Table of Contents

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q
(Mark One)

Quarterly report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
For the quarterly period ended September 30, 2017 or

Transition report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
For the transition period from _____ to _____

Commission file number 0-16533

ProAssurance Corporation
(Exact Name of Registrant as Specified in Its Charter)

Delaware 63-1261433
(State or Other Jurisdiction of (IRS Employer Identification No.)
Incorporation or Organization)

100 Brookwood Place, Birmingham, AL 35209
(Address of Principal Executive Offices) (Zip Code)

(205) 877-4400
(Registrant's Telephone Number, (Former Name, Former Address, and Former
Including Area Code) Fiscal Year, if Changed Since Last Report)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter), during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of October 31, 2017, there were 53,415,236 shares of the registrant's common stock outstanding.

Glossary of Terms and Acronyms

When the following terms and acronyms appear in the text of this report, they have the meanings indicated below.

Term	Meaning
AOCI	Accumulated other comprehensive income (loss)
Board	Board of Directors of ProAssurance Corporation
BOLI	Business owned life insurance
Council of Lloyd's	The governing body for Lloyd's of London
DPAC	Deferred policy acquisition costs
Eastern Re	Eastern Re, LTD, S.P.C.
EBUB	Earned, but unbilled premium
FAL	Funds at Lloyd's
FASB	Financial Accounting Standards Board
FHLB	Federal Home Loan Bank
FHLMC	Federal Home Loan Mortgage Corporation
FNMA	Federal National Mortgage Association
GAAP	Generally accepted accounting principles in the United States of America
GNMA	Government National Mortgage Association
HCPL	Healthcare professional liability
IRS	Internal Revenue Service
LLC	Limited liability company
Lloyd's	Lloyd's of London market
LP	Limited partnership
Medical technology liability	Medical technology and life sciences products liability
NAV	Net asset value
NRSRO	Nationally recognized statistical rating organization
NYSE	New York Stock Exchange
OCI	Other comprehensive income (loss)
OTTI	Other-than-temporary impairment
PCAOB	Public Company Accounting Oversight Board
Revolving Credit Agreement	ProAssurance's \$250 million revolving credit agreement
ROE	Return on equity
SEC	Securities and Exchange Commission
SPC	Segregated portfolio cell
Specialty P&C	Specialty Property and Casualty
Syndicate 1729	Lloyd's of London Syndicate 1729
Syndicate Credit Agreement	Unconditional revolving credit agreement with the Premium Trust Fund of Syndicate 1729
U.K.	United Kingdom of Great Britain and Northern Ireland
ULAE	Unallocated loss adjustment expense
VIE	Variable interest entity

Table of Contents

Caution Regarding Forward-Looking Statements

Any statements in this Form 10-Q that are not historical facts are specifically identified as forward-looking statements. These statements are based upon our estimates and anticipation of future events and are subject to significant risks, assumptions and uncertainties that could cause actual results to vary materially from the expected results described in the forward-looking statements. Forward-looking statements are identified by words such as, but not limited to, "anticipate," "believe," "estimate," "expect," "hope," "hopeful," "intend," "likely," "may," "optimistic," "possible," "potential," "preliminary," "project," "should," "will" and other analogous expressions. There are numerous factors that could cause our actual results to differ materially from those in the forward-looking statements. Thus, sentences and phrases that we use to convey our view of future events and trends are expressly designated as forward-looking statements as are sections of this Form 10-Q that are identified as giving our outlook on future business.

Forward-looking statements relating to our business include among other things: statements concerning future liquidity and capital requirements, investment valuation and performance, return on equity, financial ratios, net income, premiums, losses and loss reserve, premium rates and retention of current business, competition and market conditions, the expansion of product lines, the development or acquisition of business in new geographical areas, the availability of acceptable reinsurance, actions by regulators and rating agencies, court actions, legislative actions, payment or performance of obligations under indebtedness, payment of dividends and other matters.

These forward-looking statements are subject to significant risks, assumptions and uncertainties, including, among other things, the following factors that could affect the actual outcome of future events:

changes in general economic conditions, including the impact of inflation or deflation and unemployment;

our ability to maintain our dividend payments;

regulatory, legislative and judicial actions or decisions that could affect our business plans or operations;

the enactment or repeal of tort reforms;

formation or dissolution of state-sponsored insurance entities providing coverages now offered by ProAssurance which could remove or add sizable numbers of insureds from or to the private insurance market;

changes in the interest and tax rate environment;

resolution of uncertain tax matters and changes in tax laws;

changes in U.S. laws or government regulations regarding financial markets or market activity that may affect the U.S. economy and our business;

changes in the ability of the U.S. government to meet its obligations that may affect the U.S. economy and our business;

performance of financial markets affecting the fair value of our investments or making it difficult to determine the value of our investments;

changes in requirements or accounting policies and practices that may be adopted by our regulatory agencies, the FASB, the SEC, the PCAOB or the NYSE that may affect our business;

changes in laws or government regulations affecting the financial services industry, the property and casualty insurance industry or particular insurance lines underwritten by our subsidiaries;

the effect on our insureds, particularly the insurance needs of our insureds, and our loss costs, of changes in the healthcare delivery system and/or changes in the U.S. political climate that may affect healthcare policy or our business;

consolidation of our insureds into or under larger entities which may be insured by competitors, or may not have a risk profile that meets our underwriting criteria or which may not use external providers for insuring or otherwise managing substantial portions of their liability risk;

uncertainties inherent in the estimate of our loss and loss adjustment expense reserve and reinsurance recoverable;

changes in the availability, cost, quality or collectability of insurance/reinsurance;

the results of litigation, including pre- or post-trial motions, trials and/or appeals we undertake;

effects on our claims costs from mass tort litigation that are different from that anticipated by us;

allegations of bad faith which may arise from our handling of any particular claim, including failure to settle;

loss or consolidation of independent agents, agencies, brokers or brokerage firms;

changes in our organization, compensation and benefit plans;

changes in the business or competitive environment may limit the effectiveness of our business strategy and impact our revenues;

3

Table of Contents

our ability to retain and recruit senior management;

the availability, integrity and security of our technology infrastructure or that of our third-party providers of technology infrastructure, including any susceptibility to cyber-attacks which might result in a loss of information or operating capability;

the impact of a catastrophic event, as it relates to both our operations and our insured risks;

the impact of acts of terrorism and acts of war;

the effects of terrorism-related insurance legislation and laws;

guaranty funds and other state assessments;

our ability to achieve continued growth through expansion into new markets or through acquisitions or business combinations;

changes to the ratings assigned by rating agencies to our insurance subsidiaries, individually or as a group;

provisions in our charter documents, Delaware law and state insurance laws may impede attempts to replace or remove management or may impede a takeover;

state insurance restrictions may prohibit assets held by our insurance subsidiaries, including cash and investment securities, from being used for general corporate purposes;

taxing authorities can take exception to our tax positions and cause us to incur significant amounts of legal and accounting costs and, if our defense is not successful, additional tax costs, including interest and penalties; and expected benefits from completed and proposed acquisitions may not be achieved or may be delayed longer than expected due to business disruption; loss of customers, employees or key agents; increased operating costs or inability to achieve cost savings; and assumption of greater than expected liabilities, among other reasons.

Additional risks, assumptions and uncertainties that could arise from our membership in the Lloyd's of London market and our participation in Syndicate 1729 include, but are not limited to, the following:

members of Lloyd's are subject to levies by the Council of Lloyd's based on a percentage of the member's underwriting capacity, currently a maximum of 3%, but can be increased by Lloyd's;

Syndicate operating results can be affected by decisions made by the Council of Lloyd's which the management of Syndicate 1729 has little ability to control, such as a decision to not approve the business plan of Syndicate 1729, or a decision to increase the capital required to continue operations, and by our obligation to pay levies to Lloyd's;

Lloyd's insurance and reinsurance relationships and distribution channels could be disrupted or Lloyd's trading licenses could be revoked making it more difficult for Syndicate 1729 to distribute and market its products;

rating agencies could downgrade their ratings of Lloyd's as a whole; and

Syndicate 1729 operations are dependent on a small, specialized management team and the loss of their services could adversely affect the Syndicate's business. The inability to identify, hire and retain other highly qualified personnel in the future, could adversely affect the quality and profitability of Syndicate 1729's business.

Our results may differ materially from those we expect and discuss in any forward-looking statements. The principal risk factors that may cause these differences are described in "Item 1A, Risk Factors" in our Form 10-K and other documents we file with the SEC, such as our current reports on Form 8-K and our regular reports on Form 10-Q. We caution readers not to place undue reliance on any such forward-looking statements, which are based upon conditions existing only as of the date made, and advise readers that these factors could affect our financial performance and could cause actual results for future periods to differ materially from any opinions or statements expressed with respect to future periods in any current statements. Except as required by law or regulations, we do not undertake and specifically decline any obligation to publicly release the result of any revisions that may be made to any forward-looking statements to reflect events or circumstances after the date of such statements or to reflect the occurrence of anticipated or unanticipated events.

ProAssurance Corporation and Subsidiaries

Notes to Condensed Consolidated Financial Statements (Unaudited)

September 30, 2017

1. Basis of Presentation

The accompanying unaudited Condensed Consolidated Financial Statements include the accounts of ProAssurance Corporation and its consolidated subsidiaries (ProAssurance, PRA or the Company). The financial statements have been prepared in accordance with GAAP for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and notes required by GAAP for complete financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation, consisting of normal recurring adjustments, have been included. ProAssurance's results for the nine months ended September 30, 2017 are not necessarily indicative of the results that may be expected for the year ending December 31, 2017. The accompanying Condensed Consolidated Financial Statements should be read in conjunction with the Consolidated Financial Statements and Notes contained in ProAssurance's December 31, 2016 report on Form 10-K. In connection with its preparation of the Condensed Consolidated Financial Statements, ProAssurance evaluated events that occurred subsequent to September 30, 2017 for recognition or disclosure in its financial statements and notes to financial statements.

ProAssurance operates in four reportable segments as follows: Specialty P&C, Workers' Compensation, Lloyd's Syndicate and Corporate. For more information on the nature of products and services provided and for financial information by segment, refer to Note 11 of the Notes to Condensed Consolidated Financial Statements.

Reclassifications

In the second quarter of 2017, ProAssurance began presenting separately the components of Underwriting, policy acquisition and operating expense as Operating expense and DPAC amortization on the Condensed Consolidated Statements of Income and Comprehensive Income in order to provide additional details for investors. The Condensed Consolidated Statements of Income and Comprehensive Income for the three and nine months ended September 30, 2016 have been reclassified to conform to the current period presentation. Total Underwriting, policy acquisition and operating expense as well as Net income for all periods presented was not affected by the change in presentation.

Other Liabilities

Other liabilities consisted of the following:

(In thousands)	September 30, December 31,	
	2017	2016
SPC dividends payable	\$ 46,353	\$ 34,289
Unpaid dividends	16,558	265,659
All other	113,417	122,337
Total other liabilities	\$ 176,328	\$ 422,285

SPC dividends payable are the cumulative undistributed earnings contractually payable to the external preferred shareholders of SPCs operated by ProAssurance's Cayman Islands subsidiary, Eastern Re.

Unpaid dividends represent common stock dividends declared by ProAssurance's Board of Directors that had not yet been paid. Unpaid dividends at December 31, 2016 reflect a special dividend declared in late 2016 that was paid in January 2017.

Accounting Changes Adopted

Improvements to Employee Share-Based Payment Accounting

Effective for fiscal years beginning after December 15, 2016 and interim periods within those fiscal years, the FASB issued guidance that simplifies several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of cash flows, and the classification of awards as either equity or liabilities.

Under the new guidance, the difference between the deduction for tax purposes and the compensation cost recognized for financial reporting purposes is to be recognized as income tax expense in the current period and included with other income tax cash flows as an operating activity. The threshold for equity classification has also been revised to

permit withholdings up to the maximum statutory tax rates in the applicable jurisdictions. The update also provides an accounting policy election to account for forfeitures as they occur. ProAssurance adopted the guidance as of January 1, 2017. The primary effects of the adoption on the current period are the following: (1) using a prospective application, ProAssurance recorded unrecognized excess tax benefits of \$2.6 million as current tax expense for the nine months ended September 30, 2017 (unrecognized excess tax benefits were nominal for the 2017 three-month period), (2) using a modified retrospective application, ProAssurance elected to recognize forfeitures as they occur and recorded a \$0.4 million increase to Additional paid-in capital, and a respective \$0.3 million

Notes to Condensed Consolidated Financial Statements (Unaudited)

September 30, 2017

reduction to Retained earnings and a \$0.1 million increase to deferred taxes to reflect the incremental share-based compensation expense, net of related tax impacts, that would have been recognized in prior years under the modified guidance and (3) excess tax benefits from share-based compensation of \$2.2 million was reclassified from financing activities to operating activities in the Condensed Consolidated Statements of Cash Flows.

Interests Held Through Related Parties that are Under Common Control

Effective for fiscal years beginning after December 15, 2016 and interim periods within those fiscal years, the FASB issued additional guidance regarding consolidation of legal entities such as LPs/LLCs and securitization structures (collateralized debt obligations, collateralized loan obligations, and mortgage-backed security transactions). The new guidance modifies the criteria used by a reporting entity when determining if it is a primary beneficiary of a VIE when there are entities under common control and the reporting entity has indirect interests in the VIE through related party relationships. ProAssurance adopted the guidance as of January 1, 2017. Adoption of the guidance had no material effect on ProAssurance's results of operations or financial position.

Simplifying the Transition to the Equity Method of Accounting

Effective for fiscal years beginning after December 15, 2016 and interim periods within those fiscal years, the FASB issued guidance that eliminates the requirement for retroactive restatement when an investment qualifies for use of the equity method as a result of an increase in the level of ownership interest or degree of influence. The new guidance provides that the cost of acquiring an additional interest in an investee is to be added to the current basis of an investor's previously held interest and the equity method of accounting adopted as of the date the investment becomes qualified for equity method accounting with no retroactive adjustment of the investment. If an available-for-sale equity security qualifies for the equity method of accounting, the unrealized holding gain or loss in AOCI is to be recognized through earnings at the date the investment becomes qualified for use of the equity method. ProAssurance adopted the guidance as of January 1, 2017. Adoption of the guidance had no material effect on ProAssurance's results of operations or financial position.

Clarifying the Definition of a Business

Effective for fiscal years beginning after December 15, 2017 and interim periods within those fiscal years, the FASB issued guidance which provides clarification of the definition of a business, affecting areas such as acquisitions, disposals, goodwill and consolidation. The new guidance intends to assist entities with determining whether a transaction should be accounted for as an acquisition or disposal of assets or a business. The guidance will be applied prospectively to any transaction occurring within the period of adoption. ProAssurance early adopted the guidance during the third quarter of 2017 and adoption of the guidance had no material effect on ProAssurance's results of operations or financial position.

Accounting Changes Not Yet Adopted

Restricted Cash

Effective for fiscal years beginning after December 15, 2017 and interim periods within those fiscal years, the FASB issued guidance related to the classification of restricted cash presented in the statement of cash flows with the objective of reducing diversity in practice. Under the new guidance, entities are required to include restricted cash and restricted cash equivalents with cash and cash equivalents when reconciling beginning-of-period and end-of-period total amounts as presented on the statement of cash flows. ProAssurance plans to adopt the guidance beginning January 1, 2018. Adoption is not expected to have a material effect on ProAssurance's results of operations, financial position or cash flows.

Intra-Entity Transfers of Assets Other than Inventory

Effective for fiscal years beginning after December 15, 2017 and interim periods within those fiscal years, the FASB issued guidance which reduces the complexity in accounting standards related to the income tax consequences of intra-entity transfers of assets other than inventory. Under the new guidance, entities are required to recognize income tax consequences of an intra-entity transfer of assets other than inventory when the transfer occurs instead of delaying

recognition until the asset has been sold to an outside party. ProAssurance is in the process of evaluating the effect the new guidance would have on its results of operations and financial position and plans to adopt the guidance beginning January 1, 2018. Adoption of the guidance is not expected to have a material effect on ProAssurance's results of operations or financial position.

Classification of Certain Cash Receipts and Cash Payments

Effective for fiscal years beginning after December 15, 2017 and interim periods within those fiscal years, the FASB issued guidance related to the classification of certain cash receipts and cash payments presented in the statement of cash flows with the objective of reducing diversity in practice. ProAssurance plans to adopt the guidance beginning January 1, 2018. Adoption is not expected to have a material effect on ProAssurance's results of operations, financial position or cash flows.

ProAssurance Corporation and Subsidiaries

Notes to Condensed Consolidated Financial Statements (Unaudited)

September 30, 2017

Revenue from Contracts with Customers

Effective for fiscal years beginning after December 15, 2017 the FASB issued guidance related to revenue from contracts with customers. The core principle of the new guidance is that revenue is recognized to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. ProAssurance plans to adopt the guidance beginning January 1, 2018 under the modified retrospective method. As the majority of ProAssurance's revenues come from insurance contracts which fall under the scope of other FASB standards, only an insignificant amount of the Company's revenue is subject to the updated guidance. Therefore, adoption of the guidance is not expected to have a material effect on ProAssurance's results of operations or financial position.

Recognition and Measurement of Financial Assets and Financial Liabilities

Effective for fiscal years beginning after December 15, 2017 and interim periods within those fiscal years, the FASB issued guidance that requires equity investments (except those accounted for under the equity method of accounting, or those that result in consolidation of the investee) to be measured at fair value with changes in fair value recognized in net income. The new guidance also specifies that an entity use the exit price notion when measuring the fair value of financial instruments for disclosure purposes and present financial assets and liabilities by measurement category and form of financial asset. Other provisions of the new guidance include: revised disclosure requirements related to the presentation in comprehensive income of changes in the fair value of liabilities; elimination, for public companies, of disclosure requirements relative to the method(s) and significant assumptions underlying fair values disclosed for financial instruments measured at amortized cost; and simplified impairment assessments for equity investments without readily determinable fair values. ProAssurance plans to adopt the guidance beginning January 1, 2018, with the cumulative effect of the adoption made to retained earnings. The majority of ProAssurance's equity investments are either measured at fair value or accounted for under the equity method of accounting. As of September 30, 2017, approximately 1% of the Company's total investments would be impacted by the guidance and therefore, adoption of the guidance is not expected to have a material effect on ProAssurance's results of operations or financial position.

Modification Accounting for Employee Share-Based Payment Awards

Effective for fiscal years beginning after December 15, 2017 and interim periods within those fiscal years, the FASB issued guidance which reduces the complexity in accounting standards when there is a change in the terms or conditions of a share-based payment award. The new guidance clarifies that an entity should apply the modification accounting guidance if the value, vesting conditions or classification of the award changes. ProAssurance plans to adopt the guidance beginning January 1, 2018. Adoption of the guidance is not expected to have a material effect on ProAssurance's results of operations or financial position.

Premium Amortization on Purchased Callable Debt Securities

Effective for fiscal years beginning after December 15, 2018 and interim periods within those fiscal years, the FASB issued guidance that will require the premium for certain callable debt securities to be amortized over a shorter period than is currently required. Currently amortization is permitted over the contractual life of the instrument and the guidance shortens the amortization to the earliest call date. The purpose of the guidance is to more closely align the amortization period of premiums to expectations incorporated in market pricing on the underlying securities.

ProAssurance plans to adopt the guidance beginning January 1, 2019. Adoption of the guidance is not expected to have a material effect on ProAssurance's results of operations or financial position.

Leases

Effective for fiscal years beginning after December 15, 2018 and interim periods within those fiscal years, the FASB issued guidance that requires a lessee to recognize for all leases (with the exception of short-term leases) a lease liability, which is a lessee's obligation to make lease payments arising from a lease, measured on a discounted basis, and a right-of-use asset, which is an asset that represents the lessee's right to use, or control the use of, a specified asset for the lease term. ProAssurance plans to adopt the guidance beginning January 1, 2019. Adoption of the

guidance is not expected to have a material effect on ProAssurance's results of operations or financial position as ProAssurance does not have any leases it believes to be material.

ProAssurance Corporation and Subsidiaries

Notes to Condensed Consolidated Financial Statements (Unaudited)

September 30, 2017

Simplifying the Test for Goodwill Impairment

Effective for the fiscal years beginning after December 15, 2019 and interim periods within those fiscal years, the FASB issued guidance that simplifies the requirements to test goodwill for impairment for business entities that have goodwill reported in their financial statements. The guidance eliminates the second step of the impairment test which measures a goodwill impairment loss by comparing the implied fair value of a reporting unit's goodwill with the carrying amount. In addition, the guidance also eliminates the requirements for any reporting unit with a zero or negative carrying amount to perform a qualitative assessment. ProAssurance plans to adopt the guidance beginning January 1, 2020. Adoption is not expected to have a material effect on ProAssurance's results of operations or financial position.

Improvements to Financial Instruments - Credit Losses

Effective for fiscal years beginning after December 15, 2019 and interim periods within those fiscal years, the FASB issued guidance that replaces the incurred loss impairment methodology, which delays recognition of credit losses until a probable loss has been incurred, with a methodology that reflects expected credit losses and requires consideration of a broader range of reasonable and supportable information to inform credit loss estimates. Under the new guidance, credit losses are required to be recorded through an allowance for credit losses account and the income statement reflects the measurement for newly recognized financial assets, as well as increases or decreases of expected credit losses that have taken place during the period. ProAssurance is in the process of evaluating the effect the new guidance would have on its results of operations and financial position and plans to adopt the guidance beginning January 1, 2020. Adoption of the guidance is not expected to have a material effect on ProAssurance's results of operations or financial position.

2. Fair Value Measurement

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. A three level hierarchy has been established for valuing assets and liabilities based on how transparent (observable) the inputs are that are used to determine fair value, with the inputs considered most observable categorized as Level 1 and those that are the least observable categorized as Level 3. Hierarchy levels are defined as follows:

quoted (unadjusted) market prices in active markets for identical assets and liabilities. For ProAssurance,

Level 1: Level 1 inputs are generally quotes for debt or equity securities actively traded in exchange or over-the-counter markets.

market data obtained from sources independent of the reporting entity (observable inputs). For

Level 2: ProAssurance, Level 2 inputs generally include quoted prices in markets that are not active, quoted prices for similar assets or liabilities, and results from pricing models that use observable inputs such as interest rates and yield curves that are generally available at commonly quoted intervals.

the reporting entity's own assumptions about market participant assumptions based on the best information available in the circumstances (non-observable inputs). For ProAssurance, Level 3 inputs are used in

Level 3: situations where little or no Level 1 or 2 inputs are available or are inappropriate given the particular circumstances. Level 3 inputs include results from pricing models for which some or all of the inputs are not observable, discounted cash flow methodologies, single non-binding broker quotes and adjustments to externally quoted prices that are based on management judgment or estimation.

Fair values of assets measured at fair value on a recurring basis as of September 30, 2017 and December 31, 2016 are shown in the following tables. Where applicable, the tables also indicate the fair value hierarchy of the valuation techniques utilized to determine those fair values. For some assets, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. When this is the case, the asset is categorized based on the level of the most significant input to the fair value measurement. Assessments of the significance of a particular input to the fair value measurement require judgment and consideration of factors specific to the assets being valued.

Total assets at fair value				\$3,678,984

The fair values for securities included in the Level 2 category, with the few exceptions described below, were developed by one of several third party, nationally recognized pricing services, including services that price only certain types of securities. Each service uses complex methodologies to determine values for securities and subject the values they develop to quality control reviews. Management selected a primary source for each type of security in the portfolio and reviewed the values provided for reasonableness by comparing data to alternate pricing services and to available market and trade data. Values that appeared inconsistent were further reviewed for appropriateness. Any value that did not appear reasonable was discussed with the service that provided the value and adjusted, if necessary. There were no material changes to the values supplied by the pricing services during the three and nine months ended September 30, 2017 and 2016.

Level 2 Valuations

Below is a summary description of the valuation methodologies primarily used by the pricing services for securities in the Level 2 category, by security type:

U.S. Treasury obligations were valued based on quoted prices for identical assets, or, in markets that are not active, quotes for similar assets, taking into consideration adjustments for variations in contractual cash flows and yields to maturity.

U.S. Government-sponsored enterprise obligations were valued using pricing models that consider current and historical market data, normal trading conventions, credit ratings, and the particular structure and characteristics of the security being valued, such as yield to maturity, redemption options, and contractual cash flows. Adjustments to model inputs or model results were included in the valuation process when necessary to reflect recent regulatory, government or corporate actions or significant economic, industry or geographic events affecting the security's fair value.

Table of Contents

ProAssurance Corporation and Subsidiaries

Notes to Condensed Consolidated Financial Statements (Unaudited)

September 30, 2017

State and municipal bonds were valued using a series of matrices that considered credit ratings, the structure of the security, the sector in which the security falls, yields, and contractual cash flows. Valuations were further adjusted, when necessary, to reflect the expected effect on fair value of recent significant economic or geographic events or ratings changes.

Corporate debt, multiple observable inputs consisted primarily of corporate bonds, but also included a small number of bank loans. The methodology used to value Level 2 corporate bonds was the same as the methodology previously described for U.S. Government-sponsored enterprise obligations. Bank loans were valued based on an average of broker quotes for the loans in question, if available. If quotes were not available, the loans were valued based on quoted prices for comparable loans or, if the loan was newly issued, by comparison to similar seasoned issues. Broker quotes were compared to actual trade prices to permit assessment of the reliability of the quotes; unreliable quotes were not considered in quoted averages.

Residential and commercial mortgage-backed securities were valued using a pricing matrix which considers the issuer type, coupon rate and longest cash flows outstanding. The matrix used was based on the most recently available market information. Agency and non-agency collateralized mortgage obligations were both valued using models that consider the structure of the security, current and historical information regarding prepayment speeds, ratings and ratings updates, and current and historical interest rate and interest rate spread data.

Other asset-backed securities were valued using models that consider the structure of the security, monthly payment information, current and historical information regarding prepayment speeds, ratings and ratings updates, and current and historical interest rate and interest rate spread data. Spreads and prepayment speeds consider collateral type.

Equity securities were securities not traded on an exchange on the valuation date. The securities were valued using the most recently available quotes for the securities.

Short-term investments are securities maturing within one year, carried at cost which approximated the fair value of the security due to the short term to maturity.

Other investments consisted primarily of convertible bonds valued using a pricing model that incorporated selected dealer quotes as well as current market data regarding equity prices and risk free rates. If dealer quotes were unavailable for the security being valued, quotes for securities with similar terms and credit status were used in the pricing model. Dealer quotes selected for use were those considered most accurate based on parameters such as underwriter status and historical reliability.

