BIOMERICA, INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

#### Note 1: Basis of Presentation

The information set forth in these condensed consolidated statements is unaudited and reflects all adjustments which, in the opinion of management, are necessary to present a fair statement of the consolidated results of operations of Biomerica, Inc. and subsidiaries (the Company), for the periods indicated. It does not include all information and footnotes necessary for a fair presentation of financial position, results of operations, and cash flows in conformity with generally accepted accounting principles. All adjustments that were made are of normal recurring nature.

The unaudited Condensed Consolidated Financial Statements and Notes are presented as permitted by the requirements for Form 10-Q and do not contain certain information included in our annual financial statements and notes. The condensed consolidated balance sheet data as of May 31, 2013 was derived from audited financial statements. The accompanying interim condensed consolidated financial statements should be read in conjunction with the financial statements and related notes included in our Annual Report on Form 10-K filed with the Securities and Exchange Commission (SEC) on August 29, 2013 for the fiscal year ended May 31, 2013. The results of operations for our interim periods are not necessarily indicative of results to be achieved for our full fiscal year.

#### Note 2: Significant Accounting Policies

#### Principles of Consolidation

The condensed consolidated financial statements include the accounts of Biomerica, Inc. as well as the Company's German subsidiary and Mexican subsidiary which have not begun operations. All significant intercompany accounts and transactions have been eliminated in consolidation.

#### Accounting Estimates

The preparation of financial statements in conformity with generally accepted accounting principles in the United States of America (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reported period. Actual results could materially differ from those estimates.

#### Cash and Cash Equivalents

Cash and cash equivalents consist of demand deposits and money market accounts with original maturities of less than three months.

#### Accounts Receivable

The Company extends unsecured credit to its customers on a regular basis. International accounts are required to prepay until they establish a history with the Company and at that time, they are extended credit at levels based on a number of criteria. Credit levels are approved by designated upper level management. Domestic customers are extended initial credit limits until they establish a history with the Company or submit credit information. All increases in credit limits are also approved by designated upper level management. Management evaluates receivables on a quarterly basis and adjusts the reserve for bad debt accordingly. Balances over ninety days old are reserved for unless collection is reasonably assured. Any charge-offs are approved by upper level management prior to charging off.

Occasionally certain long-standing customers, who routinely place large orders, will have unusually large accounts receivables balances relative to the total gross accounts receivables. At February 28, 2014, one customer accounted for 32.1% of the Company s outstanding gross receivable balance and one foreign customer accounted for 43.4% and 15.3% of the Company s net sales for the three and nine months ended February 28, 2014, respectively. Management monitors the payments for these large balances closely and very often requires payment of existing invoices before shipping new sales orders.

#### Inventories

The Company values inventory at the lower of cost (determined using a combination of specific lot identification and the first-in, first-out methods) or market. Management periodically reviews inventory for excess quantities and obsolescence. Management evaluates quantities on hand, physical condition, and technical functionality as these characteristics may be impacted by anticipated customer demand for current products and new product introductions. The reserve is adjusted based on such evaluation, with a corresponding provision included in cost of sales. Abnormal amounts of idle facility expenses, freight, handling costs and wasted material are recognized as current period charges and the allocation of fixed production overhead is based on the normal capacity of the Company s production facilities.

The approximate balances of inventories are the following at:

	February 28,		May 31,		
	2014			2013	
Raw materials	\$	885,000	\$	787,000	
Work in progress		758,000		555,000	
Finished products		295,000		229,000	
Total	\$	1,938,000	\$	1,571,000	

#### Property and Equipment

Property and equipment are stated at cost. Expenditures for additions and major improvements are capitalized. Repairs and maintenance costs are charged to operations as incurred. When property and equipment are retired or otherwise disposed of, the related cost and accumulated depreciation or amortization is

removed from the accounts, and gains or losses from retirements and dispositions are credited or charged to income.

Depreciation and amortization are provided over the estimated useful lives of the related assets, ranging from 5 to 10 years, using the straight-line method. Leasehold improvements are amortized over the lesser of the estimated useful life of the asset or the term of the lease. Depreciation and amortization expense on property and equipment and leasehold improvements amounted to \$45,283 and \$49,220 for the three months ended February 28, 2014 and 2013, and \$131,514 and \$142,484 for the nine months ended February 28, 2014 and 2013, respectively.

