**(1) Basis of Presentation**

In the opinion of management, the accompanying unaudited interim financial statements contain all normal and recurring adjustments necessary to present fairly the financial position of Hasbro, Inc. and all majority-owned subsidiaries ( Hasbro or the Company ) as of June 27, 2010 and June 28, 2009, and the results of its operations and cash flows for the periods then ended in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP"). The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and notes thereto. Actual results could differ from those estimates.

The quarterly and six-month periods ended June 27, 2010 and June 28, 2009 are 13-week and 26-week periods, respectively.

The results of operations for the quarter and six months ended June 27, 2010 are not necessarily indicative of results to be expected for the full year, nor were those of the comparable 2009 period representative of those actually experienced for the full year 2009.

These condensed consolidated financial statements have been prepared without audit, pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and disclosures normally included in the consolidated financial statements prepared in accordance with U.S. GAAP have been condensed or omitted pursuant to such rules and regulations. The Company filed audited consolidated financial statements for the year ended December 27, 2009 in its annual report on Form 10-K, which includes all such information and disclosures and, accordingly, should be read in conjunction with the financial information included herein.

The Company's accounting policies are the same as those described in Note 1 to the Company's consolidated financial statements for the fiscal year ended December 27, 2009.

Substantially all of the Company's inventories consist of finished goods. Cost of sales primarily consists of purchased materials, labor, manufacturing overheads and other inventory-related costs such as obsolescence.

For the quarters and six-month periods ended June 27, 2010 and June 28, 2009, the effect of the Company's contingent convertible debt was dilutive and, accordingly, for the diluted earnings per share calculation, the numerator includes an adjustment to earnings to exclude the interest expense incurred for these debentures and the denominator includes an adjustment to include the shares issuable upon conversion. As of June 27, 2010, substantially all of these debentures were converted into shares of common stock. See Note 5 for additional information.

For the quarters ended June 27, 2010 and June 28, 2009, options to acquire shares totaling 707 and 7,890, respectively, were excluded from the calculation of diluted earnings per share because to include them would have been antidilutive. For the six-month periods ended June 27, 2010 and June 28, 2009, 1,517 and 6,713 options to acquire shares, respectively, were excluded from the calculation of diluted earnings per share because to include them would have been antidilutive.

**(3) Other Comprehensive Earnings**

Other comprehensive loss for the quarters and six-months ended June 27, 2010 and June 28, 2009 consist of the following:

	Quarter Ended		Six Months Ended	
	June 27, 2010	June 28, 2009	June 27, 2010	June 28, 2009
Foreign currency translation adjustments	\$ (30,355 )	27,617	(56,364 )	11,539

Net gains on cash flow hedging activities	(3,321 )	(5,849 )	(4,895 )	(14,798 )
Other comprehensive loss	\$ (28,240 )	(11,494 )	(30,828 )	(14,965 )
	=====	=====	=====	=====

At June 27, 2010, the Company had remaining deferred gains on hedging instruments, net of tax, of \$45,946 in accumulated other comprehensive earnings ( AOCE ). These instruments hedge certain anticipated inventory purchases and other cross-border transactions through 2012. These amounts will be reclassified into the consolidated statement of operations upon the sale of the related inventory or receipt or payment of the related royalties and expenses. Of the amount included in AOCE at June 27, 2010, the Company expects approximately \$28,698 to be reclassified to earnings within the next twelve months. However, the amount ultimately realized in earnings is dependent on the fair value of the contracts on the settlement dates.

**(4) Equity Method Investment**

In the second quarter of 2009, the Company acquired a 50% interest in a joint venture, DHJV Company LLC ( DHJV ), with Discovery Communications ( Discovery ). DHJV was established to create a television network in the United States dedicated to high-quality children's and family entertainment and educational programming and owns the DISCOVERY KIDS network in the United States. As of June 27, 2010, June 28, 2009 and December 27, 2009, the Company's interest in the joint venture totaled \$372,207, \$369,850 and \$371,783, respectively, and is a component of other assets. The Company's share in the earnings (loss) of DHJV for the quarter and six months ended June 27, 2010 totaled \$(76) and \$424, respectively, of income (expense) and is included as a component of other (income) expense in the accompanying consolidated statement of operations. For the quarter ended June 28, 2009, the Company's share in the earnings of DHJV totaled \$1,014 of income and is included as a component of other (income) expense in the accompanying consolidated statement of operations.

**(5) Financial Instruments**

Hasbro's financial instruments include cash and cash equivalents, accounts receivable, marketable securities, short-term borrowings, accounts payable and accrued liabilities. At June 27, 2010, the carrying cost of these instruments approximated their fair value. The Company's financial instruments at June 27, 2010 also include certain assets and liabilities measured at fair value (see Notes 7 and 9) as well as long-term borrowings. The carrying costs and fair values of the Company's long-term borrowings as of June 27, 2010, June 28, 2009 and December 27, 2009 are as follows:

	June 27, 2010		June 28, 2009		Dec. 27, 2009

Total long-term debt	\$1,396,980	1,434,268	1,134,723	1,175,697	1,131,998	1,325,342
	=====	=====	=====	=====	=====	=====

The carrying cost of the 6.125% Notes Due 2014 includes principal amounts of \$425,000 as well as fair value adjustments of \$12,085, \$0 and \$(2,725) at June 27, 2010, June 28, 2009 and December 27, 2009, respectively, related to interest rate swaps. All other carrying costs represent principal amounts. Total principal amounts of long-term debt at June 27, 2010, June 28, 2009 and December 27, 2009 were \$1,384,895, \$1,134,723 and \$1,134,723, respectively.

The fair value of the convertible debentures was based on an average of the prices of trades occurring around the balance sheet date. The fair value of the Company's other long-term borrowings is measured using a combination of broker quotations when available and discounted future cash flows. The fair value of the interest rate swaps is measured based on the present value of future cash flows using the swap curve as of the date of valuation.

In March 2010 the Company issued \$500,000 of Notes that are due in 2040 (the "Notes"). The Notes bear interest at a rate of 6.35%. The Company may redeem the Notes at its option at the greater of the principal amount of the Notes or the present value of the remaining scheduled payments discounted using the effective interest rate on applicable U.S. Treasury bills at the time of repurchase.

The Company is party to a series of interest rate swap agreements which effectively adjust the interest rates on a portion of the Company's long-term debt from fixed to variable. The interest rate swaps are matched with a portion of the 6.125% Notes Due 2014 and accounted for as fair value hedges of those notes. The interest rate swaps have a total notional amount of \$400,000 with maturities in 2014 which match the maturity date of the related notes. In each of the contracts, the Company receives payments based upon a fixed interest rate of 6.125%, which matches the interest rate of the notes being hedged, and makes payments based upon a floating rate based on Libor. These contracts are designated and effective as hedges of the change in the fair value of the associated debt. At June 27, 2010 and December 27, 2009, the fair value of these contracts was \$12,085 and \$(2,725), respectively, which is recorded in other assets with a corresponding fair value adjustment to increase long-term debt. The Company was not a party to any interest rate swap agreements at June 28, 2009. The Company recorded gains of \$6,496 and \$14,810 on these instruments in other (income) expense, net for the quarter and six months ended June 27, 2010, respectively, relating to the change in fair value of such derivatives, wholly offsetting losses from the change in fair value of the associated long-term debt, also included in other (income) expense.

At December 27, 2009, the Company had \$249,828 outstanding in principal amount of contingent convertible debentures due 2021. If the closing price of the Company's common stock exceeded \$23.76 for at least 20 trading days, within the 30 consecutive trading day period ending on the last trading day of the calendar quarter, the holders had the right to convert the notes to shares of the Company's common stock at the initial conversion price of \$21.60 in the next calendar quarter. During the first quarter of 2010, holders of these debentures converted \$111,177 of these debentures which resulted in the issuance of 5,147 shares of common stock. In addition, if the closing price of the Company's common stock exceeded \$27.00 for at least 20 trading days in any thirty day period, the Company had the right to call the debentures by giving notice to the holders of the debentures. During a prescribed notice period following a call by the Company, the holders of the debentures had the right to convert their debentures in accordance with the conversion terms described above. On March 29, 2010, the Company gave notice of its election to redeem all of the outstanding debentures on April 29, 2010 at a redemption price to be paid in cash of \$1,011.31 per \$1,000 principal amount, which was equal to the par value thereof plus accrued and unpaid cash interest through April 29, 2010. During the notice period, \$138,467 of the debentures were converted by the holders, resulting in the issuance of 6,410 shares of common stock. The remaining debentures were redeemed at a total cost of \$186, which included accrued interest through the redemption date.

**(6) Income Taxes**

The Company and its subsidiaries file income tax returns in the United States and various state and international jurisdictions. In the normal course of business, the Company is regularly audited by U.S. federal, state and local and international tax authorities in various tax jurisdictions. The Company is no longer subject to U.S. federal income tax examinations for years before 2006. With few exceptions, the Company is no longer subject to U.S. state or local and non-U.S. income tax examinations by tax authorities in its major jurisdictions for years before 2004.