Level 3 Valuations

Below is a summary description of the valuation processes and methodologies used as well as quantitative information regarding securities in the Level 3 category.

Level 3 Valuation Processes

Level 3 securities are priced by the Chief Investment Officer.

Level 3 valuations are computed quarterly. Prices are evaluated quarterly against prior period prices and the expected change in prices.

ProAssurance's Level 3 securities are primarily NRSRO rated debt instruments for which comparable market inputs are commonly available for evaluating the securities in question. Valuation of these debt instruments is not overly sensitive to changes in the unobservable inputs used.

Table of Contents

ProAssurance Corporation and Subsidiaries

Notes to Condensed Consolidated Financial Statements (Unaudited)

September 30, 2017

Level 3 Valuation Methodologies

Corporate debt, limited observable inputs consisted of corporate bonds valued using dealer quotes for similar securities or discounted cash flow models using yields currently available for similar securities. Similar securities are defined as securities of comparable credit quality that have like terms and payment features. Assessments of credit quality were based on NRSRO ratings, if available, or were subjectively determined by management if not available. At September 30, 2017, 73% of the securities were rated and the average rating was BBB+. At December 31, 2016, 84% of the securities were rated and the average rating was BBB+.

Other asset-backed securities consisted of securitizations of receivables valued using dealer quotes for similar securities or discounted cash flow models using yields currently available for similar securities.

Other investments consisted of convertible securities for which limited observable inputs were available at September 30, 2017 and at December 31, 2016. The securities were valued internally based on expected cash flows, including the expected final recovery, discounted at a yield that considered the lack of liquidity and the financial status of the issuer.

Quantitative Information Regarding Level 3 Valuations

(In thousands)	Fair Value at		Valuation Technique	Unobservable Input	Range (Weighted Average)
	September 30, 2017	December 31, 2016			
Assets:					
Corporate debt, limited observable inputs	\$14,963	\$14,810	Market Comparable Securities	Comparability Adjustment	0% - 5% (2.5%)
			Discounted Cash Flows	Comparability Adjustment	0% - 5% (2.5%)
Other asset-backed securities	\$3,540	\$3,007	Market Comparable Securities	Comparability Adjustment	0% - 5% (2.5%)
			Discounted Cash Flows	Comparability Adjustment	0% - 5% (2.5%)
Other investments	\$428	\$3	Discounted Cash Flows	Comparability Adjustment	0% - 10% (5%)

The significant unobservable inputs used in the fair value measurement of the above listed securities were the valuations of comparable securities with similar issuers, credit quality and maturity. Changes in the availability of comparable securities could result in changes in the fair value measurements.

Transfers

There were no transfers between the Level 1 and Level 2 categories during the three months ended September 30, 2017. During the nine months ended September 30, 2017, equity securities of approximately \$35.4 million were transferred from Level 2 to Level 1. During the three and nine months ended September 30, 2016, equity securities of approximately \$10.2 million were transferred from Level 2 to Level 1.

Transfers shown in the preceding Level 3 tables were as of the end of the quarter in which the transfer occurred. All transfers were to or from Level 2.

All transfers during the three and nine months ended September 30, 2017 and 2016 related to securities held for which the level of market activity for identical or nearly identical securities varies from period to period. The securities were valued using multiple observable inputs when those inputs were available; otherwise the securities were valued using limited observable inputs.

Fair Values Not Categorized

Investments in unconsolidated subsidiaries at both September 30, 2017 and December 31, 2016 included interests in investment fund LPs/LLCs and Other investments at September 30, 2017 included interests in certain investment funds that measure fund assets at fair value on a recurring basis and that provide a NAV for the interest. The carrying value of these interests is based on the NAV provided and was considered to approximate the fair value of the interests. In accordance with GAAP, the fair value of these investments was not classified within the fair value hierarchy. Additional information regarding these investments is as follows:

(In thousands)	Unfunded	Fair Value	
	Commitments	September 30, 2017	December 31, 2016
Investments in LPs/LLCs:			
Private debt funds ⁽¹⁾	\$12,006	\$42,650	\$ 55,637
Long equity fund ⁽²⁾	None	7,396	6,268
Long/short equity funds ⁽³⁾	None	30,904	28,926
Non-public equity funds ⁽⁴⁾	\$86,985	92,887	89,691
Multi-strategy fund of funds ⁽⁵⁾	None	8,966	8,448
Structured credit fund ⁽⁶⁾	None	6,394	4,273
Long/short commodities fund ⁽⁷⁾	None	12,648	11,476
Strategy focused fund ⁽⁸⁾	\$4,304	696	—
Other investments:			
Mortgage fund ⁽⁹⁾	None	20,000	—
		\$222,541	\$ 204,719

The investment is comprised of interests in two unrelated LP funds that are structured to provide interest distributions primarily through diversified portfolios of private debt instruments. One LP allows redemption by special consent; the other does not permit redemption. Income and capital are to be periodically distributed at the discretion of the LPs over an anticipated time frame that spans from three to eight years.

The fund is a LP that holds long equities of public international companies. Redemptions are allowed at the end of any calendar month with a prior notice requirement of 15 days and are paid within 10 days of the end of the calendar month of the redemption request.

The investment is comprised of interests in multiple unrelated LP funds. The funds hold primarily long and short North American equities and target absolute returns using strategies designed to take advantage of market opportunities. The funds generally permit quarterly or semi-annual capital redemptions subject to notice requirements of 30 to 90 days. For some funds, redemptions above specified thresholds (lowest threshold is 90%)

may be only partially payable until after a fund audit is completed and are then payable within 30 days.

Table of Contents

ProAssurance Corporation and Subsidiaries

Notes to Condensed Consolidated Financial Statements (Unaudited)

September 30, 2017

The investment is comprised of interests in multiple unrelated LP funds, each structured to provide capital appreciation through diversified investments in private equity, which can include investments in buyout, venture capital, debt including senior, second lien and mezzanine, distressed debt, and other private equity-oriented LPs. Two of the LPs allow redemption by terms set forth in the LP agreements; the others do not permit redemption. Income and capital are to be periodically distributed at the discretion of the LP over time frames that are anticipated to span up to nine years.

This fund is a LLC structured to build and manage low volatility, multi-manager portfolios that have little or no correlation to the broader fixed income and equity security markets. Redemptions are not permitted but offers to repurchase units of the LLC may be extended periodically.

This fund is a LP seeking to obtain superior risk-adjusted absolute returns by acquiring and actively managing a diversified portfolio of debt securities, including bonds, loans and other asset-backed instruments. Redemptions are allowed at any quarter-end with a prior notice requirement of 90 days.

This fund is a LLC invested across a broad range of commodities and focuses primarily on market neutral, relative value strategies, seeking to generate absolute returns with low correlation to broad commodity, equity and fixed income markets. Following an initial one-year lock-up period, redemptions are allowed with a prior notice requirement of 30 days and are payable within 30 days.

This fund is a LLC focused exclusively on investing in consumer product companies. The fund will invest exclusively in North American companies, comprised of equity and equity-related securities, as well as debt instruments. Redemptions are not permitted.

This investment fund is focused on the structured mortgage market. The fund will primarily invest in U.S. Agency mortgage-backed securities. Redemptions are allowed at the end of any calendar quarter with a prior notice requirement of 65 days and are paid within 45 days at the end of the redemption dealing day.

ProAssurance may not sell, transfer or assign its interest in any of the above LPs/LLCs without special consent from the LPs/LLCs.

Financial Instruments - Methodologies Other Than Fair Value

The following table provides the estimated fair value of our financial instruments that, in accordance with GAAP for the type of investment, are measured using a methodology other than fair value. All fair values provided fall within the Level 3 fair value category.

(In thousands)	September 30, 2017		December 31, 2016	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Financial assets:				
BOLI	\$61,652	\$61,652	\$60,134	\$60,134
Other investments	\$51,975	\$60,713	\$50,391	\$58,757
Other assets	\$34,412	\$34,311	\$29,111	\$28,960
Financial liabilities:				
Senior notes due 2023*	\$250,000	\$273,923	\$250,000	\$270,898
Revolving Credit Agreement*	\$152,000	\$152,000	\$200,000	\$200,000
Other liabilities	\$19,858	\$19,858	\$17,033	\$17,011

* Carrying value excludes debt issuance costs.

The fair value of the BOLI was equal to the cash surrender value associated with the policies on the valuation date. Other investments listed in the table above include interests in certain investment fund LPs/LLCs accounted for using the cost method, investments in FHLB common stock carried at cost, and an annuity investment carried at amortized cost. The estimated fair value of the LP/LLC interests was based on the equity value of the interest provided by the LP/LLC managers for the most recent quarter, which approximates the fair value of the interest. The estimated fair

value of the FHLB common stock was based on the amount ProAssurance would receive if its membership were canceled, as the membership cannot be sold. The fair value of the annuity represents the present value of the expected future cash flows discounted using a rate available in active markets for similarly structured instruments.

Table of Contents

ProAssurance Corporation and Subsidiaries

Notes to Condensed Consolidated Financial Statements (Unaudited)

September 30, 2017

Other assets and Other liabilities primarily consisted of related investment assets and liabilities associated with funded deferred compensation agreements. Fair values of the funded deferred compensation assets and liabilities were based on the NAVs provided by the underlying funds. Other assets also included a secured note receivable and unsecured note receivable under two separate line of credit agreements. Fair value of these notes receivable was based on the present value of expected cash flows from the notes receivable, discounted at market rates on the valuation date for receivables with similar credit standings and similar payment structures.

The fair value of the debt was estimated based on the present value of expected future cash outflows, discounted at rates available on the valuation date for similar debt issued by entities with a similar credit standing to ProAssurance.

September 30, 2017

The recorded cost basis and estimated fair value of available-for-sale fixed maturities at September 30, 2017, by contractual maturity, are shown below. Actual maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

(In thousands)	Amortized Cost	Due in one year or less	Due after one year through five years	Due after five years through ten years	Due after ten years	Total Fair Value
Fixed maturities, available for sale						
U.S. Treasury obligations	\$ 148,194	\$ 30,655	\$ 93,222	\$ 21,495	\$ 3,000	\$ 148,372
U.S. Government-sponsored enterprise obligations	18,756	249	8,362	10,020	141	18,772
State and municipal bonds	675,012	57,500	233,506	295,098	107,294	693,398
Corporate debt	1,254,878	124,057	737,639	390,103	20,983	1,272,782
Residential mortgage-backed securities	199,110					201,691
Agency commercial mortgage-backed securities	11,841					11,835
Other commercial mortgage-backed securities	16,135					16,190
Other asset-backed securities	105,166					105,310
	\$ 2,429,092					\$ 2,468,350

Excluding obligations of the U.S. Government, U.S. Government-sponsored enterprises and a U.S. Government obligations money market fund, no investment in any entity or its affiliates exceeded 10% of Shareholders' equity at September 30, 2017.

Cash and securities with a carrying value of \$46.6 million at September 30, 2017 were on deposit with various state insurance departments to meet regulatory requirements. ProAssurance also held securities with a carrying value of \$189.5 million at September 30, 2017 that are pledged as collateral security for advances under the Revolving Credit Agreement (see Note 7 of the Notes to Condensed Consolidated Financial Statements for additional detail on the Revolving Credit Agreement).

As a member of Lloyd's and a capital provider to Syndicate 1729, ProAssurance is required to maintain capital at Lloyd's, referred to as FAL. ProAssurance investments at September 30, 2017 included fixed maturities with a fair value of \$98.7 million and short-term investments with a fair value of approximately \$0.5 million on deposit with Lloyd's in order to satisfy these FAL requirements.

BOLI

ProAssurance holds BOLI policies that are carried at the current cash surrender value of the policies (original cost \$33 million). All insured individuals were members of ProAssurance management at the time the policies were acquired. The primary purpose of the program is to offset future employee benefit expenses through earnings on the cash value of the policies. ProAssurance is the owner and beneficiary of these policies.

ProAssurance Corporation and Subsidiaries
 Notes to Condensed Consolidated Financial Statements (Unaudited)
 September 30, 2017

Investment in Unconsolidated Subsidiaries

ProAssurance holds investments in unconsolidated subsidiaries, accounted for under the equity method. The investments include the following:

(In thousands)	Carrying Value	
	September 30, 2017	December 31, 2016
Investment in LPs/LLCs:		
Qualified affordable housing tax credit partnerships	\$91,598	\$ 102,313
Other tax credit partnerships	8,355	11,459
All other LPs/LLCs	231,944	227,134
	\$331,897	\$ 340,906

Qualified affordable housing tax credit partnership interests held by ProAssurance generate investment returns by providing tax benefits to fund investors in the form of tax credits and project operating losses. The carrying value of these investments reflects ProAssurance's total commitments (both funded and unfunded) to the partnerships, less any amortization. ProAssurance's ownership percentage relative to two of the tax credit partnership interests is almost 100%; these interests had a carrying value of \$34.5 million at September 30, 2017 and \$40.2 million at December 31, 2016. ProAssurance's ownership percentage relative to the remaining tax credit partnership interests is less than 20%; these interests had a carrying value of \$57.1 million at September 30, 2017 and \$62.1 million at December 31, 2016. ProAssurance does not have the ability to exert control over the partnerships; all are accounted for using the equity method.

Other tax credit partnerships are comprised entirely of historic tax credits. The historic tax credits generate investment returns by providing benefits to fund investors in the form of tax credits, tax-deductible project operating losses and positive cash flows. The carrying value of these investments reflects ProAssurance's total funded commitments less any amortization. ProAssurance's ownership percentage relative to the tax credit partnerships is almost 100%. ProAssurance does not have the ability to exert control over the partnerships; all are accounted for using the equity method.

As discussed in additional detail in Note 2 of the Notes to Condensed Consolidated Financial Statements, ProAssurance holds interests in certain LPs/LLCs that are investment funds which measure fund assets at fair value on a recurring basis and the fund managers provide a NAV for the interest. The carrying value of these interests is based on the NAV provided, and is considered to approximate the fair value of the interests; such interests totaled \$202.5 million at September 30, 2017 and \$204.7 million at December 31, 2016. ProAssurance also holds interests in other LPs/LLCs which are not considered to be investment funds; such interests totaled \$29.4 million at September 30, 2017 and \$22.4 million at December 31, 2016. ProAssurance's ownership percentage relative to three of the LPs/LLCs is greater than 25%, which is expected to be reduced as the funds mature and other investors participate in the funds; these investments had a carrying value of \$25.4 million at September 30, 2017 and \$18.5 million at December 31, 2016. ProAssurance's ownership percentage relative to the remaining LPs/LLCs is less than 25%; these interests had a carrying value of \$206.5 million at September 30, 2017 and \$208.6 million at December 31, 2016. ProAssurance does not have the ability to exert control over any of these funds.

Other Investments

Other investments at September 30, 2017 and December 31, 2016 were comprised as follows:

(In thousands)	September 30, December 31,	
	2017	2016
Investments in LPs/LLCs, at cost	\$ 48,505	\$ 46,852
Convertible securities, at fair value	31,789	31,501
Investment funds, at fair value	20,000	—

Other, principally FHLB capital stock, at cost	3,470	3,539
	\$ 103,764	\$ 81,892

Investments in convertible securities are carried at fair value as permitted by the accounting guidance for hybrid financial instruments, with changes in fair value recognized in income as a component of Net realized investment gains (losses) during the period of change.

Investment funds measure fund assets at fair value on a recurring basis and the fund managers provide a NAV for the interest. The carrying value of these interests is based on the NAV provided, and is considered to approximate the fair value of

Notes to Condensed Consolidated Financial Statements (Unaudited)

September 30, 2017

the interests, with changes in fair value recognized in income as a component of Net realized investment gains (losses) during the period of change.

FHLB capital stock is not marketable, but may be liquidated by terminating membership in the FHLB. The liquidation process can take up to five years.

Investments Held in a Loss Position

The following tables provide summarized information with respect to investments held in an unrealized loss position at September 30, 2017 and December 31, 2016, including the length of time the investment had been held in a continuous unrealized loss position.

(In thousands)	September 30, 2017					
	Total		Less than 12 months		12 months or longer	
	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss
Fixed maturities, available for sale

Agency commercial mortgage-backed securities	4,515	69	4,138	41	377	28
Other commercial mortgage-backed securities	8,753	71	5,217	38	3,536	33
Other asset-backed securities	47,229	159	39,552	110	7,677	49
	\$688,268	\$ 8,221	\$491,768	\$ 2,810	\$196,500	\$ 5,411

(In thousands)	December 31, 2016					
	Total		Less than 12 months		12 months or longer	
	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss
Fixed maturities, available for sale						
U.S. Treasury obligations	\$79,833	\$ 911	\$79,833	\$ 911	\$—	\$ —
U.S. Government-sponsored enterprise obligations	11,746	191	11,746	191	—	—
State and municipal bonds	224,884	6,952	219,276	6,444	5,608	508
Corporate debt	469,632	8,480	424,721	5,662	44,911	2,818
Residential mortgage-backed securities	103,680	2,046	100,542	1,982	3,138	64
Agency commercial mortgage-backed securities	4,579	143	4,192	114	387	29
Other commercial mortgage-backed securities	9,822	137	9,179	134	643	3
Other asset-backed securities	44,343	267	39,079	256	5,264	11
	\$948,519	\$ 19,127	\$888,568	\$ 15,694	\$59,951	\$ 3,433

As of September 30, 2017, excluding U.S. Government or U.S. Government-sponsored enterprise obligations, there were 501 debt securities (20.4% of all available-for-sale fixed maturity securities held) in an unrealized loss position representing 335 issuers. The greatest and second greatest unrealized loss positions among those securities were approximately \$0.6 million and \$0.4 million, respectively. The securities were evaluated for OTTI as of September 30, 2017.

Table of Contents

ProAssurance Corporation and Subsidiaries

Notes to Condensed Consolidated Financial Statements (Unaudited)

September 30, 2017

As of December 31, 2016, excluding U.S. Government or U.S. Government-sponsored enterprise obligations, there were 703 debt securities (27.2% of all available-for-sale fixed maturity securities held) in an unrealized loss position representing 456 issuers. The greatest and second greatest unrealized loss positions among those securities were each approximately \$0.5 million. The securities were evaluated for OTTI as of December 31, 2016.

Each quarter, ProAssurance performs a detailed analysis for the purpose of assessing whether any of the securities it holds in an unrealized loss position have suffered an OTTI. A detailed discussion of the factors considered in the assessment is included in Note 1 of the Notes to Consolidated Financial Statements included in ProAssurance's December 31, 2016 Form 10-K.

Fixed maturity securities held in an unrealized loss position at September 30, 2017, excluding asset-backed securities, have paid all scheduled contractual payments and are expected to continue doing so. Expected future cash flows of asset-backed securities, excluding those issued by GNMA, FNMA and FHLMC, held in an unrealized loss position were estimated as part of the September 30, 2017 OTTI evaluation using the most recently available six-month historical performance data for the collateral (loans) underlying the security or, if historical data was not available, sector based assumptions, and equaled or exceeded the current amortized cost basis of the security.

Net Investment Income

Net investment income by investment category was as follows:

	Three Months		Nine Months	
	Ended		Ended	
	September 30		September 30	
(In thousands)	2017	2016	2017	2016
Fixed maturities	\$18,924	\$21,024	\$57,885	\$64,808
Equities	4,495	3,779	12,437	10,983
Short-term and Other investments	1,147	1,466	2,926	2,550
BOLI	620	639	1,517	1,537
Investment fees and expenses	(1,457)	(1,647)	(5,173)	(4,594)
Net investment income	\$23,729	\$25,261	\$69,592	\$75,284

Equity in Earnings (Loss) of Unconsolidated Subsidiaries

Equity in earnings (loss) of unconsolidated subsidiaries included losses from qualified affordable housing project tax credit investments and historic tax credit investments. The losses recorded reflect ProAssurance's allocable portion of partnership operating losses. Losses from qualified affordable housing project tax credit investments were \$3.4 million and \$10.7 million for the three and nine months ended September 30, 2017, respectively, and \$6.7 million and \$14.9 million for the same respective periods of 2016. Tax credits recognized related to these investments totaled \$4.6 million and \$13.8 million for the three and nine months ended September 30, 2017, respectively, and \$4.6 million and \$13.9 million for the same respective periods of 2016. Losses from historic tax credit investments were \$0.6 million and \$3.4 million for the three and nine months ended September 30, 2017, respectively, and \$1.6 million and \$2.0 million for the same respective periods of 2016. Tax credits recognized related to these investments totaled \$1.4 million and \$4.0 million for the three and nine months ended September 30, 2017, respectively, and \$2.7 million and \$6.9 million for the same respective periods of 2016. Tax credits recognized reduced income tax expense in the respective periods.

Net Realized Investment Gains (Losses)

Realized investment gains and losses are recognized on the first-in, first-out basis. The following table provides detailed information regarding Net realized investment gains (losses):

(In thousands)	Three Months Ended September 30		Nine Months Ended September 30	
	2017	2016	2017	2016
Total OTTI losses:				
State and municipal bonds	\$—	\$(100)	\$—	\$(100)
Corporate debt	—	—	(419)	(7,604)
Other investments	—	—	—	(3,130)
Portion of OTTI losses recognized in other comprehensive income before taxes:				
Corporate debt	—	—	248	1,068
Net impairment losses recognized in earnings	—	(100)	(171)	(9,766)
Gross realized gains, available-for-sale securities	1,724	3,898	4,323	8,969
Gross realized (losses), available-for-sale securities	(262)	(370)	(1,730)	(5,628)
Net realized gains (losses), Short-term investments	(1)	—	(1)	18
Net realized gains (losses), trading securities	3,603	1,276	10,958	5,244
Net realized gains (losses), Other investments	478	335	2,197	833
Change in unrealized holding gains (losses), trading securities	2,182	9,816	2,606	17,663
Change in unrealized holding gains (losses), Other investments, carried at fair value	23	880	621	976
Other	2	2	7	5
Net realized investment gains (losses)	\$7,749	\$15,737	\$18,810	\$18,314

ProAssurance did not recognize OTTI during the third quarter of 2017. During the 2017 nine-month period, ProAssurance recognized OTTI in earnings of \$0.2 million and \$0.2 million in non-credit OTTI in OCI, both of which related to corporate bonds.

ProAssurance recognized OTTI in earnings of \$0.1 million and \$9.8 million during the 2016 three- and nine-month periods, respectively. ProAssurance recognized OTTI in earnings during the 2016 nine-month period of \$6.5 million related to corporate bonds, including credit-related OTTI of \$5.5 million related to debt instruments from ten issuers in the energy sector. The fair value of the bonds and the credit quality of the issuers had declined and ProAssurance recognized credit-related OTTI to reduce the amortized cost basis of the bonds to the present value of future cash flows expected to be received from the bonds. ProAssurance also recognized non-credit OTTI in OCI during the 2016 nine-month period of \$0.9 million related to certain of these same bonds, as the fair value of the bonds was less than the present value of the expected future cash flows from the securities.

ProAssurance also recognized a \$3.1 million OTTI in earnings during the 2016 nine-month period related to an investment fund that is accounted for using the cost method (classified as Other investments). The fund is focused on the energy sector and securities held by the fund declined in value during the first quarter of 2016. An OTTI was recognized to reduce ProAssurance's carrying value of the investment to the NAV reported by the fund.

Table of Contents

ProAssurance Corporation and Subsidiaries
 Notes to Condensed Consolidated Financial Statements (Unaudited)
 September 30, 2017

The following table presents a roll forward of cumulative credit losses recorded in earnings related to impaired debt securities for which a portion of the OTTI was recorded in OCI.

	Three Months		Nine Months	
	Ended		Ended	
	September 30		September 30	
(In thousands)	2017	2016	2017	2016
Balance beginning of period	\$1,313	\$3,319	\$1,158	\$5,751
Additional credit losses recognized during the period, related to securities for which:				
No OTTI has been previously recognized	—	—	171	2,398
OTTI has been previously recognized	—	—	—	2,154
Reductions due to:				
Securities sold during the period (realized)	—	(1,799)	(16)	(8,783)
Balance September 30	\$1,313	\$1,520	\$1,313	\$1,520

Other information regarding sales and purchases of available-for-sale securities is as follows:

	Three Months		Nine Months	
	Ended		Ended	
	September 30		September 30	
(In millions)	2017	2016	2017	2016
Proceeds from sales (exclusive of maturities and paydowns)	\$74.1	\$114.9	\$309.6	\$306.8
Purchases	\$90.6	\$167.2	\$449.7	\$540.4

4. Income Taxes

ProAssurance estimates its annual effective tax rate at the end of each quarterly reporting period and uses this estimated rate to record the provision for income taxes in the interim financial statements. The provision for income taxes is different from that which would be obtained by applying the statutory Federal income tax rate to income before income taxes primarily because a portion of ProAssurance's investment income is tax-exempt, and because ProAssurance utilizes tax credit benefits transferred from tax credit partnership investments.

ProAssurance had a liability for Federal and U.K. income taxes of \$3.3 million at September 30, 2017 and \$5.1 million at December 31, 2016, both carried as a part of Other liabilities. The liability for unrecognized tax benefits was \$8.5 million at September 30, 2017 and \$8.4 million at December 31, 2016.

5. Reserve for Losses and Loss Adjustment Expenses

The reserve for losses is established based on estimates of individual claims and actuarially determined estimates of future losses based on ProAssurance's past loss experience, available industry data and projections as to future claims frequency, severity, inflationary trends and settlement patterns. Estimating the reserve, particularly the reserve appropriate for liability exposures, is a complex process. Claims may be resolved over an extended period of time, often five years or more, and may be subject to litigation. Estimating losses requires ProAssurance to make and revise judgments and assessments regarding multiple uncertainties over an extended period of time. As a result, the reserve estimate may vary considerably from the eventual outcome. The assumptions used in establishing ProAssurance's reserve are regularly reviewed and updated by management as new data becomes available. Changes to estimates of previously established reserves are included in earnings in the period in which the estimate is changed.

ProAssurance believes that the methods it uses to establish reserves are reasonable and appropriate. Each year, ProAssurance uses internal actuaries to review the reserve for losses of each insurance subsidiary. ProAssurance also engages consulting actuaries to review ProAssurance claims data and provide observations regarding cost trends, rate adequacy and ultimate loss costs. ProAssurance considers the views of the actuaries as well as other factors, such as known, anticipated or estimated changes in frequency and severity of claims, loss retention levels and premium rates,

in establishing the amount of its reserve for losses. The statutory filings of each insurance company with the insurance regulators must be accompanied by a consulting actuary's certification as to their respective reserves.

