internal Revenue Code Section 162(m) which, generally, limits the annual deduction for certain compensation paid to certain team members to \$1 million. There was uncertainty in applying the newly enacted rules to existing contracts, and Customers was seeking further clarifications

before completing its analysis.

Customers completed the calculations for the provisional items with the completion of the 2017 tax returns and completed the analysis of the Section 162(m) rules after further guidance was issued. The impact of the completed calculations to the re-measurement of the deferred taxes resulted in an immaterial change and the analysis of the 162(m) rules resulted in no adjustment.

148

Table of Contents

Deferred income taxes reflect temporary differences in the recognition of revenue and expenses for tax reporting and financial statement purposes, principally because certain items are recognized in different periods for financial reporting and tax return purposes. The following represents Customers' deferred tax asset and liabilities as December 31, 2018 and 2017:

	December 31,	
	2018	2017
(amounts in thousands)		
Deferred tax assets		
Allowance for loan losses	\$10,449	\$9,738
Net unrealized losses on securities	7,639	512
OREO write-downs	91	748
Non-accrual interest	539	515
Net operating losses	1,212	1,199
Deferred compensation	1,129	1,181
Equity-based compensation	4,049	2,748
Cash flow hedge	324	84
Incentive compensation	1,056	634
Net deferred loan fees	671	47
Other	3,028	2,215
Total deferred tax assets	30,187	19,621
Deferred tax liabilities		
Fair value adjustments on acquisitions	(569)	(618)
Bank premises and equipment	(884)	(986)
Lease adjustments	(17,786)	(4,899)
Other	(746)	(980)
Total deferred tax liabilities	(19,985)	(7,483)
Net deferred tax asset	\$10,202	\$12,138

Customers had approximately \$5.2 million of federal and state net operating loss carryovers subject to the annual limitation under Internal Revenue code Section 382 at December 31, 2018, that begin to expire in 2027. Customers also has state net operating loss carryovers for some states that begin to expire in 2037.

Customers is subject to U.S. federal income tax as well as income tax in various state and local taxing jurisdictions. Generally, Customers is no longer subject to examination by federal, state, and local taxing authorities for years prior to the year ended December 31, 2015.

NOTE 15 – TRANSACTIONS WITH EXECUTIVE OFFICERS, DIRECTORS AND PRINCIPAL SHAREHOLDERS

Customers has had, and may be expected to have in the future, banking transactions in the ordinary course of business with its executive officers, directors, principal shareholders, their immediate families and affiliated companies (commonly referred to as related parties). The activity relating to loans to such persons was as follows:

	For the Years		
	Ended December		
	31,		
	2018	2017	2016
(amounts in thousands)			
Balance as of December 31,	\$—	\$238	\$220
Additions	27	99	1,160
Repayments	(22)	(337)	(1,142)
Balance as of December 31,	\$5	\$—	\$238

As of December 31, 2018 and 2017, Customers Bank had an outstanding commitment to a related party to provide a letter of credit in the amount of \$0.5 million. As of December 31, 2017, Customers Bank had an outstanding

commitment to one of its related parties to provide short-term commercial real estate financing, subject to certain terms and conditions, not to exceed \$8.0 million.

Some current directors, nominees for director and executive officers of Customers and entities or organizations in which they were executive officers or the equivalent or owners of more than 10% of the equity, were customers of and had transactions with or involving Customers in the ordinary course of business during the fiscal year ended December 31, 2018. None of these transactions involved amounts in excess of 5% of Customers' gross revenues during 2018, nor was Customers indebted to any

Table of Contents

of the foregoing persons or entities in an aggregate amount in excess of 5% of Customers' total assets at December 31, 2018. Additional transactions with such persons and entities may be expected to take place in the ordinary course of business in the future.

At December 31, 2018 and 2017, Customers had approximately \$15.3 million and \$10.6 million, respectively, in deposits from related parties, including directors and certain executive officers.

NOTE 16 – FINANCIAL INSTRUMENTS WITH OFF-BALANCE SHEET RISK

Customers is involved with financial instruments and other commitments with off-balance sheet risks. Financial instruments with off-balance sheet risks are incurred in the normal course of business to meet the financing needs of the Bank's customers. These financial instruments include commitments to extend credit, including unused portions of lines of credit and standby letters of credit. Those instruments involve, to varying degrees, elements of credit risk in excess of the amount recognized on the balance sheets.

