

NextEra Energy Partners, LP
Form 10-Q
October 27, 2017

UNITED STATES SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2017

Commission File Number	Exact name of registrant as specified in its charter, address of principal executive office and registrant's telephone number	IRS Employer Identification Number
1-36518	NEXTERA ENERGY PARTNERS, LP 700 Universe Boulevard Juno Beach, Florida 33408 (561) 694-4000	30-0818558

State or other jurisdiction of incorporation or organization: Delaware

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months, and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months. Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Securities Exchange Act of 1934.

Large Accelerated Filer <input checked="" type="checkbox"/>	Accelerated Filer <input type="checkbox"/>	Non-Accelerated Filer <input type="checkbox"/>	Smaller Reporting Company <input type="checkbox"/>	Emerging Growth Company <input type="checkbox"/>
---	--	--	--	--

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Securities Exchange Act of 1934.

Edgar Filing: NextEra Energy Partners, LP - Form 10-Q

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Securities Exchange Act of 1934). Yes No

Number of NextEra Energy Partners, LP common units outstanding as of September 30, 2017: 54,250,995

DEFINITIONS

Acronyms and defined terms used in the text include the following:

Term	Meaning
2016 Form 10-K	NEP's Annual Report on Form 10-K for the year ended December 31, 2016
AOCI	accumulated other comprehensive income (loss)
ASA	administrative services agreements
BLM	U.S. Bureau of Land Management
CITC	convertible investment tax credit
COD	commercial operation date
CSCS agreement	cash sweep and credit support agreement
FIT	Feed-in-Tariff
GWh	gigawatt-hour(s)
IDR fee	certain payments from NEP OpCo to NEE Management as a component of the MSA which are based on the achievement by NEP OpCo of certain target quarterly distribution levels to its unitholders
IPP	independent power producer
management sub-contract	management services sub-contract between NEE Management and NEER
Management's Discussion	Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations
MSA	management services agreement among NEP, NEE Management, NEP OpCo and NEP OpCo GP
MW	megawatt(s)
NEE	NextEra Energy, Inc.
NEECH	NextEra Energy Capital Holdings, Inc.
NEE Equity	NextEra Energy Equity Partners, LP
NEE Management	NextEra Energy Management Partners, LP
NEER	NextEra Energy Resources, LLC
NEP	NextEra Energy Partners, LP
NEP GP	NextEra Energy Partners GP, Inc.
NEP OpCo	NextEra Energy Operating Partners, LP
NEP OpCo GP	NextEra Energy Operating Partners GP, LLC
NEP partnership agreement	agreement of limited partnership of NEP, as amended and restated
NOLs	net operating losses
Note __	Note __ to condensed consolidated financial statements
O&M	operations and maintenance
Pemex	Petróleos Mexicanos
PPA	power purchase agreement, which could include contracts under a FIT or RESOP
RESOP	Renewable Energy Standard Offer Program
SEC	U.S. Securities and Exchange Commission
Texas pipelines	natural gas pipeline assets located in Texas
Texas pipelines acquisition	Acquisition of NET Holdings Management, LLC (the Texas pipeline business)
Texas pipeline entities	the subsidiaries of NEP that directly own the Texas pipelines
U.S.	United States of America
U.S. Project Entities	project entities located within the U.S.
VIE	variable interest entity

Each of NEP and NEP OpCo has subsidiaries and affiliates with names that may include NextEra Energy, NextEra Energy Partners and similar references. For convenience and simplicity, in this report, the terms NEP and NEP OpCo are sometimes used as abbreviated references to specific subsidiaries, affiliates or groups of subsidiaries or affiliates. The precise meaning depends on the context. Discussions of NEP's ownership of subsidiaries and projects refers to its controlling interest in the general partner of NEP OpCo and NEP's indirect interest in and control over the subsidiaries of NEP OpCo. See Note 5 for a description of the noncontrolling interest in NEP OpCo.

FORWARD-LOOKING STATEMENTS

This report includes forward-looking statements within the meaning of the federal securities laws. Any statements that express, or involve discussions as to, expectations, beliefs, plans, objectives, assumptions, strategies, future events or performance (often, but not always, through the use of words or phrases such as result, are expected to, will continue, anticipate, aim, believe, will, could, should, would, estimated, may, plan, potential, future, projection, goals, target, predict and intend or words of similar meaning) are not statements of historical facts and may be forward looking. Forward-looking statements involve estimates, assumptions and uncertainties. Accordingly, any such statements are qualified in their entirety by reference to, and are accompanied by, the following important factors (in addition to any assumptions and other factors referred to specifically in connection with such forward-looking statements) that could have a significant impact on NEP's operations and financial results, and could cause NEP's actual results to differ materially from those contained or implied in forward-looking statements made by or on behalf of NEP in this Form 10-Q, in presentations, on its website, in response to questions or otherwise.

Operational Risks

NEP has a limited operating history and its projects include renewable energy projects that have a limited operating history. Such projects may not perform as expected.

NEP's ability to make cash distributions to its unitholders is affected by wind and solar conditions at its renewable energy projects.

NEP's business, financial condition, results of operations and prospects can be materially adversely affected by weather conditions, including, but not limited to, the impact of severe weather.

Operation and maintenance of renewable energy projects involve significant risks that could result in unplanned power outages, reduced output, personal injury or loss of life.

Natural gas gathering and transmission activities involve numerous risks that may result in accidents or otherwise affect the Texas pipelines' operations.

NEP depends on the Texas pipelines and certain of the renewable energy projects in its portfolio for a substantial portion of its anticipated cash flows.

NEP is pursuing the expansion of natural gas pipelines in its portfolio that will require up-front capital expenditures and expose NEP to project development risks.

NEP's ability to maximize the productivity of the Texas pipeline business and to complete potential pipeline expansion projects is dependent on the continued availability of natural gas production in the Texas pipelines' areas of operation.

Terrorist or similar attacks could impact NEP's projects, pipelines or surrounding areas and adversely affect its business.

The ability of NEP to obtain insurance and the terms of any available insurance coverage could be materially adversely affected by international, national, state or local events and company-specific events, as well as the financial condition of insurers. NEP's insurance coverage does not insure against all potential risks and it may become subject to higher insurance premiums.

Warranties provided by the suppliers of equipment for NEP's projects may be limited by the ability of a supplier to satisfy its warranty obligations, or by the terms of the warranty, so the warranties may be insufficient to compensate NEP for its losses.

Supplier concentration at certain of NEP's projects may expose it to significant credit or performance risks.

NEP relies on interconnection and transmission facilities of third parties to deliver energy from its renewable energy projects and, if these facilities become unavailable, NEP's wind and solar projects may not be able to operate or deliver energy.

If third-party pipelines and other facilities interconnected to the Texas pipelines become partially or fully unavailable to transport natural gas, NEP's revenues and cash available for distribution to unitholders could be adversely affected. NEP's business is subject to liabilities and operating restrictions arising from environmental, health and safety laws and regulations, compliance with which may require significant capital expenditures, increase NEP's cost of operations and affect or limit its business plans.

• NEP's renewable energy projects may be adversely affected by legislative changes or a failure to comply with applicable energy regulations.

• A change in the jurisdictional characterization of some of the Texas pipeline entities' assets, or a change in law or regulatory policy, could result in increased regulation of these assets, which could have a material adverse effect on NEP's business, financial condition, results of operations and ability to make cash distributions to its unitholders.

• NEP may incur significant costs and liabilities as a result of pipeline integrity management program testing and any necessary pipeline repair or preventative or remedial measures.

• The Texas pipelines' operations could incur significant costs if the Pipeline and Hazardous Materials Safety Administration or the Railroad Commission of Texas adopts more stringent regulations.

• Pemex may claim certain immunities under the Foreign Sovereign Immunities Act and Mexican law, and the Texas pipeline entities' ability to sue or recover from Pemex for breach of contract may be limited and may be exacerbated if there is a deterioration in the economic relationship between the U.S. and Mexico.

• NEP does not own all of the land on which the projects in its portfolio are located and its use and enjoyment of the property may be adversely affected to the extent that there are any lienholders or leaseholders that have rights that are superior to NEP's rights or the BLM suspends its federal rights-of-way grants.

• NEP is subject to risks associated with litigation or administrative proceedings that could materially impact its operations, including, but not limited to, proceedings related to projects it acquires in the future.

• NEP's wind projects located in Canada are subject to Canadian domestic content requirements under their FIT contracts.

• NEP's cross-border operations require NEP to comply with anti-corruption laws and regulations of the U.S. government and non-U.S. jurisdictions.

• NEP is subject to risks associated with its ownership or acquisition of projects or pipelines that remain under construction, which could result in its inability to complete construction projects on time or at all, and make projects too expensive to complete or cause the return on an investment to be less than expected.

Contract Risks

• NEP relies on a limited number of customers and is exposed to the risk that they are unwilling or unable to fulfill their contractual obligations to NEP or that they otherwise terminate their agreements with NEP.

• NEP may not be able to extend, renew or replace expiring or terminated PPAs at favorable rates or on a long-term basis.

• NEP may be unable to secure renewals of long-term natural gas transportation agreements, which could expose its revenues to increased volatility.

• If the energy production by or availability of NEP's U.S. renewable energy projects is less than expected, they may not be able to satisfy minimum production or availability obligations under the U.S. Project Entities' PPAs.

Risks Related to NEP's Acquisition Strategy and Future Growth

• NEP's growth strategy depends on locating and acquiring interests in additional projects consistent with its business strategy at favorable prices.

• NEP OpCo's partnership agreement requires that it distribute its available cash, which could limit NEP's ability to grow and make acquisitions.

• Lower prices for other fuel sources may reduce the demand for wind and solar energy.

• Reductions in demand for natural gas in the United States or Mexico and low market prices of natural gas could materially adversely affect the Texas pipelines' operations and cash flows.

• Government laws, regulations and policies providing incentives and subsidies for clean energy could be changed, reduced or eliminated at any time and such changes may negatively impact NEP's growth strategy.

• NEP's growth strategy depends on the acquisition of projects developed by NEE and third parties, which face risks related to project siting, financing, construction, permitting, the environment, governmental approvals and the negotiation of project development agreements.

• Acquisitions of existing clean energy projects involve numerous risks.

- Renewable energy procurement is subject to U.S. state and Canadian provincial regulations, with relatively irregular, infrequent and often competitive procurement windows.