ProAssurance partitions its reserve by accident year, which is the year in which the claim becomes its liability. As claims are incurred (reported) and claim payments are made, they are aggregated by accident year for analysis purposes. ProAssurance

Table of Contents

ProAssurance Corporation and Subsidiaries

Notes to Condensed Consolidated Financial Statements (Unaudited)

September 30, 2017

also partitions its reserve by reserve type: case reserves and IBNR reserves. Case reserves are established by the claims department based upon the particular circumstances of each reported claim and represent ProAssurance's estimate of the future loss costs (often referred to as expected losses) that will be paid on reported claims. Case reserves are decremented as claim payments are made and are periodically adjusted upward or downward as estimates regarding the amount of future losses are revised; a reported loss for an individual claim equates to the case reserve at any point in time plus the claim payments that have been made to date. IBNR reserves represent an estimate, in the aggregate, of future development on losses that have been reported to ProAssurance plus an estimate of losses that have been incurred but not reported.

Development of Prior Accident Years

In addition to setting the initial reserve for the current accident year, each period ProAssurance reassesses the amount of reserve required for prior accident years. The foundation of ProAssurance's reserve re-estimation process is an actuarial analysis that is performed by both the internal and consulting actuaries. This detailed analysis projects ultimate losses on a line of business, geographic, coverage layer and accident year basis. The procedure uses the most representative data for each partition, capturing its unique patterns of development and trends. In all, there are 219 different partitions of ProAssurance's business for purposes of this analysis. ProAssurance believes that the use of consulting actuaries provides an independent view of the loss data as well as a broader perspective on industry loss trends.

Activity in the Reserve for losses and loss adjustment expenses is summarized as follows:

(In thousands)	Nine Months Ended September 30, 2017	Nine Months Ended September 30, 2016	Year Ended December 31, 2016
Balance, beginning of year	\$ 1,993,428	\$ 2,005,326	\$ 2,005,326
Less reinsurance recoverables on unpaid losses and loss adjustment expenses	273,475	249,350	249,350
Net balance, beginning of year	1,719,953	1,755,976	1,755,976
Net losses:			
Current year	454,121	430,422	587,007
Favorable development of reserves established in prior years, net	(90,063)	(94,486)	(143,778)
Total	364,058	335,936	443,229
Paid related to:			
Current year	(63,667)	(55,349)	(96,190)
Prior years	(293,522)	(293,321)	(383,062)
Total paid	(357,189)	(348,670)	(479,252)
Net balance, end of period	1,726,822	1,743,242	1,719,953
Plus reinsurance recoverables on unpaid losses and loss adjustment expenses	313,876	254,777	273,475
Balance, end of period	\$ 2,040,698	\$ 1,998,019	\$ 1,993,428

The favorable loss development of \$90.1 million recognized in the nine months ended September 30, 2017 primarily reflected a lower than anticipated claims severity trend (i.e., the average size of a claim) for accident years 2010 through 2014. The favorable loss development of \$94.5 million recognized in the nine months ended September 30, 2016 primarily reflected a lower than anticipated claims severity trend for accident years 2009 through 2013. The favorable loss development of \$143.8 million recognized in the twelve months ended December 31, 2016 primarily reflected a lower than anticipated claims severity trend for accident years 2008 through 2014.

For additional information regarding ProAssurance's reserve, see Note 1 of the Notes to Consolidated Financial Statements included in ProAssurance's December 31, 2016 Form 10-K.

6. Commitments and Contingencies

ProAssurance is involved in various legal actions related to insurance policies and claims handling including, but not limited to, claims asserted by policyholders. These types of legal actions arise in the Company's ordinary course of business and, in accordance with GAAP for insurance entities, are considered as a part of the Company's loss reserving process, which is described in detail under the heading "Losses and Loss Adjustment Expenses" in the Accounting Policies section in Note 1 of the Notes to Consolidated Financial Statements in ProAssurance's 2016 Form 10-K.

As a member of Lloyd's ProAssurance is required to provide capital to support Syndicate 1729 through 2022 of up to \$200 million, referred to as FAL. At September 30, 2017, ProAssurance is satisfying the FAL requirement with investment securities on deposit with Lloyd's with a carrying value of \$99.2 million (see Note 3 of the Notes to Condensed Consolidated Financial Statements).

ProAssurance has issued an unconditional revolving credit agreement to the Premium Trust Fund of Syndicate 1729 for the purpose of providing working capital. Permitted borrowings are £20.0 million under an amended Syndicate Credit Agreement executed in April 2016. Under the amended Syndicate Credit Agreement advances bear interest at 3.8% annually, and may be repaid at any time but are repayable upon demand after December 31, 2019. As of September 30, 2017, the unused commitment under the Syndicate Credit Agreement approximated £11.0 million (approximately \$14.7 million as of September 30, 2017).

In conjunction with a strategic business partnership ProAssurance entered into during the third quarter of 2016, ProAssurance issued a line of credit of up to \$9.0 million for the purpose of funding the entity's operations. The line of credit is non-interest bearing and may be settled upon the entity's achievement of certain milestones which is expected to occur within the next six months. As of September 30, 2017, the unused commitment under the line of credit approximated \$1.6 million.

7. Debt

ProAssurance's outstanding debt consisted of the following:

(In thousands)	September 30, 2017	December 31, 2016
Senior notes due 2023, unsecured, interest at 5.3% annually	\$ 250,000	\$ 250,000
Revolving Credit Agreement, outstanding borrowings are fully secured, see Note 3, and carried at a weighted average interest rate of 1.73% and 1.35%, respectively. Outstanding borrowings are not permitted to exceed \$250 million aggregately; Revolving Credit Agreement expires in 2020. The interest rate on the borrowings is set at the time the respective borrowing is initiated or renewed. The current borrowings can be repaid or renewed in the fourth quarter 2017. If renewed, the interest rate will be reset.	152,000	200,000
Total principal	402,000	450,000
Less debt issuance costs	1,540	1,798
Debt less debt issuance costs	\$ 400,460	\$ 448,202

Covenant Compliance

There are no financial covenants associated with the Senior Notes due 2023.

The Revolving Credit Agreement contains customary representations, covenants and events constituting default, and remedies for default. The Revolving Credit Agreement also defines financial covenants regarding permitted leverage ratios. ProAssurance is currently in compliance with all covenants of the Revolving Credit Agreement.

Additional Information

For additional information regarding ProAssurance's debt, see Note 10 of the Notes to Consolidated Financial Statements included in ProAssurance's December 31, 2016 Form 10-K.

Notes to Condensed Consolidated Financial Statements (Unaudited)

September 30, 2017

8. Shareholders' Equity

At September 30, 2017 and December 31, 2016, ProAssurance had 100 million shares of authorized common stock and 50 million shares of authorized preferred stock. The Board has the authority to determine provisions for the issuance of preferred shares, including the number of shares to be issued, the designations, powers, preferences and rights, and the qualifications, limitations or restrictions of such shares. To date, the Board has not approved the issuance of preferred stock.

ProAssurance declared cash dividends of \$0.31 per share during each of the first three quarters of 2017, totaling \$49.6 million. ProAssurance declared cash dividends of \$0.31 per share during each of the first three quarters of 2016, totaling \$49.4 million.

At September 30, 2017, Board authorizations for the repurchase of common shares or the retirement of outstanding debt of \$109.6 million remained available for use. ProAssurance did not repurchase any common shares during the nine months ended September 30, 2017 and repurchased approximately 44,500 shares at a cost of \$2.1 million during the nine months ended September 30, 2016.

Share-based compensation expense and related tax benefits were as follows:

	Three Months		Nine Months	
	Ended		Ended	
	September 30		September 30	
(In thousands)	2017	2016	2017	2016
Share-based compensation expense	\$1,018	\$1,645	\$7,110	\$7,458
Related tax benefits	\$356	\$576	\$2,489	\$2,610

ProAssurance awarded approximately 84,600 restricted share units and 48,000 base performance share units to employees in February 2017. The fair value of each unit awarded was estimated at \$58.35, equal to the market value of a ProAssurance common share on the date of grant less the estimated present value of dividends during the vesting period. All awards are charged to expense as an increase to additional paid-in capital over the service period (generally the vesting period) associated with the award. Restricted share units and performance share units vest in their entirety at the end of a three-year period following the grant date based on a continuous service requirement and, for performance share units, achievement of a performance objective. Partial vesting is permitted for retirees. A ProAssurance common share is issued for each unit once vesting requirements are met, except that units sufficient to satisfy required tax withholdings are paid in cash. The number of common shares issued for performance share units varies from 50% to 200% of base awards depending upon the degree to which stated performance objectives are achieved. ProAssurance issued approximately 29,300 and 99,500 common shares to employees in February 2017 related to restricted share units and performance share units, respectively, granted in 2014. Performance share units for the 2014 award were issued at levels ranging from 117% to 125%.

ProAssurance issued approximately 9,000 common shares to employees in February 2017 as bonus compensation, as approved by the Compensation Committee of the Board. The shares issued were valued at fair value (the market price of a ProAssurance common share on the date of award).

Other Comprehensive Income (Loss) and Accumulated Other Comprehensive Income (Loss)

For the three and nine months ended September 30, 2017 and 2016, OCI was primarily comprised of unrealized gains and losses, including non-credit impairment losses, arising during the period related to available-for-sale securities, less reclassification adjustments, as shown in the table that follows, net of tax. For the nine months ended September 30, 2016, OCI included a gain of \$0.6 million, net of tax, related to changes from the reestimation of two defined benefit plans assumed in the Eastern acquisition, one of which was terminated late in 2016. The remaining plan is frozen as to the earnings of additional benefits, but the unrecognized plan benefit liability is reestimated annually.

At September 30, 2017 and December 31, 2016, AOCI was primarily comprised of unrealized gains and losses from available-for-sale securities, including non-credit impairments recognized in OCI of \$0.5 million and \$0.3 million, respectively, net of tax. During 2016, as discussed above, one of the defined benefit plans assumed in the Eastern acquisition was terminated and the related unrecognized losses were reclassified from AOCI to earnings. At September 30, 2017 and December 31, 2016, unrecognized changes in the remaining defined benefit plan liability were nominal in amount. All tax effects were computed using a 35% rate, with the exception of unrealized gains and losses on available-for-sale securities held at our U.K. and Cayman Island entities which were immaterial in amount.

Table of Contents

ProAssurance Corporation and Subsidiaries
 Notes to Condensed Consolidated Financial Statements (Unaudited)
 September 30, 2017

Amounts reclassified from AOCI to Net income and the amounts of deferred tax expense (benefit) included in OCI were as follows:

(In thousands)	Three Months		Nine Months	
	Ended September 30 2017	2016	Ended September 30 2017	2016
Reclassifications from AOCI to Net income:				
Realized investment gains (losses)	\$1,462	\$3,852	\$2,425	\$145
Non-credit impairment losses reclassified to earnings, due to sale of securities or reclassification as a credit loss	—	(423)	(3)	(3,441)
Total amounts reclassified, before tax effect	1,462	3,429	2,422	(3,296)
Tax effect (at 35%)	(512)	(1,200)	(848)	1,154
Net reclassification adjustments	\$950	\$2,229	\$1,574	\$(2,142)
Deferred tax expense (benefit) included in OCI	\$(373)	\$(2,687)	\$4,091	\$17,114

9. Variable Interest Entities

ProAssurance holds passive interests in a number of entities that are considered to be VIEs under GAAP guidance. ProAssurance's VIE interests principally consist of interests in LPs/LLCs formed for the purpose of achieving diversified equity and debt returns. ProAssurance's VIE interests carried as a part of Other investments totaled \$27.4 million at September 30, 2017 and \$26.9 million at December 31, 2016. ProAssurance's VIE interests carried as a part of Investment in unconsolidated subsidiaries totaled \$269.6 million at September 30, 2017 and \$282.3 million at December 31, 2016.

ProAssurance does not have power over the activities that most significantly impact the economic performance of these VIEs and thus is not the primary beneficiary. Therefore, ProAssurance has not consolidated these VIEs. ProAssurance's involvement with each entity is limited to its direct ownership interest in the entity. Except as disclosed in Note 6 of the Notes to Condensed Consolidated Financial Statements, ProAssurance has no arrangements with any of the entities to provide other financial support to or on behalf of the entity. At September 30, 2017, ProAssurance's maximum loss exposure relative to these investments was limited to the carrying value of ProAssurance's investment in the VIE.

10. Earnings Per Share

Diluted weighted average shares is calculated as basic weighted average shares plus the effect, calculated using the treasury stock method, of assuming that restricted share units, performance share units and purchase match units have vested. The following table provides the weighted average number of common shares outstanding used in the calculation of the Company's basic and diluted earnings per share:

(In thousands, except per share data)	Three	Nine
	Months	Months
	Ended	Ended
	September	September
	30	30
	2017	2016
Weighted average number of common shares outstanding, basic	53,312,222	53,537,199
Dilutive effect of securities:		
Restricted Share Units	8775	8171
Performance Share Units	88132	10524
Purchase Match Units	2627	2325

Edgar Filing: PROASSURANCE CORP - Form 10-Q

Weighted average number of common shares outstanding, diluted	53,514	53,536
Effect of dilutive shares on earnings per share	\$(0.01)	\$(0.01)

All dilutive common share equivalents are reflected in the earnings per share calculation while antidilutive common share equivalents are not reflected in the earnings per share calculation. The diluted weighted average number of common shares outstanding for the three and nine months ended September 30, 2017 excludes approximately 28,000 and 9,000 common share equivalents, respectively, issuable under the Company's stock compensation plans, as their effect would be antidilutive. There were no common share equivalents that were antidilutive for the three and nine months ended September 30, 2016.

11. Segment Information

ProAssurance operates in four segments that are organized around the nature of the products and services provided: Specialty P&C, Workers' Compensation, Lloyd's Syndicate, and Corporate. A description of each segment follows. Specialty P&C is primarily focused on professional liability insurance and medical technology liability insurance. Professional liability insurance is primarily offered to healthcare providers and institutions and to attorneys and their firms. Medical technology liability insurance is offered to medical technology and life sciences companies that manufacture or distribute products including entities conducting human clinical trials. The Specialty P&C segment cedes certain premium to the Lloyd's Syndicate segment under a quota share agreement with Syndicate 1729. As discussed below, Syndicate 1729 operating results are reported on a quarter delay. For consistency purposes, results from this ceding arrangement, other than cash receipts or disbursements, have been reported within the Specialty P&C segment on the same one-quarter delay.

Workers' Compensation provides workers' compensation products primarily to employers with 1,000 or fewer employees. The segment also offers alternative market solutions whereby policies written are 100% ceded either to captive insurers unaffiliated with ProAssurance or to SPCs operated by a wholly owned subsidiary of ProAssurance. Each SPC is owned, fully or in part, by an agency, group or association. Operating results (underwriting profit or loss, plus investment results reported in the Corporate segment) of the SPCs are due to the owners of that cell.

Lloyd's Syndicate includes operating results from ProAssurance's 58% participation in Lloyd's of London Syndicate 1729. Syndicate 1729 underwrites risks over a wide range of property and casualty insurance and reinsurance lines in both the U.S. and international markets. The results of this segment are reported on a quarter delay, except when information is available that is material to the current period. Furthermore, investment results associated with investment assets solely allocated to Syndicate 1729 operations and certain U.S. paid administrative expenses are reported concurrently as that information is available on an earlier time frame.

Corporate includes ProAssurance's investment operations, interest expense and U.S. income taxes, all of which are managed at the corporate level with the exception of investment assets solely allocated to Syndicate 1729 as discussed above. The segment also includes non-premium revenues generated outside of our insurance entities and corporate expenses.

The accounting policies of the segments are the same as those described in Note 1 of the Notes to Consolidated Financial Statements in ProAssurance's December 31, 2016 report on Form 10-K and Note 1 of the Notes to Condensed Consolidated Financial Statements. ProAssurance evaluates performance of its Specialty P&C and Workers' Compensation segments based on before tax underwriting profit or loss, which excludes investment performance. Performance of the Lloyd's Syndicate segment is evaluated based on underwriting profit or loss, plus investment results of investment assets solely allocated to Syndicate 1729 operations, net of U.K. income tax expense. Performance of the Corporate segment is evaluated based on the contribution made to consolidated after tax results. ProAssurance accounts for inter-segment transactions as if the transactions were to third parties at current market prices. Assets are not allocated to segments because investments and other assets are not managed at the segment level.

⁽¹⁾ During the first quarter of 2017, ProAssurance began reporting in the Corporate segment the portion of the SPC dividend (expense) income that is attributable to the investment results of the SPCs, all of which are reported in the Corporate segment, to better align the expense with the related investment results of the SPCs. For comparative purposes, ProAssurance has reflected the SPC dividend expense for 2016 in the same manner.

(2) During the second quarter of 2017, ProAssurance recognized a \$5.2 million pre-tax expense related to previously unrecognized SPC dividend expense for the cumulative earnings of unrelated parties that have owned segregated portfolio cells at various periods since 2003 in a Bermuda captive insurance operation managed by the Company's HCPL line of business within the Specialty P&C segment. The expense recorded in the second quarter of 2017 related to periods prior to the current period and is unrelated to the captive operations of the Company's Eastern Re subsidiary. The \$1.8 million tax impact of the expense recognized in the second quarter of 2017 is included in the Corporate segment's income tax benefit (expense) for the 2017 nine-month period.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

The following discussion should be read in conjunction with the Condensed Consolidated Financial Statements and Notes to those statements which accompany this report. Throughout the discussion we use certain terms and abbreviations, which can be found in the Glossary of Terms and Acronyms at the beginning of this report. In addition, a glossary of insurance terms and phrases is available on the investor section of our website. Throughout the discussion, references to "ProAssurance," "PRA," "Company," "we," "us" and "our" refer to ProAssurance Corporation and its consolidated subsidiaries. The discussion contains certain forward-looking information that involves significant risks, assumptions and uncertainties. As discussed under the heading "Caution Regarding Forward-Looking Statements," our actual financial condition and operating results could differ significantly from these forward-looking statements.

ProAssurance Overview

We report our results in four segments based on the operational focus of the segment. Our Specialty P&C segment includes our professional liability business and our medical technology liability business. Our Workers' Compensation segment includes workers' compensation insurance for employers, groups and associations. Our Lloyd's Syndicate segment reflects operating results from our 58% participation in Syndicate 1729, which underwrites risks over a wide range of property and casualty insurance and reinsurance lines in both the U.S. and international markets. Information regarding Lloyd's operations derived from U.K. based entities is normally reported on a quarter delay, except when information is available that is material to the current period. Investment results associated with our FAL investments are reported concurrently as those results are available on an earlier time frame. Our Corporate segment includes our investment operations, which are managed at the corporate level (except results associated with investment assets solely allocated to Syndicate 1729 operations), non-premium revenues generated outside of our insurance entities, corporate expenses, interest and U.S. income taxes. Additional information regarding our segments is included in Note 11 of the Notes to Condensed Consolidated Financial Statements and in Part I of our 2016 Form 10-K.

Critical Accounting Estimates

Our Condensed Consolidated Financial Statements are prepared in conformity with GAAP. Preparation of these financial statements requires us to make estimates and assumptions that affect the amounts we report on those statements. We evaluate these estimates and assumptions on an ongoing basis based on current and historical developments, market conditions, industry trends and other information that we believe to be reasonable under the circumstances. There can be no assurance that actual results will conform to our estimates and assumptions; reported results of operations may be materially affected by changes in these estimates and assumptions.

Management considers the following accounting estimates to be critical because they involve significant judgment by management and those judgments could result in a material effect on our financial statements.

Reserve for Losses and Loss Adjustment Expenses

The largest component of our liabilities is our reserve for losses and loss adjustment expenses ("reserve for losses" or "reserve"), and the largest component of expense for our operations is incurred losses and loss adjustment expenses (also referred to as "losses and loss adjustment expenses," "incurred losses," "losses incurred," and "losses"). Incurred losses reported in any period reflect our estimate of losses incurred related to the premiums earned in that period as well as any changes to our previous estimate of the reserve required for prior periods.

As of September 30, 2017, our reserve is comprised almost entirely of long-tail exposures. The estimation of long-tailed losses is inherently difficult and is subject to significant judgment on the part of management. Due to the nature of our claims, our loss costs, even for claims with similar characteristics, can vary significantly depending upon many factors, including but not limited to the specific characteristics of the claim and the manner in which the claim is resolved. Long-tailed insurance is characterized by the extended period of time typically required to assess the viability of a claim, potential damages, if any, and to then reach a resolution of the claim. The claims resolution process may extend to more than five years. The combination of continually changing conditions and the extended time required for claim resolution results in a loss cost estimation process that requires actuarial skill and the application of significant judgment, and such estimates require periodic modification.

Our reserve is established by management after taking into consideration a variety of factors including premium rates, claims frequency, historical paid and incurred loss development trends, the expected effect of inflation, general economic trends, the legal and political environment, and the conclusions reached by our internal and consulting actuaries. We update and review the data underlying the estimation of our reserve for losses each reporting period and make adjustments to loss estimation assumptions that we believe best reflect emerging data. Both our internal and consulting actuaries perform an in-

Table of Contents

depth review of our reserve for losses on at least a semi-annual basis using the loss and exposure data of our insurance subsidiaries.

Our reserving process can be broadly grouped into three areas: the establishment of the reserve for the current accident year (the initial reserve), the re-estimation of the reserve for prior accident years (development of prior accident years) and the establishment of the initial reserve for risks assumed in business combinations, applicable only in periods in which acquisitions occur (the acquired reserve).

Current Accident Year - Initial Reserve

Considerable judgment is required in establishing our initial reserve for any current accident year period, as there is limited data available upon which to base our estimate. Our process for setting an initial reserve considers the unique characteristics of each product, but in general we rely heavily on the loss assumptions that were used to price business, as our pricing reflects our analysis of loss costs that we expect to incur relative to the insurance product being priced. Specialty P&C Segment. Loss costs within this segment are impacted by many factors, including but not limited to the nature of the claim, including whether or not the claim is an individual or a mass tort claim, the personal situation of the claimant or the claimant's family, the outcome of jury trials, the legislative and judicial climate where any potential litigation may occur, general economic conditions and, for claims involving bodily injury, the trend of healthcare costs. Within our Specialty P&C segment, for our HCPL business (77% of our consolidated gross reserve for losses and loss adjustment expenses as of December 31, 2016), we set an initial reserve using the average loss ratio used in our pricing, plus an additional provision in consideration of the historical loss volatility we and others in the industry have experienced. For our HCPL business our target loss ratio during recent accident years has ranged from 77% to 78% and the provision for loss volatility has ranged from 8 to 10 percentage points, producing an overall average initial loss ratio for our HCPL business of approximately 87%. The reasons for the higher loss provisions vary from period to period and have included additional loss activity within our surplus lines business, provisions for losses in excess of policy limits, adjustments to unallocated loss adjustment expenses, adjustment to the reserve for the death, disability and retirement provisions in our policies and additional losses recorded for particular exposures, such as mass torts. These specific adjustments are made if we believe the results for a given accident year are likely to exceed those anticipated by our pricing. We believe use of a provision for volatility appropriately considers the inherent risks and limitations of our rate development process and the historic volatility of professional liability losses (the industry has experienced accident year loss ratios as high as 163% and as low as 53% over the past 30 years) and produces a reasonable best estimate of the reserve required to cover actual ultimate unpaid losses. A similar practice is followed for our legal professional liability business (4% of our consolidated gross reserve for losses and loss adjustment expenses as of December 31, 2016).

The risks insured in our medical technology liability business (6% of our consolidated gross reserve for losses and loss adjustment expenses as of December 31, 2016) are more varied, and policies are individually priced based on the risk characteristics of the policy and the account. These policies often have significant deductibles or self-insured retentions and the insured risks range from startup operations to large, multinational entities. Reserves are established using our most recently developed actuarial estimates of losses expected to be incurred based on factors which include results from prior analysis of similar business, industry indications, observed trends and judgment. Claims in this line of business primarily involve bodily injury to individuals and are affected by factors similar to those of our HCPL line of business. For the medical technology liability business, we also establish an initial reserve using a loss ratio approach, including a provision in consideration of historical loss volatility that this line of business has exhibited. Workers' Compensation Segment. Many factors affect the ultimate losses incurred for our workers' compensation coverages (12% of our consolidated gross reserve for losses and loss adjustment expenses as of December 31, 2016) including but not limited to the type and severity of the injury, the age and occupation of the injured worker, the estimated length of disability, medical treatment and related costs, and the jurisdiction and workers' compensation laws of the injury occurrence. We use various actuarial methodologies in developing our workers' compensation reserve, combined with a review of the exposure base generally based upon payroll of the insured. For the current accident year, given the lack of seasoned information, the different actuarial methodologies produce results with significant variability. Therefore, more emphasis is placed on supplementing results from the actuarial methodologies with trends in exposure base, medical expense inflation, general inflation, severity, and claim counts, among other

things, to select an expected loss ratio.

Lloyd's Syndicate Segment. Due to the relatively short history of Syndicate 1729 (inception date January 1, 2014) we are influenced by historical claims experience of the Lloyd's market for similar risks in estimating the appropriate initial reserves for our Lloyd's Syndicate segment. Loss assumptions by risk category were incorporated into the business plan submitted to Lloyd's for Syndicate 1729 with consideration given to loss experience incurred to date. We expect loss ratios to fluctuate from quarter to quarter as Syndicate 1729 writes more business and the book begins to mature. Loss ratios can also fluctuate due to the timing of earned premium adjustments. Such adjustments may be the result of premiums for certain policies and assumed reinsurance contracts being reported subsequent to the coverage period and may be subject to adjustment based on loss experience. Premium and exposure for some of Syndicate 1729's insurance policies and reinsurance contracts are initially

Table of Contents

estimated and subsequently recorded over an extended period of time as reports are received under binding authority programs. When reports are received, the premium, exposure and corresponding loss estimates are revised accordingly. Changes in loss estimates due to premium or exposure fluctuations are incurred in the accident year in which the premium is earned.