With commitments to extend credit, exposures to credit loss in the event of non-performance by the other party to the financial instrument is represented by the contractual amount of those instruments. The same credit policies are used in making commitments and conditional obligations as for on-balance sheet instruments. Since they involve credit risk similar to extending a loan, commitments to extend credit are subject to the Bank's credit policy and other underwriting standards.

As of December 31, 2018 and 2017, the following off-balance sheet commitments, financial instruments and other arrangements were outstanding:

	December 31,	
	2018	2017
(amounts in thousands)		
Commitments to fund loans	\$345,608	\$333,874
Unfunded commitments to fund mortgage warehouse loans	1,537,900	1,567,139
Unfunded commitments under lines of credit and credit cards	867,131	485,345
Letters of credit	55,659	39,890
Other unused commitments	4,822	6,679

Commitments to fund loans, unfunded commitments to fund mortgage warehouse loans, unfunded commitments under lines of credit letters of credit and credit cards are agreements to extend credit to or for the benefit of a customer in the ordinary course of the Bank's business.

Commitments to fund loans and unfunded commitments under lines of credit may be obligations of the Bank as long as there is no violation of any condition established in the contract. Because many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. The Bank evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if the Bank deems it necessary upon extension of credit, is based upon management's credit evaluation. Collateral held varies but may include personal or commercial real estate, accounts receivable, inventory and equipment.

Mortgage warehouse loan commitments are agreements to fund the pipelines of mortgage banking businesses from closing of individual mortgage loans until their sale into the secondary market. Most of the individual mortgage loans are insured or guaranteed by the U.S. government through one of its programs such as FHA, VA, or are conventional loans eligible for sale to Fannie Mae and Freddie Mac. These commitments generally fluctuate monthly based on changes in interest rates, refinance activity, new home sales and laws and regulation.

Outstanding letters of credit written are conditional commitments issued by the Bank to guarantee the performance of a customer to a third party. Letters of credit may obligate the Bank to fund draws under those letters of credit whether or not a customer continues to meet the conditions of the extension of credit. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. The current amount of the liabilities as of December 31, 2018 and 2017 for guarantees under standby letters of credit issued was not material.

NOTE 17 – REGULATORY MATTERS

The Bank and the Bancorp are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet the minimum capital requirements can result in certain mandatory, and possibly additional discretionary, actions

150

Table of Contents

by regulators that, if undertaken, could have a direct material effect on Customers' financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Bank and Bancorp must meet specific capital guidelines that involve quantitative measures of their assets, liabilities and certain off-balance sheet items, as calculated under the regulatory accounting practices. The capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors. Prompt corrective action provisions are not applicable to bank holding companies.

Quantitative measures established by regulation to ensure capital adequacy require the Bank and the Bancorp to maintain minimum amounts and ratios (set forth in the following table) of common equity Tier 1, Tier 1, and total capital to risk-weighted assets, and Tier 1 capital to average assets (as defined in the regulations). At December 31, 2018 and 2017, the Bank and the Bancorp satisfied all capital requirements to which they were subject.

Generally, to comply with the regulatory definition of adequately capitalized, or well capitalized, respectively, or to comply with the Basel III capital requirements, an institution must at least maintain the common equity Tier 1, Tier 1 and total risk-based capital ratios and the Tier 1 leverage ratio in excess of the related minimum ratios set forth in the following table:

(amounts in thousands)	Actual		Minimum Capital Levels to be Classified as:					
	Amount	Ratio	Adequately Capitalized		Well Capitalized		Basel III Compliant	
	Amount	Ratio	Amount	Ratio	Amount	Ratio	Amount	Ratio
December 31, 2018								
Common equity Tier 1 (to risk-weighted assets)								
Customers Bancorp, Inc.	\$745,795	8.964 %	\$374,388	4.500 %	N/A	N/A	\$530,384	6.375 %
Customers Bank	\$1,066,121	12.822 %	\$374,160	4.500 %	\$540,453	6.500 %	\$530,059	6.375 %
Tier 1 capital (to risk-weighted assets)								
Customers Bancorp, Inc.	\$963,266	11.578 %	\$499,185	6.000 %	N/A	N/A	\$655,180	7.875 %
Customers Bank	\$1,066,121	12.822 %	\$498,879	6.000 %	\$665,173	8.000 %	\$654,779	7.875 %
Total capital (to risk-weighted assets)								
Customers Bancorp, Inc.	\$1,081,962	13.005 %	\$665,580	8.000 %	N/A	N/A	\$821,575	9.875 %
Customers Bank	\$1,215,522	14.619 %	\$665,173	8.000 %	\$831,466	10.000 %	\$821,072	9.875 %

