RETIREMENT SAVINGS PLAN

NOTES TO FINANCIAL STATEMENTS

JUNE 30, 2001 AND DECEMBER 31, 2000

1. ORGANIZATION AND PLAN DESCRIPTION

The following description of the Unisource Worldwide, Inc. Retirement Savings Plan (the "Plan") provides only general information. Participants should refer to the official plan documents for complete information.

Plan Description

On June 19, 1996, Alco Standard Corporation announced that it would separate Unisource Worldwide, Inc. (the "Company" or the "Employer"), its printing and imaging and supply systems distribution business, from IKON Office Solutions, Inc. ("IKON"), its office solutions business, with each business operating as a stand-alone, publicly traded company. Following the spin-off of the Company, which was completed on December 31, 1996, the Company established the Plan covering all nonunion eligible employees of the Company effective January 1, 1997.

The Company and Georgia-Pacific Corporation ("G-P") merged during 1999, at which time G-P acquired all outstanding shares of the Company. Subsequent to the merger, the Company still conducted business under its existing name as a separate subsidiary of Georgia-Pacific Group. The merger had no effect on the Plan or its administration except as discussed below.

Effective June 30, 2001, the Plan's assets merged into the Georgia-Pacific Corporation Salaried 401(k) Plan ("G-P Salaried Plan"). No employee was allowed to become a participant in the Plan on or after April 1, 2001.

The Plan is a defined contribution plan subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended. Vanguard Fiduciary Trust Company is the trustee and custodian of the Plan.

Contributions

Eligible employees may elect to participate in the Plan on the first date of the month following the completion of three full calendar months of service. The Plan allows participants to contribute from 1% to 16% of their annual compensation, as defined by the Plan. Contributions are limited by the maximum amount allowable under the Internal Revenue Code ("IRC"). Participants are immediately vested in their contributions.

The Employer contributes an amount equal to two-thirds of the first 6% of annual compensation that a participant contributes to the Plan. The Employer's contribution vests with the participant at 25% per year beginning with the participant's second year of service so that full vesting occurs after five years of service. The participant is also fully vested in the Employer's contributions upon position termination due to permanent shutdown of plant or department, total and permanent disability, attainment of age 59 1/2, or death.

-2-

In association with the acquisition by G-P, the Plan was amended to provide that employer matching contributions would no longer be made in the Company's common stock. Participants were permitted to direct the investment of the matching contribution to any of the current fund options other than the IKON common stock fund.

The Plan allows participant contributions, and any investment income (loss) earned thereon, to be allocated between any of the available investment funds. Participants may change investment allocations at any time. Additional investments in IKON common stock and Unisource Stable Value Fund are not permitted.

Contributions are transferred to the trustee twice a month and invested in the Vanguard Treasury Money Market Fund until they can be credited to participants' accounts and invested in accordance with participants' investment elections. Earnings on the short-term investments are allocated to participants' accounts once each year.

Participant Loans

The Plan allows participants currently employed by the Company to obtain loans equal to the lesser of \$50,000 or 50% of their total vested account balances. Loans bear interest at a rate equal to the prime lending rate plus one at the date of origination of the loan. Loan repayments are generally made through payroll deductions and normally must be repaid within a five-year term unless the loan was used to purchase a primary residence, which could extend the term to 15 years. Loans become due and payable

in full once a participant terminates employment.

Withdrawals and Termination

In the event of a participant's death, attainment of age 59 1/2, or disability, the participant or his/her beneficiary may elect to receive his/her entire account balance. If termination occurs for other reasons, only vested amounts are distributed to the participant, and nonvested amounts are forfeited. Such forfeitures are used to reduce the Company's future contributions. If a former participant returns to the employment of the Company within five years of the termination date, and if the full amount of the distribution received is repaid, previously forfeited amounts are reinstated to the participant's account.

Forfeitures

Forfeitures resulting from separation of service are held in the Plan and serve to reduce future employer contributions. Before the plan merger, forfeited balances as of June 30, 2001 were \$304,869. As of December 31, 2000, forfeited account balances were \$377,503.

2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting

The accompanying financial statements have been prepared on the accrual basis.

Investment Valuation and Income

Investments are presented at market value. Market values of mutual funds and common stock are determined principally from quotations as reported on various securities exchanges.

The net depreciation in the market value of mutual funds in the accompanying statement of changes in net assets available for benefits reflects the net difference between the market value and cost at the beginning and end of the period for mutual funds held throughout the period as well as the difference between the period-end market value and cost for mutual funds purchased during the period. For

-3-

mutual funds sold or distributed during the period, the net depreciation reflects the net difference between the market value and the cost at the beginning of the period and the date of disposition.

The guaranteed investment contracts held in the Stable Value Fund are valued at contract value, which approximates fair value, as established by the issuing financial institution. Contract value represents contributions made under the contract, plus interest at the contract rate less funds used for withdrawals. Contract interest rates ranged from 6.23% to 6.7% for the six-month period ended June 30, 2001.

Purchases and sales of securities are recorded on a trade date basis. Investment income is recorded as earned. Dividend income is recorded on the ex-dividend date.

Investment securities, in general, are exposed to various risks, including credit, interest, and overall market volatility risks. Due to the level of the risk associated with certain investment securities, it is possible that changes in values of investment securities will occur and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires the plan administrator to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates and assumptions.

3. INCOME TAX STATUS

The Internal Revenue Service issued a determination letter dated October 5, 1999 stating that the Plan was designed in accordance with applicable IRC requirements as of that date. Although the Plan has been amended since receiving the determination letter, the plan administrator believes that the Plan is currently designed and being operated in compliance with the applicable requirements of the IRC. The plan administrator believes that the Plan was qualified and the related trust was tax-exempt as of the financial statement dates.

4. INVESTMENTS