For significant property catastrophe exposures, Syndicate 1729 accumulates a listing of potentially affected policies through employing the use of third-party catastrophe models. Each identified policy is given an estimate of loss severity based upon a combination of factors including the probable maximum loss of each policy, market share analytics, underwriting judgment, client/broker estimates and historical loss trends for similar events. These models are inherently uncertain, reliant upon key assumptions and management judgment and are not always a representation of actual events and ensuing potential loss exposure. Determination of actual losses may take an extended period of time until claims are reported and resolved, including coverage litigation.

Development of Prior Accident Years

In addition to setting the initial reserve for the current accident year, each period we reassess the amount of reserve required for prior accident years.

The foundation of our reserve re-estimation process is an actuarial analysis based on our most recently available claims data and currently available industry trend information. Changes to previously established reserve estimates are recognized in the current period if management's best estimate of ultimate losses differs from the estimate previously established. While management considers a variety of variables in determining its best estimate, in general, as claims age, our methodologies give more weight to actual loss costs which, for the majority of our reserves, continue to indicate that ultimate loss costs will be lower than our previous estimates. The discussion in our Critical Accounting Estimates section in Item 7 of our 2016 Form 10-K includes additional information regarding the methodologies used to evaluate our reserve.

Any change in our estimate of net ultimate losses for prior years is reflected in net income in the period in which such changes are made. In recent years such changes have reduced our estimate of net ultimate losses, resulting in a reduction of reported losses for the period and a corresponding increase in pre-tax income.

Due to the size of our consolidated reserve for losses and the large number of claims outstanding at any point in time, even a small percentage adjustment to our total reserve estimate could have a material effect on our results of operations for the period in which the adjustment is made.

Use of Judgment

Even though the actuarial process is highly technical, it is also highly judgmental, both as to the selection of the data used in the various actuarial methodologies (e.g., initial expected loss ratios and loss development factors) and in the interpretation of the output of the various methods used. Each actuarial method generally returns a different value and for the more recent accident years the variations among the various methodologies can be significant. For each partition of our reserves, we evaluate the results of the various methods, along with the supplementary statistical data regarding such factors as closed with and without indemnity ratios, claim severity trends, the expected duration of such trends and changes in the legal and legislative environment and the current economic environment to develop a point estimate based upon management's judgment and past experience. The series of selected point estimates is then combined to produce an overall point estimate for ultimate losses.

Given the potential for unanticipated volatility for long-tailed lines of business, we are cautious in giving full credibility to emerging trends that, when more fully mature, may lead to the recognition of either favorable or adverse development of our losses. There may be trends, both positive and negative, reflected in the numerical data both within our own information and in the broader marketplace that mitigate or reverse as time progresses and additional data becomes available. This is particularly true for our HCPL business which has historically exhibited significant volatility as previously discussed.

HCPL. Over the past several years the most influential factor affecting the analysis of our HCPL reserves and the related development recognized has been the change, or lack thereof, in the severity of claims. The severity trend is an explicit component of our pricing models, whereas in our reserving process the severity trend's impact is implicit. Our estimate of this trend and our expectations about changes in this trend impact a variety of factors, from the selection of expected loss ratios to the ultimate point estimates established by management.

Because of the implicit and wide-ranging nature of severity trend assumptions on the loss reserving process it is not practical to specifically isolate the impact of changing severity trends. However, because severity is an explicit component of our HCPL pricing process we can better isolate the impact that changing severity can have on our loss costs and loss ratios in regards our pricing models for this business component. Our current HCPL pricing models assume a severity trend of 2% to 3% for most states and products. If the severity trend were to be higher by 1 percentage point, the impact would be an increase in our expected loss ratio for this business of 3.2 percentage points, based on current claim disposition patterns. An increase in the severity trend of 3 percentage points would result in a 10.1 percentage point increase in our expected loss ratio. Due to the

Table of Contents

long-tailed nature of our claims and the previously discussed historical volatility of loss costs, selection of a severity trend assumption is a subjective process that is inherently likely to prove inaccurate over time. Given the long tail and volatility, we are generally cautious in making changes to the severity assumptions within our pricing models. All open claims and accident years are generally impacted by a change in the severity trend, which compounds the effect of such a change.

For the 2004 to 2009 accident years, both our internal and consulting actuaries observed an unprecedented reduction in the frequency of HCPL claims (or number of claims per exposure unit) that cannot be attributed to any single factor. Since 2009, claim frequency has been relatively constant, at a lower level than had historically existed. For a number of years, we believed that much of the reduction in claim frequency was the result of a decline in the filing of non-meritorious lawsuits that had historically been dismissed or otherwise resulted in no payment of indemnity on behalf of our insureds. With fewer non-meritorious claims being filed we expected that the claims that were filed had the potential for greater average losses, or greater severity. To date, however, this effect has not materialized to the extent we anticipated. The uncertainty as to the impact this decline in frequency might ultimately have on the average cost of claims complicated the selection of an appropriate severity trend for our pricing model for these lines, and factoring severity into the various actuarial methodologies we use to evaluate our reserve has been increasingly challenging. Based on the weighted average of payments, typically 92% of our HCPL claims are resolved after eight years for a given accident year.

Although we remain uncertain regarding the ultimate severity trend to project into the future due to the long-tailed nature of our business, we have given consideration to observed loss costs in setting our rates. For our HCPL business this practice has resulted in rate reductions in recent years. For example, on average, excluding our podiatry business acquired in 2009, we have gradually reduced the premium rates we charge on our standard physician renewal business (our largest HCPL line) by approximately 16% from the beginning of 2006 to September 30, 2017. Loss ratios for the current accident years have thus remained fairly constant because expected loss reductions have been reflected in our rates.

Workers' Compensation. The projection of changes in claim severity trend has not historically been an influential factor affecting our workers' compensation analysis of reserves, as claims are typically resolved more quickly than the industry norm. As previously mentioned, the determination and calculation of loss development factors, in particular, the selection of tail factors which are used to extend the projection of losses beyond historical data, requires considerable judgment. These factors are determined in the absence of direct loss development history and thus require reliance upon industry data which may not be representative of the Company's data and experience.

Loss Development

We recognized net favorable reserve development of \$32.3 million during the three months ended September 30, 2017, of which favorable development of \$30.1 million related to our Specialty P&C segment and \$2.3 million related to our Workers' Compensation segment, slightly offset by unfavorable development of \$0.1 million related to our Lloyd's Syndicate segment. We recognized net favorable reserve development of \$90.1 million during the nine months ended September 30, 2017, of which \$81.9 million related to our Specialty P&C segment, \$7.6 million related to our Workers' Compensation segment and \$0.6 million related to our Lloyd's Syndicate segment.

Net favorable development recognized within the Specialty P&C segment was primarily attributable to the favorable resolution of HCPL claims during the period and an evaluation of established case reserves and paid claims data that indicated that the actual severity trend associated with the remaining HCPL claims is less than we had previously estimated.

Net favorable development recognized within the Workers' Compensation segment included amortization of the purchase accounting fair value adjustment within the traditional business of \$0.4 million and \$1.2 million for the three and nine months ended September 30, 2017, respectively; the remaining net favorable development of \$1.9 million and \$6.4 million for the three and nine months ended September 30, 2017, respectively, was attributable to our SPCs which are evaluated at the cell level. Because a relatively small number of claims are open per cell, the closing of claims can affect the actuarial projections for the remaining open claims in the cell to an extent that indicates development should be recognized for the cell.

Net favorable development recognized within our Lloyd's Syndicate segment for the nine months ended September 30, 2017 was attributable to actual loss experience proving to have been better than the Lloyd's market historical averages for similar risks which were used to establish initial reserves and more than offset the net unfavorable development recognized during the third quarter of 2017. See further discussion in our Segment Operating Results - Lloyd's Syndicate section that follows.

Table of Contents

Investment Valuations

We record the majority of our investments at fair value as shown in the table below. At September 30, 2017 the distribution of our investments based on GAAP fair value hierarchies (levels) was as follows:

	Distribution by GAAP Fair Value Hierarchy				Total Investments
	Level 1	Level 2	Level 3	Not Categorized	
Investments recorded at:					
Fair value	19%	68%	1%	5%	93%
Other valuations					7%
Total Investments					100%

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. All of our fixed maturity and equity security investments are carried at fair value. Our short-term securities are carried at amortized cost, which approximates fair value.

Because of the number of securities we own and the complexity of developing accurate fair values, we utilize multiple independent pricing services to assist us in establishing the fair value of individual securities. The pricing services provide fair values based on exchange-traded prices, if available. If an exchange-traded price is not available, the pricing services, if possible, provide a fair value that is based on multiple broker/dealer quotes or that has been developed using pricing models. Pricing models vary by asset class and utilize currently available market data for securities comparable to ours to estimate a fair value for our securities. The pricing services scrutinize market data for consistency with other relevant market information before including the data in the pricing models. The pricing services disclose the types of pricing models used and the inputs used for each asset class. Determining fair values using these pricing models requires the use of judgment to identify appropriate comparable securities and to choose a valuation methodology that is appropriate for the asset class and available data.

The pricing services provide a single value per instrument quoted. We review the values provided for reasonableness each quarter by comparing market yields generated by the supplied value versus market yields observed in the marketplace. We also compare yields indicated by the provided values to appropriate benchmark yields and review for values that are unchanged or that reflect an unanticipated variation as compared to prior period values. We utilize a primary pricing service for each security type and compare provided information for consistency with alternate pricing services, known market data and information from our own trades, considering both values and valuation trends. We also review weekly trades versus the prices supplied by the services. If a supplied value appears unreasonable, we discuss the valuation in question with the pricing service and make adjustments if deemed necessary. Historically our review has not resulted in any material changes to the values supplied by the pricing services. The pricing services do not provide a fair value unless an exchange-traded price or multiple observable inputs are available. As a result, the pricing services may provide a fair value for a security in some periods but not others, depending upon the level of recent market activity for the security or comparable securities.

Level 1 Investments

Fair values for a majority of our equity securities and portions of our corporate debt, short-term and convertible securities are determined using exchange-traded prices. There is little judgment involved when fair value is determined using an exchange-traded price. In accordance with GAAP, for disclosure purposes we classify securities valued using an exchange-traded price as Level 1 securities.

Level 2 Investments

Most fixed income securities do not trade daily, and thus exchange-traded prices are generally not available for these securities. However, market information (often referred to as observable inputs or market data, including but not limited to, last reported trade, non-binding broker quotes, bids, benchmark yield curves, issuer spreads, two sided markets, benchmark securities, offers and recent data regarding assumed prepayment speeds, cash flow and loan performance data) is available for most of our fixed income securities. We determine fair value for a large portion of our fixed income securities using available market information. In accordance with GAAP, for disclosure purposes we

classify securities valued based on multiple market observable inputs as Level 2 securities.

44

Table of Contents

Level 3 Investments

When a pricing service does not provide a value for one of our fixed maturity securities, management estimates fair value using either a single non-binding broker quote or pricing models that utilize market based assumptions which have limited observable inputs. The process involves significant judgment in selecting the appropriate data and modeling techniques to use in the valuation process. For disclosure purposes, we classify securities valued using limited observable inputs as Level 3 securities.

Fair Values Not Categorized

We hold interests in certain investment funds, primarily LPs/LLCs, which measure fund assets at fair value on a recurring basis and provide us with a NAV for our interest. As a practical expedient, we consider the NAV provided to approximate the fair value of the interest. In accordance with GAAP, we do not categorize these investments within the fair value hierarchy.

Investments - Other Valuation Methodologies

Certain of our investments, in accordance with GAAP for the type of investment, are measured using methodologies other than fair value. At September 30, 2017, these investments represented approximately 7% of total investments, and are detailed in the following table. Additional information about these investments is provided in Notes 2 and 3 of the Notes to Condensed Consolidated Financial Statements.

(In millions)	Carrying Value	GAAP Measurement Method
Other investments:		
Investments in LPs	\$ 48.5	Cost
Other, principally FHLB capital stock	3.5	Principally Cost
	52.0	
Investment in unconsolidated subsidiaries:		
Investments in tax credit partnerships	100.0	Equity
Equity method LPs/LLCs	29.4	Equity
	129.4	
BOLI	61.7	Cash surrender value
Total investments - Other valuation methodologies	\$ 243.1	

Other-than-temporary Impairments

We evaluate our available-for-sale investment securities on at least a quarterly basis for the purpose of determining whether declines in fair value below recorded cost basis represent OTTI. We consider an OTTI to have occurred:

- if there is intent to sell the security;
- if it is more likely than not that the security will be required to be sold before full recovery of its amortized cost basis;
- and
- if the entire amortized basis of the security is not expected to be recovered.

The assessment of whether the amortized cost basis of a security, particularly an asset-backed debt security, is expected to be recovered requires management to make assumptions regarding various matters affecting future cash flows. The choice of assumptions is subjective and requires the use of judgment. Actual credit losses experienced in future periods may differ from management's estimates of those credit losses. Methodologies used to estimate the present value of expected cash flows are:

For non-structured fixed maturities (obligations of states, municipalities and political subdivisions, and corporate debt) the estimate of expected cash flows is determined by projecting a recovery value and a recovery time frame and assessing whether further principal and interest will be received. We consider various factors in projecting recovery values and recovery time frames, including the following:

- third-party research and credit rating reports;
- the current credit standing of the issuer, including credit rating downgrades, whether before or after the balance sheet date;
- the extent to which the decline in fair value is attributable to credit risk specifically associated with the security or its issuer;
-

internal assessments and the assessments of external portfolio managers regarding specific circumstances surrounding an investment, which indicate the investment is more or less likely to recover its amortized cost than other investments with a similar structure;

45

Table of Contents

for asset-backed securities, the origination date of the underlying loans, the remaining average life, the probability that credit performance of the underlying loans will deteriorate in the future, and our assessment of the quality of the collateral underlying the loan;

failure of the issuer of the security to make scheduled interest or principal payments;

any changes to the rating of the security by a rating agency; and

recoveries or additional declines in fair value subsequent to the balance sheet date.

For structured securities (primarily asset-backed securities), management estimates the present value of the security's cash flows using the effective yield of the security at the date of acquisition (or the most recent implied rate used to accrete the security if the implied rate has changed as a result of a previous impairment or changes in expected cash flows). We consider the most recently available six month averages of the levels of delinquencies, defaults, severities, and prepayments for the collateral (loans) underlying the securitization or, if historical data is not available, sector based assumptions, to estimate expected future cash flows of these securities.

Exclusive of securities where there is an intent to sell or where it is not more likely than not that the security will be required to be sold before recovery of its amortized cost basis, OTTI for debt securities is separated into a credit component and a non-credit component. The credit component of an OTTI is the difference between the security's amortized cost basis and the present value of its expected future cash flows, while the non-credit component is the remaining difference between the security's fair value and the present value of expected future cash flows. The credit component of the OTTI is recognized in earnings while the non-credit component is recognized in OCI.

Investments in tax credit partnerships are evaluated for OTTI by considering both qualitative and quantitative factors which include: whether the current expected cash flows from the investment, primarily tax benefits, are less than those expected at the time the investment was acquired and our ability and intent to hold the investment until the recovery of its carrying value.

Investments in LPs/LLCs, which are not accounted for under the equity method, are evaluated for impairment by comparing our carrying value to the NAV of our interest as reported by the LP/LLC. Additionally, management considers the performance of the LP/LLC relative to the market and its stated objectives, cash flows expected from the interest and the audited financial statements of the LP/LLC, if available.

We recognize OTTI, exclusive of non-credit OTTI, in earnings as a part of net realized investment gains (losses). In subsequent periods, any measurement of gain, loss or impairment is based on the revised amortized basis of the security. Non-credit OTTI on debt securities and declines in fair value of available-for-sale securities not considered to be other-than-temporary are recognized in OCI.

Asset-backed debt securities that have been impaired due to credit or are below investment grade quality are accounted for under the effective yield method. Under the effective yield method, estimates of cash flows expected over the life of asset-backed securities are then used to recognize income on the investment balance for subsequent accounting periods.

Deferred Policy Acquisition Costs

Policy acquisition costs (primarily commissions, premium taxes and underwriting salaries) which are directly related to the successful acquisition of new and renewal premiums are capitalized as DPAC and charged to expense, net of ceding commissions earned, as the related premium revenue is recognized. We evaluate the recoverability of our DPAC at the segment level each reporting period, and any amounts estimated to be unrecoverable are charged to expense in the current period. As of September 30, 2017 we have not determined that any amounts are unrecoverable.

Estimation of Taxes / Tax Credits

For interim periods, we determine our provision for income taxes based on our current estimate of our annual effective tax rate. Items which are unusual, infrequent, or that cannot be reliably estimated are considered in the effective tax rate in the period in which the item is included in income, and are referred to as discrete items. In calculating our estimated annual effective tax rate, we include the estimated benefit of tax credits for the annual period based on the most recently available information provided by the tax credit partnership; the actual amounts of credits provided by the tax credit partnerships may prove to be different than our estimates. The effect of such differences is recognized in the period identified.

Deferred Taxes

Deferred federal income taxes arise from the recognition of temporary differences between the basis of assets and liabilities determined for financial reporting purposes and the basis determined for income tax purposes. Our temporary differences principally relate to our loss reserve, unearned premiums, DPAC, unrealized investment gains (losses) and basis differences on fixed assets and investment assets. Deferred tax assets and liabilities are measured using the enacted tax rates

Table of Contents

expected to be in effect when such benefits are realized. We review our deferred tax assets quarterly for impairment. If we determine that it is more likely than not that some or all of a deferred tax asset will not be realized, a valuation allowance is recorded to reduce the carrying value of the asset. In assessing the need for a valuation allowance, management is required to make certain judgments and assumptions about our future operations based on historical experience and information as of the measurement period regarding reversal of existing temporary differences, carryback capacity, future taxable income (including its capital and operating characteristics) and tax planning strategies.

Due to losses recognized in our Lloyd's Syndicate segment during the third quarter of 2017 primarily due to Hurricanes Harvey, Irma and Maria, management evaluated the realizability of the deferred tax assets for the U.K. jurisdiction recorded at the segment and concluded that it was more likely than not that the deferred tax assets would not be realized. Therefore, management established a valuation allowance against the full value of the deferred tax assets related to our U.K. operations.

Unrecognized Tax Benefits

We evaluate tax positions taken on tax returns and recognize positions in our financial statements when it is more likely than not that we will sustain the position upon resolution with a taxing authority. If recognized, the benefit is measured as the largest amount of benefit that has a greater than 50% probability of being realized. We review uncertain tax positions each period, considering changes in facts and circumstances, such as changes in tax law, interactions with taxing authorities and developments in case law, and make adjustments as we consider necessary. Adjustments to our unrecognized tax benefits may affect our income tax expense, and settlement of uncertain tax positions may require the use of cash. Other than differences related to timing, no significant adjustments were considered necessary during the nine months ended September 30, 2017 or 2016. At September 30, 2017, our liability for unrecognized tax benefits approximated \$8.5 million.

Goodwill

We review goodwill for impairment annually on October 1 and whenever events or changes in circumstances indicate the carrying amount of goodwill may not be recoverable. Goodwill is tested for impairment at the reporting unit level. Our reporting units are consistent with the reportable segments identified in Note 11 of the Notes to Condensed Consolidated Financial Statements. Of the four reporting units, two have goodwill - Specialty P&C and Workers' Compensation. As of October 1, 2016, we performed a qualitative goodwill impairment assessment for our Specialty P&C segment and a quantitative goodwill impairment assessment for our Workers' Compensation segment. At the valuation date, management concluded that the fair values of both the Specialty P&C and Workers' Compensation reporting units exceeded their respective carrying values, and no goodwill impairment was recorded. There have been no events or changes in circumstances since that evaluation date that would indicate the carrying amount of goodwill is not recoverable. Additional information regarding our goodwill assessment at the reporting unit level is included in Note 1 of the Notes to Consolidated Financial Statements included in ProAssurance's December 31, 2016 Form 10-K.

Intangible Assets

Intangible assets with definite lives are amortized over the estimated useful life of the asset. Amortizable intangible assets primarily consist of agency and policyholder relationships, renewal rights and trade names. Intangible assets with an indefinite life, primarily state licenses, are not amortized. Intangible assets are evaluated for impairment on an annual basis. Additional information regarding intangible assets is included in Note 1 of the Notes to Consolidated Financial Statements included in ProAssurance's December 31, 2016 Form 10-K.

Audit Premium

Workers' compensation premiums are determined based upon the payroll of the insured, applicable premium rates and an experience based modification factor, where applicable. An audit of the policyholders' records is conducted after policy expiration to make a final determination of applicable premiums. Audit premium due from or due to a policyholder as a result of an audit is reflected in net premiums written and earned when billed. We track, by policy, the amount of additional premium billed in final audit invoices as a percentage of payroll exposure and use this information to estimate the probable additional amount of EBUB premium as of the balance sheet date. We include changes to the EBUB premium estimate in net premiums written and earned in the period recognized.

Accounting Changes

We are not aware of any accounting changes not yet adopted as of September 30, 2017 that would have a material effect on our results of operations or financial position. Note 1 of the Notes to Condensed Consolidated Financial Statements provides additional detail regarding accounting changes.

Table of Contents

Liquidity and Capital Resources and Financial Condition

Overview

ProAssurance Corporation is a holding company and is a legal entity separate and distinct from its subsidiaries. As a holding company our principal sources of revenue are investment revenues, and dividends from our operating subsidiaries represent a significant source of funds for our obligations, including debt service and shareholder dividends. At September 30, 2017, we held cash and liquid investments of approximately \$264 million outside our insurance subsidiaries that were available for use without regulatory approval or other restriction. As of October 31, 2017, our holding company also has an additional \$66 million in permitted borrowings under its Revolving Credit Agreement, which includes \$18 million of the outstanding balance that was repaid in October 2017. Additionally, we have available an accordion feature which, if subscribed successfully, would allow another \$50 million in available funds as discussed in this section under the heading "Debt."

To date, during 2017, our insurance subsidiaries have paid dividends to us of approximately \$359 million, including \$184 million that was paid in October 2017. Dividends paid in October have not been included in our cash and liquid investments held outside of our insurance subsidiaries at September 30, 2017. Of the total dividends paid, \$200 million were extraordinary dividends. In the aggregate, our domestic insurance subsidiaries do not intend to pay dividends over the remainder of 2017. The payment of any dividend requires prior notice to the insurance regulator in the state of domicile, and the regulator may reduce or prevent the dividend if, in its judgment, payment of the dividend would have an adverse effect on the surplus of the insurance subsidiary. We make the decision to pay dividends from an insurance subsidiary based on the capital needs of that subsidiary, and may pay less than the permitted dividend or may also request permission to pay an additional amount (an extraordinary dividend).

Cash Flows

Cash flows between periods compare as follows:

(In thousands)	Nine Months Ended	
	September 30	
	2017 vs 2016	2016 vs 2015
Increase (decrease) in net cash provided (used) by:		
Operating activities	\$(30,961)	\$23,469
Investing activities	396,030	(314,046)
Financing activities	(251,214)	174,078
Increase (decrease) in Cash and cash equivalents	\$113,855	\$(116,499)

The principal components of our operating cash flows are the excess of premiums collected and net investment income over losses paid and operating costs, including income taxes. Timing delays exist between the collection of premiums and the payment of losses associated with the premiums. Premiums are generally collected within the twelve-month period after the policy is written, while our claim payments are generally paid over a more extended period of time. Likewise, timing delays exist between the payment of claims and the collection of any associated reinsurance recoveries.

The decrease in operating cash flows for the nine months ended September 30, 2017 as compared to nine months ended September 30, 2016 was primarily driven by an increase in tax payments of \$27.1 million and a decrease in cash received from investment income of \$7.7 million. The increase in tax payments was due to the effect of a \$15.0 million tax refund received in 2016 for the 2015 tax year and a \$12.1 million increase in 2017 estimated tax payments. These decreases in operating cash flows were partially offset by an increase in premium receipts of \$5.1 million driven by our Workers' Compensation segment.

The increase in operating cash flows for the nine months ended September 30, 2016 as compared to the nine months ended September 30, 2015 was primarily due to a decrease in net tax payments driven by a \$25.5 million reduction in estimated tax payments and the receipt of the aforementioned \$15.0 million tax refund received in 2016. These increases in operating cash flows were partially offset by a \$12.0 million decrease in cash received from investment income.

We manage our investing cash flows to ensure that we will have sufficient liquidity to meet our obligations, taking into consideration the timing of cash flows from our investments, including interest payments, dividends and principal payments, as well as the expected cash flows to be generated by our operations as discussed in this section under the heading "Investing Activities and Related Cash Flows."

Our financing cash flows are primarily composed of dividend payments, repurchases of common stock, and borrowings and repayments under our Revolving Credit Agreement. See further discussion of our financing activities in this section under "Financing Activities and Related Cash Flows."

Table of Contents

Operating Activities and Related Cash Flows

Reinsurance

Within our Specialty P&C segment, we use insurance and reinsurance (collectively, “reinsurance”) to provide capacity to write larger limits of liability, to provide reimbursement for losses incurred under the higher limit coverages we offer and to provide protection against losses in excess of policy limits. We also have a quota share arrangement with Syndicate 1729 established to provide an initial premium base for Syndicate 1729. Within our Workers' Compensation segment, we use reinsurance to reduce our net liability on individual risks, to mitigate the effect of significant loss occurrences (including catastrophic events), to stabilize underwriting results, and to increase underwriting capacity by decreasing leverage. In both the Specialty P&C and Workers' Compensation segments, we use reinsurance in risk sharing arrangements, to align our objectives with those of our strategic business partners and to provide custom insurance solutions for large customer groups. The purchase of reinsurance does not relieve us from the ultimate risk on our policies, but it does provide reimbursement for certain losses we pay. We pay our reinsurers a premium in exchange for reinsurance of the risk. In the majority of our excess of loss arrangements, the premium due to the reinsurer is determined by the loss experience of the business reinsured, subject to certain minimum and maximum amounts. Until all loss amounts are known, we estimate the premium due to the reinsurer. Changes to the estimate of premium owed under reinsurance agreements related to prior periods are recorded in the period in which the change in estimate occurs and can have a significant effect on Net premiums earned.

We generally reinsure risks under treaties (our excess of loss reinsurance arrangements) pursuant to which the reinsurers agree to assume all or a portion of all risks that we insure above our individual risk retention levels, up to the maximum individual limits offered. These arrangements are negotiated and renewed annually. Renewal dates for our healthcare professional liability, medical technology liability and workers' compensation treaties are October 1, January 1 and May 1, respectively. There were no significant changes in the cost or structure of our professional liability treaty which renewed October 1, 2017. Our participation was reduced upon the latest renewal of our medical technology liability treaty on January 1, 2017 to better reflect our current risk appetite. Our workers' compensation treaty renewed May 1, 2017 at a slightly higher rate than the previous agreement. The significant coverages provided by our current excess of loss reinsurance arrangements are detailed in the following table.