Customers Bancorp, Inc.	\$963,266	9.665 %	\$398,668	4.000 %	N/A	N/A	\$398,668	4.000 %
Customers Bank	\$1,066,121	10.699 %	\$398,570	4.000 %	\$498,212	5.000 %	\$398,570	4.000 %
December 31, 2017								
Common equity Tier 1 (to risk-weighted assets)								
Customers Bancorp, Inc.	\$689,494	8.805 %	\$352,368	4.500 %	N/A	N/A	\$450,248	5.750 %
Customers Bank	\$1,023,564	13.081 %	\$352,122	4.500 %	\$508,621	6.500 %	\$449,934	5.750 %
Tier 1 capital (to risk-weighted assets)								
Customers Bancorp, Inc.	\$906,963	11.583 %	\$469,824	6.000 %	N/A	N/A	\$567,704	7.250 %
Customers Bank	\$1,023,564	13.081 %	\$469,496	6.000 %	\$625,994	8.000 %	\$567,307	7.250 %
Total capital (to risk-weighted assets)								
Customers Bancorp, Inc.	\$1,021,601	13.047 %	\$626,432	8.000 %	N/A	N/A	\$724,313	9.250 %
Customers Bank	\$1,170,666	14.961 %	\$625,994	8.000 %	\$782,493	10.000 %	\$723,806	9.250 %
Tier 1 capital (to average assets)								
Customers Bancorp, Inc.	\$906,963	8.937 %	\$405,949	4.000 %	N/A	N/A	\$405,949	4.000 %

Table of Contents

Effective January 1, 2018, the capital level required to avoid limitation on elective distributions applicable to the Bancorp and the Bank were as follows:

- (i) a common equity Tier 1 risk-based capital ratio of 6.375%;
- (ii) a Tier 1 risk-based capital ratio of 7.875% and
- (iii) a Total risk-based capital ratio of 9.875%.

Failure to maintain the required capital conservation buffer will result in limitations on elective distributions, including capital distributions and discretionary bonuses to executive officers.

NOTE 18 – DISCLOSURES ABOUT FAIR VALUE OF FINANCIAL INSTRUMENTS

Customers uses fair value measurements to record fair value adjustments to certain assets and liabilities and to disclose the fair value of its financial instruments. FASB ASC Topic 825, Financial Instruments, requires disclosure of the estimated fair value of an entity's assets and liabilities considered to be financial instruments. For Customers, as for most financial institutions, the majority of its assets and liabilities are considered to be financial instruments. However, many of these instruments lack an available trading market as characterized by a willing buyer and willing seller engaging in an exchange transaction. For fair value disclosure purposes, Customers utilized certain fair value measurement criteria under the FASB ASC 820, Fair Value Measurements and Disclosures, as explained below.

In accordance with ASC 820, the fair value of a financial instrument is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value is best determined based upon quoted market prices. However, in many instances, there are no quoted market prices for Customers' various financial instruments. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. Accordingly, the fair value estimates may not be realized in an immediate settlement of the instrument.

The fair value guidance provides a consistent definition of fair value, focusing on an exit price in an orderly transaction (i.e., not a forced liquidation or distressed sale) between market participants at the measurement date under current market conditions. If there has been a significant decrease in the volume and level of activity for the asset or liability, a change in valuation technique or the use of multiple valuation techniques may be appropriate. In such instances, determining the price at which willing market participants would transact at the measurement date under current market conditions depends on the facts and circumstances and requires the use of significant judgment. The fair value is a reasonable point within the range that is most representative of fair value under current market conditions.