The U.S. Internal Revenue Service has commenced an examination related to the 2006 and 2007 U.S. federal income tax returns. The Company is also under income tax examination in several U.S. state and local and non-U.S. jurisdictions. The U.S. Internal Revenue Service recently completed an examination related to 2004 and 2005, including review by the Joint Committee on Taxation. During the first quarter of 2010, as the result of the completion of this examination, the Company recognized \$24,167 of previously accrued unrecognized tax benefits, including the reversal of related accrued interest, primarily related to the deductibility of certain expenses, as well as the tax treatment of certain subsidiary and other transactions. Of this amount, \$7,032 was recorded as a reduction of deferred tax assets and the remainder as a reduction of income tax expense. The total income tax benefit resulting from the completion of the examination, including other adjustments, totaled \$21,243 during the first quarter of 2010.

In connection with the Mexican tax examinations for the years 2000 to 2004, the Company has received tax assessments totaling approximately \$136,140, which include interest, penalties and inflation updates, related to transfer pricing which the Company is vigorously defending. In order to continue the process of defending its position, the Company was required to guarantee the amount of the assessments for the years 2000 to 2003, as is usual and customary in Mexico with respect to these matters. Accordingly, as of June 27, 2010, bonds totaling approximately \$113,890 (at June 27, 2010 exchange rates) have been provided to the Mexican government related to the 2000 to 2003 assessments, allowing the Company to defend its positions. The Company currently does not expect to be required to guarantee the amount of the 2004 assessment. The Company expects to be successful in sustaining its position with respect to these assessments as well as similar positions that may be taken by the Mexican tax authorities for periods subsequent to 2004.

**(7) Fair Value of Financial Instruments**

The Company measures certain assets at fair value. The fair value hierarchy consists of three levels: Level 1 fair values are based on quoted market prices in active markets for identical assets or liabilities that the entity has the ability to access; Level 2 fair values are those based on quoted prices for similar assets or liabilities, quoted prices in markets that are not active, or other inputs that are observable or can be corroborated by observable data for substantially the full term of the assets or liabilities; and Level 3 fair values are based on inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

Accounting standards permit entities to measure many financial instruments and certain other items at fair value and establish presentation and disclosure requirements designed to facilitate comparisons between entities that choose different measurement attributes for similar assets and liabilities. The Company has elected the fair value option for certain available-for-sale investments. At June 27, 2010, June 28, 2009 and December 27, 2009, these investments totaled \$20,937, \$6,263 and \$21,108 respectively, and are included in prepaid expenses and other current assets in the

consolidated balance sheet. The Company recorded net gains of \$88 and \$383 on these investments in other (income) expense, net for the quarter and six months ended June 27, 2010, respectively, related to the change in fair value of such investments. For the quarter and six months ended June 28, 2009, the Company recorded net gains of \$223 and \$165, respectively, on these

investments in other (income) expense, net, related to the change in fair value of such investments.

At June 27, 2010, June 28, 2009 and December 27, 2009, the Company had the following assets measured at fair value in its consolidated balance sheets:

For a portion of the Company's available-for-sale securities, the Company is able to obtain quoted prices from stock exchanges to measure the fair value of these securities. Certain other available-for-sale securities held by the Company are valued at the net asset value which is quoted on a private market that is not active; however, the unit price is predominantly based on underlying investments which are traded on an active market. The Company's derivatives consist primarily of foreign currency forward contracts. The Company uses current forward rates of the respective foreign currencies to measure the fair value of these contracts. The Company's derivatives also include interest rate swaps used to effectively adjust the interest rates on a portion of the Company's long-term debt from fixed to variable. The fair values of the interest rate swaps are measured based on the present value of future cash flows using the

(Unaudited)

swap curve as of the valuation date. The remaining derivative securities consist of warrants to purchase common stock. The Company uses the Black-Scholes model to value these warrants. One of the inputs used in the Black-Scholes model, historical volatility, is considered an unobservable input in that it reflects the Company's own assumptions about the inputs that market participants would use in pricing the asset or liability. The Company believes that this is the best information available for use in the fair value measurement. There were no changes in these valuation techniques during 2010.

The following is a reconciliation of the beginning and ending balances of the fair value measurements of the Company's warrants to purchase common stock that use significant unobservable inputs (Level 3):

**(8) Pension, Postretirement and Postemployment Benefits**

The Company, except for certain international subsidiaries, has pension plans covering substantially all of its full-time employees. Substantially all United States employees are covered under at least one of several non-contributory defined benefit pension plans maintained by the Company. Benefits under the two major plans which principally cover non-union employees are based primarily on salary and years of service. One of these major plans is funded. Benefits under the remaining plans are based primarily on fixed amounts for specified years of service. Of these remaining plans, the plan covering union employees is also funded. Effective at the end of December 2007, the Company froze pension benefits being accrued for its non-union employees in the United States. Pension coverage for employees of Hasbro's international subsidiaries is provided, to the extent deemed appropriate, through separate defined benefit and defined contribution plans.

**(9) Derivative Financial Instruments**

Hasbro uses foreign currency forward contracts to mitigate the impact of currency rate fluctuations on firmly committed and projected future foreign currency transactions. These over-the-counter contracts, which hedge future currency requirements related to purchases of inventory and other cross-border transactions not denominated in the functional currency of the business unit, are primarily denominated in United States and Hong Kong dollars, Euros and United Kingdom pound sterling and are entered into with a number of counterparties, all of which are major financial institutions. The Company believes that a default by a single counterparty would not have a material adverse effect on the financial condition of the Company. Hasbro does not enter into derivative financial instruments for speculative purposes.

The Company also has warrants to purchase common stock that qualify as derivatives. For additional information related to these warrants see Note 7. In addition the Company is party to several interest rate swap agreements to effectively adjust the interest rates on a portion of the Company's long-term debt from fixed to variable. For additional information related to these interest rate swaps see Note 5.

Cash Flow Hedges

-----

Hasbro uses foreign currency forward contracts to reduce the impact of currency rate fluctuations on firmly committed and projected future foreign currency transactions. All of the Company's designated foreign currency forward contracts are considered to be cash flow hedges. These instruments hedge a portion of the Company's currency requirements associated with anticipated inventory purchases and other cross-border transactions in 2010 through 2012.

At June 27, 2010, June 28, 2009 and December 27, 2009, the notional amounts and fair values of the Company's foreign currency forward contracts designated as cash flow hedging instruments were as follows:

During the quarter and six months ended June 27, 2010, the Company reclassified net gains from other comprehensive earnings to net earnings of \$3,937 and \$5,856, respectively. Of the amount reclassified during the quarter ended June 27, 2010, \$2,739 was reclassified to cost of sales and \$1,250 was reclassified to royalty expense. Of the amount reclassified during the six months ended June 27, 2010, \$3,851 and \$2,057 were reclassified to cost of sales and royalty expense, respectively. In addition, net losses of \$(52) were reclassified to earnings as a result of hedge ineffectiveness in the second quarter of 2010.

During the quarter and six months ended June 28, 2009, the Company reclassified net gains from other comprehensive earnings to net earnings of \$6,483 and \$16,628, respectively. Of the amount reclassified during the quarter ended June 28, 2009, \$5,565 was reclassified to cost of sales and \$918 was reclassified to royalty expense. During the six-month period ended June 28, 2009, \$13,657 was reclassified to cost of sales and \$2,971 was reclassified to royalty expense.

There were no reclassifications to earnings as a result of hedge ineffectiveness in the first six months of 2009.

#### Undesignated Hedges

-----

The Company also enters into foreign currency forward contracts to minimize the impact of changes in the fair value of intercompany loans due to foreign currency changes. Due to the short-term nature of the derivative contracts involved, the Company does not use hedge accounting for these contracts. At June 27, 2010, June 28, 2009 and December 27, 2009, the total notional amounts of the Company's undesignated derivative instruments were \$10,631, \$67,384 and \$94,926, respectively.

**(10) Segment Reporting**

Hasbro is a worldwide leader in children's and family leisure time products and services, including toys, games and licensed products ranging from traditional to high-tech and digital. The Company's segments are (i) U.S. and Canada; (ii) International; (iii) Entertainment and Licensing; and (iv) Global Operations.

The U.S. and Canada segment includes the marketing and selling of boys' action figures, vehicles and playsets, girls toys, electronic toys and games, plush products, preschool toys and infant products, electronic interactive products, toy-related specialty products, traditional board games and puzzles, DVD-based games and trading card and

role-playing games within the United States and Canada. Within the International segment, the Company markets and sells both toy and certain game products in markets outside of the U.S. and Canada, primarily the European, Asia Pacific, and Latin and South American regions. The Company's Entertainment and Licensing segment includes the Company's lifestyle licensing, digital gaming, movie, television and online entertainment operations. The Global Operations segment is responsible for manufacturing and sourcing finished product for the Company's U.S. and Canada and International segments.