Excess of Loss Reinsurance Agreements

Professional Liability	Medical Technology & Life Sciences Products	Workers' Compensation - Traditional
------------------------	---	--

(1) Historically, retention has ranged from 5% to 32.5%.

(2) Historically, retention has been as high as \$2M.

Table of Contents

Large professional liability risks that are above the limits of our basic reinsurance treaties are reinsured on a facultative basis, whereby the reinsurer agrees to insure a particular risk up to a designated limit. We also have in place a number of risk sharing arrangements that apply to the first \$1.0 million of losses for certain large healthcare systems and other insurance entities and with certain insurance agencies that produce business for us.

During the three and nine months ended September 30, 2017, we wrote workers' compensation and healthcare professional liability policies in our alternative market business generating premium of approximately \$16.4 million and \$62.0 million, respectively. These policies are reinsured to the SPCs of our wholly owned subsidiary, Eastern Re, domiciled in the Cayman Islands, net of a ceding commission. The alternative market workers' compensation policies are ceded to the SPCs under 100% quota share reinsurance agreements and then further reinsured under an excess of loss reinsurance arrangement. The alternative market professional liability policies are ceded to the SPCs under either excess of loss or quota share reinsurance agreements, depending on the structure of the individual program, and the portion of the risk that is not ceded to an SPC may also be reinsured under our standard healthcare professional liability reinsurance program depending on the policy limits provided. The remaining premium written in our alternative market business of \$1.1 million and \$6.0 million for the three and nine months ended September 30, 2017, respectively, is 100% ceded to unaffiliated captive insurers.

Each SPC has preferred shareholders and the underwriting profit or loss of each cell accrues fully to these preferred shareholders. We participate as a preferred shareholder in certain SPCs. Our ownership interest in the SPCs for which we participate is as low as 25% and as high as 100%.

As discussed above, for the workers' compensation business ceded to Eastern Re each SPC has in place its own reinsurance arrangements, which are illustrated in the following table.

Segregated Portfolio Cell Reinsurance

Per Occurrence Coverage Aggregate Coverage

(1) ProAssurance assumes 100% of aggregate losses in excess of an aggregate attachment point with a maximum loss limit of \$100K.

(2) The attachment point is based on a percentage of premium (average is 89%) and varies by cell.

Each SPC maintains a loss fund initially equal to the difference between premium assumed by the cell and the ceding commission. The external owners of each cell provide a letter of credit to us that is initially equal to the difference between the loss fund of the SPC (amount of funds available to pay losses after deduction of ceding commission) and the aggregate attachment point of the reinsurance. Over time, an SPC's retained profits are considered in the determination of the collateral amount required to be provided by the cell's external owners.

Table of Contents

Within our Lloyd's Syndicate segment, Syndicate 1729 utilizes reinsurance to provide capacity to write larger limits of liability on individual risks, to provide protection against catastrophic loss and to provide protection against losses in excess of policy limits. The level of reinsurance that the Syndicate purchases is dependent on a number of factors, including its underwriting risk appetite for catastrophic exposure, the specific risks inherent in each line or class of business written and the pricing, coverage and terms and conditions available from the reinsurance market.

Reinsurance protection by line of business is as follows:

• Reinsurance is utilized on a per risk basis for the property insurance and casualty coverages in order to mitigate risk volatility.

• Catastrophic protection is utilized on both our property insurance and casualty coverages to protect against losses in excess of policy limits as well as natural catastrophes.

• Both quota share reinsurance and excess of loss reinsurance are utilized to manage the net loss exposure on our property reinsurance coverages.

• Property umbrella excess of loss reinsurance is utilized for peak catastrophe and frequency of catastrophe exposures. The Syndicate may still be exposed to losses that exceed the level of reinsurance purchased as well as to reinstatement premiums triggered by losses exceeding specific levels. Cash demands on the Syndicate can vary significantly depending on the nature and intensity of a loss event. For significant reinsured catastrophe losses, the inability or unwillingness of the reinsurer to make timely payments under the terms of the reinsurance agreement could have an adverse effect on the Syndicate's liquidity as the Syndicate remains liable to the insured.

For all of our segments, we make a determination of the amount of insurance risk we choose to retain based upon numerous factors, including our risk tolerance and the capital we have to support it, the price and availability of reinsurance, the volume of business, our level of experience with a particular set of claims and our analysis of the potential underwriting results. We purchase excess of loss reinsurance to limit the amount of risk we retain and we do so from a number of companies to mitigate concentrations of credit risk. We utilize reinsurance brokers to assist us in the placement of these reinsurance programs and in the analysis of the credit quality of our reinsurers. The determination of which reinsurers we choose to do business with is based upon an evaluation of their then-current financial strength, rating and stability. However, the financial strength of our reinsurers, and their corresponding ability to pay us, may change in the future due to forces or events we cannot control or anticipate.

Litigation

We are involved in various legal actions related to insurance policies and claims handling including, but not limited to, claims asserted against us by policyholders. These types of legal actions arise in the ordinary course of business and, in accordance with GAAP for insurance entities, are generally considered as a part of our loss reserving process, which is described in detail in our Critical Accounting Estimates section under the heading "Reserve for Losses and Loss Adjustment Expenses." We also have other direct actions against the Company unrelated to our claims activity which we evaluate and account for as a part of our other liabilities. For these corporate legal actions, we evaluate each case separately and establish what we believe is an appropriate reserve based on GAAP guidance related to contingent liabilities. As of September 30, 2017 there were no material reserves established for corporate legal actions.

A detailed listing of our investment holdings as of September 30, 2017 is located under the Financial Information heading on the Investor Relations page of our website which can be reached directly at www.proassurance.com/investmentholdings, or through links from the Investor Relations section of our website, Investor.Proassurance.com.

We manage our investments to ensure that we will have sufficient liquidity to meet our obligations, taking into consideration the timing of cash flows from our investments, including interest payments, dividends and principal payments, as well as the expected cash flows to be generated by our operations. In addition to the interest and dividends we will receive, we

Table of Contents

anticipate that between \$50 million and \$90 million of our investments will mature (or be paid down) each quarter over the next twelve months and become available, if needed, to meet our cash flow requirements. The primary outflow of cash at our insurance subsidiaries is related to paid losses and operating costs, including income taxes. The payment of individual claims cannot be predicted with certainty; therefore, we rely upon the history of paid claims in estimating the timing of future claims payments. To the extent that we may have an unanticipated shortfall in cash we may either liquidate securities or borrow funds under existing borrowing arrangements through our credit facility and the FHLB system. As of October 31, 2017, \$116 million could be made available for use through our credit facility, as discussed in this section under the heading "Debt." Given the duration of our investments, we do not foresee a shortfall that would require us to meet operating cash needs through additional borrowings. Additional information regarding the credit facility is detailed in Note 7 of the Notes to Condensed Consolidated Financial Statements. As discussed in Note 3 of the Notes to Condensed Consolidated Financial Statements, our fixed maturity and short-term investments include securities deposited with Lloyd's in order to meet our FAL requirement. At September 30, 2017 securities on deposit with Lloyd's included fixed maturities having a fair value of \$98.7 million and short-term investments with a fair value of \$0.5 million.

Our investment portfolio continues to be primarily composed of high quality fixed income securities with approximately 94% of our fixed maturities being investment grade securities as determined by national rating agencies. The weighted average effective duration of our fixed maturity securities at September 30, 2017 was 3.41 years; the weighted average effective duration of our fixed maturity securities combined with our short-term securities was 3.04 years.

The carrying value and unfunded commitments for certain of our investments are the following:

(\$ in thousands, except expected funding period)	Carrying Value		September 30, 2017	
	September 30, 2017	December 31, 2016	Unfunded Commitments	Expected funding period in years
Qualified affordable housing project tax credit partnerships ⁽¹⁾	\$91,598	\$102,313	\$1,325	6
Historic tax credit partnerships ⁽²⁾	8,355	11,459	3,642	2
Investment fund LPs/LLCs ⁽²⁾	280,449	273,986	165,947	6
Total	\$380,402	\$387,758	\$170,914	

⁽¹⁾ The carrying value reflects our total commitments (both funded and unfunded) to the partnerships, less any amortization, since our initial investment. We fund these investments based on funding schedules maintained by the partnerships.

⁽²⁾ The carrying value reflects our funded commitments less any amortization.

Investment fund LPs/LLCs are by nature less liquid and may involve more risk than other investments. We manage our risk through diversification of asset class and geographic location. At September 30, 2017, we had investments in 29 separate investment funds with a total carrying value, as shown in the table above, which represented 8% of our Total Investments. We review and monitor the performance of these investments on a quarterly basis.

Financing Activities and Related Cash Flows

Treasury Shares

During 2017 we have not repurchased any common shares and, as of October 31, 2017, our remaining Board authorization was approximately \$109.6 million. During the nine months ended September 30, 2016 we repurchased approximately 44,500 common shares, having a total cost of approximately \$2.1 million (we did not repurchase any shares during the three months ended September 30, 2016).

Shareholder Dividends

Our Board declared quarterly cash dividends of \$0.31 per share during each of the first three quarters of both 2017 and 2016, each of which was paid in the following quarter. Dividends paid in the first nine months of 2017 and 2016 included special dividends of \$4.69 and \$1.00 per share, respectively, declared in the fourth quarters of 2016 and 2015, respectively. Any decision to pay future cash dividends is subject to the Board's final determination after a comprehensive review of financial performance, future expectations and other factors deemed relevant by the Board.

Table of Contents

Debt

At September 30, 2017 our debt included \$250 million of outstanding unsecured senior notes. The notes bear interest at 5.3% annually and are due in 2023 although they may be redeemed in whole or part prior to maturity. There are no financial covenants associated with these notes.

We have a Revolving Credit Agreement which may be used for general corporate purposes, including, but not limited to, short-term working capital, share repurchases as authorized by the Board and support for other activities. Our Revolving Credit Agreement permits borrowings of up to \$200 million, and has available a \$50 million accordion feature, which, if successfully subscribed, would expand permitted borrowings up to \$250 million. During the third quarter of 2017, we repaid \$26 million of the balance outstanding on the Revolving Credit Agreement, and at September 30, 2017, we had outstanding borrowings of \$152 million, on a fully secured basis. In October 2017, we repaid \$18 million of the balance outstanding on the Revolving Credit Agreement, and all remaining outstanding borrowings are repayable or renewable in the fourth quarter of 2017. Repayment can be deferred until expiration of the Revolving Credit Agreement in June 2020. We are in compliance with the financial covenants of the Revolving Credit Agreement.

Additional information regarding our debt is provided in Note 7 of the Notes to Condensed Consolidated Financial Statements.

We are a member of two FHLBs. Through membership, we have access to secured cash advances which can be used for liquidity purposes or other operational needs. To date, we have not materially utilized our membership for borrowing purposes.

Revenues

The following table shows our consolidated and segment Net premiums earned:

(\$ in thousands)	Three Months Ended September 30			Nine Months Ended September 30				
	2017	2016	Change	2017	2016	Change		
Net premiums earned								
Specialty P&C	\$118,331	\$116,199	\$2,132	1.8 %	\$340,394	\$335,080	\$5,314	1.6 %
Workers' Compensation	57,654	54,498	3,156	5.8 %	169,791	163,974	5,817	3.5 %
Lloyd's Syndicate	16,318	14,578	1,740	11.9 %	45,374	40,533	4,841	11.9 %
Consolidated total	\$192,303	\$185,275	\$7,028	3.8 %	\$555,559	\$539,587	\$15,972	3.0 %

All of our operating segments contributed to the increase in Net premiums earned during the three and nine months ended September 30, 2017, as compared to the same respective periods of 2016.

The following table shows our consolidated Net investment result:

(\$ in thousands)	Three Months Ended September 30			Nine Months Ended September 30				
	2017	2016	Change	2017	2016	Change		
Net investment income	\$23,729	\$25,261	\$(1,532)	(6.1 %)	\$69,592	\$75,284	\$(5,692)	(7.6 %)
Equity in earnings (loss) of unconsolidated subsidiaries	4,164	(3,349)	7,513	224.3 %	8,489	(6,607)	15,096	228.5 %
Net investment result	\$27,893	\$21,912	\$5,981	27.3 %	\$78,081	\$68,677	\$9,404	13.7 %

The increase in our Net investment result for the three and nine months ended September 30, 2017 was attributable to an increase in earnings from our unconsolidated subsidiaries of \$7.5 million and \$15.1 million, respectively, due to higher reported earnings from our investments in LPs/LLCs and the effect of a smaller increase in the estimate of partnership operating losses related to our tax credit partnerships in the 2017 three- and nine-month periods as compared to the same periods of 2016. These increases were partially offset by a reduction in earnings from our fixed income portfolio of \$2.1 million and \$6.9 million, respectively, which reflected both lower yields and lower average investment balances.

During the 2017 three- and nine-month periods, we had Net realized investment gains of \$7.7 million and \$18.8 million, respectively, as compared to \$15.7 million and \$18.3 million for the same respective periods of 2016. We did not recognize any OTTI in earnings during the three months ended September 30, 2017 as compared to \$0.1 million during the same respective period of 2016. OTTI recognized in earnings for the nine months ended September 30, 2017 was \$0.2 million as compared to \$9.8 million for the same respective period of 2016.

Table of Contents

Expenses

The following table shows our consolidated and segment net loss ratios and net loss development:

(\$ in millions)	Three Months Ended			Nine Months Ended		
	September 30			September 30		
	2017	2016	Change	2017	2016	Change
Current accident year net loss ratio						
Consolidated ratio	84.1 %	79.4 %	4.7 pts	81.7 %	79.8 %	1.9 pts
Specialty P&C	87.8 %	88.1 %	(0.3)pts	88.7 %	88.3 %	0.4 pts
Workers' Compensation	64.8 %	66.6 %	(1.8)pts	65.3 %	65.9 %	(0.6)pts
Lloyd's Syndicate	124.6 %	58.1 %	66.5 pts	91.0 %	65.0 %	26.0 pts
Calendar year net loss ratio						
Consolidated ratio	67.3 %	63.7 %	3.6 pts	65.5 %	62.3 %	3.2 pts
Specialty P&C	62.4 %	62.2 %	0.2 pts	64.7 %	61.4 %	3.3 pts
Workers' Compensation	60.8 %	63.3 %	(2.5)pts	60.8 %	63.5 %	(2.7)pts
Lloyd's Syndicate	125.3 %	77.5 %	47.8 pts	89.7 %	64.1 %	25.6 pts

Favorable (unfavorable) net loss development, prior accident years

Consolidated	\$32.3	\$29.0	\$3.3	\$90.1	\$94.5	\$(4.4)
Specialty P&C	\$30.1	\$30.0	\$0.1	\$81.9	\$90.2	\$(8.3)
Workers' Compensation	\$2.3	\$1.8	\$0.5	\$7.6	\$3.9	\$3.7
Lloyd's Syndicate	\$(0.1)	\$(2.8)	\$2.7	\$0.6	\$0.4	\$0.2

Our consolidated current accident year net loss ratio increased 4.7 and 1.9 percentage points for the 2017 three- and nine-month periods, respectively, as compared to the same periods of 2016. The increase in both periods was due to losses, somewhat offset by reinstatement premiums, related to Hurricanes Harvey, Irma and Maria during the third quarter of 2017 in our Lloyd's Syndicate segment which resulted in a 4.0 and 1.4 percentage point increase to our consolidated current accident year net loss ratio for 2017 three- and nine-month periods, respectively. See further discussion in the Segment Operating Results - Lloyd's Syndicate section that follows.

Our consolidated calendar year net loss ratios for both 2017 and 2016 periods were lower than our consolidated current accident year net loss ratios due to the recognition of net favorable loss development, as shown in the previous table.

Our consolidated and segment underwriting expense ratios were as follows:

Underwriting Expense Ratio	Three Months Ended			Nine Months Ended		
	September 30			September 30		
	2017	2016	Change	2017	2016	Change
Consolidated	29.7%	30.1%	(0.4)pts	31.0%	30.9%	0.1 pts
Specialty P&C	22.8%	22.9%	(0.1)pts	23.3%	23.1%	0.2 pts
Workers' Compensation	32.0%	33.6%	(1.6)pts	30.8%	32.0%	(1.2)pts
Lloyd's Syndicate	41.2%	42.9%	(1.7)pts	43.6%	41.1%	2.5 pts
Corporate*	2.6 %	2.7 %	(0.1)pts	3.8 %	3.8 %	— pts

* There are no Net premiums earned associated with the Corporate segment.

Ratio shown is the contribution of the Corporate segment to the consolidated ratio (Corporate operating expenses divided by consolidated Net premium earned).

Our consolidated underwriting expense ratio decreased 0.4 percentage points for the 2017 three-month period as compared to the same period of 2016 primarily due to the effect of higher Net premiums earned from all of our operating segments and a decrease in operating expenses, driven by our Specialty P&C segment, offset almost entirely

by an increase in DPAC amortization. For the 2017 nine-month period, the effect of higher Net premiums earned on the consolidated underwriting expense ratio was offset entirely by the effect of an increase in DPAC amortization, driven by our Specialty P&C segment.

Table of Contents

Taxes

Our projected effective tax rates for the 2017 and 2016 nine-month periods were 9.8% and 11.7%, respectively, before discrete items were considered. Our projected effective tax rates for both the 2017 and 2016 nine-month periods were different from the statutory federal income tax rate primarily due to a portion of our investment income being tax-exempt and the utilization of tax credits transferred to us from our tax credit partnership investments. Discrete items reduced our projected effective tax rate for the 2017 nine-month period by 5.1% and increased our projected effective tax rate by 2.9% for the 2016 nine-month period. Notable discrete items during 2017 included the application of new guidance related to the improvement in accounting for share-based payments and the application of an exception under accounting guidance related to interim period taxes for entities subject to multiple tax jurisdictions (see further discussion under the heading "Taxes" within our Segment Operating Results - Corporate section that follows).

Operating Ratio and ROE

Our operating ratio (calculated as our combined ratio, less our investment income ratio) increased by 4.5 and 4.8 percentage points in the three and nine months ended September 30, 2017, respectively. The increase in the 2017 three-month period primarily reflected a higher net loss ratio in our Lloyd's Syndicate segment driven by estimated losses recognized during the third quarter of 2017 related to Hurricanes Harvey, Irma and Maria (see further discussion in the Segment Operating Results - Lloyd's Syndicate section that follows). The increase in the 2017 nine-month period primarily reflected a higher net loss ratio in our Specialty P&C segment, due to a lower amount of prior year favorable development, and Lloyd's Syndicate segment, due to the recognition of the aforementioned estimated storm-related losses.

ROE was 6.3% and 6.6% for the three and nine months ended September 30, 2017, respectively, compared to 6.6% and 6.4% for the same respective periods of 2016. The decrease for the 2017 three-month period was primarily due to a decrease in Net income, partially offset by a lower average equity base (the denominator of the ROE ratio) as compared to the prior year period. The increase for the 2017 nine-month period was primarily due to a lower average equity base, partially offset by a decrease in Net income. The lower average equity base in 2017 as compared to 2016 was primarily due to larger dividend declarations.

Book Value per Share

We believe the payment of dividends is currently our most effective tool for the deployment of excess capital even though, in the short-term, dividend declarations dampen growth in book value per share. Our book value per share at September 30, 2017 as compared to December 31, 2016 is shown in the following table.

	Book Value Per Share
Book Value Per Share at December 31, 2016	\$33.78
Increase (decrease) to book value per share during the nine months ended September 30, 2017 attributable to:	
Dividends declared	(0.93)
Net income	1.68
Increase in AOCI	0.15
Other	(0.03)
Book Value Per Share at September 30, 2017	\$34.65

Table of Contents

Non-GAAP Financial Measures

Operating income is a non-GAAP financial measure that is widely used to evaluate performance within the insurance sector. In calculating operating income, we have excluded the after-tax effects of the items listed in the following table that do not reflect normal operating results. We believe operating income presents a useful view of the performance of our insurance operations, but should be considered in conjunction with Net income computed in accordance with GAAP.

The following table is a reconciliation of Net income to Operating income:

	Three Months		Nine Months	
	Ended		Ended	
	September 30		September 30	
(In thousands, except per share data)	2017	2016	2017	2016
Net income	\$28,949	\$33,834	\$89,922	\$96,233
Items excluded in the calculation of operating income:				
Net realized investment (gains) losses	(7,749)	(15,737)	(18,810)	(18,314)
Net realized gains (losses) attributable to SPCs which no profit/loss is retained ⁽¹⁾	764	1,189	2,191	1,502
Guaranty fund assessments (recoupments)	(225)	91	(154)	143
Pre-tax effect of exclusions	(7,210)	(14,457)	(16,773)	(16,669)
Tax effect, at 35% ⁽²⁾	2,524	5,060	5,871	5,834
Operating income	\$24,263	\$24,437	\$79,020	\$85,398
Per diluted common share:				
Net income	\$0.54	\$0.63	\$1.68	\$1.80
Effect of exclusions	(0.09)	(0.17)	(0.21)	(0.20)
Operating income per diluted common share	\$0.45	\$0.46	\$1.47	\$1.60

⁽¹⁾ Net realized investment gains (losses) on investments related to our SPCs are recognized in the earnings of our Corporate segment and the portion of earnings related to the gain or loss, net of our participation, is distributed back to the cells through our SPC dividend expense (income). To be consistent with our exclusion of Net realized investment gains (losses) recognized in earnings, we are excluding the portion of Net realized investment gains (losses) that is included in SPC dividend expense (income).

⁽²⁾ The 35% rate above is the annual expected incremental tax rate associated with the taxable or tax deductible items listed. We record the provision for income taxes in our interim financial statements based upon our estimated annual effective tax rate. The effective tax rate for the period was applied to these items in calculating Net income. See previous discussion in this section under the heading "Taxes."

Table of Contents

Segment Operating Results - Specialty Property & Casualty

Our Specialty P&C segment focuses on professional liability insurance and medical technology liability insurance as discussed in Note 11 of the Notes to Condensed Consolidated Financial Statements. Our Specialty P&C segment operating results reflect pre-tax underwriting profit or loss from these insurance lines, exclusive of investment results, which are included in our Corporate segment. Segment operating results included the following:

(\$ in thousands)	Three Months Ended September 30					Nine Months Ended September 30				
	2017	2016	Change			2017	2016	Change		
Net premiums written	\$ 143,286	\$ 134,989	\$ 8,297	6.1	%	\$ 367,112	\$ 354,510	\$ 12,602	3.6	%
Net premiums earned	\$ 118,331	\$ 116,199	\$ 2,132	1.8	%	\$ 340,394	\$ 335,080	\$ 5,314	1.6	%
Other income	1,276	1,012	264	26.1	%	3,943	4,021	(78)	(1.9)	%
Net losses and loss adjustment expenses	(73,831)	(72,311)	(1,520)	2.1	%	(220,123)	(205,787)	(14,336)	7.0	%
Underwriting, policy acquisition and operating expenses	(27,037)	(26,563)	(474)	1.8	%	(79,252)	(77,519)	(1,733)	2.2	%
Segregated portfolio cells dividend (expense) income	65	(94)	159	(169.1%)		(5,026)	(94)	(4,932)	5,246.8%	
Segment operating results	\$ 18,804	\$ 18,243	\$ 561	3.1	%	\$ 39,936	\$ 55,701	\$ (15,765)	(28.3)	%

Underwriting expense ratio	22.8%	22.9%	(0.1))pts		23.3%	23.1%	0.2	pts	

Premiums Written

Changes in our premium volume within our Specialty P&C segment are driven by four primary factors: (1) the amount of new business, (2) our retention of existing business, (3) the premium charged for business that is renewed, which is affected by rates charged and by the amount and type of coverage an insured chooses to purchase, and (4) the timing of premium written through multi-period policies. In addition, premium volume may periodically be affected by shifts in the timing of renewals between periods. The healthcare professional liability market, which accounts for a majority of the revenues in this segment, remains challenging as physicians continue joining hospitals or larger group practices and are thus no longer purchasing individual or group policies in the standard market. In addition, some competitors have chosen to compete primarily on price; both factors impact our ability to write new business and retain existing business.

Gross, ceded and net premiums written were as follows:

(\$ in thousands)	Three Months Ended September 30					Nine Months Ended September 30				
	2017	2016	Change			2017	2016	Change		
Gross premiums written	\$ 166,284	\$ 155,838	\$ 10,446	6.7	%	\$ 428,032	\$ 410,201	\$ 17,831	4.3	%
Less: Ceded premiums written	22,998	20,849	2,149	10.3	%	60,920	55,691	5,229	9.4	%
Net premiums written	\$ 143,286	\$ 134,989	\$ 8,297	6.1	%	\$ 367,112	\$ 354,510	\$ 12,602	3.6	%

Medical technology liability ⁽⁶⁾	8,082	8,625	(543)	(6.3 %)	25,401	25,358	43	0.2 %
Other	121	139	(18)	(12.9 %)	306	371	(65)	(17.5 %)
Total	\$166,284	\$155,838	\$10,446	6.7 %	\$428,032	\$410,201	\$17,831	4.3 %

Physician policies were our greatest source of premium revenues in both 2017 and 2016. The increase in twelve month term policies during the 2017 three- and nine-month periods was driven by timing differences related to the renewal of a few large policies during the current quarter. After removing the impact of those renewal timing differences, gross premiums written were slightly down for the 2017 three-month period and higher for the 2017 nine-month period as compared to the same respective periods of 2016. The remaining increase in the 2017 nine-month period was primarily due to new business written and the growth in exposure of one large insured during the first quarter of 2017, largely offset by retention losses. In addition, written premium in both periods reflected an increase in renewal pricing, driven by an increase in exposures for a few large policies. We offer twenty-four month term policies to our physician insureds in one selected jurisdiction. The increase in twenty-four month premium, as compared to 2016, primarily reflected the normal cycle of renewals (policies subject to renewal in 2017 were previously written in 2015 rather than in 2016).