• NEP may continue to acquire other sources of clean energy and may expand to include other types of assets. Any further acquisition of non-renewable energy projects may present unforeseen challenges and result in a competitive disadvantage relative to NEP's more-established competitors.

• NEP faces substantial competition primarily from regulated utilities, developers, IPPs, pension funds and private equity funds for opportunities in North America.

• The natural gas pipeline industry is highly competitive, and increased competitive pressure could adversely affect NEP's business.

Risks Related to NEP's Financial Activities

• NEP may not be able to access sources of capital on commercially reasonable terms, which would have a material adverse effect on its ability to consummate future acquisitions.

• Restrictions in NEP's and its subsidiaries' financing agreements could adversely affect NEP's business, financial condition, results of operations and ability to make cash distributions to its unitholders.

• NEP's cash distributions to its unitholders may be reduced as a result of restrictions on NEP's subsidiaries' cash distributions to NEP under the terms of their indebtedness.

• NEP's subsidiaries' substantial amount of indebtedness may adversely affect NEP's ability to operate its business, and its failure to comply with the terms of its subsidiaries' indebtedness could have a material adverse effect on NEP's financial condition.

Currency exchange rate fluctuations may affect NEP's operations.

NEP is exposed to risks inherent in its use of interest rate swaps.

Risks Related to NEP's Relationship with NEE

NEE exercises significant influence over NEP.

NEP receives credit support from NEE and its affiliates. NEP's subsidiaries may default under contracts or become subject to cash sweeps if credit support is terminated, if NEE or its affiliates fail to honor their obligations under credit support arrangements, or if NEE or another credit support provider ceases to satisfy creditworthiness requirements, and NEP will be required in certain circumstances to reimburse NEE for draws that are made on credit support.

NEE or one of its affiliates is permitted to borrow funds received by NEP's subsidiaries and is obligated to return these funds only as needed to cover project costs and distributions or as demanded by NEP OpCo.

NEP's financial condition and ability to make distributions to its unitholders, as well as its ability to grow distributions in the future, is highly dependent on NEE's performance of its obligations to return all or a portion of these funds.

NEP may not be able to consummate future acquisitions.

NEE's right of first refusal may adversely affect NEP's ability to consummate future sales or to obtain favorable sale terms.

• NEP GP and its affiliates may have conflicts of interest with NEP and have limited duties to NEP and its unitholders. NEP GP and its affiliates and the directors and officers of NEP are not restricted in their ability to compete with NEP, whose business is subject to certain restrictions.

• NEP may only terminate the MSA under certain specified conditions.

• If the agreements with NEE Management or NEER are terminated, NEP may be unable to contract with a substitute service provider on similar terms.

• NEP's arrangements with NEE limit NEE's potential liability, and NEP has agreed to indemnify NEE against claims that it may face in connection with such arrangements, which may lead NEE to assume greater risks when making decisions relating to NEP than it otherwise would if acting solely for its own account.

Risks Related to Ownership of NEP's Common Units

• NEP's ability to make distributions to its unitholders depends on the ability of NEP OpCo to make cash distributions to its limited partners.

• If NEP incurs material tax liabilities, NEP's distributions to its unitholders may be reduced, without any corresponding reduction in the amount of the IDR fee.

• Holders of NEP's common units may be subject to voting restrictions.

• NEP's partnership agreement replaces the fiduciary duties that NEP GP and NEP's directors and officers might have to holders of its common units with contractual standards governing their duties.

• NEP's partnership agreement restricts the remedies available to holders of NEP's common units for actions taken by NEP directors or NEP GP that might otherwise constitute breaches of fiduciary duties.

• Certain actions of NEP require the consent of NEP GP.

• Holders of NEP's common units currently cannot remove NEP GP without NEE's consent.

• NEE's interest in NEP GP and the control of NEP GP may be transferred to a third party without unitholder consent.

• The IDR fee may be assigned to a third party without unitholder consent.

• NEP may issue additional units without unitholder approval, which would dilute unitholder interests.

• Reimbursements and fees owed to NEP GP and its affiliates for services provided to NEP or on NEP's behalf will reduce cash distributions to or from NEP OpCo and from NEP to NEP's unitholders, and the amount and timing of such reimbursements and fees will be determined by NEP GP and there are no limits on the amount that NEP OpCo may be required to pay.

• Discretion in establishing cash reserves by NEP OpCo GP may reduce the amount of cash distributions to unitholders.

• NEP OpCo can borrow money to pay distributions, which would reduce the amount of credit available to operate NEP's business.

• Increases in interest rates could adversely impact the price of NEP's common units, NEP's ability to issue equity or incur debt for acquisitions or other purposes and NEP's ability to make cash distributions to its unitholders.

• The price of NEP's common units may fluctuate significantly and unitholders could lose all or part of their investment.

• The liability of holders of NEP's common units, which represent limited partnership interests in NEP, may not be limited if a court finds that unitholder action constitutes control of NEP's business.

• Unitholders may have liability to repay distributions that were wrongfully distributed to them.

• Provisions in NEP's partnership agreement may discourage or delay an acquisition of NEP that NEP unitholders may consider favorable, which could decrease the value of NEP's common units, and could make it more difficult for NEP unitholders to change NEP's board of directors.

• NEP's board of directors, a majority of which may be affiliated with NEE, decides whether to retain separate counsel, accountants or others to perform services for NEP.

• The New York Stock Exchange does not require a publicly traded limited partnership like NEP to comply with certain of its corporate governance requirements.

Risks Related to the Series A Convertible Preferred Units

• Issuance of the Series A convertible preferred units will dilute common unitholders' ownership in NEP and may decrease the amount of cash available for distribution for each common unit.

The Series A convertible preferred units will have rights, preferences and privileges that are not held by, and will be preferential to the rights of, holders of the common units.

Taxation Risks

NEP's future tax liability may be greater than expected if NEP does not generate NOLs sufficient to offset taxable income or if tax authorities challenge certain of NEP's tax positions.

NEP's ability to use NOLs to offset future income may be limited.

NEP will not have complete control over NEP's tax decisions.

A valuation allowance may be required for NEP's deferred tax assets.

Distributions to unitholders may be taxable as dividends.

Unitholders who are not resident in Canada may be subject to Canadian tax on gains from the sale of common units if NEP's common units derive more than 50% of their value from Canadian real property at any time.

These factors should be read together with the risk factors included in Exhibit 99.6 of NEP's Current Report on Form 8-K filed on August 7, 2017 (August 7, 2017 Form 8-K) and investors should refer to that section of the August 7, 2017 Form 8-K. Any forward-looking statement speaks only as of the date on which such statement is made, and NEP undertakes no obligation to update any forward-looking statement to reflect events or circumstances, including, but not limited to, unanticipated events, after the date on which such statement is made, unless otherwise required by law. New factors emerge from time to time and it is not possible for management to predict all of such factors, nor can it assess the impact of each such factor on the business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained or implied in any forward-looking statement.

Website Access to U.S. Securities and Exchange Commission (SEC) Filings. NEP makes its SEC filings, including the annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and any amendments to those reports, available free of charge on NEP's internet website, www.nexteraenergypartners.com, as soon as reasonably practicable after those documents are electronically filed with or furnished to the SEC. The information and materials available on NEP's website are not incorporated by reference into this Form 10-Q. The SEC maintains an internet website that contains reports and other information regarding registrants that file electronically with the SEC at www.sec.gov.

NEXTERA ENERGY PARTNERS, LP
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

The accompanying condensed consolidated financial statements should be read in conjunction with the 2016 Form 10-K. In the opinion of NEP management, all adjustments (consisting of normal recurring accruals) considered necessary for fair financial statement presentation have been made. Certain amounts included in the prior year's condensed consolidated financial statements have been reclassified to conform to the current year's presentation. The results of operations for an interim period generally will not give a true indication of results for the year.

1. Acquisitions

On May 1, 2017, an indirect subsidiary of NEP completed the acquisition from NEER of Golden West Wind Holdings, LLC for approximately \$238 million, plus working capital of \$4 million and the assumption of \$184 million in existing liabilities related to differential membership interests. Golden West Wind Holdings, LLC indirectly owns an approximately 249 MW wind generation facility located in El Paso County, Colorado.

The 2017 acquisition discussed above and the acquisitions from NEER completed by a subsidiary of NEP in 2016 (collectively, the common control acquisitions) were transfers of assets between entities under common control and required them to be accounted for as if the transfers occurred since the inception of common control, with prior periods retrospectively adjusted to furnish comparative information. Accordingly, the accompanying condensed consolidated financial statements have been retrospectively adjusted to include the historical results and financial position of the common control acquisitions prior to their respective acquisition dates.

In August 2017, NEP and NEP GP implemented governance changes that, among other things, enhanced NEP unitholder governance rights. The new governance structure established a NEP board of directors where NEP unitholders will have the ability to nominate and elect board members, subject to certain limitations and requirements. As a result of these governance changes, beginning in January 2018, acquisitions from NEER will no longer be treated as common control acquisitions.

In October 2017, an indirect subsidiary of NEP entered into an agreement with an indirect subsidiary of NEER to acquire interests in four wind and solar generation facilities with contracted generating capacity totaling approximately 691 MW. NEP expects to complete the acquisition before December 31, 2017 for a total consideration of approximately \$812 million, plus the assumption of approximately \$459 million in existing liabilities related to differential membership interests. See Part II - Item 5 for further discussion.

2. Income Taxes

For periods prior to the date a NEER project is acquired by NEP (NEP acquisition date), income taxes are calculated on the predecessor method using the separate return method applied to the group of renewable energy projects acquired.

For periods after the NEP acquisition date, income taxes are calculated on the successor method where taxes are calculated for NEP as a single taxpaying corporation for U.S. federal and state income taxes (based on its election to be taxed as a corporation). Because NEP OpCo is a limited partnership, NEP only recognizes in income its applicable ownership share of U.S. income taxes related to the U.S. and Canadian projects, allocated by NEP OpCo. The Canadian subsidiaries are all Canadian taxpayers, and therefore NEP recognizes in income all of the Canadian taxes.