Segment performance is measured at the operating profit level. Included in Corporate and eliminations are certain corporate expenses, the elimination of intersegment transactions and certain assets benefiting more than one segment. Intersegment sales and transfers are reflected in management reports at amounts approximating cost. Certain shared costs, including global product development and marketing expenses, are allocated to segments based upon foreign exchange rates fixed at the beginning of the year, with adjustments to actual foreign exchange rates included in Corporate and eliminations. The accounting policies of the segments are the same as those referenced in Note 1.

Results shown for the quarter and six months are not necessarily representative of those which may be expected for the full year 2010, nor were those of the comparable 2009 periods representative of those actually experienced for the full year 2009. Similarly, such results are not necessarily those which would be achieved were each segment an unaffiliated business enterprise.

Information by segment and a reconciliation to reported amounts for the quarters and six months ended June 27, 2010 and June 28, 2009 are as follows.

(a) The Global Operations segment derives substantially all of its revenues, and thus its operating results, from intersegment activities.

(b) Certain intangible assets, primarily goodwill, which benefit multiple operating segments are reflected as Corporate assets for segment reporting purposes. In accordance with accounting standards related to impairment testing, these amounts have been allocated to the reporting unit which benefits from their use. In addition, allocations of certain

expenses related to these assets to the individual operating segments are done at the beginning of the year based on budgeted amounts. Any difference between actual and budgeted amounts is reflected in Corporate and eliminations. As of June 28, 2009, the investment in the Discovery joint venture is included in the assets of the Corporate segment. As of June 27, 2010 and December 27, 2009 the investment in the Discovery joint venture is included in the assets of the Entertainment and Licensing segment.

This Quarterly Report on Form 10-Q, including the following section entitled Management's Discussion and Analysis of Financial Condition and Results of Operations, contains forward-looking statements expressing management's current expectations, goals, objectives and similar matters. These forward-looking statements may include statements concerning the Company's product and entertainment plans, anticipated product and entertainment performance, business opportunities and strategies, financial goals and expectations for achieving the Company's financial goals and other objectives. See Item 1A, in Part II of this report, for a discussion of factors which may cause the Company's actual results or experience to differ materially from that anticipated in these forward-looking statements. The Company undertakes no obligation to revise the forward-looking statements in this report after the date of the filing.

**EXECUTIVE SUMMARY**

-----

The Company earns revenue and generates cash primarily through the sale of a variety of toy and game products, as well as through the out-licensing of rights for use of its properties in connection with non-competing products, including digital games, offered by third-parties. The Company sells its products both within the United States and in a number of international markets. The Company's business is highly seasonal with a significant amount of revenues occurring in the second half of the year. In 2009, 2008 and 2007, the second half of the year accounted for 65%, 63% and 66% of the Company's net revenues, respectively. While many of the Company's products are based on brands and technology the Company owns or controls, the Company also offers products which are licensed from outside inventors. In addition, the Company licenses rights to produce products based on movie, television, music and other entertainment properties owned by third parties, such as the MARVEL and STAR WARS properties.

The Company's business is separated into three principal business segments, U.S. and Canada, International and Entertainment and Licensing. The U.S. and Canada segment develops, markets and sells both toy and game products in the U.S. and Canada. The International segment consists of the Company's European, Asia Pacific and Latin and South American marketing and sales operations. The Company's Entertainment and Licensing segment includes the Company's lifestyle licensing, digital gaming, movie, television and online entertainment operations. In addition to these three primary segments, the Company's world-wide manufacturing and product sourcing operations are managed through its Global Operations segment.

The Company seeks to make its brands relevant in all areas important to its consumers. Brand awareness is amplified through immersive traditional play, digital applications, publishing and lifestyle licensing and entertainment experiences presented for consumers' enjoyment. The Company's focus remains on growing core owned and controlled brands, developing new and innovative products which respond to market insights, offering immersive entertainment experiences which allow consumers to experience the Company's brands across multiple forms and formats, and optimizing efficiencies within the Company to reduce costs, increase operating

profits and maintain a strong balance sheet. The Company's core brands represent Company-owned or Company-controlled brands, such as TRANSFORMERS, MY LITTLE PONY, LITTLEST PET SHOP, MONOPOLY, MAGIC: THE GATHERING, PLAYSKOOL, G.I. JOE and NERF, which have been successful over the long term. The Company has a large portfolio of owned and controlled brands, which can be introduced in new formats and platforms over time. These brands may also be further extended by pairing a licensed concept with a core brand. By focusing on core brands, the Company is working to build a more consistent revenue stream and basis for future growth, and to leverage profitability. During the first six months of 2010 the Company had significant revenues from core brands, namely NERF, LITTLEST PET SHOP, TRANSFORMERS, MAGIC: THE GATHERING, PLAY-DOH, PLAYSKOOL and MONOPOLY. The Company's strategy of re-imagining, re-inventing and re-igniting its brands has been instrumental in achieving its overall long-term growth objectives.

The Company also seeks to drive product-related revenues by increasing the visibility of its core brands through entertainment. As an example of this, in June of 2009, the *TRANSFORMERS: REVENGE OF THE FALLEN* motion picture was released as a sequel to the 2007 motion picture *TRANSFORMERS*. In addition, in August 2009, the motion picture *G.I. JOE: THE RISE OF COBRA* was released. The Company developed and marketed product lines based on these motion pictures. As a result of pairing these core brands with motion picture entertainment, both the movies and the product lines benefited. In addition, the Company has entered into a strategic relationship with Universal Pictures to produce at least three motion pictures based on certain of Hasbro's core brands, with the potential for production of two additional pictures. The first movie is expected to be released in 2012. As part of its strategy, in addition to using theatrical entertainment, the Company continues to seek opportunities to use other entertainment outlets and forms of entertainment as a way to build awareness of its brands.

The Company is a partner in a joint venture with Discovery Communications, Inc. ( "Discovery" ) to create a television network in the United States dedicated to high-quality children's and family entertainment and educational programming. Programming on the network will include content based on Hasbro's brands, Discovery's library of children's educational programming, as well as programming developed by third parties. The Company expects the rebranded network, THE HUB, to debut in the fall of 2010 and believes that it will reach approximately 60 million homes in the U.S. at that time, with programming targeted to children 14 years of age and under. The Company believes that this effort will support its strategy of growing its core brands well beyond traditional toys and games and provide immersive entertainment experiences for consumers of all ages in any form or format. In connection with this initiative, the Company established Hasbro Studios, an internal creative group that will be responsible for the creation and development of television programming based on Hasbro's brands. The Company expects to incur a certain level of investment spending leading up to the debut of THE HUB, as well as costs in 2010 and beyond related to the production of television programming.

While the Company believes it has built a more sustainable revenue base by developing and maintaining its core brands and avoiding reliance on licensed entertainment properties, it continues to opportunistically enter into or leverage existing strategic licenses which complement its brands and key strengths. The Company's primary licenses include its agreements with Marvel Characters B.V. ( "Marvel" ), for characters in the Marvel universe, including IRON MAN and SPIDER-MAN; Lucas Licensing, Ltd. ( "Lucas" ), related to the STAR WARS brand; and Sesame Workshop, related to the Sesame Street brand of characters. The majority of product offerings under the Sesame Workshop license will commence in 2011. In the first two quarters of 2010 the Company had significant sales of products related to the movie release of *IRON MAN 2* in May 2010. During 2009 the Company had a high level of revenues from products related to television programming based on SPIDER-MAN and STAR WARS.

The Company's long-term strategy also focuses on extending its brands further into the digital world. As part of this strategy, the Company is party to a multi-year strategic agreement with Electronic Arts Inc. ( "EA" ). The agreement gives EA the worldwide rights, subject to existing limitations on the Company's rights and certain other exclusions, to create digital games for all platforms, such as mobile phones, gaming consoles and personal computers, based on a broad spectrum of the Company's intellectual properties, including MONOPOLY, SCRABBLE, YAHTZEE, NERF, TONKA, G.I. JOE and LITTEST PET SHOP.

The Company is investing to grow its business in emerging markets. During the last two years, the Company expanded its operations in China, Brazil, Russia, Korea, Romania and the Czech Republic. In addition, the Company is seeking to grow its business in entertainment and digital gaming, and will continue to evaluate strategic alliances and acquisitions which may complement its current product offerings, allow it entry into an area which is adjacent to or complementary to the toy and game business, or allow it to further develop awareness of its brands and expand the ability of consumers to experience its brands in different forms of media.

While the Company remains committed to investing in the growth of its business, it also continues to be focused on reducing fixed costs through efficiencies and on profit improvement. Over the last 7 years the Company has improved its full year operating margin from 7.8% in 2002 to 14.5% in 2009. The Company reviews its operations on an ongoing basis and seeks to reduce the cost structure of its underlying business and promote efficiency.