Our healthcare facilities premium (which includes hospitals, surgery centers and other facilities) for the 2017 three-month period was increased by new business written, somewhat offset by retention losses. However, gross premiums written declined slightly for the 2017 three-month period due to the impact of timing differences related to when new business was recorded in 2016 related to more complex policies. The slight decline during the 2017 nine-month period was primarily due to the timing difference for the renewal of one large policy. After removing the impact of this renewal timing difference, gross premiums written was higher for the 2017 nine-month period as compared to the same respective period of 2016. The remaining increase was primarily due to new business written, including one large policy during the second quarter of 2017, largely offset by retention losses. Renewal pricing increased during the 2017 three- and nine-month periods due to changes in loss experience related to a few large policies.

⁽³⁾ Our other healthcare providers are primarily dentists, chiropractors and allied health professionals.

⁽⁴⁾ Our legal professionals policies are primarily individual and small group policies in select areas of practice. The slight decline during the 2017 three- and nine-month periods was primarily due to retention losses, offset by new business written and, to a lesser extent, an increase in the rate charged for certain renewed policies. Retention losses in both periods are primarily driven by competitive market conditions.

⁽⁵⁾ We offer extended reporting endorsement or "tail" coverage to insureds who discontinue or otherwise modify aspects of their claims-made coverage with us. The amount of tail coverage premium written can vary widely from period to period. The increase during the 2017 three- and nine-month periods was driven by the purchase of tail coverage for a few large claims-made policies in one jurisdiction that were rewritten to occurrence coverage during the current quarter. These policies are a part of one of our shared risk arrangements and therefore, a large portion of the premium written was ceded during the current quarter (see further discussion in the Ceded Premiums Written

section that follows).

(6) Our medical technology liability business is marketed throughout the U.S.; coverage is offered on a primary basis, within specified limits, to manufacturers and distributors of medical technology and life sciences products including entities conducting human clinical trials. In addition to the previously listed factors that affect our premium volume, our medical

61

Table of Contents

technology liability premium volume is impacted by the sales volume of insureds. The decline during the 2017 three-month period was primarily due to retention losses, partially offset by new business written. The slight increase during the 2017 nine-month period primarily reflected new business written, offset by retention losses, including the loss of one large policy in the first quarter of 2017. Retention losses in both periods are largely attributable to price competition and merger activity within the industry.

During 2016, we expanded our alternative market solutions by writing new healthcare premium in certain SPCs at Eastern Re. We wrote approximately \$1.2 million of healthcare professional liability premium in our physicians line of business in each of the 2017 and 2016 nine-month periods. We wrote healthcare professional liability premium in our healthcare facilities line of business of approximately \$0.4 million and \$3.0 million in the 2017 three- and nine-month periods, respectively, and approximately \$0.4 million and \$2.3 million in the 2016 three-⁽⁷⁾ and nine-month periods, respectively. All or a portion of the premium written was ceded to the SPCs at our wholly owned Cayman Islands reinsurance subsidiary, Eastern Re. Under the SPC structure, the operating results of each cell, net of any participation we have taken in the SPCs, accrue to the benefit of the external owners of that cell. Our Specialty P&C segment does not currently participate in the cells that write HCPL premium, and therefore retains no underwriting profit or loss. Additional information regarding the SPCs is included in the Underwriting, Policy Acquisition and Operating Expense section that follows.

New business written by component on a direct basis was as follows:

	Three Months Ended September 30		Nine Months Ended September 30	
(In millions)	2017	2016	2017	2016
Physicians	\$7.0	\$6.9	\$17.9	\$23.6
Healthcare facilities	1.9	0.9	5.0	9.1
Other healthcare providers	0.7	0.6	1.8	1.9
Legal professionals	1.0	0.9	2.8	3.3
Medical technology liability	0.8	0.8	3.5	3.8
Total	\$11.4	\$10.1	\$31.0	\$41.7

For our Specialty P&C segment, we calculate our retention rate as annualized renewed premium divided by all annualized premium subject to renewal. Retention rates are affected by a number of factors. We may lose insureds to competitors or to alternative insurance mechanisms such as risk retention groups or self-insurance entities (often when physicians join hospitals or large group practices) or due to pricing or other issues. We may choose not to renew an insured as a result of our underwriting evaluation. Insureds may also terminate coverage because they have left the practice of medicine for various reasons, principally for retirement, death or disability, but also for personal reasons.

Retention by component was as follows:

	Three Months Ended September 30		Nine Months Ended September 30	
	2017	2016	2017	2016
Physicians	90 %	89 %	90 %	89 %
Healthcare facilities	82 %	77 %	87 %	80 %
Other healthcare providers	83 %	85 %	85 %	86 %
Legal professionals*	82 %	87 %	83 %	78 %
Medical technology liability*	86 %	90 %	85 %	87 %

* See Gross Premiums Written section for further explanation of retention decline in 2017.

The pricing of our business includes the effects of filed rates, surcharges and discounts. Renewal pricing also reflects changes in our exposure base, deductibles, self-insurance retention limits and other policy terms. We continue to base our pricing on expected losses, as indicated by our historical loss data and available industry loss data. We are committed to a rate structure that will allow us to fulfill our obligations to our insureds, while generating competitive returns for our shareholders.

Table of Contents

Changes in renewal pricing by component was as follows:

	Three Months Ended September 30 2017		Nine Months Ended September 30 2017	
Physicians*	2	%	2	%
Healthcare facilities*	16	%	9	%
Other healthcare providers	3	%	2	%
Legal professionals	2	%	3	%
Medical technology liability	1	%	1	%

* See Gross Premiums Written section for further explanation of renewal pricing increase in 2017.

Ceded Premiums Written

Ceded premiums represent the amounts owed to our reinsurers for their assumption of a portion of our losses. Through our current excess of loss reinsurance arrangements we generally retain the first \$1 million in risk insured by us and cede coverages in excess of this amount. For our medical technology liability coverages, we also retain 10% of the next \$9 million of risk for coverages in excess of \$1 million. We pay our reinsurers a ceding premium in exchange for their accepting the risk, the ultimate amount of which is determined by the loss experience of the business ceded, subject to certain minimum and maximum amounts.

Ceded premiums written were as follows:

(\$ in thousands)	Three Months Ended September 30				Nine Months Ended September 30			
	2017	2016	Change		2017	2016	Change	
Excess of loss reinsurance arrangements ⁽¹⁾	\$8,805	\$8,557	\$248	2.9 %	\$25,845	\$23,881	\$1,964	8.2 %
Premium ceded to Syndicate 1729 ⁽²⁾	2,416	4,656	(2,240)	(48.1 %)	8,906	13,767	(4,861)	(35.3 %)

Other ceded premiums written	1,039	938	101	10.8 %	2,726	1,612	1,114	69.1 %
Adjustment to premiums owed under reinsurance agreements, prior accident years, net ⁽⁴⁾	(2,520)	(2,695)	175	(6.5 %)	(4,480)	(7,525)	3,045	40.5 %
Total ceded premiums written	\$22,998	\$20,849	\$2,149	10.3 %	\$60,920	\$55,691	\$5,229	9.4 %

We generally reinsure risks under our excess of loss reinsurance arrangements pursuant to which the reinsurers agree to assume all or a portion of all risks that we insure above our individual risk retention levels, up to the maximum individual limits offered. In the majority of our excess of loss reinsurance arrangements, the premium due to the reinsurer is determined by the loss experience of the business reinsured, subject to certain minimum and

⁽¹⁾ maximum amounts. The increase in ceded premiums written under our excess of loss reinsurance arrangements for the 2017 three- and nine-month periods primarily reflected adjustments to the premiums we expect to owe our reinsurers based upon adjustments to our estimates of losses that are attributable to our reinsurance partners. For the 2017 three- and nine-month periods, we increased our estimate of premiums we expect to owe our reinsurers whereas in the 2016 three- and nine-month periods we decreased this estimate.

⁽²⁾ As previously discussed, we are a 58% participant in Syndicate 1729 and record our pro rata share of its operating results in our Lloyd's Syndicate segment on a quarter delay. We also record the cession to the Lloyd's Syndicate segment from our Specialty P&C segment on a quarter delay as the amounts are not material and this permits the cession to be reported by both the Lloyd's Syndicate segment and the Specialty P&C segment in the same reporting period. The decrease in ceded premiums to Syndicate 1729 for the 2017 three- and nine-month periods reflected the revised contract terms effective January 1, 2017 which reduced the premiums ceded by essentially half. See Lloyd's Syndicate segment results for further discussion on revisions to the quota share agreement as of the most recent renewal date. As our premiums are earned, we recognize the related ceding commission income which

reduces underwriting expense by offsetting DPAC amortization. For the 2017 and 2016 three- and nine-month periods the related ceding commission income was approximately 27% of ceded premiums written. For our consolidated results, eliminations of the inter-segment portion (58% of the Specialty P&C cession) of the transactions are also recorded on a quarter delay.

Table of Contents

We have entered into various shared risk arrangements, including quota share, fronting, and captive arrangements, with certain large healthcare systems and other insurance entities. These arrangements include our Ascension Health and CAPAssurance programs. While we cede a large portion of the premium written under these (3) arrangements, they provide us an opportunity to grow net premium through strategic partnerships. The increase in the 2017 three- and nine-month periods was primarily driven by a few large tail endorsements that were written, and substantially ceded, during the current quarter related to one of these shared risk arrangements, as previously discussed. The remaining increase in both periods was due to growth in our Ascension Health and CAPAssurance programs.

Given the length of time that it takes to resolve our claims, many years may elapse before all losses recoverable under a reinsurance arrangement are known. As a part of the process of estimating our loss reserve we also make estimates regarding the amounts recoverable under our reinsurance arrangements. As previously discussed, the premiums ultimately ceded under certain of our excess of loss reinsurance arrangements are subject to the losses ceded under the arrangements. For the 2017 and 2016 three- and nine-month periods, we reduced our estimate of (4) expected losses and associated recoveries for prior year ceded losses, as well as our estimate of ceded premiums owed to reinsurers. The change in the adjustment to ceded premiums owed to reinsurers for the 2017 nine-month period as compared to the same period of 2016 was due to the overall change in expected loss recoveries attributable to one large claim during the second quarter of 2017. We do not believe this isolated claim indicates a change in overall loss trends for us or the industry. Changes to estimates of premiums ceded related to prior accident years are fully earned in the period the changes in estimates occur.

Ceded Premiums Ratio

As shown in the table below, our ceded premiums ratio was affected in both 2017 and 2016 by revisions to our estimate of premiums owed to reinsurers related to coverages provided in prior accident years.

	Three Months Ended September 30			Nine Months Ended September 30		
	2017	2016	Change	2017	2016	Change
Ceded premiums ratio, as reported	13.8%	13.4%	0.4 pts	14.2%	13.6%	0.6 pts
Less the effect of adjustments in premiums owed under reinsurance agreements, prior accident years (as previously discussed)	(1.5 %)	(1.7 %)	0.2 pts	(1.0 %)	(1.8 %)	0.8 pts
Ratio, current accident year	15.3%	15.1%	0.2 pts	15.2%	15.4%	(0.2)pts

The increase in the current accident year ceded premiums ratio for the 2017 three-month period was primarily attributable to an increase in premium ceded under our shared risk arrangements, somewhat offset by a decrease in premium ceded to Syndicate 1729. The decline in the current accident year ceded premium ratio for the 2017 nine-month period was due to a decrease in premium ceded to Syndicate 1729, partially offset by an increase in premium ceded under our shared risk arrangements (see discussion under the heading "Ceded Premiums Written").

Net Premiums Earned

Net premiums earned were as follows:

	Three Months Ended September 30			Nine Months Ended September 30		
(\$ in thousands)	2017	2016	Change	2017	2016	Change
Gross premiums earned	\$140,427	\$135,221	\$5,206 3.8 %	\$402,897	\$391,230	\$11,667 3.0 %
Less: Ceded premiums earned	22,096	19,022	3,074 16.2%	62,503	56,150	6,353 11.3%
Net premiums earned	\$118,331	\$116,199	\$2,132 1.8 %	\$340,394	\$335,080	\$5,314 1.6 %

Net premiums earned consist of gross premiums earned less the portion of earned premiums that we cede to our reinsurers for their assumption of a portion of our losses. Because premiums are generally earned pro rata over the entire policy period, fluctuations in premiums earned tend to lag those of premiums written. Generally, our policies carry a term of one year, but as discussed above, we write certain policies with a twenty-four month term, and a few of our medical technology liability policies carry a multi-year term. Tail coverage premiums are generally 100% earned in the period written because the policies insure only incidents that occurred in prior periods and are not cancellable. Additionally, ceded premium changes due to changes to estimates of premiums owed under reinsurance agreements for prior accident years are fully earned in the period of change.

Table of Contents

The increase in gross premiums earned during the 2017 three- and nine-month periods primarily reflected the pro rata effect of higher premiums written during the preceding twelve months, predominantly in our healthcare facilities line of business, and a few large tail policies written and earned during the third quarter of 2017. For the 2017 three- and nine-month periods, prior accident year ceded premiums reductions were \$0.2 million and \$3.0 million lower than for the 2016 three- and nine-month periods, respectively (see discussion in this section under the heading "Ceded Premiums Written").

Losses and Loss Adjustment Expenses

The determination of calendar year losses involves the actuarial evaluation of incurred losses for the current accident year and the actuarial re-evaluation of incurred losses for prior accident years, including an evaluation of the reserve amounts required for losses in excess of policy limits.

Accident year refers to the accounting period in which the insured event becomes a liability of the insurer. For claims-made policies, which represent over 90% of the premiums written in our Specialty P&C segment, the insured event generally becomes a liability when the event is first reported to the insurer. For occurrence policies the insured event becomes a liability when the event takes place. We believe that measuring losses on an accident year basis is the best measure of the underlying profitability of the premiums earned in that period, since it associates policy premiums earned with the estimate of the losses incurred related to those policy premiums.

The following table summarizes calendar year net loss ratios by separating losses between the current accident year and all prior accident years. Additionally, the table shows our current accident year net loss ratio was affected by revisions to our estimate of premiums owed to reinsurers related to coverages provided in prior accident years. Net loss ratios for the period were as follows:

	Net Loss Ratios ⁽¹⁾					
	Three Months Ended			Nine Months Ended		
	September 30			September 30		
	2017	2016	Change	2017	2016	Change
Calendar year net loss ratio	62.4 %	62.2 %	0.2 pts	64.7 %	61.4 %	3.3 pts
Less impact of prior accident years on the net loss ratio	(25.4%)	(25.9%)	0.5 pts	(24.0%)	(26.9%)	2.9 pts
Current accident year net loss ratio	87.8 %	88.1 %	(0.3)pts	88.7 %	88.3 %	0.4 pts
Less estimated ratio increase (decrease) attributable to:						
Ceded premium adjustments, prior accident years ⁽²⁾	(1.9 %)	(2.1 %)	0.2 pts	(1.2 %)	(2.0 %)	0.8 pts
Current accident year net loss ratio, excluding the effect of prior year ceded premium ⁽³⁾	89.7 %	90.2 %	(0.5)pts	89.9 %	90.3 %	(0.4)pts

⁽¹⁾ Net losses, as specified, divided by net premiums earned.

Reductions to premiums owed under reinsurance agreements for prior accident years increased Net premiums earned (the denominator of the current accident year ratio) for the 2017 and 2016 three- and nine-month periods. ⁽²⁾ See the discussion in the Premiums section for our Specialty P&C segment under the heading "Ceded Premiums Written" for additional information.

The decline in the current accident year net loss ratio for the 2017 three-month period primarily reflected changes in the mix of business. For the 2017 nine-month period, the decline reflected an increase in our estimate of losses ultimately recoverable from our reinsurance partners and changes in expected loss costs related to mass tort litigation. While we increased our reserves related to mass tort litigation in both the 2017 and 2016 nine-month periods, the increase was substantially less in the 2017 nine-month period and resulted in an 0.3 percentage point decrease to the current accident year net loss ratio in the 2017 nine-month period. ⁽³⁾

We recognized net favorable loss development related to our previously established reserves of \$30.1 million and \$81.9 million during the three and nine months ended September 30, 2017, respectively, and \$30.0 million and \$90.2 million during the same respective periods of 2016. We re-evaluate our previously established reserve each quarter based on our most recently available claims data and currently available industry trend information. Development recognized during the three and nine months ended September 30, 2017 principally related to accident years 2010 through 2014. Development recognized during the three and nine months ended September 30, 2016 principally related to accident years 2009 through 2013.

A detailed discussion of factors influencing our recognition of loss development is included in our Critical Accounting Estimates section under the heading "Reserve for Losses and Loss Adjustment Expenses" and in our 2016 Form 10-K under the

65

Table of Contents

same heading. Assumptions used in establishing our reserve are regularly reviewed and updated by management as new data becomes available. Any adjustments necessary are reflected in the then current operations. Due to the size of our reserve, even a small percentage adjustment to the assumptions can have a material effect on our results of operations for the period in which the change is made, as was the case in both 2017 and 2016.

Underwriting, Policy Acquisition and Operating Expenses

Our Specialty P&C segment underwriting, policy acquisition and operating expenses for the three and nine months ended September 30, 2017 and 2016 were comprised as follows:

(\$ in thousands)	Three Months Ended September 30			Nine Months Ended September 30				
	2017	2016	Change	2017	2016	Change		
Specialty P&C segment:								
DPAC amortization	\$12,405	\$10,901	\$1,504	13.8%	\$35,350	\$32,854	\$2,496	7.6 %
Management fees	2,004	1,832	172	9.4 %	5,156	4,928	228	4.6 %
Other underwriting and operating expenses	12,628	13,830	(1,202)	(8.7 %)	38,746	39,737	(991)	(2.5%)
Total	\$27,037	\$26,563	\$474	1.8 %	\$79,252	\$77,519	\$1,733	2.2 %

DPAC amortization increased for the three and nine months ended September 30, 2017 as compared to the same respective periods of 2016 primarily driven by the effect of higher gross premiums earned in 2017 and, to a lesser extent, a slight decrease in ceding commission income, which is an offset to expense.

Management fees are charged pursuant to a management agreement by the Corporate segment to the operating subsidiaries within our Specialty P&C segment for services provided, based on the extent to which services are provided to the subsidiary and the amount of premium written by the subsidiary. While the terms of the management agreement were consistent between 2016 and 2017, fluctuations in the amount of premium written by each subsidiary can result in corresponding variations in the management fee charged to each subsidiary during a particular period.

Other underwriting and operating expenses decreased during the 2017 three- and nine-month periods as compared to the same respective periods of 2016 primarily driven by non-recurring costs in 2016, including state assessments and a donation to a scholarship program for which we received a wholly offsetting tax credit during 2016. The decrease in both periods was partially offset by an increase in compensation related expenses and costs associated with the amortization of new software that was put into service during the first quarter of 2017.

Underwriting Expense Ratio (the Expense Ratio)

The underwriting expense ratio for our Specialty P&C segment remained relatively flat for the three and nine months ended September 30, 2017 as compared to the same periods of 2016, as shown below:

	Three Months Ended			Nine Months Ended		
	September 30			September 30		
	2017	2016	Change	2017	2016	Change
Underwriting expense ratio	22.8%	22.9%	(0.1)pts	23.3%	23.1%	0.2 pts

Table of Contents

Segregated Portfolio Cell Dividend Expense (Income)

During 2016, we expanded our alternative market solutions by writing HCPL premium in three SPCs at Eastern Re. Consistent with the SPC structure discussed in the Workers' Compensation segment section that follows, the net operating results of each cell, net of any participation we have taken in the SPCs, are due to the external owners of that cell. Our Specialty P&C segment does not currently participate in the cells that write HCPL premium, and therefore retains no profit or loss. SPC dividend (expense) income for the three and nine months ended September 30, 2017 and 2016 was as follows:

	Three Months Ended September 30			Nine Months Ended September 30		
(In thousands)	2017	2016	Change	2017	2016	Change
SPC dividend (expense) income	\$65	\$(94)	\$ 159	\$(5,026)	\$(94)	\$(4,932)

The SPC dividend expense for the 2017 nine-month period reflected a \$5.2 million pre-tax expense recognized during the second quarter of 2017 related to previously unrecognized SPC dividend expense for the cumulative earnings of unrelated parties that have owned SPCs at various times since 2003 within a Bermuda captive insurance operation. Historically, within our HCPL business, we have written a limited number of segregated cell captive programs through this Bermuda captive arrangement and the use of this facility has declined as the HCPL insurance market has softened. The SPC dividend expense attributable to those cells was unrelated to the captive operations of our Eastern Re subsidiary. See the Underwriting, Policy Acquisition and Operating Expense section in our Workers' Compensation segment results for more information on our SPCs.

Table of Contents

Segment Operating Results - Workers' Compensation

Our Workers' Compensation segment provides traditional workers' compensation insurance products and alternative market solutions for workers' compensation risks to employers with 1,000 or fewer employees, as discussed in Note 11 of the Notes to Condensed Consolidated Financial Statements. Segment operating results reflect pre-tax underwriting profit or loss, which includes SPC dividend expense (income). Investment results, which includes the SPC investment results, are included in our Corporate segment. Segment operating results included the following:

(\$ in thousands)	Three Months Ended September 30					Nine Months Ended September 30				
	2017	2016	Change		%	2017	2016	Change		%
Net premiums written	\$54,647	\$54,444	\$203	0.4	%	\$184,917	\$175,986	\$8,931	5.1	%
Net premiums earned	\$57,654	\$54,498	\$3,156	5.8	%	\$169,791	\$163,974	\$5,817	3.5	%
Other income	164	86	78	90.7	%	519	696	(177)	(25.4)	%
Net losses and loss adjustment expenses	(35,081)	(34,472)	(609)	1.8	%	(103,217)	(104,160)	943	(0.9)	%
Underwriting, policy acquisition and operating expenses	(18,434)	(18,331)	(103)	0.6	%	(52,220)	(52,494)	274	(0.5)	%
Segregated portfolio cells dividend (expense) income ⁽¹⁾	(1,722)	(1,449)	(273)	18.8	%	(5,593)	(3,440)	(2,153)	62.6	%

Segment results	32.0%	33.6%	(1.6))pts		30.8%	32.0%	(1.2))pts	

⁽¹⁾ Represents the underwriting profit (loss) attributable to the alternative market business ceded to the SPCs at Eastern Re, net of our participation.

On September 18, 2017, Eastern Alliance Insurance Group completed its acquisition of Great Falls Insurance Company's ("Great Falls") book of workers' compensation insurance business for consideration of \$4.2 million. Eastern paid \$2.85 million at closing, and the remaining \$1.35 million is contingent upon Eastern renewing at least 75% of the acquired renewal book of business. In the event Eastern renews less than 75% but greater than 50% of the acquired renewal book of business, the contingent consideration will be reduced on a pro-rated basis. Great Falls is a monoline workers' compensation insurance company domiciled in Maine and is licensed to write business in Maine and New Hampshire. Great Falls' direct premiums written was approximately \$13.3 million for the year ended December 31, 2016. In addition to the renewal book of business, Eastern assumed Great Falls' contracts with agency partners and all Great Falls' employees became our employees. The acquisition of the renewal rights will expand Eastern's operations into Maine and New Hampshire and ultimately other New England states, providing geographic diversification and the ability to expand our specialty workers' compensation products and services in the New England marketplace. The transaction was accounted for as an asset acquisition and resulted in the recognition of intangible assets totaling \$4.3 million, including transaction-related costs.

Table of Contents

Premiums Written

Our workers' compensation premium volume is driven by four primary factors: (1) the amount of new business written, (2) audit premium, (3) retention of our existing book of business and (4) premium rates charged on our renewal book of business.

Gross, ceded and net premiums written were as follows:

(\$ in thousands)	Three Months Ended September 30			Nine Months Ended September 30		
	2017	2016	Change	2017	2016	Change
Gross premiums written						
Traditional business*	\$42,592	\$43,225	\$(633)	\$139,614	\$136,407	\$3,207
Alternative market business	17,091	16,685	406	63,623	58,013	5,610
Segment results	59,683	59,910	(227)	203,237	194,420	8,817
Less: Ceded premiums written						
Traditional business	2,193	2,851	(658)	5,956	7,174	(1,218)
Alternative market business*	2,843	2,615	228	12,364	11,260	1,104
Segment results	5,036	5,466	(430)	18,320	18,434	(114)
Net premiums written						
Traditional business	40,399	40,374	25	133,658	129,233	4,425
Alternative market business	14,248	14,070	178	51,259	46,753	4,506
Segment results	\$54,647	\$54,444	\$203	\$184,917	\$175,986	\$8,931

* Traditional gross premiums written and alternative market ceded premiums written are reported net of alternative market premiums assumed by our traditional business totaling \$0.2 million and \$0.5 million for the 2017 three- and nine-month periods, respectively, and \$0.2 million and \$0.7 million for the same respective periods of 2016.

Our traditional workers' compensation insurance products include guaranteed cost, dividend, deductible and retrospectively-rated policies. Our alternative market business is 100% ceded to either the SPCs at our wholly owned Cayman Islands reinsurance subsidiary, Eastern Re, or to unaffiliated captive insurers. As of September 30, 2017, there were 24 (21 active) SPCs at Eastern Re and 3 active alternative market programs with unaffiliated captive insurers.

Additional information regarding the structure of the SPCs is included in the Underwriting, Policy Acquisition and Operating Expense section that follows.

Gross Premiums Written

Gross premiums written in our traditional and alternative market business for the three and nine months ended September 30, 2017 and 2016 are reflected in the table above. The increase in gross premiums written for the nine months ended September 30, 2017 as compared to the same period of 2016, primarily reflected new business written and an improved retention rate, partially offset by a reduction in audit premium and declines in renewal pricing. Gross premiums written in our traditional business declined for the three months ended September 30, 2017, primarily due to the changes in estimated premiums under retrospectively rated policies. The underlying loss experience on the retrospectively rated policies resulted in a reduction of written premium in 2017, as compared to an increase in written premium in 2016. We retained 16 of the available alternative market programs up for renewal for the nine months ended September 30, 2017, including one program in the third quarter of 2017. During the third quarter of 2017, we added one new alternative market program at Eastern Re that will write business previously ceded to two unaffiliated captive programs. One of the unaffiliated programs was non-renewed during the third quarter of 2017 and the other program will be non-renewed in the fourth quarter of 2017.