For periods after the NEP acquisition date, income taxes include NEP's applicable ownership share of U.S. taxes and 100% of Canadian taxes. Net income or loss attributable to noncontrolling interest includes no U.S. taxes and NEER's applicable ownership share of Canadian taxes. Net income attributable to NEP includes NEP's applicable ownership share of U.S. and Canadian taxes.

The effective tax rates for the three months ended September 30, 2017 and 2016 were approximately 25% and 18%, respectively, and for the nine months ended September 30, 2017 and 2016 were approximately 20% and 12%, respectively. The effective tax rate is affected by recurring items, such as the relative amount of income earned in jurisdictions (earnings mix), valuation allowances on deferred tax assets, taxes attributable to the noncontrolling interest and the taxation of Canadian income in both Canada and the U.S. Additionally, for the nine months ended September 30, 2016, the effective tax rate was affected by an April 2016 court decision approving a reorganization of certain of NEP's Canadian assets that provided for tax bases in certain of these assets. NEP recorded approximately \$12 million of the associated income tax benefit during the nine months ended September 30, 2016.

3. Fair Value Measurements

The fair value of assets and liabilities are determined using either unadjusted quoted prices in active markets (Level 1) or pricing inputs that are observable (Level 2) whenever that information is available and using unobservable inputs (Level 3) to estimate fair value only when relevant observable inputs are not available. NEP uses several different valuation techniques to measure the fair value of assets and liabilities relying primarily on the market approach of using prices and other market information for identical and/or comparable assets and liabilities for those assets and liabilities that are measured at fair value on a recurring basis. Certain financial instruments may be valued using multiple inputs including discount rates, counterparty credit ratings and credit

NEXTERA ENERGY PARTNERS, LP
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
 (unaudited)

enhancements. NEP's assessment of the significance of any particular input to the fair value measurement requires judgment and may affect the placement of those assets and liabilities within the fair value hierarchy levels. Non-performance risk, including the consideration of a credit valuation adjustment, is also considered in the determination of fair value for all assets and liabilities measured at fair value. Transfers between fair value hierarchy levels occur at the beginning of the period in which the transfer occurred.

Cash Equivalents and Restricted Cash Equivalents - The fair value of money market funds that are included in cash and cash equivalents, restricted cash and other non-current assets on the condensed consolidated balance sheets is estimated using a market approach based on current observable market prices.

Interest Rate and Foreign Currency Contracts - NEP estimates the fair value of its derivatives using an income approach based on a discounted cash flows valuation technique utilizing the net amount of estimated future cash inflows and outflows related to the agreements. The primary inputs used in the fair value measurements include the contractual terms of the derivative agreements, current interest rates, foreign currency exchange rates and credit profiles. The significant inputs for the resulting fair value measurement are market-observable inputs and the measurements are reported as Level 2 in the fair value hierarchy.

NEP's financial assets and liabilities and other fair value measurements made on a recurring basis by fair value hierarchy level are as follows:

	September 30, 2017			December 31, 2016		
	Level 1	Level 2	Total	Level 1	Level 2	Total
	(millions)					
Assets:						
Cash equivalents	\$47	\$ —	\$ 47	\$66	\$ —	\$66
Restricted cash equivalents	30	—	30	29	—	29
Interest rate contracts	—	3	3	—	15	15
Foreign currency contracts	—	—	—	—	1	1
Total assets	\$77	\$ 3	\$ 80	\$95	\$ 16	\$111
Liabilities:						
Interest rate contracts	\$—	\$ 40	\$ 40	\$—	\$ 44	\$44
Foreign currency contracts	—	3	3	—	—	—
Total liabilities	\$—	\$ 43	\$ 43	\$—	\$ 44	\$44

Financial Instruments Recorded at Other than Fair Value - The carrying amount of short-term debt approximates its fair value. The carrying amounts and estimated fair values of other financial instruments recorded at other than fair value are as follows:

	September 30, 2017		December 31, 2016	
	Carrying Value	Fair Value	Carrying Value	Fair Value
	(millions)			
Long-term debt, including current maturities ^(a)	\$4,335	\$4,482	\$3,586	\$3,680

Edgar Filing: NextEra Energy Partners, LP - Form 10-Q

As of September 30, 2017 and December 31, 2016, approximately \$3,585 million and \$2,808 million, respectively, of the fair value is estimated using a market approach based on quoted market prices for the same or similar issues (a) (Level 2); the balance is estimated using an income approach utilizing a discounted cash flow valuation technique, considering the current credit profile of the debtor (Level 3).

Contingent Consideration - NEP recorded a liability related to a contingent holdback as part of the Texas pipelines acquisition. The contingent holdback was payable if the Texas pipelines entered into one or more written contracts by December 31, 2016 related to certain financial performance and capital expenditure thresholds. Contingent consideration is required to be reported at fair value at each reporting date. NEP determined this fair value measurement based on management's probability assessment. The significant inputs and assumptions used in the fair value measurement included the estimated probability of executing contracts related to financial performance and capital expenditure thresholds as well as the appropriate discount rate. During the three and nine months ended September 30, 2016, NEP recorded approximately \$101 million and \$118 million, respectively, in fair value adjustments to decrease the contingent consideration based on updated estimates associated with management's probability assessment as of September 30, 2016. The fair value adjustments are reflected as revaluation of contingent consideration in NEP's condensed consolidated statements of income.

NEXTERA ENERGY PARTNERS, LP
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
 (unaudited)

4. Derivative Instruments and Hedging Activity

NEP uses derivative instruments (primarily interest rate swaps) to manage the interest rate cash flow risk associated primarily with outstanding and expected future debt issuances and borrowings. NEP records all derivative instruments that are required to be marked to market as either assets or liabilities in its condensed consolidated balance sheets and measures them at fair value each reporting period. NEP does not utilize hedge accounting for its derivative instruments. All changes in the derivatives' fair value are recognized in interest expense in the condensed consolidated statements of income. In general, the commencement and termination dates of the interest rate swap agreements and the related hedging relationship coincide with the corresponding dates of the underlying variable-rate debt instruments. As of September 30, 2017 and December 31, 2016, the combined notional amounts of the interest rate contracts were approximately \$3,419 million and \$2,119 million, respectively.

At September 30, 2017, NEP's AOCI included amounts related to discontinued cash flow hedges, which have expiration dates through 2033. At September 30, 2017, approximately \$6 million of net unrealized losses are expected to be reclassified into interest expense within the next 12 months as interest payments are made. Such amount assumes no change in scheduled principal payments. Cash flows from these interest rate swap contracts are reported in cash flows from operating activities in the condensed consolidated statements of cash flows.

NEP enters into certain foreign currency exchange contracts to economically hedge its cash flows from foreign currency rate fluctuations. As of September 30, 2017 and December 31, 2016, the notional amount of the foreign currency contracts was approximately \$58 million and \$46 million, respectively. During the three months ended September 30, 2017 and 2016, NEP recorded approximately \$2 million of losses and less than \$1 million of gains, respectively, related to the foreign currency contracts in other - net in the condensed consolidated statements of income. During the nine months ended September 30, 2017 and 2016, NEP recorded approximately \$5 million and \$2 million of losses, respectively, related to the foreign currency contracts in other - net in the condensed consolidated statements of income.

Fair Value of Derivative Instruments - The tables below present NEP's gross derivative positions, based on the total fair value of each derivative instrument, at September 30, 2017 and December 31, 2016, as required by disclosure rules, as well as the location of the net derivative positions, based on the expected timing of future payments, on the condensed consolidated balance sheets.

Financial Statement Impact of Derivative Instruments - Gains (losses) related to NEP's interest rate contracts are recorded in the condensed consolidated financial statements as follows:

	Three Months Ended September 30, 2017	Nine Months Ended September 30, 2016		Three Months Ended September 30, 2017	Nine Months Ended September 30, 2016

(millions)

Interest rate contracts:

Losses reclassified from AOCI to interest expense	\$(1)	\$(2)	\$(6)	\$(6)
Gains (losses) recognized in interest expense	\$(1)	\$1	\$(21)	\$(83)

Credit-Risk-Related Contingent Features - Certain of NEP's derivative instruments contain credit-related cross-default and material adverse change triggers, none of which contain requirements to maintain certain credit ratings or financial ratios. At September 30, 2017, the aggregate fair value of NEP's derivative instruments with contingent risk features that were in a liability position was approximately \$7 million.

5. Variable Interest Entities

NEP has identified NEP OpCo as a VIE. NEP OpCo is a limited partnership with a general partner and limited partners. NEP has consolidated the results of NEP OpCo and its subsidiaries because of its controlling interest in the general partner of NEP OpCo. At September 30, 2017, NEP owned an approximately 34.9% limited partner interest in NEP OpCo and NEE Equity owned a noncontrolling 65.1% limited partner interest in NEP OpCo. The assets and liabilities of NEP OpCo as well as the operations of NEP OpCo represent substantially all of NEP's assets and liabilities and its operations.

In addition, at September 30, 2017, NEP consolidated five VIEs related to certain subsidiaries that have sold differential membership interests in entities which own and operate seven wind electric generation facilities. Certain investors that have no equity at risk in the VIEs hold differential membership interests, which give them the right to receive a portion of the economic attributes of these wind electric generation facilities, including certain tax attributes. The assets and liabilities of the VIEs, consisting primarily of property, plant and equipment - net and deferral related to differential membership interests, totaled approximately \$1,993 million and \$1,073 million at September 30, 2017, respectively, and \$2,032 million and \$1,123 million at December 31, 2016, respectively.

In October 2016, a subsidiary of NEP completed the acquisition from NEER of an indirect 24% interest in Desert Sunlight Investment Holdings, LLC (Desert Sunlight) which is reflected as investment in equity method investee on the condensed consolidated balance sheets. Desert Sunlight owns two project entities, which together make up the Desert Sunlight Solar Energy Center, a 550 MW solar generation plant located in Riverside County, California. NEER retained an interest in Desert Sunlight and remains the managing member. NEP is not the primary beneficiary and therefore does not consolidate this entity because it does not control any of the ongoing activities of this entity, was not involved in the initial design of this entity and does not have a controlling interest in this entity.