In recent years, the Company has been seeking to return excess cash to its shareholders through share repurchases and dividends. As part of this initiative, from 2004 to 2010, the Company's Board of Directors (the "Board" ) adopted five successive share repurchase authorizations with a cumulative authorized repurchase amount of \$2,325,000. The fifth authorization was approved in April 2010 for \$625,000. At June 27, 2010, the Company had \$417,525 remaining under the April 2010 authorization. For the first six months of 2010, the Company invested \$369,098 in the repurchase of 9,462 shares of common stock in the open market. For the years ended 2009, 2008 and 2007, the

Edgar Filing: HASBRO INC - Form 10-Q

Company spent \$90,994, \$357,589 and \$587,004, respectively, to repurchase 3,172, 11,736 and 20,795 shares, respectively, in the open market. The Company intends to, at its discretion, opportunistically repurchase shares in the future subject to market conditions, the Company's other potential uses of cash and the Company's levels of cash generation, including the Company's issuance of \$500,000 of long-term notes in March 2010.

**RESULTS OF OPERATIONS**

-----

The quarters and six months ended June 27, 2010 and June 28, 2009 were 13-week and 26-week periods, respectively.

Net earnings for the quarter and six months ended June 27, 2010 were \$43,631 and \$102,574, respectively, compared to net earnings of \$39,275 and \$59,005 for the respective periods of 2009. Basic earnings per share for the quarter and six months ended June 27, 2010 were \$0.30 and \$0.73, respectively, compared to basic earnings per share of \$0.28 and \$0.42 for the respective periods of 2009. Diluted earnings per share were \$0.29 and \$0.69 for the quarter and six months ended June 27, 2010, compared with diluted earnings per share of \$0.26 and \$0.40 for the respective periods in 2009. Net earnings for the six months ended June 27, 2010 include a favorable tax adjustment of approximately \$21,200, or \$0.14 per diluted share, related to the recognition of certain previously unrecognized tax benefits and reversal of related accrued interest due to the completion of a tax audit.

Consolidated net revenues for the quarter ended June 27, 2010 decreased 7% to \$737,791 compared to \$792,202 for the quarter ended June 28, 2009. For the six months ended June 27, 2010, consolidated net revenues were \$1,410,162 compared to \$1,413,542 for the six months ended June 28, 2009. Consolidated net revenues were positively impacted by foreign currency translation in the amount of approximately \$1,600 and \$22,000 for the quarter and six months ended June 27, 2010, respectively, as a result of the weaker U.S. dollar in 2010. Operating profit for the quarter ended June 27, 2010 was \$79,726 compared to \$73,073 for the quarter ended June 28, 2009. Operating profit for the 2010 six-month period was \$149,053 compared to an operating profit of \$114,290 for the six-month period of 2009.

Most of the Company's revenues and operating profit are derived from its three principal business segments: the U.S. and Canada segment, the International segment and the Entertainment and Licensing segment, which are discussed in detail below. The following table presents net external revenues and operating profit data for the Company's three principal segments for the quarters and six months ended June 27, 2010 and June 28, 2009.

	<u>Quarter</u>			<u>Six Months</u>		
	2010	2009	% Change	2010	2009	% Change

*U.S. AND CANADA SEGMENT*

The U.S. and Canada segment's net revenues for the quarter ended June 27, 2010 decreased 9% to \$444,520 from \$490,877 for the quarter ended June 28, 2009. Net revenues for the six months ended June 27, 2010 were \$869,230

compared to \$895,379 for the six months ended June 28, 2009. For the quarter and six months ended June 27, 2010, U.S. and Canada segment net revenues were positively impacted by currency translation of approximately \$2,500 and \$6,500, respectively, as a result of the weaker U.S. dollar in the first six months of 2010. The decrease in the quarter and six months was a result of decreased revenues in the boys category, partially offset by increased revenues in the games and puzzles, preschool and girls categories. The decrease in the boys category was primarily the result of higher sales of TRANSFORMERS and G.I. JOE products in 2009 as a result of the movie releases for these two brands in that year, partially offset by increased sales of NERF and, to a lesser extent, MARVEL products, as a result of the movie release of *IRON MAN 2* in May 2010. The increase in games and puzzles for the quarter and six months was primarily driven by increased sales of MAGIC: THE GATHERING products. Net revenues in the preschool category increased in the

quarter and six months primarily as a result of increased sales of PLAYSKOOL, PLAY-DOH and TONKA products. The increase in net revenues in the girls toys category in the quarter and six months was driven by increased sales of FURREAL FRIENDS products, partially offset by decreased sales of LITTLEST PET SHOP products.

U.S. and Canada segment operating profit increased to \$58,741 for the quarter ended June 27, 2010 compared to \$56,318 for the quarter ended June 28, 2009. For the six months ended June 27, 2010 operating profit increased to \$119,872 from \$97,868 for the six months ended June 28, 2009. The increase in operating profit for the quarter and six months was driven by lower royalty expense as the result of decreased sales of entertainment-driven products, as well as decreased amortization expense, primarily as a result of the property rights related to the Wizards of the Coast acquisition becoming fully amortized in the fourth quarter of 2009, and decreased advertising expense, partially offset by the decreased net revenues described above.

*INTERNATIONAL SEGMENT*

International segment net revenues decreased by 5% to \$261,411 for the quarter ended June 27, 2010 from \$276,231 for the quarter ended June 28, 2009. Net revenues for the six months ended June 27, 2010 increased 4% to \$483,130 from \$465,423 for the six months ended June 28, 2009. For the six months ended June 27, 2010, International segment net revenues were positively impacted by currency translation of approximately \$15,500, or 3%, as a result of the weaker U.S. dollar in the first six months of 2010. For the quarter ended June 27, 2010, foreign exchange did not have a material impact. Absent the impact of foreign exchange, net revenues for the six-month period increased slightly. Decreased net revenues in the boys category in the quarter and six months were partially offset in the quarter, and more than offset in the six-month period, by increased net revenues from the games and puzzles and preschool categories. Net revenues in the girls category decreased for the quarter and increased for the six-month period. Net revenues in the boys category decreased in the quarter and six months primarily as a result of decreased sales of TRANSFORMERS products, partially offset by increased sales of NERF and MARVEL products. Sales of MARVEL products increased in the quarter and six months primarily as a result of the movie release of *IRON MAN 2* in May 2010. Games and puzzles net revenue increased in the quarter and six months as a result of increased sales of MAGIC: THE GATHERING, MONOPOLY, and OPERATION. Net revenues in the preschool category increased in the quarter and six months as a result of increased sales of PLAY-DOH and PLAYSKOOL products. Increased net revenues in the girls category as a result of increased sales of STRAWBERRY SHORTCAKE and FURREAL products, were more than offset in the quarter, and partially offset in the six months as a result of decreased sales of LITTLEST PET SHOP and MY LITTLE PONY products.

International segment operating profit decreased to \$11,596 for the quarter ended June 27, 2010 from \$16,450 for the quarter ended June 28, 2009. For the six months ended June 27, 2010, operating profit increased to \$9,166 from \$1,979 for the six months ended June 28, 2009. International segment operating profit for the six months ended June 27, 2010 was negatively impacted by currency translation of approximately \$1,800. The decrease in operating profit

for the quarter was primarily a result of lower revenues, partially offset by decreased royalty expense. The increase in operating profit for the six-month period was primarily a result of decreased royalty and amortization expense.

*ENTERTAINMENT AND LICENSING SEGMENT*

Entertainment and Licensing segment net revenues for the quarter ended June 27, 2010 increased 26% to \$30,451 from \$24,153 for the quarter ended June 28, 2009. Net revenues for the six months ended June 27, 2010 increased 8% to \$55,560 from \$51,386 for the six months ended June 28, 2009. The increase in both the quarter and six months was primarily due to an increase in movie-related revenues, partially offset in the six months by decreased digital gaming revenues.

Entertainment and Licensing segment operating profit increased to \$12,996 for the quarter ended June 27, 2010 compared to \$2,939 for the quarter ended June 28, 2009. For the six months ended June 27, 2010 operating profit increased to \$22,362 from \$16,566 for the six months ended June 28, 2009. Operating profit for the quarter and six months increased as a result of the higher revenues discussed above and decreased selling, distribution and administrative expense which, in the quarter and six months ended June 28, 2009, included \$7,200 in acquisition costs related to the Company's investment in the joint venture with Discovery. While the Discovery joint venture is a component of our television operations, the Company's 50% share in the earnings (loss) from the joint venture is included in other (income) expense and therefore is not a component of operating profit of the segment.

**COSTS AND EXPENSES**

The Company's costs and expenses, stated as percentages of net revenues, are illustrated below for the quarters ended June 27, 2010 and June 28, 2009.