Table of Contents

New business, audit premium, retention and renewal price changes for both the traditional business and the alternative market business for 2017 and 2016 are shown in the table below:

(\$ in millions)	Three Months Ended September 30					
	2017			2016		
	Traditional Business	Alternative Market Business	Segment Results	Traditional Business	Alternative Market Business	Segment Results
New business	\$7.1	\$ 2.1	\$9.2	\$5.3	\$ 1.5	\$ 6.8
Audit premium (including EBUB)	\$0.4	\$ 0.3	\$0.7	\$1.5	\$ —	\$ 1.5
Retention rate ⁽¹⁾	85 %	92 %	87 %	81 %	88 %	83 %
Change in renewal pricing ⁽²⁾	(5 %)	(4 %)	(5 %)	(4 %)	(2 %)	(3 %)
(\$ in millions)	Nine Months Ended September 30					
	2017			2016		
	Traditional Business	Alternative Market Business	Segment Results	Traditional Business	Alternative Market Business	Segment Results
New business	\$24.2	\$ 8.5	\$32.7	\$15.1	\$ 7.7	\$22.8
Audit premium (including EBUB)	\$2.1	\$ 0.7	\$2.8	\$4.2	\$ 0.4	\$4.6
Retention rate ⁽¹⁾	86 %	94 %	88 %	83 %	88 %	84 %
Change in renewal pricing ⁽²⁾	(4 %)	(4 %)	(4 %)	(2 %)	(1 %)	(1 %)

⁽¹⁾ We calculate our workers' compensation retention rate as annualized expiring renewed premium divided by all annualized expiring premium subject to renewal. Our retention rate can be impacted by various factors, including price or other competitive issues, insureds being acquired, or a decision not to renew based on our underwriting evaluation.

⁽²⁾ The pricing of our business includes an assessment of the underlying policy exposure and the effects of current market conditions. We continue to base our pricing on expected losses, as indicated by our historical loss data. The renewal rate decreases reflected the competitive workers' compensation environment and the impact of loss cost reductions due to declining frequency trends in certain states in which we do business.

Table of Contents

Ceded Premiums Written

Ceded premiums written reflected our external reinsurance programs and alternative market business ceded to unaffiliated captive insurance companies.

Ceded premiums written were as follows:

(\$ in thousands)	Three Months Ended September 30				Nine Months Ended September 30			
	2017	2016	Change		2017	2016	Change	
Premiums ceded to external reinsurers								
Traditional business	\$2,573	\$2,896	\$(323)	(11.2 %)	\$6,928	\$7,498	\$(570)	(7.6 %)

Segment results	4,356	4,621	(265)	(5.7 %)	13,329	13,104	225	1.7 %
Change in return premium estimate under external reinsurance								
Traditional business	(380)	(45)	(335)	744.4 %	(972)	(324)	(648)	(200.0 %)
Alternative market business	—	—	—	nm	—	—	—	nm
Segment results	(380)	(45)	(335)	744.4 %	(972)	(324)	(648)	(200.0 %)
Premiums ceded to unaffiliated captive insurers								
Traditional business	—	—	—	nm	—	—	—	nm
Alternative market business	1,060	890	170	19.1 %	5,963	5,654	309	5.5 %
Segment results	1,060	890	170	19.1 %	5,963	5,654	309	5.5 %
Total ceded premiums written								
Traditional business	2,193	2,851	(658)	(23.1 %)	5,956	7,174	(1,218)	(17.0 %)
Alternative market business	2,843	2,615	228	8.7 %	12,364	11,260	1,104	9.8 %
Segment results	\$5,036	\$5,466	\$(430)	(7.9 %)	\$18,320	\$18,434	\$(114)	(0.6 %)

We retain the first \$0.5 million in risk insured by us on our traditional business and cede losses in excess of this amount on each loss occurrence under our primary external reinsurance contract. The traditional external reinsurance contract contains a return premium provision under which we estimate return premium based on the underlying loss experience of policies covered under the contract. In our alternative market business, the risk retention for each loss occurrence ranges from \$0.3 million to \$0.35 million based on the alternative market program. We cede 100% of premiums written under four alternative market programs to unaffiliated captive insurers.

Premiums ceded to external reinsurers in our traditional business decreased during the three and nine months ended September 30, 2017. The decline in traditional ceded premiums primarily reflected an increase in revenue sharing with our reinsurance broker, partially offset by an increase in reinsurance rates.

Changes in the return premium estimate reflected the loss experience under the reinsurance contract for the three and nine months ended September 30, 2017 and 2016. The increase in the return premium estimate for the three and nine months ended September 30, 2017 primarily reflected improved loss experience in the 2015-2016 and 2016-2017 contract years.

Table of Contents

Ceded Premiums Ratio

Ceded premiums ratio was as follows:

	Three Months Ended September 30								
	2017			2016			Change		
	Traditional Business	Alternative Market Business	Segment Results	Traditional Business	Alternative Market Business	Segment Results	Traditional Business	Alternative Market Business	Segment Results
Ceded premiums ratio, as reported	5.1%	16.6%	8.4%	6.6%	15.7%	9.1%	(1.5)	0.9	(0.7)
Less the effect of:									
Return premium estimated under external reinsurance	(0.9%)	—%	(0.6%)	(0.1%)	—%	(0.1%)	(0.8)	—	(0.5)
Premiums ceded to unaffiliated captive insurers (100%)	—%	5.5%	1.7%	—%	4.8%	1.4%	—	0.7	0.3
Ceded premiums ratio, less the effects of above	6.0%	11.1%	7.3%	6.7%	10.9%	7.8%	(0.7)	0.2	(0.5)
	Nine Months Ended September 30								
	2017			2016			Change		
	Traditional Business	Alternative Market Business	Segment Results	Traditional Business	Alternative Market Business	Segment Results	Traditional Business	Alternative Market Business	Segment Results
Ceded premiums ratio, as reported	4.3%	19.4%	9.0%	5.3%	19.4%	9.5%	(1.0)	—	(0.5)
Less the effect of:									
Return premium estimated under external reinsurance	(0.7%)	—%	(0.5%)	(0.2%)	—%	(0.2%)	(0.5)	—	(0.3)
Premiums ceded to unaffiliated captive insurers (100%)	—%	8.3%	2.8%	—%	8.7%	2.7%	—	(0.4)	0.1
Ceded premiums ratio, less the effects	5.0%	11.1%	6.7%	5.5%	10.7%	7.0%	(0.5)	0.4	(0.3)

of above

Per our reinsurance agreements, we cede premiums related to our traditional business on an earned premium basis, whereas alternative market premiums are ceded on a written premium basis. The decrease in the traditional ceded premium ratio reflects the impact of the revenue sharing noted above, partially offset by the increase in reinsurance rates. The alternative markets ceded premium ratio, less the effect of premiums ceded to the unaffiliated captive insurers, reflected premiums ceded to our external reinsurers related to the SPCs at Eastern Re. The reinsurance rate for our alternative market business varies by program.

72

Table of Contents

Net Premiums Earned

Net premiums earned were as follows:

(\$ in thousands)	Three Months Ended September 30				Nine Months Ended September 30				
	2017	2016	Change		2017	2016	Change		
Gross premiums earned									
Traditional business*	\$43,492	\$42,582	\$910	2.1 %	\$127,761	\$127,426	\$335	0.3 %	
Alternative market business	20,200	18,502	1,698	9.2 %	59,855	55,601	4,254	7.7 %	
Segment results	63,692	61,084	2,608	4.3 %	187,616	183,027	4,589	2.5 %	
Less: Ceded premiums earned									
Traditional business	2,193	2,850	(657)	(23.1 %)	5,956	7,174	(1,218)	(17.0 %)	
Alternative market business*	3,845	3,736	109	2.9 %	11,869	11,879	(10)	(0.1 %)	
Segment results	6,038	6,586	(548)	(8.3 %)	17,825	19,053	(1,228)	(6.4 %)	
Net premiums earned									
Traditional business	41,299	39,732	1,567	3.9 %	121,805	120,252	1,553	1.3 %	
Alternative market business	16,355	14,766	1,589	10.8 %	47,986	43,722	4,264	9.8 %	
Segment results	\$57,654	\$54,498	\$3,156	5.8 %	\$169,791	\$163,974	\$5,817	3.5 %	

* Traditional gross premiums earned and alternative market ceded premiums earned are reported net of alternative market premiums assumed by our traditional business totaling \$0.2 million and \$0.4 million for the 2017 three- and nine-month periods, respectively, and \$0.2 million and \$0.7 million for the same respective periods of 2016.

Net premiums earned consist of gross premiums earned less the portion of earned premiums that we cede to our reinsurers for their assumption of a portion of our losses. Our workers' compensation policies are twelve-month policies and premiums are earned on a pro rata basis over the policy period. Net premiums earned also include premium adjustments related to the audit of our insureds' payrolls. Payroll audits are conducted subsequent to the end of the policy period and any related adjustments are recorded as fully earned in the current period. In addition, we record an estimate for EBUB and evaluate the estimate on a quarterly basis. We did not adjust the EBUB estimate during the three and nine months ended September 30, 2017 and 2016.

Losses and Loss Adjustment Expenses

The following table summarizes calendar year net loss ratios by separating losses between the current accident year and all prior accident years. Calendar year and current accident year net loss ratios by component were as follows:

	Three Months Ended September 30								
	2017			2016			Change		
	Traditional Business	Alternative Market Business	Segment Results	Traditional Business	Alternative Market Business	Segment Results	Traditional Business	Alternative Market Business	Segment Results
Calendar year net loss ratio*	65.2%	49.7 %	60.8 %	66.5%	54.3 %	63.3 %	(1.3)	(4.6)	(2.5)
Less impact of prior accident years on the net loss ratio	(0.9 %)	(11.7 %)	(4.0 %)	(1.0 %)	(9.7 %)	(3.3 %)	0.1	(2.0)	(0.7)
Current accident year net loss ratio	66.1%	61.4 %	64.8 %	67.5%	64.0 %	66.6 %	(1.4)	(2.6)	(1.8)
Less impact of audit premium on loss ratio	— %	(0.9 %)	(0.3 %)	— %	0.2 %	— %	—	(1.1)	(0.3)
Current accident year net loss ratio, excluding the effect of audit premium	66.1%	62.3 %	65.1 %	67.5%	63.8 %	66.6 %	(1.4)	(1.5)	(1.5)

Table of Contents

	Nine Months Ended September 30								
	2017			2016			Change		
	Traditional Business	Alternative Market Business	Segment Results	Traditional Business	Alternative Market Business	Segment Results	Traditional Business	Alternative Market Business	Segment Results
Calendar year net loss ratio*	65.0 %	49.8 %	60.8 %	66.5 %	55.0 %	63.5 %	(1.5)	(5.2)	(2.7)
Less impact of prior accident years on the net loss ratio	(1.0 %)	(13.5 %)	(4.5 %)	(1.0 %)	(6.4 %)	(2.4 %)	—	(7.1)	(2.1)
Current accident year net loss ratio	66.0 %	63.3 %	65.3 %	67.5 %	61.4 %	65.9 %	(1.5)	1.9	(0.6)
Less impact of audit premium on loss ratio	— %	(1.0 %)	(0.3 %)	— %	(0.6 %)	(0.2 %)	—	(0.4)	(0.1)
Current accident year net loss ratio, excluding the effect of audit premium	66.0 %	64.3 %	65.6 %	67.5 %	62.0 %	66.1 %	(1.5)	2.3	(0.5)

* The net loss ratios for the 2017 three- and nine-month periods in the above tables are calculated before the impact of \$0.2 million and \$0.4 million, respectively, and \$0.2 million and \$0.7 million for the same respective periods of 2016 of premiums earned that is assumed by and ceded from the traditional and alternative markets business.

The current accident year net loss ratio in our traditional business decreased during the 2017 three- and nine-month periods which primarily reflected more favorable trends in claim closing results in 2017 as compared to 2016, which reduced loss indications for the 2017 accident year. The accident year loss ratio for the alternative market business reflected the aggregate loss ratio for all programs. Loss reserves are estimated for each program on a quarterly basis. Due to the size of some of the programs, quarterly claim activity can cause the accident year loss ratio to fluctuate significantly period to period.

Calendar year incurred losses ceded to our external reinsurers in both our traditional and alternative market business totaled \$8.0 million and \$20.6 million for the three and nine months ended September 30, 2017, respectively, compared to ceded incurred losses of \$1.5 million and \$20.1 million for the same respective periods of 2016. The increase in ceded incurred losses for the three months ended September 30, 2017 primarily reflected one large claim with ceded losses of \$5.5 million.

We recognized net favorable prior year development related to our previously established reserve of \$2.3 million and \$7.6 million for the three and nine months ended September 30, 2017, respectively, and \$1.8 million and \$3.9 million for the same respective periods of 2016. The net favorable prior year development included \$0.4 million and \$1.2 million related to amortization of the purchase accounting fair value adjustment for our traditional business for both the three and nine months ended September 30, 2017 and 2016, respectively. It also included net favorable prior year development for our alternative market business of \$1.9 million and \$6.4 million for the three and nine months ended September 30, 2017, respectively, and \$1.4 million and \$2.7 million for the same respective periods of 2016. The prior year favorable development reflected better than expected claims trends in the 2015 and 2016 accident years. Within our alternative market business, audit premium from insureds results in a decrease in the net loss ratio, whereas audit premium returned to insureds results in an increase in the net loss ratio. We recognized audit premium of \$0.3 million and \$0.7 million in the three and nine months ended September 30, 2017, respectively, and \$0.4 million in the nine months ended September 30, 2016 including a nominal amount during the 2016 three-month period, the effect of which is reflected in the tables above.

In our traditional business, we estimate our current accident year loss and loss adjustment expenses based on an expected loss ratio. Incurred losses and loss adjustment expenses are determined by applying the expected loss ratio to net premiums earned, which includes audit premium, for the respective period. In our alternative market business, we estimate our current accident year losses and loss adjustment expenses based on the underlying actuarial methodologies without consideration of audit premium. As a result, we removed the effects of audit premium in the above table for purposes of evaluating the current accident year loss ratio.

Underwriting, Policy Acquisition and Operating Expenses

Underwriting, policy acquisition and operating expenses includes the amortization of commissions, premium taxes and underwriting salaries, which are capitalized and deferred over the related workers' compensation policy period, net

of external ceding commissions earned. The capitalization of underwriting salaries can vary as they are subject to the success rate of our contract acquisition efforts. These expenses also include a management fee charged by the Corporate segment, which represents intercompany charges pursuant to a management agreement and the amortization of intangible assets related to the acquisition of Eastern by ProAssurance. The management fee is based on the extent to which services are provided to the subsidiary and the amount of premium written by the subsidiary.

Table of Contents

The table below provides a comparison of underwriting, policy acquisition and operating expenses:

(\$ in thousands)	Three Months Ended September 30			Nine Months Ended September 30		
	2017	2016	Change	2017	2016	Change
Traditional business	\$13,508	\$13,821	\$(313) (2.3%)	\$37,632	\$39,136	\$(1,504) (3.8%)
Alternative market business	4,926	4,510	416 9.2 %	14,588	13,358	1,230 9.2 %
Underwriting, policy acquisition and operating expenses	\$18,434	\$18,331	\$103 0.6 %	\$52,220	\$52,494	\$(274) (0.5%)

The decrease in underwriting, policy acquisition and operating expenses in our traditional line of business for the 2017 three- and nine-month periods as compared to the same respective periods of 2016 was driven by the decrease in intangible asset amortization of \$0.6 million and \$1.7 million, respectively. In addition, the decrease in the 2017 nine-month period included the effect of a \$0.6 million pension settlement charge related to the termination of a legacy Eastern pension plan recorded in the first quarter of 2016.

Underwriting Expense Ratio (the Expense Ratio)

The underwriting expense ratio for the Workers' Compensation segment included the impact of the following:

	Three Months Ended September 30						Change		
	2017		2016						
	Traditional Business	Alternative Market Business	Segment Results	Traditional Business	Alternative Market Business	Segment Results	Traditional Business	Alternative Market Business	Segment Results
Underwriting expense ratio, as reported*	32.5 %	30.6 %	32.0 %	34.6 %	31.0 %	33.6 %	(2.1)	(0.4)	(1.6)
Less estimated ratio increase (decrease) attributable to:									
Amortization of intangible assets	1.8 %	— %	1.3 %	3.3 %	— %	2.4 %	(1.5)	—	(1.1)
Management fee	1.1 %	— %	0.8 %	1.1 %	— %	0.8 %	—	—	—
Impact of audit premium	(0.3 %)	(0.5 %)	(0.3 %)	(1.2 %)	0.1 %	(0.9 %)	0.9	(0.6)	0.6
Impact of return premium estimate	(0.3 %)	— %	(0.2 %)	— %	— %	— %	(0.3)	—	(0.2)
Underwriting expense ratio, less listed effects	30.2 %	31.1 %	30.4 %	31.4 %	30.9 %	31.3 %	(1.2)	0.2	(0.9)
	Nine Months Ended September 30						Change		
	2017		2016						
	Traditional Business	Alternative Market Business	Segment Results	Traditional Business	Alternative Market Business	Segment Results	Traditional Business	Alternative Market Business	Segment Results
Underwriting expense ratio, as reported*	30.8 %	30.7 %	30.8 %	32.4 %	31.0 %	32.0 %	(1.6)	(0.3)	(1.2)
Less estimated ratio increase (decrease) attributable to:									
Non-recurring/unusual expenses	— %	— %	— %	0.5 %	— %	0.4 %	(0.5)	—	(0.4)
Amortization of intangible assets	1.8 %	— %	1.3 %	3.2 %	— %	2.4 %	(1.4)	—	(1.1)
Management fee	1.2 %	— %	0.9 %	1.2 %	— %	0.9 %	—	—	—
Impact of audit premium	(0.5 %)	(0.5 %)	(0.5 %)	(1.0 %)	(0.3 %)	(0.8 %)	0.5	(0.2)	0.3
Impact of return premium estimate	(0.2 %)	— %	(0.2 %)	(0.1 %)	— %	(0.1 %)	(0.1)	—	(0.1)
Underwriting expense ratio, less listed effects	28.5 %	31.2 %	29.3 %	28.6 %	31.3 %	29.2 %	(0.1)	(0.1)	0.1

* The underwriting expense ratios for the 2017 three- and nine-month periods in the above tables are calculated before the impact of \$0.2 million and \$0.4 million, respectively, and \$0.2 million and \$0.7 million for the same respective periods of 2016 of premiums earned that is assumed by and ceded from the traditional and alternative markets business, respectively.

Table of Contents

The decrease in the traditional expense ratio for the three months ended September 30, 2017, exclusive of the items noted in the tables, primarily reflected the increase in net premiums earned. There were no other individually significant variances by expense category that contributed to the increase in the expense ratio. The change in the alternative market expense ratio for the three and nine months ended September 30, 2017 primarily reflected ceding commissions, which vary by program.

Non-recurring expenses for the nine months ended September 30, 2016 in the above table reflected a pension settlement charge, as discussed above.

Segregated Portfolio Cell Dividend Expense (Income)

Our Workers' Compensation segment provides turn-key workers' compensation alternative market solutions that include program design, fronting, claims administration, risk management, SPC rental, asset management and SPC management services. The asset management and SPC management services are outsourced to a third party.

Alternative market customers include individual companies, groups and associations. SPC dividend expense (income) for each period represents the profit or loss attributable to the alternative market business ceded to the SPCs of Eastern Re, net of any participation we have taken in the SPCs.

The SPCs are segregated pools of assets and liabilities that provide an insurance facility for a defined set of risks. Assets of each SPC are solely for the benefit of that individual cell and each SPC is solely responsible for the liabilities of that individual cell. Assets of one SPC are statutorily protected from the creditors of the others. We participate to a varying degree in the results of selected SPCs. Our ownership interest in the SPCs in which we participate is as low as 25% and as high as 100%. Under the SPC structure, the net operating results of each cell, net of our participation, are due to the external owners of that cell.

The SPC financial results are included in the table below. The SPC dividend expense (income) represents the operating results of each cell in the aggregate.

SPC dividend expense (income) was as follows:

(\$ in thousands)	Three Months Ended September 30				Nine Months Ended September 30			
	2017	2016	Change		2017	2016	Change	
Net premiums earned	\$16,113	\$14,539	\$1,574	10.8 %	\$47,544	\$43,026	\$4,518	10.5 %
Other income	34	3	31	1,033.3 %	83	10	73	730.0 %
Less: Net losses and loss adjustment expenses	8,016	7,888	128	1.6 %	23,698	23,683	15	0.1 %
Less: Underwriting, policy acquisition and operating expenses	4,926	4,510	416	9.2 %	14,587	13,358	1,229	9.2 %
SPC net operating results - profit/(loss)	3,205	2,144	1,061	49.5 %	9,342	5,995	3,347	55.8 %
Less: Eastern participation - profit/(loss)	1,483	695	788	113.4 %	3,749	2,555	1,194	46.7 %
SPC dividend expense (income)	\$1,722	\$1,449	\$273	18.8 %	\$5,593	\$3,440	\$2,153	62.6 %

The increase in SPC dividend expense for the 2017 three- and nine-month periods, as compared to the same periods of 2016, was due to an increase in Net premiums earned which drove the improvement in the loss and expense ratios in both periods.

Table of Contents

Segment Operating Results - Lloyd's Syndicate

Through a wholly owned and consolidated subsidiary, we are a corporate member of Lloyd's of London and have provided the majority (58%) of the capital to Syndicate 1729 which writes and reinsures property and casualty business. The remaining capital for Syndicate 1729 is provided by unrelated third parties, including private names and other corporate members.

Syndicate 1729 covers a range of property and casualty insurance and reinsurance lines, and has a maximum underwriting capacity of £100.0 million for the 2017 underwriting year, of which £57.6 million (\$77.2 million based on September 30, 2017 exchange rates) is our allocated underwriting capacity. We have committed to provide capital (also referred to as FAL) of up to \$200.0 million through 2022 to support our underwriting capacity and are meeting our FAL requirement with investment securities held at Lloyd's. Our FAL securities had a fair value of \$99.2 million at September 30, 2017, as discussed in Note 3 of the Notes to Condensed Consolidated Financial Statements.

Our Lloyd's Syndicate segment results include both our 58% participation in the operating results of Syndicate 1729 and 100% of the operating results of our wholly owned subsidiaries that support Syndicate 1729 and were composed as follows:

(\$ in thousands)	Three Months Ended September 30					Nine Months Ended September 30				
	2017	2016	Change			2017	2016	Change		
Gross premiums written	\$20,972	\$18,956	\$2,016	10.6	%	\$56,995	\$50,870	\$6,125	12.0	%
Net premiums written	\$18,773	\$16,342	\$2,431	14.9	%	\$44,555	\$42,575	\$1,980	4.7	%
Net premiums earned	\$16,318	\$14,578	\$1,740	11.9	%	\$45,374	\$40,533	\$4,841	11.9	%

Net realized gains (losses)	31	50	(19)	(38.0)	%	105	59	46	78.0	%
Other income	(1,881))734	(2,615)	(356.3)	%	(1,641))1,174	(2,815)	(239.8)	%
Net losses and loss adjustment expenses	(20,444)	(11,299)	(9,145)	80.9	%	(40,718)	(25,989)	(14,729)	56.7	%
Underwriting, policy acquisition and operating expenses	(6,723)	(6,251)	(472)	7.6	%	(19,786)	(16,660)	(3,126)	18.8	%
Income tax benefit (expense)	(61)	(1,352)	1,291	(95.5)	%	495	(2,248)	2,743	(122.0)	%
Segment operating results	\$(12,348)	\$(3,189)	\$(9,159)	287.2	%	\$(14,977)	\$(2,127)	\$(12,850)	604.1	%
Net loss ratio	125.3%	77.5%	47.8	pts		89.7%	64.1%	25.6	pts	
Underwriting expense ratio	41.2%	42.9%	(1.7)	pts		43.6%	41.1%	2.5	pts	

We normally report results from our Syndicate 1729 involvement on a quarter delay, except that investment results associated with our FAL investments and certain U.S. paid administrative expenses are reported concurrently as that information is available on an earlier time frame. However, during the third quarter of 2017, Syndicate 1729 reported preliminary loss estimates in connection with Hurricanes Harvey, Irma and Maria, which affected Texas, several states in the southeastern United States and islands in the Caribbean. Due to the availability and significance of these estimates, we have accelerated our reporting of these storm-related losses into the third quarter of 2017. We estimate our share (58%) of the net pre-tax losses from these storms to be approximately \$7.5 million net of reinsurance and reinstatement premiums, which are written and earned during the period. The pre-tax impact of the recognition of these losses on the segment's operating results above for the 2017 three- and nine-month periods was as follows:

(In thousands)	Three and Nine Months Ended September 30, 2017
Gross premiums written	\$ 1,391
Net premiums written	\$ 1,391

Edgar Filing: PROASSURANCE CORP - Form 10-Q

Net premiums earned	\$ 1,391
Gross losses	(36,492)
Reinsurance recoveries	27,626
Net losses and loss adjustment expenses	(8,866)
Segment operating results, before tax	\$ (7,475)

77

Table of Contents**Premiums Written**

Gross premiums written in 2017 consisted of casualty coverages (40% of total gross written premium), property insurance coverages (35%), catastrophe reinsurance coverages (19%) and property reinsurance coverages (6%). For the 2017 three- and nine-month periods, net premiums written increased primarily due to new business written and volume increases on renewal business. In addition, the increase in the 2017 three- and nine-month periods reflected the effect of reinstatement premiums recorded during the third quarter of 2017 which represents the additional premium payable to the Syndicate to restore coverage limits that have been exhausted as a result of reinsured storm-related losses under certain excess of loss reinsurance treaties. The increase in net premiums written in both periods was partially offset by revisions to contract terms related to the quota share agreement with our Specialty P&C segment, as discussed below, and, for the 2017 nine-month period, the effect of revised terms on our reinsurance arrangements.

As discussed in our Specialty P&C segment operating results, Syndicate 1729 serves as a reinsurer on a quota share basis for a wholly owned insurance subsidiary in our Specialty P&C segment. For premium assumed, we include in written premium an estimate of all premiums to be earned over the entire period covered by the reinsurance agreement, generally one year, in the quarter in which the reinsurance agreement becomes effective. The quota share agreement with our Specialty P&C segment renewed effective January 1, 2017 and reflected revised contract terms which reduced premium assumed by Syndicate 1729 by essentially half. Currently, there are no plans to renew the quota share agreement on the next renewal date on January 1, 2018. Results from this ceding arrangement are reported in the Specialty P&C segment on the same quarter delay in order to be consistent with the Lloyd's Syndicate segment as the effect of doing so is not material and thus gross premiums written for the 2017 three- and nine-month periods reflected the change to the reinsurance terms described above.