In April 2015, a subsidiary of NEP made an equity method investment in three NEER solar projects. Through a series of transactions, a subsidiary of NEP issued 1,000,000 NEP OpCo Class B Units, Series 1 and 1,000,000 NEP OpCo Class B Units, Series 2, to NEER for approximately 50% of the ownership interests in the three solar projects (non-economic ownership interests). NEER, as holder of the Class B Units, will retain 100% of the economic rights in the projects to which the respective Class B Units relate, including the right to all distributions paid by the project subsidiaries. NEER has agreed to indemnify NEP against all risks relating to NEP's ownership of the projects until NEER offers to sell economic interests to NEP and NEP accepts such offer, if NEP chooses to do so. NEER has also agreed to continue to manage the operation of the projects at its own cost, and to contribute to the projects any capital necessary for the operation of the projects, until NEER offers to sell economic interests to NEP and NEP accepts such offer. At September 30, 2017 and December 31, 2016, NEP's equity method investment related to the non-economic ownership interests is reflected as investments in non-economic ownership interests on the condensed consolidated balance sheets. All equity in earnings of the non-economic ownership interests is allocated to net income attributable to noncontrolling interest. NEP is not the primary beneficiary and therefore does not consolidate these entities because it does not control any of the ongoing activities of these entities, was not involved in the initial design of these entities and does not have a controlling interest in these entities.

NEXTERA ENERGY PARTNERS, LP
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
 (unaudited)

6. Capitalization

Debt - Significant long-term debt issuances and borrowings by NEP and its subsidiaries during the nine months ended September 30, 2017 were as follows:

Date Issued	Debt Issuances/Borrowings	Interest Rate	Principal Amount (millions)	Maturity Date
February 2017 - August 2017	Senior secured revolving credit facility	Variable ^(a)	\$ 130	^(b) 2019
March 2017	Senior secured term loans	Variable ^(a)	\$ 200	^(c) 2018 - 2019
April 2017	Senior secured term loans	Variable ^(a)	\$ 150	^(c) 2019
September 2017	Senior unsecured convertible notes	1.50%	\$ 300	^(d) 2020
September 2017	Senior unsecured notes	4.25% - 4.50%	\$ 1,100	^(e) 2024 - 2027

(a) Variable rate is based on an underlying index plus a margin.

(b) In September 2017, all borrowings under this credit facility were repaid and, as of September 30, 2017, no amounts are outstanding under this revolving credit facility.

(c) In September 2017, these term loans were repaid in full.

(d) See additional discussion below.

(e) A portion of the proceeds from these senior unsecured notes were used to repay the \$950 million principal outstanding under existing variable rate term loans and the \$130 million outstanding balance under a revolving credit facility. See additional discussion below.

The secured long-term debt agreements listed above are secured by liens on certain assets and contain provisions which, under certain conditions, could restrict the payment of distributions or related party fee payments. At September 30, 2017, NEP and its subsidiaries were in compliance with all financial debt covenants under their financings.

In September 2017, NEP issued \$300 million in aggregate principal amount of its 1.50% senior unsecured convertible notes (the convertible notes). The convertible notes are unsecured obligations of NEP and are absolutely and unconditionally guaranteed, on a senior unsecured basis, by NEP OpCo. A holder may convert all or a portion of its notes into NEP common units and cash in lieu of any fractional common unit at the conversion rate. At September 30, 2017, the conversion rate, subject to certain adjustments, was 18.9170 NEP common units per \$1,000 principal amount of the convertible notes, which rate is equivalent to a conversion price of approximately \$52.8625 per NEP common unit. Upon the occurrence of a fundamental change (as defined in the related indenture) holders of the convertible notes may require NEP to repurchase all or a portion of their convertible notes for cash in an amount equal to the principal amount of the convertible notes to be repurchased, plus accrued and unpaid interest, if any. The convertible notes are not redeemable at NEP's option prior to maturity.

In connection with the issuance of the convertible notes, NEP entered into a registration rights agreement pursuant to which, among other things, NEP has agreed to file a shelf registration statement with the SEC and use its commercially reasonable efforts to cause such registration statement to become effective on or prior to September 7, 2018, covering resales of NEP common units, if any, issuable upon a conversion of the convertible notes.

NEP entered into a capped call transaction (capped call) in connection with the issuance of the convertible notes. Under the capped call, NEP purchased capped call options with a strike price of \$52.8625 and a cap price of \$63.4350. The capped call was purchased for approximately \$12 million, which was recorded as a reduction to limited partners equity on NEP's condensed consolidated balance sheets. If, upon conversion of the convertible notes, the price per NEP common unit during the relevant settlement period is above the strike price, there would generally be a payment to NEP (if NEP elects to cash settle) or an offset of potential dilution to NEP's common units (if NEP elects to settle in NEP common units).

Additionally, in September 2017, NEP OpCo issued \$550 million in aggregate principal amount of 4.25% senior unsecured notes due 2024 (the 2024 notes) and \$550 million in aggregate principal amount of 4.50% senior unsecured notes due 2027 (the 2027 notes, and together with the 2024 notes, the notes).

The notes are unsecured obligations of NEP OpCo and are absolutely and unconditionally guaranteed, on a senior unsecured basis, by NEP and a subsidiary of NEP OpCo. At any time prior to July 15, 2024, in the case of the 2024 notes, and at any time prior to June 15, 2027, in the case of the 2027 notes, NEP OpCo may redeem some or all of the notes of such series at a redemption price equal to 100% of the principal amount of the notes redeemed plus a make-whole premium and accrued and unpaid interest. On or after July 15, 2024, in the case of the 2024 notes, and on or after June 15, 2027, in the case of the 2027 notes, NEP OpCo may redeem some or all of the notes of such series at a redemption price equal to 100% of the principal amount of the notes redeemed plus accrued and unpaid interest.

In October 2017, NEP OpCo and its direct subsidiaries entered into an amendment of the senior secured revolving credit facility. See Part II - Item 5 for further discussion.

NEXTERA ENERGY PARTNERS, LP
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(unaudited)

Equity - In June 2017, NEP entered into a Series A Preferred Unit Purchase Agreement, as amended (the purchase agreement), to issue and sell in a private placement in one or more tranches on or before December 31, 2017, as determined by NEP, \$550 million of Series A convertible preferred units representing limited partner interests in NEP (preferred units) at a purchase price of \$39.2253 per preferred unit. NEP will contribute the proceeds from each closing to NEP OpCo in exchange for an equivalent number of a new series of NEP OpCo preferred units with economically equivalent rights to the preferred units.

Pursuant to the purchase agreement, the NEP partnership agreement was amended and restated to establish the rights and preferences of the preferred units. The preferred units will be a new class of securities that will rank senior to the common units representing limited partner interests in NEP (common units). The preferred units will vote on an as-converted basis with the common units and will have certain class voting rights with respect to amendments that adversely affect their distribution, liquidation or conversion rights, their ranking or certain other protections under the NEP partnership agreement.

Holders of the preferred units will receive cumulative quarterly distributions equal to \$0.4413 per unit for quarters ending on or before the third anniversary of the issuance date of the preferred units, which will be prorated for the quarter during which the preferred units are issued and which may be paid, at NEP's election, in cash, in kind or a combination thereof. For quarters ending after the third anniversary of the issuance date, holders will receive cumulative quarterly distributions equal to the greater of \$0.4413 per unit and the amount that the preferred units would have received if they had converted into common units at the then-applicable conversion rate (defined below), and NEP may elect to pay up to 1/9th of the subsequent distribution period amounts in kind. The quarterly distribution amount and portion of the distribution that may be paid in kind will be prorated for the quarter that includes the third anniversary of the issuance date. If NEP fails to pay a distribution during a subsequent distribution period, NEP would be unable to pay any distributions on or redeem or repurchase any junior securities, including the common units, prior to paying the unpaid cash component of the quarterly distribution, including any previously accrued and unpaid cash distributions.

Each holder of preferred units (together with its affiliates) may elect to convert all or any portion of its preferred units into common units initially on a one-for-one basis, subject to customary adjustments and an adjustment for any distributions that have accrued but have not been paid when due (the conversion rate), at any time after June 20, 2019, subject to certain conditions. NEP may elect to convert all or a portion of the preferred units into common units based on the conversion rate at any time after the first anniversary of the date of issuance of the preferred units being converted if certain conditions, including specific common unit price and trading volume conditions, are met and subject to certain maximum conversion amounts prior to the third anniversary of the final closing date under the purchase agreement. In addition, certain change of control events, as specified in the NEP partnership agreement, will result in, or provide holders of the preferred units with the right to elect, conversion of preferred units to common units (or substantially equivalent securities of a surviving entity) or redemption of the preferred units, with such redemption to be paid in cash or common units at NEP's discretion. Beginning January 1, 2021, NEP will give the purchasers certain rights to require NEP, under certain circumstances, to initiate underwritten offerings for the common units that are issuable upon conversion of the preferred units.

On October 25, 2017, the board of directors of NEP authorized a distribution of \$0.3925 per common unit payable on November 14, 2017 to its common unitholders of record on November 6, 2017.

Earnings Per Unit - Diluted earnings per unit are based on the weighted-average number of common units and potential common units outstanding during the period, including the dilutive effect of the convertible notes. The dilutive effect of the convertible notes is computed using the if-converted method.

Common units issuable pursuant to the convertible notes which were not included in the calculation of diluted earnings per unit due to their antidilutive effect were approximately 1.4 million and 0.5 million for the three and nine months ended September 30, 2017, respectively.

8. Related Party Transactions

Each project entered into O&M agreements and ASAs with subsidiaries of NEER whereby the projects pay a certain annual fee plus actual costs incurred in connection with certain O&M and administrative services performed under these agreements. These services are reflected as operations and maintenance in the condensed consolidated statements of income. Additionally, a NEP subsidiary pays an affiliate for transmission services which are reflected as operations and maintenance in the condensed consolidated statements of income. Certain projects have also entered into various types of agreements including those related to shared facilities and transmission lines, transmission line easements, technical support and construction coordination with subsidiaries of NEER whereby certain fees or cost reimbursements are paid to, or received by, certain subsidiaries of NEER.