	Quarter		Six Months	
	2010	2009	2010	2009
Cost of sales	40.7%	40.3%	39.9%	39.9%
Royalties	6.8	9.3	6.7	9.1
Product development	6.4	5.5	6.2	5.7
Advertising	9.8	10.3	10.1	10.2
Amortization	1.5	2.4	1.6	2.7
Selling, distribution and administration	24.0	23.0	24.9	24.3

Cost of sales decreased in dollars but increased as a percentage of revenues to \$300,322, or 40.7% of net revenues, for the quarter ended June 27, 2010 from \$319,452 or 40.3% of net revenues for the quarter ended June 28, 2009. For the six months ended June 27, 2010 cost of sales remained flat at \$563,001, or 39.9% of net revenues, compared to \$564,205, or 39.9% of net revenues for the six months ended June 28, 2009. Cost of sales for the six months ended June 27, 2010 were negatively impacted by currency translation of approximately \$9,600 as a result of the weaker U.S. dollar in the first six months of 2010. The decrease in dollars for the quarter and six months primarily reflects the decreased revenues for those periods, while the increase as a percentage of net revenues for the quarter is primarily a result of the mix of products sold in 2010 compared to 2009.

Royalty expense for the quarter ended June 27, 2010 decreased to \$50,052 or 6.8% of net revenues from \$73,826 or 9.3% of net revenues for the quarter ended June 28, 2009. Royalty expense for the six months ended June 27, 2010 decreased to \$93,834 or 6.7% of net revenues from \$128,279 or 9.1% of net revenues for the comparable period of 2009. The decrease in the quarter and six-month period is primarily the result of decreased sales of entertainment-driven products, including TRANSFORMERS, G.I. JOE and STAR WARS products. Royalty expense in the six-month period ended June 28, 2009 also included an expense of \$10,000 associated with a royalty audit.

Product development expenses for the quarter ended June 27, 2010 increased to \$47,466 or 6.4% of net revenues from \$43,529 or 5.5% of net revenues for the quarter ended June 28, 2009. For the six months ended June 27, 2010 product development expense increased to \$87,790 or 6.2% of net revenues compared to \$80,660 or 5.7% of net revenues for the comparable period of 2009. The increase in both the quarter and six-month periods of 2010 primarily relates to major product initiatives planned for 2011.

Advertising expense for the quarter ended June 27, 2010 decreased to \$71,998, or 9.8% of net revenues compared to \$81,677, or 10.3% of net revenues for the quarter ended June 28, 2009. For the six months ended June 27, 2010 advertising expense decreased to \$143,172 or 10.1% of net revenues compared to \$143,986 or 10.2% of net revenues for the comparable period of 2009.

Amortization expense decreased to \$11,315 or 1.5% of net revenues in the second quarter of 2010 from \$18,792 or 2.4% of net revenues in the second quarter of 2009. For the six months ended June 27, 2010, amortization expense was \$22,699 or 1.6% of net revenues compared to \$38,679 or 2.7% of net revenues in the six months ended June 28, 2009. The decrease in the quarter and six months is primarily the result of the property rights related to the Wizards of the Coast and Larami acquisitions becoming fully amortized in the fourth quarter of 2009 and first quarter of 2010, respectively.

For the quarter ended June 27, 2010, the Company's selling, distribution and administration expenses decreased in dollars but increased as a percentage of net revenues to \$176,912, or 24.0% of net revenues, from \$181,853 or 23.0% of net revenues for the quarter ended June 28, 2009. For the six months ended June 27, 2010, selling, distribution and administration expenses increased to \$350,613, or 24.9% of net revenues, from \$343,443, or 24.3% of net revenues, for the six months ended June 28, 2009. The decrease in dollars for the quarter reflects lower shipping and administration expenses. The increase in the six months primarily reflects the impact of currency translation as a result of the weaker U.S. dollar in the first six months of 2010. Both the quarter and six-month periods in 2010 include additional marketing and sales and administration costs related to Hasbro Studios, as well as to support continued growth in emerging markets, including Brazil and China. Administration expense in both the quarter and six-month periods of 2009 included \$7,200 in acquisition costs related to the Company's purchase of its 50% interest in the joint

venture with Discovery.

**NONOPERATING (INCOME) EXPENSE**  
-----

Interest expense for the second quarter of 2010 increased to \$21,922 from \$17,503 in the second quarter of 2009. For the six months ended June 27, 2010 interest expense increased to \$38,714 from \$27,218 in 2009. Interest expense in the second quarter of 2009 includes approximately \$4,000 in costs related to a short-term borrowing facility commitment the Company entered into in April 2009 in connection with the Company's investment in the joint venture with Discovery. Additionally, the increase in interest expense in the quarter and six months reflects higher outstanding borrowings as a result of the issuance of \$425,000 in principal amount of Notes in May 2009 and \$500,000 in principal amount of Notes in March 2010. The proceeds from the issuance of Notes in May 2009 were primarily used to purchase a 50% interest in the joint venture with Discovery. The increase in interest rates is also due to higher average borrowing rates due to the issuance of Notes in March 2010, which bear interest at the rate of 6.35%, partially offset by the conversion and redemption of the contingent convertible debentures during March and April 2010, which bore interest at 2.75%.

Interest income for the quarter ended June 27, 2010 was \$2,106 compared to \$739 for the quarter ended June 28, 2009. Interest income for the six months ended June 27, 2010 was \$2,936 compared to \$2,004 in 2009. The increase in interest income for the quarter and six months was primarily the result of income received from the Internal Revenue Service related to a tax refund and to a lesser extent higher average invested cash balances, partially offset by lower returns on invested cash in the six-month period.

Other (income) expense, net, was \$(1,127) for the second quarter of 2010, compared to \$(545) for the second quarter of 2009. Other (income) expense, net, for the six months ended June 27, 2010 was \$(1,992) compared to \$3,635 in 2009. The change in other (income) expense for the quarter and six months ended June 27, 2010 primarily reflects the impact of foreign exchange gains in 2010 compared to losses in 2009. Other (income) expense also includes the Company's 50% interest in the income (loss) of the Discovery joint venture. The Company recognized income (loss) of (\$76) and \$424, respectively, during the quarter and six-month periods of 2010, compared to \$1,014 in the comparable periods in 2009.

**INCOME TAXES**  
-----

Income taxes totaled 28.5% of pretax earnings in the second quarter of 2010 compared with 30.9% in the second quarter of 2009. For the six-month periods, income taxes totaled 11.0% of pretax earnings in 2010 compared to 30.9% of pretax earnings in 2009. Income tax expense for the six months ended June 27, 2010 includes a \$21,243 tax benefit as a result of the settlement of the 2004 and 2005 IRS examination in the first quarter. In addition, both periods are impacted by certain other discrete tax events, including the accrual of potential interest and penalties on certain tax

positions. Absent these items, the effective six month income tax rates for 2010 and 2009 were 28.5% and 29.5%, respectively. The decrease in the adjusted rate to 28.5% for the six months ended June 27, 2010 from the full year 2009 adjusted rate of 29.0% is primarily due to a change in the mix of the tax jurisdictions where the Company expects to earn its profits.

OTHER INFORMATION

-----

Historically, the Company's revenue pattern has shown the second half of the year to be more significant to its overall business than the first half. Although the Company expects that this concentration will continue, particularly as more of its business shifts to larger customers with order patterns concentrated in the second half of the year, this concentration may be less in years when the Company has products related to one or more major motion picture releases that occur in the first half of the year. In 2010 the Company had significant sales of products related to the movie release of *IRON MAN 2* in May 2010. In 2009 the Company had products related to the mid-year major motion picture releases of *TRANSFORMERS: REVENGE OF THE FALLEN*, *GI JOE: THE RISE OF COBRA* and *X-MEN ORIGINS: WOLVERINE*. The concentration of sales in the second half of the year increases the risk of (a) underproduction of popular items, (b) overproduction of less popular items, and (c) failure to achieve compressed shipping schedules.

The toy and game business is characterized by customer order patterns which vary from year to year largely because of differences each year in the degree of consumer acceptance of product lines, product availability, marketing strategies and inventory policies of retailers, the dates of theatrical releases of major motion pictures for which we have product licenses, the timing of television entertainment and changes in overall economic conditions. As a result, comparisons of our unshipped orders on any date with those at the same date in a prior year are not necessarily indicative of our expected sales for that year. Moreover, quick response inventory management practices result in fewer orders being placed significantly in advance of shipment and more orders being placed for immediate delivery. Unshipped orders at June 27, 2010 and June 28, 2009 were approximately \$921,300 and \$712,600, respectively. It is a general industry practice that orders are subject to amendment or cancellation by customers prior to shipment. The backlog of unshipped orders at any date in a given year can also be affected by programs that we may employ to incent customers to place orders and accept shipments early in the year. These programs follow general industry practices.