The 2015 and 2014 calendar year quota share arrangements with our Specialty P&C segment were commuted in December 2016 and 2015, respectively. Due to the reporting delay, the effect of the 2015 and 2014 commutation was reported by both segments in results during the first quarters of 2017 and 2016, respectively, and is reflected in the nine months ended September 30, 2017 and 2016, respectively. The commutations did not differ significantly from previously recorded amounts.

Net Premiums Earned

Net premiums earned consist of gross premiums earned less the portion of earned premiums that we cede to our reinsurers for their assumption of a portion of our losses. Policies written to date primarily carry a term of one year. Because premiums are generally earned pro rata over the entire policy period, fluctuations in premiums earned tend to lag those of premiums written. Additionally, premiums for certain policies and assumed reinsurance contracts are reported subsequent to the coverage period and/or may be subject to adjustment based on loss experience. These premium adjustments are earned when reported, which can result in further fluctuation in earned premium. Net premiums earned for the three and nine months ended September 30, 2017 included premium assumed from our Specialty P&C segment of approximately \$2.9 million and \$9.5 million, respectively, and approximately \$3.4 million and \$10.4 million for the same respective periods of 2016. In addition, net premiums earned in the 2017 three- and nine-month periods included reinstatement premiums associated with the storm-related losses, as previously discussed.

Net Losses and Loss Adjustment Expenses

Losses for the period were primarily recorded using the loss assumptions by risk category incorporated into the business plan submitted to Lloyd's for Syndicate 1729 with consideration given to loss experience incurred to date. The assumptions used in the business plan were consistent with loss results reflected in Lloyd's historical data for similar risks. We expect loss ratios to fluctuate from quarter to quarter as Syndicate 1729 writes more business and the book begins to mature. The loss ratios will also fluctuate due to the timing of earned premium adjustments (see discussion in this section under the heading "Net Premiums Earned"). Premium and exposure for some of Syndicate 1729's insurance policies and reinsurance contracts are initially estimated and subsequently adjusted over an extended period of time as reports are received under binding authority programs. When reports are received, the premium, exposure and corresponding loss estimates are revised accordingly. Changes in loss estimates due to premium or exposure fluctuations are incurred in the accident year in which the premium is earned.

The net loss ratio increased by 47.8% and 25.6% for the three and nine months ended September 30, 2017, respectively, driven by the estimated storm-related losses and reinstatement premiums recognized during the third quarter of 2017, as previously discussed, which increased the net loss ratio by approximately 47.7% and 17.3%, respectively. The net loss ratio in the 2016 three-month period was lower than in prior periods and reflected the reversal of approximately \$2.8 million of net favorable prior year development during the third quarter of 2016 which was a result of a change in methodology related to recording prior year development. Additionally, the net loss ratio for the first nine months of 2016 was lower than in prior periods and reflected reductions attributable to shifts in the mix of business as well as increased reliance on the actual loss experience on the book of business written by Syndicate 1729.

Table of Contents

Underwriting, Policy Acquisition and Operating Expenses

Underwriting expenses increased by \$0.5 million and \$3.1 million for the three and nine months ended September 30, 2017, respectively, as compared to the same periods in 2016 and primarily reflected the anticipated growth in Syndicate 1729 operations. As operations have matured, the total amount of underwriting salaries has increased along with the number of policies successfully written. Underwriting compensation is capitalized as DPAC only when efforts are successful. The decrease in the expense ratio for the 2017 three-month period was primarily due to the increase in earned premium driven by reinstatement premiums recorded and earned as a result of the storm-related losses in the third quarter of 2017, as previously discussed. The increase in the expense ratio for the 2017 nine-month period was primarily due to the timing of certain expenses relative to the increase in earned premiums.

Net Investment Income

Net investment income for the 2017 and 2016 three- and nine-month periods was primarily attributable to interest earned on the FAL investments. Our FAL investments are primarily short-term investments and investment-grade corporate debt securities.

Taxes

Operating results of this segment are subject to U.K. income tax law. Tax expense incurred in 2016 reflected the use of prior year Syndicate 1729 operating losses to offset current period Syndicate 1729 operating results.

Table of Contents

Segment Operating Results - Corporate

Our Corporate segment includes investment operations, interest expense and U.S. income taxes, all of which are managed at the corporate level with the exception of investment assets solely allocated to Syndicate 1729 as discussed in Note 11 of the Notes to Condensed Consolidated Financial Statements. Our Corporate segment operating results also reflect non-premium revenues generated outside of our insurance entities and corporate expenses. Segment operating results included the following:

(\$ in thousands)	Three Months Ended September 30			Nine Months Ended September 30

Net Investment Income, Equity in Earnings (Loss) of Unconsolidated Subsidiaries, Net Realized Investment Gains (Losses)

Net Investment Income

Net investment income is primarily derived from the income earned by our fixed maturity securities and also includes dividend income from equity securities, income from our short-term and cash equivalent investments, earnings from other investments and increases in the cash surrender value of BOLI contracts. Investment fees and expenses are deducted from investment income.

Net investment income by investment category was as follows:

(\$ in thousands)	Three Months Ended September 30			Nine Months Ended September 30				
	2017	2016	Change	2017	2016	Change		
Fixed maturities	\$18,503	\$20,660	\$(2,157)	(10.4 %)	\$56,655	\$63,759	\$(7,104)	(11.1 %)
Equities	4,495	3,779	716	18.9 %	12,437	10,983	1,454	13.2 %
Short-term and Other investments	1,131	1,456	(325)	(22.3 %)	2,867	2,524	343	13.6 %
BOLI	620	639	(19)	(3.0 %)	1,517	1,537	(20)	(1.3 %)
Investment fees and expenses	(1,432)	(1,624)	192	(11.8 %)	(5,078)	(4,523)	(555)	12.3 %
Net investment income	\$23,317	\$24,910	\$(1,593)	(6.4 %)	\$68,398	\$74,280	\$(5,882)	(7.9 %)

Table of Contents

Fixed Maturities

The decrease in our income from fixed maturity securities for the 2017 three- and nine-month periods was due to lower yields and lower average investment balances. We reduced the size of our fixed portfolio over the last year in order to pay dividends and invest in other asset classes. On an overall basis our average investment in fixed maturity securities was approximately 8% and 6% lower for the 2017 three- and nine-month periods, respectively, as compared to the same periods of 2016.

Average yields for our fixed maturity portfolio were as follows:

	Three Months Ended September 30		Nine Months Ended September 30	
	2017	2016	2017	2016
Average income yield	3.1%	3.3%	3.1%	3.3%
Average tax equivalent income yield	3.5%	3.7%	3.5%	3.8%

Equities

Income from our equity portfolio increased during the 2017 three- and nine-month periods as compared to the same periods in 2016 which reflected an increase to our allocation to this asset category as well as a different mix of equities owned.

Investment Fees and Expenses

Investment fees and expenses decreased during the 2017 three-month period as compared to the same period in 2016 primarily due to a decrease in subsequent interest expense on our LP subscriptions. Investment fees and expenses increased during the 2017 nine-month period as compared to the same period in 2016 primarily due to an increase in subsequent interest expense on our LP subscriptions and incentive fees on our convertible bond portfolio. Subsequent interest expense on some of our LPs is paid on subscriptions that occur later in the fund-raising process and incentive fees for returns that exceed a high water mark on our convertible bond portfolio reflected an increase in the fair value of the portfolio.

Equity in Earnings (Loss) of Unconsolidated Subsidiaries

Equity in earnings (loss) of unconsolidated subsidiaries is derived from our investment interests accounted for under the equity method. Results were as follows:

(\$ in thousands)	Three Months Ended September 30			Nine Months Ended September 30		
	2017	2016	Change	2017	2016	Change
Investment LPs/LLCs	\$8,227	\$4,998	\$3,229 64.6 %	\$22,590	\$10,341	\$12,249 118.5 %
Tax credit partnerships	(4,063)	(8,347)	4,284 (51.3 %)	(14,101)	(16,948)	2,847 (16.8 %)
Equity in earnings (loss) of unconsolidated subsidiaries	\$4,164	\$(3,349)	\$7,513 224.3 %	\$8,489	\$(6,607)	\$15,096 228.5 %

We hold interests in certain LPs/LLCs that generate earnings from trading portfolios, secured debt, debt securities, multi-strategy funds and private equity investments. The performance of the LPs is affected by the volatility of equity and credit markets. Our investment LPs/LLCs results for the 2017 three- and nine-month periods were affected primarily by higher reported earnings from several LPs.

Table of Contents

Our tax credit investments are designed to generate returns in the form of tax credits and tax-deductible project operating losses and are comprised of qualified affordable housing tax credit partnership interests and historic tax credit interests. We account for our tax credit investments under the equity method and record our allocable portion of the operating losses of the underlying properties based on estimates provided by the partnerships. For our qualified affordable housing tax credit partnership interests we adjust our estimates of our allocable portion of operating losses periodically as actual operating results of the underlying properties become available. Our historic tax credit investments are short-term in nature and remaining operating losses are expected to be recognized primarily during 2017. Based on operating results received, we increased our estimate of partnership operating losses by \$0.1 million and \$2.2 million in the 2017 three- and nine-month periods as compared to \$5.1 million and \$8.1 million in the same respective periods in 2016, predominantly related to our qualified affordable housing tax credit partnership interests. The tax benefits received from our tax credit partnerships, which are not reflected in our investment results above, reduced our tax expenses in 2017 and 2016 as follows:

	Three Months Ended September 30		Nine Months Ended September 30	
(In millions)	2017	2016	2017	2016
Tax credits recognized during the period	\$6.0	\$7.3	\$17.8	\$20.8
Tax benefit of tax credit partnership operating losses	\$1.4	\$2.9	\$4.9	\$5.9

Tax credits provided by the underlying projects of the historic tax credit partnerships are typically available in the tax year in which the project is put into active service, whereas the tax credits provided by qualified affordable housing tax credit partnerships are provided over approximately a ten year period. The decrease in tax credits recognized for the three and nine months ended September 30, 2017 was primarily attributable to our historic tax credit partnership investments.

Non-GAAP Financial Measure – Tax Equivalent Investment Result

We believe that to fully understand our investment returns it is important to consider the current tax benefits associated with certain investments as the tax benefit received represents a portion of the return provided by our tax-exempt bonds, BOLI, common and preferred stocks, and tax credit partnership investments (our tax-preferred investments). We impute a pro forma tax-equivalent result by estimating the amount of fully-taxable income needed to achieve the same after-tax result as is currently provided by our tax-preferred investments. We believe this better reflects the economics behind our decision to invest in certain asset classes that are either taxed at lower rates and/or result in reductions to our current federal income tax expense. Our pro forma tax-equivalent investment result is shown in the table that follows as is a reconciliation of our GAAP net investment result to our tax equivalent result.

(In thousands)	Three Months Ended September 30		Nine Months Ended September 30	
	2017	2016	2017	2016
GAAP net investment result:				
Net investment income	\$23,317	\$24,910	\$68,398	\$74,280
Equity in earnings (loss) of unconsolidated subsidiaries	4,164	(3,349)	8,489	(6,607)
GAAP net investment result	\$27,481	\$21,561	\$76,887	\$67,673
Pro forma tax-equivalent investment result	\$39,644	\$36,215	\$113,824	\$110,784
Reconciliation of pro forma and GAAP tax-equivalent investment result:				
GAAP net investment result	\$27,481	\$21,561	\$76,887	\$67,673
Taxable equivalent adjustments, calculated using the 35% federal statutory tax rate:				

Edgar Filing: PROASSURANCE CORP - Form 10-Q

Table of Contents

Net Realized Investment Gains (Losses)

The following table provides detailed information regarding our Net realized investment gains (losses).

	Three Months		Nine Months	
	Ended September 30		Ended September 30	
(In thousands)	2017	2016	2017	2016
OTTI losses, total:				
State and municipal bonds	\$—	\$(100)	\$—	\$(100)
Corporate debt	—	—	(419)	(7,604)
Other investments	—	—	—	(3,130)
Portion of OTTI losses recognized in other comprehensive income before taxes:				
Corporate debt	—	—	248	1,068
Net impairment losses recognized in earnings	—	(100)	(171)	(9,766)
Gross realized gains, available-for-sale securities	1,721	3,853	4,294	8,920
Gross realized (losses), available-for-sale securities	(260)	(369)	(1,726)	(5,620)
Net realized gains (losses), trading securities	3,602	1,277	10,957	5,243
Net realized gains (losses), other investments	478	335	2,197	833
Change in unrealized holding gains (losses), trading securities	2,152	9,809	2,526	17,646
Change in unrealized holding gains (losses), convertible securities, carried at fair value as a part of Other investments	23	880	621	976
Other	2	2	7	23
Net realized investment gains (losses)	\$7,718	\$15,687	\$18,705	\$18,255

We did not recognize any OTTI during the 2017 three-month period. During the 2017 nine-month period, we recognized OTTI in earnings of \$0.2 million and \$0.2 million in non-credit impairments in OCI, both of which related to corporate bonds.

We recognized a nominal amount of OTTI in earnings during the 2016 three-month period. During the 2016 nine-month period, we recognized OTTI in earnings of \$6.5 million related to corporate bonds, including credit-related OTTI of \$5.5 million related to debt instruments from ten issuers in the energy sector. The fair value of these bonds declined in the first quarter of 2016 as did the credit quality of the issuers and we recognized credit-related OTTI to reduce the amortized cost basis of the bonds to the present value of future cash flows we expected to receive from the bonds. During the 2016 nine-month period, we also recognized non-credit impairments of \$0.9 million in OCI relative to the bonds of these issuers, as the fair value of the bonds was less than the present value of the expected future cash flows from the securities.

We also recognized a \$3.1 million OTTI in earnings during the 2016 nine-month period related to an investment fund that is accounted for using the cost method (classified as Other investments). The fund is focused on the energy sector and securities held by the fund declined in value during 2016. An OTTI was recognized to reduce our carrying value of the investment to the NAV reported by the fund.

Operating Expenses

Corporate segment operating expenses for the three and nine months ended September 30, 2017 and 2016, respectively, were comprised as follows:

	Three Months Ended September 30			Nine Months Ended September 30		
	2017	2016	Change	2017	2016	Change
(\$ in thousands)						
Operating expenses	\$9,333	\$9,086	\$247 2.7 %	\$32,546	\$31,713	\$833 2.6 %
Management fee offset	(4,344)	(4,000)	(344) 8.6 %	(11,484)	(10,965)	(519) 4.7 %
Segment Total	\$4,989	\$5,086	\$(97) (1.9%)	\$21,062	\$20,748	\$314 1.5 %

The increase in operating expenses for the three months ended September 30, 2017 was primarily due to an increase in staffing costs. The increase in operating expenses for the nine months ended September 30, 2017 was primarily driven

by an increase in compensation related costs and professional fees, partially offset by the effect of costs incurred during the first three quarters of 2016 related to a pre-acquisition liability from a discontinued operation.

83

Table of Contents

Operating subsidiaries within our Specialty P&C and Workers' Compensation segments are charged a management fee by the Corporate segment for services provided to these subsidiaries. The management fee is based on the extent to which services are provided to the subsidiary and the amount of premium written by the subsidiary. Under the arrangement, the expenses associated with such services are reported as expenses of the Corporate segment, and the management fees charged are reported as an offset to Corporate operating expenses. While the terms of the management arrangement were consistent between 2016 and 2017, fluctuations in the amount of premium written by each subsidiary can result in corresponding variations in the management fee charged to each subsidiary during a particular period.

Segregated Portfolio Cell Dividend Expense (Income)

During the first quarter of 2017, we began reporting in the Corporate segment the portion of the SPC dividend expense (income) that is attributable to the investment results of the SPCs, all of which are reported in the Corporate segment, to better align the expense with the related investment results of the SPCs. For comparative purposes, we have reflected the SPC dividend expense for the prior periods in the same manner. SPC dividend expense was \$1.2 million and \$3.5 million for the three and nine months ended September 30, 2017, respectively, as compared to \$1.7 million and \$2.4 million for the same respective periods of 2016. See the Underwriting, Policy Acquisition and Operating Expense section in our Workers' Compensation segment results for more information on our SPCs.

Interest Expense

Interest expense increased during the three and nine months ended September 30, 2017 driven primarily by an increase in our weighted average outstanding debt, which was \$408 million and \$432 million for the three and nine months ended September 30, 2017, respectively, as compared to \$350 million for the same respective periods of 2016, and, to a lesser extent, an increase in the average interest rate on the outstanding borrowings under our Revolving Credit Agreement.

Interest expense for three and nine months ended September 30, 2017 and 2016 is provided in the following table:

(\$ in thousands)	Three Months Ended			Nine Months Ended		
	September 30			September 30		
	2017	2016	Change	2017	2016	Change
Senior notes due 2023	\$3,357	\$3,357	\$—	\$10,071	\$10,071	\$—
Revolving credit agreement (including fees and amortization)	757	381	376	2,302	1,185	1,117
Other	10	10	—	29	29	—
	\$4,124	\$3,748	\$376	\$12,402	\$11,285	\$1,117
			10.0%			9.9%

Table of Contents

Taxes

Tax expense allocated to our Corporate segment includes U.S. tax only, which would include U.S. tax expense incurred from our corporate membership in Lloyd's of London. The U.K. tax expense incurred by the U.K. based subsidiaries of our Lloyd's Syndicate segment is allocated to that segment. Consolidated tax expense reflects tax expense of both segments, as shown in the table below:

	Three Months		Nine Months	
	Ended		Ended	
	September 30		September 30	
(In thousands)	2017	2016	2017	2016
Corporate segment income tax expense (benefit)	\$5,963	\$8,328	\$4,962	\$14,209
Lloyd's Syndicate segment income tax expense (benefit)	61	1,352	(495)	2,248
Consolidated income tax expense (benefit)	\$6,024	\$9,680	\$4,467	\$16,457

Factors affecting our consolidated effective tax rate include the following:

	Three Months		Nine Months	
	Ended		Ended	
	September 30		September 30	
	2017	2016	2017	2016
Statutory rate	35.0 %	35.0 %	35.0 %	35.0 %
Tax-exempt income*	(5.6 %)	(3.8 %)	(6.8 %)	(5.7 %)
Tax credits	(17.0%)	(13.1%)	(18.9%)	(16.9%)
U.K. operating results	15.3 %	0.5 %	6.1 %	0.1 %
Excess tax benefit on share-based compensation	— %	— %	(2.8 %)	— %
Other	(10.5%)	3.6 %	(7.9 %)	2.1 %
Effective tax rate	17.2 %	22.2 %	4.7 %	14.6 %

* Includes tax-exempt interest, dividends received deduction and change in cash surrender value of BOLI.

Our effective tax rates for the 2017 three- and nine-month periods were 17.2% and 4.7%, respectively, and differ from the projected effective tax rate due to certain discrete items. These discrete items increased our projected effective tax rate by 7.4% and reduced our projected effective tax rate by 5.1% for the 2017 three- and nine-month periods, respectively. Our effective tax rates for the 2016 three- and nine-month periods were 22.2% and 14.6%, respectively, and differ from the projected effective tax rate due to certain discrete items. These discrete items increased our projected effective tax rate by 10.5% and 2.9% for the 2016 three- and nine-month periods, respectively. The effect of these discrete items on the 2017 and 2016 three- and nine-month periods resulted in our effective tax rates as shown in the table above.

The provision for income taxes and the effective tax rate for the 2017 three- and nine-month periods are determined based upon our estimate of an annual effective tax rate at the end of each quarterly reporting period (the projected effective tax rate) plus the impact of certain discrete items that are not included in the projected effective tax rate. Our projected effective tax rates for the 2017 and 2016 nine-month periods were 9.8% and 11.7%, respectively, before those certain discrete items were considered. Our projected effective tax rates for both the 2017 and 2016 nine-month periods were different from the statutory federal income tax rate primarily due to a portion of our investment income being tax-exempt and the utilization of tax credits transferred to us from our tax credit partnership investments. While projected tax credits for 2017 are less than 2016, they continue to have a reducing effect on the effective tax rate for the 2017 three- and nine-month periods. Tax credits were \$6.0 million and \$17.8 million for the three and nine months ended September 30, 2017, respectively, as compared to \$7.3 million and \$20.8 million for the same respective periods in 2016.

For the 2017 nine-month period, one notable discrete item that decreased our effective tax rate was the excess tax benefit on share-based compensation that resulted from the application of revised accounting guidance, which was effective January 1, 2017. Under the revised guidance, the difference between the deduction for tax purposes, which is based upon the fair market value of share-based awards and the time of vesting, and the compensation cost recognized

for financial reporting purposes, which is based upon the fair market value of the share-based awards on the date of grant, is to be recognized as income tax expense (benefit) in the current period rather than an adjustment to OCI as was required under prior guidance. See Note 1 of the Notes to Condensed Consolidated Financial Statements for further discussion on the adoption of the guidance. Another discrete item that increased our effective tax rate was the exclusion of a tax benefit for U.K. losses in our Lloyd's Syndicate segment that resulted from the application of accounting guidance related to interim period taxes for entities subject to multiple tax jurisdictions. Under this accounting guidance, an entity anticipating an ordinary loss in a jurisdiction for which no tax benefit can be recognized must exclude the loss and related tax benefit from the overall calculations of the estimated annual effective tax rate and interim period tax.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

We believe that we are principally exposed to three types of market risk related to our investment operations. These risks are interest rate risk, credit risk and equity price risk. We have limited exposure to foreign currency risk as we issue few insurance contracts denominated in currencies other than the U.S. dollar and we have few monetary assets or obligations denominated in foreign currencies.

Interest Rate Risk

Our fixed maturity portfolio is exposed to interest rate risk. Fluctuations in interest rates have a direct impact on the market valuation of these securities. As interest rates rise, market values of fixed income portfolios fall and vice versa. Certain of the securities are held in an unrealized loss position; we do not intend to sell and believe we will not be required to sell any of the debt securities held in an unrealized loss position before its anticipated recovery.

The following table summarizes estimated changes in the fair value of our available-for-sale fixed maturity securities for specific hypothetical changes in interest rates by asset class at September 30, 2017 and December 31, 2016. There are principally two factors that determine interest rates on a given security: market interest rates and credit spreads. As different asset classes can be affected in different ways by movements in those two factors, we have broken out our portfolio by asset class in the following table.

(\$ in millions)	Interest Rate Shift in Basis Points				
	September 30, 2017				
	(200)	(100)	Current	100	200
Fair Value:					
U.S. Treasury obligations	\$157	\$153	\$148	\$144	\$140
U.S. Government-sponsored enterprise obligations	20	19	19	18	17

Table of Contents

Computations of prospective effects of hypothetical interest rate changes are based on numerous assumptions, including the maintenance of the existing level and composition of fixed income security assets, and should not be relied on as indicative of future results.

Certain shortcomings are inherent in the method of analysis presented in the computation of the fair value of fixed rate instruments. Actual values may differ from the projections presented should market conditions vary from assumptions used in the calculation of the fair value of individual securities, including non-parallel shifts in the term structure of interest rates and changing individual issuer credit spreads.

Our cash and short-term investment portfolio at September 30, 2017 was carried on a cost basis which approximates its fair value. Our portfolio lacks significant interest rate sensitivity due to its short duration.

Credit Risk

We have exposure to credit risk primarily as a holder of fixed income securities. We control this exposure by emphasizing investment grade credit quality in the fixed income securities we purchase.

As of September 30, 2017, 94% of our fixed maturity securities were rated investment grade as determined by NRSROs, such as Fitch, Moody's and Standard & Poor's. We believe that this concentration in investment grade securities reduces our exposure to credit risk on our fixed income investments to an acceptable level. However, investment grade securities, in spite of their rating, can rapidly deteriorate and result in significant losses. Ratings published by the NRSROs are one of the tools used to evaluate the creditworthiness of our securities. The ratings reflect the subjective opinion of the rating agencies as to the creditworthiness of the securities, and therefore, we may be subject to additional credit exposure should the rating prove to be unreliable.

We also have exposure to credit risk related to our receivables from reinsurers. Our receivables from reinsurers (with regard to both paid and unpaid losses) approximated \$321 million at September 30, 2017 and \$279 million at December 31, 2016. We monitor the credit risk associated with our reinsurers using publicly available financial and rating agency data.

Equity Price Risk

At September 30, 2017, the fair value of our equity investments, excluding our equity investments in bond investment funds as discussed in the following paragraph, was \$293 million. These equity securities are subject to equity price risk, which is defined as the potential for loss in fair value due to a decline in equity prices. The weighted average beta of this group of securities was 1. Beta measures the price sensitivity of an equity security or group of equity securities to a change in the broader equity market, in this case the S&P 500 Index. If the value of the S&P 500 Index increased by 10%, the fair value of these securities would be expected to increase by 10.0% to \$322 million. Conversely, a 10% decrease in the S&P 500 Index would imply a decrease of 10.0% in the fair value of these securities to \$264 million. The selected hypothetical changes of plus or minus 10% do not reflect what could be considered the best or worst case scenarios and are used for illustrative purposes only.

Our equity investments include equity investments in certain bond investment funds which are not significantly subject to equity price risk, and thus we have excluded these investments from the above analysis.

ITEM 4. CONTROLS AND PROCEDURES.

The Chief Executive Officer and Chief Financial Officer of the Company participated in management's evaluation of our disclosure controls and procedures (as defined in SEC Rule 13a-15(e)) as of September 30, 2017. ProAssurance's disclosure controls and procedures are designed to reasonably assure that information required to be disclosed by us in reports we file or submit under the Exchange Act is accumulated and communicated to our management as appropriate to allow timely decisions regarding disclosure and is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures are effective.

Changes in Internal Control over Financial Reporting

There have been no significant changes in our internal controls over financial reporting that have materially affected, or are reasonably likely to materially affect, those controls during the quarter.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS.

See Note 6 of the Notes to Condensed Consolidated Financial Statements.

ITEM 1A. RISK FACTORS.

There are no changes to the "Risk Factors" in Part 1, Item 1A of the 2016 Form 10-K.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.

(a) Not applicable.

(b) Not applicable.

(c) Information required by Item 703 of Regulation S-K.

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs* (In thousands)
July 1 - 31, 2017	—	N/A	—	\$109,643
August 1 - 31, 2017	—	N/A	—	\$109,643
September 1 - 30, 2017	—	N/A	—	\$109,643
Total	—	\$—	—	

* Under its current plan begun in November 2010, the ProAssurance Board of Directors has authorized \$600 million for the repurchase of common shares or the retirement of outstanding debt. This is ProAssurance's only plan for the repurchase of common shares, and the plan has no expiration date.