Management Services Agreement - Under the MSA, an indirect wholly owned subsidiary of NEE provides operational, management and administrative services to NEP, including managing NEP's day to day affairs and providing individuals to act as NEP's executive officers and directors, in addition to those services that are provided under the existing O&M agreements and ASAs described above between NEER subsidiaries and NEP subsidiaries. NEP OpCo pays NEE an annual management fee equal to the greater of 1% of the sum of NEP OpCo's net income plus interest expense, income tax expense and depreciation and amortization expense less certain non-cash, non-recurring items for the most recently ended fiscal year and \$4 million (as adjusted for inflation beginning in 2016), which is paid in quarterly installments with an additional payment each January to the extent 1% of the sum of NEP OpCo's net income plus interest expense, income tax expense and depreciation and amortization expense less certain non-cash, non-recurring items for the preceding fiscal year exceeds \$4 million (as adjusted for inflation beginning in 2016). NEP OpCo also makes

NEXTERA ENERGY PARTNERS, LP
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(unaudited)

certain payments to NEE based on the achievement by NEP OpCo of certain target quarterly distribution levels to its unitholders. NEP's O&M expenses for the three and nine months ended September 30, 2017 include approximately \$17 million and \$49 million, respectively, and for the three and nine months ended September 30, 2016 include \$12 million and \$28 million, respectively, related to the MSA.

Cash Sweep and Credit Support Agreement - NEP OpCo is a party to a CSCS agreement with NEER under which NEER and certain of its subsidiaries may provide credit support in the form of letters of credit and guarantees to satisfy NEP's subsidiaries' contractual obligations. NEP OpCo will pay NEER an annual credit support fee based on the level and cost of the credit support provided, payable in quarterly installments. NEP's O&M expenses for the three and nine months ended September 30, 2017 include approximately \$1 million and \$3 million, respectively, and for the three and nine months ended September 30, 2016 include \$1 million and \$2 million, respectively, related to the CSCS agreement.

NEER and certain of its subsidiaries may withdraw funds (Project Sweeps) received by NEP OpCo under the CSCS agreement, or its subsidiaries in connection with certain long-term debt agreements, and hold those funds in accounts belonging to NEER or its subsidiaries to the extent the funds are not required to pay project costs or otherwise required to be maintained by NEP's subsidiaries. NEER and its subsidiaries may keep the funds until the financing agreements permit distributions to be made, or, in the case of NEP OpCo, until such funds are required to make distributions or to pay expenses or other operating costs or NEP OpCo otherwise demands the return of such funds. If NEER fails to return withdrawn funds when required by NEP's subsidiaries' financing agreements, the lenders will be entitled to draw on any credit support provided by NEER in the amount of such withdrawn funds. If NEER or one of its affiliates realizes any earnings on the withdrawn funds prior to the return of such funds, it will be permitted to retain those earnings. As of September 30, 2017 and December 31, 2016, the cash sweep amounts held in accounts belonging to NEER or its subsidiaries were approximately \$366 million and \$65 million, respectively, and are included in due from related parties on the condensed consolidated balance sheets.

Guarantees and Letters of Credit Entered into by Related Parties - Certain PPAs include requirements of the project entities to meet certain performance obligations. NEECH or NEER has provided letters of credit or guarantees for certain of these performance obligations and payment of any obligations from the transactions contemplated by the PPAs. In addition, certain financing agreements require cash and cash equivalents to be reserved for various purposes. In accordance with the terms of these financing agreements, guarantees from NEECH have been substituted in place of these cash and cash equivalents reserve requirements. Also, under certain financing agreements, indemnifications have been provided by NEECH. In addition, certain interconnection agreements and site certificates require letters of credit or a bond to secure certain payment or restoration obligations related to those agreements. NEECH also guarantees the Project Sweep amounts held in accounts belonging to NEER, as described above. As of September 30, 2017, NEECH or NEER guaranteed or provided indemnifications, letters of credit or bonds totaling approximately \$657 million related to these obligations. Agreements related to the sale of differential membership interests require NEER to guarantee payments due by the VIEs and the indemnifications to the VIEs' respective investors. As of September 30, 2017, NEER guaranteed a total of approximately \$86 million related to these obligations.

Due to Related Party - Non-current amounts due to related party on the condensed consolidated balance sheets primarily represent amounts owed by certain of NEP's wind projects to NEER to refund NEER for certain transmission costs paid on behalf of the wind projects. Amounts will be paid to NEER as the wind projects receive payments from third parties for related notes receivable recorded in other non-current assets on the condensed

consolidated balance sheets.

Transportation and Fuel Management Agreements - In connection with the Texas pipelines acquisition, a subsidiary of NEP assigned to a subsidiary of NEER certain gas commodity agreements in exchange for entering into transportation agreements and a fuel management agreement whereby the benefits of the gas commodity agreements (net of transportation paid to the NEP subsidiary) are passed back to the NEP subsidiary. During the three and nine months ended September 30, 2017, NEP recognized approximately \$2 million and \$7 million, respectively, and for the three and nine months ended September 30, 2016 recognized approximately \$2 million and \$8 million, respectively, in revenues related to the transportation and fuel management agreements.

9. Summary of Significant Accounting and Reporting Policies

Revenue Recognition - In May 2014, the Financial Accounting Standards Board (FASB) issued an accounting standards update, which was subsequently amended, that provides guidance on the recognition of revenue from contracts with customers and requires additional disclosures regarding such contracts. NEP's operating revenues are derived primarily from the sale of energy and performance of natural gas transportation services. NEP continues to evaluate its individual contracts in order to determine the impact, if any, this standards update will have on its consolidated financial statements. NEP intends to apply this standards update using the modified retrospective approach with the cumulative effect, if any, recognized as an adjustment to retained earnings as of January 1, 2018.

Accounting for Partial Sales of Nonfinancial Assets - In February 2017, the FASB issued an accounting standards update regarding the accounting for partial sales of nonfinancial assets. NEP intends to apply this standards update retrospectively with the cumulative

NEXTERA ENERGY PARTNERS, LP
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
 (unaudited)

effect recognized as an adjustment to retained earnings as of January 1, 2018, concurrent with the FASB's revenue recognition standards update. Based on NEP's current analysis, this standards update is expected to affect the accounting and related financial statement presentation for the sales of differential membership interests to third-party investors. NEP anticipates the liability reflected as deferral related to differential membership interests on NEP's consolidated balance sheets will be reclassified to noncontrolling interests and the amount currently being recognized in benefits associated with differential membership interests - net in NEP's consolidated statements of income will be reflected as a reduction to net income attributable to noncontrolling interests. Additionally, NEP continues to evaluate the sales of differential membership interests to third-party investors to determine if the amount or timing of income attributed to differential membership interests could change materially from amounts recorded under its current accounting method.

Property, Plant and Equipment - net - NEP reviews the estimated useful lives of its fixed assets on an ongoing basis. NEP's most recent review indicated that the actual lives of certain equipment at its wind plants are expected to be longer than those previously estimated for depreciation purposes. As a result, effective January 1, 2017, NEP changed the estimated useful lives of certain wind plant equipment from 30 years to 35 years to better reflect the period during which these assets are expected to remain in service. This change increased net income attributable to NEP by approximately \$1 million and \$3 million and basic and diluted earnings per unit attributable to NEP by approximately \$0.02 and \$0.06 for the three and nine months ended September 30, 2017, respectively. For the year ended December 31, 2017, the change is expected to increase net income attributable to NEP by approximately \$5 million.

10. Commitments and Contingencies

Land Use Commitments - The project owners are parties to various agreements that provide for payments to landowners for the right to use the land upon which the projects are located. These leases and easements can typically be renewed by the project owners for various periods. The annual fees range from minimum rent payments varying by lease to maximum rent payments of a certain percentage of gross revenues, varying by lease. Total lease expense was approximately \$5 million and \$17 million for the three and nine months ended September 30, 2017, respectively, and \$5 million and \$16 million for the three and nine months ended September 30, 2016, respectively, and is included in operations and maintenance expenses in the condensed consolidated statements of income.

The total minimum non-cancelable rental commitments at September 30, 2017 under these land use agreements are as follows:

	Land Use Commitments (millions)
Remainder of 2017	\$ 2
2018	11
2019	11
2020	11
2021	11
Thereafter	360
Total minimum land use payments	\$ 406

One of NEP's solar project's land leases includes a right-of-way lease/grant that provides for payments to the BLM for the right to use the public lands upon which the project is located. The lease may be renewed at expiration at the solar project's option and will be subject to the regulations existing at the time of renewal. In connection with the terms of the lease, the solar project obtained a surety bond from a non-affiliated party in favor of the BLM for approximately \$23 million. The surety bond remains in effect until the BLM is satisfied that there is no outstanding liability on the bond or satisfactory replacement bond coverage is furnished. Certain varying lease payments are considered contingent rent and, therefore, expense is recognized as incurred.

Development, Engineering and Construction Commitments - At September 30, 2017, the Texas pipelines had several open engineering, procurement and construction contracts related to the procurement of materials and services. As of September 30, 2017, the Texas pipelines have remaining commitments under these contracts of approximately \$4 million.

Letter of Credit Facilities - Two of NEP's projects entered into letter of credit (LOC) facilities under which the LOC lenders may issue standby letters of credit not to exceed approximately \$107 million in the aggregate. These LOC facilities have maturity dates of June 2022 and July 2022. As of September 30, 2017, approximately \$93 million of LOCs was outstanding primarily related to debt service reserves and as security for certain of the projects' agreements, including a PPA.

NEXTERA ENERGY PARTNERS, LP
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Concluded)
(unaudited)

Canadian FIT Contracts -The FIT contracts relating to NEP's wind projects located in Canada (Canadian projects) require suppliers to source a minimum percentage of their equipment and services from Ontario resident suppliers to meet the minimum required domestic content level (MRDCL). The MRDCL for two projects is 25% and the MRDCL for the other two projects is 50%. Following their respective CODs, the Canadian projects submitted reports to the Independent Electricity System Operator (IESO) summarizing how they achieved the MRDCL for their respective projects (domestic content reports) and the IESO issued letters to the Canadian projects acknowledging the completeness of their domestic content reports. The IESO has the right to audit the Canadian projects for a period of up to 7 years post-COD to confirm that they complied with the domestic content requirements under their respective FIT contracts and achieved their respective MRDCLs. The failure by any of these projects to achieve its MRDCL could result in a default by such project under its FIT contract, which default may not be possible to cure and could result in a termination of its FIT contract, without compensation, by the IESO. A termination of the FIT contract for any of these Canadian projects could negatively affect revenues generated by such project and have a material adverse effect on NEP's business, financial condition, results of operations and ability to make cash distributions to its unitholders.