In June 2009 the Financial Accounting Standards Board ( FASB ) revised accounting standards related to the transfer of financial assets. These revisions seek to improve the relevance, representational faithfulness, and comparability of the information that a reporting entity provides in its financial statements about a transfer of financial assets; the effects of a transfer on its financial position, financial performance, and cash flows; and a transferor's continuing involvement, if any, in transferred financial assets. These revisions also eliminate the concept of a qualifying special-purpose entity, and require such entities to be evaluated for consolidation in accordance with the applicable consolidation guidance. The requirements of these revised accounting standards are effective for fiscal years and interim periods beginning after November 15, 2009. As a result of the adoption of these new accounting standards in 2010, the Company will account for any sales of accounts receivable under its securitization facility in 2010 as collateralized borrowings. The accounts receivable balances will remain on the Company's balance sheet and proceeds from the sales of the receivables will be recorded as short-term debt. The adoption of these standards did not have a material impact on the

Company's consolidated balance sheet or statement of operations.

In January 2010 the FASB revised accounting standards related to fair value measurements to expand disclosure requirements to include significant transfers of assets and liabilities in and out of Level 1 and Level 2 fair value measurements and the reasons for those transfers, as well as a gross presentation of purchases, sales, issuances and settlements within the rollforward of changes in Level 3 assets and liabilities. The revised standards also provide clarification to existing fair value disclosure requirements related to the level of disaggregation and disclosure about inputs and valuation techniques. The majority of the requirements of these revised accounting standards were effective and adopted by the Company in the first quarter of 2010 and had no impact on the consolidated balance sheet or results of operations. Certain requirements related to the gross presentation of activity in the rollforward of changes in Level 3 assets and liabilities will become effective for fiscal years beginning after December 15, 2010 and for interim reporting periods within those fiscal years.

The Company's earnings release for the second quarter of 2010, dated July 19, 2010, contained a condensed consolidated balance sheet as of June 27, 2010. Subsequent to that date, the Company has reclassified approximately \$18,800 of television programming assets, resulting in a decrease of other current assets and an increase in other assets, as it believes this classification is the more appropriate presentation.

**LIQUIDITY AND CAPITAL RESOURCES**

-----

The Company has historically generated a significant amount of cash from operations. In 2009 the Company funded its operations and liquidity needs primarily through cash flows from operations, and, when needed, using borrowings under its available lines of credit and proceeds from its accounts receivable securitization program. During the first six months of 2010, the Company has continued to fund its working capital needs primarily through cash flows from operations and, when needed, using borrowings under its available lines of credit. The Company believes that the funds available to it, including cash expected to be generated from operations and funds available through its available lines of credit and accounts receivable securitization program are adequate to meet its working capital needs for the remainder of 2010. However, unexpected events or circumstances such as material operating losses or increased capital or other expenditures may reduce or eliminate the availability of external financial resources. In addition, significant disruptions to credit markets may also reduce or eliminate the availability of external financial resources. Although we believe the risk of nonperformance by the counterparties to our financial facilities is not significant, in times of severe economic downturn in the credit markets it is possible that one or more sources of external financing may be unable or unwilling to provide funding to us.

In March 2010 the Company issued \$500,000 in aggregate principal amount of Notes that are due in 2040 (the "Notes"). The Notes bear interest at a rate of 6.35%. The Company may redeem the Notes at its option at the greater of the principal amount of the Notes or the present value of the remaining scheduled payments discounted using the

effective interest rate on applicable U.S. Treasury bills at the time of repurchase. The proceeds from the issuance of the Notes are expected to be used primarily to repurchase an equivalent number of shares resulting from the conversion of the Company's contingent convertible debentures.

**(Thousands of Dollars and Shares Except Per Share Data)**

Because of the seasonality in the Company's cash flow, management believes that on an interim basis, rather than discussing only its cash flows, a better understanding of its liquidity and capital resources can be obtained through a discussion of the various balance sheet categories as well. Also, as several of the major categories, including cash and cash equivalents, accounts receivable, inventories and short-term borrowings, fluctuate significantly from quarter to quarter, again due to the seasonality of its business, management believes that a comparison to the comparable period in the prior year is generally more meaningful than a comparison to the prior quarter or prior year-end.

Net cash provided by operating activities in the first six months of 2010 was \$173,029 compared to net cash utilized of \$179,868 in the first six months of 2009. Net cash provided in 2010 as compared to net cash utilized in 2009 primarily reflects increased collections of accounts receivable as a result of higher sales in the fourth quarter of 2009 as compared to the fourth quarter of 2008, and because the Company did not utilize the securitization program at December 27, 2009 compared to a utilization of \$250,000 of the securitization program at December 28, 2008. In addition, net cash utilized in the first six months of 2009 includes a \$50,000 guaranteed advance royalty payment to Marvel related to the extension of the current agreement.

Accounts receivable increased to \$663,484 at June 27, 2010 from \$652,557 at June 28, 2009. The accounts receivable balance at June 27, 2010 includes a decrease of approximately \$9,900 as a result of a stronger U.S. dollar at June 27, 2010 as compared to June 28, 2009. The increase in accounts receivable reflects the utilization of the Company's securitization program at June 28, 2009 of approximately \$85,100. At June 27, 2010, based on the Company's cash position and liquidity needs, there was no utilization of the securitization program. Days sales outstanding were 81 days at June 27, 2010 compared to 74 days at June 28, 2009. Absent the impact of securitization, days sales outstanding at June 28, 2009 would have been 84 days. The decrease in days sales outstanding, absent the impact of securitization, is primarily due to the timing of sales and collections during the 2010 quarter as compared to 2009.

Inventories decreased to \$342,113 at June 27, 2010 from \$346,814 at June 28, 2009. The inventory balance at June 27, 2010 includes a decrease of approximately \$5,800 as a result of a stronger U.S. dollar at June 27, 2010 as compared to June 28, 2009. Absent this impact of foreign exchange, inventories increased slightly.

Prepaid expenses and other current assets decreased to \$201,962 at June 27, 2010 compared to \$210,824 at June 28, 2009. The decrease primarily relates to lower prepaid royalties, primarily related to utilization of the MARVEL advance. The decrease in prepaid expenses and other current assets was partially offset by an increase in the fair value of the Company's foreign currency forward contracts and increases in short-term investments of \$14,000.

Accounts payable and accrued expenses increased to \$646,223 at June 27, 2010 from \$600,765 at June 28, 2009. Increased accounts payable and accrued share repurchases were partially offset by decreased accrued royalties, primarily resulting from decreased sales of TRANSFORMERS, G.I. JOE and STAR WARS products, as well as decreased accruals related to employee benefit plans.

**(Thousands of Dollars and Shares Except Per Share Data)**

Collectively, property, plant and equipment and other assets at June 27, 2010 increased by \$17,895 from June 28, 2009. The increase primarily reflects an increase in other long-term assets, including increased deferred taxes as a result of the reclassification to shareholders' equity of a long-term deferred tax liability (previously netted against long-term deferred tax assets for financial reporting) related to the Company's convertible debt, increased prepaid royalty advances as a result of a \$25,000 guaranteed royalty payment to the Discovery joint venture in the third quarter of 2009, and capitalized costs related to television programming. In addition, during the fourth quarter of 2009 the Company entered into a series of interest rate swap agreements to adjust the amount of debt subject to fixed interest rates. At June 27, 2010, these contracts had a fair value of \$12,085, which was included in other assets. These increases were partially offset by a decrease in intangible assets as a result of amortization expense over the twelve months ended June 27, 2010.

Net cash utilized by investing activities was \$50,625 in the first six months of 2010 compared to \$427,670 in the first six months of 2009. Additions to property, plant and equipment were \$49,689 in 2010 compared to \$51,538 in 2009. The 2009 utilization also includes the Company's \$300,000 payment to Discovery for its 50% interest in the joint venture, a payment of \$45,000 to Lucas to extend the term of the license agreement related to the STAR WARS brand and approximately \$26,300 used to acquire certain other intellectual properties.

Net cash provided by financing activities was \$119,991 in the first six months of 2010 compared to \$370,545 in the first six months of 2009. The 2010 cash provided reflects net proceeds of \$492,528 from the issuance of long-term notes in March 2010. The 2009 cash provided reflects net proceeds of \$421,309 from the issuance of long-term notes in May 2009. Proceeds from stock option transactions increased to \$39,431 in the six months ended June 27, 2010 compared to \$1,396 in the six months ended June 28, 2009, reflecting increased stock option exercises attributed to the overall higher Company stock price during the first six months of 2010 compared to the first six months of 2009. Dividends paid were \$64,118 in 2010 compared to \$55,823 in 2009, reflecting the recent increase in the Company's dividend rate to \$0.25 per share from \$0.20 per share. Cash payments related to purchases of the Company's common stock were \$352,063 in the first six months of 2010. There were no repurchases of the Company's common stock in the first six months of 2009. At June 27, 2010, the Company had \$417,525 remaining available under its \$625,000 share repurchase authorization.