#### Intangible Assets

Intangible assets include trademarks, product rights, licenses, technology rights and patents, and are accounted for based on Accounting Standards Codification ASC 350 Intangibles Goodwill and Other (ASC 350). In that regard, intangible assets that have indefinite useful lives are not amortized but are tested at least annually for impairment or more frequently if events or changes in circumstances indicate that the asset might be impaired. Intangible assets are being amortized using the straight-line method over the useful life; not to exceed 18 years for marketing and distribution rights, 10 years for purchased technology use rights, licenses, and 17 years for patents.

Amortization amounted to \$5,989 and \$4,368 for the three months ended February 28, 2014 and 2013, respectively, and \$17,110 and \$21,927 for the nine months ended February 28, 2014 and 2013, respectively.

#### Stock-Based Compensation

The Company follows the guidance of the accounting provisions of ASC 718 Share-based Compensation (ASC 718), which requires the use of the fair-value based method to determine compensation for all arrangements under which employees and others receive shares of stock or equity instruments (warrants and options). The fair value of each option award is estimated on the date of grant using the Black-Scholes valuation model that uses assumptions for expected volatility, expected dividends, expected forfeiture rate, expected term, and the risk-free interest rate.

Expected volatilities are based on weighted averages of the historical volatility of the Company s stock and other factors estimated over the expected term of the options. The expected forfeiture rate is based on historical forfeitures experienced. The expected term of options granted is derived using the simplified method which computes expected term as the average of the sum of the vesting term plus the contract term as historically the Company had limited activity surrounding its options. The risk-free rate is based on the U.S. Treasury yield curve in effect at the time of grant for the period of the expected term.

The following summary presents the options and warrants granted, exercised, expired, cancelled and outstanding as of February 28, 2014:

	Option	Exercise Price
		Weighted
	Shares	Average
Outstanding May 31, 2013	846,500	\$ 0.47
Granted	52,000	0.84
Exercised	(39,000)	0.44
Cancelled or expired	(10,000)	0.43
Outstanding February 28, 2014	849,500	\$ 0.50

On June 10, 2013, the Board granted a stock option to purchase 20,000 shares of the Company's common stock at the purchase price of \$0.93 per share.

On November 13, 2013, the Board granted stock options to purchase 32,000 shares of the Company s common stock at the purchase price of \$0.84 per share.

In June 2013, options to purchase 2,000 shares of the Company s common stock were exercised at the exercise price of \$0.38 per share. Net proceeds to the Company were \$760.

In September 2013, options to purchase 2,500 shares of the Company s common stock were exercised at the exercise prices of \$0.45 and \$0.38 per share. Net proceeds to the Company were \$1,020.

In December 2013, options to purchase 12,000 shares of the Company s common stock were exercised at the exercise price of \$0.38 per share. Net proceeds to the Company were \$5,400.

In January 2014, options to purchase 22,500 shares of the Company s common stock were exercised at the exercise prices ranging from \$0.43-\$0.45 per share. Net proceeds to the Company were \$10,095.

#### Revenue Recognition

Revenues from product sales are recognized at the time the product is shipped, customarily FOB shipping point, at which point title passes. An allowance is established when necessary for estimated returns as revenue is recognized. In conjunction with sales to certain customers, the Company provides free products upon attaining certain levels of purchases by the customer. The Company accounts for these free products in accordance with ASC 605-50 Revenue Recognition Customer Payments and Incentives and recognizes the cost of the product as part of cost of sales.

6

#### <u>Investments</u>

From time-to-time, the Company makes investments in privately-held companies. The Company determines whether the fair values of any investments in privately-held entities have declined below their carrying value whenever adverse events or changes in circumstances indicate that recorded values may not be recoverable. If the Company considers any such decline to be other than temporary (based on various factors, including historical financial results, and the overall health of the investee s industry), a write-down to estimated fair value is recorded. The Company currently has not written down the investment and no events have occurred which could indicate the carrying value to be less than the fair value. Investments represent the Company s investment in a Polish distributor which is primarily engaged in distributing medical devices. The Company owns approximately 6% of the investee, and accordingly, applies the cost method to account for the investment. Under the cost method, investments are recorded at cost, with gains and losses recognized as of the sale date, and income recorded when received.