Acquisition Holdback - At December 31, 2016, the condensed consolidated balance sheets included an acquisition holdback related to the satisfaction of any indemnification obligations of the Texas pipelines sellers through April 2017 (indemnity holdback). During the nine months ended September 30, 2017 the indemnity holdback was released under the terms of the Texas pipelines acquisition agreement and approximately \$200 million was paid to the sellers.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

NEP is a growth-oriented limited partnership formed by NEE to acquire, manage and own contracted clean energy projects with stable long-term cash flows. At September 30, 2017, NEP owned a controlling, non-economic general partner interest and an approximately 34.9% limited partner interest in NEP OpCo. Through NEP OpCo, NEP owns a portfolio of contracted renewable generation assets consisting of wind and solar projects and a portfolio of contracted natural gas pipeline assets.

This discussion should be read in conjunction with the Notes contained herein and Management's Discussion and Analysis of Financial Condition and Results of Operations appearing in the 2016 Form 10-K. The results of operations for an interim period generally will not give a true indication of results for the year. In the following discussions, all comparisons are with the corresponding items in the prior year period.

During 2016 and 2017, a subsidiary of NEP completed several acquisitions from NEER, which were transfers of assets between entities under common control and required them to be accounted for as if the transfers occurred since the inception of common control, with prior periods retrospectively adjusted to furnish comparative information. Accordingly, the accompanying condensed consolidated financial statements have been retrospectively adjusted to include the historical results and financial position of the common control acquisitions prior to their respective acquisition dates. See Note 1.

In October 2017, an indirect subsidiary of NEP entered into an agreement with an indirect subsidiary of NEER to acquire interests in four wind and solar generation facilities with contracted generating capacity totaling approximately 691 MW. See Part II - Item 5 for further discussion.

(a) Prior-period financial information has been retrospectively adjusted as discussed in Note 1.

Three Months Ended September 30, 2017 Compared to Three Months Ended September 30, 2016

Operating Revenues

Operating revenues primarily consist of income from the sale of energy under PPAs and services provided under natural gas transportation agreements. Operating revenues decreased approximately \$14 million during the three months ended September 30, 2017 primarily due to unfavorable wind resource of approximately \$18 million during 2017, partially offset by \$3 million favorable Texas pipelines service revenue.

Operating Expenses

Operations and Maintenance

O&M expense includes interconnection costs, labor expenses, turbine servicing costs, lease royalty payments, insurance, materials, supplies, shared services and administrative expenses attributable to NEP's projects, and costs and expenses under the MSA, ASAs and O&M agreements. See Note 8. O&M expense also includes the cost of maintaining and replacing certain parts for the projects in the portfolio to maintain, over the long-term, operating income or operating capacity. O&M expense increased approximately \$4 million during the three months ended September 30, 2017 primarily due to an increase of \$6 million in IDR fees related to growth in NEP's distributions to its unitholders, partially offset by the absence of approximately \$2 million of accretion of acquisition holdbacks associated with the Texas pipelines acquisition.

Depreciation and Amortization

Depreciation and amortization expense reflects costs associated with depreciation and amortization of NEP's assets, based on consistent depreciable asset lives and depreciation methodologies. For certain U.S. renewable energy projects, CITCs have been elected and are recorded as a reduction in property, plant and equipment - net on the condensed consolidated balance sheets and amortized as a reduction to depreciation and amortization expense over the estimated life of the related property. Depreciation and amortization expense also includes a provision for wind and solar facility dismantlement, asset removal costs and accretion related to asset retirement obligations and the amortization of finite-lived intangible assets.

Depreciation and amortization expense decreased approximately \$4 million during the three months ended September 30, 2017 primarily due to the change in the estimated useful lives of certain equipment. See Note 9.

Other Income (Deductions)

Interest Expense

Interest expense primarily consists of interest on long-term debt and mark-to-market losses on interest rate swaps. Interest expense increased approximately \$9 million during the three months ended September 30, 2017 primarily due to \$4 million in higher interest cost related to additional debt issuances, a \$3 million increase in mark-to-market losses on interest rate swaps and a \$2 million write-off of deferred debt issuance costs associated with the repayment of certain term loans. See Note 6.

Benefits Associated with Differential Membership Interests - net

Benefits associated with differential membership interests - net reflect benefits recognized by NEP as third-party investors received their portion of the economic attributes, including income tax attributes, of the underlying wind projects net of associated costs. The increase in benefits associated with differential membership interests - net of approximately \$1 million during the three months ended September 30, 2017 relates to lower interest costs of approximately \$4 million primarily associated with the ongoing paydown of differential membership interest obligations, partially offset by \$3 million attributable to unfavorable wind resource.

Equity in Earnings (Losses) of Non-Economic Ownership Interests

Equity in earnings of non-economic ownership interests increased by approximately \$9 million during the three months ended September 30, 2017 primarily reflecting a \$10 million increase in operating income due to the

commencement of the PPA of one of the related projects in November 2016, partially offset by a \$1 million increase in the mark-to-market losses on interest rate derivative contracts recorded at the related projects.

Revaluation of Contingent Consideration

For the three months ended September 30, 2016, revaluation of contingent consideration reflects a fair value adjustment of approximately \$101 million to decrease the contingent holdback associated with the Texas pipelines acquisition. See Note 3 - Contingent Consideration.

Income Taxes

For periods after the NEP acquisition date, income taxes include NEP's applicable ownership share of U.S. taxes and 100% of Canadian taxes. Net income or loss attributable to noncontrolling interest includes no U.S. taxes and NEER's applicable ownership share of Canadian taxes. Net income attributable to NEP includes NEP's applicable ownership share of U.S. and Canadian taxes.

For the three months ended September 30, 2017, NEP recorded income tax expense of approximately \$13 million on income before income taxes of \$51 million, resulting in an effective tax rate of 25%. The tax expense is comprised primarily of income tax expense of \$18 million at the statutory rate of 35%, partially offset by income tax benefit of \$7 million of income tax attributable to noncontrolling interest.

For the three months ended September 30, 2016, NEP recorded income tax expense of approximately \$30 million on income before income taxes of \$165 million, resulting in an effective tax rate of 18%. The tax expense is comprised primarily of income tax expense of \$58 million at the statutory rate of 35%, \$5 million due to earnings mix and \$4 million of state income taxes, partially offset by income tax benefit of \$37 million of income tax attributable to noncontrolling interest.

Due to the transition from predecessor to successor method of accounting for income taxes, comparing current period results to the same period in the prior year does not provide meaningful information. See Note 2.

Nine Months Ended September 30, 2017 Compared to Nine Months Ended September 30, 2016

Operating Revenues

Operating revenues increased approximately \$7 million during the nine months ended September 30, 2017 primarily due to an increase in Texas pipelines service revenues of approximately \$6 million for reimbursable operating costs.

Operating Expenses

Operations and Maintenance

O&M expense increased approximately \$24 million during the nine months ended September 30, 2017 primarily due to an increase of \$20 million in IDR fees related to growth in NEP's distributions to its unitholders, an increase of \$6 million in Texas pipelines reimbursable operating costs and \$4 million in renewable asset maintenance costs. These increases were partially offset by the absence of approximately \$6 million of accretion of acquisition holdbacks associated with the Texas pipelines acquisition.

Depreciation and Amortization

Depreciation and amortization expense decreased approximately \$12 million during the nine months ended September 30, 2017 primarily due to the change in the estimated useful lives of certain equipment. See Note 9.

Other Income (Deductions)

Interest Expense

Interest expense decreased approximately \$49 million during the nine months ended September 30, 2017 primarily due to a \$62 million decrease in the mark-to-market losses on interest rate swaps, partially offset by an increase of \$8 million in higher interest costs related to additional debt issuances, \$4 million in higher interest costs related to debt at one of NEP's subsidiaries and a \$2 million write-off of deferred debt issuance costs associated with the repayment of certain term loans. See Note 6.

Benefits Associated with Differential Membership Interests - net

The increase in benefits associated with differential membership interests - net of approximately \$15 million during the nine months ended September 30, 2017 primarily relates to lower interest costs associated with the ongoing paydown of differential membership interest obligations.

Equity in Earnings (Losses) of Non-Economic Ownership Interests

Equity in earnings of non-economic ownership interests increased by approximately \$32 million during the nine months ended September 30, 2017 primarily due to a \$17 million increase in operating income due to the commencement of the PPA of one of the related projects in November 2016 and favorable solar resource for one of these projects as well as a \$15 million decrease in mark-to-market losses on certain interest rate derivative contracts recorded at the related projects.

Revaluation of Contingent Consideration

For the nine months ended September 30, 2016, revaluation of contingent consideration reflects fair value adjustments of approximately \$118 million to decrease the contingent holdback associated with the Texas pipelines acquisition. See Note 3 - Contingent Consideration.

Income Taxes

For the nine months ended September 30, 2017, NEP recorded income tax expense of approximately \$32 million on income before income taxes of \$164 million, resulting in an effective tax rate of 20%. The tax expense is comprised primarily of income tax expense of \$57 million at the statutory rate of 35%, partially offset by income tax benefits of \$5 million of foreign tax differential and \$21 million of income tax attributable to noncontrolling interest.

For the nine months ended September 30, 2016, NEP recorded income tax expense of approximately \$23 million on income before income taxes of \$190 million, resulting in an effective tax rate of 12%. The tax expense is comprised primarily of income tax expense of \$67 million at the statutory rate of 35%, \$6 million of state income taxes and \$2 million due to earnings mix, partially offset by income tax benefits of \$41 million of income tax attributable to noncontrolling interest and \$12 million related to the reorganization of Canadian assets.

Due to the transition from predecessor to successor method of accounting for income taxes, comparing current period results to the same period in the prior year does not provide meaningful information. See Note 2.

Liquidity and Capital Resources

NEP's ongoing operations use cash to fund O&M expenses, maintenance capital expenditures, debt service payments and distributions to common unit holders. NEP expects to satisfy these requirements primarily with internally generated cash flow. In addition, as a growth-oriented limited partnership, NEP expects from time to time to make acquisitions and other investments. These acquisitions and investments are expected to be funded with cash on hand, cash generated from operations, borrowings under credit facilities or term loans, issuances of indebtedness and issuances of additional NEP common units or preferred units.

These sources of funds are expected to be adequate to provide for NEP's short-term and long-term liquidity and capital needs, although its ability to make future acquisitions, expand existing projects and increase its distributions to common unitholders will depend on its ability to access the capital markets on acceptable terms.