The Company has a revolving credit agreement (the "Agreement"), which provides it with a \$300,000 committed borrowing facility through June 2011. The Company has the ability to request increases in the committed facility in additional increments of at least \$50,000, subject to lender agreement, up to a total committed facility of \$500,000. The agreement contains certain financial covenants setting forth leverage and coverage requirements, and certain other limitations typical of an investment grade facility, including with respect to liens, mergers and incurrence of indebtedness. The Company was in compliance with all covenants as of and for the quarter ended June 27, 2010. The Company had no borrowings outstanding under its committed revolving credit facility at June 27, 2010. However, the Company had letters of credit outstanding under this facility of approximately \$1,400 at June 27, 2010. Amounts

available and unused under the committed line at June 27, 2010 were approximately \$298,600. The Company also has other uncommitted lines from various banks, of which approximately

**(Thousands of Dollars and Shares Except Per Share Data)**

\$39,600 was utilized at June 27, 2010. Of the amount utilized under the uncommitted lines, approximately \$10,600 and \$29,000 represent outstanding borrowings and letters of credit, respectively.

The Company is party to an accounts receivable securitization program whereby the Company sells, on an ongoing basis, substantially all of its U.S. trade accounts receivable to a bankruptcy remote special purpose entity, Hasbro Receivables Funding, LLC ("HRF"). HRF is consolidated with the Company for financial reporting purposes. The securitization program then allows HRF to sell, on a revolving basis, an undivided fractional ownership interest of up to \$250,000 in the eligible receivables it holds to certain bank conduits. The program provides the Company with a source of working capital. Based on the amount of eligible accounts receivable as of June 27, 2010, the Company had availability under this program to sell approximately \$106,214, of which no amounts were utilized.

The Company has principal amounts of long-term debt at June 27, 2010 of \$1,384,895 due at varying times from 2014 through 2040. The Company also had letters of credit and other similar instruments of approximately \$144,200 and purchase commitments of \$563,008 outstanding at June 27, 2010. Letters of credit and similar instruments include \$113,890 related to the defense of tax assessments in Mexico. These assessments relate to transfer pricing that the Company is defending and expects to be successful in sustaining its position.

At March 28, 2010, the Company had outstanding \$138,651 in principal amount of contingent convertible debentures due 2021. If the closing price of the Company's common stock exceeded \$23.76 for at least 20 trading days within the 30 consecutive trading day period ending on the last trading day of the calendar quarter, or upon other specified events, the debentures would have been convertible at an initial conversion price of \$21.60 in the next calendar quarter. At December 31, 2009 this conversion feature was met and the debentures were convertible during the first quarter of 2010. During the first quarter of 2010, holders of these debentures converted \$111,177 of these debentures which resulted in the issuance of 5,147 shares. In addition, if the closing price of the Company's common stock exceeded \$27.00 for at least 20 trading days in any 30 day period, the Company had the right to call the debentures by giving notice to the holders of the debentures. During a prescribed notice period, following a call by the Company the holders of the debentures had the right to convert their debentures in accordance with the conversion terms described above. As of March 28, 2010, the Company had the right to call the debentures. On March 29, 2010, as part of the Company's overall debt management strategy and in furtherance of its capital structure goals, the Company gave notice of its election to redeem in cash all of the outstanding debentures on April 29, 2010 at a redemption price of \$1,011.31 per \$1,000 principal amount, which was equal to the par value thereof plus accrued and unpaid cash interest through April 29, 2010. During the notice period, \$138,467 of the debentures were converted by the holders, resulting in the issuance of 6,410 shares of common stock. The remaining debentures were redeemed at a total cost of \$186, which included accrued interest through the redemption date.

Other contractual obligations and commercial commitments, as detailed in the Company's annual report on Form 10-K for the year ended December 27, 2009, did not materially change outside of payments made in the normal course of business and as otherwise set forth in this report, including the issuance of \$500,000 of long-term notes in March 2010 and the conversion and redemption of the Company's remaining contingent convertible debentures. The table of contractual obligations and commercial commitments, as detailed in the Company's annual report on Form 10-K for the year ended December 27, 2009, does not include certain tax liabilities recorded related to uncertain tax positions because the Company does not know the ultimate resolution of these liabilities and as such, does not know the ultimate timing of payments, if required, related to these liabilities. These liabilities were \$89,135 and \$96,004 at June 27, 2010 and June 28, 2009, respectively, and are included as a component of other liabilities in the accompanying consolidated balance sheets.

The Company believes that cash from operations, including the securitization facility, and, if necessary, its committed line of credit and other borrowing facilities, will allow the Company to meet these and other obligations listed.

**CRITICAL ACCOUNTING POLICIES AND SIGNIFICANT ESTIMATES**

-----

The Company prepares its consolidated financial statements in accordance with accounting principles generally accepted in the United States of America. As such, management is required to make certain estimates, judgments and assumptions that it believes are reasonable based on the information available. These estimates and assumptions affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses for the periods presented. The significant accounting policies which management believes are the most critical to aid in fully understanding and evaluating the Company's reported financial results include sales allowances, recoverability of goodwill and intangible assets, recoverability of royalty advances and commitments, pension costs and obligations, stock-based compensation and income taxes. These critical accounting policies are the same as those detailed in the Annual Report on Form 10-K for the year ended December 27, 2009.

**FINANCIAL RISK MANAGEMENT**

-----

The Company is exposed to market risks attributable to fluctuations in foreign currency exchange rates, primarily as the result of sourcing products priced in U.S. dollars, Hong Kong dollars and Euros while marketing those products in more than twenty currencies. Results of operations may be affected primarily by changes in the value of the U.S. dollar, Hong Kong dollar, Euro, British pound, Swiss franc, Australian dollar, Canadian dollar and Mexican peso and, to a lesser extent, currencies in Latin American and Asia Pacific countries.

**HASBRO, INC. AND SUBSIDIARIES**

**(Thousands of Dollars and Shares Except Per Share Data)**

To manage this exposure, the Company has hedged a portion of its forecasted foreign currency transactions for fiscal years 2010 through 2012 using foreign exchange forward contracts. The Company is also exposed to foreign currency risk with respect to its net cash and cash equivalents or short-term borrowing positions in currencies other than the U.S. dollar. The Company believes, however, that the on-going risk on the net exposure should not be material to its financial condition. In addition, the Company's revenues and costs have been, and will likely continue to be, affected by changes in foreign currency rates. A significant change in foreign exchange rates can materially impact the Company's revenues and earnings due to translation of foreign-denominated revenues and expenses. The Company does not hedge against translation impacts of foreign exchange. From time to time, affiliates of the Company may make or receive intercompany loans in currencies other than their functional currency. The Company manages this exposure at the time the loan is made by using foreign exchange contracts. Other than as set forth above, the Company does not hedge foreign currency exposures.

The Company reflects all derivatives at their fair value as an asset or liability on the balance sheet. The Company does not speculate in foreign currency exchange contracts. At June 27, 2010, these contracts had unrealized gains of \$54,583, of which \$34,480 are recorded in prepaid expenses and other current assets and \$20,103 are recorded in other assets. Included in accumulated other comprehensive income at June 27, 2010 are deferred gains, net of tax, of \$45,946, related to these derivatives.

At June 27, 2010, the Company had fixed rate long-term debt, excluding fair value adjustments, of \$1,384,895. Also at June 27, 2010, the Company had fixed-for-floating interest rate swaps with notional amounts of \$400,000. The interest rate swaps are designed to effectively adjust the interest rates on a portion of the Company's long-term debt from fixed to variable. The interest rate swaps are matched with specific long-term debt issues and are designated and effective as hedges of the change in the fair value of the associated debt. Changes in fair value of these contracts are wholly offset in earnings by changes in the fair value of the related long-term debt. At June 27, 2010, these contracts had a fair value of \$12,085, which was included in other assets, with a corresponding fair value adjustment to increase long-term debt.

**Item 4. Controls and Procedures.**

The Company maintains disclosure controls and procedures, as defined in Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934 (the "Exchange Act"), that are designed to ensure that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and that such information is accumulated and communicated to the Company's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. The Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures as of June 27, 2010. Based on the evaluation of these disclosure controls and procedures, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective.

The Company is currently in the process of a multi-year global initiative to upgrade its existing SAP system and implement enhanced global business practices. During the quarter ended June 27, 2010, the SAP upgrade was completed for the U.S. and Canada operations. There were no significant changes in the Company's internal controls over financial reporting resulting from the completion of this phase of the project. The next phase of this project is the implementation of the SAP upgrade in Europe, currently scheduled in 2011, along with enhanced global business practices in the Company's European business, including consolidation of various activities to improve efficiency.