The fair value guidance also establishes a fair value hierarchy and describes the following three levels used to classify fair value measurements:

Level 1: Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

Level 2: Quoted prices in markets that are not active, or inputs that are observable either directly or indirectly, for substantially the full term of the asset or liability.

Level 3: Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (i.e., supported with little or no market activity).

A financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement.

The following methods and assumptions were used to estimate the fair values of Customers' financial instruments as of December 31, 2018 and 2017:

Financial Instruments Recorded at Fair Value on a Recurring Basis

Investment securities:

The fair values of equity securities and available-for-sale debt securities are determined by obtaining quoted market prices on nationally recognized and foreign securities exchanges (Level 1), matrix pricing (Level 2), which is a mathematical technique used widely in the industry to value debt securities without relying exclusively on quoted

market prices for the specific

152

Table of Contents

securities, but rather by relying on the securities' relationship to other benchmark quoted prices, or externally developed models that use unobservable inputs due to limited or no market activity of the instrument (Level 3). These assets are classified as Level 1, 2 or 3 fair values, based upon the lowest level of input that is significant to the fair value measurements.

Loans held for sale - Consumer residential mortgage loans (fair value option):

Customers generally estimates the fair values of residential mortgage loans held for sale based on commitments on hand from investors within the secondary market for loans with similar characteristics. These assets are classified as Level 2 fair values, based upon the lowest level of input that is significant to the fair value measurements.

Loans receivable - Commercial mortgage warehouse loans (fair value option):

The fair value of commercial mortgage warehouse loans is the amount of cash initially advanced to fund the mortgage, plus accrued interest and fees, as specified in the respective agreements. The loan is used by mortgage companies as short-term bridge financing between the funding of mortgage loans and the finalization of the sale of the loans to an investor. Changes in fair value are not expected to be recognized since at inception of the transaction the underlying loans have already been sold to an approved investor. Additionally, the interest rate is variable, and the transaction is short-term, with an average life of 23 days from purchase to sale. These assets are classified as Level 2 fair values, based upon the lowest level of input that is significant to the fair value measurements.

Derivatives (Assets and Liabilities):

The fair values of interest rate swaps and credit derivatives are determined using models that incorporate readily observable market data into a market standard methodology. This methodology nets the discounted future cash receipts and the discounted expected cash payments. The discounted variable cash payments are based on expectations of future interest rates derived from observable market interest rate curves. In addition, fair value is adjusted for the effect of nonperformance risk by incorporating credit valuation adjustments for the Bank and its counterparties. These assets and liabilities are classified as Level 2 fair values, based upon the lowest level of input that is significant to the fair value measurements.

The fair values of the residential mortgage loan commitments are derived from the estimated fair values that can be generated when the underlying mortgage loan is sold in the secondary market. The Bank generally uses commitments on hand from third-party investors to estimate an exit price and adjusts for the probability of the commitment being exercised based on the Bank's internal experience (i.e., pull-through rate). These assets and liabilities are classified as Level 3 fair values, based upon the lowest level of input that is significant to the fair value measurements.

Derivative assets and liabilities are presented in "Other assets" and "Accrued interest payable and other liabilities" on the consolidated balance sheet.

The following information should not be interpreted as an estimate of Customers' fair value in its entirety because fair value calculations are only provided for a limited portion of Customers' assets and liabilities. Due to a wide range of valuation techniques and the degree of subjectivity used in making these estimates, comparisons between Customers' disclosures and those of other companies may not be meaningful.

Financial Instruments Recorded at Fair Value on a Nonrecurring Basis

Impaired loans:

Impaired loans are those loans that are accounted for under ASC 310, Receivables, in which the Bank has measured impairment generally based on the fair value of the loan's collateral or discounted cash flow analysis. Fair value is generally determined based upon independent third-party appraisals of the properties that collateralize the loans or discounted cash flows based upon the expected proceeds. These assets are generally classified as Level 3 fair values, based upon the lowest level of input that is significant to the fair value measurements.

Table of Contents

The estimated fair values of Customers' financial instruments at December 31, 2018 and 2017 were as follows:

	Carrying Amount	Estimated Fair Value	Fair Value Measurements at December 31, 2018		
			Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
(amounts in thousands)					
Assets					
Cash and cash equivalents	\$62,135	\$62,135	\$ 62,135	\$ —	\$ —