As a normal part of its business, depending on market conditions, NEP expects from time to time to consider opportunities to repay, redeem, repurchase or refinance its indebtedness. In addition, NEP expects from time to time to consider potential investments in new acquisitions. These events may cause NEP to seek additional debt or equity financing, which may not be available on acceptable terms or at all. Debt financing, if available, could impose operating restrictions, additional cash payment obligations and additional covenants.

NEP OpCo has agreed to allow NEER or one of its affiliates to withdraw funds received by NEP OpCo or its subsidiaries and to hold those funds in accounts of NEER or one of its affiliates to the extent the funds are not required to pay project costs or otherwise required to be maintained by NEP's subsidiaries, until the financing agreements permit distributions to be made, or, in the case of NEP OpCo, until such funds are required to make distributions or to pay expenses or other operating costs. NEP OpCo will have a claim for any funds that NEER fails to return:

- when required by its or its subsidiaries' financings;
- when its subsidiaries' financings otherwise permit distributions to be made to NEP OpCo;
- when funds are required to be returned to NEP OpCo; or
- when otherwise demanded by NEP OpCo.

In addition, NEER and certain of its subsidiaries may withdraw funds in connection with certain long-term debt agreements and hold those funds in accounts belonging to NEER or its subsidiaries and provide credit support in the amount of such withdrawn funds. If NEER fails to return withdrawn funds when required by NEP's subsidiaries' financings, the lenders will be entitled to draw on credit support provided by NEER in the amount of such withdrawn funds.

If NEER or one of its affiliates realizes any earnings on the withdrawn funds prior to the return of such funds, it will be permitted to retain those earnings.

Liquidity Position

At September 30, 2017 and December 31, 2016, NEP's liquidity position was approximately \$765 million and \$484 million, respectively. The table below provides the components of NEP's liquidity position:

	September 30, 2017	December 31, 2016	
	(millions)		
Cash and cash equivalents	\$ 135	\$ 147	
Amounts due under the CSCS agreement	366	65	
Revolving credit facilities	400	400	
Less borrowings	(150)	(150)	
Letter of credit facilities	107	119	
Less letters of credit	(93)	(97)	
Total ^(a)	\$765	\$ 484	

^(a) Excludes current restricted cash of approximately \$32 million and \$33 million at September 30, 2017 and December 31, 2016, respectively.

Management believes that NEP's liquidity position and cash flows from operations will be adequate to finance O&M, capital expenditures, distributions to its unitholders and liquidity commitments. Management regularly monitors NEP's financing needs consistent with prudent balance sheet management.

Financing Arrangements

Revolving Credit Facilities

During the nine months ended September 30, 2017, a subsidiary of NEP borrowed \$130 million under one of its revolving credit facilities and repaid all outstanding borrowings under such facility. As of September 30, 2017, there were no amounts outstanding under this revolving credit facility. In October 2017, NEP OpCo and its direct subsidiaries entered into an amendment of this revolving credit facility which, among other things, increased the revolving credit facility size from \$250 million to \$750 million. See Part II - Item 5 for further discussion.

Project Financings and Term Loans

NEP OpCo and most of the projects in the portfolio are subject to financings that contain certain financial covenants and distribution tests, including debt service coverage ratios. In general, these financings contain covenants customary for these types of financings, including limitations on investments and restricted payments. Certain of NEP's financings provide for interest payable at a fixed interest rate. However, certain of NEP's financings accrue interest at variable rates based on the London InterBank Offered Rate and two projects accrue interest at a variable rate based upon the three-month Canadian Dealer Offered Rate. Interest rate contracts were entered into for certain of these financings to hedge against interest rate movements with respect to interest payments on the loan. In addition, under the project financings, each project will be permitted to pay distributions out of available cash on a semi-annual basis so long as certain conditions are satisfied, including that reserves are funded with cash or credit support, no default or event of default under the applicable financings has occurred and is continuing at the time of such distribution or would result therefrom, and each project is otherwise in compliance with the project financing covenants and, for the majority of the project financings, the applicable minimum debt service coverage ratio is satisfied. The majority of NEP's project financings include a minimum debt service coverage ratio of 1.20:1.00 that must be satisfied. For one project financing, the project must maintain a leverage ratio of less than 5.0:1.0 and an interest coverage ratio of at least 2.75:1.00 in order to make a distribution. Under certain term loans, NEP OpCo and one of its direct subsidiaries are required to comply with certain financial covenants, including maintaining a leverage coverage ratio of less than 5.5:1.0 and an interest coverage ratio of at least 1.75:1.00 in order to make a distribution. At September 30, 2017, NEP's subsidiaries were in compliance with all financial debt covenants under their financings.

In March and April 2017, an indirect subsidiary of NEP entered into and borrowed \$350 million under variable rate senior secured term loan agreements that were due to mature in 2018 and 2019. During September 2017, a subsidiary of NEP repaid these term loans and other previously outstanding term loans, collectively totaling \$950 million. See Note 6 - Debt.

Senior Notes

During September 2017, NEP issued \$300 million in aggregate principal amount of convertible notes. Additionally, NEP OpCo issued \$550 million in aggregate principal amount of 4.25% senior notes due 2024 and \$550 million in aggregate principal amount of 4.50% senior notes due 2027. See Note 6 - Debt.

Equity Arrangements

During the nine months ended September 30, 2017, NEP did not issue any common units to the public. At September 30, 2017, NEP may issue up to approximately \$109 million in additional common units under its

at-the-market program.

In June 2017, NEP entered into the purchase agreement to issue and sell in a private placement \$550 million of Series A convertible preferred units representing limited partner interests in NEP. See Note 6 - Equity.

28

Contractual Obligations

NEP's contractual obligations as of September 30, 2017 were as follows:

	Remainder of 2018 2019 2020 2021 Thereafter						Total
	2017						
	(millions)						
Debt, including interest ^(a)	\$48	\$294	\$294	\$644	\$310	\$ 4,082	\$5,672
Contractual obligations ^(b)	8	16	16	14	14	56	124
Revolving credit facilities fees	—	1	—	—	—	—	1
Asset retirement activities ^(c)	—	—	—	—	—	348	348
MSA and credit support ^(d)	2	8	8	8	8	98	132
Land lease payments ^(e)	2	11	11	11	11	360	406
Total	\$60	\$330	\$329	\$677	\$343	\$ 4,944	\$6,683

(a) Includes principal, interest and interest rate contracts. Variable rate interest was computed using September 30, 2017 rates.

(b) Represents estimated cash payments related to the acquisition of certain development rights and differential membership interests, as well as obligations for certain procurement contracts.

(c) Represents expected cash payments adjusted for inflation for estimated costs to perform asset retirement activities.

(d) Represents minimum fees under the MSA and CSCS agreement. See Note 8.

(e) Represents various agreements that provide for payments to landowners for the right to use the land upon which the projects are located.

Capital Expenditures

Annual capital spending plans are developed based on projected requirements by the projects. Capital expenditures primarily represent the estimated cost of capital improvements, including construction expenditures that are expected to increase NEP OpCo's operating income or operating capacity over the long-term. Capital expenditures for projects that have already commenced commercial operations are generally not significant because most expenditures relate to repairs and maintenance and are expensed when incurred. For the nine months ended September 30, 2017 and 2016, NEP had capital expenditures of approximately \$32 million and \$564 million, respectively. The 2016 capital expenditures primarily relate to construction prior to the NEP acquisition date and exclude the purchase price of acquired projects. At September 30, 2017, estimated capital expenditures for NEP's renewable energy projects for the remainder of 2017 and 2018 totaled approximately \$2 million and \$4 million, respectively. Planned capital expenditures associated with the Texas pipelines for the remainder of 2017 and 2018 totaled approximately \$4 million and less than \$1 million, respectively. There are no additional significant planned capital expenditures for the remainder of 2017 through 2021 other than costs that may occur as acquisition or expansion opportunities arise. These estimates are subject to continuing review and adjustment and actual capital expenditures may vary significantly from these estimates.

Cash Distributions to Unitholders

NEP's partnership agreement requires it to distribute available cash quarterly. Generally, available cash is all cash on hand at the date of determination relating to that quarter (including any expected distributions from NEP OpCo), less the amount of cash reserves established by NEP's board of directors. NEP currently expects that cash reserves would be established solely to provide for the payment of income taxes by NEP, if any. Cash flow is generated from distributions NEP receives from NEP OpCo each quarter. Although, as described above, NEP currently expects that cash reserves would be established by NEP's board of directors solely to provide for the payment of any of NEP's income taxes, NEP expects NEP OpCo to establish cash reserves prior to making distributions to NEP to pay costs

and expenses of NEP's subsidiaries, in addition to NEP's expenses, as well as any debt service requirements and future capital expenditures.

NEP OpCo's partnership agreement requires it to distribute all of its available cash to its common and preferred unitholders, including NEP, each quarter. Generally, NEP OpCo's available cash is all cash on hand at the date of determination relating to that quarter, plus any funds borrowed, less the amount of cash reserves established by NEP OpCo GP. The majority of such available cash will be derived from the operations of the projects. The cash available for distribution is likely to fluctuate from quarter to quarter, and in some cases significantly, as a result of the performance of the projects, seasonality, fluctuating wind resource, maintenance and outage schedules, timing of debt service and other factors.

During the nine months ended September 30, 2017, NEP distributed approximately \$60 million to its common unitholders. On October 25, 2017, the board of directors of NEP authorized a distribution of \$0.3925 per common unit payable on November 14, 2017 to its common unitholders of record on November 6, 2017.

Credit Ratings

Moody's Investors Service, Inc. (Moody's), Standard & Poor's Ratings Services (S&P) and Fitch Ratings (Fitch) assigned initial credit ratings to NEP during the second quarter of 2017. NEP's liquidity, ability to access credit and capital markets and cost of borrowings could be impacted by its credit ratings. At September 30, 2017, NEP's credit ratings were as follows:

	Moody's ^(a)	S&P ^(a)	Fitch ^(a)
NEP corporate credit rating ^(b)	Ba1	BB	BB+

(a) A security rating is not a recommendation to buy, sell or hold securities and should be evaluated independently of any other rating. The rating is subject to revision or withdrawal at any time by the assigning rating organization.