There were no changes in the Company's internal control over financial reporting, as defined in Rule 13a-15(f) promulgated under the Exchange Act, during the quarter ended June 27, 2010, that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

## **PART II. OTHER INFORMATION**

### **Item 1. Legal Proceedings.**

The Company has outstanding tax assessments from the Mexican tax authorities relating to the years 2000, 2001, 2002, 2003 and 2004. These tax assessments, which total approximately \$136 million in aggregate (including interest, penalties, and inflation updates), are based on transfer pricing issues between the Company's subsidiaries with respect to the Company's operations in Mexico. The Company has filed suit in the Federal Tribunal of Fiscal and Administrative Justice in Mexico challenging the 2000 through 2003 assessments. The Company filed the suit related to the 2000 and 2001 assessments in May 2009; the 2002 assessment in June 2008; and the 2003 assessment in March 2009. The Company is challenging 2004 assessment through administrative appeals. The Company expects to be successful in sustaining its positions for all of these years. However, in order to challenge the outstanding tax assessments related to 2000 through 2003, as is usual and customary in Mexico in these matters, the Company was required to either make a deposit or post a bond in the full amount of the assessments. The Company elected to post bonds and accordingly, as of June 27, 2010, bonds totaling approximately \$114 million (at June 27, 2010 exchange rates) have been posted related to the 2000, 2001, 2002 and 2003 assessments. These bonds guarantee the full amounts of the outstanding tax assessments in the event the Company is not successful in its challenge to them. The Company does not currently expect that it will be required to make a deposit or post a bond related to the 2004 assessment.

We are currently party to certain other legal proceedings, none of which we believe to be material to our business or financial condition.

### **Item 1A. Risk Factors.**

This Quarterly Report on Form 10-Q contains forward-looking statements, within the meaning of the Private Securities Litigation Reform Act of 1995, concerning management's expectations, goals, objectives, and similar matters. These statements may be identified by the use of forward-looking words or phrases such as "anticipate," "believe," "could," "expect," "intend," "look forward," "may," "planned," "potential," "should," "will," and "would" or any variations of words with similar meanings. These forward-looking statements are inherently subject to known and unknown risks and uncertainties.

The Company's actual results or experience may differ materially from those expected or anticipated in the forward-looking statements. The Company has included, under Item 1A. of its Annual Report on Form 10-K, for the year ended December 27, 2009 (the "Annual Report"), a discussion of factors which may impact these forward-looking statements. In furtherance, and not in limitation, of the more detailed discussion set forth in the Annual Report, specific factors that might cause such a difference include, but are not limited to:

the Company's ability to successfully re-imagine, re-invent and re-ignite its existing products and product lines to maintain and further their success and to successfully introduce new products and product lines which achieve and sustain interest from retailers and consumers;

the Company's ability to manufacture, source and ship new and continuing products in a timely and cost-effective basis and customers' and consumers' acceptance and purchase of those products in quantities and at prices that will be sufficient to profitably recover development, manufacturing, marketing, royalty and other costs;

recessions or other economic downturns which can negatively impact the retail and credit markets, and the financial health of the Company's retail customers and consumers, and which can result in lower employment levels, less consumer disposable income, lower consumer confidence and, as a consequence, lower consumer spending, including lower spending on purchases of the Company's products;

other economic and public health conditions in the various markets in which the Company and its customers and suppliers operate throughout the world, which impact the Company's ability and cost to manufacture and deliver products, such as higher fuel and other commodity prices, higher labor costs, higher transportation costs, outbreaks of diseases which affect public health and the movement of people and goods, and other factors, including government regulations, which can create potential manufacturing and transportation delays or impact costs;

currency fluctuations, including movements in foreign exchange rates, which can lower the Company's net revenues and earnings, and significantly impact the Company's costs;

the concentration of the Company's customers;

the Company's ability to generate sales during the fourth quarter, particularly during the relatively brief holiday shopping season, which is the period in which the Company derives a substantial portion of its revenues and earnings;

the inventory policies of the Company's retail customers, including the concentration of the Company's revenues in the second half and fourth quarter of the year, together with the increased reliance by retailers on quick response inventory management techniques, which increases the risk of underproduction of popular items, overproduction of less popular items and failure to achieve compressed shipping schedules;

work stoppages, slowdowns or strikes, which may impact the Company's ability to manufacture or deliver product in a timely and cost-effective manner;

concentration of manufacturing of many of the Company's products in the People's Republic of China and the associated impact to the Company of health conditions and other factors affecting social and economic activity in China, affecting the movement of people and products into and out of China, impacting the cost of producing products in China and the cost of exporting them to the Company's other markets or affecting the exchange rates for the Chinese Renminbi, including, without limitation, the impact of tariffs or other trade restrictions being imposed upon goods manufactured in China;

greater than expected costs, or unexpected delays or difficulties, associated with the Company's investment in its joint venture with Discovery Communications, LLC, the rebranding of the joint venture network and the creation of new programming content to appear on the network, including greater than expected costs, or unexpected delays or difficulties, related to the creation of Hasbro Studios LLC and Hasbro Studios' efforts to develop programming, including programming to appear on the joint venture network;

consumer interest in and acceptance of the joint venture network, the programming appearing on the network, products related to the network's programming, and other factors impacting the financial performance of the joint venture;

consumer interest in and acceptance of programming and entertainment created by Hasbro Studios, as well as products related to Hasbro Studios' programming and entertainment;

the ability of the Company to hire and retain key officers and employees who are critical to the Company's success;

the costs of complying with product safety and consumer protection requirements worldwide, including the risk that greater regulation in the future may increase such costs, may require changes in the Company's products and/or may impact the Company's ability to sell some products in particular markets in the absence of making changes to such products;

the risk that one of the Company's third-party manufacturers will not comply with applicable labor, consumer protection, product safety or other laws or regulations, or with aspects of the Company's Global Business Ethics Principles, and that such noncompliance will not be promptly detected, either of which

could cause damage to the Company's reputation, harm sales of its products and potentially create liability for the Company;

.

an adverse change in purchasing policies or the bankruptcy or other lack of success of one or more of the Company's significant retailers comprising its relatively concentrated retail customer base, which could negatively impact the Company's revenues or bad debt exposure;

.

the risk that the market appeal of the Company's licensed products will be less than expected or that sales revenue generated by these products will be insufficient to cover the minimum guaranteed royalties;

.

the risk that the Company may face product recalls or product liability suits relating to products it manufactures or distributes; which may have significant direct costs to the Company and which may also harm the reputation of the Company and its products, potentially harming future product sales;

.

the impact of competition on revenues, margins and other aspects of the Company's business, including the ability to secure, maintain and renew popular licenses and the ability to attract and retain employees in a competitive environment;

.

the risk that anticipated benefits of acquisitions may not occur or be delayed or reduced in their realization;

.

the Company's ability to obtain and enforce intellectual property rights both in the United States and other worldwide territories;

.

the risk that any litigation or arbitration disputes or regulatory investigations could entail significant expense and result in significant fines or other harm to the Company's business;

.

the Company's ability to maintain or obtain external financing on terms acceptable to it in order to meet working capital needs;

.

the risk that one or more of the counterparties to the Company's financing arrangements may experience financial difficulties or otherwise be unable or unwilling to allow the Company to access financing under such arrangements;

the Company's ability to generate sufficient available cash flow to service its outstanding debt;

restrictions that the Company is subject to under its credit agreement;

unforeseen circumstances, such as severe softness in or collapse of the retail environment that may result in a significant decline in revenues and operating results of the Company, thereby causing the Company to be in non-compliance with its debt covenants and the Company being unable to utilize borrowings under its revolving credit facility, a circumstance likely to occur when operating shortfalls would result in the Company being in the greatest need of such supplementary borrowings;

market conditions, third party actions or approvals, the impact of competition and other factors that could delay or increase the cost of implementation of the Company's programs, or alter the Company's actions and reduce actual results;

the risk that the Company may be subject to governmental sanctions for failure to comply with applicable regulations

the risk that the Company's reported goodwill may become impaired, requiring the Company to take a charge against its income;

other risks and uncertainties as are or may be detailed from time to time in the Company's public announcements and filings with the SEC, such as filings on Forms 8-K, 10-Q and 10-K.

The Company undertakes no obligation to revise the forward-looking statements contained in this Quarterly Report on Form 10-Q to reflect events or circumstances occurring after the date of the filing of this report.

In February 2008 the Company's Board of Directors authorized the repurchase of up to \$500 million in common stock. This authorization was fully utilized in May 2010. In April 2010 the Board of Directors authorized the repurchase of an additional \$625 million in common stock. Purchases of the Company's common stock may be made from time to time, subject to market conditions. These shares may be repurchased in the open market or through privately negotiated transactions. The Company has no obligation to repurchase shares under the authorization, and the timing, actual number, and value of the shares that are repurchased will depend on a number of factors, including the price of the Company's stock. The Company may suspend or discontinue the program at any time and there is no expiration date.