#### Shipping and Handling Fees and Costs

Shipping and handling fees billed to customers are classified as revenues, and shipping and handling costs are classified as cost of sales. The Company included shipping and handling fees billed to customers in net sales. The Company included shipping and handling costs associated with inbound freight and unreimbursed shipping to customers in cost of sales.

#### Research and Development

Research and development costs are expensed as incurred.

#### Income Taxes

The Company accounts for income taxes in accordance with ASC 740, Income Taxes (ASC 740). Deferred tax assets and liabilities arise from temporary differences

between the tax bases of assets and liabilities and their reported amounts in the consolidated financial statements that will result in taxable or deductible amounts in future years. These temporary differences are measured using enacted tax rates. A valuation allowance is recorded to reduce deferred tax assets to the extent that management considers it is more likely than not that a deferred tax asset will not be realized. In determining the valuation allowance, management considers factors such as the reversal of deferred income tax liabilities, projected taxable income, and the character of income tax assets and tax planning strategies. A change to these factors could impact the estimated valuation allowance and income tax expense. The Company s annual effective tax rate is approximately 38%, however, due to its federal net operating loss carry forwards, the effective tax rate for the three and nine months ended February 28, 2014 was adjusted for utilization of these carry forwards. During the quarter ended February 28, 2013, the Company recorded a refund due from the state of California which resulted in an adjustment to the provision for income taxes.

#### Foreign Currency Translation

The subsidiary located in Germany is accounted for primarily using local functional currency. Accordingly, assets and liabilities of this subsidiary are translated using exchange rates in effect at the end of the period, and revenues and costs are translated using average exchange rates for the period. The resulting adjustments are presented as a separate component of accumulated other comprehensive loss.

#### Deferred Rent

Incentive payments received from landlords are recorded as deferred lease incentives and are amortized over the underlying lease term on a straight-line basis as a reduction of rent expense. When the terms of an operating lease provide for periods of free rent, rent concessions, and/or rent escalations, the Company establishes a deferred rent liability for the difference between the scheduled rent payment and the straight-line rent expense recognized. This deferred rent liability is amortized over the underlying lease term on a straight-line basis as a reduction of rent expense.

#### Net Income (Loss) Per Share

Basic earnings (loss) per share are computed as net income (loss) divided by the weighted average number of common shares outstanding for the period. Diluted earnings per share reflect the potential dilution that could occur from common shares issuable through stock options, warrants and other convertible securities. The total amount of anti-dilutive warrants or options not included in the earnings per share calculation for the three months ended February 28, 2013 was 910,625. There were no anti-dilutive warrants or options excluded from the earnings per share calculation for the nine months ended February 28, 2013. There were no anti-dilutive warrants or options excluded from the earnings per share calculation for the three months ended February 28, 2014. The total amount of anti-dilutive warrants or options not included in earnings (loss) per share calculation for the nine months ended February 28, 2014 was 359,013.

The following table illustrates the required disclosure of the reconciliation of the numerators and denominators of the basic and diluted earnings per share computations.

	Nine Months				Three Months			
	Ended				Ended			
	February 28,				February 28,			
	2014		2013		2014		2013

#### New Accounting Pronouncements

Management does not believe that any recently issued, but not effective, accounting standards if currently adopted would have a material effect on the accompanying condensed consolidated financial statements.

#### Note 3: Accounts Payable and Accrued Expenses

	February 28,			May 31,		
	2014	1	20	)13		
Accounts payable	\$	317,464	\$	282,138		
Accrued expenses		45,996		-		
Deferred rent		59,670		69,779		
Total	\$	423,130	\$	351,917		

## Note 4: Shareholders' Equity

For the nine months ended February 28, 2014, options to purchase 39,000 shares of the Company's common stock were exercised. See Note 2.

In January 2014, pursuant to the Stock Purchase Agreement dated April 18, 2013, the Company sold the remaining 200,000 shares of its common stock at a price of \$1.25 per share to an investor for \$250,000.

## Note 5: Geographic Information

Financial information about foreign and domestic operations and export sales is as follows:

		Nine Months Ended February 28,				Three Months Ended February 28,			
		2014		2013		2014		2013