(b) The outlook indicated by each of Moody's, S&P and Fitch is stable.

Cash Flows

Nine Months Ended September 30, 2017 Compared to Nine Months Ended September 30, 2016

The following table reflects the changes in cash flows for the comparative periods:

	2017	2016	Change
	(millions)		
Nine Months Ended September 30,			
Net cash provided by operating activities	\$237	\$260	\$(23)
Net cash used in investing activities	\$(569)	\$(1,479)	\$910
Net cash provided by financing activities	\$319	\$1,186	\$(867)

Net Cash Provided by Operating Activities

The decrease in net cash provided by operating activities was primarily driven by approximately \$20 million of higher IDR fees and the \$14 million portion of the acquisition holdback payment reflected as cash flows from operating activities. This was partially offset by approximately \$14 million in distributions from an equity method investee.

Net Cash Used in Investing Activities

The decrease in net cash used in investing activities was driven by lower project acquisitions during 2017, decreased capital expenditures related to construction activities as a result of the completion of two wind projects at the end of 2015 prior to the NEP acquisition date, decreases in restricted cash balances related to the timing of construction payments and increased payments to related parties under the CSCS agreement.

	2017	2016
	(millions)	
Nine Months Ended September 30,		
Acquisition of membership interests in subsidiaries	\$(242)	\$(641)
Capital expenditures	(32)	(535)
Changes in restricted cash	6	(23)
Payments to related parties under CSCS agreement - net	(301)	(280)
Net cash used in investing activities	\$(569)	\$(1,479)

Net Cash Provided by Financing Activities

The decrease in net cash provided by financing activities primarily reflects the absence of issuances of additional NEP common units to the public, an absence of pre-acquisition member contributions and increased member distributions. This was partially offset by increased net issuances of debt, in part to pay the acquisition holdback and for a project acquisition.

	2017	2016
	(millions)	
Nine Months Ended September 30,		
Proceeds from issuance of common units - net	\$—	\$645
Issuances of long-term debt - net	709	194
Partners/Members' contributions	2	510
Partners/Members' distributions	(185)	(166)
Repayments of short-term debt	—	(12)
Payment of acquisition holdback	(186)	—
Other	(21)	15
Net cash provided by financing activities	\$319	\$1,186

New Accounting Rules and Interpretations

Revenue Recognition - In May 2014, the FASB issued an accounting standards update related to the recognition of revenue from contracts with customers and required disclosures. See Note 9 - Revenue Recognition.

Accounting for Partial Sales of Nonfinancial Assets - In February 2017, the FASB issued an accounting standards update regarding the accounting for partial sales of nonfinancial assets. See Note 9 - Accounting for Partial Sales of Nonfinancial Assets.

Quantitative and Qualitative Disclosures about Market Risk

NEP is exposed to several market risks in its normal business activities. Market risk is the potential loss that may result from market changes associated with its business. The types of market risks include interest rate, counterparty credit and foreign currency risks.

Interest Rate Risk

NEP is exposed to risk resulting from changes in interest rates associated with outstanding and expected future debt issuances and borrowings. NEP manages interest rate exposure by monitoring current interest rates, entering into interest rate swap contracts and using a combination of fixed rate and variable rate debt. Interest rate swaps are used to mitigate and adjust interest rate exposure when deemed appropriate based upon market conditions or when required by financing agreements.

NEP has long-term debt instruments that subject it to the risk of loss associated with movements in market interest rates. As of September 30, 2017, approximately 11% of the long-term debt, including current maturities, was exposed to fluctuations in interest expense while the remaining balance was either fixed rate debt or financially hedged. As of September 30, 2017, the estimated fair value of NEP's long-term debt was approximately \$4.5 billion and the carrying value of the long-term debt was \$4.3 billion. Based upon a hypothetical 10% decrease in interest rates, which is a reasonable near-term market change, the fair value of NEP's long-term debt would increase by approximately \$116 million.

Counterparty Credit Risk

Risks surrounding counterparty performance and credit risk could ultimately impact the amount and timing of expected cash flows. Credit risk relates to the risk of loss resulting from non-performance or non-payment by counterparties under the terms of their contractual obligations. NEP monitors and manages credit risk through credit policies that include a credit approval process and the use of credit mitigation measures such as prepayment arrangements in certain circumstances. NEP also seeks to mitigate counterparty risk by having a diversified portfolio of counterparties.

Foreign Currency Risk

Because NEP has Canadian operations, it is exposed to foreign currency exchange gains and losses. Since the functional currency of NEP's Canadian operations is in their local currency, the currency effects of translating the financial statements of those Canadian subsidiaries, which operate in local currency environments, are included in the accumulated other comprehensive income (loss) component of consolidated equity and do not impact earnings. However, gains and losses related to foreign currency transactions not in NEP's subsidiaries' functional currency do impact earnings and resulted in less than \$1 million of gains or losses during all periods presented. NEP has certain foreign currency exchange contracts to economically hedge its cash flows from foreign currency rate fluctuations. See Note 4.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

See Management's Discussion - Quantitative and Qualitative Disclosures About Market Risk.

Item 4. Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures

As of September 30, 2017, NEP had performed an evaluation, under the supervision and with the participation of its management, including the chief executive officer and the chief financial officer of NEP, of the effectiveness of the design and operation of NEP's disclosure controls and procedures (as defined in the Securities Exchange Act of 1934 Rules 13a-15(e) and 15d-15(e)). Based upon that evaluation, the chief executive officer and the chief financial officer of NEP concluded that NEP's disclosure controls and procedures were effective as of September 30, 2017.

(b) Changes in Internal Control Over Financial Reporting

NEP is continuously seeking to improve the efficiency and effectiveness of its operations and of its internal controls. This results in refinements to processes throughout NEP. However, there has been no change in NEP's internal control over financial reporting (as defined in the Securities Exchange Act of 1934 Rules 13a-15(f) and 15d-15(f)) that occurred during NEP's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, NEP's internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1A. Risk Factors

There have been no material changes from the risk factors disclosed in the August 7, 2017 Form 8-K. The factors discussed in the August 7, 2017 Form 8-K, as well as other information set forth in this report, which could materially adversely affect NEP's business, financial condition, results of operations, cash available for distribution and prospects should be carefully considered. The risks in the August 7, 2017 Form 8-K are not the only risks facing NEP. Additional risks and uncertainties not currently known to NEP, or that are currently deemed to be immaterial, also may materially adversely affect NEP's business, financial condition, results of operations, cash available for distribution and prospects.

Item 5. Other Information

(a)

(i) On October 24, 2017, NEP OpCo and its direct subsidiaries (loan parties) entered into an amendment and restatement of their existing revolving credit facility. The amendments to the revolving credit facility include, among other things, the following:

- an increase in the revolving credit facility size from \$250 million to \$750 million,
- an extension of the maturity from July 2019 to October 2022, and
- an increase in incremental commitments to increase the revolving credit facility to up to \$1.5 billion in the aggregate, from the previous aggregate amount of up to \$1 billion, subject to certain conditions.

The revolving credit facility is secured by liens on, among other things, certain assets of NEP OpCo's direct subsidiaries. The revolving credit facility contains default and related acceleration provisions relating to the failure to make required payments or to observe other covenants in the facility and related documents. Additionally, NEP OpCo and one of its direct subsidiaries are required to comply with certain financial covenants on a quarterly basis and NEP OpCo's ability to pay cash distributions is subject to certain other restrictions. All borrowings under the revolving credit facility are guaranteed by NEP OpCo and NEP.

The foregoing summary of the amendments to the revolving credit facility is qualified in its entirety by reference to the Amended and Restated Revolving Credit Agreement, which is filed as Exhibit 10.6 to this report and is incorporated herein by reference.

(ii) On October 25, 2017, an indirect subsidiary of NextEra Energy Partners Acquisitions, LLC (the purchaser), an indirect subsidiary of NEP, entered into an amendment to the amended and restated purchase and sale agreement, dated as of February 22, 2016, as amended on September 8, 2016 (collectively, the purchase and sale agreement) with NEP US SellCo, LLC (the seller), an indirect wholly-owned subsidiary of NEER, and ESI Energy, LLC, a direct subsidiary of NEECH. Pursuant to the terms of the purchase and sale agreement, the purchaser agreed to acquire:

- 100% of the membership interests of Javelina Wind Funding, LLC, which owns 100% of the Class A membership interests of Javelina Wind Energy Holdings, LLC, that owns an approximately 250 MW wind generation facility, Javelina I, located in Webb County, Texas;
- 100% of the membership interests of Nokota Wind Holdings, LLC, which owns 100% of the Class A membership interests of Nokota Wind, LLC, that indirectly owns two wind generation facilities, Brady Wind I and Brady Wind II, with a combined generating capacity of approximately 299 MW, located in Hettinger and Stark counties, North Dakota; and

- an approximately 51.8% interest in NextEra Desert Sunlight Holdings, LLC, which owns 50.0% of the economic interest in Desert Sunlight Investment Holdings, LLC, which owns two project entities that together make up a solar generation plant with a total generating capacity of 550 MW, located in Riverside County, California.

The purchase and sale agreement contains customary representations, warranties and covenants by the parties. The parties are obligated, subject to certain limitations, to indemnify the other for certain customary and other specified matters, including breaches of representations and warranties, nonfulfillment or breaches of covenants and for certain liabilities and third-party claims.

NEP expects the acquisition to close before December 31, 2017 for a total consideration of approximately \$812 million, subject to customary working capital and other adjustments, plus the assumption of approximately \$459 million in existing liabilities related to differential membership interests. The transaction is subject to customary closing conditions and the receipt of certain regulatory approvals. NEP intends to fund the purchase price through a combination of the net proceeds from the issuance of the preferred units and cash on hand.

The terms of the purchase and sale agreement were unanimously approved by NEP's conflicts committee, which is comprised of the independent members of the board of directors of NEP. The conflicts committee retained independent

Edgar Filing: NextEra Energy Partners, LP - Form 10-Q

legal and financial advisors to assist in evaluating and negotiating the acquisition. In approving the acquisition, the conflicts committee based its decision, in part, on an opinion from its independent financial advisor.

The foregoing summary of the purchase and sale agreement is qualified in its entirety by reference to Exhibits 2.1 and 2.2 to this report, which are incorporated herein by reference.
